## SUMMARY

AUTHOR: Shuichi Miyasaki, LTC, JAGC  
TITLE: Case Study of the Army ROTC Core Curriculum and  
its Implementation in the 70's  
FORMAT: Essay

The purpose of this essay is to examine the development of the Army ROTC Core Curriculum (hereinafter sometimes referred to as "core curriculum", "new core curriculum" or "core curriculum program") and its implementation at the University of Hawaii which has ~~suffered~~ its share of anti-military sentiments. Data was principally obtained from search of laws, governmental regulations, publications and reports, newspapers, periodicals, and personal interviews with the Professor of Military Science of Army ROTC at the University of Hawaii. The principal conclusion is that the implementation of the core curriculum at the University of Hawaii which includes 120 hours of military instruction in excess of the minimum authorized by the Continental Army Command (hereinafter referred to as "CONARC") has been successfully integrated into a student's academic program without loss of graduates. A further conclusion is that the core curriculum can be implemented at the University of Hawaii with substantially more individualized tailoring by providing an optional program which allows students to take any number of acceptable military subjects consisting of not less than 210 hours of military instruction.

A CASE STUDY OF THE ARMY ROTC CORE CURRICULUM  
AND ITS IMPLEMENTATION IN THE 70'S

Introduction

A number of articles have been written on the significance and necessity of the Army ROTC program in our military-civilian complex.<sup>1</sup> The constantly changing political, economical, sociological, and technological scenes continue to make a heavy demand upon ROTC graduates for our national security.<sup>2</sup> With the advent of the volunteer Army concept, retention of the Army ROTC program on the university and college campuses throughout the United States becomes most critical to dispel any fear that our Army will disrupt the tradition of civilian over military authority in this country. The essence of a military-civilian partnership requires military professionalism to be developed within a sound civilian oriented educational framework which is meaningful and real in the main

<sup>2</sup>General Westmoreland, the immediate past Chief of Staff of the US Army has on numerous occasions stated with reference to the ROTC program that "It's essential for national security . . . No other officer procurement program exceeds ROTC in quantity and quality." "Westmoreland Comes to the Defense of ROTC," The Washington Post, 21 February 1969, p. A-26; He subsequently on 21 September 1971 reiterated the fact that the ROTC program contributes about eighty per cent of the junior officers getting into active duty status each year. General Westmoreland, address at Hardin Simmons University (21 September 1971), Speech File Service, No. 9 (October 1971) p. 1. Also see "Asst. Secretary Sees ROTC Continuing as Primary Officer Source," The Officer, December 1970, p. 28.

stream of the American way of life.<sup>3</sup> Development of the core curriculum for tailoring into a student's baccalaureate degree program was a positive thrust for military professionalism in a changing society.<sup>4</sup>

It is the significance of the Army ROTC program for our national security that prompted this case study at the University of Hawaii (hereinafter sometimes referred to as "University") which has experienced the following events<sup>5</sup> since 1970:

- On 6 May 1970, the Faculty Senate voted to exclude from the faculty all ROTC instructors and deny academic credit to military courses taught by the ROTC staff.

- In February 1971, there was a burning of an ROTC supply building.

- On 1 March 1971, the President of the University indicated that the senior commissioned officer with ROTC on campus will have a rank comparable to the academic rank held by other faculty of professional status.

- On 10 May 1972, the Faculty Senate of the University by

<sup>5</sup>Interview with David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii, 24 November 1972.

vote of 33 in favor and 15 opposing disapproved academic credit for Army ROTC courses.

- On 16 May 1972, the Chancellor of the University overrode the Faculty Senate's disapproval of academic credit for Army ROTC courses on the condition that there were troublesome areas that needed clarification and concluded that the ROTC courses as recommended by the ROTC Committee during school year 1972-73 be continued with credit.

- On 18 May 1972, the President of the University upheld the Chancellor's position.

- The Army ROTC curriculum is now being readied for submission to the University's Program and Curriculum Planning Committee for retention of academic credit.

