20. ABSTRACT (Continue on reverse side if necessary and identify by block number)

ARINC Research Corp. conducted an investigation to determine the feasibility of deploying off-the-shelf (OTS) electronic test equipment (ETE) at the general support (GS) maintenance level and to determine the "Best Mix of TMDE" required by GS units to support individual C-E systems and categories of C-E systems by a specific Military Occupatonal Specialty. In addition, data were compiled for use in updating maintenance allocation charts and in determining TMDE acquisition priorities for the TMDE Modernization Program.

FOREWORD

Under Contract DAAB07-78-A-6606/BG02, ARINC Research Corporation was tasked by the U.S. Army Communications and Electronics Materiel Readiness Command (CERCOM) to optimize the quantity and types of test, measurement, and diagnostic equipment (TMDE) required to support U.S. Army electronic systems at the general support level. The effort encompassed nine specific Military Occupational Specialties and more than 100 communications-electronics (C-E) systems. The contract was issued by the Electronics Procurement Branch of the Directorate of Procurement, at CERCOM, Fort Monmouth, New Jersey. This report presents the results of the contract effort.

ARINC Research Corporation wishes to acknowledge the invaluable assistance of Mr. Richard E. Pribyl of the Special Equipment Support Division, Directorate of Maintenance (CERCOM). We also wish to thank Mr. Eli J. Dworkin, Chief of the Special Equipment Support Division, and Mr. James A. Carter, Chief of the Electronics Equipment Support Division, for their interest and guidance during the project.

Finally, we wish to express our thanks to all of the U.S. Army commands and individuals who assisted in meeting the project objectives.

This report is presented in two volumes. Chapters One through Four and Appendixes A through C are presented in Volume I, and Appendixes D through G are presented in Volume II.

APPENDIX F

MAC TMDE NOT REQUIRED

This appendix lists all those TMDE specified in one or more of the MACs of the 101 C-E systems included in the project that were not specified as being required by at least one GS maintenance unit surveyed or by the best mix of TMDE.

APPENDIX G

NOT SPECIFIED TMDE AUTHORIZED AND ON HAND

This appendix lists the TMDE authorized and on hand at the five GS maintenance units surveyed that were not specified as being required to support any of the 101 C-E systems included in the project.
