NOTICES

FINAL DISPOSITION: This Research Product may be destroyed when it is no longer needed.
Please do not return it to the U.S. Army Research Institute for the Behavioral and Social Sciences.

NOTE: This Research Product is not to be construed as an official Department of the Army
document, unless so designated by other authorized documents.
Throughout the 1980s, Army leaders and policymakers have been especially concerned about the well being of Army families. Research designed to assist Army leaders in addressing family concerns is an important part of the Army's effort to increase family well being and the sense of partnership between the Army and its constituent families.

In response to the call for more Army family research, the Army Family Research Program (AFRP) surveyed the spouses of married soldiers in its 1989 worldwide data collection. Data from approximately 3,400 spouses was obtained and included in the spouse data file. This codebook enables researchers to analyze the spouse data file by providing information on the variables, coding, value labels, and edit flags.