#### ACADEMIC RECOGNITION<sup>6</sup> AND THE CORE CURRICULUM

The topic of awarding academic credit for Army ROTC courses is not a new one. As far back as 1958, the Army ROTC program in many of our engineering schools faced the exclusion of its academic credit toward a degree in order to maintain accreditation of their engineering curriculum.<sup>7</sup> The Army's policy on academic credit is governed by the following:

---

<sup>6</sup>The phrase "Academic Recognition" is used to include academic freedom and academic credit.

<sup>7</sup>Headquarters, Department of the Army, Office of the Chief of Engineers, Credit for Advanced ROTC, (26 February 1959).

- a. Each institution controls its curricula, the faculty playing a major role . . . b. It is not possible to qualify the amount of credit that is appropriate for purely military subjects; however, host institutions will be encouraged to award the maximum number of credits toward graduation . . .
- c. Institutions should weigh academic credit for ROTC in the same manner and to the same extent that is weighed for all other courses in the institution's curricular.<sup>8</sup>

The academician's current position was stated in 1966 by the joint action of the American Association of University Professors, The American Council on Education, and the Association of Governing Boards of Universities and Colleges, as follows:

. . . the faculty has "primary responsibility" with respect to curriculum, subject matter and methods of instruction, research, faculty status, and those elements of student life which relate to the educational process. The faculty determines the requirements for the degree offered in course and decides when and how these degree requirements have been met. The faculty has primary responsibility with respect to academic appointments, reappointments, decision not to appoint, promotions, the granting of tenure, and dismissals. This responsibility derives from the circumstances that scholars in a particular field have the chief competence for making such judgments.<sup>9</sup>

Since 1969, 15 academically outstanding universities have removed or restricted academic credit to university faculty taught

<sup>9</sup>David Fellman, "The Academic Community: Who Decides What?" in Whose Goals for American Higher Education? ed. by Charles G. Dobbins and Calvin B. T. Lee (Washington: American Council of Education, 1968), p. 110.

courses.<sup>10</sup> This writer believes that such denial of academic credit is a resultant of the political emotionalism and frustration against the Vietnam conflict by those students and academicians who express academic freedom for themselves and yet denounce the same fundamental option to those who seek a military education on the very same campus. Under the guise of an academic decision, a political controversy has resulted in the ROTC academic credit being withdrawn. The significance of the military establishment to US foreign policy in our complex world should be sufficient reason for those who profess academic freedom to accommodate a civilian-military educational partnership.<sup>11</sup>

The proper course for the academicians to pursue is the normal academic process of evaluating all courses for academic credit on a uniform basis. A uniform and non-discriminatory standard of awarding academic credit should result in academic recognition of military subjects at the University strictly on the basis of other courses presently being accorded such privilege.<sup>12</sup> Furthermore, it is the

<sup>11</sup>See Richard M. Nixon, President of the United States, A Report To The Congress On US Foreign Policy For The 1970's, (9 February 1972), pp. 154-167.

<sup>12</sup>See Appendix I, selected pages from the University of Hawaii Schedule of Courses--Fall Semester 1972-73 with courses marked with an asterisk (\*) in the fields of library science, architecture, art, communication, drama and theatre, geography, music, survival plus, travel industry management, education, industrial education, health and physical education, fashion design, and home economics which are now awarded academic credits.

contribution of a subject to the overall academic program of a student that should be reviewed for gauging the intellectual challenge of a student's program. Understanding of the military is certainly a contribution to such end, especially when it is accommodated on a civilian oriented academic campus which allows the free interchange of popular and unpopular ideas.

The denial of academic credit arbitrarily is analogous to the denial of equal protection of the law, when it occurs at a State university. It becomes more significant when the University is the only institution that offers the Senior Army ROTC Program in Hawaii. It has been repeatedly held by our courts that the guarantee of the equal protection of the laws means that person or class of persons shall not be denied the same protection of the laws which is enjoyed by other person or other classes in like circumstances.<sup>13</sup>

This writer further believes that the essence of motivating the better students to enroll in Army ROTC will rest on the "academic credit" recognition of the core curriculum military subjects. Academic recognition is inherent in the education of any recognized profession.

