Guide to Captured German Documents

Prepared under contract AF 18 (600-1) with

Personal views or opinions expressed or implied in this publication are not to be construed as carrying official sanction of the Department of the Air Force or the Air University.

Not to be reproduced in whole or in part without permission from Headquarters, Air University, Maxwell Air Force Base, Alabama.
The War Documentation Project (WDP) is being conducted under Air Force contract by the Bureau of Applied Social Research, Columbia University. It is a major research activity of the Psychological Warfare Directorate of this Institute. Mr. Hans J. Epstein serves as Project Officer.

The War Documentation Project was conceived to answer a long-standing requirement for the systematic research exploitation of the vast masses of captured documents which came into the hands of the United States Government during and after World War II. The project was planned in two phases. Under Phase I the significant depositories of such documents were to be located and their contents surveyed and catalogued. Under Phase II the documentary holdings thus surveyed are to be exploited for systematic research, focusing on tasks in the psychological warfare and intelligence fields. Phase I was undertaken with the aid and support of the Department of the Army, the Department of the Navy, and the Department of State. This phase was completed in June 1952, and Phase II was initiated soon afterwards.

The present volume is to be regarded as a by-product of Phase I. The collection and publication of this guide was not originally contemplated or called for in the contract, but as the work of the WDP staff progressed towards its prescribed goal, the information here assembled was accumulated.

For a long time scholars and researchers have been contributing to the efforts of the Armed Forces of our country. In doing so, their professional identity has been sacrificed to the anonymity demanded by security restriction. It is with very real satisfaction, therefore, that the United States Air Force makes available a volume which primarily meets scholarly needs, although it results from a governmental research undertaking of restricted scope and operationally defined focus.

I feel certain that the Guide to Captured German Documents will be but the first in a significant and useful series of publications produced by the War Documentation Project.

Preface

This Guide to captured German documents is the out-growth of efforts on the part of the War Documentation Project (WDP) to secure as accurate information as possible on the fate and location of freely accessible German documentary sources scattered by the fate of war. It should be noted that the term "captured documents" is used here not with its limited legal significance; the expression is applied, in a generalizing and abbreviating sense, to German materials which through capture, confiscation, purchase, donation, salvage, etc., were transferred to non-German control during or after World War II.

As more and more information on German documentary holdings outside Germany accumulated, it seemed useful to make a compilation of the data generally available. The difficulties encountered in collecting this information for the War Documentation Project itself—difficulties which have presumably confronted other organizations and individuals—greatly strengthened the intention of publishing this Guide.

The Guide has been prepared on a co-operative basis; several members of the staff of the WDP have made important contributions. The following staff members aided in collecting the information: Kurt DeWitt, Wilhelm Moll, Frances Mond, Hans Weil, and Earl Ziemke. Philip E. Mosely, Director of the Russian Institute, Columbia University, and Senior Consultant to the WDP, has been the principal advisor to the project since its inception; to his unflagging efforts and endeavors the WDP in general, and this, its first publication, in particular, owes a singular debt of gratitude. The task of putting some form into the material has benefited from the labors of exceedingly patient and devoted secretaries, Mrs. Jean S. Powell and Mrs. Margot W. Moll.

The bibliography owes much to the generous aid received from the administrations and staffs of several institutions. The cooperation of the Library of Congress; the National Archives; the Hoover Institute and Library; the Yiddish Scientific Institute (YIVO); the Centre de Documentation Juive Contemporaine; République Française, Présidence du Conseil, Comité d'Histoire de la Guerre; and the Netherlands State Institute for War-Documentation is gratefully acknowledged.

The willingness of the Air University to offer its publishing facilities for the printing of the Guide as War Documentation Project, (Research Memorandum Number 2, Vol. 1) has encouraged its preparation and is greatly appreciated.

General Introduction

At the end of World War II, documents of German Government agencies, military organizations, and political and private groups were scattered or destroyed in large numbers. No comprehensive survey of the surviving records and their location is available. No such survey is likely to become available for a long period of time. Little is known about the considerable quantity of German records which fell into the hands of Germany's eastern enemies; and probably a far greater quantity of documents is presently kept in various classified collections of Western Powers. The great importance of the German documents for research purposes, however, makes it very desirable that a preliminary survey of at least of the unrestricted German materials to be found in certain American, Dutch, English, and French depositories, be made accessible to government agencies and private scholars.

