1. Introduction

1.1 Purpose. This paper sets forth the specific functions of individual billets within the Naval Air Training Command (NATRACOM) as currently documented. Each function has been assigned a unique alpha-numeric name for future reference purposes. The motivation is to provide a manageable fundamental basis for determining where and to what extent an ADP system can render direct support to the established tasks within NATRACOM—a relatively stable organization. Any proposed ADP system and its initial functional expectations should have a clearly responsible relationship to one or more of these specific functions. If that is not the case, then there is the question of whether the proposed system is simply a self-serving one or, perhaps, just misguided. This is not to say that ADP cannot bring about highly desirable new capabilities in a mature application but that should come after the fundamental requirements have been satisfied and are running smoothly. Moreover, specific functions provide a sanitary basis for an analytic comparison of competing systems; even though it is clear that the organization manuals for the various echelons within NATRACOM were not written with ADP support particularly in mind.
1.2 **Coding of Function Names.** As a means of providing an abbreviated handle to each function, a system of name assignments was improvised. $XYY-ZZ$ where:

- $X =$ Alpha character for the echelon
- $YY =$ Numeric characters for staff division or branch/operating department or division
- $ZZ =$ Numeric characters for sequential number.

For $X = N$:

- $W$: Chief of Naval Air Training (CNATRA) Staff
- $W$: Training Air Wing (TRAURING)
- $A$: Naval Air Station (NAS)
- $S$: Training Squadron (TRARON)
- $C$: Naval Aviation Schools Command (NAVAVSCOLSCom).

1.3 **Background.** Reference [1] sets forth the functional expectations of three partially documented management information system (MISs) intended for the NATRACOM environment. The three systems are identified by the following titles.

- **NATIS:** Naval Air Training Command Management Information System
- **ATSS:** Aviation Training Support System (modified for NATRACOM)
- **VTXTS-TIS:** VTX Training System Training Integration System (the VTX is a new jet trainer under development and designated the T-45)

Reference [1] makes a highly aggregated comparison of the three systems in terms of system architecture and functional performance requirements.

1.4 **Foreground.** A forthcoming paper will compare the same three systems as in Reference [1] in terms of the specific functions contained herein.

2. Chief of Naval Air Training Staff Functions

2.1 Command Responsibility and Staff Doctrine

2.1.1 Command Responsibility. The Chief of Naval Air Training is responsible to the Chief of Naval Education and Training for the exercise of military command of assigned units and to carry out the functions as set forth in CNETINST 5450.3B.

2.1.2 Mission. To provide undergraduate pilot training and undergraduate naval flight officer training for Navy, Marine Corps and Coast Guard Personnel and selected foreign nationals. Supervise and coordinate the functions of all naval aviation activities in the Naval Education and Training Command not specifically assigned to other functional commanders. Prosecute such other aviation training tasks as the Chief of Naval Education and Training may direct.

2.1.3 Staff Mission. The mission of the staff is to assist CNATRA in the discharge of his command functions. To this end, the staff will perform the following general tasks:

a. Gather and evaluate detailed and accurate information on pertinent phases of the existing situation as it relates to the mission of the command;

b. Prepare plans, schedules, directives and reports based upon such information or in compliance with directives received from higher authority;

c. Translate the decisions of CNATRA into directives;

d. Disseminate information and directives to subordinate commanders, and information and reports to higher authority, rapidly, accurately and completely;

e. Supervise and evaluate the execution of CNATRA's directives by subordinate commands.

4.1.4 Civilian Personnel Department.

12000: Civilian Personnel Department. Civilian personnel administration is a staff function to line management. It is the policy of the Deputy Assistant Secretary of the Navy that each activity employing 100 or more employees establish a single civilian personnel staff responsible for advising and assisting command in developing and administering a civilian personnel management program to meet its needs.

The typical organization promulgated by Civilian Manpower Management Instruction (CMMI 250D) has been adopted as the organization standard for civilian personnel administration with the following modification and amplification:

a. Employee Relations and Employee Services are usually combined into an Employee Relations and Services Division.

b. Employee counseling, labor-management relations, performance evaluation, and incentive awards functions are assigned to the Employee Relations and Services Division.

A small activity may not require a civilian personnel staff large enough to warrant the formal establishment of branches as indicated in the standard organization. However, in such cases, a Civilian Personnel Officer should be appointed as a special assistant to the Commanding Officer, to direct a small group of qualified personnel in carrying out functions. These functions should be grouped insofar as possible in relation to Branch responsibilities when assigning functions to individuals within the limited staff. In all cases, specific responsibility for each personnel function should be specifically assigned.
