Foreword

Each spring, the SEI Education Program publishes the *SEI Software Engineering Education Directory*, which summarizes undergraduate and graduate courses in software engineering taught at United States and Canadian colleges and universities. This annual survey, the only one of its kind, serves as a directory for potential students seeking information about where they might study software engineering. The survey is useful to industry and government recruiters in evaluating the background of job candidates.

The teamwork and energy of Allison Brunvand, Albert Johnson, Bill McSteen, Jack Poller, Mark Schmick, and Barbara Zayas were, in large part, responsible for the successful completion of this edition. Gary Ford, Senior Computer Scientist, spent much time editing entries into final form. The Information Management staff of the SEI were helpful in developing its attractive layout. We extend our thanks to them and all others who aided this effort.

Norman E. Gibbs
Director of Education
Software Engineering Institute
Software Engineering Education Directory

Abstract: This directory provides information about software engineering courses and software engineering degree programs that are available in the United States and Canada.

Introduction

The Software Engineering Institute (SEI) is a federally funded research and development center, sponsored by the Department of Defense and operated by Carnegie Mellon University. The mission of the SEI is to serve the public interest by establishing the standard of excellence for the art and practice of software engineering and by accelerating the transition of software technology.

This directory has been compiled to provide information that will help students and their advisors make appropriate educational choices. It contains a detailed listing of available software engineering courses and software engineering degree programs.

In future editions of this directory, we plan to provide indices and cross tabulations showing a profile of ongoing software engineering education efforts. To discuss any issues related to this report, please contact:

Mark Schmick

Directory Guide

Compilation of Entries
Compilation of entries for this directory began in the summer of 1986 with a questionnaire mailed to schools selected from Peterson's *Graduate Programs in Engineering and Applied Sciences 1986*. We contacted schools offering graduate degrees in computer engineering, computer science, information science, software engineering, and systems engineering because they seemed most likely to offer courses involving software engineering concepts.

Of the 456 original questionnaires mailed, more than 33% were returned. A random telephone survey of people who did not return questionnaires for their universities revealed that none offered courses related to software engineering. We also included information from other reliable sources. Thus we feel that the directory is reasonably complete, although not exhaustive.

This year, we updated course entries by contacting all who gave us information last year. We sent each a revised questionnaire, including guidelines for responses. Most people responded to our update request.

We have edited the directory entries for accuracy, completeness, and relevance to software engineering. We are limited in our ability to edit responses, however, and might have included courses in the listings that do not seem to be closely related to software engineering study. However, all such courses were cited as part of a software engineering sequence in the responses that we received. In addition, please be aware that some "Textbook" entries actually contain articles, reports, or other published papers. In such cases, the papers shown are consistently used and considered to be required course reading.

Some of the entries in this edition of the directory have not been updated since the first edition. We plan to drop them from the next edition.

Changes in the Directory
Changes we adopted this year include:

- **More stringent standards for courses to be included in the directory.** Courses in data structures, computer science fundamentals, programming, database management, hardware, simulation, and similar topics are included only if they are directly related (say, as co-requisites) to a sequence of software engineering courses.

- **More Information In each entry.** We added an "Additional Information" field for remarks explaining information in directory entries.

- **Better overall organization.** We added a table of contents, and organized the directory by state and country.

How to Use this Directory
The directory is organized by state and province. Within each section, the directory entries are alphabetized by institution name. Each entry lists the following:

- **Degrees.** These are the degree programs that have software engineering courses as electives or requirements.

- **Contact.** This is the person you may contact for more information about the software engineering courses offered at the institution.

- **Update.** The month and year that a directory entry was last updated appear here.
- **Courses.** Software engineering and related (co-requisite, laboratory, or advanced elective) courses are listed under this title. Each Course has four self-explanatory subtitles, Textbooks, Compilers, Computers, and Languages.

**Notation in abbreviations**

Each degree entry has one or two parts. The first part is the degree and the second part, if present, is the subject. For example, BSC, BS EE, MSE, MA CE means Bachelor of Computer Science, Bachelor of Science in Electrical Engineering, Master of Software Engineering, and Master of Arts in Computer Engineering. The abbreviations used appear on the following page.

