### Abstract

How To Get It: A Guide to Defense-Related Information Resources is a reference tool to identify and/or obtain government published or sponsored publications, documents, maps, patents, specifications, standards, regulations, and other information resources of interest to the defense community. Entries are arranged alphabetically in a single directional listing, by document type, source, acronym, series description, or short title.

Each entry consists of an identification of the item and detailed acquisition information including: originator, order source, forms necessary, cost information, telephone and fax numbers, e-mail addresses, and the Internet URL when known. There are four appendices: Appendix A: Ordering Information; Appendix B: Forms for Ordering; Appendix C: Foreign Sources for Scientific and Technical Information; Appendix D: Topic Links for Subject Access to Information Sources Categories.

HOW TO GET IT

Acknowledgments

We are indebted to the many librarians who contributed their time and energy to this major project. The HOW TO GET IT Advisory Group consisted of librarians Patricia A. Ames, Lawrence E. Clemens, Lorna A. Dodt, Harriet H. Foster, Dolores M. Knight, Catheryn Lee, Susan K. Lundgren, Lily A. Waters, and Information Specialist Larry Goldberg.

We appreciate the efforts of originating offices and agencies which cooperated by updating data about their documents and services.

Special thanks are extended to the librarians who assisted significantly with the editing and cross referencing of this edition. They are Patricia Alderman, Ellen Barber, Julie A. Gibson, Rebecca A. Hamil, Wendy S. Hill, Marie T. O'Mara, Candy S. Parker, and Sharon L. Serzan.

Special recognition must be given to Phyllis Levine and Mary Jane Brewster. Phyllis created and graciously allowed us to use the Webpages of Topic Links in which she used DTIC's Subject Categories to link to pertinent Websites. This became Appendix D. Mary Jane compiled the Foreign Scientific and Technical Information Sources which became Appendix C.

Our deep appreciation is extended to Gwen P. Marshall, whose data entry and composition skills created the uniformity and style of the document.

The work reported in this document was compiled and updated by the Defense Technical Information Center. The publication of this guide does not indicate endorsement by the Department of Defense, nor should the contents be construed as reflecting the official position of this agency.

James M. Erwin
Director, Directorate of Operations
INTRODUCTION

Background

A Directory that would identify sources and channels for the acquisition of types of government-published or government-sponsored documents of interest to the Defense community was conceptualized in the early 1970's by the Committee on Information Hang-ups' Subcommittee on Document Procurement. It was based on the recurring problem that documents which were not indexed, announced or distributed by the major government information services were difficult to locate, and searches by letter and telephone were time consuming and not always successful. No directory existed, except in the minds of experienced librarians and information specialists and in their working notes accumulated during years of experience.

The guide, first published in 1973, was well received by the Defense information services community. This Librarians' Edition is the sixth revision.

Purpose

The guide is intended to assist librarians and information specialists as well as other individuals who need to identify or acquire Government-published, Government-sponsored, or Defense-related information resources.

Scope

The contents are limited to technical documents and information resources prepared for or of particular interest to the Department of Defense and its contractors (or potential contractors).

Information was gathered from written and Internet sources, such as the official regulations, directives and instructions which establish the formal, preferred channels for acquiring these documents, and from telephone calls, fax, e-mail and traditional correspondence. Information on maps, patents, translations and databases is included. New to the publication is the inclusion of URL’s for Internet locations of sources whenever they are known.

Arrangement

Individual entries are arranged alphabetically in a dictionary type list. Each entry consists of an identification of the items and the following information whenever available:

Originator: The agency that produces or sponsors that type of information resource.

Order from: Sources from which the item may be ordered, with notations indicating who may order from those sources.

Forms: Forms that should be used to order from each source cited.
HOW TO GET IT

Cost: Where there is a charge, the word “yes” is entered; where there is no known charge the word “no” is entered.

Telephone: Telephone numbers, fax numbers, and e-mail addresses of offices from which the item may be ordered, or from which additional information can be obtained.

Restrictions: Any restrictions on the distribution or use of the item, including who may order it.

Indexed in: Publications in which that type of information resource is indexed.

Notes: Comments on the history, status, or content of the information resource.

Contractor Reports

With some exceptions, contractor-generated reports are not included. The procedure for the acquisition of these reports is fairly standard. Most contractor reports are indexed and distributed by the Defense Technical Information Center (DTIC) and National Technical Information Service (NTIS). Reports not in DTIC or NTIS usually are controlled by the specific agency for which the contract work was performed. These reports must be requested from (or through) the controlling agency. That is, the request for the document, with need-to-know certified by the requester's contract monitor, must be sent to the office which controls distribution of the report. That office may transmit the report directly to the requester, or may direct the contractor to transmit the report. For additional information see the entries under Defense Technical Information Center (DTIC) and National Technical Information Service (NTIS).

Forms

In general, the forms used for ordering a specific type of document from DTIC, NTIS, or the Government Printing Office (GPO), are included in Appendix B. Appendix B also includes a form to send in updated or corrected information for the entries in this publication. There is an electronic form for updates on DTIC's STINET Website under "Librarians' Edition Entry Form" at: http://www.dtic.mil/stinet/htgi/

Agencies often will honor a document request submitted on other than the prescribed form.

Publications Centers

The Air Force, Army and Navy each maintain Publication Centers which are responsible for stocking and distributing publications produced by and of interest to the community they serve. For information on these centers see Appendix A.

The Defense Technical Information Center is the central repository, disseminator, and referral center for the information needs of the Department of Defense (DoD) and its
HOW TO GET IT

contractors. For more information see the entry under the Defense Technical Information Center and Appendix A.

The National Technical Information Service (NTIS) handles the announcement and sale of unclassified, unlimited documents available for general public distribution. For more information see the entry under the National Technical Information Service.

Other Government publications centers announce and distribute documents, many of which are of interest to the Defense community. For examples, see Appendix A.

Corrections and Updates

The Department of Defense has undergone numerous reorganizations and consolidations. These changes have had a major impact on the revision and updating of the HOW TO GET IT. Inevitably the organizations are experiencing a loss of institutional memory. Often knowledge of what happened to the publications of a former organization or where to go for information on the newly formed organization is very difficult to obtain.

Consequently, the editing of the HOW TO GET IT is a work in progress. We are depending on the users of this document to help us correct and update information. There are some gaps and inaccuracies in the data. We have included incomplete entries in the belief that some information is better than none. DTIC would appreciate receiving corrections and new information to be included in the next revision.

Please either fill out the form in Appendix B and fax it to Barbara J. Fox at (703) 767-8032; or send E-mail to Barbara J. Fox at: bjfox@dtic.mil; or call (703) 767-8041; DSN 427-8041. If you have access to the Internet, there is an electronic form on DTIC's STINET Website under “Librarians' Edition Entry Form” at: http://www.dtic.mil/stinet/htgi/

Your input, comments, and criticisms are welcome. We will investigate errors and will post the new information on the DTIC Users Listserv (User-L) and the Federal Reference Librarians Listserv (FedRef-L) sponsored by the Library of Congress.

A Web version of the HOW TO GET IT is our next project.

Notes: ACCESS RUSSIA is a full-text document delivery service with access to the collections of many libraries in the former Soviet Union. Also, for many years, the former Soviet Union provided technical, economic, and material support for North Korea and for other emerging nations of the world. Because of the relationship that existed between Russia and North Korea, rich resources of information concerning these advancements in science and technology now reside in various repositories throughout the former Soviet Union.

Notes: Formerly AFR 0-2 - This index is a user reference of standard departmental publications. Included are:

AFMAM - Air Force Manuals Formerly AFM
AFPAM - Air Force Pamphlets Formerly AFP
AFI - Air Force Instructions, Manuals & Pamphlets, Formerly AFR Air Force Regulations
AFRP - Air Force Recurring Publications
AFVA - Air Force Visual Aids

AFIND4 Department of Defense, Chairman Joint Chiefs of Staff (JCS) and the Joint Staff and Interservice Combined Publications, Air Force Contract Requirements (AFCRD) and Commercial Publications

Originator: Department of the Air Force
ATTN: SAF/AADDQ
1720 Pentagon
Washington, DC 20332-5000

Order from: U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-4. Lists DoD, JCS, and interservice publications directives of interest to the Air Force, excepting Department of Defense Directives and Department of Defense Instructions. (For information on these, see AFIND5) It also includes Air Force Acquisition Documents (AFAD).

Indexed in: AFIND11

HOW TO GET IT

AFIND5 Numerical Index of Specialized Information Protection Publications
(COMSEC Publications)

*Originator:* HQ, AFCS/GCIS
203 W. Losey Street
Room 2040
Scott Air Force Base, IL 62225-5234

*Order from:* U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

*Notes:* Now known as Air Force Index 5. Formerly AFR 0-5. This indexes Air Force Manpower Standards (AFMS).

AFIND7 Index of Air Force Personnel Tests

*Originator:* Department of the Air Force
AFPC/DPPAT
Director of Personnel Programs
Washington, DC 20330

*Order from:* U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

*Restrictions:* Only available to Test Control Officers (TCO) & Test Examiners (TE)

*Notes:* Formerly AFR 0-7. This indexes Air Force Personnel Tests (AFPT). The APPT # and date, requisition cod, TCO, Acct #, # of copies must be included. See web site for complete ordering instructions.

AFIND8 Numerical Index of Specialty Education/Training Standards and Air Force Job Qualification Standards

*Originator:* Department of the Air Force
2 AF/DOT
721 Hangar Road, Ste 102
Keesler AFB, MS 39534-2804

Directorate of Departmental Publishing
Distribution Management Office
Bolling AFB
Washington, DC 20330-1111
HOW TO GET IT

AFIND8 Numerical Index of Specialty Education/Training....Continued

Order from: U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-8. This indexes Air Force Specialty Training Standards (STS).

AFIND9 Numerical Index of Departmental Forms

Originator: Department of the Air Force
ATTN: SAF/AADF
1720 Pentagon
Washington, DC 20332-5000

Order from: U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Notes: Formerly AFR 0-9. See Air Force Materiel Command (AFMC) Publications for ordering instructions

AFIND10 Management Control and Authorization Program for Tables of Allowance and Allowance Source Codes for USAF Activities

See also: Allowance Standard Retrieval System (ASRS) on CD-ROM
Allowance Standards (AS) Air Force

Originator: Department of the Air Force
Director of Maintenance and Supply
Washington, DC 20330

Order from: National Technical Information Service (NTIS) (See Appendix A)
U.S. Air Force Publications Distribution Center (USAFPDC) (See Appendix A)

Notes: Formerly AFR 0-10. This is available on CD-ROM and on the Web. This index provides a listing of all Air Force Miscellaneous Allowance Source Codes with the corresponding control regulation and all current Allowance Standards. An alphabetical listing of separate Allowance subjects is included.

Notes: Formerly known as Air Force Aramament Laboratory Technical Reports Wright Laboratories/Aramament Directorate (AFRL) MN). Now called the Air Force Studies & Analysis Agency (AFSAA) Air Force Center for Studies and Analysis Study Reports. Requests for AFSAA publications must comply with Air Force and Industrial Security Regulations. The Air Force Center for Studies and Analyses, Information Services Team (AFSAA/SAM) is a document repository and research library that supports AFCSA and Headquarters Air Staff analysts. By screening the information media of all military services, OSD, JCS, contractors, and research organizations, the Information Services Team acquires the operation and contingency, test and evaluation, intelligence, weapon and support systems, and research and development documents frequently needed by analysts to accomplish their mission.

Army Laboratory Technical Report series continued through ATL-TR-66-61 (June 1966); then changed to AFATL-TR-xx-xx.

600 Chennault Circle
Maxwell AFB, AL 36112-6424

Order from: Originator

Telephone: (334)953-2966/5046; DSN 493-5046; Fax: 334-953-4096
E-mail: AFHRANews1%RS%AFHRA@max1.au.af.mil

Restrictions: Except for documents that are classified or otherwise restricted, the Agency's collection is open to the public.

Notes: The USAF Historical Research Center, collocated with the Air University Library at Maxwell Air Force Base, is a principal repository for Air Force historical documents. The Agency's holdings, exceeding 65 million pages, represent the largest and most valuable specialized collection of historical documents on US military aviation in the world. Materials range from the use of balloons in the Civil War through the record of Air Force activities in World War II, Korea, Vietnam, and Operations DESERT SHIELD/DESERT STORM. About three-fourths of the Agency's documents are US Air Force unit histories submitted from 1942 to the present. Special collections, some dating from the early 1900's complement the unit histories. Among them are historical monographs and studies written by Air Force historians; more than 2,000 oral history interviews; end-of-tour reports of major overseas commanders, course materials of the Air Corps Tactical School from the 1930's; and working papers of key Army Air Forces staff offices, the British Air Ministry and German Air Force during World War II. More than 500 collections of personal papers of key, retired Air Force civilian and military officials are also available to researchers.

AF Form 1784
AF Form 1846
Letter

Telephone: USAFPDC - DSN 851-1463 or (410) 687-3723

Restrictions: Customer accounts must be established with the Air Force Publications Distribution Office (PDO) in accordance with AF137-161.

