Mobilization Concepts Development Center
National Defense University
1983
INTRODUCTION

Within recent years, the study of mobilization and industrial preparedness has intensified within the defense community. With the founding of the Mobilization Concepts Development Center (MCDC) at the National Defense University (NDU) in April 1982, a new focal point for research was established. The charter of MCDC provides in part that it will "Establish a national repository of historical documents, analytical studies and contemporary policy papers and research reports..." As one of its projects, MCDC is embarked on the establishment of such a repository and the attached bibliography is the result of extensive research into the mobilization-related data sources.

This bibliography is meant to assist the faculty, staff and students of all the National Defense University components as well as other researchers. In order to facilitate the use of this document during the current academic year (AY 1983-84), we are forwarding this pre-publication edition. This document is the first of five publications that together will attempt to be the definitive bibliography of mobilization-related literature. When completed the series will have the following five volumes:

I - PERIODICAL ARTICLES
II - BOOKS AND MONOGRAPHS
III - CONGRESSIONAL DOCUMENTS
IV - TECHNICAL REPORTS
V - INDUSTRIAL COLLEGE OF THE ARMED FORCES PUBLICATIONS

Any questions concerning this publication should be forwarded to Barbara Henseler, Research Analyst, at (202) 693-3257.

DOUGLAS B. BLACKBURN
Director, Mobilization Concepts Development Center

1 October 1983