The War Documentation Project has attempted to bring together printed as well as hitherto unpublished information on captured, non-technical German documents. Therefore, on the one hand, an effort has been made to compile listings of books and periodicals containing either the text of captured German documents, citations of such documents in footnotes, or information concerning the location of document holdings (Parts I and II). On the other hand, the War Documentation Project has prepared or secured detailed listings of the German documents in the most important depositories, particularly the Library of Congress (Part III).

In all the listings, materials used in the war crimes and collaborationist trials have been omitted. Furthermore, only holdings of unclassified depositories are listed. This means that all documents mentioned in Part III are accessible to the general public, subject only to the internal regulations of the various depositories.

In their policy of territorial expansion under the Hitler regime, the Germans systematically confiscated German materials which have hitherto been neglected.

[The bibliographic listing of captured German documents has been appended to the bibliography. The listing of these documents in the bibliography does not, of course, imply any judgment by the War Documentation Project as to their authenticity. The bibliography should be regarded as a preliminary survey of such information as could be gathered within a relatively short period of time as a by-product of the principal task of the War Documentation Project. Under the circumstances, the preparation of an evenly analytical, detailed survey was impossible. The nature of the sources of some of the information and the differences in the manner and state of organization of the materials in the various depositories have resulted in a compilation which, unfortunately, is very uneven in its treatment of different aspects of the same subject. Supplementary and more accurate information is being sought, and it may be possible to issue corrections and additions. Recommendations by users for improvement of the Guide will be welcomed. The War Documentation Project will greatly appreciate receiving comments and suggestions and, particularly, more detailed information derived from research on holdings of the depositories covered by the Guide. Communications may be sent c/o Bureau of Applied Social Research, Columbia University, 427 West 117th Street, New York 27, N. Y.

Conceived solely as an aid to research, no other consideration than possible research value has determined the selection of references to hitherto unpublished documents or to publications containing information about captured German documents. It is hoped that the Guide will prove helpful to those whose research interests require use of German documents, and will stimulate greater utilization of important documentary materials which have hitherto been neglected.

Egon Merker, "Ehemalige deutsche Reichsarchive."
Brief listing of the fate of various large German archives.

The remainder of the archives of the Geheime Staatsarchiv, Berlin-Dahlem, is now in the Berliner Hauptarchiv, in Western Berlin. It includes:
- Reichsfinanzministerium, almost complete;
- Reichswirtschaftsministerium, some;
- Reichsministerium fuer Wissenschaft, Erziehung, und Volksbildung, some;
- Reichsministerium fuer Kirchliche Angelegenheiten, some;
- Volksgerichtshof, some;
- Reichskulturkammer, some.

The author states that there is almost no information on the fate of the former Heeresarchiv Wien. Some of the collection is believed to be in Russian hands; much was lost in the war.

The Russians obtained large parts of the files of the Reichspropagandaministerium, including the "Schneidendiens," which contained many of the most important files. The Russians are also supposed to have the files of the Reichspressekammer.

The Zentralarchiv der Deutschen Demokratischen Republik (Soviet Zone) in Potsdam has the files of the Deutsche Volkspartei, Deutschnationale Volkspartei, and the Stahlhelm.

The archives of the Sozialdemokratische Partei Deutschlands (SPD) and of the Marx-Engels-Archiv are in the International Institute for Social History, Amsterdam.

Depositories

The material in the following lists is not classified. The listings have, to a very large extent, been prepared by members of the staff of the War Documentation Project. Some of the identifications are still tentative and it is hoped that researchers making use of the materials will give additional information on them to the War Documentation Project as well as to the depository in which the material is located.

Anyone interested in using the documents listed here, or in securing photostats or microfilms, should communicate directly with the depository, not with the War Documentation Project.

Library of Congress gets the von Rohden Collection. The collection consists mainly of German Air Force and other German official records. In addition, there are manuscripts of members of the von Rohden project after the war on the history of the air war. Part of the original collection is in London and part at Maxwell Field. For further information see under the Aeronautics Division of the Library of Congress.