Notes: Requirements for publications must be determined at the local level by the CAR (Customer Account Representative) and submitted to the local PDO. Contractors requiring publications in conjunction with Government contracts should submit requests to the Air Force or other government officials responsible for administering contracts.

URL: http://af.pubs.hq.af.mil

Air Force Publications Distribution Center (USAFPDC)

Order from: Each Air Force organization has a local Publications Distribution Office (PDO) through whom documents are acquired from the AFPDC. There is also a category of PDO which is not under Air Force control (for example, one assigned to the Army, the State Department or other government agency). Air Force Regulation AF137-61 (Receiving, Distributing, Requisitioning and Warehousing Publications and Forms) explains the
HOW TO GET IT

Air Force Publications Distribution Center (USAFPDC).....Continued

relationship between the PDO and AFPDC. At the office level is the Customer Account Representative (CAR) who processes all requests to the PDO. This responsibility may be assigned to an individual or a local library. Air Force Regulation AF137-61 (Procedural Guide for Customers of the Publication Distribution Office) describes the CAR's interaction with the PDO. Together they describe how the system works. Other DoD and U.S. Government agencies who have a continuing need for Air Force publications should register with the Publications Distribution Center for Distribution Codes. Assignment of a Distribution Code makes an agency eligible to order from the Distribution Center. For further information about registering, write or call:
U.S. Air Force Publications Distribution Center (USAFDPC) (See Appendix A)
The Air Force Publications Distribution Center stocks and distributes publications produced by Air Force Headquarters, AF Forms, some DD Forms, some DoD Administrative Publications and other publications of interest to the Air Force.

Telephone: USAFPDC - DSN 851-1463 or (410) 687-3723
Notes: Government agencies may request small quantities of Air Force publications from the nearest PDO.

Telephone: DTIC 1-800-225-3842
NTIS 1-800-553-6847

Notes: Since 1 October 1997 all Air Force laboratories are now designated AFRL,
Air Force Research Laboratory.
The Phillips Laboratory was established on 13 Dec 1990. From 1 October
1997, it has been called the Air Force Research Laboratory.

The following organizations were disestablished at Hanscom Air Force
Base:
Geophysics Laboratory (AFSC) (1989-1990)
Formerly Air Force Geophysics Laboratory (1976-1989)
Formerly Air Force Cambridge Research Laboratories (1960-1976)
Formerly Cambridge Research Center (1951-1960)
Formerly Cambridge Research Laboratories (1949-1951)

The following organizations were disestablished at Edwards Air Force
Base:
Astronautics Laboratory (AFSC; 1989-1990)
Formerly Air Force Astronautics Laboratory (1987-1989)
Formerly Air Force Rocket Propulsion Laboratory (1963-1987)

The following organizations were disestablished at Kirtland Air Force
Base:
Air Force Space Technology Center (1982-1990)
Weapons Laboratory (AFSC) (1989-1990)
Formerly Air Force Weapons Laboratory (1963-1989)
The Research Directorate of AFSWC spun off and became AFWL in
1963. In 1976 AFSWC was closed and OPR functions came to the AFWL.
Formerly Air Force Special Weapons Center (1952-1976)
HOW TO GET IT

Air Force Research Laboratories.....Continued

The following organizations were disestablished at Eglin Air Force Base:
Air Force Armament Laboratory, and the Wright Laboratories/Armament
Directorate (WL/MN)
Their report series include:
ADTC-TR-xx-xx - Armament Development and Test Center Technical
Report
AFAC-TDR-xx-xx - Air Force Armament Center
AFAC-TR-xx-xx - Air Force Armament Center Wright
Laboratories/Armament Directorate
ALT-TDR-xx-xx - Armament Laboratory Technical Report
APGC-TDR-xx-xx - Air Proving Ground Center
APGC-TN-xx-xx - Air Proving Ground Center
APGC-TR-xx-xx - Air Proving Ground Center
ATL-TR-xx-xx - Armament Laboratory Technical Report

Effective 1 Jan 1991, the geographical locations vary on reports and the
report series are:

PL-TR-91-1000 series Kirtland AFB
PL-TR-91-2000 series Hanscom AFB
PL-TR-91-3000 series Edwards AFB

Other publication-series numbering, such as technical notes, conference
proceedings, reprint series, etc., are established using the same format for
specific series.

Limited distribution statements are assigned to TOs in accordance with DODD 5230.24, Distribution Statements on Technical Documents. Limited distribution TOs may be withheld from release in accordance with procedures in DODD 5230.25, Withholding of Unclassified Technical Data From Public Disclosure, and AFI 61-204, Disseminating Scientific and Technical Information. TO 00-CD-1, a CD-ROM containing electronic copies of the Category 00-5, 00-20, and some 00-25 TOs, is provided to all TODOs when their accounts are established. A copy of TD 0-1-01, the Index of TO Indexes, is provided at the same time. The CD and Index are approved for public release.

HOW TO GET IT

Allowance Standards (AS) Air Force.....Continued

Cost: Yes

Telephone: (410) 687-3723 or DSN 584-4529

Indexed in: AFIND10 Management Control and Authorization Program for Table of Allowance and Allowance Source Code for USAF Activities

Restrictions: Order through channels. Certification of need-to-know is required on requests for classified publications. Request from contractors for Air Force publications available at the Air Force Publishing Distribution Center must be made through the contract monitor. All queries concerning access to Tactical Command publications should be referred to Headquarters, Air Combat Command, Langley AFB, VA.

Notes: Allowance Standards, formerly called Tables of Allowance, are equipment allowance documents which prescribe basic allowances of organizational equipment, and provides the control to develop, revise or change equipment authorization inventory data. Responsibility for Allowance Standards assignment varies. Information on Allowance Standards Management Offices, applications of Allowance Standards, and Activity monitor codes are contained in AFIND10. Use the Allowance Standard Retrieval System on CD-ROM which replaces the information previously distributed on microfiche.

ATI-xxx xx – Air Technical Information/Index Documents

Originator: Central Air Documents Office (CADO) (Disbanded).

Order from: Defense Technical Information Center (DTIC) (See Appendix A)

Forms: DTIC Form 1 or Form 55 for limited documents (See Appendix B)

Telephone: DTIC (See Appendix A)

Restrictions: Classified reports available to DTIC registered users only. Call or write DTIC for information.

Notes: The ATI collection of technical information developed during and immediately after World War II includes copies and translations of confiscated German and Japanese wartime research reports; however, the majority are shared British and U.S. research and development reports. The accession numbers range from ATI-000 001 to ATI-210 999. This collection was announced between 1947 and 1953 in a series of index file cards and catalogs (made up of the 3x5 cards reproduced on 8 1/2 x 11 sheets of paper) published by the Central Air Documents Office (CADO) and long out of print. The only retrieval technique currently available for these documents is a manual search of the closed card catalog at DTIC. File categories are: master accession number, author, CADO subject heading, corporate source and contract number. Searches for documents in this file are only made in response to a specific user request on a special service basis. Some of the unclassified ATI-numbered documents are also held in the collections of the Library of Congress and the National Archives.

Ballistic Missile Defense Organization (BMDO) Technical Information Center

Originator: Ballistic Missile Defense Organization (BMDO)

Order from: Order online on the Internet

Restrictions: Must register online and be approved.

Notes: Within the Department of Defense, the Ballistic Missile Defense Organization (BMDO) is responsible for managing, directing, and executing the Ballistic Missile Defense (BMD) Program. The program focuses on three areas: Theater Missile Defense (TMD), National Missile Defense (NMD), and advanced ballistic missile defense technologies. The Ballistic Missile Defense Organization’s (BMDO) Technical Information Center (TIC) serves as the primary repository for technical, scientific and managerial information for the BMDO and the greater ballistic missile defense community. The TIC uploads all BMDO documents on their Website.

Gunpowder Branch
Aberdeen Proving Grounds, MD 21010-0196

Order from: Originator

Cost: Yes

Telephone: (410) 676-9030; Fax: (410) 676-9703
E-mail: cbiac@battelle.org

Notes: CBIAC was established in August, 1986 to serve as the DoD focal point for Chemical Warfare/Chemical Biological Defense (CW/CBD) technology. It is responsible for the collection, review, analysis, appraisal and summary of available CW/CBD information and data and providing these data to all interested user in support of the DoD CW/CBD research and development program. To do this, CBIAC has developed and maintains several databases and has access to a number of other CW/CBD databases. CBIAC is concerned with all areas of CW/CBD technology and provides technological assistance in such areas as:

- Chemical and physical properties of agents, decontaminants, simulants and intermediates
- Identification of Chemical Biological and Radiological (CBR) agents, simulants and other materials that may be encountered in the environment.
- Environmental transport and fate of agents and simulants.
- Medical effects, treatment, prophylaxis and equipment/procedures
- Toxicology of agents and related materials
- Warning and identification
- Treaty verification including technology assessments, process identification and methodology
- Individual and collective protection
- Decontamination
- NBC survivability of personnel and equipment

Cold Regions Science and Technology Bibliography.....Continued

Notes: This bibliography superseded the Annotated Bibliography on Snow, Ice and Permafrost in 1969. Annual volume contains material accessioned during the year and has an author & subject index. Time span covered: 1951 to present. This data base includes materials in all disciplines dealing with Antarctica, the Antarctic Ocean and sub-Antarctic islands; snow, ice and frozen ground; behavior and operation of materials and equipment in cold temperatures, Hydrology, Climatology and Civil Engineering in cold regions are emphasized. Sources are in the Antarctic Bibliography, and the Bibliography on Cold Regions Science and Technology. It is produced by the Library of Congress under contract to CRREL, and the National Science Foundation.

Cost: Yes

Telephone: (603) 646-4221 or Fax: (603) 646-4712
E-mail: nliston@crrel.usace.army.mil

Notes: Hydrology, climatology, civil engineering, meteorology, military operations, mobility, constructions materials in cold temperatures, and environmental issues relating to cold regions. Technical areas include - Cold regions science and technology including the design, construction, and maintenance of military facilities in cold regions and the conduct of snow, ice, and frozen ground investigations.

Publications - The Center maintains a Bibliography on Cold Regions Science and Technology covering 1951 to the present. It is available in paper copy or online through Orbit Search Service as file Cold. Every item in the bibliography is available at CRSTIAC. The Center also publishes an in-house report series available through DTIC.

URL: http://www.ed.gov/NLE

Notes: The agencies have formed a cooperative organization called CENDI to develop ways to improve the productivity of federal research and development through efficient and responsive information programs and improved management systems.

Since information is a critical need in the research process, each of the agencies is actively involved in gathering and processing information from research by others, including foreign information obtained through international exchange agreements to supplement the information generated by its own research activities. The collected information is of interest not only to researchers within the federal government but also to U. S. industry, colleges and universities, nonprofit organizations, and state and local government agencies.

CENDI’s programs are conducted by working groups on cataloging standards, electronic networking, user education, and international scientific and technical information activities. Special projects cover topics such as development of Standard Technical Report Numbers (STRN), development of common authority lists, coordination of classification and sensitive information marking, development of information transfer standards, and promotion of cost-benefit studies.

**Restrictions:** None

**Notes:** A comprehensive source of information on America’s 50,000 technology manufacturers. Over 80% of the companies are privately held or operating units of larger companies. Company profits are quite extensive including details of ownership, executives, products, address, phone/Fax/email/sales, employee count, and past and future employment growth. CorpTech has developed its own coding system of over 3,000 codes for indexing companies in 17 different high-tech industries. The information is provided in print, CD-ROM, ASCII files or over the Internet at www.corptech.com. The CorpTech Directory of Technology Companies is an annual published, 4-volume, 7,000 page directory of 50,000 companies. Each subscription includes free monthly updates. The CorpTech Explore Database and Explore Database are two versions of the database on CD-ROM. Comprehensive software provides the opportunity to search the companies using over 30 different criteria as well as text searching the descriptions and product codes. The Explore Database version offers additional functionality including mailing label production, downloading in comma delimited formats and Extended Profiles, providing company change information (ownership, location executives, sales, employee, products) going back 10 years. The data can also be obtained in comma delimited format for importing into contact management programs. All products are available in national, regional and custom versions.

Notes: Crew system ergonomics information is scientific and technical knowledge and data concerning human characteristics, abilities, limitations, physiological needs and tolerances, performance, body dimensions, biomechanical dynamics, and physical strength. It also includes engineering and design data concerning equipment intended to be used, operated, maintained or controlled by members of military crews in sea, land, air, and space environments. Subject areas include, but are

C-31

Crew System Ergonomics Information.....Continued

not limited to: acquisition of information through visual, auditory and other senses; information storage and retrieval; attention allocation; perceptual organization; human language processing; operator motor control; effects of environmental stress; and operational workload, and control and display interfaces (real and virtual). Various information products will be developed including the following: handbooks and data books; state-of-the-art reports; critical reviews; technology assessments; research directories, abstracts, and indexes; and currents awareness bulletins. In addition, CSERIAC offers a variety of services including: responding to technical and bibliographic inquiries, providing support for revision and development of military standards and specifications, and maintaining and implementing computer based models of human operators. CSERIAC sponsors symposia, workshops, conferences, colloquia, and short courses to apprise scientists and engineers of important developments in crew system ergonomics and to provide opportunities for professional development.

