INTRODUCTION

This directory is an integration of references to sources of information and data bases dealing with education and training in the military services, academia, government, and commercial sources. It is a guide to the location, content, and means of access to these sources of information.

The material contained in this report is intended to be of assistance to training managers, decision makers, operating personnel, and researchers in accomplishing their assigned tasks. For the newcomer to the Naval Education and Training Command (NAVEDTRACOM), the Directory is also a rapid source of orientation to training and related management information systems in the Navy and other military services.

ORGANIZATION OF THE DIRECTORY

The content of the directory is organized into several major groupings including Academic (ACAD 000), United States Army (ARMY 000), Commercial (COMM 000), Foreign (FRNG 000), United States Navy (GNAV 000), Government (GOVT 000), Under Development (UNDV 000), and United States Air Force (USAF 000). Each of the abstracts is identified in the table of contents by title and by unique numbered code as indicated above. Abstracts dealing with particular topics are indicated in the KEYWORD DIRECTORY section.

Abstracts are grouped by keywords which appeared in the Title, Scope, or Description. The user will have to determine the appropriateness of abstract content for specific applications.

SYSTEM DESCRIPTION

The data management system used for the directory is an interactive system which has been implemented on a WANG 2200 MVP series computer. The system uses 59K of the available 256K bytes of memory and 5 megabytes of online disk storage. This system allows for update of information, expansion of the data base and processing of special keyword searches.
The reader is cautioned that the information contained in each abstract is subject to change. The information given for each entry represents that which was available to the authors at the time of writing. We have elected to include any reference which seems to be relevant to the purpose of the directory regardless of the amount of detail available.

Suggestions for the correction, addition or deletion of entries or improvement of the directory are invited. All suggestions or inquiries should be directed to:

Ganser Library
Millersville, PA 17551

Company Phone:
717-872-5411

Name of Point of Contact:
ERMA D. KEYES (DIR)

Phone Number of Point of Contact:
717 872-5411

Description of the System:
Systematic collection, documentation, retrieval, and dissemination of data to all persons in PA involved with vocational, tech, and continuing education programs. The core of the information bank is the ERIC microfiche collection, supplemented by resources of other state and national centers. VEIN provides information on articles of interest to specific user groups, directed selectively to those groups; its staff responds to questions and fulfills specific document requests that are directed to VEIN.

Scope or Subjects Covered:
All educational topics, with emphasis on career and vocational education. A VEIN subject search can result in the delivery of bibliographies, resumes, or abstracts of documents, with microfiche to be the preferred transmittal form. User workshops or institutes will be announced each year for target groups. Files of resource persons and programs will be developed.

Input or Source of Data:

How to Access the Data:
See primary contact

Availability of the Data:
See primary contact.

Cost and Format:
ERIC collection is held as microfiche; reprints of documents can be supplied as 4 by 6 inch microfiche with negative duplicates. Microreproduction service is free of charge. Services are available free of charge to vocational and technical education professionals and to others concerned with vocational, adult, and career programs. Computer time purchased for search of ERIC
Cost and Format: (continued)
tapes. Hard Copy limited to selected pages; Documents loaned at
no charge.

System Hardware:
DEC Writer Terminal for connection to Lockheed system.

System Software:
Lockheed Dialog System for Database Retrieval

Comments and Remarks:
Abstract and index curric materials and local program reports;
advisory and consulting services in info sources, equipment
utilization, and use of materials; manual lit search (free to
target audience); SDI services. VEIN provides interlibrary loan.

Description of the System:
Abstracts of Dissertations; "American Doctoral Dissertations": Use UMI Dissertation Information Services to identify dissertations on any topic; appraise the research content of a dissertation; keep informed of new titles; acquire copies of dissertations, masters theses and research documents; establish a reference library of abstracts; build specialized collections of dissertations, theses and research documents; broaden research capabilities; compile your own subject bibliographies within minutes. DATRIX II: The Datrix II search system gives you direct access to the specific dissertations and theses you need for your research. Your query directs a computer search of the Comprehensive Dissertation Database. The search produces a list of all titles matching your specifications and only those titles.

Scope or Subjects Covered:
HUMANITIES: Communications and the Arts; Education; Language, Literature and Linguistics; Philosophy, Religion and Theology; Social Sciences; Folklore; History; History of Science; Law; Marketing; Political Science; Public Relations; Recreation; Social Geography; Social Structure; Social Work; Sociology; Transportation; Urban and Regional Planning; Women's Studies

Keywords:
EDUCATIONAL MEDIA
Abstract of A Data Source

Name of Data Source: National Info Center for Educational Media (NICEM)

Date Established: July 1966

Organization Title: University of Southern California (NICEM)

Mailing Address: University of Southern California (NICEM) University Park Los Angeles, CA 90007

Company Phone: 213-741-6681

Name of Point of Contact: M. Thomas Risner,

Phone Number of Point of Contact: 213-746-6681

Description of the System:
NICEM was established by the University of Southern California for the purpose of collecting and disseminating descriptive information concerning all the educational media distributed in the United States. Services include the abstracting and indexing of educational media; consulting, reference and computerized literature searches; and custom cataloging. The master database consists of over 280,000 main entries averaging 700 characters per entry. Analyses may be made by subject heading or category, audience, application level, producer or distributor of title, and by media type.

Scope or Subjects Covered:
Non-book educational media, including 16mm film, 35mm filmstrips, 8mm motion picture, phonograph records, audiotapes and videotapes. Entries are filed under 2,087 key words or subheadings oriented to elementary, secondary, and undergraduate levels of education, although the file is not limited to these levels.

Input or Source of Data:
Producers' and distributors' catalogs of educational media. Since 1966, the Library of Congress (LC) has collaborated with NICEM, providing input covering every educational non-book media item registered with LC.

How to Access the Data:
Users consult published indices or the NICEM database itself as commercially available through the BRS and DIALOG systems.

Availability of the Data:
No Restrictions.

Cost and Format:
Formats available include magnetic tape or disc, punched cards, hardcopy and microfiche. NICEM produces two categories of catalogs: 1. Custom catalogs of educational media contracted for by AV centers, libraries, colleges and universities. Over 400 educational institutions have contracted for catalogs. 2.
Training Analysis and Evaluation Group (TAEG)

Cost and Format: (continued)

General media or special topic indices. (See goldenrod enclosure for specific titles and prices.)

System Hardware:
IBM 360/65K Memory Tape: EBCDIC. Density 800/1600 bpi. 7 track.

System Software:
SDI programs available.

Comments and Remarks:
The U.S. Office of Education helped to launch this system by funding $115,000 for a 2-year study entitled, Southern California Automated Cataloging Project of the Department of Health, Education, and Welfare, Office of Education, Title III and Title VII. This study was completed in 1966. Since that time, the University has invested in excess of $1 million in refining and expanding the system. The University of Southern California holds the copyright on the NICEM system and its products.

Description of the System:
(FERIC) provides research reports, documents, instructional
materials, position papers, and other ed research data to Fl.
educators. It is also responsible for disseminating info to the
State Cabinet, Legislature, and agencies to keep these officials
informed about nearly every phase of education in Florida and
the nation.

Scope or Subjects Covered:
Educational methods and materials concerned with public
education from pre-school through higher ed. FERIC's principal
products are repackaged documents, including surveys and
projects, technical reports, case studies, and courses of
instruction.

Input or Source of Data:
Input includes: ERIC documents, professional periodicals,
newsletters, news periodicals, house organs, and other materials
provided on a regular basis by educational institutions and
agencies.

How to Access the Data:
See primary contact.

Availability of the Data:
Not usually for private agencies. See primary contact.

Cost and Format:
Free to public educators of Fla. Microfiche copies of
educational research documents, printouts or resumes of
documents, and technical assistance are provided upon request by
FERIC and its 66 satellite centers to eligible individuals and
agencies.

System Hardware:
IBM 360/40
Training Analysis and Evaluation Group (TAEG)

System Software:
Query system computer program is used for searching FERIC files.

Comments and Remarks:
FERIC satellite centers are located in nine state universities, 26 community colleges, 21 area vocational-technical centers, five vocational education exemplary programs, and five vocational education area program coordinating offices.

Abstract of A Data Source

Name of Data Source:
Internl and Developmental Education Clearinghouse

Date Established:
1964

Organization Title:
Univ of Pittsburg/School of Education

Mailing Address:
Univ of Pittsburg/School of Education
5th Floor, Forbes Quad
Pittsburgh, PA 15260

Company Phone:
412 624-5574

Name of Point of Contact:
Mrs. C. L. Portugal

Phone Number of Point of Contact:
412 624-1280

Description of the System:
Collects and disseminates info on educational planning and development throughout the world. Maintains a primary collection of unpublished papers, conf proceedings, national reports and publications, development plans, and other materials, supplemented by a small ref collection of regularly published materials and journals. Pubs include monographs, reports, bibliographies, and acquisitions lists.

Scope or Subjects Covered:
Professional aspects of education, including cross/national/cultural operations, applied social science approaches to education problems, development techniques and planning.

Input or Source of Data:
Collection of 1,000 books and 8,000 documents about 150 to 200 items are acquired every two months with emphasis on procurement of regional educational and development publications (from Africa, Asia, Europe, South America, United States, Oceania, and Eastern Europe), organization publications (UNESCO, OECD), bibliographies, and directories.

How to Access the Data:
Acquisition list. See primary contact.

Availability of the Data:
Outside requests handled by the director; lib collection is available to faculty and students of research and training projects; liaison by the CLEARINGHOUSE is maintained with other institutions with similar interests, and exchange of material is possible.

Cost and Format:
Abstracting and indexing; copying; interlibrary loan; manual literature searching; reference and referral services; SOI services; state-of-the-art compilation.
System Hardware:
197 Acq. list on magnetic tape (IBM 360)

System Software:
above discontinued.

Comments and Remarks:
Access is available to the main library of the University of Pittsburgh with over a million volumes and to the Library of the Graduate School of Public and International Affairs with over 50,000 volumes in areas of national development in other countries. Also available, Learning Resources Center School of Education

Chicago, IL 60611

Company Phone:
312-944-6780

Name of Point of Contact:
D. F. Hammer

Phone Number of Point of Contact:
312-944-6780

Description of the System:
(LITA) fosters and guides membership activity in the development and application of electronic DP techniques and the design of automated systems in all phases of the library and information sciences field. LITA focuses on three general areas: education, publications, and standardization. It encourages research in these areas; its interests include such activities as systems development, electronic DP, mechanized information retrieval, operations research, standards development, telecommunications, networks and other collaborative efforts among libraries; advisory and consulting; sponsoring educational programs and seminars; state-of-the-art compilations.

Scope or Subjects Covered:
Automation of library operations and library information services; telecommunications; library-related areas of instructional technology; scientific management of library and information systems; education for information science; standards; systems analysis; and research in these areas.

Input or Source of Data:

How to Access the Data:

Availability of the Data:
Membership in ALS is required. Membership in LITA $15.00 additional. As an education organization, same services are available to members only, but most services are available to anyone.

Abstract of A Data Source

Name of Data Source:
Northeast Academic Science Info. Ctr. (NASIC)

Date Established:
1973

Organization Title:
New England Board of Higher Education

Mailing Address:
New England Board of Higher Education
40 Grove St.
Wellesley, Mass. 02181

Company Phone:
617-235-8071

Name of Point of Contact:
Dr. David M. Wax

Phone Number of Point of Contact:

Description of the System:
(NASIC) will provide the Northeast area with a central access point to the nation's growing and diverse information resources in computer-readable form. By aggregating data bases and existing information services, comprehensive and in-depth services can be provided to users in order to increase the capability and competitiveness of the Northeast's scientific research community. NASIC will be an arm of the Northeast regional science research community, serving its users through their university libraries.

Scope or Subjects Covered:
Science information resources and services. Specific data bases used to date include: education, linguistics, information science, business management, chemistry, and chemical engineering. Another objective will be to provide workable cooperative arrangements between academic research institutions, libraries, and information centers to their mutual benefit through the aggregation of services and markets for these services.

Input or Source of Data:
NASIC will work on the principle that "you need not own what you access" and will utilize existing information centers' resources rather than duplicating them. Computerized data bases currently being used include: CHEMCN, INFORM, MEDLINE, and ERIC.

How to Access the Data:
See primary contact.

Availability of the Data:
Primary users will be researchers in the Northeast academic science community. Industrial and governmental organizations will be later prospects for NASIC services.

Cost and Format:
Info products and services at cost. Non profit basis.
System Hardware:

NASIC will use remote machine media for data searching, with a number of options to be offered.

System Software:

Comments and Remarks:

Services will include computerized current awareness and retrospective search services, with both on-line and off-line options; other capabilities will be introduced during subsequent years of the program. Reference, referral, and interlibrary loan services are also planned. Center services support from the National Science Foundation, Office of Science Information Service.

