MEMORANDUM FOR See Distribution

SUBJECT: Emergency Preparedness Plan (EPP) Implementation

1. Enclosed is the Emergency Preparedness Plan for the DHCS. This volume represents DeWitt Army Community Hospital's (DACH) doctrine for emergency preparedness and is directive in nature.

2. The EPP is effective for planning upon receipt. All DACH departments/divisions/services/activities will prepare supporting Standard Operating Procedures (SOPs) and/or protocols for operations envisioned in Annex C, EPP.

3. Selected portions of this plan will be implemented by a mass casualty exercise at a minimum of twice yearly.

4. The EPP satisfies regulatory and statutory requirements as set forth by Public Law, executive order, Department of the Army, Medical Command (MEDCOM), and Fort Belvoir mandated emergency preparedness planning. Appendix 2 to Annex C to the EPP satisfies OSHA fire and safety planning requirements. This volume also satisfies emergency medical planning guidelines as set forth by JCAHO's 1996 Standard EC.1.6. emergency preparedness management plan.

5. This volume is unclassified and contains no Privacy Act restrictions. Dissemination may include public domain without prior command approval.

6. The DeWitt Army Medical Activity Emergency Preparedness Plan (EPP) dated 1 October 1997 is hereby rescinded and may be destroyed as unclassified non-sensitive material.
MCXA (350-28A)
SUBJECT: Emergency Preparedness Plan (EPP) Implementation

7. Chief, Operations and Training are assigned EPP proponency. Comments for improvement may be directed to C, Operations and Training at DSN 655-0093 or commercial (703) 805-0093.

Encl. EPP

   a. Topography:
   b. Installation:
   c. Structural:

4. Time. Local time (EST/EDT) is used for basic telephonic, E-Mail, and FAX communications. Zulu time will be used for AUTODIN traffic sent through the post message center. At DACH, Zulu time is five hours ahead of Eastern Standard Time, four ahead during eastern daylight savings time.
GENERAL. This volume defines DeWitt Army Community Hospital’s doctrine or responding to a variety of emergencies. It is divided into three general sections. The Basic Plan states what situations are to be planned for, the scope of planning, and general information required to start the detailed planning process. Annex C (Operations) is the plan’s execution document, which implements prior planning efforts. Thirdly, each appendix addresses a particular type of scenario. These represent known emergency possibilities on Fort Belvoir, within the Northern Virginia community, and other situations required by statute and regulation. Regardless of the situation, DeWitt Army Community Hospital must be prepared to receive, treat, assist, or hospitalize large numbers of casualties in a short period of time.

BASIC PLANNING REQUIREMENTS. Three broad planning efforts are required by the Army and MEDCOM regulations, OSHA standards, and JCAHO guidelines. For contingency planning, staff training, and implementing exercises, they are:

1. Mass Casualty (MASCAL). Planning/training must include:
   a. The organization’s role.
   b. Staff roles and responsibilities.
   c. Reliable methods for notification (both internal and external).
   d. Alternate staff assignments.
   e. Patient Management (transfers, accountability, information, etc.).
   f. Alternate cares sites.
   g. Managing space, supplies, and security.
   h. Semi-annual implementation and critique.

2. Internal Emergencies. Planning/training must include:
   a. Facility fire plan.
   b. Evacuation and escape (patient and staff).
   c. Staff and patient accountability.
   d. Training for all employees and staff.
   e. Alternate sources for essential utilities.
DEWITT ARMY COMMUNITY HOSPITAL
EMERGENCY PREPAREDNESS PLAN
BASIC PLAN

3. **Civil Assistance/Adverse Weather.** Planning must include:
   a. Description of organization’s role in community wide emergencies.
   b. Resource control (managing space, supplies, etc.).
   c. Available alternative facilities.
   d. Lines of authority.

D. **BASIC PLANNING ASSUMPTIONS.**

1. **Installation and Internal Situations.**
   a. Minimum warning time to accomplish basic task organization and to alert the command group will be available.
   b. Information concerning numbers of injured and extent of injuries will not be reliable.
   c. A separate simultaneous emergency event will not occur.
   d. Minimum staffing, funds, supply, and ancillary support will be available.
   e. Normal medical center functions and missions will not be abandoned.
   f. Traditional duty/job responsibilities and work hours may change radically, depending on the extent of the situation.

2. **Community Situations.**
   a. Civil and community agencies my request medical assistance directly from DACH without regard to installation chain of command policies.
   b. Posse Comitatus Act will remain in force (military will not enforce or execute civil law).
   c. Civil authorities may not be able to reimburse military assistance costs.

FILE: BASICPLN

12/23/97
E. CONDITIONS THAT COMMENCE OPERATIONS. As stated below but not limited to:

1. **Mass Casualty** (MASCAL)/Disaster situations:
   a. Is declared on order from command group, designated representative, or authorized code initiators (See Annex C, para E.3., page C-6).
   b. Emergency 911, notification from installation
   c. Announcement of **CODE YELLOW** on public address system.

2. **Internal Emergencies:**
   a. **CODE RED** - FIRE
      (1) Is declared on order of the command group or designated representative.
      (2) On order of the Safety Officer/Fire Marshal.
      (3) Is announced on public address system after verifying a fire exists.
   b. **CODE ORANGE** - BOMB THREAT
      (1) Is declared on order from command group or designated representative.
      (2) Is announced on public address system after verification by military police authorities.
   c. **CODE PURPLE** (Restraint or Disturbance) in Ward 5A, Adolescent Partial Hospitalization and **CODE BLUE** (Cardiac Arrest) are, for the purposes of this plan, medical occurrences limited in scope and not further considered within the EPP.
   d. **CODE GREEN** is used for ALL CLEAR and cancels other codes and is issued by any authorized code initiators.

3. **Severe Weather:** (No CODE issued)
DEWITT ARMY COMMUNITY HOSPITAL
EMERGENCY PREPAREDNESS PLAN
BASIC PLAN
a. Installation EOC issues SEVERE WEATHER WARNING codes.

b. Installation EOC issues HURRICANE CONDITION warnings.

c. On order from command group or designated representative, DACH will adhere to severe weather instructions as issued by the installation IOC.

4. Official codes/warnings/conditions are not designated for civil assistance, disaster relief operations, nuclear or chemical incidents, or work slowdowns/stoppages.

F. CONTINUITY OF OPERATIONS. When emergencies are declared, DACH will continue its primary mission: provide quality medical care to beneficiaries. Those staff personnel not directly involved with emergency care will continue providing normal patient care as best possible. Clinics will operate, patients cared for, supplies provided, reports rendered, and administrative functions performed.

ANNEX A TO EMERGENCY PREPAREDNESS PLAN
TASK ORGANIZATION

A. GENERAL. This annex provides a task organization guideline for consideration upon the need to structure available forces to accomplish emergency medical missions as stated in the Basic Plan. Formal task organization to employ forces is at the discretion of the (Crisis Management Team). For the purposes of this plan, DeWitt Army Community Hospital will be considered the supported command and may be assigned operational control (OPCON) of augmentation (supporting) forces provided by unit and activities below:

1. FOR JOINT/COMBINED OPERATIONS: (MASCAL, Community Disaster, Environmental/Weather, etc)

2. FOR INTERNAL EMERGENCIES: (fire, bomb, work stoppage, etc)

B. TASK ORGANIZATION EXECUTION. The EOC is the authorized agent to request manpower augmentation. As the situation warrants, the Commander, or the (Crisis Management Team) will determine additional requirements to the EOC. OIC, EOC will communicate with activities concerned and request for and direct the employment of personnel received either to the Manpower Pool or other locations as the situation warrants. OPCON, if authorized, will be released after official termination of the emergency.

ANNEX B TO EMERGENCY PREPAREDNESS PLAN
ALERT NOTIFICATION AND RECALL INSTRUCTIONS

A. **SITUATION.** An incident has occurred in which the DACH Commander has ordered emergency plans implemented. During the initial estimate of the situation it is determined that the incident is so serious that alerting and recalling selective individuals (limited recall) and/or multiple clinical and administrative staffs (total recall) must be accomplished to place personnel for emergency medical operations.

B. **MISSION.** The DACH Adjutant or Administrative Officer of the DAY (AOD) will, on order, or automatically by a catastrophic event, activate alert notification procedures for the recall of personnel, both military and mission essential civilians to provide patient care and assist in relief of pain and suffering.

C. **EXECUTION.**

1. **Concept of Operations.**

   a. **External Emergency.**

   (1) **NORMAL DUTY HOURS.** DACH will be alerted to prepare to receive injured by a call into 911, radio communications with the Ambulance Section, or by telephonic notification. Upon verifying the extent of effort required. If expectations require additional manpower and resources a CODE may be issued. The Adjutant or official DACH representative will initiate the necessary department/division alerting and notification of medical personnel.

   (2) **AFTER DUTY HOURS.** DACH will be alerted to prepare to receive injured by a call into 911, radio communications with the Ambulance Section, post EOC hot line, or by other telephonic means. The senior emergency room physician will notify the SDNCO of the potential extent of effort required. The SDNCO will follow standard operating procedures for alert and recall notification. Priority of recall will be necessary clinical departments followed by administrative divisions on call officers. When the determination that the EOC needs to be activated, a total recall will commence.

   b. **Internal Emergency.**

   (1) **NORMAL DUTY HOURS.**

   Any department/division/service/activity discovering an emergency situation will immediately sound the alarm within their duty section and follow-up with a verbal or telephonic
ANNEX B TO EMERGENCY PREPAREDNESS PLAN
ALERT NOTIFICATION AND RECALL INSTRUCTIONS

notification through the chain-of-command. An assessment of
the situation along with the determination of alert, notification,
and recall of personnel necessary to contain and control the
emergency will be made. Notification procedures will
commence as necessary as stated above, Para C.1.a. (1).

(2) AFTER DUTY HOURS. A person(s) discovering an
emergency situation or a potential emergency will immediately
sound the alarm within their duty section and follow-up with a
verbal or telephonic notification to the SDNCO. The SDNCO
will assess the situation and determine the necessary response
effort (either limited or total recall) to contain and control the
emergency. Notification procedures will commence as
necessary as stated above, Para C.1.a.(2)

2. Tasks

a. Adjutant.

(1) Insure alert rosters (to include mission essential civilians), AOD
alert notification SOP’s, and SDNCO instructions are current, and
posted in the AOD Instruction Books.

(2) Maintain liaison with Clinical Support Division and other activities
to support Para C.1. above, concept of operations.

(3) Review and be familiar with Annex C of the EPP, for situation
specific responsibilities.

(4) Assist C, CSD with control of Information Desk/overhead Public
Address System.

(5) Alert outlying activities, i.e., Medical Company, Veterinarian
Services, Dental Activity, etc.

b. Administrative Officer of the Day /Staff Duty NCO (AOD/SDNCO).

(1) Assess the situation and in coordination with a member of the
command group, determine the need for a limited or total recall o
personnel during duty hours.

(2) On order, implements recall instructions while maintaining a journal of
events.

(3) Notify all on-call department/division/services/activities notification
official(s) as required.
ANNEX B TO EMERGENCY PREPAREDNESS PLAN
ALERT NOTIFICATION AND RECALL INSTRUCTIONS

c. **Chief, Nursing Administration or Senior Nurse, Emergency Room.**
   Review and be familiar with Annex C, for situation specific responsibilities. Provide advice to Deputy Commander for Nursing for emergency nursing support requirements.

d. **Chief, Operations and Training.** Is proponent for EOC operations and is executive agent for DACH’s alert and notification program.

3. **Coordinating Instructions.**

   a. All departments/divisions/services/activities will maintain an alert and recall roster. Format for alert roster will be as per format at Tab A and B. Rosters will be verified and updated monthly for the Adjutant.

   b. During partial recall, the senior person present will maintain personnel accountability. Periodic reports will be provided to the command group. During total recall, periodic personnel accountability will be provided to the C, Manpower Pool and EOC.

   c. Situation information flow will be directed from the ER to the EOC (if activated), command group, or AOD, as appropriate, and as it becomes available.

D. COMMAND, CONTROL, COMMUNICATIONS.

1. **Command.** No changes are anticipated. Refer to Annex C for specifics.

2. **Control.** No changes to established procedures IAW Annex C are anticipated.

3. **Communications.**

   a. Example of Total Notification/Recall cascade is provided at Tab A.

   b. Example of Partial Notification/Recall (Department/Division/Service/Activity) cascade is at Tab B.

   c. Essential/Selected telephone numbers are at Tab C

   d. Emergency Operations Center Telephone Directory at Tab D.

ANNEX C TO EMERGENCY PREPAREDNESS PLAN
OPERATIONS – EMERGENCY PREPAREDNESS IMPLEMENTATION

A. REFERENCES.
1. MEDCOM Regulation 40-5, Ambulatory Patient Care
2. MEDCOM Regulation 525-3, Emergency Operations Control
3. MEDCOM Regulation 525-4, Emergency Preparedness

B. GENERAL.
1. Fort Belvoir is a major military installation within the Military District of Washington. DACH must be prepared to receive, treat, and hospitalize large numbers of casualties within a short period of time.

2. This annex outlines procedures and taskings that enable DACH to respond effectively to a variety of emergencies. These procedures, tasking, and management objectives have been developed, refined, and implemented during exercises and real situations. These are approved for execution, on order, by department/division/service/activity chiefs, and the Disaster and Mobilization Planning Committee.

C. MISSION. DACH will provide immediate medical care and task organize for emergency medical services to accident/disaster victims upon arrival at DACH so to contain and minimize the extent of injuries and suffering.

D. EXECUTION.

1. Assumptions. See Basic Plan. There are no assumptions during plan/execution/implementation.

2. Concept of the Operations.

a. DACH will respond to any emergency/contingency occurring on Fort Belvoir and, as appropriate, the local community. Upon notification (regardless of means) of incoming injured, Deputy Commander for Clinical Services is the lead agency for plan execution. In-house personnel will make available all assets for emergency medical services. Success in emergencies will depend on speed and momentum. Leaders will act independently and in cooperation with other elements of the facility. Leaders and subordinates will have the greatest possible freedom of action consistent with accomplishing the mission. Individual initiative,
teamwork, and leadership from expected and unexpected sources will occur. Initial chaos will be overcome. Patient identification and tracking begins immediately. DACH's basic objective is to provide the best medical attention possible to the injured by sustaining unity of effort, restoring order, communicating effectively, and returning to normal operation.

b. Interagency contacts, coordination, and cooperation agreements will continue. Maintenance of these interagency contacts and contracts are mutually beneficial. Civilian care providers and administrators are to be included in the planning process. As the emergency situation develops and in-house response requirements increase, selected outside assets will be called upon incrementally. In addition, public law authorizes military assistance to civilian agencies and local and state governments. The primary goal is to provide mutually supportive and flexible response packages that eliminate time waste, cost and management questions, and other detractors from the provision of emergency medical care.

c. Contingent upon the type and magnitude of the emergency, the applicable annex or appendix will be implemented, either by itself or in concert with other annexes/appendixes. Leaders and subordinates alike may modify or depart from written planning documents as the situation dictates. To improve the deliberate planning process, after action reports will be prepared and submitted to C, Operations and Training (OPTR) after each exercise or real event.

d. Exercises and rehearsals apart from regulatory requirements are training tool used to gain expertise and continuity. Planning documents, protocols, and standard operating procedures (SOPs) will be periodically reviewed, tested, and updated. Problems arising from transportation, resource control and issue, EOC implementation, reporting procedures, command and control, security, and other areas require creative solutions and decision making.

3. Tasks.

a. Commander, DACH will provide executive oversight and guidance pertaining to the implementation and conduct of emergency operations.
ANNEX C TO EMERGENCY PREPAREDNESS PLAN
OPERATIONS – EMERGENCY PREPAREDNESS IMPLEMENTATION

b. Commander, DENTAC is requested to be prepared to augment DACH with personnel and resources to accomplish the mission and to provide representation during exercises and rehearsals.

c. Deputy Commander for Clinical Services (DCCS) directs the implementation of clinical services in response to actions envisioned in this annex and other emergency situations.

d. Deputy Commander for Administration directs the implementation of administrative support in response to actions envisioned in this plan and other emergency situations.

e. Commander Vet Activity is requested to provide veterinarian services to the MEDDAC Commander and advice to installation agencies during emergencies. Provides personnel to Manpower Pool when necessary.

f. Chief, Department of Emergency Medicine will assume lead role to accomplish mission statement during plan implementation.

g. Deputy Commander for Nursing will direct ward expansion activities and develop and maintain ward expansion plans.

h. Chief, Operations and Training, (OPTR) will:

   (1) Plan for, staff, and organize the EOC IAW Annex G EOC. Activate the EOC on order.

   (2) Prepare and conduct twice yearly exercises of this annex as required by U.S. Army Medical Command and JCAHO.

   (3) Maintain the accuracy and currency of the EPP manual.

   (4) Be the tasking authority, proponent, and responsible agent to coordinate manpower and resources for plan exercise and implementation.

   (5) Will develop and formalize MOA’s with installation units to provide emergency support beyond the capability of DACH

i. Chiefs of Department, Divisions, Services and Activities will:

   (1) Maintain current internal alert rosters to include mission essential civilian employees.
ANNEX C TO EMERGENCY PREPAREDNESS PLAN
OPERATIONS - EMERGENCY PREPAREDNESS IMPLEMENTATION

(2) Designated a representation for dedicated organization - EOC- command group information liaison, with authority to speak for the department/division/service/activity chief.

(3) Support assigned duties and functions as stated within this annex.

(4) Assist C, OPTR division in updating applicable parts of this annex and provide recommendations for training focus.

(5) Practice internally to coalesce and implement emergency actions that support overall mission requirements.

(6) Ensure that assigned personnel are familiar with this plan and understand their respective functions and responsibilities during emergency situations through the development of internal division/department/activity/service implementing SOPs. Practice and rehearse internal SOPs periodically. Ensure MASCAL resources and patient document packages are maintained.

4. **Coordinating Instructions.**
   
   a. Upon notification that this annex is to be implemented all departments/divisions/services/activities will reduce, suspend or curtail non-essential activities and prepare to support actions necessary to manage the situation.

   b. The Commander DACH, or the senior emergency medical officer will, based upon an estimate of the situation, designate the portions of this plan which will be implemented and the level of response necessary to manage the situation.

   c. In support of this plan, normal working hours could be extended and/or modified. Authority to grant overtime or compensatory time is inherent upon plan execution.

   d. Safety procedures and responsibilities will not be compromised during plan implementation. Safety will be incorporated into emergency planning during all phases of execution.

   e. Operations Security (OPSEC) will not be compromised during plan implementation and execution. No portion of this plan is classified. However, it must be kept in mind that certain sensitive
organizations are on Fort Belvoir and injuries to their personnel may cause immediate media interests.

f. Commercial media inquiries will be directed to the facility PAO. In the absence of the DACH PAO the installation will assume the duties and responsibilities.

g. Next-of-kin, relatives, friends, or others seeking information regarding casualties will be directed to the Family Assistance Center located in the Main Conference Room, basement floor

5. COMMAND, CONTROL, COMMUNICATION (C3).

(1) **Command.** No changes to established command relationships are anticipated.

(2) **Control.**

(a) The Command Post is located in the EOC. The EOC will be initially set in the Commands Wing

(b) The alternate site is Ward 5B (OPTR). EOC operations will conform to procedures outlined in Annex G.

(c) The Manpower Pool is located in the Dining Family, controlled by the Company Commander. The alternate site will be the front lobby leading into the command wing, or as designated by the command group or manpower pool OIC.

(d) The Family Assistance Center is located in the Main Conference Room controlled by C, Social Work Services and augmented by Department of Ministry and Pastoral Care personnel. The alternate site is the Company Day Room, building 802.

(e) The Public Affairs Media Center will be located at a location designated by the facility Public Affairs Officer. In the absence of the DACH’s Public Affairs Officer, the DCA will coordinate with the Installation PAO to assure proper handling of all Public affairs issues.
ANNEX C TO EMERGENCY PREPAREDNESS PLAN
OPERATIONS – EMERGENCY PREPAREDNESS IMPLEMENTATION

(f) Civilian medical and medical administrative counterparts control their assets as mandated by law, corporate by-laws, consent decree, or duty responsibility of office.

6. **Authorized Code Initiators.**

   a. **Code Yellow (MASCAL)** - Commander, Deputy Commander for Clinical Services, Deputy Commander for Administration, Administrative Officer of the Day, Chief, Emergency and Ambulance Services or Senior Medical Officer on duty in the Emergency Room.

   b. **Code Red (FIRE)** - Commander, Deputy Commander for Clinical Services, Deputy Commander for Administration, Administrative Officer of the Day, Deputy Commander for Nursing, Chief Wardmaster, Chief Engineer, and Safety Officer.

   c. **Code Orange (BOMB)** - Commander, Deputy Commander for Clinical Services, Deputy Commander for Administration, Administrative Officer of the Day, Provost Marshal, senior Military Police person present.

   d. **Code Green (ALL CLEAR)** - Anyone authorized to initiate Code Yellow, Red or Orange.

7. **Communications.**

   a. The existing hospital telephone system will continue to be the primary means of communications.

   b. Supplemental communications equipment available for intro-office communications includes the LAN system, E-mail, cc:Mail, FAX, runners, “beepers”, and hand-held radios.

   c. Radio and TV announcements are available for mass public communications for alerts, recalls, and warnings.

   d. Refer to Annex F for detailed communication systems and critical phone numbers.

   e. Alert notification procedures are detailed in Annex A.

E. **SERVICE SUPPORT.**

1. **Supply and Services.**
ANNEX C TO EMERGENCY PREPAREDNESS PLAN
OPERATIONS – EMERGENCY PREPAREDNESS IMPLEMENTATION

a. Sufficient supplies exit on-hand or are available through normal resupply channels to support operations envisioned within this annex.

b. Services as deemed prudent and necessary may be provided through the local community by contract or other instruments. Urgent and compelling justification will be considered as the situation warrants.

c. Sufficient transportation assets, engineering, and maintenance facilities are on-hand or available to support operations envisioned in this annex.

d. Detailed service and support requirements germane to a situation are outlined within this annex and appendixes.

2. Administrative.

a. Routine administrative procedures may be reduced to minimum essential during a given emergency.

b. Administrative civilian personnel may be asked to perform non-traditional duties to include carrying litters, pushing gurneys and wheelchairs, assisting in patient evacuation and accountability and other manual tasks. These non-traditional duties are permitted by law and labor contract during declared emergencies.

c. Detailed records of funding and accounting codes, overtime and compensatory time and other recordkeeping and reporting requirements will be kept as best practical.

