Phone: (617) 552-3605

**Distribution Statement:** 1-Approved for public release; distribution is unlimited.

**STEM Degrees:** 0

**STEM Participants:** 0

**Major Goals:** The major goal of the grant was to gather leaders and emerging scientists in the area of switchable catalysis in a symposium held at the 253 American Chemical Society National Meeting held on April 2-6, 2017. The purpose for this gathering was so that researchers could share new results with each other in order to foster new relationships and build the community of scientists studying switchable catalysis.

**Accomplishments:** There were 29 speakers and 13 poster presenters at the symposium. The presenters disseminated new ideas and new collaborations were established that have driven the field forward in new and exciting directions. Since the symposium, which was the first one ever devoted to this topic, several high impact papers emerged along with several reviews in the general area. New collaborations were established that will likely lead to exciting advances in the field in the coming years.

## Final Report: "Switchable Catalysis", Symposium Support

### A. Location and Dates

"Switchable Catalysis", 53rd American Chemical Society National Meeting and Exposition on April 2-3, 2017 in San Francisco, CA.

### B. Summary

Switchable catalysis is an atom-economical method that generates multiple, catalytically active species with different reactivity. Because these species originate from a single precursor and are readily controlled by the external stimuli, rapid production of molecular complexity is achieved and chemical synthesis is made more efficient and less costly. The topics that were covered by participants included photo-switchable, redox-controllable, pH-responsive, ion selective, and host-guest recognition reactions, which have led to significant advances that have made controlling chemical reactions with switchable catalysis possible. The applications for this emerging technology are broad and particularly relevant to environmental chemistry including applications in energy science from renewable resources, degradable polymers, and green chemistry. The speakers who presented (see list below) were diverse and international featuring male and female speakers, scientists at all career levels, and speakers from all over the world. Moreover, speakers with different chemical backgrounds (organic, inorganic, and polymer chemists) were purposely chosen in order to create a forum that fosters the exchange of new ideas across multiple disciplines. In addition to the two-day symposium, the lectures were complemented by a poster session, which was comprised of student and postdoctoral researchers (see list below) in order to offer career opportunities to the next generation of scientists in the field. To further foster the exchange of ideas and the development of new and lasting relationships, a symposium dinner was held for all participants.

### C. Topics Covered

- Redox-switchable polymerization catalysis
- Photoredox catalysis and its application in organic synthesis
- Using molecular recognition to control catalytic reactions
- Computational investigations into the origin of switchable reactions
- Controlling polymer patterning using switchable catalysts
- Controlling hierarchical structures using switchable polymerization catalysis
- pH responsive catalysts for energy applications

### D. Outcomes/Impact

Participants in the symposium disseminated new ideas and new collaborations were established that have driven the field forward in new and exciting directions. Since the symposium, which was the first one ever devoted to this topic, several high impact papers emerged along with several reviews in the general area. New collaborations were established that will likely lead to exciting advances in the field in the coming years.

### E. Participants

#### Speakers:

1. Chris Bielawski, Ulsan National Institute of Science and Technology, Korea
2. Andrew J. Boydston, University of Washington

## Final Report: "Switchable Catalysis", Symposium Support

3. Jeff Byers, Boston College (**PI, co-chair**)
4. Frank Breher
5. Thibault Cantat, CEA, France
6. Jean-François Carpentier, University of Rennes, France
7. Changle Chen, University of Science and Technology of China
8. Eugene Chen, Colorado State University
9. Paul Chirik, Princeton University
10. Christopher Cramer, University of Minnesota
11. Donald Darensbourg, Texas A&M University
12. Paula Diaconescu, University of California, Los Angeles (**co-chair**)
13. Natalie Fey, University of Bristol
14. Brett Fors, Cornell University
15. Etsuko Fujita, Brookhaven National Lab
16. Brian Long, University of Tennessee
17. Kazushi Mashima, Osaka University
18. Krzysztof Matyjaszewski, Carnegie Mellon University
19. Parisa Mehrkhodavandi, University of British Columbia, Canada
20. Chad Mirkin, Northwestern University
21. David Nicewicz, The University North Carolina at Chapel Hill
22. Jun Okuda, RWTH Aachen, Germany
23. Javier Read de Alaniz, University of California, Santa Barbara
24. Michael Reynolds, Shell
25. Mitsuo Sawamoto, Kyoto University, Japan
26. Alex Spokoyny, University of California, Los Angeles
27. Corey Stephenson, University of Michigan
28. Charlotte Williams, Imperial College, UK
29. Tehshik Yoon, Wisconsin University

### Poster presenters (13 participants):

Kayla Delle Chiaie, Stephanie Quan, Arnaud Thevenon, Rongjia Zhang, Jeffrey Kehl, Junnian Wei, Amy Lai, Soohik Ro, Madeline Riffel, Ruxi Dai, Theresa Williams, Mark Abubekarov, Yi Shen.

1155 16th Street, NW, Washington, DC 20036  
Tel: 800-227-5558 (US only) or 202-872-4600

Fax: 202-872-4615 E-mail: [help@acs.org](mailto:help@acs.org) Website: [www.acs.org](http://www.acs.org)

The American Chemical Society is a self-governed individual membership organization of members at all degree levels and in all fields of chemistry. The Society provides a broad range of opportunities for peer interaction and career development, regardless of professional or scientific interests. The programs and activities conducted by ACS today are the products of a tradition of excellence in meeting member needs that dates from the Society's founding in 1876.

This On-site Meeting Program is published by the American Chemical Society as a service to its attendees. Information contained herein is subject to change without notice. While every effort is made to ensure accuracy, ACS makes no warranties, expressed or implied, related to the information. For the official technical program for the 253rd National Meeting & Exposition, refer to [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017). ## Welcome to San Francisco and the 253rd ACS National Meeting

---

**W**elcome to beautiful San Francisco for the 253rd ACS National Meeting. It is my pleasure to join all of you in this vibrant city, and a favorite location for our meetings.

Advanced Materials, Technologies, Systems & Processes is the theme of this meeting. Twenty nine technical divisions and six committees are hosting original programming, including 1,100 half-day oral sessions and 144 poster sessions. More than 14,500 papers and nearly 5,700 posters will be presented at the meeting. In addition to symposia, there are a number of special events planned throughout the week.

There are three Presidential Symposia that I encourage you to attend, as well as 14 symposia that I am recommending. Organized by the Division of Professional Relations, the LGBT Graduate & Postdoctoral Student Chemistry Research Symposium on Sunday and Monday will include scientific talks by LGBT graduate and postdoctoral students and a panel discussion on issues that affect LGBT students (Hotel Nikko San Francisco, Nikko Ballroom III). Sunday afternoon, Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal will assess the progress made in critical areas of chemistry since first highlighted in a 1995 issue of the journal (San Francisco Marriott Marquis, Golden Gate A). On Monday, Science for a Sustainable Energy Future will focus on scientific advances in energy storage and chemical and biological approaches to energy conversion (Moscone Center, Room 133).

On Sunday afternoon, please join your colleagues at noon for the ACS Board of Directors Regular Session as we hear from two renowned guest speakers: Joseph M. DeSimone presenting on the Future Fabricated with Light: The Launching of Carbon, and Anne Milasinic Andrews, talking about The Brain is More

**Allison A. Campbell**  
ACS President

Than a Computer (Moscone Center, Gateway Ballroom 103/104).

On Monday afternoon, Bradley D. Olsen from the Massachusetts Institute of Technology will present the Kavli Foundation Emerging Leader in Chemistry Lecture on Classical challenges in the physical chemistry of polymer networks. Following his presentation, Jennifer A. Doudna of the University of California, Berkeley will give the Fred Kavli Innovations in Chemistry Lecture on CRISPR systems: Nature's toolkit for genome engineering (Moscone Center, Gateway Ballroom 103/104).

Throughout the meeting, many education-focused programs for high school teachers, undergraduate and graduate students, postdocs, and chemical professionals will be offered. For job seekers and employers, the career fair will feature on-site interviews, one-on-one career assistance, and workshops. Please find time to walk the expo hall where more than 400 booths will showcase services, instruments, books, and lab equipment of more than 250 companies.

My personal thanks to the members of the Santa Clara Valley Section and California Section; the divisional program chairs and symposium chairs responsible for organizing the technical sessions; and the ACS staff for making it all happen. Thanks to you for contributing to the success of this meeting, and of course for attending.

Allison A. Campbell  
ACS President

## Welcome Message from Kathryn Beers, San Francisco Thematic Program Chair

---

The Spring 2017 ACS National Meeting will be held April 2–6 in San Francisco, CA. The theme for the meeting is Advanced Materials, Technologies, Systems, and Processes.

The plenary session on Sunday afternoon, April 2, includes four invited lectures: Dr. Peter Green (National Renewable Energy Laboratory) will discuss “Clean energy challenge: An integrated approach involving basic research, innovation and human factors;” Dr. Jeffrey Linhardt (Verily Life Sciences) will discuss “Technology at the interface of microelectronics, life sciences, and big data: Materials challenges;” Dr. Ann-Christine Albertsson will discuss “From design and synthesis to advanced properties and sustainable polymeric materials;” Dr. Keith Watson (The Dow Chemical Company) will discuss “Fostering industrial and academic partnerships.”

The Kavli Foundation Lecture Series will be held Monday, April 3. The Kavli Foundation Emerging Leader in Chemistry Lecture by Prof. Bradley Olsen (Massachusetts Institute of Technology) on “Classical challenges in the physical chemistry of polymer networks” and the Fred Kavli Innovations in Chemistry Lecture by Dr. Jennifer Doudna (UC Berkeley, Lawrence

**Kathryn Beers**  
San Francisco Thematic  
Program Chair

---

Berkeley National Lab) on “CRISPR systems: Nature’s toolkit for genome engineering”.

The technical program constructed by the ACS divisions includes 134 symposia that support the theme of the meeting. Divisions and committees with symposia supporting the theme include AGFD, ANYL, BIOT, CATL, CELL, CHED, CINF, COLL, COMP, ENFL, ENVR, HIST, I&EC, INOR, NUCL, ORGN, PHYS, PMSE, POLY, SCHB, and YCC. MPPG is cosponsoring a total of 27 symposia.

The program for the meeting and other information is available online at the website of the meeting, [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017).

I am very grateful to the members of the local section, the program chairs of the divisions and committees listed above, the thematic symposia chairs, and the ACS staff for their work in supporting the theme of this meeting. I look forward to meeting you in San Francisco!

*Kathryn Beers*  
Thematic Program Chair

## OFFICE OF THE GOVERNOR

April 2, 2017

### *American Chemical Society*

On behalf of the State of California, I am pleased to welcome you to the 253rd American Chemical Society (ACS) National Meeting & Exposition.

Since its inception in 1876, the ACS has supported chemists and the chemical enterprise by providing professional and academic support to a growing network of members. Scientific research and emerging technologies continue to spur economic growth in California and in the broader global community. I commend all those who have come together to discuss the power of chemistry and I applaud your efforts to foster the innovators and innovations of tomorrow.

Best wishes for a memorable and productive meeting.

Sincerely,

  
EDMUND G. BROWN JR.

## **GREETINGS FROM THE MAYOR OF SAN FRANCISCO**

On behalf of the City and County of San Francisco, it is my pleasure to welcome you to the 253<sup>rd</sup> National Meeting of the American Chemical Society, focused on *Advanced Materials, Technologies, Systems and Processes*, held on April 2-6, 2017

The American Chemical Society (ACS) is the world's largest scientific society and one of the world's leading sources of authoritative scientific information. ACS is at the forefront of the evolving worldwide chemical enterprise and the premier professional home for chemists, chemical engineers and related professions around the globe.

San Francisco is proud to host this valuable event as our City continues to be a leader in scientific innovation, and we welcome the gathering of the brightest minds in the chemical sciences.

Congratulations to the American Chemical Society for their dynamic and visionary commitment to improving the lives of others through the transforming power of chemistry. I commend all the individuals who helped make this event a true success, and I wish you all the best in your future endeavors!

With warmest regards,

A handwritten signature in black ink that reads "Edwin M. Lee".

Edwin M. Lee  
Mayor

# GENERAL MEETING INFORMATION

**YOUR MEETING REGISTRATION** entitles you to a range of programming, including scientific sessions, invited symposia, poster sessions, special lectures and events, award presentations, workshops, and the exposition. Interact with chemical scientists from around the world by participating in social events, networking opportunities, exhibitor sessions, and educational activities, with many events offered at no additional charge. Certain workshops, short courses, and ticketed events require a separate entry fee, as indicated in this program.

## REGISTRATION

All attendees, including speakers and poster presenters, must register for the meeting to participate in the technical sessions. Sponsored speakers should contact their symposium organizer or division program chair to clarify the terms of their invitation and to determine who will complete the speaker's registration. Attendees must display their badge at all times for admission to all official ACS sessions and events.

**Early registration.** U.S. residents who registered by February 20 received their badge credentials by mail. International registrants (this includes Canada and Mexico) must pick up their badge credentials at ACS Attendee Registration.

**Standard & on-site registration.** Attendees who registered after February 20 must pick up their badge credentials on-site.

**Registration changes.** Attendees can modify their existing registration or generate a receipt from the registra-

tion website by following the instructions in their confirmation message. Attendees can also contact the ACS National Meeting Registration Center or update their registration on-site at ACS Attendee Registration. Bring your confirmation and/or badge credentials with you to the meeting for faster processing.

**Registration methods.** All registrants received a confirmation via the original method of registration.

**Internet.** Register online at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) until April 6. A valid credit card is required to register online, and online registrations are real-time transactions.

**Telephone.** Call the ACS National Meeting Registration Center at 800-251-8629 (U.S./Canada only) or 508-743-0192 (international), Monday through Friday, 9:00 AM to 5:00 PM ET.

**Fax/mail.** Submit the registration form via fax by April 6 at 508-743-9604, or mail it to ACS Registration, c/o CDS, 107 Waterhouse Rd., Bourne, MA 02532.

**On-site.** Register during the meeting at ACS Attendee Registration at standard registration rates. ACS Attendee Registration will be open at the Moscone Center, North Lobby, on Saturday, 3:00 to 6:00 PM; Sunday, 7:30 AM to 7:30 PM; Monday, 7:30 AM to 9:00 PM; Tuesday, 7:30 AM to 5:00 PM; Wednesday, 7:30 AM to 4:00 PM; and Thursday, 7:30 AM to 1:00 PM.

**REGISTRATION PAYMENTS.** Registration fees can be paid by check, money order, credit card (American Express, Discover, MasterCard, or VISA), or bank wire transfer. Make checks payable in U.S. dollars to the American Chemical Society, and include a completed registration form with each payment. Registration fees should not be combined with any other payment (such as membership dues). Purchase orders and training requests are not accepted. For wire transfer payments, contact the ACS Finance Department at 202-872-6106 or e-mail [bankwires@acs.org](mailto:bankwires@acs.org). **Registration forms received without payment will not be processed.**

**REGISTRATION ASSISTANCE.** The ACS National Meeting Registration Center will be available from 9:00 AM

## BADGES

All attendees are required to wear their badges for all technical sessions, poster sessions, and other official meeting events. Our badge holders are recyclable and biodegradable. Please discard appropriately.

REGISTRATION CATEGORY	FEE	
	EARLY BY FEB. 20	STANDARD FEB. 21
<b>MEMBERS</b>		
ACS affiliate	\$445	\$535
Postdoctoral member	445	535
Emeritus or retired member	225	270
50-year member	No fee	No fee
Unemployed member (Dues waiver required)	No fee	No fee
Precollege teacher	110	110
Graduate student	225	225
Undergraduate	110	110
One-day registrant	225	270
<b>NONMEMBERS</b>		
Chemical scientist	\$780	\$935
Postdoctoral scientist	780	935
Visitor: Nonchemical scientist or chemical technician	445	535
Precollege teacher	110	110
Graduate student	445	445
Undergraduate	225	225
One-day registrant	445	535
Guest of registrant*	45	45
<b>EXPOSITION-ONLY VISITORS</b>		
Adult, exposition only	\$60	\$60
Student, exposition only	30	30

\* Registration is restricted to a spouse or family member of registered attendee having no affiliation with the field of chemical science and who is not eligible to become an ACS member. Only one guest registration is allowed per registering attendee, and the guest registration must be completed and paid by the registering attendee at time of original registration.

### ACS BADGE REPRINT POLICY

**1st badge reprint:** no charge, upon proper identification and confirmation of registration payment, a duplicate badge is issued.

**2nd badge reprint:** attendee completes a duplicate badge request, shows identification (which we copy), a charge of \$25 is paid (cash/credit card), a duplicate badge is issued.

**3rd badge reprint:** attendee completes a duplicate badge request, shows identification (which we copy), a charge of \$50 is paid (cash/credit card), a duplicate badge is issued.

**For any badge beyond the 3rd:** attendee completes a duplicate badge request, shows identification (which we copy), a charge of \$100 is paid (cash/credit card), a duplicate badge is issued.

## MEETING INFO ON THE WEB

Registration, housing, technical programming, special events, participating exhibitors, and other meeting details are available at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017).

## GENERAL INFORMATION

to 5:00 PM ET by telephone, fax, mail, or e-mail. Service representatives can be reached by phone at 800-251-8629 (U.S./Canada only) or 508-743-0192 (international), by fax at 508-743-9604, by e-mail at [acs@xpressreg.net](mailto:acs@xpressreg.net), or by mail at ACS Registration, c/o CDS, 107 Waterhouse Rd., Bourne, MA 02532.

### Registration cancellations/refunds.

All cancellations and refund requests must be submitted in writing by March 6 to guarantee the registrant a full refund less a \$50 administrative fee. Refund requests made after March 6 will not be honored. Your registration badge credentials and a copy of your registration confirmation must be attached to your request. All refunds will be issued via the original payment method, and refunds will be processed within 30 days after the meeting. Send your request to ACS Registration Cancellation, c/o CDS, 107 Waterhouse Rd., Bourne, MA 02532, or fax it to 508-743-9604 (save your fax confirmation sheet).

### ONSITE PROGRAM BOOK NO LONGER FREE

Copies of the on-site program book will be available for \$10 until February 20 through the online registration process. The standard fee of \$20 will apply after February 20. In response to numerous requests, the author index will be included in the printed program booklet. Satellite registration and on-site program purchase/pickup locations will be located at the Moscone Center, North Lobby; Hilton Union Square, West Lounge; and Grand Hyatt San Francisco, Theater Level. Credit cards, debit cards, and checks will be accepted at these locations. We encourage meeting attendees to download the ACS San Francisco mobile app or access the ACS San Francisco digital meeting program with author index in early April. These digital options will provide quick access to the full technical program, along with special features so you can easily build your schedule.

### Social event ticket cancellations/

**refunds.** Social event cancellations received by March 6 entitle the registrant to a full refund. Refund requests made after March 6 will not be honored. Event tickets and a copy of your registration confirmation must be attached to your request.

**Abstract cancellations/refunds.** Abstract USB flash drives (thumb drives) and their shipping costs are nonrefundable.

**MEMBER REGISTRATION.** You must enter a valid ACS membership number during registration to register as a member and receive your ACS member discount on registration fees. Your registration options will automatically appear in accordance with your current membership status in the ACS membership database. Your ACS membership number can be found on your ACS membership card or your *Chemical & Engineering News* address label. Address questions about your membership status to ACS Member Services at 800-333-9511 (U.S./Canada only) or 614-447-3776 (international) or by e-mail at [service@acs.org](mailto:service@acs.org).

**NONMEMBER REGISTRATION.** Save money on discounted registration fees by joining ACS. You can join ACS now through the online ACS membership application at [www.acs.org/join](http://www.acs.org/join) or by contacting ACS Member Services and then registering for the meeting at your member rate. To receive your meeting discount, you must join the society before you register for the meeting. New memberships or questions about membership status should be handled through ACS Member Services at 800-333-9511 (U.S./Canada only) or 614-447-3776 (international) or by e-mail at [service@acs.org](mailto:service@acs.org).

**PRESS/MEDIA REGISTRATION.** Press registration is complimentary for credentialed members of the news media who are approved by the ACS Office of Communications (restricted to reporters and editors working full-time for print or broadcast news). Press badges may be picked up with valid media credentials from the Press Room at the Moscone Center. For more information, visit [www.acs.org/pressroom](http://www.acs.org/pressroom).

**EXPO-ONLY ADMISSION.** All meeting attendees with a valid badge receive complimentary admittance into the exposition as part of their registration. Individuals who want to visit the exposi-

tion without registering for the meeting's technical sessions can register for an expo-only adult badge for \$60 or \$30 for students with school identification. Register online or in person at ACS Attendee Registration.

**EXHIBITOR REGISTRATION.** Exhibitor registration is handled exclusively through ACS National Expositions at [www.acs.org/expositions](http://www.acs.org/expositions).

**CAREER FAIR EMPLOYER REGISTRATION.** ACS Career Fair Employer registration is handled exclusively through ACS Careers at [www.acs.org/careers](http://www.acs.org/careers).

## ACCOMMODATIONS

**CONFERENCE DIRECT** is the official housing bureau for the ACS National Meeting in San Francisco. ACS does not endorse booking hotel reservations through any other sources. All attendees who made their reservation through ConferenceDirect will receive complimentary internet access in their sleeping rooms and will be automatically entered in the ACS Housing Drawing.

**ON-SITE HOUSING.** An onsite housing desk will be available during the meeting in the registration area of the Moscone Convention Center to assist with last-minute housing changes or needs.

**RESERVATION.** All registrants received confirmation for reservations made directly through ConferenceDirect. Each confirmation contains a unique number that is proof of your reservation through ConferenceDirect.

Published ACS rates apply to hotel stays from March 28 – April 8. To extend your stay beyond these dates, you must reserve additional nights directly through the hotel.

## ACS GREENER MEETINGS

The ACS Department of Meetings & Expositions Services and the Committee on Meetings & Expositions are committed to greener meetings. For each national meeting, we collaborate with the destination city, the convention center, and our hotel and vendor partners to reduce our environmental footprint and raise the bar for industry sustainability practices.

## GENERAL INFORMATION

Interested in learning more about how we're leading the way? Go to [www.acs.org/greenermeetings](http://www.acs.org/greenermeetings) to read about our greener meeting initiatives and access our annual Event Sustainability Report.

For its efforts, ACS has been recognized as a cowinner of the 2016 UFI Sustainable Development Award. Here are a few reasons why:

- ACS seeks sustainable convention center venues to track energy, waste, and water data for each meeting.
- ACS offsets staff event emissions in partnership with American Forests (over 16,000 trees planted since 2014) and shuttle emissions in partnership with Transportation Management Services (TMS) and carbonfund.org. In 2016, ACS and its partners indirectly offset 3,270 metric tons of CO<sub>2</sub>.
- ACS engages hotel partners to survey and collect information on sustainability initiatives and perform on-site walkthroughs of hotel room block properties to encourage hotels to increase sustainability efforts and validate said efforts. These sustainability initiatives are provided to meeting attendees through the Hotel Sustainability Green Grid, published on the ACS housing page. ACS collaborates with catering partners to bring as many local food items to all food and beverage functions during the meeting.

### TAKE THE ACS GREENER MEETINGS

**PLEDGE.** In 2016, 13,842 meeting attendees took the Greener Meetings Pledge, representing 47% of total attendees. As a result of attendee donations through American Forests, 3,714 trees were planted. Do your part and take the Greener Meetings Pledge during registration!

#### I pledge to:

- Take advantage of linen reuse initiatives at my hotel, turn off the lights when away from my room, and participate in any incentive programs for declining housekeeping service during my stay, such as Starwood's Make a Green Choice program.
- Responsibly dispose of recyclable materials (paper, plastic, glass, aluminum) in the Moscone Center and hotels.

- Use the meeting mobile app and digital program instead of the printed on-site program.
- Enjoy the city, burn calories, and reduce my carbon footprint by walking to and from my hotel.
- Use the ACS carbon-offset shuttle service provided by TMS when walking isn't an option.
- Bring a reusable water bottle to avoid the cost and waste associated with disposable, petroleum-based plastic water bottles.

Suggestions? Send them to the ACS Committee on Meetings & Expositions at [greenermeetings@acs.org](mailto:greenermeetings@acs.org).

## TRAVEL & TRANSPORTATION

**TRANSPORTATION DISCOUNTS.** ACS has negotiated special travel discounts with the following partners. To get the best rates and avoid service fees, we recommend making reservations online (except for Amtrak).

#### AIRLINES:

##### Delta

[delta.com/meeting](http://delta.com/meeting); 800-328-1111

Discount code: NMPBR

##### United Airlines

[united.com](http://united.com); 800-426-1122

Discount code: ZXMC508834

#### TRAIN:

##### Amtrak

800-872-7245

Discount code: X90C-958

(phone reservations only)

#### CAR RENTAL:

##### Avis

[avis.com](http://avis.com); 800-331-1600

Discount code: B923099

##### Hertz

[hertz.com](http://hertz.com); 800-654-2240

Discount code: 02UZ0016

#### AIRPORT GROUND TRANSPORTATION.

San Francisco International Airport is located 13 miles south of downtown San Francisco.

**Public transportation.** San Francisco has a comprehensive public transportation system that includes the Bay Area Rapid Transit (BART) system, Caltrain commuter rail, and SamTrans public bus service. For more information please visit [bit.ly/2jueoyY](http://bit.ly/2jueoyY).

**Taxi services.** Taxis depart from the designated taxi zones located at the roadway center islands on the arrivals and baggage claim level. Fares range from \$46.16–\$66.16. A \$2.00 exit surcharge is included in all San Francisco taxicab meter fares for rides originating from San Francisco International Airport.

**TRAVELING TO MEETING VENUES.** The Moscone Center is located at 747 Howard St., San Francisco, CA 94103.

**ACS shuttle.** Complimentary shuttle service will be provided between the Moscone Center and official ACS hotels, with the exception of hotels within walking distance.

**Parking.** There is no parking provided at the Moscone Center for attendees or exhibitors. Nearby parking garages are listed on the Moscone Center website.

## ACS MEMBER SERVICES

**ACS MEMBER SERVICES.** ACS staff can assist you on-site with joining ACS, renewing memberships, completing adjustments to member records, and answering general membership questions. ACS members receive discounted rates when registering for the meeting.

ACS Member Services is located in the North Lobby near attendee registration in the Moscone Center and is open Saturday, April 1, 3:00 to 6:00 PM; Sunday, April 2, 7:30 AM to 7:30 PM; Monday, April 3, 7:30 AM to 9:00 PM; Tuesday, April 4, 7:30 AM to 5:00 PM; Wednesday, April 5, 7:30 AM to 4:00 PM; and Thursday, April 6, 7:30 AM to 1:00 PM.

#### ONLINE SOCIAL NETWORKING TOOLS.

Start discussions and connect with other attendees at the ACS Network and the ACS Facebook page. Follow ACS national meetings on Twitter. Read, comment on, and share C&EN's coverage of ACS meetings.

#### ATTENDEE NATIONAL MEETING

**E-NEWSLETTER.** Receive official updates on ACS national meetings, including locations, registration and accommodation dates, information and discounts, resources, and event details. You can sign up and manage your subscriptions with your free ACS ID. E-mail [meetingnews@acs.org](mailto:meetingnews@acs.org) to subscribe.

**BUSINESS CENTER.** The Moscone Business Center provides full service business needs for your convenience, including photocopying, faxing, computer workstations, and printing services. Shipping is provided through UPS. Office supplies and souvenirs are also available for purchase.

**MEMBER INSURANCE PROGRAM.** Do you need help in determining the right amount of financial protection for you and your loved ones? Are you confused about how to plan for your family's financial future? Do you have student debt or a mortgage? Visit the ACS Member Insurance kiosk at exposition booth 725 and learn how we can help you protect the elements you've built your life around with plans ranging from Life & Health Insurance, International Term Life, Auto & Homeowners Plus, Disability Income, Long-Term Care, Professional Liability, and more. Also learn about our latest addition: Chemical Educators' Legal Liability.

If you are a chemistry educator, visit us for a complimentary 15-minute consultation about Chemical Educators' Legal Liability, and learn how this policy provides the unique coverage necessary for you. Visit [haysconsult.setmore.com](http://haysconsult.setmore.com) to schedule your complimentary consultation.

To learn more about the insurance plans available to you, visit [www.acs.org/insurance](http://www.acs.org/insurance)

### ON-SITE MEETING ARRANGEMENTS

**ADA-COMPLIANT MEETING.** The Moscone Center provides service ramps to entrances and elevated areas, braille instructions and directions throughout the building, and pay phones on each level of the facility with (TDD) hearing-impaired functions. More information is available at [moscone.com](http://moscone.com).

ACS is dedicated to ensuring that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently because of the absence of auxiliary aids and services identified in the Americans with Disabilities Act. If you require special accommodations to participate in the meeting, communicate your needs to ACS Meeting Services by e-mail at [nationalmeetings@acs.org](mailto:nationalmeetings@acs.org), by fax

at 202-872-6128, or by phone at 202-872-6111 by February 20 to allow enough time to fulfill your request. Keep in mind that ACS may not be able to accommodate last-minute requests.

If you have an emergency or need immediate assistance during the meeting, contact any ACS Operations Office.

**ASSISTANCE.** Our greeters will be positioned throughout the meeting and can help you navigate the on-site program, find a particular session or room, and answer questions. Lost-and-found items at the convention center should be directed to the ACS Operations Office located in the South Lobby. Messages left at the ACS Operations Office will be conveyed to attendees via the Meeting Mail system, but ACS cannot accept responsibility for the delivery of any messages, mail, or packages.

**ATTENDEE BADGES.** Attendees and guests must be registered and display their badges at all times to be admitted to all official ACS sessions and events.

**ATTENDEE MESSAGING/MEETING MAIL.** After registering for the meeting, you will be assigned a temporary electronic mailbox to exchange personal messages with other registered attendees via Meeting Mail. Meeting Mail will be available before, during, and after the meeting at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017). Use the Meeting Mail terminals located in the Moscone Center. Telephone messages left at the ACS Information Booths will be conveyed to attendees via the electronic message center, but the society cannot accept responsibility for the delivery of any messages. No one will be paged in meeting rooms.

**AUDIO TAPING, PHOTOGRAPHY & VIDEO-TAPING.** The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital rebroadcast) of speakers or presentations is strictly prohibited at all ACS meetings and events without express written consent from ACS.

**CHILD CARE.** Camp ACS will be available to all meeting attendees free of charge from 7:00 AM to 6:00 PM on Sunday, April 2, through Thursday, April 6. At Camp ACS, children two (and potty-trained) to 16 years of age can participate in age-appropriate activities, including arts and crafts and active games, while you enjoy the meeting. For your child's safety, the location of Camp

### TIPS FOR A SAFE STAY IN SAN FRANCISCO

- Be aware of your surroundings at all times.
- Don't wear your meeting badge outside the convention center or hotels.
- Don't wear fancy jewelry or carry expensive technology in plain sight.
- Carry your briefcase, tote bag, purse, or laptop carrier close to your body.
- Don't leave valuables in your hotel room. Get a hotel safe deposit box.
- Walk in open and well-lit areas at night.
- Travel in groups. Don't be a loner, particularly in the evening.
- Use common sense. If someone or someplace looks suspicious, report it and/or avoid it.
- If an emergency occurs during a meeting event, refer to detailed instructions placed by ACS staff inside each meeting room to follow in case of emergencies. Report emergencies to the nearest security guard or to any ACS Operations Office during the meeting.
- If an emergency occurs outside an ACS event, contact police or emergency assistance by dialing 911 or seeking assistance from the facility where the emergency has occurred.
- Should a catastrophic event occur while the meeting is under way, follow safety and security instructions issued by the facility where you are located at the time of the event.

ACS will not be communicated until your registration is confirmed. On-site registration will be accepted on a space-available basis.

**ELECTRONIC DEVICES.** As a courtesy to other meeting attendees, electronic devices must be operated in silent or vibrate mode in technical or educational sessions. Cell phone conversations are not permitted in meeting rooms.

**EMERGENCIES DURING ACS MEETING EVENTS.** ACS will place detailed instructions in each meeting room to be used if an emergency occurs during an ACS meeting event. These instructions will

## GENERAL INFORMATION

revolve around following the established emergency guidelines of the facility where the emergency occurs. Report emergencies to the nearest security guard or to any ACS Operations Office during the meeting. Should a catastrophic event occur, attendees should follow safety and security instructions issued by the facility where they are located at the time of the event.

**HOST LOCAL SECTION.** ACS gratefully acknowledges the cooperation and assistance of the ACS California and Santa Clara Valley Local Sections and their members in handling local arrangements. Volunteers have planned many interesting activities; the Host Local Sections booth will be located in the Lower North Lobby.

**INTERNATIONAL REGISTRANTS.** Many international visitors are required to hold a visa prior to being admitted to the U.S. because of security measures in place at airports and other border crossings. All visa applicants are advised to apply for their visa in their home country as soon as possible. Detailed information for international attendees can be found at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017).

**INTERNET & COMPUTER SERVICES.** Use our electronic communication services before, during, and after the meeting. Once you get to the meeting, you can access your e-mail and the internet as well as your personal Meeting Mail mailbox from Meeting Mail terminals, which will be located throughout the Moscone Center.

**LITERATURE & PRODUCT DISTRIBUTION.** Promotions, posters, and literature distribution by attendees,

exhibitors, or other groups during the meeting must be done within their own contracted meeting space or exhibit booth and not in public meeting space, with the exception of designated marketing opportunities. No one is authorized to place any promotional items in public meeting space except the ACS Operations Office at a given location. Items left in violation of this policy will be removed and discarded. Literature distribution at specific division tables is under the control of that division, and permission must be secured from the division before placing any items on its table.

**LUGGAGE & COAT CHECK.** A luggage and coat check station will be available during registration hours from Sunday through Thursday in the North Lobby. Items left beyond published hours of operation will be turned over to building security at the end of each day.

**MEETING OFFICES.** The following ACS offices will be located in the Moscone Center:

**Attendee Registration:** North Lobby

**Career Fair:** Halls B & C

**Exhibitor Registration:** South Lobby

**Exposition:** Halls B & C

**Finance Office:** Room 110

**Host Local Section Center:** Lower North Lobby

**Member Services:** North Lobby

**Press Center:** South Lobby

**Shuttle Desk:** Outside West Lobby

The following offices are located at the identified properties:

### THANK YOU

The society thanks the many volunteers of the ACS California and Santa Clara Valley Sections who are contributing to the 253rd ACS National Meeting & Exposition as division officers or program chairs, symposium organizers, session or award presiders, oral and poster presenters, short course or workshop instructors, career consultants, and society governance members.

**Operations Offices:** Grand Hyatt San Francisco, Hilton San Francisco Union Square, Hotel Nikko San Francisco, InterContinental San Francisco, Palace Hotel, Parc 55 San Francisco, Park Central San Francisco, San Francisco Marriott Marquis, San Francisco Marriott Union Square, Sir Francis Drake Hotel, W San Francisco, Moscone Center.

**Governance Office:** San Francisco Union Square, Union Square 22

**Society Programs:** San Francisco Union Square, Nob Hill 2/3

**MOTHERS ROOM.** For your convenience and privacy, ACS will provide a room for nursing mothers at the Moscone Center. Please see the ACS Operations Office, South Lobby, for access to the room.

**SMOKING.** ACS policy prohibits smoking in all rooms during ACS functions at the convention center and official hotels. Additionally, the convention center and many of the official hotels are designated as smoke-free environments at all times.

# GOVERNANCE & BUSINESS MEETINGS

**MANY MEMBERS PARTICIPATE** in meetings concerning the business of the Society, technical divisions, and governance committees in conjunction with the meeting. On the following pages, you will find a listing of the open meetings scheduled for San Francisco. ACS encourages its members to get active in governance at all levels in order to contribute their vision to the direction of the Society. You can share ideas and insights into the Society and the chemical profession, network with peers, and catch up with friends through these volunteer connections. With nearly thirty national governance committees and leadership opportunities in technical divisions and local sections to choose from, there are many opportunities for

members to become actively involved in ACS at the national level. If you are an ACS member interested in volunteering for a governance committee, contact the Office of the Secretary by email at [secretary@acs.org](mailto:secretary@acs.org) or by phone 202-872-4461. Someone will put you

in contact with the ACS Committee on Committees to discuss your desire to volunteer for a committee assignment. If you wish to volunteer with a specific technical division or local section, contact the officers listed at [www.acs.org](http://www.acs.org) to explore your specific interests.

## ACS COUNCIL

The ACS Council meeting will begin at 8:00 AM, Wednesday, April 5, at the Hilton San Francisco Union Square. The meeting will be preceded by a continental breakfast for councilors beginning at 7:00 AM. Councilors are asked to check in beginning at 7:00 AM and proceed to the breakfast area, keeping in mind that the meeting starts promptly at 8:00 AM. Space will be available for ACS members and nonmembers to observe the council in action. We hope that many will take advantage of this opportunity to learn firsthand of the society's operation. Alternate councilors and division and local section officers are particularly urged to attend.

Golden Gate Bridge. SHUTTERSTOCK

# GOVERNANCE MEETINGS

## BOARD & COUNCIL MEETINGS

**ACS Board of Directors.** The ACS Board of Directors meeting, open to members who wish to participate, will be held in the Moscone Convention Center from noon to 1:00 PM on Sunday, April 2.

**ACS Council.** The ACS Council meeting will begin at 8:00 AM, Wednesday, April 5, at the Hilton San Francisco Union Square Hotel. The meeting will be preceded by a continental breakfast for councilors beginning at 7:00 AM. Councilors are asked to check in beginning at 7:00 AM and proceed to the breakfast area, keeping in mind that the meeting starts promptly at 8:00 AM. Space will be available for ACS members and nonmembers to observe the council in action. We hope that many will take advantage of this opportunity to learn firsthand of the society's operation. Alternate councilors and division and local section officers are particularly urged to attend.

## COUNCILOR CAUCUS MEETINGS

**District I Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 1/2

**District II Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 3/4

**District III Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 5/6

**District IV Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 15/16

**District V Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 17/18

**District VI Councilor Caucus**  
Sunday, April 2, 6:00 to 7:00 PM  
Hilton San Francisco Union Square  
Union Square 19/20

**Division Officers/Councilors Caucus**  
Tuesday, April 4, 4:00 to 6:00 PM  
Moscone Convention Center  
Room 132

## COMMITTEE AGENDA

**THE COMMITTEE ON COMMITTEES** has clarified three types of committee meetings:

**Open.** May be attended by any ACS member. At these sessions, members are encouraged to voice concerns, issue compliments, offer suggestions, express interest in, or raise questions about matters over which the committee has purview. The assumption is that participation is welcomed and will be orderly and courteous. Only committee members can vote.

**Executive.** Attendance and participation are limited to officially appointed/ elected committee members, associates, advisers, consultants, staff liaisons, and the appointed Committee on Committees liaison. Liaisons from other groups and ex officio and elected councilors may attend; participation by these groups would be at the invitation of the chair. Only committee members can vote.

**Closed.** The committee chair must declare any executive session closed when confidential or sensitive personnel, financial, or legal matters of the society are discussed. At that point, only officially appointed/elected committee members, associates, consultants, staff liaisons, and the

### COUNCIL POLICY COMMITTEE

The Council Policy Committee will open the floor during its meeting at 11:30 AM on Tuesday, April 4, to councilors who would like to raise issues of concern that affect them and/or their local sections or divisions. For further information, contact

appointed Committee on Committees liaison shall remain in the session. Others may stay in the session at the discretion of the chair. Once these discussions have been completed, the committee should return to executive mode. During the open and executive committee meetings, ACS members are given a chance to express their views on issues under consideration before these issues are acted on by the board or the council, or to bring up other subjects that deserve attention.

Members are urged to examine the agenda and make known any opinions or ideas they may have. If you cannot attend the particular sessions involved, write to the officers listed or ask someone attending the session to speak on your behalf. For further information, contact the officers listed.

## GOVERNANCE & BUSINESS MEETINGS

For the complete list of committee meetings and agendas, please consult [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) or the on-site program for the meeting.

### Budget & Finance

*Joseph A. Heppert, chair; b\_ffeedback@acs.org*

#### Open Meeting

Saturday, April 1, 8:00 to 10:30 AM  
Hilton San Francisco Union Square,  
Imperial Ballroom B

1. Report of the Chair
2. Report of the Treasurer & CFO:
  - a. Budgetary Performance Report for the Year Ended December 31, 2016
3. Reports from the Subcommittees:
  - a. Financial Impact of Constitution & Bylaw Changes
  - b. Communications
  - c. Program Funding Requests
  - d. Program Review

### Chemical Safety

*Elizabeth M. Howson, chair; safety@acs.org*

#### Open Executive Session

Monday, April 3, 8:30 to 11:30 AM  
Hilton San Francisco Union Square,  
Continental Ballroom 6

1. Welcome
2. Minutes of August 22 Meeting
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees and Task Forces:
5. New and Old Business

## Chemistry & Public Affairs

Raymond E. Forslund, chair; [reforslund@me.com](mailto:reforslund@me.com)

### Open Meeting

Saturday, April 1, 3:00 to 4:30 PM  
Hilton San Francisco Union Square,  
Continental Ballroom 4

1. Reports from the Subcommittees:
  - a. Member Advocacy
  - b. Public Policy
  - c. Fellowships
2. Committee Liaison Reports
3. Public Comment
4. Closing Comments

## Chemists with Disabilities

John J. Johnston, chair; USDA-FSIS, 2150 Centre Ave, Fort Collins, CO 80526-8116

### Open Executive Session

Sunday, April 2, 8:30 AM to 4:30 PM  
Hilton San Francisco Union Square,  
Continental 1/2

1. Welcome
2. Chair Report
  - a. Update of CWD Activities/Events, and Collaborative Opportunities
  - b. Diversity & Inclusion Advisory Group Report
  - c. Minutes from (Philadelphia 2016)
3. Strategic Planning Group Updates
4. Discussion on Gender Neutral/Gender Inclusive Pronouns
5. Discussion on Awards and Travel Grants
6. CWD Poster Project
7. ACS Fellows Program
8. CWD Visibility (Social Media)
9. Other Action Items from Philadelphia Meeting
10. Staff Report
11. Future Event and Programming Planning
12. Subcommittee Progress Reports
13. Reports of Liaisons to/from other committees
14. Ongoing Business
15. New Business

## Committees

Wayne E. Jones Jr., chair; Department of Chemistry, Binghamton University, SUNY, 4400 Vestal Pkwy. East, Binghamton, NY 13902-6000

### Open Meeting

Monday, April 3, 1:30 to 2:15 PM  
Hilton San Francisco Union Square,  
Continental 8/9

1. Welcome
2. Minutes of August 22-24, 2016
3. Reports of chair/staff liaison
4. Report of Subcommittees and Task Forces:
  - a. Diversity
  - b. Leadership Development
  - c. Society Committee Bylaws
5. Topics from floor

## Community Activities

Michael B. McGinnis, chair; dean, College of Science & Mathematics, Norwich University, 158 Harmon Dr., Northfield, VT 05663

### Executive Session

Sunday, April 2, 10:00 AM to noon  
Hilton San Francisco Union Square,  
Grand Ballroom A

1. Chair's welcome and comments
2. Reports from liaisons
3. Reports from subcommittees on:
  - a. Program Development and Promotion
  - b. Tools & Training
  - c. Volunteer Engagement and Recognition
4. New business

### CCA/LSAC Joint Open Meeting

Tuesday, April 4, 2:00 to 3:30 PM  
Hilton San Francisco Union Square

1. Report from the LSAC and CCA Executive Sessions
2. Interactive session: questions, answers and best practices

## Constitution & Bylaws

James C. Carver, chair, the Carver Law Firm, 451 Florida St., Ste. 750, Baton Rouge, LA; [bylaws@acs.org](mailto:bylaws@acs.org)

### Open Meeting

Sunday, April 2, 1:30 to 1:45 PM  
Hilton San Francisco Union Square,  
Golden Gate 8

Open forum to discuss bylaws, petitions, and other issues that may arise

### Executive Session

Sunday, April 2, 9:30 to 11:15 AM and 1:45 to 4:30 PM

Hilton San Francisco Union Square,  
Golden Gate 8

1. Petition on International Chemical Sciences Chapters
2. Petitions, procedures, IAC Charter bylaws, and other items for action by Council
3. Bylaw Templates, questions document, and model bylaws
4. Bulletin 5 review and discussion
5. Reports from liaisons
6. Status of unit bylaws
7. Other business

## Corporation Associates

Diane Grob Schmidt, chair; [d\\_schmidt@acs.org](mailto:d_schmidt@acs.org)

### Open Meeting

Monday, April 3, 8:00 AM to noon  
Hilton San Francisco Union Square,  
Continental Ballroom 4

1. Welcome
2. Approval of Minutes from San Diego, March 14, 2016
3. Chair's Report
4. Reports from Subcommittee Chairs
  - a. Strategic Investment and Awards
  - b. Public Policy
  - c. CA Relations
  - d. CA Member Value
5. Staff liaison report
6. New Business

## Council Policy

Mary K. Carroll, vice chair; [cpc@acs.org](mailto:cpc@acs.org)

### Open Executive Session

Tuesday, April 4, 9:30 AM to noon  
Hilton San Francisco Union Square,  
Imperial Ballroom A

1. Committee and Officer Reports
2. Report of CPC vice chair
3. Reports of Subcommittees on:

- a. Petitions, Constitution & Bylaws
- b. Long-Range Planning
- c. Nominations
4. Schedule of business sessions, fall 2017
5. Review of Council agenda
6. Open forum
7. Old and new business

## Divisional Activities

Rodney M. Bennett, chair; [rodbennetttdac@gmail.com](mailto:rodbennetttdac@gmail.com)

### Open Meeting

Sunday, April 2, 8:00 AM to noon  
Hilton San Francisco Union Square,  
Yosemite B

1. Welcome
2. Review San Francisco agenda
3. Minutes from 252nd ACS National Meeting in Philadelphia, PA
4. Allocation formula
5. DAC Chair Report
6. Subcommittee Reports

## Economic & Professional Affairs

Rick Ewing, chair; [ewingwre@comcast.net](mailto:ewingwre@comcast.net)

### Executive Session

Saturday, April 1, 8:00 to 10:30 AM  
Hotel Nikko San Francisco,  
Nikko Ballroom I/II

1. Opening Remarks
2. Invited Guest Reports
3. Staff Reports

### Open Meeting

Saturday, April 1, 10:30 AM to noon  
Hotel Nikko San Francisco,  
Nikko Ballroom I/II

1. Subcommittee Reports
  - a. Public Policy
  - b. Events, Volunteers and Employment Services
  - c. Marketing and Research
  - d. Standards and Ethics
2. Reports from Liaisons to and from CEPA
3. Ongoing Business/New Business

## Education

Diane Krone, chair; [kroned@alumni.stevens.edu](mailto:kroned@alumni.stevens.edu)

### Open Meeting

Monday, April 3, 3:00 to 4:00 PM  
Hilton San Francisco Union Square,  
Golden Gate 8

Review of meeting, as below, plus items from the floor.

### Executive Session

Friday, March 31, 1:00 to 5:30 PM  
Hotel Nikko San Francisco,  
Nikko Ballroom I/II

1. K-12 science topics, including ChemCom, ChemMatters, the American Association of Chemistry Teachers, High School Chemistry Clubs, Chemistry Olympiad, ACS-Hach programs, and teacher professional development
2. College/university topics, including undergraduate programs, graduate and postdoctoral education, ChemIDP, Chemistry in Context, and faculty development

Items 1-2 open to all Councilors with prior approval of the Chair

**Environmental Improvement**

Anthony "Tony" Noce, chair; cei@acs.org

**Breakfast/Open Meeting**

Monday, April 3, 7:45 to 9:00 AM

San Francisco Marriott Marquis, Nob Hill D

1. Review of the Saturday-Sunday CEI Executive Session
2. Overview of CEI activities in San Francisco
3. Planning of CEI activities in Washington
4. Preview of 2017 policy statement development (sustainability, scientific integrity)
5. Open discussion period

**Ethics**

Keith Vitense, chair; Cameron University, Physical Science Department, 2800 West Gore Blvd., Lawton, OK 73505-6320

**Open Executive Session**

Sunday, April 2, 9:00 AM to 4:30 PM

Hilton San Francisco Union Square, Golden Gate 7

1. Welcome & Introductions
2. Approval of Minutes from Philadelphia Meeting
3. Review of Committee on Ethics Charge
4. Chair/Staff Liaison Reports
5. Liaison Reports
6. Subcommittee Progress Reports
7. Committee Discussion
8. Subcommittee Working Sessions
9. Programming
10. Old Business/New Business/Action Items
11. Adjourn

**International Activities**

Ellene Tratras Contis, chair; c/o ACS Office of International Activities, 1155 16th St., N.W., Washington, D.C. 20036

**Open Meeting**

Saturday, April 1, 1:00 to 3:00 PM

Hilton San Francisco Union Square, Continental 1/2

1. Welcome
2. Minutes of August 20, 2016 IAC Meeting in Philadelphia
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees:
  - a. Subcommittee on Africa and the Americas
  - b. Subcommittee on Europe and the Middle East
  - c. Subcommittee on Asia/Pacific Rim
5. New Business

**Local Section Activities**

Jason E. Ritchie, chair; University of Mississippi Department of Chemistry & Biochemistry; 222 Coulter Hall, University, MS 38677; jritchie@olemiss.edu

**LSAC/CCA Joint Open Meeting**

Tuesday, April 4, 2:00 to 3:30 PM

Hilton San Francisco Union Square, Continental 1-3

1. Report from the LSAC and CCA Executive Sessions
2. Interactive session: questions, answers and best practices

**Open Executive Session**

Sunday, April 2, 8:00 AM to noon

Hilton San Francisco Union Square

1. Report of chair, subcommittee chairs, staff liaison
2. Review of petitions for Council consideration
3. Reports of committee liaisons

**Meetings & Expositions**

Kevin J. Edgar, chair; M&E@acs.org

**Open Executive Session**

Sunday, April 2, 7:30 to 10:00 AM

Moscone Center, Room 134

1. Welcome
2. Minutes from Philadelphia
3. Chair's Report
4. Subcommittee Reports
  - a. Expositions
  - b. Technical Programming
  - c. Regional Meetings

**Closed Executive Session**

Sunday, April 2, 10:00 AM to noon

Moscone Center, Room 134

1. Operations Subcommittee & Financial Report
2. Staff Liaison Report
3. New Business

**Membership Affairs**

Margaret J. Schooler, chair; 5 Alexander Court, Hockessin, DE 19707-9797; margaret.j.schooler@axaltacs.com

**Open Executive Session**

Sunday, April 2, 3:00 to 4:00 PM

Hilton San Francisco Union Square, Grand Ballroom B

1. Welcome
2. Minutes of August 21, 2016
3. Reports of Chair/Staff Liaison
4. Committee Strategic Planning Conference
5. Reports of Subcommittees
  - a. Categories & Dues
  - b. Retention, Benefits & Services
  - c. Recruitment & Admissions
6. International Chapter Recruiting Trial Extension
7. Board "Collaborative for Re-Imagining a Diverse ACS Membership"
8. Topics from floor

**Minority Affairs**

Madeleine Jacobs, chair; madeleine.s.jacobs@gmail.com

**Closed Executive Session**

Sunday, April 2, 8:00 AM to 12:30 PM

Hilton San Francisco Union Square, Continental Ballroom 4

1. Opening Remarks
2. Staff Report
3. Fall Meeting Minutes
4. Subcommittee Meetings

**Open Meeting**

Sunday, April 2, 12:30 to 2:00 PM

Hilton San Francisco Union Square, Continental Ballroom 4

1. Subcommittee Reports
2. Old Business
3. New Business

**Nomenclature, Terminology & Symbols**

Michael D. Mosher, chair; University of Northern Colorado; michael.mosher@unco.edu

**Open Meeting**

Monday, April 3, 2:00 to 5:00 PM

Hilton San Francisco Union Square, Continental Ballroom 5

1. Review minutes from 2016 Fall National Meeting
2. Chair/Staff Liaison reports
3. Subcommittee Reports
  - a. Communication/Outreach
  - b. Education
  - c. Liaison
  - d. Long Range Planning
4. IUPAC Reports
5. New Business

**Nominations & Elections**

Les W. McQuire, chair; nomelect@acs.org

**Open Executive Session**

Monday, April 3, 11:30 AM to noon

Hilton San Francisco Union Square, Imperial Ballroom A

1. Report of the Executive Session
2. Vote 2020 Task Force
3. Topics from floor

**Patents & Related Matters**

Sadiq Shah, chair; sadiq@utpa.edu

**Open Meeting**

Saturday, April 1, 9:00 AM to 5:00 PM

Hilton San Francisco Union Square, Imperial Ballroom A

1. Legislation & Regulation Subcommittee.
2. Education and Outreach Subcommittee.
3. Awards Subcommittee.
4. Executive Session

**Professional Training**

Thomas J. Wenzel, chair; Department of Chemistry, Bates College; cpt@acs.org

**Open Meeting**

Sunday, April 2, 4:00 to 5:00 PM

Hotel Nikko San Francisco, Peninsula

1. Macromolecular curriculum requirement
2. Value of ACS approval of chemistry programs
3. Value of ACS certification to students
4. Applying for ACS approval
5. CPT survey of online instruction and virtual labs
6. CPT symposium on undergraduate research
7. Topics from floor

**Project SEED**

Anna G. Cavinato, chair; department of chemistry, Eastern Oregon University, One University Blvd., LaGrande, OR 97850-2807

**Open Meeting**

Sunday, April 2, 9:30 to 10:30 AM

Hilton San Francisco Union Square, Union Square 15/16

1. Report from executive session
2. Topics from the floor

# GOVERNANCE & BUSINESS MEETINGS

## Closed Executive Session

Saturday, April 1, 10:30 AM to 5:00 PM

Hilton San Francisco Union Square,  
Union Square 17/18

1. Subcommittee meetings 10:30 AM to 12:00 noon
2. Minutes of August 20, 2016
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees:
5. Old and new business

## Publications

Nicole S. Sampson, chair; Department of  
Chemistry, Stony Brook University, Stony Brook,  
NY 11794-3400

## Open Meeting

Friday, March 31, 4:30 to 5:00 PM

Hotel Nikko San Francisco, Golden Gate

1. Updates from ACS Publications Division
2. Open Discussion

## Science

Mark C. Cesa, chair; markcesa@comcast.net

## Open Meeting

Saturday, April 1, 8:30 AM to 4:30 PM

Hilton San Francisco Union Square,  
Continental 3

1. Welcome
2. Approval of Minutes
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees:
  - a. Science and Technology,
  - b. Awards,
  - c. Public Policy and Communication
5. Subcommittee Breakouts
6. Subcommittee Reports from Breakouts

## Senior Chemists

Thomas R. Beattie, chair; silvercircle@acs.org

## Open Executive Session

Monday, April 3, 8:00 AM to 1:00 PM

Hilton San Francisco Union Square,  
Yosemite B

1. Welcome and Introductions
2. Minutes from November 2016 & February 2017 Meetings
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees and Task Forces:
  - a. Newsletter of Senior Chemists
  - b. Programming for Senior Chemists
  - c. Consulting and Mentoring
  - d. SCC Group on the ACS Network
  - e. ACS Local Section Subcommittee
  - f. Community Education Subcommittee
  - g. ChemLuminary Award Nominations 2017
  - h. ACS Fellows Nomination Subcommittee
5. Senior Chemists Breakfast in San Francisco
6. Open Discussion/General Information

## Technician Affairs

Kara M. Allen, chair; cta@acs.org

## Closed Executive Session

Sunday, April 2, 8:00 AM to 12:30 PM

Hilton San Francisco Union Square,  
Continental Ballroom 6

## Open Executive Session

Sunday, April 2, 12:30 to 1:00 PM

Hilton San Francisco Union Square,  
Continental Ballroom 6

1. Welcome and Introductions
2. Review of Philadelphia Minutes, August 21, 2016
3. Reports of Chair/Staff Liaison
4. Report of Subcommittees and Task Forces:
  - a. Communications Subcommittee
  - b. Awards & Recognition Subcommittee
  - c. Professional Development Subcommittee
5. Topics from floor/Meeting feedback/Wrap-up
6. Open Executive Session

## Women Chemists

Laura Sremaniak, chair; wcc@acs.org

## Closed Executive Session

Saturday, April 1, 8:00 AM to 5:00 PM

Hilton San Francisco Union Square,  
Continental Ballroom 6

1. Welcome
2. Review of Fall Action Items & Minutes
3. Reports of Chair/Staff Liaison
4. Subcommittee Meetings
5. Reports of Subcommittees and Task Forces:
  - a. Awards & Recognition
  - b. Communications & Technology
  - c. Professional Development
  - d. Programs & Events
6. New Business

## Younger Chemists

Natalie A. LaFranzo, chair; nlafranzo@gmail.com

## Open Meeting

Sunday, April 2, 8:00 AM to noon

Hilton San Francisco Union Square,  
Continental Ballroom 5

1. Welcome
2. Staff Report
3. Subcommittee Reports
  - a. Communications
  - b. Governance Interface and Outreach
  - c. Membership Engagement
4. Liaison Reports
5. Petitions (CLOSED)
6. New Business
7. Visitors
8. Adjourn

## Executive Session

Sunday, April 2, noon to 1:00 PM

Hilton San Francisco Union Square,  
Continental Ballroom 5

Closed

# DIVISION MEETINGS & SOCIAL EVENTS

## Division of Agricultural & Food Chemistry — AGFD

AGFD Poster Session Reception	Sunday, April 2	5:00 PM - 7:00 PM	West Hall, Moscone Convention Center
AGFD Future Program Meeting	Monday, April 3	12:00 PM - 1:00 PM	Yoskemite A, Hilton San Francisco Union Square
AGFD Executive Committee Meeting (CLOSED)	Monday, April 3	5:00 PM - 8:00 PM	Yoskemite A, Hilton San Francisco Union Square
AGFD Business Meeting	Tuesday, April 4	12:00 PM - 1:00 PM	Yoskemite A, Hilton San Francisco Union Square

## Division of Analytic Chemistry — ANYL

ANYL Division Reception	Tuesday, April 4	5:00 PM - 7:30 PM	Golden Gate 2, Hilton San Francisco Union Square
ANYL Chemical Forensics International Technical Working Group Workshop	Wednesday, April 5	8:30 AM - 5:00 PM	Continental 4, Hilton San Francisco Union Square
ANYL Poster Session	Sunday, April 2	7:00 AM - 9:00 PM	West Hall, Moscone Convention Center

## Division of Biochemical Technology — BIOT

Registration Table	Sunday, April 2	7:00 AM - 9:00 PM	SoMa, InterContinental San Francisco
Lunch Seminar	Sunday, April 2	12:30 PM - 2:00 PM	Intercontinental A, InterContinental San Francisco
Registration Table	Monday, April 3	7:00 AM - 9:00 PM	SoMa, InterContinental San Francisco
Lunch Seminar	Monday, April 3	12:30 PM - 2:00 PM	Intercontinental A, InterContinental San Francisco
Executive Committee Meeting (CLOSED)	Monday, April 3	7:00 PM - 10:00 PM	Marina, InterContinental San Francisco
Registration Table	Tuesday, April 4	7:00 AM - 9:00 PM	SoMa, InterContinental San Francisco
Lunch Seminar	Tuesday, April 4	12:30 PM - 2:00 PM	Intercontinental A, InterContinental San Francisco
BIOT Poster Session Social	Tuesday, April 4	6:00 PM - 8:00 PM	West Hall, Moscone Convention Center
Registration Table	Wednesday, April 5	7:00 AM - 9:00 PM	SoMa, InterContinental San Francisco
Lunch Seminar	Wednesday, April 5	12:30 PM - 2:00 PM	Intercontinental A, InterContinental San Francisco
Program Chair Meeting (CLOSED)	Wednesday, April 5	12:30 PM - 2:00 PM	Russian Hill, InterContinental San Francisco
Future Programming Meeting	Wednesday, April 5	12:30 PM - 2:00 PM	Intercontinental B, InterContinental San Francisco
Registration Table	Thursday, April 6	7:00 AM - 9:00 PM	SoMa, InterContinental San Francisco

## Division of Biological Chemistry — BIOL

BIOL Poster Session/Social	Sunday, April 2	7:00 PM - 9:00 PM	West Hall, Moscone Convention Center
BIOL Poster Session/Social	Tuesday, April 4	7:00 PM - 9:00 PM	West Hall, Moscone Convention Center

## Division of Business Development & Management — BMGT

Governance Meeting	Sunday, April 2	12:00 PM - 1:00 PM	Carmel I, Hotel Nikko San Francisco
--------------------	-----------------	--------------------	-------------------------------------

## GOVERNANCE & BUSINESS MEETINGS

### Division of Catalysis & Surface Science — CATL

CATL Business Meeting	Monday, April 3	5:30 PM - 7:30 PM	Market Street, Parc 55 San Francisco
-----------------------	-----------------	-------------------	--------------------------------------

### Division of Cellulose & Renewable Materials — CELL

Executive Committee Meeting (CLOSED)	Saturday, April 1	4:00 PM - 7:30 PM	Room 262, Moscone Convention Center
Awards Banquet (TICKETED EVENT))	Tuesday, April 4	6:30 PM - 10:00 PM	Chart House @ Pier 39
Governance Meeting	Wednesday, April 5	5:30 PM - 7:30 PM	Room 274, Moscone Convention Center
Technical Program Meeting	Wednesday, April 5	7:30 PM - 8:00 PM	Room 274, Moscone Convention Center

### Division of Chemistry & Law — CHAL

Drug & Power Luncheon (TICKETED EVENT)	Monday, April 3	12:00 PM - 1:30 PM	Mourad, 140 New Montgomery Street
CHAL Reception	Monday, April 3	6:00 PM - 8:00 PM	Jillian's, 175 Fourth Street

### Division of Chemical Health & Safety — CHAS

Laboratory <del>CANCELLED</del> ment Workshop	Friday, March 31	8:00 AM - 5:00 PM	Room 120, Moscone Convention Center
The Laboratory Safety Workshop	Friday, March 31	8:00 AM - 5:00 PM	Room 121, Moscone Convention Center
Cannabis <del>CANCELLED</del> lysis Workshop	Saturday, April 1	8:00 AM - 5:00 PM	Room 120, Moscone Convention Center
How to be an Effective Chemical Hygiene Officer	Saturday, April 1	8:00 AM - 5:00 PM	Room 121, Moscone Convention Center
Reactive Chemical Management for Laboratories & Pilot Plants	Saturday, April 1	8:00 AM - 5:00 PM	Room 125, Moscone Convention Center
Using ACS <del>CANCELLED</del> each Lab Safety	Saturday, April 1	8:00 AM - 5:00 PM	Room 124, Moscone Convention Center
Executive Committee Meeting	Sunday, April 2	8:00 AM - 12:00 PM	Franciscan I, Park Central San Francisco
Cannabis Subdivision Lunch (CLOSED)	Monday, April 3	11:45 AM - 1:15 PM	Concordia, Parck Central San Francisco

### Division of Chemical Education — CHED

CHED Meeting - (CLOSED)	Friday, March 31	2:00 PM - 6:00 PM	Sierra A, San Francisco Marriott Marquis
Exams Institute Board of Trustees	Saturday, April 1	7:30 AM - 12:00 PM	Sierra A, San Francisco Marriott Marquis
Board of Publication	Saturday, April 1	7:30 AM - 12:00 PM	Sierra B, San Francisco Marriott Marquis
Biennial Conference on Chemical Education Meeting	Sunday, April 2	8:00 AM - 9:30 AM	Golden Gate Ballroom C3, San Francisco Marriott Marquis
GC18F Exams (CLOSED)	Saturday, April 1	8:00 AM - 5:00 PM	Sierra J, San Francisco Marriott Marquis
PH19 Exams (CLOSED)	Saturday, April 1	8:00 AM - 5:00 PM	Sierra H, San Francisco Marriott Marquis
GC18 Exams (CLOSED)	Saturday, April 1	8:00 AM - 5:00 PM	Sierra F, San Francisco Marriott Marquis
GC17PQ Exams (CLOSED)	Saturday, April 1	8:00 AM - 5:00 PM	Sierra E, San Francisco Marriott Marquis
Program Committee Meeting	Saturday, April 1	10:30 AM - 12:30 PM	Sierra C, San Francisco Marriott Marquis
Executive Committee Meeting	Saturday, April 1	1:00 PM - 5:30 PM	Golden Gate Ballroom B, San Francisco Marriott Marquis
International Activities Committee Meeting	Sunday, April 2	8:00 AM - 9:30 AM	Salon 1, San Francisco Marriott Marquis
OR17F Exams (CLOSED)	Sunday, April 2	8:00 AM - 5:00 PM	Sierra E, San Francisco Marriott Marquis
ACS Exams Workshop	Sunday, April 2	8:00 AM - 5:00 PM	Sierra F, San Francisco Marriott Marquis
Finance Committee Meeting (CLOSED)	Sunday, April 2	9:30 AM - 11:30 AM	Sierra H, San Francisco Marriott Marquis
Research Committee Meeting	Sunday, April 2	12:00 PM - 1:30 PM	Sierra H, San Francisco Marriott Marquis
High School/College Interface Luncheon (TICKETED EVENT)	Sunday, April 2	12:00 PM - 1:00 PM	Salon 7, San Francisco Marriott Marquis
Regional Meeting Committee	Sunday, April 2	12:00 PM - 2:00 PM	Sierra G, San Francisco Marriott Marquis

## GOVERNANCE & BUSINESS MEETINGS

Long Range Planning Committee	Sunday, April 2	2:30 PM - 4:30 PM	Sierra G, San Francisco Marriott Marquis
CHED Safety Committee Meeting	Sunday, April 2	4:00 PM - 5:30 PM	Sierra H, San Francisco Marriott Marquis
Social Reception	Sunday, April 2	5:30 PM - 7:00 PM	Room 130, Moscone Convention Center
Younger Chemistry Education Scholars Committee Meeting	Monday, April 3	9:30 AM - 5:00 PM	Sierra H, San Francisco Marriott Marquis
New Member Committee Meeting	Monday, April 3	12:00 PM - 12:30 PM	Salon 1/2
Business Meeting	Monday, April 3	12:00 PM - 12:30 PM	Salon 1/2, San Francisco Marriott Marquis
ACS Exams Workshop (CLOSED)	Monday, April 3	12:30 PM - 1:00 PM	Sierra F, San Francisco Marriott Marquis

### Division of Chemical Information — CINF

Awards Committee Meeting (CLOSED)	Saturday, April 1	12:30 PM - 2:30 PM	City Room, Pack Central San Francisco
Education Committee Meeting (CLOSED)	Saturday, April 1	12:30 PM - 2:30 PM	Franciscan II, Park Central San Francisco
Program/Executive Committee Meeting (CLOSED)	Saturday, April 1	12:30 PM - 6:00 PM	Franciscan I, Park Central San Francisco
Chemical Structure Association (CSAT) Meeting (CLOSED)	Sunday, April 2	12:00 PM - 2:00 PM	Franciscan II, Park Central San Francisco
Welcome Reception and Poster Session	Sunday, April 2	6:30 PM - 8:30 PM	Franciscan I & II, Park Central San Francisco
Luncheon (TICKETED EVENT)	Tuesday, April 4	12:00 PM - 1:30 PM	Franciscan I, Park Central San Francisco
Chemistry Research Data Interest Group (Research Data Alliance)	Wednesday, April 5	1:00 PM - 5:00 PM	Franciscan I, Park Central San Francisco

### Division of Colloid & Surface Chemistry — COLL

Program & Executive Committee Meeting (CLOSED)	Saturday, April 1	4:00 PM - 7:00 PM	Room 133, Moscone Convention Center
Poster Session/Social Hour	Sunday, April 2	5:30 PM - 8:00 PM	Halls B/C, Moscone Convention Center
Division Luncheon (TICKETED)	Tuesday, April 4	12:00 PM - 1:30 PM	Great Room I, W San Francisco

### Division of Computers in Chemistry — COMP

Executive Committee Meetings	Saturday, April 1	3:00 PM - 6:00 PM	Grand Ballroom B, InterContinental San Francisco
Poster Session	Tuesday, April 4	6:00 PM - 8:00 PM	West Hall, Mocone Convention Center

### Division of Energy & Fuel — ENFL

Energy and Fuels Program Meeting	Sunday, April 2	12:00 PM - 2:00 PM	Redwood B, Grand Hyatt San Francisco
ENFL Executive Meeting	Sunday, April 2	4:00 PM - 7:00 PM	Sunset A/B, Grand Hyatt San Francisco
Energy and Fuel Business Meeting	Monday, April 3	5:00 PM - 7:00 PM	Grand Ballroom West, Grand Hyatt San Francisco
ENFL Dinner (TICKETED)	Tuesday, April 4	6:30 PM - 9:00 PM	Le Colonial, 20 Cosmo Place

### Division of Environmental Chemistry — ENVR

Program Planning Committee Meeting	Sunday, April 2	2:00 PM - 3:00 PM	Golden Gate Blrm C3, San Francisco Marriott Marquis
Long Range Planning Committee	Sunday, April 2	3:00 PM - 5:00 PM	Golden Gate Blrm C3, San Francisco Marriott Marquis
Executive Committee Meeting	Sunday, April 2	7:00 PM - 10:00 PM	Golden Gate Blrm C3, San Francisco Marriott Marquis
Division Reception (TICKETED EVENT)	Tuesday, April 4	6:00 PM - 8:00 PM	Thirsty Brewery Company, 661 Howard Street

### Division of Geochemistry — GEOC

Executive Committee Meeting (CLOSED)	Sunday, April, 2	6:00 PM - 8:00 PM	Russian Hill, San Francisco Marriott Union Square
Social Event (CLOSED)	Tuesday, April 4	5:30 PM - 7:30 PM	Empire Ballroom, Sir Francis Drake

## GOVERNANCE & BUSINESS MEETINGS

### Division of History of Chemistry — HIST

Executive Committee Meeting (CLOSED)	Sunday, April 2	5:00 PM - 8:00 PM	Redwood B, Grand Hyatt San Francisco
--------------------------------------	-----------------	-------------------	--------------------------------------

### Division of Industrial & Engineering Chemistry — I&EC

I&EC Subdivision, Steering & Programming Meeting (CLOSED)	Saturday, April 1	11:00 AM - 3:00 PM	Russian Hill, San Francisco Marriott Union Square
---	-------------------	--------------------	---

### Division of Inorganic Chemistry — INOR

INOR Poster Session/Social	Sunday, April 2	5:30 PM - 7:30 PM	Hall D, Moscone Convention Center
INOR Poster Session/Social	Tuesday, April 4	5:30 PM - 7:30 PM	Hall D, Moscone Convention Center

### Division of Medicinal Chemistry — MEDI

Executive Committee Meeting (CLOSED)	Sunday, April 2	8:30 AM - 1:00 PM	Room 133, Moscone Convention Center
Business Meeting (CLOSED)	Sunday, April 2	5:30 PM - 6:30 PM	Room 133, Moscone Convention Center
General Poster Session	Sunday, April 2	7:00 PM - 9:00 PM	West Hall, Moscone Convention Center
MEDI Long Range Planning Committee (CLOSED)	Monday, April 3	5:30 PM - 10:00 PM	Great Room 1, W San Francisco
MEDI & ORGN General Poster Session	Wednesday, April 5	7:00 PM - 11:00 PM	West Hall, Moscone Convention Center

### Division of Nuclear Chemistry & Technology — NUCL

Executive Committee Meeting (CLOSED)	Sunday, April 2	5:00 PM - 7:00 PM	Esplanade Blrm 308, Moscone Convention Center
Business Meeting	Tuesday, April 4	5:00 PM - 6:00 PM	Room 134, Moscone Convention Center
NUCL Social Hour	Tuesday, April 4	6:00 PM - 8:00 PM	Room 130, Moscone Convention Center

### Division of Organic Chemistry — ORGN

Executive Committee Meeting (CLOSED)	Sunday, April 2	1:00 PM - 6:00 PM	Room 134, Moscone Convention Center
ORGN Poster Session/Social	Sunday, April 2	5:30 PM - 7:30 PM	West Hall, Moscone Convention Center

### Division of Physical Science — PHYS

Executive Committee Meeting (CLOSED)	Sunday, April 2	4:30 PM - 7:30 PM	Powell Room, Parc 55 San Francisco - A Hilton Hotel
Molssi Kick-Off Reception	Tuesday, April 4	5:30 PM - 7:30 PM	Bayview, Hotel Nikko San Francisco
Division Poster Session	Wednesday, April 5	6:00 PM - 8:00 PM	Hall D, Moscone Convention Center

### Division of Polymeric Materials — PMSE

Membership Desk	Sunday, April, 2	8:00 AM - 5:00 PM	Esplanade Ballroom Foyer, Moscone Convention Center
Executive Committee Meeting (CLOSED)	Sunday, April 2	4:30 PM - 7:00 PM	Room 132, Moscone Convention Center
Membership Desk	Monday, April 3	8:00 AM - 5:00 PM	Esplanade Ballroom Foyer, Moscone Convention Center
Business Meeting and PMSE/POLY Coordination	Monday, April 3	5:00 PM - 6:00 PM	2nd Floor, Area 2, Moscone Center West
Membership Desk	Tuesday, April 4	8:00 AM - 5:00 PM	Esplanade Ballroom Foyer, Moscone Convention Center
PMSE/POLY Joint Poster Session/Social	Tuesday, April 4	6:00 PM - 8:00 PM	Hall A, Moscone Center
Membership Desk	Wednesday, April 5	8:00 AM - 5:00 PM	Esplanade Ballroom Foyer, Moscone Convention Center
Membership Desk	Thursday, April 6	8:00 AM - 5:00 PM	Esplanade Ballroom Foyer, Moscone Convention Center

## GOVERNANCE & BUSINESS MEETINGS

### Division of Polymer Chemistry — POLY

Membership Desk	Sunday, April 2	8:00 AM - 5:00 PM	Rooms 120-123 Foyer, Moscone Convention Center
Workshop Committee (CLOSED)	Sunday, April 2	11:00 AM - 12:00 PM	Room 132, Moscone Convention Center
Board Meeting	Sunday, April 2	12:00 PM - 2:00 PM	Room 132, Moscone Convention Center
International Committee Meeting (CLOSED)	Sunday, April 2	2:00 PM - 4:00 PM	2nd Floor, Area 1, Moscone Center West
Strategic & Long Range Planning Meeting (CLOSED)	Sunday, April 2	4:00 PM - 5:30 PM	2nd Floor, Area 1, Moscone Center West
Membership Desk	Monday, April 3	8:00 AM - 5:00 PM	Rooms 120-123 Foyer, Moscone Convention Center
Financial/Executive Planning Meeting (CLOSED)	Monday, April 3	12:00 PM - 2:00 PM	2nd Floor, Area 1, Moscone Center West
Industrial Advisory Board Meeting (CLOSED)	Tuesday, April 4	8:00 AM - 10:00 AM	Room 133, Moscone Convention Center
Membership Desk	Tuesday, April 4	8:00 AM - 5:00 PM	Rooms 120-123 Foyer, Moscone Convention Center
POLY/IPEC Meeting (CLOSED)	Tuesday, April 4	9:00 AM - 12:00 PM	2nd Floor, Area 1, Moscone Center West
Programming Committee Meeting	Tuesday, April 4	1:00PM - 2:00 PM	Room 2000, Moscone Convention Center West
Membership Committee Meeting (CLOSED)	Tuesday, April 4	2:00 PM - 3:00 PM	2nd Floor, Area 1, Moscone Center West
PMSE/POLY Joint Poster Session/Social	Tuesday, April 4	6:00 PM - 8:00 PM	Hall A, Moscone Center
Membership Desk	Wednesday, April 5	8:00 AM - 5:00 PM	Rooms 120-123 Foyer, Moscone Convention Center
POLY/PMSE Award Lecture & Reception	Wednesday, April 5	5:30 PM - 8:00 PM	Room 134, Moscone Convention Center
Membership Desk	Thursday, April 6	8:00 AM - 5:00 PM	Rooms 120-123 Foyer, Moscone Convention Center

### Division of Professional Relations — PROF

Executive Committee Meeting	Tuesday, April 4	3:00 PM - 5:00 PM	Nikko Ballroom II, Hotel Nikko San Francisco
Henry Hill & Lou Sacco Award Reception	Tuesday, April 4	5:00 PM - 7: 00 PM	Nikko Ballroom II, Hotel Nikko San Francisco

### Division of Small Chemical Business — SCHB

Executive Committee	Sunday, April 2	8:00 AM - 11:30 AM	Monterey II, Hotel Nikko San Francisco
---------------------	-----------------	--------------------	--

## SOCIAL & EDUCATIONAL EVENTS

### PRESIDENTIAL EVENTS

**ACS President Allison Campbell** welcomes attendees to the 253rd ACS National Meeting. The presidential and cosponsored event symposia will focus on areas of significant importance: the health of our planet, the safe practice of science, and strong technical programming.

The first symposium, "**LGBT Graduate & Postdoctoral Student Chemistry Research**," is organized by the Division of Professional Relations. This two-day symposium on Sunday, April 2 and Monday, April 3 will consist of scientific talks by LGBT graduate and postdoctoral students and will conclude with a panel discussion on issues that affect LGBT students and postdocs. Later Sunday afternoon at 1:20 PM, the symposium "**Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal**" will focus on a 1995 issue in the journal that sought to spotlight critical areas of chemistry and will assess the progress in these areas since then.

On Monday, April 3, from 8:30 AM to 4:30 PM, the symposium "**Science for a Sustainable Energy Future**" will highlight scientific advances for creating and storing sustainable, low-carbon energy. The symposium will focus on advances in energy storage in the morning session and chemical and biological approaches to energy conversion in the afternoon.

Thirteen **president-recommended** symposia focus on issues of safety, communicating science, highlighting up-and-coming graduate researchers, and celebrating diverse practitioners of chemistry. Details of these presidential events and other recommended symposia can be found at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017).

### ACS 2017 NATIONAL AWARD WINNERS

**THE ACS NATIONAL AWARDS** recognize individual and team accomplishments in diverse fields of the chemical sciences. Award recipients traditionally receive their national award in person during the ACS awards dinner and general meeting and deliver an award address on the scientific work that is being recognized to an appropriate division.

This year's event will be held on the evening of Tuesday, April 4, at the San Francisco Marriott Marquis, Yerba Buena Ballroom, Salons 8/9. Dinner begins at 7:30 PM, and the general meeting begins at 8:30 PM.

Tobin J. Marks will deliver the Priestley Medal Address at the general meeting. See Ticketed Events on page 38 for ticket information.

Several awards, such as the Arthur C. Cope Scholar Awards and the Arthur C. Cope Award, will be presented at the Arthur C. Cope Symposium in conjunction with the 254th ACS National Meeting in Washington, D.C. in August.

**ACS Award for Achievement in Research for the Teaching & Learning of Chemistry**, sponsored by the ACS Exams Institute, **Marcy H. Towns**, Purdue University. Address to be presented before the Division of Chemical Education. April 3; San Francisco Marriott Marquis; Salons 1/2; 3:55 PM.

**ACS Award for Affordable Green Chemistry**, sponsored by Dow Chemical Co. and endowed by Rohm and Haas, **Peter J. Dunn**, Pfizer (retired). Address to be presented before the Division of Industrial & Engineering Chemistry. April 4; Grand Hyatt San Francisco; Fillmore C; 11:35 AM.

**ACS Award for Computers in Chemical & Pharmaceutical Research**, sponsored by the ACS Division of Computers in Chemistry, **Yvonne Connolly Martin**, Abbott Laboratories, AbbVie. Address to be presented before the Division of Computers in Chemistry. April 4; InterContinental San Francisco; Laurel Hill; 4:15 PM.

**ACS Award for Creative Advances in Environmental Science & Technology**, sponsored by the ACS Division of Environmental Chemistry and the ACS Publications journals Environmental Sci-

ence & Technology and Environmental Science & Technology Letters, **Douglas R. Worsnop**, Aerodyne Research and University of Helsinki, Finland. Address to be presented before the Division of Environmental Chemistry. April 4; San Francisco Marriott Marquis; Salons 10/11; 4:15 PM.

**ACS Award for Creative Invention**, sponsored by ACS Corporation Associates, **Richard B. Silverman**, Northwestern University. Address to be presented before the Division of Medicinal Chemistry. April 4; Moscone Center; 3002/3004; 10:30 AM.