The Army's response to the sensitive issue of academic recognition was the development of CONARC's core curriculum.<sup>14</sup> It

---

<sup>13</sup>See 16 Am Jur 2d, Constitutional Law Sec. 487.

<sup>14</sup>Headquarters, United States Continental Army Command, Senior Division Program of Instruction Army ROTC (5 August 1970).

stresses the rationale-concept of offering quality subjects and developing a well rounded junior officer educated in English, humanities, natural sciences, and social sciences for the enhancement of his creative thinking ability.<sup>15</sup> CONARC's core curriculum allows a minimum of 210 hours of military subjects<sup>16</sup> supplemented by 180 hours of acceptable academic subjects offered by the host institution.

The actual implementation of the core curriculum for any given institution is determined by the Professor of Military Science (hereinafter referred to as "PMS") and the host institution and may differ among institutions so long as the minimum of 210 military contact hours are met.<sup>17</sup> The core curriculum is tailored into the

---

<sup>15</sup>Ibid., pp. 1-4, 17-19; Also see Ohio State University, Role of Colleges and Universities in ROTC Programs, (June 1960), pp. 5-21, containing much of the features now found in CONARC's core curriculum with emphasis on the development of an officer's ability to explore in depth the many problems arising in our complex society.

<sup>16</sup>The 210 military hours are required to be presented with a minimum contact of one hour per week in the freshman year and two hours per week in the sophomore, junior, and senior years. In the alternative, the core curriculum provides for a two-year program of two hours per week in the junior and senior years with a summer camp training prior to enrollment in the junior year. The original thinking of the Department of the Army indicated that one hour per week for both the freshman and sophomore years were sufficient. Compare US Department of the Army, Deputy Chief of Staff for Personnel, Senior ROTC Core Curriculum (4 August 1969), Inclosure 1, p. 2 with Headquarters, United States Continental Army Command, Senior Division Program of Instruction Army ROTC (5 August 1970), pp. 2-3.

<sup>17</sup>Headquarters, United States Continental Army Command, Senior Division Program of Instruction Army ROTC (5 August 1970), p. 3.

requirements for a baccalaureate degree, a prerequisite for obtaining a commission, through the Army ROTC program.<sup>18</sup>

#### IMPLEMENTATION OF AN ARMY ROTC CORE CURRICULUM

The University of Hawaii offers the Army ROTC general military subjects (GMS) program tailored into a core curriculum which requires 330 military contact hours and 120 hours of academic subjects acceptable to the PMS.<sup>19</sup> The 330 military contact hours at the University are awarded 20 academic credit hours. On said basis of credit hour determination, CONARC's 210 minimum military contact hours are equivalent to 13 credit hours. It follows that the Army ROTC Program at the University enjoys seven academic credit hours in excess of the minimum required by CONARC.

Significant information and data on the Army ROTC Program at the University obtained from its PMS<sup>20</sup> are:

- The University grants full academic credit for all Army ROTC courses for the school year 1972-73 but review for credit qualification is now pending before the Faculty Senate. However,

---

<sup>18</sup>US Department of the Army, Army Regulations 145-1: Eligibility for Appointment in AUS for ROTC Graduates (14 October 1968), p. 6-9.

<sup>19</sup>See Appendix II for Army ROTC general military subjects program modified into a core curriculum offered at the University of Hawaii obtained from David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii.

<sup>20</sup>Interview with David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii, 24 November 1972.

there are some academic areas in which such credits are not counted toward the fulfillment of the requirements.<sup>21</sup>

- The University recognizes the Professor of Military Science with an academic rank and its privileges.

- Courses awarded academic credit toward a baccalaureate degree by the University are as a rule accepted by the PMS to satisfy the 120 hours of supplemental academic subjects.<sup>22</sup>

- The Army ROTC program is initially approved by the University ROTC Committee comprised of a chairman from the administration, four faculty members, two ROTC faculty members, and four students and is in line with the Benson Committee report.<sup>23</sup>

Army ROTC program approved by the ROTC Committee is then submitted to the Program and Curriculum Planning Committee (hereinafter referred to as P&CP) for approval.

