The DISA Strategy

Surety
Reach
Speed

How do we enable warfighters at Internet speed?

We will increase the delivery speed of capabilities and services
The Five Foundations

- **Sharing and defense of information** – enable sharing of information while staunchly protecting it

- **Speed** – deliver IT capabilities and services faster

- **Power to the edge** – extend enterprise services to the edge

- **Operational excellence** – accelerate operational effectiveness and efficiency

- **Financial transparency** – customers know and understand the value and costs of DISA capabilities and services

Increasingly mobile and collaborative

Create value — and balance — and speed

The value of what is compared to the value of what can be
Changing our Approaches

We want to achieve…

- Speed
- Mobility
- Agility
- Availability
- Elasticity

With…

- Relationships
- Partnerships
- Non-traditional sources

Through…

- Innovation
- Ingenuity

Using smart sourcing…

- The need for managed services
- The right mix of time and materials and performance-based contracts
- The right mix of resources