Abstract of A Data Source

Name of Data Source:
NASA INDUSTRIAL APPLICATION CENTER (NIAC)

Date Established:
1967

Organization Title:
Univ. of Southern California (NIAC)

Mailing Address:
Univ. of Southern California (NIAC)
809 West 34th St.
Los Angeles, Calif. 90001

Company Phone:
213 741-6132

Name of Point of Contact:
Dr. Robert Mixer

Phone Number of Point of Contact:
213 741-6132

Description of the System:
(NIAC) operates as a division of the Univ. of So. Calif. and is a U. S. NASA Reg. Dissemination Center for the West. NIAC was originally organized to provide efficient search access to the NASA collection of new technology which has been indexed on computer tape as well as manual searching of almost any data source. It now also includes on-line searching of the Lockheed Dialog system and the SOC Orbit System. A non-profit activity in coop. with NASA.

Scope or Subjects Covered:
Over 20,000 subject areas are covered in the composite data bases, including the general fields of aerospace science and technology, biological and physical sciences, engineering, business and management, and social sciences.

Input or Source of Data:
U. S. NASA Admin. reports; selected U. S. Dept. of Def., U. S. Atomic Energy Comm. and other fed. gov. reports; selected articles from over 1,000 domestic and foreign tech. journals, 3,500 eng. journals and pubs., 12,000 chem. journals and other pubs., 2,300 world-wide biomedical journals and journal and report lit. covering fields of educ., psychology, sociology and economics.

How to Access the Data:
On Line searches can be initiated by phone or in person on an appointment basis.

Availability of the Data:
Unrestricted. See Primary Contact.

Cost and Format:
Both microfiche sheets and reproduced pages are available. Search results are presented in abstract form. In addition, full documents (translated into English in most cases) are available. Cost is dependent on scope of search. Estimates are given prior to initiation of work.
System Hardware:
IBM 370/158. Includes NASA data bank (AIAA-STAR Cat.), ERIC, Engineering Index, NTIS, Managements contents, etc.

System Software:
Data Base development available on ad-hoc basis

Comments and Remarks:
Has access to 12 complete libraries on the University of Southern California campus with holdings of 9,000 periodical titles and 1.5 million volumes.

Description of the System:
(COSMIC) was established to serve as a clearinghouse for computer software produced by the U.S. National Aeronautics and Space Admin (NASA) and their contractors. COSMIC collects and disseminates computer programs in all areas of aerospace engineering, mathematics, business, and industry; many of these programs can be incorporated into existing commercial or industrial operations with minor or no modifications. COSMIC also offers other customer services such as searching for programs which best suit the customer's needs, supplying descriptions of software programs in the customer's general areas of interest.

Scope or Subjects Covered:
Computer programs in various fields; aerodynamics, biotechnology, communications, computer utilities and monitoring packages, electronics, business games, aerospace engineering, mathematics and statistics, simulation packages, meteorology, data reduction, and information systems.

Input or Source of Data:
Software programs are received from NASA and NASA contractors, DOD and DOD contractors, and a few other federal government agencies.

How to Access the Data:
See primary contact.

Availability of the Data:
See primary contact.

Cost and Format:
Public sale or lease U.S. organizations. Selected programs are available for foreign distribution.

System Hardware:
IBM 370/158 CDC 70/74 UNIVAC 1100
System Software:
   COSMIC maintains approximately 1,500 software packages, with
   input of 250 to 300 yearly.

Comments and Remarks:
   USNASA provides support.

A POI master file is

Phone Number of Point of Contact:
283-4801

Description of the System:
A POI master file is used to build a separate record for each
POI for which a specific lesson plan is administered. This
record is built by determining the responsible school element
for the lesson plan and storing this information along with the
necessary information from the master file. Each lesson plan
taught in the school identifies the hours and types of
instruction necessary to effectively administer that particular
lesson plan. These hours and types of instruction have been
further identified such that depending on student load the
number of instructors necessary to administer this lesson can be
calculated. This information coupled with the frequency
of classes for a given FY is sorted and platform man-hours by
instructional element is broken out. Thus a schedule is produced
for each lesson plan taught in the school.

Scope or Subjects Covered:
Class scheduling POI, lesson plans, instructor requirements.

Description of the System:
The system aids in the establishment of a schedule of classes to meet the foreign language training requirements of the military services & various civ agencies for an entire FY. The system produces reports whose manual compilation was very time-consuming. The schedule is developed by integrating the training needs of the agencies that provide student inputs with restrictions such as service type, billet & class capacity & classes from the previous year still in progress. An updated capacity maintains the file so that up-to-date reports may be prepared as necessary.

Scope or Subjects Covered:
Foreign language training, class scheduling, requirements,

Description of the System:
US Army Reserve real estate facilities.

Scope or Subjects Covered:
Processing consists of updating the reserve facilities master file. Output consists of section I center list which indicates units assigned to the center, cost for operating the center, training sites used and ancillary facilities used. Section II center which indicates the percent of usage of different areas at the center such as wash racks, storage areas, admin space, medical space, etc., and the training site list which shows utilization of training sites by all units other than conus armies. USARAL and USARPAC are main recipients of output products.

Input or Source of Data:
Punched cards from DA form 3962 and 3962-1 prepared for all USAR centers. Input is 10 different card formats containing info relative to a USAAR center such as name, location size, rated copy, facilities and training areas used, maint costs, supporting installation, and units located at the centers.

Description of the System:
This document contains the results of a survey of 94 US organizations, and 36 organizations in other countries that were thought to prepare machine-readable data bases. Of those surveyed, 55 organizations (40 in US, 15 in other countries) provided completed camera-ready forms describing 81 commercially available, machine-readable data bases that contain bibliographic information about published literature.

Scope or Subjects Covered:
Name, frequency of issue, and time span covered by the data base; Name of organizations and individuals who can provide information on the data base; Subject matter and scope of data on the tape; Source of information in the data base (journal articles, reports, patents, monographs, etc.); Method(s) used for indexing or other types of subject analysis; Special data elements: Tape specifications (density, tracks, labels, etc.); Availability of programs for retrospective searching and selective dissemination of information (SDI); Type and cost of search services offered; and Availability and charges for data bases. The information provided represents the status of these data bases as of Nov 72.

Answers inquiries; provides consultation on mental health info; provides technical assistance to complementary and other information resources; prepares abstract publications, syntheses, and evaluations of materials in the data base and encourages the prep of critical reviews and state-of-the-art papers for dissemination; makes referrals to other sources of info.

Scope or Subjects Covered:
Mental health aspects of affective disorders, aging, alcohol, biochemistry and metabolism, children and youth, crime, environment, service organization and delivery, epidemiology, group processes, learning, minority groups, neuroses, psychometrics, psychopharmacology, reactive disorders, schizophrenia, sexology, suicide, treatment, and violence.

Input or Source of Data:
An on-line file of about 360,000 abstracts, updated at the rate of 2000 - 3000 abstracts per month. Over 900 journals from 42 countries and in 22 different languages (including Far Eastern materials) are routinely scanned for input to the data base. These are screened, cataloged, abstracted indexed, and coded for over 50 substantive areas for retrieval purposes. Coverage is also augmented through input of information from books, workshops, conference proceedings, legislation, and such other sources as Dissertation Abstracts and nonprint materials, the latter including abstracts of films, video tapes, cassettes, and recno abstracts of films, video tapes, cassettes, and records.

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
SIE is designed to provide the community with timely information about currently active scientific research. The Natl Science Foundation supports SIE through the Smithsonian Inst. SIE consists of three divisions: (1) the Life Sciences Div--sciences, behavioral sciences, medical sciences, agriculture and applied biological sciences, and social sciences and community programs, (2) The Phy Sciences Div (chemistry, sciences, electronics, engineering, materials, and physics and mathematics) and (3) the Data Processing Division (registry reports, systems and programming, computer operations, and science support). Each div is staffed by specialists in the several fields.

Scope or Subjects Covered:

Input or Source of Data:
Acquisition of data. Info on current research is accepted from organizations that support research programs and from individual investigators. Analysis of Info. SIE's system for registering, indexing, organizing, and retrieving information is complex since it involves not only the collection of data from many different sources, the indexing and retrieval of technical material in detail, but also compilation of information extracted from thousands of records. Recording results of analysis. Info about research planned or in progress in registered on a single page Notice of Research Project. Storage of source documents. Notice of

Company Phone: 212 751-6214

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
EFL was established by the Ford Foundation early in 1958 to help American schools and colleges with their physical problems by encouraging research, experimentation, and the dissemination of knowledge regarding educational facilities. EFL is a nonprofit organization governed by a 13-member board of directors and operated by a small professional staff headquartered in New York. To strengthen its contact with educators, architects, and planners in the West and Southeast, EFL provides support to the School Planning Labs at Stanford University and the Univ of Tenn for their operation as EFL Regional Centers.

Scope or Subjects Covered:
Areas of acquisition: EFL sponsors research and experiments and collects and disseminates information over all institutional planning design, and construction of the elements of educational facilities, tools, equipment, and apparatus which support instruction.

Input or Source of Data:

How to Access the Data:
Written request or phone

Availability of the Data:
Anyone interested in obtaining information on educational facilities may use EFL's service. See primary contact

Cost and Format:
EFL publishes several books and pamphlets describing various aspects of educational facilities, research, planning, and construction. EFL also refers interested parties to publications of other organizations and institutions.

Dr. Frank Burtnett

Phone Number of Point of Contact:

Description of the System:
APGA is a scientific and educational assoc dedicated to the advancement of guidance & counseling work. Its purpose is to serve the membership and the general public through programs specifically designed to further the broad educational aspects of guidance and counseling.

Scope or Subjects Covered:

Input or Source of Data:
APGA receives 100 plus professional journals which are skimmed for relevant points before forwarding to appropriate committees for review in divisional journals or other publications. The library acquires and indexes guidance and career publications through donations, and some other materials are purchased.

How to Access the Data:
APGA answers written requests for information from members and nonmembers without charge and inquiries are directed where to look for the information they seek.

Availability of the Data:
Anyone with an interest in guidance, counseling, personnel work and research in these areas.

Cost and Format:
Journals per copy/per year.

System Hardware:

System Software:
APGA single publications, as well as journal subscriptions, are available to the public at modest charges, and to members at special rates. Bibliographic info on counseling, occupation and educational info and professional references are available on request. APGA sponsors training in a variety of topical areas of concern to counselors, counselor educators and counseling supervisors.

Description of the System:
(SRIS) secures copies of school research reports and descriptions of innovative practices both directly from the schools and school study program and through its active membership of 66,000 educators. These reports are coded for cross referencing in an electronic information system and are made available to interested parties on request.

Scope or Subjects Covered:
SRIS collects reports dealing with educational research and innovative practices in elementary and secondary education.

Input or Source of Data:
SRIS collects info from schools, school study councils, and from its active membership of 66,000 educators. SRIS both supplements and utilizes the ERIC System in that it (1) forwards any document whose subject matter qualifies to the appropriate ERIC Clearinghouse, (2) uncodes and incorporates documents on any subject for which there is no ERIC Clearinghouse, and (3) in its own service, searches ERIC encodings and selects the ERIC documents which are potentially relevant to the question.

Phone Number of Point of Contact:

Description of the System:
NAFC has been established by the National Assoc for Public School Adult Educ (NAPSAE) to provide easier access to information useful in the education, training, and retraining of adults and out-of-school youth in adult basic and secondary education. It works toward this objective by obtaining, processing, and disseminating information about all aspects of adult basic and secondary education.

Scope or Subjects Covered:
NAEC collects information dealing with the education, training, and retraining of adults and out-of-school youth in adult basic and secondary education.

Input or Source of Data:
NAFC is systematically collecting such useful info as books, letters, pamphlets, catalogs, newspaper clippings, slides, project proposals (both accepted and denied), case histories, training designs, evaluations of programs, names of resource specialists, effective news releases, and bibliographies of instructional materials. NAEC welcomes copies of all such materials.

How to Access the Data:
NAEC will answer requests for info about adult basic and secondary education (1) by citing ref, (2) by providing copies of documents at cost, and (3) by providing summaries of info about adult basic and sec education.

Availability of the Data:
Unrestricted

Cost and Format:

System Hardware:
System Software:

Comments and Remarks:
In addition to supplying written responses to requests for service, NAEC makes its services available (1) by conducting a workshop on information utilization at the annual NAPSAE Conf, (2) by assembling and circulating kits of information on teacher training and other frequently requested areas.

Center for the Study of Library Education for Adults
138 Mountfort St
Brookline, Mass 02146

Company Phone:

Name of Point of Contact:
Director

Phone Number of Point of Contact:

Description of the System:
The CSLEA was originally established to work with institutions of higher learning seeking to initiate or improve programs of liberal education for adults. Although the function of CSLEA was originally defined as the promotion of education specifically liberal in nature, the Center has since become involved with every facet of the vast complex of continuing liberal education.