A. SITUATION. An accident has occurred on Ft Belvoir/Davison United States Army Airfield or within the local community generating a significant number of casualties in a relatively short time frame. This emergency requires medical measures beyond those available at the accident site and will necessitate alerting multiple hospital departments and recalling the full complement of the DACH staff.

B. EXECUTION.

1. Assumptions. None.

2. Concept of the Operation.
   a. Department of Emergency Medicine (DOEM) through direction of the DCCS are lead agencies. Reception of patients will be by multiple forms of transportation and delivered into the triage area. Expect ground ambulance, tactical vehicle, and POC delivery. Medical, Surgical, Nursing, and Logistical supervisors will direct emergency requirements into triage area(s). Upon completion of triage, patients requiring further life support procedures will be admitted into DACH or transferred to an outside medical facility with the requisite capabilities to care for the patient. Accountability through patient tracking systems will occur.

   b. Decentralized execution commences. Ancillary services to include logistics and administration will organize to support DOEM requirements. As events warrant or if the magnitude is such, other installation medical units will be asked to provide assistance. Objectives are three fold; control the situation, treat and protect the injured, and sustain medical services. Independent actions and decision making consistent with the mission will occur from all levels of leadership.

   c. Cooperative action will emplace medical supplies, equipment and material. Forces in reserve (see Manpower Pool and Task Organization) are allocated. Administrative functions and coordination is effected with lateral and higher headquarters. Patient equipment and personal effects secured. Additional ward space and beds are prepared. Family member and patient chain-of-command receptions is established. A media site will be established. Patient care and treatment continues until full return to normalcy.

FILE: C1

12/08/97
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALITY MANAGEMENT: CODE YELLOW

3. **Policies.**

   a. All immediate category casualties will be initially stabilized in the Emergency Room.

   b. The Triage Officer will be the senior surgeon present.

   c. Patient care category areas are:

      (1) **IMMEDIATE.** Located in Emergency Room. Overflow area is ICU (Ward 2B). OIC is Chief, Department of Emergency Medicine or senior representative.

      (2) **CRITICAL CARE, Pre- and Post- Operative.** Initially, Pre-Op will be located in ICU step-down (Ward 2B), Post-Op is PACU. OIC, Physician assigned as the ICU attending.

      (3) **DELAYED.** Ward 3B as backup. OIC is physician (internist or family practice) assigned to the combined inpatient service attending or senior representative. Additional staffing by residents and Phase II students.

      (4) **MINIMAL.** Located in the Family Health Center of Fort Belvoir. OIC is the Medical Director of the Family Health Center of Fort Belvoir.

   d. The **CRISIS INTERVENTION/DE-STRESS and DISCHARGE** area will be located in the Family Practice Conference Room. OIC is Chief, Mental Health or senior representative.

   e. **TRIAGE AREAS.** The primary triage area will be the grassy area in front to the emergency room entrance. During inclement weather and hours of darkness, the Emergency Waiting Room Area may be used. Overflow area will be inside, within the patient waiting area.

   f. **MEDIA SITE.** To be determined by facility PAO.

4. **Tasks Common to All.** All Chiefs, Dept/Div/Act/Services will:

   a. Implement alert and notification plans and on order, recall those personnel off-duty and from operational or support commitments.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

b. Implement internal emergency procedure SOP’s following approved protocols.

c. On order, department chiefs will provide a dedicated liaison to EOC for information updates and internal status reports.

d. Direct personnel without pre-assigned MASCAL duties to the Manpower Pool.

e. On demand, all wards will provide ER with one gurney or litter.

f. Take immediate steps to keep family members, excess staff, and other non-essential personnel away from the triage site, emergency room, and the five MASCAL patient care areas.

g. Take immediate steps to identify supplies and equipment that may be needed and infuse these resources when called upon.

h. On demand, return all military vehicles to C, Logistics. Dispatch will be prioritized by EOC.

i. Continue normal health care services to beneficiaries as best possible.

j. Keep the EOC and chain of command(s) informed of changing situations.

k. Ensure all safety precautions and infection control protocols are observed for all personnel at all times.

5. Specific Tasks.

a. C, Department of Emergency Medicine or senior medical officer on duty will:

   (1) Assess the situation and in absence of guidance, has authority to declare a MASCAL situation and announce CODE YELLOW as appropriate. Becomes OIC of IMMEDIATE patient care area.

   (2) Establish a triage site(s) at DACH most appropriate to the situation. Appoints Officer-in-Charge (OIC) of Triage Team and controls ER traffic, and ambulatory patient handling area.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

(3) Establish communications and coordination with chain of command, EOC, OR, and ICU for follow-on casualty care.

(4) As required send a Triage Team (see TAB C for team composition) to the accident site by any mode of transportation available, with OIC assuming control of on-site triage efforts.

(5) Be prepared to receive in support an anesthetist/anesthesiologist and a surgeon skilled in situation specific requirements.

(6) Request additional MASCAL supplies, and equipment requirements during initial estimate of the situation.

(7) Clears ER of all non-critical patients to the Extended Care Clinic or to an appropriate area.

(8) Provide critical personnel skill requirements to the EOC by AOC/MOS. Include requirements for dedicated specimen, blood, and blood product couriers, patient transport teams, and other manpower requirements.

(9) Establish and maintain communications with other emergency medical services on Fort Belvoir or DUSAA as the situation warrants, and/or civilian emergency medical services as appropriate.

(10) Coordinate with EOC if additional MP support is required.

(11) Coordinate for a medical escort for all casualties requiring MEDEVAC to another facility.

b. **Adjutant or Administrative Officer of the Day (AOD) and SDNCO** will:

(1) Alert the command group per AOD/SDNCO instructions for MASCAL situations and Code Yellow announcement status.

(2) Implement alert notifications and/or recall of personnel after assessing the situation with OIC Triage/ER.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

(3) Implement other emergency procedures per AOD/SDNCO standing instructions and/or special guidance. On order, direct Information desk to announce Code Yellow over the beeper paging system and hospital speaker system.

(4) Notify the post EOC, Walter Reed AOD, and NARMC AOD/EOC and render periodic reports as required if DACH EOC is not activated/operational.

(5) In the absence of a PAO, coordinate with post PAO and assume duties as hospital spokesperson.

c. **C, Department of Surgery** or senior representative will:

(1) Organize surgical teams for full mass casualty effort. Organize patient flow, operating and recovery rooms.

(2) Provide a senior surgeon to perform duties as Triage OIC for trauma related mass casualty incidents.

(3) Provide anesthesiologists to assist ER staff with airway management.

(4) Maintain in-house communications with other department chiefs, operating rooms, recovery room, emergency room.

(5) Effect rapid internal re-supply of pharmaceutical and expendable surgical/medical supplies.

(6) As necessary coordinate with DON to relocate patients from inpatient wards receiving expansion requirements.

d. **C, Medical Director of ICU** or senior representative will:

(1) Organize and staff the CRITICAL CARE, Pre-Op (located in ICU step-down) patient care areas. Is the OIC of the critical care pre-op and post-op patient care areas.

(2) Be prepared to provide a Triage Team OIC for non-trauma mass casualty situations.

(3) In coordination with Department of Nursing (DON) and Patient Administration Division (PAD), discharge
non-critical admitted patients as necessary, opening beds for trauma patients.

(4) On demand, dispatch at least one Respiratory Specialist (91V) to the ER.

e. **C. Department of Family Practice** or senior representative will:

(1) Organize and staff the **DELAYED** (located on Ward 4A with 3B as backup) patient care areas. OIC is physician (internist or family practice) assigned as the combined inpatient service attending.

(2) Organize DOFP internal medical assets (residents, Phase II students, etc.) and physical therapy personnel for sustained emergency operations in the delayed patient care area.

(3) Coordinate with Department of Surgery, Department of Medicine, and other medical departments for post-triage patient care.

(4) Direct unutilized DOFP personnel to the manpower pool.

(5) Be prepared to become alternate OIC of internal Triage Team.

(6) During duty hours and through the DCPMC, alert facility clinics to expect receiving minimal care patients from the disaster site.

(7) Organize and staff the **MINIMAL** patient care area (located in the Family Health Care Center of Fort Belvoir).

(8) The OIC of the minimal patient care area is the Medical Director of the Family Health Care Center of Fort Belvoir.

(9) With assistance from OB/GYN, account for and discharge outpatients derived from the disaster/emergency in the minimal care patient area.

f. **Mental Health**, or senior representative will organize and staff the **CRISIS INTERVENTION/DE-STRESS** and
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALITY MANAGEMENT: CODE YELLOW

**DISCHARGE** patient care area (located in the Family Practice Conference Room). In coordination with DCCS prepare follow-on care plans. Is the OIC of the crisis intervention/de-stress and discharge patient care area. Implement as appropriate, crisis intervention counseling.

g. **Deputy Commander for Clinical Support (DCCS),** or Acting DCCS will:

1. Organize and control the total medical response effort and allocate human and material resources.

2. Monitor management of trauma causalities and medical patients originating from disaster area/site.

3. Establish and direct appropriate follow-on care programs. Organize clinical assets for post-operative and/or post-admission medical care.

h. **Deputy Commander for Nursing,** or Chief Clinical Nursing or senior Nurse Emergency Room will:

1. Organize and assign the nursing staff for emergency medical care. Direct unutilized nursing personnel to the labor pool.

2. Implement ward expansion plans as warranted by the situation.

3. Provide DOM with nursing personnel for care of Critical Care Pre-op and Post-op patients.

4. Provide other emergency nursing duties where indicated by the gravity of the situation.

5. Determine medical supply and equipment requirements and after screening internally available assets, provide to C, Logistics for consolidated procurement or issue.

6. Be prepared to provide the ER with nurse anesthetist(s) in coordination with C, DOS.

i. **C, Department of Pathology,** or senior representative present will:
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

(1) On order, provide phlebotomy team(s) to triage area and/or ER as necessary to draw blood specimens for lab testing.

(2) As the situation warrants or on order, provide a blood status report to the EOC reflecting available blood supplies from all sources. Be prepared to make the necessary arrangements to receive blood products to handle and support the MASCAL.

(3) Coordinate with C, Logistics to provide transportation for the deceased to our morgue. Drivers will be obtained from the labor pool. In the event that the morgue has reached its maximum capacity of 8 to 10, the Department of Pathology will coordinate with Fairfax County Medical Examiner and local military morgues for supplemental morgue space. Coordination will be made with the Chief, Logistics for refrigerated vans should the MASCAL require additional temporary morgue space.

(4) Coordinate with installation Casualty Assistance Officer (through AG Casualty Branch), and provide assistance to accomplish requirements for the deceased.

C. Patient Administration Division, or senior PAD representative present will:

(1) Execute pre-packaged medical record support. Request additional administrative/clerical support personnel from DCPMC when required.

(2) Establish liaison to effect the transfer/regulation of patients to other military medical facilities, VA hospital, and civilian hospitals.

(3) Provide a PAD team to the triage/ER to collect and safeguard patient’s equipment and personal effects.

(4) Provide command group (EOC) with casualty lists, unit of assignment, if known, and periodic updates.

(5) Provide an EOC representative IAW Annex G.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

(6) Coordinate as required with installation AG Casualty
Branch and Mortuary Officer for patient administrative
requirements of the deceased.

k. **Company Commander**, or representative will:

   (1) Coordinate with and maintain communications with
       EOC or Command Group for manpower and labor
       allocation requirements.

   (2) On order, provide EOC support IAW Annex G.

l. **C. Operations and Training**, or senior division representative
   present will:

   (1) On order, implement and execute Emergency
       Operations Center functions IAW Annex G.

   (2) Implement lateral, higher headquarters, and community
       notification as appropriate to the situation.

   (3) Coordinate for MP and/or security forces as required
       for traffic control, family assistance and crowd control.
       Request MPs clear fire lanes of any and all
       POVs/unauthorized vehicles.

   (4) Manage and institute lessons learned requirements.

m. **C. Nutrition Care Division** will:

   (1) On demand, provide nutritional care to the command
       and staff, EOC and shift personnel, volunteers, and as
       authorized by the commander, family members, media,
       VIPs, etc.

   (2) As the situation warrants, be prepared to stop customer
       food costs and the surcharge.

n. **C. Logistics Division**, or senior division representative present
   will:

   (1) Implement emergency re-supply, service,
       housekeeping, and medical maintenance/equipment
       repair plans. If practical, determine requirements and
       implement emergency logistics for night operations
       (procure generators, light sets for Triage/ER areas, etc.)
through the EOC. If not activated coordinate directly with installation operations center.

(2) Issue extra medical supplies and materials on an emergency basis to the ER and/or triage site(s).

(3) Implement elevator independent power operations working condition, issue by-pass keys, and staff the elevators with dedicated operators. Coordinate with Red Cross officials, through the EOC, for additional manpower requirements.

(4) As required, re-call DACH vehicles support and establish centralized motor pool. EOC will establish priority of dispatch.

(5) Organize and manage a litter and blanket exchange site with ER.

(6) Be prepared to provide a temporary mortuary in coordination with C, Department of Pathology.

(7) Provide personnel for EOC support IAW Annex G.

(8) Provide personnel without pre-assigned MASCAL duties to manpower pool.

o. **Public Affairs Officer**, will:

1. Coordinate with and notify appropriate Public Affairs Officers and disseminates authorized information. Request patient information updates from EOC.

2. Coordinate with appropriate PAOs to establish a media center when necessary.

3. Secures authorization to release patient information from the patient, the patient’s family members, or as appropriate, the patient’s chain-of-command, or the DACH command group, for further release to media sources.

4. Be the official DACH spokesperson. Be the escort for the medical center to those media representatives authorized access to patient care areas.
p. **C. Social Work Service** will:

(1) On order, become OIC and establish, staff, and operate a Family Assistance Center located in the Main Conference Room. Coordinate staffing assistance with Department of Ministry/Pastoral Care and Representatives, American Red Cross. The alternate Family Assistance Center will be the Medical Company Day Room.

(2) Coordinate with the installation Emergency Casualty Assistance Center (ECAC), if activated, through AG Casualty Branch, and be prepared to assist with family member counseling.

(3) Coordinate with DACH’s Staff Judge Advocate for legal assistance representative in the Family Assistance Center.

q. **C. Ministry/Pastoral Care** will:

(1) Administer emergency ministrations as appropriate.

(2) Will provide ministerial and staffing support to the Family Assistance Center. In coordination with Social Work Service, disseminate factual information on the status of loved ones to family members.

(3) On order, coordinate with the installation Emergency Casualty Assistance Center (ECAC), if activated, through AG Casualty Branch, and be prepared to assist with family member pastoral care.

r. **C. Radiology** will expand operations to maximum capacity. WILL NOT send personnel to the manpower pool.

s. **C. Pharmacy** will expand operations to maximum capacity. WILL NOT send personnel to the manpower pool.

t. **C. OB/GYN** will provide personnel to assist family practice physician with DELAYED patient care area operations.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

u. **All Other Professional Departments, Services, and Activities**, will:

(1) On demand, and in coordination with the primary care providers, assist with clinical emergency casualty care and/or with administrative support functions.

(2) Detail other professionals staff and care providers to the manpower pool.

(3) Provide administrative personnel, to include civilian employees, to the manpower pool for patient documentation assistance, carrying litters, pushing wheelchairs, and other labors.

v. **All Other Administrative Divisions and Services**, will:

(1) Provide emergency administrative, material, supply, nutritional care, engineering, housekeeping, and other resource support within capabilities.

(2) Provide administrative personnel, to include civilian personnel, and other secondary care providers to the manpower pool for patient documentation assistance, carrying litters, pushing wheelchairs, beds, gurneys, and other labors.

(3) Refer to Annex E (Personnel and Administrative Management) for further instructions and tasks.

w. **American Red Cross Volunteers** are requested to:

(1) Assist in clearing all elevators of non-essential personnel and visitors and provider elevator operations in coordination with Logistics Division.

(2) Assist in family member comfort in coordination with Social Work Services and Pastoral Care/Ministry.

(3) Assist in transporting lab reports between ER and clinical services.

6. **Coordinating Instructions.**

a. In absence of specific guidance, next-of-kin notification VSI, SI, and ambulatory patients will be reported (via PAD) to unit chains-of-command.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALITY MANAGEMENT: CODE YELLOW

b. Reporting of medical data, lab reports, and other critical patient information will be by courier or CHCS only. Telephonic notification of results is inappropriate and subject to error.

c. Ft Belvoir military police support will provide assistance with controlling and dispersing on-lookers, family members, and other non-medical, non-essential personnel.

d. All personnel engaged in triage operations will follow approved protocols appropriate to their level of experience and expertise.

e. Volunteers not affiliated with a recognized volunteer organization may not be used for emergency assistance.

f. Safety, standard precautions, and infection control policies will not be compromised.

C. COMMAND, CONTROL, COMMUNICATION (C3). Upon plan implementation, the following C3 additions/changes will occur:

1. **Command.** No changes.

2. **Control.**

   a. Commander, DACH is Chief, Crisis Management Team and has authority to announce or delegate MASCAL CODE YELLOW. Is initially located in the command wing. As appropriate, details CSM to manpower pool to assist with detail/labor management.

   b. Deputy Commander for Clinical Services controls and allocates clinical services. Serves on Crisis Management Team. Is Acting Commander during Commander’s absence and has authority to announce MASCAL CODE YELLOW. Is initially located in the command wing.

   c. Deputy Commander for Administration controls and allocates material and human resources. Serves on Crisis Management Team and has a authority to announce MASCAL CODE YELLOW. Is initially located in the command wing.

   d. Company Commander controls (OIC) the manpower pool.

   e. Deputy Commander for Nursing controls the nursing staff. Serves on Crisis Management Team.
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

f. C, Operations and Training manages the EOC and controls the EOC staff. Advises the Crisis Management Team.

g. C, Department of Emergency Medicine controls the ER staff and establishes the triage site. Coordinates with appropriate department (Surgery, Medicine) for Triage Team OIC. Is authority to declare CODE YELLOW. During after duty hours authority to announce CODE YELLOW rests with the senior medical officer present.

h. The OIC of the mobile (on-site) triage team is appointed from available medical personnel assets most appropriate to the mass casualty situation.

i. C, Social Work Services controls the Family Assistance Center staff.

j. OICs of patient care areas will keep the EOC and command group informed of changing situations and requirements.

k. All other departments/division/service/activity chiefs remain available to task, organize, and allocate human and material resources.

3. Communication. See Annex F, SIGNAL.

a. Chief, IMD has authority to impose minimize on telephone communications and electronics message traffic.

b. While mobile, the ambulance teams will utilize current radio equipment to communicate with field units and fire departments.

c. Hand held radios (available form Adjutant/EOC) will have priority issue to C, DOS, C, Emergency Dept, DCCS, C, Operating Room, C Manpower Pool, hospital Triage Area, and C, Immediate Area.

d. The telephone will be a primary voice network for the command group and department/division chiefs. See Annex F for telephone lists and secure.

e. Chief, IMD as required, will coordinate with post Director of Information (DOIM) for additional EOC communications to include FAX, LAN, e-mail, FM radio, and secure STU-III
APPENDIX 1 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MASS CASUALTY MANAGEMENT: CODE YELLOW

equipment. Special cellular phones may be procured for
patient/family communication.

ENCLOSURES:
TAB A - Heat Injuries
TAB B - Manpower Pool Organization and Management
TAB C - Triage Team Organization
TAB D - Family Assistance Center Operations
TAB E - Public Affairs Operations
TAB F - Delayed Treatment Area
TAB G - Minimal Treatment Area
TAB H - Immediate Treatment Area
TAB I - Critical Care, Pre-op/Post-op Treatment Area

FILE: C1
1-C-15
12/08/97
A. **REFERENCE.**

1. Protocol. DACH Emergency Room - Heat Injury
2. Field Manual (FM)21-11. First Aid for Soldiers

B. **SITUATION.** Ambulance Section or the Emergency Room is notified of heat casualties which have overwhelmed unit medical capabilities and the more seriously affected are in-route to DACH. After initial notification, it is highly probable that more patients are to follow. Casualties are expected to be delivered by all modes of transportation (air, ground, POV).

C. **CONCEPT OF THE OPERATION.** As stated in Appendix 1 plus:

1. Ambulance section confirms situation, number of patients and degree of heat injury. Emergency Room task organizes by coordinating with chain of command and service/support divisions.
2. Heat injury MASCAL protocols are implemented. Triage area is established. PAD representatives assist in patient identification and tracking. Patient equipment and personal effects protected. Chief, Clinical Nursing/or Charge Nurse, Ward 4A prepares ward space and assigns nursing personnel.
3. Non-critical patients are removed from the ER waiting room to DeWitt Family Health Center. Litter bearers, gurney operators, lab and specimen couriers and other personnel requirements are drawn from available personnel. The Command Group is notified.
4. Patient's chain of command is consulted. Medical follow-ups continue. Chaos is controlled, situation contained and normalcy re-established.

D. **TASKS.** Review tasks stated in Appendix 1 and:

1. **Supervisor, Ambulance Section,** will:
   a. Confirm seriousness of situation and potential numbers of heat casualties. Report findings to ER.
   b. Coordinate ambulance transportation requirements to and from site. On order, transport medical team to site for initial triage control.
   c. Assist in triage at DACH.

FILE: C-1-A

A-1-C-1

12/08/97
2. **OIC, Emergency Room**, will:
   a. Coordinate with EOC for Triage Team OIC. Determine requirement for code yellow recommend such to DCCS.
   b. Implement heat injury protocol.
   c. Determine need to send a medical team for on-site triage.
   d. Coordinate with EOC for additional manpower requirements.

3. **Chief, Emergency Medicine** will be prepared to become the principle Triage Officer, on order, or as the situation warrants.

E. **COORDINATING INSTRUCTIONS.**

1. Ice is available in the Dining Facility. Additional IV fluids, poles, litters, and litter straps are available from Logistics Division.

2. A heat injury MASCAL exists when at least 10 persons per hour are brought into the emergency room or when 15 or more **confirmed** number of casualties are in-route to DACH.