Section II—Main Collection

Sections of certain captured libraries have been accessioned directly into the main library holdings and can be located through the main catalog. These include books selected from the libraries of Gerdy Troost, Frank Himmler, and possibly Goebbels. Some parts of the Bibliothek (des Institutes!) zur Forschung der Judenfrage have been accessioned, one item is in the Manuscripts Division.

Books supplementing Library of Congress holdings from the library of Wehrkreiskommando XII have been accessioned; a list exists of the material originally in this library.

In addition, a large number of individual captured German items, classified by the Germans, have been accessioned into the main collection. These can be located only through the card catalog, particularly under the names of various German government agencies and military offices and units. For publications of various German government agencies concerning the occupied eastern territories between 1941 and 1945 look under the following entries:

1. Germany, Reichsministerium des Innern, Publikationsstelle Berlin-Dahlem; also Publikationsstelle Ost.

2. Reichsministerium fuer die besetzten Ostgebiete.

Section III—Film Division

(Care of Mr. James H. Culver, Custodian of the Motion Picture Collection, in the microfilm reading room.)

The library’s holdings can be divided into the following four groups:

1. Enemy alien films impounded by the United States at the outbreak of war. Under control of Allen Property Custodian.

2. German feature films, cultural subjects, amusement films, newsreels, and similar material.

3. German military training films, 35 mm. There is a great deal of duplication. This is the only part of an immense collection on which indexing work has been done. A listing is in the library.

4. About 100 cases of unopened 16 mm film.

See also Section I.

Section IV—Map Division

Germany, Beauftragter fuer den Vierjahresplan.

"Goering’s Atlas." Berlin, 1946. 33 colored maps. Maps outlining the raw material resources and industrial plants of primary importance to German war efforts, prepared by the Office of the Delegate for the Four Year Plan in the spring of 1944 on the basis of information for 1942 and 1943. The maps were put together in their present form by the American occupation authorities.

See also Section I.

Section V—Microfilm Section

There is no separate listing or guide to show what captured German material is here. A search of the card catalog under “Germany” revealed one film: No. 1228. Aside from clippings about July 20, 1944 and anti-Nazi pamphlets and letters, it contains a copy of a paper entitled:

"Abteilung fuer Militaerpolitik," September 1887. This seems to be a military intelligence report on a branch of the German Communist Party (KPD) of the above name.

Mainly Weimar period.

The Microfilm Section has a six-reel micro-
film copy of the Goebbels Diary for 1942-1943
in the Hoover Institute and Library.

Section VI—Aeronautics Division
The holdings can be divided into three parts:
1. The von Rohden collection.
   The originals of the von Rohden collection are partly in London and partly at
   Maxwell Air Force Base. The Aeronautics Division has a large part of the total
   collection on microfilm. The material covers all aspects of the Second World
   War and includes diplomatic as well as purely military and political material. An
   inventory of the LC microfilm which gives an inventory number and a very
   brief description of each item is kept in the stacks of the Aeronautics Division.

2. Books and periodicals.
   A considerable number of books and a large number of periodicals, largely for
   the war years, are in the stacks of the Aeronautics Division.

3. Unprocessed documents and materials from Wright Field. This is a very large
   mass of material, most of it of a technical nature and including some books. A
   part of the technical material is organized by type of plane, like Messerschmitt;
   there are intelligence reports on planes of various countries. All the important
   Allies are included. There are also:
   Reichsluftfahrtsministerium, statistical files.
   Reichswaffenministerium, Heereswaffen-
   sammlung, 1936, three folders.
   Reichswaffenministerium, Inspektion der
   Waffenschulen, 1927-1931, five folders.
   Freiwilligen, Kriegsministerium, General-
   Inspektion des Militäer-Verkehrswesens,
   1912-1918.
   Bayern, Staatsministerium des Aus-
   sern, air matters, 1932-1934, three folders.
   Regierung Niederbayern, Kammer des
   Innen, Verkehr mit Luftfahrzeugen,
   1912-1922.
   Bayern, Luftwaffe, two folders.
   Bayern, Akt der Koenigl. Inspektion
   des Militaer-Luftfahrwesens, 1917-
   1918.
   Bayern, Koenigliche Inspektion des
   Ingenieurkorps, 1915-1918.
   Propagandapics including captured
   Russian pictures.
   One folder of correspondence of the
   RLM with the Deutsche Waffen-
   stilltandskommission in Wiesbaden
   concerning demands to be made on
   the French, 1940-1941.
   Some envelopes of material, including
   Russian request for material from
   Germany, 1939-1940.
   "Bericht ueber den Besuch der russi-
   schen Luftfahrtskommission bei den
   Lizenzwerken des Motorbaues, 12
   Jan., 1940."