Restrictions: None
Notes: ITT purchased Kaman Sciences Corporation. Kaman Sciences (DACS) are still available and can be obtained through ITT. DACS supports the development, testing, validation, transition and use of software engineering technology. DACS subject areas encompass software engineering methods, practices, techniques, tools, guides, and standards; acquisition management; Ada and other programming language techniques and methods; software life cycle development - including requirements definition, design, coding, integration, testing and acceptance; software failures; test methodologies; software quality metrics and measurements; reliability and cost modeling; standards and guides for software development and maintenance; software engineering techniques and tools; and software technology research, improvements, and training.

DACS Databases

- Software Engineering Bibliographic Database (SEB)
- Robotics and Artificial Intelligence Database (RAID)
- Software Engineering Research Projects Database (SERP)
- Software Life Cycle Experience Database (SLED)
- Software Engineering Tools Information Database (SETI)

SEB contains collected citations from texts, technical reports, journals, periodicals and proceedings on a wide variety of software engineering topics. The RAID and SERP databases contain project information on R&D projects in the fields of robotics, artificial intelligence and software engineering. SLED contains software life cycle data relevant to software reliability, software errors, faults and failures, software cost and productivity, and post development programs. SETI contains information on tools indexed by data elements such as operating systems, target systems, output, and implementation languages used to support the software development and maintenance process. Subsets of all data are available in hard copy and magnetic form.

Product and Service Information

The User's Guide to DACS Products and Services (DACSGUIDE) provides an introduction to DACS, an overview of DACS specialty databases, a description of DACS products and services, a description of DACS special studies, and information on ordering DACS products and services. The User's Guide to the Robotics and Artificial Intelligence Database (RAIDGUIDE) explains the contents and requirements to access RAID information. Detailed information on the contents and access requirements to DACS software engineering bibliographic data is contained in the User's Guide to the Software Engineering Bibliographic Database (BIBGUIDE). DACS provides and transitions laboratory-developed software engineering tools such as the Ada Compiler.

Indexed in: DoD 5010.12-L, (AMSDL) Acquisition Management Systems and Data Requirements Control List

Restrictions: DIDs which are identified in the index as "Limited to (system)" in the column, identified with an "@" and/or annotated with an "@" symbol are not available from DAPS. They must be obtained from the program office or office of primary responsibility (OPR) of the DID.

Notes: List identifies those source documents and related Data Items Descriptions (DIDs) which have been cleared for use in defense contracts by the Office of Management and Budget (OMB) under the authority granted by Public Law 96-511, "Paperwork Reduction Act of 1980"

Government agencies may request a complete set of DIDs by sending their request to DAPS. If more than one set is needed, the request must go via the requester is Designated Service Focal Point (see DoD 5010.12-
HOW TO GET IT

Data Item Description (DID).....Continued

L, for a list of Focal Points). New and revised DID's, the AMSDL and the
AMSDL Notices are automatically distributed to government activities
appearing on the automatic distribution list maintained at DAPS. A
request for more than five copies must be approved by the requester is
Designated Service Focal Point.

New and revised issuances of DIDs, the AMSDL, and the AMSDL Notices
are available by subscription to non-government activities.

Prior to July 1985 DID's were assigned to a functional category which
most nearly describe the use of the required data, as follows:
A - Administrative/Management
E - Engineering and Configuration Documentation
F - Financial
H - Human Factors
L - Logistic Support
M - Technical Publications
P - Procurement/Production
R - Related Design Requirements
S - System/Subsystem Analyses
T - Test
V - Provisioning

Beginning 1 July 1985, DID's have been assigned identification numbers
with a four-letter designator representing the functional area
assignment, as outlined below:
ADMN - Administrative Data
ATTS - Automatic Test Technology Standards
CDNC - Computer Aided Design/Numerical Control
CMAN Configuration Management
CMPS - Composites Technology
DCPS - Data Communications Protocol Standards
DRPR - Drawing Practices
EDRS - DoD Engineering Data Reproduction Systems
EGRS - Engineering Data Systems
EMCS - Electromagnetic Compatibility
ENVR - Environmental Requirements and Related Test Methods
FACR - Facility Construction Design Requirements
FNCL - Financial Data
FORG - Forgings
GDRQ - General Design Requirements
HFAC - Human Factors
ILSS - Integrated Logistics Support Standards
IPSC - Information Processing Standards for Computers
MCCR - Mission Critical Computer Resources
MECA - Metal Castings

Defense Automated Printing Service (DAPS)

Originator Defense Automated Printing Service (DAPS)
Order from: Originator (See Appendix A)
Cost: Yes
Telephone: (215) 697-2179; DSN 442-2179

Notes: The Department of Defense Single Stock Point (DODSSP) was created to
centralize control and distribution to provide access to extensive technical
information within the collection of Military Specifications and Standards
and related documents produced or adopted by DoD. The DODSSP
mission was assumed by the Defense Printing Service in October of 1990.
Although the DODSSP collection is extensive, not all documents specified
in government procurements are provided by DODSSP. Those which are
include: Military Specifications and Standards; Federal Specifications and
Standards; Military Handbooks; Qualified Producers Lists (QPL'S); Data
Item Descriptions (DIDs); Commercial Item Description (CIDs); Air
Force-Navy Aeronautical Standards; Air Force Navy Aeronautical Design
Standards; other Departmental Forms; DoD Adopted Non-
Government/Industry Documents(issued to DoD only); Department of
Defense Index of Specifications and Standards

DODISS on CD-ROM - This product is in PDF as well as a paper product.
ASSIST CD-ROM - This product is also available as a single issue.
ASSIST-Online - This product offers online access to ASSIST database or
is available as an annual subscription.

D-24
HOW TO GET IT

Defense Logistics Studies Information Exchange.....Continued

Notes: DLSIE collects, organizes, stores and disseminates information relating to the DoD logistics study effort and logistics management documentation that may be of interest to the Defense community. It provides searches of the Studies data base and the Models data base, makes secondary distribution of DLSIE documents (identified by LD number) through the use of microfiche, and selective dissemination of information (SDI) for authorized users. DLSIE products and services are available to authorized users only. This includes DoD components, other Federal agencies and DoD contractors and grantees. The contractors and grantees must submit requests in writing through channels for certification of need-to-know.

Suspended April 13, 1998, part of the collection went to DTIC, and part is being stored.

Notes: The Defense Visual Information Center (DVIC) is the official Department of Defense (DoD) records center for the storage and preservation of significant visual information (VI) material. The DVIC is responsible for the reception, selection, storage, retrieval, compilation, duplication and distribution of significant DoD imagery of military operations, exercises, and training to DoD units and activities in support of mission requirements. The DVIC also provides VI products and services to public customers for a cost recovery fee. The DVIC's records are a dynamic collection of still and motion imagery and a working depository where images are accessioned as they are submitted to DoD military departments and activities.

DVIC's holdings consist of approximately 75 million feet of motion picture film and 500,000 minutes of original master video material. Major portions of the subject material id dated from 1982 although there may be historic subject pre WWII to the present. Copies of unclassified official images records are available to all DoD units and activities and maybe purchased by the public.

GPO Sales Product Catalog (SPC)

Notes: This index lists the unclassified Federal, Military and Departmental specifications, standards and related standardization documents, and those industry documents which have been adopted for DoD use. International standardization documents are included. It contains three listings:

Military Specifications and Standards; Federal Specifications and Standards; Military Handbooks; Qualified Producers Lists (QPL'S); Data Item Descriptions (DIDs); Commercial Item Description (CIDs); Air Force-Navy Aeronautical Standards; Air Force-Navy Aeronautical Design Standards; Air Force Specifications; Cancellation Lists and other Departmental Forms.

DODISS Part 1. An alpha listing of all current standardization documents in order by title.
DODISS Part 2. A numerical listing of all current standardization documents in order by document identifier number plus all standardization documents canceled since the latest edition of DODISS Part IV.
DODISS Part 3. A Federal Supply CClass (FSC) listing of all current standardization documents in alpha order within each FSC. FSC are identified in the Cataloging Handbook H2-1, which can be ordered at the subscription desk.
DODISS Part 5. A numerical listing of all standardization documents canceled from 1964 to date of current edition. This is published every three years.

DODISS on CD-ROM - This product is in PDF as well as a paper product.

Originator:
- Department of Energy
- Office of Energy Research (OER)
- Office of Computational and Technology Research (OCTR)
- Office of Scientific and Technical Information
  P. O. Box 62
  Oak Ridge, TN 37831

Order from:
- Originator
- National Technical Information Service (NTIS) (See Appendix A)

Notes:
DOE/OSTI was formerly called AEC/TIC and ERDA/TIC and DOE/TIC. DOE/OSTI services, including distribution of printed DOE reports, are available to DOE and its contractors. Limited services are available to state, local and federal agencies involved in energy activities.

The Office of Scientific Technical Information is the Department of Energy's central point for: coordinating the establishment, communication and implementation of policy procedures, and standards for handling scientific and technical information in DOE. Report Handling, including collecting, processing, announcing and distributing technical reports of DOE-funded research. Energy data base production, involving maintenance and enhancement of the Energy Data Base which is the world's most comprehensive collection of references to energy-related information, Energy Research in Progress, and other data base services. Information Retrieval. The Energy Data Base and other specialized databases are accessible by means of an online retrieval system the Integrated Technical Information System (ITIS) and through production and distribution of various printed products, including abstracts journals, specialized bibliographies and current awareness publications. (See Energy Data Base (EDB) for additional information on other means of accessing this database.)

Notes: This Directive comes in three sections; Activity Address Code Sequence;
FIP Code Sequence; Civil Agency Address.

A DODAAC is a Department of Defense Activity Address Code which
identifies each activity with a unique six digit (alpha/numeric) code. Your
DODAAC is a uniform way to identify customers' organizations and
addresses, and is used for shipping, tracking and billing purposes. No two
codes are alike, and everyone who has an agreement or contract to
receive, ship and/or have custody of government property on a regular
basis must have one. For more information about DODAACs or to conduct
on-line queries of the Department of Defense Activity Address Directory
(DODAAD, where DODAAC information is stored visit the web site.

DoD Listing of Approved Department of Defense.....Continued

Notes: DoD 8910-1-L renumbered to be DoD 8910-1-M in June 1993. Formerly DoD 7750.7-L consists of a seven-part listing; (1) Listing of current DD Forms by form number, (2) Listing of current DD Forms by sponsoring components; (3) Index of DoD major subject groups; (4) Index of subject numbers by DD Form number; (5) DD Forms associated with active reports; (6) DD Forms associated with expired reports; and (7) DD Forms cancelled in the last two years. Published semiannually. Formerly DoD 5000.21-L.

Unclassified DOD issuances will not be printed for hardcopy distribution after July 1, 1998. DoD issuances will be available at http://web7.whs.osd.mil/corres.htm

DTIC Independent Research and Development (IR&D) Database on CD-ROM

Originator: Defense Technical Information Center (DTIC) (See Appendix A)

Forms: Government – DTIC Form 64 (See Appendix B)
Others – DTIC Form 4

Cost: Yes

Telephone: (703) 767-8278; DSN 427-8278
DTIC General Information 1 (800) 225-3842

Notes: This system is a network of remote terminals linked to DTIC's central computer providing online access to the data from the three major databases: The Technical Reports (TR) Database, The Technical Effort and Management System (TEAMS), and the Independent Research and Development (IR&D) Database. Each of the databases is discussed in more detail in a separate entry for each title. The Network Services Branch provides support for online system users–training problem-solving. At this time there are four regional offices around the United States which offer search services to registered users who do not have a terminal in-house. See DTIC Regional Offices for more information. Interested prospective contractors and grantees should also call the Special Programs Branch (703) 767-8222 or DSN 8222 to learn about the special programs for those who do not have a current contract or grant with DoD. See also information under the University Research Initiative (URI), Small Business Innovation Research (SBIR), and Historically Black Colleges and Universities (HBCU) Programs in this directory. This service is available to all DTIC registered users. Bibliographies will be prepared by the DTIC Retrieval staff on demand, from any of the databases. See each title for complete ordering instructions.

Notes: The Office of Naval Research, Europe became headquarters for ONR International Field Office, London in April of 1997. All three services operate international science and technology offices in London. They are the U. S. Army Research, Development and Standardization Group (USARDSG), the Office of Naval Research Europe (ONREUR), the European Office of Aerospace Research and Development (EOARD), and the Research and Development Liaison Office London (USAF). They are co-located in one building, the Edison House. The basic mission of each service group is to foster international cooperative programs

Indexed in: Resources in Education (RIE)
Educational Resources Information Center (ERIC) Database

Notes: Ed-xxx xxx is an accession number assigned to publications acquired, analyzed, announced and made available by ERIC. ERIC is a decentralized nationwide network of 16 subject-oriented Clearinghouses, located at nonprofit institutions, and three commercial contractors. Each Clearinghouse publishes its own bibliographies, reviews, and state-of-the-art studies which are indexed in RIE and available from the EDRS Document Reproduction Service (EDRS). Approximately 92% of documents abstracted in ERIC are available from EDRS. The ERIC database contains journal articles and reports concerned with education and curriculum materials covering the subjects of communications, education, and information science. The database contains all the references in Current Index to Journals in Education, 1969+ and Resources in Education, 1966+.

