INTRODUCTION

This bibliography is intended to provide background reading for a study performed by IDA for the Office of Research of the Urban Mass Transportation Administration of the U.S. Department of Transportation. In keeping with the focus of the IDA Study, S-351, Intra-Airport Transportation Systems: An Examination of Technology and Evaluation Methodology, a survey of documents and articles was made to help identify current data and studies relating to air travel demand projections, alternative airport configurations, flow patterns and rates, and available or potential ground transportation concepts, systems, and components. This bibliography covers the subject areas up to August 1969.
1. A Digest and Assessment of Air Travel Forecasting Techniques, Ralph A. Calderone, Institute of Transportation and Traffic Engineering, California Univ. Berkeley, 1967.
