Report Documentation Page

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

(DSN 444)
First, the Reverse Distribution (RD) contractor removes the expired pharmaceutical items from the Military Treatment Facility (MTF), returns them to the RD warehouse, and sorts them by manufacturer.

Each pharmaceutical manufacturer’s policy determines disposition.

Reverse Distribution contractor maintains the contractual fee for their service (between 5% and 9.5% depending on type of material and CONUS/OCONUS location). Balance (90.5% - 95% of ARV credit) forwarded to MTF’s Prime Vendor.

For creditable product, Manufacturer reimburses the RD the Actual Return Value (ARV) of the returned product.

Non-returnable: Controlled destruction by RD through a high temperature incinerator.

Last, the Prime Vendor issues a credit to the MTF’s credit account to be used for future pharmaceutical purchases.

Medical Supply Chain POC is Vince Valinotti