Energy Abstracts for Policy Analysis.....Continued

E-mail: estsc@adonis.osti.gov

Indexed in: GPO Monthly Catalog
GPO Sales Product Catalog (SPC)

Notes: (ESTSC) was formerly known as Energy Science & Energy Software Center Abstracts for Policy Analysis is a monthly abstract journal of primarily nontechnical or quasi-technical literature on energy. Its subject scope includes energy policy; legislation and regulation; search and development programs; conservation; supply and demand; and social, economic, and environmental impacts of energy production and use. Material for EAPA, which is selected strictly on the basis of content, comes from such publications as federal, regional, state, and local reports; periodicals, including trade journals and news weeklys; and documents produced by private and educational foundations, institutions, societies, and associations.

Indexed in: GPO Monthly Catalog
GPO Sales Product Catalog (SPC)

Notes: Energy Research Abstract is a semimonthly journal that covers all areas of energy-related literature originated by the U. S. Department of Energy and its laboratories, energy centers, and contractors. Scientific and technical reports prepared by federal and state government agencies, foreign governments, and domestic and foreign universities and research organizations are also included. Coverage of nonreport literature is limited to that generated by DOE activities. ERA's subject scope encompasses the research and development, demonstration, and technological programs resulting from DOE's broad charter for energy sources, conservation, safety, environmental impacts, and regulation.

National Technical Information Service (NTIS) (See Appendix A)

Indexed in: FIPS Index

Telephone: (301) 722-9100; 1-800-688-9889

Notes: Established in 1966, the Federal Information Center (FIC) is a single point of contact for people who have questions about Federal agencies, programs, and services. The FIC currently responds to about 2 million calls per year via its nationwide.
HOW TO GET IT

Federal Information Center.....Continued

Principal reference tool is the FIC's own electronic data base, which lists more than 100,000 points of contact (telephone numbers, addresses, electronic access) by agency and subject. The data base also includes the Catalog of Federal Domestic Assistance and many agency fact sheets. GSA and the FIC contractor are working with the Government Printing Office to place the FIC's data base on CD-ROM, sell it to the public, and distribute it to all Government Depository Libraries. Printed periodicals such as the Federal Register and the Code of Federal Regulations. Printed agency materials such as the Consumer's Resource Handbook, the Budget of the United States Government, and agency telephone directories.

Foreign Broadcast Information Service.....Continued

Available on Microfilm (1941-52) & Microfiche, 1974 +

Forms: Letter

Cost: Yes

Telephone: LC (202) 707-5639
NTIS World News Connection (703) 605-6575

Restrictions: See Notes

Notes: Prior to 1946 these reports were issued by the U. S. Federal Communications Service. From January 1946 to February 21, 1947 they were issued by the Latin American, European, and Far Eastern Sections of the FBIS. These sections were subsequently united into one series in February 1947, known as the "White Cover" edition. There are occasional missing issues. Individual reels or years can be supplied in complete reels only. In addition to the above, a Daily Report Supplement was issued which was separately filmed for the years 1966-69, and which may be purchased on 10 reels. The Supplement for 1970 and following years have been filmed with the Daily Report. The "Area Editions" of the Daily Report as were initialed in February 1947, and the area sections of the "White Cover" edition were discontinued as separate series. After that time the Daily Reports appeared in two editions: the unrestricted "White Cover" edition described above, and the "Area Editions" restricted to official use. The "Area Editions" are the basis for the parallel "White Cover" edition, and contain information omitted from the latter. The "Area Editions" initially appeared in four series, covering the Far East, Latin America, the Soviet Union, and the Near East, and has been released form restrictions for the period of Feb. 24, 1947 thru Jan. 3, 1952. Positive microfilm can be provided on 289 reels. Individual reels or dates are available in complete reels only. "Area Editions" for the period 1952 thru August 3, 1970, are still subject to State Department restrictions, and therefore are not available yet for filming. For the period August 4, 1970 thru December 30, 1973, the "Area Editions," have been released and filmed only for the areas of Communist China, Eastern Europe, and the Soviet Union. Positive microfilm is available as follows:

<table>
<thead>
<tr>
<th>Area</th>
<th>Reels</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communist China</td>
<td>10</td>
</tr>
<tr>
<td>Eastern Europe</td>
<td>15</td>
</tr>
<tr>
<td>Soviet Union</td>
<td>13</td>
</tr>
</tbody>
</table>

As of April 1, 1974, FBIS no longer issues the White Cover Edition and has divided the Area Edition into 8 series. These series are available through NTIS on microfiche. As the Area Editions will be available from

Government Information Locator Service.....Continued

Notes: GILS is a decentralized collection of servers and associated information services that is used by the public either directly or through intermediaries to find public information throughout the Federal Government. The GILS standard is recommended for use by Federal agencies in the development and establishment of information locators, information resources that identify other information resources, describes the information available in those resources, and provide assistance in how to obtain the information. GILS was approved as Federal Information Processing Standard 192 to create a uniform technical approach to providing information locator services to the public. The DefenseLINK Locator is the Government Information Locator Service (GILS) for the Department of Defense information sources.

Government-Industry Data Exchange Program (GIDEP)

Originator: Government-Industry Data Exchange Program
P.O. Box 8000
Corona, CA 91718-8000

Order from: Originator

Telephone: (909) 273-4677; Fax: (909) 273-5200

Notes: GIDEP is a cooperative by government and industry to exchange research, development, design, testing, acquisition and logistics information among government and industry participants. GIDEP's object is to avoid unplanned expenditures of time, manpower and money.

GIDEP is chartered by the Joint Logistics Commanders (JLCs) and by agreement the Navy is assigned executive management of the Program. The Program Manager, located in the Office of the Assistant Secretary of Navy, Research, Development and Acquisition, Office of Acquisition Business Management [OASN(RDA)ABM], exercises overall executive authority over the planning and management of the Program.

GIDEP participating organizations includes all department of the Department of Defense, Department of Commerce, Department of Transportation, Department of Energy, Federal Aviation Administration, Defense Logistics Agency, General Administration Services, U. S. Postal Service, National Institute of Standards and Technology, and the National Aeronautics and Space Administration. The Canadian Department of Defence and the Canadian industrial contractors are members. There are also thousands of industrial partners which supply goods and services to federal, state and local governments.

Participants have electronic access to the following data:

. Engineering Data
. Failure Experience Data
. Metrology Data
. Product Information Data
. Reliability and Maintainability Data

In addition, the Urgent Data Request (UDR) is a service provided to GIDEP participants. UDRs permit participants to query to GIDEP community concerning a specific problem to determine if the scientific
HOW TO GET IT

Government-Industry Data Exchange Program....Continued

and engineering may have solutions or recommendations. UDRs are circulated electronically and may be commented on by any user of the GIDEP system. Responses and comments may be read directly on-line by the submitter or users of the GIPEP system.

Membership requirements: Membership is voluntary, unless there is a specific statement of work (SOW) in your contract. In order to obtain membership your company must have access to the World Wide Web (WWW). Your organization must be willing to share documents prepared for your customers for Internet consumption. New reports are necessary from our participants to maintain constant renewal of the database. Your representative must also coordinate and submit at least one Annual Utilization Report per year. There are no fees for participation.

Guide to Selected National Environmental Statistics in the U.S. Government

**Originator:** Office of Policy, Planning, and Evaluation
Center for Environmental Information Statistics
U.S. Environmental Protection Agency (PM-2161)
401 M Street, SW
Washington, DC 20460

**Order from:** National Center for Environmental Publications & Information (NCEPI)
PO Box 42419
Cincinnati, OH 45242

**Telephone:** Office of Policy, Planning & Evaluation (202) 260-2680
NCEPI (800) 490-9198; Fax: 513 489-8695

**Restrictions:** None

**Notes:** This Guide must be obtained from NCEPI. It contains information on selected sources of environmental statistics from U.S. government agencies. This document responds to the need to help analysts, decision makers, researchers, students, and others obtain policy-relevant environmental statistics and publications and locate experts who are knowledgeable about the data. This guide is a reference to national-level, time-series environmental statistics that are compiled and distributed by the U.S. government on a regular basis. It is a guide to statistical programs and the primary and secondary summary statistics they generate, not a guide to raw data or databases. It is not intended to supersede information that can be obtained directly from the government agencies and is not an inclusive guide to U.S. environmental statistical programs, but one to selected programs that produce frequently sought-after, national-level statistics.

Order from: Defense Technical Information Center (DTIC) (See Appendix A)

Telephone: 767-8222; DSN 427-8222
Email: hbcu@dtic.mil

Notes: The intent of the Historically Black Colleges and Universities (HBCU) program is to increase the opportunities to participate and benefit from federally funded programs. The Executive Order mandated agencies to increase the participation of Historically Black Colleges and Universities (HBCU) in Federal programs by identifying and eliminating or reducing barriers. Guided by the Office of the Secretary of Defense, Office of Small and Disadvantaged Business Utilization the Defense Technical Information provides technical services to eliminate Scientific and Technical Information (STI) barriers.

H-2
HOW TO GET IT

Historically Black Colleges and Universities Program.....Continued

The program enhances HBCU possibilities for winning DoD contracts and grants, as well as enhancing the academic environment at the undergraduate and graduate level. DTIC helps the DoD achieve these goals by providing unclassified unlimited documents at no cost, establishing networks for transferring information within the HBCU/DTIC user community, identifying HBCU R&D programs where DTIC can provide technical assistance, and promoting HBCU awareness and participation in the various potential defense contractors' programs in order to strengthen HBCU abilities to compete and perform work under DoD R&D contracts.

E-mail: INIS@iaea.org

Restrictions: INIS registration required

Notes: INIS is the world's leading information system on the peaceful uses of nuclear science and technology. It has been operational since 1970. INIS maintains a database containing over 2 million bibliographic references to nuclear literature. It also maintains a collection of full-text non-conventional (grey) literature. One hundred one countries and 17 co-operating international organizations comprise the current membership. The INIS Database published on CD-ROM has a time span of 1970 to the present. INIS Atomindex files are available as are INIS Microfiche of Non-conventional literature cited in INIS from the INIS Clearinghouse. Interested parties should view the INIS Homepage for specific details of products and availability.

Telephone: 1-800-334-3414

Restrictions: Participants must register with JECPO.
HOW TO GET IT

Joint Electronic Commerce Program.....Continued

Notes: JECPO, initially formed in January 1998, is accelerating paperless processes in all DoD business areas. The office, organized under both Defense Logistics Agency (DLA) and the Defense Information Systems Agency (DISA), brings together experts from both DoD's business and technology arenas to build a partnership in electronic commerce. The use of electronic commerce is one of the "best business practices" identified in the Defense Reform Initiative announced by Secretary William Cohen last November to streamline the management and support structure of the Department of Defense.

URL: http://www.acq.osd.mil/ec

Joint Electronic Library

Originator: Joint Warfighting Center

Order from: Joint Warfighting Center
Doctrine Division
JEL Systems Operator
Building 100 - Ingalls Road
Ft Monroe, VA 23651-5000

Telephone: DSN 680-6525

Restrictions: Some security limitations. The primary users are the representatives of the combatant commands, the Services, the Joint Staff, and the joint education community. Secondary users include other commands, agencies, and individuals requiring access for other joint and service operations and activities.

Notes: The Joint Electronic Library (JEL) provides a high speed, full-text search and retrieval capability immediately accessible through desk top computers. It is a multi-user on-line full-text search and retrieval library and electronic mail and bulletin board system. Action officers, planners, warfighters, educators, students, and doctrine developers now have immediate access to current doctrine and tactics, techniques, and procedures available. The library consists of a series of databases containing: (a) Selected joint, service and combined publications. (b) Joint terminology. (c) Military education research papers. (d) Joint education curricula.

Joint Engineering Data Management Information and Control System (JEDMICS)

Originator: Naval Supply Systems Command

Order from: PHD Naval Surface Warfare Center (NSWC)
Port Hueneme, CA
HOW TO GET IT

Joint Engineering Data Management Information.....Continued

Telephone: (805) 228-8063; E-mail: menken_richard@aphdnswc.nswses.navy.mil

Restrictions: Requires a JEDMICS workstation.

Notes: JEDMICS is a Joint Service initiative managed by the Naval Supply systems Command that digitizes the DoD drawing repository system. It is operational at the Naval Surface Warfare Center (NSWC). There are currently 36 JEDMICS installations in the Army, Navy, Air Force and DLA.

HOW TO GET IT

Joint Interest List of Technical Manuals for Departments of the Navy, Air Force, Army, Defense Logistics Agency, Marine Corps (T.O. EO-4-5)

See: Air Force Technical Orders

Joint Munitions Effectiveness Manuals (JMEM)

Originator: Director
U. S. Army National Systems Analysis Activity (ANSAA)
ATTN: AMXSY-J(JTCG/ME Control Office)
392 Hopkins Road
Aberdeen Proving Ground, MD 21005-5071

Order from: OC-ALC/TILUB
ATTN: JTCG/ME Publications Manager
7851 Arnold Street, Suite 204
Tinker Air Force Base, OK 73145-9160

Telephone: Publications Manager, Tinker AFB (405) 736-2707/5468
DSN: 336-5468/2707; Fax: (405) 736-5013; DSN: 336-5013

Complete instructions for ordering JMEM's are contained in the Joint Service Index (61JTCG/ME-1-2) which may be obtained by writing or calling the publications manager.

