The New World Order: A Second Look

A Selected Bibliography

August 1994
In a new era of peril and opportunity, our overriding purpose must be to expand and strengthen the world’s community of market-based democracies. During the cold war we sought to contain a threat to the survival of free institutions. Now we seek to enlarge the circle of nations that live under those free institutions. For our dream is of a day when the opinions and energies of every person in the world will be given full expression, in a world of thriving democracies that cooperate with each other and live in peace.

Preface

The citations in this bibliography reflect the considerable changes and challenges evident in our world since the end of the Cold War. With a few notable exceptions, the citations are dated 1992 to the present.

All the books, documents, and periodical articles referenced in the bibliography are readily available in the U.S. Army War College Library. For your convenience, we have added our call numbers at the end of each book and document entry (keep in mind that call numbers may vary from library to library).