A complete Courses entry has six fields on the first line, arranged in order of course name, course number, level, prerequisite, status, and frequency. The codes as used in the corresponding fields are:

**Level:**
- U Undergraduate
- G Graduate
- B Both
- O Other
- X No information supplied

**Prerequisite:**
- P The course has at least one prerequisite
- N None
- X No information supplied

**Status:**
- R Required
- E Elective
- B Both
- O Other
- X No information supplied

**Frequency:**
- B Biennial
- Y Once a year
- T Once a term
- A Alternate terms
- D On demand
- O Other
- X No information supplied

Most Courses entries also have fields describing the textbooks, compilers, computers, and languages used. Here are examples:

**Introduction to Software Engineering with Ada** MATH 555 G N R T 5

Textbooks: *Ada Primer*
by SoTech, Inc.
*Reference Manual for the Ada Programming Language*
ANSI/MIL-STD-1815A
*Software Components with Ada: Structures, Tools, and Subsystems*
by Booch, Grady
*Software Engineering with Ada*
by Booch, Grady

Compilers: Verdix Ada

Computers: VAX 11/785 UNIX

Languages: Ada

**Software Project Management and Development I** CSC 460 U P E T 8

Textbooks: *Software Engineering: A Practitioner's Approach*
by Pressman, Roger S.

Compilers: Pascal

Computers: VAX (VMS or UNIX)

Languages: Pascal

by Connor, D.
Compilers:  TeleSoft Ada
Computers:  IBM 4381 with VM/CMS
Languages:  Ada
CMS

Additional Information:
This program is offered at all of the National University campuses. Dial-up facilities are offered on all campuses so that a student with a computer and a modem can work on the IBM mainframe at home. All classes are offered in a one class per month format, meeting for a total of forty-eight contact hours in a four week period. The last three classes (CS 627a, CS 627b, and CS 627c) are a capstone senior project class where a major software package is designed and implemented using all of the software engineering techniques taught in the curriculum. Software engineering techniques are stressed throughout the Bachelor of Science in Computer Science degree program.

Additional Information:
Software Engineering I (Systems Analysis) and Software Engineering II (Design and Development) are offered twice a year. We also offer a seminar about once a year or so on Ada. The book used is Software Engineering with Ada by Grady Booch. The software projects done in CS 497-498 are actual projects selected by the students and approved by the professor. We are presently developing two courses that will be offered in parallel with CS 497-498. One will be in technical writing to be taught by the Department of English. The other will be in team building to be given by the Department of Psychological Science.

Textbooks: Software Specification Techniques
by Gehani, Narain and McGettrick, Andrew D.
The Science of Programming
by Gries, David

Software Project Management SC 518 G P R Y 2
by Parikh, Girish and Zvegintzov, Nicholas
Software Engineering Economics
by Boehm, Barry W.

The Computer as a System Component SC 714 G P R Y 1
Textbooks: To be determined
Compilers: DEC VAX Ada
Computers: Encore
Languages: Ada

Software Engineering Project SC 912 G P R Y 4
Compilers: DEC VAX Ada
Computers: Encore
IBM PC
VAX 785
Languages: Ada predominately, but depends on project

Additional Information:
We also teach two courses, SC 465 and EK 215 that use the Ada programming
language to teach software engineering concepts.
All new courses (SC 504, SC 517, SC 518) were effective as of January 1988.
The master's program in software engineering is MS SYSE with a Software
Engineering Option. It will be renamed Software Systems Engineering effective
1989.
The PHD with research specialization in Software Engineering is offered, but
the degree is officially called "PHD in Engineering."
In Software Project Management (SC 518), we use Super project on IBM PC, VAX
Project Manager on VAX, and WICOMO (a cost estimation tool on IBM PC).