Forms: THDC (Technical Handbook Distribution Code) Requirements (found in 61JTG/ME-1-2)

Cost: No

Indexed in: Joint Service Index (61JTCG/ME-1-2)

Restrictions: Many of these publications are classified and their distribution is controlled by established approving agencies. They are available to Government activities and contractors having a certified need-to-know under a current contract with a DoD agency.

Notes: These publications contain non-nuclear effectiveness data for a variety of weapon systems in every branch of service. They are especially useful to commanders, staff officers, weapons designers, logisticians, analysts, planners, and may be used as texts for training purposes.

The series includes:
61A1- series - Aircraft Applications
61B1- Anti-Air
61S1- Surface to Surface Joint Technical Coordinating Group for Munitions Effectiveness

DRSAR-MA (309) 794-4313

Indexed in: DNA TP 0-1 and TP 0-1A, TP 0-1B, TP 0-1C
SWOP 0-1 and SWOP 0-1B
TM 39-0-1 and TM 39-0-1A
T.O. 0-1-11N and T.O. 0-1-11NC

Restrictions: These indexes are classified and restricted. Check with appropriate source for more information. Most JNWPS publications are classified or restricted and all are tightly controlled. They must be ordered through channels with certification of need-to-know and valid justification approved. Agencies with a need to order Army/Navy/Air Force Joint Nuclear Weapons Publications should register with the appropriate distribution center to establish the proper accounts and/or distribution codes. Contractors must order all JNWPS publications from the Field Command Defense Nuclear Agency (FCPSP) through channels, or ask their contract monitor to order for them from the appropriate source.

Notes: The JNWPS publications include the following series:
AEC-AFSWP-TP Atomic Energy Commission Armed Forces Special Weapons Project Technical Publications
AEC-DNA-TP AEC Defense Nuclear Agency Technical Publications
AEC/TIC – Atomic Energy Commission/Technical Information Center
AEC-TP Atomic Energy Commission Technical Publications
AIR FORCE T.O. – Air Force Technical Orders
ARMY TM – Army Technical Manuals
DNA-TP – Defense Nuclear Agency Technical Publications
DOE-DNA – Department of Energy – Defense Nuclear Agency

HOW TO GET IT

LD xxx xxx - Logistics Document

Originator: Defense Logistics Studies Information Exchange (DLSIE)
U. S. Army Logistics Management Center
ATTN: ATSZ-DL
Fort Lee, VA 23801-6043

Order from: Some documents are available from Defense Technical Information Center (DTIC) (See Appendix A)

Forms: DTIC Form 1 or Form 55 for limited documents (See Appendix B)

Cost: Yes

Telephone: None available as of 1 May 1998

Restrictions: Available to DoD components other Federal agencies and DoD contractors and grantees with a certified need-to-know. DoD contractors and grantees must submit each request for microfiche in writing to the DoD activity sponsoring their grant or contract requesting that the sponsoring office endorse the letter and certify their need-to-know.

Notes: DLSIE was suspended indefinitely on 13 April 1998. Formerly, some documents were sent to DTIC for secondary distribution. DTIC super-imposed an AD number on these. (See entry under AD xxx xxx.) In the past the Logistics Document (LD) Index was included in the DoD Bibliography of Logistics Studies and Related Documents and often referenced the AD numbers.

URL: http://www.usmc.mil
HOW TO GET IT

Marine Corps Doctrine Manuals

**Originator:** Commandant of the Marine Corps  
Headquarters, U. S. Marine Corps  
Washington, DC 20380-1775

**Order from:** Electronic copies of all doctrine are available full-text online.

**Notes:** Doctrine Division has significantly revised the way Marine Corps doctrine is presented. The doctrine manuals are now organized into six categories as well as three levels of content. The levels of doctrine are Marine Corps Doctrine Publications (MCDP's), Marine Corps Warfighting Publications (MCWP's), and Marine Corps Reference Publications (MCRP's). MCDP's are higher order doctrine containing the philosophical underpinnings of the Marine Corps fundamental beliefs of warfighting. They will be published as MCDP's. When promulgated, MCDP's will supersede selected FMFM's. (For example, FMFM-1, Warfighting, when revised will become MCDP-1). Publications promulgated as MCWP's will contain the tactics, techniques, and procedures utilized by the Marine Corps in the prosecution of war or other assigned missions. When promulgated, MCWP's will supersede selected FMFM's and OH's. When promulgated, MCRP's will supersede selected FMFRP's and OH's. Also, in order to make doctrine more responsive to the needs of the operating forces, Marine Corps Order 5600.49 established a system of "proponents" who will assist in the writing and revision of MCDP's, MCWP's and MCRP's.

TI - Technical Instruction
TM - Technical Manual
TM - ENG - Technical Manuals - Engineering

Determine whether your command has a Individual Activity Code (IAC). The IAC is what MCB Albany uses to mail out publications to units. Some units share these codes. If you don't have an IAC, you should contact Ms. Helen Stewart, HQMC, at DSN 224-2951 or Commercial (703) 614-2680. Ms. Stewart will advise you on how to obtain an IAC. If you do have an IAC, the Doctrine Division AO will put you on the distribution list using the IAC and you will receive copies of any manuals upon their release. If you have an IAC, you can also order the publications through MCPDs. MCPDs is a computer based distribution system run from Albany, GA. If instruction on the use of MCPDs is required, contact Ms. Diane Lewis at DSN 278-6035 or Commercial (703) 784-6035. If your unit does not have an IAC, you are from another service, or if you are a civilian, and in turn can not order publications through MCPDs, contact Ms. Jackie Bryan, HQMC, at DSN 224-1748 or Commercial (703) 614-1748. Ms. Bryan will be able to order.

Depending on unit size, the MCPDS/PL Clerk is usually found in the S-1. If it s a larger unit, they may be in the S-4. Since S-1 shops are concerned with the administrative side of operations, they may not realize that the same system that controls orders and bulletins can be used for ordering FMFM's, FMFRP's, Joint Pubs, NAVMC's Army's GTA's and FM's, Marine Corps and Army TM's etc.

All of the items stocked by Albany are ordered by using an eleven digit PCN (Publication Control Number). For example, NAVMC 2691, Marine
HOW TO GET IT

Marine Corps Publications.....Continued

Corps Drill and Ceremonies Manual can be ordered using PCN 10001337900. (Note: Any item from this system is supplied at no cost to your unit). If you do not know the specifics of a desired item, the PL system itself has a listing. You will need to utilize a microfiche listing-SL 1-2/1-3. Most MCPDS users will have that, but if they do not they should put themselves down for distribution. It comes out quarterly. SL 1-2 is a listing of technical pubs and the SL 1-3 lists everything else. (PCN 12100001000). The only thing "on paper" is MCBul 5600 "Marine Corps Doctrinal Publications Status" and should come out yearly in July. This has a complete listing of all current FMFMs, FMFRPs, and Joint Pubs, not to mention all of FMFMs, RPs under development. There have been changes within the numbering system. For instance, FMFM 10-1 "Communications" is now FMFM 3-30. The PCN for MCBul 4500 is 10208633800.

If you need to determine what is currently available, whether an item has been published yet, or help in identifying a manual you can also contact Doctrinal Division MCCDC, Quantico at DSN 278-4182 or Marine Corps University's Publications, DSN 278-2173. Neither of these sections furnish or mail publications but will assist in information on the system itself.

Militarily Critical Technologies List

Originator: Office of the Under Secretary of Defense for Acquisition and Technology Washington, DC

Order from: Defense Technical Information Center (DTIC) (See Appendix A)
Militarily Critical Technologies.....Continued

National Technical Information Service (NTIS) (See Appendix A)

Telephone: Comments: Fax: 703-931-7792; E-mail: mctl@ida.org
Orders from Government and their Contractors: 1-800-225-3842
Fax: 703-767-9070; DSN: 427-9070; E-mail: msorders@dtic.mil
General Public: NTIS-1-800-553-6847; Fax: 703-321-8547

Restrictions: Approved for public release; distribution unlimited

Notes: The Militarily Critical Technologies List (MCTL), is a detailed and
structured compendium of the technologies the Department of Defense
(DoD) assesses as critical to maintaining superior United States military
capabilities. Part I: Weapons Systems Technologies has been printed.
Part II: weapons of Mass Destruction, and Part III: Developing
Technologies are projected for late 1998.

Military Assistance Program Address Directory (MAPAD) (DoD 4000.25-8-M)

Originator: Office of the Deputy Under Secretary of Defense (Logistics)
Washington, DC

Order from: Defense Logistics Agency (DLA) (See Appendix A)
Defense Technical Information Center (DTIC) (See Appendix A)
National Technical Information Service (NTIS) (See Appendix A)

Cost: Yes

Notes: The United States program for providing military assistance under the
Foreign Assistance Act of 1961, as amended, as distinct from Economic
Aid and other program authorized by the Act; including the furnishing of
defense articles and defense services through Grant Aid or Military Sales
to eligible Allies, as specified by Congress. Foreign governments and
Commercial organizations may submit request copies of the printed
directory to their U. S. Military Service representative or to the Defense
Logistics Agency. Basic Volume was published March 1979.

Command (Cancelled)

Military Bulletin 544A - List of Specifications and Standards (Cancelled)

Military Engineering Drawings Asset Locator System (MEDALS)

Originator: Defense Logistics Information Services (DLIS)
74 Washington Avenue, N

M-15
HOW TO GET IT

Military Engineering Drawings Asset Locator.....Continued

Battle Creek, MI 49017-3084

Order from: Originator (See Appendix A for complete ordering instructions)

Telephone: Information: (616) 691-4725/4068; DSN: 932-4725/4068
Email: (information): disc-cso@disc.dla.mil
Email: (order): aradford@disc.dla.mil

Notes: MEDALS is DoD's central locator system for engineering data stored by technical data repositories throughout the DoD. An interactive system, it indicates quickly and easily where engineering drawings reside and provide with the information and ability to obtain them fast, either by phone, mail, Fax, E-mail, or Online. With MEDALS, once you have located the information you need, you can order the data and download it in a matter of seconds if it is in a digitized format.

If you have a large volume of query needs for engineering data, submit them to MEDALS in batch format directly on-line or though other multimedia (e.g. magnetic tape, cartridge, or floppy disk) and MEDALS will process your input request and return it within five working days.

The information from the Navy Engineering Drawings Asset Locator System (NEDALS) has been incorporated into this system.

Telephone: GPO (202) 512-1800. For information only: (618)-256-3534
DSN: 576-3534

Notes: GPO stock number 708-029-0000-9. The Mobility Forum, home of C.R.
Terror, the military's longest running safety feature, began as The MAC
Flyer in 1954. Since its first issue, TMF has stressed mishap prevention
in all safety disciplines in support of three commands - the Military Air
Transport Service, the Military Airlift Command, and now the Air
Mobility Command. In 1991, The MAC Flyer was combined with Airlift
magazine and became The MAC Forum. In 1992, organizational changes
brought about yet another name change, and we became The Mobility
Forum.

            NASA/RECON Plus Database

Restrictions: None

Notes: Automatic distribution of NASA-accessioned documents is available in
one or more subject categories to NASA-registered users. For more
information, call or write.

Accesion numbers containing the letter “N” indicate that the document is
publicly available. The number following this letter is the year it was
processed. For example, N(YR)-xxxx (N88-1001) was processed in 1988.

Documents of Limited Significance (DLS) are assigned accession numbers
in the 70,000 to 80,000 range. This series consists of older unclassified
documents, documents not announced for administrative reasons, or
documents of limited technical significance, which are catalogued,
indexed, subject categorized, and included in the computerized data base
but are not announced in an abstract journal. Selected documents may
be microfiched and/or abstracted. This series is identified as the N70K
series or the 7N series. Many of the reports accessioned by NASA may be
borrowed from various cooperating libraries.

Indexed in: National Academy of Sciences Annual Report
Books in Print

Restrictions: DTIC services are restricted to registered users only. Classified NAS
publications must be ordered through channels with certification of need-to-know.

Notes: NAS was established by Congressional charter to consider questions
referred to it by the Government, but it is not a government agency. Sections of the Academy represent branches of scientific research, such as
the Institute of Medicine and the National Academy of Engineering (NAE). The National Research Council (NRC) is the governing board
which administers the business of the Academy. Committees and boards are established from time to time to perform specific missions and then go
out of existence. NAS publications are similar to contractor reports. Some are available only through the originating committee or board (these
generally are in short supply); others from the sponsoring government agency (who might send them to DTIC or NTIS): and still others
(commercial trade items) from the National Academy Press.

Notes: The National Agricultural Library (NAL) is one of the three U.S. national libraries. The library is viewed nationally as the premiere world resource for agricultural information. Worldwide agricultural information is gathered from government agencies, extension services, universities, research centers, professional organizations, publishers, individuals and others. The library’s collection totals nearly 2.2 million volumes located on 48 miles of bookshelves on 14 floors. NAL has items dating back to the seventeenth century and in 75 different languages. The collection grows by about 20,000 volumes each year. Access to the NAL collection is provided through Agricultural On-Line Access (AGRICOLA), the library’s bibliographical database. AGRICOLA is available online using DIALOG and OCLC or on compact disc.