**ACS Award for Creative Work in Fluorine Chemistry**, sponsored by the ACS Division of Fluorine Chemistry, **Antonio Togni**, Swiss Federal Institute of Technology, (ETH) Zurich. Address to be presented before the Division of Fluorine Chemistry. April 3; Grand Hyatt San Francisco; Sequoia; 11:15 AM.

**ACS Award for Creative Work in Synthetic Organic Chemistry**, sponsored by MilliporeSigma, **Matthew S. Sigman**, University of Utah. Address to be presented before the Division of Organic Chemistry. April 4; Moscone Center; 3018/3022; 11:15 AM.

**ACS Award for Distinguished Service in the Advancement of Inorganic Chemistry**, sponsored by Strem Chemicals, **William B. Tolman**, University of Minnesota, Twin Cities. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 8:15 AM.

**ACS Award for Encouraging Disadvantaged Students into Careers in the Chemical Sciences**, sponsored by the Camille and Henry Dreyfus Foundation, **Sandra Yancy McGuire**, Louisiana State University. Address to be presented before the Division of Chemical Education. April 4; San Francisco Marriott Marquis; Salons 3/4; 10:35 AM.

**ACS Award for Encouraging Women into Careers in the Chemical Sciences**, sponsored by the Camille and Henry Dreyfus Foundation, **Judith M. Iriarte-Gross**, Middle Tennessee State University. Address to be presented before the ACS Women Chemists Committee and the Division of Chemical Education. April 4; Hotel Nikko San Francisco; Monterey II; 10:50 AM.

**ACS Award for Research at an Undergraduate Institution**, sponsored by Research Corporation for Science Advancement, **Maria R. Hepel**, SUNY at Potsdam. Address to be presented before the Division of Colloid and Surface Chemistry. April 4; Moscone Center; 2002; 3:45 PM.

**ACS Award for Team Innovation**, sponsored by ACS Corporation Associates, **Robert A. DeVries**, R DeVries Consulting, LLC; **Philip E. Garrou**, Microelectronic Consultants of North Carolina; **Carol E. Mohler** and **Theodore M. Stokich, Jr. (Ted)**, Dow Chemical; **Eric Scott Moyer**, LORD Corporation. Address to be presented before the Division of Polymeric Materials: Science & Engineering. April 5; Moscone Center; Esplanade Ballroom 307; 3:40 PM.

**ACS Award in Analytical Chemistry**, sponsored by the Battelle Memorial Institute, **Donald Frederick Hunt**, University of Virginia. Address to be presented before the Division of Analytical Chemistry. April 3; Hilton San Francisco Union Square; Franciscan D; 4:00 PM.

**ACS Award in Applied Polymer Science**, sponsored by Eastman Chemical, **Zhenan Bao**, Stanford University. Address to be presented before the Division of Polymeric Materials: Science & Engineering. April 3; Moscone Center; Esplanade Ballroom 304; 4:30 PM.

**ACS Award in Chromatography**, sponsored by MilliporeSigma, **Robert T. Kennedy**, University of Michigan. Address to be presented before the Division of Analytical Chemistry. April 3; Hilton San Francisco Union Square; Franciscan D; 10:55 AM.

**ACS Award in Colloid Chemistry**, sponsored by Colgate-Palmolive Co., **Nicholas Alexander Kotov**, University of Michigan. Address to be presented before the Division of Colloid & Surface Chemistry. April 4; Moscone Center; 2002; 2:05 PM.

**ACS Award in Industrial Chemistry**, sponsored by the ACS Division of Industrial & Engineering Chemistry, **Jane Frommer**, IBM Research. Address to be presented before the Division of Industrial & Engineering Chemistry

and the Division of Organic Chemistry. April 3; Grand Hyatt San Francisco; Fillmore C; 1:35 PM.

**ACS Award in Inorganic Chemistry**, sponsored by Aldrich Chemical Co., LLC, **Lawrence Que, Jr.**, University of Minnesota, Twin Cities. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 9:20 AM.

**ACS Award in Organometallic Chemistry**, sponsored by the Dow Chemical Co. Foundation, **Marcetta Y. Darensbourg**, Texas A&M University. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 10:10 AM.

**ACS Award in Polymer Chemistry**, sponsored by ExxonMobil Chemical, **Murugappan Muthukumar**, University of Massachusetts, Amherst. Address to be presented before the Division of Polymer Chemistry. April 5; Moscone Center; Esplanade Ballroom 310; 4:30 PM.

**ACS Award in Pure Chemistry**, sponsored by the Alpha Chi Sigma Fraternity and the Alpha Chi Sigma Educational Foundation, **Neal K. Devaraj**, University of California, San Diego. Address to be presented before the Division of Biological Chemistry. April 2; Moscone Center; 3014/3016; 4:30 PM.

**ACS Award in Separations Science & Technology**, sponsored by Waters Corp., **Rakesh Agrawal**, Purdue University. Address to be presented before the Industrial & Engineering Chemistry Separations Science & Technology Symposium at the fall ACS national meeting in Washington, D.C.

**ACS Award in Surface Chemistry**, sponsored by the ACS Division of Colloid & Surface Chemistry, **Cynthia M. Friend**, Harvard University. Address to be presented before the Division of Colloid & Surface Chemistry. April 4; Moscone Center; 2002; 2:55 PM.

**ACS Award in the Chemistry of Materials**, sponsored by DuPont, **Douglas A. Keszler**, Oregon State University. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 11:40 AM.

**ACS Award in Theoretical Chemistry**, sponsored by the ACS Division of Physical Chemistry, **Peter Pulay**, University of Arkansas. Address to be presented before the Division of Physical Chemistry. April 4; Parc 55 San Francisco; Embarcadero; 11:00 AM.

**Award for Volunteer Service to the American Chemical Society**, sponsored by ACS, **D. Richard Cobb**, Eastman Kodak Company (retired). Address to be presented before the ACS ChemLuminary Awards at the fall ACS national meeting in Washington, D.C.

**Roger Adams Award in Organic Chemistry**, sponsored by Organic Reactions, Inc. and Organic Syntheses, Inc., **Hisashi Yamamoto**, Chubu University, Japan. Address to be presented before the National Organic Chemistry Symposium in Davis, CA.

**Alfred Bader Award in Bioinorganic or Bioorganic Chemistry**, sponsored by the Alfred R. Bader Fund, **Kim D. Janda**, Scripps Research Institute. Address to be presented before the Division of Organic Chemistry at the fall ACS national meeting in Washington, D.C.

**Earle B. Barnes Award for Leadership in Chemical Research Management**, sponsored by the Dow Chemical Co. Foundation, **Laurie E. Locascio**, National Institute of Standards & Technology. Address to be presented before the Division of Analytical Chemistry at the fall ACS national meeting in Washington, D.C.

**Ronald Breslow Award for Achievement in Biomimetic Chemistry**, sponsored by the Ronald Breslow Award Endowment, **Benjamin G. Davis**, University of Oxford, England. Address to be presented before the Division of Biological Chemistry. April 2; Moscone Center; 131; 11:40 AM.

**Herbert C. Brown Award for Creative Research in Synthetic Methods**, sponsored by the Purdue Borane Research Fund and the Herbert C. Brown Award Endowment, **Bruce H. Lipshutz**, University of California, Santa Barbara. Address to be presented before the Division of Organic Chemistry. April 2; Moscone Center; 3018/3022; 4:00 PM.

**James Bryant Conant Award in High School Chemistry Teaching**, sponsored by the Journal of Chemical Education and ChemEd X, **Laura Elizabeth Slocum**, Heathwood Hall Episcopal School, South Carolina. Address to be presented before the Division of Chemical Education. April 2; San Francisco Marriott Marquis; Golden Gate C2/C3; 1:10 PM.

**Arthur C. Cope Award**, sponsored by the Arthur C. Cope Fund, **Carolyn R. Bertozzi**, Stanford University and Howard Hughes Medical Institute. Address to be presented before the Division of Organic Chemistry at the fall ACS national meeting in Washington, D.C.

**Arthur C. Cope Scholar Awards**, sponsored by the Arthur C. Cope Fund, **Alejandro L. Briseno**, University of Massachusetts, Amherst; **Sherry R. Chemler**, University of Buffalo, SUNY; **Guangbin Dong**, University of Texas at Austin and University of Chicago; **P. Andrew Evans**, Queen's University; **M.G. Finn**, Georgia Institute of Technology; **Paul J. Hergenrother**, University of Illinois, Urbana-Champaign; **Thomas R. Hoye**, University of Minnesota, Twin Cities; **Kathlyn A. Parker**, Stony Brook University, SUNY; **Mikiko Sodeoka**, RIKEN, Japan; **Christopher D. Vanderwal**, University of California, Irvine. Address to be presented before the Division of Organic Chemistry at the fall ACS national meeting in Washington, D.C.

**Elias J. Corey Award for Outstanding Original Contribution in Organic Synthesis by a Young Investigator** sponsored by the Pfizer Endowment Fund, **Neil K. Garg**, University of California, Los Angeles. Address to be presented before the Division of Organic Chemistry. April 3; Moscone Center; 3018/3022; 11:00 AM.

**F. Albert Cotton Award in Synthetic Inorganic Chemistry**, sponsored by the F. Albert Cotton Endowment Fund, **Pingyun Feng**, University of California, Riverside. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 10:40 AM.

**Peter Debye Award in Physical Chemistry**, sponsored by DuPont, **Bruce J. Berne**, Columbia University. Address to be presented before the Division of Physical Chemistry. April 3; Parc 55 San Francisco; Embarcadero; 8:00 AM.

**Frank H. Field & Joe L. Franklin Award for Outstanding Achievement in Mass Spectrometry**, sponsored by Waters Corp., **Vicki Hopper Wysocki**, Ohio State University. Address to be presented before the Division of Analytical Chemistry. April 4; Hilton San Francisco Union Square; Union Square 19/20; 1:35 PM.

**Francis P. Garvan–John M. Olin Medal**, sponsored by the Francis P. Garvan–John M. Olin Medal Endowment, **Barbara J. Finlayson-Pitts**, University of California, Irvine. Address to be presented before the Division of Physical Chemistry. April 5; Parc 55 San Francisco; Embarcadero; 8:05 AM.

**James T. Grady–James H. Stack Award for Interpreting Chemistry for the Public**, sponsored by ACS, **Thomas A. Hager**, University of Oregon. Address to be presented before the ACS Office of Public Affairs, Division of Chemical Education and the Division of the History of Chemistry at the fall ACS national meeting in Washington, D.C.

**Harry Gray Award for Creative Work in Inorganic Chemistry by a Young Investigator**, sponsored by the Gray Award Endowment, **Nilay Hazari**, Yale University. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 8:50 AM.

**Ernest Guenther Award in the Chemistry of Natural Products**, sponsored by Givaudan, **Stephen F. Martin**, University of Texas at Austin. Address to be presented before the Division of Organic Chemistry. April 3; Moscone Center; 3018/3022; 3:45 PM.

**Kathryn C. Hach Award for Entrepreneurial Success**, sponsored by the Kathryn C. Hach Award Fund, **David R. Walt**, Tufts University. Address to be presented before the Division of Analytical Chemistry and the Division of Biochemical Technology. April 4; Hilton San Francisco Union Square; Union Square 19/20; 10:55 AM.

**E. B. Hershberg Award for Important Discoveries in Medicinally Active Substances**, sponsored by Merck Research Laboratories, **Stanley T. Croke**, Ionis Pharmaceuticals. Address to be presented before the Division of Medicinal Chemistry. April 4; Moscone Center; 3002/3004; 9:45 AM.

**Joel Henry Hildebrand Award in the Theoretical & Experimental Chemistry of Liquids**, sponsored by ExxonMobil Research & Engineering, **Salvatore Torquato**, Princeton University. Address to be presented before the Division of Physical Chemistry. April 3; Parc 55 San Francisco; Embarcadero; 4:30 PM.

**E. V. Murphree Award in Industrial & Engineering Chemistry**, sponsored by ExxonMobil Research & Engineering, **Eleftherios Terry Papoutsakis**, University of Delaware. Address to be presented before the Division of Biochemical Technology. April 5; InterContinental San Francisco; Grand Ballroom B/C; 11:30 AM.

**Nakanishi Prize**, sponsored by the Nakanishi Prize Endowment, **Martin Gruebele**, University of Illinois, Urbana-Champaign. Address to be presented before the Division of Physical Chemistry. April 3; Parc 55 San Francisco; Powell I/II; 9:00 AM.

**Nobel Laureate Signature Award for Graduate Education in Chemistry**, sponsored by Avantor Performance Materials, **Junqi Li (student)** and **Martin D. Burke (preceptor)**, University of Illinois, Urbana-Champaign. Address to be presented before the Division of Organic Chemistry. April 5; Moscone Center; 3018/3022; 11:15 AM & 10:30 AM.

**James Flack Norris Award in Physical Organic Chemistry**, sponsored by the ACS Northeastern Section, **Robert A. Moss**, Rutgers University. Address to be presented before the Division of Organic Chemistry. April 4; Moscone Center; 3018/3022; 4:00 PM.

**George A. Olah Award in Hydrocarbon or Petroleum Chemistry**, sponsored by the George A. Olah Award Endowment, **Robert Howard Grubbs**, California Institute of Technology. Address to be presented before the Division of Organic Chemistry. April 2; Moscone Center; 3018/3022; 11:10 AM.

**Charles Lathrop Parsons Award**, sponsored by ACS, **John I. Brauman**, Stanford University. Address to be presented before the ACS Board of Directors. April 2; Moscone Center; 130; 1:30 PM.

**George C. Pimentel Award in Chemical Education**, sponsored by Cengage Learning and the ACS Division of Chem-

ical Education, **Thomas A. Holme**, Iowa State University. Address to be presented before the Division of Chemical Education. April 4; San Francisco Marriott Marquis; Salons 1/2; 3:55 PM.

**Priestley Medal**, sponsored by ACS, **Tobin J. Marks**, Northwestern University. Address to be presented at the ACS National Awards Banquet Ceremony & General Meeting of the Society at the spring national meeting in San Francisco.

**Glenn T. Seaborg Award for Nuclear Chemistry**, sponsored by the ACS Division of Nuclear Chemistry & Technology, **David L. Clark**, Los Alamos National Laboratory. Address to be presented before the Division of Nuclear Chemistry & Technology. April 2; Moscone Center; Esplanade Ballroom 302; 1:20 PM.

**Gabor A. Somorjai Award for Creative Research in Catalysis**, sponsored by the Gabor A. & Judith K. Somorjai Endowment Fund, **John E. Bercaw**, California Institute of Technology. Address to be presented before the Division of Inorganic Chemistry. April 3; Moscone Center; Gateway Ballroom 103/104; 11:10 AM.

**E. Bright Wilson Award in Spectroscopy**, sponsored by the ACS Division of Physical Chemistry, **David John Nesbitt**, Joint Institute for Lab Astrophysics/National Institute of Standards & Technology and University of Colorado. Address to be presented before the Division of Physical Chemistry. April 4; Parc 55 San Francisco; Embarcadero; 2:40 PM.

**Ahmed Zewail Award in Ultrafast Science & Technology**, sponsored by the Ahmed Zewail Endowment Fund established by the Newport Corp., **Stephen R. Leone**, University of California, Berkeley. Address to be presented before the Division of Physical Chemistry. April 2; Parc 55 San Francisco; Embarcadero; 9:40 AM.

**National Fresenius Award**, sponsored by Phi Lambda Upsilon, the National Chemistry Honor Society, **Neal K. Devaraj**, University of California, San Diego. Address to be presented before the Division of Organic Chemistry. April 2; Moscone Center; 3014/3016; 11:05 AM.

## STUDENT & EDUCATOR ACTIVITIES

Education-focused programs and specialty activities are being held for undergraduate students, graduate students, high school teachers, and chemical professionals. Explore these opportunities in depth at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017).

**Undergraduate Program.** A vibrant program designed especially for undergraduate students has been planned by the Society Committee on Education's Undergraduate Programs Advisory Board. This educational and career-oriented program includes technical symposia and workshops on essential skills for employment in chemistry and success in graduate school. Eminent scientist Dr. Carolyn Bertozzi of Stanford University will present, "What life and research share in common: Finding opportunity in failure."

### Sunday, April 2

**Undergraduate Hospitality Center**, 8:00 AM to 5:00 PM, SF Marriott Marquis, Salon 7

**Making the Most of your First National Meeting**, 8:30 to 9:15 AM, SF Marriott Marquis, Salon 7

**Undergraduate Research Oral Session**, 8:30 AM to 5:00 PM, SF Marriott Marquis, Nob Hill C

**Symposium: Frontiers in Nanoscience** (cosponsored by POLY), 9:30 to 11:30 AM, SF Marriott Marquis, Golden Gate A

**Chem Demo Exchange**, 11:00 AM to 12:30 PM

**Graduate School Reality Check, Step I: Getting In** (cosponsored by YCC), 10:00 to 11:30 AM, SF Marriott Marquis, Golden Gate A

**Graduate School Reality Check, Step II: You're In—Now What?** (cosponsored by YCC), 11:30 AM to 12:45 PM

**Networking Social with Graduate School Recruiters**, 1:00 to 5:00 PM

**Networking 101** (cosponsored by YCC and PROF), 1:30 to 3:00 PM, SF Marriott Marquis, Golden Gate A

**Two-Year to Four-Year College Transfer Survival Guide** (cosponsored by YCC), 2:30 to 3:30 PM, SF Marriott Marquis, Golden Gate B

**SciBabe, Ten Rules to Surviving Fake News**, 4:00 to 5:30 PM, SF Marriott Marquis, Golden Gate A

**Student Awards Ceremony**, 7:00 to 8:30 PM, Hilton Union Square, Grand Ballroom B

**Undergraduate Social**, 8:30 to 11:00 PM, Hilton Union Square, Continental Ballroom 1–6

### Monday, April 3

**Undergraduate Hospitality Center**, 8:00 AM - 4:00 PM, SF Marriott Marquis, Salon 7

**Undergraduate Research Oral Session**, 8:30 AM to 5:00 PM, SF Marriott Marquis, Nob Hill C

**Improving Scientific Communications**, 9:00 to 10:15 AM, SF Marriott Marquis, Golden Gate B

**Symposium: The Chemistry of Fermented Beverages** (cosponsored by AGFD), 10:00 to 11:30 AM, SF Marriott Marquis, Golden Gate A

**Workshop: Chemists Celebrate Earth Day** (sponsored by CCA), 10:30 to 11:45 AM

**Undergraduate Research Poster Session** (cosponsored by CHED, AGFD, ENVR, INOR, MEDI, PHYS, POLY, GEOC, and BIOT), noon to 2:00 PM

**Eminent Scientist Lecture with Dr. Carolyn Bertozzi, Stanford University** (cosponsored by MEDI), 2:30 to 4:00 PM, SF Marriott Marquis, Golden Gate A

**Student Speed Networking with Chemistry Professionals**, 4:00 to 5:15 PM

**Sci-Mix/Successful Student Chapter Posters**, 8:00 to 10:00 PM

### Tuesday, April 4

**NSF Graduate School Fellowships**, 9:00 to 9:45 AM, SF Marriott Marquis, Golden Gate A

**Chemistry & the Environment Film Series** (cosponsored by CEI), noon to 2:00 PM, SF Marriott Marquis, Golden Gate A

**GRADUATE & POSTDOCTORAL SCHOLARS OFFICE.** The Graduate & Postdoctoral Scholars Office, with support from the Graduate Education Advisory Board, provides and promotes programs and resources for graduate students and postdoctoral scholars.

**Sunday, April 2**

**ChemIDP™: Planning for Your Career,** 11:30 AM to 1:15 PM

**Graduate & Postdoctoral Scholars Focus Group,** 2:00 to 4:00 PM

**Faculty & Postdoc Afternoon Networking Coffee Break,** 4:00 to 6:00 PM

**Monday, April 3**

**Student Speed Networking with Chemistry Professionals,** 4:00 to 5:15 PM

**Graduate & Postdoctoral Scholars Reception,** 7:00 to 8:30 PM

For more information about these events and other ACS programs offered to graduate students and postdocs, visit [www.acs.org/grad](http://www.acs.org/grad) or contact the ACS Graduate & Postdoctoral Scholars Office at [graded@acs.org](mailto:graded@acs.org) or at 800-227-5558 ext. 4588.

**CHEMISTRY TEACHER PROGRAM.** The Division of Chemical Education and the ACS Education Division are sponsoring the Chemistry Teacher Program. It will include presentations on current pedagogies, resources, and activities. The 2017 recipient of the James Bryant Conant Award in High School Chemistry Teaching will be a featured presenter during the program. The High School-College Interface Luncheon will bring together educators from all grade levels with the goal of facilitating an exchange of ideas and networking among teachers and professors.

High school and middle school teachers can register for the program directly through Attendee Registration as a pre-college teacher; the reduced registration fee includes program materials, lunch, access to the full ACS meeting, and entry to the exposition. Teachers can receive a certificate documenting up to 24 professional development hours for attending sessions.

**Sunday, April 2**

**Chemistry Teacher Program,** 8:30 AM to 4:30 PM

**Monday, April 3**

**High School Polymer Program** (cosponsored by POLY), 5:00 to 8:30 PM  
For more information, contact the Office of High School Chemistry at [education@acs.org](mailto:education@acs.org) or at 800-227-5558 ext. 2105

**SOCIAL & TICKETED EVENTS**

**Friday, March 31**

**CHAS Laboratory Waste Management** 8:00 AM to 5:00 PM, Moscone Center, Room 120

**CHAS Laboratory Safety Workshop** 8:00 AM to 5:00 PM, Moscone Center, Room 121

**Saturday, April 1**

**CHAS Cannabis Extraction & Analysis Workshop** 8:00 AM to 5:00 PM, Moscone Center, Room 120

**CHAS How to be a More Effective Chemical Hygiene Officer** 8:00 AM to 5:00 PM, Moscone Center, Room 121

**CHAS Using ACS Lab Safety Resources in the Classroom** 8:00 AM to 5:00 PM, Moscone Center, Room 124

**CHAS Reactive Chemical Management for Laboratories & Pilot Plants** 8:00 AM to 5:00 PM, Moscone Center, Room 125

**COACHing Strong Women in the Art of Strategic Persuasion** 8:00 AM to 5:00 PM, SF Marriott Union Square, Sutter 1

**COACH: Uping the Game: Refresher Workshop for Past COACH Alums** 8:00 AM to 5:00 PM, SF Marriott Union Square, Sutter 2

**ACS Presidential Outreach Event — OPEN** Noon to 4:00 PM, Exploratorium, Pier 15

**COACH Reception** 5:00 to 7:00 PM, SF Marriott Union Square, Russian Hill

**Sunday, April 2**

**Career Pathways Workshops** 8:00 AM to 5:30 PM, W San Francisco, Great Room 2

**Career Pathways II** 8:00 AM to 5:30 PM, W San Francisco, Workroom 2

**Career Pathways III** 8:00 AM to 5:30 PM, W San Francisco, Workroom 3

**Career Pathways I** 8:00 AM to 5:30 PM, W San Francisco, Workroom 1

**Undergraduate Hospitality Center** 8:00 AM to 5:00 PM, SF Marriott Marquis, Salon 7

**Making the Most of Your First National Meeting** 8:30 to 9:15 AM, SF Marriott Marquis, Salon 7

**Graduate School Reality Check, Part 1: Getting in** 10:00 to 11:30 AM, SF Marriott Marquis, Golden Gate Blrm B

**Chem Demo Exchange Household Chemicals** 11:00 AM to noon, Moscone Center, Hall A

**Graduate School Reality Check, Part II: You're in- Now What?** 11:30 AM to 12:45 PM, SF Marriott Marquis, Golden Gate Blrm B

**ACS Board Luncheon & Meeting** Noon to 1:00 PM, Moscone Center, Gateway Ballroom 103/104

**CHED (Division of Chemical Education) High School/College Interface Luncheon/SE-01/\$45** Noon to 1:00 PM, SF Marriott Marquis, Salon 7

**POLY Board Meeting** Noon to 1:00 PM, Moscone Center, 132

**Developing Communication Strategies** Noon to 5:30 PM, Park Central San Francisco, Commonwealth

**BIOT Lunch Seminars** 12:30 to 2:00 PM, InterContinental San Francisco, InterContinental B

**CTA (Committee on Technician Affairs) Awards Luncheon/SE-02/\$45** 1:00 to 3:00 PM, Hilton SF Union Square, Continental Parlor 3

## SOCIAL & EDUCATIONAL EVENTS

### **Networking Social with Graduate School Recruiters**

1:00 to 5:00 PM, Moscone Center, Hall A

### **Networking 101**

1:30 to 3:00 PM, SF Marriott Marquis, Golden Gate Blrm A

### **Graduate & Postdoc Focus Group**

2:00 to 4:00 PM, Moscone Center West, 2nd Floor, Area 2

### **Two-Year to Four-Year College**

#### **Transfer Survival**

2:30 to 3:30 PM, SF Marriott Marquis, Golden Gate Blrm B

### **Advanced Materials, Technologies, Systems & Processes Plenary Session**

3:00 to 6:00 PM, Moscone Center, Gateway Ballroom 103 & 104

### **McGraw-Hill Education Learning**

#### **Technologies Workshop**

Sponsor: McGraw-Hill Education

3:30 to 6:00 PM, Moscone Center, Room 250

### **SciBabe: Chemistry Blogging**

4:00 to 5:30 PM, SF Marriott Marquis, Golden Gate Blrm A

### **IAC (Committee on International Activities) Networking Globally: Helping Chemistry Students Find Success in Careers and Study Abroad/**SE-03/**no charge**

4:00 to 5:30 PM, Hilton SF Union Square, Yosemite C

### **Faculty and Postdoc Afternoon**

#### **Coffee Break**

4:00 to 6:00 PM, Hotel Nikko San Francisco, Monterey I

### **Diversity Reception**

5:00 to 7:00 PM, Hilton Union Square, Yosemite A & B

### **AGFD Poster Session Reception**

5:00 to 7:00 PM, Moscone Center, West Hall

### **University of Wisconsin @ Madison Alumni & Friends Social Hour**

5:00 to 7:00 PM, Park Central San Francisco, Concordia Park

### **University of California, San Diego Alumni & Friends**

5:00 to 7:00 PM, SF Marriott Marquis, Salon 1

### **University of Illinois @ Urbana-**

**Champaign Alumni & Friends Reception**  
5:00 to 8:00 PM, InterContinental San Francisco, Sutter

### **District I Councilor Caucus**

5:30 to 7:00 PM, Hilton SF Union Square, Union Square 1 & 2

### **CHED Social Reception**

5:30 to 7:00 PM, Moscone Center, 134

### **COLL Social Hour/Poster Session**

5:30 to 8:00 PM, Moscone Center, Hall B/C

### **INOR Poster Session**

5:30 to 7:30 PM, Moscone Center, Hall D

### **ORGN Poster Session**

5:30 to 7:30 PM, Moscone Center, West Hall

### **Joint Research Corporation Petroleum Research Fund Reception in Honor of the Awardee for Research at an Undergraduate Institution**

5:30 to 7:30 PM, Hilton Union Square, Golden Gate 4 & 5

### **International Welcome Reception/**SE-04/**no charge**

5:30 to 7:30 PM, Hilton Union Square, Grand Ballroom A

### **District IV Councilor Caucus**

6:00 to 7:00 PM, Hilton SF Union Square, Union Square 15 & 16

### **District V Councilor Caucus**

6:00 to 7:00 PM, Hilton SF Union Square, Union Square 17 & 18

### **District VI Councilor Caucus**

6:00 to 7:00 PM, Hilton SF Union Square, Union Square 19 & 20

### **District II Councilor Caucus**

6:00 to 7:00 PM, Hilton SF Union Square, Union Square 3 & 4

### **District III Councilor Caucus**

6:00 to 7:00 PM, Hilton SF Union Square, Union Square 5 & 6

### **SCHB Entrepreneurs' Poster Session**

6:00 to 8:00 PM, Moscone Center, Hall B/C

### **University of Washington Alumni & Friends/**SE-27/**\$5**

6:00 to 8:00 PM, W San Francisco, Great Room 1

### **Attendee Welcome Reception**

6:00 to 8:30 PM, Moscone Center, Halls B/C

### **CINF Welcoming Reception and Poster Session**

6:30 to 8:30 PM, Park Central San Francisco, Franciscan I & II

### **PROF General Posters**

6:30 to 8:30 PM, Moscone Center, Expo Hall B/C

### **Student Chapter Awards Ceremony**

7:00 to 8:30 PM, Hilton SF Union Square, Grand Ballroom B

### **Analytical Division Poster Session**

7:00 to 9:00 PM, Moscone Center, West Hall

### **MEDI General Posters**

7:00 to 9:00 PM, Moscone Center, West Hall

### **CHED Poster Session**

7:00 to 9:00 PM, Moscone Center, Hall D

### **BIOL Poster Session**

7:00 to 9:00 PM, Moscone Center, West Hall

### **FLUO Poster Session**

8:00 to 10:00 PM, Moscone Center, Hall D

### **Undergraduate Social**

8:30 to 11:00 PM, Hilton SF Union Square, Continental Ballroom 1-6

## **Monday, April 3**

### **Women in the Chemical Enterprise Breakfast/**SE-05/**\$40 (regular)/**SE-06/**\$20**

7:30 to 9:00 AM, Hilton Union Square, Imperial B

### **YCC Fun run/**SE-07/**\$30 (regular)/**SE-08/**\$15 (undergraduates)**

8:00 to 10:00 AM, Moscone Center West, Outside West Lobby

### **Career Pathways II**

8:00 AM to 5:30 PM, W San Francisco, Workroom 2

### **Career Pathways III**

8:00 AM to 5:30 PM, W San Francisco, Workroom 3

### **Career Pathways I**

8:00 AM to 5:30 PM, W San Francisco, Workroom 1

### **Undergraduate Hospitality Center**

8:00 AM to 4:00 PM, SF Marriott Marquis, Salon 7

### **Engaging Colleagues in Dialogue**

8:00 AM to noon, Park Central San Francisco, Commonwealth

### **Improving Scientific Communications**

9:00 to 10:15 AM, SF Marriott Marquis, Golden Gate Blrm B

## SOCIAL & EDUCATIONAL EVENTS

### ACS Exposition

9:00 AM to 5:00 PM, Moscone Center, Halls B/C

### Teaching Laboratory Safety in the Undergraduate Chemistry Curriculum

Sponsor: Flinn Scientific Inc.  
9:30 AM to noon, Moscone Center, Room 250

### Solutions for Innovation

Sponsor: JEOL USA, Inc.  
9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 2

### Advancing Material Science Research through Spectroscopy

Sponsor: ThermoFisher Scientific  
9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 1

### Getting Real with Organic Chemistry

Sponsor: CAS  
9:30 AM to noon, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 3

### CCA Outreach Workshop

10:30 to 11:45 AM, Moscone Center, Hall A

### Women Chemists of Color Networking/ SE-09/no charge

10:30 AM to noon, Hilton SF Union Square, Yosemite C

### PROF Speaker Luncheon

11:30 AM to 1:30 PM, Hotel Nikko San Francisco, Carmel II

### CRC Handbook Discussion Forum

11:30 AM to 3:00 PM, Moscone Center, 134

### Committee on Minority Affairs Luncheon/ SE-10/\$50 (regular)/ SE-11/\$25 (student)

11:30 AM to 1:30 PM, Hilton Union Square, Grand Ballroom A

### CHAL (Chemistry & the Law Division)

**Drug & Power Luncheon/SE-12/\$40**  
Noon to 1:30 PM, Mourad, 140 New Montgomery Street

### Undergraduate Research Poster Session

Noon to 2:00 PM, Moscone Center, Hall D

### BIOT Lunch Seminars

12:30 to 2:00 PM, InterContinental San Francisco, InterContinental B

### How to Make LC Method Development and Peptide Mapping Simpler / Part 2: Tackle Interferences with Advanced Triple Quadrupole Technology

Sponsor: ThermoFisher Scientific  
12:30 to 3:00 PM, Moscone Center, Hall B, Exhibitor Workshop Room 1

### What can NMR do for the chemist? Introduction to experiments beyond 1D proton and carbon spectra

Sponsor: Bruker  
12:30 to 3:00 PM, Moscone Center, Room 250

### Leading Change

1:00 to 5:00 PM, Park Central San Francisco, Commonwealth

### Graduate and Postdoc Focus Group

2:00 to 5:00 PM, Moscone Convention Center West, 2nd floor, Area 3

### Seamless Integration of 2D to 3D SAR to Guide Multi-parameter Optimisation

Sponsor: Optibrium Ltd.  
3:30 to 6:00 PM, Moscone Center, Hall B, Exhibitor Workshop Room 1

### The Kavli Foundation Emerging Leader in Chemistry Lecture

4:00 to 5:10 PM, Moscone Center, Gateway Ballroom 103/104

### Women Chemists Committee Open Meeting and 'Just Cocktails' Reception

4:00 to 5:00 PM, Hotel Nikko San Francisco, Nikko Ballroom II

### The Fred Kavli Innovations in Chemistry Lecture

5:15 to 6:30 PM, Moscone Center, Gateway Ballroom 103/104

### CHAL Reception

6:00 to 8:00 PM, Jillian's, 175 Fourth Street

### CACS (Chinese-American Chemical Society) Dinner Banquet/SE-13/\$37

6:30 to 9:00 PM, Far East Café, 631 Grant Avenue

### ACS Graduate & Postdoctoral Scholars Reception/SE-14/no charge

7:00 to 8:30 PM, Moscone Center, Room 134

### UC Berkeley Dept of Chemistry Alumni & Friends Reception

7:00 to 8:30 PM, InterContinental San Francisco, Grand Ballroom C

### Sci-Mix Interdivisional Poster Session (Drink ticket with Registration)

8:00 to 10:00 PM, Moscone Center, Hall D

### Tuesday, April 4

### University of Minnesota Alumni & Friends Breakfast/SE-16/\$5

7:30 to 9:30 AM, Moscone Center, Room 2000

### Senior Chemists Breakfast/SE-15/\$20

7:30 to 9:30 AM, Hilton SF Union Square, Grand Ballroom A

### Career Pathways II

8:00 AM to 5:30 PM, W San Francisco, Workroom 2

### Career Pathways III

8:00 AM to 5:30 PM, W San Francisco, Workroom 3

### Career Pathways I

8:00 AM to 5:30 PM, W San Francisco, Workroom 1

### Coaching & Feedback

8:00 AM to noon, Park Central San Francisco, Commonwealth

### NSF Graduate School Fellowships

9:00 to 9:45 AM, SF Marriott Marquis, Golden Gate Blrm A

### ACS Exposition

9:00 AM to 5:00 PM, Moscone Center, Halls B/C

### Mass Spec Inlet Versatility to Maximize Productivity

Sponsor: Advion  
9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 1

### Innovative HPLC Solutions to Increase Efficiency and Productivity in the Lab

Sponsor: Agilent Technologies  
9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 2

### McGraw-Hill Education Learning Technologies Workshop

Sponsor: McGraw-Hill Education  
3:30 PM to 6:00 PM, Moscone Center, Room 250

### Women Chemists Committee/Eli Lilly Travel Award Poster Session

11:00 AM to noon, Hilton Union Square, Grand Ballroom A

### PROF & SCHB Speaker Luncheon

11:30 AM to 1:30 PM, Hotel Nikko San Francisco, Nikko Carmel II

### CINF (Chemical Information Division) Division Luncheon/SE-20/\$30

Noon to 1:30 PM, Park Central San Francisco, Franciscan I

### COLL (Division of Colloid & Surface) Luncheon/SE-19/\$45

Noon to 1:30 PM, W San Francisco, Great Room 1

### WCC (Women Chemists Committee) Luncheon/SE-17/\$50 (regular)/ SE-18/\$25 (student)

Noon to 1:30 PM, Hilton Union Square, Grand Ballroom A

### Chemistry & the Environment Film Series

Noon to 2:00 PM, SF Marriott Marquis, Golden Gate Blrm B

## SOCIAL & EDUCATIONAL EVENTS

### BIOT Lunch Seminars

12:30 to 2:00 PM, InterContinental  
San Francisco, InterContinental B

### Advancing HPLC and GC Separations

Sponsor: Agilent Technologies  
12:30 to 3:00 PM, Moscone Center, Hall  
B, Exhibitor Workshop Room 2

### Vibrational Spectroscopy for Pharmaceutical Applications

Sponsor: Bruker  
12:30 to 3:00 PM, Moscone Center, Hall  
B, Exhibitor Workshop Room 1

### Raman inVia Qontor and LiveTracking

Sponsor: Renishaw  
12:30 PM to 3:00 PM, Moscone Center,  
Exhibit Hall B, Exhibitor Workshop  
Room 3

### Leading Without Authority

1:00 to 5:00 PM, Park Central San  
Francisco, Commonwealth

### Local Section Officers, Outreach Coordinator and Speakers Reception

3:30 to 5:30 PM, Hilton SF Union  
Square, Continental Ballroom 4

### Division Officers & Councilors Caucus

4:00 to 5:30 PM, Moscone Center,  
Room 132

### ANYL (Division of Analytical Chemistry) Dinner/SE-21/\$25 (regular)/SE-22/\$15 (student)

5:00 to 7:30 PM, Hilton SF Union  
Square, Golden Gate 2

### Henry Hill & Lou Sacco Award Reception

5:00 to 7:00 PM, Hotel Nikko San  
Francisco, Nikko Ballroom III

### UCLA Research Showcase

5:00 to 7:00 PM, Moscone Center,  
Room 135

### Sacramento Region Meet & Greet Reception

5:00 to 7:00 PM, W San Francisco,  
Great Room 1

### INOR Poster Session

5:30 to 7:30 PM, Moscone Center,  
Hall D

### ORGN Poster Session

5:30 to 7:30 PM, Moscone Center,  
Hall D

### Moissi Kick-Off Reception

5:30 to 7:30 PM, Hotel Nikko San  
Francisco, Bay View

### Division Officers & Councilors Caucus (DOC/DCC) Reception

5:30 to 6:30 PM, Moscone Center, 133

### COMP Poster Session

6:00 to 8:00 PM, Moscone Center,  
West Hall

### ENVR (Division of Environmental Chemistry) Division Reception/ SE-23/\$20

6:00 to 8:00 PM, Thirsty Bear Brewing  
Co., 661 Howard St.

### NUCL Social Hour

6:00 to 8:00 PM, Moscone Center, 130

### CATL Poster Session

6:00 to 8:00 PM, Moscone Center,  
Hall D

### BIOT Poster Session/Social

6:00 to 8:00 PM, Moscone Center,  
West Hall

### ENFL (Division of Energy and Fuel) Awards Dinner/SE-24/\$60

6:30 to 9:00 PM, LeColonial, 20  
Cosmo Pl.

### CELL (Division of Cellulose and Renewable Materials) Awards Banquet/SE-25/\$65

6:00 to 10:00 PM, The Chart House,  
Pier 39, San Francisco, CA 94119

### ACS National Awards Banquet Ceremony & General Meeting/SE-26/\$130

6:30 to 10:00 PM, SF Marriott Marquis,  
Salon 8/9

### BIOL Poster Session/Social

7:00 to 9:00 PM, Moscone Center,  
West Hall

## Wednesday, April 5

### Career Pathways II

8:00 AM to 5:30 PM, W San Francisco,  
Workroom 2

### Career Pathways III

8:00 AM to 5:30 PM, W San Francisco,  
Workroom 3

### Career Pathways I

8:00 AM to 5:30 PM, W San Francisco,  
Workroom 1

### Chemical Forensics International Technical Working Group

8:30 AM to 5:00 PM, Hotel Union  
Square, Continental Ballroom 4

### Electrochemistry 101: Experiments For Use In Undergraduate Labs

Sponsor: Gamry Instruments  
9:30 AM to noon, Moscone Center,  
Room 250

### BIOT Lunch Seminars

Noon to 2:00 PM, InterContinental  
San Francisco, InterContinental B

### Structure-Based Drug Design and Ligand Modification

Sponsor: Chemical Computing Group  
3:30 to 6:00 PM, Moscone Center,  
Room 250

### POLY/PMSE Lecture & Awards Reception

5:30 PM to 8:00 PM, Moscone Center,  
134

### ENVR Poster Session

6:00 to 8:00 PM, Moscone Center,  
Hall D

### GEOC Poster Session

6:00 to 8:00 PM, Moscone Center,  
Hall D

### I&EC Poster Session

6:00 to 8:00 PM, Moscone Center,  
Hall D

### PHYS Poster Session

7:00 to 9:00 PM, Moscone Center,  
Hall D

### NUCL Poster Session

7:00 to 9:00 PM, Moscone Center,  
Hall D

### MEDI & ORGN General Poster Social

7:00 to 11:00 PM, Moscone Center,  
West Hall

## WORKSHOPS

The following workshops require a separate registration process and/or entry fee to participate in the event, as indicated in this listing. Participation is open to all interested registrants.

### Division of Chemical Health & Safety (CHAS)-sponsored workshop fees

(unless otherwise indicated). CHAS member: full registration \$375/early registration \$300; non-CHAS member: full registration \$425/early registration \$350. Early registration ends February 17. K-12 science teachers who are American Association of Chemistry Teacher members: \$99. Need-based scholarships are available for K-12 science teachers; contact scholarships@labsafetyinstitute.org.

**Half-day workshops fees.** CHAS member: \$175 early registration/\$200 after February 17; non-CHAS member: \$200 early registration/\$225 after February 17.

Registration is required for all CHAS workshops. Register online at [dchas.org/workshop-registration-page](http://dchas.org/workshop-registration-page).

**Laboratory Safety—Beyond the Fundamentals.** Friday, March 31, 8:00 AM to 5:00 PM. Moscone Center, Room 121. Presenter: James Kaufman. The Laboratory Safety Institute will present a new course at the ACS national meetings which is designed to meet the needs of scientists and science educators wanting to learn more about laboratory safety. “Lab Safety— Beyond the Fundamentals” continues where LSI’s introductory course (The Laboratory Safety Workshop) leaves off and explores new areas in lab safety. There is an emphasis on simple and inexpensive steps to create more effective lab safety programs and grow the culture of lab safety.

There is extensive opportunity for questions during the workshop with follow-up by phone and e-mail. This includes a one-hour conference call to help with the implementation of course concepts. Course participants are encouraged to submit in advance five questions or topics they wish to be sure are covered in the course: [jim@labsafetyinstitute.org](mailto:jim@labsafetyinstitute.org).

**Laboratory Waste Management.**

Friday, March 31, 8:00 AM to 5:00 PM. Moscone Center, Room 120. Presenter: Russ Phifer. CHAS offers this workshop to assist participants with the various regulatory requirements that apply to laboratories that generate hazardous waste, as well as to provide insight into the options for on-site management and off-site disposal. Focus will include discussion on recycling/reclamation techniques, economical handling of waste, and liability issues. There is extensive opportunity for questions during the workshop with follow-up by phone and e-mail.

**Cannabis Extraction Workshop.** Saturday, April 1. Moscone Center, Room 120. Presenters: Ezra Pryor, Jahan Marcu, and Melissa Wilcox. 8:00 AM to noon. CHAS and CANN (Cannabis Chemistry Subdivision) present a Cannabis Extraction Workshop, which is a comprehensive review of current methodologies and best practices in the extraction and processing of cannabis. Participants will learn the latest developments in extraction technologies, how to comply with regulations, and how to operate safely. There is extensive opportunity for questions during the workshop with follow-up by phone and e-mail.

**Cannabis Analysis Workshop.** Saturday, April 1. Moscone Center, Room 120. Presenters: Ezra Pryor, Jahan Marcu, and Melissa Wilcox. 1:00 to 5:00 PM. CHAS and CANN (Cannabis Chemistry Subdivision) present a Cannabis Analysis Workshop, which is a comprehensive review of current testing requirements, methodologies, and best practices in the analysis of cannabis and cannabis-infused products. Participants will learn how to overcome testing challenges, how to comply with standards, and how to operate safely. There is extensive opportunity for questions during the workshop with follow-up by phone and e-mail.

**Reactive Chemical Management for Laboratories & Pilot Plants.** Saturday, April 1, 8:00 AM to 5:00 PM. Moscone Center, Room 125. Sponsored by CHAS. Presenters: Neal Langerman and Harry Elston. Chemical reactivity hazards contribute to a significant number of incidents in laboratories and pilot plants. This workshop will provide participants with the knowledge and skill to screen processes for potential hazards, recognize when reactive hazards are present, and implement appropriate controls to reduce the risk of an incident associated with the hazards. Workshop attendees will review case studies of actual incidents and do screening examples in order to understand the screening and recognition process. Group discussions of control methods will allow participants to share their experiences and to evaluate methods for controlling reactivity risks.

**How to Be a More Effective Chemical Hygiene Officer.** Saturday, April 1, 8:00 AM to 5:00 PM. Moscone Center, Room 121. Sponsored by CHAS. Presenters: Russ Phifer and Jim Kaufman. CHAS offers the How to Be a More Effective Chemical Hygiene Officer workshop to provide participants with a detailed analysis of the CHO position and to prepare for the CHO Certification exam. Participants receive a clear perspective on safety issues in the laboratory, focusing on what the CHO does and how to do it better. The workshop covers the content areas of the certification exam, including a sample test in the same format as the real one. Whether you are a new Chemical Hygiene Officer or an old one, you will find something to put to real use in this

fast-paced presentation. There is extensive opportunity for questions during the workshop with follow-up by phone and e-mail.

**Using ACS Resources to Teach Lab Safety** (replacing Meeting New Chemical Safety Expectation in Instructional Laboratories). Saturday, April 1, 8:00 AM to 5:00 PM. Moscone Center, Room 124. Presenters: Samuella Sigmann and Ralph Stuart. Over the last few years, ACS has released several important new resources and updated others to support teaching laboratory safety at a variety of academic levels from secondary school to undergraduate and research settings. They are built around the RAMP paradigm supported by the ACS Committee on Professional Training guidelines. This two-part workshop will discuss how the ACS publications can be used to support chemical safety education and to promote a proactive safety culture in these settings. Each module, which has separate but complementary content, can be taken individually or both can be taken on the same day.

**Part 1: ACS Safety Tools for Secondary School and Undergraduate Labs.** 8:00 AM to noon. This module will use a variety of tools available from ACS to cover topics such as hazard recognition, basic risk assessment, understanding the Globally Harmonized System of Labeling (GHS), selecting personal protective equipment, engineering controls, safe chemical management and storage, and basic chemical waste management principles. The information presented in this module is appropriate for secondary school teachers (including those who are preservice) as well as undergraduate faculty.

**Part 2: ACS Safety Tools for Chemistry Majors and Research Laboratories.** 1:00 to 5:00 PM. In 2016, ACS released an updated web version of its *Identifying and Evaluating Hazards in Research Laboratories* document. The methods outlined in this document are designed to address operations in research laboratory settings, which are less defined and more changeable than those in teaching settings. The workshop focuses on the Job Hazard Analysis and Control Banding tools, which are appropriate for most laboratory research at the undergraduate level. Examples of Lessons Learned programs in the research setting will also be reviewed.

**COACHing Strong Women in the Art of Strategic Performance.** Saturday, April 1, 8:00 AM to 5:00 PM. San Francisco Marriott Union Square, Sutter 2. Workshop facilitators: Lee Warren and Nancy Houfek. Open to women in academia, industry, national labs, and government. This workshop is designed to provide powerful women with skills to succeed in accomplishing their goals in negotiations and meetings. Participants will be introduced to performance techniques that people in the theater and in leadership training understand about how to be effective, such as body language and nonverbals. They will learn how to articulate a clear purpose, land their message, be heard, enhance personal presence, depersonalize attacks, and manage hot moments. Participants are asked to bring examples of past challenging negotiations or meetings. These moments are examined in the workshop through the use of role plays. Discussion, coaching, and the replay of scenarios creates highly interactive, personal, and powerful learning of the wide range of tactics available for success. Travel assistance is available for women in academia and national labs. Preregister at [coach.uoregon.edu](http://coach.uoregon.edu). For more information, contact Priscilla Lewis at [coach@uoregon.edu](mailto:coach@uoregon.edu).

**Upping your Game: Refresher Workshop for Past Workshop Alums.** Saturday, April 1, 8:00 AM to 5:00 PM. San Francisco Marriott Union Square, Sutter 1. Workshop facilitators: Barbara Butterfield and Jane Tucker. This workshop is designed to be a refresher of what is learned in COACHing Strong Women in the Power of Strategic Persuasion. It begins with a preview of essential negotiation skills and moves into examination of Cialdini's six principles of influence, dealing with abrasive people, mentoring influence strategies, and dealing with difficult people. Factors contributing to personal success and failure are examined and applied to case studies. You will also be given refresher tools and concepts for making change happen where it needs to happen through exercises and role-plays, learn how to make effective interventions, and get your voice heard at the table. Travel assistance is available for women in academia and national labs. Preregister at [coach.uoregon.edu](http://coach.uoregon.edu). For more information, contact Priscilla Lewis at [coach@uoregon.edu](mailto:coach@uoregon.edu).

## ACS CAREER NAVIGATOR

**ACS Career Navigator** is your home for career services, leadership development, professional education, and market intelligence resources. We offer comprehensive and easily identified tools to help you to achieve your career goals by landing a new job, finding a new career path, comparing your salary, and viewing current trends in the chemistry enterprise to make more informed decisions. Opportunities abound at the ACS national meeting in San Francisco for career development. Take advantage of the resources and tools the ACS Career Navigator offers to help you succeed in the global scientific enterprise.

Are you ready to get started? Refresh your skills and branch into new areas of science and advanced applications with an ACS short course.

Take an ACS Leadership Development System course to gain skills that can be immediately applied in school or on the job.

If you are an ACS member, stop by the ACS Career Fair in the Moscone Center and speak to a career consultant or get a professional head shot taken.

In short, whatever your career goals, the ACS Career Navigator is here to help you achieve and exceed them. We'll see you in San Francisco!

---

## ACS CAREER FAIR

**Job seekers**, are you looking to jumpstart your job search or enhance your professional development?

**Employers**, are you looking to hire scientists and engineers? Then you need to attend the ACS Career Fair, open Sunday, April 2, from 6:00 to 8:30 PM; Monday, April 3, from 9:00 AM to 5:00 PM, and Tuesday, April 4, from

9:00 AM to 5:00 PM. The career fair is the place where the best talent and the best employers in chemistry meet.

The ACS Career Fair provides on-site activities for job seekers to help them reach their career goals. ACS will help you prepare for your next career move by providing resources that make it possible to map out your personal job search strategy, strengthen your résumé, and build your interview skills, all with the support of career consultants. During the career fair, participants can take full advantage of the following:

- Networking opportunities
- Résumé reviews
- One-on-one career consulting
- Interview practice and skills building
- More than 30 career-related workshops
- Keynote speakers presented live and via webcast
- Live, on-site interviews on request

**The ACS Career Fair** is a free event with a national meeting registration. All attendees are free to visit recruiters' booths and drop off their résumés. ACS members interested in a private interview must create a profile and upload their résumés in the ACS Career Fair database. The ACS Career Fair will be held in conjunction with the ACS National Exposition, Sunday through Tuesday.

**Please note:** We cannot guarantee that you will secure interviews at the ACS Career Fair. Interviewing is strictly contingent on the availability of positions and the credentials and qualifications that employers are seeking.

**One-on-one career consulting.** Individual 30-minute appointments with career consultants are available both on-site and online. These consults can help you strengthen your résumé, improve your interviewing skills, and design a job search or comprehensive professional growth strategy. Please bring a copy of your résumé or CV to all appointments. All one-on-one on-site career consulting sessions will take place in the Résumé Review/ Mock Interview area in the Moscone Center. Sign-up begins at 9:00 AM on Sunday, April 2, on a first-come, first-served basis.

**Career and professional development workshops.** More than 20 career-related workshops will help you with everything from improving your résumé to optimizing job performance or acing an interview. Workshop times are subject to change. Please consult the online workshop schedule at [www.acs.org/careerfair](http://www.acs.org/careerfair) for locations.

**Sunday, April 2**

**New Technologies to Find Jobs and Manage Your Career,** 10:00 to 11:30 AM

**ChemIDP: Planning for Your Career,** 11:30 AM to 1:15 PM

**Setting Yourself Up for Success in an Interview,** 1:00 to 3:00 PM

**Careers in Industrial Chemistry: Identifying Your Role in the Industrial Value Chain,** 1:00 to 3:00 PM

**Finding Yourself: Identifying a Career That Matches Your Strengths and Values,** 1:00 to 4:00 PM

**Foreign National Scientist Obtaining a Job in the US,** 1:30 to 3:00 PM

**Writing Excellent Proposals,** 3:30 to 5:00 PM

**Making the Most of Your Interview: Outshine the Competition,** 3:30 to 5:30 PM

**Résumé Development: Marketing Your Brand for an Industrial Chemistry Position,** 3:30 to 5:30 PM

**Networking: How to Get Started,** 4:30 to 5:30 PM

**Monday, April 3**

**Opportunities for Chemists in the Federal Government,** 8:00 to 10:00 AM

**Working in Higher Education,** 8:00 AM to noon

**Working for Yourself,** 8:00 AM to noon

**How to Find and Apply for a Chemistry Position in the Federal Government,** 10:30 AM to 12:30 PM

**Careers in Industrial Chemistry: Identifying Your Role in the Industrial Value Chain,** 1:00 to 3:00 PM

**Setting Yourself Up for Success in an Interview,** 1:00 to 3:00 PM

**Finding Yourself: Identifying a Career that Matches your Strengths and Values,** 1:00 to 4:00 PM

**Making the Most of Your Interview: Outshine the Competition,** 3:30 to 5:30 PM

**Résumé Development: Marketing Your Brand for an Industrial Chemistry Position,** 3:30 to 5:30 PM

**Networking: How to Get Started,** 4:30 to 5:30 PM

**Tuesday, April 4**

**Careers in Industrial Chemistry: Identifying Your Role in the Industrial Value Chain,** 8:00 to 10:00 AM

**Setting Yourself Up for Success in an Interview,** 8:00 to 10:00 AM

**Finding Yourself: Identifying a Career That Matches Your Strengths and Values,** 8:00 to 11:00 AM

**Making the Most of Your Interview: Outshine the Competition,** 10:30 AM to 12:30 PM

**Résumé Development: Marketing Your Brand for an Industrial Chemistry Position,** 10:30 AM to 12:30 PM

**Networking: How to Get Started,** 11:30 AM to 12:30 PM

**Opportunities for Chemists in the Federal Government,** 1:00 to 3:00 PM

**Working for Yourself,** 1:00 to 5:00 PM

**Working in Higher Education,** 1:00 to 5:00 PM

**How to Find and Apply for a Chemistry Position in the Federal Government,** 3:30 to 5:30 PM

**Wednesday, April 5**

**Careers in Industrial Chemistry: Identifying Your Role in the Industrial Value Chain,** 8:00 to 10:00 AM

**Setting Yourself Up for Success in an Interview,** 8:00 to 10:00 AM

**Finding Yourself: Identifying a Career That Matches Your Strengths and Values,** 8:00 to 11:00 AM

**Making the Most of Your Interview: Outshine the Competition,** 10:30 AM to 12:30 PM

**Résumé Development: Marketing Your Brand for an Industrial Chemistry Position,** 10:30 AM to 12:30 PM

**Networking: How to Get Started,** 11:30 AM to 12:30 PM

**Employers—Find the talent you need at the ACS Career Fair.** Leading employers around the world trust and depend on ACS to provide them with the talent they need to innovate and excel. At our most recent event, approximately 1,000 global job seekers—from recent grads to seasoned professionals—met with recruiters seeking to fill positions in all facets of chemistry, pharmaceuticals, and biotechnology.

The ACS Careers Database can help manage your employer account, post jobs, search for qualified candidates, and schedule career fair interviews. Moreover, participating in the ACS Career Fair enables you to accomplish the following:

- Connect with top talent via on-site interviews.
- Screen candidates, and make appointments in advance.
- Find the personnel your company needs to thrive, from entry- to executive-level positions.
- Meet qualified candidates informally via networking forums.
- Extend your presence for 30 days after the career fair via the ACS jobs database.

Looking for a more traditional career fair experience? Employers can purchase booth space inside the exposition hall, enabling your company to maximize its ability to showcase products and services and connect with job seekers. Employers can sign up for the ACS Career Fair Recruiters Row package online at [www.acs.org/careers](http://www.acs.org/careers).

Employers will receive an e-mail confirmation and must visit the ACS Career Fair Information Booth to pick up their blue badge. For more information, please visit [www.acs.org/careerfair](http://www.acs.org/careerfair). You can also contact Heather McNeill at 202-452-8918 or e-mail her at [h\\_mcneill@acs.org](mailto:h_mcneill@acs.org).

**ACS SHORT COURSES**

The following short courses, specifically designed to improve the skills and marketability of chemical scientists and technicians, are offered in conjunction with the national meeting. ACS member, early registration, and group discount rates are available. A course fee and registration sepa-

rate from the national meeting are required. For more information on ACS Short Courses, to obtain pricing details, or to view a full course catalog, visit [www.proed.acs.org](http://www.proed.acs.org). If you have questions, call 202-872-4508, fax 202-872-6336, or e-mail [proed@acs.org](mailto:proed@acs.org)

**ANALYTICAL**

**1-D & 2-D NMR Spectroscopy: Structure Determination of Small-Molecule Organic Compounds**, April 1–2

**Fundamentals of High-Performance Liquid Chromatography**, April 3–4

**BIOLOGICAL/PHARMACEUTICAL/MEDICINAL CHEMISTRY**

**Application of Pharmacokinetics & Safety Pharmacology for Chemists in Drug Development**, April 2

**COMPUTERS/STATISTICS/ENGINEERING**

**Chemical Engineering for Chemists**, April 1–2

**Statistical Analysis of Laboratory Data**, April 2–4

**ORGANIC/PHYSICAL CHEMISTRY**

**1-D & 2-D NMR Spectroscopy: Structure Determination of Small-Molecule Organic Compounds**, April 1–2

**Dispersions in Liquids: Suspensions, Emulsions & Foams**, April 2–3

**Organic Synthesis: Methods & Strategies for the 21st-Century Chemist**, April 4–5

**POLYMER CHEMISTRY**

**Polymeric Coatings**, April 1–2

**Polymer Science & Technology**, April 1–2

**PROFESSIONAL DEVELOPMENT**

**Effective Technical Writing**, April 4–5

**Chemistry for Non-Chemists: The Basics, Language, and Function of Chemistry**, April 2

**Write Your Own Patent Applications**, April 2

**REGULATORY/ENVIRONMENTAL**

**Intellectual Property Strategies for Technical Professionals**, April 2

**Methods Development, Validation Procedures & Regulatory Compliance Issues**, April 3–4

**Write Your Own Patent Applications**, April 2

**Highlights of FDA and Other cGMP Regulations**, April 5

**2017 LEADERSHIP DEVELOPMENT SYSTEM COURSE OFFERINGS**

Whether you are a manager, experienced professional, or new to the workforce, we invite you to attend an ACS Leadership Development System course held at the ACS national meeting. The following four-hour facilitated courses require a fee of \$150 each for ACS members and \$300 each for nonmembers. Register for these courses when you register for the meeting. For more information and full course descriptions, visit [www.acs.org/leadershipdevelopment](http://www.acs.org/leadershipdevelopment).

**Engaging Colleagues in Dialogue.** Monday, April 3, 8:00 AM to noon. Engaging Colleagues in Dialogue is a four-hour, hands-on interactive course that helps you develop your one-on-one communication skills. You will learn how to improve both sides of the communication exchange: first working to understand how to better communicate your messages, and second working on listening and acknowledging others' messages. You will even have an opportunity to assess your own communication skills through conversations with colleagues.

**Developing Communication Strategies.** Sunday, April 2, 1:00 to 5:00 PM. With the skills that you'll gain from this half-day workshop, you'll be a better communicator in your role as an ACS leader and as a leader in your workplace and in your community. Working in small interactive groups, you'll have the chance to develop and practice your own effective communication strategy. Plan to attend this workshop and discover how a comprehensive communication strategy can make both your goals and the goals of ACS possible.

**Leading Change.** Monday, April 3, 1:00 to 5:00 PM. If you are involved in

shifting team priorities, changing the direction of a project, or reconfiguring teams, understanding how people react to change and how to help yourself and others effectively deal with the changes is key to increasing your professional success.

**Coaching and Feedback.** Tuesday, April 4, 8:00 AM to noon. This hands-on, four-hour course will provide you with a proven process and practical tools to help coach team members, project groups, employees, and volunteers more regularly and effectively. As a participant, you will work on real coaching opportunities to help you practice addressing the development and performance issues you have identified.

**Leading Without Authority.** Tuesday, April 4, 1:00 to 5:00 PM. Whether in a lab, the office, the classroom, or on a volunteer committee, you will likely find yourself leading others without formal or "positional" authority and need to be able to influence them to accomplish the project. This four-hour interactive workshop provides practical tools to help you gain cooperation and engage others in accomplishing project and team goals.

**EXHIBITOR SPONSORED WORKSHOPS**

**Exhibiting companies** will host free education sessions for attendees to introduce new products and services, build skills with specific tools and techniques, and highlight applications for existing instrumentation. Visit [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) to register for workshops.

**Sunday, April 2**

**McGraw-Hill Education Learning Technologies Workshop.** Sponsor: McGraw-Hill Education, 3:30 to 6:00 PM, Moscone Center, Room 250.

3:30 to 4:30 PM. Tactics for Facilitating Flipped Learning — Dr. Danae Quirk Dorr, Minnesota State University, Mankato. During this workshop, participants will actively explore various strategies that may be utilized in building a student need-based flipped learning environment. By the end of the workshop, participants should be equipped

with tools that they can incorporate into their own classrooms to help bridge content delivery and assessment of student learning.

4:45 to 6:00 PM. Using ALEKS as a Tool for General Chemistry Preparation and Blended Instructional Design—Dr. Tracy McGill, Emory University

**Monday, April 3**

**Solutions for Innovation.** *Sponsor:* JEOL, USA, Inc., 9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 2.

Ambient Ionization Mass Spectrometry, Scanning Electron Microscopy.

NMR Structure. Learn how the latest innovations from JEOL integrate together to enhance your science.

**Getting Real with Organic Chemistry.** *Sponsor:* CAS, 9:30 AM to noon, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 3.

Students are often left wondering—why should I care? How does this apply to me and my future career? Professors are tasked with trying to connect the real world with the concepts taught in textbooks. Come hear how Chemistry Class Advantage™, a new digital learning solution from CAS, will help you teach the relevance of organic chemistry, as well as bridge the gap between memorization and conceptual understanding.

**Advancing Material Science Research through Spectroscopy.** *Sponsor:* Thermo Fisher Scientific, 9:30 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 1. New materials present new analytical challenges. Like many labs today, you need to stay ahead of the curve. This workshop will show you how FTIR and Raman spectroscopy can be applied in your lab; from the discovery of new materials, to solving production problems and assuring product quality. Industry expert will guide you through the latest trends and techniques to solve your toughest challenges.

**How to Make LC Method Development and Peptide Mapping Simpler/Part 2: Tackle Interferences with Advanced Triple Quadrupole Technology.** *Sponsor:* Thermo Fisher Scientific, 12:30 to 3:00 PM, Moscone Center, Hall B, Exhibitor Workshop Room 1. Part I: How to Make LC Method Development and Peptide Mapping Simpler Abstract: Why should method development and

peptide mapping be a challenge? Come and see how the latest developments in UHPLC afford method transfer from any LC with higher levels of reproducibility as well as resolution, and how when it comes to peptide mapping, we haven't just revolutionized one part of your workflow, we have revolutionized them all!

Part II: Title: Tackle Interferences with Advanced Triple Quadrupole Technology

Abstract: Kick interference to the curb, achieve better detection limits and maximize lab efficiency in the face of any sample matrix. Challenging applications are no match for new triple-quadrupole ICP-MS technology with unprecedented interference removal capabilities.

**New Reaxys: Help Shape the Future of Chemistry Search.** *Sponsor:* Elsevier, 12:30 to 3:00 PM, Moscone Center, Hall C, Exhibitor Workshop Room 4. The Reaxys/Elsevier team invites you to join this session to help share your experiences and thoughts on what makes the ideal chemistry search. Combining a mix of pre-defined testing, surveys and an open discussion, the product team would like to get your perspective on what makes a good search and discovery experience throughout your chemistry research workflow. Apply your real-life experiences to this session and help shape the future of chemistry search. We look forward to seeing you there.

**Wiley Workshop: Technology in the Modern General Chemistry Classroom.** *Sponsor:* Wiley, 12:30 to 3:00 PM, Moscone Center, Hall B, Exhibitor Workshop Room 2. Please join Wiley as we explore the trends and challenges of teaching general chemistry utilizing technology. Collaborate with your peers on what's working well and what's needed to improve student engagement and performance in this course.

Share your feedback on a forthcoming, digital general chemistry project from Jason Kautz, University of Nebraska-Lincoln. Lunch will be served! We look forward to seeing you in San Francisco.

**Seamless Integration of 2D to 3D SAR to Guide Multi-parameter Optimisation.** *Sponsor:* Optibrium, 3:30 to 6:00 PM, Moscone Center, Hall B, Exhibitor Workshop Room 1. This hands-on workshop in collaboration with BioSolveIT will explore how the combination of 2D structure activity relationships (SAR) with

3D structure-based design can be used to guide the optimisation of novel, high-quality compounds. Practical examples will be illustrated using both Optibrium's StarDrop and BioSolveIT's SeeSAR software

**Teaching Laboratory Safety in the Undergraduate Chemistry Curriculum.** *Sponsor:* Flinn Scientific, Inc., 9:30 AM to noon, Moscone Center, Room 250. Many faculty and lab managers at undergraduate institutions often find it difficult to incorporate laboratory safety throughout their courses. Join us as we discuss how to integrate Flinn Scientific's new engaging online student laboratory safety course and other valuable safety resources into your curriculum and learn how these resources can be used to build a positive safety culture in your department and school.

**What can NMR Do For The Chemist? Introduction to Experiments Beyond 1D Proton and Carbon Spectra.** *Sponsor:* Bruker, 12:30 to 3:00 PM, Moscone Center, Room 250. With the modern NMR hardware and software available today, many of the experiments that used to be considered complicated and unnecessary are now quite routine and extremely beneficial to the chemist. This workshop will present an introduction to the alphabet soup of NMR experiments and explain what they are, what information can be obtained from them, and when to use one over another. Topics will include:

- 2D experiments commonly used for structure verification and elucidation such as COSY, TOCSY, HSQC, and HMBC.
- Examination of NMR active nuclei that might be of interest to the inorganic chemist and important things to consider when running these experiments.
- Brief introduction to Magic Angle Spinning (HR-MAS and MAS) methods
- Quick look into the possibilities of triple resonance bio-molecular NMR.

**McGraw-Hill Education Learning Technologies Workshop.** *Sponsor:* McGraw-Hill Education, 3:30 to 6:00 PM, Moscone Center, Room 250.

3:30 to 4:30 PM. Implementing Connect and its Adaptive Learning Tools in the General Chemistry Classroom—Dr. Jason Overby, College of Charleston. While the online homework paradigm has been a regular component of

chemistry instruction for many years, the addition of adaptive learning tools presents a new challenge to instructors. This workshop will provide an overview of the ways that Connect and its adaptive learning tools can effectively be incorporated into any general chemistry classroom.

4:45 to 6:00 PM. The Many Faces of ALEKS in General and Elementary Chemistry at the University of Toledo—Dr. Andy Jorgensen, University of Toledo University of Toledo has utilized assessment and learning technology to better place students into introductory chemistry courses, as well as increase mastery and retention throughout those introductory courses. During this session, Professor Jorgensen will share their implementation details, results, and overall experience

### Tuesday, April 4

**Mass Spec Inlet Versatility to Maximize Productivity.** *Sponsor:* Advion, 9:30 AM to noon, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 1. With the daily need to analyze liquids, solids, vapor-phase compounds and even air-sensitive samples, the ability to change sample inlets is indispensable. Learn how a single instrument can be adapted to each of these sample requirements and rapidly changed to accommodate back-to-back assays. Listen to users in the field speak about the innovative sample inlets that have cut down on prep and streamlined their everyday work flow.

**Innovative HPLC Solutions to Increase Efficiency and Productivity in the Lab.** *Sponsor:* Agilent Technologies, 9:30 AM to noon, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 2. This workshop will focus on 2 topics: Increasing productivity of biotherapeutic characterization in drug development and developing rapid HPLC methods with sufficient resolution and speed. Detailed discussion utilizing novel HPLC instrumentation, software, and column chemistries will be discussed— with

time for Q&A with Agilent Application Scientists.

### **Engaging Millennials in the Classroom: A Panel Discussion with Dr. Neil Garg.**

*Sponsor:* Top Hat, 11:00 AM to noon, Moscone Center, Hall B, Exhibitor Workshop Room 3. With millennials demanding a more engaging learning experience, higher education instructors have had to evolve their teaching methods. Through this lively panel discussion moderated by Dr. Neil Garg, hear about tips and tricks that experts in the field are using to foster active learning both inside and outside the classroom.

### **Raman inVia Qontor and LiveTracking.**

*Sponsor:* Renishaw, 12:30 to 3:00 PM, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 3. inVia Qontor—Accurate Raman imaging of rough samples and/or those with complex surface topographies, now even faster with the new Renishaw ultra-fast Centrus detector.

### **Advancing HPLC and GC Separations.**

*Sponsor:* Agilent Technologies, 12:30 to 3:00 PM, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 2. QbD solutions for analytical method development in HPLC: Real-world data will be presented demonstrating unique ways to overcome analytical challenges. Plus, Agilent will provide an introduction to modern 2D-HPLC across multiple sample types. See the latest developments on this exciting work-flow that you can implement today. Plus witness a new era in Gas Chromatography, the Intuvo 9000 GC. Resolve Your Search for More Ions by discovering the advantages of Agilent's GCMS solutions.

### **Vibrational Spectroscopy for Pharmaceutical Applications.**

*Sponsor:* Bruker, Tuesday, 12:30 to 3:00 PM, Moscone Center, Exhibit Hall B, Exhibitor Workshop Room 1. The latest advances in the FT-IR and Raman instrumentation and applications will be reviewed on this seminar with a thorough discussion of the following topics:

- Contaminations in pharmaceutical products

- Reverse engineering
- Structural changes in proteins
- Maximization of protein stability
- Chemical imaging of biological tissues

Examples of applications will include analysis of proteins secondary structure, protein melting point determination, bacteria recognition, analysis of tablets. Seminar will include live demonstration of new Bruker FTIR microscope and hands-on session. Attendees are encouraged to bring samples of interest for analysis during the hands-on session.

### Wednesday, April 5

### **Electrochemistry 101: Experiments For Use In Undergraduate Labs.**

*Sponsor:* Gamry Instruments, 9:30 AM to noon, Moscone Center, Room 250. Gamry Instruments has developed a complete laboratory course in electrochemistry for undergraduate facilities. The course includes experiments designed to engage the students and provide them the opportunity to explore various disciplines in chemistry; such as, analyte characterization, aqueous sample testing, digital simulations, electrosynthesis, sensors, batteries, and corrosion. The complete educational bundle includes the instrument, teaching and student manuals with eleven separate experiments, as well as all cells and electrodes needed to complete a semester course for 20 students. This workshop will be an introduction to all aspects of the course material via the performance of select experiments.

### **Structure-Based Drug Design and Ligand Modification.**

*Sponsor:* Chemical Computing Group, 3:30 to 6:00 PM, Moscone Center, Room 250. The course covers MOE applications for interactive structure based design. Examples include active site visualization, protein-ligand contact analysis and ligand modification/optimization in the receptor pocket. Conformational searching and analysis of the ligand to assess ligand flexibility will be discussed. A protocol for aligning and superposing protein complexes in the context of protein selectivity will be studied.

## SPEAKER INSTRUCTIONS

**ALL SPEAKERS** and poster presenters must register and pay the appropriate registration fee to attend the meeting. Invited speakers should contact their symposium organizer or division program chair to clarify terms of their invitation.

As a speaker, you should prepare for your presentation by verifying the following details: the status of your abstract at [abstracts.acs.org](http://abstracts.acs.org) (using your ACS ID to log in to the system); mode of presentation (oral or poster); and the time, length, and location of your presentation. You should arrive in your presentation room at least 30 minutes before your scheduled speaking time. Poster presenters should set up posters at least one hour before the start of the poster session. If you need to withdraw your presentation, please send a withdrawal notice to [maps@acs.org](mailto:maps@acs.org) and contact your symposium organizer immediately.

**TECHNICAL SESSION EQUIPMENT.** Each technical session meeting room will be equipped with the following: LCD projector, screen, podium, podium microphone or lapel microphone, and laser pointer. As a speaker, you will need to provide your own laptop or arrange for specialty equipment directly with your symposium organizer and/or division program chair. To request other specialty equipment (at the standard fee), contact an ACS Operations Office during the meeting.

**SPEAKER READY ROOMS & AUDIOVISUAL SERVICE CENTERS.** As a presenter, you may use the speaker ready rooms to preview your presentation, ensure compatibility with our LCD projectors, or fulfill last-minute audiovisual equipment orders. We strongly recommend that all presenters come to the speaker ready room the day before their presentation to check for con-

nectivity and resolution. The hours of operation will be from 3:00 to 5:00 PM Saturday and 7 AM to 6 PM Sunday through Thursday. Visit the ACS Operations Office at any ACS property for speaker ready room locations. Speaker ready rooms are not equipped with copy machines. There are business centers located in each building of the Moscone Center that provide a range of services including copying, incoming and outgoing faxes, computer access, laser printing, and shipping: in the North Hall on the lower level under the escalators, adjacent to Room 130; in the South Hall, on the lower level, adjacent to Hall C; and in the West Hall, on the lobby level near the Howard St. entrance.

**POSTER SESSIONS.** All materials must be confined to a 4-foot-high by 8-foot-wide display board in the convention center and a 4-foot-high by 6-foot-wide display board in hotels. Presenters must mount their poster one hour before the scheduled session start time. Poster numbers supplied by ACS will be in the upper corner of each poster board; this number corresponds with the number assigned to each poster in the technical program. Pushpins will be available at the poster session. Presenters must remain with their posters for the duration of their scheduled session as indicated in the technical program. All posters must remain up until the session ends and then must be removed within one hour. ACS cannot assume responsibility for materials beyond these time limits.

**SCI-MIX POSTER SESSION ONLY.** Sci-Mix presenters may begin poster setup at 7:15 PM (45 minutes before the session begins). Each presenter may be accompanied by one assistant only, and both people are required to arrive together when entering the hall. After exiting, presenters will not be permitted to reenter the hall until the session begins at 8:00 PM.

## ABSTRACTS & PREPRINTS

**ONLINE TECHNICAL PROGRAM.** The technical program for the 253rd ACS National Meeting is now available at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017). You can search by divisions or committees, symposia, speakers, or keywords from abstracts as well as presidential events and the multidisciplinary theme of "Advanced Materials, Technologies, Systems & Processes."

**ABSTRACTS (USB FLASH DRIVE).** Abstracts of all scientific sessions at the meeting can be purchased in USB flash drive (thumb drive) format through ACS Attendee Registration either online before February 20 or on-site in San Francisco from April 2–6. The ACS member fee is \$65 each; the nonmember fee is \$90 each. Attendees can pick up their abstracts on-site at ACS Attendee Registration at the Moscone Center. You can have a USB flash drive shipped to you if you place your order before February 20, pay an \$8.00 postage fee per item, and provide a valid street address within the U.S. If you are not attending the meeting, you can purchase abstracts only from the ACS Office of Society Services, 1155 16th St. N.W., Washington, D.C. 20036; 800-227-5558. Abstract USB flash drives and their shipping costs are nonrefundable.

**GRAPHICAL ABSTRACTS.** Graphical abstracts from the polymer chemistry division may be ordered directly from the division. You can purchase them by e-mailing Kathy Mitchem ([kathyl@vt.edu](mailto:kathyl@vt.edu)) or inquiring about these products at the hospitality table for the division near their meeting rooms.

# TECHNICAL PROGRAM

## How to Read the Technical Program

**1.**  
**Search for the Division—**  
listed in alphabetical order

**3.**  
**Locate the session name**

**4.**  
**Locate the time or poster #**

### GEOC

#### Division of Geochemistry

A. Ilgen, Program Chair

#### SUNDAY MORNING

##### Section A

San Francisco Marriott Union Square  
Union Square North

##### Mineral-Water Interface Chemistry

##### A Tribute to Glenn Waychunas

*Cosponsored by COLL and ENVR*

C. S. Kim, P. A. O'Day, Organizers

B. Gilbert, Organizer, Presiding

8:30 Introductory Remarks.

8:35 **GEOC 1.** X-ray absorption spectroscopy studies of sorption reactions at mineral-aqueous

#### Note:

*Times represent the start of oral presentations and numbers represent poster numbers.*

**2.**  
**Locate the day**

**5.**  
**Locate the venue and room for each session**

# FULL TECHNICAL PROGRAM

**TWENTY-NINE OF THE SOCIETY'S** technical divisions and six committees are hosting original technical programming during the meeting. More than 14,000 papers have been accepted for this meeting.

Each organizing group's programming is detailed on the following pages. Nearly 4,000 chemical professionals and students are expected to attend the ever-popular Sci-Mix Inter-divisional Poster Session & Mixer on

Monday, April 3 from 8:00 to 10:00 PM at Moscone Center, Hall D. More than 1,000 noteworthy poster presentations, networking with colleagues, and light refreshments make up this enjoyable event.

## PRES

## Presidential Events

A. Campbell, Program Chair

## SUNDAY MORNING

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis &amp; Spectroscopy

Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC

## PHYS Division Awards Symposium

## Ahmed Zewail Award in Ultrafast Science &amp; Technology: Symposium in honor of Stephen R. Leone

Sponsored by PHYS, Cosponsored by PRES

## SUNDAY AFTERNOON

## Section A

San Francisco Marriott Marquis  
Salon 8

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&amp;EC, MEDI, MPPG‡, ORGN and PROF

A. Campbell, Organizer

C. J. Burrows, Organizer, Presiding

1:20 Introductory Remarks.

1:30 PRES 1. New opportunities for using light in energy conversion. A. Alivisatos

2:00 PRES 2. Challenges and opportunities for synthetic chemists in grid-scale energy storage. M.S. Sanford

2:30 PRES 3. Electrochemical and chemical storage of electrons at nanoscale for sustainable future. Y. Cui

3:00 PRES 4. Defining the glycome, the final omics frontier. C.R. Bertozzi

3:30 PRES 5. Controlling silica in its crystalline and amorphous states: A problem in surface science. H. Freund

## Best Practices in Selecting &amp; Presenting Safety Training Content

Sponsored by CHAS, Cosponsored by CCS and PRES

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## Novel Reactions, Methodologies &amp; Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC

## PHYS Division Awards Symposium

## Ahmed Zewail Award in Ultrafast Science &amp; Technology: Symposium in Honor of Stephen R. Leone

Sponsored by PHYS, Cosponsored by PRES

## MONDAY MORNING

## Section A

Moscone Center  
133

## Science for a Sustainable Energy Future

## Energy Storage

Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&amp;EC, MEDI, MPPG‡, ORGN and PROF

Financially supported by Chemical Sciences Roundtable; SSURF

A. Campbell, Organizer, Presiding

8:30 Introductory Remarks: A. Campbell.

8:40 Discussion: Energy Research: S. Binkley.

9:05 PRES 7. Challenges for large scale energy storage and transmission. J. Liu

9:35 PRES 8. How flexible long-duration storage is changing the way energy storage is used. J. Song

10:05 PRES 9. Developing and applying new tools to understand how materials for Li and beyond-Li battery technologies function. C.P. Grey

10:35 PRES 10. Innovation in stationary electricity storage: The liquid metal battery. D.R. Sadoway

11:05 PRES 11. Storing energy in lithium batteries for a sustainable energy future. M. Whittingham

11:35 Panel Discussion.

