LIGHTER-TTHAN-AIR (LTA) VEHICLES:
A TECHNICAL BIBLIOGRAPHY

David B. Bailey and
Richard E. Adams
Aircraft and Crew Systems Technology Directorate
NAVAL AIR DEVELOPMENT CENTER
Warminster, Pennsylvania 18974

FINAL REPORT

AIRTASK NO. A03P-03PA-001B/F41-411

Approved for Public Release; Distribution Unlimited

7 OCTOBER 1981

Prepared for
Naval Air Systems Command
Department of the Navy
Washington, D.C. 20361
REPORT NUMBERING SYSTEM — The numbering of technical project reports issued by the Naval Air Development Center is arranged for specific identification purposes. Each number consists of the Center acronym, the calendar year in which the number was assigned, the sequence number of the report within the specific calendar year, and the official 2-digit correspondence code of the Command Office or the Functional Directorate responsible for the report. For example: Report No. NADC-78015-20 indicates the fifteenth Center report for the year 1978, and prepared by the Systems Directorate. The numerical codes are as follows:

<table>
<thead>
<tr>
<th>CODE</th>

Lighter-Than-Air (LTA) Vehicles: A Technical Bibliography

Approved for Public Release; Distribution Unlimited

This technical bibliography provides a systematic accounting of Lighter-Than-Air (LTA) documents. This report should enable rapid review of past and present activities for specific individual applications. Both author and subject indices are included.
ACKNOWLEDGEMENTS

The assistance of Mr. Michael Poli of this Center is gratefully acknowledged by the authors.

APPENDIX A. ADDITIONAL (NEW) DOCUMENTS ............................ 115
I. INTRODUCTION

This document is intended to provide information for the Lighter-Than-Air (LTA) technical community. This bibliography is the result of numerous searches of both old and new literature on this topic since the fall of 1975. These searches have been conducted in support of investigations by the LTA Project Office (605B) at the Naval Air Development Center, Warminster, PA 18974. Hopefully, it will serve to assist the studies of others in this field by presenting in one volume a fairly complete listing of technical reports, papers, memoranda and articles.

The report format is organized to present an alphabetical authors index plus a cross-reference by subject.

Sources for the listings are suggested below. Note that any one or even two of the sources may not possess the entire collection. Sources are as follows:

a) Naval Air Systems Command
Technical Library (AIR-00D4)
Washington, DC 20361

b) History of Aviation Collection
The University of Texas at Dallas

80. Detail Specification for Model ZPG-1 Airship, SD-487-1, Department of the Navy, 2 October 1953.

82. Detail Specification for Model ZPG-3W Airship, SD-457-3W-1, Department of the Navy, 12 April 1956.

BUREAU OF AERONAUTICS (BUAER) AIRSHIP DESIGN MEMOS 1-401, LTA DESIGN GROUP:

87. HINSAKER, J. C. 1 - Standard Definitions Used in Design of ZR-1.

89. BURGESS, C. P. 5 - Comparative Longitudinal Strength of the ZR-1 and Other Rigid Airships.

90. MICOTTI, A. D. 6 - Distribution of Strength in L-49, R-38 and XR-1.

91. 7 - Detailed Longitudinal Strength Computation of Rigid Airship ZR-1.

92. 8 - Effect of Gas Pressure Upon the Netting and Longitudinals.

93. 9 - Transverse Strength of Airship ZR-1.

94. 10 - Aerodynamic Forces on Airship ZR-1.

95. 11 - Strength of the Fins and Control Surfaces of the Airship ZR-1.