National Air Intelligence Center (NAIC)

Originator: NAIC/CC
4180 Watson Way
Wright-Patterson Air Force Base, OH 45433-5648

Telephone: (937) 257-6121; DSN: 785-6121

Restrictions: Their database (CIRC) is accessible only through the Open Source Information system (OSIS) or by direct accounts with NAIC.

Notes: NAIC was formed on October 1, 1993, with the integration of the Foreign Aerospace Science and Technology Center (FASTC) and the 480th Intelligence Group. It is the primary Department of Defense (DOD) producer of foreign aerospace intelligence. NAIC assesses current and projected foreign aerospace capabilities, develops targeting and mission planning intelligence materials, and evaluates evolving technologies of N-10
National Air Intelligence Center (NAIC).....Continued

potential adversaries. Their new 10 million record Central Information and Reference Center (CIRC) provides worldwide coverage of military science and technology topics with an emphasis on aeronautics and astronautics. NAIC's Foreign Science Library was founded in 1951 to collect open source foreign scientific and technical information it is operating as a library and reference center specializing in foreign subscriptions, book acquisitions, gray literature, and document delivery.

EPA Publication Numbering System: The EPA publications numbering system was designed in 1991 to provide easier identification, tracking and dissemination of publications. Each publication number identifies the responsible organization producing the publication, a specific office/division within the organization, an alpha descriptor of the document type, calendar year in which the publication was produced, and the sequential number identifying how many of that type of publication were produced within that particular organization during the calendar year.

Notes:
NIMA was established 1 October 1996. It incorporates the Defense
Mapping Agency, the Central Imagery Office, the Defense Dissemination
Program Office, the National Photographic Interpretation Center, and
imagery elements of the Defense Intelligence Agency, National
Reconnaissance Office, Defense Airborne Reconnaissance Office, and
Central Intelligence Agency. Its mission is to provide imagery, imagery
intelligence, and geospatial information in support of national security
objectives.

Nautical and Aeronautical Products: Sale of many of NIMA's nautical,
aeronautical, hydrographic charts and publications and Flight
Information Publication (FLIP) products is the responsibility of the
National Ocean Service (NOS). Also available from NOS are nautical
charts of coastal waterways. To purchase products contact:
NOS Distribution Branch N/CG33
National Ocean Service
6501 Lafayette Avenue

Standards Information Center: (301) 975-4040/2816; Fax: (301) 926-3696

Notes: An agency of the U. S. Department of Commerce's Technology Administration, NIST's primary mission is to promote U. S. economic growth by working with industry to develop and apply technology, measurements, and standards. It carries out this mission through a portfolio of four major programs: Measurement and Standards Laboratories; an Advanced Technology Program; a grassroots Manufacturing Extension Partnership with a network of local centers, and a quality outreach program associated with the Malcolm Baldrige National Quality Award that recognizes continuous improvements in quality management by U. S. manufacturers and service companies. NIST supports the development of voluntary industry standards. Federal Information Processing Standards (FIPS) are developed only when there are no existing voluntary standards to address Federal requirements for the interoperability of different systems, for the portability of data and for computer security. Information about Voluntary industry standards can be obtained from the American National Standards Institute (ANSI) which operates the National Standards System Network (NSSN). To access, open the NSSN World Wide Web site at: http://www.nssn.org.

Notes: NTTC is the hub of a national network linking U. S. companies with 
federal technologies. The center's free Gateway Service provides caller 
with direct contacts in the federal laboratory system. NTTC also offers 
Business Gold, a free on-line electronic bulletin board featuring: 
announcements of new federal technologies available for licensing and 
other technology transfer opportunities; latest information on federal 
agency Small Business Innovative Research (SBIR) grant solicitations; 
directory of contacts, resources and current research activities in more 
than 2000 federal laboratories and facilities; access to NTTC's 
comprehensive collection of databases to perform searches; and a message 
board to allow users to post information related to technology transfer. 
Other NTTC services include: needs assessment and evaluation studies 
related to technology commercialization; customized training courses for 
federal laboratories, business, trade, academic, state and local groups 
involved in manufacturing modernization, technology transfer and 
economic development; forums, seminars and short courses; and 
curriculum development.

1171 Howell Street
Newport, RI 02841

Telephone: (401) 841-2182
E-mail: webmaster@npt.nuwc.navy.mil

Notes: The Naval Undersea Warfare Center, Division Newport, is interested in
developing cooperative programs with industry and academia. Its goal is
to develop innovative solutions to undersea warfare issues and new
products and processes for the global marketplace. Division Newport's
Industrial Independent Research and Development Office provides
several unique opportunities for industry, academia, government
agencies, and individuals to interface and conduct business with Division
Newport; its Technology Transfer Program coordinates technology
transfer activities and serves as a point of contact for potential users of
the Division's technologies and facilities. Excellent history resource.

Indexed in:
NAVSUP 2002

Notes:
The stock number is 0910-LP-003-7600. The NAVSEA Technical Manual Identification Numbering System (TMINS) has been promulgated to initiate the implementation of a single significant numbering system for technical manuals procured by NAVSEA. The use of the single numbering system will eliminate the confusion that now results from the different numbering systems in use by the former Naval Ships and Navy Ordnance Commands. The Guide has two purposes: (1) to explain the concepts of the TMIN system and the composition of the TMINS number, and (2) to provide the necessary data for proper application of TMINS numbers. The Guide is divided into four sections: Sect. I provides the explanation of the system and the composition of the number. Sect. II presents the TMINS application data in the form of alpha-numeric codes and code groups. Sect. III summarizes by means of a definitive form, the system, equipment and project-related information necessary for proper assignment of a TMINS number. Sect. IV is an alphabetical index of subjects and commodities within the purview of the TMINS system.

Notes: This Index is available in microfiche only. Each edition supersedes and replaces the previous edition. The introduction is included on a separate microfiche with each edition and should be read before trying to locate stock numbers. It includes precise instructions on how to locate and order the forms and publications needed, and provides excellent cross-references from other series or originator numbers. It includes a list of the other distribution points for forms, and instructions for ordering some of the publications which are not available directly from Aviation Supply Office.

This index covers publications and forms issued by various Navy commands and centers and some publications from other branches of the service. All publications and forms listed are cross-referenced to a 13-digit stock number by which the materials must be ordered. Contractors should check for specific instructions shown under the entry for the publications series.

Navy Forms

See also: NAVSUP 2002, Introduction

Originator: Various commands and offices of the Department of the Navy

Order from: Naval Inventory Control Point (NAVICP) (See Appendix A)

Forms: DD Form 1348 – MILSTRIP

Cost: Yes

Telephone: (215) 697-4374 or (215) 697-2626; DSN: 442-2626

Indexed in: NAVSUP 2002

Restrictions: Contractors may not order forms from NACICP but should ask their contract monitors to order for them.

Notes: Not all Navy forms are available. Each command or activity may issue its own forms for its own use. Generally, these forms are available only from the offices which issue them. The Introduction to NAVSUP 2002
HOW TO GET IT

Navy Forms.....Continued

should be read before trying to locate stock numbers. It includes precise
instructions as to how to locate and order the forms needed, and provides
excellent cross-references from other series and originator numbers.
Contractors should check for specific instructions shown under the forms
needed, e.g., Department of Defense Forms (DD Forms). The
Introduction also includes a list of all the distribution points for forms.

Navy Historical Information

See also: U. S. Naval History Sources in the United States, 1979

Originator: Operational Archives Branch (AR)
Naval Historical Center
Bldg. 57, Washington Navy Yard
Washington, DC 20374-5060

Order from: Publication is out of print, but available for use in Navy Department
Library or other library reference collections.

Telephone: AR (202) 433-3170 or DSN 288-3170
Navy Department Library (202) 433-4131

Notes: Operational Archives Branch: This organization maintains a select group
of manuscripts, records, and historical documents that support and
provide information required by the Navy and other government
agencies. The bulk of the Branch's holdings date back to 1939 and
include:

Navy Operations, Policy and Strategy
History of Specific Commands
Officer Biographies, Oral Histories
Personal Papers
Materials relating to Women and Minorities in Navy
Navy Department Library:
Contains 170,000 volumes. Subject matter includes:
Naval History
Naval Biography
Naval Customs and Tradition
Exploration
Naval Science and Technology

HOW TO GET IT

Nondestructive Testing Information Analysis Center (NTIAC).....Continued

Cost: Yes

Telephone: General Information (512) 263-2106; Fax: (512) 263-3530

Notes: NTIAC capabilities cover the full spectrum of Nondestructive Testing (NDT), Nondestructive Evaluation (NDE), and Nondestructive Inspection (NDI), utilizing techniques and processes involving material-energy interaction phenomena to detect flaws and/or characterize materials, components, structures, or entire systems. Radiographic, holographic, acoustic, magnetic and other related phenomena are within the NTIAC scope. The use of nondestructive sensors for manufacturing and materials process control, and for intelligent or adaptive control applications, is also within the purview of NTIAC. Other information of concern to NTIAC includes economic aspects of the NDE industry, economic considerations with respect to selection of techniques and processes; industry trends in applying current NDE technologies in research and development, production, maintenance, safety monitoring, failure prevention of in-service material, and life assurance. As a national resource of NDT/NDE/NDI technology, NTIAC will provide fast reaction time to service inquiries for analysis, especially where field and military systems are involved or where potential failure or quality situations may arise. In addition to providing customized literature searches on NDT/NDE/NDI, NTIAC has a variety of state-of-the-art reports available on specialized NDE topics and copies of conference proceedings for NDE Symposia held in San Antonio since 1969. NTIAC receives guidance from the Tri-Service Nondestructive Testing Steering Committee and supports the Committee on Materials (COMAT) Working Group on NDI/E.

North American Industry Classification System (NAICS)

Order from: National Technical Information Service (NTIS) (See Appendix A) Bernan Press

N-76
HOW TO GET IT

North American Industry Classification System (NAICS).....Continued

4611 F Assembly Drive
Lanham, MD 20706-4391

Cost: Yes

Telephone: NTIS (See Appendix A)
Bernan: 1-800-865-3457; Fax: 1-800-865-3450;
E-mail: order@bernan.com

Notes: Adopted by the Office of Management and Budget in 1997, NAICS is the first-ever industry classification system for all of North America. It replaces the decades-old SIC, last updated in 1987. It includes over 350 new industries, tables showing correspondence between NAICS and SIC codes, a comprehensive index of industries and their Codes, and a directory of NAICS-involved agencies.

North Atlantic Treaty Organization (NATO) Documents

See also: Advisory Group for aerospace Research and Development (AGARD) Publications

Order from: Chief, Central U. S. Registry
3072 Army Pentagon
The Pentagon, Rm. 1B889
Washington, DC 20310-3072

Forms: Letter

Cost: No

Telephone: CUSR (703) 697-4204/6432; DSN 227-5943/6432;
Fax: (703) 693-0585; DSN 227-0585

Notes: Classified and Unclassified NATO Documents should be ordered from the Central U. S. Registry (CUSR) or from U. S. NATO Subregistries who are established to support U. S. Government elements and Contractors worldwide. Contractors requesting NATO classified documents must have a Defense Security Services (DSS) or other Agency facility clearance (FSC or Cage #), have personnel NATO-briefed, and have a NEED-TO-KNOW and/or NATO contract. Contractors must have their requests verified by their contract monitors prior to submission to a U. S. NATO Subregistry or the Central U. S. Registry, Rm. 1B889, Army Pentagon, Washington, DC 20310-3072. CUSR does not presently maintain an index of all documents published by Headquarters, NATO or in the CUSR inventory. A need-to-know, storage capability, security clearance, and NATO-briefing are required to obtain NATO classified documents. NATO documents must be ordered through U. S. NATO Registry channels. For
HOW TO GET IT

North Atlantic Treaty Organization (NATO) Documents.....Continued

requesting NATO documents, the following is essential: NATO short title (i.e. AC, MC, etc.), date, originator, and if known, classification and subject/title. CUSR is the sole U. S. Depository for NATO documents and maintains copies on microfilm of the majority of NATO documents issued by Headquarters, NATO since its establishment in 1949. CUSR will request from NATO originators any document not held by the CUSR. Contact your NATO Control Officer, Security Manager, Classified Document Custodian, Contract Monitor, DIS representative, etc. or the CUSR for information about the U. S. NATO Subregistries. Contact the CUSR for information regarding NATO documents, organizations, Registry System, etc.