3. Safety codes, standard precautions, and infection control policies will not be compromised.

F. **COMMAND, CONTROL AND COMMUNICATIONS (C3).** As stated in Appendix 1 plus:

1. During normal duty hours, authority to formally declare a heat injury MASCAL rests with the command group.

2. After duty hours, weekends and holidays, authority to formally declare a heat injury MASCAL rests with the senior medical officer present.

3. Authority to implement re-call of personnel is inherent with declaration of code yellow.
A. **GENERAL.** All requirements for professional, primary and secondary care providers, and labor and administrative personnel will be centrally consolidated into a manpower Pool, located in the Dining Facility. As the situation warrants, personnel with certain skill requirements will be assigned emergency duties when called upon by a requesting department through the EOC, if established. A manpower pool may be established under any emergency situation.

B. **SITUATION.** An emergency situation has occurred on Fort Belvoir or in the vicinity of, generating a significant number of casualties in a relatively short time-frame. DACH is alerted to prepare to receive and treat casualties. Orders are issued to organize and staff a consolidated manpower pool from available personnel, regardless of rank. Skill requirements are received through the EOC and transmitted to the Manpower Pool. Personnel are allocated for emergency medical, nursing, logistical and administrative requirements.

C. **ASSUMPTIONS.**

1. Physicians, surgeons, and major elements of the nursing staff have pre-planned emergency duty instructions and will not report to the Manpower Pool.

2. Major clinical departments may establish internal manpower pools during a limited response separate and distinct from a general CODE declaration.

3. Standard precautions for infection control and safety standards will be observed by all manpower pool participants and will not be compromised.

4. Civilian employees will respond accordingly. Overtime or compensatory time is inherently approved by an official declaration of an emergency situation.

5. DENTAC will respond to DACH's requests for oral surgeons, a dental forensic team, and other manpower requirements as necessary.

D. **CONCEPT OF OPERATIONS/MANAGEMENT.**

1. Orders are issued by the command group or EOC, to establish the Manpower Pool.
2. Upon orders, the first NCO or Officer present within the dining facility will set-up and organize the manpower pool. This initial responsibility will last until the arrival of the OIC (Company Commander), and First Sergeant to the Dining Facility and establishes communications, either by runner or by phone, with the EOC or command group. Initial organization of the dining facility will occur with the first arriving personnel. EOC provides skill requirements and OIC allocates personnel. Accounting of personnel is secondary to meeting initial manpower requirements.

3. Personnel not required for essential emergency duties within their assigned workplace will be directed to report to the Manpower Pool. In addition, many day-to-day activities that are not absolutely essential will be, as specified by department/division chief, deferred, curtailed, or discontinued for the duration of the emergency.

E. TASKS.

1. Company Commander will develop implementing plans that support this appendix.

2. OIC, Manpower Pool will respond to manpower requests from the EOC as a first priority.

3. Periodic status reports of personnel available, by AOC/MOS, will be provided to the EOC.

4. Assign personnel (91Cs) to assist the patient Discharge area located in the Family Practice Conference Room.

5. LABOR REQUIREMENTS. Initial Manpower Pool requirements to be provided and be prepared for are:

   a. Two (2) messengers/runners to the EOC and Triage area(s).

   b. One or more Respiratory Specialist (91V) to the ER.

   c. A minimum of 10 laborers to Logistics Division to carry out efforts of re-supply, positioning materials and equipment. Identify all military licensed drivers.

   d. On demand, laborers to Department of Nursing for ward and bed expansion purposes.

   e. On demand, liter carriers, gurney and wheelchair pushers to the ER, OR, and Department of Nursing.
f. On demand, couriers/messengers to laboratory and clinical service offices for relaying specimens and test results to ER and OR(s).

g. Elevator operators to Department of Logistics for dedicated elevator operations using manual or keyed by-pass controls.

h. Couriers for transporting blood, blood products, and by-products for Department of Pathology.

i. Clerks, typists, telephone operators, and administrative personnel to Patient Administration Division and other divisions/departments/activities/services.

F. COORDINATING INSTRUCTIONS:

1. Civilian volunteers not affiliated through a recognized volunteer organization may not be utilized.

2. Standard precautions and safety standards will not be compromised.

3. Personnel will not be assigned duties not qualified for by lack of certification or license.

4. Medical smocks or disposable linen may be required for personnel arriving in civilian attire. Direct coordination with C, Logistics is authorized.

G. COMMAND, CONTROL, COMMUNICATIONS.

1. **Command.** No changes to current relationships are anticipated.

2. **Control.**

   a. The *Company Commander* is the Officer-in Charge of the Manpower Pool, its task organization, operation and management.

   b. The First Sergeant, is the assistant OIC. The assistant will establish communication (runners, phone) with the ER/OR and EOC.

   c. The Command Sergeant Major will initially collocate with the OIC and assist in personnel control, accountability, and utilization. The CSM will provide input to the command group and the EOC as to manpower pool status of operations.
3. **Communications.**

   a. Initial communications between the Manpower Pool and the EOC/Triage Teams will be by hand held radio, the phone(s) located in the Dining Facility, also see Annex F, Signal) will be used by the OIC and assistants as a secondary (backup) system.

   b. If available, hand-held radios may be issued for internal voice communications.

CATINA, CATHERINE
CPT, MS
Company Commander
A. **GENERAL.** Triage teams are formed to expedite casualty care by identifying life-threatening wounds from non-life threatening wounds for priority treatment. The team will triage patients by standard patient priority categories (immediate, minimal, delayed, or expectant) so the most critical non-expectant patient is seen first by emergency medical personnel.

B. **TRIAGE TEAM COMPOSITION.** During emergency situations two triage teams will be formed. One triage team stays within the patient receiving area. During mass casualty situations or when the situation dictates, a triage team will be taken by Ambulance Services to the disaster site. The "on-site" triage team will perform on-site triage of patients and direct patient movement priorities. Communications to and from the Emergency Dept will be by normal ambulance communication devices. The triage teams as a minimum may be staffed as follows:

<table>
<thead>
<tr>
<th>in-house Triage Team</th>
<th>Mobile Triage Team</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 - Emergency Physician</td>
<td>1 - EMS trained Physician</td>
</tr>
<tr>
<td>4 - EMS trained Nurses</td>
<td>4 - EMS trained Medics</td>
</tr>
<tr>
<td>4 - EMS trained medic's (91B)</td>
<td>(2 -ALS providers)</td>
</tr>
<tr>
<td>1 - PAD representative (71G MOS)</td>
<td>(2 - BLS provider)</td>
</tr>
<tr>
<td>Litter Teams</td>
<td>Litter Teams</td>
</tr>
</tbody>
</table>

Note: a Chaplain, a Psychiatrist, and a Dentist may supplement the triage team(s)

C. **PATIENT DISPOSITION: TRIAGE AREA.** Initial patient reception area may be established outside the ER. During inclement weather the patient receiving area will be inside the walk-in entrance of the ER or elsewhere as the situation warrants. Once triaged, casualties will be further moved to a defined area based on their category given during triage.

D. **PATIENT DISPOSITION: TREATMENT AREA.** Patients will be transferred to specific areas based on the four-triage categories. Each area will have a designated OIC with support staff.

1. **Immediate:** Primary Location - Emergency Room waiting room. Patients will be transferred to appropriate patient care area: OR, ICU, PACU (pre-op of patients pending surgery) ASAP to make space for additional patients as needed. The OIC will be the C, EMS.

2. **Delayed:** Primary Location - 4A. OIC will be a Family Practice attending. Alternate Location – 3B.
3. **Minimal**: Location - Family Health Center at Fort Belvoir. OIC will be a surgical staff who is not participating in surgical procedures. Alternate Location: Specialty Clinic (Surgical, GI, Orthopedic, and Physical Therapy).

4. **Expectant**: Primary Location - Lab/Phlebotomy area. OIC will be a Family Practice attending. Alternate Location -

5. Patients to be **Discharged** will be escorted to Family Practice Conference Room for crisis intervention and/or de-stress counseling.

E. **PATIENT DISPOSITION: MEDEVAC.** Casualties taken to DACH who require air evacuation will first be stabilized in the Triage Area. As the need arises, the Triage OIC will coordinate initially with the Ambulance Section/911 for medevac requests. The Ft. Belvoir Fire Department and MP’s will be notified so an area may be secured for a landing zone. The following Medevac services the Ft. Belvoir region:

1. **MedStar** - able to transport up to 2 patients per aircraft. Two aircraft on site at Washington Hospital Center. Staff consists of a RN and EMT-P. **Telephone**: 1-800-824-6814 or (202) 877-7000.

2. **AirCare** - able to transport up to 3 patients per aircraft. One aircraft on site at Fairfax Hospital (INOVA). Staff consists of a RN and EMT-P. **Telephone**: 1-800-258-8181 or (703) 698-3009.

3. **U.S. Park Services** - able to transport up to 4 patients per aircraft with 2 aircraft on site at Bowling AFB. Staff consists of 5 aircrew with 3 medical provider with ALS capabilities. **Telephone**: (202) 690-0768.

The following civilian facilities have agreements with DACH to accept MASCAL patients and are designated alternative critical care patient reception sites:

<table>
<thead>
<tr>
<th>Facility</th>
<th>Emergency Dept</th>
<th>Hospital</th>
</tr>
</thead>
<tbody>
<tr>
<td>Washington Hospital Center</td>
<td>(202) 877-7000</td>
<td>877-6701</td>
</tr>
<tr>
<td>Fairfax Hospital (INOVA)</td>
<td>(703) 698-3111</td>
<td>876-0522</td>
</tr>
<tr>
<td>Potomac Hospital</td>
<td>(703) 670-1363</td>
<td>670-1363</td>
</tr>
<tr>
<td>Mount Vernon Hospital (INOVA)</td>
<td>(703) 664-7000</td>
<td>360-9199</td>
</tr>
<tr>
<td>Children’s Hospital</td>
<td>(202) 884-5433</td>
<td></td>
</tr>
</tbody>
</table>

All other transfer arrangements between military/DOD facilities remain in effect.
F. COORDINATING INSTRUCTIONS.

1. Logistics Division will manage litter and gurneys availability.
2. Blanket exchange point will be coordinated through Logistics Division, Linen Branch.
3. MASCAL supply containers is the responsibility of the Chief, Emergency Room.
4. Manpower will be coordinated with the EOC.

G. COMMAND, CONTROL, COMMUNICATION.

COMMAND. The OIC of the Mobile Triage Team will be responsible for medical management. The Fort Belvoir Fire Department will establish an Command Post with an Incident Commander (IC) who will be the Officer-In-Charge at the scene.

CONTROL. Staging area for triage and patient loading will be coordinated with the IC. In accordance to Fort Belvoir Department Mascal SOP, a Transportation Officer is identified within the Command Post to keep track of the movement of patients to all medical facilities (military or civilian). The Triage OIC is to provide the medical guidance on the where the patient should go for care and the type of evacuation (ground or air) that would be appropriate.

COMMUNICATION. Communications will be channeled through the on-scene Fire Department Command Post so the overall scene management may be controlled. Request for additional medical support or manpower is to be made through the IC.

12/08/97
A. **GENERAL.** During a disaster or emergency situation strong emotions occur including fear, numbness, shock, confusion, and anger. These emotions can appear in victims, their families and relatives, friends, and co-workers.

B. **SITUATION.** An emergency situation has occurred on Fort Belvoir generating a significant number of casualties. During this casualty situation concerned families and friends will converge upon the main conference room. Orders are issued to organize and staff a Family Assistance Center.

C. **EXECUTION.**

1. **Concept of Operations.**
   a. On order of the EOC or command group, a Family Assistance Center will be organized and established in the Main Conference Room, located on the basement floor of the main hospital.
   
   b. Chief, Social Work Services is designated as Chief, Family Assistance Center. Additional staffing will be provided by Department of Ministry and Pastoral Care, Red Cross volunteers, and personnel from the Manpower Pool.
   
   c. Services that will be provided include grief counseling, social service referrals, comfort refreshments, patient status updates, and other related services. OIC will coordinate with Staff Judge Advocate for legal assistance/representation.
   
   d. The Family Assistance Center will operate and provide services until terminated by the EOC or the command group.

2. **Tasks.**
   a. Chief, Social Work Services will develop implementing plans/SOP in coordination with Red Cross officials and Chief, Department of Ministry and Pastoral Care.
   
   b. Chief, Department of Ministry and Pastoral Care will provide Family Assistance Center staffing and administrative support within area of expertise. Assign chaplains and provide counseling as appropriate.
   
   c. Staff the hospital main entrance to receive family members and friends of casualties.
d. Director, Red Cross Volunteers is invited to provide staffing and administrative support within area of expertise.

3. Coordinating Instructions.
   a. Logistical resources (tables, desks, typewriters, etc.) will be provided from internal (SWS, Red Cross, Chaplain) sources.
   b. Additional personnel requirements will be submitted to the EOC. The EOC will task the Manpower Pool to provide personnel assets as available.
   c. Refreshments for family members and friends, staff and volunteers, may be coordinated directly with the Dining Facility.
   d. Provide the EOC with periodic updates of activities and degree of situation involvement.

D. COMMAND, CONTROL, COMMUNICATIONS.

1. Command. No changes to current command relationships is anticipated.

2. Control. The Chief, Social Work Services controls the Family Center, its operation and management. The senior Chaplain present is designated deputy chief.

3. Communications. Normal telephone lines will be used as the primary means to alert and recall Family Assistance Center personnel. The Main Conference Room has telephone lines for direct communications with the EOC. See Annex F for phone numbers and communication devices available.

A. REFERENCES.

1. AR 360-5, Army Public Affairs - Public Information
2. AR 360-61, Army Public Affairs - Community Relations
3. AR 360-81, Command Information Program
4. FM46-1, Public Affairs Operations
5. MEDCOM Pamphlet 360-1, Public Affairs Officer’s Desk Top Guide
6. Walter Reed Army Medical Center Reg 360-1, MEDCEN Public Affairs Program
7. USAFB Policy Letter 360-14-96, Interaction with External Media

B. GENERAL. Any large-scale disaster generating significant numbers of casualties will cause intense media interest. The media will request interviews with survivors, family members and the staff of DeWitt Army Community Hospital.

C. SITUATION. An emergency situation has occurred on Fort Belvoir generating a significant number of casualties. Due to the gravity of the situation, media interest is generated. Orders have been issued to implement Code Yellow and the MEDDAC PAO/Spokesperson is notified.

D. MISSION. To release appropriate information on DACH’s emergency medical care activities, and its patients, consistent with limitations of security, accuracy, propriety, policy, and patient privacy, in order to keep the public informed, retain public confidence in DeWitt ACH, and preserve favorable media and community relations.

E. EXECUTION.

1. Assumptions. None.

2. Friendly Forces. For the purposes of this plan, all PAOs on Fort Belvoir, representing all commands and tenant organizations, will assist and/or augment the MEDDAC PAO when called upon with public relations duties during times of emergencies and/or disasters, and during humanitarian operations.
3. **Concept of Operations.** The installation PAO is the lead agent with MEDDAC PAO as the hospital’s spokesperson and public affairs representative. Information will be received from various sources and can be expected to be incomplete, contradictory, out of date, wrong, and biased. A media center will be established. As local and national media representatives arrive on the scene, situation updates, interviews, and human interest stories will be demanded. Cooperative action will ensue. Initial chaos will be overcome. Orderly and objective news releases will be available. Closure of emergency PAO operations will occur as a normal part of the disaster/emergency containment and return to normalcy process.

4. **Tasks:** The DACH Public Affairs Officer/Spokesperson will:

   a. Immediately notify appropriate PAO offices; i.e., Fort Belvoir PAO and any unit or tenant PAOs with personnel involved in or victims of a disaster or emergency. Notify lateral and higher headquarters PAOs. Notify counterparts at local and civilian medical facilities.

   b. In coordination with installation PAO, establish the media site (normally SOSA Recreation Center). Coordinate with the DACH EOC for periodic updates and exchanges of information in a timely manner.

   c. Accompany media representatives within the interior of the hospital when representatives are so authorized access.

   d. Coordinate with the DACH EOC for periodic updates and exchanges of information in a timely manner.

   e. Take immediate actions as necessary to correct discrepancies or erroneous press reports.

   f. Keep the WRAMC, MEDCOM and OTSG Public Affairs Offices informed of the situation. Respond to WRAMC, MEDCOM and OTSG reporting requirements accordingly.

   g. Draft news releases and/or periodic situation updates for command approval.

5. **Standing Policies.**

   a. INTERVIEWS. Requests to interview patients and attending health care providers will be honored subject to appropriate written agreement of individuals concerned.
b. MEDIA ACCESS to health care personnel will be made available to the news media whenever requested for interviews subject to WRAMC/MEDCOM/OTSG/Installation PAO notification.

6. Information concerning special operations personnel will not be released without specific chain of command or installation approval.

7. Classified information will be protected from unauthorized disclosure and under no circumstances will be released to media representatives.

OFFICIAL:

SUSAN J. ALLEN
Public Affairs Officer
A. **MISSION:** To receive and treat casualties categorized as “delayed” until the resources of the hospital permit them to receive definitive care or can be transferred to a facility which can provide definitive care.

B. **LOCATION:** The delayed treatment area will be located on inpatient ward 4A and 3B.

C. **RESPONSIBILITIES:** The OIC of the delayed treatment area will:
   1. Supervise the overall operation of the delayed treatment area.
   2. Ensure that all patients are properly categorized as “delayed.”
   3. Coordinate directly with the Chief, Department of Emergency Medicine and EOC to ensure appropriate and efficient utilization of personnel and resources assigned to the delayed treatment area.
   4. Coordinate with nursing staff and representatives from the pediatric, surgical, orthopedic and obstetric services to assess disposition patients previously admitted to wards 4A and 3B. Patients will be dispositioned by discharge or transfer based on an estimate of the resources required to support the delayed treatment area.
   5. Coordinate with the OIC, Operating Room for movement of “delayed” patients to that area. Coordinate directly with Chief, Department of Emergency Medicine and Chief, Department of Surgery to evaluate hospital resources and anticipated surgical workload. Arrange for transfer of stable “delayed” patients to other facilities for definitive care as required.
   6. Ensure that required documentation of medical treatment is completed on every patient.

D. **STAFFING:** The specific staffing of the delayed treatment area will depend on the nature of the mass casualty event and requirements for personnel to support other areas. The OIC of the delayed treatment area will coordinate closely with the EOC and Chief, Department of Emergency Medicine to ensure that the delayed treatment area is assigned sufficient personnel to meet situational requirements. Recommended minimum staffing levels for planning purposes are outlined below:
   1. Family Physicians or Internists: 5 (Inpatient residents and attending physician)
2. Orthopedic Surgeon: 1
3. Pediatrician: 1
4. Clinical Nurse: 2
5. Practical Nurse: 2
6. Enlisted Medical Specialist (91B) or Medical Assistant: 2
7. Administrative Coordinator: 1

E. SUPPLY REQUIREMENTS: (1 set each for 4A and 3B)

A. **MISSION:** To provide definitive care to casualties classified as “minimal” resulting from a mass casualty event.

B. **LOCATION:** The delayed treatment area will be located on at the Family Health Center of Fort Belvoir.

C. **RESPONSIBILITIES:** The OIC of the delayed treatment area will:

1. Supervise the overall operation of the minimal treatment area.
2. Ensure that all patients are properly categorized as “minimal.”
3. Coordinate directly with the Chief, Department of Emergency Medicine and EOC to ensure appropriate and efficient utilization of personnel and resources assigned to the minimal treatment area.
4. Ensure that the medical records packet for released patients are retained in the minimal treatment area until retrieved by Patient Administration Division personnel.
5. Immediately notify the Admissions and Dispositions Branch of all patients requiring admission. Report discharged active duty military patients to the Patient Administration Division for direction to assist in the “manpower pool” as dictated by the situation.

D. **STAFFING:** The specific staffing of the minimal treatment area will depend on the nature of the mass casualty event and requirements for personnel to support other areas. The OIC of the minimal treatment area will coordinate closely with the EOC and Chief, Department of Emergency Medicine to ensure that the minimal treatment area is assigned sufficient personnel to meet situational requirements. Recommended minimum staffing levels for planning purposes are outlined below:

1. Ophthalmologist: 1 (if not required in immediate or delayed areas)
2. Family Physicians, General Medical Officers or Physicians Assistants: 5
3. Internist: 1
4. Pediatrician: 1
5. Clinical Nurse: 2

IMMEDIATE TREATMENT AREA:

A. MISSION: To receive those casualties categorized as Immediate from the Triage Area and prepare them for surgery. To provide care necessary to stabilize the patient while awaiting surgery.

B. LOCATION: Within the emergency room. The alternate will be the pharmacy waiting area.

C. RESPONSIBILITIES: OIC will:

1. Supervise the overall operation of the Immediate area.

2. Ensure casualties received have been properly triaged as Immediate.

3. Coordinate closely with the supervisor of the Operating Room to establish the sequence in which the patients receive surgery.

4. Ensure that area is adequately supplied with necessary medical supplies.

5. Ensure that the area is staffed as planned and the any deviations are reported to the Emergency Operations Center.

6. Ensure that the required documentation of medical treatment is completed on every patient.

D. STAFFING: The exact breakdown of the physicians and nursing personnel designated for the area will depend on the exact nature of the disaster. The tentative staffing for planning purposes will consist of the following:

1. General Surgeon 1
2. EMS MD/ General Medical Officer 1
3. Internist 1
4. EMS Nurse 3
5. EMS NCO 3
6. Practical Nurse 2
7. Patient Administrative Specialist 1

4. Linen:
  a. Sheets
  b. Blankets
  c. Scrubs Sets
A. **MISSION:** To receive and treat “pre-op” and “post-op” casualties until the resources of the hospital permit them to receive definitive care on 4A or can be transferred to a facility which can provide definitive care.

B. **LOCATION:** The pre-op and post-op treatment area will be located on the step down unit of 2A.

C. **RESPONSIBILITIES:** The OIC of the pre and post-op treatment area will:

1. Supervise the overall operation of the pre and post-op treatment area.

2. Ensure that all patients are properly identified as “pre-op” and “post-op”.

3. Coordinate directly with the Chief, Department of Emergency Medicine and OIC to ensure appropriate and efficient utilization of personnel and resources assigned to the pre and post treatment area.

4. Coordinate with nursing staff and representatives from the pediatric, surgical, orthopedic and obstetric services to assess the disposition of patients previously admitted to wards 4A and 3B. Patients will be disposition by discharge or transferred to 4A, 3B, or another treatment facility based on an estimate of the resources required to support pre and post-op patients.