96. 12 - The Function of the Corridor Structure in Carrying Loads.
97. 13 - Shearing Forces and Bending Moments Due to Deflated Gas Cells in Fleet Airship ZR-1.
98. 14 - Further Consideration on the Comparative Longitudinal Strength of the ZR-1 and Other Rigid Airships.
99. 15 - Strength Calculations of the Airship R-38.
100. 16 - Comment on Mr. W. W. Pagon's Paper on the Primary and Secondary Stresses in Rigid Airships.
101. 17 - Capacity of Gas Valves in Airship ZR-1.
102. 18 - Shearing Forces and Bending Moments in the Airship ZR-1 When Lying to the Mooring Mast.
103. 19 - Shearing Forces and Bending Moments Due to Deflated Gas Cells in Special Light Load Condition of Fleet Airship ZR-1.
104. 20- Additions and Corrections to Design Memo No. 8.
105. 21 - The Use of Correction Factors in Applying Bending Theory in Rigid Airships.
106. 22 - Analysis of Tests Conducted by the Bureau of Standards Upon Test Girders of the Airship.
107. BURGESS, C. P. 23 - Stresses in the Corridor of the ZR-1 Due to Lateral Inclination of the Airship.
108. 24 - Comparison of Aerodynamic Forces on ZR-1 and German Airships by Use of Zeppelin Company's Coefficient.
109. 25 - Factors of Safety in Airship ZR-1 by the Zeppelin Method of Calculation.
110. 26 - Stresses Observed on Sixth Trial Flight of ZR-1, September 27, 1923.
111. 27 - Stresses Observed in the Seventh Trial Flight of Airship ZR-1 (Lakehurst to St. Louis and return), Oct 1 to 3, 1923, and in Shed Bending Tests.
112. 28 - Interpretation of Photo-Elastic Experiments on Celluloid Model of the ZR-1.
113. 29 - Bending Test of ZR-1.
114. 30 - Experimental Determination of the Resistance and Admiralty Constant of the USS SHENANDOAH.

116. 32 - Forces on Airships in Gusts.

117. 33 - Determination of the Size and Horsepower of Rigid Airships for Any Desired Performance.

118. 34 - Forces on an Airship Secured to a Mooring Mast on a Rolling Ship.

119. 35 - Structure and Gas Cell Tests on Fleet Airship ZR-1 February 19 to March 2, 1925.

120. 36 - A Study of the Influence of Size Upon the Scouting Efficiency of Naval Airships.

121. 37 - Effect of the Position of the Tail Surfaces Upon the Bending Moments in Rigid Airships.

122. 38 - Rules for Procedure in Case of Deflation of a Gas Cell in the U.S.S. SHENANDOAH.

123. 39 - Acceleration Forces Upon an Airship Moving in a Series of Sine Curves.

124. 40 - Use and Computation of the Quantity $E \sin^2 \theta$ in Airships Having Regular Polygonal Cross-Sections.

125. 41 - Admiralty Constants of the U.S.S. SHENANDOAH as Calculated from Engine Tests.

126. 42 - Comparative Weights of Airships ZR-1 and ZR-3.

127. 43 - Interpretation of the C-7 Pressure Distribution Experiments.

128. 44 - Comparison of Dynamic Lift and Pressure Distribution on the Airship LOS ANGELES by Observation and Experiment.

129. 45 - Preliminary Design Calculations for a Rigid Airship of 6,000,000 cu. ft. gas volume.

130. 46 - Comparative Efficiency of Different Methods of Carrying Airplanes on Airships.

131. 47 - Deceleration Tests of U.S.S. LOS ANGELES.

132. 48 - Factors Determining the Endurance of Airships.
BUREAU OF AERONAUTICS (BUAER) AIRSHIP
DESIGN MEMOS 1-401, LTA DESIGN GROUP:

133. BURGESS, C.P.  (Continued)
134. 135. 136. 137. 138. 139. 140. 141. 142. 143. 144. 145. 146. 147. 148. 149. 150. 151. 152. 49 - Possible Advantages of Metalclad Airships.
50 - Towing Rigid Airships at Sea.
51 - Loading a Light Airship.
52 - Strength of Perforated Plate Webs in Metal Spars and Girders.
53 - Gas Pressure Bending Moment and Longitudinal Force in Airships.
54 - The Dynamical Stability of Airships.
55 - Strain Gage Tests on U.S.S. LOS ANGELES, May 25 to June 4, 1925.
56 - Comparative Weights of Main Frames of Rigid Airships With and Without Cross-Wiring.
57 - Photo-Elastic Experiments on Lengthened Model of U.S.S. SHENANDOAH.
58 - Deceleration Test of U.S.S. SHENANDOAH, 22 August 1925.
59 - Probable Performance of a Rigid Airship of 1,070,000 cu. ft. Volume.
60 - The Dynamic Lift Efficiency of Airships.
61 - Hydrogen and Coal Gas as Airship Fuels.
62 - Performance of Small Rigid Airships Designed by the Goodyear-Zeppelin Corporation.
63 - Strength and Pressure Tests on U.S.S. LOS ANGELES, April 6, May, 1926.
64 - Centrifugal Forces in the Kirsten-Boeing Propeller.
65 - The Comparative Explosibility of Liquid and Gaseous Fuels for Airships.
67 - Comparative Factors of Safety in Bridges and Aircraft.
68 - A Method of Testing a Stub Mooring Mast for Airships.
153. BURGESS, C. P. (Continued) 159. 75 - Relation Between Size and Performance of Large Airships.
154. 70 - Effect of Netting Tension on Gas Pressure Loads on Longitudinals.
155. 71 - The Use of Strain Gages on Structural Members Carrying Combined Bending and Axial Loads.
156. 72 - Torsional Strength of Two-Spar and Multi-Spar Wings.
157. 73 - Note on Deceleration Tests of French Airships.
158. 74 - Cross-Wing Force and Rate of Fall of Airships.
159. 75 - Relation Between Size and Performance of Large Airships.
160. 76 - Strength of British Airship R-100.
161. 77 - Stresses in U.S.S. LOS ANGELES Held Across a 20-Mile Wind.
162. 78 - Stresses in Deflation Test of U.S.S. LOS ANGELES.
163. 79 - Distribution of Dynamic Lift on U.S.S. LOS ANGELES.
164. 80 - Comparative Strength of Airships.
165. 81 - Forces on U.S.S. LOS ANGELES When Held at Portable Moving Mast.
166. 82 - Speed and Deceleration Trials of U.S.S. LOS ANGELES, September, 1927.
167. 83 - Forces in Airplane Landing Device for U.S.S. LOS ANGELES.
170. 86 - Forces on U.S.S. LOS ANGELES During Wind Shifts at Mooring Mast.
171. 87 - Gas Cells Sub-Division for Airship ZR-4.
172. 88 - Inflation and Strength Tests of Stern Section of Metalclad Airship MC-2.
173. 80 - Performance of a Nonrigid Airship of 320,000 cu. ft. Volume, Inflated with Helium and Fuel Gas.

174. 90 - The Properties of Cold Worked Duralumin.

175. 91 - A Discussion of Methods for Providing a View of the Bottom Fin and Rudder from the Control Car of the ZRS-4.

176. 92 - Static Bending Moments and Stresses in the U.S.S. LOS ANGELES as Designed and in Service in 1930.

178. 94 - Comparative Strength and Factors of Safety of U.S.S. LOS ANGELES as Designed and in Service in 1930.

179. 96 - Water Recovery Apparatus for Airships.

180. 97 - Comparison of the Proposed "100 Ton, 100 Mile" Metalclad Airship, and an Equivalent Rigid Airship of Conventional Design.

181. 98 - Stress Analysis of a Main Frame of Airship ZRS-4.

183. 100 - Internal vs. External Engines for Airships.

184. 101 - Effect of Slackening Gas Cell Wires on U.S.S. LOS ANGELES.

185. 102 - Progress in Airship Design From U.S.S. SHENANDOAH to U.S.S. AKRON.

186. 103 - External vs. Internal Radiators for Airships.

188. 105 - Theory of the Inherently Stiff Ring Frame for Airships.

189. 106 - The Strength of Airship Mooring Masts.

190. 107 - Methods of Supporting the Bow of an Airship While Mooring to a Mast.

