FOREWORD

The federation, in July, 1967, of Case Institute of Technology
with Western Reserve University, has made possible a broadening and
deepening of resources available to the School of Library Science.
Some indication of these changes begins to appear in the Bibliography
of the Center for Documentation and Communication Research. An indica-
tion appears also of our increasing concern with the principles and
philosophy underlying a program in library and information science;
particular attention is directed to the last section of the Bibliography.

This Bibliography, revised in October, 1967, represents a selec-
tion of the variety of papers and reports contributed to the field
since 1964 by the staff of the Center. As previously, earlier lists
have been revised in order to restrict the Bibliography to current
items, except when they have been retained to preserve a series. Re-
quests for reprints, where these are available, may be directed to
Edward Verhosek, Administrative Assistant of the Center. Stocks of some
are limited or exhausted, however, and the fact of listing does not in-
sure availability of any item.