5. Coordinate with the OIC, Operating Room for movement of pre-op patients to the OR and post-op patients back to the step-down unit or to 4A. Coordinate directly with Chief, Department of Emergency Medicine and Chief, Department of Surgery to evaluate hospital resources and anticipated surgical workload.

6. Ensure that required documentation of medical treatment is completed on every patient.

D. **STAFFING** the specific staffing of the pre and post-op area will depend on the nature of the mass casualty event and requirements for personnel to support other areas. The OIC of the pre and post-op area will coordinate closely with the EOC and Chief, Department of Emergency Medicine to ensure that the pre and post-op treatment area is assigned sufficient personnel to meet situation requirements. Recommended minimum staffing levels for planning purposes are outlined below:

1. Family Physicians or Internists: 1 (inpatient residents or attending physician)

2. Orthopedic Surgeon: 1

3. Clinical Nurse: 1

FILE: I-C

12/08/97
4. Practical Nurse: 1

5. Enlisted Medical Specialist (91B) or Medical Assistant: 1

6. Administrative Coordinator: 1

E. SUPPLY REQUIREMENTS.

1. Medical Supplies:
   - Lactated Ringers: 12ea
   - Foley Catheter: 8ea
   - Three-way Stopcock ext. tubing: 12ea
   - Adhesive Tape 1": 4ea
   - Adhesive Tape 2": 4ea
   - 4x4 Sterile Dressing: 4bx
   - 2x2 Sterile Dressing: 4bx
   - Voluntrol with Tubing: 20bx
   - Salem Sump Tubes, 16f, 18f: 8ea
   - NS IV Solution: 12ea
   - Primary IV Set: 20ea
   - Latex Gloves: 2 bx
   - Lumbar Puncture Tray: 2ea
   - Betadine Solution: 1gal
   - Laceration Set: 5ea
   - Butterfly Needle, 19ga: 1bx
   - IV Catheter, 18ga, 20ga: 1bx
   - Syringe, Disposable 10cc: 2bx
   - Utility Bowl, 32oz: 1gal
   - Betadine Scrub: 1bx ea sz
   - Surgical Gloves: 12ea
   - Primary IV Tubing: 12ea
   - Secondary IV Tubing: 8ea

2. Central Material Supply:
   - Paraecentesis Tray (Basic DX Tray): 1ea
   - Tracheotomy Tray: 1ea
   - Thoracentesis Tray: 1ea
   - Minor Surgery Set: 4ea

FILE: I-C

I-C-2

12/08/97

A. **MISSION:** To provide for supervision and control of all nursing personnel and maintain control and proper utilization of bed space.

B. **CONCEPT OF OPERATIONS.**

1. The appropriate Department of Nursing Alert Notification Procedures will be initiated when the Deputy Commander for Nursing (DCN) or the representative is notified that an ALERT has been called. The last person on each alert chain will call back to the information desk to notify completion of the chain.

2. All officers and enlisted personnel assigned to Department of Nursing will report and sign in at the manpower pool in BDU’s (if civilians are activated, will report in duty whites). Personnel assigned to teams will report to designated areas following sign-ins.

3. In the absence of the DCN, the Chief, Clinical Nursing will act as the DCN and make appropriate assignments.

4. Upon notification that the EPP is in effect, each ward will forward a Ward Report to the A&D Office listing the name and status of each patient (discharged vs. inpatient).

5. The Ward Physicians will determine appropriate discharges. The charge nurse will make telephonic contact to PAD. Patients determined to be discharged will be seated in each ward’s day room until a PAD clerk completes the discharge procedures and until his/her transportation arrives. If determined feasible by the Ward Physician, those active duty patients who are able will be referred to the manpower pool.

6. Each ward will maintain a current listing of patient dispositions, bed status and interward transfers on the 24 hour nursing report. This information will also be provided to PAD personnel assigned to each ward. VSI/SI and death reporting will be accomplished as expeditiously as possible through PAD personnel assigned to each ward.

C. **FUNCTION OF EACH DEPARTMENT OF NURSING UNIT.**

1. See Annex C1FA and C1Ga, Tab H to Appendix 1 to Annex C.

2. ICU - expect critical post-ops. ICU step-down - utilized for pre-op patients and post-ops unless the post-ops are transferred to 4A.

FILE: J

12/08/97
3. 4A - delayed patients designated area.

4. MBU - overflow delayed patients.

5. Labor & Delivery (L&D) - pending the Commander's decision based on the casualties L&D may be closed and placed on re-route, if so all staff will report to the manpower pool.

6. Same Day Surgery/GI Clinic will be closed.

7. PACU - usual post-op recovery mission. Upon completion of surgeries, report to the manpower pool.

DCN
APPENDIX 2 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – FIRE-CODE RED

A. REFERENCES.

1. AR 385-10, The Army Safety Program
2. AR 420-90, Fire Protection

B. GENERAL. Fire and smoke within DACH or its supporting facilities can cause physical damage or loss of facilities, supplies and equipment. In addition injury to personnel or loss of life may occur. This appendix is provided to establish response procedures in the event that a fire starts somewhere within the medical facility and its adjoining buildings. This appendix also applies to other fire related situations to include smoke, toxic fumes, and non-deliberate explosions.

C. SITUATION. Smoke has been detected from an unknown origination within close proximity of patients and hospital staff. A fire alarm or smoke detector may or may not have been triggered. Actions must be taken to evacuate and protect patients, staff members, and secure property and equipment.

D. MISSION. DACH personnel will protect the lives of patients, themselves, and government property on discovery of a fire or similar situation with the facility or its adjacent facilities and warehouses. Additionally, they will sound the alarm so as to minimize the effect of fire and smoke damage to personnel and property.

E. EXECUTION.

1. Assumptions.
   a. A fire will occur anywhere within DACH when fire safety precautions are ignored.
   b. A fire will not involve more than one floor or the core medical facility, or more than a single story of an adjacent building, or one complete warehouse.
   c. Adequate fire fighting systems and fire departments are available 24 hours/day.
   d. Smoke detectors, fire alarm boxes and automatic sprinklers may not be operational at any given time.
APPENDIX 2 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – FIRE-CODE RED

e. A simultaneous external emergency (MASCAL) will not occur with an internal fire emergency.

2. Friendly Forces.

a. Fort Belvoir Fire and Rescue Departments
b. Community Fire and Rescue Departments

3. Concept of Operations. DACH has adopted the National Fire Protection Association’s R-A-C-E concept of fire response. The RACE format will be used as explained below.

a. The following steps will be executed by all personnel in the fire area as quickly as possible.

   (1) **RESCUE**
   (2) **ALARM**
   (3) **CONFINE**
   (4) **EXTINGUISH/EVACUATE**

b. Rescue.

   (1) The first person discovering the source of the fire will ensure that everyone is out of the room/area/warehouse.

   (2) If anyone is remaining in the room/area, they will be removed to the nearest safe area and the room door will be closed to confine the fire.

c. Alarm.

   (1) The person discovering the fire will immediately sound the alarm by voice prior to implementing rescue procedures.

   (2) An electrical alarm is sounded by activating the red fire alarm system mounted on the wall. Notify one's immediate chain of command by voice or telephone.

FILE: C-2

12/08/97
The immediate chain of command will notify 911, Clinical Support Division, or the DCCS, or the AOD as appropriate. Give a patient census report to the CSD/AOD or EOC (if established) and indicate if patient evacuation assistance is required.

d. Confine.

(1) Immediately close all doors leading into the fire area. If practical, close all windows or ensure all windows are closed. Close every door to every room and all corridor, stair, and fire doors.

(2) Turn on all lights (day or night) and unplug any unnecessary appliances/equipment from electrical outlets.

(3) Turn off all medical gases (oxygen, nitrous oxide) and suction at the nearest valve.

e. Extinguish/Evacuate

(1) Try to put the fire out; use available extinguishers or any other means to quickly extinguish the fire and stop it from building/spreading. Close the room door after extinguishing the fire.

(2) Reopen the door only if you intend to rescue someone or you intend to put the fire out.

(3) Organize to evacuate personnel as follows:

(i) On the ground/first floor, all personnel other than staff will be directed out of the building.

(ii) On the second floor and up, as conditions permit, all personnel shall remain in place until told when and where to move by the Evacuation Officer (DCCS). Personnel will evacuate without orders when patient or staff safety is in jeopardy.

FILE: C-2

12/08/97
(iii) On order, or as conditions allow, personnel on the upper floors of the hospital will move horizontally into another fire compartment on the same floor (i.e. A/B/C wing stairwells) before moving vertically (down). Vertically movement will be initiated first only if horizontal movement is not possible and the space must be evacuated.

4. **Priority of Evacuation.**
   
a. Babies and small children  
b. Patients confined to beds  
c. Ambulatory patients (to include Adolescent Partial Hospitalization)  
d. Visitors, family members  
e. Non-essential staff  
f. all others

5. **Evacuation Guidelines.**
   
a. The stairs are the primary means of vertical movement. The elevators will not be used unless specifically authorized by the Fire Department. Under the direction of the fire department personnel or the Evacuation Officer, personnel will be transported to a lower floor of the building.  

b. All personnel must be accounted for during evacuation. Accountability of patient will be maintained at all times.  

c. Patients will be protected during movement. Normal safety procedures during movement will be followed to the extent possible to prevent additional injuries during transport. Patient records and medications should accompany each patient.  

d. No attempt will be made to evacuate compressed gases. Leave cylinders in a room with the door closed. No gases will be
moved on elevators or the stairs unless necessary for life support.

e. For areas other than the fire area, all personnel, upon hearing a fire alarm, will assume a working fire in progress and immediately confine their area. All doors and windows will be closed and lights turned off. The staff will comfort patients and prepare to assist with evacuation.

6. **Tasks Common to All.** Chiefs, Departments / Divisions / Services and Activities will:

   a. Be prepared to provide personnel for patient escort, fire fighting, security, and assist in containing the fire or smoke emergency.

   b. Develop and implement fire response procedures of their area(s) of responsibility taking into consideration R-A-C-E procedures, location and use of emergency fire fighting equipment.

   c. Provide training and periodically practice proper response procedures that encompass patients, military staff and civilian employees.

   d. Develop and maintain personnel accountability procedures that encompass patients, military staff and civilian employees.

7. **Specific Tasks.**

   a. Safety Officer.

      (1) Is the Fire Marshal for DACH.

      (2) Will develop, implement and direct fire response plan.

      (3) Directs the initial on-scene response during fires or fire related incidents. Provides advise to the Evacuation Officer for partial evacuation decisions.

      (4) Has the authority to declare Code Red.

   b. Collateral Duty/Section Safety NCO
APPENDIX 2 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – FIRE-CODE RED

(1) Is the Assistant Fire Marshal.

(2) Assists the Fire Marshal with on-scene response. Assumes duties and authority as Fire Marshal in absence of Fire Marshal.

c. Deputy Commander for Clinical Services.

(1) Is the DACH Evacuation Officer.

(2) Has the authority to declare Code Red and implement partial or total evacuation of DACH.

d. Chief, Patient Administration Division.

(1) Is the Assistant Evacuation Officer.

(2) Assists the Evacuation Officer with patient, visitor, and staff evacuation.

(3) Reports evacuation progress to EOC when activated.

e. Supervisor, Information Desk, or AOD/SDNCO.

(1) On order, call 911 for Fort Belvoir Fire Department, if not already alerted by fire alarms.

(2) On order, announce Code Red on overhead speaker system. On order increase volume to overhead speakers.

(3) Maintain duty and off-duty page and telephone numbers of the Fire Marshals and Evacuation Officers for emergency notification.

(4) Notify Hospital Engineers of emergency, providing as much detail as possible.

(5) Notify the Medical Company of emergency, providing as much detail as possible.
APPENDIX 2 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – FIRE-CODE RED

(6) Announce Code Green (All Clear) after the emergency is terminated and verified by the Fire Marshal or senior fire official on the scene.

f. Chief, Department of Surgery.

(1) Direct surgical and medical assets into patient receiving areas when causalities occur.

(2) Be prepared to coordinate for burn specialists from external sources.

g. Chief, Department of Medicine

(1) Notifies pulmonologists and internist to be prepared to receive smoke inhalation injuries.

(2) Notifies Respiratory Therapy to prepare mechanical ventilator support procedures.

(3) Directs movement of mechanical ventilators to the ICU as necessary and aid physicians in monitoring and treatment of patients.

h. Deputy Commander for Nursing

(1) Directs nursing assets into patient receiving areas.

(2) Directs nursing assets in support of patient evacuation, accountability, and medication security.

(3) As the situation warrants, coordinate with Chief, Logistics(Engineers) and/or Fire Department to shut off suction and oxygen’s systems.

i. Chief, Logistics Division

(1) Provide transportation equipment (wheelchairs, litters, etc.) for the emergency evacuation of litter and ambulatory patients.

(2) On order, or as appropriate, shut down electrical, suction, oxygen, and other hospital-wide systems.
APPENDIX 2 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – FIRE-CODE RED

(3) Be prepared to provide keys/master keys to EOC or Wardmasters.

j. Wardmasters and Department/Division/Activity/ Service

(1) Develop evacuation floor plans with primary and secondary evacuation routes within the area/ward of responsibility. Coordinate same with adjacent areas for comprehensive plan.

(2) Train staff in fire emergency response procedures. Ensure rehearsals are completed periodically in accordance with regulations.

(3) Provide keys/master to lock/unlock rooms.

(4) Comply with para D.6. (Task Common to All) above.

F. COMMAND, CONTROL, AND COMMUNICATIONS. No Changes to current policy and procedures are anticipated.

1. The safety Officer is DACH Fire Marshal.

2. The Collateral Duty Section NCOIC are the Assistant Fire Marshals.

3. THE DCCS is the DACH Evacuation Officer.

4. The Chief, PAD is the Assistant Evacuation Officer.

FILE: C-2

2-C-8

12/08/97
INTERNAL EMERGENCY: WORK STOPPAGE//SLOWDOWN
UTILITY OUTAGE//FAILURE
INFECTION//EPIDEMIC
BOMB THREAT (Code Orange)

A. GENERAL. Disruption of patient care due to internal emergencies as stated herein must be considered within any medical emergency preparedness plan. Although the chance of occurrence is considerably remote, the potential still exists for full-scale disruption to medical center operations if allowed to go unnoticed or uncorrected.

B. CONCEPT OF OPERATIONS.

1. Work Stoppage/Slowdown.
   a. Participation by DACH employees in work slow down or stoppages is contrary to the nature and commitment of health care providers. Options to ensure continuing patient care include:
      (1) Direct higher authority.
      (2) Self-policing by medical licensing boards.
      (3) Transfer of patients to civilian or VA medical facilities.
      (4) CHAMPUS and TRICARE referrals.
   b. In those rare instances or situations whereas civilian personnel might become engaged in work slow downs, a variety of responses/actions are available depending on departments/service/activity situation. Responses may include:
      (1) Nutrition Care: In-house military personnel will be used for food preparation, serving, and clean up. Cooks and cook supervisors may be detailed from other installation dining facilities on an as needed basis.
      (2) Re-supply, Maintenance, and Services: will continue with supervisors and management, supplemented by military personnel.
(3) Nursing: will continue to function with augmentation of staffing with military personnel.

(4) Clinical and Out-Patient Support: will continue to function by managerial staff. Some non-critical appointments may be rescheduled or canceled.

c. Chief, Personnel Division is executive agent for potential slowdown/stoppage and provides to DCA recommended solutions/bargaining agendas.

2. Utility Outage/Failure.

a. Electrical. The Possibility of an electrical outage closing services within the hospital is considered remote due to the installations ability to re-route power for priority usage. In addition, the auxiliary generators are continually maintained and tested. Temporary power outages are frequent during the summer months due to lighting; however, the auxiliary generators, are capable of compensating for these outages.

b. Water/Sewage. The possibility of a DACH wide disruption of water and sewage is remote. In the unlikely event that the main water main and pump are disabled, significant quantities of water tankers are available on post for emergency water resupply. In addition, Chief, Logistics Division will provide continuous maintenance oversight for detecting potential water and sewage problems and implement actions to preclude DACH wide disruptions.

c. Infection/Epidemic. When established sanitation principles and practices are allowed to degrade, opportunities for outbreaks of diseases and infections within the installation and within the military centers, concerns with diseases or infections striking a unit and degrading its readiness still continue. Handling of refugees and displaced persons during humanitarian operations also provide soldiers and health care providers ample exposure to third world disease against which U.S. military forces are vulnerable to and largely unprotected against. Preventive Medicine Service is lead agency to continually monitor and update sanitation practices in coordination with the Department of Nursing’s Infection Control Office. The infection Control Officer will provide advise when MEDDAC is faced with special situations requiring more than standard protection.
APPENDIX 3 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN

3. Bomb Threats. It is considered prudent to include bomb threat procedures as part of the EPP. The recent bombing in the Federal Building in Oklahoma City demonstrate that catastrophic incidents with horrendous loss of life can happen. Follow the procedures of Appendix 3 (Bomb Threat) to Annex R (Force Protection/Combating Terrorism).

C. COORDINATING INSTRUCTIONS. The Command Group will order implementation of necessary and prudent measures that control and contain internal emergencies above and beyond normal practices. This includes water conservation, "brown-outs", and other needed measures. Primary responsibility for utility conservation plans and implementation is the installation DWPE. Primary responsibility for bomb threat jurisdiction rests with the CID and Military Police.

D. SERVICE SUPPORT. See basic plan. No additional requirements are anticipated beyond a reorganization of priorities.

E. COMMAND, CONTROL, COMMUNICATIONS. No changes are anticipated for implementing internal emergency actions.

OFFICIAL:

[Tarrant]
LTC, AN
Chief, Operations and Training
APPENDIX 4 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
CONTAMINATED PATIENT MANAGEMENT

A. REFERENCES.
1. AR 200-1, Environmental Quality
2. AR 200-2, Installation Hazardous Waste Management Plan
3. AR 40-13, Medical Support - Nuclear/Chemical Accidents and Incidents.
4. AR 200-3, Installation Spill Control Plan
5. Technical Manual(TM)3-220, Chemical, Biological, and Radiological Decontamination

B. GENERAL. Despite their role as less prominent components of warfare on the conventional battlefield, nuclear, biological, and chemical (NBC) weapons continue to pose significant threats as terrorists tools and weapons for other forms of unconventional conflict. Moreover, soldiers are exposed to a multitude of NBC hazards in the course of daily training and garrison activities. Chemicals and radiological contamination may occur from accidental exposure during handling, spills, and explosions. Clean-up operations of industrial accidents, chemical spills into the environment, and battlefield clean-up operations represent commonly encountered hazards as well. Infections and toxic exposures from environmental, food, or waste sources are similarly causes for potential concerns.

C. SCOPE. The focus of this appendix is to situations that may generate many (more than 5) contaminated casualties. Isolated incidents or individual cases of biological and chemical contamination, blood and food borne pathogens, and radiation poisoning, are treated on a case by case basis. This appendix also does not pertain to social or sexually transmitted diseases, nor zoonotic (rabies, etc.) diseases, except as they may result from a mass contamination.

D. SITUATIONS GERMANE TO DACH. Fort Belvoir and the Northern Virginia community is exposed to many hazards. Threats to soldiers, dependents, and civilian employees include:

1. Nuclear Threat/Attack. Due to the type military forces located and operations conducted within the Military District of Washington, a significant portion of the local area is designated a high risk area by the Federal Emergency Management Agency. While the probability
APPENDIX 4 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
CONTAMINATED PATIENT MANAGEMENT

of nuclear attack is currently low, the potential exists for radiation exposure due to accidents, sabotage, and terrorism.

2. **Hazardous Materials.** There are several industries and dealers in Northern Virginia considered generators/users of hazardous materials. Chemical characteristics of the material involved pose a danger to the environment, water, and inhabitants when accidentally released in high concentrations. Hazards to the Fort Belvoir population include airborne clouds of concentrated chemicals drifting to and through the installation. Fort Belvoir is dependent on the Potomac river for its water supply. Deliberate or inadvertent pollution due to purposeful or accidental dumping into this river and its tributaries can contaminate the entire water supply.

3. **Diseases, Infections, and Epidemics.** See Appendix 3, Internal Emergencies.

E. **CONTAMINATED PATIENT POLICIES.**

1. DACH IS NOT a decontamination site for soldiers with non-life threatening injuries.

2. Contaminated patients will be decontaminated in accordance with standard procedures consistent with their life threatening medical needs.

3. Medical staff will apply measures to protect themselves from receiving and spreading the contaminate.

4. Contamination will not defer efforts to save life or limb.

5. Isolation techniques may be employed, depending on type and severity of contamination/infection. Restricted access rules may apply with military police/guard enforcement.

6. All clothing, materials, supplies, and equipment used for medical care of a contaminated patient is considered contaminated and will be disposed of according to established procedures.

F. **EXECUTION.**

1. **Friendly Forces:** In addition to forces listed in Annex A:

   a. DEH Hazardous Material Response Team (HAZMAT)(call 911)

FILE: C-4

12/08/97
b. Installation chemical companies (DISCOM: 21st Chemical Company, COSCOM: 101st Chemical Company)

c. Fire Departments from Fort Belvoir and surrounding community.

2. Assumptions: None

3. Concept of Operations.
   a. Concepts as outlined in Appendix 1, Mass Casualty Management: Code Yellow apply.
   b. Upon notification that a casualty producing situation has occurred, a triage set will be established outside and downward of the hospital. Modified MASCAL procedures will commence. Type of contamination must be identified through field/site reports, and/or chemical testing. Hazardous Material Response Team communicates with installation activities concerning type contamination and protective barriers to be used.
   c. As necessary, isolation wards will be designated. Controlled access measures imposed.