191. 108 - Significance of the Tests of the Metal Models of Airships ZRS-4 and MC-38 in the Variable Density Wind Tunnel.
192. BURGESS, C. P. (Continued)
109. - Internal Radiators for Airships.
110. - Effect of Adding One Main Bay to the ZRS-5.
112. - Comparison of Static Bending Tests of Airships LOS ANGELES and AKRON.
113. - Resistance of a Core Radiator Enclosed in a Duct.
114. - Strength of Expeditionary Mooring Masts.
115. - Forces on the Airplane Trapeze for U.S.S. AKRON.
116. - Speed, Resistance and Fuel Consumption of U.S.S. AKRON.
118. - Forces on U.S.S. AKRON During Ground Handling.
119. - Analyses of the Goodyear-Zeppelin's Company Proposals to Reduce the Drag of the Airship MACON.
120. - Steam Power Plant for Airships, Proposed by the Great Lakes Aircraft Corporation.
121. - Calculation of Stresses in Three Bridle System of Stern Handling Lines for U.S.S. AKRON.
122. - Use of Dynamic Lift in the U.S.S. AKRON in Deflated Gas Cell Conditions.
123. - Resistance of the Bare Hull of the U.S.S. AKRON.
124. - Note on the Variation of Wind Velocity with Altitude.
125. - Air Cooling vs. Water Cooling for Mayback Engine Manifolds.
126. - Cooling of Airship Radiators by Circulation of Internal Air.
127. - Stress in a Ring Subjected to Two Opposite Forces.
128. - The Vibration of Structures.
130. - Improvements in Mark IV Water Recovery Apparatus.
215.  132 - The Aerodynamic Control of Airships.
216.  133 - Bow Elevators for Airships.
217.  134 - Local vs. General Loads on Airship Girders.
220.  137 - A Useful Beam and Column Relation.
221.  138 - Airship Outer Cover Tension and Loads on Longitudinals.
222.  139 - The Relative Weights of Metalclad and Fabric Airships.
223.  140 - Aileron Controlled Bow Elevators.
224.  141 - Stresses in Two-Spar Cantilever Wings.
225.  142 - Comparative Bending Strength and Weight of Structural and Pressure Airships.
226.  143 - Transverse Strength of Flying Boats.
227.  144 - Torsional Stresses in Box Beams.
228.  145 - Analysis of Flat Plate and Stiffener Combinations Tested by Consolidated Aircraft Corporation.
229.  146 - Maybach Engines and Water Recovery Versus Diesel Engines and Hydrogen Balloons in U.S.S. MACON.
230.  147 - Reply to Criticism of Metalclad Airship Corp. on Design Memorandum No. 142.
231.  148 - Shearing Forces in Airships.
232.  149 - The Effect of Double Drag Bracing in Biplanes.
233.  150 - Liquid Hydrogen as Fuel for Airships.
234.  151 - The Bending Strength of Metalclad Airships.
235.  152 - The Rigidity of Intermediate Supports for Columns.
236. BURGESS, C. P. (Continued) 153 - The Distribution of Torsion Between the Spars and Drag Bracing of Cantilever Wings.

237. 154 - Strength and Weight of the Spar-Type Airship.

238. 155 - Development of Spot Welding of Al clad by the Aluminum Company of America.

239. 156 - Characteristics of Hydrogen - Propane Fuel Gas Mixtures.

241. 158 - Stress Analysis of Biplane Wing Trusses.

242. 159 - Ratio of Arc to Chord When the Angle Subtended is Small.

243. 160 - Obtaining Water Ballast From the Atmosphere or Engine Exhaust by Means of Silica Gel.

244. 161 - Simple Expressions for the Strength of Thin-Walled Cylinders in Bending or Compression.

245. 162 - The Stress Analysis of Rings.

246. 163 - The Diving Planes of Submarine Vessels.

247. 164 - The Critical Stresses of Thin Curved and Flat Plates.

248. 165 - The Solution of Numerical Simultaneous Equations of the First Degree.

250. 167 - The Strength of an Euler Column with One Fixed and One Pinned End.

251. 168 - A Method of Determining the Best Airplane Wing Proportions.

252. 169 - Airship Fin and Rudder Loads.

253. 170 - The Elastic Axis of Stressed Skin Wings.

254. 171 - Bending Stresses in Monocoques.

255. 172 - The Tension in a Fabric Surface Due to Normal Pressure.

276.  
277.  

173 - Variations of the Modulus of Elasticity in Redundant Structures.

174 - Compartmentation in Airships and Surface Ships.

175 - Duralumin Masts.

