A. Mission Description and Budget Item Justification

This program element provides funding for the development of systems that fulfill a portion of the third phase of the Ship Self Defense: Engage Hard Kill. Development in this line will focus on hard kill capabilities in which missiles are used to intercept incoming Anti-Ship Cruise Missiles (ASCM). ENGAGEMENT: Missile and system improvements necessary to meet their requirements are being addressed via NATO SEASPARROW Missile System (NSSMS) (0173), 5" Rolling Airframe Missile (RAM) (0167), Phalanx CIWS SeaRAM (9853A), Griffin and Spike missile (3342). Missile improvements include improved kinematic performance plus advanced seeker and low elevation fusing/warhead capability improvements. System improvements include incorporation of Phalanx detection capability into RAM system (SeaRAM), future concepts studies and self-destructing ammunition, and Future Phalanx Next Generation Improvements. New system developments include integration of Griffin missile into Patrol Craft (PC) and development of Spike missile system. Missile systems demonstration to include Javelin, Spike and Griffin to assess weapons effectiveness in a maritime environment.

Change Summary Explanation

FY 2011 Reprogramming increase provides funding for Cyclone Patrol Craft (PC) integration with Griffin Missile System (GMS) and DEMO of Javelin, Spike and Griffin.

FY 2013 increase provides funds for Evolved Sea Sparrow Missile BLK1 (ESSM) Test, ESSM BLK 1 integration into SSDS MK2 upgrade on LHDs, risk reduction efforts for ESSM BLK 2, and Stalker Long Range Electro Optic (EO)/Infra Red (IR)/Laser Range Finder (LRF) System. Funding also increased for Cyclone Patrol Craft (PC) integration with Griffin Missile System (GMS) and development of Spike Missile System to support a CENTCOM requirement.

A. Mission Description and Budget Item Justification

The purpose of this program is to develop a surface-to-air self-defense system utilizing a dual mode, passive Radio Frequency/Infrared 5" RAM. The baseline system (Block 0) provides a self-defense capability against active radar-guided anti-ship missiles and was developed on an equal cost share basis with the Government of the Federal Republic of Germany. The RAM Block 1 provides a capability against passive anti-ship missiles, very low altitude missiles, and maneuvering missiles through the incorporation of an infrared all-the-way mode seeker and improved fuze. The RAM Block 1 MOD 3 upgrade program, which provides an additional capability against helicopters, aircraft and surface craft, is a Cooperative requirement of the U.S. and Federal Republic of Germany agreed to in a Memorandum of Agreement (MOA) signed by both parties. FY 2011-2017 funding continues development and testing of a Block 2 upgrade to the RAM. This upgrade will allow RAM to regain battle space lost to emerging, more maneuverable ASCM threats. This system is designed to counter anti-ship cruise missile raids and other threats to provide for ship survivability with accurate terminal guidance, proven lethality, and no shipboard post launch dependence.

A. Mission Description and Budget Item Justification

This project encompasses three (5) primary efforts to enhance ship self defense:

1. Evolved SEASPARROW Missile (ESSM): A cooperative effort among 10 NATO SEASPARROW Nations and the U.S., to improve the capability of the SEASPARROW Missile to counter the low altitude, highly maneuverable Anti-Ship Cruise Missile (ASCM) threat. The program consists of evolving the SEASPARROW Missile through the development of a new rocket motor with tail control; thrust vector control and ordnance (warhead) upgrade; modifications to the MK 41 Vertical Launch System (VLS) to fire from a single cell with 4 ESSM (QuadPack); and modifications to the NSSMS to provide ESSM capability.
2. NATO SEASPARROW - MK 91 Rearchitecture: The MK 91 Rearchitecture Program integrates NSSMS into the Ship Self Defense System (SSDS) Architecture to provide ship missile defense utilizing an open architected system Technical Design Agent.
3. NATO SEASPARROW Objective Configuration (OC). The OC Program consists of segmenting and automating the existing MK 57 NSSMS radars (MK 9 Track illuminator System) and launchers (MK 29 Guided Missile Launching System). The program eliminates all MK 57 watch stations, reduces the required system hardware.
4. STALKER LONG RANGE Electro Optic(EO)/Infra Red (IR)/Laser Range Finder (LRF) SYSTEM: Detects, acquires, classifies, identifies and determines intent of conventional, asymmetrical and advanced threats supporting Anti-Air Warfare (AAW), Anti-Surface Warfare (ASUW), Anti-terrorism/Force Protection (AT/FP) and Global War on Terrorism. Long Range Visible/Infra Red Sensors and Laser Range Finder provide multi-spectral target imagery and accurate range data in non-benign environments. Classification to the horizon, visual resolution of 1ft @ 10 nm and range resolution/rate within 1 ft/1kt/nm.
5. ESSM Block 2 Risk Reduction: ESSM Block 2 upgrade is a cooperative effort between U.S Navy and NATO SEASPARROW Consortium Nations. ESSM Block 2 upgrade replaces the largely obsolete guidance section with a dual mode Active/Semi-Active X-Band seeker capable of defeating future threat capabilities within the existing envelope, including; smaller signatures, increased raid sizes, and adverse environments including countermeasures. Threat types include; advanced Anti-Ship Cruise Missile (ASCM)s, Anti-Ship Ballistic Missiles (ASBMs), surface and asymmetrical.

A. Mission Description and Budget Item Justification

PEO IWS 3.0 established a new program office IWS 3S for Surface Missions which is primarily focused on developing and delivering Counter-Swarm Small Boat defense capabilities for the Surface Fleet. IWS 3S has three (3) efforts supporting this mission area listed below:

1. Rapid Deployment Capabilities (RDCs):
- Cyclone Patrol Craft (PC) with Griffin Missile System (GMS)
2. DEMO (Javelin-Spike-Griffin)
3. NAWC China Lake Spike Shoulder Launched Missile System

B. Accomplishments/Planned Programs (\$ in Millions, Article Quantities in Each)

	FY 2011	FY 2012	FY 2013
<p>Title: Cyclone Patrol Craft (PC) with Griffin Missile System (GMS)</p> <p style="text-align: right;">Articles:</p> <p>FY 2011 Accomplishments: Preliminary system requirements determination, market research and team development.</p> <p>FY 2013 Plans: Complete lead PC design, develop training and logistics support, obtain safety approvals for system deployment and formulate the OCONUS AIT plan. Procurement planning for forward deployed PC hardware.</p>	17.000 0	-	8.100 0
<p>Title: DEMO (Javelin-Spike-Griffin)</p> <p style="text-align: right;">Articles:</p> <p>FY 2011 Accomplishments: Test planning, test article procuremeent, target allocation, range coordination and developed data collection plan.</p>	5.000 0	-	-
<p>Title: Spike Shoulder Launched Missile System</p> <p style="text-align: right;">Articles:</p> <p>FY 2013 Plans:</p>	-	-	22.677 0

• OPN/5421: <i>Griffin</i>	0.000	0.000	0.000	0.000	0.000	13.200	17.000	0.000	0.000	0.000	30.200

D. Acquisition Strategy
The RDC'S will use a sole contract via the U.S. Army Joint Program Office to procure in production Griffin B Block II Missles. In addition, the NSWC DD Battle Management System (BMS) will be integrated as the Weapon Control and Launcher Control System. IWS 3L will support 3S in developing and delivering launchers with gas management systems.
China Lake will develop a shoulder launcher for Spike missile.

E. Performance Metrics
Successful completion of DT/OA for Griffin missile. Continued development of shoulder launcher and integration of Spike missile.