Pascal

Additional Information:
Software Design and Development (Undergraduate) and Software Design and
(Graduate) are offered twice a year.
For Software Design and Development, the choice of machines and
languages depends on the interests of each particular instructor and on the
type of projects they wish the class to pursue. In addition, some students
travel a great distance to come to class, and they prefer to work on machines
they can access at home or on the job. In these cases, special arrangements
are usually made with the instructor.

Additional Information:
Software Systems Development is offered 3 times a year.
Software Systems Development uses real projects. Therefore, student teams work on a variety of machines and with a variety of languages and compilers. Each team of 4 to 5 students typically works on a different project.
Documentation is required including: abstract, planning document, requirements document, preliminary design document, user's manual, and maintenance manual. Each team must make a one-hour presentation to the instructor, client, classmates, and invited guests during a "presentation day" at the end of the semester.

Software Engineering W4156 B P B Y 1

Programming Environments and Software Tools E6123 G P E X 1

Special Projects in Computer Science W3998, W4995, others B N E D 1
Computers: Tops 20
UNIX

Additional Information:
Programming Environments and Software Tools began in Spring 87.
Various projects in software engineering and other areas can be negotiated
between one or more students and a faculty member. Often the projects involve
a small piece of a faculty member's research and may be supervised by a Ph.D.
student.

Courses: Software Development Methodology CpSc 472/672 B P B O 6
Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Software Engineering Concepts
by Fairley, Richard E.

Compilers: Ultrix C
Computers: DEC VAX 11/780 running Ultrix
Languages: C

Design and Programming Methodology CpSc 872 G P E Y 3
Textbooks: Software Specification Techniques
by Gehani, Narain and McGettrick, Andrew D.

Languages: Various specification languages

Software Verification, Validation, and Measurement CpSc 873 G P E O 1
Textbooks: IEEE Tutorial: Software Testing and Validation Techniques
by Miller, Edward and Howden, William E.

Additional Information:
Software Development Methodology is offered once or twice per year. Software
Verification, Validation, and Measurement is offered every two years when
demand warrants.
1.32. Tennessee

**East Tennessee State University** School of Applied Science and Technology

Additional Information:
UH-CL has a strong emphasis on the engineering of computer automated systems, which includes the integration and trade-off studies of issues involving software, hardware, and people. Therefore, several research projects and these have a strong component of software engineering. In addition, two system-level courses offered annually that contain such a component are Computer Automated Systems (CTEC 4532) and Synthesis of Computer Networks (CTEC 6532).

Additional Information:
At Seattle University, Software Engineering is viewed as an academic/professional discipline, which has its principal academic basis in computer science. Thus, the following graduate courses in computer science are also offered as technical electives in the MSE program:
ESW 500 Information Structures and Algorithms
ESW 501 Computer Systems Principles
ESW 541 Database Systems
ESW 551 Distributed Computing
ESW 553 Artificial Intelligence
ESW 564 Computer Graphics
ESW 566 Real Time Systems

          VAX 11/780
Languages: PL/I and System Utilities

Software Engineering in Data Communications CS 350 G P E Y 4
Compilers: ALSYS Ada
           IBM PC Assembler
           Lattice C
           RT-11 Assembler
           VAX UNIX C
Computers: IBM PC/AT
           IBM PC/XT
           IBM PCs
           PDP 11/23s
           VAX 11/750
Languages: Ada
           Assembly
           C

Additional Information:
Courses numbered 0-99 are Freshman and Sophomore level courses. Courses numbered 100-299 are Junior and Senior level courses. Graduate students can count (3 or 4) 200 level courses for credit towards MS degree. Courses numbered 300-399 are MS level courses, and courses numbered 400-499 are Ph.D. level courses. All 200 level courses have CS 1, 2, 50 and 51, a year of calculus, and a course in discrete mathematics as prerequisites.
1.38. Wisconsin

Marquette University College of Engineering
Department of Electrical, Computer and Biomedical Engineering
Program in Electrical Engineering
Milwaukee, WI, 53233, United States

Degrees: BS EE, MS EE, PHD EE
Contact: Dr. Niedejohn, Russell J.
Professor and Chairman
(414) 224-6820
Update: September 1988
Courses: Software Engineering EECE-211 G N E T 11
Compilers: Pascal
Computers: VAX
Languages: Pascal

Additional Information:
Other courses on compilers, advanced software, database, operating systems, and architecture.