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Frontiers in Analytical &amp; Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT‡, ENVR‡, I&amp;EC, PRES‡ and PROF

## Celebrating 90 years of the WCC: Reflections of Past Chairs

Sponsored by WCC, Cosponsored by PRES and PROF

## Chemical Forensics

## Investigations of Alleged Use &amp; Source Attribution of Chemical Weapons

Sponsored by ANYL, Cosponsored by CHAL and PRES

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## PHYS Division Awards Symposium

## Peter Debye Award in Physical Chemistry: Symposium in honor of Bruce J. Berne

Sponsored by PHYS, Cosponsored by PRES

## MONDAY AFTERNOON

## Section A

Moscone Center  
133

## Science for a Sustainable Energy Future

## Chemical &amp; Biological Conversions Approaches to Energy Conversion

Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&amp;EC, MEDI, MPPG‡, ORGN and PROF

A. Campbell, Organizer, Presiding

1:30 Introductory Remarks.

1:40 PRES 12. Exploiting anaerobes for biomass breakdown and sustainable chemistry. M.A. O'Malley

2:10 PRES 13. Driving the future: The development of advanced biomass conversion technologies at the Joint BioEnergy Institute. B.A. Simmons

2:40 PRES 14. Designer interfaces for energy storage and recovery. Y. Surendranath

3:10 PRES 15. Novel strategies to enhance catalytic vectors. J.A. Lercher

3:40 PRES 16. Role of innovation in enabling a sustainable energy future. D.E. Arvizu

4:10 Panel Discussion.

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT‡, ENVR‡, I&amp;EC, PRES‡ and PROF

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Advances in Medicinal &amp; Biological Chemistry: From Therapeutics to Education

Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC

## Chemical Forensics

## Chemical Attribution Signatures of Illicit Drugs &amp; Toxic Chemicals

Sponsored by ANYL, Cosponsored by CHAL and PRES

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## PHYS Division Awards Symposium

## Joel Henry Hildebrand Award in the Theoretical &amp; Experimental Chemistry of Liquids: Symposium in honor of Salvatore Torquato

Sponsored by PHYS, Cosponsored by PRES

## Rising Star Award Symposium

Sponsored by WCC, Cosponsored by BIOL and PRES

## TUESDAY MORNING

## Producing Knowledgeable, Well-Rounded, T-Shaped Chemists for the 21st Century: Current Perspectives from High School, Undergraduate &amp; Graduate Educators

Sponsored by PROF, Cosponsored by BMGT, CHED and PRES

## Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

Sponsored by NUCL, Cosponsored by INOR and PRES

## Chemical Forensics

## Chemometrics &amp; Statistics for Signature Discovery &amp; Exploitation

Sponsored by ANYL, Cosponsored by CHAL and PRES

## GSSPC: Water Sustainability

## Chemists in Pursuit of Clean Water

Sponsored by CHED, Cosponsored by CEI and PRES

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## PHYS Division Awards Symposium

## ACS Award in Theoretical Chemistry: Symposium in honor of Peter Pulay

Sponsored by PHYS, Cosponsored by PRES

## TUESDAY AFTERNOON

## Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

Sponsored by NUCL, Cosponsored by INOR and PRES

## Chemical Forensics

## Isotopic &amp; Elemental Profiling for the Source Attribution of Materials

Sponsored by ANYL, Cosponsored by CHAL and PRES

## GSSPC: Water Sustainability

## Chemists in Pursuit of Clean Water

Sponsored by CHED, Cosponsored by CEI and PRES

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## PHYS Division Awards Symposium

## E. Bright Wilson Award: Symposium in honor of David J. Nesbitt

Sponsored by PHYS, Cosponsored by PRES

## ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

## Chemists Leading the Charge: Chemists Using Business Acumen &amp; Transformative Research to Address Societal Needs

Sponsored by INOR, Cosponsored by BMGT‡, MPPG, PRES and PROF‡

‡Cooperative Cosponsorship

## TUESDAY EVENING

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## WEDNESDAY MORNING

## What Have We Learned &amp; Where Are We Going: Post-Settlement in the University of California

Sponsored by CHAS, Cosponsored by CCS and PRES

## Communicating Science in the Twenty-First Century to Diversified Audiences

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

## PHYS Division Awards Symposium

## Francis P. Garvan–John M. Olin Medal: Symposium in honor of Barbara J. Finlayson-Pitt

Sponsored by PHYS, Cosponsored by PRES

## WEDNESDAY AFTERNOON

## What Have We Learned &amp; Where Are We Going: Post-Settlement in the University of California

Sponsored by CHAS, Cosponsored by CCS and PRES

## Communicating Science in the Twenty-First Century to Diversified Audiences

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

## THURSDAY MORNING

## Current Best Practices for Chemistry REU Programs

Sponsored by CHED, Cosponsored by PRES

## MPPG

## Multidisciplinary Program Planning Group

K. Beers, Program Chair

## SUNDAY MORNING

## Section A

Moscone Center  
Esplanade Ballroom 302

## Spotlight on Advanced Materials, Technologies, Systems &amp; Processes in the Journal of the American Chemical Society

S. Krane, Organizer, Presiding  
P. J. Stang, Presiding

8:30 Introductory Remarks.

8:35 MPPG 1. Advanced bioelectrocatalytic materials for fuel cells and electrosynthesis. S.D. Minter

9:10 MPPG 2. Surface coordination chemistry of metal nanomaterials. N. Zheng

9:45 MPPG 3. From upconverting nanoparticles to graphene: When surfaces matter. M. Cerruti

10:20 MPPG 4. Semiconductor nanowires for energy conversion. P. Yang

10:55 MPPG 5. Fluorescent nanodiamonds for precision sensing & drug delivery applications. T. Weil

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis &amp; Spectroscopy

Sponsored by PROF, Cosponsored by ANYL†, BIOL†, CHED, CMA, COLL, COMP, CWD, ENVR, INOR†, MEDI, MPPG, ORGN, PHYS, PMSE†, POLY, PRES† and WCC

## Next Generation Smart Materials

Sponsored by POLY, Cosponsored by MPPG†

## Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG† and PHYS

## Polymeric Materials for Performance &amp; Sustainability

## Biobased Polymers

Sponsored by POLY, Cosponsored by MPPG†

## Advanced Materials &amp; Technologies for Solar Energy Conversion &amp; Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG† and PMSE

## Catalysis for Unconventional Energy Sources

Sponsored by ENFL, Cosponsored by CATL and MPPG†

## Janus Particles: Synthesis, Characterization &amp; Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG†

## Incorporating Polymer Science into the Classroom

Undergraduate Curriculum  
Sponsored by POLY, Cosponsored by CHED, MPPG† and PMSE

Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG†

## SUNDAY AFTERNOON

## Section B

Moscone Center  
Gateway Ballroom 103/104

## Advanced Materials, Technologies, Systems &amp; Processes Plenary Session

K. Beers, Organizer, Presiding

3:00 MPPG 6. Clean energy challenge: An integrated approach involving basic research, innovation and human factors. P.F. Green

3:45 MPPG 7. Technology at the interface of microelectronics, life sciences, and big data: Materials challenges. J.G. Linhardt

4:30 MPPG 8. From design and synthesis to advanced properties and sustainable polymeric materials. A. Albertsson

5:15 MPPG 9. Fostering industrial and academic partnerships. K. Watson

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG†, ORGN and PROF

## Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG† and PHYS

## Polymeric Materials for Performance &amp; Sustainability

## Functional Materials: Gels &amp; Membranes

Sponsored by POLY, Cosponsored by MPPG†

## Advanced Materials &amp; Technologies for Solar Energy Conversion &amp; Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG† and PMSE

## Janus Particles: Synthesis, Characterization &amp; Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG†

## Catalysis for Unconventional Energy Sources

Sponsored by ENFL, Cosponsored by CATL and MPPG†

## Incorporating Polymer Science into the Classroom

## High School &amp; Community College

Sponsored by POLY, Cosponsored by CHED, MPPG† and PMSE

## Innovative Chemistry &amp; Materials for Electrochemical Energy Storage

## Cathode Materials

Sponsored by ENFL, Cosponsored by MPPG† and PMSE

Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG†

## MONDAY MORNING

## Section A

Moscone Center  
130

## Advanced Materials, Technologies, Systems &amp; Processes: Implementation of Chemistry into Practice

K. Beers, Organizer, Presiding

8:45 Introductory Remarks.

8:55 MPPG 10. Designing organic semiconductors for advanced applications. M. Jeffries-El

9:25 MPPG 11. Opportunities for new and efficient catalytic processes for the utilization of natural gas. T. Gunnoe, M.S. Webster-Gardiner, B.A. Vaughan, S.K. Khani, J.B. Gary, J. Chen, B.A. McKeown, T.R. Cundari

9:55 MPPG 12. Automated flow peptide synthesis: Toward amide bonds at nature's pace. B.L. Pentelute

10:25 MPPG 13. Chemistry in a startup environment: A personal journey. C. Reich

10:55 MPPG 14. Making real parts: Rethinking materials for 3D manufacturing. J. Rolland

11:25 MPPG 15. Modifying organic polymers using metal-organic materials: A perspective from a Fulbright fellow in Peru. C.V. Gauthier, S. Kim, J. Nakamatsu

## Science for a Sustainable Energy Future

## Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG†, ORGN and PROF

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Frontiers in Analytical &amp; Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL†, BIOL†, CHED, CMA, COLL, COMP, CWD, ENVR, INOR†, MEDI, MPPG, ORGN, PHYS, PMSE†, POLY, PRES† and WCC

## Next Generation Smart Materials

Sponsored by POLY, Cosponsored by MPPG†

## Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG† and PHYS

## Advanced Materials &amp; Technologies for Solar Energy Conversion &amp; Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG† and PMSE

## Polymeric Materials for Performance &amp; Sustainability

## High Performance

Sponsored by POLY, Cosponsored by MPPG†

## Support &amp; Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG†

## Catalysis for Unconventional Energy Sources

Sponsored by ENFL, Cosponsored by CATL and MPPG†

## Janus Particles: Synthesis, Characterization &amp; Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG†

## Innovative Chemistry &amp; Materials for Electrochemical Energy Storage

## Flow Batteries &amp; Organic Electrodes

Sponsored by ENFL, Cosponsored by MPPG† and PMSE

## 50th Anniversary Celebration of Macromolecules

Sponsored by POLY, Cosponsored by MPPG† and PMSE

Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG†

## MONDAY AFTERNOON

## Section A

Moscone Center  
130

**Nanoscience & Nanotechnology for Advanced Materials & Technologies**

L. E. Fernandez, *Organizer*  
P. Alivisatos, R. S. Weiss, *Organizers, Presiding*

1:00 Introductory Remarks.

1:10 MPPG 16. Nanoscale gems, needles and grooves. H. Park

1:45 MPPG 17. Exploiting the nanocrystal library to construct electronic and optoelectronic devices. C.R. Kagan

2:20 MPPG 18. Carbon dots for environmental and energy applications. Z. Kang, S. Lee

2:55 MPPG 19. Structure-controlled synthesis of single-walled carbon nanotubes. Y. Li

## Section B

Moscone Center  
Gateway Ballroom 103/104

**The Kavli Foundation Emerging Leader in Chemistry Lecture**

A. Campbell, *Organizer, Presiding*

4:00 Introductory Remarks.

4:05 MPPG 20. Classical challenges in the physical chemistry of polymer networks. B.D. Olsen, J.A. Johnson, R. Wang, S. Tang, M. Zhong, K. Kawamoto, J. Ramirez, T. Dursch

4:55 Q&A Session.

## Section B

Moscone Center  
Gateway Ballroom 103/104

**The Fred Kavli Innovations in Chemistry Lecture**

A. Campbell, *Organizer, Presiding*

5:15 Introductory Remarks.

5:20 MPPG 21. CRISPR systems: Nature's toolkit for genome engineering. J. Doudna

6:15 Q&A Session.

**Industrial Innovations in Polymer Chemistry**

*Sponsored by POLY, Cosponsored by MPPG‡ and PMSE*

**Science for a Sustainable Energy Future**
**Chemical & Biological Conversions Approaches to Energy Conversion**

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG‡, ORGN and PROF*

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

**Next Generation Smart Materials**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Catalytic Materials from Molecular Insight**

*Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS*

**Polymeric Materials for Performance & Sustainability**
**Biodegradable & Recyclable Polymers**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Support & Activator Effects on Metal Mediated Polymerization**

*Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG‡*

**Advanced Materials & Technologies for Solar Energy Conversion & Storage**

*Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE*

**Janus Particles: Synthesis, Characterization & Applications**

*Sponsored by PMSE, Cosponsored by COLL and MPPG‡*

**Innovative Chemistry & Materials for Electrochemical Energy Storage**
**Capacitors**

*Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE*

**50th Anniversary Celebration of Macromolecules**

*Sponsored by POLY, Cosponsored by MPPG‡ and PMSE*

**Computations for CO2 Capture, Conversion & Sequestration**

*Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG‡*

## TUESDAY MORNING

**Functional Porous Materials for Sustainable Energy**

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

**Next Generation Smart Materials**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Polymers under Deformation**
**Structure & Morphology Changes during Deformation of Polyolefins & Polymer Composites**

*Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡*

**Catalytic Materials from Molecular Insight**

*Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS*

**Polymeric Materials for Performance & Sustainability**
**Functional Materials for Energy & Electronics**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Support & Activator Effects on Metal Mediated Polymerization**

*Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG‡*

**Advanced Materials & Technologies for Solar Energy Conversion & Storage**

*Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE*

**Innovative Chemistry & Materials for Electrochemical Energy Storage**
**Solid-State Electrolytes & Beyond Li**

*Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE*

**Biomass & Biofuel Processing**

*Sponsored by ENFL, Cosponsored by CELL, MPPG‡ and WCC*

**Polymer Chemistry (RSC) Lectureship**

*Sponsored by POLY, Cosponsored by MPPG‡*

**State-of-the-Art Methods for Modeling Materials Chemistry**

*Sponsored by COMP, Cosponsored by CATL and MPPG‡*

**ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler**
**Materials Chemistry of Solutions & Solids for a Sustainable Future**

*Sponsored by INOR, Cosponsored by BMGT‡, MPPG, PRES and PROF‡*

**Chemistry is Central to Applied Materials**

*Sponsored by INOR, Cosponsored by MPPG‡*

## TUESDAY AFTERNOON

**Catalytic Materials from Molecular Insight**

*Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS*

**Functional Porous Materials for Sustainable Energy**

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

**Next Generation Smart Materials**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Polymers under Deformation**
**Applying Advances in Characterization Methods for In-Situ Studies of Deformation**

*Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡*

**Advances in Polysaccharides: Practice & Applications**
**New Developments in the Industrial Sector**

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY*

**Advanced Materials & Technologies for Solar Energy Conversion & Storage**

*Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE*

**Support & Activator Effects on Metal Mediated Polymerization**

*Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG‡*

**Innovative Chemistry & Materials for Electrochemical Energy Storage**
**2D Energy Storage Materials**

*Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE*

**Biomass & Biofuel Processing**

*Sponsored by ENFL, Cosponsored by CELL, MPPG‡ and WCC*

**Polymer Chemistry (RSC) Lectureship**

*Sponsored by POLY, Cosponsored by MPPG‡*

**State-of-the-Art Methods for Modeling Materials Chemistry**

*Sponsored by COMP, Cosponsored by CATL and MPPG‡*

**ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler**
**Chemists Leading the Charge: Chemists Using Business Acumen & Transformative Research to Address Societal Needs**

*Sponsored by INOR, Cosponsored by BMGT‡, MPPG, PRES and PROF‡*

## WEDNESDAY MORNING

**Functional Porous Materials for Sustainable Energy**

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

**Next Generation Smart Materials**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Polymers under Deformation**
**AFM & Nanoindentation Studies**

*Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡*

**Advances in Polysaccharides: Practice & Applications**
**Novel Biocatalytic & Biopolymeric Approaches**

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY*

**Polymeric Materials for Performance & Sustainability**
**Other Functional Materials**

*Sponsored by POLY, Cosponsored by MPPG‡*

**Innovative Chemistry & Materials for Electrochemical Energy Storage**
**Electrolytes & Interface**

*Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE*

**Biomass & Biofuel Processing**

*Sponsored by ENFL, Cosponsored by CELL, MPPG‡ and WCC*

**State-of-the-Art Methods for Modeling Materials Chemistry**

*Sponsored by COMP, Cosponsored by CATL and MPPG‡*

**Undergraduate Laboratory Experiments Involving Advanced Materials**

*Sponsored by CHED, Cosponsored by MPPG‡*

**Chemistry is Central to Applied Materials**

*Sponsored by INOR, Cosponsored by MPPG‡*

## WEDNESDAY AFTERNOON

**Functional Porous Materials for Sustainable Energy**

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

‡Cooperative Cosponsorship

**Next Generation Smart Materials**

Sponsored by POLY, Cosponsored by MPPG‡

**Polymers under Deformation****Control of Deformation across the Length Scale for Advanced Polymer Materials**

Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡

**Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry****Advanced Materials & Structures**

Sponsored by CELL, Cosponsored by MPPG‡ and POLY

**Advances in Polysaccharides: Practice & Applications****Novel Materials & Methodologies**

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

**Polymeric Materials for Performance & Sustainability****Recyclable & Bio-Based Materials**

Sponsored by POLY, Cosponsored by MPPG‡

**Innovative Chemistry & Materials for Electrochemical Energy Storage****Anode Materials & Li-S**

Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE

**Biomass & Biofuel Processing**

Sponsored by ENFL, Cosponsored by CELL, MPPG‡ and WCC

**State-of-the-Art Methods for Modeling Materials Chemistry**

Sponsored by COMP, Cosponsored by CATL and MPPG‡

**Undergraduate Laboratory Experiments Involving Advanced Materials**

Sponsored by CHED, Cosponsored by MPPG‡

**Frontiers in Glycoanalytics****MS & NMR Methods**

Sponsored by CELL, Cosponsored by ANYL, CARB‡ and MPPG‡

**THURSDAY MORNING****Functional Porous Materials for Sustainable Energy**

Sponsored by ENFL, Cosponsored by CATL and MPPG‡

**Next Generation Smart Materials**

Sponsored by POLY, Cosponsored by MPPG‡

**Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry****Commercial & Versatile Technology**

Sponsored by CELL, Cosponsored by MPPG‡ and POLY

**Advances in Polysaccharides: Practice & Applications****New Functional Materials**

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

**Polymeric Materials for Performance & Sustainability****Applications**

Sponsored by POLY, Cosponsored by MPPG‡

**Innovative Chemistry & Materials for Electrochemical Energy Storage****Electrochemical Catalysis & Energy Conversion**

Sponsored by ENFL, Cosponsored by MPPG‡ and PMSE

**Frontiers in Glycoanalytics****Molar Mass & Crystallinity Analyses**

Sponsored by CELL, Cosponsored by ANYL, CARB‡ and MPPG‡

**THURSDAY AFTERNOON****Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry****Energy, Food & Packaging Development**

Sponsored by CELL, Cosponsored by MPPG‡ and POLY

**Advances in Polysaccharides: Practice & Applications****Preparation, Characterization & Applications**

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

**AGFD****Division of Agricultural and Food Chemistry**

N. Seeram, Program Chair

**SOCIAL EVENTS:**

Poster Reception, 5:00 PM: Sun

**BUSINESS MEETINGS:**

Business Meeting, 12:00 PM: Tue

Future Program Meeting, 12:00 PM: Mon

**SUNDAY MORNING****Section A**Hilton San Francisco Union Square  
Continental Parlor 9**Chemistry & Biological Effects of Maple Food Products**

H. Ma, N. P. Seeram, Organizers, Presiding

**9:00** Introductory Remarks.**9:05 AGFD 1.** Maple-Derived food bioactives in human health & diseases: The path forward. N.P. Seeram**9:35 AGFD 2.** Effect of the new high vacuum technology on the chemical composition of maple sap and syrup. L. Lagace, M. Deschênes, N. Martin, F. Ethier, M. Beaudoin, J. Houde, S. Corriveau, M. Sadiki**10:05 AGFD 3.** Maple sugar, an unexplored maple food product: UFLC-TOF-MS/MS Characterization and neuroprotective activities of phenolics. Y. Liu, K. Rose, N.P. Seeram**10:35** Intermission.**10:50 AGFD 4.** Phenolic-enriched Maple Syrup Extract (MSX) inhibited the formation of advanced glycation end-products through its antioxidant capacity. W. Liu, H. Ma, Z. Wei, J. Dain, N.P. Seeram**11:20 AGFD 5.** Synthesis and characterization of the bioactivity of quebecol and its analogs. N. Voyer, S. Cardinal, C. Bouchard, D. Grenier**11:50 AGFD 6.** Unraveling the complex carbohydrates in maple syrup. D.C. Rowley, J. Sun, H. Ma, N.P. Seeram**12:20** Concluding Remarks.**Section B**Hilton San Francisco Union Square  
Franciscan A**Chemistry of Korean Foods & Beverages**

Cosponsored by IAC

C. H. Do, A. M. Rimando, Organizers

K. G. Lee, Organizer, Presiding

Y. Kim, Presiding

**8:00** Introductory Remarks.**8:05 AGFD 7.** Introduction of Korean foods and beverages. C.H. Do, J.C. Park, S. Chun**8:30 AGFD 8.** Evaluation of metabolites from lactic acid bacteria originated from kimchi. J. Lee**8:55 AGFD 9.** Withdrawn.**9:20 AGFD 10.** Isolation and characterization of lactic acid bacteria from naturally fermented Korean sourdough. N. Han, C. Park, S. Shim, J. Seo**9:45** Intermission.**10:00 AGFD 11.** Lactic acid bacteria isolated from kimchi as a modulator of gut microbiota in diet-induced obese mice. H. Choi**10:25 AGFD 12.** Structure and function of garlic derived organo-sulfur compounds. T. Seki, T. Hosono**10:50 AGFD 13.** Reduction of food hazards in Maillard reaction based Korean food model systems. K.G. Lee**Section C**Hilton San Francisco Union Square  
Franciscan B**Undergraduate Symposium**

Cosponsored by CHED

K. D. Deibler, Organizer

A. E. Mitchell, Presiding

**9:00** Introductory Remarks.**9:05 AGFD 14.** Detection of *Escherichia coli* in drinking water using engineered bacteriophage. A. Chen**9:30 AGFD 15.** Detection of 2,4-dichlorophenoxyacetic acid in food using molecularly imprinted polymers-surface enhanced Raman spectroscopy. Z.M. Hua**9:55** Intermission.**10:10 AGFD 16.** BG-4, a novel bioactive peptide from *Momordica charantia*, inhibits lipopolysaccharide-induced inflammation in THP-1 human macrophages. L. Jones, P. Pangloli, H. Krishnan, V.P. Dia**10:35 AGFD 17.** Investigation of antioxidant capacity and bioactive chemicals in South Carolina grown peaches. R.F. Ramey, F. Chen, L. Wang, C. Zhang, A. McCullogh, A. Burgess, T. Nguyen**11:00 AGFD 18.** Isolation and structure elucidation of bioactive compounds from *Garcinia buchananii* seeds. B. Stiglbauer, T.D. Stark**Nanocellulose Processing & Analysis****Novel Processes**

Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&amp;EC

## Chemistry of Korean Foods &amp; Beverages

Cosponsored by IAC

A. M. Rimando, Organizer

C. H. Do, K. G. Lee, Organizers, Presiding

## 1:00 Introductory Remarks.

**1:05 AGFD 25.** Changes in phytochemicals, aroma compounds, and sensory properties of Korean teas influenced by harvesting time and oxidative fermentation. Y. Kim

**1:30 AGFD 26.** Elucidation of flavor characteristics of Korean traditional fermented sauces. Y. Kim, S. Lee, M. Park, H. Namgung, K. Lee, S. Kum, S. Kim, J. Lee

**1:55 AGFD 27.** Correlation between the physicochemical components and sensory properties of *Makgeolli*. J. Kang, H. Choi, C. Kim, S. Yeo, S. Jeong

**2:20 AGFD 28.** Changes of volatile compositions in *soju* mashes from fermentation to distillation using different kinds of fermentation starters. S. Lee, K. Shin

## 2:45 Intermission.

**3:00 AGFD 29.** Comparing the effects of high hydrostatic pressure and thermal pasteurization on the quality of soft-persimmon juice. G. Kim, J. Kim, K. Kim, S. Choi

**3:25 AGFD 30.** Keeping kimchi delicious and safe through kimchi packaging. S. Yoo

**3:50 AGFD 31.** Image-based high content screening assay to predict of hepatotoxicity of bioactive compounds in natural products. H. Chun

## 4:15 Discussion.

## Section C

Hilton San Francisco Union Square  
Franciscan B

## Withycombe-Charalambous Graduate Student Symposium

Cosponsored by CHED

K. D. Deibler, Organizer

B. Park, Presiding

## 1:00 Introductory Remarks.

**1:10 AGFD 32.** Novel polysaccharide-polypeptides nanocomplexes: Assembly, characterization, and encapsulation of polyphenol in multi-platforms. Y. Jiang, Q. Huang

**1:40 AGFD 33.** Influence of legume proteins on the gastrointestinal digestion of omega-3 emulsions. C. Gumus, D. McClements

## 2:10 Intermission.

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**2:20 AGFD 34.** Prevention of obesity and type 2 diabetes with aged citrus peel (*chenpi*) extract. J. Guo, H. Tao, S. Jin, C. Ho, Q. Huang

**2:50 AGFD 35.** Rapid detection of methicillin-resistant *Staphylococcus aureus* in pork using a nucleic acid-based lateral flow immunoassay. L. Ma, H. Zhang, L. Ma, Z.M. Hua, S. Wang, X. Lu

**3:20 AGFD 36.** Absorption and metabolism of 3-MCPD 1-monopalmitate in rats. B. Gao, L.L. Yu

**3:50 AGFD 37.** Synergistic inhibitory effect of allyl isothiocyanate and sulforaphane on human non-small cell lung carcinoma cells. K. Rakariyatham, Z. Gao, H. Xiao

## Nanocellulose Processing &amp; Analysis

## Process Parameters

Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC

## Valorization of Renewable Resources &amp; Residuals into New Materials &amp; Multiphase Systems

Sponsored by CELL, Cosponsored by AGFD

## SUNDAY EVENING

## Section A

Moscone Center

West Hall

## General Posters

N. P. Seeram, Organizer

## 5:00 - 7:00

**AGFD 38.** Spatial variations in mercury and selenium concentrations in marine fishes of Rhode Island: Risks and benefits to human health. J. Jacques, M. Yurkevicius, D.L. Taylor

**AGFD 39.** Rheology and microstructure of caseinate-based edible films. M.H. Tunick, L. Bonnalie, L.D. Aburto, J. Mulherin, P.M. Tomasula

**AGFD 40.** Fatty acid profiles of marine fishes from Rhode Island coastal waters. M. Yurkevicius, J. Jacques, N.E. Breen, D.L. Taylor

**AGFD 41.** Cuticular hydrocarbon profile analysis of *Drosophila athabasca*: Variability by race. B.L. Gay, R. Yukilevich, J.D. Kehlbeck

**AGFD 42.** Investigation of the kinetics and equilibrium chemistry of cold-brew coffee: Caffeine and chlorogenic acid concentrations as a function of roasting temperature and grind size. N.Z. Rao, M. Fuller, N. Parenti, S. Ryder, N. Setchie Tchato

**AGFD 43.** Triterpenoid-enriched fruit extract of *Eugenia Jambolana L.* (Jamun) attenuates experimental type I diabetes in mice. Y. Zhao, R. Guo, Q. Zhang, Z. Guo, F. Xue, J. Xu

**AGFD 44.** Effect of substitution of  $\beta$ -glucans on the glycemic response and thermal properties of common starches. A. Anderson

**AGFD 45.** Vibrational spectroscopy and multivariate data analysis for elucidation and classification of compositional changes in milk subject to Supercritical Fluid Extraction (SFE). E. Jones, C. Ulrichsen, A. Laubscher, R. Jimenez-Flores

**AGFD 46.** Mechanistic investigation of nitric oxide inhibition and subsequent nitrous oxide (N<sub>2</sub>O) emission. S. Li, G. Chen

**AGFD 47.** Novel collagen-derived glycopeptide pro-Hyp-CONH-GlcN: Synthesis and transepithelial transport in Caco-2 cell model. M. Feng, M. Betti

**AGFD 48.** Effect of drying in raw almonds with concealed damage. C. Rogel-Castillo, A.E. Mitchell

**AGFD 49.** Determination of raffinose content in pulses as a factor enhances the growth of probiotics and antioxidant protection in yogurt. P. Dinh, K. Bhargava, S. Gamagedara

**AGFD 50.** Detection of polyphenolic compounds in crude extract samples of strawberry cultivars. C.M. Van Spronsen, N.C. Dopke

**AGFD 51.** Vapor-Infusion of wine flavor volatiles in specialty dark chocolate and analysis via GC-MS. S. Richards, P.J. Iles, L.D. Giddings, R.V. Valcaro, N.R. Bastian, R. Holcomb, R. McFarland, H. Hsieh, T. Nielsen, J. Reelitz, M. Alvarez, S. Cunninghamham

**AGFD 52.** Optical control of insecticide activity and insect behaviors. S. Xusheng, Z. Gao, Y. Feng

**AGFD 53.** Reduction of lead uptake in leafy green vegetables using an ion exchange material. A. Anthony, M. Schenkel, L. Taormina, C.C. Philipp

**AGFD 54.** Comparison of fruit quality and metabolite profiling of natural or exogenous ethylene-induced ripe kiwifruit *Jecy green*. S. Lim, J. Lee, E. Lee

**AGFD 55.** Comparison of amygdalin levels in California almond (*Prunus dulcis*) varieties using UHPLC-(ESI) QqQ MS/MS. K. Luo, A.E. Mitchell

**AGFD 56.** Sugar and organic acid content of astringent, non-astringent, and pollination variant persimmons. A.M. Vilches, I.J. Sedej, C.W. Olsen, J. Smith, R.D. Woods, J.E. Preece, R.R. Milczarek, A.P. Breksa

**AGFD 57.** Vapor-Infusion of whiskey flavor volatiles in specialty dark chocolate and analysis via GC-MS. S. Richards, P.J. Iles, L.D. Giddings, R. Holcomb, N.R. Bastian, R.V. Valcaro, M. Alvarez, R. McFarland, H. Hsieh, J. Reelitz, T. Nielsen, S. Cunninghamham

**AGFD 58.** Dynamics and imbalance of nutrient concentrations in a closed hydroponic system during tomato growth. J. Lee, A. Rahman, H. Azam, H. Kim, M. Kwon

**AGFD 59.** Synthesis of copper, iron, calcium and barium alginate beads for the controlled release of a systemic fungicide. R. Torres Caban, J. Munoz, F. Roman, L. Morell

**AGFD 60.** Combinatorial enzyme technology for the conversion of agricultural fibers to functional products. S.B. Batt Throne, D. Feng, W.J. Orts, D.W. Wong

**AGFD 61.** Combinatorial enzyme technology: Conversion of pectin to oligo species and its effect on microbial growth. D. Feng, S.B. Batt Throne, W.J. Orts, D.W. Wong

**AGFD 62.** Dissipation pattern of pesticide residues during cultivation of agricultural products for establishing post-harvest residue level in Korea. J. Park, S. Yang, H. Choi

**AGFD 63.** Aroma optimization of low caloric, alcohol-free beverages. D. Gernat, E. Brouwer, M. Ottens

**AGFD 64.** Estimation of capsaicin and other nutritionally important compounds in Colorado grown pepper cultivars. M. Hamed, D. Kalita, M. Bartolo, S. Jayant

**AGFD 65.** Biochemical characterization of the polyphenolic radical in third hand smoke. A. Skochko, C. Lopez, S. Russell, G. Firestone, K. Stone

**AGFD 66.** Changes of volatile flavors during fermentation of kimchi. W. Hawer, D. Seo

**AGFD 67.** Environmental extraction and quantitation of tetracycline antibiotics and their metabolites in agricultural wastes using SPE, HPLC-MS, and HPLC-PDA. A.J. Abdulheem, C. Fullington, J.H. Loughrin, E.D. Conte

**AGFD 68.** Macro and micro-mineral contents of the pork cuts in Korea. D. Seo, S. Kim, J. Hwang, H. Lee, J. Park, Y. Jin, Y. Choi, S. Kim, J. Nam

**AGFD 69.** Experiment for analysis of urushiol in sumac and several indigenous food in Korea. D. Seo, K. Kim, W. Hawer

**AGFD 70.** Mineral nutrient contents of lentil bean, khorasan wheat and quinoa. J. Hwang, D. Seo, S. Kim, H. Lee, J. Park, Y. Jin, Y. Choi, S. Kim, J. Nam

**AGFD 71.** Effect of black rice on quality characteristics and antioxidant activity of yogurt fermented using *Lactobacillus paracasei* and *Lactobacillus rhamnosus*. J. Yoon, H. Kim, D. Baek, K. Choi, S. Ahn, C. Ra, J. Jhoo, G. Kim

**AGFD 72.** Anti-allergic effects of low-molecular-weight peptides derived from bovine  $\beta$ -casein on RBL-2H3 cells. H. Kim, S. Park, S. Ahn, H. An, S. Yoon, G. Kim, J. Jhoo

**AGFD 73.** Novel approaches to the chemical preparation and spectral characterization of tormentica acid. Y. Lo, G. Ren, J. Wu, H. Honda, T. Wei

**AGFD 74.** Novel approaches to the chemical synthesis and biological activity of 24-ketolanosterol as an inhibitor of HMG-CoA reductase. E.J. Parish, G. Ren, Y. Lo, H. Honda

**AGFD 75.** Novel approaches to the chemical synthesis and carbon-13 nuclear magnetic resonance spectral properties of cholest-4-en-3,6-dione. D. Ren, E.J. Parish, G. Ren, Y. Lo, H. Honda

**AGFD 76.** Novel approaches to the chemical synthesis and structural characterization of hydroxysterols. E.J. Parish, Y. Lo, H. Shyu, H. Honda, T. Wei

**AGFD 77.** Multiplex surface plasmon resonance imaging platform for label-free detection of foodborne pathogens. J. Chen, B. Park

**AGFD 78.** Effect of the cocoa butter equivalent addition on the volatile compounds of dark chocolate. C. Silva de Souza, J. Block

**AGFD 79.** Characterization of chemical and biological properties of proanthocyanidins from color corn after different processing methods. C. Chen, P. Somavat, V. Singh, E.G. Demejia

**AGFD 80.** Low-resolution 1H NMR as a reliable technique to study fresh and freeze-thawed hen egg yolk. C. Au, T. Wang, N. Acevedo

**AGFD 81.** Elucidation of the gelation mechanism of frozen-thawed egg yolk. C. Au, N. Acevedo, T. Wang

**AGFD 82.** Cellulose nanocrystals with light induced antimicrobial functions. Y. Zhu

**AGFD 83.** Encapsulation of microbial isolates in alginate beads designed to increase nutrient uptake in hydroponic systems. F. Al Jallaf, H.H. Hernandez

‡ Cooperative Cosponsorship

AGFD **84.** Quality characteristics of yogurt supplemented with trehalose and fructooligosaccharide. **D. Baek**, H. An, J. Park, J. Jhoo, G. Kim

AGFD **85.** Phenolic profile of aqueous and hydroalcoholic extracts from pecan nut shell [*Carya illinoensis* (Wangenh) C.Koch] obtained by optimization of ultrasonic-assisted extraction. **J. Block**, J. Hilbig, J. Bork

AGFD **86.** Sagebrush polyphenols impact the expression of CYP1A1. **S. Nosworthy**, J. Forbey, R. Prough, C. Dadabay

AGFD **87.** Isolation and purification of sesquiterpene lactones in sagebrush. **C.E. Ferrell**, J. Forbey, C. Dadabay

AGFD **88.** Antioxidant properties and phenolic concentrations of herbs within the Lamiaceae family. **J. Ahn**, **A. Alford**, E.D. Niemeyer

AGFD **89.** Green synthesis of coumarin derivatives in search of potent pesticides for sustainable agriculture. **M. Uroos**, N. Akhtar, J. Tariq

AGFD **90.** Chemical composition, and antinutritional factors in seeds, cake, and botanical fractions of Sacha inchi (*Plukenetia volubilis* L.). **P. Glorio**, M. Baquerizo, G. Rodríguez Paucar, J. Chavez, R. Lázaro, F. Saldaña

AGFD **91.** Effect of plant maturity on antioxidant properties and phenolic concentrations in green basil (*Ocimum basilicum* L.) cultivars. **C. Palmer**, **A. Reddy**, E.D. Niemeyer

AGFD **92.** LC/MS-MS method optimization for the detection and quantification of moxidectin in bovine serum. **G. Samenuk**, A.A. Pérez de León, R. Miller

AGFD **93.** Effect of mechanical stress on anthocyanin levels in blackberries. **A. Anthony**, **C. Schoborg**, M. Schenkel, A. Kinman, C.C. Philipp

AGFD **94.** Influence of organophosphorus pesticides on the stability of plasmonic nanoparticles in the presence of dissolved organic matter. **N.M. Dissanayake**, S.O. Obare

AGFD **95.** Detection of microbial volatile organic compounds released from *Macrophomina phaseolina* by headspace solid phase micro-extraction and gas chromatography-mass spectrometry. **J. She**

AGFD **96.** Chemical analysis of a commercial product containing essential oils shown to control southern cattle fever tick infestations in bovines. **M. Montoya**, S.B. Bach, A.A. Pérez de León, R. Miller

AGFD **97.** Changes in monoterpene glycosylation patterns in *Vitis vinifera* during grape berry maturation. **J. Godshaw**, A.K. Hjeltnelund, J. Zweigenbaum, S.E. Ebeler

AGFD **98.** Density functional theory study on triplet intermolecular hydrogen transfer between cycloxydim and chlorothalonil. **Q. Yuan**, I.R. Gould, N. Kidley

AGFD **99.** Correlating micro climate to alpha and beta acid concentrations in hops. **R. Schindler**, **A. Chui**, Z. Sharrett, M. Lares

AGFD **100.** Proteomic characterization of inhalable dust from the California San Joaquin Valley. **N. Nole**, C. Santiago, **S. Russell**

AGFD **101.** Development and validation of QuEChERS method for simultaneous analysis of trichothecenes in nuts by ultra performance liquid Chromatography coupled to tandem mass spectrometry. **M. Yoo**, S. Lee, S. Kim

AGFD **102.** Novel metabolites of food contaminant phthalates revealed by HRMS and their implications in quantitating urinary toxicant exposure markers. **J. Hsu**, J. Hsu, Y. Chen, S. Tsai, **P. Liao**

AGFD **103.** Withdrawn.

AGFD **104.** Monitoring of natural preservative levels in fisheries products. **S. Lee**, M. Yoo, S. Choi, D. Shin

AGFD **105.** Development and application of the AMBER molecular mechanics force field to investigate herbicide interaction in plants. **T. Khanna**, L. Barter, I.R. Gould

AGFD **106.** Biological evaluation of Yansun (*Thunia alba* L.) extract from Yungui plateau in China. **H. Ma**, N.P. Seeram

AGFD **107.** Characterization of commercially available honey in Puerto Rico. **J. Becerra Lopez**, **R. Flores-Morales**, **A. Muñoz**, C. Perez-Rodríguez, M. Figueroa-Cruz, R. Maiz, K. Blanco, J. Morales-Velez, C. Camacho, J. Gomez-Torres, A. Vega Negron, A.M. Gonzalez

AGFD **108.** Ethanol analysis via infrared spectroscopy. **A. Campanella**, M.D. Mosher

AGFD **109.** Effects of cooling rate on  $\alpha$ -oryzanol and  $\beta$ -sitosterol oleogels. **I. Hazlett**, N. Acevedo

AGFD **110.** Characterization of a novel arabinoxylan-glucan crosslink in rice bran fiber. **B.J. Savary**, K. Takahashi, K. Teoh

AGFD **111.** Determination of the effect of meringue under different conditions. **M. Nguyen**, E. Stemp

AGFD **112.** Analysis of major elements in wines using an Agilent MP-AES. **C.K. Tanabe**, H. Hopfer, R. Boulton, S.E. Ebeler, J. Nelson

AGFD **113.** Fast analysis of arsenic species in Californian wines with LC-ICP-QQQ. **C.K. Tanabe**, S.E. Ebeler, J. Nelson

AGFD **114.** Refrigeration storage of native and improved native potatoes. **F. Cerron Mercado**, P. Glorio-Paulet, F. Rodríguez, J. Nuñez

AGFD **115.** Characterization of the organoleptic properties, vitamin C levels and anti-oxidant contents of Californian grown persimmons. **I.J. Sedej**, A.M. Vilches, C.W. Olsen, J. Smith, R.D. Woods, J.E. Preece, R.R. Milczarek, A.P. Breksa

AGFD **116.** Industrial hemp for fuels and chemicals: From weed to wonder. **S. Tulaphol**, T. Phung, M. Hossain, N. Sun, T. Prasomsri, S. Renneckar, **N. Sathitsuksano**

AGFD **117.** Determination of imidacloprid in central California honey and the decline of the bee population. **S.C. Fleming**, B. Anderson, M. Barr-Ramsey, E. Issa, E. Manzo, D. Smith, M. Tjuanta, C. Olea

AGFD **118.** Palmitic, stearic and oleic acid sophorolipids and thiamine dilauryl sulfate inactivate *Escherichia coli* O157:H7 in the presence of low concentrations of ethanol. **X. Zhang**, R. Ashby, D. Solaiman, Y. Liu, **X. Fan**

AGFD **119.** Recovery of grape pomace polyphenols by polymeric adsorbents with affinity ligands and the evaluation of adsorption and desorption characteristics of polyphenols. **A. Seker**, S. Chen

AGFD **120.** Extraction and purification of (E)-resveratrol from the bark of conifer species in Maine. **P.S. Piyaratne**, B.W. Cole, R. Fort

## MONDAY MORNING

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

#### Isolation, Food Composition & Antioxidant Activity

G. Gattuso, G. K. Jayaprakasha, *Organizers*

B. Patil, *Organizer, Presiding*

D. Barreca, V. Cheynier, *Presiding*

#### 8:00 Introductory Remarks.

**8:05 AGFD 121.** Concentration of polyphenolic compounds and antioxidant activity of garlic grown from air bulbils. **A. Kopec**, E. Jedrzejczyk, R. Francik, **J. Zawistowski**

**8:30 AGFD 122.** Changes of phenolic compounds resulting from thermal food processing. **S. Rohn**

**8:55 AGFD 123.** Potential green solvents using accelerated extraction of Brussel sprouts yielded higher phenolics, antioxidant activity and  $\alpha$ -amylase inhibition. **G.K. Jayaprakasha**, H. S. Y.B. Ruiz, B. Patil

**9:20 AGFD 124.** Cooking effects on the bioavailability and bioactivity of phenolic and carotenoids of Mediterranean sofrito. **R. Lamuela-Raventos**, J. Fernando-Rinaldi, S. Hurtado-Barroso, M. Martínez-Huélamo, M. Illan, X. Torrado

#### 9:45 Intermission.

**10:00 AGFD 125.** Natural and bioinspired phenol polymers with antioxidant properties for health and food applications. **A. Napolitano**

**10:25 AGFD 126.** Analysis of non-extractable phenolic compounds in fruit products: Methodology and perspectives. **J. Pérez-Jiménez**, F. Saura-Calixto

**10:50 AGFD 127.** Edible bean sprouts as a dietary source of antioxidant phenolics. **H. Corke**, R. Gan

#### 11:15 Concluding Remarks.

### Section B

Hilton San Francisco Union Square  
Franciscan A

### Artisanal Foods

A. L. Waterhouse, *Organizer*

M. H. Tunick, *Organizer, Presiding*

#### 8:00 Introductory Remarks.

**8:10 AGFD 128.** Marketing artisanal products. **R. Villarreal**

**8:45 AGFD 129.** Impact on chemical composition of yerba mate tea using artisan methods in comparison to mass-produced technology. **E.G. Demejia**, D. Karr

#### 9:30 Intermission.

**9:45 AGFD 130.** Fundamentals of coffee brewing. **K. Sanchez**

**10:05 AGFD 131.** Physics and chemistry of brewing coffee. **C. Hendon**

**10:30 AGFD 132.** Craft and science of artisanal wine. **A.L. Waterhouse**, N. Gislason

## Section C

Hilton San Francisco Union Square  
Franciscan B

### Structure & Chemistry of Proteins of Food Safety & Food Manufacturing Interest

Y. Zhang, *Organizer, Presiding*

**8:00 AGFD 133.** Detection of allergens and gluten in fermented and hydrolyzed food and ingredients. **L. Jackson**

**8:25 AGFD 134.** Nucleic acid-based sensors for the detection of gluten in food: A tool for ensuring the safety of celiac patients. **M. Lobo-Castañón**, R. Miranda-Castro, N. de los-Santos-Alvarez, A.J. Miranda-Ordieres

**8:50 AGFD 135.** Caracterización de sericina producido por liofilización. **C. Londoño**, D.C. Castrillón Martínez, **A. Restrepo**, C. Alvarez

**9:15 AGFD 136.** Differences in the functionality and characterization of kafirins extracted from decorticated sorghum flour or gluten meal with protease. **J. Espinosa**, I. Garza-Guajardo, E. Perez-Carrillo, S.O. Serna-Saldivar

#### 9:40 Intermission.

**9:55 AGFD 137.** Recent development in typing, characterization and detection of Shiga toxins produced by pathogenic *E. coli*. **X. He**

**10:20 AGFD 138.** Functionalization of food proteins and peptides via Transglutaminase (TGase) catalysis: Effects on bioactivity, functionality and safety. **M. Betti**, Y. Hrynets

**10:45 AGFD 139.** Recent development in recombinant food allergen production. **Y. Zhang**

**11:10 AGFD 140.**  $\beta$ -Lactoglobulin-chlorogenic acid conjugate-based nanoparticle for delivery of (-)-epigallocatechin-3-gallate. **J. Yi**, Y. Fan, Y. Zhang

### Nanocellulose Processing & Analysis Properties

*Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC*

## MONDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

#### HPLC Separation, Mass Spectrometry & Antioxidant Activity

G. Gattuso, G. K. Jayaprakasha, B. Patil, *Organizers*

G. Gowda, R. Lamuela-Raventos, J. Singh, *Presiding*

#### 1:00 Introductory Remarks.

**1:05 AGFD 141.** Analytical characterization of anthocyanins in *Vaccinium myrtillus* L. berries and food products. **V. Brighenti**, C. Ranieri, F. Pellati, S. Benvenuti

**1:30 AGFD 142.** Properties and applications of macromolecular antioxidants, the hidden face of dietary antioxidants. F. Saura Calixto, J. Pérez-Jiménez

**1:55 AGFD 143.** High-resolution mass spectrometry analysis of flavonoid-acetaldehyde reaction products in wine-like model solutions. A. Vallverdu-Queralt, E. Meudec, R. Lamuela-Raventos, N. Sommerer, V. Cheyner

**2:20 AGFD 144.** Polyphenolic profiles of fruits grown in Serbia. Z. Tesic, U. Gasic, D. Milojkovic-Opsenica

**2:45** Intermission.

**3:00 AGFD 145.** UHPLC-qTOF MS analysis of phenols in wines made with different maceration techniques. S. Frost, J. Blackman, J. Zweigenbaum, H. Heymann, S.E. Ebeler

**3:25 AGFD 146.** Combination of green solvents using accelerated extraction of spinach and LC-HR-ESI-QTOF-MS led five new flavonoids and yielded higher antioxidants. J. Singh, G.K. Jayaprakasha, B. Patil

**3:50 AGFD 147.** Determination of ellagic acid in the wastes of walnut, chestnut and pomegranate grown in Turkey using HPLC-DAD method. G. Yalcin, C. Demirbag, I. Bahsi, L. Ozgul, D. Bilgic, H. Onurlu, S.A. Seyhan

**4:15** Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Artisanal Foods

M. H. Tunick, *Organizer*

A. L. Waterhouse, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 148.** Crafting a regionally evocative gin using locally wild-crafted botanicals. D. Smith, T.S. Collins

**1:50 AGFD 149.** Mezcal: An ancestral distilled beverage obtained from agave. A.C. Gschaedler, M. Kirchmayr, M. Arellano, R. Prado

**2:15 AGFD 150.** Artisanal excellence: Beer. C. Bamforth, S. Ungermann

**3:00** Intermission.

**3:15 AGFD 151.** Artisanal chocolate: Flavor chemistry of the enticing aroma and taste of cocoa. M. Foley

**4:00 AGFD 152.** Volatile compounds during traditional fermentation and drying of cacao (Theobroma cacao). E. Lugo, A. Gschaedler, J. Rodriguez

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## Section C

Hilton San Francisco Union Square  
Franciscan B

### General Papers

N. P. Seeram, *Organizer, Presiding*

H. Ma, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 153.** Withdrawn.

**1:30 AGFD 154.** Bioassay-guided isolation and structure elucidation of a natural product inhibitor of *Xylella fastidiosa* from the endophytic fungus *Ulocladium* sp. M. Papineau, L. D'Elia, P. Rolshausen, C. Roper, K.N. Maloney

**1:55 AGFD 155.** Changes in lipid profile and plasma proteome of streptozotocin-induced diabetic rats fed an amaranth supplemented diet. A.J. Velarde Salcedo, A. Barrera Pacheco, A.P. Barba de la Rosa

**2:20** Intermission.

**2:35 AGFD 156.** Investigation of the anti-proliferative constituents of *Podocarpus neriifolius* leading to the isolation of bioactive type-B podolactones and a novel glucoside derivative. P. Benatrehina, W. Chen, H. Chai, T.N. Ninh, D.D. Soejarto, J.E. Burdette, L. Rakotondraibe, A.D. Kinghorn

**3:00 AGFD 157.** Mechanically robust N-halamine grafted PVA-co-PE membranes with renewable antimicrobial activity. Y. Si, Y. Ma, A. Cossu, N. Nitin, G. Sun, D. Wang

**3:25 AGFD 158.** Lunasin-enriched products: Effect of Kunitz trypsin and Bowman-Birk protease inhibitors on stability against pepsin-pancreatin hydrolysis and modification of the inflammasomes *in vitro*. S.J. Price, P. Pangloli, H. Krishnan, V.P. Dia

**3:50 AGFD 159.** Sorghum kafirin: Effect of ultrasonication on its pepsin-pancreatin digestibility and anti-inflammatory effects in lipopolysaccharide-induced THP-1 human macrophages. A. Sullivan, P. Pangloli, V.P. Dia

**4:15 AGFD 160.** Particle size related bacterial recovery in immunomagnetic separation. J. Chen, B. Park

**4:40** Concluding Remarks.

## Nanocellulose Processing & Analysis

### Fundamentals

*Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC*

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

### Undergraduate Research Posters

#### Agricultural & Food Chemistry

*Sponsored by CHED, Cosponsored by AGFD† and SOCED‡*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

N. P. Seeram, *Organizer*

**8:00 - 10:00**

**38, 40, 47, 49, 51, 53, 55, 57, 59-60, 64, 86-88, 91, 93-95, 98-100, 103, 105, 107-108, 110.** See previous listings.

## TUESDAY MORNING

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

#### Mass Spectrometry & Invitro Biological Activities

G. Gattuso, B. Patil, *Organizers*

G. K. Jayaprakasha, *Organizer, Presiding*

G. Williamson, J. Zawistowski, *Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 161.** Cryo-TOF-SIMS visualization of water-soluble chemicals in plant. D. Aoki, Y. Matsushita, K. Fukushima

**8:30 AGFD 162.** Towards a comprehensive analysis of condensed tannin structures. H. Fulcrand, L. Rouméas, C. Romieu, L. Mouis, J. Brillouet

**8:55 AGFD 163.** Chemical composition of flavonoids from selected herbs and their mechanism of inhibition of dipeptidyl peptidase-IV as potential strategy in the management of diabetes. E.G. Demejia, A. Bower, M.A. Berhow

**9:20 AGFD 164.** Mass spectrometry techniques for metabolomics and tissues imaging of natural products from *Lychnophora* species, a flavoring agent in the Brazilian traditional spirit. N. Lopes

**9:45** Intermission.

**10:00 AGFD 165.** Nanoencapsulated curcumin demonstrated higher cytotoxicity of colon cancer cells through enhanced bioavailability. G.K. Jayaprakasha, K. Murthy, B. Patil

**10:25 AGFD 166.** Potential cancer chemopreventive activity of fruit phytochemicals from black chokeberry, goji, and maqui berry botanical dietary supplements. B. Naman, J. Li, P. Benatrehina, L. Pan, W. Keller, A. Kinghorn

**10:50 AGFD 167.** Expanding human blood metabolomics to the analysis of coenzymes and antioxidants using 1H NMR spectroscopy. G. Gowda, D. Raftery

**11:15 AGFD 168.** Proanthocyanidins from Chinese Bayberry (*Myrica rubra* Sieb. et Zucc.) leaves regulate lipid metabolism and glucose consumption by activating AMPK pathway in HepG2 cells. Y. Zhang, X. Ye, S. Chen

**11:40** Concluding Remarks.

### Section B

Hilton San Francisco Union Square  
Franciscan A

#### Chemistry of Tree Nuts

A. E. Mitchell, *Organizer, Presiding*

K. Lapsley, *Presiding*

**8:00 AGFD 169.** Health effects of tree nuts: Nothing but good news. J.A. Vinson

**8:25 AGFD 170.** Beyond benzaldehyde: The chemistry of raw, roasted and rancid almonds. A.E. Mitchell

**8:50 AGFD 171.** Chemical and nutritional characterization of the wrapped cashew. L.L. Oehrl

**9:15** Intermission.

**9:35 AGFD 172.** Comparison of analytical GC-MS techniques for the determination of volatile and semi-volatile compounds in raw and roasted Macadamia nuts (*Macadamia integrifolia*). S.J. Toth

**10:00 AGFD 173.** Metabolomics based approach identifies changes in the composition of small molecular weight compounds in the peanut seed after dry-roasting. C.M. Klevorn, L.L. Oehrl

### Section C

Hilton San Francisco Union Square  
Franciscan B

#### Artisanal Foods

M. H. Tunick, *Organizer*

A. L. Waterhouse, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 174.** Chemistry of artisanal cheese. M.H. Tunick, S. Doughy

**8:50 AGFD 175.** Mexican Cotija cheese: Flavors that keep more than 400 years of tradition. P.M. Chombo-Morales

**9:15 AGFD 176.** Artisanal and sourdough breads. B. Klein, A.S. Ross

**10:00** Intermission.

**10:15 AGFD 177.** Understanding the flavor and quality of honey. A.E. Mitchell, A. Harris

**11:00 AGFD 178.** Quality and authenticity assessment of extra virgin olive oil. S. Wang, D. Garcia-aguirre

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

## TUESDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

#### Invitro Studies

G. K. Jayaprakasha, B. Patil, *Organizers*

G. Gattuso, *Organizer, Presiding*

J. Kim, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 179.** C- and O-glycosyl flavones in pigmented orange juices: Identification, quantification and evaluation of their influence on antioxidant and cytoprotective activity. D. Barreca, E. Bellocchio, S. Ficarra, G. Laganà, E. Tellone, A. Galtieri, G. Gattuso

**1:30 AGFD 180.** Identification, quantification and mechanism study of potential anti-inflammatory hydroxycinnamic Acid Amides from root bark of *Lycium barbarum*. S. Wang, Y. Wang, C. Ho, J. Suh

†Cooperative Cosponsorship

**1:55 AGFD 181.** Evaluation of abiotic environmental conditions on phytochemical and biological activities in *Abies koreana*. J. Kim, D. Kim, E. Park

**2:20 AGFD 182.** Bioactive compounds and cellular antioxidant activity of selenized *P. ostryae* fruiting bodies. J.A. Carrasco-Gonzalez, J. Gutierrez-Urbe, S.O. Serna-Saldivar

**2:45** Intermission.

**3:00 AGFD 183.** Aronia berry: Polyphenols, anti-inflammatory activity, and lipid modulation. B.W. Bolling

**3:25 AGFD 184.** Cranberry proanthocyanidins: Effects on *Helicobacter pylori* and uropathogenic *Escherichia coli*. A.B. Howell

**3:50 AGFD 185.** *In vitro* and *in vivo*  $\alpha$ -glucosidase inhibition of vitexin and isovitexin. C. Choo

**4:15** Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Chemistry of Tree Nuts

A. E. Mitchell, *Organizer, Presiding*

K. Lapsley, *Presiding*

**1:00 AGFD 186.** Almond and hazelnut are rich in tannins, with varying proportions of bound proanthocyanidin. B.W. Bolling

**1:25 AGFD 187.** Sensory evolution of rancidity in roasted almonds. L.M. Franklin, E. King, D.M. Chapman, N. Byrnes, G. Huang, A.E. Mitchell

**1:50 AGFD 188.** Walnut: Unique health benefits among the tree nuts. J.A. Vinson

**2:15** Intermission.

**2:35 AGFD 189.** Physical property influence on almond fracture properties and digestibility. G. Bornhorst, C. Floyd, Y. Mennah Goveia

**3:00 AGFD 190.** Advanced life cycle modeling of California almond production systems. E. Marvinney, A. Kendall, E. Spang, S. Brodt, F. Shilling, J. Fulton

## Section C

Hilton San Francisco Union Square  
Franciscan B

### General Papers

N. P. Seeram, *Organizer, Presiding*

H. Ma, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 191.** Biodegradable matrix for sustained release of pesticides for crop protection. T. Pirzada, A. Salam, N. Burns, R. Mathew, R.H. Guenther, T.L. Sit, M. Byrd, L. Pal, C. Opperman, S.A. Khan

**1:30 AGFD 192.** Optimization and validation of 360 pesticides multiresidue method for GC-MS/MS in brown rice, orange and spinach. J. Lee, Y. Shin, J. Lee, J. Lee, M. Jung, S. Baek, D. Jeon, H. Yu, X. Yuan, E. Kim, J. Kim

**1:55 AGFD 193.** Synthesis and evaluation of natural herbicide, Thaxtomin A and analogues. N. Esmati, J. Bourgault, A. Reddy Maddirala, P.R. Andreana, J. Gray

**2:20 AGFD 194.** Development of the simultaneous analytical method for aryloxyphenoxypropionate herbicides and their metabolites in rice and pepper using LC-MS/MS. J. Lee, J. Lee, E. Kim, Y. Shin, J. Lee, M. Jung, S. Baek, X. Yuan, D. Jeon, H. Yu, J. Kim

**2:45** Intermission.

**3:00 AGFD 195.** Development of analytical method for pesticide multi-residues in egg and milk using GC-ECD/NPD. J. Lee, J. Lee, Y. Shin, J. Lee, E. Kim, M. Jung, S. Baek, D. Jeon, X. Yuan, H. Yu, J. Kim

**3:25 AGFD 196.** Multi-residue screening method for the determination of 380 pesticides in human urine by liquid chromatography-tandem mass spectrometry. Y. Shin, J. Lee, E. Kim, J. Lee, M. Jung, S. Baek, H. Kim, J. Kim, M. In, H. Lee, J. Kim

**3:50 AGFD 197.** Mosquito larvicidal activity of some isocoumarins. K.M. Meepagala, A. Estep, J.J. Becnel

**4:15 AGFD 198.** Potato chips: A simple model for odor image encoding. M.M. Rochelle, T. Acree, G. Prevost, C. Maxe

**4:40** Concluding Remarks.

### Advances in Polysaccharides: Practice & Applications

#### New Developments in the Industrial Sector

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG+, PMSE and POLY*

#### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

#### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

## WEDNESDAY MORNING

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

#### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

##### Invivo Studies

G. Gattuso, G. K. Jayaprakasha, B. Patil, *Organizers*

S. Poulouse, J. F. Stevens, *Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 199.** Dietary polyphenols and health: Novel mechanisms of action involving their *in vivo* metabolites. D. Del Rio

**8:30 AGFD 200.** Raspberry (poly) phenolics exert bioactivity following *in vivo* digestion. C. Gill, C. Latimer, G. McMullan, R. Lawther, G. McDougall, D. Stewart, G. Pereira-Caro, A. Crozier, K. Rotjanapun, I. Rowland

**8:55 AGFD 201.** Polyphenol- and PUFA-rich walnuts protect against age-associated cognitive decline through epigenetic modulation. S. Poulouse, B. Shukitt-Hale

**9:20** Intermission.

**9:35 AGFD 202.** Mice fed high fat diets supplemented with red, golden or black Arkansas apple peels have reduced weight and differences in gut microbiota. M. Friedman, S. Elkahoui, D. Sturges, G.E. Bartley, C. Levin, W.H. Yokoyama

**10:00 AGFD 203.** Prenylated flavonoids from hops (*Humulus lupulus*) for treatment of metabolic syndrome. J.F. Stevens

**10:25 AGFD 204.** Potential effects of flavonoids from breadfruit in prevention of Advanced Glycation End products (AGEs)-induced biological events. J. Lin, G. Yen

**10:50** Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Bliss Point: Food Satiety & Food Mood Effects

B. Burton-Freeman, I. Edirisinghe, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 205.** Food chemistry, satiety and food intake regulation. B. Burton-Freeman

**8:35 AGFD 206.** Brain and behavioral responses to fructose vs. glucose. K.A. Page

**9:05 AGFD 207.** Dynamic relationships between emotion and food perception. H. Seo

**9:35 AGFD 208.** Is UMAMI, the 5th basic taste, to control satiety? H. Uneyama

**10:05 AGFD 209.** Appetite regulating hormones and eating behaviors in healthy adults. N.L. Keim, S. Krishnan, W.F. Horn, A. Widaman, K. Stanhope, M.G. Witbracht, S.M. Forester, K.D. Laugero, J.W. Newman, M. Van Loan

## Section C

Hilton San Francisco Union Square  
Franciscan B

### General Papers

N. P. Seeram, *Organizer, Presiding*

H. Ma, *Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 210.** HPAE-PAD Determination of carbohydrates in honey. M. Aggrawal, J. Rohrer

**8:30 AGFD 211.** Stabilization of natural pigments from purple corn pericarp in a beverage model through complex formation with metal ions and polysaccharides. R. Cortez, D. Luna, E.G. Demejia

**8:55 AGFD 212.** Polycyclic aromatic hydrocarbons in vegetable oils by gas chromatography with SIM mode mass spectrometry. A.C. Litin, V. Vega

**9:20 AGFD 213.** Simultaneous extraction of gingerols and polysaccharides from ginger (*Zingiber officinale* Roscoe) with ionic liquid-based ultrasonic-assisted extraction. X. Kou, Y. Ke, Y. Xie, H. Wang, Y. Su

**9:45** Intermission.

**10:00 AGFD 214.** Use of reconstituted egg yolk systems to study the roles of plasma and granules in yolk gelation induced by freezing-thawing. M. Primacella, T. Wang, N. Acevedo

**10:25 AGFD 215.** Designing and optimizing light protection dairy milk packaging. C.M. Stancik, D.A. Conner, P. Niedenzu, P. Jernakoff

**10:50 AGFD 216.** Improved stability of whey protein fibrils and utility for biomaterial application. O.G. Jones, J. Gilbert

**11:15 AGFD 217.** Withdrawn.

**11:40 AGFD 218.** Bioactive compounds present in karela peel extract [*Momordica charantia*]: Potential inhibitors of advanced glycation endproducts (AGEs) and implications in diabetes type 2 patients. B. Dayal, M.A. Lea, V. Dobariya, P. Bhalala, K. Sahithi, B. Patel, S. Roy, C. Navadia, P. Chauhan, A. Shah, Y. Attoti, P. Antwi

**12:05** Concluding Remarks.

## Bio-based Gels & Porous Materials

### Biopolymer Hydrogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Advances in Polysaccharides: Practice & Applications

#### Novel Biocatalytic & Biopolymeric Approaches

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG+, PMSE and POLY*

#### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

#### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

## WEDNESDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

#### Chemistry & Biological Activities of Phenolic Compounds from Fruits & Vegetables

##### Invivo & Human Clinical Trials

G. Gattuso, G. K. Jayaprakasha, B. Patil, *Organizers*

A. Crozier, D. Ghosh, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 219.** Phenolic compounds accumulation in wild and domesticated cladodes from *Opuntia spp.*: Their relation with changes in their metabolism. A. Negre-Salvayre, F. Guéraud, M. Santos Diaz, A.P. Barba de la Rosa

**1:30 AGFD 220.** Metabolic and microbiome innovations for improving phenolic bioactives for health. K. Shetty, D. Sarkar

**1:55 AGFD 221.** Absorption, distribution, metabolism and excretion of orange juice flavanones in endurance trained athletes. A. Crozier

**2:20 AGFD 222.** Safety of cocoa flavanol intake in healthy adults. J. Ottaviani

**2:45** Intermission.

**3:00 AGFD 223.** Polyphenols from fenugreek: Wellness and medicinal uses. D. Ghosh

**3:25 AGFD 224.** Flavonoids in onion beef soups: Stability, reactivity and potential health benefits. **M. Wang, Y. Zhao**

**3:50 AGFD 225.** Effect of phenolic compounds on sugar metabolism: Mechanism of protection against developing type 2 diabetes. **G. Williamson**

**4:15** Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Chemistry of Cellulosic Natural Products

S. Chang, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 226.** Infrared imaging of cotton fiber bundles and products. **M. Santiago, D. Hinchliffe, J.E. Rodgers**

**1:30 AGFD 227.** *In situ* synthesis and application of silver nanoparticles as an antimicrobial agent for cotton fibers. **K.R. Fontenot, S. Nam, B.D. Condon**

**1:55 AGFD 228.** Alkaline extraction of residual hemicellulose in dissolving pulp and its properties. **C. Kim, T. Floyd, T. Treasure, S. Kelley, S. Park**

**2:20** Intermission.

**2:35 AGFD 229.** Multifunctional chitosan-based nanocoatings: Stopping oxygen and fire with renewable materials. **J.C. Grunlan**

**3:00 AGFD 230.** Anti-flammable properties of casein with phosphorus and nitrogen containing flame retardants on cotton by layer-by-layer self assisted coating processing. **S. Chang, B.D. Condon, J. Smith**

## Section C

Hilton San Francisco Union Square  
Franciscan B

### General Papers

N. P. Seeram, *Organizer, Presiding*  
H. Ma, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 231.** Non-targeted chemometric detection of adulterated olive oils by flow injection mass spectrometric fingerprints. **D. Lijuan, W. Lu, L.L. Yu**

**1:30 AGFD 232.** Characterization of uranium exposure in sheep grazing near abandon uranium mines on the Navajo reservation. **A.R. Lister, J.C. Ingram**

**1:55 AGFD 233.** U.S. Dairy Forage Research Center (DFRC) condensed tannin NMR database. **W. Zeller, P. Schatz**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**2:20 AGFD 234.** Detecting and distinguishing among type 1 and type 2 Shiga toxins in human serum. **C.J. Silva, M.L. Erickson-Beltran, C.B. Skinner, S.A. Patfield, X. He**

**2:45** Intermission.

**3:00 AGFD 235.** Optical probe for the detection of a spoilage indicator in shrimp. **R.A. Federico Perez, Z. Xue**

**3:25 AGFD 236.** Fate and transport of electronic waste degradation products in soil and water. **S. Moller, A. Chaparadza**

**3:50 AGFD 237.** Magnetic-Encoded fluorescent multifunctional nanopores for multiplex pathogenic bacteria assay. **E. Song**

**4:15 AGFD 238.** Normpack-The Swedish code for food packaging materials since year 1981. **K. Salmen**

**4:35 AGFD 239.** Lycopene a panacea for sustainable man power for agricultural production in Nigeria: Determination of lycopene from water melon (*Citrullus lanatus*). **S. Okonkwo**

**5:00** Concluding Remarks.

### Bio-based Gels & Porous Materials Biopolymer Organogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Advances in Resource Recovery & Conservation in Water Systems

*Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC*

### Advances in Polysaccharides: Practice & Applications

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY*

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

## THURSDAY MORNING

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### General Papers

N. P. Seeram, *Organizer, Presiding*  
W. Liu, H. Ma, *Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 240.** Enhancement of catalytic activity and stability of crude Laccase extract in Silica Sol-Gel. **J. Gill, V. Orsat, S. Kermasha**

**8:30 AGFD 241.** Stabilization and protection of retinyl palmitate in policosanol oleogels. **Y. Tian, N. Acevedo**

**8:55 AGFD 242.** Rationale behind the near-ideal catalysis of *Candida antarctica* Lipase A (CAL-A) for highly concentrating  $\omega$ -3 polyunsaturated fatty acids into monoacylglycerols. **Z. Guo**

**9:20 AGFD 243.** Molecularly imprinted polymers based colorimetric-sers dual biosensor for the detection of atrazine in foods. **B. Zhao, X. Lu**

**9:45** Intermission.

**10:00 AGFD 244.** Chemical defence and novel biosynthetic pathways of phytoalexins in crucifers. **Q. To, M. Pedras**

**10:25 AGFD 245.** RNA-seq reveals insight into the molecular mechanism of biocontrol yeast antagonistic against aflatoxinigenic *Aspergillus flavus*. **S.T. Hua**

**10:50 AGFD 246.** Here come the potato shock troops: Investigating temporal resistance of potato tubers to microbial infection using antibacterial activity and metabolite profiling of wound-healing tissue extracts from contrasting cultivars. **K. Dastmalchi, M.E. Perez Rodriguez, A. Mychak, J. Linn, A. Janakiraman, R.E. Stark**

**11:15 AGFD 247.** Disaggregation of amyloid beta peptides by ginnalin A, a glucitol-core containing gallotannin from red maple (*Acer rubrum*): Biophysical, bioanalytical, and cytotoxicity studies. **X. Wang, H. Ma, Z. Li, F. Zhou, N.P. Seeram**

**11:40** Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Synthetic Biology in Food & Agriculture

N. Nitin, J. Talbert, R. S. Tiwari, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:10 AGFD 248.** Computational identification of new ingredients. **C. Anderson**

**8:35 AGFD 249.** Emerging organism engineering industry. **S. Reisinger**

**9:00 AGFD 250.** Human design of food and crops. **J. Medford**

**9:25 AGFD 251.** Securing the global food web. **M. Koeris**

**9:50 AGFD 252.** Recombinant bacteriophages serve as sensitive bacterial recognition elements. **T.C. Hinkley, S. Nugen**

**10:15 AGFD 253.** FDA's approach to the safety assessment and regulation of food ingredients. **R. Merker**

**10:40** Discussion.

## Section C

Hilton San Francisco Union Square  
Franciscan B

### Coffee & Cocoa Products

M. Granvogl, M. C. Qian, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 AGFD 254.** Molecularizing the taste of cocoa (*Theobroma cacao*). **T.D. Stark, T. Hofmann**

**8:35 AGFD 255.** Influence of caffeine-polyphenol-melanoidin interactions on the bitter taste perception of coffee beverages. **O. Frank, T. Hofmann**

**9:05** Intermission.

**9:25 AGFD 256.** Characterization of key odorants of dark chocolate by means of the sensomics approach. **C. Seyfried, M. Granvogl**

**9:55 AGFD 257.** New insight into the role of flavour precursors upon coffee roasting. **T. Davidek, L. Poisson, F. Mestdagh, I. Blank**

## Bio-based Gels & Porous Materials

### Aero-, Cryo- & Xerogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Advances in Resource Recovery & Conservation in Water Systems

*Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC*

### Advances in Polysaccharides: Practice & Applications

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY*

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Sponsored by CELL, Cosponsored by AGFD*

## THURSDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Continental Parlor 9

### General Papers

N. P. Seeram, *Organizer, Presiding*  
H. Ma, *Presiding*

**1:00** Introductory Remarks.

**1:05 AGFD 258.** Influence of pre-fermentation apple juice clarification on the chemistry of hard cider. **S. Ma, A. Neilson, G. Peck, S.F. Okeefe, K. Hurlay, A. Sandbrook, A. Stewart**

**1:30 AGFD 259.** Encapsulation of policosanol enriched sugarcane wax for food supplement application. **S. Sittivanichai, S. Boonyarattanakalin, S. Jarussophon, I. Sramala, W. Pinket, P. Pongwan, K. Kasemwong**

**1:55 AGFD 260.** Oxidation of olive oil and canola oil: Applications in organic chemistry. **L. Callen, Z. Van Scyoc, D. Morelli, M. Glick**

**2:20** Intermission.

**2:35 AGFD 261.** Investigation into the chemical properties of traditional and so-called drug-store varieties of pipe tobaccos and the impact of the US FDA's Substantial Equivalence (SE) rules on the continued marketability of those products. **J.H. Lauterbach**

**3:00 AGFD 262.** Significance of cooking oil to bioaccessibility of DDTs and PBDEs in raw and cooked fish. **X. Mi, Y. Su, L. Bao, E. Zeng**

**3:25 AGFD 263.** Hydrogen peroxide quantitation in complex matrices – A fluorimetric method using Amplex Red. **S. Chakraborty, A.L. Hill, G. Shirsekar, A. Afzal, G. Wang, D. Mackey, P. Bonello**

**3:50 AGFD 264.** Dye-Sensitized solar cell for STEM learning. **P. Hill**

† Cooperative Cosponsorship

4:15 AGFD **265.** Chiral monoterpene profiles of aromatic white wines. M. Song, C. Fuentes, A. Loos, E. Tomasino

4:40 Concluding Remarks.

## Section B

Hilton San Francisco Union Square  
Franciscan A

### Coffee & Cocoa Products

M. Granvogl, M. C. Qian, *Organizers, Presiding*

1:00 AGFD **266.** Role of roasting conditions in the formation of bioactive chemicals in coffee. J. Moon, M. Kamiyama, T. Shibamoto

1:30 AGFD **267.** Trends in coffee and cocoa products and the complexity of described formulations. P. Son, V.A. Biehl, E.M. Altizer, A. Windhof, R.B. McWhirter

2:00 AGFD **268.** Withdrawn.

2:30 Intermission.

2:50 AGFD **269.** FTIR analysis of gasses emitted during roasting coffee. S. Amanuel, P. Catravas, J.D. Kehlbeck

3:20 AGFD **270.** Identification of coffee constituents with beneficial effects on cholesterol metabolism. V. Somoza, W. Hoffmann

3:50 Concluding Remarks.

### Bio-based Gels & Porous Materials

#### Open-Porous Carbon Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

#### Advances in Resource Recovery & Conservation in Water Systems

Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC

#### Advances in Polysaccharides: Practice & Applications

Preparation, Characterization & Applications

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

#### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY

#### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

Sponsored by CELL, Cosponsored by AGFD

## AGRO

### Division of Agrochemicals

S. Jackson, *Program Chair*

## SUNDAY MORNING

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

## SUNDAY AFTERNOON

#### Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

## MONDAY MORNING

#### Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

## MONDAY AFTERNOON

#### Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

## WEDNESDAY AFTERNOON

#### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Advanced Analytical Techniques to Assess Chemical Profiles

Sponsored by ENVR, Cosponsored by AGRO

## WEDNESDAY EVENING

#### Contaminants in Urban & Coastal Estuarine Ecosystems

Sponsored by ENVR, Cosponsored by AGRO

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

## THURSDAY MORNING

#### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Environmental Processes Affecting Chemical Availability & Toxicity

Sponsored by ENVR, Cosponsored by AGRO

## THURSDAY AFTERNOON

#### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Temporal & Spatial Assessment of Persistent-Bioaccumulative Chemicals in Coastal & Urban Waters

Sponsored by ENVR, Cosponsored by AGRO

## ANYL

### Division of Analytical Chemistry

L. Baker and K. Phinney, *Program Chairs*

#### OTHER SYMPOSIA OF INTEREST:

**Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation** (see ENVR, Sun, Mon, Wed)

**Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies** (see ENFL, Tue, Wed)

**Contaminants of Emerging Concern in Natural & Engineered Systems** (see ENVR, Sun, Mon, Wed)

**Frontiers in Glycoanalytics** (see CELL, Wed, Thu)

**Nanocellulose Processing & Analysis** (see CELL, Sun, Mon)

**Separation of Macromolecules & Particulates** (see POLY, Sun)

#### SOCIAL EVENTS:

Reception, 5:00 PM: Tue

## SUNDAY MORNING

### Section A

Hilton San Francisco Union Square  
Union Square 14

#### Synthesis & Characterization of Materials for Energy Applications

#### Enabling Concepts for Energy Materials Design

Cosponsored by CATL

J. Rodriguez Lopez, K. J. Stevenson, *Organizers*

D. R. Rolison, *Organizer, Presiding*

V. Augustyn, *Presiding*

8:30 ANYL **1.** Thin-Film pair distribution analyses of energy-storage materials in device-ready 3D electrodes. D.R. Rolison, M.D. Donakowski, J.M. Wallace, M.B. Sassin, K.W. Chapman, J.F. Parker, J.W. Long, C.N. Chervin, I.R. Pala, A.N. Mansour

9:00 ANYL **2.** Synthesis and characterization of solvated transition metal oxides for electrochemical energy storage. R. Wang, J. Mitchell, W. Lo, V. Augustyn

9:30 ANYL **3.** Decreasing impedance and increasing capacity in solid state electrochemical cells through architectural optimization. E.D. Wachsman

10:00 Intermission.

10:30 ANYL **4.** First principles optimization of novel solar cell materials. E.A. Carter

11:00 ANYL **5.** Interfacing nanomaterials for solar-to-fuel conversion. P. Yang, D. Kim

11:30 ANYL **6.** Probing intrinsic stability of complex metal halides: A transition from hybrid to all inorganic perovskite solar cells. P.A. Troshin, L.A. Frolova, A. Akbulatov, S. Luchkin, K.J. Stevenson

### Section B

Hilton San Francisco Union Square  
Franciscan D

#### Advances in Separations

J. L. MacLachlan, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 ANYL **7.** Simultaneous estimation of ketorolac tromethamine and phenylephrine hydrochloride in artificial aqueous humor. F.B. Tandell, R. Trivedi

8:25 ANYL **8.** Aqueous normal phase chromatography: A new approach to complex sample analysis. J.J. Pesek, M. Matyska

8:45 ANYL **9.** Rapid determination of cocamidopropyl betaine impurities in cosmetic products by core-shell HILIC-MS/MS. P.G. Wang, W. Zhou

9:05 ANYL **10.** Adaption of Ehrlich's Reagent to a HPLC post-column reaction system for the quantification of limonoid glucosides. A.P. Breksa, D.E. King, A.M. Vilches

9:25 ANYL **11.** New HPLC method development workflow by leveraging state-of-the-art software. L. Wang

9:45 ANYL **12.** Integration of out-of-plane optical fiber for multipoint detection in microfluidic platforms and using fiber tunneling mode for particle/cell counting, velocimetry and size discrimination. D. Ediriweera, J. Sadeghi, C.T. Culbertson

10:05 Intermission.

10:15 ANYL **13.** Investigating the gas chromatography separation properties of azulene- and naphthalene-modified polysiloxanes. M. Jackson, C.M. Garner

10:35 ANYL **14.** Screening and on-site identification of accelerants for arson investigations. J.L. MacLachlan, J.N. Driscoll

10:55 ANYL **15.** Polymer-based gas chromatography microcolumns. J.J. Hinman, K.S. Suslick

11:15 ANYL **16.** Alternative to commercial instrumentation. S. Abbott, D. Faries, R. Taylor

11:35 Concluding Remarks.

