FOREWORD

When the six-volume annotated bibliography on immunofluorescence was published, we assumed that each volume of citations, arranged by subject matter and including an author index, would be used independently. However, many readers have requested a seventh volume indexing the other six by subject and by author. This Supplement is published in response to those requests.

Both indexes are arranged in three columns. The first lists the author or the subject. The second column indicates the pertinent volume (I through VI). The third column shows the pertinent citation, by accession number, in the indicated volume.

The original six volumes were arranged by general subject field as follows:

- I. Bacterial Studies
- II. Viral Studies
- III. Studies of Fungi, Metazoa, Protozoa, and Rickettsiae
- IV. Studies of Animal Physiology
- V. Diagnostic Applications and Review Articles
- VI. Technical Procedures

ABSTRACT

This supplement to the six-volume series of annotated bibliographies provides a ready reference, arranged alphabetically, to all authors cited in the six volumes. It identifies senior authors and indicates precise location for each of the 1,895 citations in the series.

In addition, a general subject index is included. It is arranged alphabetically, by subject, and indicates the volume and citation numbers for each of 65 general subjects with their associated sub-subjects.

SUBJECT INDEX*

| | | | | | |
|------------------------|----|-------------|-----------------------|-----|-------------|
| Actinomycetales | I | 10 - 110 | Diagnosis, | | |
| procedures | VI | 1700 | miscellaneous | | |
| Adenovirus | II | 1070 - 1140 | applications | V | 3020 - 3060 |
| procedures | VI | 2430 - 2470 | reviews | V | 390 - 640 |
| Antibody in situ | IV | 2320 - 2440 | specific | | |
| Antigen-antibody | | | applications | V | 860 - 3060 |

| 13. ABSTRACT This supplement to the six-volume series of annotated bibliographies provides a ready reference, arranged alphabetically, to all authors cited in the six volumes. It identifies senior authors and indicates precise location for each of the 1,895 citations in the series. In addition, a general subject index is included. It is arranged alphabetically, by subject, and indicates the volume and citation numbers for each of 65 general subjects with their associated sub-subjects. ← | | |