University of Wisconsin-Madison College of Engineering
Department of Industrial Engineering
Madison, WI, 53706, United States

Degrees: MS, PHD
Contact: Prof. Gustafson, David H.
Department Chairman
(608) 262-3768
Update: October 1987
Courses: Computer Methods in Industrial Engineering 490-612-9 G N B Y 9
Textbooks: Software Engineering
by Sommerville, Ian
Compilers: Turbo Pascal
Computers: IBM PC
Languages: Pascal

University of Wisconsin-Milwaukee School of Engineering and Applied Science
Department of Electrical Engineering and Computer Science
Milwaukee, WI, 53201, United States

Degrees: BS, MS, PHD
Contact: Dr. Vairavan, K.
Chair, Computer Science
(414) 963-5357
Update: June 1988

Courses: Introduction to Software Engineering 262-536 B P R T 7
Textbooks: Software Engineering
            by Sommerville, Ian
            The C Programming Language
            by Kernighan, Brian and Ritchie, Dennis
Compilers: UNIX C compiler
Computers: ISI 68K's
          VAX 11/750
Languages: C
1.39. Wyoming

University of Wyoming College of Arts and Sciences
Computer Science Department
Program in Computer Science
Laramie, WY, 82071, United States

Degrees: BS CS, BA CS, BS MIS, MS CS, PHD CS

Contact: Prof. Rowland, John
(307) 766-6475

Update: September 1988

Courses: Software Engineering COSC 684 B P O B 1
Textbooks: Software Engineering
by Sommerville, Ian
Compilers: Ada on VAX 8800
Computers: PC
VAX 11/785
VAX 8800
Languages: Ada

Software Engineering Management COCS 884 G P O B 1

Software Engineering Laboratory COCS 685 B P O B 1

Additional Information:
COSC 885 Software Management Laboratory is pending. It would be run jointly
with the Software Engineering Laboratory with members of this class acting
as team leaders.
2. Canada

2.1. Alberta

The University of Alberta
School of Science
Department of Computing Science
Edmonton, AB, T6G 2H1, Canada

Degrees: BS, MS, PHD

Contact: Prof. White, Lee J.
Chairman
(403) 432-4589

Update: October 1987

Courses:

Software Engineering CMPUT 401 U P R T 4
Textbooks: Software Engineering Concepts
by Fairley, Richard E.

Compilers: Modula-2
Pascal

Computers: Macintosh
Sun workstations (UNIX OS)

Languages: Modula-2
Pascal

Interactive Programming Environments CMPUT 652 G P E B 3
Textbooks: Interactive Programming Environments
by Barstow, David R., Shrobe, Howard E., and Sandewall, Erik

Compilers: Cornell program synthesizer generator
Smalltalk

Computers: VAX systems (UNIX OS)
Languages: Smalltalk

Software Testing CMPUT 501 G P E B 3
Textbooks: Computer Program Testing
by Chandrasekaran, B. and Radicchi, Sergio
Software Testing Techniques
by Beizer, Boris

Computers: VAX systems (UNIX OS)

Specification and Verification CMPUT 508 G P E Y 3
Textbooks: Communicating Sequential Processes
by Hoare, C.A.R.
The Logic of Programming
by Hehner, E.C.
The Science of Programming
by Gries, David

Computers: VAX computer systems (UNIX OS)
Languages: Various specification languages
2.2. British Columbia

University of Victoria School of Arts and Sciences
Department of Computer Science
Victoria, BC, V8W 2Y2, Canada

Degrees: BS, MS

Contact: Dr. Hoffman, Daniel
Assistant Professor
(604) 721-7222

Update: June 1987

Courses: Software Engineering CSC 365 U P R T 6
Textbooks: The Mythical Man-Month: Essays on Software Engineering
by Brooks, Frederick Phillips
Compilers: C
Pascal on UNIX 4.2
Computers: Pyramid
VAX 11/780
Languages: C
Pascal