See also Section I.

Section VII—Rare Books Division
The Rare Books Division has the following
materials, mostly in unprocessed and uncata-
aloged form. The material is, however, shelved.
1. Hitler Library (in two parts, one called
   the Reichskanzlei library). Several hun-
   dred books, folios, and photograph al-
   bums from the Hitler library. Many
   books on art and architecture, mostly
   complimentary copies, the rest on a
   variety of current topics. Cataloging of
   these books has been started.
2. Eva Braun Library. Most of these books,
   which supposedly belonged to Eva
   Braun, are ascribed to her by mistake,
   as evidenced by various library stamps
   in them.
3. Literature, photographs, and photostats
   dedicated to Hitler.
4. Fine bindings and other items such as
   folios and a book register from the li-
   brary of Hermann Goering.
5. Some folios entitled Fuehrerankaufse,
   apparently pictures and other items
   purchased for Hitler.
6. A number of special books, presenta-
   tion volumes etc. from the Constantin
   von Neurath Collection.
7. A collection of posters, leaflets etc.
   from the Rehse-Archiv (Hauptarchiv
   der NSDAP).
8. There are a few miscellaneous items,
   including a presentation volume from
   the library of Heinrich Himmler.
9. Included with the Hitler library, but
   possibly not a part of it, is a set of
   "Die Alte Garde spricht." - a series of
   typed autobiographies of Nazi Party
   members, organized by Gau and bound
   into several volumes.
10. Small groups from the libraries of Strei-
    cher, Frank, Schwartz, Strasser.

Section VIII—Prints and Photographs
Division
The Prints and Photographs Division has a
very large number of items captured in
Germany such as
GUIDE TO CAPTURED GERMAN DOCUMENTS-REPOSITORIES

Parts of the Reihen collection.
Photograph collection of Hermann Goring.
Items from the Deutsche Arbeitsfront.
Photographs and pictures of and about the Hitler Youth, army, air force, Kraft durch Freude, NSDAP Volkswohlfahrt, etc.

All items or groups of items have been given numbers and cards for each number. These have been entered into a subject catalog (see under Germany) and a numerical catalog. The German materials are scattered through the numerical sequence.

A very useful guide is being published: "Selective Checklist of Prints and Photographs recently cataloged and made available for reference.

Three issues have appeared. Lots 2280-2294, 2295-2442, and 2443-2462. A fourth issue is in preparation. The highest number of a captured German lot in the numerical catalog is now No. 5774, but most of the important material will have been covered when the next issue appears. The cards in the division give slightly more complete information about each lot than the checklist. See also Section I.

The following excerpts from some of the lot numbers listed in the checklists of the Prints and Photographs Division will illustrate the nature of the holdings of this division and indicate how these have been chosen because of their importance, origin, or representative character. This is not a complete list. All lots are referred to and cataloged by number, and more information about each lot can be obtained from the card catalog of the division.

NATIONAL ARCHIVES OF THE UNITED STATES

The captured German documents in the National Archives will be found in the following Record Groups:

1. Record Group 242: World War II Collection of Seized Enemy Records. The German material in this Record Group consists of two main sections. First, there are pieces of the Heeresarchiv Potsdam. For these the War Records Section of the National Archives has made some listings of its own and the original German deposit records. In Appendix 1 this material is listed by the name of the German under which the material is grouped with the amount of material for each name indicated. In the second place, there is a group of miscellaneous materials. These are listed in some detail in Appendix 1, as no comprehensive listing has been prepared by the National Archives for this section.

The microfilm copy of German Foreign Ministry records, received from the Department of State, can be briefly described as consisting of 176 rolls of 35 mm. positive microfilm, dating from June 1914 to October 1918. YIDDISH SCIENTIFIC INSTITUTE—YIVO (NEW YORK)

I. Hauptamt Wissenschaft. (G 233-233.)
Amt Wissenschaftsbeobachtung und -Wertung in the office of Alfred Rosenberg as "Beauftragter des Fuehrers fuer die Uberwachung der gesamten geistigen und wissenschaftlichen Schulung der NSDAP."

