AIR FORCE SYSTEMS COMMAND
WRIGHT-PATTERSON AIR FORCE BASE, OHIO
NOTICES

When US Government drawings, specifications, or other data are used for any purpose other than a definitely related Government procurement operation, the Government thereby incurs no responsibility nor any obligation whatsoever, and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise, as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

Requests for copies of this report should be directed to either of the addresses listed below, as applicable:

Federal Government agencies and their contractors registered with Defense Documentation Center (DDC):

DDC
Cameron Station
Alexandria, Virginia 22314

Non-DDC users (stock quantities are available for sale from):

Chief, Input Section
Clearinghouse for Federal Scientific & Technical Information (CFSTI)
Sills Building
5285 Port Royal Road
Springfield, Virginia 22151

Organizations and individuals receiving reports via the Aerospace Medical Research Laboratories' automatic mailing lists should submit the addressograph plate stamp on the report envelope or refer to the code number when corresponding about change of address or cancellation.

Do not return this copy. Retain or destroy.

STANDARDIZATION OF SYMBOLS AND UNITS
FOR ENVIRONMENTAL RESEARCH

W. C. KAUFMAN, Lieutenant Colonel, USAF

Distribution of this document is unlimited.
FOREWORD

This report describes a suggested system of symbols and units for use in environmental research. It has been devised over a period of years in the Biothermal Branch, Environmental Medicine Division, Biomedical Laboratory, Aerospace Medical Research Laboratories, Wright-Patterson Air Force Base, Ohio, under project 7222, "Biophysics of Flight," task 722207, "Biophysics of Flight: Human Thermal Stress."

Publication of this report does not constitute Air Force approval of the report's findings or conclusions. It is published only for the exchange and stimulation of ideas.

J. W. HEIM, PhD
Technical Director
Biomedical Laboratory
Aerospace Medical Research Laboratories
ABSTRACT

A logical system of symbols to designate the widely accepted biological variables routinely measured in environmental research is described. Upper case letters are used for three major symbols of temperature, heat quantity, and rate of heat transfer. These are modified by upper case subscripts for physical variables and lower case subscripts for biological variables.
In a meeting called by the National Aeronautics and Space Administration (NASA) and held at NASA Manned Spacecraft Center, Houston, Texas, on 10 March 1966, representatives of the various research centers of NASA and the biological laboratories of the Air Force Systems Command agreed on the desirability of standardizing symbols and units commonly used in environmental research. In line with the system agreed upon many years ago by respiratory physiologists (ref 1) the following set of symbols is recommended.

Three major symbols will be used.

\[ T \] = temperature
\[ H \] = rate of heat transfer or production
\[ Q \] = heat quantity

Upper case subscripts will define physical variables.

\[ a \] = air
\[ w \] = wall
\[ r \] = radiant
\[ e \] = evaporative
\[ c \] = convective
\[ d \] = conductive
\[ db \] = dry bulb
\[ wb \] = wet bulb

Lower case subscripts will define physiological variables.

\[ r \] = rectal
\[ e \] = esophageal
\[ t \] = tympanic
\[ o \] = oral
\[ s \] = skin
\[ b \] = body
\[ m \] = metabolism

Preceding Page Blank
A dash above any symbol will indicate a mean value and Δ will indicate a change in a variable. Should it be desired, a dot above any symbol will indicate a time derivative.

\[ \bar{s} = \text{mean skin} \]
\[ \bar{b} = \text{mean body} \]
\[ \Delta T_r = \text{change in rectal temperature} \]

For metabolic or atmospheric designations those suggested by the Federation of American Societies for Experimental Biology should be used.

\[ \dot{V}_{O_2} \] = rate of oxygen consumption
\[ P_s \] = barometric pressure

A second subscript will be used, if necessary, to indicate the time of the observation.

i = initial
f = final

Examples:

\[ Q = H_s + H_c + H_b + H_f + H_m \]
\[ Q \] = quantity of heat
\[ H_s \] = radiative heat transfer
\[ H_c \] = convective heat transfer
\[ H_b \] = conductive heat transfer
\[ H_f \] = evaporative heat transfer
\[ H_m \] = metabolic heat production

\[ Q_b \] = quantity of body heat storage
\[ T_A \] = air temperature
\[ T_w \] = wall temperature
\( T_{mb} = \) wet bulb temperature
\( T_r = \) rectal temperature
\( T_e = \) esophageal temperature
\( T_t = \) tympanic temperature
\( T_o = \) oral temperature
\( T_{Si} = \) initial mean skin temperature
\( T_{Di} = \) final mean body temperature

Less universally accepted terms such as "effective" or "operative" temperature, "index of strain," "heart rate," etc., shall be defined in publication as necessary. Symbols used should be abbreviations or, in any event, clearly distinguished from those such as \( T_e \) (esophageal temperature) or \( T_o \) (oral temperature).