- The P&CP then submits its recommendation to the Faculty Senate.

- The primary objection to the Army ROTC program at the last Faculty Senate review was primarily against the military tactics courses. It has now been revised with emphasis on the qualities and

---

<sup>21</sup>See Appendix III, Academic Credit For ROTC Instruction, obtained from David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii, pp. 3-5 under column "Credits That Count For Grad Reqmts".

<sup>22</sup>Ibid., pp. 1-5, under column "Academic Field".

<sup>23</sup>US Department of Defense, Report of the Special Committee on ROTC to the Secretary of Defense, 22 September 1969, p. 52.

techniques of leadership with de-emphasis on the tactical formations, and the title "Military Tactics" was changed to "Theory and Dynamics of Military Management".

- The leadership laboratory period of one hour per week<sup>24</sup> is highly acceptable to the students.<sup>25</sup> Notwithstanding student acceptability, it seems that leadership laboratory will continue to remain suspect of utilizing valuable college time in matters lacking the intellectual challenge of university course work.<sup>26</sup> Recognizing this possibility, the PMS has implemented a voluntary program in leadership training and tactics during selected weekends at a nearby Army installation with de-emphasis of such training on campus.

- All military subjects have been under an emphatic upgrading program both as to subject matter and method of instruction for the past three years.

- The leadership instructor was sent to West Point during

---

<sup>24</sup>In the course of the year, the laboratory periods are used for four formal formations of all cadets; approximately 10 to 15 hours of close order drills and drill competitions conducted in groups divided into freshman, sophomore, junior and senior cadets with seniors as cadres; and the balance of the time being allocated for tactics, Army physical training and testing, and duties in the personnel, supply and encampment planning sections of the ROTC program.

<sup>25</sup>See Appendix IV, Part V: Leadership Laboratory and Camps.

<sup>26</sup>US Department of Defense, Report of The Special Committee on ROTC To The Secretary of Defense, 22 September 1969, pp. 13, 38, 39; Ohio State University, Role of Colleges and Universities in ROTC Programs, (June 1960), pp. 17-18.

the summer of 1972 for a six week course which was regarded by the PMS as very rewarding.

- General officers from the active Army and business and civic leaders from the community are used as guest speakers.<sup>27</sup>

- Academic faculty members on campus have been invited to speak to the students.<sup>28</sup>

- The military courses are open to all students and faculty members on campus for visitation and participation.<sup>29</sup> The PMS feels that visitation by members of the academic community in general still remains inadequate to enable them to draw a fair and constructive criticism of the military courses. The open invitation to students lends greater exposure of the Army ROTC program for recruiting of cadets and for gauging the acceptability of Army ROTC on the campus.

- The academic background of the military faculty has been upgraded.<sup>30</sup>

- The military faculty and courses have been rated above

---

<sup>27</sup>For rationale, see Robert Sobel, "Military Affairs in the Curriculum--Up From Mickey Mouse", Army (January 1972), pp. 18-22 for discussion on teaching methods of military subjects.

<sup>28</sup>Ibid., p. 22.

<sup>29</sup>Ibid., p. 21.

<sup>30</sup>See Appendix V for military faculty members' academic background obtained from David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii; Also see US Department of the Army, Army Regulations 611-50: Assignment to Reserve Component and Reserve Officer Training Corps Duty (20 March 1972), p. 2, for faculty qualification requirements.

the norm among University instructions.<sup>31</sup>

- The military courses are all taught by officers.
- Greater emphasis is being placed on the collection of books for the ROTC library.
- There is a ranger company and an officer candidate company made up of upper classmen which signify proficiency.
- There is a big brother program for tutoring and counseling of lower classmen by the seniors.
- The students publish a yearbook of their activities for the academic year.
- The students are very close to the military faculty due to individualized counseling throughout the year.

Should the laboratory which presently is awarded six academic credits be denied, the core curriculum at the University of Hawaii will account for 14 academic credits toward a baccalaureate degree.