176 - Performance of 1,200,000 ft.³ Metalclad Airship.

177 - Helium versus Air as a Cooling Medium for Radiators.

178 - Some Characteristics of Induced Drag.

179 - Wing Truss and Spar Analysis of Bureau Aero. Design No. 133.

180 - The Lift-Drag of Airships.

181 - Variation of the Properties of a Structural Section with Shift of the Neutral Axis.

182 - The Calculation of the Beam and Torsional Frequencies of Vibration of Cantilever Wings.

183 - Range with Relay System.

184 - Relation Between Length of Voyage and Revenue of Commercial Carriers.

185 - Comparative Efficiency of Airship Fuel Gases.

186 - On Worms and Wedges.

187 - Vent holes for Seaplane Floats.

188 - Gust Required to Carry Away Fins of U.S.S. MACON.

189 - Center Tunnel Airship Proposed by the Virginia Airship Company.

190 - Comparative Strength of Rigid Airships.

191 - The Structure of Rigid Airships.

192 - Forces on the U.S.S. LOS ANGELES at a Mooring Mast.

193 - Requirements for Proposed Airship K-2.

194 - Discussion of the Report of the Airworthiness of Airships Panel (British Aeronautic Research Committee R. & M. No. 970).

BUREAU OF AERONAUTICS (BUAER) AIRSHIP
DESIGN MEMOS 1-401, LTA DESIGN GROUP:

322. BURGESS, C. P. 239 - The Bending of Thin Walled Tubes.

323. 240 - Deflection of Cantilever Wing Spurs.

324. 241 - L/D and Range of Aircraft.

325. 242 - Comparative Rigidity of Deep Ring and Wire Braced Frames.

326. 243 - Comparison of 7.8 Million cu. ft. Airship Proposed by Goodyear-Zeppelin Corp. and U.S.S. MACON.

327. 244 - Progress in Flying Boats, 1933-1936.

328. 245 - The Influence of the Air in Damping Wing Vibrations.

329. 246 - Effect of Slenderness Ratio Upon Structural Weight of Airships.

331. 248 - Isolation of Airplane Engine Vibrations.

332. 249 - Airships vs. Surface Ships as Carriers of Airplane Bombers.

333. 250 - Performance of the HINDENBURG as a Carrier for Bombing Airplanes.

334. 251 - Bending Moment Due to Axial Stress in a Ring.

335. 252 - Discussion of Airship Structural Model Test by Goodyear Tire & Rubber Co.

337. 254 - Use of an Easily Liquifiable Fuel Gas for Buoyancy Control in Airships.

338. 255 - A Relation Between Weight and Variation of Horsepower with Speed.

339. 256 - Comparative Performance of Nonrigid and Metalclad Airships of 750,000 cu. ft. Vol.

340. 257 - Comparative Weights of the Respess and Zeppelin Type Airships.

341. 258 - Relation Between Speed, Weight and Horsepower of Gliding Craft.

18
342. BURGESS, C. P. (Continued)

259 - Circumferential Reinforcing Bands on Thin-Shell Pressure Vessels.

260 - Comparison of Tests of Airships Hull Models in the NACA and NPL Variable Density Wind Tunnels.

261 - Analysis of a Radially Braced Continuous Ring by the Three Moment Equation.

262 - Forces on Airships in Gusts.

263 - The Required Strength of Airships.

264 - Boundary Layer Control in Airships.

265 - Comparative Performances of Commercial Airships Inflated with Hydrogen and with Helium.

266 - Ballasting an Airship by Removing Hydrogen from a Helium-Hydrogen Mixture.

267 - Temperature Stresses in Structures of Steel and Aluminum Alloy in Combination.

268 - Performance of Respess Airships.

269 - Progress of Corrosion in Metalclad Airships ZMC-2.

270 - The Stability of an Airship Structure Considered as a Stiffened Shell.

271 - Airships as Airplane Carriers.

272 - The Economic Efficiencies of Airships and Flying Bouts.

273 - Economic Efficiencies of the China Clipper and the German Seaplane HA-139.

274 - The Ultimate Airship.

275 - The Relation Between the Weight, Efficiency and Size of Structures and Machines.

