SPRAYED METALLIC COATINGS FOR FERROUS METALS,
AN INTRODUCTORY BIBLIOGRAPHY

Compiled by
Richard W. H. Lee

April 1, 1964

2101 Constitution Avenue
Washington 25, D. C.
The Prevention of Deterioration Center operates with the support of the Army, Navy, and Air Force under contract between the National Academy of Sciences-National Research Council and the Office of Naval Research.

Consulting and advisory services are offered by the Center to U.S. military agencies and their contractors, and to other Federal Government organizations. A library of about 50,000 technical reports, journal articles, and patents on materiel deterioration and its prevention is maintained, and provides the basis for literature searches. Preparation of selected bibliographies on specific subjects in this field represents but one area of service the Center renders. Information regarding library loans, and other PDC services and publications will be furnished upon request.