Implementation of Software Engineering Methods CSC B P E Y 3
Compilers: C
Computers: Pyramid
Sun
VAX
Languages: C

Additional Information:
Software Engineering/Education Cooperative Project - a joint project with IBM Canada to advance the state of the art in educational software.
2.3. Nova Scotia

Acadia University Jodrey School of Computer Science
Department of Computer Science
Wolfville, NS, B0P 1X0, Canada

Degrees: BCS, MS

Contact: Dr. Oliver, Leslie H.
Professor and Director
(902) 542-2201 x331

Update: October 1988

Courses: Software Engineering Comp 3653 U P B Y 4
Textbooks: Software Engineering Concepts
by Fairley, Richard E.
Compilers: Turbo Pascal
UNIX C
Computers: PC-Compatible
SUN
Languages: C
Pascal

Additional Information:
Also offers degrees in BCSH, BCSS Hardware, BCSS Software, and BCSS Business Data Processing.
2.4. Ontario

Carleton University Faculty of Engineering
Department of Systems and Computer Engineering
Programs in Computer Systems Engineering and Electrical Engineering
Ottawa, ON, K1S 5B6, Canada

Degrees: BE, ME, MCS, MS, PHD

Contact: Prof. Bowen, B. A.
Chairman
(613) 564-2793

Update: None

Courses: Software Engineering 94.480 UNXY1
Textbooks: Software Tools in Pascal
by Kernighan, Brian and Plauger, P.J.
System Design with Ada
by Buhr, R.J.A.

Digital Systems Engineering 94.533 GNXT1
System Design with Ada 94.531 GNXT1

Queen's University Faculty of Arts and Science
Department of Computing and Information Science
Kingston, ON, K7L 3N6, Canada

Degrees: BS, MS

Contact: Dr. Lamb, David A.
Assistant Professor
(613) 545-6067

Update: June 1987

Courses: Modules and Specifications CISC 322 UPYE2

Software Engineering CISC 422/CISC 838 BPEY4
Textbooks: Software Engineering: Planning for Change
by Lamb, David

Compilers: IBM Pascal/VS
Computers: IBM 3081 under VM/CMS
Languages: Pascal/VS

Additional Information:
As a senior thesis, Computing majors take CISC-499, a course where
(working by themselves, supervised by a faculty member) they complete
a substantial programming project.

University of Ottawa Faculty of Science
Department of Computer Science
Program in Computer Science
Ottawa, ON, K1N 9B4, Canada

Degrees: BS, MCS

Contact: Dr. Raymond, Jacques
Professor
(613) 564-5423

Update: October 1988

Courses:

Software Engineering I CSI 3111 U P R Y 4
Textbooks: Software Engineering: A Practitioner’s Approach
by Pressman, Roger S.
Software Engineering Concepts
by Fairley, Richard E.
Languages: Ada
Pascal
Prolog

Software Engineering II CSI 4112 U P R Y 6
Textbooks: Software Engineering: A Practitioner’s Approach
by Pressman, Roger S.
Software Engineering Concepts
by Fairley, Richard E.
Computers: VAX 750
Languages: Ada
C

Software Testing: Theory and Practice CSI 5111 G N E Y 7
Textbooks: Selected papers

Software Engineering CSI 5112 G N E Y 5
Textbooks: Selected papers
Computers: VAX 750
Languages: Ada
Modula II

Additional Information:
B.Sc. Major and Honours with General Computer Science option.
B.Sc. Major and Honours with Information and Management System option.
Software Engineering is offered in the Winter and Summer terms.
Software Engineering I is offered twice a year.
We also have courses in Ada (Ada Language Concepts, CSI 2161) and Modula II
(Modula II Language Concepts, CSI 2169).