This collection, the only complete one in the YIVO, is separated from the main collection (Ministry of Propaganda.) It has not been cataloged at all. It consists of about 12 folders, each containing about 300 pages. The folders and documents are in alphabetical order according to names of academic personnel, teachers, researchers, writers, etc.

Three separate folders contain documents pertaining to particular universities, scientific institutions, and academic conferences. The file containing the documents beginning with letters "A" is missing at the time of this report.

While most of the file in the alphabetical folders of the HAW consists of correspondence up to 20 pages, two files are outstanding by their mere quantity of pages, several hundred each, and by the degree of actual research that has gone into the preparation of the two files. The first is on the poet Stefan George and his circle, the second on Ludwig Klages and his followers.

II. The collection of documents of the Reich Ministry for Propaganda.

The collection of captured German documents in YIVO, besides the special collection "Hauptamt Wissenschaft", consists of about 70 folders. It has been cataloged by a member of the Institute.

The documents seem to stem mainly from the archives of the German Ministerium fuer Volksaufklarung und Propaganda, the Goebbels Ministry. None of the special collections is complete. On some territories of eastern Europe, e.g., the Baltic States, material is to be found than on Hungary or Bulgaria.

III. A volume, formerly the property of Kurt Daluege, entitled "Fire in the Reichstag Building, a collection of photographs." It contains eight different photographs of the "Guilty Man," van der Lubbe. 21 pictures of the halls in the Reichstag Building, showing damage and destruction due to the fire, four views of the hall where plenary sessions were held, and a series of other photographs, chiefly of objects found on van der Lubbe's person.

IV. A Reichssicherheitshaftamt (RSHA) file, concerning the assassination of the Deputy Reich Governor Reinhard Heydrich in Prague. This contains two volumes, with four sketches and 49 photographs showing a reconstruction of the crime, objects found, as well as photographs of the criminals and their alleged accomplices. In addition, there is a final report with six supplementary files on the activities of parachutists trained in England and on the measures taken to elucidate the crime. These concern short-wave messages by the parachutists, administrative and penal measures, use of the regular police, and reprisals against the town of Lidice. The file also contains verdicts of the military courts in Prague and Brno, also reports on the reaction of the Czech radio in London and the effect of these measures on the Czech population.

V. Eighty-two files containing newspaper clippings about Goebbels that appeared between 1931 and 1943. The files were kept by Goebbels himself and arranged according to periods and events.

VI. Documents relating to the withdrawal of citizenship from certain German subjects.

VII. Three secret, mimeographed, memoranda from the Statistische Reichsamt:
1. Die Entwicklung der Kriminalitaet im Deutschen Reich vom Kriegsbeginn bis Mitte 1943.
(German criminality statistics have been published in Wirtschaft und Statistik only up to June 30, 1940.)

VIII. Reichshauptamt des Innern, Der Sachverstandige fuer Rassenforschung (Expert for Racial Research, Reich Ministry of the Interior). One thousand seven hundred forty genealogical reports which mostly concern the descendants of the inter-related families of Mendelssohn and Itzig (Hitzig), and were probably collected with a view to bringing the family tree of the Mendelssohns up to date.

(Note: Items III-VI and VIII are excerpted from an article by Bruno Blau, in Wiener Library Bulletin, Vol. V (1951), No. 1-2, pp. 9).

INDEX

FOR THE USE of the index the following points should be kept in mind: The nature of the material covered by the Guide makes exhaustive subject indexing impossible. Thus, for instance, the Reiche-Archiv is a general source on many aspects of German and Nazi Party history, the Auswärtiges Amt for German foreign relations, and the Himmler Files for the organization and wide range of activities of the SS. It is essential that researchers interested in specific subjects look not only under the subject headings, but also under the names of those agencies whose files may contain relevant information.

Geographical terms are used in their English version. For German government and party agencies the official German titles are used, regardless of the form to be found in the text. All German government agencies are listed alphabetically, while those of the Nazi Party are grouped under the Party's German name. Under the heading "Germany," a detailed listing of German governmental, political, industrial, and private organizations has been compiled in order to provide a general survey of most of the material covered by the index.

The index is largely the work of Roger W. Nelson and Ralph Mavrogordato.