North Atlantic Treaty Organization (NATO) Reports (Except AGARD)

See also: Advisory Group for Aerospace Research and Development (AGARD) Publications

Originator: North Atlantic Treaty Organization (NATO)
NATO Headquarters
B-1110
Brussels, Belgium

Order from: Classified NATO Reports must be ordered from a NATO Subregistry, such as:

Department of Defense
OSD Subregistry
Pentagon, Room 3A948
Washington, DC 20310

The Defense Technical Information Center (DTIC) is also a subregistry. Contractors must send their requests through their contract monitors (for certification of need-to-know), through their cognizant Defense Contract Administration Services Region (DCASR) offices (for certification of NATO clearances and storage capability), and to the NATO Subregistry. Unclassified NATO reports are frequently labeled NATO Furnished and are usually available to registered users from:
Defense Technical Information Center (DTIC) (See Appendix A)

Telephone: (703) 274-7633 or DSN 384-7633
Forms: Letter
Telephone: OSD Subregistry (703) 697-6395 or DSN 697-6395
NATO Liaison, Washington, DC (202) 697-6395

NTIS Army Publications Program

Order from: National Technical Information Service (NTIS) (See Appendix A)

Notes: Under an agreement with the Army, NTIS will fill orders for Army Publications. This will allow the Army to better handle its own primary distribution and let NTIS assist the general public in obtaining Army Publications in a more timely and efficient manner. Because of the active nature of the Army document inventory, many manuals are now obsolete. Others are restricted and available to the U. S. Government only. NTIS needs the Army Publication number when ordering. Army titles can be searched on the NTIS Website.

URL: http://www.ntis.gov/databases/armypub.htm

NTIS Bibliographic Database

See also: PB(yr)-xxxxxx

Originator: National Technical Information Service (NTIS)

Order from: Originator (See Appendix A)

Telephone: (703) 605-6000 or 1-800-553-6847

Notes: The database contains bibliographic citations from July 1964 to the present. It provides multidisciplinary coverage of unclassified technical reports generated by the U. S. and selected reports from some foreign governments. The subjects covered include scientific, technical and business related information in: aerospace and aeronautical engineering, agriculture and agricultural engineering, chemistry and chemical engineering, civil engineering, communication electronics and electric engineering, energy, general science and technology, information science, life sciences, mathematics, mechanical engineering, medicine, mining and metallurgy, nuclear sciences, and physics. Customers subscribing to a direct lease of the database receive updates containing the citations added for that period. An NTIS “Search Guide to the NTIS Bibliographic Database” is available.

LC (202) 707-5661

Indexed in: Summary of Technical Report of NDRC, Master Subject Index
Summary Technical Report of NDRC, Microfilm Index

Notes: OSRD has been disbanded. The basic set of Summary Technical Reports
in this series consists of 68 volumes, organized in 19 divisions, panels and
committees. There are hundreds of back-up and contractor reports which
do not appear in the Summary Technical Reports. Both the Summary
Technical Reports and the contractor reports are available from several
sources. The National Archives and Records Service seems to have a
complete set, but the paper copy and microfilm reproductions from NARS
are expensive. Until 1962, the OSRD/NDRC reports sent from DTIC to
NTIS automatically were forwarded to the Library of Congress. After
that date, reports received from DTIC were retained at NTIS. Therefore,
an incomplete set (some in hard copy, some in microform) can be found at
LC, and some volumes, such as the Catalog of OSRD Reports, Division 6,
Sub-Surface Warfare (AD 621 339) are available from DTIC for registered
users and NTIS. The following abbreviations refer to Panels and
Committees of NDRC:

AMP – Applied Mathematics Panel
APP – Applied Psychology Panel
CP – Committee on Propagation
TD – Tropical Deterioration Committee

Official Gazette of the United States Patent and Trademark Office.....Continued

Telephone: 202-512-1800

Notes: The Official Gazette of the United States Patent and Trademark Office is the official journal relating to patents and trademarks. It has been published weekly since January 1872 (replacing the old "Patent Office Reports"), and is now issued each Tuesday in two parts, one describing patents and the other trademarks. It contains a claim and a selected figure of the drawings of each patent granted on that day; notices of patent and trademark lawsuits; indexes of patents and patentees; list of patents available for license or sale; a list of Patent and Trademark Depository Libraries (PTDLs); and much general information such as orders, notices, changes in rules, changes in classification, etc. The Official Gazette is sold on subscription and by single copies.

Notes: Many OT&E reports are classified, and most are limited distribution. Requests for release of specific reports should be addressed to the originator via DTIC using a DTIC Form 55. DTIC will obtain the necessary release authorization and will supply the reports to the requester. OT&E Reports are information derived from Air Force or multiservice testing of major weapons and other systems as part of the overall acquisition process and are updated continuously. OT&E includes the following:

Initial Operational Test and Evaluation (IOT&E)
Follow-on Operational Test and Evaluation (FOT&E)
Multiservice Test and Evaluation (MST&E)
Operational Assessments (OA)
Operational Utility Evaluations (OUE)
Qualification Operational Test and Evaluation (QOT&E)
Also information on the mission and history of the Air Force Operational Test and Evaluation Center (AFOTEC, formerly AFTEC)

For assistance in locating information, call the phone number shown above, or write to AFOTEC/HO, AD500, Gibson Blvd. SE, Kirtland AFB, NM 87117-5558. The Army, Navy, and Marine Corps have their own operational testing agencies.

Restrictions: Should be ordered through channels. Certification of need-to-know is required for requests for classified publications. Contractors may order from either source. Justification and need-to-know must be certified by NAVSEA Security (Code 09B).

Notes: In 1959, the Bureau of Ordnance (Navy) became the Bureau of Naval Weapons and the designation for this series was changed to WD. In 1966, the Bureau of Naval Weapons split into the Naval Ordnance Systems Command (now Naval Sea Systems Command) and the Naval Air Systems Command. Naval Sea Systems Command retained the WD-designation for its series. Naval Air Systems Command retained the WD-designation for some publications in the series, but as they are being revised they are reissued in the AR-series. As of 1980 NAVSEA dropped the WD-designation and reverting to the OD-designation for the series.

Notes:  The Range Commanders Council (RCC), formerly the InterRange
Instrumentation Group (IRIG), is an unchartered tri-service organization
created to address common problems faced by the member ranges.
Numerous working groups publish standards and documents pertaining
to technical disciplines such as telemetry, optics, meteorology, range
safety, electronic trajectory, and telecommunications and timing.
Document numbers consist of five digits. First three identify the
document and last two indicate year published.

Notes:      SURVIAC is the DoD focal point for non-nuclear survivability and
            vulnerability data, information, methodologies, models and analysis
            relating to U. S. and foreign aeronautical and surface systems.
            SURVIAC's scope covers the survivability of friendly systems to threat
            weapons and the effectiveness of U. S. weapons against foreign systems.

S-24
HOW TO GET IT

Survivability/Vulnerability Information Analysis Center (SURVIAC)....Continued

Nonuclear weapons include conventional missiles and guns, directed energy weapons, and chemical/biological weapons. Data holdings in the weapons area include, as applicable, acquisition, detection, tracking, launch, fly-out and fuzing characteristics, the countermeasures and counter-countermeasures employed, and terminal effects.

Weapon systems include fixed- and rotary-winged aircraft, both manned and unmanned, missiles, tanks, trucks, armored personnel carriers, artillery, etc. Data holdings for systems include physical and functional characteristics; design, performance and operational information; acoustics, infrared, optical, electro-optical and radar signatures; combat damage and repair, and system, subsystem, and component probability.

SURVIAC is sponsored by the Joint Logistics Commanders' Joint Technical Coordination Groups on Aircraft Survivability (JTCG/AS) and Munitions Effectiveness (JTCG/ME). SURVIAC was established December 21, 1984.

Technical Data Package Material Information System (TDPMIS)

Originator: National Technical Information Service (NTIS)
Order from: Originator (See Appendix A)
Cost: Yes
Telephone: 1-800-553-6847
Restrictions: Online subscription service only.
Notes: TDPMIS provides access to drawings, technical standards and military standards related to procurements to allow contractors, suppliers, and manufacturers, and government agencies to obtain the DoD technical documents referenced in DoD solicitations. It uses active DoD solicitations, or Requests for Quotations to identify the technical data components that comprise a bid-set. The solicitations for which the packages are available are related to supply item procurements of $1000,000 or less. This online service is a cooperative effort by NTIS and the Department of Defense.

Order from: U. S. Air Force Historical Research Agency
600 Chenault Circle
Maxwell AFB, AL 36112-6424

Cost: Yes

Telephone: Customer Service: (334) 953-5834; DSN 493-5834; Fax: (334) 953-7428
E-mail: afhranews1%rs%afhra@max1.au.af.mil

Notes: The USAF Historical Research Agency, co-located with the Air University Library at Maxwell Air Force Base, is a principal repository for Air Force historical documents. The Agency's holdings, exceeding 60 million pages, represent the largest and most valuable specialized collection of historical documents on U. S. military aviation in the world. Materials range from the use of balloons in the Civil War through the record of Air Force activities in World War II, Korea, Vietnam, Operations DESERT SHIELD/DESERT STORM and the Balkan Air Campaign. About three-fourths of the documents are U. S. Air Force unit histories submitted from 1942 to the present. Special collections, some dating from the early 1900's, complement the unit histories. Among them are historical monographs and studies written by Air Force historians; more than 2,000 oral history interviews; end-of-tour reports of major overseas commanders; course materials of the Air Corps Tactical School from the 1930's; and working papers of key Army Air Forces staff offices, the British Air Ministry, and German air force during World War II. More than 500 collections of personal papers of key, retired Air Force civilian and military officials are also available to researchers. Additionally, 16mm microfilm copies of unclassified materials in the collection can be purchased by special order. Except for documents that are classified or otherwise restricted, the collection is open to the public, and visitors are welcome. Operating hours are 0830-1600, Monday - Friday.

U. S. Strategic Bombing Survey (USSBS) Publications

Originator: U. S. Strategic Bombing Survey (USSBS), which has been disbanded

Order from: National Archives and Records Administration (NARA)
8601 Adelphi Road
College Park, MD 20740

Forms: Letter

Cost: Yes

Telephone: (301) 713-6645

Indexed in: Index to Records of the U. S. Strategic Bombing Survey (TR-48)

Restrictions: All USSBS records have been declassified and are available to the public.

Notes: This was a survey of the impact of strategic bombing on Germany and Japan and the effect of the atom bomb, naval bombardment, and use of Allied photographic intelligence in the Pacific War Theater. Records of the USSBS at NARA are designated as Record Group 243. This includes the 325 final reports and appendixes issued between 1945 and 1947. These are available on 25 reels of microfilm and cost $20 per reel. (A free descriptive pamphlet (M 1013) lists the contents of each reel.) Supporting documentation, such as other reports, source materials, working papers,
HOW TO GET IT

U. S. Strategic Bombing Survey (USSBS) Publications...Continued

and drafts are included in Record Group 243 and are available in paper
 copy facsimile at a per page cost. (Overseas requesters should add 4
 percent for microforms and 18 percent for paper copy facsimile. Materials
 are sent by air mail.) Approximately 15 of the final reports also are
 available from DTIC and NTIS, including the index (AD 491 563).

U. S. Transportation Command (USTRANSCOM)

Originator: U. S. Transportation Command
508 Scott Drive
Scott AFB, IL 62225-5357

Order from: Originator

Cost: No

Telephone: (618) 256-4828; DSN 576-4828
E-mail: hunterdl@transcom.safb.af.mil

Notes: USTRANSCOM provides a defense transportation system capable of
meeting the nation's needs in peace and in war by ensuring timely, global
mobility with integrated transportation from origin to destination. It is a
unified command comprising all forces assigned for the accomplishment
of global air, land, and sea transportation. It has three transportation
component commands (TCC): Air Mobility Command (AMC) is the Air
Force component; Military Sealift Command (MSC) is the Navy
component; and Military Traffic Management Command (MTMC) is the
Army component. All of its publications are available on the Website and
by contacting Danita Hunter at the provided numbers.

Telephone: (703) 325-3733; DSN 335-3733; Fax: (703) 325 6374; DSN 335-6374

Notes: Support includes the following programs:
The Defense Sciences (DRS) Program is the long standing core research program of the Department of Defense. DRS is the largest single source of DoD research funding for universities.
The University Research Initiative: The goal of this program is to strengthen the capabilities of the nation's universities to perform multidisciplinary research; educate scientific and engineering personnel, and enhance new technologies critical to a strong U. S. Defense economy.
The University Research Initiative (URI) is one of the many DoD university programs supported by the Defense Technical Information Center. The URI Program is funded by the Office of the Secretary of Defense. It is designed to improve the quality of research performed at universities to meet Defense needs; provide expanded opportunities for interaction between universities and the DoD research community; and support fellowships and traineeships in science and engineering disciplines important to national defense.
For more information regarding participation in the University Research Support Program, contact Keith Thompson via e-mail: kthompson@dtic.mil

X

X(YR)-xxxxx – NASA Accession Number for Classified or Limited Reports

See also: NASA Center for AeroSpace Information (CASI)

Originator: Various NASA offices, government agencies, and industrial organizations publishing limited distribution reports of interest to the aerospace community.

Order from: NASA Center for AeroSpace Information (NASA CASI)
7121 Standard Drive
Hanover, MD 21076-1320

Forms: NASA Order Blank (Form 492)

Telephone: NASA CASI
Document Requests - (301) 621-0390 or (410) 712-0272
Registration (301) 621-0153 or (410) 859-5300 ext. 153
Fax: 301-621-0134; E-mail: help@sti.nasa.gov

Restrictions: Available to NASA registered users only. Call or write for further information.