4. Tasks Common to All. All Chiefs, Departments/Divisions/Activities/Services will:
   a. On order, implement re-call notification procedures.
   b. Direct personnel without pre-assigned functions to the Manpower Pool.
   c. Take immediate steps to identify supplies and equipment that may be needed and infuse these resources when required.
   d. Capture costs associated with operations envisioned in this appendix.
   e. Keep the EOC and chain of command informed of changing situations and outside requirements.
   f. Ensure all safety precautions and infection control protocols are observed for all personnel at all times.
5. **Specific Tasks.**

a. **Chief, Emergency and Ambulance Service** on order, will establish a triage site ICW MASCAL plan, outside and downwind of the hospital. Activate and operate the decontamination shower stalls.

b. **Chief, Preventive Medicine Services** is lead agency for contamination prevention policies. Directs prevention and containment operations of water and food borne pathogens. The following health officials are also available to provide subject matter advice:

   (1) Community Health Nurse
   (2) Environmental Health Officer
   (3) Health Physics Officer
   (4) Epidemiology & Disease Control Officer
   (5) Industrial Hygiene Officer

c. **Safety Officer** will advise the command of disposal procedures for contaminated waste.

d. **Chief, Logistics** will provide approved containers for hazardous and contaminated waste. Disposes of waste ICW current hazardous waste guidelines.

e. **Chief, Operations and Training** will render reports as appropriate to lateral and higher headquarters. On order, activate the EOC.

f. **Commander for Veterinary Services** is lead agency for animal control and food inspection operations.

g. **Infection Control Officer (Dept of Nursing)** will provide guidance as to any special isolation measure if indicated.

h. **Chief, Nutrition Care Division** will take necessary steps to destroy food and food by-products found to be the source of carrying food borne pathogens.

FILE: C-4

12/08/97
6. **Coordinating Instructions.**

   a. Medical Personnel will receive required immunizations and vaccinations within specified time frames.

   b. All personnel involved in contaminated patient operations will don protective clothing and use all available barriers to protect themselves from contamination in accordance with guidelines established for the incident.

G. **SERVICE SUPPORT.** See Annex C and Appendix 1, plus:

1. **Supply and services.**

   a. Sufficient supplies exist on-hand or are available through normal re-supply channels to support decontamination operations outlined by this appendix.

   b. For purposes of re-supply, supplies used for decontamination operations are one use, one time only, items.

2. **Administration.** Incident reports to installation headquarters and Medical Command will be made periodically. Follow-up and final reports will be provided as necessary. After action reports/reviews of contaminated patient procedures and management will be accomplished.

H. **COMMAND, CONTROL, COMMUNICATIONS.** See Annex C and Appendix 1. No changes are anticipated.

**OFFICIAL**

Chief, PM Services

FILE: C-4

4-C-5

12/23/97
A. REFERENCES.

Fort Belvoir Regulation 155-1, Routine and Hazardous Weather Condition Procedures, 01 September 1996.

B. GENERAL. Natural Disasters are defined as hazardous conditions which may require reduction or curtailment of medical center activities. DeWitt Army Community Hospital (DACH) and Fort Belvoir is susceptible to violent weather (hurricane, tornado) or a weather condition (snow, ice) hazardous to personnel while at work and traveling to and from work. Included in natural disaster management is an evacuation plan for civilians and military personnel residing off-post. In addition, natural disaster management also considers continuing mission essential activities through procedures that will provide safe military transportation to pick-up and return mission essential personnel.

C. WARNINGS, CONDITIONS, NOTIFICATIONS, AND POLICIES.

1. Installation Weather Warnings:
   a. Hurricane Condition IV - 72 hrs prior to arrival of 50 knot winds.
   b. Hurricane Condition III - 48 hrs prior to arrival of 50 knot winds.
   c. Hurricane Condition II - 24 hrs prior to arrival of 50 knot winds.
   d. Hurricane Condition I - 12 hrs prior to arrival of 50 knot winds.

2. Weather Warning Notification.
   a. The Garrison Commander is responsible for notifying installation units and activities through the IOC and is the overall coordinator for weather warning instructions.
   b. During duty hours the installation IOC will announce weather warnings. Instructions will be provided to release or retain personnel. Military personnel residing on-post could have separate instructions and may be ordered to work details for preparing and securing installation equipment and property from damage.

FILE: C-5

5-C-1

12/08/97
c. During non-duty hours the installation IOC will announce weather warnings to the AOD/SDNCO and will utilize public service messages on local radio and TV. Instructions will be provided to stay at home or report to work. Military personnel residing on-post could have separate instructions as stated above, and may include debris clearing activities, snow and ice removal, traffic control/assistance, and guard detail.

d. Specific instructions concerning hurricane conditions and weather warnings will accompany alert notifications. Each condition and warning has preparation requirements assigned, i.e., organize rescue teams, labor squads, prepare shelters, etc. DACH will organize manpower and resources accordingly.

e. DACH will implement alert/notification/recall procedures as necessary to the situation IAW Annex B.

3. Mission Essential Personnel. Mission essential personnel are defined as those civilian employees who perform duties vital to the continuity of patient medical care. Direct patient care providers and individuals and ancillary services in support of patient care are mission essential. Civilian employees are to be notified in writing if considered mission essential by department/division/service/activity chief and provide written return acknowledgment. All military are considered mission essential.

4. Weather Warning Policies for DACH Personnel. Upon declaration of weather warning from the Garrison Commander the following apply:

a. Release from Work.

(1) Facility Commander is ultimate authority for release from work

(2) Management and Supervision will be last released after patient staffing requirements have been met.

(3) Non-management and non-supervisory civilians will be released according to furthest from home, first to leave concept.
APPENDIX 5 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
NATURAL DISASTER MANAGEMENT
INSTALLATION SUPPORT

(4) Military personnel residing on-post may be exempt from release, depending on situation and Garrison Commander’s instructions.

(5) Mission essential personnel will remain on duty until relieved. Safe transportation will be provided to return home.

b. Reporting to Work.

(1) Follow radio and TV message instructions.

(2) Mission essential employees will make every effort to report to work consistent with safe travel conditions. If not able to travel, military transportation may be dispatched for consolidated/individual personnel pick-up.

c. Work hours missed due to properly applied instructions will be considered administrative time, not subject to annual or sick leave deductions.

d. A pay differential for designated mission essential personnel is not authorized per labor bargaining agreements. Normal overtime pay and compensatory time rules apply.

e. Efforts to protect and secure patients, government equipment, supplies, and real property will have highest priority during weather related emergencies.

D. EXECUTION.

1. Friendly Forces. Per Annex A plus any assigned specialty forces per Garrison Commander’s instructions through the installation IOC.

2. Assumptions.

   a. Minimum warning time will allow DACH to prepare for natural disasters.

   b. For plan implementation, a weather related emergency must devastate Fort Belvoir with either one or more of the below events taking place.

5-C-3

FILE: C-5

12/08/97
APPENDIX 5 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
NATURAL DISASTER MANAGEMENT
INSTALLATION SUPPORT

c. Extended power/electrical outage
   (1) Extended water and/or sewage disruption
   (2) Severe property damage from high winds
   (3) Severe ice storm
   (4) Severe snow storm
   (5) Widespread flooding and stagnant water

3. Concept of Operations. DACH will support installation operations as follows:

a. Preparation Phase. If conditions warrant, the IOC may be established to coordinate tasks required to protect and secure life and property. When the Garrison Commander authorizes it, non-mission essential personnel may be released. Military personnel will be directed as necessary to execute stated and implied tasks. All efforts will be expended to keep damage to a minimum.

c. Post Phase. Damage assessment begins. Work details are formed for possible: (1) debris clearing, (2) snow/ice removal, (3) utility restoration and (4) real property repair. Support teams are dispatched with veterinarian and preventive medicine inspectors. Food and water checked. Electrical, water, and sewage conservation measures lifted if imposed. Return to normalcy continues.

4. Tasks.

a. Chief, Department of Emergency Services will:

   (1) In addition to expected trauma cases, be prepared to receive near drowning, electrical shock, and exposure patients, as well as animal/snake bite victims.
(2) Be prepared to provide maximum emergency trained medical personnel/crews on-hand/on-duty to respond to a surge of 911 requests for assistance.

(3) Coordinate with on-duty MP for additional patient/crowd control security forces.

b. **Adjutant** will maintain communications with the Administrative Officer of the Day and Staff Duty NCOs for up-to-date situation reports. Issue any special instructions as received by the Command Group/Crisis Management Team.

c. **Chief, Preventive Medicine Services** will:

   (1) Provide preventive medicine teams for insect and rodent control in coordination with installation DPCA, DPW, and DYNCORP.

   (2) Provide monitoring of disaster shelters to prevent outbreaks of diseases and potential health problems.

   (3) In coordination with Veterinary Services, be prepared to establish block ice distribution points if perishable food stuffs have undergone temperature abuse.

   (4) Coordinate with Dewitt's Chief of Marketing for contact with local radio/TV station for public service announcements on food, water, and public safety issues.

d. **Chief, Operations and Training** will:

   (1) On order, establish the EOC. Provide contingency plan recommendations to the Command Group/Crisis Management Team.

   (2) Establish and maintain communications with installation headquarters and the Walter Reed Health Care System. Provide situation updates periodically.
APPENDIX 5 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
NATURAL DISASTER MANAGEMENT
INSTALLATION SUPPORT

(3) Determine requirements for security, clean-up, and
other work details and direct priorities of work (see para 3.c.).

(4) Coordinate with C, IMD for non-electrical radio and
communication requirements.

(5) Be responsible for ground evacuation planning in
coordination with C, Logistics and installation officials.

e. **Chief, Logistics Division** (See Annex D, Logistics) will:

(1) Recall all vehicles and establish consolidated motor
pool for priority dispatch.

(2) As necessary, coordinate with installation motor pool
for mission essential personnel transportation and
vehicles for the Veterinarian and Preventive Medicine
inspection teams.

(3) When time permits, obtain and prepare to issue non-
electrical equipment and supplies; i.e., flashlights,
batteries, etc., power tools and hand tools for debris
cleanup, ice and snow removal equipment, water
purification tablets, etc. Coordinate with DPWE for
heavy machine utilization and priorities.

(4) Be responsible for necessary evacuation route planning
in coordination with C, POMS and installation DPWE.

f. **Chief, Patient Administration Division** will be prepared to
evacuate patients to other medical facilities determining best
and available transportation.

g. **Safety Officer** will recommend courses of action in response to
the situation. Ensure safety measures are enforced that protect
both patient and patient care provider.

h. **Chief of Marketing** will represent DACH for the installation
PAO. Provide news releases as requested.
APPENDIX 5 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
NATURAL DISASTER MANAGEMENT
INSTALLATION SUPPORT

i. Chief, Nutrition Care Division will:

(1) Monitor temperature on perishable foods and be prepared to request block ice or other needed preservation techniques.

(2) Coordinate with the Department of Nursing for requirements.

(3) Maintain patient diets and staff nutritional needs. Provide box lunches for those unable to leave duty station.

j. Chief, Personnel Division will maintain a list of designated mission essential personnel and a map to each home or quarters. List and map will be periodically updated. On order, provide same to the EOC.

k. Chief, RMD will negotiate with labor union officials for off-duty civilian recall as required by the situation.

l. Company Commander/1SG will on order establish Manpower Pool.

m. Commander, Fort Belvoir Veterinary Detachment is requested to provide veterinarian inspection teams to investigate and resolve food safety and zoonosis control issues. Tasks include the following.

(1) Assist in capture/treatment of injured wildlife/pets and provide advice for pick-up and disposal of wildlife carcasses.

(2) Assist in and provide advice for quarantining/segregating areas with a high density of dead wildlife.

(3) Submit tissue/blood samples to clinical pathology laboratories for disease surveillance testing.

(4) Provide emergency in-patient/out-patient services to injured wildlife and pets.

FILE: C-5

12/08/97
In coordination with Preventive Medicine Services provide public service announcements to radio/TV stations on pet and wildlife dangers to the public safety.

In coordination with Preventive Medicine Services, be prepared to establish block ice distribution points if perishable food stuffs have undergone temperature abuse.

Inspect damaged or temperature abused perishable and potentially hazardous food items to determine safety and serviceability.

Commander, Logan Dental Clinic is requested to provide an oral surgeon and support personnel to perform emergency dental procedures as needed.

All Other Clinical Departments/Services/Activities:

Be prepared to implement casualty assistance in accordance with MASCAL tasks and procedures outlined in Appendix 1.

Be prepared for near drownings, electrical shock, and exposure patients in addition to animal/snake bite victims.

Be prepared to expedite the discharge of non-critical patients as space and bed availability requirements dictate.

Evaluate and recommend to Chain of Command any special pre-storm preparation requirements and report post-storm damages within department/service/activity.

Provide and maintain essential patient services.

On order, provide personnel to the Manpower Pool.

Capture costs associated with natural disaster operations and report same through appropriate channels.
p. All Other Administrative Divisions will:

1. Be prepared to implement administrative assistance requirements in accordance with MASCAL procedures, tasks and responsibilities as outlined in Appendix 1.

2. Provide and maintain essential patient administrative services.

3. Evaluate and recommend to chain of command any special pre-storm preparation requirements and report post-storm damages within division.

4. Capture costs associated with natural disaster operations and report same through appropriate channels.

5. On order, provide personnel to Manpower Pool.

5. Coordinating Instructions.

a. Priority of transportation assets will initially go to mission essential employee pick-up and then to the Veterinary and Preventive Medicine inspection teams.

b. Accountability and welfare of assigned personnel are mandatory during emergency operations. Priority of snow removal, debris clearing, and real property repair will go to the Emergency Room entrances first and then other patient and staff entrances as outlined in MEDDAC MOI: Hazardous Weather dtd 9 Dec. 1996.

E. SERVICE SUPPORT.

1. Services.

a. Custodial Services will reorganize to maintain sanitation and cleanliness of wards, rooms, offices, and reception areas.

b. Conservation or rationing of supplies, water, electricity, etc. may be imposed.
2. **Support.**
   
a. Expenditures will be consolidated for reimbursement by the installation or US Army Medical Command.

b. Administrative sections reorganizes and supports clinical departments with necessary requirements.

c. Urgent and compelling contracts through commercial vendors will be authorized where necessary to support natural disaster operations.

F. **COMMAND, CONTROL, COMMUNICATIONS.**

1. **Command.** No changes are anticipated to current command structure during installation natural disaster operations.

2. **Control.** No changes are anticipated to current control and accountability procedures during installation natural disaster and weather related operations.

3. **Communications.** Primary means of communication will be by existing telephones. A portable radio net will be established IAW TAB 1 to Appendix 6 to Annex C. Runners provided by the Manpower Pool will be the primary alternate method of communications if power is disrupted. FM radios and battery operated hand-held radios will be available for selected/critical requirements.

---

**OFFICIAL:**

FRANCO
Deputy Commander for Administration

FILE: C-5

5-C-10

12/08/97
APPENDIX 6 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MEDICAL ASSISTANCE TO CIVIL AUTHORITIES

A. REFERENCES.

1. The Disaster Relief Act of 1974 (Public Law 93-288)
2. The Economy Act of 1932, with amendments, (31 USC 686)
3. The Posse COMITATUS Act (18 USC 1385)
4. AR 500-60, Disaster Relief

B. GENERAL.

1. Reference A.1. Authorizes the federal government to provide emergency assistance and aid to state and local governments in the event of emergencies or major disasters. In a major CONUS natural disaster (as witnessed by the floods in Georgia and California in 1994) medical resources (both personnel and equipment) may be deployed into the disaster site.

2. Situations that may require civilian request for military assistance may include:
   a. Severe Flooding
   b. Natural Disaster (major earthquake, hurricane, forest fires, drought, etc).
   c. Civil Disturbance/Rioting
   d. Man Made/Caused Disaster (Bombing/Airplane-Rail Crash)
   e. Major Environmental/Pollution Disaster
   f. Major industrial accident/explosion

3. In addition, Fort Belvoir and DACH are authorized to provide assistance when a serious emergency or disaster is so imminent to the civilian community that waiting for instructions from higher authority would preclude effective response. The commander may do what is required and justified to save human life, prevent immediate human suffering, or lesson major property damage or destruction.

FILE: C-6
12/08/97
C. **Restrictions.** Military assistance to civilian authorities is restricted by the following conditions:

1. Military provided support is not available to civil authorities from commercial sources.

2. Military support does not compete with private enterprise or civilian labor force.

3. Military support will end as soon as possible.

4. Military rehabilitation assistance after the disaster is authorized only when directed.

5. Military forces will not enforce or execute civil law.

6. A commitment for reimbursements made by civil authorities when requesting assistance for federal resources and assistance.

D. **Execution.**

1. **Friendly Forces.** As stated in reference A.5. and:
   a. City/County Governments and elected officials
   b. American Red Cross
   c. Local City/County Police Forces and Fire Departments
   d. Federal Emergency Management Agency (FEMA)
   e. Virginia National Guard
   f. National Disaster Medical System (NDMS)

2. **Assumptions.**
   a. No more than one emergency/disaster occurs at a time.
   b. Civilian and private sector resource requirements are exceeded.
APPENDIX 6 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MEDICAL ASSISTANCE TO CIVIL AUTHORITIES

3. Concept of Operations.

a. DACH may be requested to provide support and assistance to one or more of the following taskings in conjunction with Para B.2. situations above:

(1) Emergency Medical Treatment
(2) Emergency Hospitalization
(3) Patient Administration
(4) Preventive Medicine
(5) Medical Sorting/On-site Triage
(6) Insect and Rodent Control
(7) Temporary Morgue Space
(8) Veterinary Services

b. Depending on the situation or circumstance, DACH may declare Code Yellow and reduce or suspend normal medical activities for lower priority beneficiaries. Mobile triage teams will prepare for deployment. Clinical staffs redirects activities for reception of civilian casualties. MEDCEN forms mobile preventive medicine and veterinarian inspection teams. Nursing services prepares bed and ward expansion. Administrative staffs provide logistical, financial, and patient administrative support functions.

4. Tasks. Tasks as stated in Appendix 1, Mass Casualty, Appendix 4, Contaminated Patient Management, and Appendix 5, Natural Disaster Management Installation Support, apply. Specific taskings are dependent on the situation; EOC will communicate those requirements.

5. Coordinating Instructions. Any special coordinating instructions common to all will be provided as operations commence.
APPENDIX 6 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
MEDICAL ASSISTANCE TO CIVIL AUTHORITIES

1. As stated in Appendix 1, Mass Casualty, Appendix 4, Contaminated Patient Management, and Appendix 5, Natural Disaster Management: Installation Support, apply. Specific service support requirements are dependent on the situation; EOC will communicate those requirements.

2. Strict supply account management must be maintained when supplies and equipment are on loan to civil officials.

F. COMMAND, CONTROL, COMMUNICATIONS.

1. **Command.** No changes to command policies are anticipated. Military forces remain under their respective commands. Civil agencies exercise no command authority over federal military forces during disaster relief operations.

2. **Control.** Higher authority may impose OPCON of medical assets. No other changes are anticipated. Cooperation will be extended to disaster relief officials, civil authorities, and other non-military/federal officials and agencies providing leading roles to the community.

3. **Communications.** Civil and military tactical communications equipment may not be compatible. Primary means of communications will be the commercial telephone systems to include cellular phones. Dedicated lines may be installed as the situation demands. Alternative civil/military communications may consist of runners, official couriers, commercial handheld radios, and other compatible methods.

6-C-4
12/08/97
APPENDIX 7 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
NATIONAL DISASTER MEDICAL SYSTEM (NDMS)

A. REFERENCES.
2. Medical Command (MEDCOM Reg 500-2, Emergency Employment of Army and Other Resources - National Disaster Medical System
3. AR 500-60, Disaster Relief (Section II, Para 2-11E)
4. HSC Mobilization Plan, Tab F to Appendix 1 to Annex B MEDCOM Reg 500-5

B. GENERAL. The National Disaster Medical System (NDMS) is designed to care for the victims of an incident that exceeds the medical care capability of an affected state, region, or federal medical system. It may be used in a variety of emergency events, such as a major earthquake, an industrial disaster, a refugee influx, or a military contingency. Under a military contingency, the NDMS plan will be implemented as backup to the VA/DOD when their medical assets have been extend. NDMS is a national voluntary cooperative medical effort by the private sector securing reimbursement from federal sources.

C. CONCEPT OF OPERATIONS. In the event of a military contingency or mobilization with ensuing significant numbers of casualties, all available military medical sources and the VA/DOD contingency hospital system would be utilized prior to activation of the NDMS system. Military hospital beds, current and planned expansion, will be first used until capacity is reach. Primary backup to DeWitt Army Community Hospital will then be provided by the VA Medical Center, Washington DC, with secondary support provided by the VA hospital in Richmond, Virginia. Once these assets are near capacity, NDMS may be activated providing additional beds and medical resources by participating civilian hospitals.

D. EXECUTION.
1. **Friendly Forces.** NDMS situations may combine the military services, federal agencies, and civilian medical counterparts.

2. **Assumption.** National Command Authority (NCA) has directed the Department of Defense or the Federal Emergency Management Agency (FEMA) to implement emergency assistance plans utilizing federal resources.

FILE: C-7
7-C-1
12/31/97
3. **Responsibilities.**

a. **NDMS-Federal Coordinating Center (FCC) will:**
   
   (1) Acquire and maintain NDMS Memorandums of Understanding (MOU), with all participating civilian hospitals.
   
   (2) Periodically provide DACH with participating civilian hospitals and number of beds committed to NDMS with type specialties.
   
   (3) On order, establish initial notice to and coordination with participating civilian hospitals and provide DACH with current available beds and specialties at each civilian hospital.
   
   (4) Plan and conduct joint military-VA-civilian annual exercises of the system, strongly emphasizing reception, sorting, and transporting patients.
   
   (5) Prepare an operations plan for the NDMS area, coordinate the approval process, and provide updated copies.

b. **NDMS-Army Military Liaison Team (DACH), (positions currently slotted on MOBTDA to individual reservists) will:**
   
   (1) On order, activate initially at DACH and begin operations ICW the NDMS-OPLAN.
   
   (2) Coordinate and visit NDMS participating civilian hospitals where military patients are admitted. Provide soldier accountability and support function requirements back to DACH representatives.
   
   (3) Submit daily bed status reports from participating civilian hospitals to FCC-NDMS and DACH, Fort Belvoir, VA.
   
   (4) ICW Patient Administration Division (PAD), report through appropriate channels, (NDMS, AG, DACH) when patients are ready to be returned to duty.
   
   (5) Maintain appropriate records (for reporting purposes) of military patients treated in civilian hospitals.
c. Chief, NDMS Military Liaison Team will:

(1) Establish base of operations with DACH's Operations and Training section to provide continuity of effort with DACH and participating hospitals.

(2) Publish and maintain the NDMS-OPLAN in accordance with input from DACH staff, and NDMS-FCC.

(3) Coordinate for necessary administrative and logistical support between participating civilian hospitals, military hospitals, and VAMCs.

(4) Negotiate and acquire Memorandums of Agreement (MOAs) with Army Reserve Centers and National Guard Armories for office space, administrative/logistical support, and possible housing for the NDMS Liaison Team.

E. SERVICE AND SUPPORT. Service and support requirements will generally be provided by NDMS officials for internal matters. However, DACH may provide service and support to liaison team members when requested. Housing and pay and allowances during active duty periods will be supported by appropriate Fort Belvoir agencies.

F. COMMAND, CONTROL, AND COMMUNICATIONS.

1. Command and Control.

   a. There will be no change to the current DACH command and control structure.

   b. NDMS officials will operate independent of military authority, in a coordinating role.
2. **Communications.**

   a. Communications equipment will be provided by each independent user agency when possible.

   b. Normal telephone and FAX lines at DACH will be utilized.

**OFFICIAL:**

Tarrant
TARRANT
LTC, AN
Chief, Operations and Training
A. **GENERAL.** Fire and smoke, Bomb threats and other Natural disasters may require the entire evacuation of all patients, visitors and staff within DACH buildings. This appendix also applies to other fire related situations to include smoke, toxic fumes, and non-deliberate explosions.

B. **SITUATION.** An event has occurred in which the entire hospital must be evacuated as safely and quickly as possible. Actions must be taken to evacuate and protect patients, staff members, and secure property and equipment.

C. **MISSION.** DACH personnel will protect the lives of patients, themselves, and government property on notification of evacuation.

D. **EXECUTION.** Inpatients, Visitors and Staff

1. Should the need to occur to evacuate inpatients, the charge nurse/wardmaster on the ward(s) will coordinate the moving of patients(s) away from the emergency to a ward located on the opposition wing of the hospital floor (horizontal evacuation).

2. If horizontal evacuation cannot be accomplished, ward personnel will proceed to evacuate patients to another floor or as directed by the Fire Marshal, evacuate the building.

3. After evacuation all patients will be transported to the Specker Field House, which will serve as a collection point and holding facility until coordination can be made to relocate them to a neighboring facility.

E. **COORDINATING INSTRUCTIONS.**

1. The Logistics Division will be responsible for providing additional transportation assets to support the moving of patients from DACH to Specker Field House.

2. The Chief Operations and Training will be responsible for coordinating the BASOPS for the use of Specker Field House.
APPENDIX 8 TO ANNEX C: EMERGENCY PREPAREDNESS PLAN
INTERNAL EMERGENCIES – EVACUATION PROCEDURES

3. The Chief of Patient Administration will be responsible for coordinating with the Departments of Nursing for the transfer and disposition of all patients.

LOGISTICS

A. REFERENCES.

1. DACH Dep/Div/Act/Services Internal MASCAL Implementation SOPs
2. DACH Dep/Div/Act/Services Internal Alert and Recall Rosters
3. DACH Dep/Div/Act/Services Internal Fire SOPs

B. GENERAL. This annex provides guidelines that enable DACH to respond effectively with logistics during an emergency. The objective of this annex is to provide for logistical support of all emergency operations as declared by the command group. Logistical operations and procedures outlined herein are applicable to all contingencies as outlined by Annex C, Operations. Mobilization Class VIII and war reserve stocks are not applicable to this annex.

C. MISSION. On order, Logistics Division will provide material, services, maintenance, and engineering support to medical departments and administrative divisions that will enable DACH to provide casualties with the best medical care support possible during an emergency situation.

D. EXECUTION.

1. Assumptions.
   a. Sufficient logistical resources are on-hand or readily available for issue to provide necessary support during an emergency.
   b. No more than one emergency situation will occur at any given time.

2. Friendly Forces. See Annex A (Task Organization) for external available forces. Internal sources of personnel include:
   a. Directorate of Public Works and Environment Fort Belvoir
   b. Walter Reed General Hospital
   c. Local public and private hospitals
   d. Contractual providers of medical supplies and services
3. **Concept of the Operations.**

   a. During emergency situations simultaneous logistical support events will occur. Logistics Division personnel will make all available assets necessary to provide a total emergency response effort. Success in emergencies will depend on speed and momentum, providing the right equipment and supplies at the right time. Leaders and subordinates will have the greatest possible freedom of action, consistent with accomplishing the mission. Individual initiative, teamwork, and leadership from expected and unexpected sources will occur. Normal logistical accounting practices will not delay emergency issue of supplies and services.

   b. For the purposes of emergency preparedness and plan implementation, four general categories of logistical support are envisioned to be provided, as delineated below:

      (1) **Engineering.** Includes all utility systems (water, electrical, sewage, oxygen, elevators, etc.), fire prevention systems, building and ground master plans/blueprints, and the custodial care of facilities and utilities.

      (2) **Material.** Includes all aspects of supplies and equipment acquisition, stockage levels, financial management, temporary loans, and coordination with users for emergency requisition and issue.

      (3) **Services.** Includes housekeeping, non-ambulance transportation for pick-up and delivery, job order requests, master key control and issue, and linen.

      (4) **Maintenance.** Includes repair services, preventive maintenance, repair parts, medical standby equipment, and calibration requirements.

   c. Emergency operations may necessitate expenditures of supply items as follows:

      (1) **Class II (Clothing).** Additional requirements may include gratuitous issue to patients of a Class B, or C uniform.
ANNEX D: EMERGENCY PREPAREDNESS PLAN
LOGISTICS

(2) Class III (POL). Provisions for additional fuel, gas, and diesel to support motor pool operations may be required.

(3) Class VI (Personal Demand Items). Increased stockage levels may be authorized to support family members and visitors. This may also include PX items.

d. Upon completion of the emergency situation, logistical activities will reconstitute supply resources, account for, and reorder to authorized stockage levels. Normal accounting practices will resume.

4. Tasks. Chief, Logistics Division or senior representative present will:

a. Code Yellow (MASCAL).

(1) Implement emergency SOPs to provide engineering, material, services, and maintenance support to clinical and administrative staff.

(2) Make determination as to elevator Independent Power Operations working condition. Request Red Cross volunteers for elevator operations and assist with any training requirements.

(3) When activated, provide a logistics representative with authority to speak for the division to the EOC in addition to requirement of paragraph (8) below.

(4) Provide personnel to Manpower Pool not dedicated to support efforts.

(5) Recall all vehicles and established centralized motor pool. Request drivers from the Manpower Pool through the EOC. EOC will determine priority of dispatch.

(6) Upon request, issue IV poles, litters and litter straps, blankets, and position at predetermined locations.

(7) Be prepared for and provide emergency requests (urgent and compelling) of disposable medical supplies, to include pharmaceuticals.

(8) On order, provide dedicated messenger, runner for EOC/ER/LOG information interchange.
b. **Code RED (Fire), ORANGE (Bomb Threat) and PURPLE (Restraint or Disturbance).**

(1) Refer to Appendix 2 to Annex C for fire emergencies and fire fighting responsibilities. As appropriate, implement all or part of paragraphs A (References) above.

(2) Depending on the response necessary to the situation, any or all of the above (paragraph a, Code Yellow) tasks may be necessary.

(3) Be prepared to provide EOC or Crisis Management Team with facility blueprints and technical engineering advise.

(4) Be prepared to shut down elevator systems, oxygen systems, or electrical systems as the situation warrants, or on order.

(5) Be prepared to shut down basic operations, and on order, evacuate personnel and high value property.

c. **Natural Disaster/Weather Warning Codes**

(1) Refer to Appendix 5 to Annex C for natural disaster and weather warning codes, concept of operations, and basic tasks.

(2) Depending on the response necessary to the situation, be prepared to obtain and issue debris clearing tools, both electrical and non-electrical, snow removal equipment, and other essential work detail requirements.

(3) Coordinate with installation DPWE for road clearing equipment with priority to emergency requests (urgent and compelling) to ensure basic patient requirements continue.

(4) Be prepared to implement conservation measures for water, sewage, and utilities as the situation warrants, or on order.

(5) Be prepared for and provide emergency requests (urgent and compelling) to ensure basic patient requirements continue.
ANNEX D: EMERGENCY PREPAREDNESS PLAN
LOGISTICS

(6) On order, provide dedicated messenger/runner for
EOC/ER/LOG information interchange.

5. Coordinating Instructions.
   a. Refer to Appendix 1 of Annex C for complete MASCAL
      management information, Tab A to Appendix 1 for Heat
      Casualties, and Appendix 2 to Annex C for fire emergencies and
      Appendix 5 for natural disaster management.
   b. First priority of logistical support goes initially to the emergency
      room (immediate area) and the four other patient care areas
      (delayed, expectant, pre-op, and minimal.)

E. COMMAND, CONTROL, COMMUNICATION (C3).

2. Control.
   a. Refer to Annex C, paragraph E, (Command, Control, and
      Communications) for overall guidance for control of emergency
      operations.
   b. Chief, Logistics Division exercises control over all division
      activities. In the absence of the Chief, the senior representative
      present will exercise control responsibilities until properly
      relieved.
   c. Authority to release accountable/non-accountable/disposable
      property is inherent with official declaration of Code Yellow
      (MASCAL). Full attempts to capture and report associated costs
      will be made with any code, to include official notification of a
      weather related emergency.

3. Communications.
   a. Primary communications will be through the telephone system,
      supplemented by beepers, e-mail, and cc: Mail.
   b. Runners or messengers will be used as an alternative
      communication/information method.
c. The EOC, when activated has authority to communicate with lateral and higher headquarters on the status of logistical operations being conducted.

d. Authorized logistical representatives may communicate with vendors, contractors, or medical channels for requesting necessary supply and service items.

ANNEX E: EMERGENCY PREPAREDNESS PLAN
PERSONNEL AND ADMINISTRATIVE MANAGEMENT

A. REFERENCES.

1. Manpower Pool Implementing SOP
2. Internal Notification and Recall Plans
3. Internal Fire Fighting and Evacuation Plans
4. Medical Command Regulation 40-25, Professional Officer file System
5. AR 601-142, Professional Office Filler System

B. GENERAL. This annex provides guidelines that enable DACH to respond effectively with personnel and administrative resources during an emergency. The objective of this annex is to provide for manpower and administrative services that support all emergency operations as declared by the command group. Personnel and administrative operations and procedures outlined herein are applicable to all contingencies as outlined by Basic Plan and Annex C, Operations. Mobilization personnel requirements during mobilization.

C. SITUATION. An emergency situation has occurred of sufficient gravity that generates the necessity to provide additional manpower and administrative services to the clinical staff and ancillary services. A Code YELLOW (MASCAL) or RED (Fire) may or may not be announced.

D. MISSION. On order, Personnel Division will provide manpower support and administrative management to DACH during emergency situations that will enhance and expand current manpower strengths for timely and sustained operations that support all aspects casualty care.

E. EXECUTION.

1. Assumptions.
   a. Sufficient personnel skilled in emergency medical services will not be readily available.
   b. Simultaneously with official declaration of Code YELLOW, necessary and prudent services, supplies equipment, moneys, etc, are released for direct patient casualty care.
   c. No more than one emergency event will occur at any given time.
d. Current administrative personnel and procedures are adequate for sustained emergency requirements and reserve forces (IRR, IMA, TPU members, etc.) will not be activated.

2. **Friendly Forces.** See Annex A (Task Organization) for external available forces. Internal sources of personnel include:

   a. Personnel Division (plus CPO liaison)
   b. Patient Administration Division
   c. Nutrition Care Division
   d. Resource Management Division
   e. Coordinated Care Division
   f. Public Affairs Officer
   g. Operations and Training
   h. Information Management Division
   i. Logistics Division
   j. DACH Judge Advocate Office

3. **Concept of the Operations**

   a. During emergency situations simultaneous personnel and administrative support function will occur. The Deputy Commander for Administration/Chief of Staff will direct support implementation of DACH’s administrative divisions when the EOC is not activated. The EOC, when activated, will otherwise direct administrative support requirements.

   b. Success in emergencies will depend on speed and momentum. Leaders and subordinates will have the greatest possible freedom of action, consistent with accomplishing the mission. Individual initiative, teamwork, and leadership from expected and unexpected sources will occur. Normal administrative practices will not delay emergency services.
4. \textbf{Tasks.}

a. \textbf{Chief, Personnel Division} or senior division representative present will, on order or as the situation warrants:

(1) Provide a division representative to the EOC upon activation.

(2) Coordinate with the Deputy Commander for Primary Care and Managed Care for additional 91B and 91C medics from installation outlying clinics.

(3) As appropriate or on order, recall critical/mission essential personnel on leave/TDY/pass within the local community.

(4) Recall Selected PROFIS personnel detailed for unit operations/training.

(5) Continue with normal administrative functions and systems as best possible.

(6) Refer to Appendix 1 of Annex C for specific C, Personnel MASCAL tasks.

b. \textbf{Chief, Resource Management Division} or senior division representative present will, on order or as the situation warrants:

(1) Provide advise to the EOC/Crisis Management Team, if activated.

(2) Obtain and sustain necessary funding.

(3) Obtain and sustain increased supplemental care funding.

(4) Determine structure of cost assignments to DACH staffs and activities.

(5) Authorize overtime/compensatory time requests germane to the emergency situation.
c. **Chief, Nutrition Care Division** or senior division representative present will, on order as the situation warrants:

1. Extend meal hours and plan for the potential of midnight meals.
2. Provide additional meal service for an increased patient census.
3. Provide box lunches with beverages to staff and clinical personnel unable to leave emergency site(s).
4. Determine requirement to delete or adjust meal rates and surcharge for DACH staff involved in emergency operations.
5. Provide space for Manpower Pool.
6. Continue with normal operations as best as possible.

d. **Chief, Patient Administration Division** or senior representative present will, on order or as the situation warrants:

1. Provide advise to the EOC/Crisis Management Team, if activated.
2. Be responsible for the casualty count and periodic updates to the EOC if activated. If EOC is not activated, provide casualty count to command group (CDR, DCA, DCCS, etc.).
3. Effect coordination with post AG Casualty Branch, as required for notifications to Next-of-kin. Provide a Line of Duty (LOD) investigation form with Part I completed for each casualty.
4. Facilitate casualty/patient care through prompt management of admission and disposition requirements, evacuation, medical records, supplemental care, and other PAD functions.
5. Refer to Appendix 1 to Annex C for PAD specific MASCAL tasks and responsibilities.
ANNEX E: EMERGENCY PREPAREDNESS PLAN
PERSONNEL AND ADMINISTRATIVE MANAGEMENT

(6) Continue normal operations as best possible.

e. **Public Affairs Officer** will, on order or as the situation warrants:

   (1) Be public spokesperson for DACH to media inquires.

   (2) Coordinate with installation Provost Marshal for a security force, traffic police, and other security measures as appropriate.

f. **Chief, Operations and Training** or senior division representatives present will, on order or as the situation warrants and as a supplement to managing the EOC:

   (1) Coordinate with installation Provost Marshal for a security force, traffic police, and other security measures as appropriate.

   (2) Coordinate with VA representatives and NDMS officials as appropriate.

g. **DCPMA** be prepared to provide personnel to C, PAD for administrative and clerical support to patient/casualty accountability and processing.

h. **Ft Belvoir Garrison SJA** will on request provide:

   (1) Legal advise to the command group, EOC, and or the Crisis Management Team on courses of actions taken and the following primary concerns:

      (a) Use of volunteers in emergencies.

      (b) Posse Comitatus Act (18 USC 1385)

      (c) Economy Act (31 USC 686)

   (2) Provide legal assistance and counseling to patients/casualties and family members/relatives concerning matters of Wills, Powers of Attorney, Notary Public Services and other legal matters/questions that may arise.

ANNEX E: EMERGENCY PREPAREDNESS PLAN
PERSONNEL AND ADMINISTRATIVE MANAGEMENT

5. **Coordinating Instructions.**
   
a. AAFES PX is invited to extend operating hours to support emergency operations by providing sundry items on demand.

b. Other concessions are invited to expand operating hours required to support emergency operations.

c. Personnel not in direct support of emergency operations will report to the Manpower Pool.

d. Refer to Annex C for emergency management information.

F. **COMMAND, CONTROL, COMMUNICATION (C3).**

1. **Command.** No changes.

2. **Control.** No changes to current control procedures are anticipated.

3. **Communications.** See Annex F, SIGNAL.

   a. Primary communications will be through the telephone system, supplemented by beepers, e-mail, and cc: Mail.

   b. Runners or messengers will be used as an alternative communication/information method.

OFFICIAL:

Ellis, CPT
Chief, Personnel
ANNEX F: INFORMATION MANAGEMENT: SIGNAL
EMERGENCY PREPAREDNESS PLAN

A. REFERENCES.

1. Internal Dept/Div/Sec/Act MASCAL Implementing SOPs.
2. Internal Dept/Div/Sec/Act Notification and Recall Rosters.
3. Internal Dept/Div/Sec/Act Fire Fighting & Evacuation Plans.

B. GENERAL. During emergency situations timely and reliable communications are absolutely essential to command and control the situation. This annex provides guidelines that enable DACH to communicate effectively during an emergency. The objective of this annex is to provide a basis for communications and information management support that will provide emergency operations personnel with multiple communication systems that may be used separately or in tandem. This annex is applicable to all contingencies as outlined by the Basic Plan and Annex C.

C. SITUATION. An emergency situation has occurred of sufficient gravity that generates the necessity to activate the EOC, establish communications with higher and lateral headquarters and civilian counterparts, and prepare support information systems. A Code Yellow or Red may or may not be announced.

D. MISSION. On order, Information Management Division will provide communications support and information management to DACH during emergency situations that will enhance and expand current systems for timely and sustained operations in support of the emergency situation mission.

E. EXECUTION.

1. Assumptions.

   a. During times of emergencies, the present communication systems will not be adequate to handle the increased usage demand.

   b. Operations will require expansion of the information communications capability to include secure networks.

   c. No more than one emergency situation will occur at any given time.

2. Friendly Forces.

FILE:F

12/08/97
3. **Concept of the Operations.**

a. During emergency situations simultaneous information management support events will occur. IMD personnel will make available all assets necessary to provide a total emergency response effort. Success in emergencies will depend on speed and momentum, providing the right communications and information systems at the right time. Leaders and subordinates will have the greatest freedom of action, consistent with accomplishing the mission. Individual initiative, teamwork, and leadership from expected and unexpected sources will occur. Normal information management accounting practices will not delay emergency issue of information and communication services.

b. For the purposes of plan implementation and emergency operations the following categories of information management support are envisioned to be provided, as delineated below:

1. Communications Devices (may include FM radio)
2. Automation (includes E-mail, LAN, FAX, CHCS, etc.)
3. Printing, Records Management, and Publication
4. Postal and Distribution
5. Visual Information

4. **Tasks.** Chief, Information Management Division (IMD), or senior representative present will:

a. **Code YELLOW (MASCAL):**

1. Coordinate with Chief, Operations and Training/Crisis Management Team for EOC communication requirements. Basic requirements may include cellular phones, secure phones, FM radio with frequency assignments, hand-held radios, E-mail, and local area network (LAN).

2. Prepare communication devices for the Crisis Management Team, when formed, for direct
ANNEX F: INFORMATION MANAGEMENT: SIGNAL EMERGENCY PREPAREDNESS PLAN

EOC/CMT voice communications. Plan for CMT members to be mobile. Coordinate for a direct line from DACH EOC to Ft. Belvoir EOC, as required.

(3) Be prepared to connect additional telephones and radio devices __________, as an alternate EOC.

(4) Provide clerical assistance to EOC for electrical message preparation by AUTODIN, for official message traffic.

(5) On order, impose MINIMIZE for medical facility telephones and outgoing electronic communications.

(6) Procure from external sources supplemental voice communications requirements (pagers, hand-held radios, etc.) with priority to ER, Ambulance Section, Lab and Blood Bank, senior clinical and nursing staff.

(7) Assume control over public address system. Increase volume as required.

(8) Suspend operations of non-critical distribution center activities, official mail, and printing, publication, and visual media operations. Prepare these activities for dedicated emergency support operations.

(9) Provide non-essential personnel to Manpower Pool.

b. Code RED(Fire), ORANGE (Bomb Threat) and Severe Weather Warnings and other listed Codes are:

(1) Refer to Appendix 2 to Annex C for internal fire emergencies and fire fighting responsibilities. Refer to Appendix 3 Annex R for bomb threat procedures, and Appendix 5 for natural disaster management. Refer to Appendix 2 for Utility Systems Failure and Basic Staff Response and refer to Appendix 3 for Emergency Conditions and Basic Staff Responses.

(2) Depending on the response necessary to the situation, any or all of the above Para a. Code Yellow tasks may also be necessary.
ANNEX F: INFORMATION MANGAGEMENT: SIGNAL
EMERGENCY PREPAREDNESS PLAN

(3) Be prepared to shut down basic IMD operations, and on
order, evacuate IMD personnel, protect high value
property as best possible, and secure the area.

c. EOC Activation/Crisis Management Team Formation.

(1) On request provide the EOC with an updated list of
pager/beeper numbers for contact with Clinical and
Administrative Chiefs.

(2) On request provide the EOC with an updated list of all
ward computer modem numbers (internal FAX).

(3) Provide the EOC with any additional FAX or secure
FAX numbers and locations, activated for emergency
situations.

5. Coordinating Instructions.

a. Top priority for communications networks go initially to the
ambulance section, the emergency room, and senior clinical
and nursing department chiefs.

b. Second priority will be to establish communications nets
within the EOC.

c. Communications systems in DACH will be utilized for
UNCLASSIFIED information only. The EOC has sole
authority for classified information, (transmission, receiving,
storage, distribution, etc.), and will control access procedures.

d. Visual Information Branch will assist the PAO, EOC, and
senior staff prepares visual briefing support when required.

F. COMMAND, CONTROL, COMMUNICATIONS (C3).

2. Control.

a. Refer to Annex C Para E, (Command, Control,
Communications) for overall C3 guidance for the conduct of
emergency operations.
ANNEX F: INFORMATION MANAGEMENT: SIGNAL EMERGENCY PREPAREDNESS PLAN

b. Chief, Information Management Division exercises control over all information management activities. In the absence of the Chief, the deputy or senior representative present will exercise control responsibilities until properly relieved.

c. Authority to release accountable equipment for use is inherent with official declaration of Code Yellow (MASCAL). Full attempts to capture and report associated costs will be made.