### Section C

Hilton San Francisco Union Square  
Union Square 17/18

#### New Analytical Advances in Accelerator Mass Spectrometry (AMS)

Financially supported by National Electrostatics Corporation

B. A. Buchholz, *Organizer, Presiding*

8:30 ANYL **17.** PIMS progress. S. Freeman, R. Shanks, C. McIntyre, G. Gaubert

8:50 ANYL **18.** Chemi-ionization in the Cs sputter ion source: Selective ionization for AMS. J.S. Vogel

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:

[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**9:10 ANYL 19.** Developing AMS hyphenations with analytical instruments for atmospheric aerosol characterization. **G. Salazar, K. Agrios, S. Szidat**

**9:30 Intermission.**

**9:45 ANYL 20.** Streamlining analyses of atmospheric carbonaceous aerosols: Determining the sources of fires in Indonesia. **E. Wiggins, G. dos Santos, C. Czimczik, J. Randerson**

**10:05 ANYL 21.** Plasma oxidation prior to accelerator mass spectrometry radiocarbon dating. **K.L. Steelman**

**10:25 ANYL 22.** Compound specific radiocarbon analyses at NOSAMS: Unlocking ocean and lake chronologies one molecule at a time. **A.P. McNichol, L. Xu, W. Longo, A. Gagnon, M. Roberts, S. Shah Walter, B. Longworth, Y. Huang**

**10:45 ANYL 23.** Macromolecular isolation and purification in AMS. **B.A. Buchholz, K.L. Spalding, R. Dreier, I. Maze, B.J. Mailloux, S.A. Carratt, L.S. Van Winkle, T. Ognibene, E. Kuhn, N. Hum, N. Etminan, G.G. Loots**

## Section D

Hilton San Francisco Union Square  
Franciscan C

### Coherent Multidimensional Spectroscopy in Materials Science

*Cosponsored by PHYS*

**W. Zhao, Organizer, Presiding**

**A. T. Krummel, Presiding**

**8:00 ANYL 24.** Multiresonant coherent multidimensional spectroscopy of MoS<sub>2</sub>. **J.C. Wright, K. Czech, B. Thompson**

**8:30 ANYL 25.** Fast electronic dynamics in 2D spectra of PbS quantum dots. **S.D. Park, D. Baranov, J. Ryu, D.M. Jonas**

**9:00 ANYL 26.** Two dimensional electronic spectroscopy of methyl ammonium lead halide perovskite nanocrystals. **G.S. Engel, L. Wang**

**9:30 ANYL 27.** Exciton dynamics in transition metal dichalcogenide monolayers revealed by two-dimensional electronic spectroscopy. **L. Guo, D.M. Monahan, G.R. Fleming**

**10:00 Intermission.**

**10:15 ANYL 28.** Resolution and selectivity: Major advantages of coherent 3D spectroscopy over coherent 2D spectroscopy. **P. Chen**

**10:45 ANYL 29.** Pushing signal-to-noise ratio toward the detector limit in multidimensional spectroscopy. **N. Ge**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**11:15 ANYL 30.** Two-dimensional electronic Stark spectroscopy. **J.P. Ogilvie, A. Loukianov, A. Niedringhaus, B. Berg**

## Section E

Hilton San Francisco Union Square  
Union Square 19/20

### Analytical Neuroscience

*Financially supported by Pittcon*

**A. C. Michael, Organizer, Presiding**

**8:30 Introductory Remarks.**

**8:35 ANYL 31.** Microfabricated and mass spectrometry tools for In Vivo monitoring of neurochemicals. **R. Kennedy**

**9:05 ANYL 32.** Aptamer field-effect transistors as neurochemical sensors to monitor neurotransmitters *in vivo*. **N. Nakatsuka, K. Yang, Y. Rim, X. Xu, J. Abendroth, C. Zhao, Y. Yang, M. Stojanovic, P.S. Weiss, A.M. Andrews**

**9:35 ANYL 33.** Extraction and detection of neurotransmitters and anesthetic drug *in-vivo* based on polymeric ionic liquids. **X. Zhou, Y. Zhang, G. Shi**

**10:05 Intermission.**

**10:20 ANYL 34.** Faster neurochemical measurements using continuous on-line microdialysis: Towards microdialysis 2.0. **M.G. Boutelle, I.C. Samper, A. Leong, M.L. Rogers, S. Gowers, A.M. Nightingale, X. Niu**

**10:50 ANYL 35.** Some considerations on limitations and opportunities in making measurements in living tissue. **S.G. Weber, Y. Ou**

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

### Nanocellulose Processing & Analysis

#### Novel Processes

*Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC*

#### Separation of Macromolecules & Particulates

*Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE*

#### Contaminants of Emerging Concern in Natural & Engineered Systems

*Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI*

#### Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation

*Sponsored by ENVR, Cosponsored by ANYL*

## SUNDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Union Square 14

### Synthesis & Characterization of Materials for Energy Applications

### In Operando & Surface Sensitive Analysis

*Cosponsored by PHYS*

**J. Rodriguez Lopez, K. J. Stevenson, Organizers**

**D. R. Rolison, Organizer, Presiding**

**J. E. Pemberton, Presiding**

**1:30 ANYL 36.** Generation and evolution of materials in the anode Solid Electrolyte Interphase (SEI) of lithium ion batteries. **B.L. Lucht**

**2:00 ANYL 37.** Application of local probes of structure to characterize supercapacitor and battery function. **A. Forse, C. Merlet, K.J. Griffith, P.K. Allan, C.P. Grey**

**2:30 ANYL 38.** Understanding and design of core-shell architectures for battery electrodes based on complex oxides. **J. Cabana**

**3:00 Intermission.**

**3:30 ANYL 39.** Organic semiconductor interfaces in optoelectronic devices: Undesirable chemistry galore! **J.E. Pemberton, L. Sang, K.E. Watts, T. Nguyen, E.L. Ratcliff**

**4:00 ANYL 40.** Chemomechanically mediated processes in energy devices. **H. Tavassol**

**4:30 ANYL 41.** Dendrites and pits: Untangling the complex behavior of lithium metal anodes through operando video microscopy. **K.N. Wood, E. Kazyak, A.F. Chadwick, J. Zhang, K. Thornton, N.P. Dasgupta**

## Section B

Hilton San Francisco Union Square  
Franciscan D

### Advances in Separations

**J. L. MacLachlan, Organizer, Presiding**

**1:00 Introductory Remarks.**

**1:05 ANYL 42.** Ionic liquid surfactants in cationic polyacrylamide gel electrophoresis protein separation. **P. Vidanapathirana, F. Hasan, K. Mussio, N. Siraj, A. Grove, I.M. Warner**

**1:25 ANYL 43.** Stirred-electromembrane extraction at low voltages as a novel microextraction technique for analysis of basic drugs. **K.M. Ara**

**1:45 ANYL 44.** Microchip electrophoresis separation of pre-term birth biomarkers in a 3D printed device. **M.J. Beauchamp, H. Gong, G.P. Nordin, A.T. Woolley**

**2:05 ANYL 45.** Capillary electrophoresis coupled with micro free flow electrophoresis for high speed comprehensive two dimensional analysis of peptides. **A.C. Johnson, M. Bowser**

**2:25 ANYL 46.** Three-phase direct immersion in-tube microextraction coupled with capillary electrophoresis. **J. Choi, Y. Choi, D. Chung**

**2:45 Intermission.**

**2:55 ANYL 47.** Affinity extraction of DNA for sepsis diagnosis using on-chip monoliths. **R. Knob, A. Woolley**

**3:15 ANYL 48.** SFE and preparative SFC with mass directed collection as beneficial tools in the workflow for natural products isolations from complex mixtures. **J.P. McCauley**

**3:35 ANYL 49.** Determination of sodium nitrite in peanut paste baits by ion chromatography. **B.G. Abbo, S.F. Volker**

**3:55 ANYL 50.** Evaluation and comparison of pulsed-electromembrane extraction and electromembrane extraction techniques for the analysis of fluoxetine and olanzapine in biological fluids. **K.M. Ara**

**4:15 Concluding Remarks.**

## Section C

Hilton San Francisco Union Square  
Union Square 17/18

### New Analytical Advances in Accelerator Mass Spectrometry (AMS)

*Financially supported by National Electrostatics Corporation*

**B. A. Buchholz, Organizer, Presiding**

**1:30 ANYL 51.** Technological developments for BioAMS applications. **T. Ognibene**

**1:50 ANYL 52.** Ultrasensitive Bio-AMS applications for safe and environmentally relevant clinical studies of high molecular weight polycyclic aromatic hydrocarbon pharmacokinetics. **E. Madeen**

**2:10 ANYL 53.** Coupled accelerator mass spectrometer-mass spectrometer analysis of biomolecules. **B. Stewart**

**2:30 ANYL 54.** Use of accelerator mass spectrometry for precision medicine applications in cancer therapy. **P.T. Henderson, T. Scharadin, M. Zimmermann, T. Ognibene, R. de Vere White, K. Turteltaub, G. Cimino, E. Kim, A. Yu, B. Jonas, C. Pan**

**2:50 Intermission.**

**3:05 ANYL 55.** Combined use of HRMS and combustion AMS for simultaneous metabolite quantification and identification. **E.V. Duijn, W. Vaes**

**3:25 ANYL 56.** AMS enabled clinical studies in GSK: Past, present and future. **G.C. Young**

**3:45 ANYL 57.** Strategies for efficient metabolite characterization by UPLC + AMS. **H. Lee, S. La, S. Dueker**

**4:05 ANYL 58.** Automation of <sup>14</sup>C-labeled, biological-sample measurements by cavity ring-down spectroscopy and comparison to accelerator mass spectrometry. **A. McCart, T. Ognibene, G. Bench, K. Turteltaub**

## Section D

Hilton San Francisco Union Square  
Franciscan C

### Coherent Multidimensional Spectroscopy in Materials Science

*Cosponsored by PHYS*

**W. Zhao, Organizer**

**P. B. Petersen, M. C. Thielges, Presiding**

**1:00 ANYL 59.** Dynamics of functionalized alkyl monolayers on gold: Two dimensional infrared experiments and molecular dynamics simulations. **M.D. Fayer**

**1:30 ANYL 60.** What can be learned from high-order spectroscopies? The hidden dynamics of rate-exchange. **J.R. Darwin, H. Kaur, M.A. Berg**

**2:00 ANYL 61.** Development of femto-second multidimensional spectroscopies to probe vibronic couplings in molecules and materials. **J.D. Gaynor, Z. Fox, M. Balasubramanian, M.H. Khalil**

‡ Cooperative Cosponsorship

**2:30 ANYL 62.** High-throughput 2D IR spectroscopy platform yields insights into solvent dynamics in solution mixtures. **A.T. Krummel, K. Tracy, C. Carver**

**3:00** Intermission.

**3:15 ANYL 63.** Charge separation in 2D crystal heterostructures. **J. Zheng**

**3:45 ANYL 64.** Conformations and dynamics of protein molecular recognition via 2D IR spectroscopy. **M.C. Thielges, S. Ramos, A. Le Sueur, R. Horness**

**4:15 ANYL 65.** Investigating lipid membrane interfaces with 2D IR spectroscopy. **C. Baiz, J. Flanagan, M. Valentine, S. Edington**

**Section E**

Hilton San Francisco Union Square  
Union Square 19/20

**Analytical Neuroscience**

*Financially supported by Pittcon*

A.C. Michael, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ANYL 66.** Single- and sub-cellular observation of acetylcholine neurotransmission with a nanopipet electrode. **M. Shen**

**2:05 ANYL 67.** Voltammetric investigation of serotonin's roles in depression. **P. Hashemi**

**2:35 ANYL 68.** Probing *in vivo* neurochemistry by microdialysis sampling coupled to mass spectrometry. **L. Li**

**3:05** Intermission.

**3:20 ANYL 69.** Mathematical model to optimize electroenzymatic microbiosensors for the monitoring of glutamate signaling in the brain. **M. Clay, H.G. Monbouquette**

**3:50 ANYL 70.** Unraveling the neurochemistry of 'chemobrain'. **M.A. Johnson, S. Kaplan, T. Field, R. Gerhinger**

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

*Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCC*

**Nanocellulose Processing & Analysis**

**Process Parameters**

*Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC*

**Separation of Macromolecules & Particulates**

*Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE*

**Contaminants of Emerging Concern in Natural & Engineered Systems**

*Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI*

**Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation**

*Sponsored by ENVR, Cosponsored by ANYL*

**SUNDAY EVENING**

**Section A**

Moscone Center  
West Hall

**Analytical Division Poster Session**

K. Phinney, *Organizer*

**7:00 - 9:00**

**ANYL 71.** Quantitative detection of carbazole and halogenated carbazoles in human blood samples. **J. She**

**ANYL 72.** Effects of ozone on representative molecular components in epicuticular waxes of leaves: Oleoanolic and ferulic acid. **C. Smith, M. Riches, T. Kocher, D.P. Soulsby, T.L. Longin**

**ANYL 73.** Development of highly sensitive personal use colorimetric fumigant sensors. **P. Tang, G. Sun**

**ANYL 74.** Characterization of short-chain dicarboxylic acids in the infrared region using Beer's Law. **N.Q. Vu, C. Cooper, P.K. Hudson**

**ANYL 75.** Determination of airborne mercury using Ag-nanoparticles assisted TXRF. **S. Boettger, D. Rosenberg, M. Busker, W. Jansen, U.E. Fittschen**

**ANYL 76.** Evaluating suspect screening and non-targeted analysis approaches using a collaborative research trial at the US EPA. **A.J. Williams, A. McEachran, E.M. Ulrich, J. Sobus, A. Richard, C. Grulke**

**ANYL 77.** Mass-spectrometry based structure identification of "known-unknowns" using the EPA's CompTox dashboard. **A. McEachran, A.J. Williams**

**ANYL 78.** Trace anion determinations using inline calibration and an electrolytic water purifier. **T. Christison, D. Khor, J. Rohrer**

**ANYL 79.** Analysis of fluoride and pH, in Utah waters, beverages and dental products. **P.J. Iles, S. Moore, A. Abbinanti, J. Morris, K. Robbins, L. Dalby, R. Holcomb, N.R. Bastian, L.D. Giddings, M. Alvarez, R.V. Valcarce**

**ANYL 80.** Effects of ozone on resveratrol and quercetin: Phytochemicals in grape berry skins. **T. Rogoff, A. Teller-Radatz, T. Kocher, D.P. Soulsby, T.L. Longin**

**ANYL 81.** Cormorant AGE's: When old isn't based on pentosidine concentrations in tissues. **R.S. Stahl, B. Dorr**

**ANYL 82.** Investigation of inorganic anions in indoor airborne particulate matter during SoCal wildfire season. **H. Zhu, Y. Liu**

**ANYL 83.** Quantification of VOCs emitted from cut and uncut grass. **L. Leti**

**ANYL 84.** Evolution of the equilibrium vapor pressures of 1,4-bis(phenylethynyl) benzene (DEB) through the hydrogenation process. **E. Sangalang, H. Sharma, G. Cairns, C. Saw, W. McLean II, R.S. Maxwell, L. Dinh**

**ANYL 85.** Fluorogenic probe for rapid detection of fluoride in water. **S. Bae**

**ANYL 86.** Investigation of the sequential flow analysis and the use of nitrate reductase and for the determination of nitrate in sea water and salt water aquaria. **P.J. Iles, A. Pabon, R. Kochambilli, H. Hauritz, A. Villa, R. Holcomb, M. Alvarez, N.R. Bastian, L.D. Giddings, R.V. Valcarce**

**ANYL 87.** Continued identification of pharmaceuticals in Utah's Jordan River. **N. Elmore, P.J. Iles, L.D. Giddings, N.R. Bastian, R. Holcomb, M. Alvarez, R.V. Valcarce, B. Sanders, H. Hsieh, M. Asadian, A. Samani, A. Mineer**

**ANYL 88.** Investigation of selected metals in soil samples exposed to agricultural and automobile activities in Macedonia, Greece using inductively coupled plasma-optical emission spectrometry. **V. Topalidis, A. Harris, G.S. Benipal, C. Douvris**

**ANYL 89.** Monitoring of trace level arsenic in the environmental waters using ZIF-8. **D. Parajuli, K. Sue, A. Takahashi, T. Kawamoto**

**ANYL 90.** Development of a novel CE-XRF system for elemental speciation. **I.M. Tyssebotn, A. Fittschen, U.E. Fittschen**

**ANYL 91.** Photocatalytic degradation of common pharmaceuticals for disposal. **L.A. Tom, O. Beale, M. Kalala, E. Juliano, M. Botts**

**ANYL 92.** Quantification of uranium in soil and sediment from Cameron, AZ. **B.N. Dalton, J.C. Ingram**

**ANYL 93.** Visualization of surface adsorption properties of trace metals by rice husks using LA-ICP-MS. **R. Ellerby, D. Alexander, D.D. Amarasiwardena**

**ANYL 94.** Flower-like CuO as electrochemical sensor for thiobencarb detection. **C. Su, C. Lee, H. Chiu**

**ANYL 95.** Development of simultaneous analytical method for parent compound and its metabolites of pesticide in livestock products. **S. Yang, J. Park, H. Choi**

**ANYL 96.** Perfluorinated bonded phase as a separation medium in high performance liquid chromatography: Evaluation of properties and applications. **T. Nguyen, J. Topete, V. Truong, D. Hong, S. Jarman, T. Pham, C. Pham, T. Mo**

**ANYL 97.** Determination of polyphenols in mesquite pod flour extracts by HPLC-UV and LC-MS. **T. Nguyen, J. Topete, V. Truong, S. Jarman, D. Hong, T. Pham, C. Pham, T. Mo**

**ANYL 98.** Diversity, antimicrobial activity and chemical fingerprinting of marine actinomycetes. **R. Kashfi**

**ANYL 99.** Rapid screening method for selenium containing dietary supplements. **T. Hanley, K. Kubachka, S. Kern**

**ANYL 100.** Matrix extension and multi-laboratory validation of the U.S. Food and Drug Administration method EAM 4.10 to include arsenic speciation in wine. **R.A. Wilson, C.K. Tanabe, H. Hopfer, S.E. Ebeler, J. Nelson, S. Conklin, K. Kubachka**

**ANYL 101.** Development of method by UFLC-DAD for identification of the prostaglandin cloprostenol sodium in veterinary pharmaceuticals. **A.M. Miranda, M.V. de Moura**

**ANYL 102.** X-ray fluorescence elemental imaging, and micro analysis of plant tissue samples. **U.E. Fittschen, R. Hoehner, W. Tramel, A. Fittschen, H. Kunz**

**ANYL 103.** Determination of Sudan I and of a newly synthesized Sudan III positional isomer in the color additive D&C Red No. 17 using high-performance liquid chromatography. **A. Weisz, I.C. James, C. Tae, C.D. Ridge, Y. Ito**

**ANYL 104.** Investigation of tissue level distribution of essential and toxic metals in corn seeds from contaminated mining area using LA-ICP-MS. **S. Gaiss, D. Alexander, F. Wu, D.D. Amarasiwardena**

**ANYL 105.** Analysis application in jaboriticaba fruit. **J. Guido**

**ANYL 106.** Chemotaxonomy of poplar and sourwood honey. **V. Rizzi, E.B. Grimley, K.D. Sienerth**

**ANYL 107.** Withdrawn.

**ANYL 108.** Bioavailability of methylmercury in rice cereal and fish. **G. Nicholas, W. Cui**

**ANYL 109.** Metabolomic profiling of three representative food diets using ion chromatography with high resolution Orbitrap mass spectrometry. **T. Christison, R. Kiyonami, R. Tautenbaum, J. Rohrer**

**ANYL 110.** Analytical- and preparative-scale isolation of oleandrin from *Nerium oleander* using microwave-assisted extraction coupled with purification using supported-metal ion solid phase extraction resins. **L.M. Jablonksi, D.B. Green**

**ANYL 111.** Interactions of the cell penetrating peptide TAT with model membranes using Scanning electron microscopy, differential scanning calorimetry, and infrared techniques. **N. Phambu, B.M. Almarwani, A. Sunda-Meya**

**ANYL 112.** Withdrawn.

**ANYL 113.** Glycan microarray-based screening for substrate specificity of sialyltransferase. **H. Heo, C. Kim, J. Seo, H.J. Cha**

**ANYL 114.** Electro spray mass spectrometry using an organosiloxane polymer. **M.T. Dulay, R.N. Zare**

**ANYL 115.** Gradient chromatofocusing: Multiple buffer components for the separation of prolactin isoforms. **A. Gobburu, H. Jogiraju, I. Tirak, J. Tirak, D. Anderson**

**ANYL 116.** Photonic crystal microplate for high performance multi-anion recognition. **Y. Liu, C. Yu, J. Lv, C. Wei**

**ANYL 117.** Development and validation of a sensitive ultra-performance liquid chromatographic method with tandem mass spectrometry for quantification of doxorubicin in human plasma. **M. Semreen, H. Al-niss, M. Mousa, R. El-Awady**

**ANYL 118.** Red-NIR perylene-based fluorescent dyes for detection of DNA G-quadruplexes. **L. Huang, G.H. Aryal, K.W. Hunter**

**ANYL 119.** Detection of heterogeneity of mAb and corresponding Antibody Drug Conjugates (ADCs) by size exclusion chromatography and its orthogonal and complimentary modes. **A. Chakrabarti**

**ANYL 120.** Which is worse? Hookah consumption or cigarette smoking, a preliminary study on toxicity. **R.T. Saadawi, T. Hanley, A.A. Clutterbuck, M. Nashu, J. Landero**

**ANYL 121.** Faster and improved ease-of-use citrate and phosphate assays of pharmaceutical products. **H. Yang**

**ANYL 122.** Analysis of Cu(II)-mediated dityrosine cross-linking of amyloid-beta in-vitro and in-vivo by MALDI MS. **A. Kelley, G. Perry, S.B. Bach**

**ANYL 123.** Evaluation of human NAD(P) H:Quinone Oxidoreductase Isozyme-1 (NQO1) expression and activity in several human ovarian carcinoma cell monolayers. **M. Jackson, R.L. McCarley**

- ANYL **124.** Fabrication and application of microfluidic devices for safety test of cosmetics. **T. Tian**
- ANYL **125.** Sensitive analysis of cancer biomarkers using nonlinear multi-photon laser wave mixing detector interfaced to micellar capillary electrophoresis. **J. Liang**
- ANYL **126.** Trichloroacetic acid improves MS signal and separation in determination of tobramycin in M9 bacterial medium by LC-MS/MS. **L. Huang, J. Haagensen, D. Verotta, V. Cheah, A. Spormann, F. Aweeka, K. Yang**
- ANYL **127.** Study of mouse enamel proteins by imaging mass spectrometry. **M. Colley, Y.P. Chun, S.B. Bach**
- ANYL **128.** Using Reversed-Phase High Performance Liquid Chromatography Mass Spectrometry (RP-HPLC-MS) for domain-specific free thiol variant characterization of an IgG1. **Y. Cheng, M. Chen, Y. Chen, C. Yu, T.Y. Zhang, B. Burgess**
- ANYL **129.** Withdrawn.
- ANYL **130.** Direct electrochemical sensing of hydrogen sulfide. **J. Hall, M. Schoenfish**
- ANYL **131.** Multiplexed quantitation of cancerous tRNA biomarkers by capillary electrophoresis. **H. Chen, Y. Huang, W. Lin, P. Chang**
- ANYL **132.** Analyzing global metabolite variation based on mutations in the tricarboxylic acid cycle of *Escherichia Coli* using high resolution mass spectrometry. **E.D. Tague, J. Wen, H.F. Castro, E. Fozo, S.R. Campagna**
- ANYL **133.** Microwave-assisted synthesis of SBD-F derivatives for the HPLC-FLD determination of four biological aminothiols. **M.B. Blayney, D.B. Green**
- ANYL **134.** Spectroscopic studies on CTAB-lysozyme-Vitamin C. **N. Barbier, J. Lacoste, H. Yan**
- ANYL **135.** Hydrogen deuterium exchange mass spectrometry analysis of lipid free apolipoprotein A-I dimer. **C. Topbas, C. Baleanu Gogonea, I. Choucair, H. Alamri, J. Didonato, J. Smith, S. Hazen, V. Gogonea**
- ANYL **136.** Ruthenium-modified sensitive NO sensors: Quantifying nitric oxide in the pathobiology of cystic fibrosis. **T. Bose**
- ANYL **137.** Fundamental studies of ferriprotoporphyrin polymerization on electrode surfaces for H2S detection. **J.A. Bennett, S. Simpson, E. Zurek**
- ANYL **138.** Differentiation of species using aptamers binding to unknown targets in organism. **Y. Jeong, B. Lee, H. Han, M. Gu**
- ANYL **139.** Investigating the Intracellular Fate of NaYF4:Yb,Er@NaYF4 conjugated siRNA in HeLa Cells. **M. Shahruck**
- ANYL **140.** Preparative HPLC methods with type-C columns. **J. Topete, M. Matyska, J.J. Pesek**
- ANYL **141.** Determination of folic acid concentration in tick samples with cogent DH columns. **J. Topete, J. Chen, J. Zhong, M. Matyska, J.J. Pesek**
- ANYL **142.** Enzyme kinetics studies to guide mathematical modeling of microdialysis sampling to predict *in situ* biochemistry. **J. Klucher, J.A. Stenken**
- ANYL **143.** Monitoring rapid reactions with ambient pressure ionization mass spectrometry. **E. Jansson, R.N. Zare**
- ANYL **144.** Probing intracellular micro-environments through spectrally resolved STORM. **S. Moon, R. Yan, S. Kenny, Y. Shyu, W. Li, K. Xu**
- ANYL **145.** Droplets microfluidic platform for high throughput enzyme screening. **X. Diefenbach**
- ANYL **146.** Poly-adenine tailed DNA probe based self-assembly monolayer engineering for electrochemical biosensors. **L. Li, Y. Wen, J. Meng, L. Wang, Q. Xu, W. Liang, G. Liu**
- ANYL **147.** Characterization of corticotropin (ACTH) products by Liquid Chromatography High Resolution Mass Spectrometry (LC-HRMS). **K. Zeng, C. Sommers, D. Keire**
- ANYL **148.** Imaging the distribution of selective GABAA receptor modulators in the asthmatic lung using MALDI assisted mass spectrometry. **M. Guthrie**
- ANYL **149.** Single-Molecule fluorescence imaging of mismatched and modified oligonucleotide hybridization. **M.W. Manhart, E.M. Peterson, J.M. Harris**
- ANYL **150.** Surface sandwich SPR biosensing platforms for tau proteins in plasma sample. **H. Lee, S. Kim**
- ANYL **151.** Analysis of formation and recognition of three G-quadruplexes in c-myc proto-oncogene. **F. Li, J. Zhou, G. Yuan, J. Li**
- ANYL **152.** Exploring the formation and high affinity recognition of miR-1587 G-quadruplex by spectroscopy. **W. Tan, J. Zhou, J. Li, G. Yuan**
- ANYL **153.** Facile electrochemical melting of surface-bound DNA with minimal electrostatic screening. **D. Ho, N. Le, A. Chin, W. Hetrick, R. West**
- ANYL **154.** DNA aptamers that bind with high affinity to hydroxyapatite. **J. Florek, A.E. Gordon**
- ANYL **155.** Electrochemical oxidation of alendazole on electrode surface: Chromatographic determination of drug metabolites. **A.M. Mugweru, Z. Mazzochette, G.N. Kamau**
- ANYL **156.** TIR-Enhanced Raman system for sensitive and selective identification of volatile organic compounds. **C.J. Taylor, A. Niemz, K.J. Park, R. Dodson, C. Wu, H. Lu, P. Rentzepis, P. Koonath**
- ANYL **157.** Magnesium ribbon-templated microfluidic device and a diffusion limited titration. **C.F. Monson, J. Barney**
- ANYL **158.** Water-soluble conjugated polymers for the detection and inhibition of protein aggregation. **R. Chai, Y. Zhan, C. Xing**
- ANYL **159.** Withdrawn.
- ANYL **160.** Folic acid- and transferin-functionalized gold nanoparticles for targeted delivery and controlled release of anti-cancer drug Gemcitabine. **T. Santiago, K. Kurzatowska, M.R. Hepel**
- ANYL **161.** Controlled release of anti-leukemia drugs azacitidine and decitabine monitored using SERS. **M. Smith, M.R. Hepel**
- ANYL **162.** ROS induced by FRET between upconversion nanoparticle and photosensitizer for targeted photodynamic cancer therapy. **W. Hou, W. Tan**
- ANYL **163.** Characterization of phospholipid bilayers in copolymer belted nanodisks by electrokinetic chromatography. **W. Penny, C.P. Palmer**
- ANYL **164.** Label-Free detection of small molecule-membrane protein binding kinetics using self-assembled nano-oscillators. **G. Ma, X. Shan, S. Wang, N. Tao**
- ANYL **165.** Single gold nanoparticle gas sensing based on photo-thermal effect. **X. Li, L. Zhang**
- ANYL **166.** Super-resolution optical imaging of interaction between metal nanoparticles based on microsphere. **B. Hou, L. Zhang**
- ANYL **167.** Study of single Pt nanoparticle collision: Against electrocatalytic activity on a Pd UME. **C. Park**
- ANYL **168.** Detection of copper single nanoparticle collision on gold ultramicroelectrode by electrocatalytic amplification. **K. Kim**
- ANYL **169.** Synthesis and characterization of conductive polymer hydrogels and the investigation of their application as a biosensor hybrid for the detection of catechol. **V. Grebe, E. Castillo, B. Palys, J. Widera**
- ANYL **170.** Adsorption, decomposition, and surface-assisted laser desorption/ionization of asphaltenes using transition metal oxide nanoparticles. **L. Barnes, J.R. Yount, K.A. Reyes, K.E. King, P.M. Kirkconnell, H. Hamilton, S.S. Ward, A. Olaitan, K.S. Molek**
- ANYL **171.** Biosensing based on ordered gold nanoshell arrays with plasmonic tunability. **W. Qian**
- ANYL **172.** Towards paper based assays with intrinsically labeled oligonucleotide probes on QDs for detection of selective hybridization. **A. Shahmuryan, U.J. Krull**
- ANYL **173.** Multiplexed resonance energy transfer nucleic acid hybridization assay using a single form of upconversion nanoparticle as donor and three quantum dots as acceptors. **S. Doughan, U.J. Krull**
- ANYL **174.** Liquid biopsy of type-III mutant EGFR in exosomes by using CD63 specific aptamer modified magnetic nanoparticles and qPCR. **Z. Li, B. Li, L. He, N. He**
- ANYL **175.** Towards a paper-based oligonucleotide assay for point-of-care detection of disease using immobilized quantum dots as donors in fluorescence resonance energy transfer. **K. Malhotra, O. Noor, T. Vimalarajah, U.J. Krull**
- ANYL **176.** Synthesis of functionalized multiwalled carbon nanotubes and the application in analysis of small biomolecules by matrix assisted laser desorption/ionization mass spectrometry. **J. Meng, C. Shi, L. Li, C. Deng**
- ANYL **177.** Thermoresponsive nanoparticle agglomeration reversibility in salt: Dependence on graft density. **T. Vasicsek, L. Vaz, J.A. Stenken**
- ANYL **178.** Assessing the electrochemical response of microcontact-printed silver nanogrids utilizing cyclic voltammetry. **W.C. Sanders, P.J. Iles, J.S. Smith, M. Alvarez, N.R. Bastian, R. Holcomb, L.D. Giddings, R.V. Valcarlos, A.C. Lines, J. Meyers, G. Johnson, C. Page, K. Salisbury, C.F. Thompson, D. Young**
- ANYL **179.** Rechargeable Zn-air battery architecture, design, and synthesis strategies that go beyond Li-Ion. **M.N. Vila, C.N. Chervin, J.F. Parker, J. Ko, P.A. DeSario, J.W. Long, D.R. Rolison**
- ANYL **180.** Asymmetric chemical modification of Photosystem I enabling orientationally-selective deposition on gold electrodes. **C. Bryant, E.A. Gizzie, D.E. Cliffe**
- ANYL **181.** Fuel cell catalyst formation by simultaneous reduction of platinum (IV) and graphene oxide. **T.E. Kusumadaja, W. Zhou**
- ANYL **182.** Chemometric evaluation of multifeedstock biodiesel diesel blended fuels. **A.M. Hupp, M. Flood, C. Mary, M. Comiskey**
- ANYL **183.** Modifying carbon electrodes to behave like precious metals. **J.C. Lytle, G. Kamm, A.D. McGovern, J.F. Parker, M.D. Donakowski, D.R. Rolison, J.W. Long**
- ANYL **184.** Sensitive and selective detection of explosives by nonlinear optical laser wave-mixing spectroscopy. **J. Pradel, A. Jackson, G. Varnau, W.G. Tong**
- ANYL **185.** Soil survey for southwest Louisiana and its potential forensic applications. **J. Higginbotham, S. Bonilla, C. Becktold, A. Tizeno, P. Spencer**
- ANYL **186.** Bath salts analyzed via HPLC. **M. Makhanov, A. Lopez, J.J. Pesek, M. Matyska**
- ANYL **187.** Biological sex determination via bioaffinity-based fingerprint analysis. **C. Huynh, E. Brunelle, J. Agudelo, L. McGoldrick, L. Halámková, J. Halamek**
- ANYL **188.** Fingerprint analysis: Chemical assays for the identification of biological sex. **E. Brunelle, C. Huynh, A.M. Le, L. Halámková, K. Wingfield, J. Agudelo, L. McGoldrick, J. Halamek**
- ANYL **189.** Withdrawn.
- ANYL **190.** GC-MS/MS analyses of biological samples in support of developmental toxic effects of exposure to sarin in rats via multiple routes. **J.M. McGuire, L. Lumley, M. Busch, L. Wright, P. Demond**
- ANYL **191.** Selective and sensitive capture of pathogens on imprinted Sol-gel polymers. **M.T. Dulay, N. Zaman, R.N. Zare**
- ANYL **192.** Total vaporization of derivatization reagent for in situ headspace derivatization solid phase microextraction. **L. Perry, J. Yu**
- ANYL **193.** Forensic science research and development programs at the National Institute of Justice: Opportunities in analytical chemistry. **G.J. Dutton**
- ANYL **194.** Forensic quantitative analysis of opiates in post-mortem blood and brain: Application of DLLME-LC/MS/MS. **M.A. Hunt, W.J. Morrison, L.D. Muir, A. Tully, W.W. Jenkins, L.E. Lowe, J.E. Owens**
- ANYL **195.** GC-FID Method for the forensic discrimination of lipstick residues. **B. Esterlen, B.J. Bellott**
- ANYL **196.** Probing the use of a UHPLC Whelk-O1 chiral stationary phase in eUHPSFC-MS for chiral/achiral analysis of naturally occurring cannabinoids. **M.J. Wilcox, G. Mazzocantini, O.H. Ismail, A. Ciogli, C. Villani, F. Gasparini, S. Anderson**
- ANYL **197.** Smartphone-assisted colorimetric analysis of Mn in stainless steel. **C. Huang, B. Lum, Y. Liu**
- ANYL **198.** 2D IR spectroscopy study of <sup>13</sup>C-natural abundant vibrational transition in Mn(CO)<sub>5</sub>Br. **Y. Fan, J.P. Wang**

ANYL **199.** Nanohydroxyapatite-Nanocellulose composites as bioactive scaffolds for applications in bone tissue regeneration. **S. Laboy**, C.I. Rivera, E. Nicolau

ANYL **200.** Development of methods for kinetic analysis of templated and untemplated calcium phosphate mineralization. **K. Luarasi**, K. Meserve, J. Miech, A.E. Gerdon

ANYL **201.** Effect of energy per atom (E/n) in Ar gas cluster ion beam (GCIB, Arn+) and O2+ cosputter. **S. Wang**, J. Shyue

ANYL **202.** Withdrawn.

ANYL **203.** Electro-photodynamic visualization of singlet oxygen induced by zinc porphyrin modified microchip in aqueous media. **C. Zheng**, H. Cui, Y. Wan, **S. Deng**

ANYL **204.** Synthesis and characterization of meso-tetrakis(2-fluoro-4-methoxyphenyl)porphyrin and its copper(II) and cadmium(II) derivatives. **A. Adeyemo**

ANYL **205.** Solution spectral characteristics of metallophthalocyanine. **A. Adeyemo**

ANYL **206.** Meso-tetrakis(2-chloro-3quinolyl) porphyrin and its water-soluble derivative meso-tetrakis(2-chloro-4-sulfonato-3-quinolyl)porphyrin. **A. Adeyemo**

ANYL **207.** Ligand exchange reactions involving copper(II) thiamine complexes and water-soluble porphyrin, 5,10,15,20-tetrakis(2,4-dimethyl-5-sulfonatophenyl)porphyrin. **A. Adeyemo**

ANYL **208.** Synthesis and characterization of three isomeric porphyrins for Photodynamic Therapy of tumor (PDT). **A. Adeyemo**

ANYL **209.** Preparation and characterization of a new photosensitizer and its metal derivatives: Potential anticancer drugs. **A. Adeyemo**

ANYL **210.** Synthesis and characterization of porphyrins for photodynamic therapy of tumor (PDT). **A. Adeyemo**

ANYL **211.** Withdrawn.

ANYL **212.** Introducing analytical chemistry to Navajo undergraduates through field research: Uranium exposure of sheep grazing near abandoned mines. **J.C. Ingram**, D.K. Robinson

ANYL **213.** Development of novel paper- and fabric-based microfluidic fuel cells and batteries. **F.A. Gomez**, A. Avoundjian, A. Mendez, C. Tang, F. Bernal, S. Valuilis, R. Ortiz, V. Galvan, K. Domalaon, M. Gonzalez

ANYL **214.** From sample to answer: A low-cost disposable cartridge for epidemic detection on site based on 3D printing technology. **N. He**, H. Chen, Y. Deng

ANYL **215.** Polyvinyl alcohol modified porous graphitic carbon stationary phase for hydrophilic interaction liquid chromatography. **H. Yanjie**, Z. Feifang, Y. Bingcheng

ANYL **216.** Withdrawn.

ANYL **217.** PCR-free ligase cyclic reaction for SNP detection of KRAS mutation with attomole sensitivity. **J. Kim**

ANYL **218.** Development of NIRS calibration models for pharmaceutical quality control analysis. **J. Feng Baez**, J.E. Mercado-Adrover, V. Cárdenas, R.J. Romanach

ANYL **219.** Self-assembly of the cephalopod structural protein reflectin. **K. Naughton**, L. Phan, E. Leung, R. Kautz, Q. Lin, Y. van Dyke, B. Marmiroli, B. Sartori, A. Arvai, S. Li, M. Pique, M. Naeim, J. Kerr, M. Aquino, V. Roberts, E. Getzoff, C. Zhu, S. Bernstorff, A.A. Gorodetsky

ANYL **220.** Detection of low level nitrate in seawater by combining Ag nanoparticles and Au electrode. **K. Fajerweg**, E. Lebon Tailhades, P. Fau, M. Kahn, M. Comtat, P. Temple Boyer, B. Dubreuil, **P. Behra**

ANYL **221.** Use of Graphene-Oxide (GO) for both aptamer screening and fluorescence aptasensor in the detection of whole avian viruses. **S. Kim**, Y. Kwon, J. Lee, M. Kim, H. Cho, C. Song, M. Gu

ANYL **222.** Withdrawn.

ANYL **223.** Withdrawn.

ANYL **224.** Withdrawn.

ANYL **225.** Antenna-Coupled Plasmonic Nanowire Endoscope (ACPNE) for label-free remote sensing in single live-cells. **S. Kim**, Y. Zhu, R. Yan

ANYL **226.** Withdrawn.

ANYL **227.** Photolysis of a Zn(II)-nitrilotriacetate cage in AOT/isooctane reverse micelles. **C.N. Beuning**, T. Paryani, N.E. Barkley, P. Basa, R.L. Cole, N.E. Levinger, S.C. Burdette, D.C. Crans

ANYL **228.** Way to go green! Evaluation of different analytical SFC systems. **M. Goel**, A. Kumar

ANYL **229.** Inhibition of MYC-induced lipogenesis prevents renal cell carcinoma initiation and progression. **A. Gouw**, K. Margulis, D. Sullivan, G. Toal, L. Eberlin, C.V. Dang, R.N. Zare, D. Felsher

ANYL **230.** Superfast two-phase reactions in microdroplets without the use of phase transfer catalyst. **X. Yan**, H. Cheng, S. Banerjee, R.N. Zare

ANYL **231.** Withdrawn.

ANYL **232.** Development of impidimetric aptasensor devices for the analytical determination of inorganic arsenic. **E. Nicolau**, K. Vega

ANYL **233.** Human *in vivo* protein corona formed onto liposomes in ovarian carcinoma patients: From characterization to potential clinical utilization. **M. Hadjidemetriou**, K. Kostarelou

ANYL **234.** Ratiometric resonance synchronous spectroscopy for material characterizations. **D. Zhang**

ANYL **235.** Development of a biomineralization strategy for surface modification of single glass nanopore: Versatile nanopores for fluorescence observation and electrochemical chiral sensing. **A. Zhu**, S. Cao, G. Shi

ANYL **236.** Asymptomatic diagnosis of Huanglongbing disease using metalloporphyrin functionalized single-walled carbon nanotubes sensor arrays. **H. Wang**, P. Ramnani, T. Pham, C. Villareal, G. Liu, A.K. Mulchandani

ANYL **237.** Nanostructured superhydrophobic organic semiconductor films enable sub-zeptomole level molecular sensing in surface-enhanced Raman spectroscopy. **G. Demirel**, H. Usta, A. Facchetti

ANYL **238.** Withdrawn.

ANYL **239.** Non-fouling SERS substrate for detect the cationic fluorescent tag from human blood solution. **T. Wen**

ANYL **240.** Determination of second hyperpolarizability with computational Raman activities and identification of DOVE signatures for selected molecules. **W. Zhao**

## MONDAY MORNING

### Section A

Hilton San Francisco Union Square Union Square 14

#### Synthesis & Characterization of Materials for Energy Applications

##### Enabling Concepts for Energy Materials Design

Cosponsored by *CATL*

J. Rodriguez Lopez, D. R. Rolison, *Organizers*

K. J. Stevenson, *Organizer, Presiding*

A. Kolpak, *Presiding*

**8:30 ANYL 241.** Tuning the electrocatalytic activity of perovskite oxides for water oxidation and oxygen reduction by active site variation. **K.J. Stevenson**, W. Hardin, R. Forslund, C. Alexander, K.P. Johnston

**9:00 ANYL 242.** Role of interface structure and stoichiometry on water splitting in oxide photo- and electrocatalysts. **A. Kolpak**

**9:30 ANYL 243.** Measurement strategies and challenges for the study of heterogeneous water oxidation electrocatalysts. **S.W. Boettcher**, M. Burke-Stevens, L. Enman

**10:00 Intermission.**

**10:30 ANYL 244.** First-principles comparative study of Li, Na and Mg intercalation compounds. **A. Van der Ven**, M. Radin, J. Vinckeviciute

**11:00 ANYL 245.** Reflection on the performance defining properties induced by the positive electrode – Electrolyte interface chemistry. **G.G. Amatucci**, N. Pereira, F. Badway, N. Faenza

**11:30 ANYL 246.** Ab initio band-diagram framework for the development of cation intercalation charge storage materials. **M. Young**, A.M. Holder, S.M. George, **C. Musgrave**

### Section B

Hilton San Francisco Union Square Franciscan D

#### ACS Award in Chromatography: Symposium in honor of Robert T. Kennedy

L. Huang, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:40 ANYL 247.** Capillary LC with sub-2 micron particles: Effects of column packing conditions on column morphology and efficiency. **J.W. Jorgenson**, J. Godinho, A. Reising, U. Tallarek

**9:10 ANYL 248.** Phosphoproteomics of fertilization. **E. Peuchen**, P. Huber, K. Dubiak, L. Sun, **N.J. Dovichi**

**9:40 ANYL 249.** Toward resolving large isomeric glycans. **M.V. Novotny**

**10:10 Intermission.**

**10:25 ANYL 250.** Charting protein-protein interactions using Cross-Linking Mass Spectrometry (XL-MS). **C. Yu**, C. Gutierrez, X. Wang, E. Novitsky, S.D. Rychnovsky, **L. Huang**

**10:55 ANYL 251.** Award Address (ACS Award in Chromatography sponsored by MilliporeSigma). High-speed electrophoresis as an enabling technology for protein analysis, screening, and sensing. **R. Kennedy**

### Section C

Hilton San Francisco Union Square Union Square 17/18

#### Chemical Forensics

##### Investigations of Alleged Use & Source Attribution of Chemical Weapons

Cosponsored by *CHAL* and *PRES*

R. Foster, C. Fraga, J. J. Moran, *Organizers*

J. R. Cort, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:10 ANYL 252.** Influence of analytical chemistry on multilateral diplomacy and chemical disarmament. **J.E. Forman**

**8:25 ANYL 253.** Analysis in support of investigations of alleged use. **H. Gregg**

**8:45 ANYL 254.** Analysis of biomedical samples of victims after exposure to sarin or sulfur mustard. **P. Vanninen**, U. Hakala, M. Söderström, O. Kostianinen, M. Rapinaja

**9:10 ANYL 255.** Phosphatidylglycerol chlorohydrins as potential biomarkers for chlorine gas exposure. **P. Hemström**, A. Larsson, L. Elfsmark, **C. Astot**

**9:35 ANYL 256.** DHS S&T chemical forensics program. **R. Bull**

**9:50 Intermission.**

**10:05 ANYL 257.** Chemical forensics for sourcing chemical. **C. Fraga**

**10:30 ANYL 258.** Small-scale production of chemical warfare agents for chemical attribution signature determination. **S. Hok**

**10:55 ANYL 259.** Chemical forensics using multivariate data analysis of chemical attribution signatures from production of chemical warfare agents. **K. Höjer Holmgren**, D. Wiktelius, R. Magnusson, S. Lindberg, A. Larsson, R. Norlin

**11:20 ANYL 260.** Chemical attribution of chemical warfare agents for forensic purposes. **D. Noort**, **M.J. Van der Schans**

**11:40 ANYL 261.** Chemical threat agent attribution signature studies by Isotope Ratio Mass Spectrometry technology (IRMS). **K. Hoang**, L. Hoffland, G. Hondrogiannis, S. Ostazeski

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:

[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## Section D

Hilton San Francisco Union Square  
Franciscan C

## Coherent Multidimensional Spectroscopy in Materials Science

Cosponsored by *PHYS*

W. Zhao, *Organizer*

J. M. Anna, E. Harel, *Presiding*

**8:00 ANYL 262.** Multidimensional spectroscopy of conical intersections by broadband x-ray pulses. S. Mukamel

**8:30 ANYL 263.** *In situ* probe of interfacial electric field, catalyst structure and dynamics at electrode/ liquid interfaces by time-resolved vibration sum-frequency generation spectroscopy. T. Lian

**9:00 ANYL 264.** Dynamic intermediates in singlet fission observed with ultrafast infrared spectroscopy. C. Grieco, G. Doucette, J.B. Asbury

**9:30 ANYL 265.** Ultrafast vibrational energy delocalization in graphdiyne. J.P. Wang

**10:00** Intermission.

**10:15 ANYL 266.** Energy transfer in solar cells made from semiconducting carbon nanotubes studied using 2D white-light spectroscopy. M.T. Zanni

**10:45 ANYL 267.** Exploring energy transfer in photosynthetic light harvesting. G. Schlau-Cohen

**11:15 ANYL 268.** Two-Dimensional electronic spectroscopy of Photosystem I and light harvesting chromophores. J.M. Anna

## Section E

Hilton San Francisco Union Square  
Union Square 19/20

## Biomedical Advances in Cancer Detection &amp; Therapeutics Using Advanced Analytical Techniques

C. Burton, Y. Ma, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 ANYL 269.** Surface-Enhanced Raman scattering biosensor for cancer protein biomarker detection. N. Wu

**8:55 ANYL 270.** Nanoscale tools for biomarker discovery: The emerging role of nanoparticle biomolecule corona. M. Hadjidemetriou, K. Kostarelos

**9:15 ANYL 271.** Investigation of biomarkers to screen for prostate cancer in urine using gas chromatography/mass spectrometry. A. Siegel, A. Daneshkhan, J. Munshi, T.A. Gardner, M. Agarwal

**9:35 ANYL 272.** Mass spectrometric imaging of prostate biopsy samples: Cancer margin assessment from the distribution of small metabolites and lipids. S. Banerjee, R. Zare, R. Tibshirani, C. Kunder, R. Nolley, R. Fan, J. Brooks, G. Sonn

**9:55** Intermission.

**10:10 ANYL 273.** *In vitro* detection of miR-21 target using a nucleic acid self-quenching smart probe. S.A. Oladepo

**10:30 ANYL 274.** *In vitro* manipulation of stimuli-responsive liposomal contents release potentially activated by overexpressed hNQO1 in cancer cells. H.H. Nguyen

**10:50 ANYL 275.** Evaluating the transfection efficacy of spherical nucleic acid coated upconverting nanoparticles in cells for *in vitro* imaging and diagnostics. H. Najib

**11:10 ANYL 276.** Current trends in cancer biomarker discovery using urinary metabolomics: Achievements and new challenges. C. Burton, Y. Ma

**11:30** Concluding Remarks.

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Frontiers in Analytical &amp; Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by *PROF*, Cosponsored by *ANYL*‡, *BIOL*‡, *CHED*, *CMA*, *COLL*, *COMP*, *CWD*, *ENVR*, *INOR*‡, *MEDI*, *MPPG*, *ORGN*, *PHYS*, *PMSE*‡, *POLY*, *PRES*‡ and *WCC*

## Nanocellulose Processing &amp; Analysis Properties

Sponsored by *CELL*, Cosponsored by *AGFD*, *ANYL*, *CHAS* and *I&EC*

## Contaminants of Emerging Concern in Natural &amp; Engineered Systems

Sponsored by *ENVR*, Cosponsored by *AGRO*, *ANYL* and *CEI*

## Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring &amp; Remediation

Sponsored by *ENVR*, Cosponsored by *ANYL*

## MONDAY AFTERNOON

## Section A

Hilton San Francisco Union Square  
Union Square 14

## Synthesis &amp; Characterization of Materials for Energy Applications

## In Operando &amp; Surface Sensitive Analysis

Cosponsored by *CATL*

D. R. Rolison, K. J. Stevenson, *Organizers*  
J. Rodriguez Lopez, *Organizer, Presiding*  
H. D. Abruna, *Presiding*

**1:30 ANYL 277.** Versatile *in situ* chemical imaging of alkali ion reactivity at battery interfaces. J. Rodriguez Lopez, Z.J. Barton, J. Hui, M. Burgess

**2:00 ANYL 278.** Near- and far-field IR spectroscopy of the Si electrode/organic electrolyte interface. R. Kostecky, A. Jarry, M. Ayache, H.A. Bechtel, M.C. Martin

**2:30 ANYL 279.** Capturing chemical dynamics at the buried electrode-electrolyte interface by *in situ* imaging mass spectrometry. J. Yu, Y. Zhou, Z. Zhu, X. Yu

**3:00** Intermission.

**3:30 ANYL 280.** Operando methods for the characterization of energy materials. H.D. Abruna

**4:00 ANYL 281.** Near-Ambient Pressure X-ray Photoelectron spectroscopy for *in situ* and *in operando* studies of electrocatalytic materials. E. Savinova

**4:30 ANYL 282.** Design consideration for regenerative electrodes for energy storage application. S. Mukerjee, S. Ghoshal, J. Li, Q. Jia

## Section B

Hilton San Francisco Union Square  
Franciscan D

## ACS Award in Analytical Chemistry: Symposium in honor of Donald F. Hunt

J. R. Yates, *Organizer, Presiding*

**1:00 ANYL 283.** Uniform field ion mobility QTOF MS and in-source ion activation for protein structural studies. R.T. Kurulugama, G. Stafford, J.D. Eschweiler, B.T. Ruotolo, J. Fjeldsted

**1:45 ANYL 284.** Intra-surgical diagnosis of human brain tumor tissue and surgical margin characterization by DESI-MS. R.G. Cooks, C. Alfaro, A. Jarmusch, V. Pirro, Z. Baird, E. Hattab, A. Cohen-Gadol

**2:30 ANYL 285.** Investigating aberrant glycosylation in cancer using mass spectrometry: Insight for cancer immunotherapy design. S. Malaker

**3:15 ANYL 286.** Mapping dynamic protein interaction landscapes in *Saccharomyces cerevisiae* using a novel whole network enrichment approach. J.R. Yates, B. Stein, D. Calzolari, M. Lavallée-Adam

**4:00 ANYL 287. Award Address** (ACS Award in Analytical Chemistry sponsored by Battelle Memorial Institute). Instrumentation and methods for the identification and sequence analysis of (a) intact proteins on a chromatographic time-scale and (2) tumor specific peptides for immunotherapy of cancer. D.F. Hunt

## Section C

Hilton San Francisco Union Square  
Union Square 17/18

## Chemical Forensics

## Chemical Attribution Signatures of Illicit Drugs &amp; Toxic Chemicals

Cosponsored by *CHAL* and *PRES*

J. R. Cort, R. Foster, J. J. Moran, *Organizers*  
C. Fraga, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:10 ANYL 288.** Changes in illicit cocaine hydrochloride processing identified and revealed through multivariate analysis. J. Mallette, J. Casale, J. Jordan

**1:35 ANYL 289.** Detection of marijuana varieties based on chemical signatures extracted from sample headspace. A. McDaniel, J. Velez, F. Liu, J. Sweet, C.C. Yu

**2:00 ANYL 290.** Impurity profiling of methamphetamine synthesized from clandestine methylamine. J.L. Brown, S. Toske

**2:25 ANYL 291.** Multivariate statistical analysis of orthogonal mass spectral data for the identification and route attribution of 3-methylfentanyl. B.P. Mayer, C.A. Valdez, P. Spackman, A.M. Williams

**2:50** Intermission.

**3:10 ANYL 292.** Source attribution of fentanyl through impurity and stable isotope and trace element profiling. A. Bennett, P. Hough, D. Noort, N.J. Cooper, D. Alkema, A. Patel, J. Riches

**3:35 ANYL 293.** Signature profiling of illicit fentanyl and fentanyl-related seizures for tactical and strategic intelligence. J. Casale, J. Mallette

**4:00 ANYL 294.** Forensic profiling of amanita mushrooms by high resolution LC-MS. D. Jansson, A. Wolterink, C. Astot

**4:20 ANYL 295.** Anionic, isotopic, and elemental signatures for forensic source attribution of cyanides. N.S. Mirjankar, C. Fraga, A.J. Carman, J.J. Moran

**4:40 ANYL 296.** Chemical attribution signatures of cyanogen chloride from commercial sources. D.B. Cullinan

## Section D

Hilton San Francisco Union Square  
Franciscan C

## Coherent Multidimensional Spectroscopy in Materials Science

Cosponsored by *PHYS*

W. Zhao, *Organizer*

T. R. Calhoun, G. Schlau-Cohen, *Presiding*

**1:00 ANYL 297.** Using multi-order Time Correlation Functions (TCFs) to elucidate biomolecular reaction pathways from microsecond single-molecule fluorescence experiments. A.H. Marcus

**1:30 ANYL 298.** Interferometric 2D-SFG spectroscopy of molecular catalysis on TiO<sub>2</sub> surfaces. H. Vanselow, A.M. Stingel, P.B. Petersen

**2:00 ANYL 299.** Quantum coherence selective 2D Raman spectroscopy to probe electron-phonon interactions in hybrid systems. E. Harel, A. Spencer, W. Hutson

**2:30 ANYL 300.** Time-resolving solid-state solvation using small-molecule dopants in glassy polymer hosts. M. Delor, B. Cotts, D. McCarthy, N.S. Ginsberg

**3:00** Intermission.

**3:15 ANYL 301.** Transient absorption microscopy reveals amphotericin B's mechanism of action. T.R. Calhoun, K. Higgins

**3:45 ANYL 302.** Optical resonance imaging: An optical analog to MRI with sub-diffraction-limited capabilities. M.A. Alloidi, R.J. Mazurki, P.D. Dahlberg, J.P. Otto, H. Davis, G.S. Engel

**4:15 ANYL 303.** Bandgap inhomogeneity from 2D spectra vs. size dispersion from TEM in PbSe quantum dots. D. Baranov, S.D. Park, J. Ryu, D.M. Jonas

## Section E

Hilton San Francisco Union Square  
Union Square 19/20

## Biomedical Advances in Cancer Detection &amp; Therapeutics Using Advanced Analytical Techniques

C. Burton, Y. Ma, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 ANYL 304.** Detection of exosomes using fluorescence detection based on competitive hybridization with aptamer. L. He, B. Li, Z. Li, P. Xiao, N. He

**1:55 ANYL 305.** Biosynthesized nanoclusters and supramolecular complexes as scaffolds for multimodal cancer bio-imaging. X. Wang

**2:15 ANYL 306.** Flotation immunoassay: Masking the signal from free reporters in sandwich immunoassays. H. Chen, A. Hagstrom, J. Kim, G. Garvey, A. Paterson, F. Ruiz-Ruiz, B. Raja, U. Strych, M.A. Rito Palomares, K. Kourentzi, J. Conrad, R. Atmar, R.C. Willson

‡Cooperative Cosponsorship

**2:35 ANYL 307.** Droplet microfluidic platform for the determination of single-cell lactate release and [18F] fluoro-deoxyglucose uptake. **A. Mongersun**, D. Sengupta, P. Asuri, G. Pratz, P. Abbyad

**2:55** Intermission.

**3:10 ANYL 308.** Biomedical applications of nanoGUMBOS. **N. Bhattarai**, M. Chen, I.M. Warner

**3:30 ANYL 309.** Laser-Driven droplet PCR reactions in multiplexed format for gene expression studies. **S.S. Dixit**, E. Hall, G. Abraham, B. Guo, Z. Ao, R.J. Cote, R. Datar, **G.W. Faris**

**3:50 ANYL 310.** Immobilization of circulating tumor cells via polyelectrolyte multilayers allows for free-floating cell visualization and drug screening. **J.I. Andorko**, K.R. Chakrabarti, P. Zheng, S.S. Martin, C. Jewell

**4:10** Concluding Remarks.

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC

**ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer**

Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY

**Nanocellulose Processing & Analysis**

**Fundamentals**

Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC

**Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**Environmental Chemistry: Undergraduate & Graduate Classroom, Laboratory & Local Community Learning Experiences**

Sponsored by ENVR, Cosponsored by ANYL and CHED

**Undergraduate Research Posters**

**Analytical Chemistry**

Sponsored by CHED, Cosponsored by ANYL and SOCED

**MONDAY EVENING**

**Section A**

Moscone Center  
Hall D

**Sci-Mix**

L. A. Baker, K. Phinney, *Organizers*

**8:00 - 10:00**

**20, 42, 73, 90, 104, 106, 108, 133, 144, 172, 175, 183-185, 187, 189.** See previous listings.

**377, 447, 458, 475.** See subsequent listings.

**TUESDAY MORNING**

**Section A**

Hilton San Francisco Union Square  
Union Square 14

**Synthesis & Characterization of Materials for Energy Applications**

**Fundamental & Molecular Models for Advanced Energy Materials**

*Cosponsored by CATL*

J. Rodriguez Lopez, K. J. Stevenson, *Organizers*  
D. R. Rolison, *Organizer, Presiding*  
S. Brock, *Presiding*

**8:30 ANYL 311.** Identification of carbon-encapsulated iron nanoparticles as active species in non-precious metal oxygen reduction catalysts. **A.A. Gewirth**, J. Varnell, A. DiAscro

**9:00 ANYL 312.** Electrocatalytic small-molecule transformations using well-defined multilayer films of discrete molecular catalysts. **C.C. McCrory**

**9:30 ANYL 313.** Cationic, anionic & electronic disorder on perovskite oxide surface for (electro)catalysis. **W. Chueh**

**10:00** Intermission.

**10:30 ANYL 314.** Tuning catalytic activity in bimetallic transition metal phosphide nanoparticles via composition control. **D. Li**, D. Liyanage, S. Mutinda, **S. Brock**

**11:00 ANYL 315.** Electrocatalyst design and development for the Oxygen Evolution Reaction (OER) and the electro-reduction of CO<sub>2</sub>. **T.F. Jaramillo**

**11:30 ANYL 316.** Studying the kinetics of electrochemical reactions on ruthenium-coated carbon electrodes. **J.C. Lytle**, G. Kamm, A.D. McGovern, J.F. Parker, M.D. Donakowski, D.R. Rolison, J.W. Long

**Section B**

Hilton San Francisco Union Square  
Franciscan D

**Metamorphosis of Supercritical Fluid Chromatography to Chromatographic Systems Using Carbon Dioxide**

S. J. Olesik, A. Tarafder, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 ANYL 317.** Overcoming major hurdles against the adoption of achiral SFC. **L. Taylor**, M. Ashraf-Khorassani

**8:35 ANYL 318.** Separation of polar biological molecules using enhanced-fluidity liquid chromatography. **S.J. Olesik**, R. Bennett, Y. Wang

**9:05 ANYL 319.** UHPSFC-MS; The final piece in the analyst's toolbox? **J.J. Langley**

**9:35 ANYL 320.** Fast and high throughput analysis in pharmaceutical process research and development using carbon dioxide based eluents. **C.J. Welch**, K. Zawatzky, E.L. Regalado

**10:05** Intermission.

**10:20 ANYL 321.** Modeling solvent gradient behavior in SFC. **A. Tarafder**, J.F. Hill

**10:50 ANYL 322.** New insights in modern SFC-MS for the analysis of complex samples and biological matrices. **A. Grand-Guillaume-Perrenoud**, A. Périat, **V. Desfontaine**, S. Moco, D. Barron, J. Veuthey, D. Guillaume

**11:20 ANYL 323.** Comprehensive subcritical fluid chromatography for the modern drug discovery lab. **T. Leek**, P. Sjo

**Section C**

Hilton San Francisco Union Square  
Union Square 17/18

**Chemical Forensics**

**Chemometrics & Statistics for Signature Discovery & Exploitation**

*Cosponsored by CHAL and PRES*

J. R. Cort, R. Foster, J. J. Moran, *Organizers*  
C. Fraga, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:10 ANYL 324.** Statistical framework for establishing defensibility of chemical threat detection and forensics methods. **K. Jarman**, J.H. Wahl, K.L. Wahl

**8:35 ANYL 325.** Wow! or the so-what? factor: A measured approach to the application of chemometrics to examine complex analytical data in forensic science. **C. McKenzie**, N. Nic Daéid

**9:00 ANYL 326.** Establishing evidentiary value through validated inference and reporting of likelihood ratios. **M.E. Sigman**

**9:25 ANYL 327.** Forensic analysis of diesel using GC×GC-TOFMS with Fisher Ratio Software. **B.A. Parsons**, D.K. Pinkerton, B.C. Reaser, **R.E. Synovec**, B. Wright

**9:50** Intermission.

**10:10 ANYL 328.** Assessment of one-class supervised pattern recognition methods for nuclear material group inclusion/exclusion. **C. Stork**

**10:30 ANYL 329.** Rodenticide attribution signatures. **E. Durnal**, K. Brady, E.P. Naveo, N. Doll, C. Carroll, O. Beverly

**10:50 ANYL 330.** DHS Chemical Forensics Program – REACTS. **K. Brady**, E. Durnal, P.J. Deardorff, K. Broekhuizen, C. Grisham

**11:10 ANYL 331.** Comprehensive analysis of aquatic toxins by HPLC-MS/MS. **B. Valenzuela**, B. Kaiser, J. Arce, D. Wunschel

**11:30 ANYL 332.** Infrared microscopy and multivariate curve resolution for the forensic examination of automotive paint chips and smears. **B.K. Lavine**, M. Allen, N.T. Perera, C.G. White, K. Kalkan, K. Nishikida

**Section D**

Hilton San Francisco Union Square  
Franciscan C

**Advanced Materials, Discovery, Characterization & Safety**

L. A. Holland, *Organizer*

W. Zhong, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 ANYL 333.** Metal nanoparticle fate and stability. **A.J. Haes**

**9:00 ANYL 334.** Analytical assessment of protein conformational change induced by interaction with nanomaterials. **W. Zhong**, Y. Duan

**9:55** Intermission.

**10:10 ANYL 335.** Biomolecular screening of nanomaterials. **L.A. Holland**, T.A. Davis, M. Ellington

**11:05 ANYL 336.** Growth-based Bacterial Viability (GBV) assay for interference-free and high-throughput nanotoxicity screening. **T.A. Qiu**, T. Nguyen, H. Frew, N. Hudson-Smith, D. Forester, P. Clement, A. Vartanian, L.M. Jacob, M. Hang, C.J. Murphy, R.J. Hamers, V. Feng, C.L. Haynes

**Section E**

Hilton San Francisco Union Square  
Union Square 19/20

**Kathryn C. Hach Award for Entrepreneurial Success: Symposium in honor of David R. Walt**

*Cosponsored by BIOT*

J. M. Desimone, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:40 ANYL 337.** Nanoparticle-mediated characterization of circulating tumor cell subpopulations. **S.O. Kelley**

**9:10 ANYL 338.** Spherical nucleic acids: Making a case for next-generation nucleic acid therapeutics. **C.A. Mirkin**

**9:40** Intermission.

**9:55 ANYL 339.** Microfabricated systems to screen and separate cells and tissues based on complex phenotypes. **N.L. Allbritton**

**10:25 ANYL 340.** Chemiresistive sensors: Functionalization and organization of carbon nanotubes. **T.M. Swager**

**10:55 ANYL 341.** Award Address (Kathryn C. Hach Award for Entrepreneurial Success sponsored by the Kathryn C. Hach Award Fund). Microwell arrays as a platform for discovery and diagnostics. **D.R. Walt**

**Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies**

**Catalysis**

*Sponsored by ENFL, Cosponsored by ANYL*

**Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla**

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

**TUESDAY AFTERNOON**

**Section A**

Hilton San Francisco Union Square  
Union Square 14

**Synthesis & Characterization of Materials for Energy Applications**

**Novel Architectures, Materials & Synthetic Routes/In Operando & Surface Sensitive Analysis**

*Cosponsored by CATL*

J. Rodriguez Lopez, D. R. Rolison, *Organizers*

K. J. Stevenson, *Organizer, Presiding*

J. W. Long, *Presiding*

**1:30 ANYL 342.** Designing transition metal oxides for energy storage at high charge/discharge rates. **H. Kim**, J. Cook, S.H. Tolbert, **B. Dunn**

**2:00 ANYL 343.** Understanding pseudo-capacitive charge storage from fundamental interfacial processes to 3D electrode design. **J.W. Long**, M.D. Donakowski, J.F. Parker, M.B. Sassin, J.M. Wallace, D.R. Rolison

**2:30 ANYL 344.** Revealing Li intermetallic transformations using operando neutrons and NMR methods. **A. Co**

**3:00** Intermission.

**3:30 ANYL 345.** Advanced transmission electron microscopy for Li-ion battery cathodes. **A. Abakumov**

**4:00 ANYL 346.** Watching reactions with operando X-ray tools. **K.W. Chapman**

**4:30 ANYL 347.** Engineering non-precious metal oxides as cathode electrocatalysts for Li-O<sub>2</sub> batteries. **E. Nikolla**

## Section B

Hilton San Francisco Union Square  
Franciscan D

### New Applications of Supercritical Fluid Chromatography

L. Miller, *Organizer*

L. Taylor, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:10 ANYL 348.** Process excellence in discovery scale pharmaceutical chiral purifications. **Y. Zhang**, M. Beres, J. Carlson, G. Bi, S. Hollis, P. Krolkowski, L. Miller

**1:35 ANYL 349.** Online Supercritical Fluid Extraction/Supercritical Fluid Chromatography (SFE/SFC) for pharmaceutical and food sample analysis. **M. Wong**, Y. Ko, A. Guillen, J.P. Pease

**2:00 ANYL 350.** Stereo isomeric analysis of cannabinoids using UPC2. **J.L. Runco**, A. Aubin

**2:25 ANYL 351.** Purification of cannabinoids using preparative SFC. **B. Murphy**

**2:50** Intermission.

**3:10 ANYL 352.** Advances and applications of supercritical fluid chromatography for small molecules medicinal chemistry. **G. Rosse**

**3:35 ANYL 353.** Practical separation of synthetic peptides from complex crude mixtures by SFC. **M. Ventura**

**4:00 ANYL 354.** New SFC developments as the extended tools for pharmaceutical analysis. **L. Zeng**

**4:25 ANYL 355.** Applications of supercritical fluid technologies for the analysis, extraction and isolation of cannabinoids for cannabis-based therapeutics. **C.J. Hudalla**

**4:50** Concluding Remarks.

**Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)**

## Section C

Hilton San Francisco Union Square  
Union Square 17/18

### Chemical Forensics

#### Isotopic & Elemental Profiling for the Source Attribution of Materials

*Cosponsored by CHAL and PRES*

J. R. Cort, R. Foster, C. Fraga, *Organizers*

J. J. Moran, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:10 ANYL 356.** Forensic attribution using stable isotopes: Hairs to humans and insects to carrion. **G.P. Jackson**, R. Mohr, M.P. Matos, M. Engel

**1:35 ANYL 357.** Applying isotope ratio mass spectrometry to characterize chemical threat agents: Case study on plastic explosives. **L. Chesson**, J. Howa, M. Lott, J. Ehleringer

**2:00 ANYL 358.** Isotope composition of manufactured bulk ammonium nitrate and its isolated ions as a method of differentiating forensic samples. **B.L. Grimm**, L.A. Stern, A.J. Lowe, J. Buscaglia, J. Hietpas, C.M. Marsh

**2:25 ANYL 359.** Linking a fentanyl sample to its synthetic origin using stable isotope forensic signature analysis. **M. Singleton**, C.A. Valdez, S. Hok, H.A. Mulcahy, B.P. Mayer, A.M. Williams

**2:50** Intermission.

**3:10 ANYL 360.** Signatures for detection and attribution of chemical agents and emerging threats using position specific isotope analysis (SNIF-NMR) and multimodal NMR at Ultra-Low Magnetic Field Strengths (ULMF). **R.F. Williams**, R. Michalczyk, M.A. Espy

**3:35 ANYL 361.** Position-Specific stable isotope ratio measurement for chemical forensics. **J.R. Cort**, S.M. Colby, R.S. Renslow

**4:00 ANYL 362.** Characterisation of inter-national uranium ore concentrates and uranium ores for materials provenancing in nuclear forensics. **R. Popelka-Filcoff**, T. Ditcham, A. Wotherspoon, C. Lenahan, P. Kirkbride, A. Stopic, J. Bennett, T. Bull

**4:25 ANYL 363.** Forensic applications of laser ablation ICP-MS. **J. Almirall**

## Section D

Hilton San Francisco Union Square  
Franciscan C

### Advanced Materials, Discovery, Characterization & Safety

W. Zhong, *Organizer*

L. A. Holland, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 ANYL 364.** Optical and electronic property of Au nanomaterials revisited. **J. Zhang**, J. Zhao, S. Sun, L. Swartz, S.L. Riechers, J. Zheng, G. Liu

**2:00 ANYL 365.** Microbial community response to food and industrial grade titanium dioxide in decentralized wastewater treatment systems. **T. Waller**, S.L. Walker

**2:55** Intermission.

**3:10 ANYL 366.** Evaluation of electronic structure via voltammetry: A theoretical study of Carbon Nanotubes. **M. Hossain**, B. Muralidharan, B. Kirk

**4:05 ANYL 367.** Spectroscopic single-molecule tracking reveals the one-dimensional diffusion pathways in surfactant-templated mesoporous silica. **R. Kumarasinghe**, D.A. Higgins, T. Ito

## Section E

Hilton San Francisco Union Square  
Union Square 19/20

### Frank H. Field & Joe L. Franklin Award for Outstanding Achievement: Symposium in Honor of Vicki H. Wsocki

*Cosponsored by WCC*

F. M. Fernandez, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ANYL 368. Award Address** (Frank H. Field & Joe L. Franklin Award for Outstanding Achievement in Mass Spectrometry sponsored by Waters Corporation). Development of surface-induced dissociation as a structural biology tool. **V.H. Wsocki**

**1:55 ANYL 369.** Uncovering lipid connections – new roles for mass spectrometry. **C. Robinson**

**2:15 ANYL 370.** Progress in top-down analysis of branched proteins. **C.C. Fenselau**, A. Lee, L. Geis-Asteggiane, S. Chauhan, D. Chen, Y. Wang, E. Dixon, D. Abeykoon, M. Miller, D. Fushman

**2:35 ANYL 371.** Mapping peptide/protein conformation space: A challenge for IM-MS. **D.H. Russell**

**2:55** Intermission.

**3:10 ANYL 372.** Ultraviolet photodissociation mass spectrometry for characterization of protein complexes. **J. Brodbelt**

**3:30 ANYL 373.** Accelerated reactions in microdroplets: Mechanisms and scale-up methods. **R.G. Cooks**

**3:50 ANYL 374.** Distonic polyradical cations. **H.I. Kenttamaa**

**4:10 ANYL 375.** Proto-Peptidomics: The first peptides in Darwin's warm little pond. **J.G. Forsythe**, A. Petrov, W.C. Millar, S. Yu, I. Mamajanov, R. Krishnamurthy, M. Grover, N.V. Hud, F.M. Fernandez

**4:30** Concluding Remarks.

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

#### Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies

#### Energy Sources & Combustion

*Sponsored by ENFL, Cosponsored by ANYL*

## WEDNESDAY MORNING

### Section A

Hilton San Francisco Union Square  
Union Square 14

#### Synthesis & Characterization of Materials for Energy Applications

### Fundamental & Molecular Models for Advanced Energy Materials/Novel Architectures, Materials & Synthetic Routes

*Cosponsored by CATL*

D. R. Rolison, K. J. Stevenson, *Organizers*

J. Rodriguez Lopez, *Organizer, Presiding*

H. White, *Presiding*

**8:30 ANYL 376.** Electrochemistry at three-phase boundaries. **H. White**, S. German, Y. Liu, M. Edwards, Q. Liu, L. Luo, H. Ren

**9:00 ANYL 377.** Interface characterization of PEDOT:PSS on solution-processed ITO using photoelectron spectroscopy. **L.M. Kogler**, M. Haeming, C. Heske

**9:30** Intermission.

**10:00 ANYL 378.** Ion transport in single-ion conducting polymer electrolytes for lithium batteries. **J.L. Schaefer**

**10:30 ANYL 379.** Significance of manganese in designing advanced Li-ion battery cathodes. **M. Thackeray**

**11:00 ANYL 380.** Controlling the arrangement of matter at different length scale in hybrid membrane to tune the ion transport. **C. Laberty**

## Section B

Hilton San Francisco Union Square  
Franciscan D

### Active Learning in the Undergraduate Analytical Chemistry Curriculum

*Cosponsored by CHED*

T. J. Wenzel, *Organizer*

J. K. Robinson, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ANYL 381.** Overcoming obstacles to active learning in analytical chemistry. **J.K. Robinson**

**8:55 ANYL 382.** Applying active learning to give students enduring learning experiences in chemistry at Texas A & M International University. **A.K. Addo-Mensah**

**9:15 ANYL 383.** Active learning analytical chemistry laboratory; environmental applications and course embedded research performed on an island. **D.J. Lecaptain**, J. Tomasik

**9:35 ANYL 384.** Particulate matter in public spaces: An exploratory, student-led air quality monitoring project for the third-year classroom. **S.A. Styler**, S. Gao

**9:55** Intermission.

**10:10 ANYL 385.** Quantitative determination of aluminum in eight deodorant brands. **A. Kanu**, V.M. Sedwick, A. Leal, D. Turner

**10:30 ANYL 386.** Lithia Water Springs Project: Structuring active learning around a community resource. **S.C. Petrovic**

**10:50 ANYL 387.** Football, Beer, and Analytical Chemistry: The Path to Significant Learning. **M.F. Tuchler**

**11:10 ANYL 388.** Instrument building in undergraduate instrumental analysis. **L.A. Baker**

**Section C**

Hilton San Francisco Union Square  
Union Square 17/18

**Recent Innovations in Nano-Biosensing**

X. Li, Y. Zeng, *Organizers, Presiding*

**8:30 Introductory Remarks.**

**8:35 ANYL 389.** Dynamic cantilever biosensors for pathogens, toxins and genes and NSF's nanobio-sensing program. R. Mutharasan

**9:05 ANYL 390.** Nanoporous gold: A multifunctional material for electrochemical detection and purification of nucleic acids in complex biological fluids. E. Seker

**9:35 ANYL 391.** Nanoparticle-mediated photothermal immunosensing for quantitative biomarker detection using a thermometer. X. Li

**10:05 Intermission.**

**10:20 ANYL 392.** Graphene FRET aptasensor built on a solid support. Y. Ueno, T. Teshima, C. Henderson, H. Nakashima

**10:50 ANYL 393.** Amphiphilic nanoparticles as droplet stabilizers for high-fidelity droplet-based biochemical assays. M. Pan, S. Tang

**11:20 ANYL 394.** Nanomaterial-Inspired microfluidic technologies for biomarker analysis. Y. Zeng

**11:50 Concluding Remarks.**

**Section D**

Hilton San Francisco Union Square  
Franciscan C

**Hierarchical Characterization of Materials Using Atomic Spectrometry & Related Techniques**

U. E. Fittschen, *Organizer, Presiding*

**8:00 Introductory Remarks.**

**8:05 ANYL 395.** Mapping trace metals in hierarchical systems using X-ray fluorescence microscopy. S. Vogt

**8:35 ANYL 396.** High-Resolution elemental imaging with LA-ICP-TOFMS: State of the art. A. Gundlach-Graham, G. Schwarz, M. Burger, P.S. Garofalo, B. Hattendorf, D. Günther

**9:05 ANYL 397.** Solid sample analysis by a Tandem LIBS and LA-ICP-MS system. J.J. Gonzalez

**9:35 Intermission.**

**9:45 ANYL 398.** X-ray tomographic imaging of mechanical deformation at various length and time scales. B. Patterson, J. Mertens, K. Henderson, N. Cordes, M. Herman, P.M. Welch, C.F. Welch, J. Williams, A. Sundar, N. Chawla, X. Xiao

**10:15 ANYL 399.** Applications of x-ray tomography across multiple length scales. P. Pianetta

**10:45 ANYL 400.** Practical multi-scale characterization with correlative microscopy. J. Gelb, L. Lavery, W. Harris, H. Bale, A. Merkle

**11:05 ANYL 401.** Detecting the chemical phases of lithium and iron phosphate in nanoparticles with photoinduced force microscopy. D. Nowak, W. Morrison, R. Murdick, S. Park, J. Cabana

**11:25 ANYL 402.** X-ray fluorescence *in-vivo* elemental imaging of plant samples. U.E. Fittschen, H. Kunz, R. Hoehner, I.M. Tyssebotn, A. Fittschen

**11:45 Concluding Remarks.**

**Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies**

**Fuel Cells**

*Sponsored by ENFL, Cosponsored by ANYL*

**Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla**

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

**WEDNESDAY AFTERNOON**

**Section A**

Hilton San Francisco Union Square  
Union Square 14

**Synthesis & Characterization of Materials for Energy Applications**

**Novel Architectures, Materials & Synthetic Routes**

*Cosponsored by CATL*

D. R. Rolison, *Organizer*

J. Rodriguez Lopez, K. J. Stevenson, *Organizers, Presiding*

**1:30 ANYL 403.** In-depth study of non-intercalation materials as electrode materials for high energy Na-ion batteries and Li-ion batteries. S. Meng

**2:00 ANYL 404.** Alkali and transition metal fluoride-phosphates as cathode materials for metal-ion batteries. E. Antipov

**2:30 ANYL 405.** Design of stable polymer- and ionic liquid-based electrolytes for Li-O2 batteries. S. Feng, L. Giordano, C. Amanchukwu, M. Chen, R. Anandakathir, J.A. Johnson, Y. Shao-Horn

**3:00 Intermission.**

**3:30 ANYL 406.** Effects of nanoscale interfacial design on the UV and visible photocatalytic activity of plasmonic aerogels. J.J. Pietron, P.A. DeSario, T.H. Brintlinger, R.M. Stroud, D.R. Rolison

**4:00 ANYL 407.** Characterization of composite materials prepared by controlled reassembly of functional nanosheets. Q. Cheng, C.K. Chan

**4:30 ANYL 408.** Synthesis of crystalline metal chalcogenide electrocatalysts and group III-V semiconductor films from aqueous solutions at room temperature. S. Maldonado

**Section B**

Hilton San Francisco Union Square  
Franciscan D

**Active Learning in the Undergraduate Analytical Chemistry Curriculum**

*Cosponsored by CHED*

T. J. Wenzel, *Organizer*

J. K. Robinson, *Organizer, Presiding*

**1:30 ANYL 409.** Optical properties of gold nanoparticles: A contextual module to introduce concepts of chemical equilibrium and spectrophotometry. A.G. Cavinato

**1:50 ANYL 410.** Optimization of an HPLC method: A method development approach to upper-level undergraduate laboratory instruction. T. Thomas-Smith

**2:10 ANYL 411.** 3D Printing, active learning, and undergraduate instrumental analysis. B.J. Winters

**2:30 ANYL 412.** How do you sample all of the leaves in the forest? . M. Kistler Langston

**2:50 Intermission.**

**3:05 ANYL 413.** Empowering active learning with virtual machines. K. Streu, N.C. Lee, A. Zubiria, S. Anderson, S. Gagliardi, R.M. Georgiadis

**3:25 ANYL 414.** Electrode modification through self-assembly and electron transfer characterizations by cyclic voltammetry and electrochemical impedance spectroscopy. J. Yan

