ABSTRACT

Meteorological data gathered for the launching of Nike-Hydac STV-88 and Nike-Hydac Ballistic Round are presented for the Space and Missile Systems Organization, AFMPC, Holloman Air Force Base, New Mexico and for ballistic studies. The data appear, along with calculated ballistic data, in tabular form.

INTRODUCTION

Nike-Hydac STV-88 was launched from Launch Complex 33, L-314, White Sands Missile Range, New Mexico, at 1130 hours MDT, 10 July 1969.

Nike-Hydac Ballistic Round was launched from Launch Complex 33, L-361, White Sands Missile Range, New Mexico, at 1230 hours MDT, 10 July 1969.

Meteorological data used in conjunction with theoretical calculations to predict rocket impact were collected by the Meteorological Support Division, U.S. Army Electronics Research and Development Activity, White Sands Missile Range, New Mexico. Ballistics Meteorologists for these firings were Len E. Carter and John M. Sharpe.

DISCUSSION

Wind data for the first 216 feet above the surface were obtained from a system composed of five Aerovanes mounted on a 200-foot tower and cabled to component wind indicators.

From 216 to 4,000 feet above the surface, wind data were obtained from T-9 Radar-observed balloon ascents.

Temperature, pressure, and humidity data, along with upper wind data from 4,000 to 70,000 feet above the surface, were obtained from standard rawinsonde observations.

Mean wind component values in each ballistic zone were determined from vertical cross sections by the equal-area method.

Theoretical rocket performance values and wind-weighting values as a function of altitude were provided by the Atmospheric Sciences Office and are the basis for the data appearing in Table I.

PAYLOAD		225	Pounds
CORIOLIS DISPLACEMENT	WEST	4.2	Miles
SECOND-STAGE IGNITION	TIME	20.0	Seconds

13. ABSTRACT Meteorological data gathered for the launching of Nike-Hydac STV-88 and Nike-Hydac Ballistic Round are presented for the Space and Missile Systems Organization, AFMDC, Holloman Air Force Base, New Mexico and for ballistic studies. The data appear, along with calculated ballistic data, in tabular form.