Scope or Subjects Covered:
Incoming documents consist of reports, brochures, catalogues, etc., about only continuing educ in the US, Canada, and overseas. Materials are indexed and portions of material and reports are digested and reported to some 3,500 persons through the CSLEA Newsletter, Continuing Education for Adults.

Input or Source of Data:
1. Through continuous contact with colleges and univ CSLEA collects and assimilates knowledge about needs and developments in the field. The center also sponsors or assumes responsibility for broad field studies, research projects, and pilot experimentation programs, the results of which are included in CSLEA files for use by researchers interested in the field.

How to Access the Data:

Phone Number of Point of Contact:
same

Description of the System:
PLATO is an education service available via subscription or by lease or purchase of a stand alone system. Training delivery is by a CRT Terminal connected to central site via telephone lines. This is an interactive computer controlled network service available for installation at customers' site.

Scope or Subjects Covered:
Approximately 6000 hours of line published courseware available in a wide range of subject matter. Also, customer can generate their own courseware (custom application courseware) for delivery anywhere from the network. A catalog is available from any major CDC sales office.

Input or Source of Data:
Source data is generated by a combination of subject matter experts, education analysts, education course designer and developers, and is programmed on line via the TUTOR language.

How to Access the Data:
Network access is gained by the purchase of a "subscription". Subscription includes terminal and access to the network from a "Point of Entry" established in numerous cities in US, Canada and Europe.

Availability of the Data:
No restrictions except vendor must pay for phone line costs to the "point of entry" city.

Cost and Format:
Output is available via CRT and by hard copy printer which duplicates screen. Subscription cost varies but is generally $100/month/subscriber. Peripherals devices extra.

System Hardware:
Control Data Cycles computer
System Software:
  System software is a PLATO application package which runs under the NOS operating system.

Comments and Remarks:
  Service growing rapidly and in use throughout US, Europe. Installation underway in South Africa, and elsewhere. Approximately 1500 to 2000 terminals total at present

Date Established:

Organization Title: American Management Association

Mailing Address:
American Management Association
Management Information Service
135 W 50th St.
New York City, NY 10020

Company Phone:
212 JV6-8100

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
Designed to provide the members of the American Management Association with background info for making sound decisions. Subject areas covered by the Service include administrative services, finance, general mgmt, insurance, international mgmt, mgfing, marketing, packaging, personnel, purchasing, and research and development. The Management Info Service is a ser of the Amer Mgt Assoc (AMA) and is but one of the means by which the association provides a broad interchange of administrative experience.

Scope or Subjects Covered:

Input or Source of Data:
Books, periodicals, and other published documents selected by librarians who are familiar with interests of members and staff. Some advice and counsel from other dept people. Unpublished forms, charts, procedures, reports, etc., via AMA program activities. Special letters requesting company documents. Materials acquired --- by-products of research and management practices.

How to Access the Data:
Letter or in person

Availability of the Data:
All members are welcome to visit AMA's library. Except for junior executive and student enrollees, they may also discuss their problems with one of the staff and borrow books and other unrestricted matter on a ten day basis.

Cost and Format:
Conventional book cataloging systems. Vertical file with about 4,000 functional headings for clippings and small documents. Specially prepared bibliographies for almost all major management subjects. Most course bibliographies annotated. Published ten-year index of all AMA publications (with annual supplements).
System Hardware:

System Software:

Comments and Remarks:
Source documents are stored in the Service Library at the American Management Association Bldg in N Y City. The American Foundation for Mgt Research (founded by AMA), maintains small collections of documents on Recordak equipment in Hamilton, N. Y.

National Computer Program Abstract Service
Box 3783
Washington, D.C. 20007

Company Phone:
(703) 534-1434

Name of Point of Contact:
A. E. Dawson, Editor

Phone Number of Point of Contact:
(703) 534-1434

Description of the System:
(NCPAS) is a clearinghouse for computer program abstracts-simulation systems. The major advantage of this service is that it provides you with a summary of constantly changing interdisciplinary program info and lets you select those specific programs in depth on only those subjects in which you are interested. You pay for only that info you need. The service is problem oriented, not hardware oriented. A quarterly newsletter, ABSTRACTS, provides current items of interest, abstract samples and an index of abstract categories and numbers.

Scope or Subjects Covered:
All fields of knowledge are included in the data base: biosciences, medical sciences, business, manufacturing, management, education, libraries, environment, ecology, nature, government (federal, state, local), urban affairs, legal, humanities, specific industries, public utilities, military, games, science and engineering.

Input or Source of Data:
Software developers, vendors, colleges and universities and government agencies.

How to Access the Data:
See primary contact

Availability of the Data:
Unrestricted For NCPAS members or see primary contact

Cost and Format:
Information disseminated in two forms: "ABSTRACTS", a quarterly newsletter, and Abstract Reports. ABSTRACTS costs $10/year and provides current items of interest, abstract samples and an index of abstract categories and numbers. Abstract Reports consists of all abstracts of a specific category. The cost is $39 for the first 200 abstracts and $15 for up to each 200 additional abstracts.
System Hardware:

System Software:

Comments and Remarks:
NCPAS membership Box 3783 Wash DC ($10 Yr) Free Report Index to 35,000 Computer Program Abstracts available upon request.

Abstract of A Data Source

Name of Data Source:
Bibliographic Retrieval Services Inc. (BRS) Inc.

Date Established:

Organization Title:

Mailing Address:

Company Phone:

Name of Point of Contact:
R P Quake (Pres)

Phone Number of Point of Contact:

Description of the System:
BRS was established to fill this gap by making it possible for user community to search bibliographic data bases on-line. BRS to give libraries and info centers, regardless of size or location, the opportunity to apply the advanced technology of on-line searching to help solve the problems created by the increasing demand being made on their info storage and retrieval capabilities. BRS was created with the support of a large group of libraries.

Scope or Subjects Covered:
BRS will offer users access to more than 9 million bibliographic citations in the key subject areas of medicine, biology, chemistry, psychology, education, agriculture, physics, engineering, computer science, and business management.

Input or Source of Data:

How to Access the Data:
Any teletype-compatible on-line communication terminal with a print speed of 10-30 characters per second may be used to access the BRS system. Access at higher speeds is also possible via special arrangements. Most terminals (either hard copy of CRT) now be used to access other on-line search services will also be compatible with BRS.

Availability of the Data:
Unrestricted See Primary Contact

Cost and Format:
Charging will be on a connect hour basis, and all users will be required to purchase a contract for service that will guarantee a minimum number of hours of usage per month. The actual price per connect hour for an individual usage will depend on the number of hours which are guaranteed, according to the rate scale.
System Hardware:

The BRS searching system uses as its nucleus proven online retrieval program called STAIRS (STorage And Information Retrieval System). Developed by IBM in 1971, STAIRS combines the best features of many online programs to provide searchers with a sophisticated and yet easy to use interactive search language.

System Software:

Comments and Remarks:

The BRS system has all the standard searching features of other programs, as well as special characteristics. Utilizing the special BRS "Save" feature, searchers may request that a given search profile be stored by the system either for processing later in the same day (temp save) or for processing on a future day (permanent save).

Information Publications System

Date Established:

Organization Title:
R R Bowker Co./Info Publications Systems

Mailing Address:
R R Bowker Co./Info Publications Systems
1180 Ave of the Americas
New York, NY 10036

Company Phone:

Name of Point of Contact:
M T Fischev (Mgr)

Phone Number of Point of Contact:
212 764-5100

Description of the System:
Designed to accommodate extensive bibliographic info concerning books and serials in order to produce a number of reference pub. The SYSTEMS include: 1) the Bibliographic Info Publications Systems (BIPS); 2) the Wkly Rd/Bk Publishing Rd Sys; and 3) the Subject Class System. Each SYSTEM has full input, storage, update, and retrieval capacities as well as specific outputs. All are separately maintained but have interface capabilities. The SYSTEMS are designed to allow for great flexibility in selective retrieval, sorting, and variety of output.

Scope or Subjects Covered:
All available info on books published or distributed in the U S, including both currently in-print and out-of-print books; current serial titles in continuing publication, including periodicals, proceedings, and yearbooks, but not nat, state, and municipal documents (except for selected serials which are generally regarded as part of the conventional literature in science and technology).

Input or Source of Data:
Book data input consists of MARC II tapes and LC cataloging and subject class info; serial data are gathered and updated by contacts with approx 50,000 publishers world-wide.

How to Access the Data:

Availability of the Data:

Cost and Format:
Outputs are parameterized to achieve variations between indexes produced for all publications as well as variations in data output between indexes in any one pub. Extensive cross-ref and page ref indexing are also possible. Final output is presently in the form of photo-composed pages, but microform output is being developed.
Training Analysis and Evaluation Group (TAEG) COMM073

System Hardware:

System Software:

Comments and Remarks:

Holdings include: the BIPS master book file which contains over 500,000 full bibliographic records; Weekly Record/Book Publishing Record which contains 125,000 converted MARC III records with full LC subject headings and extensive cross references; and the master serial file which contains 75,000 entries (55,000 periodicals and 20,000 irregular serials and annuals) classified under 230 major subject headings plus a Dewey class for each entry.

BIBLIOGRAPHIC SERVICE
Abstract of A Data Source

Name of Data Source:
Psychological Abstracts Info Ser (PAIS)

Date Established:

Organization Title:
American Psychological Assoc (PAIS)

Mailing Address:
American Psychological Assoc (PAIS)
1200 Seventeenth St NW
Wash, D. C. 20036

Company Phone:
202 833-7624

Name of Point of Contact:
Patricia M Zell (Sup)

Phone Number of Point of Contact:
202 833-7640

Description of the System:
Through machine-readable tapes, PAIS provides computer access to the world's literature in psychological related disciplines as published in Psychological Abstracts (PA). PAIS covers material from over 850 periodicals and scans about 1,200 books and separates per year. Articles and abstracted books are cited with annotations, and separates (tech rpts, monographs, etc.) are cited, annotated, or abstracted according to their relevancy to the behavioral and social sciences. Other characteristics include classification codes designating 17 primary categories (and sub-categories) within psychol, controlled indexing vocab, selected from the PAIS thesaurus of Psychol Index Terms, "free" index phrases, and biblio info.

Scope or Subjects Covered:
These services can provide rapid retrieval of worldwide behavioral and social science citations and abstracts with a high degree of relevancy to the user's specific need.

Input or Source of Data:

How to Access the Data:
Organizations may access the data base through a service called PADAT (PA Direct Access Terminal); and individuals may submit written search requests to PASAR (PA Search and Retrieval). Both PADAT and PASAR enable searching with natural language as well as index terms or codes, and any or all portions of the records, including full abstracts, may be retrieved.

Availability of the Data:
Tapes are available to info centers through PATELL (PA Tape Edition Lease or Licensing). PASAR is accessible by mail. The individual fills out a search request form, making a specific statement of his info requirement, and sends it to PAIS at the association's central office.

Cost and Format:
Through PATELL, an annual lease allows use of the PA tapes by an institution's personnel, while a licensing agreement permits the
Cost and Format: (continued)

Inst to offer services to others on a royalty basis. Tapes are distributed in monthly, quarterly or semi-annual reels, according to the spec of the user. Price for leasing the 1973 tapes is $3,000, with the prev yr's tapes $2,000 and other prev yrs' tapes $800 ea. One must lease the current tape edition to retain use of the prev leased tapes. Thesaurus tape is also avail.

System Hardware:
Output may be printed on-line if a "hard-copy" type terminal (such as a teletype) is used; otherwise, output may be printed off-line at the computer facility and mailed to the researcher.

System Software:
Through PAIDAT, the researcher conducts his own search on a computer terminal located at his own facility. This method allows him to browse personally through the records, modifying his search as he obtains info from the data base.

Comments and Remarks:
PAIS provides this service through a contractor, Lockheed Info Sys, Palo Alto, Calif.

Phone Number of Point of Contact:

Description of the System:
This service provides access to doctoral dissertations written at more than 421 participating universities in the US and Canada. The data base has grown to a current 665,000 doctoral dissertations, covering a period from 1861 to present. An effort is being made to include many of the Canadian dissertations, approx one-third of which now are available. It is planned that about 90% of all dissertations currently being written will be added to the data base.

Scope or Subjects Covered:
An interrelated system of info resources is offered from which the user may select the one best suited to his needs. Data products include the following: The Comprehensive Dissertation Index (CDI) is a subject/author guide to doctoral research. Dissertation Abstracts Intern'l (DAI), published monthly, contains 600 word abstracts summarizing the objectives and the conclusions of each dissertation. DAEIX II is a mail-order computerized info retrieval system which conducts a computer search to identify doctoral dissertations written on any topic.

Comments and Remarks:

University Microfilms International periodically publishes short bibliographies as spinoffs from CDI and DATRIX II. These normally contain several hundred dissertation titles on various/several issues. This service provides the most comprehensive records on dissertations available anywhere. For a modest fee the user enjoys access to an enormous amount of scholarly research that might remain unnoticed and unused by other researchers.

Abstract of A Data Source

Name of Data Source:
INTERNATIONAL OCCUPATIONAL SAFETY AND HEALTH INFORMATION CENTER (CIS)

Date Established:
1959

Organization Title:
INTERNATIONAL LABOR OFFICE

Mailing Address:
INTERNATIONAL LABOR OFFICE
C/O Bit
154 Ave deLausanne
Geneva 22, Switzerland

Company Phone:
(22) 99.67.39.

Name of Point of Contact:
Herbert Siegel, Head, International Occupational Safety and Health Information Center.

Phone Number of Point of Contact:
022 32 6200

Description of the System:
CIS scans worldwide literature on all aspects of occupational safety and health and economic activity with the help of institutions acting as National Centers in 38 countries in all parts of the world. Abstracts of the documents become part of a machine-readable database. The database is used to publish printed English and French editions of the abstracts and their indexes, and also to provide retrospective information searching.

Scope or Subjects Covered:
Worldwide occupational safety and health including ergonomics, occupational psychology and physiology, industrial toxicology, pollution in the working environment, work conditions, training and education.

Input or Source of Data:
Books, journal articles, laws and regulations, standards and directives, guides and manuals, data sheets, research reports, dissertations, proceedings of congresses and symposia, statistical reports, films and other audiovisual materials, and translations.

How to Access the Data:
CIS ABSTRACTS (seven issues a year plus annual cumulative subject and author indexes); five-year cumulated subject and author indexes; available in English or French (BULLETIN CIS). Information Sheets and Bibliographies on subjects of topical interest are also issued, as well as the CIS Users Guide and the List of Periodicals abstracted.

Availability of the Data:
The products and services are available on a subscription basis, to all individuals, organizations, and governmental units interested in any aspect of occupational safety and health. Special arrangements exist for subscriptions and services for users in developing countries.
Cost and Format:

CIS maintains approximately 45,000 abstracted documents in either original form or microfiche. Abstracts and indexes published since 1974 are maintained in machine-readable and printed forms; abstracts and indexes produced during 1960-1973 are held in card index files. Microfiche duplicates from the CIS master microfiche collection are available to subscribers. Custom searches of the complete files (1960 to date) for individuals, organizations and governmental units are available on request from subscribers and non-subscribers. Results are available in English or French. Online searching is available in French through the Societe pour l'Informatique in Paris, France and may be available in English from another organization.

System Hardware:

IBM 370/135

System Software:

Comments and Remarks:

The CIS THESAURUS of over 7,000 descriptors and 3,000 synonyms has been published in English and French. These terms, which encompass all of occupational safety and health and related fields, are used for indexing the original documents; the terms appear in the printed index and machine-readable files. Copies of most original documents abstracted and indexed in CIS ABSTRACTS, otherwise not available, can be obtained, subject to copyright laws, from CIS.

Phone Number of Point of Contact: 
452-3521 A/V 922-3521

Description of the System: 
Primarily designed to respond to the demands for training information by CNET and provide support to COMNAV MILPERSCOM and COMNAVCRUITCOM. Also is ready to react when specific information is required by a CCA or a particular training activity. NITRAS data is often required by top level of Navy Training Management to justify training resource requirements on POM and BUDGET processes. NITRAS is the only official source for NAVY training information. NITRAS has three modules - Master Course Reference File (MCRF), Student Master File (SMF), Training Summary File (TSF).

Scope or Subjects Covered: 
Master Course Reference File (MCRF) Reports; Student Master File (SMF) Reports; Training Summary File (TSF) Reports; course descriptive data, student action data by name and social security number and training statistical data respectively.

Input or Source of Data: 
MCRF data is input by training activities and/or Curriculum Control Authorities (CCA); SMF and TSF data is reported by the training activity. Input is reported on flat paper, mag-tape, punch-card and via on-line terminals.

How to Access the Data: 
The NITRAS system Manager provides regular reports and on-line query capability to authorized personnel in the Navy Training community on request via a letter to MILSA Code 22. Special reports are provided on CNET approval.

Availability of the Data: 
There are 90 regular reports provided by NITRAS. See NITRAS User Manuals on schedule and availability. The student data is restricted to authorized training activities.

Cost and Format: 
No cost for mission funded services.

GNAV003 213 GNAV003
Training Analysis and Evaluation Group (TAEG)

System Hardware:
The NITRAS data base resides on UNIVAC 1100/40.

System Software:
ANSICOBOL/MIRADS

Comments and Remarks:
NITRAS provides data to fifteen other ADP systems: Some of them are PRIDE, MAPMIS, NETMIS, CANTRAC. It will provide data to POM, ZBO, ZBB in very near future.

Mailing Address:
CO NARDAC Naval Air Station, (PDBA)
Pensacola, FL 32508

Company Phone:

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
The existing applications are being revised and files expanded to provide a responsive personnel reference data base which will substantially reduce the clerical effort currently involved in accounting for and controlling of personnel resources. The revision is required to provide proper interface with the CHNAPERS personnel system to ensure effective information exchange and integrity and to reduce the clerical effort required in rendering military personnel diaries and reports. CRT terminals (to support the personnel function at each NATRACOM activity), with the capability to call up standard formats for data input or report generation, will be required. These terminals will be shared with other NATRACOM areas dependent on volume of transactions and must have on-line (query) or batch processing (for data input) capabilities dependent on information response time requirements.

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
The primary purpose of NETFMS is to: Make available accounting information on a current basis which may be accessed as desired by managers using remote terminals; decrease the number of working stations through which data is required to pass prior to entering system, and reduce the number of personnel required in the process; provide on-line input and update capability as required on every type transaction. Note: NETFMS furnishes resources management accounting services to some 225 separate CNET activities from NROTC units and aviation training squadrons to functional commands such as the Chief of Naval Air Training. NETFMS provides accounting and financial management information on a current basis which may be accessed as desired by fund administrators and authorization accounting activities at NAS Pensacola and NAS Memphis. 1. An improved method of converting source data for input to computer. 2. Pre-balancing batches of input data by accounting technic in lieu of post-balancing after processing by the ADP facility.

Scope or Subjects Covered:
3. Entry of balanced data and individual transactions directly into the computer by accounting technicians utilizing on-line terminals. 4. On-line access for updating files and retrieving current data. 5. Restricting ADP programs under a generalized data base management system in such a manner that extensive annual modifications and interim changes can be accomplished with substantially less lead time and ADP effort. 6. Improved storage media for historical data.

Description of the System:
The primary purpose of this ADS is to consolidate existing ADP personnel accounting systems into one single standardized system operating from a central site computer and provide for: control and submission of data to other Department of Defense (DOD) ADP systems; (3) automated submission and redistribution of enlisted availability information; (4) automated preparation of enlisted Standard Transfer Directives (STD's); (5) acquisition of source data through information interchange with other DOD ADP systems; (6) user capability to extract and manipulate report information from a common data base, and (7) automated preparation of standardized enlisted service record, medical record, and dental record forms as well as all other forms which are incidental to an individual's transfer from training to a fleet activity.

Scope or Subjects Covered:

Description of the System:
An automated material management system designed to satisfy the Education/Training Material management information requirements of CNET and other commands. Provide an information system sufficiently flexible to provide planning, programming and budgeting inputs to meet the varying information needs of the SECNAV, OSB/OMB review process. Provide timely, accurate feedback information to other submitting Training Commands/Activities to assist in the data update process and to enable the development of implementation of alternate support plans. Provide a capability for comparative analysis of CNET training material requirements to assist in the development of improved TMS planning procedures. Provide a complete inventory of TMS assets, capable of update and available for allowance determination purposes.

Scope or Subjects Covered:
Provide timely Training Material Support (TMS) information in: planning (stating and approving requirements) programming, budgeting, implementation analysis (appraisal-evaluation). Provide accurate TMS information for use in: inventory, establishing allowances, determining excess and shortage quantities, establishing priorities.

Description of the System:
The Navy Research and Development Information Center (NARDIC) is the focal point within the DON for making information regarding research and development planning and requirements available to industry representatives who are registered for DoD information services. Each NARDIC office provides a reading room where representatives of qualified organizations may review those documents relevant to the R&D capability of the organization. On-line access to DoD holdings is also available.

Scope or Subjects Covered:
All weapons systems and support system needed by the Navy. Information includes plans and technical material.

Input or Source of Data:
Headquarters, Naval Material Command is input source; however, documents are collected by HR NAVMAT from all parts of the DON including the MARCORPS.

How to Access the Data:

Availability of the Data:
The services of NARDIC are available to representatives of industrial, scientific or other organizations registered for access to DoD information services. An organization may register for DoD information services as contractor or potential contractor.

Cost and Format:
No cost. Format of information is various.

System Hardware:
Previously a manual system; however, DTIC on-line terminals (UNISCOPE 200) are used to some extent.

System Software:
Not applicable
Comments and Remarks:

NARDIC has two offices, one in the Washington, DC area and the other at NPDC Nav. Undersea Ctr. 1030 E. Green St., Pasadena, CA 91106 (Ref. Sec. NAVINST 3900.31/3900.24 DoD INST 5100.45)

Phone Number of Point of Contact:
(1) AV 224-4519; (2) AV 224-1882; (3) AV224-8714

Description of the System:
A large MIS to support CNO and CNMPC in the areas of personnel, manpower and training. It includes the official personnel (officer and enlisted) and billet files of the U. S. Navy. Other minor files such as fitness report, enlisted evaluation and officer candidate also maintained.

Scope or Subjects Covered:
The personnel files contain all such data required to support CNO & CNMPC. Data includes personal data, base dates, training completed, past duty history, educational achievements, awards, eval history, duty prefs. The billet files contain a complete list of all authorized Navy billets qualitative and quantitative for all Navy activities.

Input or Source of Data:
Primary sources of info to the personnel files are OCR and diary entries from all Navy activities. Other sources include MEPCOM, SSA CRUITCOM, MILPERSIS, CNET activities and various internal NMPC offices.

How to Access the Data:
Communicate needs to the Director, Management Information Systems Div. (NMPC-165) via one of the contacts listed previously. Appropriate means/methods of access will be determined. Request forms only used internally.

Availability of the Data:
Various - dependent upon type and quantity of data requested. Personnel performance data is generally restricted.

Cost and Format:
Various - flat rate fees not used. Most output formats available (i.e., hardcopy, tape, disc, punched card, microfiche).

System Hardware:
IBM 370/165; CDC 3300; INTERDATA 7/32 mini network
Training Analysis and Evaluation Group (TAEG)

System Software:
OS/MVT on IBM; MSOS on CDC; OS32MT on INTERDATA.

Comments and Remarks:
The MAPTIS (formerly MAPMIS) is an extremely large information system and not any single file or application. The major files are independently functioning subsystems.

Phone Number of Point of Contact:
AV 288-4621

Description of the System:
(NOTAP) is a Bureau of Naval Personnel program whose primary objective is the collection, processing and analysis of occupational information about the job content of Navy billets. The collective term for this function is job task analysis.

Scope or Subjects Covered:

Input or Source of Data:
NOTAP data is collected by means of a job task inventory questionnaire. Initially, data collection team members use secondary sources of job data, such as Occupational Standards, NEC manuals, and rate training manuals to familiarize themselves with the work content of the rating. Personnel in the Bureau of Naval Personnel, Office of the Chief of Naval Operations and various systems commands who have a vested interest in a particular rating are contacted at this time. The primary source of job data, however, is the man at the job site. Accordingly, the primary input to the task inventory takes place during the observation and interview of job incumbents at the work site. Data collection team members then consolidate their finding.

How to Access the Data:
See primary contact

Availability of the Data:
See primary contact

Cost and Format:
After collection, the data is subjected to an optical scanning process which transfers the data to magnetic tapes. The tapes
Cost and Format: (continued)

are processed through the Comprehensive Occupational Data Analysis Program (CODAP) which was developed under the auspices of the U.S. Air Force Human Resources Laboratory. Since its inception in 1963, CODAP has been continually updated and improved. All the military services and the Coast Guard as well as other U.S. government agencies and universities use CODAP. Its use is spreading into State and local government agencies. Foreign military users include Canada and England. CODAP produces nearly 50 different printouts for analysis and use by consumers.

**Description of the System:**
The FAIR ADP System is a batch/On-Line system which stores and reports data pertaining to world-wide requirements and utilization of training equipment in support of the program. It includes cataloging and utilization data, status of material in-use, on contract and planned requirements for five out-years. Stock status and allowance data are maintained and reprocurement requirements, reorder points and budgetary estimates and projections are compiled. Data is provided DOD-wide, including catalogs, descriptive lists, asset and financial reports, projections, in hard copy, microfiche and in interface with other ADP systems in various magnetic tape and EAM card formats.