University of Waterloo Faculty of Mathematics
Department of Computer Science
Waterloo, ON, N2L 3G1, Canada

Degrees: BM, MM, PHD

Contact: Dr. Taylor, David
(519) 888-4432

Update: October 1988

Courses: Applications Software Engineering CS 430 U P E Y 1
Textbooks: Software Engineering: A Practitioner’s Approach, 2nd ed.
by Pressman, Roger S.
Business System Analysis CS 432 U P E O 1
Textbooks: *Information Systems Analysis: with an Intro to 4th Generation Technologies*
            by Hall, V.J. and J.W. Mosevich
Computers: IBM PC

Software System Design and Implementation CS 446 and CS 646 B P E T 1
Textbooks: *Software Engineering: A Practitioner’s Approach, 2nd ed.*
            by Pressman, Roger S.

Techniques in Systems Analysis CS 482 U P E T 1
Textbooks: *Information Systems Analysis: with an Intro to 4th Generation Technologies*
            by Hall, V.J. and J.W. Mosevich

Additional Information:
Applications Software Engineering and Techniques in Systems Analysis are
offered in the Fall and Spring terms.
2.5. Quebec

McGill University School of Computer Science
Montreal, PQ, H3A 2K6, Canada

Degrees: MS, PHD

Contact: Prof. Madhavji, Nazim H.
Professor
(514) 398-7073

Update: None

Courses:

Advanced Topics (Software Engineering) 308-762A G P E Y 5
Textbooks: Software Development: A Rigorous Approach
by Jones, C.B.
Software Engineering
by Sommerville, Ian
Software Engineering Environments
by Hunke, H.
Software Engineering with Modula-2 and Ada
by Wiener, Richard and Sincovec, Richard
Compilers: Cambridge Modula-2
Modula-2/68
Powell Modula-2
Computers: Sun 3
VAX 11/780
Languages: Modula-2

Advanced Topics (Programming Environments) 308-767B G P E Y 3
Textbooks: Interactive Programming Environments
by Barstow, David R., Shrobe, Howard E., and Sandewall, Erik
Compilers: Cambridge Modula-2
Modula-2/68
Powell Modula-2
Computers: Sun 3
VAX 11/780
Languages: Modula-2

Additional Information:
1) The School offers research study (M.Sc. and Ph.D.) in software engineering.
2) The School offers software engineering projects for Masters students.
2.6. Saskatchewan

University of Regina Faculty of Science
Department of Computer Science
Regina, SK, S4S 0A2, Canada

Degrees: BA, BS, MS

Contact: Dr. Maguire, R. B.
Department Head
(306) 584-4632

Update: October 1988

Courses: Business Information Systems CS270 U P R T 11
Textbooks: Elements of Systems Analysis, 4th ed.
by Gore, Marvin and Stubbe, John W.
Computers: IBM PC AT
Languages: Excelerator InTech

Advanced Systems Analysis and Design CS372 U P E Y 4
Textbooks: Introduction to Systems Analysis and Design: A Structured Approach
by Kendale, Penny A.
Compilers: UNIX C
Computers: Berkeley 4.2 UNIX on VAX 750
Languages: C programming language

Project Management for Data Processing Applications CS373 U P E B 2
Textbooks: Information Resource Management
by Hussain, Donna and Hussain, K.M.

University of Saskatchewan College of Engineering
Department of Computational Science
Program in Computer Science
Saskatoon, SK, S7N 0W0, Canada

Degrees: BS CS, BC CS, MS CS, PHD CS

Contact: Dr. Sorenson, Paul
Professor
(306) 966-4886

Update: October 1988

Courses: Computer Systems CMPT 230.6 U P R Y 1
Computers: VAX 8600

Information Systems Analysis and Design CMPT 477.6 U P E Y 1
Textbooks: Advanced Structured Analysis and Design
by Peters, L.
Software Design and Development
by Gilbert, P.
Compilers: DEFT analysis and design (CASE tools)
Computers: Macintosh

Information Systems CMPT 876.3 G P E Y 1
Computers: Sun workstations
VAX 8600

Additional Information:
Other degree offered: combined B.Sc. (Computer Science) and B.Eng.
(Electrical Engineering).