Units used in publications shall always be in the metric system. The author is well aware of the impact units such as the newton and the joule will have on biologists in general and particularly on those who are clinically oriented. However, in the interest of standardization and uniformity, the Systeme International d'Unites as agreed upon at the 1960 Eleventh General Conference on Weights and Measures (ref 2), is recommended to the courageous.

Instructions

1. ORIGINATING ACTIVITY: Enter the name and address
   of the contractor, subcontractor, grantee, Department of De-
   fense activity or other organization (corporate author) issuing
   the report.

2a. REPORT SECURITY CLASSIFICATION: Enter the over-
    all security classification of the report. Indicate whether
    "Restricted Data" is included. Marking is to be in accord-
    ance with appropriate security regulations.

2b. GROUP: Automatic downgrading is specified in DoD Direc-
    tive 5200.10 and Armed Forces Industrial Manual. Enter
    the group number. Also, when applicable, show that optional
    markings have been used for Group 3 and Group 4 as author-
    ized.

3. REPORT TITLE: Enter the complete report title in all
   capital letters. Titles in all cases should be unclassified.
   If a meaningful title cannot be selected without classifica-
   tion, show title classification in all capitals in parenthesis
   immediately following the title.

4. DESCRIPTIVE NOTES: If appropriate, enter the type of
   report, e.g., interim, progress, summary, annual, or final.
   Give the inclusive dates when a specific reporting period is
   covered.

5. AUTHOR(S): Enter the name(s) of author(s) as shown on
   or in the report. Enter last name, first name, middle initial.
   If military, show rank and branch of service. The name of
   the principal author is an absolute minimum requirement.

6. REPORT DATE: Enter the date of the report as day,
   month, year; or month, year. If more than one date appears
   on the report, use date of publication.

7a. TOTAL NUMBER OF PAGES: The total page count
    should follow normal pagination procedures, i.e., enter the
    number of pages containing information.

7b. NUMBER OF REFERENCES: Enter the total number of
    references cited in the report.

8a. CONTRACT OR GRANT NUMBER: If appropriate, enter
    the applicable number of the contract or grant under which
    the report was written.

8b. BC, & SubPROJECT NUMBER: Enter the appropriate
    military department identification, such as project number,
    subproject number, system numbers, task number, etc.

9a. ORIGINATOR'S REPORT NUMBER(S): Enter the of-
    ficial report number by which the document will be identi-
    fied and controlled by the originating activity. This number
    must be unique to this report.

9b. OTHER REPORT NUMBER(S): If the report has been
    assigned any other report numbers (either by the originator
    or by the sponsor), also enter this number(s).

10. VAILABILITY/LIMITATION NOTICES: Enter any lim-
    itations on further dissemination of the report, other than those
    imposed by security classification, using standard statements
    such as:

    (1) "Qualified requesters may obtain copies of this
        report from DDC."

    (2) "Foreign announcement and dissemination of this
        report by DDC is not authorized."

    (3) "U. S. Government agencies may obtain copies of this
        report directly from DDC. Other qualified DDC
        users shall request through...

    (4) "U. S. military agencies may obtain copies of this
        report directly from DDC. Other qualified users
        shall request through...

    (5) "All distribution of this report is controlled. Quali-
        fied DDC users shall request through...

If the report has been furnished to the Office of Technical
Services, Department of Commerce, for sale to the public, indi-
cate this fact and enter the price, if known.

11. SUPPLEMENTARY NOTES: Use for additional explana-
    tory notes.

12. SPONSORING MILITARY ACTIVITY: Enter the name of
    the departmental project office or laboratory sponsoring
    (paying for) the research and development. Include address.

13. ABSTRACT: Enter an abstract giving a brief and factual
    summary of the document indicative of the report, even though
    it may also appear elsewhere in the body of the technical
    report. If additional space is required, a continuation sheet shall
    be attached.

It is highly desirable that the abstract of classified reports
be unclassified. Each paragraph of the abstract shall end with
an indication of the military security classification of the in-
formation in the paragraph, represented as (TS), (S), (C), or (U).

There is no limitation on the length of the abstract. How-
ever, the suggested length is from 150 to 225 words.

14. KEY WORDS: Key words are technically meaningful terms
    or short phrases that characterize a report and may be used as
    index entries for cataloging the report. Key words must be
    selected so that no security classification is required. Identi-
    fiers, such as equipment model designation, trade name, military
    project code name, geographic location, may be used as key
    words but will be followed by an indication of technical con-
    text. The assignment of links, rules, and weights is optional.