**3:45 ANYL 415.** Articles from the primary literature as a platform for active learning. M.L. Kovarik

**4:05 Concluding Remarks.**

**Section C**

Hilton San Francisco Union Square  
Union Square 17/18

**Recent Innovations in Nano-Biosensing**

X. Li, *Organizer*

Y. Zeng, *Organizer, Presiding*

**1:30 Introductory Remarks.**

**1:35 ANYL 416.** Molecularly imprinted nanoparticles as non-animal antibodies substitutes for detection of viruses. A. Poma, K. Karim, G. Battaglia, S. Piletsky

**1:55 ANYL 417.** Nanopatterned matrices enable enzyme activity measurements using SAMDI-mass spectrometry. M. Cabezas, C.A. Mirkin, M. Mrksich

**2:15 ANYL 418.** Development of DNA-based glycan microarray platform for on-chip enzymatic glycosylation. H. Heo, C. Kim, J. Seo, H.J. Cha

**2:35 ANYL 419.** Development of genetically engineered virus for bacteria detection in resource-limited settings. J. Chen, S. Nugen

**2:55 ANYL 420.** Development and characterization of thiol-responsive scintillation proximity assay core-shell nanoparticles as turn-on biosensors. Z. Mokhtari, C. Janczak, C.A. Aspinwall

**3:15 Intermission.**

**3:25 ANYL 421.** Janus micromotors for electrochemical sensing and biosensing. B. Jurado, M. Pacheco, J. Rojo, A. Escarpa

**3:45 ANYL 422.** Charge-directed immobilization of bacteriophage on nanostructured electrode for whole cell electrochemical biosensors. Y. Zhou, R. Ramasamy

**4:05 ANYL 423.** Membrane protein ion channels as specific molecule sensors. R. Lazenby, F. Macazo, R.J. White

**4:25 Concluding Remarks.**

**Section D**

Hilton San Francisco Union Square  
Franciscan C

**Applications of Wearable or Implantable Sensors for Systems in Biology**

L. Deravi, T. Zarkovic Grove, *Organizers, Presiding*

**1:00 Introductory Remarks.**

**1:05 ANYL 424.** 3D Printing functional electronic and bioelectronic devices. M.C. McAlpine

**1:35 ANYL 425.** Electroactive protein-based materials. L.F. Deravi

**2:05 Intermission.**

**2:20 ANYL 426.** Towards the development of wearable biosensors for human performance. R.R. Naik

**2:50 ANYL 427.** Chemical sensors: Flexibility and economy by putting technology into transducing materials. T.M. Swager

**Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies**

**Gas Storage & Ion Conduction**

*Sponsored by ENFL, Cosponsored by ANYL*

**Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla**

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

**Frontiers in Glycoanalytics**

**MS & NMR Methods**

*Sponsored by CELL, Cosponsored by ANYL, CARB and MPPG*

**WEDNESDAY EVENING**

**Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation**

*Sponsored by ENVR, Cosponsored by ANYL*

**Contaminants of Emerging Concern in Natural & Engineered Systems**

*Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI*

**Environmental Chemistry: Undergraduate & Graduate Classroom, Laboratory & Local Community Learning Experiences**

*Sponsored by ENVR, Cosponsored by ANYL and CHED*

**THURSDAY MORNING**

**Section A**

Hilton San Francisco Union Square  
Union Square 14

**Advances in Analytical Electrochemistry**

L. A. Baker, *Organizer, Presiding*

**8:30 ANYL 428.** Synthesis and characterization of highly active Au NPs using the rotating disk slurry electrodeposition technique for EtOH electrooxidation in alkaline media. L. Betancourt

**8:50 ANYL 429.** Perfluoroalkyl and alkyl modified glassy carbon electrodes: A model system to understand role of solvation in interfacial electron transfer kinetics. S. Mao, H. Sun

**9:10 ANYL 430.** Use of nonstandard pH electrodes for the determination of pH-values of e-cigarette aerosols to comply with requirements specified in USFDA draft guidance on Pre-market Tobacco Product Applications (PMTA) for Electronic Nicotine Delivery Systems (ENDS). J.H. Lauterbach

**9:30 ANYL 431.** Use of electrochemical techniques in conjunction with computer simulations and spectroscopic methods to determine the electrochemical reduction pathways of atrazine. J. Brown

**9:50 ANYL 432.** Using voltammetry to detect hydrogen-bonding interactions. R.D. Webster

**10:10** Intermission.

**10:30 ANYL 433.** SECM with high areal scan rates using continuous line probes and compressed sensing. G. O'Neil, H. Kuo, J. Wright, D. Esposito

**10:50 ANYL 434.** PeakForce scanning electrochemical microscopy with nanoelectrode probes. Z. Huang, R. Poddar, P. De Wolf

**11:10 ANYL 435.** Localized detection of D-serine using scanning electrochemical microscopy and an enzymatic biosensor. D. Polcaro, S.C. Perry, L. Pollegioni, M. Geissler, J. Mauzeroll

**11:30 ANYL 436.** Electrochemical gate-controlled conductance switching in DNA via STM break junction technique. L. Xiang, J.L. Palma, Y. Li, V. Mujica, M.A. Ratner, N. Tao

## Section B

Hilton San Francisco Union Square  
Franciscan D

### Advances in Analytical Mass Spectrometry

K. Phinney, *Organizer, Presiding*

**8:30 ANYL 437.** Role of acetylation in validating the peptide sequence using mass spectrometry: Implications in proteomics. M. Jagannadham

**8:55 ANYL 438.** Using mass spectrometry and small molecule reagents to detect distinctive structural features of different prion conformations (strains). C.J. Silva, M.L. Erickson-Beltran, I.C. Dynin

**9:20 ANYL 439.** Withdrawn.

**9:45 ANYL 440.** Laser desorption/ionization droplet delivery mass spectrometry for live single cell analysis and imaging. J. Lee, H. Nam, R.N. Zare

**10:10** Intermission.

**10:25 ANYL 441.** Sub-Minute comprehensive metabolomic analyses of biofluid and environmental samples using SPE-IMS-MS. E.S. Baker, X. Zheng, N. Aly, V. Paurus, R.F. Marek, K.C. Hornbuckle, R.S. Renslow, D. Thomas, J. Teeguarden, T. Metz, R. Smith

**10:50 ANYL 442.** Application of statistical sample classification in non-target analysis of complex environmental samples analyzed via LC-HR-QTOFMS. S. Samanipour, J.A. Baz-Lomba, M.J. Reid, B. Van Bavel, K. Thomas

**11:15 ANYL 443.** Taking on mass spectrometry challenges with MethodsNow™. J.M. Wilson, S.P. Kuhn

## Section C

Hilton San Francisco Union Square  
Union Square 17/18

### Advances in Analytical Spectroscopy

J. M. Harris, *Organizer*

J. C. Lee, *Presiding*

**8:00 ANYL 444.** DNA micelle flares: A study of the basic properties that contribute to enhanced stability and binding affinity in complex biological systems. Y. Wang, W. Tan

**8:25 ANYL 445.** Ultra-highly sensitive and dynamic fluorescence imaging of ROS in live cells and in vivo. P. Li

**8:50 ANYL 446.** Advancing spectroscopy of buried interfaces: Determination of surface potential and electrical double-layer structure at the aqueous electrolyte-nanoparticle interface. M.A. Brown

**9:15 ANYL 447.** Fluorinated boronic acid-appended pyridinium salts for Diol recognition & discrimination in water using 19F NMR. J. Axthelm, A. Schiller

**9:40** Intermission.

**10:00 ANYL 448.** Speciation of trace amounts of organic carbon with NMR: The example of plant silica particles. A. Mason, A. Alexandre, F. Ziarelli, S. Viel, G. Santos

**10:25 ANYL 449.** Quantitative analysis of organically bound minerals in nutritional supplements using FT-IR spectroscopy. C. Connolly, R. Murphy

**10:50 ANYL 450.** FTIR microspectroscopy imaging reveals changes in adipose tissues and liver induced by high-fat diet. S.P. Liyanage, A. Bouyanfif, N. Abidi, L. Ramalingam, N. Moustaid-moussa

**11:15 ANYL 451.** Microfluidics-Based surface plasmon resonance for biomolecular interactions and detection of biomarkers related to neurological disorders. X. Wang, E. Enriquez, N. Ukhivanova, A. Benedict, Y. Wang, F. Zhou

## Section D

Hilton San Francisco Union Square  
Franciscan C

### Applications of Wearable or Implantable Sensors for Systems in Biology

L. Deravi, T. Zarkovic Grove, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 ANYL 452.** Wearable epidermal microfluidic systems capable of capture, storage and colorimetric sensing of sweat. A. Koh, D. Kang, J.A. Rogers

**8:50 ANYL 453.** Implantable indium gallium zinc oxide field effect biosensors. X. Du, G.S. Herman

**9:20 ANYL 454.** Mechanically adaptive bio-nanocomposites for implantable sensing. J. Foster

**9:50 ANYL 455.** Nanocellulose wearable sensor platform. Y.S. Kim, S. Minko

**10:20** Intermission.

**10:35 ANYL 456.** Low-Cost human and animal health diagnostics enabled through novel hybrid microfluidic systems. K. Ramzy, C. Heist, G. Bandara, S. Pengpukiat, V.T. Remcho

**11:05 ANYL 457.** Microbial sensing – learning from the innate immunity receptors. T. Zarkovic Grove, R. Parker, A. Mercedes-Camacho

**11:35 ANYL 458.** Towards the development of a smart device surface to non-invasively image and monitor implant associated infection in-situ. U. Uzair, J.N. Anker

**11:50** Concluding Remarks.

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atala

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Frontiers in Glycoanalytics

### Molar Mass & Crystallinity Analyses

*Sponsored by CELL, Cosponsored by ANYL, CARB† and MPPG‡*

## THURSDAY AFTERNOON

### Section A

Hilton San Francisco Union Square  
Union Square 14

### Advances in Analytical Electrochemistry

L. A. Baker, *Organizer, Presiding*

**1:00 ANYL 459.** Highly sensitive and selective electrochemical biosensor for monitoring sialic acid in live brain of mice with Alzheimer's disease based on wettable switching of a stimuli-responsive copolymer. S. Ding, C. Ma, A. Zhu, G. Shi

**1:20 ANYL 460.** Biosensors based on conducting polymer scaffolds targeting carbohydrate-protein interactions. A. Rehman, M. Sharif

**1:40 ANYL 461.** Lab-on-paper cyto-device for the detection of H2S released from MCF-7 cells. J. Yu, L. Zhang, Y. Zhang, S. Ge, M. Yan, H. Liu

**2:00 ANYL 462.** Highly selective nanoparticle-enhanced electrochemical biosensing platforms for proteins in biological fluids. H. Lee, Y. Si, S. Hayati

**2:20** Intermission.

**2:40 ANYL 463.** DNA biosensing through instantaneously electrostatic attraction on polystyrene gold electrode. B. Yao, W. Lu, Q. Yuan

**3:00 ANYL 464.** Integration of collagen hydrogel scaffold to enhance performance of RNA Electrochemical-Aptamer Based (E-AB) sensors. M. Santos Cancel

**3:20 ANYL 465.** Real-time monitoring of Ca<sup>2+</sup> and pH using a non-invasive wearable biosensor. H.Y. Nyein, W. Gao, A. Javey

**3:40 ANYL 466.** Real-time parallel detection of alpha-L-fucosidase and cardiac troponin I with an ultrasensitive plasmonic biosensor. X. Han, H. Shokri Kojori, S. Kim, R.M. Leblanc

## Section B

Hilton San Francisco Union Square  
Franciscan D

### Advances in Analytical Mass Spectrometry

K. Phinney, *Organizer, Presiding*

**1:00 ANYL 467.** Trace determination of nitrosamines in finished drinking water by direct-inject LC-MS/MS. A.E. Pierr

**1:25 ANYL 468.** 2-Hydrazinyl-N, N, N-trimethylethan-1-ammonium iodide: A reagent for chemoselective isolation of volatile aldehydes and ketones from exhaled breath. M. Ogunwale, X. Fu, M.H. Nantz

**1:50 ANYL 469.** High-throughput gas and headspace analysis for the process-line and laboratory: SIFT-MS. V.S. Langford, B.J. Prince, D.B. Milligan, M. Perkins, T. Wilks, T. Potter

**2:15 ANYL 470.** Identifying known unknowns: A comparison between ChemSpider and the US EPA's CompTox Dashboard. A. McEachran, J. Sobus, A.J. Williams

**2:40** Intermission.

**2:55 ANYL 471.** Novel method for determining aldehyde and ketone photoproducts from solar irradiated crude oil-seawater systems by MS/MS. X. Cao, M.A. Tarr

**3:20 ANYL 472.** Positive mode atmospheric pressure chemical ionisation mass spectrometry in archaeological analysis: Differentiation of epimers of pentacyclic terpenoids. W. Martin, R.D. Bowen, R. Brettell, R. Gallagher, C. Townley

**3:45 ANYL 473.** Personal information from latent fingerprints obtained by mass spectrometry using machine learning. Z. Zhou, R.N. Zare

## Section C

Hilton San Francisco Union Square  
Union Square 17/18

### Advances in Analytical Spectroscopy

J. M. Harris, *Organizer*

S. R. Emory, *Presiding*

**1:00 ANYL 474.** Conformation and dynamics of -synuclein probed by Raman microspectroscopy. J.D. Flynn, J.C. Lee

**1:25 ANYL 475.** Harnessing drop coat deposition Raman spectroscopy for non-invasive cancer diagnosis. A. Niyibizi, J. Jabara, R. Halvorson, S. Potter, C. Lahr, C. Gomez, M. Sakiyama

**1:50 ANYL 476.** *In situ* determination of metformin in Type 2 diabetes tablets using Raman spectroscopy. S.A. Oladepo

**2:15 ANYL 477.** Towards a nonresonant detection strategy for single molecule SERS. N.L. Wong, R.P. Van Duyne

**2:40** Intermission.

**3:00 ANYL 478.** Nanostructured thin-film materials for surface-enhanced Raman scattering and electrochemical studies. S.R. Emory, C. Swanson, E. Douglass

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

**3:25 ANYL 479.** Breakthrough developments in x-ray spectroscopy toward LA-ICP-MS capabilities: Trace-Level microns-scale mapping and femtogram detection sensitivity. **S. Lewis, W. Yun, S. Lau, B. Stripe, D. Reynolds, A. Lyon, J. Kirz, S. Chen, V. Semenov, M. Cordier**

**3:50 ANYL 480.** Recent advances in two-dimensional X-ray diffraction. **B.B. He**

**Section D**

Hilton San Francisco Union Square  
Franciscan C

**Applications of Wearable or Implantable Sensors for Systems in Biology**

L. Deravi, T. Zarkovic Grove, *Organizers, Presiding*

**1:00** Introductory Remarks.

**1:05 ANYL 481.** Comprehensive investigation of potential adverse effects of silver nanoparticle and its environmental transformation in embryonic zebrafish using implantable biosensor. **X. Liu, E. Dumitrescu, K. Wallace, S. Andreescu**

**1:20 ANYL 482.** Nanosensor for chemical imaging of neurotransmitter acetylcholine using MRI. **Y. Luo, E.H. Kim, H. Clark**

**1:35 ANYL 483.** Silk: A glamorous bridge between fashion and smart outfits. **G. Matzeu, P. Tseng, L. Mogas-Soldevila, B. Napier, L. Garbarini, D.L. Kaplan, F. Omenetto**

**2:05 ANYL 484.** Peptide melanins. **R. Ulijn**

**2:35** Intermission.

**2:50 ANYL 485.** Wearable sweat biosensors for personalized healthcare. **W. Gao, H. Nyein, Z. Shahpar, A. Javey**

**3:05 ANYL 486.** Biomaterials-based energy storage devices for next generation edible electronics. **Y. Kim**

**3:35 ANYL 487.** Metal organic frameworks for portable chemical sensing. **K. Mirica, M.K. Smith, M. Ko, A. Aykanat**

**4:05** Concluding Remarks.

**Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla**

Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY

**BIOT**

**Division of Biochemical Technology**

M. O'Malley and V. Roy, *Program Chairs*

**OTHER SYMPOSIA OF INTEREST:**

**Cellulose Structure & Biosynthesis** (see CELL, Sun, Mon, Tue)

**Innovations in Drug Delivery Systems & Combination Products** (see PMSE, Tue, Wed)

**Kathryn C. Hach Award for Entrepreneurial Success: Symposium in honor of David R. Walt** (see ANYL, Tue)

**Science for a Sustainable Energy Future** (see PRES, Mon)

**Young Investigator's Symposium** (see PMSE, Sun, Mon)

**Undergraduate Research Posters** (see CHED, Mon)

**SOCIAL EVENTS:**

**Membership Desk, 8:00 AM:** Sun, Mon, Tues, Wed, Thu

**Reception, 6:30 PM:** Sun

**Program Chair's Lunch, 12:30 PM:** Wed

**Company Seminars, 12:30 PM:** Sun, Mon, Tue, Wed

**Networking/Mentoring Session, 6:00 PM:** Wed

**BUSINESS MEETINGS:**

**BIOT Executive Committee Meeting, 7:00 PM:** Mon

**Future Programming Meeting, 12:30 PM:** Tues

**SUNDAY MORNING**

**Section A**

InterContinental San Francisco  
Grand Ballroom A

**Upstream Processes**

**Disruptive Bioprocessing & Process Integration**

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*  
N. R. Boyle, A. Ouyang, *Presiding*

**8:30 BIOT 1.** Online capacitance probes precisely control cell biomass growth through temperature regulation. **J.C. Swanberg, R. Lewis, K. Aron, M.C. Borys, Z. Li**

**8:50 BIOT 2.** Effective and efficient approaches to cell line engineering in CHO cells. **S. Sandefur, C. Frye**

**9:10 BIOT 3.** Feasibility study of dielectric spectroscopy as a tool for monitoring and controlling of mammalian cell culture processes. **A. Zhang, F. Ma, S. Ghose, O.D. Velez**

**9:30 BIOT 4.** Leveraging media components to control cell growth and improve specific productivity in perfusion cell culture. **S. Wang, A. Lee-Goldman, J. Goby, J. Ravikrishnan, L. Zheng, S. Mishra, J.L. Coffman, H. Lin**

**9:50** Intermission.

**10:10 BIOT 5.** Non-mammalian expression systems for new bioprocesses: Enabling a step-change in manufacturing productivity and cost. **M. Bartlett, C. Wright, A. Kuo, N. Colant, M. Westoby, J.C. Love**

**10:30 BIOT 6.** Molecular mechanisms of epigenetic instability control in long-term cell culture processes. **M. Kamga, S. Yoon**

**10:50 BIOT 7.** Integrated bioprocess for production of recombinant butyrylcholinesterase from transgenic rice cell suspension cultures. **J. Corbin, S. Alkanaimsh, M. Kalemia, K. Karuppanan, R. Rodriguez, C.B. Lebrilla, K. McDonald, S. Nandi**

**11:10 BIOT 8.** Establishing a high-efficient serum-free process for influenza vaccine production using MDCK cells. **Q. Ye, X. Liu, W. Dai, L. Zhao, Y. Wu, W. Peng, K. Hu, W. Tan**

**Section B**

InterContinental San Francisco  
InterContinental C

**Downstream Processes**

**Advances in Chromatographic Separations**

R. Barros, V. Natarajan, N. Tugcu, *Organizers*

D. J. Roush, *Organizer, Presiding*

J. Neville, A. Podgornik, *Presiding*

**8:30 BIOT 9.** Aggregation phenomena in cation exchange chromatography and implications to process development for mAb and Fc-fusion proteins. **Z. Chen, C. Huang, N. Chennamsetty, X. Xu, Z. Li**

**8:50 BIOT 10.** Competitive binding kinetics of antibody monomer-dimer mixtures on CEX resins during separation by frontal analysis. **J.M. Reck, T.M. Pabst, A.K. Hunter, G. Carta**

**9:10 BIOT 11.** Understanding the molecular details of protein adsorption in polymer-grafted ion exchangers. **J. Basconi, G. Carta, M.R. Shirts**

**9:30 BIOT 12.** Investigating domain contributions to antibody retention in chromatography systems. **J. Robinson, D.J. Roush, S.M. Cramer**

**9:50** Intermission.

**10:10 BIOT 13.** *In silico* scale-up from laboratory to production scale: A case study on applying mechanistic modeling for describing chromatographic purification of a monoclonal antibody. **F. Stueckler, T. Hartneck, S. Paschen, K. Doninger, J. Griesbach**

**10:30 BIOT 14.** Enablers for QbD implementation: Mechanistic modeling for ion-exchange membrane chromatography. **L. Kanwar, A.S. Rathore, A.P. Manvar**

**10:50 BIOT 15.** From bed to bead and below: Multiscale measurements of chromatography. **D.G. Bracewell**

**11:10 BIOT 16.** Modeling of axial and radial heterogeneity of preparative chromatography packings. **M. Dorn, D. Hekmat, D. Weuster-Botz**

**Section C**

InterContinental San Francisco  
Union Square

**Biophysical & Biomolecular Processes**

**Protein Developability: Assessing Candidates for Preclinical & Clinical Studies**

J. Moore, J. A. Van Deventer, *Organizers*

B. E. Jones, P. M. Tessier, *Presiding*

**8:30 BIOT 17.** Measuring physical stability using intrinsic fluorescence and static light scattering. **K. Tschudi, Y. Adem**

**8:50 BIOT 18.** Chemical unfolding as a predictor for monoclonal antibody stability. **J. Floyd, A. Gillespie, C. Siska, B. Kerwin**

**9:10 BIOT 19.** Assessing differential photosensitivity of tryptophan using a model Trp-cage peptide as a mAbs surrogate. **L.F. Welch, M. Deshpande, G. Deperalta, S. Alavattam, J. Lin**

**9:30 BIOT 20.** Non-ideal colligative properties in high concentration mAb solutions and impact to biopharmaceutical manufacturing. **A. Teran, B. Callahan, R. Kaushik**

**9:50** Intermission.

**10:10 BIOT 21.** Is the dilute solution diffusion interaction parameter a robust predictor of concentrated monoclonal antibody formulation shear viscosity? **J.A. Pathak, S. Banappagari, A.L. Chamberlain, L. Lofchy, L. Kueltzio**

**10:30 BIOT 22.** Small volume screening of bispecific antibody solution viscosities. **M. Woldeyes, L. Josephson, D. Leiske, W.J. Galush, E.M. Furst**

**10:50 BIOT 23.** Protein interactions at concentrated conditions and their impact on the thermodynamics and rheology of antibody solutions. **M.A. Blanco, H.W. Hatch, J.E. Curtis, V.K. Shen**

**11:10 BIOT 24.** Multidimensional data visualization and data mining for characterization of long term protein phase behavior. **M. Klijn**

**Section D**

InterContinental San Francisco  
Telegraph Hill

**Bio-Based Products**

**Synthetic Biology Approaches to Engineer Production of Biofuels & Value-Added Chemicals**

M. R. Antoniewicz, C. A. Eckert, G. Sriram, *Organizers*

A. Garst, Z. Shao, *Presiding*

**8:30 BIOT 25.** Accelerating strain engineering with CRISPRi-based tool development. **B.F. Cress, R.J. Linhardt, M. Koffas**

**8:50 BIOT 26.** Exploring nonconventional yeasts to produce pharmaceutical precursors and cosmetics additives. **M. Cao, L. Zhao, Z. Shao**

**9:10 BIOT 27.** What does it take to engineer microbes for industrial applications? **G. Stephanopoulos**

**9:50** Intermission.

**10:10 BIOT 28.** Production of branched-chain fatty acid derivatives in high percentage. **W. Jiang, G.J. Bentley, J.B. Qiao, F. Zhang**

**10:30 BIOT 29.** Inducible gene circuits to control *Saccharomyces cerevisiae* metabolism for advanced biofuel production. **E.M. Zhao, J.L. Avalos**

**10:50 BIOT 30.** Robust and scalable two-stage fermentation for efficient terpenoids production using dynamic metabolic control. **Z. Ye, M. Lynch**

**11:10 BIOT 31.** Engineering biosynthetic routes to high-performance non-natural polymers. **B. Motta Nascimento, N.U. Nair**

Sutter

### Biosimilars

#### Scientific Challenges in Production of Biosimilars: Processing & Analysis

R. S. Gronke, A. S. Rathore, *Organizers*  
N. Chimule, R. I. Shpritzer, *Presiding*

**8:30 BIOT 32.** FDA perspective on demonstrating analytical similarity. **M.A. Shapiro**

**9:10 BIOT 33.** Control of cell culture variables to meet target process and product quality in the production of biologics. **P. Bhebe**

**9:30 BIOT 34.** Clearance of mAb charge variant by preparative ion exchange or multimodal chromatography. **T. Bjorkman, A. Ljunglöf**

**9:50 Intermission.**

**10:10 BIOT 35.** Correlating critical quality attributes in IgG1: Glycosylation and charge heterogeneity. **N. Nupur, R. Gudihal, A.S. Rathore**

**10:30 BIOT 36.** Addressing the challenge of higher-order structure assessment of biologics with 2D NMR. **J.P. Marino**

**10:50 BIOT 37.** Withdrawn.

**11:10 Panel Discussion.**

## Section F

InterContinental San Francisco  
Grand Ballroom B/C

### David Perlman Memorial Lectureship

M. A. O'Malley, T. M. Przybycien, V. Roy, *Organizers, Presiding*

**11:30 BIOT 38.** Synthetic biology platforms for natural product biosynthesis and discovery. **C.D. Smolke**

### Cellulose Structure & Biosynthesis

#### In the Plant Cell Wall

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## SUNDAY AFTERNOON

### Section A

InterContinental San Francisco  
Grand Ballroom A

#### Upstream Processes

#### Mammalian Cell Culture Process Development

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*  
M. Cunningham, N. George, S. W. Harcum, *Presiding*

**2:00 BIOT 39.** Identification of genes that rescue deficient DNA double-strand break repair in Chinese hamster ovary cells. **X. Zhang, K. Lee**

**2:20 BIOT 40.** Strategy to enhance monoclonal antibody productivity in CHO cells with anti-apoptotic inhibitors based on flow cytometric analysis. **D.W. Lin, D. Townsend, A. Zanghi, P. Huang**

**2:40 BIOT 41.** Strategies to modulate CHO cell growth and reduce cell bleed product loss in high density perfusion cultures using classic cell culture medium nutrients. **D. Ogawa, J. Ravikrishnan, S. Wang, H. Lin**

**3:00 BIOT 42.** Kinetic based metabolic model of mammalian cell cultures – model building and experimental validation for productivity improvement. **Z. Huang, S. Yoon**

**3:20 Intermission.**

**3:40 BIOT 43.** Practical approach in bioreactor scale-up and process transfer. **S. Xu, L. Hoshan, R. Jiang, B.M. Gupta, E. Brodean, J.S. Bowers, K. O'Neill, T. Seamans, H. Chen**

**4:00 BIOT 44.** Oxygen uptake modeling for cross-scale prediction of gas sparge rates in a CHO cell culture process. **B. Reed, E. Garr**

**4:20 BIOT 45.** Elucidating the effects of CO<sub>2</sub> on CHO cell metabolism in bioprocessing. **W. Chen, J. Wang, L. Zhao, L. Fan, W. Tan**

**4:40 BIOT 46.** Novel shear assay for increasing chinese hamster ovary cell culture robustness in biomanufacturing. **D. Chang, K. Chang, R. Ferguson, D. Osborne, O.D. Velez**

## Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Advances in Chromatographic Separations

R. Barros, V. Natarajan, N. Tugcu, *Organizers*  
J. Neville, D. J. Roush, *Organizers, Presiding*  
A. Podgornik, *Presiding*

**2:00 BIOT 47.** Role of more than 40 years of improvement in protein A chromatography in the growth of the therapeutic antibody industry. **G. Bolton, K. Mehta**

**2:40 BIOT 48.** Comprehensive evaluation of emerging anion exchange adsorber technologies for improving capacity and manufacturing agility. **M.R. McGarrah, H. Ardeshta, G.J. Terlith, K.E. Goklen**

**3:00 BIOT 49.** Evaluation of single-use FibroSelect technology for monoclonal antibody purification. **K. Mehta, A. Venkatesh, I. Scanlon, P. Shah, R.G. Soderquist**

**3:20 Intermission.**

**3:40 BIOT 50.** Clearance of challenging, hard-to-remove CHO host-cell proteins by application of orthogonal approaches towards establishment of a robust downstream process. **N. Sanaie, A. Velayo, A. Quezada, R. Vonder Reith, C. Tran, B. Kluck, J. Woo, C. Garcia, R. Krishnan**

**4:00 BIOT 51.** Chromatofocusing of IgG isoforms using peptide-based affinity adsorbents and dual ionic strength-pH gradients. **H. Reese, J. Lembo, A. Hirsh, S. Menegatti**

**4:20 BIOT 52.** Developing a split-in-protein based platform for the purification of any biological therapeutic protein. **A. Lahiry, J. Taris, M. Cooper, Y. Fan, T. Han, C. Shi, D.W. Wood**

**4:40 BIOT 53.** Rapid optimization of chromatographic separations using a nano-liter scale column in a microfluidic platform. **A. Azevedo, I.F. Pinto, R.R. Soares, V. Chu, J.P. Conde, M.R. Aires-Barros**

## Section C

InterContinental San Francisco  
Union Square

### Biophysical & Biomolecular Processes

#### Protein Engineering & Design

J. Moore, J. A. Van Deventer, *Organizers*  
A. J. Karlsson, J. Scheer, *Presiding*

**2:00 BIOT 54.** Impact of affinity maturation on the specificity of antibodies targeting protein post-translational modification sites. **D. Li, Y. Cho**

**2:20 BIOT 55.** Improved antibody library design and selection methods for minimizing trade-offs between affinity, specificity and stability. **K. Tiller, M. Julian, L. Rabia, L. Li, S. Garde, S. Kumar, P.M. Tessier**

**2:40 BIOT 56.** Translatable affibody ligand discovery: Engineered biopanning, deep sequence-guided library design, and pharmacokinetic modulation. **L. Stern, D. Woldring, B. Case, B. Hackel**

**3:00 BIOT 57.** Engineering the substrate specificity and activity of human proteases towards therapeutic target proteins: An approach to the treatment of autoimmune and inflammatory bowel diseases. **C.A. Denard, L. Yi, J. DeSautelle, Z. Bennett, P. Marek, J. Taft, R. Yaghi, G. Georgiou, B. Iverson**

**3:20 Intermission.**

**3:40 BIOT 58.** Structurally guided design of chimeric proteins containing novel peptide loops. **J. Plaks, J.R. Uzarski, T.J. Lawton, S. Filocamo, J. Kaar**

**4:00 BIOT 59.** Engineering histatin 5 for improved resistance to secreted aspartic proteases. **S.P. Ikononova, Y. Wang, A.J. Karlsson**

**4:20 BIOT 60.** Developing strategies to engineer G protein-coupled receptor binding properties. **J. Yoo, P. Daugherty, M.A. O'Malley**

**4:40 BIOT 61.** Nicking mutagenesis: User-defined, single-pot comprehensive mutagenesis. **T. Whitehead, E. Wrenbeck**

## Section D

InterContinental San Francisco  
Telegraph Hill

### Bio-Based Products

#### Synthetic Biology Approaches to Engineer Production of Biofuels & Value-Added Chemicals

M. R. Antoniewicz, C. A. Eckert, G. Sriram, *Organizers*

A. Garst, Z. Shao, *Presiding*

**2:00 BIOT 62.** High-throughput enzyme screening platform for IPP-bypass MVA pathway for isopentenol production. **A. Kang, C. Meadows, N. Canu, J.D. Keasling, T. Lee**

**2:20 BIOT 63.** New paradigm for pathway engineering at high-throughput and resolution. **M. Bassalo, A. Garst, R.T. Gill**

**2:40 BIOT 64.** Industrialization of biology: Making nature accessible and affordable. **H. Tseng**

**3:00 BIOT 65.** Multilevel engineering of the upstream aromatic module in *Saccharomyces cerevisiae* for high production of polymer and drug precursors. **M. Suastegui, Z. Shao, C.Y. Ng, C. Maranas**

**3:20 Intermission.**

**3:40 BIOT 66.** Optimization of hexanoic acid production pathway in a recombinant *Escherichia coli* by precise flux rebalancing using synthetic promoters and UTRs. **S. Kim, S. Jang, B. Sang, G. Jung**

**4:00 BIOT 67.** Dynamic metabolic control: Improved flux through malonyl-CoA for renewable production of valuable chemicals. **C. Cooper, M. Lynch**

**4:20 BIOT 68.** Elucidating the influence of horizontal gene transfer and mutation rate on adaptive laboratory evolution for industrial biocatalyst development. **G.L. Peabody, K.C. Kao**

**4:40 BIOT 69.** Whole genome regulator mutant library for expedited identification of beneficial mutations for enhanced tolerance towards environmental stress. **A. Choudhury, Z. Wang, R.T. Gill, J. Kaar**

## Cellulose Structure & Biosynthesis

### Evolution of Synthases & Fine Structure of Microfibrils

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## SUNDAY EVENING

### Section A

InterContinental San Francisco  
Grand Ballroom A

#### Startup Road

#### BIOT Tank

G. Bolton, A. May, T. Meyerrose, *Organizers, Presiding*

**5:00 Panel Discussion.**

## MONDAY MORNING

### Section A

InterContinental San Francisco  
Grand Ballroom A

#### Upstream Processes

#### Mammalian Cell Culture Process Development

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*  
M. Cunningham, Y. Inn, *Presiding*

**8:30 BIOT 70.** Ornithine concentration as a tool for modulating high mannose levels in mammalian cell culture. **H. Barkhordarian, C. Huang, P.K. Chan, Z. Zhang, B. Shah, S. Kang, P.V. Bondarenko, C. Goudar**

**8:50 BIOT 71.** Impact of high osmolality cell culture media on cell growth and product quality of biopharmaceuticals. **D. Ponsi, J. Purdie, D. Olson**

**9:10 BIOT 72.** Investigating the cause of charge variant shift of a monoclonal antibody from a mammalian cell culture process. **J. Cacciatore, J. Weng, D. Mitchell, R. van Houts, J. van de Lagemaat, A.G. Tulloch, V. Janakiram**

- 9:30 BIOT 73.** Enabling product quality-driven development of cell culture processes for knobs-in-to-holes bispecifics. **J. Wu**
- 9:50** Intermission.
- 10:10 BIOT 74.** Culture media influenced the phenotypic stability of an NSO cell line—A case study. **T. Bui, M. Berge, L. Li**
- 10:30 BIOT 75.** Production of recombinant adenovirus in a single use bioreactor system. **G. Ahlén, M. Bennemo, T. Persson, M. Lundgren**
- 10:50 BIOT 76.** Reducing variability in cell specific productivity in perfusion culture. **Y. Shimoni**
- 11:10 BIOT 77.** Impact of gas entrance velocity on cell culture performance at small scale and manufacturing scale bioreactors: A case study. **M. George, J. Tressel, B. Vincent, J. Ravikrishnan, A. Chhibbar, J. Cuenca, W. Asprey, H. Lin**

## Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

### Disruptive Bioprocessing & Process Integration

**R. Barros, M. Brower, V. Natarajan, N. Tugcu, Organizers**

**M. Brower, S. M. Cramer, Presiding**

- 8:30 BIOT 78.** Development of an integrated, automated, multi-product platform for the rapid production and purification of protein therapeutics. **L. Crowell, N. Mozdierz, A. Lu, A. Stockdale, K.R. Love, J.C. Love**
- 8:50 BIOT 79.** Optimization of multi-column format for continuous capture of monoclonal antibodies. **S. Chollangi, J. Angelo, D. Baur, X. Xu, N. Singh, M. Morbidelli**
- 9:10 BIOT 80.** Streamlining biopharmaceutical decision-making: Designing for manufacturability, facility fit and cost-effectiveness. **S.S. Farid**
- 9:50** Intermission.
- 10:10 BIOT 81.** Design and control of integrated chromatography column sequences. **B. Nilsson, N. Andersson, P. Tiainen, K. Köhler Van Alstine, A. Staby**
- 10:30 BIOT 82.** Linking single pass tangential flow filtration with anion exchange chromatography for intensified mAb processing. **T. Elich, E.M. Goodrich, H. Lutz, U. Mehta**
- 10:50 BIOT 83.** Integrated continuous processing of proteins expressed as inclusion bodies: GCSF as a case study. **N. Kateja, H. Agarwal, V. Hebbi, A.S. Rathore**
- 11:10 BIOT 84.** Connected DSP mindset: How development enables future manufacturing visions. **L.W. Pampel, R. Rodrigues, F. Gillet, M. Goebel, J. Shultz**

## Section C

InterContinental San Francisco  
Union Square

### Biophysical & Biomolecular Processes

#### Protein Structure & Function

**J. Moore, J. A. Van Deventer, Organizers**  
**H. Samra, T. Whitehead, Presiding**

- 8:30 BIOT 85.** Molecular recognition of diverse type of odorants in a broadly tuned receptor OR2W1. **L. Ahmed, V.S. Batista**
- 8:50 BIOT 86.** Recon 3D: A resource enabling a three-dimensional view of human metabolism and disease. **E.C. Brunk, S. Sahoo, D. Zielinski, A. Altunkaya, N. Mih, A. Pric, A. Sastry, G. Gonzalez, A. Danielsdottir, A. Noronha, M. Aurich, P. Rose, R. Fleming, A. Draeger, S. Burley, J. Nielsen, I. Thiele, B.O. Palsson**

- 9:10 BIOT 87.** Engineering enzymes for broad temperature range applications through active site flexibility. **W. Wang, S. Dassetty, S. Sarupria, M.A. Blenner**
- 9:30 BIOT 88.** Effect of co-solutes on viscosity and structure of highly concentrated monoclonal antibodies. **J. Hung, B. Dear, A. Sharma, C. Karouta, M. Nieto, T. Truskett, K.P. Johnston**

**9:50** Intermission.

- 10:10 BIOT 89.** Efficient antibody affinity maturation requires co-selection of compensatory mutations to maintain thermodynamic stability. **M. Julian, L. Li, S. Garde, P.M. Tessier**

- 10:30 BIOT 90.** Non-destructive in-situ method for measuring protein concentration in frozen drug substance. **A. Borwankar, C. Du, N. Singh**

- 10:50 BIOT 91.** Functional and structural analysis of challenging protein targets using conformationally selective recombinant Fabs. **C. Craik**

## Section D

InterContinental San Francisco  
Telegraph Hill

### Bio-Based Products

#### Engineering Microbes to Utilize Next Generation Feedstocks

- M. R. Antoniewicz, C. A. Eckert, G. Sriram, Organizers**  
**N. R. Boyle, C. Johnson, Presiding**
- 8:30 BIOT 92.** Biological conversion of gaseous alkenes to liquid chemicals. **A. Case**
- 8:50 BIOT 93.** Bioconversion of natural gas: Commercially attractive gas to liquids technology. **B. Yeh, C. Bodarkey**
- 9:10 BIOT 94.** Bioconversion of volatile fatty acids derived from waste activated sludge into lipids by *Cryptococcus curvatus*. **J. Liu, J. Liu, M. Yuan, X. Huang**
- 9:30 BIOT 95.** One-pot bioconversion of distiller dried gains hydrolysate to advanced biofuels. **F. Liu, W. Wu, M.B. Tran-Gyamfi, R.W. Davis**
- 9:50** Intermission.
- 10:10 BIOT 96.** Lactic acid production from the pyrolytic sugar levoglucosan. **S.M. Rothstein, T.J. Mansell**

- 10:30 BIOT 97.** Discovery of CO<sub>2</sub>-fixing one-carbon (C1) metabolism in a cellulose degrading bacterium *Clostridium thermocellum*. **W. Xiong, P. Lin, L. Magnusson, L. Warner, J.C. Liao, P. Maness, K.J. Chou**

- 10:50 BIOT 98.** Consolidating pretreatment and hydrolysis with engineered microbial consortia. **J. Henske, S. Wilken, M.A. O'Malley**

- 11:10 BIOT 99.** Photosynthetic production of butyrate: A versatile chemical and non-toxic alternative for butanol in cyanobacteria. **M.C. Lai, E.I. Lan**

## Section E

InterContinental San Francisco  
InterContinental B

### Startup Road

#### Bioprocessing & Industrial Biotechnology

**G. Bolton, A. May, T. Meyerrose, Organizers**

**A. Boesch, V. Mahendroo, T. Ransohoff, Presiding**

- 8:30 BIOT 100.** Next generation process development: Stop experimenting. GoSilico. **T. Huuk, T. Beck, T. Hahn, J. Hubbuch**

- 8:50 BIOT 101.** Apeel sciences: Peels good! **L. Perez, C. Vild, M. Kahlscheuer**

- 9:10 BIOT 102.** Purifyfy: Purifications solutions for biotherapeutic manufacturing. **O. Hardick, I. Roberts**

**9:30** Intermission.

- 9:50 BIOT 103.** Tale of two companies: Comparing the founding and early growth of Sutro BioPharma and GreenLight Biosciences. **J.R. Swartz**

**10:30** Panel Discussion.

## Section F

InterContinental San Francisco  
Sutter

### Emerging Technologies

#### New Tools & Approaches: Cellular & Microbiome Engineering

**Y. Y. Chen, Y. Kim, J. P. Pieracci, Organizers**

**H. Victor, Organizer, Presiding**

**Z. Shao, Presiding**

- 8:30 BIOT 104.** Novel platform for the production of proteoglycans. **A. Roulier, M. Kipper, C.A. Peebles**

- 8:50 BIOT 105.** Tracking dual signal mediated antibiotic resistance transfer in *Enterococcus faecalis*. **A. Bandyopadhyay, P. Agrawal, R. Breuer, A. Barnes, D. Manias, K.D. Dorfman, G. Dunny, W. Hu**

- 9:10 BIOT 106.** Phylogenetic and targeted functional profiling of the microbiome associated with a unique phytoremediation system. **J. Ravichandar, A. Dyson, C.H. Collins**

- 9:30 BIOT 107.** Elucidating physiology of microbial communities through co-culture 13C-metabolic flux analysis. **M.R. Antoniewicz**

**9:50** Intermission.

- 10:10 BIOT 108.** Enhancing *Agrobacterium* mediated transient recombinant protein production in *Nicotiana benthamiana* plant cell suspension culture. **S. Sukenik, K. McDonald**

- 10:30 BIOT 109.** Developing microbiome-bots to treat inborn errors of metabolism. **Z. Mays, N.U. Nair**

- 10:50 BIOT 110.** Programmable control of CRISPR-Cas9 systems by engineering sgRNA as toehold-switchable riboregulators. **K. Siu, W. Chen**

- 11:10 BIOT 111.** Whole cell biosensor for detection and directed evolution of human milk oligosaccharide production. **F. Enam, T.J. Mansell**

## Section G

InterContinental San Francisco  
Grand Ballroom B/C

### James M. Van Lanen Distinguished Service Award & Marvin J. Johnson Award in Microbial & Biochemical Technology

**M. A. O'Malley, T. M. Przybycien, V. Roy, Organizers, Presiding**

- 11:30 BIOT 112.** Building complex protein functions at the intersection of nanofabrication and synthetic biology. **W. Chen**

### Science for a Sustainable Energy Future

#### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVIR, GEOC, I&EC, MEDI, MPPG+, ORGN and PROF*

### Cellulose Structure & Biosynthesis

#### Mechanism of Synthesis

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## MONDAY AFTERNOON

### Section A

InterContinental San Francisco  
Grand Ballroom A

### Upstream Processes

#### Control of Product Quality Attributes

**N. Agarwal, I. R. Wheeldon, I. Yuk, Organizers**

**Y. Cho, Organizer, Presiding**

**M. Mun, Presiding**

- 2:00 BIOT 113.** Confessions of a cell culture engineer: Process impact on protein products in a quality-by-design world. **R.D. Kiss**

- 2:40 BIOT 114.** Modulation of the afucosylation level of recombinant antibodies with small molecule fucosin inhibitors in cell culture processes. **J. Huang, M. Mujacic, T. Hwang, O.R. Thiel, E. Le, J.G. Allen**

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**3:00 BIOT 115.** Glycoengineering to improve biotherapeutic quality from CHO cells. C. Chung, B. Yin, S. Yang, Q. Wang, H. Zhang, M.J. Betenbaugh

**3:20** Intermission.

**3:40 BIOT 116.** Investigation into the cause of observed differences in the charge variants of a monoclonal antibody during production bioreactor process characterization studies. N. Agarwal, J. Kemper, A. Agarwal, J. Reier, J. Wang, S. Ahuja, G. Miro-Quesada

**4:00 BIOT 117.** Control and estimation of glycosylation profile via media supplementation based on intracellular metabolic models in mammalian cell cultures. S. Sha, S. Yoon

**4:20 BIOT 118.** Cathepsin D knock-out in CHO cells using CRISPR/Cas9. J. Baik, K. Lee

**4:40 BIOT 119.** Novel control strategy for pink colored IgG4 caused by vitamin B12. C. Du, R. Martin, Y. Huang, A. Borwankar, N. Singh, M.C. Borys, Z. Li

## Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Disruptive Bioprocessing & Process Integration

R. Barros, M. Brower, V. Natarajan, N. Tugcu, *Organizers*

S. M. Cramer, *Organizer, Presiding*

M. Brower, *Presiding*

**2:00 BIOT 120.** Chromatography-box-device for process-scale bio-separations. R. Ghosh

**2:20 BIOT 121.** Continuous downstream purification with an all membrane process: Protein A capture and AEX flowthrough. A. Gospodarek, M. Brower, G. Skarja, D.J. Pollard

**2:40 BIOT 122.** Engineering the calcium-regulated -roll peptide for bioseparations applications. S. Banta

**3:00 BIOT 123.** Fit-for-purpose cGMP compliant magnetic separation device: Cleaning validation and protein purification results. M. Ebeler, M. Franzreb

**3:20** Intermission.

**3:40 BIOT 124.** Integration of ATPS and precipitation in a monoclonal antibody manufacturing process: The future of downstream processing? F. Rudolph, M. Richter, M. Dieterle, J. Studts

**4:00 BIOT 125.** Exploring the limits of clarifying high cell density feeds with Cadence™ acoustic separator. M. Collins, K. Galipeau, E. Ayturk

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**4:20 BIOT 126.** Implementation of single-pass tangential flow filtration for inline concentration and production of drug substance: Module effects and diafiltration. J. Zhang, A. Arunkumar, N. Singh

**4:40 BIOT 127.** Combining cell removal and Protein A affinity separation in the same unit operation. I. Roberts, C. Morris, M. Townsend

## Section C

InterContinental San Francisco  
Union Square

### Biophysical & Biomolecular Processes

#### Protein Structure & Function

J. Moore, J. A. Van Deventer, *Organizers*

H. Samra, *Organizer, Presiding*

T. Whitehead, *Presiding*

**2:00 BIOT 128.** Engineering a GPCR for biophysical analysis of oligomer interactions. N.S. Schonenbach, J. Yoo, A.M. Duran, M.D. Riehl, J. Meiler, S. Han, M.A. O'Malley

**2:20 BIOT 129.** Withdrawn.

**2:40 BIOT 130.** Saturation mutagenesis panning libraries enable activity and specificity modulation of Microcin J25. S. Ritter, Y. Kaznessis

**3:00 BIOT 131.** Design and analysis of bioengineered models of Alzheimer's disease. L.M. Walker, J.B. Leach

**3:20** Intermission.

**3:40 BIOT 132.** Characterization of knobs-into-holes antibody assembly variants reveals structural plasticity in IgG Fc structure. V. Lundin, H. Zhang, A. Estevez, X. Guo, K. Lin, K. Tschudi, K. Catherman, F. Hermann, J. Quang, K. Aurori, J. Giulianotti, M. Bhaumik, A. Ladiwala, H. Liu, J. Zhang, C. Ciferri, J. Shimoni-Zhu

**4:00 BIOT 133.** Effect of protein-stabilizer microheterogeneity on long-term stability in solid-state biopharmaceutical formulations. S.H. Koshari, K. Rajagopal, I.E. Zarraga, Y. Liu, N.J. Wagner, A.M. Lenhoff

**4:20 BIOT 134.** Process linkage experiments to support the design space of a biopharmaceutical manufacturing process. N.L. McKnight, K. Lazzareschi, R. St. John, B.D. Kelley

**4:40 BIOT 135.** Effective virus clearance using strong anion exchange bind/elute chromatography. M. Garcia, R. Specht

Telegraph Hill

### Bio-Based Products

#### Facility Enabled Opportunities

C. A. Eckert, G. Sriram, *Organizers*

M. R. Antoniewicz, *Organizer, Presiding*

Y. Yoshikuni, *Presiding*

**2:00 BIOT 136.** Opportunities for facility-enabled science at the DOE Joint Genome Institute (JGI). Y. Yoshikuni

**2:20 BIOT 137.** DOE Environmental Molecular Sciences Laboratory: Accelerating biological research for biobased product production. J. Evans, S.E. Baker

**2:40 BIOT 138.** Genomic and transcriptomic analysis of *Rhodospiridium toruloides* producing biofuels from depolymerized polysaccharides and lignin. J. Kim, Y. Junko, M. Reilly, B.A. Simmons, J.K. Magnuson, J.M. Skerker, J.M. Gladden

**3:00 BIOT 139.** Parts list for fungal cellulosomes revealed by proteomics and comparative genomics. S. Gilmore, C.H. Haitjema, J. Henske, K. Solomon, R. de Groot, A. Kuo, S.J. Mondo, A.A. Salamov, K. LaButti, H.M. Brewer, S.O. Purvine, A.T. Wright, S.E. Baker, I.V. Grigoriev, M.A. O'Malley

**3:20** Intermission.

**3:40 BIOT 140.** Comparison of base-catalyzed depolymerization of lignin sourced from multiple biochemical conversion processes, biomass sources, and feedstock processing processes. R. Katahira, X. Chen, E.M. Kuhn, M.P. Tucker, G. Beckham, A.E. Ray, N. Nagle

**4:00 BIOT 141.** Exploring the functional landscape of aldehyde dehydrogenase activity throughout the ferritin superfamily. J.B. Siegel

**4:20 BIOT 142.** Biocatalysis with flavin-dependent halogenases for selective C-H functionalization. M. Andorfer, J.C. Lewis

**4:40 BIOT 143.** Urease Crosslinked Enzyme Lyophilizates (CLELs) streamlining conventional organic syntheses. T. Akkas, A. Zakharyuta

## Section E

InterContinental San Francisco  
InterContinental B

### Startup Road

#### Diagnostics, Devices, New Therapeutic Modalities & Personalized Medicine

G. Bolton, A. May, T. Meyerrose, *Organizers*

S. Flaim, S. Gallant, L. Lu, *Presiding*

**2:00 BIOT 144.** SimpleScan platform for rapid, quantitative, multiplexed and fully automated protein assays for pharma and diagnostic applications. K. Araz, S. Tia, A. Apori

**2:20 BIOT 145.** Host-response biomarkers: A disease-defining diagnostic for sepsis. T.E. Sweeney, P. Khatri

**2:40 BIOT 146.** Utilizing the skin microbiome for UV protection- Can a startup do it? N. Qvit-Raz

**3:00 BIOT 147.** Advanced glycation end products as predictors of diabetic complications. P.J. Beisswenger

**3:20** Intermission.

**3:40 BIOT 148.** Xip: From idea to impact in IVD. O. Florescu, T. Siegel

**4:00** Panel Discussion.

#### Science for a Sustainable Energy Future

#### Chemical & Biological Conversions Approaches to Energy Conversion

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, IMEDI, MPPG±, ORGN and PROF*

### Section A

Moscone Center

Hall D

#### Sci-Mix

M. A. O'Malley, V. Roy, *Organizers*

**8:00 - 10:00**

**237, 239, 249-250, 264, 273, 279, 297, 305, 312, 326, 334, 346, 349, 352, 364, 378, 385, 390, 392, 480, 581.** See subsequent listings.

## TUESDAY MORNING

### Section A

InterContinental San Francisco  
Grand Ballroom A

#### Upstream Processes

#### Microbial & Non-Model Hosts: Strain Engineering & Process Development

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*

K. Solomon, K. Veeravalli, *Presiding*

**8:30 BIOT 149.** Developing the thermotolerant yeast *Kluyveromyces marxianus* as a microbial host for volatile ester biosynthesis. A. Loebis, R. Engel, C. Schwartz, I.R. Wheeldon

**8:50 BIOT 150.** Extremely thermophilic organisms for efficient glucose and xylose fermentations. M.R. Antoniewicz

**9:10 BIOT 151.** Improved production of biochemicals and biofuels with reduced CO2 emissions. S. Jones, B.P. Tracy, J.R. Phillip, P.C. Munasinghe

**9:30 BIOT 152.** Retroelements for continuous evolution. A.J. Simon, A.T. Tucker, B.W. Davies, A.D. Ellington

**9:50** Intermission.

**10:10 BIOT 153.** Sugar sensors and transporters in biomass-degrading anaerobic fungi. S. Seppala, I. Podolsky, J. Yoo, D. Yur, M.A. O'Malley

**10:30 BIOT 154.** Enabling glucose-xylose co-utilization in yeast through expression of xylose-specific transporters. M. Gao, M. Cao, Q. Su, Z. Shao

**10:50 BIOT 155.** Engineering photosynthetic production of L-lysine. T. Korosh, A.L. Markley, R. Clark, B. Pfleger

**11:10 BIOT 156.** Development of a general defined media for *Pichia pastoris* protein expression. M. Bartlett, K.R. Love, J. Clark, A. Kuo, A. Roberts, J.C. Love

## Section B

InterContinental San Francisco  
InterContinental C

## Downstream Processes

## Antibodies, Drug Conjugates &amp; Novel Formats

R. Barros, V. Natarajan, N. Tugcu, *Organizers*

A. Ladiwala, M. A. Rito Palomares, N. Sanaie, *Presiding*

**8:30 BIOT 157.** Process control to minimize product related conjugation variants in the manufacture of ADCs. D. Olson, R. Hendricks, M. Hutchinson, R.L. Beardslay

**8:50 BIOT 158.** Mechanistic model of excipient exchange during protein UF/DF. J. Ladwig, R. Hart

**9:10 BIOT 159.** Downstream process development and scale-up for *Streptovorticillum* transglutaminase expressed in *E.coli*, and its application to enable site-specific conjugation in ADC production. S. Chen, W. Wellborn, J. Cundy, B. Chen, E. Barr, L. Determan, B. Nolting, J. Martin

**9:30 BIOT 160.** Mechanism and application of dextran sulfate in protein A affinity chromatography to achieve improved HCP and DNA clearance for biologics purification. C. Huang, J. Angelo, X. Xu, Z. Li

**9:50** Intermission.

**10:10 BIOT 161.** Thermo-separating polymer-based aqueous two-phase systems for the fractionation and recovery of PEGylated lysozyme species. G. Hernández-Vargas, M. González-González, M.A. Rito Palomares, J. González-Valdez

**10:30 BIOT 162.** High viscosity tangential flow filtration applications: The impact of feed channel screen on process performance, high concentration capability, and membrane re-use. D. Kinzmaier, E.M. Goodrich

**10:50 BIOT 163.** Downstream process development considerations to address polysorbate degradation in drug substance formulation. Y. Yizgaw, A. Morris, M. Sawant, J. Gu

**11:10 BIOT 164.** Continuous in line flocculation, new opportunities for primary separation and economic impact. P. Satzer, D. Burgstaller, W. Krepper, A. Cataldo, J. Haas, M. Maszelin, J. Mohoric, K. Pajnic, A. Jungbauer

## Section C

InterContinental San Francisco  
Union Square

## Biophysical &amp; Biomolecular Processes

## Prediction &amp; Characterization of Biophysical Properties

J. Moore, J. A. Van Deventer, *Organizers*

S. Kumar, P. Tamamis, *Presiding*

**8:30 BIOT 165.** Structure of concentrated antibody solutions in the presence of weak self-association. D. Corbett, C. Avendaño, M. Hebditch, C. van der Walle, S. Uddin, R. Curtis

**8:50 BIOT 166.** Effects of thermal-stress and glycan-removal on structural integrity of a human IgG1 antibody: Insights from extended molecular dynamics simulations. D. Tomar, S. Kumar, S. Singh

**9:10 BIOT 167.** Towards predictive models of antibody biophysical properties and aggregation. G. Ferreira, H. Samra, R.L. Remmele, C.J. Roberts

**9:30 BIOT 168.** Semiempirical and quantum chemical prediction of ATP affinities and non-covalent binding to P-loops of proteins. J.H. Rodriguez

**9:50** Intermission.

**10:10 BIOT 169.** Signaling protein diffusion and accurate molecular weight based estimations of biomolecule dynamics. C.J. Fennell, N. Ghousilam, H. Gappa-Fahlenkamp

**10:30 BIOT 170.** Withdrawn.

**10:50 BIOT 171.** Time-resolved anisotropy measurements of single, non-tethered tau proteins in solution. A. Foote, L. Manger, R.H. Goldsmith, M.R. Holden, M. Margittai

**11:10 BIOT 172.** Recent advances in affinity maturation with the ADAPT platform. T. Sulea, C.R. Corbell, E.O. Purisima

## Section D

InterContinental San Francisco  
Telegraph Hill

## Bio-Based Products

## Synthetic Biology &amp; Metabolic Engineering using Omics Based Approaches

M. R. Antoniewicz, C. A. Eckert, G. Sriram, *Organizers*

J. L. Avalos, T. Lee, *Presiding*

**8:30 BIOT 173.** Reverse engineering of short-chain fatty acid tolerance and production in *E.coli*. Y. Chen, E. Boggess, J. Shanks, T. Mansell, J. Dickerson, L.R. Jarboe

**8:50 BIOT 174.** Production of acyl esters and its analogues from microbes. W. Kim, Z. Guo, O. Zelder, G.V. Abendorth

**9:10 BIOT 175.** Designing aptazyme-based biosensor delay control systems to minimize expression-associated stresses in engineered biosynthetic pathways. J. Stevens, J.M. Carothers

**9:30 BIOT 176.** Characterizing *in vivo* isopentenyl diphosphate (IPP) toxicity in isoprenol-producing *E. coli*. K.W. George, M. Thompson, J. Kim, E. Baidoo, C.J. Petzold, J.D. Keasling, T. Lee

**9:50** Intermission.

**10:10 BIOT 177.** Evolution of biomass-degrading anaerobic consortia revealed by metagenomics. X. Peng, S. Gilmore, J. Henske, C. Swift, M. Theodorou, D.L. Valentine, M.A. O'Malley

**10:30 BIOT 178.** Flux coupling analysis for studying the dependencies and degrees of freedom in thermodynamically constrained metabolic network models. Z. Hosseini, M. Ataman, N. Hadadi, V. Hatzimanikatis

**10:50 BIOT 179.** Omics-enabled discovery of a novel bacterial enzyme, phenylacetate decarboxylase, enabling bio-based toluene production. H.R. Beller, A. Rodrigues, K. Zargar, A. Saini, S. Tringe, J.D. Keasling, C.J. Petzold

**11:10 BIOT 180.** Bio-based products: Synthetic biology approaches to engineer production of biofuels & value-added chemicals. C.J. Harvey, M. Teng, J. Horecka, U. Schlecht, C. Fischer, M. Miranda, J. Cherry, R. Davis, R. St. Onge, Y. Tang, M. Hillenmeyer

## Section E

InterContinental San Francisco  
InterContinental B

## Downstream Processes

## Automated Technologies &amp; High Throughput Systems in Biologics Production

R. Barros, V. Natarajan, N. Tugcu, *Organizers*

M. Ottens, J. Pollard, *Presiding*

**8:30 BIOT 181.** Overcoming limitations of high throughput scale chromatography columns to facilitate the evaluation of extended resin lifetime. C. Andersen, G. Bolton, H. Hoang

**8:50 BIOT 182.** High throughput process development application in the DoE study of insulin analog capture step. S. Liao, D. Wu, B. Wang

**9:10 BIOT 183.** Integration of downstream platform development into a single 96-well filter plate for ultra-rapid process definition. R. Gillespie, M. McClure, S. Freeman, L. Connell-Crowley

**9:30 BIOT 184.** Development of a high-throughput microscale cell disruption platform for *Pichia pastoris* in rapid fermentation process design. B. Blaha, T. Mukhopadhyay

**9:50** Intermission.

**10:10 BIOT 185.** Miniaturized techniques for high throughput biopurification process development. M. Ottens

**10:30 BIOT 186.** Rapid determination of partition coefficients of biomolecules in a microfluidic ATPS platform using fluorescence microscopy. R. Aires-Barros, D. Silva, A. Azevedo, P. Fernandes, V. Chu, J. Conde

**10:50 BIOT 187.** Utilizing fluidized bed resin tips for high-throughput clarification and capture. M. Rauscher, J. Pollard, J.P. Welsh, M. Manahan, N. Tugcu

**11:10 BIOT 188.** Integrated precipitation and periodic counter-current chromatography process. S. Grosshans, G. Wang, P. Baumann, J. Hubbuch

## Section F

InterContinental San Francisco  
Sutter

## Emerging Technologies

## New Tools &amp; Approaches: Molecular &amp; Biochemical Technologies

Y. Y. Chen, Y. Kim, L. Morsut, J. P. Pieracci, *Organizers*

L. Morsut, S. Ozturk, *Presiding*

**8:30 BIOT 189.** Rational design and study of polysialic acid-binding peptides. D. Shastry, P. Karande

**8:50 BIOT 190.** Enhancing the chemical versatility and throughput of yeast display. H.P. Kehoe, C.E. Ghadban, J.T. Stieglitz, L.B. Quinto, J.B. Lissos, J.A. Van Deventer

**9:10 BIOT 191.** Rewiring genome structure with programmable CRISPR-Cas tools to physically reposition genes. J. Zalatan

**9:30 BIOT 192.** Controlled protein degradation for the conditional survival of cancer suicide enzymes. A. Gaynor, W. Chen

**9:50** Intermission.

**10:10 BIOT 193.** High throughput analysis of the antibody specificity repertoire for antigen identification and diagnostic applications. J. Bozekowski, M.L. Paull, P. Daugherty

**10:30 BIOT 194.** Covalent trapping reveal that phosphorylated EGFR oligomers activate Ras more potently than dimers. Z. Gartner, S. Liang, D. Patterson

**10:50 BIOT 195.** Accelerated biomolecular kinetics revealed by microdroplet fusion mass spectrometry. J. Lee, H. Nam, R.N. Zare

**11:10 BIOT 196.** Highly sensitive and selective peptide-based fluorescent probe for Endoplasmic Reticulum Aminopeptidase Associated with Antigen Processing (ERAAP). J. Zhang, S. Yang, F. Gonzalez, N. Shastri, N. Murthy

## Section G

InterContinental San Francisco  
Grand Ballroom B/C

## W. H. Peterson Awards &amp; BIOT Young Investigator Award

M. A. O'Malley, T. M. Przybycien, V. Roy, *Organizers, Presiding*

**11:30 BIOT 197.** Repurposing ribosomes for synthetic biology. M.C. Jewett

## Cellulose Structure &amp; Biosynthesis

## Biochemistry &amp; Cellular Biology

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## Kathryn C. Hach Award for Entrepreneurial Success: Symposium in honor of David R. Walt

*Sponsored by ANYL, Cosponsored by BIOT*

## TUESDAY AFTERNOON

## Section A

InterContinental San Francisco  
Grand Ballroom A

## Upstream Processes

## Metabolic Engineering &amp; Synthetic Biology

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*  
J. Latone, T. J. Mansell, *Presiding*

**2:00 BIOT 198.** Engineering and modeling of a modular, motility-based biosensor system in *Escherichia coli*. J. Ravichandar, A. Bower, A. Julius, C.H. Collins

**2:20 BIOT 199.** Development and demonstration of a robust and scalable two-stage fermentation system for enhanced bioproduction. Z. Ye, M. Lynch

**2:40 BIOT 200.** Exploring chemodiversity in metabolism towards the integration of chemistry into biology. J. Hafner, N. Hadadi, V. Hatzimanikatis

**3:00 BIOT 201.** Metabolic engineering of bacteria for production of oleochemicals. N. Hernandez, M.J. Grisewood, C. Maranas, B. Pfeleger

**3:20** Intermission.

**3:40 BIOT 202.** Metabolic flux analysis of transgenic *E. coli* BL21(DE3) producing a non-specific antivenom. I. Sawaya, C.F. Komives

**4:00 BIOT 203.** Genetic system for regulatory sRNA retargeting and scaffold optimization: Metabolic engineering applications. **R.A. Lease,** A. Lahiry, S.D. Stimple, D.W. Wood

**4:20 BIOT 204.** Systems biology approaches for engineering microbial biocatalysts. **J. Reed**

## Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Antibodies, Drug Conjugates & Novel Formats

R. Barros, V. Natarajan, N. Tugcu, *Organizers*

A. Ladiwala, M. A. Rito Palomares, N. Sanaie, *Presiding*

**2:00 BIOT 205.** Development of adsorptive hybrid filters to enable two-step purification of biologics. **A. Arunkumar,** N. Singh, M. Peck, A. Voloshin

**2:20 BIOT 206.** Process development for the enzyme-mediated manufacture of site-specific ADCs for early clinical trials. **B. Notting**

**2:40 BIOT 207.** Optimization of process parameters for viral filtration of therapeutic monoclonal antibodies. **H. Tjandra,** R. Zolyomi, G. Prakash, D. Surendar, K. Shill, Y. Chang, X. Pan, T. Luong, A. Hesselein

**3:00 BIOT 208.** Innovative Hydrophobic Interaction Chromatography (HIC) resins for next generation molecule challenges. **O. Terova**

**3:20 Intermission.**

**3:40 BIOT 209.** High resolution experimental design to study antibody-drug conjugation process robustness. **B. Sackett,** T. Peram, J. Franklin

**4:00 BIOT 210.** Direct demonstration of scalability of virus removal filter performance. **B. Buesing,** D. Strauss, A.H. Schwartz, T. Miyabayashi, N. Hirotoami

**4:20 BIOT 211.** Platform approach to purification of albumin-fusion proteins. **T.M. Pabst,** C. Thompson, M. Fonseca, A.K. Hunter, X. Wang, L. Tie

**4:40 BIOT 212.** Protein A chromatography as capture step for antibody fragments: Mechanism of interaction and case study. **G. Platteau,** G. Ströhlein, B. Van der Jeugt, G. Lissens, V. Gasparianaitė, S. Muylderms, C. Vincke, Y. Sterckx

## Section C

InterContinental San Francisco  
Union Square

### Biophysical & Biomolecular Processes

#### Protein Interactions & Interfaces

J. Moore, J. A. Van Deventer, *Organizers*

S. Kumar, P. Tamamis, *Presiding*

**2:00 BIOT 213.** Toolbox of experimental and *in silico* methods to predict protein long-term stability. **M. Schermeyer,** P. Baumann, J. Hubbuch

**2:20 BIOT 214.** Predicting the structure and orientation of adsorbed peptides with molecular simulations. **K. Sprenger,** T. Weidner, F. Baneyx, J. Pfaendtner

**2:40 BIOT 215.** Coupling experiment and modeling to understand peptide capture agent specificity for similar protein targets. **D.A. Sarkes,** M. Hurley, D.N. Stratis-Cullum

**3:00 BIOT 216.** Aggregation kinetics for IgG1-based monoclonal antibody therapeutics. **R. Bansal,** A. Singla, V. Joshi, A.S. Rathore

**3:20 Intermission.**

**3:40 BIOT 217.** Extractables studies on single-use components in the manufacture of Antibody Drug Conjugates (ADCs). **K. Isaksson,** S. Burke, A. Graanberg, F. Lundstrom

**4:00 BIOT 218.** Site-selective approach for DNA directed immobilization of enzymes via oxidative coupling. **T. Hurlburt,** K. Palla, M.B. Francis, G.A. Somorjai

**4:20 BIOT 219.** Noncovalent modulation of protein energy landscapes with an emerging class of cyclic-peptide chaperones. **D.N. Bunck,** B. Atsavaprannee, K. Museth, J.R. Heath

**4:40 BIOT 220.** Enzyme-Polymer conjugates. Improving the activity of cellulase for biofuel applications. **D. Konkolewicz,** R.C. Page, M. Lucius, T. Wright, H. Fischesser, J. Shepherd, J. Stewart

## Section D

InterContinental San Francisco  
Telegraph Hill

### Bio-Based Products

#### Synthesis in Space

M. R. Antoniewicz, C. A. Eckert, G. Sriram, *Organizers*

M. A. Blenner, M. Roberts, *Presiding*

**2:00 BIOT 221.** Bio-based synthesis on the International Space Station U.S. National Lab. **M. Roberts**

**2:20 BIOT 222.** Materials processing on the International Space Station and enabling long-term industry access to low Earth orbit. **J.A. Robinson,** K. Costello

**2:40 BIOT 223.** Microgravity biologics crystallization processes. **P. Reichert**

**3:00 BIOT 224.** X-ray and neutron crystallographic structures of inorganic pyrophosphatase determined from microgravity-grown crystals. **J.D. Ng,** J.M. Garcia-Ruiz

**3:20 Intermission.**

**3:40 BIOT 225.** Methane metabolism by yeast for solar system exploration. **A. Rahman,** M.J. Dougherty, J.A. Hogan, **J.M. Galazka**

**4:00 BIOT 226.** Synthetic biology for recycling human waste into nutraceuticals and materials. **D. Gao,** M. Spagnuolo, G. Rodriguez, M. Brabender, K. Scola, **M.A. Blenner**

**4:20 BIOT 227.** Engineering cyanobacteria for the conversion of CO<sub>2</sub> to lightweight materials. **F. Zhang,** S. Rommelfanger, Y. Xiao

**4:40 Panel Discussion.**

## Section E

InterContinental San Francisco  
Sutter

### Emerging Technologies

#### Precision Medicine: Biomarkers & Targeted Therapeutics

Y. Y. Chen, B. Hackel, Y. Kim, J. P. Pieracci, *Organizers*

D. Liu, C. Pirie, *Presiding*

**2:00 BIOT 228.** Designing targeted therapeutics to interrogate intracellular tumor antigens. **P. Ho,** C. Ede, Y.Y. Chen

**2:20 BIOT 229.** Prodrug activation controlled by Boolean logic-gated nucleic acid strand displacement inside live cancer cells. **R.P. Chen,** W. Chen

**2:40 BIOT 230.** MicroRNA-Triggered dCas9 binding to a molecular beacon for cancer detection. **L. Dorsey,** R.P. Chen, W. Chen

**3:00 BIOT 231.** Raman molecular urinalysis. **R.S. Senger,** J. Robertson

**3:20 Intermission.**

**3:40 BIOT 232.** Volatile organic compounds in breath associated with hypoglycemia in type 1 diabetes. **A. Siegel,** A. Daneshkhalah, D.S. Hardin, K. Varshramyan, M. Agarwal

**4:00 BIOT 233.** Human *in vivo* nanoparticle protein corona in ovarian carcinoma patients: A novel tool for biomarker discovery. **M. Hadjidemetriou,** K. Kostarelou

**4:20 BIOT 234.** Rotaxane probes for applications in molecular detection with Xe hyperCEST NMR. **J. Finbloom,** C.C. Slack, C.J. Bruns, K. Jeong, D.E. Wemmer, A. Pines, M.B. Francis

**4:40 BIOT 235.** Regulating immune tolerance using quantum dots to track and control the density of self-antigen display. **K.L. Hess,** E. Oh, I. Medintz, **C. Jewell**

## TUESDAY EVENING

### Section A

Moscone Center  
West Hall

#### Poster Session

N. U. Nair, K. Solomon, *Organizers*

**6:00 - 8:00**

**BIOT 236.** *In vitro* evaluation of folic acid-conjugated redox-responsive mesoporous silica nanoparticles for the delivery of cisplatin. **M.P. Alvarez,** J.L. Vivero-Escoto

**BIOT 237.** Nonviral genome editing based on a CRISPR nanocomplex for target-specific treatment of multidrug-resistant bacterial infections. **Y. Kang,** H. Chung

**BIOT 238.** New effective washing step in protein A purification. **O. Jensen,** P. Kærsgaard

**BIOT 239.** Characterization and kinetics of fragmentation in IgG1 based monoclonal antibody products. **R. Bansal,** S. R., N. Chhabra, A.S. Rathore

**BIOT 240.** Bioinspired dual-cross-linked tough protein hydrogel as a catalytic matrix for CO<sub>2</sub> sequestration. **C. Kim,** Y. Yang, H.J. Cha

**BIOT 241.** Optimizing expression of tissue-type plasminogen activator in *E.coli*. **O. Vega,** V. Torres Irizarry, V. Rodriguez Torres, S. Chattopadhyay, **V. Bansal**

**BIOT 242.** siRNA Delivery with hybrid collagen/cell penetrating peptide carriers. **A. Gamboa,** K. Slowinska

**BIOT 243.** Investigating and understanding process improvements for transient production of virus like particles in HEK 293 cells. **D.J. Blackstock,** P. Chen, P. Biswas, J. Horwitz, R. Schwartz

**BIOT 244.** Cytotoxicity and acute toxicity studies of imidazolium-based ionic liquids. **W. Han,** Q. Chang, L. Li, B. Zhong, K. Yeung

**BIOT 245.** Production of jet fuel precursor monoterpenoids from engineered *Escherichia coli*. **D. Mendez-Perez,** J. Alonso-Gutierrez, Q. Hu, M. Molinas, E. Baidoo, G. Wang, L. Chan, C.J. Petzold, P.D. Adams, J.D. Keasling, T. Lee

**BIOT 246.** Impact of feed composition on protein A chromatography lifetime and residual foulants. **D.G. Bracewell,** K. Lintern, M. Pathak, A.S. Rathore

**BIOT 247.** Conversion of biomass to value-added bioproducts by enzyme nanoassemblies. **C. Lee,** R. Kibblewhite, K.C. Wagschal

**BIOT 248.** Enhanced galactosylation of a monoclonal antibody. **R. Anderson,** L. Hock, **S. Ozturk,** J. Yan

**BIOT 249.** Silica shell/adhesive composite film for color Doppler ultrasound guided needle placement. **T. Sung,** J. Yang, J. Wang, E. Ward, N. Mendez, C. Barback, S. Blair, A. Kummel, W.C. Trogler

**BIOT 250.** Investigation into thermodynamic binding mechanisms of protein-ligand interactions in MM chromatography using surface plasmon resonance. **R.B. Gudhka,** S. Ranjan, S. Banerjee, S.M. Cramer

**BIOT 251.** Achieving desired monoclonal antibody product quality attributes through cell culture process manipulations. **M. Leith,** A. Chen

**BIOT 252.** Coarse grained model development of enzymatic lignocellulosic biomass degradation by fungal cellulosomes. **S. Wilken,** M.A. O'Malley

**BIOT 253.** Defining important protein surface property clusters to predict retention in multimodal chromatography systems. **J. Robinson,** C. Blodeau, S.M. Cramer

**BIOT 254.** Withdrawn.

**BIOT 255.** mAb Aggregate removal using flow through chromatography on fractogel. **M. Dillingham,** O. Jensen, N. Laroudie

**BIOT 256.** Enzymatic synthesis of DNA-RNA nanoparticles for efficient siRNA delivery. **L. Jae Sung,** J. Lee, **D. Kim**

**BIOT 257.** Rapid, integrated purification process development for non-mAb biologics with variant challenges. **C. Goodwine,** S. Timmick, N. Vecchiarello, S.M. Cramer

**BIOT 258.** Identifying and characterizing the secondary metabolites of anaerobic fungi. **C. Swift,** M.A. O'Malley, K. Louie, **T. Northern**

**BIOT 259.** *In silico* process design tool for rapid identification of orthogonally selective multimodal chromatographic materials for HCP removal. **N. Vecchiarello,** S. Timmick, C. Goodwine, S.M. Cramer

**BIOT 260.** Developing computational tools for understanding and predicting protein retention behavior in multimodal chromatographic systems. **C. Blodeau,** S. Banerjee, S. Garde, S.M. Cramer

†Cooperative Cosponsorship

- BIOT 261.** Process analytical technology for the rapid quantitation of underivatized amino acids in bioreactor media by mass spectrometry. **D.N. Powers, C. Agarabi**
- BIOT 262.** Feasibility of formulating a highly concentrated monoclonal antibody (mAb) into a buffer-free solution using tangential flow filtration (TFF). **W. Chang, D. Chen, D. Laikijung, X. Xin**
- BIOT 263.** Co-expression of Bacterial Microcompartment (BMC) shell proteins shield toxicity of lysis protein E from bacteriophage  $\Phi$ X174 during recombinant expression in *E. coli*. **M.C. Yung, F. Bourguet, T. Carpenter, M. Coleman**
- BIOT 264.** Mycoplasma clearance and risk analysis in a model bioprocess. **J. Wang, M. Brown, A. Dabrazhynetskaya, V. Chizhikov, K.A. Brorson**
- BIOT 265.** Robust viral clearance on virus removal filters using a targeted virus spiking approach. **E. Vyas, N. Takahashi, M. Burnham, P. Nemitz, D. Strauss, N. Hiroto**
- BIOT 266.** Combinatorial strategies for optimizing polyketide production in *Saccharomyces cerevisiae*. **T. McTaggart, N.A. Da Silva**
- BIOT 267.** Combinatorial engineering of the mevalonic acid pathway for optimization of valerenol-1,10-diene production. **J. Tran, J. Lamberts, S.P. McCormick, E. Nybo**
- BIOT 268.** Combinatorial enzymatic synthesis of lipid A analogs. **K. Sankar, C. Khosla**
- BIOT 269.** Liposome-based co-delivery of paclitaxel and docetaxel enhances oxidative stress in MCF-7 breast cancer cells. **V. Geraldo, I.M. Paino, F.L. Maccari, M. Scarpa, V. Zucchetto, O.N. Oliveira**
- BIOT 270.** Evaluation of single-use technologies for the primary clarification of pre-treated bacterial harvest feedstreams. **F. DiGennaro**
- BIOT 271.** High throughput solubility screening for developability assessment during therapeutic antibody discovery. **Q. Chai, J.J. Shih**
- BIOT 272.** Integration of near-IR spectroscopy in to bench-scale bioreactors. **B. Chavez, S. Velugula, N. Trunfio, C. Agarabi, K.A. Brorson**
- BIOT 273.** Tracking single quantum dots to unravel membrane diffusion dynamics of the ADHD/autism/bipolar disorder-associated Ala559Val dopamine transporter coding variant. **L.B. Thal, I.D. Tomlinson, R.D. Blakely, S.J. Rosenthal**
- BIOT 274.** Detection of LAMP amplified Amelogenin gene using a binary deoxyribozyme sensor. **A. Smith**
- BIOT 275.** Optimization of protein A chromatography process for a Herceptin® biosimilar (trastuzumab). **A. Naresh, C. Caroselli, W. Dendamrongvit, C. Yonan, D. Bailey, M. Siwak**
- BIOT 276.** Mussel-inspired water-proof protein glue for treatment of urinary fistula. **H. Kim, H.J. Cha**
- BIOT 277.** Surface adhesion to cohesion switched by dopa-Fe<sup>3+</sup> complexation in response to microenvironment at the mussel plaque-substrate interface. **B. Yang, C. Lim, D. Hwang, H.J. Cha**
- BIOT 278.** Engineered zinc finger proteins immobilized on beads as a novel diagnostic application for detection of pathogen-specific DNA sequences. **B. Kim, D. Kim, M. Kim**
- BIOT 279.** Development of a synthetic metabolic engineering tool for the yeast *Yarrowia lipolytica*. **K. Frogue, C. Schwartz, M. Shabbir-Hussain, M.A. Blenner, I.R. Wheeldon**
- BIOT 280.** High-yield & high-speed biohydrogen production from starch and water via in vitro synthetic enzymatic pathways. **J. Kim, Y. Zhang**
- BIOT 281.** Implementing single-use assemblies: Design qualification testing & implications. **A. Steele**
- BIOT 282.** Structure-function studies of the *Thermodesulfobacterium yellowstonii* ADP-Glucose Pyrophosphorylase. **E. Yik, S. Kaur, E. Pushkarev, E. Mercado, M. Collazo, D. Cascio, H. Axelrod, C.R. Meyer**
- BIOT 283.** Engineering characterization and cultivation of fast growing plant suspension cells using the ReadyToProcess WAVE™ 25 bioreactor system. **A. Castan, S. Werner, M. Stalder, D. Eibl, R. Eibl**
- BIOT 284.** Case study: Impact of polishing step sequence order on the manufacturing of therapeutic monoclonal antibodies. **D. Surendar, X. Pan, H. Tjandra, A. Hesslein**
- BIOT 285.** Investigation of barrier technologies for clearance of mycoplasma in bioprocess solutions. **S. Johnson, S. Lute, M. Brown, S. Dolan, C. Breuning, K.A. Brorson**
- BIOT 286.** Secretion of functional formate dehydrogenase in *Pichia pastoris*. **M.P. Takacs, O.V. Makhlynets, P.L. Tolbert, I.V. Korendovych**
- BIOT 287.** Monitoring directed evolution of enzymes with Raman spectroscopy. **A. Fisher, D.R. Bevan, R.S. Senger**
- BIOT 288.** Withdrawn.
- BIOT 289.** Recent advances in RNA centric tools that detect, visualize, and covalently modify specific RNAs in fixed and living tissues. **S.C. Alexander, N.K. Devaraj**
- BIOT 290.** Characterization of chinese hamster ovary host cell protein interactions with monoclonal antibody by yeast surface display. **C. McGovern, K.M. Doolan**
- BIOT 291.** Screening and partial characterization of moderate halophilic hydrolases with good stability in organic solvents. **E. Fasoli, M. Matar Abed, J.J. Sanchez, S. Toro, I. Rivera, A. Miranda**
- BIOT 292.** Exploring protein-excipient interactions via on-column screening and complementary methods. **R. Pirnie, M.E. Krause, M. Ogunyankin, F. Rinaldi, S. Patke, A.S. Narang, M.L. Adams, R.B. Gandhi**
- BIOT 293.** Role of metals in crosslinking of virus-like particles. **E. Wen, J. Konietzko, J.G. Joyce, M. Kosinski**
- BIOT 294.** Clone selection and process development for recombinant HIV trimers. **P. Chen**
- BIOT 295.** Investigating the effect of oxidation of granulocyte colony stimulating factor on biological activity using experimental and computational approach. **S. Singh, A. Mishra, D. Kumar, A.S. Rathore**
- BIOT 296.** Assessing analytical comparability of biosimilars: GCSF as a case study. **N. Nupur, S. Singh, G. Narula, A.S. Rathore**
- BIOT 297.** Electrical stimulation of human dermal fibroblasts and quantification of collagen, collagenase, and elastin with morphology studies. **E. Nguyen, K. Columna, J. Wishner, K. Slowinska**
- BIOT 298.** Electrospinning of bio-based polyurethane and its drug delivery properties. **H. Lv, D. Tang, L. Zhang**
- BIOT 299.** Metabolic engineering of *Corynebacterium glutamicum* for the production of D-lactate and ethyl lactate from corn stover hydrolysates. **A. Varman, J.M. Gladden, R.W. Davis**
- BIOT 300.** Position-Dependent screening of luminescence in flotation immunoassay. **H. Chen, A. Hagstrom, J. Kim, G. Garvey, A. Paterson, F. Ruiz-Ruiz, B. Raja, U. Strych, M.A. Rito Palomares, K. Kourentzi, J. Conrad, R. Atmar, R.C. Willson**
- BIOT 301.** Characterization of mAb HMW and monomer species to enhance downstream process development. **H.R. Doss, A. Shupe, R.K. Swanson, D. Wang, L. Chemmail**
- BIOT 302.** End-to-end-process: From genetic engineering to chemical valorization of unsaturated fatty acids from microalgae. **S. Hess, V. Goldbach, D. Ewe, S. Mecking, P. Kroth**
- BIOT 303.** Continuous processing of biotherapeutics through application of a novel Coiled Flow Inversion Reactor (CFIR). **N. Kateja, H. Agarwal, A.S. Rathore**
- BIOT 304.** Automated atom-mapped metabolic network reconstruction of *E. coli* from in silico labeled metabolites. **J. Hafner, N. Hadaadi, V. Hatzimanikatis**
- BIOT 305.** Multi-objective flux analysis software for the COBRA toolbox. **M. Griesemer, A. Navid**
- BIOT 306.** Silica nanostructured multilayer assembly using engineered mussel glue for accelerating bone growth on titanium implants. **Y. Jo, B. Choi, C. Kim, H.J. Cha**
- BIOT 307.** Design of experiments applications in bioprocessing: Chromatography process development. **L. Kanwar, A. Godara, V. Kumar, A.S. Rathore**
- BIOT 308.** Optimization of titer and quality of IgG antibody using high-throughput micro-bioreactor system for CHO cell media, supplements and anti-foam screening. **A. Williams, C. Hsu, S. Velugula, K.A. Brorson, C. Agarabi**
- BIOT 309.** Temporal and temperature-dependence on expression of Atrazine-degrading genes in *Pseudomonas* sp. ADP biofilms. **M.A. Delcau, T.L. Peeples**
- BIOT 310.** Integration of HTPD and general interpolation models to predict overloaded chromatographic behavior. **A. Creasy, G. Carta**
- BIOT 311.** Rational molecular tweaking of an IgG1 monoclonal antibody for improved high concentration solution properties. **K. Roffi, S. Kumar**
- BIOT 312.** Biodegradation of sulfamethoxazole in sewage and swine sludge. **C. Fan, B. Chang, L. Tsai**
- BIOT 313.** Engineering of microbial expression platform for antibodies fragments with scale-up process. **C. Fan**
- BIOT 314.** Solvent stability and synthetic applications of an esterase isolated from moderately halophilic microorganism. **S. Toro, M. Abed, J.J. Sanchez, A. Miranda, I. Rivera, E. Fasoli**
- BIOT 315.** Investigating C-terminal cleavage of amino acid residues in recombinant IgG produced in Chinese hamster ovary cells. **D. Ruble, B.A. Kelly, B. Evans, P. Slade**
- BIOT 316.** Evaluating implications of high-temperature short time treatment on media component solubility and cell culture performance. **N. Moore, E. Hodgman, C. Leung, J. Mullberg, E. Garr**
- BIOT 317.** Detection of small molecule via the application of VH and VL fragments of scFv: An example of bisphenol A sensing. **L. Yu-chun, C. Chi, C. Chao, Y. Li, H. Ueda**
- BIOT 318.** Probing the lysine proximal microenvironments within membrane protein complexes by active dimethyl labeling and mass spectrometry. **Y. Wu, Y. Zhou, F. Wang**
- BIOT 319.** High throughput screening under weak partitioning conditions to guide process development of monoclonal antibodies. **M. Aswath**
- BIOT 320.** High-throughput combinatorial differentiation screening of 3D human neural progenitor cells for enhanced neurogenesis on a microarray chip platform. **G.J. Nierode, B.C. Perea, S.K. McFarland, D.V. Schaffer, D.S. Clark, J.S. Dordick**
- BIOT 321.** Novel design of glutamine-derived polymer with a high affinity to cancer cells based on aberrant glutamine metabolism. **Y. Honda, N. Yamada, H. Takemoto, T. Nomoto, M. Matsui, K. Tomoda, N. Nishiyama**
- BIOT 322.** In vitro – in vivo liver toxicity correlations of 3D microculture and humanized liver mice. **D. Bruckner, M. Connerney, G. Monastersky, T. Little, J.S. Dordick**
- BIOT 323.** Molecular design of -sheet-forming self-assembled peptides as common amyloid inhibitors. **R. Hu, B. Ren, M. Zhang, H. Chen, J. Zheng**
- BIOT 324.** Process conditions that control cysteine/cystine associated product quality attributes. **J. Guthrie, E. Yu, A. Saati, L. Wafer, P.G. Slade**
- BIOT 325.** Optimization of cell culture media to increase cell specific productivity and suppress cell growth in perfusion cell culture. **L. Zheng, H. Lin, S. Wang**
- BIOT 326.** Self-assembled Iron Sulfide Supraparticles as Artificial Viruses. **E.S. Turalli-Emre, A.E. Emre, N. Kotov**
- BIOT 327.** Development of a two-step purification platform for *E. coli*-expressed Fab constructs. **W. Evans, A. Chakrabarti**
- BIOT 328.** Engineering EF-Tu to translate unnatural amino acids with broader applications in synthetic polymer synthesis. **V. Cox, E. Gaucher**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- BIOT 329.** Antimicrobial and anti-biofilm activities of extracted by supercritical fluid from *Moringa Oleifera* seed. **J. Park, Y. Kwon, C. Kim, Y. Kim, J. Lee, G. Gwon, J. Lee**
- BIOT 330.** Developing a simple and versatile platform for pathogen detection utilizing engineered DNA-binding proteins. **S. Alam, A. Brown, S. Chung, M. Chung, M. Kim**
- BIOT 331.** XDR-500 MO—single-use fermentor for microbial processes. **J. Vasi, A. Castan, S. Kristiansson**
- BIOT 332.** Control of glycation and deamidation of monoclonal antibodies by high-throughput screening via ambr250 technology. **M. Moynihan, N. DePrimo, P.J. Alfonso, J. Grey**
- BIOT 333.** Production of IL-24 and its receptors for structural studies. **C. Sonmez, J. Lubkowski, A. Wlodawer**
- BIOT 334.** Probing hGFAT1 activity through small-molecule inhibition, CRISPR and Cryo-EM: Identifying the downstream effects of O-GlcNAc modified proteins and their role in cancer cell survival. **L.A. Walter, Y. Lin, K.N. Chuh, F. Nasertorabi, R. Stevens, M. Pratt**
- BIOT 335.** Using metalloproteins as targets to develop antimicrobial agents. **Y. Chen, Z. Zhang, H. An**
- BIOT 336.** Engineering polyketide synthases for production of designer biofuels. **A. Zargar, R. Phelan, C.B. Bailey, L. Katz, J.D. Keasling**
- BIOT 337.** High throughput resin screening and development of polishing chromatography step for a recombinant therapeutic protein. **X. Pan, Y. Chang, J. Teare, H. Tjandra, A. Hesslein**
- BIOT 338.** Designed coculture for the production of metabolites from air, water and sunlight. **M.J. Smith, M.B. Francis**
- BIOT 339.** Long-term storage solution offering membrane stability and bioburden effectiveness for regenerated cellulose ultrafiltration membrane cassettes. **W. Cataldo, D. Aquino, M. Kozlov, D. DeCesaro, K. Souza, A. Bartlett**
- BIOT 340.** Evaluating the correlation between packing quality and process performance in protein A chromatography. **A. Becerra-Arteaga, J. Castano**
- BIOT 341.** Development and evaluation of synthetic 3D scaffolds for the maintenance of viability and function of hepatocytes. **J.A. Hoch Brown, P. Das, L. Tan, J.A. Wertheim**
- BIOT 342.** Effects of pore size on protein binding capacity of affinity membranes. **A. Santiago Ruiz, C. Ortiz Hernandez, R. Oyola Martinez, E. Fasoli, V. Bansal**
- BIOT 343.** Evaluation of the Virosart® media filter for application in upstream risk mitigation for adventitious agent contamination. **R. Alsop, C. Breuning, H. Aranha**
- BIOT 344.** Using multimodal chromatography: Developing an effective and robust purification process for a bispecific antibody. **E. Rosenberg, S. Willmann, S. Konrad, S. Hackl**
- BIOT 345.** Influenza virus capture using membrane chromatography: Improving selectivity by matrix design and pseudo-affinity ligand interactions. **H. Kaligotla**
- BIOT 346.** Chinese Hamster Ovary (CHO) cell specific high throughput multiplex glycosylation assay. **S. Gupta, C. Goudar, J. Piret**
- BIOT 347.** Modular approach of supramolecular complexation with chemically conjugated peptide building blocks. **E. Kang, Y. Kim**
- BIOT 348.** Continuous chromatography for polishing of biomacromolecules: A reliable alternative to traditional batch chromatography? **C. Wayne, A. Velayudhan**
- BIOT 349.** Directed evolution of CRISPR/Cpf1 for orthogonal PAM recognition. **Z. Abil, J. Gollihar, J. Ellefson, I. Finkelstein, A.D. Ellington**
- BIOT 350.** Facile affinity maturation of antibody variable domains via natural diversity mutagenesis. **K. Tiller, T. Li, R. Chowdhury, C. Maranas, P.M. Tessier**
- BIOT 351.** Application and strategy of leveraging prior knowledge to facilitate process validation activities. **S. Wong, K. Kaleas, M. Hutchinson, A. Kleinjans, A. White, J. Persson**
- BIOT 352.** Investigation of protein monomer-aggregate separations using multimodal chromatography. **L. Zhang, J. Chen, S.M. Cramer**
- BIOT 353.** Improvement of gamma-aminobutyric acid production by an overexpression of glutamate decarboxylase from *Pyrococcus horikoshii* in *Escherichia coli*. **S. Hong**
- BIOT 354.** Development of recA promoter based bisphenol-A sensing and adsorption system by recombinant *Escherichia coli*. **S. Hong**
- BIOT 355.** Increased salinity tolerance: Linked with the sodium transporter HKT1. **R. Nadipalli**
- BIOT 356.** Isoelectric chromatofocusing as an analogous technique to isoelectric capillary electrophoresis for preparation separation of monoclonal antibodies. **D. Choy, S. Sen, X. Zhang, S. Voronov, N. Chittoor**
- BIOT 357.** Effect of matrix on protein separation and capacity with multimode ligands. **B. Thiyagarajan, Q. Zhang, H. Li, B. Beyer, N. Deorkar**
- BIOT 358.** Identification and control of a unique glycosylation sensitivity in a bispecific immunoglobulin. **B. Shepard, C. Racicot, K. Chemfe, L. Zhou, A. Ibragimov, D. Serna, P. Hossler**
- BIOT 359.** Adapting single-use mixing solutions for high titer drug product formulation: A case study. **A. Sokolnicki**
- BIOT 360.** Fluorescent precipitation-based sensing of nucleic acid targets using carbon-dot nanoparticle for detecting multidrug-resistant bacteria. **H. Lee, J. Ryu, H. Chung**
- BIOT 361.** Graphene as a protective dental layer and an antimicrobial agent for the prevention of biofilm formation. **S. Grace**
- BIOT 362.** Utilizing a step-wise approach to define binding mechanisms of virus particles to multimodal anion exchange resin. **M. Brown, S. Johnson, K.A. Brorson, S. Lute, D.J. Roush, J. Hughes, M. Burnham, F. Wang, A. Walsh**
- BIOT 363.** Process economy modeling for viral vector production. **M. Bennemo, G. Ahlén, T. Persson, Å. Hagner Mcwhirter, M. Lundgren**
- BIOT 364.** Online biocapacitance probes for the monitoring of viable cell density and automating feeding strategies in mammalian cell cultures. **D. Montell, P. Cheng, H. Lin, D. Bock**
- BIOT 365.** Application of perfusion technology for improvement of a legacy biologics process. **D. Harrison, N. Vaidyanathan, E. Garr**
- BIOT 366.** Directed evolution of an epoxide hydrolase: Engineering the active site of the Cif epoxidase to form a covalent bond with progressively larger synthetic substrates. **M. Ko, J.J. Love**
- BIOT 367.** Evaluating the impact of high extracellular lactate on induced pluripotent stem cell metabolism and pluripotency. **D. Odenwelder, S.W. Harcum**
- BIOT 368.** Withdrawn.
- BIOT 369.** Should charge variants of monoclonal antibody therapeutics be considered critical quality attributes? **D. Kumar, S. Singh, G. Narula, A.S. Rathore**
- BIOT 370.** Risk mitigation for calcium chloride solution as an additive to cell culture media using high flux virus filters. **R. Alsop, C. Breuning, H. Aranha**
- BIOT 371.** Novel approaches to the chemical similarity networks that will improve the drug target identification. **Y. Lo, G. Ren, E.J. Parish, H. Honda**
- BIOT 372.** Novel approaches to the wireless system on sensor networks with new device to agricultural environment. **G. Ren, E.J. Parish, Y. Lo, H. Honda, M. Hsiao, T. Wei**
- BIOT 373.** Novel application of new bioinformatics methods to glycoprotein identification and functional prediction. **G. Ren, E.J. Parish, Y. Lo, H. Honda**
- BIOT 374.** Novel application of scanning electron microscopes and the comparison of non-native tephritid flies. **G. Ren, H. Honda, Y. Lo, E.J. Parish, T. Wei**
- BIOT 375.** Novel approaches to the clinical efficacy study of the application of ticagrelor for the PCI patients. **L. Lv, D. Ren, E.J. Parish, G. Ren, H. Honda**
- BIOT 376.** Novel approaches to the development of amperometric biosensor for serum cholesterol level determination. **Y. Lo, G. Ren, H. Honda, M. Hsiao, T. Wei**
- BIOT 377.** New approaches to the chemical synthesis of azetidinone, naturally occurring  $\beta$ -lactam antibiotics. **D. Ren, Y. Lo, G. Ren, E.J. Parish, H. Honda**
- BIOT 378.** Engineering Bone Morphogenetic Protein-1 (BMP-1) in *Saccharomyces cerevisiae* as a potential treatment of osteoarthritis. **R. Yaghi, B. Iverson**
- BIOT 379.** Withdrawn.
- BIOT 380.** Deciphering and expending *Clostridium formicoaceticum* metabolism based on whole genome sequencing. **T. Bao, S.T. Yang**
- BIOT 381.** Single-Molecule and ionic protein competition on ion-exchange adsorbents. **U. Patil, L. Kisley, S.P. Dhamane, M. Poongavanam, A. Mansur, E. Kulla, L.J. Tauzin, K. Kourntzi, C.F. Landes, R.C. Willson**
- BIOT 382.** Novel approach for transdermal delivery of ferulic acid via microneedle. **B. Zhong, H. Poon, W. Han, M. Hasan, K. Yeung**
- BIOT 383.** Sustained release of small molecules from silk films with applications in HIV-inhibition. **J. Andersen, P.J. Liwang, L. Zhang**
- BIOT 384.** Ultrasound activated and fluorescent film for *in vivo* bio-imaging. **J. Yang, E. Ward, T. Sung, J. Wang, C. Barback, N. Mendez, J. Delong, S. Blair, W.C. Trogler, A. Kummel**
- BIOT 385.** Identified genes involved in improving recombinant protein expression from HEK 293 cells by miRNA 22-3p. **S. Inwood, M.J. Betenbaugh, J. Shioach**
- BIOT 386.** Single-use bioreactor selection and scale-up considerations for live virus vaccine production. **S. Christanti, J.C. Gercke, K. Hamaker, D. Jan**
- BIOT 387.** Controlling quality attributes in an Fc fusion protein through the manipulation of cell culture pCO<sub>2</sub>. **D. Maskas, E. Garr**
- BIOT 388.** Preparation, crystallization, microstructure and mechanical behavior of silica based bio-compatible glass ceramics for dental applications. **C. Gautam**
- BIOT 389.** Supramolecular assembly of  $\beta$ -peptides nanofibers with carbon nanotubes formed by noncovalent helical wrapping. **J. Nam, N. Kim, O. Lee, Y. Kim**
- BIOT 390.** Engineered conductive and biodegradable bio-ionic liquid hydrogel. **J. Pletcher, M. Isterfi, M. Nabavinia, M. Keshvardoost, S. Asgari, A. Masoumi, I. Noshadi**
- BIOT 391.** Strategy for qualifying a mechanistic chromatography modeling approach. **C. Williams**
- BIOT 392.** Hydrogen-deuterium exchange to interrogate the reaction kinetics of d-glucuronoyl C5 epimerase. **D. Vaidyanathan, L. Lin, K. St. Ange, X. Zhang, B. Cress, C. Wang, R.J. Linhardt, J.S. Dordick**
- BIOT 393.** Comprehensive characterization of the cellulosome machinery of three novel strains of anaerobic gut fungi. **D. Knop, M.A. O'Malley**
- BIOT 394.** Evaluation of Flow-VPE for in-line concentration measurement of monoclonal antibodies during chromatography. **P. Shah, M. Rohani, K. Mehta, B. Yao, R.G. Soderquist**
- BIOT 395.** Modeling and simulation in the biotech industry: A survey from the 2nd workshop. **J. Griesbach, A. Staby, R.J. Todd, S. Hunt**
- BIOT 396.** Versatile signal peptide for periplasmic translocation of heterologous proteins in *Escherichia coli*. **J. Seo**
- BIOT 397.** Development of polydiacetylene-phospholipid based biosensors for the detection of influenza virus and Foot and Mouth Disease Virus (FMDV). **J. Jeong, T. Kim, I. Lee, S. Jung**

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

- BIOT 398.** Mechanism of filter fouling of virus retentive membranes. **M. Bieberbach,** M. Bennecke, P. Kosiol
- BIOT 399.** Characterizing anaerobic fungal sugar transporters for metabolic engineering applications. **I. Podolsky,** S. Seppala, M.A. O'Malley
- BIOT 400.** Creating the ideal vaccine formulation: Attenuating inflammation while maintaining the adaptive response. **B. Moser,** R.C. Steinhart, B. McGonnigal, Y. Escalante-Buendia, A. Esser-Kahn
- BIOT 401.** Developing polyvalent vaccines and therapeutics against viral pathogens. **T. Rosen,** C. Varner, A. Arsiwala, F. Krammer, R.S. Kane
- BIOT 402.** Using metabolic flux analysis to analyze carbon flux in the C4, drought-tolerant crop sorghum. **S. Moore-Farrell,** C. Broeckling, A. Heuberger, C. Jahn, C.A. Peebles
- BIOT 403.** Generation of high producing cell lines with suspension adapted DXB11-S1 in chemically defined medium and optimization of basal medium. **B. Chen,** H. Lu, W. Chi
- BIOT 404.** Redirecting the immune response by controlling the nanoscale presentation of antigens. **C. Varner,** A. Arsiwala, T. Rosen, R.S. Kane
- BIOT 405.** Insertion of inter-domain linkers improves expression and bioactivity of zygote arrest (Zar) fusion proteins. **J.M. Cook,** A. Charlesworth
- BIOT 406.** Genetically encoded biotin analogs in bacterial and mammalian cells. **A. Hohl,** Y. Mideksa, M. Feige, K. Lang, J. Eppinger
- BIOT 407.** Achieving ultra-high antibody concentrations. **P.J. Davis**
- BIOT 408.** Facing the unknown: Suggesting alternative novel biochemistry in *Escherichia coli* and *Saccharomyces cerevisiae*. **A. Chiappino Pepe,** M. Ataman, N. Hadadi, H. Mohammadi, V. Hatzimanikatis
- BIOT 409.** Manipulating sialylation of antibody fusion protein in cell culture process. **X. Chen,** L. Zhao, L. Fan, W. Tan
- BIOT 410.** Using natural ligand and receptors to develop next-generation cancer therapeutics. **J.W. Kim,** C. Marquez, A. Sweet-Cordero, J.R. Cochran
- BIOT 411.** Artificial intelligence in protein chromatography: Estimation of mechanistic model parameters. **G. Wang,** T. Briskot, T. Hahn, P. Baumann, J. Hubbuch
- BIOT 412.** Effect of yeast hydrolysate on monoclonal antibody production and quality: A transcriptomic perspective. **W. Buggele,** M.R. Good, W. Ling
- BIOT 413.** Optimization of solid support and ligand density to improved alkaline stability of protein A resin. **J.U. Hansson,** D. Jansson, B. Noren, I. Ekling, J. Vasic
- BIOT 414.** Understanding the generation of monoclonal antibody charge heterogeneity in CHO cell cultures. **X. Zhang,** H. Tang, L. Zhao, L. Fan, W. Tan, X. Liu
- BIOT 415.** Disposable microliter monolithic columns for PAT. **A. Podgornik,** T. Lukan, N. Yoshimoto, S. Yamamoto
- BIOT 416.** Optimization of high capacity protein A chromatography step for a therapeutic monoclonal antibody. **Y. Chang,** R. Zolyomi, X. Pan, K. Shill, G. Prakash, H. Ly, H. Tjandra, A. Hesselstein
- BIOT 417.** Development of microchip CE system for single-strand conformation polymorphism analysis. **G. Shin,** G. Jung
- BIOT 418.** Controlling variability in protein therapeutics by defining trace metal and carbohydrate composition in upstream process development. **B. Beyer,** J. Fura, L. Fortin, Thiyagarajan, N. Deorkar
- BIOT 419.** Microcarrier removal using gradient depth filters: Influenza vaccine case study. **A. Gupta,** S. Patel, L. Mullin, M. Higson, C. Gillespie
- BIOT 420.** Continuous antibody capture with a scalable supported bed platform. **G. Platteau,** G. Ströhlein, M. Siwak, G. de los Reyes
- BIOT 421.** Investigating the use of Polyethyleneimine (PEI) in combination with tangential flow filtration for the primary recovery of antibody fragments from *E. coli* fermentation using ultra scale-down techniques. **J. Newton,** M. Hussain, J. Vlahopoulou, Y. Zhou
- BIOT 422.** *In vitro* oxidative folding of disulfide-containing protein using aromatic thiols and disulfides. **N. Zhang,** W.J. Lees
- BIOT 423.** Withdrawn.
- BIOT 424.** Why complicate, when simple things can make big differences to your process. **J. Kanakaraj,** C. K.N. S. Desan, **D. Baskar,** A. Bhatnagar, A. Goel
- BIOT 425.** Development, scale-up and proof of concept of a live virus vaccine platform using single use technology in the clinical space. **K. Appgar,** R. Ducoat, B. Grau, B. Thomas, F. Torres
- BIOT 426.** Integrating transcriptome analysis and data driven prognosis to decipher catabolite repression. **K. Wu,** M. Gao, A. Chandra, **Z. Shao**
- BIOT 427.** Nano-scale reversible oligomerization of amyloidogenic peptides. **K. Yokoyama,** J. Battaglia, J. Ehret, J. Bekoe, M. Endo, A. Islam
- BIOT 428.** Characterization and removal of a monoclonal antibody aggregate containing four light chains. **Z. Tan,** V. Ehamparanathan, Y. Song, W. Hui, R. Swanson, S. Traylor, N. Singh, D. Yu, M. Lu, A.T. Lewandowski, Z. Li
- BIOT 429.** Peptide conformational change effect to a solvent diffusion rate in a sol-gel matrix. **K. Yokoyama,** R. Sah, J. Ban, E. Esquivel, R. Singh
- BIOT 430.** Investigation of peptide conformation through energy relaxation dynamics of fluorophore interacting with amyloid beta peptide at nanoscale interface. **K. Yokoyama,** T. James, J. Imayeguchi, A. Olatunbosun
- BIOT 431.** Fusing individual-based models with genome-scale metabolic networks - a novel approach for quantifying emergent microbial community spatiotemporal dynamics. **M. Ataman,** B. Borer, D. Or, V. Hatzimanikatis
- BIOT 432.** Aptameric sensor for fluorescent analysis of specific nucleic acid sequence. **N. Kikuchi**
- BIOT 433.** Effects of flow and seeding on the crystallisation of immunoglobulin G. **H. Yang,** J. Heng
- BIOT 434.** High throughput survival promoter assay for embryotoxicity and cancer drug screening. **X. Xin**
- BIOT 435.** Designing robust virus filtration processes to maximize operational flexibility while achieving small virus removal. **B. Buesing,** T. Hongo-Hirasaki, M. Inouye, D. Strauss, A.H. Schwartz, N. Hiroto, T. Miyabayashi
- BIOT 436.** Impact of an iron contaminant and its removal during downstream processing. **M. McClure,** S. Freeman, R. McCoy, B. Dell, D. Leiske, A. Gillespie, L. Connell-Crowley
- BIOT 437.** Cyanobacterial genome-scale carbon mapping models for genome-scale 13C-metabolic flux elucidation. **S. Gopalakrishnan,** C. Maranas
- BIOT 438.** Discovery, characterization and applications of a novel extremozymes from the deep Red-Sea brine pools. **S. Grötzinger,** A.L. Akal, M. Vogler, R. Karan, **J. Eppinger**
- BIOT 439.** Peptide-conjugated smart biopolymers for the purification of therapeutic proteins by affinity precipitation. **A. Mullerpatan,** E. Kane, D. Chandra, P. Karande, S.M. Cramer
- BIOT 440.** Alteration of bacterial surface protein architectures for guided assembly of cell populations. **J. Terrell,** H. Dong, M.C. Small, D.A. Sarkes, J. Jahnke, M. Hurley, W.E. Bentley, D.N. Stratis-Cullum
- BIOT 441.** Withdrawn.
- BIOT 442.** Integrated continuous protein A capture chromatography: Lean development approach. **R. Rodrigues,** H. Thuer, L.W. Pampal, J. Shultz
- BIOT 443.** Combined electrophoretic and light scattering approach to elucidate the molecular origin of reverse Hofmeister series effects on protein solutions. **R. Curtis,** M. Nuhu, A. Alfutimie, D. Kovacevic
- BIOT 444.** Systematic development of direct photosynthetic succinate production from CO<sub>2</sub>. **E.I. Lan,** C.T. Wei
- BIOT 445.** Analytical characterization and establishing comparability of IgG1-based monoclonal antibody. **N. Nupur,** N. Chhabra, R. Dash, A.S. Rathore
- BIOT 446.** Production of formate from carbon monoxide-containing waste gas using homoacetogenic bacteria as whole cell biocatalyst. **H. Hwang**
- BIOT 447.** Separation by intrinsic magnetic susceptibility differences in cells. **K. Park,** T. Testoff, J. Adams, M. Venere, M. Zborowski, J. Chalmers
- BIOT 448.** Process optimization for high cell density cultivations in cell culture-based viral vaccine production. **Y. Wu,** X. Liu, L. Zhao, Q. Ye, W. Peng, W. Dai, K. Hu, W. Tan
- BIOT 449.** Removal of organic acids from bio-oils by catalytic esterification. **J. Li,** T. An, X. Bao, H. Liu
- BIOT 450.** Peptide array and SAMDI mass spectrometry for profiling protein activities in cell lysates. **H. Kuo,** T. DeLuca, W.M. Miller, M. Mrksich
- BIOT 451.** Fundamental toolbox for protein A resin characterization and link to application efficiency. **O. Rammo,** P. Menstell, B. Edelmann, R. Skudas
- BIOT 452.** Tuning high mannose glycan levels of therapeutic proteins via CHO cell culture media supplementation. **J. Wang,** X. Chen, C. Wang, L. Zhao, W. Tan, L. Fan
- BIOT 453.** Case analysis of orthogonal, sterile antibody purification platform. **R. Skudas,** O. Rammo, P. Menstell
- BIOT 454.** Combining Rh-catalyzed diazo-coupling and enzymatic reduction to efficiently synthesize enantioenriched 2-substituted succinate derivatives. **Y. Wang,** M.J. Bartlett, C. Denard, J.F. Hartwig, H. Zhao
- BIOT 455.** Ion-Specificity on reponsive hydrophobic interaction chromatography. **X. Sun,** X. Qian
- BIOT 456.** Rapid and reliable analytical RP HPLC for high-throughput insulin process development. **A. Stein,** A. Heinen-Kreuzig, A. Kiesewetter
- BIOT 457.** Case Study: Expedited development of a cation exchange polishing step for therapeutic monoclonal antibody purification using a miniaturized high-throughput approach. **X. Pan,** D. Surendar, Y. Chang, R. Zolyomi, H. Tjandra, A. Hesselstein
- BIOT 458.** Tracking the delivery of silver to bacteria. **M.N. Pinto,** I. Chakraborty, W. Schultz-simonton, M. Rojas-Andrade, P. Mascharak
- BIOT 459.** Accelerated generation of high-yielding monoclonal stable CHO cell lines using a ClonePix-based cell line development platform. **K. Agarwal,** M. Kachole, A. McKenzie, J.G. Smedley, A. Shukla, A. Hussain
- BIOT 460.** Scalability of cell culture processes in single-use bioreactors using different CHO cells line variants. **N. Bubna,** C. Phillips, S.S. Mostafa, A. Shukla
- BIOT 461.** Systems biology approaches to omics data analysis in complex diseases. **R. Hajjo,** C. Willis
- BIOT 462.** High-throughput screening of hydrolytic enzyme activity via wireless antennas with embedded (bio)-logic. **N.F. Reuel**
- BIOT 463.** Using co-dominant negative recA to enhance CRISPR/Cas9-mediated recombineering. **E. Moreb,** M. Lynch
- BIOT 464.** Novel clinically-relevant nanoscale probes for optical cell labelling and tracking. **D. Jasim,** K. Kostarelos
- BIOT 465.** Molecular mechanisms of ion transport in a soy protein-based solid ion conductor. **J. Liu,** Y. Jewel, X. Fu, Y. Wang, W. Zhong
- BIOT 466.** Refractive Index as part of a feedback control scheme to better control tangential flow filtration operations. **Y. Lam,** M. Westoby
- BIOT 467.** Cell-selective proteomic analysis of host-microbe interactions using Bio-orthogonal Noncanonical Amino Acid Tagging (BONCAT). **S. Stone,** J. Shon, A. Khosravi, M. Sweredoski, A. Moradian, S. Hess, S. Mazmanian, D.A. Tirrell
- BIOT 468.** Withdrawn.

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

- BIOT 469.** Downstream processing development of *Nicotiana benthamiana* based recombinant butyrylcholinesterase. **S. Alkanaimsh**, J. Corbin, K. Karuppanan, M. Kailemia, C.B. Lebrilla, R. Rodriguez, S. Nandi, K. McDonald
- BIOT 470.** Harnessing intranodal vaccination to probe changes in local and systemic immunity. **J.I. Andorko**, J. Gammon, C. Jewell
- BIOT 471.** Process Analytical Technology (PAT) in continuous bioprocessing. **E. Btonjic-Sehic**
- BIOT 472.** Reverse hairpin beacon based positive SERS assay for influenza virus detection. **K. Jisun**, E. Jiang, S. Han, J. Kim, Y. Huh, S. Haam
- BIOT 473.** Withdrawn.
- BIOT 474.** Process economy improvements with in-line conditioning using ready-made stock solutions in a mAb case study. **M. Hall**, K. Busson, T. Bjorkman
- BIOT 475.** Alpha helix stabilization for improving the subcutaneous bioavailability of a helical peptide. **L. Zhang**, T. Navaratna, G. Thurber
- BIOT 476.** Enabling Hyper-productive™ processing: Advances in a novel modular supported bed chromatography platform. **M. Siwak**, A. Naresh, G. de los Reyes
- BIOT 477.** Single-molecule investigation of tau protein solution-phase conformations using the anti-Brownian electrokinetic (ABEL) trap. **L. Manger**, A. Foote, S. Wood, M.R. Holden, M. Margittai, R.H. Goldsmith
- BIOT 478.** Application of chlorine dioxide as a bactericide agent. **R. Moore**, B.G. Ooi
- BIOT 479.** Solid-state hydrogen-deuterium exchange mass spectrometry (ssHDX-MS) analysis of therapeutic fragment antigen-binding (Fab) protein formulations. **K. Balakrishna Chandrababu**, L. Kumar, B. Walters, D. Chang, P. Nayak, A. Allmendinger, I.E. Zarraga, E.M. Topp
- BIOT 480.** Computational Fluid Dynamics (CFD) modeling of axial and radial flow distribution and its impact on fouling in Hollow Fiber Tangential Flow (HFTF) and Alternating Flow (HFATF) microfiltration in perfusion bioreactor. **F. Radonjic**
- BIOT 481.** Nano-interface peptide affinity for amyloidogenic peptides. **K. Yokoyama**, P.J. Shevlin, K. Brown, M. Abdelmalik, A. Olatunbosun
- BIOT 482.** Probing the local electronic structure of dilute bioinorganic active sites using ultra-sensitive soft X-ray detectors. **C. Titus**, B.K. Alpert, M.L. Baker, H. Cho, E. Denison, W.B. Doriese, J.W. Fowler, K. Gaffney, B. Gao, J. Gard, G.C. Hilton, K.D. Irwin, Y.I. Joe, C. Kenney, J. Knight, T. Kroll, S. Lee, D. Li, M. Minitti, K. M. Morgan, R.A. Mori, D. Nordlund, G. O'Neil, H. Ogasawara, C. Reintsema, D. Schmidt, D. Sokaras, Y. Song, D.S. Swetz, J. Ullom, T. Weng, C. Williams, B.A. Young
- BIOT 483.** Engineering self-cleaving intein affinity tags for bioseparations using yeast surface display. **S.D. Stimple**, M.J. Coolbaugh, Y. Fan, J. Westfall, D.W. Wood
- BIOT 484.** Late-phase process improvement: Methods to increase titer while maintaining product quality. **M. Bennett**
- BIOT 485.** Translation initiation is controlled by RNA folding kinetics via a ribosome drafting mechanism. **A. Espah Borujeni**, A. Reis, **H. Salis**
- BIOT 486.** Full factorial analyses via novel high-throughput microculture platform reveal numerous interactions among stimuli within adult hippocampal neural stem cell niche. **R. Muckom**, S.K. McFarland, B.C. Perea, A. Rosenbloom, M. Gentes, D.S. Clark, D.V. Schaffer
- BIOT 487.** Kinetic modeling approach for media formulation optimization in mammalian CHO cell-cultures. **H. Bhatia**, S. Yoon
- BIOT 488.** Systems engineering of N-glycans for the production of recombinant proteins in mammalian cells. **T. Le**, **C. Stach**, M. McCann, S. O'Brien, X. Chen, L. Zhao, M. Smanski, W. Hu
- BIOT 489.** Overcoming the challenges of moving from hydrolysate-containing media to chemically defined media for a high cell density perfusion cell culture process. **R. Chelikani**, F.H. Bacon, H. Yuan
- BIOT 490.** Precise engineering of regulated mammalian gene expression through core promoter choice. **C. Ede**, Y.Y. Chen, X. Chen, M. Lin
- BIOT 491.** Functionalization of graphene by using protein engineering. **A. Tyagi**, I.H. Abidi, Z. Luo
- BIOT 492.** Fabrication of S-Adenosyl Methionine (SAM) biosensor via engineered virus like particles. **N. Bhokisham**, Y. Liu, A. Brown, G.F. Payne, J.N. Culver, W.E. Bentley
- BIOT 493.** Novel clone selection technique reveals heterogeneity among HEK293T cells engineered to produce therapeutic extracellular vesicles. **P. Amaya**, M. Phelps, T. Schmittgen, J. Chalmers
- BIOT 494.** Inducing cell death in cancer cells by targeted cytochrome c delivery via transferrin-cytochrome c conjugate. **M. Saxena**, Y. Delgado, R.K. Sharma, S. Sharma, S. Ponce De Leon Guzman, A.D. Tinoco, K. Griebenow
- BIOT 495.** Template assisted and continuous crystallisation: Control of polymorphs, protein crystallisation and bioseparation. **H. Yang**, **J. Heng**
- BIOT 496.** Novel stereoselective alcohol dehydrogenases from red-sea brine pools. **A.L. Akal**, **S. Grötzinger**, J. Eppinger
- BIOT 497.** Development of Streptomyces sp. FR-008 as a promising chassis. **Q. Liu**
- BIOT 498.** Choosing the right protein A affinity chromatography column can improve the process performance. **N. Yoshimoto**, **S. Yamamoto**
- BIOT 499.** Demonstration of a highly productive and scalable continuous chromatography approach. **X. Gjoka**, **R. Gantier**, **M. Schofield**
- BIOT 500.** TFF Optimization for small molecule processing. **E. Peterson**
- BIOT 501.** Mussel protein-based injectable porous microspheres for *in situ* cell delivery. **Y. Jo**, K. Min, D. Kim, B. Kim, D. Kim, H.J. Cha
- BIOT 502.** Peptoid-based microsphere-coated slides have increased performance in ELISA microarray. **S.L. Servoss**, G. Perez, B. Colford
- BIOT 503.** Predicting and understanding aggregation of antibody therapeutics at air-water interfaces. **I. Shieh**, D. Leiske, A. Patel
- BIOT 504.** Exploiting yeast glucan micro-particles for immune cells and tissue targeting. **I. Salon**, A. Bajgar, F. Stepanek
- BIOT 505.** Molecular assay for rapid detection of nuclear factor Kappa B. **Z. Wang**
- BIOT 506.** Isolation of live CTCs for downstream analysis using the MagSifter™: Rare cell isolation device. **M.B. Kerby**, K. Ziv
- BIOT 507.** Extraordinary urinary excretion of thin graphene oxide sheets following intravenous administration and short circulation in blood. **D. Jasim**, K. Kostarelos
- BIOT 508.** Withdrawn.
- BIOT 509.** Applications of high throughput screening in the process development for monoclonal antibody purification. **T. Zhou**, X. Fu, Z. Zhang, L. Wang, M. Jin, J. Bock
- BIOT 510.** Rapid design of integrated, orthogonal downstream bioprocesses using characterization of process-related impurities and *in-silico* tools. **S. Timmick**, C. Goodwine, N. Vecchiarello, S.M. Cramer
- BIOT 511.** Withdrawn.
- BIOT 512.** Case-Study of qualifying a mammalian working cell bank for use in manufacturing of a commercial biologic. **P. Apostolidis**, L. Zhou, N. Patil, P. Thompson, M. Boyer, H. Graham, R. Bates
- BIOT 513.** Modulating biologic quality attributes by applying high-throughput technologies and advanced statistics for media and process optimization. **J. Tian**, C. Oliveira, S. Egan, Z. Tan, J. Chen, J. Lee, M.C. Borys, Z. Li
- BIOT 514.** Molecular dynamics simulations of organomimetic cluster nanomolecules. **P. Rehak**, Y. Han, P. Kral
- BIOT 515.** Phospho-proteomic and transcriptomic data for fungal cell-wall repair pathway reveal new functionality. **C. Chelius**, L. Ribeiro, J. Kumar, S. Lincoln, R. Srivastava, S. Harris, M. Marten
- BIOT 516.** Metabolic modeling of a multicellular nitrogen fixing cyanobacterium. **J. Gardner**, N.R. Boyle
- BIOT 517.** Factors impacting filterability during primary clarification of monoclonal antibodies. **A.M. Senczuk**, **J. Basha**, A. Lee, J. Salm
- BIOT 518.** Process intensification benefits and PAT in continuous chromatography. **H. Blom**, B. Westerlund, A. Almén, T. Bjorkman
- BIOT 519.** Morphing the pepto-type: Translation of IgG-binding peptides into their peptoid analogues. **H. Reese**, S. Menegatti
- BIOT 520.** Improving protein A performance using chromatographic clarification strategy. **A. Voloshin**, B. Cope, T. Hill, M. Murray, J. Peart, M. Richardson
- BIOT 521.** Bringing down the cost of MAb purification with novel resin designs. **H.J. Johansson**, P. Gilbert
- BIOT 522.** When DoE fails: Mechanistic modeling for chromatographic manufacturability. **T. Hahn**, T. Huuk, T. Beck, J. Hubbuch
- BIOT 523.** Design of ligand and solid support for high capacity protein A resin. **D. Jansson**, J.U. Hansson, B. Noren, I. Ekling, J. Vasic
- BIOT 524.** Harnessing the intramolecular electrons of enzymes: An alternative pathway to enzymatic fuel cells. **C. Ji**
- BIOT 525.** Integrated product removal of terpenoids with direct adsorption and membrane-assisted extraction. **L. Janoschek**, L. Grozdev, S. Berensmeier
- BIOT 526.** Preferential crystallization for the purification of highly similar polyphenols. **M. Silva**, B. Vieira, M. Ottens
- BIOT 527.** High-throughput screen for compounds that block aberrant protein aggregation using a fluorescent bacterial display system. **J.J. Love**, M. Ko
- BIOT 528.** Investigating hydrodynamics in expanded bed adsorption systems using multiphase computational fluid dynamics. **V. Koppejan**, G. Ferreira, D. Lin, H. Wang, M. Ottens
- BIOT 529.** DOPA redox regulation strategy of mussel adhesion using plaque foot proteins. **M. Shin**, B. Yang, H.J. Cha
- BIOT 530.** Withdrawn.
- BIOT 531.** Synthesis and use of dendronized HIC supports for the recovery of proteins. **M. Mata-Gómez**, J.A. Valencia-Gallegos, M.A. Rito Palomares, **J. González-Valdez**
- BIOT 532.** Study of alpha casein potential as anticancer drug and development of a nano-sized targeted drug delivery system. **V.C. Barcelo Bovea**, E.N. Saladini-Alvarado, L.J. Delinois, F.M. Joaquin, Y. Delgado, K. Griebenow
- BIOT 533.** Withdrawn.
- BIOT 534.** Chromatographic process development for complex biological feedstocks. **S. Pirrung**, M. D. Pons Royo, D. Parruca da Cruz, L.A. van der Wielen, R.F. van Beckhoven, M. Eppink, M. Ottens
- BIOT 535.** Role of disulfide bonding in protein aggregation. **L.E. Hanzly**, J.R. Barone
- BIOT 536.** Effect of ionomer rigidity on the complex formation with block-cationer and RNAs. **K. Hayashi**, S. Fukushima, H. Takemoto, K. Osada, N. Nishiyama, K. Miyata, K. Kataoka
- BIOT 537.** Prediction of subsequent centrifuge problems by analyzing clean-in-place data. **L. Xu**, J. Erickson
- BIOT 538.** CFD of mixing of multi-phase flow in a bioreactor using population balance model. **L. Kanwar**, A.S. Rathore, J. Sarkar, V. Loomba
- BIOT 539.** Focused library approach to discover discrete dipeptide bolaamphiphiles for siRNA delivery. **A. Eldredge**, M. Johnson, N.J. Oldenhus, S. Guan
- BIOT 540.** Discretized multi-level elution trajectories for preparative chromatography. **A. Sellberg**, N. Andersson, A. Holmqvist, B. Nilsson

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**BIOT 541.** Development of a high-throughput immunofluorescence assay platform using a DNA-encoded streptavidin library for the rapid evaluation of protein-catalyzed capture agents. **A. McCarthy**, J. Kim, R. Henning, A. Mishra, R. Ng, A. Museth, J. Heath, E. Winslow, J. Oh, J.R. Heath

**BIOT 542.** Biolayer Interferometry using Fortebio™ Octet® for monitoring antigenicity of ENVs to guide process development. **N. Oien**, L.S. Wolfe, J. Devaney, C. Cameron, B.C. Peacor, J.G. Smedley, A. Shukla

**BIOT 543.** Strategies for increasing *Saccharomyces cerevisiae* tolerance to medium-chain fatty acids. **P.B. Botero Besada-Lombana**, N.A. Da Silva

**BIOT 544.** Investigating protein throughput, v<sub>max</sub> values and virus removal efficiency of the paper based mille-feuille filter. **S. Gustafsson**, A. Mharyan

**BIOT 545.** Withdrawn.

**BIOT 546.** Economic benefits of membrane chromatography versus packed bed column purification of therapeutic proteins expressed in microbial and mammalian hosts. **M. Kumar**, M. Thukkaram, R. Mendhe, A.S. Rathore

**BIOT 547.** Withdrawn.

**BIOT 548.** Fluorescent turn-on probes for wash-free mRNA imaging via covalent site-specific enzymatic labeling. **E.C. Zhou**, S. Alexander, N.K. Devaraj

**BIOT 549.** Colorimetric and fluorescence based Aptasensors for the determination of hepatitis B e antigen. **R. Huang**, N. He

**BIOT 550.** Stress sensitivity toolkit with spectroscopic characterization for development of robust biologic drug products. **M.E. Krause**, J.M. Wasyluk, D. Fichana, A.S. Narang, S. Deshmukh, N. Chennamsetty, M.L. Adams, R.B. Gandhi

**BIOT 551.** Domain based understanding of activity and thermal stability. **S. Kang**, Y.J. Yoo

**BIOT 552.** Engineering the pH optimum of hyaluronidase for improved targeting of hyaluronan overexpressing pancreatic tumors. **J. Hennigan**, M. Lynch

**BIOT 553.** Influence of the architecture of chromatographic media on protein adsorption. **S.H. Koshari**, Y. Liu, N.J. Wagner, A.M. Lenhoff

**BIOT 554.** Lipid-polymer hybrid nanoparticles: Photoacoustic imaging applied to ovarian cancer diagnosis. **C. Chen**, J. Jøkerst

**BIOT 555.** Optimization of structure of an aptamer discovered utilizing Ligand Guided Selection (LIGS) yields high affinity aptamer. **H.E. Zmurt**, S. Batool, N. Van, P. Mallikaratchy

**BIOT 556.** Bioconversion of butanal and 13C acetaldehyde conversion in three strains of yeast. **N.O. Flynn**, J. Alvarez

**BIOT 557.** Transcriptome analysis in high-producing CHO cell cultures: Strategies to design high-performing cell culture media. **A. Castan**, D. Reinhart, R. Kunert

**BIOT 558.** Investigating correlation between biolayer interferometry and biological assay for potency assessment of biotherapeutics. **D. Kumar**, S. Singh, A.S. Rathore

**BIOT 559.** Quality by Design (QbD) based process development for production of ranibizumab in *E. coli*. **D. Kumar**, J. Batra, J. Gomes, A.S. Rathore

**BIOT 560.** Setting new standards for cleaning and sanitization of Protein A chromatography resins. **M. Wetterhall**, S. Musunuri, A. Ljunglöf, T. Björkman, E. Monie, A. Mattsson, A. Grönberg

**BIOT 561.** Biological self-assembly for modularly modifying hepatitis B virus-like particles for cancer detection and treatment. **E. Hartzell**, H. Kim, W. Chen

**BIOT 562.** Evaluation of ligand design for downstream processes: Impacts of ligand structure on ion-exchange membrane performance. **J.K. Rasmussen**, C.A. Bothof, S. Colak Atan, G. Griesgraber, R.T. Fitzsimons, F. Sgolastra, A.W. Vail

**BIOT 563.** Withdrawn.

**BIOT 564.** Achieving desired product quality for a CHO-derived monoclonal antibody. **J. Lakkyreddy**, M. Gawlitzeck

**BIOT 565.** Molecular insight on the inhibition of rate limiting step of cholesterol synthesis: Comparison of binding efficiency of statins – a platform for the screening of novel molecules. **R. Jain**, U. Agarwal, S. Ayothiraman, T. Panda

**BIOT 566.** Optimization and integration of single-pass, continuous final formulation technologies for mAb purification. **B. Trafton**, J. Marshall, E. Ayurk

**BIOT 567.** Investigation into Host Cell Protein (HCP) - Monoclonal Antibody (mAb) interactions in downstream bioprocessing. **S. Ranjan**, W. Chung, J.S. Bee, R. Hofele, J. HeidbrinkThompson, M. Zhu, D. Robbins, S.M. Cramer

**BIOT 568.** Rapid fractionation of monoclonal antibody oxidation variants using laterally-fed membrane chromatography. **R.H. Sadavarte**, P. Madadkar, C. Filipe, R. Ghosh

**BIOT 569.** Effect of hydrophobicity on the ultrasound contrast of silica nanoparticles. **F. Chen**, J.V. Jøkerst

**BIOT 570.** Automated and miniaturized ProteinA affinity resin lifetime optimization studies. **M. Geiss**, C. Atzkern, S.A. Oelmeier, D. Boeth

**BIOT 571.** Interactions in L-arginine solutions detected by proxy via relaxation dispersion NMR Spectroscopy of H/D Exchange at the ε-NH. **G. Khirich**, A. Nandy, J.C. Lin

**BIOT 572.** Withdrawn.

**BIOT 573.** Withdrawn.

**BIOT 574.** Maximizing the functional lifetime of Protein A resins. **J.Y. Zhang**, S. Ghose, R.S. Gronke, S. Siva

**BIOT 575.** Coenzyme engineering of NADP-dependent hyperthermophilic dehydrogenases toward small-size biomimetic coenzymes. **R. Huang**, Y. Zhang

**BIOT 576.** Domain insertion of a beta roll-forming peptide into a thermostable alcohol dehydrogenase gives rise to calcium-dependent cofactor specificity. **W. Abdallah**, K. Solanki, S. Banta

**BIOT 577.** Monitoring endogenous microRNA during adipogenesis via exocytosis-mediated signal secretion of liposomal probes. **S. Han**, B. Kang, E. Jang, J. Ki, M. Shin, H. Son, Y. Huh, S. Haam

**BIOT 578.** pDADMAC flocculation & clarification of CHO cell culture harvest. **A. Gupta**, J. Castano, K.M. Pizzelli, S. Ryan

**BIOT 579.** Advective flow membrane chromatography: Utilization of flow-through mode for scalable, single-use downstream mAb processing. **R. Overbeck**, X. Chen, M. Lin

**BIOT 580.** HP-β-cyclodextrin as an inhibitor of amyloid-β aggregation and toxicity. **B. Ren**, R. Hu, M. Zhang, H. Chen, F. Yang, K. Chu, J. Zheng

**BIOT 581.** Laser scanning confocal microscope as a tool for ligand density and protein binding estimation in affinity membranes. **J. Cruz-Lebron**, S. Yeldell, J. Sotero, V. Bansal, I. Dmoschowski, E. Fasoli

## Section B

InterContinental San Francisco  
Grand Ballroom B/C

### Alan S. Michaels Award in the Recovery of Biological Products

M. A. O'Malley, T. M. Przybycien, V. Roy, *Organizers, Presiding*

**5:00 BIOT 582.** Industrial perspective on applied science & engineering for biopharmaceutical process development. **B.D. Kelley**

## WEDNESDAY MORNING

### Section A

InterContinental San Francisco  
Grand Ballroom A

### Upstream Processes

#### Systems Biology & Omics Applications

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*  
H. Le, N. E. Lewis, *Presiding*

**8:30 BIOT 583.** Assessing stability, chromatin accessibility and transcriptional activity of the Chinese hamster ovary cell genome. **A. Bandyopadhyay**, Z. Lee, C. O'Brien, M. McCann, S. O'Brien, W. Hu

**8:50 BIOT 584.** Lessons from the hamster: A combined omics approach to analyze CHO cell lines and *Cricetulus griseus* tissues. **K.M. Heffner**, M.J. Betenbaugh, D. BaycinHizal

**9:10 BIOT 585.** Insights into the protein secretory pathway in filamentous fungi using random and targeted mutational approaches. **K. Boppidi**, L. Ribeiro, N. Rogers, A. Ramsey, S. Nelson, S. Lincoln, R. Srivastava, S. Harris, M. Marten

**9:30 BIOT 586.** Proteomic and transcriptomic analysis reveals major metabolic shifts in cyanobacteria exposed to dynamic light environments. **S. Park**, B. Andersson, C. Shen, G. Peers, D.S. Dandy, **K.F. Reardon**

**9:50 Intermission.**

**10:10 BIOT 587.** Metabolic flux rewiring and physiology in *E. coli* knockout strains. **M.R. Antoniewicz**

**10:30 BIOT 588.** Development of a core model of CHO cell metabolism. **A. Richelle**, N.E. Lewis

**10:50 BIOT 589.** Kinetic modeling of metabolism in clostridia. **S. Dash**, A. Khodayari, G. Stephanopoulos, L.R. Lynd, C. Maranas

**11:10 BIOT 590.** On the shift-up to high lactate production in fed-batch culture of mammalian cells. **T. Le**, C. O'Brien, T. Phan, E. Liu, W. Hu

### Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Vaccines, Gene Therapy Vectors, Cell Therapy, Stem Cell & Non-Protein Biological Products

M. Bakhshayeshi, R. Barros, V. Natarajan, A. Noyes, N. Tugcu, *Organizers*

M. Bakhshayeshi, A. Jungbauer, A. Noyes, *Presiding*

**8:30 BIOT 591.** Challenges and advances in live virus vaccine process development. **M. Wenger**, A. Kristopeit, S. Christanti, J. Konietzko, J. Ma, K. Phillips, J. Vlasak, S. Wang, M. Woodling, J.G. Joyce

**8:50 BIOT 592.** Recombinant prokaryotic lectins for affinity capture of HIV envelope proteins. **U. Bhaskar**, S.S. Mostafa, A. Shukla

**9:10 BIOT 593.** Manufacturing process development challenges for exosomes, a new therapeutic platform for the delivery of biomolecules. **A. Noyes**, R. Bourdeau, K. Konstantinov, M. Mercaldi

**9:30 BIOT 594.** Can oligonucleotide purification processes be improved to meet (or beat) future industry demands. **R.S. Gronke**, R. Joshi, K. Ruanjaikaen, Y. Fillon, H. Nguyen, F. Antia

**9:50 Intermission.**

**10:10 BIOT 595.** Addressing the downstream challenges of viral therapy for cancer treatment – a study of rhabdoviral vector purification. **S. Shoaibargh**, M.F. Medina, A. Smith, J. Bell, B. Lichty, D.R. Latulippe

**10:30 BIOT 596.** High resolution separation of virus-like particles and extracellular particles by convective media. **P. Steppert**, N. Lendero, T. Schneider, P. Aguilar, A. Tover, **A. Jungbauer**

**10:50 BIOT 597.** Enabling technologies for efficient downstream processing of AAV viral vectors. **P. Hermans**

**11:10 BIOT 598.** Virus safety for vaccines, viral vectors, and cell based therapies. **D. Asher**, A. Boumlic, P. Pattnaik, M. Wisher

### Section C

InterContinental San Francisco  
Union Square

### Biophysical & Biomolecular Processes

#### Protein Conjugates & Materials

S. Alavattam, J. Moore, J. A. Van Deventer, *Organizers*

S. Alavattam, G. Thurber, *Presiding*

**8:30 BIOT 599.** Modular design and functionalization of enzymatic hydrogels using a self-assembling protein building block. **S. Lim**, D.J. Glover, D.S. Clark

**8:50 BIOT 600.** Understanding water interactions at the biomolecule/surface interface through neutron reflectometry. **W. Fies**, L.J. Webb

**9:10 BIOT 601.** Microenvironment effect rather than proximity channeling causes the activity enhancement in enzyme cascade. **Y. Zhang**, H. Hess

**9:30 BIOT 602.** Ultra-Sensitive protein detection with nanoparticle-proximity ligation assay. **H. Chen**, M. Crum, H. Goux, D. Chavan, B. Vu, K. Kourentzi, R.C. Willson

9:50 Intermission.

**10:10 BIOT 603.** *In vivo* site-specific protein tagging with diverse amines using an engineered sortase variant. **J. Glasgow**, M.L. Salit, J.R. Cochran

**10:30 BIOT 604.** Design of double-click stabilized p53-like peptides with serum-independent on-target efficacy. **L. Atangcho**, E. Khera, G. Thurber

**10:50 BIOT 605.** Engineering complete *in vivo* synthesis of acylated proteins. **R. Menacho Melgar**, M. Lynch

**11:10 BIOT 606.** Engineered polyelectrolyte multilayers to promote immune tolerance. **L.H. Tostanoski**, M. Guo, W. Royal, C. Jewell

## Section D

InterContinental San Francisco  
Telegraph Hill

### Drug Product & Delivery

#### Devices & Biopharmaceutical Drug Delivery: Interactions & Strategies

T. Randolph, E. Sahin, *Organizers*

D. Doughty, C. Weikart, *Presiding*

**8:30 BIOT 607.** Enabling patient centric drug products through innovation in devices and drug delivery. **A. Subramony**

**9:10 BIOT 608.** Container-formulation interactions: A comparison of borosilicate glass vials and cyclic olefin polymer vials with novel silica-coated surfaces. **C.F. Chisholm**, J. Berggren, C. Weikart, T. Randolph

**9:30 BIOT 609.** Withdrawn.

9:50 Intermission.

**10:10 BIOT 610.** Paradigm shift: How a novel drug delivery technology can save formulation time and effort. **M. Huddleston**

**10:30 BIOT 611.** Withdrawn.

**10:50 BIOT 612.** Cellular migration, survival and gene expression on patterned collagen fibers. **M. Paukshto**

**11:10** Panel Discussion.

## Section E

InterContinental San Francisco  
InterContinental B

### Quality by Design

#### Case Studies on Product Understanding & Determination of Quality Attribute Criticality (CQAs)

J. Glassey, R. Godavarti, *Organizers*

M. Albarghouthi, P. Dalby, *Presiding*

**8:30 BIOT 613.** Perspectives on the impact of quality by design (after a decade in the making!). **B.D. Kelley**

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**9:10 BIOT 614.** How to uncover critical quality attributes – Lessons learned applying CQA assessment tools to biologics. **N. Alt**, T.Y. Zhang, P. Motchnik, V. Quamby, T. Schlothauer, H. Beck, T. Emrich, R. Harris

**9:30 BIOT 615.** Balancing act: Leveraging literature and in-house characterization in CQA assessment. **R. Hofele**, W. Xu, J. Ahn, J. Wang

9:50 Intermission.

**10:10 BIOT 616.** Identification of critical quality attributes of biopharmaceuticals: GCSF as a case study. **S. Singh**, D. Kumar, D. Yadav, A.S. Rathore

**10:30 BIOT 617.** Strategies to streamline risk ranking and filtering in quality by design process validation. **M.P. Lee**, J.A. Patch, J. Persson, C. Williams, S. Wong

**10:50 BIOT 618.** Exploiting mAb structure characteristics for rapid screening and a directed QbD implementation in process development. **J. Glassey**, M. Karlberg, A. Kizhedath, M. von Stosch, S. Wilkinson

**11:10 BIOT 619.** Development of an integrated risk assessment strategy for process related impurities for biopharmaceutical production. **Y. Li**, H. Luo, S. Nicholson

## Section F

InterContinental San Francisco  
Sutter

### Emerging Technologies

#### Stem Cells & Regenerative Medicine

Y. Y. Chen, Y. Kim, J. P. Pieracci, *Organizers*

P. Apostolidis, S. Rao, *Organizers, Presiding*

**8:30 BIOT 620.** Engineered tissue microspheres for use in regenerative medicine and disease modeling applications. **E.A. Lipke**

**9:10 BIOT 621.** Metabolic transition between stem cell state and hepatocyte-like state. **D. Chau**, T. Le, Y. Park, W. Hu

**9:30 BIOT 622.** High-throughput toxicity and phenotypic screening of 3D human neural progenitor cells on a microarray chip platform. **G.J. Nierode**, B.C. Perea, S.K. McFarland, D.V. Schaffer, D.S. Clark, J.S. Dordick

9:50 Intermission.

**10:10 BIOT 623.** Megakaryocytic microparticles for cell-therapy applications: *In vitro* & *in vivo* studies. **C. Kao**, C. Escobar, E.T. Papoutsakis

**10:30 BIOT 624.** Novel culture systems for trabecular meshwork and Schlemm's canal cells: An *in vitro* model for screening glaucoma therapeutics. **S.T. Sharfstein**, K. Torregon, C. Dautriche, Y. Xie, M. Bergkvist, J. Danias

**10:50 BIOT 625.** Engineering mechanical cues in the stem cell differentiation niche: Applications in vascular tissue engineering. **Q. Smith**, X. Yi Chan, A. Carmo, D. Vig, S. Sun, S. Gerecht

**11:10 BIOT 626.** Fluid shear stress induces cancer stem cell-like phenotype in MCF7 breast cancer cell line without inducing epithelial-to-mesenchymal transition. **U.L. Triantafyllu**, N. Klaassen, A. Raddatz, Y. Kim

## Section G

InterContinental San Francisco  
Grand Ballroom B/C

### 2017 E.V. Murphree Award in Industrial & Engineering Chemistry: Symposium in honor of Eleftherios T. Papoutsakis

*Cosponsored by I&EC*

M. A. O'Malley, T. M. Przybycien, V. Roy, *Organizers, Presiding*

**11:30 BIOT 627. Award Address** (E. V. Murphree Award in Industrial & Engineering Chemistry sponsored by ExxonMobil Research & Engineering Company). 101 Years of clostridial biotechnologies. **E.T. Papoutsakis**

## WEDNESDAY AFTERNOON

### Section A

InterContinental San Francisco  
Grand Ballroom A

### Upstream Processes

#### Automated Technologies & High-Throughput Systems in Biologics

N. Agarwal, A. E. Schmelzer, I. R. Wheeldon, I. Yuk, *Organizers*

M. Jewett, A. Schmelzer, *Presiding*

**2:00 BIOT 628.** Cell line development, miniaturization, automation, and analysis using the Berkeley Lights Platform. **K. Lee**, T. Neville, T.P. Munro

**2:20 BIOT 629.** Shaken tube system for CHO process development. **P. Harns**, L. Chirdon, M. Gawlitzek

**2:40 BIOT 630.** High-throughput scale down model (SDM) for fed-batch and perfusion process characterization studies. **S. Rameez**, J.S. Notey, D. Costello, D. Ryan, S.S. Mostafa, A. Shukla

**3:00 BIOT 631.** Advancing automated sampling, process monitoring, and nutrient feedback control for a system of 3-L bioreactors. **K. O'Neill**, L. Hoshan, T. Seamans

3:20 Intermission.

**3:40 BIOT 632.** Implementing HIPDOG (High end pH controlled delivery of glucose) in the AMBR15 microbio-reactor system. **P. Jones**, B. Figueroa

**4:00 BIOT 633.** Development of a CHO-based cell-free platform for the synthesis of active monoclonal antibodies as a potential high-throughput screening tool. **R. Martin**, N. Majewska, C. Chen, A.E. Schmelzer, M.C. Jewett, V. Roy

**4:20 BIOT 634.** High-Throughput characterization of enzymes that assemble glycoproteins. **M. Mrksich**, M.C. Jewett, W. Kightlinger, L. Lin

**4:40 BIOT 635.** Real time product quality analysis of mammalian cell culture processes. **M. George**, G. Sidhu, A. Durve, G. Sharma, J. Tressel, H. Lin, E. Zimmermann

### Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Technology Transfer, Scale-Up & Scale-Down

R. Barros, V. Natarajan, N. Tugcu, *Organizers*

B. Roman, S. A. Tobler, *Presiding*

**2:00 BIOT 636.** Use of platform strategy to achieve efficient and agile technology transfer. **M. Ratna**

**2:20 BIOT 637.** Defining a window of operation by applying integrated fermentation and cell removal scale-down mimics of mammalian cell culture with predictive modelling. **M. Sebastian**, S. Goldrick, A. Mason, D. Gruber, R. Turner, S. Farid

**2:40 BIOT 638.** Evaluation of single use harvest technologies. **A. Brinkmann**

**3:00 BIOT 639.** Does BPOG extractable protocol truly help? - Case studies from an end user perspective. **E. Mahajan**

3:20 Intermission.

**3:40 BIOT 640.** Optimization and scale-up of charge variants separation of mAbs in cation exchange chromatography. **F. Wittkopp**, F. Seelinger, **C. Dr. Frech**

**4:00 BIOT 641.** Mechanistic investigations of chromatography resin aging: Building a toolbox to maximize the lifetime of resins used in commercial processes. **A.J. Pike**, P.R. Smith, B.F. Marques, K.E. Goklen

**4:20 BIOT 642.** Scale-up and predicting flux-pressure relationships of Tangential Flow Filtration (TFF) using a combined Computational Fluid Dynamics (CFD) and Ultra Scale-Down (USD) input: Method and application. **M. Hussain**, Y. Zhou

**4:40 BIOT 643.** Scalable and representative: Improved approaches to process characterization for a tangential-flow ultrafiltration unit operation. **A. Szkodny**, J. Molek, K.E. Goklen

### Section C

InterContinental San Francisco  
Union Square

### Drug Product & Delivery

#### Big Data & Biomanufacturing

T. Randolph, E. Sahin, *Organizers*

J. Fox, A. Vatsyayan, *Presiding*

**2:00 BIOT 644.** Learning from small data in the era of big data for real-time biopharmaceutical process monitoring. **A. Tulsyan**, C. Garvin, C. Undery

**2:20 BIOT 645.** Application of multivariate data analysis to enhance product quality of a novel antibody-peptide fusion. **S. Goldrick**, W. Holmes, N. Bond, M. Kuiper, R. Turner, S. Farid

**2:40 BIOT 646.** High-throughput data analysis for rapid ranking of high-concentration monoclonal antibody formulations using manufacturability indices. **Y. Yang**, A. Velayudhan, S. Farid, N. Thornhill

**3:00 BIOT 647.** Fermentanomics: Relating quality attributes of a monoclonal antibody to cell culture process variables and raw materials using multivariate data analysis. **S. Singh**, M. Pathak, E. Read, C. Agarabi, A.S. Rathore

3:20 Intermission.

‡ Cooperative Cosponsorship

**3:40 BIOT 648.** Multi-objective medium-term capacity planning for stainless steel and single-use multi-product biopharmaceutical facilities under uncertainty using a genetic algorithm. **K. Jankauskas**, A.P. Long, M.D. Osborne, G.R. McCartney, L. Papageorgiou, S. Farid

**4:00 BIOT 649.** Multivariate data analysis for biotech processes: Industrial case studies. **A.S. Rathore**, S. Singh

**4:20** Panel discussion.

## Section D

InterContinental San Francisco  
Telegraph Hill

### Bio-Based Products

#### Synthetic Biology Tool Development & Metabolic Engineering in Novel Microbes

M. R. Antoniewicz, C. A. Eckert, G. Sriram, *Organizers*

G. Rudenko, F. Zhang, *Presiding*

**2:00 BIOT 650.** Pathway engineering pipeline for efficiently engineering many-enzyme pathways. **S. Halper**, D. Cetnar, **H. Salis**

**2:20 BIOT 651.** Synthetic biology tools for engineering members of the marine bacterial genus *Vibrio*. **T. Tschirhart**, Z. Wang, J. Erickson, J. van Kessel, G.J. Vora

**2:40 BIOT 652.** Light-dark cycle tool development in *Synechocystis sp.* PCC 6803. **A.J. Zimont**, D. Miller, C.A. Peebles

**3:00 BIOT 653.** Synthetic biology tools for engineering *Gluconacetobacter sp.* **S. Lim**

**3:20** Intermission.

**3:40 BIOT 654.** Metabolic analysis of the extremely thermoacidophilic sulfobacterales offers improved understanding of lithoautotrophy and identifies potential routes to production of bio-based chemicals and fuels directly from CO<sub>2</sub>. **B. Zeldes**, A. Loder, C. Straub, R. Kelly

**4:00 BIOT 655.** Production of industrial products from natural gas using an engineered methanotroph biocatalyst. **J. Kealey**, L. Chao

**4:20 BIOT 656.** Withdrawn.

**4:40 BIOT 657.** Overcoming the transformation hurdle of *Clostridium cellulovorans* for efficient metabolic engineering towards consolidated n-butanol production from cellulose. **J. Zhao**, S.T. Yang

## Section E

InterContinental San Francisco  
Sutter

### Emerging Technologies

#### Stem Cells & Regenerative Medicine

Y. Y. Chen, Y. Kim, J. P. Pieracci, *Organizers*

P. Apostolidis, S. Rao, *Organizers, Presiding*

**2:00 BIOT 658.** Vocal fold-mimetic environment for the modulation of stem cell behaviors. **X. Jia**

**2:20 BIOT 659.** Engineered environments for modulating iPSC function and fate in three-dimensional culture. **E. Ovadia**, A.M. Klöxin

**2:40 BIOT 660.** Increasing stem cells retention and survivability by engineering with magnetic porous nanoparticles. **F. Chen**, E.R. Zhao, S. Darmadi, J.V. Jokerst

**3:00 BIOT 661.** Scalable production of self-aggregating glioblastoma cancer stem cells. **J. Park**, Y. Kim

**3:20** Intermission.

**3:40 BIOT 662.** Solutions for robust cell therapy production. **A. Schnitzler**, M. Pease, T. Hood, T. Lawson, S. Luther, A. Verma, S. Punreddy, S. Rigby, **J. Murrell**

**4:00 BIOT 663.** Reflectin as a material for neural stem cell growth. **R. Kautz**, L. Phan, J. Arulmoli, J. Kerr, M. Shenk, M. Pathak, L. Flanagan, F. Tombola, A.A. Gorodetsky

**4:20 BIOT 664.** Functionalized poly(ethylene glycol)-based hydrogels as a synthetic culture surface to enhance in-vitro proplatelet formation. **E.N. Bess**, J. Berry, W.M. Miller

**4:40 BIOT 665.** Amplified photodegradation of cell-laden hydrogels through an addition-fragmentation reaction. **T. Brown**, I. Marozas, K.S. Anseth

## WEDNESDAY EVENING

### Section B

InterContinental San Francisco  
Grand Ballroom B/C

#### D.I.C. Wang Award Lecture

M. A. O'Malley, T. M. Przybycien, V. Roy, *Organizers, Presiding*

**5:00 BIOT 666.** Following the advice of Daniel Wang: Improving quality through cell culture engineering. **M.J. Betenbaugh**

## THURSDAY MORNING

### Section A

InterContinental San Francisco  
Grand Ballroom A

#### Upstream Processes

#### Engineering Natural Products Biosynthesis

N. Agarwal, I. R. Wheeldon, I. Yuk, *Organizers*

Y. Li, J. Wee, *Presiding*

**8:30 BIOT 667.** Heterologous microbial (combinatorial) biosynthesis of natural products using dynamic metabolic control. **Z. Ye**, M. Lynch

**8:50 BIOT 668.** Engineered biosynthesis of the complex natural products erythromycin and yersiniabactin for health and environmental opportunities. **B.A. Pfeifer**

**9:10 BIOT 669.** Snake antivenom peptide production using elastin-like peptide tag. **C.F. Komives**, E. Hartzell, E.E. Sanchez, M. Suntravat, S. Mancini, W. Estell, K. Kumar, W. Chen

**9:30 BIOT 670.** Design of synthetic microbial communities for metabolic engineering and synthetic biology applications. **J.A. Jones**, M. Koffas

**9:50** Intermission.

**10:10 BIOT 671.** Engineered biosynthesis of neocantimycin depsipeptides in *S. albus* J1074. **W. Skyrud**, J. Liu, W. Zhang

**10:30 BIOT 672.** Design and implementation of a robust *S. cerevisiae* chassis strain with improved growth characteristics and stationary phase glycolytic flux. **J. Burg**, M. Lynch

**10:50 BIOT 673.** Expressing a metabolic loop enables the continuous synthesis of 3-hydroxybutyrate in cyanobacteria. **T.T. Ku**, E.I. Lan

**11:10 BIOT 674.** Metabolic engineering of *Synechocystis sp.* PCC 6803 for improved terpenoid production: Ribosome binding sites and codon optimization. **J. Sebesta**, C.A. Peebles

## Section B

InterContinental San Francisco  
InterContinental C

### Downstream Processes

#### Advances in Non-Chromatographic Separations

R. Barros, V. Natarajan, N. Tugcu, *Organizers*  
A. Azevedo, E. Benabaji, *Presiding*

**8:30 BIOT 675.** Effect of channel induced shear on biologics during ultrafiltration/diafiltration. **A. Arunkumar**, N. Singh, M. Peck, E. Schutsky

**8:50 BIOT 676.** Mechanisms of precipitation on pH adjustment. **D.G. Greene**, L. Choe, S. Traylor, N. Singh, X. Xu, Z. Li, K. Lee, N.J. Wagner, **A.M. Lenhoff**

**9:10 BIOT 677.** Protein precipitation via combined reversible cross-linking and volume exclusion: Solubility and aggregation kinetics models. **T.M. Przybycien**, Q. Gu

**9:30 BIOT 678.** Antibody aggregate removal by depth filtration in cell culture harvesting. **D. Yu**, M. Mayani, Y. Song, Z. Xing, Z. Li

**9:50** Intermission.

**10:10 BIOT 679.** Transitioning from low to high density mammalian cell culture clarification within existing manufacturing infrastructure. **J. Walker**, A. Richardson, **M. Westoby**

**10:30 BIOT 680.** Effect of product concentration on continuous parvovirus-rentive filtration. **D. Bohonak**, H. Lutz

**10:50 BIOT 681.** Investigation of flushing strategies for reducing beta glucan leachables originating from cellulose based depth filtration media. **A. Gupta**, D. Kinzmaier, K.M. Pizzelli, E.M. Goodrich

**11:10 BIOT 682.** Characterizing protein concentration dependent parvovirus filtration fouling. **A. Seay**

## Section C

InterContinental San Francisco  
InterContinental B

### Drug Product & Delivery

#### Biopharmaceuticals: Novel Formulations & Mechanisms

M. E. Krause, T. Randolph, E. Sahin, *Organizers*

B. Demirdirek, *Organizer, Presiding*

M. Krause, *Presiding*

**8:30 BIOT 683.** Melt processed virus-like particle laden polymeric implants for immunoresponsive applications. **P. Lee**, S. Shulka, J.D. Wallat, C. Danda, J. Maia, N. Steinmetz, J.K. Pokorski

**8:50 BIOT 684.** 2-Nitrobenzenesulfonamide group as a chemical linker with highly selective cleavability in response to intracellular redox system for a construction of siRNA-polymer conjugate. **H. Takemoto**, C. Huang, T. Nomoto, K. Tomoda, M. Matsul, N. Nishiyama

**9:10 BIOT 685.** Peptide dendrons as thermal stability amplifiers for IgG1 monoclonal antibody biotherapeutics. **R. Bansal**, S. Chattopadhyay, A.S. Rathore, S. Dhawan, V. Haridas

**9:30 BIOT 686.** Aptamer-peptide-drug conjugates: Targeted delivery of synergistic drug combinations with ratiometric precision. **A. Pusuluri**, S. Menegatti, H. Soh, S. Mitragotri

**9:50** Intermission.

**10:10 BIOT 687.** Withdrawn.

**10:30 BIOT 688.** *In vitro* selection of pH-activated DNA nanostructures. **F. Fong**, S. Oh, C.J. Hawker, H. Soh

**10:50 BIOT 689.** Brain targeting transferrin conjugated deformable nanovesicle (Tf-DNV) encapsulating the bioflavonoid galangin: A nanocarrier prepared by an adaptable microfluidic platform. **M. Alam**, J. Campagna, H. Rollins, P. Spilman, I. Nishimura, V. John

**11:10 BIOT 690.** Encapsulation and release of dsDNA through dual-responsive, biodegradable hydrogel capsules. **B.A. Tucker**, J. Chen, V.A. Kozlovskaya, D.E. Graves, E.P. Kharlampieva

## Section D

InterContinental San Francisco  
Telegraph Hill

### Quality by Design

#### Case Studies on Process Understanding & Design Space

J. Glassey, R. Godavarti, *Organizers*

P. Slade, A. Staby, *Presiding*

**8:30 BIOT 691.** Successful mAb design space claim approach. **R. Hamilton**

**8:50 BIOT 692.** Resin attribute and its interaction with process parameters to impact product quality and process performance for cation exchange chromatography. **A. Hagstrom**, S. Madaras, J. Prentice, S. Parra, O. Terova, G. Miro-Quesada, M. Stone, D. Robbins

**9:10 BIOT 693.** Defining design space: Strategies to improve efficiency during process validation. **T. Peram**

**9:30 BIOT 694.** Case study: Lifecycle management of a process wide design space. **A. Kleinjans**

**9:50** Intermission.

**10:10 BIOT 695.** Monte Carlo tool for prediction of variability in product quality attributes and definition of downstream process design space. **T.M. Wasylenko**, M. Coolbaugh, T. Dahal-Busfield, A. Kanodia, K. Kelly, N.M. Troccoli, Y. Waghmare, R. Patil, K.P. Brower, V. Warikoo

**10:30 BIOT 696.** Mechanistic modeling of chromatography: An industry perspective and vision. **J. Griesbach**, F. Stueckler

**10:50 BIOT 697.** Identification of key/non-key process and model parameters of autoinjector devices via global sensitivity analysis using mechanistic models. **P. Rolandi**, F. Schlegel

**11:10 BIOT 698.** Design space characterization for filling process leveraging modeling and pilot scale capabilities. **M. Boggara**, V. Padmakumar, N. Rathore

## Section E

InterContinental San Francisco  
Sutter

## Emerging Technologies

## Cell &amp; Gene Therapy

Y. Y. Chen, Y. Kim, J. P. Pieracci, *Organizers*  
C. Beisel, E. Gschweng, *Presiding*

**8:30 BIOT 699.** Immunotherapy using protein nanoparticles for improved response towards human cancer antigens. **M. Neek**, J. Tucker, N. Molino, E. Nelson, S. Wang

**8:50 BIOT 700.** Engineering self-modulating T cells to prevent cytokine release syndrome in adoptive T-cell therapy. **M. Lin**, H. Kehoe, Y.Y. Chen

**9:10 BIOT 701.** Drug responsive control systems for more potent and safer chimeric antigen receptor T cells. **B. Wang**

**9:30 BIOT 702.** Evaluating cost-effectiveness of allogeneic T-cell immunotherapy based on a bioprocess economic model. **N. Razavilar**, K. Wallner, R. Pedroza, J. Delisle, C. McCabe

**9:50** Intermission.

**10:10 BIOT 703.** Data-fusion based process analytics for stem cell immunotherapy cell-culture on micro-carriers in bioreactor. **S. Yoon**, **B. Kuang**

**10:30 BIOT 704.** Opportunities and challenges for vector manufacturing used for gene therapy. **S. Ozturk**

**10:50 BIOT 705.** Efficient microRNA delivery system for treatment of disease by using cholesterol-conjugated microRNA and pegylated polycationic polymer. **B. Mun**, E. Jang, S. Han, J. Ki, H. Son, Y. Choi, Y. Huh, S. Haam

**11:10 BIOT 706.** Histone-targeted gene transfer leads to enhanced MSC differentiation with 100-fold reduced BMP-2 dosing for bone regenerative applications. **E.V. Munsell**, M.O. Sullivan

## Section F

InterContinental San Francisco  
Grand Ballroom B/C

Biotechnology & Bioengineering  
Elmer Gaden Award Lecture

T. M. Przybycien, *Organizer, Presiding*  
D. S. Clark, *Presiding*

**11:30 BIOT 707.** Difficult-to-remove CHO host cell protein impurities. **K. Lee**

## THURSDAY AFTERNOON

## Section A

InterContinental San Francisco  
InterContinental C

## Downstream Processes

## Advances in Non-Chromatographic Separations

A. Azevedo, R. Barros, V. Natarajan, N. Tugcu, *Organizers*

E. Benabaji, *Organizer, Presiding*  
A. Azevedo, *Presiding*

**2:00 BIOT 708.** Evolution of an improved high-throughput scale-down model for flocculation studies. **A. Radhamohan Keba**, J. Bill

**2:20 BIOT 709.** Investigation of virus retention mechanisms by size exclusion membranes: The role of membrane properties and solution conditions in different flow regimes. **P. Kosiol**, C. Kahrs, B. Hansmann, M. Ulbricht, V. Thom

**2:40 BIOT 710.** Evaluation of a new all-synthetic depth filter media demonstrates improved clarification and soluble impurity clearance post-protein A and low pH viral inactivation. **H.C. Nguyen**, A. Langland, B. Meyer, D.S. Kahn, J.A. Costanzo, J. Amara

**3:00 BIOT 711.** Continuous precipitation of process related impurities from clarified cell culture supernatant using a novel Coiled Flow Inversion Reactor (CFIR). **N. Kateja**, H. Agarwal, A. Saraswat, M. Bhat, A.S. Rathore

**3:20** Intermission.

**3:40 BIOT 712.** Impact of novel continuous clarification techniques on sizing and optimization of depth filtration trains. **K. Galipeau**, M. Collins, E. Ayturk

**4:00 BIOT 713.** Countercurrent staged diafiltration for monoclonal antibody formulation. **Y. Li**, A. Anirudh, A.L. Zydney

**4:20 BIOT 714.** Adsorptive properties of filter aids. **O. Khanal**, N. Singh, S. Traylor, X. Xu, Z. Li, A.M. Lenhoff

**4:40 BIOT 715.** Elucidate the effects of filtration conditions on virus removal. **X. Qian**, R. Fan, S. Wickramasinghe

## Section B

InterContinental San Francisco  
Grand Ballroom A

## Drug Product &amp; Delivery

## Quality Assurance Challenges for Biopharmaceuticals: Single Use Processing Containers, Primary Packaging, Delivery Devices &amp; Excipients

T. Randolph, E. Sahin, *Organizers*

C. Garvin, P. Paranjpe, C. Undey, *Presiding*

**2:00 BIOT 716.** Activity of inactive ingredients: Foundations for innovations in drug excipients. **J. Pottel**, J. Irwin, B. Shoichet

**2:20 BIOT 717.** Suitability and challenges of using Raman spectroscopy for polysorbate testing— use of Multivariate analysis to quantify variability. **E. Bolesla**, T. Wang, N. Deorkar, T. Wang

**2:40 BIOT 718.** Nanobubble stability and protein aggregation in pharmaceutically-relevant formulations. **J. Snell**, T. Randolph

**3:00 BIOT 719.** Excipient & pH targeting in bulk drug substance: A modified approach to buffer exchange during diafiltration. **R.W. Muthard**, G. Tran, A. Sophocleous, A.C. Dumetz, Y. Wu, K.E. Goklen

**3:20** Intermission.

**3:40 BIOT 720.** Performance of capping on residual seal force and container close integrity. **R. Ovidia**, P. Lam

**4:00 BIOT 721.** Modeling plunger-stopper placement to optimize combination product process design. **J.P. Bernacki**, J. Jazayeri, D. Marsiglio, G. Gordon, N. Rathore

**4:20 BIOT 722.** In-line Raman spectroscopy for bispecific assembly process monitoring. **A. Maier**

**4:40 BIOT 723.** Development and implementation of an automated HIAC approach for high throughput subvisible particle analysis. **J. Purtell**, M. Berke, J. Yeary, E. Avanes, S. Cao, C. Ren, R. Kaushik

## Section C

InterContinental San Francisco  
InterContinental B

## Quality by Design

## Implementation &amp; Description of Control Strategy

J. Glassey, R. Godavarti, *Organizers*

H. Shen, *Organizer, Presiding*

D. Robbins, *Presiding*

**2:00 BIOT 724.** Continuous improvement of control strategy at Genentech and Roche. **A.S. Miller**

**2:20 BIOT 725.** Practical considerations of knowledge management as an enabler of quality throughout the product lifecycle. **D. Paoletta**, S. Weisser, P. Smith, A.R. Ubiera

**2:40 BIOT 726.** Advanced process control strategy for consistent product quality and improved manufacturing efficiency. **C. Jiang**

**3:00 BIOT 727.** Real-time monitoring of critical quality attributes and process parameters by spectroscopy during chromatographic capture and polishing steps. **M. Rudt**, N. Bestrich, D. Buchler, L. Roilinger, A. Sanden, J. Hubbuch

**3:20** Intermission.

**3:40 BIOT 728.** Exploring PAT approaches for ultrafiltration/diafiltration as the first step to continuous process design. **D. Arzensek**

**4:00 BIOT 729.** Implementation of QbD for development of a downstream process for a therapeutic biosimilar. **A.S. Rathore**, R. Bhambure

**4:20 BIOT 730.** Implementation of a QbD bioprocess into a traditional manufacturing site. **N.L. McKnight**, A. Kleeb, P. Walsler

**4:40 BIOT 731.** Automated methodology for post-approval management of a process control strategy. **P.R. Smith**, B.F. Marques, T. Wiley, K.E. Goklen

## THURSDAY EVENING

## Section F

InterContinental San Francisco  
Telegraph Hill

Biotechnology & Bioengineering  
Daniel IC Wang Award

T. M. Przybycien, *Organizer, Presiding*

D. S. Clark, *Presiding*

**5:00 BIOT 732.** Novel insights into understanding and designing regulatory RNAs. **L.M. Contreras**

## BIOL

## Division of Biological Chemistry

L. Hedstrom, *Program Chair*

## SOCIAL EVENTS:

Social Hour, 7:00 PM: Sun, Tue

## SUNDAY MORNING

## Section A

Moscone Center  
130

## Graduate Student &amp; Postdoctoral Fellow Symposium

L. Hedstrom, *Organizer*

M. E. Farkas, *Presiding*

**8:30** Introductory Remarks.

**8:35 BIOL 1.** RNA labeling induced by oxidation with high spatial resolution. **Y. Li**, R. Spitaler

**8:50 BIOL 2.** CRISPR-Cas9: Computational insights toward improved genome editing. **G. Palermo**, Y. Miao, R. Walker, M. Jinek, J. McCammon

**9:05 BIOL 3.** Luminescence probes of deaminated nucleotide surveillance enzymes DUT and ITPA. **D. Ji**, Y. Pavlov, E.T. Kool

**9:20 BIOL 4.** Monitoring the phenotypic response of FoxO1 at the single cell level in patient samples. **J. Simpson**

**9:35 BIOL 5.** Identification of novel allosteric HSP72 inhibitors. **H. Traynor**, R. Burke, Y. Le Bihan, I. Collins, R.L. van Montfort

**9:50 BIOL 6.** Polymerase-mediated synthesis of TNA polymers containing a fluorescent base that can read through G-repeats in a DNA template. **H. Mei**, C. Shi, J. Chaput

**10:05** Intermission.

**10:20 BIOL 7.** Antibiotic resistance evolved via inactivation of a ribosomal RNA methylating enzyme. **V. Stojkovic**, L. Noda-Garcia, D. Tawfik, D.G. Fujimori

**10:35 BIOL 8.** Comparative analysis of translesion DNA synthesis by a high fidelity DNA polymerase. **A. Dasari**

**10:50 BIOL 9.** Ultra-photostable, genetically directed fluoromodule enables STED nanoscopy and long time scale single protein tracks in live bacteria. **S. Saurabh**, A.M. Perez, C.J. Commerci, L. Shapiro, W.E. Moerner

**11:05 BIOL 10.** Infrared spectroscopy reveals a base stacking limit in DNA G-quadruplexes. **D.A. Price**, Z.J. Kartje, T.D. Hill, G. Cairo-Baza, K.T. Gagnon, S.D. Moran

**11:20 BIOL 11.** Synthesis, spectroscopic investigation, biological screening, interaction with SS-DNA and DFT study of aliphatic ferrocenyl ureas. **F. Asghar**, A. Badshah, I.S. Butler

## Section B

Mosccone Center  
131

**Ronald Breslow Award for Achievement in Biomimetic Chemistry: Symposium in honor of Benjamin G. Davis**

B. G. Davis, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 **BIOL 12.** Chemical Immunology - New approaches to study killer T-cell activation. S. van Kasteren

8:25 **BIOL 13.** Immunomodulation by targeted delivery of carbon monoxide using artificial metalloproteins. G. Bernardes

8:45 **BIOL 14.** Sulfur chemistry for biology and human health. J.M. Chalker

9:05 **BIOL 15.** Chemical biology tools for studying the O-GlcNAc modification of proteins. D.J. Vocadlo

9:40 Intermission.