Notes: Accession numbers containing the letter "X" indicate that the document is security classified or has limited distribution. The number following this letter indicates the year the document was processed. For example, X88-10001 was processed in 1988. NASA-supported documents with distribution limitations are announced in the X10,000 series and generally carry an accession number of X(YR)-10001 and up.

Documents of Limited Significance-Limited Distribution (DLSLD) are assigned accession numbers in the 70,000 to 79,000 range. This series consists of current non-NASA documents that are security classified or have administrative limitations or both. They are cataloged, indexed, subject categorized, and entered into the computerized database, but are not announced in an abstract journal. Selected documents may be microfiched and/or abstracted. This series is identified as the X70K series or the 7X series.

X70K Series

See: X(YR)-xxxxx
Directives, Instructions and Publications for DoD
*NOTE: Pursuant to the Secretary of Defense Reform Initiative, unclassified DoD issuances will not be printed for hardcopy distribution after 1 July 1998. Online ordering NTIS OrderNow® is a free service which allows you to locate and order online the most recently added products in the NTIS collection. OrderNow provides both secure and standard ordering options for order charged to a credit card or and NTIS Deposit Account. NTIS accepts payment by credit card, check or money order, or charged to an NTIS Deposit Account. We can also bill your organization for an additional fee. A Money Order Payable to NTIS in U. S. dollars drawn on: a U. S. bank; an international bank with a U.S address on the check; or a Canadian bank.

Note: Orders shipped to international destinations are subject to international prices. Airmail Fees Canada and Mexico add $4 per item. Other countries add $8 per item. NTIS Handling Fee Effective April 6, 1998, the handling fee is $5 per total order for delivery to any location in the United States, Canada, or Mexico. Orders outside of North America carry a handling fee of $10 per total order. Handling Fee does not apply to RU. S.H Service, SRIM, Subscriptions, and orders picked up at the NTIS Bookstore in Springfield, VA. Documents downloaded directly from FedWorld are exempt while all other documents ordered from FedWorld or the NTIS Web site are subject to the handling fee. Additional Information Ongoing Subscription Service Provides revisions and/or updates on a continuous but irregular basis. To begin Ongoing Subscription Service, please submit your request in writing. Include your NTIS deposit account number, payment to establish an NTIS Deposit Account, or authorization to charge a major credit card.

Ordering Through Online Services: You can order NTIS products online through DATA-STAR (Dialog Corporation), DIALOG, OCLC, and STN International/CAS. Inquiries should be addressed to: DATA-STAR (Dialog Corporation): 1-800-221-7754 DIALOG: 1-800-334-2564 OCLC: 1-800-848-5800 STN International/CAS: 1-800-848-6533 STN International/CAS in Ohio: 1-800-848-6538 Questions About a Product or an Order info@ntis.fedworld.gov.

If you are interested in distributing the database via your host system, please contact NTIS Office of Product Management (703)605-6615 or by fax at (703) 487-4134.

IMPORTANT INFORMATION ABOUT YOUR NTIS DEPOSIT ACCOUNT(S)

BY REGISTERING YOUR DEPOSIT ACCOUNT NUMBER(S) WITH THE DEFENSE TECHNICAL INFORMATION CENTER (DTIC), YOU CAN PREVENT DELAYS WHEN ORDERING REPORTS. ALL ESTABLISHED DEPOSIT ACCOUNTS MUST BE ON FILE WITH DTIC BEFORE ORDERS CAN BE PROCESSED.

INSTRUCTIONS

Complete all items below. Print or type your address exactly as it appears on your DD Form 1540, Registration for Scientific and Technical Information Services. Fold this card so DTIC's address appears on the outside, affix your return address and postage, staple once along bottom edge, and return to DTIC.

**PREVIOUS EDITIONS MAY BE USED UNTIL STOCK IS EXHAUSTED.**
INSTRUCTIONS

A. DTIC REQUESTER  (Complete Sections I and II)

1. Complete User Routing block, if desired, for your internal control purposes.

2. Contractors and Grantees must identify in Section I their government sponsor including an appropriate individual's name and telephone number.

3. Indicate type of copy and quantity requested in Section I. Microfiche will be supplied whenever possible if "Microform" is selected.

4. Indicate method of payment in Section I, either as a charge to your NTIS deposit account, credit card or as a bill to your organization from NTIS. DTIC will not accept any form of prepayment with this request. (Service charge will be made only for documents approved for release.)

5. Requesting official must sign.

6. Enter the AD Number you are requesting in Section III. Enter bibliographic information about the document.

7. Explain in detail your requirement for the document. Include appropriate contract information and explain need-to-know, in Section III.

8. If classified information must be included, CLASSIFY THIS FORM ACCORDINGLY.

10. Do not include payment or order cards with this request. Retain a copy for your record and forward the original to:

    DEFENSE TECHNICAL INFORMATION CENTER
    ATTN: DTIC-BCS
    8725 JOHN J. KINGMAN ROAD, SUITE 0944
    FT. BELVOIR, VA 22060-6218

B. RELEASING AGENCY  (Complete Section IV)

1. Review the request. Contractor or Government, and sponsor is included in Section I for your use, if necessary.

2. If the request information is proprietary data developed under SBIR contract, it can not be released outside the U.S. Government for a period of five years after acceptance of the last contract deliverable item without the written permission of the contractor (DFARS clause 252.227-7018).

3. If approved for all DTIC users, check the appropriate block, type name and title, sign and enter date in Section IV.

   NOTE: When this block is checked the existing distribution limitation assigned to the report is retained, but you are giving DTIC the authority to release your limited document to all registered DTIC users who are cleared for the security level and subject area of the document.

4. If disapproved, check disapproval block, type name and title, sign, enter date and explain reason for disapproval in Section IV. Retain copy and return original copy to DTIC.

5. As directed by USD(A&T)ODDR&E(AT), DoD releasing agencies should:

   a. Complete this form and return it to DTIC within 15 days.

   b. Reexamine the need for a limited distribution statement on this document and, if possible, authorize its removal. To document this review, a memorandum indicating that the limitation statement can be removed or explaining why it cannot be removed should also be sent to DTIC.

INSTRUCTIONS

A. DTIC REQUESTER (Complete Sections I and II)

1. Complete User Routing block, if desired, for your internal control purposes.

2. Indicate type of copy and quantity requested in Section I. Microfiche for limited documents cannot be sanitized & therefore requests cannot be filled.

3. Indicate your NTIS deposit account number. DTIC will not accept any form of prepayment with this request.

4. Requesting official must sign.

5. Enter AD Number you are requesting in Section II. Enter bibliographic information about the document in Section III.

6. Explain in detail your requirement for the document in Section III.

7. If classified information must be included, CLASSIFY THIS FORM ACCORDINGLY.

8. Complete the Releasing Agency/Foreign Disclosure Authority (FDA) block.

9. Do not include payment or order cards with this request. Retain a copy for your record and forward the original to:

   DEFENSE TECHNICAL INFORMATION CENTER
   ATTN: DTIC-BCS
   8725 JOHN J. KINGMAN ROAD, SUITE 0944
   FT. BELVOIR, VA 22060-6218

B. RELEASING AGENCY/FDA (Complete Section IV)

1. Review the request.

2. Check the appropriate block, type name, title, sign and enter date in Section IV. Retain a copy and return the original copy to DTIC.

3. If also released under a specific information or data exchange agreement between the United States and the Embassy (such as the Technical Cooperation Program (TTCP)), check the block and identify the implementing agreement.

4. As directed by USD(A&T)ODDR&E(AT), DoD Releasing Agency/FDA should:
   a. Complete this form and return it to DTIC within 30 days.
   b. Reexamine the need for a limited distribution statement on this document and, if possible, authorize its removal. To document this review, a memorandum indicating that the limitation statement can be removed.
**INSTRUCTION:** Complete appropriate blocks and forward the original to the attention of DTIC-BCS. Quantities requested should provide for three months supply.

Thank you for your interest in U.S. Government Information

Advance payment is required. Prices are subject to change. Current prices and stock availability can be obtained by calling (202) 512-1800. Please allow 4 weeks for domestic delivery of publications. Delivery of subscription issues varies according to the frequency of issue (i.e., daily, monthly, semi-annually, etc.) Please see the reverse side of this form for additional ordering information.

Please return order form with payment.
GENERAL ORDERING INFORMATION

To help us answer any questions we may have about your order, please include your daytime telephone number.

To ensure prompt and accurate service, please be sure to include payment with all orders.

Please allow four weeks for delivery. If an item is missing from your order, we may have shipped it separately. Please wait one to two weeks after receiving your first shipment before contacting us to report missing merchandise.

All sales are final; however, we accept returns on merchandise received incorrectly or damaged. Customers must obtain authorization in advance, from our service areas, before the return of merchandise.

When you are unsure of the title or do not know the stock number or List ID of merchandise, just call and ask our telephone agents on:

(202) 512-1800

Price Quote Identifier – We give customers a seven character alphanumeric in response to customer requests for a price quote. This identifier guarantees the customer the quoted price of an item for 90 days. If you have received a price quote from us, please include the identifier on the front of this order form.

Units of Issue – When ordering items sold in packs, pads, kits, or sets, specify only the number of complete units you desire.

EA Single copies
PK Package of multiple copies
PD Pad of multiple sheets
KT Kit of multiple items
SE set of multiple items

ORDER BY PHONE

For fast service, please call us on:

(202) 512-1800

and charge your order using your VISA, MasterCard, or GPO Deposit Account. Our telephone agents are ready to receive your phone orders from 8:00 a.m. to 4:30 p.m. eastern time, Monday through Friday. Please have your GPO stock number or List ID, credit card number and expiration date or deposit account number handy. You may use this order form to organize your order before calling.

ORDER BY FAX

Fax your order to us 24 hours a day. Simply dial:

(202) 512-2250

To expedite your order, please provide both your phone and fax numbers, credit card number and expiration date or GPO Deposit Account number.

ORDER BY MAIL

Complete the order form on the reverse side, and include payment. In the event we need to contact you, please provide your day time phone number. Send mail orders to the following address:

Superintendent of Documents
P.O. Box 371954
Pittsburgh, PA 15250-7954

METHODS OF PAYMENT

We require pre-payment for all orders. We accept VISA and MasterCard, SuDocs Deposit Account, check or money order made payable to the Superintendent of Documents. Please do not send cash. Sorry, we cannot accept C.O.D. orders. Payments from foreign countries must be by international money order, or by checks drawn from a United States bank written in U.S. Dollars.

Deposit Accounts — We offer and maintain prepaid accounts for the convenience of customers having a continuing need to order Government information as easily as possible. A Deposit Account can be established upon receipt of a written request and an initial deposit of $50.00 or more. Please address requests to:

Superintendent of Document
Attn: Deposit Account Unit
Stop: SSOR
Washington, D.C. 20402

For additional Deposit Account information, contact us on:

(202) 512-1800

% DISCOUNTS

Except for items marked “no discount allowed,” any customer ordering 100 or more copies of a single title for delivery to a single destination will receive a 25% discount. We apply this discount to the domestic price of the item.

Except for items marked “no discount allowed,” designated book dealers and educational institution bookstores are also authorized a 25% discount, with no minimum quantity when we deliver the item to the normal place of business. We apply this discount to the domestic price of the item.

EXPRESS DELIVERY

To receive your order faster, phone us on (202) 512-1800 for details on express delivery.

SHIPPING ABROAD

Our prices include regular domestic postage and handling. Please add 25 percent on international orders to accommodate extra handling charges and fees. Duties and value-added taxes may be required and are the responsibility of the customer. Phone us for details on international shipping or send a Telex to 710-822-9413; ANSWERBACK USGPO WSH.

QUESTIONS ABOUT YOUR ORDER?

For publication service inquiries —
call our Publications Service Section on:

(202) 512-1803

or mail to the Superintendent of Documents, Publication Service Section, Stop SSOS Washington, D.C. 20402.

For subscription service inquiries —
call our Subscription Service Section on:

(202) 512-1806

or mail to the Superintendent of Documents, Subscription Service Section, Stop SSOM, Washington, D.C. 20402.

If you are ordering a subscription, you will receive an acknowledgment card once your order is processed. Please retain this card for future reference. Receipt of your first subscription issue depends on the frequency and type of subscription service you have ordered.

Notes: Home Page in English; links to German text

URL: http://www.unibw-muenchen.de

Originator: Von Karmann Inst. For Fluid Dynamics
72, Chaussee de Waterloo
1640 Rhode-Saint-Genese Belgium

Notes: Provides training and research in aerodynamics (open to engineering & scientists of NATO countries). Recent publications can be downloaded; others available upon request.

URL: http://www.vki.ac.be

Appendix C-7
NOTE: TopicLinks is a gateway to scientific and technical information Web sites primarily from the US Government. The main list topics are based upon Defense Technical Information Center's (DTIC) Field and Group Structure. Under each topic you will find links that can lead you to online publications, databases and Web sites with reliable government information. The sites assist and direct you to other locations and sources of information on that topic available on the internet.

DTIC has identified 25 broad subject fields and 251 groups to categorize the areas of scientific and technical interest. These fields and groups provide the structure for grouping the technical reports in DTIC's collections and are listed below:
