Foreword

The U.S. Army Research Institute for the Behavioral and Social Sciences reports the findings of its research and investigations in its own series of publications (research reports, technical reports, research products, and research notes). For some time we have felt a need to list the contributions which ARI researchers make to their respective fields through other media in addition to ARI publications: Media such as books, book chapters, journal articles, and papers presented at professional conferences. The following is a list of all such items from the years 1982 through 1991. This listing helps give a truer picture of the endeavors of ARI scientists, and can serve as a valuable aid for those interested in topics covered by ARI.