3. **Communications.** As stated and supplemented by enclosures. Volume II (EOC and CMT Operations) is also supplemented by enclosures as stated below.

I. **GENERAL.** A portable radio net will be established with the onset of a natural disaster or other emergency affecting the activities of DACH.

II. **RESPONSIBILITIES.**

A. Adjutant / Security Manager / SDNCO: Issue portable radios IAW this Appendix.

B. SDNCO /OPTR: Establish base station (radio) to perform duties as Net Control Station (NCS) of portable radio net.

C. Portable Radio Net Users. The following individuals will report to Adjutant/SDNCO and will be issued radios upon reporting:
   1. OPERATIONS AND TRAINING
   2. TRIAGE OIC/NCOIC
   3. IMMEDIATE OIC/NCOIC
   4. MINIMAL OIC/NCOIC
   5. DELAYED OIC/NCOIC
   6. MANPOWER POOL OIC/NCOIC
   7. PAO
   8. SECURITY
   9. LOGISTICS OIC/NCOIC
   10. CDR
   11. OPERATING ROOM OIC/NCOIC
   12. SDNCO/ADJUTANT

D. **Use of the portable radio net.** The net will be established, maintained and utilized to provide essential information to the users. Radios must be kept on the users person at all times and remain on throughout the emergency situation. Batteries should be exchanged at 12-hour intervals at the information desk.

ANNEX G TO EMERGENCY PREPAREDNESS PLAN
ALERT NOTIFICATION AND RECALL INSTRUCTIONS FOR EMERGENCY OPERATIONS CENTER (EOC) PROCEDURES

A. REFERENCES.

1. HSC Regulation 525-3 - Emergency Operations Control
2. HSC Regulation 500-1 - Emergency Action Procedures (Secret)
3. HSC Regulation 525-4 - Emergency Preparedness

B. GENERAL.

1. **Purpose.** To provide a foundation for command and senior staff to control and manage emergency situations. To provide continuity for future command groups and as a baseline for those requirements that must be accomplished by the command group to resolve emergency situations. To provide inter-related but independent control systems capable of organizing and directing the total DACH response effort for providing medical support and care to casualties.

2. **Applicability.** Applicable to all situations described in the Emergency Preparedness Plan. It is applicable to chiefs and decision-makers from both clinical departments and administrative divisions. Officers and NCOs performing after-duty hours' responsibilities must also be cognizant of requirements contained herein.

3. **Conditions that Implement.**

   a. **Alert Notification and Recall.**

      (1) Alert and recall of personnel may be implemented by proper authority, either selectively by person, by staff organization, or DACH wide.

      (a) On order of the Commander, DACH, the Deputy Commander for Clinical Services, or the Chief of Staff.

      (b) On order of the Administrative Officer of the Day (AOD)/Staff Duty Non-Commissioned Officer (SDNCO).

      (2) On order of a department/division/activity/service chief for that staff element, or by the senior person present.

      (3) Refer to Annex C for detailed instructions.
b. Emergency Operations Center.

(1) EOC implementation is not predicated on a single event, however, one or more of the following conditions or events may cause the EOC to operate:

(a) On order from higher authority to support exercises and/or military operations, Note: EOC activation is automatic upon DOD declaration of Defense Condition (DEFCON) 3, 2, or 1, and acts of terrorism and criminal activity, i.e., THREATCON Charlie or Delta.

(b) On order from the DACH Commander or designated representative to support an emergency situation demanding a total response effort by DACH.

(c) On order of the EOC Officer-in-Charge to support a command post exercise, an internal situation, or announced or unannounced drills for the EOC staff and support elements.

c. Crisis Management Team.

(1) The necessity to form the CMT is at the discretion of the Commander, DACH. No known regulatory or event driven requirement exists for automatic formation.

C. EXECUTION.

1. Assumptions.

a. Sufficient senior staff members are available to execute provisions contained herein.

b. Certain day-to-day activities, as defined by the department/division chief, that are not absolutely essential will be deferred, curtailed, or discontinued for the duration of the emergency.
c. Installation activities and civilian counterparts will respond accordingly to DACH support requests.

d. An emergency event will occur at the worst possible or most inconvenient time, however, only one emergency event will occur at any given time.

2. Concept of the Operations.

a. Emergency Operations Center.

(1) During duty hours, staff elements will begin internal procedures to notify its personnel, prepare resources, and assign responsibilities for execution.

(2) After duty hours, the AOD/SDNCO alerts command elements, determines extent of recall required, and alerts those required department/division/activity/service chiefs. Chiefs implement internal notification rosters, orders recall, and direct reporting location. Individuals alerted will arrive expecting to support sustained and prolonged emergency operations.

b. Crisis Management Teams.

(1) As directed by the commander, DACH, the CMT forms as a separate command element initially within the EOC. The team is provided with all available information and makes judgements for courses of action. Issues orders for EOC execution and staff implementation. As the executive element of the EOC, the CMT apprises local commanders and counterparts.

3. Coordinating Instructions.

a. The Commander, DACH, based upon the estimate of the situation, will designate the portion(s) of the EPP to be implemented and the degree of response necessary to cope with the situation.
b. Direct coordination among DACH activities is authorized and encouraged to ensure continuity of operations and to ensure minimal interruption of health care delivery.

c. The Command Group or CMT, and EOC, if activated, must be kept advised of coordination and communication with established channels between DACH activities and counterpart elements in civilian hospitals, commercial activities, and any local, state, or federal agency.

d. Classified information will not be included in this plan or its annexes or appendixes. Classified information may be stored in the EOC in an approved container.

D. COMMAND, CONTROL, COMMUNICATIONS (C3).

1. Command.

a. As delineated by Annex C, EPP.

b. The EOC, when activated, will function as a Command Post and may temporarily usurp normal supervisory command channels.

c. Separate activities (Vets, DENTAC, etc.) will assist where directed during emergency operations.

2. Control. Refer to appropriate emergency response annexes in the EPP for emergency specific control measures.

3. Communications. No significant additions to communication procedures and devices as stated by Annex F, EPP, and supplemented by the appropriate emergency response Annex is envisioned.

E. SERVICE AND SUPPORT.

1. Service. Services as described in the EPP are sufficient to support the EOC without major augmentation.
ANNEX G TO EMERGENCY PREPAREDNESS PLAN
ALERT NOTIFICATION AND RECALL INSTRUCTIONS FOR EMERGENCY
OPERATIONS CENTER (EOC) PROCEDURES

2. **Support.** Support as described in the EPP is sufficient for operations envisioned herein without further augmentation with the exception of:

   a. Portable administrative equipment (typewriters, overhead projectors, etc.) for the EOC.

   b. Additional SSSC funds to support EOC operations with expendable supplies (pens, pencils, etc.).

2. HSC Regulation 525-5, Countering Terrorism

B. GENERAL. Dewitt Army Community Hospital will be required to provide emergency medical services from a disaster situation. The EOC will be activated on order to assist in relief operations. The purpose of this EOC Instruction is to prescribe the organization, procedures, and responsibilities for EOC operations in the event of an emergency. This set of instructions is applicable to the principal staff charged with EOC operations. This chapter may also be used as a guide for senior department and division chiefs and the command group to visualize the overall operations involved in containing and controlling the situation during periods of extreme stress to personnel and resources.

C. SITUATION: An incident has occurred in which the DACH Commander has ordered emergency plans implemented. During the initial estimate of the situation it is determined that the incident is so serious that the EOC must be activated to centralize control and operations. The C, OPERATIONS AND TRAINING receives the order to activate and staff the EOC.

D. MISSION. The DACH Emergency Operations Center will, or order or automatically, organize and activate for sustained operations at the Headquarters' Command Wing to provide the Commander with a centralized facility for directing emergency operation response efforts.

E. SCOPE OF OPERATIONS. The EOC is neither a formal military organization nor a separate agency or echelon of command. It is formed from internal resources solely to provide economy of action during an emergency requiring a significant DACH response. By authority of the Commander, DACH subordinate elements will respond to EOC taskings accordingly.

1. Responsibilities

   a. The EOC is charged with assisting the Commander in directing and controlling internal personnel and resources. In addition, the EOC will serve as the sole crisis information coordinator to external military headquarters, federal agencies, and civilian counterparts.

   b. The EOC will:

       (1) Establish and maintain internal and external communications with periodic reporting updates.
APPENDIX 1 TO ANNEX G TO THE EMERGENCY PREPAREDNESS PLAN
EMERGENCY OPERATIONS CENTER – OPERATING PROCEDURES

(2) Keep Commander and Crisis Management Team informed of all progress reports and significant activities.

(3) Originate and distribute medical situation reports (MEDSITREP) to requesting agencies.

(4) Provide periodic command situation briefings.

(5) Control and disseminate public domain information.

(6) Maintain liaison with departments/divisions/activities and services through couriers/runners for response direction and information relay.

(7) Maintain a journal of events.

(8) Other actions as deemed prudent and necessary.

2. Location. The EOC will initially be located in the Command Wing, will be chosen when necessary. A secondary location, if required, will be chosen when necessary.

3. Staffing. The EOC will be staffed with an operating nucleus from OPERATIONS AND TRAINING division with additional officers, civilians, NCOs, and enlisted personnel, as required, supplied by the Manpower pool to run day-evening operations. The initial staff will consist of:

OIC - C, OPERATIONS AND TRAINING Division (also serves as command briefer)

NCOIC - Operations Sergeant, OPERATIONS AND TRAINING (assistant briefer)

1 Officer/NCO from {Patient Administration Division)
1 Officer/NCO from Logistics Division
2 Radio/Telephone Operator - Training NCO & Security NCO
1 Journal Clerk - NCO/EM from Clinical Services Division
1 Clerk Typist - Secretary OPERATIONS AND TRAINING
1 Driver and vehicle from Logistics Division

When necessary the OIC will organize a second shift as follows:

OIC - Adjutant or equal substitution
APPENDIX 1 TO ANNEX G TO THE EMERGENCY PREPAREDNESS PLAN
EMERGENCY OPERATIONS CENTER - OPERATING PROCEDURES

NCOIC - NCOIC from Clinical Services Division or equal substitution

1 Officer/NCO from Patient Administration Division
1 Officer/NCO from Logistics Division
2 Radio/Telephone Operators - NCO/EM from Personnel Division
1 Journal Clerk - from supplemental/supporting taskings
1 Clerk Typist - from supplemental/supporting taskings
1 Driver and Vehicle from Personnel or PAD Division

On-call supplemental and supporting staff (See taskings, Annex C) will consist of:

1 PAO representative
1 representative from each Clinical Departments
1 representative from each Administrative Divisions
1 Red Cross representative

Supporting staff, when not directly involved with EOC operations will maintain contact with, and be available to the EOC.

Driver will make frequent distribution runs and classified message runs.

4. Organization.

a. Information Flow-In. All patient data derived from the emergency room and admissions must be provided to the EOC for consolidation. EOC will ensure reporting requirements are accomplished, summarize the information, and provide to the CMT. In addition the following information must also be provided:

(1) Bed status/availability.
(2) Manpower requirements and availability.
(3) Clinical support requirements
(4) Administrative and logistical requirements
(5) Patient Evacuation Requirements

b. Information Flow-Out. As a crisis situation becomes clear, the EOC will issue taskings or directives to staff elements for implementation in support of emergency operations. In addition general information concerning the situation will be provided when available. Information concerning Para 4.a above will also be provided when available.
c. **Command Briefing Requirements.** Periodic briefings for the command group will be provided by staff elements as necessary for complete information updates. The EOC OIC will announce requirements and staff elements involved.

d. **Public Relations.** A proactive public relations program will be in effect to keep dependents, family members, media interests, and general public interests informed of the situation and the role DACH is playing.

e. **Work Shifts.** The OIC will institute work shifts as necessary. Personnel will be drawn from resources as stated in Para 3. Above.

5. **Stockage: Supplies and Equipment.** Minimum requirements for EOC operations support include:

a. **Tabletop Staff Telephone Directories of:**

   Fort Belvoir  
   Walter Reed Medical Center  
   North Atlantic Regional Medical Command

b. **Telephone Books:**

   Northern Virginia  
   Fort Belvoir

APPENDIX 2 TO ANNEX G TO THE EMERGENCY PREPAREDNESS PLAN
CRISIS MANAGEMENT TEAM OPERATIONS

A. GENERAL. Commander, DACH may decide to form a Crisis Management Team (CMT) to command and vie subordinates direction in overcoming an emergency situation. The Crisis Management Team is composed of senior selected officials from within the organization and charged with making hard decisions to overcome emergency situations. The CMT is formed for as short a time as possible and separated geographically from subordinate activities. Separation is provided to make objective decisions based on fact and merit. The CMT is terminated at the discretion of the Commander.

B. SITUATION. Personnel have reported it to DACH on the scene that an emergency situation is in progress. The Commander is informed that this emergency is of significant magnitude that major medical response effort is required. Patients are in-route with many more to follow. The Commander decides that centralized control element is the best way to cope with the situation. The CMT is ordered formed. The CMT orders the EOC formed.

C. CONCEPT OF THE OPERATIONS.

1. The DACH Crisis Management Team will be composed of; Commander; Deputy Commander for Clinic Support (DCCS), Deputy Commander for Nursing (DON), and the Chief of Staff/Deputy Commander for Administration (DCA).

2. The Crisis Management Team will initially form within the EOC on order of the Commander. The team will be provided a situation update by the duty EOC OIC with supplemental input by principle advisors (Dept/Div Chiefs).

3. Staff information flow is directed to the EOC for CMT action. Situation specific decisions are acted upon. Conflicting priorities resolved. Directions to staff efforts are implemented. Media and installation inquiries are met. Moral visits to clinics and staff are made.
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

A. REFERENCES:

1. AR 525-13, The Army Terrorism Counteraction Program
2. AR 381-12, Subversion and Espionage
3. AR 190-13, Army Physical Security Program
4. MEDCOM Reg 525-5, Combating Terrorism
5. MEDCOM Reg 525-4, Emergency Preparedness

7. MEDCOM PAM 190-2, Guide for Crime Prevention Officers
8. MEDCOM Reg 190-6, Crime Prevention Program
9. MEDCOM Suppl 1 to AR 190-11, Security of Arms, Ammunition & Explosions

B. GENERAL. A continuous potential exists for terrorist activities. The threats may take the form of subversive action, civil disturbance, overt or covert aggression, and harassment by bomb threats or sabotage by actual placement of explosive or pyrotechnical devices.

C. MISSION. Establish policies and procedures to protect soldiers, DOD civilians, family members, contract personnel, and Army facilities and assets from terrorist attacks.

D. CONCEPT OF THE OPERATIONS.

1. The Commander must reduce the vulnerability potential of these targets to terrorist attacks by planning, implementing appropriate antiterrorism measures based on known or perceived threat, and by providing or obtaining appropriate resources.

2. The emergency, preparatory, and preventive procedures delineated herein provide specific guidance of this command to expedite organized reaction to prevent and/or minimize injury, loss of life and property damage as the result of terrorist activity. This Force Protection Annex to the DeWitt Army Community Hospital (DACH) Emergency Preparedness Plan (EPP) will create a standardized document that compiles unclassified documents dealing specifically with force protection (protection/mitigation).

E. TASKS.

   a. Will be the proponent and primary point of contact for all Forces Protection matters.
   b. Coordinates with WRAMC Brigade S-3 for any resources or special requirements.
   d. Prepares to respond to terrorist incidents in facility.

FILE: R  
12/09/97
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

2. Security Officer/Manager.

   a. Ensures all military personnel traveling on leave, temporary duty (TDY) or
      permanent change of station (PCS) status, to or through areas determined “high risk areas”
      receive appropriate personal protection and threat briefings.

   b. Ensures that recurring awareness training on all aspects of combating terrorism, to
      include Code of Conduct, personal protective measures, and SAEDA, is provided to all
      personnel.

   c. Ensures travel itineraries for officers and civilians are marked FOR OFFICIAL USE
      ONLY and handled in accordance with regulations when travel is through DOD designated high
      (or potential) physical threat countries.

   d. Monitors command terrorist threat conditions.

      (1). Threat Conditions (THREATCON) (Department of Defense Terrorist Alert
      System).
          a. THREATCON Normal - normal day-to-day activities/and operations.

          b. THREATCON ALPHA - a non-specific unpredictable terrorist threat exists
             against installation, facilities, or personnel.

          c. THREATCON BRAVO - a predictable threat exists - increased awareness and
             surveillance is initiated.

          d. THREATCON CHARLIE - an accident occurs or information is received that
             terrorist action is imminent - significant awareness and dedicated surveillance techniques
             implemented/continues.

          e. THREATCON DELTA - localized warning that an attack is expected against a
             specific location, facility, or person is likely.

      (2) Provides Threat Condition (THREATCON) report to WRAMC Brigade when
      threat conditions change.

      (3) Defense Conditions (DEFCON) (Department of Defense World Wide Watch
      Defense Conditions.

          a. DEFCON 1 - normal day to day operations.

          b. DEFCON 2 - increased vigilance

FILE: R
12/09/97
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

c. DEFCON 3 - readiness options selected/executed

d. DEFCON 4 - deployment options selected/executed

e. DEFCON 5 - war is imminent or has started

NOTE: Exact DEFCON definitions are classified.

(4). Coordinates with WRAMC Brigade for any resources or special requirements.

(5). Conducts annual training on subversion and espionage IAW AR 381-12.

a. Oral or audiovisual briefings will be presented to:

1. All military personnel.

2. Key civilian personnel whom:

   a. Have security clearances and current access.

   b. Are involved in readiness and other military exercises.

(6). Analyzes terrorism intelligence and disseminates information as appropriate.

(7). Establishes a Physical Security Program to plan, formulate, prioritize, and coordinate physical security matters. (See Appendix 1 - Antiterrorist Plan, Appendix 3 - Bomb Threat Plan).

(8). Acts as primary coordinator for physical security and staff responsibility for counter terrorism. Identifies, lists and inspects Mission Essential and/or Vulnerable Areas (MEVA). The following areas are designated as MEVAs and will have limited control/access at all times. (See Appendix 2 - Mission Essential/Vulnerable Areas ).

(9). Coordinates proactive measures regarding physical security measures IAW AR 190-13.

   a. Hospital Lock & Key Control.

   c. Mandatory Briefings (given monthly).

   d. Physical Security Inspections.

   e. MEDDAC ID Badge Program.
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

f. Vehicle Registration.
g. Equipment and supplies.
h. MEDDAC - DACH Physical Security SOP.
i. Personnel Access Control.
j. Contractors Visitors Policy.
k. Unaccompanied Access/Emergency Notification Listing
l. Sensitive Areas Access/Emergency Notification Listing

(10). Responsible for guidance, assistance, evaluation and review of terrorism counteraction plans.

(11). On occurrence of a terrorist incident:

a. Chief, Operations and Training will:

(1). Coordinate with the MEDDAC Commander for initiating the crisis management team and the activation of the EOC in order to deal with terrorist-related situations.

(2) Immediately contact the WRAMC, Brigade S-3 during duty hours, or after duty hours call the Staff Duty Officer. Serious incidents should be reported immediately but in no case later than 12 hours after learning of an incident.

(3) Establishes the EOC and maintains communication with the WRAMC EOC to facilitate the flow of information.

(4) Coordinate with installation security directors for security protection plans.

(5) Develop and maintain access rosters for information access, EOC access, and rosters and authorization levels for installation message center couriers.

2. Chief, Information Management Division (C, IMD) will:

a. Provide communications support and information management to MEDDAC during emergency situations that will enhance and expand current systems for timely and sustained operations and support of the emergency situation.
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

b. For the purpose of plan implementation and emergency operations the following categories of information management support are envisioned to be provided, as delineated below:

1. Communication devices (may include FM radio)
2. Automation (includes E-mail, LAN, FAX, CHCS, etc.)
3. Printing, records management and publications
4. Postal and distribution
5. Visual Information

F. TASKS COMMON TO ALL.

1. Enforce everyday operations and physical security requirements with assigned personnel.
2. Ensure key control procedures are adhered to and immediately report any discrepancies.
3. Respond accordingly to personnel and equipment taskings in support of security operations being conducted.
4. Report any suspected/unusual activity or person.

G. COORDINATING INSTRUCTIONS.

1. OPTR has tasking authority for personnel and equipment to accomplish security missions.
2. DACH personnel may be required to register their vehicle with the Provost Marshal’s office.
3. The hospital badge ID will be worn at all times while on duty.
4. Key control procedures will be adhered to.
5. All military and civilian employees must carry an official identification card with them at all times.
6. Access control during a MASCAL or any other emergency will be coordinated through the Commander’s representative (C, OPERATIONS AND TRAINING), Emergency Operations Center or the Security Officer.
7. All MEDDAC military and civilian personnel must carry their hospital identification badge at all times.

FILE: R
12/09/97
ANNEX R TO EMERGENCY PREPAREDNESS PLAN
FORCE PROTECTION

8. All other personnel who have not been authorized for access into the hospital for visiting
patients, appointments and any other hospital business must be approved by the
Emergency Operations Center (EOC) or the above mentioned personnel in (Para. f) a MASCAL
or emergency situation.

9. The Fort Belvoir Military Police will provide the hospital’s physical security
requirements and assistance upon request.

H. PUBLIC AFFAIRS OFFICER (PAO) will.

1. Establish liaison with the Fort Belvoir Public Affairs Office (PAO) to request assistance in
support of the MEDDAC.

2. Coordinate with the Patient Administration Division (PAD) to obtain an updated
Admissions and Disposition Roster.

3. Ensure all information released through the PAO is cleared through the Commander or
the ranking official within the Emergency Operations Center (EOC).

4. Provides public affairs guidance to Commander regarding the release of terrorist-related
information, and periodically publicizes the need for awareness of the terrorist threat.

I. COMMAND, CONTROL, COMMUNICATIONS.

1. Command. Established command channels will not change for the purpose of this
annex.

2. Control. Normal control procedures will not change except for the outside military
police support that remain under the control of supporting organization.

3. Communications. Established communications equipment and/or devices should not
change for the purpose of this annex.

APPENDIX 1 TO ANNEX R EMERGENCY PREPAREDNESS PLAN
ANTITERRORIST PLAN

A. GENERAL. Terrorist attacks have the potential to produce numerous medical/psychological injuries. The requirements for the MEDDAC to support the installation’s Combating Terrorism Field Training Exercises (Cbt/TFTX) will vary depending on the phase of the operation and nature of the incident.