Generally, the requirements for a baccalaureate degree in four years at the University of Hawaii are as follows:

- College of Arts and Sciences--granting bachelor of arts: 124 credit hours of which 20 hours may be taken in acceptable electives outside of the college;<sup>32</sup>

---

<sup>31</sup>See Appendix IV for a sampling of comparative grading of a military instructor and course with other instructions at the University obtained from David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii.

<sup>32</sup>University of Hawaii, 1972-73 General Information and Catalogue, Manoa Campus, pp. 47-51.

- College of Business Administration--granting bachelor of business administration degree: 124 credit hours of which 12 hours may be taken in non-directed acceptable electives outside the college;<sup>33</sup>

- College of Engineering--granting bachelor of science in engineering: 130 credit hours of which 15 hours are allowed for directed electives and leaves no hour remaining for other electives.<sup>34</sup>

- College of Education--granting bachelor of education degree: 126 credit hours of which six hours may be taken in acceptable electives out of the college.<sup>35</sup>

All baccalaureate degree programs at the University require approximately 50 basic credit hours consisting of English, logics (mathematics), world civilizations, humanities, natural sciences and social sciences.<sup>36</sup>

From the above, one gets an impression that only students in the College of Arts and Sciences can readily accommodate the 20 credit hours of military courses without an overload. Technically, this is true. However, upon scrutiny, the credit hours required for a degree when divided by eight, the number of semesters in four

---

<sup>33</sup>Ibid., pp. 119-120.

<sup>34</sup>Ibid., pp. 146-148.

<sup>35</sup>Ibid., pp. 129-130.

<sup>36</sup>Ibid., pp. 36-38.

years, result in a student carrying not more than 16 credit hours per semester. It is not uncommon for students to carry at least 18 to 20 credit hours per semester judging from this writer's experience as a student at the University of Hawaii. This observation has been concurred to by a faculty member of the Army ROTC program.<sup>37</sup> The complexity of a student's academic program should, however, be accorded serious consideration on the question of academic overload. Disregarding exceptions, it can be reasonably concluded that a student in any of the colleges recited above can be expected to carry 18 to 20 credit hours without it being considered an excessive overload of courses. This is consistent with a policy expressed in the rationale-concept of CONARC's core curriculum which says:

8. It is not unreasonable--or unusual in the academic world--to expect a student to carry an overload if the reward is proportionate to the amount of work involved. Academically, the reward would be the granting of "a minor" in a particular field of study; in the ROTC program, it will be a commission. The Army, therefore, has a right to expect the student to accept military instruction as an overload, but the amount must be tempered with reasonableness. The Army will, of course, continue to encourage that academic credit be awarded for all portions of the ROTC curriculum.<sup>38</sup>

---

<sup>37</sup>Interview with George M. Fukumoto, LTC., Associate Professor of Military Science, Army ROTC Program, University of Hawaii, 1 December 1972.

<sup>38</sup>US Department of the Army, Deputy Chief of Staff for Personnel, Senior ROTC Core Curriculum (4 August 1969), Inclosure 1 at p. 2.

Statistics published in early 1972 after the advent of CONARC's core curriculum shows that enrollment in ROTC of all services was down from 218,000 in academic year 1968-69 to 83,000.<sup>39</sup> Army ROTC enrollment at the University dropped from 651 in academic year 1964-65 to 255 in academic year 1965-66 when the program became voluntary. The enrollment since 1965-66 is shown in the following table:<sup>40</sup>

1966-67	357	1970-71	250
1967-68	371	1971-72	236
1968-69	312	1972-73	179
1969-70	276		

Interestingly, however, the number of graduating junior officers<sup>41</sup> did not drop in accordance with such statistics but were as follows:

<u>Academic Year</u>	<u>Graduates with Commission</u>
1964-65	41
1965-66	48
1966-67	30
1967-68	51
1968-69	54
1969-70	34
1970-71	45
1971-72	52
1972-73	50 (estimated)

---

<sup>39</sup>"Return of the ROTC", Commonweal, 3 March 1972, p. 516.