**Scope or Subjects Covered:**
Training Devices and training aids which have been specifically developed and procured for support of training programs. Normally involves some forms of simulation or simulation. Includes audiovisual equipments used in support of classroom training.

**Input or Source of Data:**
Manual & EAM card inputs and magnetic tape inputs from other activities, commands and data systems.

**How to Access the Data:**
Requests for data, reports to NAVTRAEQUIPCEN (N-44). No current external on-line interface.

Description of the System:
CANTRAC contains information on schools and formal training courses under the purview of the Chief of Naval Education and Training and Amphibious Forces, Atlantic and Pacific. It is a consolidation of the Navy Formal Schools Catalog, a series of 13 catalogs, each produced by separate Navy commands. Information provided with each course listed includes: purpose, scope, prerequisites, skill code, length, and other administrative information. CONTRAC is maintained by the Education and Training Office in Pensacola, Florida. It is being used to store and retrieve up-to-date, standardized information on all Navy formal courses, and support the periodic printing of hard copy versions of CANTRAC for service-wide distribution.

Scope or Subjects Covered:
Navy courses, course description, course location, purpose, scope, prerequisites, course length, etc.

Input or Source of Data:
From Navy training commands.

How to Access the Data:

Availability of the Data:
INFOCEN open to Government agencies.

Cost and Format:
Output: hard copy through INFOCEN (NAVEDTRA 10500), microfiche and on-line. Cost sharing basis to Government agencies.

System Hardware:
IBM 370/155

System Software:
Developed by Mead Technology Labs
Comments and Remarks:
Existing materials of relevance to a proposed course must be indexed by more sensitive criteria than course titles if efficient sharing of course materials is to exist.

Description of the System:
PQS is a Navy-wide qualification program entitled "Personnel Qualification Standards." The PQS is a method for qualifying officer and enlisted personnel to perform assigned duty. A PQS is a written compilation of knowledge and skills derived from task analysis, required to qualify for a specific watch station, maintain a specific equipment or system, or perform as a team member within the assigned unit. A PQS is in the format of a qualification guide, which asks the questions a trainee must answer to verify his readiness to perform given task and provides a record of his progress and final certification.

Scope or Subjects Covered:
Watchstations, maint. of equip., team performance. Theory, systems, watchstations, and qualification cards.

Input or Source of Data:
Naval task analysis.

How to Access the Data:
PQS through Navy Supply System (Phil. PA).

Availability of the Data:

Description of the System:
To provide a catalog of Bureau of Naval Personnel synchronized sound/slide programs and other selected audio/visual training programs.

Scope or Subjects Covered:
Each sound/slide program is packaged to consist of a series of 35mm slides, audio tape(s), and for certain programs a script and/or 16mm film clip. Slides are normally provided in Kodak Carousel/Ektographic slide trays. Most programs listed herein are designed to be used with the Eastman Kodak Carousel AV900 or Ektographic AV305 slide projector, together with an Ampex Model AV770 tape recorder (modified with a 20 Hz sensing panel to pick up an inaudible tone on the tape which will automatically activate the slide projector). Activities which do not have this special equipment will be provided tape with an 800 Hz audible tone.

Input or Source of Data:
Programs assembled by Naval Training Aids Center, San Francisco, CA.

How to Access the Data:
Use NAV PERS 301351-4 to identify program and write to Naval Training Aids Center and include: Program number and title, quantity required (justify if more than one of each program). Specify training program (including curriculum number, title, and topic, where applicable). Date required (if for loan, indicate inclusive dates of retention). Information as to whether or not the Ampex Model AV770 tape recorder (modified with 20 Hz sensing panel) is available, or if tapes with an 800 Hz audible tone are required.

Availability of the Data:
Government use or see primary contact.

Cost and Format:
Training Analysis and Evaluation Group (TAEG)

System Hardware:

System Software:

Comments and Remarks:

This catalog will be updated periodically. As programs are cancelled or superseded in the future, or other corrections are made, pertinent new pages will be provided to holding activities by the Naval Training Aids Center, San Francisco, for insertion into this catalog.

Nav Personnel Research Development Center (CCOPS)
San Diego, CA 92152

Company Phone:

Name of Point of Contact:
E. P. Somer

Phone Number of Point of Contact:
714-225-2191

Description of the System:
The Chief of Naval Personnel established the CCOPS system in August 1974. Objectives of the system are to minimize fleet disruptions by personnel surveys and to insure maximum utilization of collected data. The system is to perform three major functions: technical review of all proposed Navy personnel surveys to insure compliance with Navy standards, to prevent duplication, and to minimize intrusions; (2) coordination of data collection efforts with personnel survey coordinating officers Navy-wide; and (3) collection, storage, and retrieval of survey information including purpose, sponsor, questions asked, and sampling strategy employed.

Scope or Subjects Covered:
Personnel, surveys, sampling, attitude assessment.

Input or Source of Data:

How to Access the Data:
See primary contact.

Availability of the Data:
See primary contact.

Cost and Format:
A survey information storage and retrieval system cataloging CCOPS-approved surveys was developed. The fifth in a series of CCOPS letters was distributed to personnel managers and researchers to make known the availability of existing survey data.

System Hardware:

System Software:
Comments and Remarks:
This coordination also aids the research community by supplying centralized points for arranging data collection as well as insuring greater fleet cooperation with approved surveys.

Date Established:
1978

Organization Title:
Naval Tng Equip Cen, N-423, Index of Tech Reports

Mailing Address:
Naval Tng Equip Cen, N-423, Index of Tech Reports
Orlando, FL 32813

Company Phone:
646-5335

Name of Point of Contact:
Elma R. Craft

Phone Number of Point of Contact:
AU 791-5335

Description of the System:
The NAVTRAEEQUIPCEN Index of Technical Reports lists published Naval Training Equipment Center technical reports and technical notes which are available through the Defense Documentation Center (DDC) and which have resulted from basic research, exploratory development, and advanced development type projects. This index also contains a list of Naval Training Equipment Center patents (in-house and contractor).

Scope or Subjects Covered:
Reports, indexes, bibliographies, training devices, Naval training, scientific research, and studies.

Input or Source of Data:
Naval Training Equipment Center. Reports are cataloged when printed.

How to Access the Data:
Obtain classified publications through Defense Documentation Center on a "need-to-know" basis.

Availability of the Data:
Approved for public release; distribution unlimited.

Cost and Format:
Output: NAVTRADEV P-3695, hard copy.

System Hardware:

System Software:

Comments and Remarks:
Supersedes NAVTRADEV P-3695 of November 1973. (The Technical Report Index, P-3695 is presently being revised with issue proposed for 1 July 1978.)

Naval Training Center
Orlando, FL 32813

Company Phone:
305-646-4797

Name of Point of Contact:
Charlotte M. McDaniel

Phone Number of Point of Contact:
305-646-4797

Description of the System:
As of 1/3/79 the coordinate indexing system was "frozen". We are presently using a conventional cataloging system with terminology based on the Defense Documentation Center's retrieval and indexing terminology. Same access points are available; e.g., subject, author, etc.

Scope or Subjects Covered:
Simulation techniques, training devices and systems, supporting research and human factors studies.

Input or Source of Data:
Engineering and technical reports, manuals and handbooks generated under the Naval Training Equipment Center's research, technical, and engineering programs.

How to Access the Data:
Naval Training Equipment Center personnel and their contractors (with a monitor) use the system in the library. Other requests must be in writing (no special format) addressed to: Commanding Officer, Naval Training Equipment Center, Administration & Manpower Dept., Orlando, FL 32813.

Availability of the Data:
Usage is restricted to Naval Training Equipment Center personnel; their contractors (with a monitor), and others approved by Logistics and Training Material Management Dept., Orlando, FL 32813.

Cost and Format:
For written requests typed bibliographic data and/or availability information. No cost to qualified users; however, personnel limitations preclude in-depth searches and bibliographies.

System Hardware:
one
System Software:
none

Comments and Remarks:
Personnel limitations preclude in-depth searches and bibliographies by library staff.

Name of Data Source:
Research & Development Info System (RDIS)

Date Established:
1977

Organization Title:
R&D Coord Office (Code 06), NPRDC (RDIS)

Mailing Address:
R&D Coord Office (Code 06), NPRDC (RDIS)
San Diego, CA 92152

Company Phone:

Name of Point of Contact:
RE Blanchard

Phone Number of Point of Contact:

Description of the System:
RDIS will provide for info collection, storage, retrieval, and updating for all people-related R&D underway or recently completed in the Navy, Army, and Air Force. Ultimately, the RDIS could include other branches of the Federal Govt, selected academic institutions, and industrial groups from the private sector. The RDIS is being designed to serve various kinds of users whose requirements for types of info and level of detail likely will vary widely. Such users include top-level planners and decision makers, resource managers, technical directors, program managers, program administrators, research directors, and research practitioners. The basic components of the RDIS as planned include (1) a human resources R&D controlled vocabulary which will serve as the basic indexing and search language for the system; (2) a human resources R&D information network within several sources supplemental to the Research and Technology Work Unit Info Sys; and (3) a resources R&D data base with a specially designed information format. An information system for all RDT&E conducted in support of manpower, personnel, education and training, and human factors.

Scope or Subjects Covered:
An Information System for all RDT&E conducted in support of Navy Manpower, personnel, education and training, and human factors.

Input or Source of Data:

How to Access the Data:

Company Phone:
452-3521; AV 922-3521; (FTS) 948-3521

Name of Point of Contact:
Dr. I. Shever (Code N-392)

Phone Number of Point of Contact:
452-3521, AV 922-3521, (FTS) 948-3521

Description of the System:
The System is organized under the Marshall Information and Retrieval System (MIRADS). Primary access is through Demand Terminal Queries. The system also produces management reports in the following areas: MMTR, Staff Personnel Accounting and Allocation, SHORESTAMPS Instructor Computation, and Projected Student Loading.

Scope or Subjects Covered:
The files contain training and support statistics for those courses for which CNET or one of its functionals has Course Curriculum Control Authority.

Input or Source of Data:
File extracts are received from NITRAS containing course descriptive information and training statistics. A file extract is received from EPMAC which contains manning statistics and projections. The data base files are updated by functionals with activity support statistics.

How to Access the Data:
Local processing is coordinated through the system manager. Remote processing is via remote batch or demand terminals. Access procedures and passwords are provided to authorized users via the system manager.

Availability of the Data:
Authorization to use the system is controlled by the system sponsor CNET, CODE N-302. Access to the system is controlled by the system manager.

Cost and Format:
Processing time is at the rate of $215.00 per sup hour Magnetic tapes are billed at cost.

System Hardware:
The data base resides on the UNIVAC 1100/82. Access to the information is via RBT, Univac U200, and teletype compatible terminals.

Abstract of A Data Source

Name of Data Source:
Audio/Visual Device Summaries for Electronic Warfare

Date Established:
October 1974

Organization Title:
Naval Training Equipment Center (NAVTRAEOIPCEN) Code N-44

Mailing Address:
Naval Training Equipment Center
(NAVTRAEOIPCEN) Code N-44
Naval Training Center
Orlando, FL 32813

Company Phone:
AV 791-5608

Name of Point of Contact:
D. Kelly

Phone Number of Point of Contact:
AV 791-5608

Description of the System:
This catalog is published to satisfy the need of personnel engaged in learning/teaching the basic objectives of EW techniques used to detect, display, identify, locate, collect and analyse the characteristics of each electronic device. It provides the user the basis for developing techniques that will negate or limit the effectiveness of an enemy's electronic systems; also hostile strategic and tactical doctrines when EW is effectively used.

Scope or Subjects Covered:
The publication is designed to assist all Fleet activities in identifying Electronic Warfare and associated weapon systems oriented audio/visual programs currently available within the Navy inventory. The catalog contains a narrative summary of each EW Audio/Visual Device; indicating the specific nature and basic content of a given Program. A listing of the number of parts, their individual classifications, sound/slide set and stock numbers, audio tape running time, number of slides and release dates.

Input or Source of Data:
Through NAVTRAEOIPCEN

How to Access the Data:

Availability of the Data:
One-time requirements and request to be placed on the permanent distribution list for this publication, and changes should be addressed NAVTRAEOIPCEN, Code N-44.

Cost and Format:
The EW Summary Catalog is distributed in hard copy format to requiring Navy and DOD activities.
Training Analysis and Evaluation Group (TAEG)

Oct 79

Organization Title:
Management Information and Instructional Systems Activity (MIIA)

Mailing Address:
Management Information and Instructional Systems Activity (MIIA)
Naval Air Station
Pensacola, FL 32508

Company Phone:

Name of Point of Contact:
Lt. M. Noble

Phone Number of Point of Contact:
904-452-2668

Description of the System:
The NROTC System will provide the user with the capability to track NROTC personnel from the time of their initial selection as candidates, throughout their progression as college students, and eventually their commissioning into the Naval or Marine Officers Corps. The system will allow the user to: Establish accurate cost information; expedite the placement process; and provide the program manager with factual and historical data concerning each of the NROTC units and enrollment trends, costs, and other information necessary for unit evaluation and budgeting consideration. Included will be long term retention of statistical information for future study and evaluation.