9:45 **BIOL 16.** Controlling biological machines with synthetic photoswitches. D. Trauner

10:20 **BIOL 17.** Mass spectrometry of membrane proteins - the lipid connection. C. Robinson

10:55 **BIOL 18.** Homogeneous glycoproteins for structural and functional study. C. Wong

11:30 Introduction of Awardee.

11:40 **BIOL 19. Award Address** (Ronald Breslow Award for Achievement in Biomimetic Chemistry

*Sponsored by Ronald Breslow Award Endowment).*

**Sugars & proteins: Towards a synthetic biology.** B.G. Davis

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy**

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

**National Fresenius Award: Symposium in honor of Neal K. Devaraj**

*Sponsored by ORGN, Cosponsored by BIOL*

**Cellulose Structure & Biosynthesis In the Plant Cell Wall**

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## SUNDAY AFTERNOON

## Section A

Mosccone Center  
131

**Goodman Award: Symposium in honor of Jennifer Doudna**

J. Doudna, *Organizer, Presiding*

2:00 Introductory Remarks.

2:05 **BIOL 20.** CRISPR immune response to viruses that infect bacteria. B. Wiedenheft

2:50 **BIOL 21.** Retooling CRISPR to turn genes on and off. L. Gilbert

3:35 **BIOL 22.** CRISPRi/dCas9 for complex genome regulation and disease research. L. Qi

4:20 Introduction of Awardee.

4:25 **BIOL 23.** CRISPR biology: Expanding nature's toolkit for genome engineering. J. Doudna

## Section B

Mosccone Center  
3014/3016

**ACS Award in Pure Chemistry: Symposium in honor of Neal K. Devaraj**

N. K. Devaraj, *Organizer, Presiding*

2:00 Introductory Remarks.

2:05 **BIOL 24.** Measuring and modulating the repair of DNA damage. E.T. Kool

2:35 **BIOL 25.** Expanding the synthetic capabilities of yeast. V.W. Cornish

3:05 **BIOL 26.** Transition metal signaling in the brain and beyond. C.J. Chang

3:35 Intermission.

3:55 **BIOL 27.** Evolving click chemistry → SuFEx. K.B. Sharpless

4:25 Introduction of Awardee.

4:30 **BIOL 28. Award Address** (ACS Award in Pure Chemistry sponsored by the Alpha Chi Sigma Fraternity & the Alpha Chi Sigma Educational Foundation). In situ synthesis and modification of lipid membranes. N.K. Devaraj

5:05 Concluding Remarks.

**Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal**

*Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG‡, ORGN and PROF*

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

**Cellulose Structure & Biosynthesis**

**Evolution of Synthases & Fine Structure of Microfibrils**

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

**Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes & Future Challenges**

*Sponsored by INOR, Cosponsored by BIOL*

## SUNDAY EVENING

## Section A

Mosccone Center  
West Hall

**Current Topics in Biochemistry**

L. Hedstrom, *Organizer*

7:00 - 9:00

**BIOL 29.** Clarification by flocculation: A promising solution for high cell density. C. Decarmin

**BIOL 30.** Exploration of the N-terminal extension's role in human gamma-S crystallin function. K. Roskamp, A. Chenault, R. Martin

**BIOL 31.** Chemical biology approach for dimethyllysine incorporation into proteins. Z.A. Wang, W. Liu

**BIOL 32.** New tools for controlling the supramolecular assembly of proteins in living cells. G.R. Casey, X. Zhou, B. Xu, C.I. Stains

**BIOL 33.** Structural analysis of heme c motifs for the template-based design of heme c proteins. J. Kleingardner

**BIOL 34.** Unnatural lysine analogues to mimic the catalytic pocket of human DNA polymerase  $\beta$ . C. Bhattacharya, S.M. Daskalova, S. Hecht

**BIOL 35.** Efficient method to study engineering temperature shift strategies for Chinese hamster ovary cell culture via mechanistic macroscopic kinetic modeling. Y. Wang, J. Xu, p. tang, s. liu, z. li

**BIOL 36.** Investigating the specificity of methylated DNA binding by MBD1 and mutant peptides for transcriptional regulation. S. Scherer, A. Stewart

**BIOL 37.** Synthesis and evaluation of a norbornene containing substrate for protein farnesyltransferase. J. Wollack, J. Rowe, C. Sutton, L. Crepeau, K. Caron, M.D. Distefano

**BIOL 38.** Developing a pipeline for generating TNA-phosphoramidite and TNA-triphosphate monomers for the *in vitro* evaluation of the properties of the polymers. S. Bala, J. Liao, J. Chaput

**BIOL 39.** Exploring the role of Tat-SF1 as an HIV-1 host factor. M. Warrick, H.B. Miller

**BIOL 40.** Mutational studies of a deoxyribozyme by high-throughput sequencing. D. Venugopal, S. Kobori, Y. Yokobayashi

**BIOL 41.** Transcriptome-wide mapping of RNA-RNA interactions. M. Oumais, A. Luptak

**BIOL 42.** Possible prebiotic fabrication of ribonucleotides using microdroplets. I. Nam, J. Lee, H. Nam, R.N. Zare

**BIOL 43.** Tat-specific factor 1's role in HIV RNA stability. A.P. Goodwin, H.B. Miller

**BIOL 44.** Theoretical characterization of the H-bonding and stacking potential of two nonstandard nucleobases expanding the genetic alphabet. M. Chawla, R. Oliva, L. Cavallo

**BIOL 45.** Live cell imaging of RNA using endogenous fluorophore protoporphyrin IX. D. Zhang

**BIOL 46.** ADARs and RNA; Structural basis for site selectivity of ADAR2. J. Thomas, M. Matthews, Y. Zheng, P.A. Beal, A.J. Fisher

**BIOL 47.** Nucleobase analogs as probes for substrate recognition and repair by DNA glycosylase MutY. C. Majumdar, S.S. David, A. Manlove

**BIOL 48.** Bioorthogonal near-infrared fluorogenic probe for mRNA detection. H. Wu, S.C. Alexander, S. Jin, N.K. Devaraj

**BIOL 49.** Bioluminescent detection of HIV persistency via a stem-loop probe. B. Cherif, A. Moutsiopoulou

**BIOL 50.** Optimizing the production of FOXA2 to unravel the interaction between homeodomain and Forkhead transcription factors. S. Ramirez

**BIOL 51.** Investigation into the broad substrate specificity of the DNA glycosylase hNEIL1. B. Anderson, J. Ashby, A.M. Fleming, C.J. Burrows, S.S. David

**BIOL 52.** Influence of loop mutations on G-quadruplex unfolding. B.A. Tucker, J.S. Hudson, D.E. Graves

**BIOL 53.** Oncostatin M mediated regulation of microRNA-21 function in HeLa cells. N. Jain, S. Ahmed, M.J. Sever

**BIOL 54.** 5' Start site heterogeneity of the HIV-1 RNA and its effect on structure and function. D. Francis, M. Orellana, J. Brown, M. Summers

**BIOL 55.** Parallel stranded G-quadruplex composed of Threose Nucleic Acid (TNA). J. Liao, I. Anosova, S. Bala, W.D. Van Horn, J. Chaput

**BIOL 56.** Structural stability analysis of a *S. cerevisiae* DEAD-box protein. Z. Iezzi, C. Bardine, H. Englert, I. Garcia

**BIOL 57.** High-throughput mutational analysis and engineering of self-cleaving ribozymes by sequencing. S. Kobori, Y. Yokobayashi

**BIOL 58.** Elucidation of the role of adenine DNA glycosylase muty in MNNG-mediated cell cytotoxicity. D.M. Banda, A.G. Raetz, G. Xu, X. Ma, P.L. McKibbin, A. Rajavel, C.B. Lebrilla, S.S. David

**BIOL 59.** Synthesis and screening of a naphthalene diimide bisintercalator library. E. Gratton, B.L. Iverson

**BIOL 60.** High-yield syntheses of DNA duplexes containing interstrand cross-links at a single well-defined location via a reductive amination reaction between 2-aminopurine and an abasic site. M. Imani Nejad, N.E. Price, Y. Wang, K.S. Gates

**BIOL 61.** Engineering the N-terminal domain of pyrrolysyl-tRNA synthetase: Optimizing genetic incorporation of non-canonical amino acids. V. Sharma, W. Liu

**BIOL 62.** Complete Zn<sup>2+</sup> linchpin coordination sphere of the DNA repair glycosylase MUTYH. N. Nunez, S.S. David, J.B. Siegel, C. Lim

**BIOL 63.** Enzymatic site-specific labeling with RNA-TAG for affinity purification of RNA-protein complexes. K.N. Busby, N.K. Devaraj

**BIOL 64.** 5-Hydroxymethylcytosine impacts Holliday junction structure to promote recombination via recognition by Endonuclease G. C. Vander Zanden, R.K. Rowe, A.J. Broad, A.B. Robertson, P.S. Ho

**BIOL 65.** Ligand selectivity in a pathogenic preQ1 riboswitch aptamer domain. K.M. Yamakawa, M. Doan, J.M. Davison, M.N. Pahl, I.T. Suydam

**BIOL 66.** E2F1 and p27 regulation in non-neuronal cells by isoxazole 9. M. McCabe, M.J. Sever

**BIOL 67.** Structural and energetic characterization of the emissive RNA alphabet based on the isothiazolo[4,3-d]pyrimidine heterocycle core. M. Chawla, R. Oliva, L. Cavallo

**BIOL 68.** Interaction of Menadiquinone (MK) analogs (MK-1 and MK-2) with phospholipids. G. Cardiff, B.J. Peters, J.T. Koehn, J.B. Hough, A. Groninger, D.C. Crick, D.C. Crans, F. Fontes

- BIOL 69.** Ca<sup>2+</sup> induced conformational changes of calmodulin and troponin C chimera. C. Wei, D. Jensen, K. Schafer, E.A. Fabry
- BIOL 70.** Selective detection of protein homologues by outer membrane protein G nanopore. B. Yang, M.A. Fahie, H. Wang, P. Limpikirati, R.W. Vachet, S. Thayumanavan, M. Chen
- BIOL 71.** How host gender affects the polysaccharide capsule of *Cryptococcus neoformans*. P. Doski, E. McClelland
- BIOL 72.** Structure of the pro-apoptotic BCL-2 family protein BAD and insight into BAD-calceurin interactions. S.N. Blakenny, E.C. Cook, T.P. Creamer
- BIOL 73.** Aquaporin inspired water purification membrane based on graphene oxide membrane. C. Lee, D. Kim, G. Lee, Y. Lee, Y. Lee
- BIOL 74.** Amyloid Forming Sequences in *Trichomonas vaginalis*. A. Asakawa, C. Chan
- BIOL 75.** Exploration of the interactions of hen egg white lysozyme with deoxyribonucleic acids. E.A. Fabry, C. Wei, T. Shields
- BIOL 76.** Proteomics-based screening and identification method for redox sensitivities of global cellular cysteine residues. K. Araki, K. Fukui, T. Natsume
- BIOL 77.** Functionalization of polydopamine via the Aza-Michael reaction for antimicrobial interfaces. P.T. Ha, C. Huang, C. Liu, Y. Huang
- BIOL 78.** Utilization of extracts of garlic, oregano, neem and a commercial insecticide on endophyte bacteria on orange leaves infected by *Citrus green-ting*. J. Becerra Lopez, A. Perez Matos
- BIOL 79.** Characterization of the huntingtin aggregation pathway via single-molecule and super-resolution fluorescence microscopy. C. Becker, R. Harman, A. Khan, R. Levy, W.C. Duim
- BIOL 80.** Is it a biological response or chemical process? Chemical and transcriptional regulation experiments probe the cause for the increased accumulation of Chlorogenic Acid (CGA) in carrot root slices exposed to UV-B light. G.E. Bartley, R.J. Avena-Bustillos, W. Du, M. Hidalgo, B. Cain, A.P. Breksa
- BIOL 81.** N acetyl cysteine as an inducer of retina regeneration. J. Landers, K. Del Rio-Tsonis, N. Echeverri
- BIOL 82.** 5-azidomethyl-2'-deoxyuridine triphosphate can be efficiently incorporated by a repair DNA polymerase. C. Garcia, Y. Ren, Z. Wen, S.F. Wnuk, Y. Liu
- BIOL 83.** Comparison of synthetases in the incorporation of the non-natural amino acid p-azidophenylalanine in the oncogenic protein kRas. M. Wheeler, T. Andresson, R.E. Connor
- BIOL 84.** Precise delivery of a chemotherapeutic Prodrug to mitochondria of prostate cancer cells to bypass repair induced resistance. U. Basu
- BIOL 85.** Visualizing the chain-flipping mechanism to study inhibition and protein-protein interaction in fatty acid biosynthesis. K. Charov, J. Beld, M.D. Burkart
- BIOL 86.** Assessing cysteine residue thiol status in T-Darpp, a protein involved in chemoresistance. J.A. Aldana-Mendoza, P. Farias, J. Momand
- BIOL 87.** Nanomaterials toxicological evaluation: Natural product shielded magnetite nanoparticles. H. Huang, J.L. Liu, S. Bashir
- BIOL 88.** Analogs of methyl 4-(4-chlorophenyl)-4-oxobut-2-enoate that inhibit MenB in the bacterial menaquinone biosynthesis pathway. Y. Si, J. Matarlo, F. Daryaeae, P.J. Tonge
- BIOL 89.** Characterization of a robust serine protease from *P. intermedia*. S. Spradlin, C.M. Evilia
- BIOL 90.** Reverse transcription past major guanine oxidation products in RNA. A. Alenko, A.M. Fleming, C.J. Burrows
- BIOL 91.** Importance of F365 in the binding of inhibitors in *Escherichia coli beta-glucuronidase*. S. Van Shufflin
- BIOL 92.** Ratiometric fluorescent chloride sensor. K. VanDenburgh, Y. Liu, B. Qiao, A.H. Flood
- BIOL 93.** Highly selective small potassium transporter induces cancer cell death. F. Shen, D. Yang
- BIOL 94.** Evaluating the effect of lipophilicity on antimicrobial potency, cytotoxicity, and combinatorial library design. J.A. Turkett, K. Bicker
- BIOL 95.** Determinants of the pKa value of catalytic residue in de novo designed enzymes. K. Hiebler, C. Castaneda, O. Makhlynets
- BIOL 96.** Allosteric control of histone demethylase KDM5A. J.E. Longbotham, C. Chio, M. Kelly, D.G. Fujimori
- BIOL 97.** Pathological mutations in the prion protein modulate the metal driven cis interaction. G.P. Roseman
- BIOL 98.** Electrophilic reactive carbonyl species: Participation in the nonenzymatic covalent protein modification of human hemoglobin. P. Ropski, J. Pattan, B. Park, R.W. Holman, K. Rodnick
- BIOL 99.** Towards a mechanistic understanding of nonenzymatic glycation of human hemoglobin: Diverse effects of inorganic phosphate on the initial noncovalent binding of glucose. A. Hendricks, C. Mottishaw, J. Mitchell, P. Ropski, B. Smith, G. Titus, B. Park, M. Finkbeiner, R.W. Holman, K. Rodnick
- BIOL 100.** Fine-tuning triazabutadiene stability for controlled aryl diazonium release. L. Guzman, J.C. Jewett
- BIOL 101.** Self-Assembling nanoluciferase fragments as probes for alpha-synuclein solubility. T. Truong, C. Bilyeu, J. Zhao, T. Nelson, C.I. Stains
- BIOL 102.** Effects of DNA bending on T=C CPD deamination. K. Wang, J.S. Taylor
- BIOL 103.** Development of targeted stigmaterol-solid lipid nanoparticles by hyaluronic acid and transferrin for lung cancer therapy. Z. Torres, Y. Delgado, K. Griebenow
- BIOL 104.** Use of infrared spectroscopy to study the structural changes of calreticulin upon the addition of ligand. A. Farquharson, C. Thomas, L. Maynard
- BIOL 105.** Withdrawn.
- BIOL 106.** Cyclopropene neurotransmitters for biorthogonal imaging of neural circuits. P. Kumar, S. Li, D. Shukhman, S.T. Laughlin
- BIOL 107.** Effect of caffeine on lipophagy in mammalian skeletal muscle cells. D.S. Enyart, J. Stansell, J.W. Ruppel, S. Kinsey, B. Baumgarner
- BIOL 108.** Use of CDNB assay to determine calreticulin domain responsible for autoacetylation. C. Nnebe, C. Thomas, L. Maynard
- BIOL 109.** Design of biomimetic antimicrobial peptide-polymer conjugates as building blocks for reactive/responsive membranes: A water purification approach. V. Ortiz Gomez, V. Rodriguez, E. Nicolau
- BIOL 110.** Effect of 4,4' DDT, 4,4' DDE, 4,4' DDD, and 2,4' DDD on dihydrotestosterone binding to and releasing from the androgen receptor. T. Resto, F. Dean, A. Chavez, V. Flores
- BIOL 111.** Synthesis and evaluation of Nebraska red derivatives for protein labeling studies. L. Lesiak, X. Zhou, C.I. Stains
- BIOL 112.** Tryptophan derivatives as novel fluorescent probes for studying protein conformational changes and DNA-protein interaction. P. Talukder, S. Chen, B. Roy, P. Yakovchuk, S. Hecht
- BIOL 113.** Photo-uncaging of reactive species and fluorescence with visible light and NIR. S. Dai, D. Yang
- BIOL 114.** Withdrawn.
- BIOL 115.** Molecular dynamics simulations of metabolite fibrils. P. Rehak, L. Vukovic, P. Kral
- BIOL 116.** Physiological and behavioral adaptations of *Vibrio cholerae* to fatty acids in a continuous culture (bioreactor) model. R.A. Boeger, A. Turgeson, D. Giles, B. Harris
- BIOL 117.** Binding mechanism study of coomassie brilliant blue species and bovine serum albumin. R.N. Ngo, C. Wei, E.A. Fabry
- BIOL 118.** Using comb-branching DNA to construct deoxyribozyme-based biosensors. M.R. Polaske, E. Teselle, D.A. Baum
- BIOL 119.** Effects of heterocyclic diamidine antiparasitic agent binding to DNA on restriction enzyme kinetics. T.M. Rodriguez, S.A. Winkle
- BIOL 120.** Developing FRET assays to study the binding and regulation of fibroblast growth factor to its receptor. M. Mohale
- BIOL 121.** Mechanistic studies of StyA1 styrene monooxygenase from *Rhodococcus Opacus*. J.L. Diaz, G.T. Gassner, d. Tischler
- BIOL 122.** Development of a fluorescence polarization assay for RhII. N.R. Rexrode, J. Taffin, N. Lam, R. Nagarajan
- BIOL 123.** Bioluminescence and photoluminescence properties of the earthworm *Eisenia lucens*. P. Taborsky, O. Pes
- BIOL 124.** Toward Raman-based diagnostics for amatoxins: Synthetic, computational, and spectroscopic studies on analogs for the substituted tryptathionine sulfoxide core of amanitins, the peptide toxins of *Amanita phalloides*. K. Yniguez, T.G. Moreno, A. Ringer McDonald, S.C. Eagon, E. Jones
- BIOL 125.** Hyper obesity suppression by the products of *Rhinacanthus nasutus*: A study in rats. T. Kedam
- BIOL 126.** Energy depletion in vitro potentially caused immunosuppression: A multi-omics characterization of pathogenic threat in spaceflight. N. Chakraborty, A. Cheema, A. Gautam, S. Miller, A. Hoke, M. Jett, R. Hammamieh
- BIOL 127.** Structural analysis of tau peptide interactions with lipid membranes using Fourier transform infrared spectroscopy. P. Engen, L. Masterson
- BIOL 128.** Growth based complementation assay in *E. coli* for inhibitor screening of *S-adenosylmethionine synthetase*. G.G. Parungao, R.M. Blumenthal, R.E. Viola
- BIOL 129.** Effect of the antimicrobial peptide combi-2 on vesicles of membrane mimicking systems of normal and cancer cells. B.M. Almarwani, A. Sunda-Meya, N. Phambu
- BIOL 130.** Quantification of the minimum numbers of TLR2 agonists necessary to elicit a detectable immune response. W.J. Howitz, B. Moser, A. Esser-Kahn
- BIOL 131.** Development of a novel, neural-activity triggered split enzyme. B. O'Neill, S. Laughlin
- BIOL 132.** Enzyme-enzyme proximity stimulates iNOS activity. K.M. Fomchenko, D.J. Hirsh
- BIOL 133.** Investigating the conformational landscape in a signaling protein complex with optical tweezers. J.P. England
- BIOL 134.** Reactivity of bovine serum albumin with ligands of cisplatin analogs. N.C. Puckett, K. Williams
- BIOL 135.** Selective in vivo cell labeling mediated cancer targeting. H. Wang, K. Cai, R. Wang, J. Cheng
- BIOL 136.** Withdrawn.
- BIOL 137.** In vitro biochemical studies of the midgut serine protease AaSPVII of the Zika vector *Aedes aegypti*. J.T. Nguyen, A. Rascon
- BIOL 138.** Withdrawn.
- BIOL 139.** Elucidating the temporal dynamics of caspase activity within the mitochondrial pathway of apoptosis. R.D. Reif, S. Morris
- BIOL 140.** Characterization of menaquinone-2. E. Magallanes, J.T. Koehn, B.J. Peters, C.N. Beuning, M. Zhu, D.C. Crick, D.C. Crans
- BIOL 141.** Allosteric inhibition via two-step enzyme isomerization of human herpesvirus protease protein-protein interaction decreases viral infectivity of Kaposi's sarcoma-associated herpesvirus in mammalian cells. T. Acker, J. Gable, M. Bohn, P. Jaishankar, A.R. Renslo, C. Craik
- BIOL 142.** Chemical imaging of neuron-astroglia interactions. A. Preston, J. Farr, S. Laughlin

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡Cooperative Cosponsorship

- BIOL 143.** Computational study of relative thermodynamic stability of mutant base pairs between keto, enol and deprotonated forms of guanine and thymine at DNA polymerase active site. **S.N. Maximoff**, J. Eloge, S. Kamerlin, J. Florian
- BIOL 144.** Dipyrimidine sequence library for determining the sequence dependence of UV-induced *cyclobutane pyrimidine dimer* formation. **C. Lu**, J.S. Taylor
- BIOL 145.** Direct observation of breathing dynamics at the mismatch induced DNA bubble by smFRET measurement. **T. Paul**, P. Mishra
- BIOL 146.** DNA Editing in DNA/RNA hybrids by adenosine deaminases that act on RNA. **Y. Zheng**, C. Lorenzo, P.A. Beal
- BIOL 147.** Probing RNA recognition by human ADAR2 using a high-throughput mutagenesis method. **Y. Wang**, P.A. Beal
- BIOL 148.** Successful screening of aptamers for an early diagnosis of a periodontitis. **B. Lee**, J. Park, Y. Ko, M. Gu
- BIOL 149.** Single-molecule FISH of specific mRNAs using click chemistry. **S.H. Rouhanifard**, A. Raj
- BIOL 150.** Dynamics of the *E. coli* beta clamp and its influence on DNA loading. **B. Koleva**, J. Baez, J. Conway, A. Wu, P.J. Beuning
- BIOL 151.** T4 DNA ligase-catalyzed polymerization of modified oligonucleotides: Discovery and application of a high-fidelity codon set to the evolution of modified aptamers. **Y. Lei**, D. Kong
- BIOL 152.** Design and synthesis of thiol cleavable self-immolative linkers and their conjugation to proteins. **C.M. Sadlowski**, N. Murthy
- BIOL 153.** Tools for controlled microdomain formation and protein localization in artificial phospholipid membranes. **A.K. Rudd**, N.K. Devaraj
- BIOL 154.** Site-Specific nanocluster synthesis in biomolecular hosts. **S. Teymorian**, A. West, M. Griep
- BIOL 155.** Fourier transform infra red spectroscopy based spectral biomarker identification: Applications in classifying lung cancer subtypes. **A. Sarkar**, A. Sadhu, S.B. Thakur
- BIOL 156.** Withdrawn.
- BIOL 157.** ROS responsive self-cyclization for hydroxyl radical detoxification. **J. Liu**, S. Abdul Salam, H. Zhu, E.J. Merino
- BIOL 158.** New design for twin reactive oxygen species activated anti-tumor agents. **H. Zhu**, S. Abdul Salam, J. Liu, E.J. Merino
- BIOL 159.** Investigation of catalytic activity of stable  $\beta$ -keto-acyl-ACP substrate analogs in quorum sensing signal synthesis. **N. Lam**, D. Dudekula, I. Csik, N. Collingwood, E.C. Brown, R. Nagarajan
- BIOL 160.** Examination of essential genes involved in the biosynthesis of key metabolite by *Chlamydia trachomatis*. **T. Nguyen**, D.G. McCafferty
- BIOL 161.** Versatile site-specific modification of native protein N termini using a panel of engineered peptide ligases. **A. Weeks**, J.A. Wells
- BIOL 162.** Role of miRNAs in chick retina regeneration. **N.G. Burns**, A. Luz-Madrigal, J. Shi, S. Sreeskandarajan, L. Liu, P. Tsonis, C. Liang, K. Del Rio-Tsonis

- BIOL 163.** Novel porphyrin derivatives for photodynamic therapy. **T.E. Hayes**, T. White, M.E. Scarbrough, J.E. Bradshaw

## MONDAY MORNING

### Section A

Moscone Center  
131

#### Nucleic Acid Therapeutics: Mechanisms & Applications

M. Manoharan, *Organizer*  
M. J. Damha, *Presiding*

8:00 Introductory Remarks.

8:10 **BIOL 164.** Design and assembly of artificial proteins using nucleic acid hybridization. **J. Wengel**

8:45 **BIOL 165.** This is your brain on antisense oligonucleotides: Distribution, activity and application to the treatment of severe neurodegenerative disease. **E.E. Swayze**

9:20 **BIOL 166.** Applying the chemist's toolbox for studying nucleic acid structure and function. **M.J. Damha**, H. Abou Assi, D. O'Reilly, E. Malek-Adarnian, M. Habibian, D. Vlaho, J. Bogojewski, S. Jana, S. Martinez-Montero, C. Gonzalez

9:55 Intermission.

10:10 **BIOL 167.** Advances in RNAi therapeutics: Chemistry, mechanism and applications. **M. Manoharan**

10:45 **BIOL 168.** Structure-based insights into stability, activity and protein interactions of chemically modified oligonucleotides. **M. Egli**

### Section B

Moscone Center  
132

#### Early Career Investigators in Biological Chemistry

L. Hedstrom, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 **BIOL 169.** Withdrawn.

8:55 **BIOL 170.** Introduction of D-glutamate at a key site of A $\beta$ 42 stabilizes a soluble aggregation intermediate and enhances toxicity. **J.A. Raskatov**, C.J. Warner, S. Dutta, A. Foley

9:15 **BIOL 171.** Human monomeric insulin derived from cone snail venoms. **D. Chou**

9:35 **BIOL 172.** Chemically modified macrophages for cancer imaging and drug delivery. **M. Mingroni**, J.J. Elliott, J. Hardie, M.E. Farkas

9:55 Intermission.

10:05 **BIOL 173.** Development of peptide-based tools to study quorum sensing in streptococci. **Y. Yang**, B. Koirala, C.R. Bikash, N.R. Phillips, L.A. Sanchez, S.R. Hamry, Y. Tai-Gan

10:25 **BIOL 174.** Chemical biology strategies illuminating how the proteostasis network modulates evolutionary excursions in sequence space by RNA viruses. **M. Shoulders**

10:45 **BIOL 175.** Profiling endogenous protein phosphatase activity using direct activity probes. **C.I. Stains**

11:05 **BIOL 176.** Pushing click chemistry to its limits: An in-vitro sample generation pipeline for high-throughput single-molecule FRET-based screening of proteins and ribosome-bound nascent chain libraries. **K.M. Hamadani**, P. Wu, J. Cate, S. Marqusee

### Science for a Sustainable Energy Future

#### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG, ORGN and PROF*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

*Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCC*

### Cellulose Structure & Biosynthesis

#### Mechanism of Synthesis

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## MONDAY AFTERNOON

### Section A

Moscone Center  
131

#### Nucleic Acid Therapeutics: Mechanisms & Applications

M. Manoharan, *Organizer*  
M. Egli, *Presiding*

1:00 Introductory Remarks.

1:05 **BIOL 177.** New roles for G-quadruplexes in gene expression and infectious disease. **C.J. Burrows**, A. Fleming, Y. Ding

1:40 **BIOL 178.** Advances in the chemistry of microRNA-based therapeutics. **C. Allerson**

2:15 Intermission.

2:30 **BIOL 179.** Potent delivery of LUNAR™ nanoparticles containing synthetic mRNA for therapeutic protein expression. **P. Chivukula**

3:05 **BIOL 180.** Homologous DNA recombination in vivo with the delivery of Cas9 ribonucleoprotein and donor DNA complexed to gold nanoparticles. **K. Lee**, M. Conboy, F. Jiang, H. Kim, M. Dewitt, H. Park, J. Corn, J. Doudna, I. Conboy, N. Murthy

### Rising Star Award Symposium

*Sponsored by WCC, Cosponsored by BIOL and PRES*

### Science for a Sustainable Energy Future

#### Chemical & Biological Conversions Approaches to Energy Conversion

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG, ORGN and PROF*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

*Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCC*

### ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer

*Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY*

### Cellulose Structure & Biosynthesis Synthase Trafficking & Synthesis of plant (1->3),(1->4)-D-glucans

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

### Undergraduate Research Posters

#### Biochemistry

*Sponsored by CHED, Cosponsored by BIOL and SOCED*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

L. Hedstrom, *Organizer*

8:00 - 10:00

**32, 34, 48, 92, 106, 133, 135, 141, 161.** See previous listings.

**203, 206, 228, 256, 279, 292, 318, 321, 324.** See subsequent listings.

## TUESDAY MORNING

### Section A

Moscone Center  
131

### Metalloprotein-Initiated Signaling Transduction Response to Redox Stress

*Cosponsored by INOR*

A. Liu, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 **BIOL 181.** Screening of small molecule inhibitors of human p19<sup>INK4</sup>. **H. Osada**

8:40 **BIOL 182.** Enzymology of hydrogen sulfide signaling. **R. Banerjee**

9:15 **BIOL 183.** Probing heme trafficking, signaling, and dynamics in health and disease. **A.R. Reddi**

9:50 Intermission.

10:00 **BIOL 184.** Enzyme mechanism-driven DNA-protein crosslinks during attempted DNA repair. **B. Dimple**

10:35 **BIOL 185.** Signal transduction mechanisms in heme-dependent gas-sensing transcription factors. **J.N. Burstyn**, J.P. Hines, H. Bowman, M.R. Dent, D.J. Stevens

11:10 **BIOL 186.** How metal-dependent oxidation can redirect AAA+ proteases to new protein substrates. **B. Ah**, B. Brown, S. Calmant, J. Kardon, T. Baker

## Section B

Mosccone Center  
132

## Chemical Epigenetics

D. G. Fujimori, *Organizer, Presiding*

## 8:30 Introductory Remarks.

**8:35 BIOL 187.** Advanced chemical genetics for epigenetics: Bump-and-hole and PROTACs. A. Ciulli

**9:05 BIOL 188.** Regulation of catalysis and novel inhibitor chemotypes for histone demethylases. D. G. Fujimori

**9:35 BIOL 189.** Discovery of A-395: A novel protein-protein interaction inhibitor of EED. B. Pappano

## 10:05 Intermission.

**10:20 BIOL 190.** Development of irreversible small molecule epigenetic modulators to block menin-MLL in cancer. J.E. Grembecka, D. Borkin, S. Klossowski, H. Miao, K. Kempinska, J. Pollock, T. Purohit, B. Wen, D. Sun, T. Cierpicki

**10:50 BIOL 191.** On the mechanisms of generation, recognition, and erasure of DNA and histone modifications. X. Cheng

## Cellulose Structure &amp; Biosynthesis

## Biochemistry &amp; Cellular Biology

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

## ACS Award for Computers in Chemical &amp; Pharmaceutical Research: Symposium in honor of Yvonne C. Martin

*Sponsored by COMP, Cosponsored by BIOL, MEDI and WCC*

## Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes &amp; Future Challenges

*Sponsored by INOR, Cosponsored by BIOL*

## TUESDAY AFTERNOON

## Section A

Mosccone Center  
131

## ACS Chemical Biology Award Symposium

*Cosponsored by WCC*

A. Weidmann, *Organizer*

L. L. Kiessling, *Organizer, Presiding*

## 2:00 Introductory Remarks.

**2:05 BIOL 192.** Profiling acetyltransferases to understand cancer's metabolic cues. J.L. Meier

**2:35 BIOL 193.** Privileged First-Responding redox sensors in isozyme-specific apoptosis regulation. Y. Aye

**3:05 BIOL 194.** Chemical tools for probing bacterial peptidoglycan activation of the innate immune system. C.L. Grimes

**3:35 BIOL 195.** Cross-reactive cysteine modifications. B.R. Martin

## 4:05 Introduction of Awardees.

**4:10 BIOL 196.** Activity-based proteomics – protein and ligand discovery on a global scale. B.F. Cravatt

## ACS Award for Computers in Chemical &amp; Pharmaceutical Research: Symposium in honor of Yvonne C. Martin

*Sponsored by COMP, Cosponsored by BIOL, MEDI and WCC*

## Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes &amp; Future Challenges

*Sponsored by INOR, Cosponsored by BIOL*

## TUESDAY EVENING

## Section A

Mosccone Center  
West Hall

## Current Topics in Biochemistry

L. Hedstrom, *Organizer*

## 7:00 - 9:00

**BIOL 197.** Label free proteomics profiling unveils downregulation of thrombin mediated signaling and aggregation of human platelets upon treatment with thrombin inhibitors. C.C. Clement, A. Babinska, J. Gonzalez

**BIOL 198.** Allosteric and catalysis of UDP-sugar pyrophosphorylases suggest a new approach to anti-parasitic treatments. J.T. Cramer, J.I. Fühling, F.H. Routier, A. Lamerz, J. Schneider, P. Baruch, R. Gerardy-Schahn, R. Fedorov

**BIOL 199.** Development of novel substrate inhibitors of bacterial phospholipid biosynthesis as new antibacterial agents. P. Saklani, J. Luo, D.P. Brown

**BIOL 200.** Analysis of chemotypes in retail *Cannabis strains*. R.M. Hyslop, C.E. Brown, A. Schwabe, S. Desa, M. McLaughlin

**BIOL 201.** Novel application of TEC-disulfide replacement showcased in the synthesis of SFTI-1. J. Barbaretta, A.J. Wommack

**BIOL 202.** Self-assembled synthetic ion channels. D. Yang

**BIOL 203.** Discovering and manipulating miRNA biology utilizing click-chemistry. D. Lorenz, A. Garner

**BIOL 204.** Synthesis & spectroscopic characterization of xenometabolite, biomarkers for the diagnosis of fatty acid  $\beta$ -oxidation disorder. H.F. Sobhi, S. Adams, M. Ekwuru, P. Teasley

**BIOL 205.** Study of aminoglycosides binding to mitochondrial rRNA. L. Garmo, P. Madubashitha, E. Jones, C.S. Chow

**BIOL 206.** Bioorthogonal metal catalysed transformation of dehydroalanine in peptides and proteins. A. de Bruijn, G. Roeloffs

**BIOL 207.** *In vitro* anti-neoplastic activity of specific phytocannabinoids of *Cannabis sativa*. R.M. Hyslop, A. Saviola, S. Bydalek, C.E. Brown, S. Desa, M. Thomas, A. Magiotta, S. Mackessy, C. Hansen, M. Brown

**BIOL 208.** Quantifying the relative amounts of PrP polymorphisms present in prions isolated from heterozygous prion-infected animals. C.J. Silva, M.L. Erickson-Beltran, C. Hui, J.J. Badiola, J.R. Requena, R. Bolea

**BIOL 209.** Novel application of scaffold treatment procedure with minimum side effects by using an engineered biodegradable scaffold. Y. Lo, G. Ren, E.J. Parish, H. Honda

**BIOL 210.** Novel approaches to the developmental relationship of retinol binding protein and clinical phenotype of coronary heart disease. L. Lv, E.J. Parish, D. Ren, G. Ren, H. Honda

**BIOL 211.** Novel application of new methodology in the treatment of enzyme as a preparation method for biocompatible material. G. Ren, E.J. Parish, Y. Lo, H. Honda

**BIOL 212.** *In vitro* activation of purified *Aedes aegypti* mosquito wild-type Early Trypsin (AaET) versus the inactive AaET mutant. R.M. Lucero, A. Rascon

**BIOL 213.** Importance of Ser26 in the folate half-reaction of *E. coli* MTHFR. R. Li

**BIOL 214.** Interfacial interactions of glycine and short glycine peptides in confined spaces. K. Doucette, P. Chaiyasit, D.L. Calkins, K. Martinez, M.J. Fisher, D.C. Crans, A. Tongraar

**BIOL 215.** Developing small molecule adjuvants from contact allergens. S. Kim, A. Esser-Kahn

**BIOL 216.** Synthesis of 2-Arachidonoylglycerol: An endocannabinoid with potential as an anti-cancer drug. S. Bydalek, R.M. Hyslop

**BIOL 217.** Purification and characterization of adenosine aminohydrolases from *Pisum Sativum*. L. Thicklin, P.C. Kline

**BIOL 218.** Photoactivatable innate immune receptor for optogenetic inflammation. B. Moser, A. Esser-Kahn

**BIOL 219.** Investigation of Cu(II) complexation with fourth microtubule-binding repeat of tau protein by ESI-MS, IMS-MS and NMR. S. Ahmadi, S. Zhu, R. Dutta Majumdar, R. Soong, D. Wilson, A. Simpson, H. Kraatz

**BIOL 220.** Conformational sampling and non-dimer aggregates of HIV-1 protease containing darunavir promoted mutations. L. Pham, Z. Liu, L. Hu, X. Huang, A. Bhatt, K. Bentz, T. Tran, D. Savin, R. McKenna, G. Fanucci

**BIOL 221.** Synthesis of fluorogenic phosphatidylcholine derivatives for kinetic studies of phospholipase A2 enzymes. L. Zelaya, J. Hajdu, T.G. Minehan

**BIOL 222.** Enhancing efficacy of protease drugs through site-directed mutagenesis. A. Amorello, A. Batt, T. Baird

**BIOL 223.** Investigating a new paradigm in melanocortin signaling and energy balance. V. Chen

**BIOL 224.** Affinity ligand purification for pyridine dinucleotide binding proteins. D. Andy, J. Slama, T. Walseth

**BIOL 225.** Elucidating Met18 functionality in iron-sulfur cluster biogenesis pathway. C. Lee, A. Vo, J. Cosman, D. Perlstein

**BIOL 226.** Engineering a polymerase for accurate bypass of damaged DNA samples. T. Coulther, P.J. Beuning, M.J. Ondrechen

**BIOL 227.** Topology study of one CpTat component, Hc1f106, in resting and precursor binding state. A.G. Habtemichael, G. Thomas, C. Dabney-Smith

**BIOL 228.** Single molecule imaging of protein activity in living cells. N. Pinkin, J. Smith, B. Liu, C.J. MacNevin, K.M. Hahn

**BIOL 229.** Assessing the functionality of active site threonine substituted trypsin with disulfide residue serine variants. J. Schuder, B. Caswell, T. Baird

**BIOL 230.** HPLC analysis of sulfation of dopamine derivatives by SULT1A3. K. Reed, J. Rogowiec, M.L. Cafiero, L.W. Peterson

**BIOL 231.** Cloning of IME4 to establish a new model system to probe N6-methyladenosine modification of mRNA. A. Barnaby, C. Schoose, J. Dunkle

**BIOL 232.** Gene expression in a synthetic tissue of artificial cells. H. Niederholtmeyer, N.K. Devaraj

**BIOL 233.** Cobalticinium derivatives as mediators for bioelectrochemical catalysis with P450. W. Bae

**BIOL 234.** Characterization of Sup35, Rnq1, and Ure2 cotranslational prion aggregation in *Saccharomyces cerevisiae*. B.T. Allwein, D. Cameron

**BIOL 235.** Construction of hydrophobic nanoparticles based surface plasmon resonance biosensor for lysozyme detection. Y. Saylan, F. Yilmaz, A. Derazshamshir, A. Denizli

**BIOL 236.** Photoswitchable immunostimulators for optical control of TLR activity. A. Love, T.J. Albin, A.P. Esser-Kahn

**BIOL 237.** Solid phase peptide cyclization and development of PRC2 Inhibitors. G. Zhang

**BIOL 238.** Relationship between metal binding and protein stabilization of an ancestral  $\beta$ -crystallin from the *Ciona intestinalis tunicata*. N. Kozlyuk, S. Sengupta, J. Bierma, R.W. Martin

**BIOL 239.** Using light and a photoactivated insulin depot to control insulin release and blood glucose in-vivo. B.R. Sarode, K. Kover, P.Y. Tong, C. Zhang, S.H. Friedman

**BIOL 240.** C9orf72 repeat expansion disrupts nucleocytoplasmic transport. S. Bifulco, K. Zhang

**BIOL 241.** Development of highly specific carbohydrate-nucleic acid reagents for lectin recognition. C. Gordon, J. Niu, A. Pusuluri, A. Csordas, C.J. Hawker, H. Soh

**BIOL 242.** Synthesis of solvatochromic probes to study the effect of host microenvironment on mycobacterial cell wall dynamics during infection. S. Keyser, A. Utz, C.R. Bertozzi

**BIOL 243.** Cryptic antibiotic discovery in the filamentous cyanobacterium *Scytonema* sp. UTEX LB 1163. M.L. Hillwig

**BIOL 244.** Chemo-enzymatic synthesis of an effective bifunctional NAADP analog for isolation and purification of the NAADP receptor. P. Su, T. Walseth, J. Slama

**BIOL 245.** Ribonucleotide reductase enzyme a target for titanium complexes: A strategy to cure cancer. K. Gaur, S.C. Perez, E. Akam, E. Tomat, M. Saxena, R.K. Sharma, A.D. Tinoco

**BIOL 246.** Inhibition of cancer cell viability and selective inhibition of lysyl oxidase with small-molecule inhibitors. K. Johnston, K.M. Lopez

**BIOL 247.** Plausible reaction mechanism of the deamination of histidine catalyzed by histidine-ammonia lyase. S. Minkowicz, Y. Sheng

**BIOL 248.** Unraveling the role of ligands in the hydrogen evolution mechanism catalyzed by [NiFe] hydrogenases. S. Qiu, L.M. Azofra, D.R. MacFarlane, C. Sun

**BIOL 249.** Highly responsive and selective fluorescent probes to image ATP in live cells. Y. Fan, H. Ai

‡ Cooperative Cosponsorship

- BIOL 250.** Design of a two-step fluorogenic strategy for tyrosine specific labeling of proteins. **M. Shadmehr, M. Stagg, J.C. Jewett**
- BIOL 251.** Development of a direct activity probe for a critical regulator of metabolic signaling. **T. Hamada, J.R. Beck, G.R. Casey, M. Kelly, X. Zhou, C.I. Stains**
- BIOL 252.** Spatial and temporal control of lysine acetyl transferases (KATs): Ligand gated split KATs. **C.S. de Silva**
- BIOL 253.** Determination of metal affinities of *Halobacterium salinarum* cysteinyl-tRNA synthetase. **L. Cobani, J. Kuhlmeier, J. Rosentretter, C.M. Evilia**
- BIOL 254.** Irradiation-controlled disassembly of peptide hydrogels and dye release via photolabile Lys(Nvoc). **J. Pellegrino, R.M. Abaskharon, F. Gai**
- BIOL 255.** DNA repair proteins XLF and XRCC4 interact with telomeric proteins TRF1 and RAP1. **P. Zaibaq, M. Guirette, E. Castle, K. Vu, N. Fahmy, J. Jabbur, A. Ribes-Zamora**
- BIOL 256.** Evolved luciferases improve activity with pyridone luciferins. **B.S. Zhang, K.A. Jones, D.C. McCutcheon, J.A. Prescher**
- BIOL 257.** Development of anti-fungal  $\alpha/\beta$ -peptides mimetics of the antimicrobial peptide Aurein 1.2. **M. Lee, N. Raman, A. Rodriguez-Lopez, S.H. Gellman, D.M. Lynn, S. Palecek**
- BIOL 258.** Engineering Modular Polyketide Synthases for Generation "Drop In" Biofuels. **C.B. Bailey, A. Zargar, R. Anayah, S. Curran, L. Katz, J.D. Keasling**
- BIOL 259.** Development of *Streptomyces* as heterologous hosts for the production of branched fatty acids for biofuels. **R. Krishna, J. Blake-Hedges, R. Haushalter, J.D. Keasling**
- BIOL 260.** Synthesis and biochemical assessment of hydroxytyrosol. **I. Kady, E. Onobun, S. Mumford**
- BIOL 261.** Proline-rich peptides inhibit polymerization of sickle cell hemoglobin. **B.B. Brennan, L. Steenberge**
- BIOL 262.** Investigation of the effect of gold nanoparticles on the structure and catalytic function of *Escherichia coli* prolyl-tRNA synthetases. **S. Mitchell, O. Hurst, A. Lato, J.A. Dahl, S. Hati**
- BIOL 263.** LGN protein purification for X-ray crystallography. **A. Howard, A.H. Smith, R. Elnicki, J. Galardi, L.B. Cook, B.M. Sreenilayam**
- BIOL 264.** Measuring metabolite consumption by *Sinorhizobium meliloti* using 1H NMR spectroscopy and time domain Complete Reduction to Amplitude Frequency Table (CRAFT). **D.P. Soulsby, D.B. Wacks, N. Stubb**
- BIOL 265.** Development of a cannabinoid-based Cell-in-a Box® therapeutic system targeted toward malignant tumors. **R.M. Hyslop, C.E. Brown, A. Magiotta, B. Morgan, M. Brown, T. Sherman, D. Petty, S. Desa, J. O'Neil, S. Fiora, K. Kellogg, C. Hansen, S. Bydalek, T. Cale, C. Laster, J. Folsom, A. Hawkinson**
- BIOL 266.** Cartilage: Function and supramolecular structure. **F. Horkay, E.K. Dimitriadis, I. Horkayne-Szakaly, P.J. Bassar**
- BIOL 267.** Photosensitized oxidation of biotinylated dyes. **R.A. Haack, Q. Ruan, K.M. Swift, S. Tetin**
- BIOL 268.** Purification of a putative tartrate-resistant acid phosphatase from *Penicillium spinulosum*. **B.A. Schofield, J. Carsella, S.J. Bonetti**
- BIOL 269.** Evaluation of potential functions of two previously uncharacterized bacterial GNAT threonine N-acetyltransferases from *Clostridium difficile* and *Staphylococcus aureus*. **J. Baumgartner, D. Tran, M.L. Kuhn**
- BIOL 270.** Discovery of endogenous and synthetic ligands for orphan nuclear receptor TLX. **A.C. Cao, P. Kandel, M. Maletic-Savatic, D. Young**
- BIOL 271.** Synthesis, characterization and biological studies of cobalt(II) Schiff bases derived from *o*-vanillin with series of aromatic amines. **R.O. Shaibu**
- BIOL 272.** Spectroscopic and computational studies on the comparative interaction of cationic single-chain and gemini surfactants with hen egg white lysozyme. **R. Patel**
- BIOL 273.** Evaluating Fmoc-amino acids as butyrylcholinesterase inhibitors. **J.P. Schwans, J. Ramirez, J. Gonzalez**
- BIOL 274.** -2-Himachalen-6-ol: A novel anticancer sesquiterpene unique to the Lebanese wild carrot. **R.I. Taleb, C. Daher, M. Mroueh, M. ElSibai**
- BIOL 275.** Reverse transport of 1-Methyl-4-Phenylpyridinium (MPP+) is mediated by extracellular calcium in dopaminergic MN9D cells. **V.Q. Le, K. Wimalasena, S. Mapa**
- BIOL 276.** Glycoconjugated site-selective DNA-methylating agent targeting glucose transporters on glioma cells. **M. Buchanan, N. Chase, N. Neill, M. White, C. Kelly, K. Mastro-Kishton, L. Chauvigne-Hines, T. Goodwin, A. Mclver, L.J. Bartolotti, A. Bourdelais, A. Frampton, S. Varadarajan**
- BIOL 277.** Disabling WTA to kill MRSA with beta-lactam antibiotics. **C.V. Rice, M. Foxley, M. Xiao, S. Wright, S. Strange**
- BIOL 278.** Heteromultivalency in melanoma with GPCR ligands: Target validation and use of orthogonal chemistries towards a heterobivalent scaffold. **J.A. Rodriguez Corrales, D.H. Clark, P. Kohnke, J.S. Josan**
- BIOL 279.** NitroTyrosine: Gain-of-function alterations to calcium signaling. **J. Porter, R.A. Mehl**
- BIOL 280.** Traversing the challenges of extended conjugation: Bacteriochlorins and aza-bodipys, a new era in photomedicine. **M. Cheng, R.W. Boyle**
- BIOL 281.** Bioelectrochemical detection of endocrine disrupting compounds. **A.L. Furst, A. Hoepker, M.B. Francis**
- BIOL 282.** Cytochrome c-induced permeabilization of cardiolipin-containing phospholipid membranes is induced through the selective interaction of cytochrome c with cardiolipin. **J.P. Kitt, D.A. Bryce, S.D. Minter, J.M. Harris**
- BIOL 283.** Correlation between melatonin and cortisol levels in hair and their validity as biomarkers. **A. Alarbi, W. Potter**
- BIOL 284.** Propargyl-linked antifolates potently inhibit US clinical *S. aureus* isolates with newly identified dfrG and dfrK resistance genes. **S.M. Reeve, A.C. Anderson, D. Wright**
- BIOL 285.** Development and application of novel small molecule calcium sensors for investigating neuronal activity. **A.A. Contractor**
- BIOL 286.** Engineering alternative radical rebound chemistry the  $\alpha$ KG oxygenase Factor Inhibiting Hypoxia Inducible Factor (FIH). **V.D. Chaplin, M. Knapp**
- BIOL 287.** Withdrawn.
- BIOL 288.** Determination of calcitriol-ligand complex formation using fluorescence spectroscopy. **C. Thomas**
- BIOL 289.** Isomerically pure tetramethylrhodamine voltage reporters. **P. Deal, E. Miller**
- BIOL 290.** Design and application of new voltage sensitive dyes for *Ex vivo* brain imaging. **R. Kulkarni, E. Miller**
- BIOL 291.** Withdrawn.
- BIOL 292.** Investigating active site dynamics in a thermophilic enzyme through FTIR and 2DIR spectroscopy. **T.D. Hill, H.H. Lepird, D.A. Price, S.D. Moran**
- BIOL 293.** Dynamics of thrombin generation and flux from clots during whole human blood flow over collagen/tissue factor surfaces. **S. Zhu, Y. Lu, T. Sinno, S. Diamond**
- BIOL 294.** Internally quenched synthetic peptides for the study of yeast Ste24p proteolytic activity. **E.A. Krautkramer, E. Hsu, C. Hrycyzna, M.D. Distefano**
- BIOL 295.** Tissue-specific ascariole production in the nematode *Caenorhabditis elegans*. **A.E. Akagi, P. Sternberg, F. Schroeder**
- BIOL 296.** Stable-on-the-table enzymes: Interlocking of laccase in Whatman filter paper. **C. Riccardi, C.V. Kumar, R. Kasi**
- BIOL 297.** Synthetic foldamers as inhibitors of A $\beta$  aggregation. **S. Kumar, A. Hamilton**
- BIOL 298.** Characterization of cold adaptation in Antarctic toothfish eye lens proteins. **J. Bierna**
- BIOL 299.** Host cell entry of Zika virus may be mediated by glycosaminoglycans. **S.Y. Kim, J. Zhao, X. Liu, L. Lin, X. Zhang, F. Zhang, R.J. Linhardt**
- BIOL 300.** Fibrinogen  $\alpha$ C (233-425): A model protein for characterizing cross-linking by the transglutaminase factor XIII. **K. Mouapi, J. Bell, K. Smith, R. Ariens, H. Philippou, M.C. Maurer**
- BIOL 301.** Withdrawn.
- BIOL 302.** Ionic interactions of collagen and thermosetting resin composites. **A. Lorts, A. Stewart, R. Quirino**
- BIOL 303.** Characterizing the atypical protein kinase 9 in *Plasmodium*. **A. Eubanks, R. Raphemot, E. Derbyshire**
- BIOL 304.** Withdrawn.
- BIOL 305.** Investigating the ability of small molecule gibberellins to inhibit the NF- $\kappa$ B pathway. **J. Annand, A.R. Henderson, A.K. Mapp, A.N. Koehler, C. Schindler**
- BIOL 306.** On the mechanism of slowing down cancer cell migration in the gold nanoparticles treatment. **Y. Wu, M.R. Ali, M.A. El-Sayed**
- BIOL 307.** Purification and kinetic assays of recombinant AaCHYMO from the *Aedes aegypti* female mosquito. **O.E. Burata, A. Rascon**
- BIOL 308.** Characterizing the genetic fitness landscape of virus-like particles. **E. Hartman, C. Jakobson, D.T. Ercek, M.B. Francis**
- BIOL 309.** Mechanistic studies in Flavin Dependent Thymidylate Synthase (FDTs). **K.U. Karunaratne, M. LeFebvre, J. Villalobos, A. Kohen**
- BIOL 310.** Insight into the mechanism of a bifunctional diguanylate cyclase enzyme in *Agrobacterium vitis*: A catalytic loop 6, nitric oxide signaling and bacterial biofilm formation. **D. Williams, N.M. Nesbitt, E.M. Boon**
- BIOL 311.** Investigation of oligomeric assemblies within the claudin tight junction protein family: A combined computational and experimental approach. **D. Shastry, F.J. Irudayanathan, S. Nangia, P. Karande**
- BIOL 312.** Design, synthesis, and conformational analysis of proposed  $\beta$ -turn mimics from isoxazoline-cyclopentane aminols. **M. Memeo, M. Mella, V. Montagna, P. Quadrelli**
- BIOL 313.** Design and synthesis of lysine-56 targeting covalent inhibitors of HSP72. **J. Pettinger, M. Cheeseman, Y. Le Bihan, M. Widy, R.L. van Montfort, K. Jones**
- BIOL 314.** Exploiting the peptide-binding site to design inhibitors of the KDM4 subfamily. **J. Maw, Y. Le Bihan, N. Mok, K. Boxall, A. Tumber, V. Bavetsias, J. Blagg**
- BIOL 315.** Repurposing an aminomutase from *Taxus* plants: Enzymatic conversion of cinnamate epoxides into ring-opened, chiral phenylserines. **P.K. Shee, N. Ratnayake, O. Goethe, E.E. Onyeozili, K.D. Walker**
- BIOL 316.** Branched polyethylenimine disables teichoic acid function leading to altered morphologies of Gram-positive bacteria. **M. Foxley, S. Wright, M. Xiao, S. Strange, C.V. Rice**
- BIOL 317.** Protein power: Enzyme-hydrogels for efficient sugar-to-power conversion in a biofuel cell. **A. Ghimire, A. Pattanammattel, R. Kasi, C.V. Kumar**
- BIOL 318.** Protein phosphor materials: A new generation of biodegradable, multi-functional, protein-based, hydrogels for white emission, sensing of small molecules, and detection of pH over a wide range (3-11). **K.R. Benson, A. Ghimire, R. Kasi, C.V. Kumar**
- BIOL 319.** Inhibition of fibrillar assemblies of l-phenylalanine by crown ethers: A potential approach toward phenylketonuria. **D. Banik**
- BIOL 320.** Assay interference and off-target liabilities of reported histone acetyltransferase inhibitors. **J.L. Dahlin, K.M. Nelson, J.M. Strasser, D. Barsyte-Lovejoy, J.H. Shrimp, J.L. Meier, C.H. Arrowsmith, P. Brown, J.B. Baell, M.A. Walters**
- BIOL 321.** Epigenetics and O-GlcNAc cycling: The relationship between dynamic O-linked glycosylation and transcriptional regulation. **K.R. Harwood, J. Hanover**
- BIOL 322.** Withdrawn.
- BIOL 323.** Enzymatically self-assembled functional RNA nanostructures and their therapeutic applications. **H. Kim, J. Lee**
- BIOL 324.** Withdrawn.
- BIOL 325.** Withdrawn.

## WEDNESDAY MORNING

## Section A

Moscone Center  
131

## Self-Assembly of Small Molecules in the Cellular Milieu

B. Xu, *Organizer, Presiding*

## 8:30 Introductory Remarks.

**8:35 BIOL 326.** Molecular prosthetics for missing ion transport proteins. M.D. Burke

**9:10 BIOL 327.** Protein responsive supramolecular assembly for live cell imaging. I. Hamachi

**9:45 BIOL 328.** Enzyme-instructed self-assembly in cellular milieu: Bioinspired targeting of cancer cells without drug resistance. H. Wang, Z. Feng, J. Zhou, X. Du, B. Xu

## 10:20 Intermission.

**10:35 BIOL 329.** Self-assembly of chemotherapeutic colloidal drug aggregates. M.S. Shoichet, A. Ganesh, C. McLaughlin, J. Logie, S.C. Owen, B. Shoichet

**11:10 BIOL 330.** Mechanism of cell death induced by a small-molecule forming fibrils. O. Julien, J.A. Wells

## Section B

Moscone Center  
132

## Mid-Career Investigators in Biological Chemistry

L. Hedstrom, *Organizer*

C. I. Stains, *Presiding*

## 8:30 Introductory Remarks.

**8:35 BIOL 331.** Nanobody activation immunotherapeutics. B. McNaughton

**8:55 BIOL 332.** Highly selective and sensitive fluorescent probes for superoxide, peroxyxynitrite, hypochlorous acid, hydrogen peroxide and hydroxyl radical. J. Hu, N. Wong, T. Peng, X. Bai, M. Lu, S. Ye, D. Yang

**9:15 BIOL 333.** Allosteric modulation of G protein coupled receptors: The P2Y1 receptor as an example. Z. Gao, K.A. Jacobson

**9:35 BIOL 334.** Role of intrinsic dynamics on substrate binding and catalysis of Escherichia coli prolyl-tRNA synthetase. S. Hati

## 9:55 Intermission.

**10:05 BIOL 335.** Chemical probes for the investigation of natural product assembly: Biosynthetic insights and novel opportunities. M. Tosin, C. Ho, I. Wilkening, E. Riva, J. Havemann

**10:25 BIOL 336.** Targeting RNA with branched peptide boronic acids: Unnatural amino acids, molecular recognition, and in vitro activity against HIV-1 RRE RNA. W.L. Santos, Y. Dai, J. Wynn, A. Peralta, D. Rekosh, M. Hammarskjöld

**10:45 BIOL 337.** Chemical biology tools to study protein-protein interactions of the fatty acid synthase – updates from the interface. M.D. Burkart

## Chemical Biology: Enabling Drug Discovery

*Sponsored by ORGN, Cosponsored by BIOL*

## WEDNESDAY AFTERNOON

## Section A

Moscone Center  
131

## Chemical Probes for Bacterial Imaging

*Cosponsored by WCC*

E. E. Carlson, *Organizer, Presiding*

## 2:00 Introductory Remarks.

**2:05 BIOL 338.** Chemical technologies for illuminating Mycobacterium tuberculosis. K.E. Beatty

**2:50 BIOL 339.** Probing the dynamics of peptidoglycan biosynthesis with Fluorescent D-amino Acids (FDAAs). M. Van Nieuwenhze

## 3:35 Intermission.

**3:50 BIOL 340.** Activity-Based probes for selective imaging of an essential PBP in Streptococcus pneumoniae. E.E. Carlson

**4:35 BIOL 341.** Chemical insights into methicillin-resistant Staphylococcus aureus. S. Walker

## 5:20 Concluding Remarks.

## Section B

Moscone Center  
132

## Graduate Student &amp; Postdoctoral Fellow Symposium

L. Hedstrom, *Organizer*

W. L. Santos, *Presiding*

## 2:00 Introductory Remarks.

**2:05 BIOL 342.** Utilizing selenocysteine for expressed protein ligation and bioconjugations. J. Liu, Q. Chen, S. Rozovsky

**2:20 BIOL 343.** Genetic targeting of small molecule voltage indicators using SpyTag/SpyCatcher. V. Grenier, E. Miller

**2:35 BIOL 344.** Translating unnatural amino acids with phenotypically-diverse computationally-engineered EF-Tu variants. V. Cox, E. Gaucher

**2:50 BIOL 345.** Constructing de novo small molecules responses via signal-induced protein proximity in mammalian cells: Chemically engineer cell behaviors & signaling. G. Zeng, W. Xuan, H. Li, R. Zhang, Y. Wei, L. Breden, F. Liang, W. Wang

**3:05 BIOL 346.** Direct proximity tagging of small molecule proteins targets. Z.B. Hill, S.B. Pollock, M. Zhuang, J.A. Wells

## 3:20 Intermission.

**3:35 BIOL 347.** Development of novel far-red to near-infrared fluorophores for chemical biology. X. Zhou, L. Leisak, R. Lai, J.R. Beck, J. Zhao, C. Elowsky, H. Li, C.I. Stains

**3:50 BIOL 348.** Probing innate immunity with tunable synthetic glycopeptides. M. Zhou, C. Delaveris, J. Kramer, C.R. Bertozzi

**4:05 BIOL 349.** Monitoring thioredoxin redox in live cells with a genetically encoded red fluorescent protein biosensor. Y. Fan, H. Ai, M. Makar

**4:20 BIOL 350.** SAMDI Mass spectrometry assay for the high-throughput profiling of protein interaction domains with peptide ligands and its application to chromodomains. P.T. O'Kane, M. Mrksich

**4:50 BIOL 351.** Generation of allosteric chaperones for Glucose-6-Phosphate Dehydrogenase (G6PD) deficiency. S. Hwang

## THURSDAY MORNING

## Section A

Moscone Center  
131

## Graduate Student &amp; Postdoctoral Fellow Symposium

L. Hedstrom, *Organizer*

M. L. Kuhn, *Presiding*

## 8:30 Introductory Remarks.

**8:35 BIOL 352.** Exploring vectorial chain translocation in assembly line polyketide synthases. M. Ostrowski, C. Khosla

**8:50 BIOL 353.** What machinery controls the release of peptide mimetics from endosomes? A genome-wide analysis. A. Steinauer, J.R. LaRochelle, R.F. Wissner, A. Schepartz

**9:05 BIOL 354.** Influenza hemagglutinin fusion domain by advanced NMR using novel orthogonal refinement and BICS curvature measurements. S.T. Smrt, A. Draney, J. Lorieu

**9:20 BIOL 355.** Discovery of a bacterial gene in the gut microbiome encoding metabolism of dietary lignans. E. Bess, J. Bisanz, P. Spanogiannopoulos, E. Waligurski, P. Turnbaugh

**9:35 BIOL 356.** Targeting phospholipase A2 to diminish inflammation by developing novel inhibitors. V. Mouchlis, J. McCammon, E.A. Dennis

**9:50 BIOL 357.** Investigating the Regiospecificity of an Unusual Bacterial Acyl-CoA Dehydrogenase. J. Blake-Hedges, J. Pereira, J. Chen, P.D. Adams, J.D. Keasling

## 10:05 Intermission.

**10:20 BIOL 358.** Characterization of a drug-inactivating enzyme from a prominent human gut microbe. N. Koppel, J. Bisanz, P. Turnbaugh, E.P. Balskus

**10:35 BIOL 359.** Investigating the molecular basis of algal-bacterial symbioses. R. Wang, M. Wilson, M. Seyedsayamdost

**10:50 BIOL 360.** Engineering protein structure and small molecule transport of the bacterial microcompartment. M. Slinger Lee, C. Jakobson, D.T. Ereck

**11:05 BIOL 361.** Structural insight from activity: Functional screening of the entire Arabidopsis GT1 family enables cheminformatic-bioinformatic predictions of glycosyltransferase reactions and protein features. C. Fehl, M. Yang, K.V. Lees, E. Lim, W. Offen, G.J. Davies, D. Bowles, S.J. Roberts, B.G. Davis

**11:20 BIOL 362.** Enzymatic mechanisms for decorating phenazine antibiotics from Lysobacter antibioticus. J. Jiang, Y. Zhao, S. Wright, L. Du

## BMGT

## Division of Business Development and Management

J. Bryant, *Program Chair*

## OTHER SYMPOSIA OF INTEREST:

**Entrepreneurial Opportunities in Chemistry** (see YCC, Sun)

**Strengthening Your Patent Rights in Light of Recent Federal Circuit Court Decisions** (see CHAL, Sun)

**The Use of Scientific Information in IP-Related Matters** (see CHAL, Mon)

## BUSINESS MEETINGS:

**Business Meeting**, 1:00 PM: Sun

## SUNDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Carmel I

## Chemical Angel Network: Chemists Investing in Chemical Companies

*Cosponsored by PROF<sup>‡</sup> and SCHB<sup>‡</sup>  
Financially supported by CIEC*

J. L. Bryant, M. Vreeke, *Organizers*

S. S. White, *Presiding*

## 1:30 Introductory Remarks.

**1:35 BMGT 1.** News and updates from the Chemical Angel Network (CaN) and its 5th year of supporting chemists and company and job creation. M. Vreeke

## 2:00 Company Presentations.

## 3:00 Investment Discussion.

## 3:30 Open Forum.

## 4:00 Concluding Remarks.

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

*Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG<sup>‡</sup>, ORGN and PROF*

## SUNDAY EVENING

## Entrepreneurial Opportunities in Chemistry

*Sponsored by YCC, Cosponsored by BMGT, PROF and SCHB*

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

<sup>‡</sup> Cooperative Cosponsorship

## MONDAY MORNING

## Science for a Sustainable Energy Future

## Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG‡, ORGN and PROF

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT‡, ENVR‡, I&EC, PRES‡ and PROF

## MONDAY AFTERNOON

## Chemical Innovation Partnerships: Industry-University Success Stories

Sponsored by COMSCI, Cosponsored by BMGT

## Science for a Sustainable Energy Future

## Chemical &amp; Biological Conversions Approaches to Energy Conversion

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG‡, ORGN and PROF

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT‡, ENVR‡, I&EC‡, PRES‡ and PROF‡

## TUESDAY MORNING

## Producing Knowledgeable, Well-Rounded, T-Shaped Chemists for the 21st Century: Current Perspectives from High School, Undergraduate &amp; Graduate Educators

Sponsored by PROF, Cosponsored by BMGT, CHED and PRES

## ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

## Materials Chemistry of Solutions &amp; Solids for a Sustainable Future

Sponsored by INOR, Cosponsored by BMGT‡, MPPG and PROF‡

## TUESDAY AFTERNOON

## ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

## Chemists Leading the Charge: Chemists Using Business Acumen &amp; Transformative Research to Address Societal Needs

Sponsored by INOR, Cosponsored by BMGT‡, MPPG, PRES and PROF‡

## WEDNESDAY MORNING

## Looking Beyond Your Current Boundaries: What's the Next Step?

## Academic Route: PhD to Postdoc to Ass. Prof.

Sponsored by PROF, Cosponsored by BMGT and YCC

## WEDNESDAY AFTERNOON

## Looking Beyond Your Current Boundaries: What's the Next Step?

## Industrial Route: PhD, Postdoc, Scientist

Sponsored by PROF, Cosponsored by BMGT and YCC

## CARB

## Division of Carbohydrate Chemistry

N. Snyder, Program Chair

## SUNDAY MORNING

## Section A

Grand Hyatt San Francisco  
Grand Ballroom East

## Wolfrom Award

E. Rozners, N. L. Snyder, Organizers  
L. Wang, Presiding

## 9:00 Introductory Remarks.

**9:10 CARB 1.** Stereoselective synthesis of the legionaminic and pseudaminic acids and their glycosides. B. Dhakal, O. Popik, D. Crich

**9:40 CARB 2.** New type of fully synthetic self-adjuvanting glycoconjugate vaccines. Z. Guo

**10:10 CARB 3.** Fighting cancer with a sweet bullet: The development of carbohydrate based anticancer vaccines. X. Huang

## 10:40 Concluding Remarks.

## Design &amp; Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

## Drug Delivery

Sponsored by CELL, Cosponsored by CARB

## Cellulose Structure &amp; Biosynthesis

## In the Plant Cell Wall

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

## SUNDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Grand Ballroom East

## Isbell Award

E. Rozners, N. L. Snyder, Organizers  
L. Wang, Presiding

## 1:25 Introductory Remarks.

**1:35 CARB 4.** Stabilizing Nod2, an innate immune receptor of bacterial cell wall fragments, in Crohn's disease. C.L. Grimes

**2:05 CARB 5.** Glycoconjugates constructed on peptoid scaffolds. K. Kirshenbaum, R.N. Zuckermann

**2:35 CARB 6.** Decoding structure-function relationships in the glycome. L.K. Mahal

## 3:05 Concluding Remarks.

## Section A

Grand Hyatt San Francisco  
Grand Ballroom East

## Gin New Investigator Award

E. Rozners, N. L. Snyder, Organizers  
L. Wang, Presiding

## 3:20 Introductory Remarks.

**3:30 CARB 7.** In vitro evolution of carbohydrate clusters for vaccine design. I.J. Krauss

**4:00 CARB 8.** Synthesis of heparan sulfate oligosaccharides and glycopeptides. X. Huang, W. Yang, S.B. Dulaney, Y. Xu, P. Wang, B. Yang, K. Yoshida, J. Liu

**4:30 CARB 9.** Study and application of protein glycosylation. Z. Tan

## 5:00 Concluding Remarks.

## Design &amp; Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

## Tissue Engineering

Sponsored by CELL, Cosponsored by CARB

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG‡, ORGN and PROF

## Cellulose Structure &amp; Biosynthesis

## Evolution of Synthases &amp; Fine Structure of Microfibrils

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

## MONDAY MORNING

## Section A

Grand Hyatt San Francisco  
Grand Ballroom East

## Hudson Award

E. Rozners, N. L. Snyder, Organizers  
L. Wang, Presiding

## 9:00 Introductory Remarks.

**9:10 CARB 10.** De Novo Synthesis of oligosaccharide via bi-metallic catalysis. G.A. O'Doherty

**9:40 CARB 11.** Synthesis and biological evaluation of STn-PS A1 as a tumor immunogen. P.R. Andreato

**10:10 CARB 12.** Towards rules for carbohydrate synthesis: Insights from computational chemistry. N.L. Pohl

**10:40 CARB 13.** Synthesis of designer polysaccharides as probes of glycan assembly. T.L. Lowary

**11:10 CARB 14.** Acetals, ion pairs, and oxocarbenium ions. D. Crich

## 11:40 Concluding Remarks.

## Design &amp; Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

## Structure

Sponsored by CELL, Cosponsored by CARB

## Science for a Sustainable Energy Future

## Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG‡, ORGN and PROF

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Cellulose Structure &amp; Biosynthesis

## Mechanism of Synthesis

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

## Functional Lignocellulosics &amp; Nanotechnology

## Tuning Interfacial Phenomena with Ligno-Nanocellulosic Materials

Sponsored by CELL, Cosponsored by CARB and COLL

## MONDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Grand Ballroom East

## Carbohydrate-Based Hybrid Materials for Nanomedicine

Cosponsored by CELL

R. Narain, Organizer, Presiding

## 1:30 Introductory Remarks.

**1:35 CARB 15.** Glycopolymer monolith for protein separation. Y. Miura

**2:05 CARB 16.** Genome editing *in vivo* with the delivery of Cas9 ribonucleoprotein and donor DNA complexed to nanoparticles. N. Murthy

**2:35 CARB 17.** Polymer with trehalose side chains enhances the stability and *in vivo* plasma lifetime of insulin. K. Mansfield, Y. Liu, J. Lee, J. Ko, H.D. Maynard

**2:55 CARB 18.** Glycocalyx-mimetic interfaces: Sugar-coating the answers to virus binding. R. Kumar, D. Krazter, K. Cheng, I. Kopyeva, J. Lahann

## 3:15 Intermission.

**3:30 CARB 19.** Chitosan-based graft copolymers for tissue engineering applications. M. Kaliva, A. Georgopoulou, E. Mygdali, M. Chatziniolaïdou, M. Vamvakaki

**4:00 CARB 20.** Carbohydrate based nanotheranostics for the management of hypoxic tumors. R. Narain

**4:30 CARB 21.** Zwitterionic-/glycol-polymers coated polystyrene microspheres as surrogates for studying the interactions between *Cryptosporidium* oocysts and silica surface. L. Liu, Y. Wang, R. Narain, Y. Liu

**5:00 CARB 22.** Influenza-binding sialylated nanoparticles by combination of RAFT polymerization, reductive amination and gold-thiol self-assembly. B. De Geest

## 5:20 Concluding Remarks.

**Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar**

**Structure**

Sponsored by CELL, Cosponsored by CARB

**Hollyweird Chemistry**

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

**Science for a Sustainable Energy Future**

**Chemical & Biological Conversions Approaches to Energy Conversion**

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVF, GEOC, I&EC, MEDI, MPPG†, ORGN and PROF

**Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials**

**Lignin Conversion & Upgrading**

Sponsored by CATL, Cosponsored by CARB and ENFL

**Cellulose Structure & Biosynthesis**

**Synthase Trafficking & Synthesis of plant (1->3),(1->4)-D-glucans**

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

**Functional Lignocellulosics & Nanotechnology**

**Modification & Analytics**

Sponsored by CELL, Cosponsored by CARB and COLL

**MONDAY EVENING**

**Section A**

Moscone Center  
Hall D

**Sci-Mix**

N. L. Snyder, *Organizer*

8:00 - 10:00

21. See previous listings.

38-42, 46-47, 50, 53, 57-58, 60-61, 67, 72, 75, 77, 79-80. See subsequent listings.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**TUESDAY MORNING**

**Section A**

Grand Hyatt San Francisco  
Grand Ballroom East

**LPS: Chemistry, Synthesis & Applications**

Cosponsored by CELL

P. G. Wang, *Organizer*

D. E. Kahne, *Presiding*

8:30 Introductory Remarks.