B. MISSION. To provide medical advise/support to the installation’s Crisis Management Team (CMT) antiterrorism training, and provide emergency medical care in support of an actual terrorist event.

C. CONCEPT. The Crisis Management Team (CMT) is a group of personnel from the installation who gather at the Post Emergency Operations Center (EOC), to pool resources and respond to any unusual incident or emergency situation occurring on Ft. Belvoir. Plans may be tested periodically as part of the Ft. Belvoir Cbt/TFTX.

1. Coordination. Should the SDNCO be alerted that the CMT has been activated, MEDDAC must be prepared to provide a casualty assessment team and medical support to the on scene command post.

(a) An ambulance staffed with one physician and two medical technicians (91B).

(b) One field medical assistant (67B).

(c) Provide Community Mental Health assistance as required to assist with the hostage rescue effort.

2. Medical Treatment.

(a) The OPTR will be responsible for coordinating medical support during terrorist training/incidents.

(b) The installation will be responsible for identifying a temporary facility for the reception/treatment of casualties

(c) Only emergency life saving care will be provided to captured terrorists.

(d) Hospitalized terrorists will be separated from other patients and kept under constant surveillance by armed guards provided by the Military Police.

(e) Any terrorists requiring medical treatment beyond the capability of DACH, will be evacuated to the nearest civilian hospital IAW the MEDDAC evacuation plan.
APPENDIX 2 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN
MISSION ESSENTIAL/VULNERABLE AREAS

A. GENERAL. To identify those areas within the MEDDAC designated as mission essential vulnerable areas (MEVA).

B. MISSION. To ensure MEVAs are identified and protected through periodic security checks and inspections.

C. CONCEPT. OPTR has the responsibility for ensuring periodic security checks/inspections are performed, and that the areas are included in the installation security plan.

1. The SDNCO will be responsible for performing security checks of the MEVAs during their tour of duty.

   (a) Security checks are conducted from 1800 hours until 0600 hours daily, see instructions in the NCOD book for closure times of all exit/entrance doors.

2. All deficiencies should be noted on the Staff duty Journal, MEDDAC Security Checklist and reported during the morning report on the following day.

3. The following areas are designated as MEVAs and will have limited control/access at all times.

   (a) Emergency Operation Center Bldg 808, 5th fl (EOC)
   (b) Pharmacy, Bldg 808, 1st fl
   (c) Surgical Suites/Operating Room, Bldg 808, 2nd fl
   (d) Medical Supply Vault, Bldg 808, basement
   (e) Medical Supply Warehouse, Bldg 1414
   (f) Oral Surgery, Bldg 808, 1st fl
   (g) Treasurer’s Office, Bldg 808, 1st fl
   (h) Emergency Utility Room, Bldg 808, basement
   (i) Laboratory/Pathology, Bldg 808, 1st fl
   (j) Oxygen, Control, Gas, and Anesthetix Storage Area, Bldg 808, basement
   (k) Emergency Utility Room, Bldg 808, basement
   (l) Security Office, Bldg 808, Rm. 113
   (m) Logistics Offices (Bldg 1414)
   (n) Central Computer Room, IMD, Bldg 808, basement
   (o) Emergency Treatment Room, Bldg 808, 1st fl
   (p) Mother Baby Ward, Ward 3 B
   (q) Medical Treatment Records, Bldg 808, basement and 1st
   (r) Blood Product Storage Area, Bldg 808, 1st fl
APPENDIX 3 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN
BOMB THREAT PLAN

A. PURPOSE. To provide guidance and procedures to prevent the loss of life/injury, and damage to the facility as a result of a bomb threat or incident.

B. MISSION. To provide an effective means for requesting assistance, perform an orderly search, and upon order of the Commander, evacuate patients and staff personnel from the facility.

C. CONCEPT OF OPERATIONS. A bomb threat may be delivered by various means to include, the telephone, through the mail, a note delivered in person, or by discovering an explosive device. Regardless of the method of receipt, a bomb threat should never be ignored. Upon receipt of a bomb threat, the following procedures should be followed:

1. Bomb Threat.
   a. Follow the procedures as outlined on MDW Form 90-R Bomb Threat Report (Tab A this appendix). This form will be posted in the immediate vicinity of each phone within DeWitt Health Care System.
   b. Prolong the conversation for as long as possible in an effort to capture information as to the location, type of explosive device, time of detonation, and any clues which may be useful during the search process. Gain the immediate attention of your immediate supervisor or someone in the immediate vicinity by signal while the caller is still on the phone.
   c. Upon receiving a signal, the supervisor will immediately notify the MEDDAC Commander, DCA, Chief Operations and Training and Security Officer. The Military Police will be notified after notification of the above staff personnel.

1. The Military Police upon notification of a bomb threat at DACH, will notify the Explosive Ordinance Team, the Fort Belvoir Fire Department, and the Post Staff Duty Officer.

2. The MEDDAC Commander based on the information provided to him will decide whether to make the following announcement over the public address system.

"CODE ORANGE, CODE ORANGE"

(a) During normal duty hours, OPTR/Security will represent the Commander based on his guidance, and function as the focal point for alert and recall operations. The MEDDAC Noncommissioned Officer of the Day (NCOD) will function as the focal point at all other times.
APPENDIX 3 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN
BOMB THREAT PLAN

(b) Upon hearing the above code, supervisors shall immediately, without causing alarm, instruct their subordinates to visually inspect their ward/clinic and surrounding areas. This is not a function of the Military Police, Fire persons, of the Explosive Ordnance Team.

2. Bomb Discovery.

a. Inform personnel that if when conducting a search of their area, an object if found and suspected to be a bomb, the item should not be moved, touched or jar the device and the individual in charge and/or the MP’s should be notified immediately.

b. When possible, shut off all gas inputs into the area and remove the gas cylinders when possible.

c. Upon the authority of the Commander, the OPTR-Security Officer/SDNCO will:

1. Direct the evacuation of the building according to section fire escape plans. Routes of departure may have to be alerted to avoid traveling through/near the threatened area. Direct the search to continue in case of multiple bombs/explosive devices.

2. Ensure windows and doors are open to minimize the blast.

3. Ensure guards are posted on the perimeter of the threatened area to prevent personnel entering the area.

4. Ensure that all personnel have evacuated the area and maintain a clear distance of at least 500 feet. Prevent entry into the building or area until the MP’s arrive and have cleared the area.

5. Direct evacuated personnel to report back to their work areas once the “all clear” command has been given by the MP’s.

3. Bomb Explosion. In the event of an explosion able personnel should give the following warning:

a. “Evacuate Now, Evacuate Now” and continue with the warning until all personnel who are physically able begin to evacuate to an area a safe distance away from the blast.

b. The senior medical qualified person present (military/civilian) should:

(1). Ensure first aid is administered to all injured patients & personnel.

FILE: 3-R

12/23/97
APPENDIX 3 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN
BOMB THREAT PLAN

(2). Detail personnel to form a perimeter around the effected area.

(3). Telephone or send runner to alert the Commander/SDNCO, and OPTR-Security Officer.

c. The Commander will advise the OPTR/SDNCO to:

(2). Implement the Emergency Notification and Recall Roster.

(3). Establish the Emergency Operation Center, Manpower Pool and Security Force.

(4). Brief key personnel on the current situation.

(5). Alert Post DPTMS for additional support.

(6). Stay abreast of the search and rescue operation.

(7). Relinquish control of the scene to the military police and EOD personnel upon their arrival.

d. Release of Information.

(1) The MEDDAC Public Affairs Officer will coordinate the release of all information to the news media and press with the installation Public Affairs Office.

(2) Inquiries received from military sources should be directed to the EOC for disposition.

e. Orientation and Training

(1). Bomb threat awareness will be maintained through the use of posters, briefings, and staff meetings. Special emphasis will be placed on specific vulnerabilities.

(2). Bomb threat classes will be given semiannually by each division/section chief or NCO. A record of the training will be maintained by each section an the by the Training NCO.
APPENDIX 3 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN
BOMB THREAT PLAN

(3). All personnel assigned duties to perform a bomb threat search will be
trained on procedures of the search and what to do if an explosive device is
discovered

Tab D - Bomb Threat/Incident After Action Report
TAB A TO APPENDIX 3 TO ANNEX R EMERGENCY PREPAREDNESS PLAN
BOMB THREAT PROCEDURES

Bomb Threat Report (Printed on reverse side of MDW FORM 90-R). Maintain on bulletin board or near phone.

**DO**
Record pertinent information on Bomb Threat Data Sheet

**DO**
Notify the Military Police through 806-3104

**Then**
Notify DACH Command Group at 805-0824 during duty hours, or the AOD at 805-0510 after duty hours and then your OIC/NCOIC

**DO**
Use only phones and Public Address systems to communicate. NO RADIO TRANSMITTERS.

**DO NOT**
Attempt to handle, dismantle, or remove any suspected object. Seal off area and warn others.

**DO NOT**
Contact the Bomb Squad (EOD) unless you find a suspected object.

**DO NOT**
Use paging equipment, hand held transmitters, walkie-talkies.

**HOSPITAL**
Selected staff members should conduct a thorough search of the entire area. Wait for the Military Police.

**Outlying Clinics**
Should evacuate all personnel and staff to 300 feet minimum, then selected staff members should return to conduct a thorough search. Selected staff should not remain in the building longer than necessary to complete the search. Wait for the Military Police or Local Police.

Please contact the DACH Security Branch, at 805-0246/0746. for further information.
QUESTIONS TO ASK:

1. When is the bomb going to explode?
2. Where is it right now?
3. What does it look like?
4. What kind of bomb is it?
5. What will cause it to explode?
6. Why?
7. What is your address?
8. What is your name?

EXACT WORDING OF THE THREAT:

____________________________________________________________________________________

Sex of caller: ______ Race: ______
Age: ______ Length of call: ______
Number at which call is received: __________________________________________
Time: __________________________
Date: __________________________

Please contact the DACH Operations and Training (Security Branch), at 805-0246, for further information.

FILE: B-3-R

B-3-R-1

12/09/97
1. **GENERAL.** To establish a rapid notification roster for the NCOD to use during a bomb threat/incident.

2. **MISSION.** To ensure the appropriate support agencies and personnel are notified in case of a bomb threat/incident.

3. **CONCEPT.** During a bomb threat/incident, notification of MEDDAC staff will be made utilizing the public address system and messengers. Two-way radio communication will not be utilized due to the possibility of detonating an electrical blasting cap by means of radio transmission. The NCOD will use the direct dial system to contact the following agencies and personnel.

   - * MEDDAC Commander .................. 805-0824
   - * Operations and Training .............. 805-0093/9056
   - * MEDDAC Noncommissioned Officer of the DAY .................. 805-0510/0747
   - Post Staff Duty Officer .................. 806-3012
   - Provost Marshal/Military Police ........ 805-3104/3105/3106
   - Fort Belvoir Fire Department ........... 911
   - Fort Belvoir, DPTMS ..................... 805-3370

     DSN ..................................... 94-291-0562/4408
   - Fairfax County Police/Bomb Squad ...... (703) 691-2131
1. PURPOSE. To gather historical information and documentation for the record of the events surrounding a bomb threat/incident.

2. MISSION. To ensure a bomb threat incident/action report is prepared after the conclusion of each bomb threat/incident.

3. CONCEPT. The SDNCO will be responsible for ensuring the information is gathered and documented in the format below. The OPTR will be responsible for preparing and submitting a serious incident report installation Provost Marshal and HQ MEDCOM.

a. PART I: BOMB THREAT.

(1) NATURE OF THREAT

   a. Who received the call?

   b. Where was the call received?

   c. Telephone number of line to which the call was made.

(2) ACTION TAKEN.

   a. Who was notified immediately after the call was received and when?

   b. Time of evacuation, if applicable, completion.

   c. Search techniques employed.

   d. What was discovered, if anything?

   e. If there was an evacuation, at what time did personnel re-enter the facility.

b. PART II. INCIDENT OF BOMB DISCOVERY

(1) NATURE OF INCIDENT.

   a. How was the bomb discovered?

   b. Place of discovery.

   c. Who discovered the bomb?
TAB D TO APPENDIX 3 TO ANNEX R: EMERGENCY PREPAREDNESS PLAN

E. MEDCOM Regulation 190-1, Key Control and Physical Security Standards.

II. GENERAL.

A. This annex is provided as a guide for improving and maintaining security awareness for potential emergencies. This annex outlines a series of security applications that may be required to be put into effect as a situation warrants for protecting information, personnel, property, and equipment. This annex does not apply to controlled pharmaceuticals and/or narcotics, or radioactive isotopes. Security measures as outlined below apply to all scenarios in Emergency Preparedness Plan.

B. Aside from emergency situations and contingency operations, day to day minor criminal acts occur. Theft of inexpensive government property takes place routinely. The misuse and misappropriation of government equipment and supplies also occur. Crimes of vandalism and assault in the parking lots are also of great concern.

III. PLANNING REQUIREMENTS. Significant security subject areas for implementing consideration during emergency operations include:

A. Operations Security (OPSEC).
   1. Media Interest/Control
   2. Visitor Control
   3. Barrier Protection
   4. Parking Lot Control
   5. Telephone Conversation

C. Information Security.

1. Classification levels
2. Access Rosters
3. Security Clearances

D. Subversion and Espionage Directed against the Army (SAEDA).

1. Threat Briefings
2. Area Briefings

E. Automation Security.

1. Passwords
2. Codes
3. Personal use of computers and unauthorized software.

F. Threat Conditions (THREATCON)(Department of Defense Terrorist Alert System).
ANNEX S TO EMERGENCY PREPAREDNESS PLAN
SECURITY: PHYSICAL, OPERATIONS, INFORMATION

1. THREATCON Normal - normal day-to-day activities/and operations.
2. THREATCON ALPHA - a non-specific unpredictable terrorist threat exists against installation, facilities, or personnel.
3. THREATCON BRAVO - a predictable threat exists - increased awareness and surveillance is initiated.
4. THREATCON CHARLIE - an incident occurs or information is received that terrorist action is imminent - significant awareness and dedicated surveillance techniques implemented/continues.
5. THREATCON DELTA - localized warning that an attack is expected against a specific location, facility, or person is likely.

G. Defense Conditions (DEFCON) (Department of Defense World Wide Watch Defense Conditions)

1. DEFCON 1 - normal day to day operations
2. DEFCON 2 - increased vigilance
3. DEFCON 3 - readiness options selected/executed
4. DEFCON 4 - deployment options selected/executed
5. DEFCON 5 - war is imminent or has started NOTE: Exact DEFCON definitions are classified.

12/09/97
B. **Assumptions.**

1. Installation military police assets will provide DACH’s physical security requirements and assistance upon request.

2. Military police detailed to DACH will remain and provide assistance during an emergency.

C. **Concept of the Operations.** During emergency operations at Fort Belvoir, security measures will be considered that assist in protecting military operations, property, and life. Additional measures will be taken to thwart undesirables from committing criminal acts, unauthorized information gathering, and exploitation of the innocent. The intent is to provide visual and passive security measures that neither disrupt routine nor hinder operations. DACH personnel will cooperate with security officials to minimize compromises and be personally aware of security considerations.

D. **Tasks Common to All.** All Departments/Divisions/Services/Activities will:

1. Enforce everyday operations and physical security requirements with assigned personnel.

2. Ensure key control procedures are adhered to and immediately report any discrepancies.

3. Respond accordingly to personnel and equipment taskings in support of security operations being conducted.

E. **Specific Tasks.**

1. **C. Operations and Training will:**
   a) Be the proponent and primary point of contact for all security matters.
   b) Coordinated with installation security directors for security protection plans.
   c) Develop and maintain access rosters for information access, EOC access, and rosters and authorization levels for installation message center couriers.
   d) 

S-4

FILE: S

12/09/97
ANNEX S TO EMEGENCY PREPAREDNESS PLAN
SECURITY: PHYSICAL, OPERATIONS, INFORMATION

2. C. IMD will:
   a) Be the primary point of contact for automation systems security.
   b) Be prepared to provide or coordinate for additional communication equipment to support the security mission.

F. Coordinating Instructions.

1. Operations and Training has tasking authority or personnel and equipment to accomplish security missions.
2. DACH personnel may be required to register their vehicle with the Provost Marshal’s office.
3. The hospital badge ID will be worn at all times while on duty.
4. Key control procedures will be adhered to.
5. All military and civilian employees must carry an official identification card with them at all times.

V. SERVICE SUPPORT. Sufficient security services and support requirements, to include office space and nutrition for personnel engaged in reaction teams and guard relays, are available or obtainable.

VI. COMMAND, CONTROL, COMMUNICATIONS (C3)

A. Command. Established command channels will not change for the purposes of this annex.

B. Control. Normal control procedures will not change except for outside military police support who remain under the control of supporting organization.

FILE: S

S-5

12/09/97
C. Communications. Established communications equipment and/or devices should not change for the purpose of this annex. Important phone numbers for assistance are:

1. Military Police Desk Sergeant: 806-3104/3105
2. EOD Bomb Squad: 806-5059
3. CID Duty Agent: 806-0497
4. Installation EOC: 805-3030
5. Directorate of Security: 805-2416/4012

ANNEX T TO EMERGENCY PREPAREDNESS PLAN
TRAINING; EXERCISES

A. REFERENCES.
   1. MEDCOM Regulation 525-1, Soldier Readiness Exercise (SRX) 15 January 1993
   2. MEDCOM Regulation 525-4, Emergency Preparedness, August 1990
   3. MEDCOM Regulation 350-4, Training Requirements
   4. JCAHO Standard EC1.2.4, et.al., 1996 edition

B. GENERAL. DeWitt Army Community Hospital will be prepared for any emergency situation. For DACH purposes, an emergency situation not only includes mass casualty events but in addition, unexpected deployments of unspecified duration. This dual responsibility will be met through a continuous program of soldier training with validation through either announced or unannounced exercises. This annex provides information to accomplish basic emergency and readiness requirements as set forth by regulation. This annex should also be used as a resource document for planning departmental level training objectives focusing on internal SOPs and individual skills.

C. EMERGENCY PREPAREDNESS TRAINING REQUIREMENTS.
   1. SRX. Reference 1. and 2. apply. The minimum requirement is one (1) exercise per fiscal year.
   2. MASCAL. Reference 3. and 4. apply. The standard is to conduct two (2) MASCAL exercises per year, separated by at least four months, one of which must include simulated injuries in a mass casualty situation. Notification and Recall drills are acceptable exercises. Tabletop exercises do not meet minimum requirements.
   3. Weapons Training.
      a. U.S. Army Medical Command specifies (reference 3) that weapons qualification is mandatory for PROFIS personnel, within 90 days after being so designated. DACH will provide periodic weapon qualification opportunities for PROFIS and all other assigned personnel through the DACH training schedule or unit PROFIS training.
      b. All soldiers participating in the Expert Field Medical Badge must be weapon qualified.
ANNEX T TO EMERGENCY PREPAREDNESS PLAN
TRAINING; EXERCISES

4. **External Directed Exercises.** From time to time, higher headquarters require or request DACH to participate in exercises as part of a MACOM Command Post Exercise (CPX) or Field Training Exercise (FTX). Primary impact is to Operations and Training for inter-MACOM coordination.

5. **Leadership Training.** DACH will use the Officer Professional Development Program (OPD) and the Noncommissioned Officer Professional Development Program (NCOPD) for leadership training. These two leader training programs will develop, emphasize, and ensure the practice of hands-on leadership skills. The proponents are the Commander, DACH, and the Command Sergeant Major.

D. **EXECUTION.**

1. **Concept of the Operations.**
   a. All soldiers of DACH must be mentally and physically ready for emergencies. Participation in Continuing Medical Education and soldier skill programs will occur. Both officers and enlisted will maintain a high state of personal readiness. Periodically, DACH will conduct exercises to validate ones readiness and responsiveness. Chiefs and NCOICs of all departments/divisions/services/activities will place maximum emphasis on soldier training and readiness.
   
   b. DACH will assess the impact of training and readiness after each exercise event. Goals and objectives will be re-looked with a potential for re-defining the training focus, or shifting the training emphasis. All departments/divisions/services/activities are encouraged to plan internal exercises or rehearsals to include alert notification and recall in support of DACH’s emergency medical and emergency deployment responsibility.

2. **Responsibilities Common to All.**
Departments/divisions/activities/services will:
   a. Develop an internal section level orientation program for Emergency Preparedness Plan training. Orientation must include ones specific roles and responsibilities during emergencies. Training must include skills required to perform duties during emergencies.
   
   b. Monitor organizational training programs. Schedule appropriate training and refresher training when required.
ANNEX T TO EMERGENCY PREPAREDNESS PLAN
TRAINING; EXERCISES

Develop and maintain competency based training records as appropriate IAW JCAHO standards.

c. Estimate yearly expenditures necessary for training and exercises and submit as part of the budget.

d. Update and review training and readiness SOPs, alert rosters, and training certification documents.

e. Respond accordingly to taskings for personnel and/or equipment to support training and exercises requirements.

3. **Specific Responsibilities.**

a. **C, Operations and Training** is the primary point of contact for CPR training and certification, competency based training issues, common soldier skills, SDT manuals, and requests for schooling, along with the Adjutant. Publishes the DACH training schedule, coordinates for ranges and ammunition, and schedules for hospital wide SRX and MASCAL exercises.

b. **Deputy Commander for Nursing** is the primary point of contact for nursing skills and CPR training and certification.

c. **Commander, Medical Company** is responsible for the soldier’s physical fitness program.

d. **Command Sergeant Major** monitors enlisted skills and development. CSM provides NCO development advise.

4. **Coordinating Instructions.**

a. Within seven working days of an exercise, DACH wide or internal, after action reports will be prepared or the Commander’s review and higher headquarters reporting purposes.

b. Classrooms and conference rooms for training purposes may be scheduled with the secretary Operations and Training.

c. Operations and Training has tasking authority for personnel and equipment for the conduct of training and exercises.

d. Per reference c., DACH does not have a nuclear or chemical mission with corresponding training requirements.

FILE: T

12/09/97
ANNEX T TO EMERGENCY PREPAREDNESS PLAN
TRAINING; EXERCISES

e. Safety training will be included in all emergency exercises and drills. Safety will not be compromised for the sake of speed or cutting corners.

f. Hazardous Communications Training will be provided to all employees subject to handling or being exposed to blood, blood by-products, chemicals and solvents, and other potential toxins.