Scope or Subjects Covered:
The system provides for the placement of NROTC scholarship selectees. This is accomplished by permitting prompt identification of fully qualified selectees through the weekly receipt of physical qualification information from the Department of Defense Medical Evaluation and Review Board (DOMERB). The system allows timely and sound management decisions to be made concerning selectee nomination and the offering of scholarships to alternate candidates to fill vacancies, made known by weekly or bi-weekly information concerning acceptance, declination and disqualification.

Input or Source of Data:
Personnel, Detachment Units, Grades and Naval Science Institute Data is maintained in the system.

How to Access the Data:
Request for access is made thru the system manager.

Availability of the Data:
No restrictions

Cost and Format:
Mission funded - No cost
Training Analysis and Evaluation Group (TAEG)

Abstract of A Data Source

Name of Data Source:
Computer Management Instruction (CMI) System

Date Established:

Organization Title:
Management Information and Instructional System Activity (MIISA)

Mailing Address:
Management Information and Instructional System Activity (MIISA)
Bldg. 600-A, Naval Air Station
Millington, TN 38054

Company Phone:
AV 966-5987, Larry Snell, CMI Branch Head

Name of Point of Contact:
Dwain Chambers, System Manager NTECHTRA, N824

Phone Number of Point of Contact:
AV 966-5375

Description of the System:
CMI provides management information, prediction, and tracking for approximately 8,000 students enrolled in 12 Naval technical training schools. In addition, CMI provides students with on-line learning assignments and test grading in an individualized learning environment.

Scope or Subjects Covered:
CMI now operates in the following Naval Schools: BE/E, AFUN(P), ADJ, PE, RM, AVA, EW, and IC. CMI is also used in recruit training evaluation of reading grade level evaluation and remediation.

Input or Source of Data:
Source data for the system is supplied manually by the user and by on-line interface with MILPERSIS.

How to Access the Data:
Access is gained to CMI from on-line clusters (terminal + opscan) for on-line function; and through remote job entry terminals for batch functions.

Availability of the Data:
Availability is restricted to users approved by CNET. Requests should be made through the system manager.

Cost and Format:
Tape and hardcopy output is available for information transmitted on a project basis through liaison with the system manager on NTECHTRA staff.

System Hardware:
Honeywell Level 66 Model 60.

System Software:
GCOS operating system with full complement of compilers and utilities.
Comments and Remarks:
CMI provides a full range of instruction management tools including: making learning assignments, grading tests, printing rosters, printing test history, predicting completion times, printing grade rosters, and item analysis.

Name of Data Source:
Integrated Disbursing and Accounting Financial Management System - IDAFMS

Date Established:

Organization Title:
Management Information and Instruction System Activity (MIISA)

Mailing Address:
Management Information and Instruction System Activity (MIISA)
Building 600-A
Naval Air Station
Pensacola, FL 32508

Company Phone:
Com: 904-425-2668; AV: 922-2668

Name of Point of Contact:
Lional Alexander, Div. Director Joe Dees - NETFIPC - System Manager

Phone Number of Point of Contact:
Com: 904-452-2633 AV: 922-2633

Description of the System:
The Integrated Disbursing and Accounting Financial Management System (IDAFMS) is a Data Base Managed system with remote terminal access for updates and retrieval of data. The system encompasses the disbursing and financial reporting system functions and four (4) primary accounting systems functions. The accounting functions consist of Resource Management, Allotment Accounting, Research and Development (R&D) and Reserve Pay, Navy (RPN) accounting. IDAFMS is a CNET developed system which will, when fully implemented, service 55 activities in the IDA network Region 7. The system currently services 32 activities. IDAFMS operates in both the on-line and batch modes. The data is totally current on a daily basis and accessed as desired by fund administrators and the Naval Education and Training Financial Information Processing Center, Pensacola. The system institutes an improved method of converting source data for input to the computer which includes pre-balancing of batch input data by the accounting technicians in lieu of post-balancing after processing by the ADP facility.

Scope or Subjects Covered:
IDAFMS is a disbursing and accounting system used to eliminate delays between the payment of commercial dealers' bills and the recording of the expenditures on the activities' records. It reduces the clerical effort required to reconcile payment data to accounting data and also reduces end of moth report processing time. Its primary user is the Chief of Naval Education and Training.

Input or Source of Data:
All accounting type source documents such as invoices, obligations, receipts, expenditures, labor, funds, work units, etc.
How to Access the Data:

On-line access to the system is made by authorized personnel only. System security is controlled by passwords assigned by the System Manager. The System Manager determines the designated users for both batch and on-line access. Changes to the system are requested via AD/IS Project Specification Request, CNET form 3230/4.

Availability of the Data:

The system is available to on-line users from 0600-1800 Monday thru Friday. Batch processes are scheduled during night shift operations.

Cost and Format:

The system provides hard copy, microfiche and tape outputs in addition to on-line CRT availability. The system is mission funded.

System Hardware:

The system is currently operational on an IBM 360/65 with 3270 compatible type CRT terminal. The system is being converted to a UNIVAC 1100/40 using U1200 terminals and is scheduled for implementation July 1980.

System Software:

Current: 360 OS, MVT; TOTAL AND ENVIRON/1 DMBS. Conversion: EXECUTIVE 8; DMS; TIP

FINANCIAL MANAGEMENT
Abstract of A Data Source

Name of Data Source:
Military Personnel Information System II (MILPERSIS II)

Date Established:

Organization Title:
Management Information and Instructional Systems Activity (MIISA) Branch, Office, Memphis

Mailing Address:
Management Information and Instructional Systems Activity (MIISA) Branch, Office, Memphis
Andrews AFB, MD 20331

Company Phone:
AV 966-5987 (Carl Weaver)

Name of Point of Contact:
Wilson Thomas

Phone Number of Point of Contact:
AV 966-5375

Description of the System:
The primary purpose of MILPERSIS II is to consolidate existing ADP personnel accounting systems into one single standardized system operating from a central site computer and provide for the following:
1. Control and submission of data to other Department of Defense ADP systems.
2. Acquisition of source data through information interchange with other ADP systems.
3. User capability to extract and manipulate report information from a common data base.
4. Automated preparation of standard enlisted service record, medical record, and dental record.
5. All other forms incidental to an individual's transfer from a training to a fleet activity.

Scope or Subjects Covered:
Provides personnel management support for the following commands and areas: recruits, students, staff, TPU, and tenant at San Diego, Great Lakes, and Orlando; student and staff at Corry Station.

Input or Source of Data:
Punched card in TAC format from all remote users. Tape input used from NITRAS, STD's, NMPC Fleet Tape, NPC All Navy UIC Tape, and BUPERS NES Tape.

How to Access the Data:
Remote locations use remote batch input; local applications are submitted as batch jobs. On-line locator is accessed via Honeywell VIP'S.

Availability of the Data:
The system is available for on-line locator seven days a week. Remote batch updating and processing is available from 1600 hours Sunday thru 2400 hours Friday.

Cost and Format:
No cost to users.
Training Analysis and Evaluation Group (TAEG)

System Hardware:
Honeywell Level 66 Model 60.

System Software:
GCOS operating system with full complement of compilers and utilities.

Comments and Remarks:
The quantifiable objectives of this ADS are: (1) Personnel requirements to support local student personnel accounting systems will be reduced through the consolidation of these systems into one sharing the CMI telecommunications equipment and lines for transmission of data, and (2) Automated generation and transmission of data to the NIRAS. Result is 90% workload reduction of the MILPERSIS.

Description of the System:
STDM is an on-line and batch system used to provide activities with enlisted assignments upon completion of school or upon attrition and for others such as staff upon normal rotation. Activities add data elements to data base files such as, mode of travel, leave address, detaching date and etc. and request draft lists and standard transfer directives on-line or request the complete transfer package in a batch mode.

Scope or Subjects Covered:
STDM is a military enlisted personnel transfer system.

Input or Source of Data:
Enlisted personnel assignment data from NMPC and EPMAC Enlisted Personnel transfer data from each user.

How to Access the Data:
Access to STDM is provided through CRT's or with batch input by tape to tape transmission. In either case access is gained to a central STDM data base.

Availability of the Data:
On-line CRT's are available from 0600-1800 Mon-Fri except holidays. Batch processing is done daily 2000.

Cost and Format:
Cost estimate is $210,982 Attach 1: STDM output products

System Hardware:
IBM 360-65 will be converted to either the UNIVAC 1100 or Honeywell 6000 by 1 Sept 80.

Phone Number of Point of Contact:
202 393-2420

Description of the System:
A comprehensive numerical info storage and retrieval system for the nation's major college of labor statistics. Objectives include tape format suitable for the storage of many different types of economic data; provision for maintenance of storage files; monitored operation to reduce response time; logical independence of retrieval and reduction operations by use of two discrete sets of user commands.

Scope or Subjects Covered:
Historical and current labor and manpower statistics for the nation, the states, and geographic areas. These files include, for example, employment, hours, and earnings statistics, by industry for the nation, states, and areas; the Consumer Price Index (CPI) and the Wholesale Price Index (WPI). A variety of statistical routines are available to users, including the Bureau of Labor Statistics Seasonal Factor Method for removing seasonal movement from time series.

Input or Source of Data:
Surveys and other data generation activities undertaken by the US Bur of Labor Statistics. The data base includes approx 30,000 monthly time series, of which 25,000 are regularly published by the US Bur of Lab Stat, as well as several cross-sectional data sets. Some time series commence as early as 1909.

How to Access the Data:
See primary contact

Availability of the Data:
See primary contact

Cost and Format:
Copies of data on mag tape at a cost. Access to all processing features through a language readily learnable by noncomputer oriented researchers. FORTRAN compatible output in addition to tabular output is available. Ten data files, each occupying 1 to 3 reels of mag tape, may be processed by the Info Sys. Eight of these files, designated the Data Bank, are the Bureau's official files-of-record.
System Hardware:
IBM 7074 with 10K word storage (53 bits/word) and nine 729 mag tape units; IBM 360/30 with 84K bytes, six 2401 mag tape units, two 2311 disks, one card reader, one reader/punch, and two printers.

## Abstract of A Data Source

**Name of Data Source:**
National Referral Center (NRC)

**Date Established:**
1962

**Organization Title:**

**Mailing Address:**
10-1st St SE
Wash, DC 20540

**Company Phone:**
202 426-5670

**Name of Point of Contact:**
M W McFarland

**Phone Number of Point of Contact:**
202 426-5670

**Description of the System:**
Center assists people who have questions in science and technology by referring them to organizations that can answer those questions. It does not itself attempt to provide technical answers - or even refer to literature that might contain such answers - but instead refers people to known sources of information (called "info resources" by the Center). In response to requests by mail or by phone, referral specialists will search the database and furnish - normally within five days or less - a list of suggested points of contact (with name, address, phone number, what info services to expect, etc.).

**Scope or Subjects Covered:**
All fields of science and technology: physical, biological, social, and engineering sciences and related technical areas. Referrals are to information resources in government, industry, and the academic and professional worlds.

**Input or Source of Data:**
Data are collected by sending questionnaires to potential sources of info. Data base for this free service is a sub-indexed inventory which contains descriptions of some 13,000 organizations with specialized knowledge in science and technology, including the social sciences.

**How to Access the Data:**
See primary contact

**Availability of the Data:**
Unrestricted See primary contact

**Cost and Format:**
No charge

**System Hardware:**
Computers for internat use only IBM 370/155

**System Software:**
Comments and Remarks:

Broad selections from this data base are also occasionally published in the series A Directory of Info Resources in the US sold by the Super of Documents, Gov Printing Office.

Description of the System:

Responsible for converting computer-readable form bibliographic data representing the current cataloging output of the US Lib of Cong and for making these data available to outside libraries and institutions on a subscription basis. The OFFICE is also charged with the automation of technical processes for the Library of Congress. The MARC II format which is used to manipulate and transmit bibliographic data is based on three elements: the structure, the content designators, and the content of each record. Records covered to date include English and French Language monographs and serials, maps, and films in all languages. Formats for music and sound recordings are in preparation.

Scope or Subjects Covered:

  Bibliographic data concerning all subjects represented by the collections of the US Library of Congress.

Input or Source of Data:

  Manuscript cards used in the cataloging process are transferred to a worksheet as one means of input; the second method of input involves the use of a machine program called format recognition which can process unedited catalog records and supply all the necessary content designators required for the full MARC record.

How to Access the Data:

Abstract of A Data Source

Name of Data Source:
NAEPE Assessment of Ed Progress (NAEP)

Date Established:
1964

Organization Title:
Ed Comm of the States (ECS)

Mailing Address:
Ed Comm of the States (ECS)
1860 Lincoln St, Suite 700
Denver, CO 80295

Company Phone:
(303) 861-4917

Name of Point of Contact:
Jack G. Schmidt (Dir. of User Services)

Phone Number of Point of Contact:
303 861-4917

Description of the System:
(NAEP), a project of the Ed Comm of the States, is an annual national survey of the knowledge, skills, understandings, and attitudes of certain groups of young Americans aged 9, 13, 17, and 26-35. The project has two major goals: (1) to make available data on the educational attainments of young Americans; and (2) to measure any growth or decline which may take place in selected aspects of the educational attainments of young Americans in certain subject areas. Advisory and consulting services, and data collection and analysis are major functions.

Scope or Subjects Covered:
Ten subject areas were chosen for assessment, with others to be added in the future; two subjects are assessed each year. Subjects selected are: science, writing, citizenship, reading, art, music, soc studies, math, career and occupational development, and art. Special one-time assessments have also been conducted in Basic Life Skills, Consumer Skills and Energy Knowledge and Attitudes.

Input or Source of Data:
Students in school are assessed in groups of up to sixteen, or in some cases, in individual interviews. Adults are interviewed individually in their home, and out-of-school 17-yr-olds are also interviewed individually. Assess is by means of written responses, discussions, and tasks to be performed.

How to Access the Data:
See primary contact person

Availability of the Data:
Services are available to professional organizations and other concerned groups, both ed and non-ed. Most NAEP publications are available on microfiche through the ERIC system.

Cost and Format:
NAEP Newsletter (6 times a year)—findings available upon request. Reports are published about twelve months after completion of assessment; more than 20 are available and others are in process. Reports can be ordered from address above. A current...
Cost and Format: (continued)
Pub list can be obtained from the NAEP offices. Mag tapes of
data are also available.

System Hardware:
IBM 360/50

System Software:
PL/1 FORTRAN

Comments and Remarks:
A project of the Ed Comm of the States (ECS), NAEP is supported
by the National Institute of Education. Members of the staff are
available to conduct workshops and to provide consultant
assistance in adapting many of NAEP's innovating procedures to
state and local ed assessments.

Natl Inst of Ed, Dept HEW (ERIC)

Mailing Address:
Natl Inst of Ed, Dept HEW (ERIC)
Wash, DC 20208

Company Phone:

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
ERIC is a natl info sys which disseminates educational research results, research-related mater, and other resource info that can be used in developing more effective ed programs. Through a network of specialized centers or clearinghouses, each of which is responsible for a particular educational area, the info is monitored, acquired, evaluated, abstracted, synthesized, indexed, and listed in ERIC ref products. Two computer readable data bases: RIE (Reser in Ed), (CIJE) Curr Index to Journals in Ed.

Scope or Subjects Covered:
ERIC focus is primarily on education, but there is considerable overlap with some aspects of mental health, as for example, the listings under the heading of drug addiction. Media covered: Research reports, descriptions of new or experimental education programs, reviews of research, theoretical or conceptual analyses of issues, interpretative summaries of research on a topic.

Input or Source of Data:
ERIC collects and disseminates currently available educational research reports and documents describing new developments in ed programs. Researchers and others can assist ERIC in the acquisition of significant documents (1) keeping the director of any clearinghouse informed on any new projects which relate to the specialty of the clearinghouse.

How to Access the Data:
For current material, the user can refer to the monthly issues and annual cumulative index of ERIC's abstracts journal, Research in Educ, searching the Subject Index under the descriptor terms obtained from the Thesaurus.

Availability of the Data:
No qualifications, Unrestricted ERIC's publications are available from the Government Printing Office, Wash, DC 20402

Cost and Format:
Clearinghouse outputs include monographs and state-of-the-art pub on educ problems and research. Documents are available in
Training Analysis and Evaluation Group (TAEG)  GOVT027

Cost and Format: (continued)

Microfiche or hard copy from the ERIC Doc Reprod Ser, Computer
Microfilm International Corp, Box 190, Arlington, Va 22210. The
cost of each document appears in the citation.

System Hardware:

System Software:

Comments and Remarks:

All ERIC Clearinghouses have active publication programs. Anyone
can get on the mailing list by submitting his name to the
Clearinghouse. Anyone who is likely to have recurring need for
making use of ERIC should be equipped with the Thesaurus.

Description of the System:
(SSIE) is a clearinghouse for info on on-going unclassified research. Gov agencies and non government organizations with major research programs furnish the Exchange with info on their current research. Non-Gov agencies include private foundations, fund-raising agencies, univ, industry, and individual investigators who wish to register their research. The Exchange is concerned with records of research planned or actually in progress. But older project summaries are on file.

Scope or Subjects Covered:
The Exchange provides broad coverage of basic and applied research in fields including learning, education, training, behavioral sci, etc. The Exch provides custom search ser in broad or specific subject areas. Selective dissemination of info in any search area is also avail monthly, quarterly, or semi-ann. Mostly domestic and foreign reser supported by US sources.

Input or Source of Data:
Active file of 200,000 current and recent research prog. Current file of 14,000 projects. Works with 1300 supporting organizations to assue quality descriptions.

How to Access the Data:

Description of the System:

Presents a funct descript of the large and complex SIL-II Model. SIL-II represents a major attempt to integrate, within one model structure, the training model outputs and training-related data bases already in existence. The Report represents, insofar as SIL-II is concerned, a documented description of what such a model should have as input data, and what its capability should be. The development of a fully operational SIL-II model remains a major future task for army training managers, a task which would require complete support at all levels of training management in addition to significant model building knowledge.

Scope or Subjects Covered:
Army training, Management planning and control, computer programming, army operations, integrated systems, models, students, instructors, scheduling, manpower utilization, courses (ed), input output processing, data processing, flow charting, job analysis, abundance, data bases. Trams (Training Management Modeling Sys), training management modeling system.

Description of the System:
Vol II of the Training Management Modeling Sys presents the basic methodology and structural framework for the student instructor load model, phase III (SIL III). This model is the result of an attempt to integrate the SIL-II training simulation model with the computation of manpower programs using linear programming (COMPLIP) manpower projection model in order to facilitate training management consideration within the total Army manpower planning function. Combining complip-determined accessions with SIL-II training requirement parameters and user-supplied inputs, this program derives 36 monthly estimates of the corresponding student input, output, load, and direct and overhead staffing requirements for total army service schools and total army training.

Scope or Subjects Covered:
Army Training, management planning and control Manpower utilization, data bases, data processing, army operations, computer programs, subroutines, linear programming, input output processing, courses (education), students, trainees, instructors, user needs, models, scheduling, computer programs.

Description of the System:
The R&D Coordination Sys (RDCS) will provide for info collection, storage, retrieval, and updating for all human resources R&D planned and underway in the Navy, Marine Corps, Air Force, and Army. Ultimately the RDCS could be expanded to include other branches of the Federal Government, selected academic institutions, and certain industrial groups in the private sector. This sys is for users ranging from researchers to top-level manager.

Scope or Subjects Covered:
The following basic RDCS components will be developed: 1. A human resources R & D controlled indexing and retrieval vocabulary; 2. An info network; 3. A specially compiled data base; and 4. A data base management sys to be used for querying the RDCS according to user needs.

Input or Source of Data:
In house project NPRDC Est completion 1980-81 Jan 77 - Jun 77: complete indexing Navy RDT&E data; updated indexing and retrieval vocabulary; expanded data base to include Army and AF data; developed new computer input data format and procedures; created initial computerized data base on data base management sys Model 204.

The proposed TIS will provide a central file at HQ Marine Corps containing course, student, cost, and statistical info on Marines undergoing formal inst. Training and modified Manpower Mgt Sys (MMS) reporting procedures will be used to collect the data.

Scope or Subjects Covered:
1. Identify, collect and aggregate the student and fiscal data necessary to produce the Military Manpower Training Report (MMTR) required by Public Law. 2. Support other related training management functions.

Input or Source of Data:
Mil Manpower Sys (MMS)

How to Access the Data:
Restricted to Marine Corps commands. Avail of data will be contingent upon local data processing capabilities. Info will normally be provided in report format.

Availability of the Data:
Info can be provided to external agencies after the Commandant of the Marine Corps' approval.

Cost and Format:
Dependent upon the request hard copy, microfiche, and tape are available.

System Hardware:
IBM 360/65

System Software:
COBOL

Comments and Remarks:
The TIS is essentially a historical record of schools data.

Description of the System:
The ASVAB mark sense evaluation and scoring subsystem (AMESS) scans, translates and scores ASVAB high school header, student identification and test answer cards placing reformatted BCD images on a 7 Track Honeywell compatible labeled tape. The ASVAB production reporting system (APRS) processes the data tape from AMESS. It homogenizes and organizes the data on a "by school basis." The raw scores are converted to composite, percentile and standards. Printed products of student results are produced for each of the Armed Services, US Coast Guard and high school vocational guidance counselor. Microfiche are produced for the Armed Forces Ent and Exam stations. Mag tape files of the student data, along with statistical data on each school, is collected for input to ASVAB monthly system.

Scope or Subjects Covered:
Armed Service Vocational Apt. Batt Sys

Input or Source of Data:
AMESS mark sense, APRS tape files, APDS files, cards, AMS files

Description of the System: CDTS can generally be described as being made up of two dependent subsystems—the computer system and the instructional material. The computer system permits the construction and maintenance of instructional materials, transmits instructional material to trainees based on trainee performance and course design directions, and keeps track of trainee progress. The computer system also produces records on trainee accomplishments. The instructional materials provided through COTS are divided into courses and lessons. Each CAI course is made up of one or more lessons. More than one lesson may be on the same subject or unit of instruction.

Scope or Subjects Covered: Computer --- instruction

Input or Source of Data: Disks, tapes, cards

How to Access the Data: Remote (i.e., Silent 700, Terminals, execupor) No request forms required, U.S. Public Phone Lines & also data phones

Availability of the Data: 2 hours a day 365 days a year. Usually limited to Govt. personnel with occasional exceptions for Businesses that do business with Govt.

Cost and Format: Outputs: lists, disk

System Hardware: H6000, B3500

AFHRL, Wright-Patterson AFB ISD, ADP (ADIT)
Dayton, Ohio 44533

Company Phone:

Name of Point of Contact:
Dr Ted Botterman

Phone Number of Point of Contact:
785-3771

Description of the System:
On-line ADP system (DOD INFOCEN) searchable by KWIC (keyword In Context) techniques. Data can be retrieved through on-line terminals and peripheral printers or from off-line hard copy reports. In addition to the abstract, the records contain up to 35 kinds of info, including tech data, eval of the article, variables studied and subject population.

Scope or Subjects Covered:
Abstracts of technical reports, journal articles, books and other original sources bearing on IS. About 9,570 records are now available and, through contract services, additional records are being prepared so that by July 1978 a total file of about 11,200 items is expected.

Input or Source of Data:
Submitted by participating activities, normally in the format of DD Form 1473.

How to Access the Data:
Access is by compatible computer terminal via commercial, AV or Tymnet comm channels to the on-line interactive, full text retrieval sys (INFOCEN) operated by the Aeronautical Sys Div, AFSC at Wright-Patterson AFB. Any dial-up terminal of common configuration may be used for this purpose. The system may be reached through both military AV and Comm phone lines.

Availability of the Data:
Authorization must be obtained from the system sponsor being developed for use by anyone with the DOD concerned with instructional system development (ISD)

Cost and Format:
Usage is reimbursable.

System Hardware:
Training Analysis and Evaluation Group (TAEG)

System Software:

Comments and Remarks:
See para 1 The system is presently being used by 18 elements of the Army, the Navy and the Air Force. It is anticipated that eventually all principal training agencies and concerned R&D organizations within DOD will access the file - probably through various offices.

Description of the System:
The Auto Records Control System is a comprehensive and timely system to manage the auto, manual, and microform personnel, records of the Air National Guard and the Air Reserve components of the USAF Total Force. This system will provide a real-time method of tracking receipt and status of all records on gains/losses to the records custodian. It will be dependent on strength transactions generated by the Adv Pers Data Sys. The strength affecting transactions generated by that sys would be loaded to the new system. The ARC master file would contain basic personnel data, plus fields for annotation of receipt or loss of the applicable record components. The record will also contain control info, suspense fields, and a remarks area. Records would be stored in a random access mode (fixed length records) under access control of the system software directly. Retrieval of these records for display or update would be on an individual basis via remote terminals (CRT). Displays would be axed format, and update would be in a field-by-field tutorial mode under software control.

Scope or Subjects Covered:

Input or Source of Data:
Gain and loss data to this sys would be via tape or card from the APDS supporting Burroughs 1714 computer. Updating to the ARC master file would be accomplished via remote terminals (CRTs).