<sup>40</sup>The enrollment figures were obtained from George M. Fukumoto, LTC., Associate Professor of Military Science, Army ROTC Program, University of Hawaii.

<sup>41</sup>Figures were obtained from David L. Silver, Jr., COL., Professor of Military Science, Army ROTC Program, University of Hawaii.

It is apparent from the table above that the dropage in enrollment did not drastically affect the number graduating as second lieutenants at the University. The number of graduates can be said to have been retained or even bettered than pre-1970. This is a good indication that those who no longer enrolled in the Army ROTC program at the University after it became a voluntary program would probably not have continued on to graduation with a commission. Furthermore, it can be said that Army ROTC at the University has achieved economy without loss of results.

#### CONCLUSION

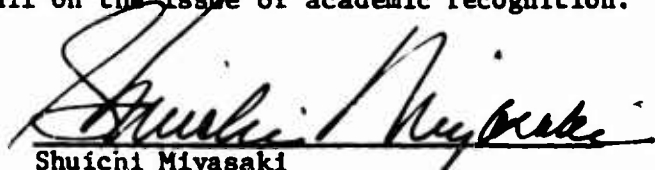

1. The implementation of Army ROTC core curriculum at the University of Hawaii which includes 120 hours of military instruction in excess of the minimum approved by CONARC has been successfully integrated into a student's baccalaureate degree program with retention of substantially the same number of graduates as in the pre-1970 academic years.

2. The core curriculum is considered flexible enough for integration into a four-year baccalaureate degree program of students in the Colleges of Arts and Science, Business Administration, Education and Engineering without creating an unreasonable overload of military instruction.

3. The Army ROTC core curriculum at the University of Hawaii can be modified with substantially more individualized tailoring by providing an optional program which allows a student to take any number of acceptable military subjects consisting of not less than

210 military hours of instruction.

4. The military courses offered at the University of Hawaii when compared without discrimination to other courses now awarded academic credit should prevail on the issue of academic recognition.

APPENDIX IV

University of Hawaii, Faculty-Course Evaluation Scale

45

# UNIVERSITY OF HAWAII

July 7, 1972

TO: NAME DELETED

FROM: Gerald M. Meredith, Ph.D.  
Academic Evaluation Officer

RE: Faculty-Course Evaluation  
Scale (Form J-6)--Spring '72  
Results

## PURPOSE

The purpose of the FACULTY-COURSE EVALUATION SCALE was three-fold: (a) to describe student reactions toward the instructor, course, and outcomes, (b) to confirm hypotheses relevant to the attainment of instructional objectives, and (c) to generate hypotheses for future curriculum and instructional research in your course.

## PROCEDURES

Student answer sheets for Form J-6 were processed on the IBM 1230 Optical Scanner. The numbers "1" to "5" were assigned to each scorable rating scale. A score of "1" indicated strong disagreement with the statement, while a "5" indicated strong agreement. The midpoint of the score range (i.e., "3") defined the intermediate or uncertain region. This coding procedure was followed for all 48 items. These rating scores were used as the raw score ingredients for the computation of averages and measures of variability ("scatter of individual differences"). The mean (M) and standard deviation (s.d.) are presented for each of the 48 items.

## FINDINGS

The following materials have been returned for your inspection:

1. Normative Information. Marginal distributions for 5378 students enrolled in 244 courses taught by 192 instructors are enclosed, along with summary statistics for the Total Sample (e.g., Mean, Standard Deviation, Sample Size, etc.).
2. Your Class Information. Marginal distributions and summary statistics are presented for your class, based on scorable IBM sheets.
3. Graphical Comparison. A graphical comparison between the mean scores from your class and the means obtained from the 5378 UH students is presented. Your averages are designated by the symbol  $\bar{x}$ , while the Total Group uses the symbol  $\bar{X}$ .

The results of the semester evaluation may be used as evidence of "impact" on students to support promotion and tenure recommendations.

INSTRUCTOR: NAME DELETED