276 - The Surface Area of Ellipsoids.

277 - Preliminary Analysis of Structural Tests of 7.5 Million cu. ft. Airship Model.

278 - The Support of Flat Plates Against Normal Pressure.

279 - The Theory of Flexure Plates.

364. 281 - An Airplane Carrier Airship.

365. 282 - Preliminary Design Calculations for 9,500,000 cu. ft. Airplane Carrier Airship.

366. 283 - The Resistance and Prismatic Coefficient of Streamline Bodies.

367. 284 - Fighter Airplanes on Airships.

369. 286 - The Development of Airship Girders from 1916 to 1937.

370. 287 - A Note on Reynolds Number and Skin Friction.

371. 288 - Permissible Roughness of Airship Hulls.

372. 289 - Possibility of a Man-Power Airship.

373. 290 - Accelerations of Nonrigid Airships.

374. 291 - Airplane Wing Loading.

375. 292 - The Energy of Rubber Cords.

376. 293 - The Goodyear-Zeppelin Version of the Class K Airship Form.

377. 294 - The Performance of an Airship-Based Dive Bomber.

378. 295 - Methods of Storing Energy on Aircraft.

379. 296 - Optimum Wing Thickness Ratio.

380. 297 - Relative Shear Stiffness Provided by Sheet and Diagonal Members.

381. 298 - Airplane Carrying Capacity of a 3,000,000 cu. ft. Airship.

382. 299 - Picking Up Sea-Water Ballast.

384. 301 - Comparative Aerodynamic Efficiencies of Liquid and Air Cooled Engines.

20
BUREAU OF AERONAUTICS (BUAER) AIRSHIP
DESIGN MEMOS 1-401, I.TA DESIGN GROUP:

385. BURGESS, C. P. 302 - Skin Friction of Smooth and Rough Flat Plates.

933, 945, 957, 966, 985, 1040, 1041, 1070, 1156, 1184, 1209.
B. Design Considerations (cont):

3. Technologies (cont):

e) General:

18, 22, 26, 27, 30, 47, 48, 49, 74, 101, 117, 171, 175, 180, 185, 191,
240, 277, 281, 286, 313, 326, 339, 357, 367, 389, 429, 430, 448, 457,
491, 493, 494, 496, 509, 510, 511, 529, 530, 539, 541, 568, 569, 572,
576, 604, 606, 608, 609, 614, 630, 633, 811, 824, 825, 859, 882, 892,
901, 927, 938, 943, 1020, 1039, 1061, 1074, 1092, 1097, 1101,
1109, 1117, 1124, 1126, 1148, 1149, 1202, 1203, 1221, 1224, 1225,
1226, 1235, 1242.
B. Design Considerations (cont):

3. Technologies (cont):

f) Stability and Control:

2, 14, 30, 54, 56, 57, 60, 116, 118, 123, 138, 153, 169, 179, 186, 213,
215, 216, 223, 243, 246, 271, 275, 279, 283, 285, 292, 293, 337, 343,
345, 349, 382, 383, 389, 403, 404, 423, 443, 456, 467, 473, 475, 482,
490, 492, 500, 502, 519, 520, 538, 543, 544, 545, 546, 549, 558, 559,
560, 561, 582, 591, 596, 597, 614, 622, 624, 627, 646, 691, 699, 699,
704, 720, 726, 729, 731, 733, 735, 736, 737, 739, 740, 741, 742, 743,
744, 745, 746, 747, 749, 750, 751, 752, 753, 755, 757, 758, 760, 761,
768, 770, 773, 775, 777, 778, 780, 781, 785, 786, 788, 791, 792, 793,
795, 801, 815, 839, 852, 868, 903, 925, 929, 930, 940, 953, 975, 976,
978, 983, 988, 989, 999, 1000, 1022, 1028, 1040, 1041, 1051, 1055,
1056, 1062, 1063, 1065, 1075, 1094, 1095, 1133, 1155, 1157, 1159,
1164, 1183, 1231, 1233, 1247.
B. Design Considerations (cont):

3. Technologies (cont):

   g) Human Factors:

   517, 943, 980, 1017, 1069.
B. Design Considerations (cont):

3. Technologies (cont):

   h) Support Equipment:

   1, 28, 44, 46, 53, 58, 115, 152, 167, 168, 169, 189, 190, 197, 258, 282,
   382, 428, 458, 459, 475, 516, 654, 655, 680, 717, 723, 804, 828, 862,
   985, 993, 994, 999, 1010, 1049, 1096, 1098, 1106, 1107, 1108, 1153,
   1223.
B. Design Considerations (cont):

3. Technologies (cont):
   
   1) Manufacturing:
   
   891, 892, 936, 1080.
B. Design Considerations (cont):

4. Performance Estimates:

C. Fabrication:

1. Past:

51, 286, 526, 641, 642, 1080, 1214.
C. Fabrication (cont):

2. Present/Future:

   51, 1080.
D. Test and Evaluation:

1. Ground:

3, 8, 9, 10, 484, 581, 662, 675, 676, 677, 678, 680, 684, 707, 814, 1010, 1253, 1254.
D. Test and Evaluation (cont):

2. Flight:

3, 8, 9, 10, 487, 506, 514, 556, 557, 581, 582, 662, 676, 677, 678, 680, 701, 814, 1002, 1003, 1005.
E. Acceptance Tests:

581, 662, 675, 676, 677, 678, 679, 707, 712, 814.
F. Operation:

1. Flight Handbooks/Procedures:

78, 85, 86, 122, 878, 884, 984, 985, 990, 1006, 1042.
2. Evaluations:
   a) Vehicle:
F. Operation (cont):

2. Evaluation (cont):

b) Sensor:

29, 61, 547, 566, 585, 589, 656, 658, 687, 698, 699, 702, 707, 709,
718, 780, 823, 845, 942, 949, 979, 987, 995, 997, 1007, 1008, 1009,
1011, 1012, 1013, 1113, 1114.
F. Operation (cont):

2. Evaluation (cont):

c) Weapons:

61, 79, 639, 676, 681, 996.
F. Operation (cont):

2. Evaluation (cont):

d) Fleet Exercises:

851, 991, 992, 1004, 1007, 1086, 1132.
F. Operation (cont):

2. Evaluation (cont):

e) Support Equipment:

593, 985, 994, 1010, 1153.
F. Operation (cont):

3. Mission Performance:
   a) ASW:
      547, 595, 615, 710, 713, 808, 809, 810, 823, 851, 921, 942, 1007,
      1012, 1013, 1014.
F. Operation (cont):

b) AEW:

   644, 649, 653, 693, 713, 851, 949.
F. Operation (cont):

c) Other:

332, 333, 832.
F. Operation (cont):

4. Ground Handling:

F. Operation (cont):

5. Vulnerability:
   
a) Weather:

    756, 759, 764, 834.
F. Operation (cont):

5. Vulnerability (cont):

b) Hostile Action:

426, 469, 639.
F. Operation (cont):

6. History:

11, 39, 42, 50, 51, 59, 62, 68, 70, 87, 88, 287, 369, 429, 489, 493, 501,
509, 527, 553, 554, 555, 563, 565, 571, 573, 588, 607, 618, 641, 812, 817,
824, 825, 830, 837, 838, 846, 847, 848, 849, 950, 851, 853, 855, 856, 858,
904, 905, 906, 909, 919, 928, 958, 959, 960, 961, 963, 985, 991, 992, 1001,
1004, 1018, 1020, 1025, 1050, 1074, 1079, 1082, 1085, 1088, 1089,
1090, 1091, 1121, 1132, 1134, 1135, 1142, 1144, 1145, 1146, 1147, 1156,
1158, 1163, 1170, 1189, 1198, 1201, 1208, 1215, 1222, 1246.
F. Operation (cont):

7. Environmental Data/Considerations:

45, 207, 311, 387, 654, 725, 756, 759, 762, 764, 776, 789, 807, 841, 901, 924, 1060, 1066, 1067, 1072, 1122, 1169, 1236.
G. **Costing:**

15, 32, 462, 505, 603, 638, 640, 716, 831, 853, 1086, 1128, 1131.