How to Access the Data:
See primary contact

Availability of the Data:

AFROTC Accession System
Randolph AFB, Texas 78148

**Company Phone:**

**Name of Point of Contact:**
R. V. Dooling

**Phone Number of Point of Contact:**
487-6653

**Description of the System:**
The AFROTC Accession System is a subsystem of the Advanced Personnel Data System. It is used for forecasting, appointing, and tracking personnel being accessed to extended active duty, making required data changes for AFROTC personnel being commissioned into the Air Force.

**Scope or Subjects Covered:**
System contains personnel data (qualification data) on projected officer accessions.

**Input or Source of Data:**
AFROTC data base at Maxwell AFB, Alabama, feeds AFMPC Reserve Master Personnel File with initial accession data and any changes there-to.

**How to Access the Data:**
See primary contact

**Availability of the Data:**
See primary contact

**Cost and Format:**
Output available: paper, tape, card and over terminal.

**System Hardware:**
Two Burroughs 6700

**System Software:**
COBOL

**Comments and Remarks:**
The individuals record is loaded to the Reserve File at the beginning of the students junior year. When commissioned, an assignment is input at AFMPC to transfer the record from the Reserve File to the active duty file; additional transactions are generated to establish the members pay record.

Phone Number of Point of Contact:
AV 487-2658

Description of the System:
The Advanced Personnel Data System is a vertical, integrated, world-wide, automated system for collecting, processing, storing and communicating information for the management of AF personnel. It is integrated in that it encompasses active, Air Natl Gd and USAF Reserve members as well as civilian personnel; vertical and world-wide in that USAF installations participating include active duty Consolidated Base Personnel Offices (CBPOs), Air Natl Gd and USAF Reserve CBPOs, Consolidated Reserve Personnel Offices (CPOs), Civilian Personnel Offices (CPDs), the MAJCOM hqtrs, and various HAF activities; automated in that computers play an integral role at each level. In consonance with the management objectives of the USAF Personnel Plan, the major functions of promotion, accession, assignment, career management, training, management, and contingency management are included in the Advanced Personnel Data System.

Scope or Subjects Covered:
Personnel, advanced, data, management, world wide, USAF.

Input or Source of Data:
Input: More than 10 million personnel transaction are captured by the APDS each month. The types of input at each level are: A. AFMPC: Systems input consists of transactions and messages from CBPOs, CCOS MAJCOMs, HAF operations, ARPC, and interface systems. B. Base Level: Input transactions flow directly to AFMPC through AUTODIN from the base level system which is maintained on 33500 computers.

How to Access the Data:
See primary contact

Availability of the Data:
See primary contact

Cost and Format:
Outputs: outputs include promotion rosters, selection briefs, a strength summary, assignment notifications, worldwide locator rosters, and a wide variety of other personnel management products. Output media include punch cards, magnetic tape,
Cost and Format: (continued)
  printer lists, computer output microfilm, and messages displayed
  at remote terminals.

System Hardware:
  2-B6/700S at AFMPC and B3500/B3700/B4700 at base level

System Software:
  Air Force Personnel System Unique - table driven systems and
  Burroughs DMS

Comments and Remarks:
  Tie-In With Other Systems: The Air Reserve Forces and civ persl
  info processing sys are integral parts of the APDS. In addition,
  the APDS provides for the exchange of data with JUMPS, the Human
  Resources Lab., MACINS, the Air Force Acqy, the Air Univ (AFIT,
  ECI), the Flight Data Management System and offices of Personnel
  Management.

Description of the System:
The auto program evaluation system is designed to provide flexibility and greater capacity in carrying out the responsibilities of conducting studies of personal, social, educational, emotional, and environmental factors related to delinquency in the retrainee population. Program evaluation of internal processes and procedures are made to refine and develop more efficient methods of retraining. Long-range longitudinal and one-time studies are made with the goal of contributing to the development of criteria for screening out potential enlistees who have a high probability of delinquency. Prediction instruments are refined to provide better predictability of retrainee program. Policies and responsibilities are primarily described in AFR 125-5.

Scope or Subjects Covered:
Behavioral, retraining, training, delinquency, predictability, emotional, educational, environmental, USAF.

Input or Source of Data:
Biographical, social psychological, test results, and military history variables concerning each retrainee assigned are collected on punch cards for entry into data bank.

Gunter AFS, AL 36114

Company Phone:

Name of Point of Contact:

Phone Number of Point of Contact:

Description of the System:
The Command Manpower Data System is designed to provide Major
Command and Separate Operating Agency Directors of Manpower and
Organization a responsive data system with which to manage and
control their manpower resources. It receives, edits, manipulates, compares, simulates, updates, extracts, and outputs
manpower data in various forms and levels of detail. The system
automatically updates the command's manpower allocation status
with automated inputs from HQ USAF. Through major command user
inputs, it expands the relatively gross manpower allocations
into manpower authorizations by appending detailed position
attributes. The manpower authorizations and changes thereto are
transmitted to HQ USAF, AFMPC, and applicable base-level Data
Processing installations. Unit related data are input from the
AFMPC Personnel Accounting Symbol System. The CMDS has the
capability to simulate and price a proposed change prior to
actually updating the master files. In addition, it has both a
specialized and generalized retrieval capability.

Scope or Subjects Covered:
Personnel, manpower, resources, allocation

Input or Source of Data:
Input: Inputs to the Command Manpower Data System emanate from
three basic sources. Manpower Allocation revisions are input
from HQ USAF. Personnel Accounting Symbol revisions are input
from AFMPC. All other inputs are provided by the Major Command
Manpower and Organization activities. Within the Manpower
activities, there are basically two general areas of
responsibility for input: Manpower Requirements technicians are
responsible for inputting to the Key Retrieval, Project Work
File, and Price/Update Routines. The Data Management Function is
responsible for providing the remainder of the system inputs.
These manpower responsibilities may, however, be aligned
differently, at the discretion of director.

How to Access the Data:
See primary contact
Availability of the Data:
See primary contact

Cost and Format:
Outputs: Outputs from the Command Manpower Data System fall into three major categories as follows: (1) These consist of error lists, registers, Author Change Requests, and the like which either basically or exclusively assist in transaction input or provide the status of the various transactions. (2) Included in this category are Manpower Source Lists, Inquiry Responses, and in some cases, replies to Key Retrievals. These info outputs are produced only upon request. (3) The final category of sys output are reports to other activities which are transmitted via AUTODIN.

System Hardware:
H6000, H7705, 7705W, RLP300, RLP300T printers

System Software:
COBOL, GMAP, FORTRAN

Description of the System:
Objective to facilitate the rapid retrieval, processing, and effective presentation of info contained in personnel and training research data bases.

Scope or Subjects Covered:
Basic Military Training (Air Force) data are combined with reenlistment and/or losses transactions for one file. Other fields in the system relate to strength data tied to demographic data. Microfiche reports of single data elements.

Input or Source of Data:
AF Basic Military Training data are received from Air Training Command on enlisteds. The reenlistments & losses transactions are received from AFMPC at Randolph AFB, TX. Other files in the system are acquired from AFMPC and ATC.

How to Access the Data:

Availability of the Data:

Cost and Format:

System Hardware:

System Software:

Comments and Remarks:
Approach: (U) improved data storage and display techniques will be implemented, both off line and on line. File edits and identity rosters will be displayed on microfiche produced under longitudinal storage and retrieval system 4B-73. Longitudinal files reflecting a series of records through time for each case included in the file will be established and maintained. A test of the utility of the management info system 2000 will be made initally by using the generalized data index tape (GDI).

Description of the System:
This system provides foreign student training data to the Foreign
Military Training Affairs Group. It handles foreign student
training requests from unified commands or Military Assistance
Advisory Groups (MAAGs), and ATC technical training allocations
for foreign students. It provides local management products
controlled management info requirements. Modernization of the
system was approved under DAP/TPD/ATP ATC E75-6, to include
on-line real time processing. Foreign Affairs Management Info
Sys (FAMIS) was approved under DPP ATC E75-6-I. FAMIS provides
FMTAG with the products necessary to manage the foreign students
in training and projected for training in CONUS. It also
provides the on-line real time capability to respond rapidly to
foreign student training inquiries received from Congress, DOD,
USAF, the MAAGs, unified commands and approximately 82 training
installations.

Scope or Subjects Covered:
Foreign student, training, requests, MAAG, allocation

Input or Source of Data:
Computer cards for establishing and updating the MDSL file, WSCN
file, student data files and country location and ECL table
files.

Description of the System:
This subsystem maintains a Student Data Bank and a Class Master file. Student Status Actions submitted from all ATC Flying Training Bases (RCS: ATC-DX(W)7101) are the source transactions for maintaining the Student Data Bank through use of an edit/update process. The Class Mst File is output from the Flying Training Program Resources Subsystem and is maintained by this subys with minor revisions submitted as change card transactions by ATC DCS/Operations. It is used as a master file to edit student Status/Actions to insure the Base/Course/Class reported are authorized by HQS ATC. This sys provides HQ ATC with an automated means to compute, maintain and print flying training schedules, associated training resource requirements and related summary data.

Scope or Subjects Covered:
Flying training, schedules, student records, ATC

Description of the System:
Pre-candidate evaluation data such as applicant questionnaires, ACT scores, CEEB scores, athletic indexes and medical data are converted to punched cards and magnetic tape for computer processing. The computer is programmed to identify fully qualified applicants and applicants with deficient intelligence scores, medical indexes, and/or athletic indexes. The system also identifies candidates that are qualified for the USAF Academy but are not qualified for pilot training. The results of this processing are provided to members of Congress and the Vice President for their use in nominating qualified individuals to the USAF Academy.

Scope or Subjects Covered:

Input or Source of Data:
Inputs: PAR cores, CEEB scores, ACT scores, PAE scores, athletic/nonathletic indexes and applicant questionnaires.

How to Access the Data:
See primary contact

Availability of the Data:

Description of the System:
System provides a composite of approx 80 position groupings with six associated criteria for each position grouping, a career progression ladder comprised of these 80 positions, a two page data bank, and a man-job match. The data bank includes info relevant to personnel assignment and career management/development decisions. The career progression ladder is used in conjunction with the man-job match to determine whether selection for a specific position would represent career progression, regression, or a lateral assignment.

Scope or Subjects Covered:
Personnel, career, management, development, career progression, man-job, assignments.

Input or Source of Data:

Description of the System:
This system is designed to create and maintain records on students enrolled in the Resident Air War College program. The computer is used to enroll students, verify personnel data, provide enrollment master rosters, class statistics and section assignment listings. Student examinations are graded on the computer and individual student records are automatically updated. Each test is analyzed and the results provided to the evaluation section for their use. Current records are transferred to permanent historical file upon class graduation.

Scope or Subjects Covered:
War College, air, resident, student records, USAF

Input or Source of Data:
AU Form 4, Standard Answer Sheet; AU Form 10, Student Questionnaire; End of Seminar Subjective Grade (Punched Cards). AU Forms 4 and 10 are processed on the IBM 3881 Optical Mark Reader.

Name of Point of Contact:

Phone Number of Point of Contact: AV 487-2762

Description of the System:
The proposed system will provide more rapid response of certain reports preparation and statistical aggregation of some large data bases. It will involve generally three major areas of concern to the command staff of Recruiting Service. The first is a computer based processing and analysis of the recruiting market place, and the subsequent fair share goal allocations to the field recruiting force. The second major area of concern is the proper management of Recruiting Services budget and fiscal affairs. The third major area is to track results of the field recruiting efforts for management analysis purposes in both the short run and for long term effects.

Scope or Subjects Covered:
Recruit, management, budget, fiscal, USAF

Input or Source of Data:
All specific inputs are not yet defined but will consist of several market oriented data files that are currently available; recruiting budget and actual cost info, Air Force and DOD enlistment processing info, and Air Force job reservation information.

How to Access the Data:

Availability of the Data:

Cost and Format:
Air Force Recruiting Service Report of NPS Enlistments, and other statistical and Analytical products to be determined in detail.

System Hardware: H6060

System Software: COBOL
Comments and Remarks:

Tie in with other systems: This system will receive data extracts from the AFEES Reporting System (Army Recruiting Command), ARDS-PROMIS, and PACE (ATC). It will also eventually receive data from the base level General Accounting System. DSAD E027 ABPS Mgr AFDSOC

Description of the System:
To identify long-term effects of diverse variables on flying performance, to determine the relationship between daily grades and check grades, and to evaluate practice requirements and student progress rates (i.e., readiness to learn) during various phases of UFT by studying UPT grades and other appropriate measures. The primary objective is the establishment of a single UPT data base. The secondary objective is the conduct of statistical investigations on the data base.

Scope or Subjects Covered:
The daily flying grades will be obtained from Air Training Command. This data will be formatted for analysis by AFHRC/FT. As a minimum, the data will also include syllabus flight number, maneuver identification and IP grades. A series of statistical analyses will be performed on the data.