8:35 **CARB 23.** Polymerases, terminators, molecular rulers and transporters—integrated quality control systems for establishing the chain length of LPS O antigens. C. Whitfield

9:05 Discussion.

9:15 **CARB 24.** Using the LPS biosynthetic enzyme heptosyltransferase I to explore protein dynamics of a GT-B glycosyltransferase. E.A. Taylor

9:45 Discussion.

9:55 **CARB 25.** Discovery of a novel Wzz3 co-polymerase protein in *Pseudomonas aeruginosa* via data-mining of whole genome sequences. J. Lam

10:25 Discussion.

10:35 **CARB 26.** Withdrawn.

11:05 Discussion.

11:15 **CARB 27.** Studies on the assembly of the outer membrane in *E. coli*. D.E. Kahne

11:45 Discussion.

11:55 Concluding Remarks.

**Section B**

Grand Hyatt San Francisco  
Grand Ballroom West

**Carbohydrate-Based Hybrid Materials for Nanomedicine**

Cosponsored by CELL

R. Narain, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 **CARB 28.** Glycopolymers with selectivity as well as avidity through macromolecular engineering. M.I. Gibson

9:05 **CARB 29.** Synthetic glycopolymers for recognizing cells and bacteria. G. Chen

9:35 **CARB 30.** Broad-spectrum and highly selective antiviral macromolecular assemblies that mitigate resistance. M. Fevre, Y. Yang, J. Hedrick

9:55 Intermission.

10:10 **CARB 31.** Trehalose-grafted glycopolymers and glycanomaterials for the detection and drug delivery to mycobacteria. M. Yan

10:40 **CARB 32.** Availability of N-quaternized groups determines the bactericidal activity of N,N,N-trimethyl chitosan salts. H.D. Follmann, T.M. Nobre, O.N. Oliveira

11:00 **CARB 33.** Thermo-responsive poly(N-isopropylacrylamide) and cellulose nanocrystals hybrid hydrogels for wound dressing. P. Singhsa, K. Zubik, Y. Wang, H. Manuspiya, R. Narain

11:20 Concluding Remarks.

**Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar**

**Novel Derivatives for Demanding Applications**

Sponsored by CELL, Cosponsored by CARB

**Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials**

**Carbohydrate Processing & Upgrading of Biomass-Derived Molecules**

Sponsored by CATL, Cosponsored by CARB and ENFL

**Cellulose Structure & Biosynthesis**

**Biochemistry & Cellular Biology**

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

**Functional Lignocellulosics & Nanotechnology**

**Tuning Interfacial Phenomena with Ligno-Nanocellulosic Materials**

Sponsored by CELL, Cosponsored by CARB and COLL

**TUESDAY AFTERNOON**

**Section A**

Grand Hyatt San Francisco  
Grand Ballroom East

**LPS: Chemistry, Synthesis & Applications**

Cosponsored by CELL

P. G. Wang, *Organizer, Presiding*

1:30 Introductory Remarks.

1:35 **CARB 34.** Differential induction of innate immune responses by synthetic lipid A derivatives. G. Boons

2:05 Discussion.

2:15 **CARB 35.** Chemical synthesis of homogeneous and structurally defined bacterial polysaccharide repeating units and their oligomers. Z. Guo

2:45 Discussion.

2:55 **CARB 36.** New tools for the elucidation of complex polysaccharide biosynthesis pathways. J.M. Troutman

3:25 Discussion.

3:35 **CARB 37.** Chemical biology approach to explore biosynthesis and biogenesis of lipopolysaccharides. P.G. Wang

4:05 Discussion.

4:15 Concluding Remarks.

**Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar**

**Novel Derivatives for Demanding Applications**

Sponsored by CELL, Cosponsored by CARB

**Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials**

Sponsored by CATL, Cosponsored by CARB and ENFL

**Advances in Polysaccharides: Practice & Applications**

**New Developments in the Industrial Sector**

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

**Functional Lignocellulosics & Nanotechnology**

**Dispersions, Gels, Foams, Colloids & Films**

Sponsored by CELL, Cosponsored by CARB and COLL

**TUESDAY EVENING**

**Section A**

Moscone Center  
Hall D

**General Posters**

N. L. Snyder, *Organizer*

7:30 - 9:30

**CARB 38.** Glycoprotein monosaccharide analysis using HPAE-PAD. S. Patil, J. Rohrer

**CARB 39.** Development of an alkyne-based therapeutic to covalently target bacterial pathogens based on their distinctive glycans. R. Herman, D.H. Dube

**CARB 40.** Discovery of genes required for glycoprotein biosynthesis in the gastric pathogen *Helicobacter pylori*. K. Moulton, D.H. Dube

**CARB 41.** Synthesis of C-4 modified sialic acid 2,3 dehydroderivatives. M. Lohman, C. De Meo

**CARB 42.** Synthesis of 7-O-substituted derivatives of N-acetyl neuraminic acid. M. Shadrick, C. Yu, C. De Meo

**CARB 43.** Synthesis of a C-5 thioamide sialyl donor. B. Jones, C. De Meo

**CARB 44.** Effects of picoloyl at C-7 in sialylation reactions. S. Escopy, C. De Meo

**CARB 45.** Progress towards the synthesis of galactosaminoglycan mimetics for diagnostic and therapeutic applications. D.J. Akrobetu, N.L. Snyder

**CARB 46.** Synthesis of carbohydrate-functionalized oligopropylene analogs for multivalent carbohydrate display. H. Nakanishi, N.L. Snyder

**CARB 47.** Synthesis of trehalose-based photosensitizers. M.A. Burch, D. Dennis, J.V. Ruppel, N.L. Snyder

**CARB 48.** SEM-EDS study of calcium and copper alginate bead formation. J. Ayarza, Y.P. Coello, J. Nakamatsu

**CARB 49.** Fluorescent FPP analogs for the study of UPPS specificity. A. Reid, J. Troutman

**CARB 50.** Development and analysis of a novel targeting strategy for bacterial sugars. K.M. Erickson, P.M. Scott, J.M. Troutman

**CARB 51.** Replacement of endogenous isoprenoids with fluorescent probes in *Escherichia coli*. C. George

**CARB 52.** Application of newly developed Karplus equations for C(sp<sup>2</sup>)-O-C-H dihedral angles to the conformational analysis of ester linked carbohydrate derivatives. S. Hackbusch, A. Watson, S. Do, A. Franz

**CARB 53.** New Karplus Equations for  $\alpha$ -1,6-linked Glycans. A. Watson, S. Do, A. Franz

† Cooperative Cosponsorship

**CARB 54.** Diaryliodonium salts as useful tools for metal-free arylation of carbohydrates. **C.M. Braun, S. Townsend**

**CARB 55.** Synthesis of and evaluation of boronic acid derived lectin mimetics. **J. Whited, X. Sun**

**CARB 56.** Application of TiO<sub>2</sub> nanostructure for sustainable removal of moisture from air. **S. Ferdousi, M. Hasan, K. Yeung**

**CARB 57.** Mechanochromic properties of cellulosic liquid crystalline materials. **K. Miyagi, Y. Teramoto**

**CARB 58.** Preservation of labile biomolecules in cellulose nanofiber pills and their biosensing applications. **R. Murase, Y. Teramoto**

**CARB 59.** Synthesis and evaluation of an expanded set of chemical reporters for probing mycoloylation in mycobacteria. **T. Fiolek, H.W. Kavunja, N. Holmes, B. Swarts**

**CARB 60.** Synthesis and evaluation of a fluorogenic probe for trehalose dimycolate hydrolase in *Mycobacterium*. **C.N. Ramsey, B.M. Swarts, H.W. Kavunja, N. Holmes**

**CARB 61.** Chemoenzymatic synthesis of UDP glucose by reversing the direction of the trehalose synthase TreT. **B.M. Swarts, P. Woodruff**

**CARB 62.** Inhibition of mycobacterial growth and biofilm formation by chemoenzymatically synthesized trehalose analogues. **J.M. Wolber, B. Urbanek, L. Meints, I. Lopez-Casillas, B.M. Swarts, P. Woodruff**

**CARB 63.** De Novo chemical synthesis of 3-azido-3-deoxy-myo-inositol via Ferrier rearrangement. **K. Bednarz, B. Swarts**

**CARB 64.** Investigating the substrate specificity of the trehalose-recycling transporter SugABC-LpqY in *Mycobacterium*. **M. O'Neill, Z. Wagar, A. Stothard, L. Meints, S. Rundell, B.M. Swarts**

**CARB 65.** Withdrawn.

**CARB 66.** Deoxyfluoro-D-trehalose (FDTre) analogues as potential PET probes for imaging mycobacterial infection. **C. Olson, S. Rundell, Z. Wagar, L. Meints, M. O'Neill, B. Piliagian, A. Poston, R.J. Hood, P. Woodruff, B.M. Swarts**

**CARB 67.** Chemoenzymatic synthesis of 2-amino-modified trehalose analogues. **J. Groenevelt, L. Meints, B.M. Swarts**

**CARB 68.** Exploiting trehalose metabolism to deliver Antibody-Recruiting Small Molecules (ARMs) to mycobacteria. **A. Rytski, H.W. Kavunja, B.M. Swarts**

**CARB 69.** Comparison of micro-wave-mediated sugar linker reactions. **D. Dimas, K.D. McReynolds**

**CARB 70.** Synthesis of a novel glycodendrimer through green and sustainable methods. **C. Viera, K.D. McReynolds**

**CARB 71.** Synthesis and fluorescent labeling of lacto-*N*-tetraose. **K. Craft, S. Townsend**

**CARB 72.** Tuning hyaluronic acid binding properties to CD44 using synthetic, *in vitro* and *in silico* approaches. **D.S. Bhattacharya, D. Svehkarev, J. Souček, T. Hill, M. Taylor, A. Natarajan, A. Mohs**

**CARB 73.** Genotoxic agents conjugated inhibitors of glucose transporter for anti-colorectal cancer. **C. Chang, H. Yang, P. Liang**

**CARB 74.** Design, synthesis and antitumor evaluation of novel 2-amino-2-deoxysugar-bearing pentacyclic triterpenoid saponin derivatives. **Y. Lin, Y. Juang, P. Liang**

**CARB 75.** Synthesis and evaluation of cell-permeable analogs of trehalose. **J. Bragg, M.G. Paulick**

**CARB 76.** Understanding the biosynthetic transformation of carbohydrate metabolic chemical reporters. **A. Batt, M. Pratt**

**CARB 77.** Composition, stability and structure of calcium-complex(es) of isosaccharinate forming in hyperalkaline aqueous solutions. **C. Dudas, B. Kutus, I. Palinko, P. Sipos**

**CARB 78.** Multinuclear complex formation between Ca(II) and L-gulonate in strongly alkaline medium. **B. Kutus, G. Peintler, I. Palinko, P. Sipos**

**CARB 79.** Synthesis of neoglycoproteins for the potential diagnosis and follow-up of leishmaniasis and Chagas disease. **A.L. Montoya, R.A. Ashmus, K. Michael**

**CARB 80.** Regioselective trifluoromethylation and pentafluoroethylation of glycals and electron-rich alkenes using Cu(CF<sub>3</sub>)<sub>2</sub>nCF<sub>3</sub> reagents. **J. Mestre, O. Boutureira, A. Lishchynsky, V. Grushin, S. Castillon**

**CARB 81.** Micro/nanoparticles prepared from kappa-, iota-, and lambda-carrageenan for versatile use. **N. Sahiner, S. Sagbas, S. Yilmaz**

**CARB 82.** Transparent cassava-based cellulose film production using carbon dioxide switchable polarity solvent. **P. Nanta, K. Kasemwong, W. Skolpap, Y. Shimoyama**

## WEDNESDAY MORNING

### Section A

Grand Hyatt San Francisco  
Grand Ballroom East

### Carbohydrate-Based Nanomaterials & Drug-Delivery Vehicles

Cosponsored by CELL

Y. C. Lee, W. F. Vann, *Organizers, Presiding*

8:30 Introductory Remarks.

8:35 **CARB 83.** Cell response at the interface of carbohydrates and nanomaterials. **J. Du, R. Bhattacharya, K.J. Yarema**

9:05 **CARB 84.** Human influenza virus receptors. **J.C. Paulson, W. Peng, R.P. de Vries, O.C. Grant, A.J. Thompson, R. McBride, I.A. Wilson, R.J. Woods**

9:35 **CARB 85.** Glycocluster: Use of multivalent-type carriers for assembly of carbohydrates. **K. Matsuoka**

10:05 **CARB 86.** Acid-degradable mannosylated nanogels for dendritic cell targeted immunotherapy. **R. De Coen, B. De Geest**

10:25 Intermission.

10:45 **CARB 87.** Systemic clearance: Natural and synthetic glycosaminoglycan-based drugs are cleared by the stabilin family of receptors. **E.N. Harris**

11:15 **CARB 88.** Nanostructured glycan architecture is important in the inhibition of influenza A virus infection. **S. Kwon, D.H. Na, J.H. Kwak, M. Douaisi, F. Zhang, E.J. Park, J. Park, H. Youn, C. Song, R.S. Kane, J.S. Dordick, K.B. Lee, R.J. Linhardt**

11:45 **CARB 89.** Withdrawn.

12:05 **CARB 90.** Synthesis of novel biodegradable saccharides-containing polymers and nanoparticles with biomedical applications. **K.T. Petrova**

### Bio-based Gels & Porous Materials

#### Biopolymer Hydrogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

#### Advances in Polysaccharides: Practice & Applications

#### Novel Biocatalytic & Biopolymeric Approaches

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

#### Functional Lignocellulosics & Nanotechnology

#### Dispersions, Gels, Foams, Colloids & Films

Sponsored by CELL, Cosponsored by CARB and COLL

## WEDNESDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Grand Ballroom East

### Carbohydrate-Based Nanomaterials & Drug-Delivery Vehicles

Cosponsored by CELL

Y. C. Lee, W. F. Vann, *Organizers, Presiding*

1:30 **CARB 91.** Gene expression mediated by N-glycan targeted DNA nanoparticles. **K. Rice**

2:00 **CARB 92.** New glycotecology platform interfacing chemistry and biology. **S. Nishimura**

2:30 **CARB 93.** Sugar-based polymers with bioactivity. **K.E. Uhrich**

3:00 **CARB 94.** Beta-glucan for therapeutic functional oligonucleotides: Immunocyte targeting DDS with dextrin-1. **K. Sakurai, N. Fujiwara, S. Mochizuki**

3:20 Intermission.

3:40 **CARB 95.** Water-Soluble synthetic carbohydrate receptor with non-glucosidic selectivity. **A.B. Braunschweig**

4:00 **CARB 96.** Supramolecular biomaterials with multi-scale hierarchical order via synthetic glycopeptide self-assembly. **G. Hudalla, A. Restuccia**

4:20 **CARB 97.** Sugar-Grafted Trojan Horse nanocarrier for combating planktonic and biofilm bacteria. **K. Neoh, M. Li, E. Kang, K. Chua**

4:40 **CARB 98.** Adhesion of micro-composites based on yeast glucan particles in 3D cell culture perfusion environment. **I. Salton**

5:00 Concluding Remarks.

### Bio-based Gels & Porous Materials

#### Biopolymer Organogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

#### Advances in Polysaccharides: Practice & Applications

### Novel Materials & Methodologies

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

#### Functional Lignocellulosics & Nanotechnology

#### Responsive Materials & Biosensors

Sponsored by CELL, Cosponsored by CARB and COLL

#### Frontiers in Glycoanalytics

#### MS & NMR Methods

Sponsored by CELL, Cosponsored by ANYL, CARB† and MPPG†

## THURSDAY MORNING

### Bio-based Gels & Porous Materials

#### Aero-, Cryo- & Xerogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

#### Advances in Polysaccharides: Practice & Applications

#### New Functional Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

#### Functional Lignocellulosics & Nanotechnology

#### Responsive Materials & Biosensors

Sponsored by CELL, Cosponsored by CARB and COLL

#### Frontiers in Glycoanalytics

#### Molar Mass & Crystallinity Analyses

Sponsored by CELL, Cosponsored by ANYL, CARB† and MPPG†

## THURSDAY AFTERNOON

### Bio-based Gels & Porous Materials

#### Open-Porous Carbon Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

#### Advances in Polysaccharides: Practice & Applications

#### Preparation, Characterization & Applications

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

#### Functional Lignocellulosics & Nanotechnology

#### (nano)Paper: From Fundamentals to Applications/Antimicrobial, Functional Materials

Sponsored by CELL, Cosponsored by CARB and COLL

## CATL

## Division of Catalysis Science and Technology

E. Nikolla and S. Scott, Program Chairs

## SUNDAY MORNING

## Section A

Parc 55 San Francisco  
Mission I

## Advanced X-Ray Techniques for Catalyst Characterization

## Catalysts in Action

Cosponsored by PHYS

A. M. Karim, Organizer

S. R. Bare, Organizer, Presiding

**8:00 CATL 1.** Multi-modal *operando* investigations of activities and phase transformations of supported Pd nanocatalysts during ethylene hydrogenation reaction. Y. Li, S. Zhao, D. Liu, R.G. Nuzzo, E. Stach, A. Frenkel

**8:20 CATL 2.** X-ray characterization of subnanometer cluster-based catalysts. S. Vajda

**8:50 CATL 3.** Application of lab-based AP-XSP to *operando* studies of catalysis. F. Tao

**9:20 CATL 4.** Catalysts for selective hydrogenation of furfural derived from [Pd(NH<sub>3</sub>)<sub>4</sub>](ReO<sub>4</sub>)<sub>2</sub> on  $\gamma$ -Al<sub>2</sub>O<sub>3</sub>: Advanced characterization by EXAFS, STEM-EDX, and complementary techniques. H. Lamb, S. Thompson

9:40 Intermission.

**10:10 CATL 5.** *Operando* x-ray spectroscopy of a catalytic solid: Towards a molecular movie. B.M. Weckhuysen

**10:50 CATL 6.** Combining *in situ* characterization techniques to reveal real-time deactivation mechanisms in Fischer-Tropsch synthesis catalysts. M. Ronning

11:20 CATL 7. Withdrawn.

## Section B

Parc 55 San Francisco  
Cyril Magnin III

## Amorphous Catalytic Materials

S. L. Scott, Organizer

B. Peters, Organizer, Presiding

**8:00 CATL 8.** Theoretical studies of the solid-liquid interface of  $\gamma$ -alumina supported catalysts: Impact on impregnation and dried state. M. Corral Valero, B. Nguouana-Wakou, P. Raybaud

**8:35 CATL 9.** Computational studies of catalytic reactions of metal oxide clusters and metal ions in zeolites. Z. Fang, S. Zhang, D.A. Dixon

9:10 CATL 10. Withdrawn.

9:45 Intermission.

**10:05 CATL 11.** Dynamic structures and catalytic properties of platinum nanoparticle in carbon nanotube. G. Wei, Z. Liu

**10:25 CATL 12.** Ab-initio modeling of Zr(OH)<sub>4</sub> in the presence of atmospheric contaminants. I. Iordanov, V.M. Bermudez, G.W. Peterson, W.O. Gordon, C.J. Karwacki, R. Balow, D. Barlow, I. Schweigert, J. Lundin, D. Gunlycke, P.E. Pehrsson

**10:45 CATL 13.** Computational investigation of Lewis and Bronsted acidity in metal-doped mesoporous silicates. A. Jystad, A. Biancardi, M. Caricato

**11:05 CATL 14.** Structure and reactivity of porous amorphous catalysts: Insights from molecular modeling. R. Chaudret, S. Schweizer, J. Low, L. Subramanian

**11:25 CATL 15.** Hydroisomerization of n-hexadecane: Remarkable selectivity of platinum nanoparticles supported on amorphous mesoporous silica post-synthetically modified with aluminum. K. Sabyrov, N. Musselwhite, G. Melaet, G.A. Somorjai

## Section C

Parc 55 San Francisco  
Market Street

## ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

## Honoring the Contribution to Single Crystal Catalysis

Cosponsored by COLL and WCC

C. Kumar, Organizer

R. Madix, Presiding

8:00 Introductory Remarks.

**8:15 CATL 16.** Competition for active sites in steady state catalytic reactions; importance of weak van der Waals interactions. R.J. Madix, S. Karakalos, Y. Xu, A. Tkatchenko, F. Kabeer, W. Chen, E. Kaxiras, C.M. Friend

**8:45 CATL 17.** Energetics of adsorbed molecular fragments on Ni(111) and Pt(111) by calorimetry: Understanding differences in catalysis by Ni versus Pt. C.T. Campbell, S.J. Carey, W. Zhao

9:15 Intermission.

**9:30 CATL 18.** Structure-reactivity relations through charge control at the atomic level in heterogeneous catalysis. H. Freund

**10:00 CATL 19.** Single atom alloys for efficient and cost-effective catalysis. E.H. Sykes

10:30 Intermission.

**10:45 CATL 20.** Understanding the catalytic activity of Pt-Re bimetallic surfaces. A.J. Brandt, T.D. Maddumapatabandi, G.S. Seuser, K. Xie, A. Duke, D.A. Chen

**11:15 CATL 21.** Oxygen surface chemistry for energy conversion processes. J.K. Norskov

## Section D

Parc 55 San Francisco  
Cyril Magnin I

## Electrocatalysis for Energy Generation &amp; Storage

## Oxygen Reduction

Cosponsored by ENFL

A. Holewinski, C. Wang, H. Xin, Organizers

J. Snyder, Organizer, Presiding

A. Holewinski, Presiding

**8:00 CATL 22.** Platinum alloy nanocatalyst with manipulated particle composition and morphology for improved ORR property. Z. Peng, C. Zhang, S. Hwang

**8:20 CATL 23.** Morphological and compositional instability in nanoporous nanoparticle electrocatalysts for oxygen reduction reaction. Y. Li, J. Snyder

**8:40 CATL 24.** Enhanced electrocatalysis for polymer electrolyte membrane fuel cells and electrolyzers. M. Escudero-Escribano, A.L. Strickler, T.F. Jaramillo, I. Stephens, I. Chorkendorff

**9:00 CATL 25.** Phase segregated copper silver thin films as model catalysts for electrochemical oxygen reduction in alkaline electrolytes. D.C. Higgins, B. Gibbons, C. Hahn, M. Wette, B. Clemens, T.F. Jaramillo

9:20 Intermission.

**9:40 CATL 26.** From well-defined electrochemical interfaces to functional nanoscale materials. V. Stamenkovic

10:20 CATL 27. Withdrawn.

**10:40 CATL 28.** Nitrogen-doped Carbon Nanostructures (CNx) as bifunctional electrocatalysts for oxygen reduction reaction and oxygen evolution reaction in acidic media. K. Mamtani, D. Jain, A. Co, U.S. Ozkan

**11:00 CATL 29.** Nitrogen doped double gyroidal mesoporous carbon materials for oxygen reduction reaction synthesized from pyridine containing precursor, hydroxymethyl-3-hydroxylpyridine. F. Matsuoka, Q. Zhang, U.B. Wiesner

**11:20 CATL 30.** Manganese deception on graphene. R. Ye, R. MendozaCruz, Y. Li, M.J. Yacaman, J.M. Tour

**11:40 CATL 31.** Flexible bifunctional oxygen electrode through morphological emulsion of human hair array for rechargeable zinc air batteries. J. Fu, F. Hassan, Z. Chen

## Section E

Parc 55 San Francisco  
Cyril Magnin II

## Synthesis of Catalysts by Non-Traditional Methods

## Nanoparticle Catalysts

Cosponsored by COLL and INOR

A. Alba-Rubio, T. J. Schwartz, Organizers, Presiding

8:00 Introductory Remarks.

**8:10 CATL 32.** Electrostatic adsorption for synthesis and size control of supported metal catalysts. A. Wong, Q. Liu, S. Eskandari, J.R. Regalbuto

**8:40 CATL 33.** Aerosol synthesis of shape-controlled nanomaterials for photocatalytic applications. S.E. Skrabalak

**9:10 CATL 34.** Development of a new generation of stable, tunable, and catalytically active nanoparticles produced by the helium nanodroplet deposition method. A. Orlov, Q. Wu, J. Cen, C.J. Ridge, M. Lindsay, S. Zhao, D. Zakharov, E. Stach, E. Connors, X. Tong, D. Su

**9:30 CATL 35.** Synthesis and compositional control in highly uniform palladium-based bimetallic nanocrystals for catalytic methane activation. J. Willis, E.D. Goodman, M. Cargnello

**9:50 CATL 36.** Cobalt-copper nanoparticle catalysts for higher alcohols synthesis prepared by water-in-oil microemulsion. J.L. Snider, T.F. Jaramillo

**10:10 CATL 37.** Colloidal synthesis, characterization, & selective alkyne hydrogenation by supported Ni and Co nanocrystals. N.S. Dwarica, J. Bruno, B.D. Chandler, C. Pursell

**10:30 CATL 38.** Highly active Au-Pd nanoparticles supported on titanate nanotubes. M.M. Khawaji, D. Chadwick

**10:50 CATL 39.** Novel Mo/W precursors for supported catalysts with enhanced hydrodesulfurization activity and selectivity. P. Yuan

**11:10 CATL 40.** Synthesis of catalytic materials by electrospinning with controlled morphology. M. Guerrero-Perez, R. Berenguer, I. Guzman, J. Rodriguez-Mirasol, T. Cordero

## Section F

Parc 55 San Francisco  
Mission II/III

## Elucidation of Mechanisms &amp; Kinetics on Surfaces

## Theory

Cosponsored by COLL and ENVR

S. L. Scott, C. Sievers, Organizers

A. Savara, Organizer, Presiding

**8:00 CATL 41.** Catalytic processing of bioethanol on transition state metals. F. Jalid, T.S. Khan, M. Haider

8:20 CATL 42. Withdrawn.

**8:40 CATL 43.** Orbital-wise coordination number as a reactivity descriptor for metal nanocatalysts. H. Xin, X. Ma, S. Wang

**9:20 CATL 44.** Insights into active sites and their environments under working catalytic condition. M. Neurock

**10:00 CATL 45.** Elucidation of structure and activity using machine learning-accelerated genetic algorithms and kMC. T. Bligaard

**10:40 CATL 46.** Models and trends in adsorbate-adsorbate interactions at metal surfaces. A. Bajpai, K. Frey, W.F. Schneider

**11:20 CATL 47.** Modeling segregation in late transition metal alloys across composition space. J. Boes, J.R. Kitchin

## Synthesis &amp; Characterization of Materials for Energy Applications

## Enabling Concepts for Energy Materials Design

Sponsored by ANYL, Cosponsored by CATL

## C1 Catalysis

Sponsored by ENFL, Cosponsored by CATL

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

### Catalytic Materials from Molecular Insight

Sponsored by *COMR*, Cosponsored by *CATL*, *MPPG‡* and *PHYS*

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

#### Surface Science is Alive & Well

Sponsored by *COLL*, Cosponsored by *CATL*

### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by *ENFL*, Cosponsored by *CATL*, *MPPG‡* and *PMSE*

### Catalysis for Unconventional Energy Sources

Sponsored by *ENFL*, Cosponsored by *CATL* and *MPPG‡*

### Subsurface Technologies for Recovery of Fossil & Geothermal Energy

Sponsored by *ENFL*, Cosponsored by *CATL* and *GEOC*

### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by *ENFL*, Cosponsored by *CATL*, *COMR*, *GEOC* and *MPPG‡*

### Sustainability in Electrocatalytic Fuel & Chemical Production

Sponsored by *INOR*, Cosponsored by *CATL*

## SUNDAY AFTERNOON

### Section A

Parc 55 San Francisco  
Mission I

### Advanced X-Ray Techniques for Catalyst Characterization

#### Theory & Beyond

Cosponsored by *PHYS*

S. R. Bare, A. M. Karim, *Organizers*

A. M. Karim, *Presiding*

**1:00 CATL 48.** Al K-edge XAFS, molecular dynamics-XAFS and the chemistry of zeolite Bronsted acid sites. **J. Fulton**, N. Govind, D. Mei, A. Vjunov, D.M. Camaioni, T. Huthwelker, J.A. Lercher

**1:30 CATL 49.** Exploring the anomalous behavior of metal nanocatalysts with finite temperature AIMD and x-ray spectra. **F.D. Vila**, J.J. Rehr, A. Frenkel

**2:00 CATL 50.** Environmental sensitivity of spectroscopic properties for Cu ions in Cu-SSZ-13: XANES and XES studies from first principles. **R. Zhang**, H. Li, K. Groden, F. Gao, J. Szanyi, S.L. Scott, **J. McEwen**

**2:30 CATL 51.** Structural characterization of catalysts: Interplay between theory and experiment. **P. Sautet**

**3:00** Intermission.

**3:30 CATL 52.** Solving dynamic structure of nanoparticles: From model to real catalysts. **A. Frenkel**

**4:10 CATL 53.** Crystalline covalent organic frameworks for heterogeneous catalysis. **Y. Zhang**

**4:30** Discussion.

### Section B

Parc 55 San Francisco  
Cyril Magnin III

### Amorphous Catalytic Materials

B. Peters, *Organizer*

S. L. Scott, *Organizer, Presiding*

**1:00 CATL 54.** Studies of silica- and alumina-supported catalysts by dynamic nuclear polarization solid-state NMR. **F.A. Perras**, T. Kobayashi, **M. Pruski**

**1:35 CATL 55.** Solid state NMR as a powerful tool for the study of alumina-supported organo-metallic catalysts. **L. Delevoye**, F. Pourpoint, N. Merle, K.C. Szeto, A. Gallo, S.L. Scott, M. Taoufik, **R. Gauvin**

**2:10 CATL 56.** Surface Science approach to the Phillips (Cr/SiO<sub>2</sub>) catalyst. **Q. Pan**, L. Li, S. Shaikhutdinov, H. Freund

**2:30 CATL 57.** Well-defined group VI oxo derivatives supported on silica by SOMC: Model of industrial olefin metathesis catalyst. **N. Merle**, Y. Bouhoute, K.C. Szeto, A. De Mallmann, I. Del Rosal, L. Maron, C.P. Nicholas, L. Delevoye, R. Gauvin, M. Taoufik

**2:50** Intermission.

**3:10 CATL 58.** Spectroscopic properties and coordination environment of silica supported MoO<sub>3</sub> catalyst. **S. Klepper**, Y. Wang, D. Jeffcoat, N. Peek, L.J. Van De Burgt, S.L. Scott, **A.E. Stigman**

**3:45 CATL 59.** Molecular design of cooperative interactions for amorphous silica materials to tune catalytic selectivities. **N.A. Brunelli**, M.R. Whitaker, R. Joshi, A. Parulkar

**4:20 CATL 60.** Understanding the role of atmospheric surface adsorbates on the chemical reactivity of zirconium hydroxide nanopowders using *Operando* vibrational spectroscopy. **R. Balow**, W.O. Gordon, D. Barlow, J. Lundin, I.O. Iordanov, C. Knox, V.M. Bermudez, J.H. Wynne, G.W. Peterson, C.J. Karwacki, P.E. Pehrsson

**4:40 CATL 61.** Preparation and characterization of amorphous/nanocrystalline thin film catalysts. **A. Pfau**, S. He, J.T. Diulus, G. Albuquerque, I. Lyubinskyy, **G.S. Herman**

### Section C

Parc 55 San Francisco  
Market Street

### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

#### Honoring the Contribution to Single Crystal Catalysis

Cosponsored by *COLL* and *WCC*

K. Kumar, *Organizer*

C. J. Stowers, *Presiding*

**1:00 CATL 62.** Understanding of atomically-thin materials grown on Au(111). **X. Deng**, D. Sorescu, J. Lee

**1:30 CATL 63.** Catalytic C-C bond formation to synthesize carboxylic acids using CO<sub>2</sub>. **K.J. Stowers**

**2:00** Intermission.

**2:15 CATL 64.** Adsorption and oxidation reactions on RuO<sub>2</sub> and IrO<sub>2</sub> surfaces. **J.F. Weaver**, Z. Liang, T. Li, R. Rai, M. Kim, A.R. Asthagiri

**2:45 CATL 65.** Recycling of CO<sub>2</sub>: Probing the chemical state of the Ni(111) surface during methanation reaction. **C. Heine**, **M. Salmeron**

**3:15** Intermission.

**3:30 CATL 66.** In-situ liquid phase spectroscopy for characterization and quantification of acid sites in the presence of solvents. **B. Xu**, N. Gould

**4:00 CATL 67.** Application of surface science techniques to nanoporous materials: Studies of metal organic frameworks. **L.B. Benz**

### Section D

Parc 55 San Francisco  
Cyril Magnin I

### Electrocatalysis for Energy Generation & Storage

#### CO<sub>2</sub> Reduction

Cosponsored by *ENFL*

A. Holewinski, J. Snyder, C. Wang, *Organizers*

H. Xin, *Organizer, Presiding*

A. Holewinski, *Presiding*

**1:00 CATL 68.** Mechanistic insights into the electrochemical reduction of CO<sub>2</sub> using in-situ surface enhanced spectroscopy. **B. Xu**, M. Dunwell, Q. Lu, J.G. Chen, Y. Yan, F. Jiao

**1:20 CATL 69.** Surface structure engineering of Cu thin films for electrochemical CO<sub>2</sub> reduction. **C. Hahn**, T. Hatsukade, A. Vailonis, D.C. Higgins, S. Nitopi, T.F. Jaramillo

**1:40 CATL 70.** Electrolysis of CO<sub>2</sub> to syngas in bipolar membrane-based electrochemical cells. **C.C. Li**, D. Zhou, Z. Yan, R. Goncalves, D. Salvatore, C.P. Berlinguette, T.E. Mallouk

**2:00 CATL 71.** Bimetallic Au-Cu nanocatalysts for enhanced electrochemical CO<sub>2</sub> conversion. **D. Kauffman**, D. Alfonso

**2:20 CATL 72.** Understanding trends in electrochemical synthesis of fuels and chemicals. **J.K. Norskov**

**3:00 CATL 73.** Charge of an ion in the outer Helmholtz plane. **L.D. Chen**, M. Bajdich, C.M. Krauter, J. Martirez, E.A. Carter, A.C. Luntz, K. Chan, J.K. Norskov

**3:20 CATL 74.** DFT investigation of CO<sub>2</sub> electrochemical reduction to C<sub>2</sub> species on copper surfaces: The critical role of surface facet and CO coverage. **P. Hirsutit**, Y. Huang, B.S. Yeo

**3:40 CATL 75.** Promoter effects of alkali metal cations during electrocatalytic carbon dioxide reduction. **J. Resasco**, A.T. Bell

**4:00 CATL 76.** N-Heterocyclic carbenes as promoters for the heterogeneous reduction of CO<sub>2</sub> at metal electrodes. **K.M. Waldie**, C.P. Kubiak

**4:20 CATL 77.** Synergistic performance enhancement in graphene nanoribbon – metal nanoparticle composites for electrocatalysis. **C. Rogers**, F.R. Fischer

**4:40 CATL 78.** Copper nanoparticle/carbon nanospire catalyst for high-selectivity electrochemical conversion of carbon dioxide. **Y. Song**, D. Hensley, A. Rondinone

### Section E

Parc 55 San Francisco  
Cyril Magnin II

### Synthesis of Catalysts by Non-Traditional Methods

#### Model Catalysts, Microporous Materials & Oxides

Cosponsored by *COLL* and *INOR*

A. Alba-Rubio, T. J. Schwartz, *Organizers, Presiding*

**1:00 CATL 79.** New catalytic structures via atomic layer deposition. **P.C. Stair**

**1:30 CATL 80.** Doped Zn-containing magnetic oxides in methanol synthesis: Does the capping polymer matter? **N. Baird**, J. Dittmar, Y. Losovyj, M. Pink, D.G. Morgan, B. Stein, N. Firsova, E. Serkova, M. Grigoriev, A. Sidorov, M. Sulman, Z. Shifrina, **L. Bronstein**

**1:50 CATL 81.** Calixarene-Metal clusters as precatalysts and catalysts. **A. To**, X. Ouyang, L. DeBefve, T. Rea, A. Palermo, B.C. Gates, A. Kuperman, **A.S. Katz**

**2:20 CATL 82.** Catalytic consequences of hydrophobic pockets confining Lewis acid sites in beta zeolites for aqueous-phase glucose isomerization. **M.J. Cordon**, J.W. Harris, J. Hall, R. Gounder

**2:40 CATL 83.** Ionic liquids for the synthesis of metal aluminophosphate-based catalysts. **S. Citrak**, S.I. Zones, S. Oliver

**3:00 CATL 84.** Synthesis of supported metal catalysts using molecular precursors and halide metathesis reactions. **S.L. Scott**

**3:30 CATL 85.** Biomineralization and bioinspired synthesis of ceria and transition metal-ceria solid solution nanocrystals. **C.D. Curran**, L. Lu, C.J. Kiely, B. Berger, S. McIntosh

**3:50 CATL 86.** Tuning graphitic oxide for initiator - and metal-free aerobic epoxidation of linear alkenes. **S. Pattison**, E. Nowicka, U. Gupta, G. Shaw, R. Jenkins, D. Morgan, D. Knight, G. Hutchings

**4:10 CATL 87.** Withdrawn.

**4:30 CATL 88.** Nano-confinement preparations of nano- CuO-MOFs in ceria tubes. **Y. Feng**, J. Feng, J. Jiang, M. Zhang

### Section F

Parc 55 San Francisco  
Mission II/III

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Surface Science

Cosponsored by *COLL* and *ENVR*

S. L. Scott, C. Sievers, *Organizers*

A. Savara, *Organizer, Presiding*

**1:00 CATL 89.** Selectivity in hydro-generation catalysis: A surface-science study. **F. Zaera**

**1:40 CATL 90.** Model systems in heterogeneous catalysis at the atomic scale. **H. Freund**

**2:20 CATL 91.** Surface structure and chemistry of a Pd-Cu(111) single-atom alloy from polarization dependent infrared spectroscopy. **C.M. Kruppe**, J.D. Krooswyk, **M. Trenary**

**3:00 CATL 92.** From surface science to practical catalysts for catalytic esterification and acylation. R.J. Madix, C.M. Friend, M.L. Personick, B. Xu, L. Wang, B. Zucig, J. Biener, M. Biener

**3:40 CATL 93.** Looking at zeolites through the eyes of surface science. J.A. Boscoboinik

**4:20 CATL 94.** Olefin metathesis by supported  $WO_x/SiO_2$  catalysts: Structure-Reactivity relationships, number of active sites, and kinetics. S. Lwin, I.E. Wachs

**4:40 CATL 95.** Interaction of atomic oxygen with Ag(111) and Ag(110) surfaces: Understanding the role of subsurface oxygen in oxidative catalysis by silver. S. Isbill, S. Roy

### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG‡, ORGN and PROF

#### C1 Catalysis

Sponsored by ENFL, Cosponsored by CATL

#### Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE

#### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

##### Catalyst Design

Sponsored by COLL, Cosponsored by CATL

#### Catalysis for Unconventional Energy Sources

Sponsored by ENFL, Cosponsored by CATL and MPPG‡

#### Sustainability in Electrocatalytic Fuel & Chemical Production

Sponsored by INOR, Cosponsored by CATL

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG‡

## SUNDAY EVENING

#### Sustainability in Electrocatalytic Fuel & Chemical Production

Sponsored by INOR, Cosponsored by CATL

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## MONDAY MORNING

### Section A

Parc 55 San Francisco  
Mission I

#### Advanced X-Ray Techniques for Catalyst Characterization

##### Electro- & Photo-Catalysis

Cosponsored by PHYS

A. M. Karim, *Organizer*

S. R. Bare, *Organizer, Presiding*

**8:00 CATL 96.** Structural kinetics study of redox processes of Pt/C and Pt<sub>3</sub>Co/C cathode electrocatalysts in a polymer electrolyte fuel cell during an accelerated durability test by in situ time-resolved XAFS. N. Ishiguro, S. Kityakarn, O. Sekizawa, T. Uruga, H. Matsui, K. Nagasawa, T. Yokoyama, M. Tada

**8:20 CATL 97.** Bismuth-Ionic liquid interface for electrocatalytic CO<sub>2</sub> conversion under the lens of x-ray reflectivity. J. Medina Ramos, S. Lee, A.A. Hubaud, T.T. Fister, P. Fenter

**8:40 CATL 98.** In-operando x-ray spectroscopic insight into biomimetic fuel cell electrocatalyst. H. Lien, S. Chang, C. Dong, K. Chen, L. Chen

9:00 Intermission.

**9:20 CATL 99.** Withdrawn.

**9:40 CATL 100.** *In situ* and *operando* insight into CO<sub>2</sub> electroreduction and gas phase hydrogenation catalysts. B.R. Cuenya

**10:20 CATL 101.** Nano-XAFS imaging of oxygen diffusion in Pt-Ce<sub>2</sub>Zr<sub>2</sub>O<sub>x</sub> particles during oxygen storage/release. H. Matsui, N. Ishiguro, K. Enomoto, T. Uruga, O. Sekizawa, M. Tada

**10:40 CATL 102.** Electrochemical carbon deposition from CO<sub>2</sub> on nickel and ceria electrodes studied by *operando* XPS. T. Skafte, Z. Guan, M. Machala, C. Gopal, M. Monti, L. Martinez, E. Stamate, S. Sanna, W. Chueh, C. Graves

**11:00 CATL 103.** Why is water more reactive than H<sub>2</sub> in photocatalytic CO<sub>2</sub> conversion into fuels at reaction pressure up to 0.80 MPa? H. Zhang, S. Kawamura, M. Miyano, M. Yoshida, Y. Izumi

**11:20 CATL 104.** Evidence for small polaron formation leading to intrinsic photoexcited charge trapping in -Fe<sub>2</sub>O<sub>3</sub>. L.M. Carneiro, S. Cushing, C. Liu, S.R. Leone

11:40 Discussion.

### Section B

Parc 55 San Francisco  
Cyril Magnin III

#### Amorphous Catalytic Materials

B. Peters, S. L. Scott, *Organizers*

N. Brunelli, *Presiding*

**8:00 CATL 105.** Cu/ZnO catalysts derived from amorphous zincin georgeite precursors. G. Hutchings, S. Kondrat, J. Bartley, S. Taylor, C. Kiely

**8:35 CATL 106.** Nanocatalysts based on amorphous porous silica for high-efficient reaction processes. J. Huang

**9:10 CATL 107.** Ambient temperature NO oxidation over Cr-based amorphous mixed oxide catalysts: Effects from the second oxide components. A. Wang, Y. Guo, C.H. Peden, F. Gao

**9:30 CATL 108.** Limitations of top-down approaches to synthesize amorphous polymer catalysts for biomass hydrolysis. M.T. Timko, M. Emmert, S. Granados Focil, K. Schmidt-Rohr

9:50 Intermission.

**10:10 CATL 109.** *In situ* site titration of silica-supported metal oxide catalysts. T.R. Eaton, N.E. Thornburg, S. Ahn, J.M. Notestein

**10:45 CATL 110.** Two dimensionally dispersed V/SiO<sub>2</sub> catalysts for the oxidative dehydrogenation of propane. I. Hermans

**11:20 CATL 111.** Carbon support effects on the selectivity of Pd/C catalysts for the hydrogenation of multifunctional chemicals. R.G. Rao, R. Blume, T.W. Hansen, E. Fuentes, Y.J. Chabal, R. Schloegl, D. Hibbits, J. Tessonnier

**11:40 CATL 112.** Improved graphene oxide sponge as superoleophilic furan coupling catalyst. S. Dutta, D.G. Vlachos, B. Saha

### Section C

Parc 55 San Francisco  
Market Street

#### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

##### Honoring the Contribution to Nanocatalysis

Cosponsored by COLL and WCC

C. Kumar, *Organizer*

M. L. Personick, *Presiding*

**8:00 CATL 113.** Metal nanoparticles on metal-oxide nanoparticle supports as model catalysts. J.C. Hemminger

**8:30 CATL 114.** Nanoporous copper foams as a platform for synthesizing active oxygen reduction and alcohol oxidation catalysts. A. Co

9:00 Intermission.

**9:15 CATL 115.** Polyhedral metal nanoparticles with bimetallic surfaces: Kinetic control and surface passivation. M.L. Personick, M.E. King, H. Jung, A.L. Stone, D.D. Robertson, I.A. Kent

**9:45 CATL 116.** Au/TiO<sub>2</sub> catalysts for low-temperature oxidation and H<sub>2</sub> photoproduction from water. F. Zaera

10:15 Intermission.

**10:30 CATL 117.** Solar-to-chemical conversion via a standalone photo-electrochemical system. B. Min

**11:00 CATL 118.** Selectivity in methanol oxidation on Fe<sub>2</sub>O<sub>3</sub> and the effect of Mo dosing. M. Bowker, P. Hellier

### Section D

Parc 55 San Francisco  
Cyril Magnin I

#### Electrocatalysis for Energy Generation & Storage

##### Oxygen Evolution

Cosponsored by ENFL

A. Holeywinski, J. Snyder, C. Wang, H. Xin, *Organizers*

A. Holeywinski, C. Wang, *Presiding*

**8:00 CATL 119.** Oxygen evolution with an atomically-precise nickel catalyst. D. Kauffman, D. Alfonso

**8:20 CATL 120.** Understanding aqueous proton transfer in ruthenium catalyzed water splitting. N. Govindarajan, A. Tiwari, B. Ensing, E. Meijer

**8:40 CATL 121.** Cobalt modification of Ni-Fe layered double hydroxide and the resulting enhancement for the oxygen evolution reaction. D.R. Strongin, A.C. Thenuwara, N. Attanayake, Q. Yan

**9:00 CATL 122.** Electrodeposited cobalt oxide catalyst in Fe-spiked KOH electrolyte for efficient evolution of oxygen. L. Gong, B.S. Yeo

9:20 Intermission.

**9:40 CATL 123.** Design principles of oxides to catalyze oxygen evolution reaction. Y. Shao-Horn

**10:20 CATL 124.** Near surface alloyed perovskites for catalysis. L. Zhang, A. Vojvodin

**10:40 CATL 125.** Biotemplated synthesis of NiFe oxide nanocatalysts for oxygen evolution reaction. C. Li, W. Zhao

**11:00 CATL 126.** Au@M<sub>x</sub>O<sub>y</sub> core-shell nanoparticles as catalysts for the oxygen evolution reaction. A.L. Strickler, M. Escudero-Escribano, T.F. Jaramillo

**11:20 CATL 127.** Improving the HER and OER performance by hydrogenation of electrocatalysts. X. Chen

### Section E

Parc 55 San Francisco  
Cyril Magnin II

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

Cosponsored by COLL, ENFL, I&EC and INOR

S. Ardo, G. Dukovic, D. Esposito, I. Sharp, *Organizers, Presiding*

8:00 Introductory Remarks.

**8:05 CATL 128.** Understanding photoelectrocatalysis from first principles. E.A. Carter

**8:35 CATL 129.** Resonantly excited photocatalysts and light absorbers for solar fuels. H. Atwater

**9:05 CATL 130.** Dye sensitized photoelectrosynthesis cell: The energy frontier research center for solar fuels and Thomas J. Meyer. T.J. Meyer

9:35 Intermission.

**9:50 CATL 131.** How to provide solar hydrogen and how to apply it? The activity of artificial photo synthetic chemical process project. T. Setoyama

**10:20 CATL 132.** CO<sub>2</sub> + H<sub>2</sub>O + sunlight = chemical fuels + O<sub>2</sub>. P. Yang

**10:50 CATL 133.** Enhancing photostability of BiVO<sub>4</sub> photoanodes for solar water oxidation. K. Choi

**11:20 CATL 134.** Addressing the fundamental materials challenges in advanced solar-driven water splitting technologies. E. Miller

### Section F

Parc 55 San Francisco  
Mission II/III

#### Elucidation of Mechanisms & Kinetics on Surfaces

‡ Cooperative Cosponsorship

## Surface Science

Cosponsored by COLL and ENVR

S. L. Scott, C. Sievers, *Organizers*

A. Savara, *Organizer, Presiding*

**8:00 CATL 135.** Aspartic acid adsorption and decomposition mechanism on Cu surfaces. **A.J. Gellman**, A. Reinicker, Y. Yun, B. Karagoz, S. Dutta

**8:20 CATL 136.** Exploring enantioselective hydrogenation on chirally modified surfaces in ultrahigh vacuum. **W.T. Tysoe**

**9:00 CATL 137.** Insights into methane activation and oxidation on modified ceria catalysts. **J.J. Carey**, **M. Nolan**

**9:20 CATL 138.** Insight into active sites for methane activation from first principles. **Z. Zuo**, **S. Liu**, **S. Zhang**, **J. Rodríguez**, **P. Liu**

**10:00 CATL 139.** Adsorption and reaction of alcohols on SrTiO<sub>3</sub>(100) by ambient pressure XPS. **Y. Zhang**, **A. Savara**, **D.R. Mullins**

**10:20 CATL 140.** Mechanism of CO oxidation on supported Ir and Pt single atoms. **Y. Lu**, **C. Kuo**, **X. Ma**, **H. Xin**, **A.M. Karim**

**11:00 CATL 141.** Alcohols selective aminations: A DFT based micro-kinetics modeling strategy for screening the promising heterogeneous catalysts. **T. Wang**, **C. Michel**, **M. Sabbe**, **M. Pera-Titus**, **P. Sautet**

**11:20 CATL 142.** Alloy catalysis across composition space. **I. Sen**, **A.J. Gellman**

**11:40 CATL 143.** Dynamics, stability, and adsorption states of water on oxidized RuO<sub>2</sub>(110). **M. Nguyen**, **R. Mu**, **D. Cantu**, **I. Lyubinitzky**, **V. Glezakou**, **R. Rousseau**, **Z. Dohnalek**

## Science for a Sustainable Energy Future

### Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG‡, ORGN and PROF

### Synthesis & Characterization of Materials for Energy Applications

#### Enabling Concepts for Energy Materials Design

Sponsored by ANYL, Cosponsored by CATL

#### C1 Catalysis

Sponsored by ENFL, Cosponsored by CATL

#### Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE

#### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

#### Soft Interfaces

Sponsored by COLL, Cosponsored by CATL

#### Support & Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG‡

## Catalysis for Unconventional Energy Sources

Sponsored by ENFL, Cosponsored by CATL and MPPG‡

### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG‡

## MONDAY AFTERNOON

### Section A

Parc 55 San Francisco

Mission I

#### Advanced X-Ray Techniques for Catalyst Characterization

##### New Methodologies

Cosponsored by PHYS

S. R. Bare, A. M. Karim, *Organizers*

A. M. Karim, *Presiding*

**1:00 CATL 144.** Ultra sensitive probing of the local electronic structure based on state-of-the-art Transition-Edge Sensor (TES) technology and soft x-ray spectroscopy. **D. Nordlund**, **B.K. Alpert**, **M.L. Baker**, **H. Cho**, **E. Denison**, **W.B. Dorise**, **J.W. Fowler**, **K.J. Gaffney**, **B. Gao**, **J. Gard**, **G. C. Hilton**, **K.D. Irwin**, **Y.I. Joe**, **C. Kenney**, **J. Knight**, **T. Kroll**, **S. Lee**, **D. Li**, **R. Marks**, **M. Minitti**, **R.A. Mori**, **H. Ogasawara**, **G. O'Neil**, **D. Schmidt**, **D. Sokaras**, **D.S. Swetz**, **Y. Song**, **C.J. Titus**, **J. Ullom**, **T. Weng**, **C. Williams**, **B.A. Young**

**1:20 CATL 145.** Characterizing working catalysts with correlated electron and photon probes. **E. Stach**, **Y. Li**, **S. Zhao**, **A. Gamalski**, **D. Zakharov**, **R. Tappero**, **J.G. Chen**, **R.G. Nuzzo**, **A. Frenkel**

**1:50 CATL 146.** Applications of x-ray Raman scattering for in-situ material characterization. **B. Mishra**

**2:20 CATL 147.** Metal poisoning of catalyst particles as studied by x-ray imaging at multiple length scales. **F. Meirer**

2:50 Intermission.

**3:20 CATL 148.** Piecing together a complete picture of catalysis through operando XRD-PDF-DRIFTS. **K.W. Chapman**

**4:00 CATL 149.** Utilizing in-situ small and wide angle x-ray scattering for rapid feedback of nanocrystal catalyst synthesis. **C.J. Tassone**, **L. Wu**, **J. Willis**, **I. McKay**, **B. Diroll**, **M. Cargnello**, **J. Qin**, **L. Pellouchoud**, **A. Fournier**

**4:30 CATL 150.** Atomic scale strain field distribution of catalyst during the reaction process by coherent x-ray diffraction imaging. **H. Kim**

### Section B

Parc 55 San Francisco

Cyril Magnin III

#### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

## Lignin Conversion & Upgrading

Cosponsored by CARB and ENFL

M. M. Abu-Omar, S. L. Scott, *Organizers*

C. Sievers, *Presiding*

**1:00 CATL 151.** Atomic level structure characterization of biomass post Catalytic Depolymerization of Lignin (CDL) by dynamic nuclear polarization-enhanced solid state NMR. **M.M. Abu-Omar**, **H. Luo**, **F. Perras**, **M. Pruski**, **N.S. Mosier**

**1:35 CATL 152.** Reductive conversion of lignin with copper-doped catalysts. **M.B. Foston**, **P.C. Ford**, **D.P. Harper**, **Y. Gao**

**2:10 CATL 153.** Divergent pathways for solid-acid catalyzed alkylation of phenol in liquid phase. **H. Shi**, **Y. Liu**, **J. Hu**, **D.M. Camaioni**, **J.A. Lercher**

**2:30 CATL 154.** Aqueous phase transformation of biomass-derived oxygenated compounds over supported tungsten based catalysts. **J.M. Lopez-Nieto**, **N. La Salvia**, **D. Delgado**, **A. Fernandez-Arroyo**, **M. Domine**

2:50 Intermission.

**3:10 CATL 155.** Electrochemical coupling of primary biomass derivatives for the production of second generation platforms for renewable polymer and biofuel applications. **L. Wu**, **M. Mascal**, **T.J. Farmer**, **S. Pérocheau Arnaud**, **M. Wong Chang**

**3:45 CATL 156.** Novel strategies for the catalytic conversion of lignocellulose. **K. Barta**

**4:20 CATL 157.** Chemo-enzymatic synthesis of renewable antioxidant additives with tunable polarity from lignocellulose and vegetable oils. **L. Holland**, **J. Beaugrand**, **P. Ducrot**, **S. Domenek**, **F. Alleais**

**4:40 CATL 158.** Electrochemical conversion of biologically-produced muconic acid to renewable monomers. **J.E. Matthiesen**, **S. Abdolmohammadi**, **M. Viswanathan**, **A. Okerlund**, **D.R. Raman**, **J. Tessonnier**

### Section C

Parc 55 San Francisco

Market Street

#### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

##### Honoring the Contribution to Nanocatalysis

Cosponsored by COLL and WCC

C. Kumar, *Organizer*

K. L. Queeney, *Presiding*

**1:00 CATL 159.** Recent advances in gold catalysis. **G. Hutchings**

**1:30 CATL 160.** Surface chemical transformations and environmental impact of nanoscale complex oxides. **R.J. Hamers**

2:00 Intermission.

**2:15 CATL 161.** Chemical patterning of nanoscale topographical features on Si(100). **K.L. Queeney**

**2:45 CATL 162.** Modifying catalysts using atomic layer deposition. **N. Yang**, **A.S. Asundi**, **S.F. Bent**

**3:15** Overview of research accomplishments and acknowledgements. **C. Friend**

## Section D

Parc 55 San Francisco

Cyril Magnin I

### Electrocatalysis for Energy Generation & Storage

#### Fuel Cells, Electrolyzers & Batteries

Cosponsored by ENFL

A. Holewinski, J. Snyder, C. Wang, *Organizers*

H. Xin, *Organizer, Presiding*

A. Holewinski, *Presiding*

**1:00 CATL 163.** Synthesis and characterization of thiophene annulated butterfly [2Fe-2S] complexes. **W. Brezinski**, **M.O. Talbot**, **T. Yamamoto**, **S. Sill**, **L.M. Stratton**, **D.L. Lichtenberger**, **D.H. Evans**, **R.S. Glass**

**1:20 CATL 164.** Differential electrochemical x-ray absorption spectroscopy of hydrogen evolution electrocatalysis on metal phosphides. **T. Billo**, **L. Hsu**, **Y. Lin**, **W. Chen**

**1:40 CATL 165.** Universal surface engineering of transition metals for hydrogen evolution from water. **Y. Sun**

**2:00 CATL 166.** Fundamental understanding of defective carbon-based materials for electrochemical synthesis of hydrogen peroxide. **S. Chen**, **Z. Chen**, **S. Siahrostami**, **T.R. Kim**, **D. Nordlund**, **D. Sokaras**, **S. Nowak**, **J.W. To**, **D.C. Higgins**, **R. Sinclair**, **F. Studt**, **J.K. Norskov**, **T.F. Jaramillo**, **Z. Bao**

**2:20 CATL 167.** Electrocatalytic and thermal catalytic phenol hydrogenation over platinum and rhodium. **N. Singh**, **Y. Song**, **O. Gutiérrez**, **D.M. Camaioni**, **C.T. Campbell**, **J.A. Lercher**

2:40 Intermission.

**3:00 CATL 168.** Probing the nature of active sites for methanol oxidation with transient isotope kinetics. **C. Barnhill**, **A. Holewinski**

**3:20 CATL 169.** Search for a high efficiently platinum-based mixed-metal anode catalyst for polymer electrolyte membrane fuel cells. **N. Dimakis**, **D. Valdez**, **E.S. Smotkin**

**3:40 CATL 170.** Ultrasmall intermetallic nanoparticles for enhanced catalytic electro-oxidation. **Z. Qi**, **C. Xiao**, **C. Liu**, **T. Goh**, **L. Zhou**, **R. Malgal Ganesha**, **Y. Pei**, **L.A. Curtiss**, **W. Huang**

**4:00 CATL 171.** Design of Ni-based electrocatalysts for CO<sub>2</sub> electrolysis from first-principles. **X. Gu**, **J. Carneiro**, **E. Nikolla**

**4:20 CATL 172.** Controlled selectivity towards CO/H<sub>2</sub> production during the Co-electrolysis of H<sub>2</sub>O and CO<sub>2</sub> using solid oxide electrolysis cells. **B. Hu**, **A. Aphale**, **W. Song**, **J.W. Stevenson**, **S.L. Suib**, **P. Singh**

**4:40 CATL 173.** Surface reactions of lithium-oxygen batteries studied under electrochemical control with field ionization methods. **H. Valdés Espinosa de los Monteros**, **K.A. Carpenter**, **E. Stuve**

### Section E

Parc 55 San Francisco

Cyril Magnin II

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Mechanistic Studies of Catalysis in Photocatalytic & Photoelectrodes

Cosponsored by COLL, ENFL, I&EC and INOR

G. Dukovic, D. Esposito, I. Sharp, *Organizers*  
S. Ardo, *Organizer, Presiding*

**1:00 CATL 174.** Catalytic reactions on optically excited plasmonic metal nanoparticles. S. Linic

**1:30 CATL 175.** Plasmon-Driven photoelectrochemical cells for artificial photosynthesis. J. DuChene, G. Tagliabue, A.J. Welch, Q. Yang, K. Reidy, A.R. Davoyan, C. Hsiow, H. Atwater

**1:45 CATL 176.** Hot electron and surface plasmon-driven water splitting on Au nanoparticles/TiO<sub>2</sub> nanotube arrays. S. Moon, K. Goddetti, E. Gwag, J. Park

**2:00 CATL 177.** Investigation of plasmon-enhanced photocatalytic CO<sub>2</sub> reduction using nanostructured heterogeneous Ag and Cu catalysts. Y. Kim, E. Creel, E. Corson, F. Oiu, J. Urban, B.D. McCloskey, R. Kostecki

**2:15 CATL 178.** Effect of the application of a non-resonant electric field on the photo-dissociation dynamics of HBr. M. Sneha, Y.H. Lai, J. Meiser, K.L. Hillsbeck, R.N. Zare

**2:30 CATL 179.** Photoelectrochemical hydrogen evolution reaction with quantum yield exceeding 100% via MEG. Y. Yan

**2:45** Intermission.

**3:00 CATL 180.** Fate of carbon dioxide in water-rich fluids under extreme conditions. G.A. Galli, D. Pan

**3:30 CATL 181.** Three distinct nature of surface-bound atomic hydrogen and their role in dictating product selectivity in artificial photosynthesis reactions. S. Poudyal, S. Laursen

**3:45 CATL 182.** Charge transfer processes in catalyzed semiconductor photoelectrodes. S.W. Boettcher

**4:15 CATL 183.** Intrinsic carrier transport and photocatalytic behavior in single crystalline bismuth vanadate thin film solar water splitting photoanodes. W. Zhang, D. Yan, M. Liu

**4:30 CATL 184.** Exceptionally stable molybdenum disulfide protection schemes for silicon photocathodes. L. King, T. Hellstern, T.F. Jaramillo

### Section F

Parc 55 San Francisco  
Mission II/III

#### Elucidation of Mechanisms & Kinetics on Surfaces

##### Mechanisms

Cosponsored by COLL and ENVR

S. L. Scott, C. Sievers, *Organizers*

A. Savara, *Organizer, Presiding*

**1:00 CATL 185.** Augmenting reaction mechanisms for improved computational catalyst screening. L. Grabow

**1:20 CATL 186.** Standard states of adsorbates on surfaces. A. Savara, C.T. Campbell

**2:00 CATL 187.** Understanding the role of anionic dopants on Pd for hydrogen production from formic acid. P. Sautet, P. Wang, S. Steinmann, C. Michel, G. Fu

**2:40 CATL 188.** Stabilization of catalytically active Cu<sup>+</sup> surface sites on titanium-copper mixed-oxides. D.J. Stacchiola

**3:00 CATL 189.** Mechanistic requirements of hydrogen addition to carbonyl compounds. F. Lin, J. Shangquan, Z. Wu, Y. Chin

**3:40 CATL 190.** Mechanistic origins of unselective oxidation products in the conversion of propylene to acrolein. L. Bui, A. Bhan

**4:20 CATL 191.** Calculating free energy of atomic oxygen adsorbed on late transition metal surfaces. K. Frey

**4:40 CATL 192.** First-principles study of water-gas shift reaction on cobalt: Microkinetic modeling of a system with strong coverage effects. W. Luo, A.R. Asthagiri

### Science for a Sustainable Energy Future

#### Chemical & Biological Conversions Approaches to Energy Conversion

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG†, ORGN and PPOF

#### Synthesis & Characterization of Materials for Energy Applications

##### In Operando & Surface Sensitive Analysis

Sponsored by ANYL, Cosponsored by CATL

##### C1 Catalysis

Sponsored by ENFL, Cosponsored by CATL

Sponsored by COMP, Cosponsored by CATL, MPPG† and PHYS

#### Support & Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG†

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG† and PMSE

#### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

##### Catalysts for Selective Chemical Transformations

Sponsored by COLL, Cosponsored by CATL

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG†

#### Sustainability in Electrocatalytic Fuel & Chemical Production

Sponsored by INOR, Cosponsored by CATL

## TUESDAY MORNING

### Section A

Parc 55 San Francisco  
Cyril Magnin III

#### Advanced X-Ray Techniques for Catalyst Characterization

### New Methodologies

Cosponsored by PHYS

A. M. Karim, *Organizer*

S. R. Bare, *Organizer, Presiding*

**8:00 CATL 193.** Ex-situ profiling of TiO<sub>2</sub> thin film growth: An XRD study using synchrotron radiation. K.A. Kulinski, D. Steckhahn, B. Gunn, C. Tassone, A.S. Ichimura

**8:20 CATL 194.** Characterization of catalysts with operando x-ray spectroscopy. D. Sokaras

**9:00 CATL 195.** Operando electrochemical grazing incidence x-ray absorption and diffraction for the CO<sub>2</sub> reduction reaction. J. Feaster, M. Farmand, J. Lin, A. Landers, S. Fackler, R. Davis, A. Mehta, J. Yan, T.F. Jaramillo, W. Drisdell

**9:20 CATL 196.** Advanced X-ray spectroscopic tools for operando catalysis studies at the National Synchrotron Light Source-I. E. Stavitski

**9:50 CATL 197.** Using organometallic model complexes to assist in interpreting x-ray absorption spectra of single-site catalysts. A. Getsoian, J. Camacho-Bunquin, G. Zhang, A. Hock

**10:20 CATL 198.** Analytical XAFS and XES on the benchtop in research groups, industrial testing facilities, and teaching labs. G. Seidler, E. Jahrman, W. Holden, A. Ditter, O. Hoidn, L. Bradshaw, S.A. Kozimor, J. Sieber, D. Mortensen

**10:50** Discussion.

### Section B

Parc 55 San Francisco  
Powell I/II

#### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

#### Carbohydrate Processing & Upgrading of Biomass-Derived Molecules

Cosponsored by CARB and ENFL

M. M. Abu-Omar, S. L. Scott, *Organizers*

J. Tessonier, *Presiding*

**8:00 CATL 199.** Intensified oxidative processes for biomass conversion to chemicals. B. Subramaniam, M. Lundin, A.M. Danby, X. Zuo

**8:35 CATL 200.** New fine chemical building blocks from lignin via stabilization of reactive intermediates from the C-2 acidolysis pathway. J.G. De Vries, K. Barta, P.J. Deuss

**9:10 CATL 201.** Deactivation paths during hydrodeoxygenation of aromatic oxygenates over Pt/H-BEA. C. Okolie, G. Foo, M.V. Rodrigues, M. Yung, C. Sievers

**9:45** Intermission.

**10:05 CATL 202.** Recent advances in biomass conversion for bio-products and fuels. D.G. Vlachos, B. Saha, P.J. Dauenhauer, W. Fan, M. Tsapatsis, S. Caratzoulas

**10:40 CATL 203.** Ru-based heterogeneous catalysts for levulinic acid hydrogenation: On the influence of catalyst composition, synthesis and feed impurities. P. Buijntinx, B.M. Weckhuysen

**11:15 CATL 204.** Observing biomass conversion at solid-liquid interfaces using operando solid-state NMR spectroscopy. L. Qi, A. Chamas, D.W. Hoyt, E. Walter, N. Washton, M. Foston, S.L. Scott

**11:35 CATL 205.** Muconic acid isomerization strategies: The role of water (friend or foe?). J. Carraher, J. Tessonier

### Section C

Parc 55 San Francisco  
Market Street

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

##### Single Crystal Catalysis

Cosponsored by COMP

T. Bligaard, C. M. Friend, C. Kumar, *Organizers*

J. Rodriguez, *Presiding*

**8:00** Introductory Remarks.

**8:15 CATL 206.** Heterogeneous photochemical processes on metal oxides. A.S. Crampton, F. Xu, E. Kaxiras, L. Cai, X. Zheng, C.M. Friend

**8:45 CATL 207.** On the active site model in computational catalyst screening. K.U. Ruter

**9:15** Intermission.

**9:30 CATL 208.** Modifications of Pt single crystal surfaces for designing ideal electrochemical interfaces in PEFCs. K. Kodama, R. Jinnouchi, A. Shinohara, Y. Morimoto

**10:00 CATL 209.** Mechanistic studies of the HDO of lignin-derived oxygenates on PtZn: From single crystals to high surface area catalysts. J.M. Vohs, D. Shi

**10:30** Intermission.

**10:45 CATL 210.** Decoding the rich behaviour of single atom alloys and identifying opportunities for catalyst design. M. Stamatkakis

**11:15 CATL 211.** Inverse oxide/metal systems and fundamental studies in heterogeneous catalysis. J. Rodriguez, P. Liu, J. Graciani, S.D. Senanayake, D.J. Stacchiola, J.F. Sanz

### Section D

Parc 55 San Francisco  
Cyril Magnin I

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Molecular & Bio-Inspired Photocatalysts

Cosponsored by COLL, ENFL, I&EC and INOR

S. Ardo, D. Esposito, I. Sharp, *Organizers*

G. Dukovic, *Organizer, Presiding*

**8:00 CATL 212.** Photocatalytic reduction of CO<sub>2</sub>. C.P. Kubiak, P. Cheung, A. Zhanaidarova

**8:30 CATL 213.** Catalytic light-driven reductive transformations mediated by cobalt complexes. J. Lloret Fillol, A. Call, C. Casadevall, F. Acuña-Pares, A. Casitas Montero, M. Claros

**8:45 CATL 214.** Photoinduced proton-coupled electron transfer in solvated molecular systems and photoreceptor proteins. S. Hammes-Schiffer

**9:15 CATL 215.** π-Hole-π interaction promoted photocatalytic hydrodefluorination via inner-sphere electron transfer. J. Lu, N. Khetrapal, J. Johnson, X.C. Zeng, J. Zhang

**9:30** Intermission.

†Cooperative Cosponsorship

- 9:45 CATL 216.** Study of light-driven catalysis by enzyme-nanoparticle hybrids. P.W. King, K.A. Brown, D. Harris, M. Wilker, H. Hamby, S. Keable, N. Khadka, L.C. Seefeldt, J. Peters, G. Dukovic
- 10:15 CATL 217.** Photocatalytic NADH-analog systems for fuel-forming reactions. K. Glusac
- 10:30 CATL 218.** Molecular surface coatings for semiconductor photoelectrochemistry and photocatalysis. G.F. Moore, A.M. Beller, D. Khusnutdinova, B.L. Wadsworth
- 11:00 CATL 219.** Atomic layer-deposited cobalt oxide stabilizes dye-sensitized photoanodes for improved photoelectrochemical water splitting. P. Xu, Y. Hu, C. Gray, I. Sharp, T.E. Mallouk
- 11:15 CATL 220.** Design of visible light organic photoredox catalysts for the synthesis of polymers and small molecules. C. Lim, R.M. Pearson, J.C. Theriot, B.G. McCarthy, M.D. Ryan, H. Yang, C. Musgrave, G. Miyake
- 11:30 CATL 221.** Design of photoredox catalysts for efficient organocatalyzed atom transfer radical polymerization. C. Musgrave, C. Lim, J.C. Theriot, G. Miyake, M.D. Ryan, B.G. McCarthy, S. Sartor, N.H. Damrauer

### Section E

Parc 55 San Francisco

Cyril Magnin II

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

*Cosponsored by ENVR and I&EC*

M. A. Banares, M. Guerrero-Perez, F. Tao, Organizers

G. Rupprechter, *Presiding*

- 8:00 CATL 222.** Molecular catalysis science. Nanoparticle synthesis, and instrument development for characterization under reaction conditions. Conquering catalytic complexity. G.A. Somorjai
- 8:40 CATL 223.** Operando studies of working catalysts by synchrotron-based XPS and XAS at atmospheric pressure. G. Rupprechter, K. Foettinger, C. Rameshan
- 9:20 Intermission.**
- 9:40 CATL 224.** Operando spectroscopy from the perspective of SUNCAT and SSR. S.R. Bare
- 10:20 CATL 225.** Bridging the material and pressure gaps in synchrotron based photoelectron in-situ/operando studies. L. Gregoratti, M. Amati, H. Sezen

### Section F

Parc 55 San Francisco

Mission II/III

#### Elucidation of Mechanisms & Kinetics on Surfaces

##### Electrons

*Cosponsored by COLL and ENVR*

S. L. Scott, C. Sievers, Organizers

A. Savara, Organizer, *Presiding*

- 8:00 CATL 226.** Surface thermodynamics and kinetics of perovskite oxides. L. Zhang, D. Müller, Z. Guan, C. Gopal, M. Monti, W. Chueh, A. Vojvodic

- 8:20 CATL 227.** NO electrochemical reduction on transition metal electrocatalysts: A DFT approach. H. Chun, K. Honkala, V. Apaja, A.Z. Clayborne, J. Greeley

- 9:00 CATL 228.** Direct synthesis of H<sub>2</sub>O<sub>2</sub>: Competing reaction pathways depend differently on surface structure. N. Wilson, P. Priyadarshini, D. Flaherty

- 9:40 CATL 229.** When modelling bridges electrocatalysis and heterogeneous catalysis: The case of the formic acid decomposition. S.N. Steinmann, C. Michel, P. Sautet

**10:00 Intermission.**

- 10:20 CATL 230.** Enhancing rates of redox reactions with surface-induced solvent effects. R.C. Remsing

- 10:40 CATL 231.** Reaction mechanisms for the electrochemical reduction of CO<sub>2</sub> on the Cu(100) surface from quantum mechanics free energy calculations with explicit water. T. Cheng, H. Xiao, W.A. Goddard

- 11:00 CATL 232.** Silicon surface termination affects electrolyte reduction pathways as probed by in situ sum frequency generation vibrational spectroscopy. Y. Horowitz, H. Han, G.A. Somorjai

- 11:20 CATL 233.** Computational investigation of secondary electron emission and other mechanisms involved in plasma-assisted dry methane reforming using nickel catalysts. A. Sirjoosingh, G.C. Schatz

#### Synthesis & Characterization of Materials for Energy Applications

##### Fundamental & Molecular Models for Advanced Energy Materials

*Sponsored by ANYL, Cosponsored by CATL*

##### Functional Porous Materials for Sustainable Energy

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

##### Catalytic Materials from Molecular Insight

*Sponsored by COMP, Cosponsored by CATL, MPPG‡ and PHYS*

##### Support & Activator Effects on Metal Mediated Polymerization

*Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG‡*

##### Advanced Materials & Technologies for Solar Energy Conversion & Storage

*Sponsored by ENFL, Cosponsored by CATL, MPPG‡ and PMSE*

##### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

##### Surface Science of Functional Interfaces

*Sponsored by COLL, Cosponsored by CATL*

##### State-of-the-Art Methods for Modeling Materials Chemistry

*Sponsored by COMP, Cosponsored by CATL and MPPG‡*

## TUESDAY AFTERNOON

### Section A

Parc 55 San Francisco

Cyril Magnin III

#### General Papers

S. L. Scott, *Organizer*

E. Nikolla, *Organizer, Presiding*

- 1:00 CATL 234.** Advancing energy applications with nanoscale hybrid catalysts: The key concept of exploiting interfaces. P. Fornasiero, M. Prato, F. Paolucci, M. Bonchio, R.J. Gorte

- 1:20 CATL 235.** Efficient biomass transformation to chemicals and biofuel catalyzed by ordered mesoporous solid acid. C. Carrie, J. Boravilas, A. Masoumi, B. Kanjilal, F. Liu, C. Slater, M.J. Savelski, J.F. Stanzione, I. Noshadi

- 1:40 CATL 236.** Structure-Activity relationships in m-cresol hydrodeoxygenation over platinum catalysts. J.A. Hunns, K. Wilson, A.F. Lee, M. Watson

- 2:00 CATL 237.** Enhanced production of aromatics from biomass upgrading over in-framework Ga-ZSM5 catalysts via a systematic study. M. Xu, C. Mukarakate, B.G. Trewyn, R.M. Richards

- 2:20 CATL 238.** Investigating lignin disassembly pathways through modifications of Cu-doped porous metal oxide catalysts. M.A. Chui, G. Metzger, C.M. Bernt, A. Tran, P.C. Ford

- 2:40 CATL 239.** Selective non-oxidative ethanol dehydrogenation on dilute NiCu alloys. N. Janvelyan, J. Shan, H. Li, J. Liu, T. Egle, J. Ye, M.M. Biener, J. Biener, M. Flytzani-Stephanopoulos, C.M. Friend

**3:00 Intermission.**

- 3:15 CATL 240.** Pt-catalysed hydrodeoxygenation of lignin monomers: Understanding of factors affecting the catalyst performance. A. Shivhare, A.F. Lee, K. Wilson, J.A. Hunns, C.M. Parlett, M. Isaacs

- 3:35 CATL 241.** Effect of post-treatment on structure and catalytic activity of CuCo-based materials for glycerol oxidation. G. Dodekatos, H. Tuysuz

- 3:55 CATL 242.** *Ex-situ* catalytic fast pyrolysis of lignocellulosic biomass over Pt/TiO<sub>2</sub>: Fundamental insight to large bench scale validation. M. Griffin, G.A. Ferguson, C. Mukarakate, M.J. Bidy, D.A. Ruddy, R.J. French, F.G. Baddour, G. Beckham, J. Schaidle

- 4:15 CATL 243.** Transition metal phosphide catalysts for methanol synthesis from CO and CO<sub>2</sub>. M.S. Duyar, J. Snider, E. Valle, T.F. Jaramillo

- 4:35 CATL 244.** Thermodynamic and kinetics studies on site requirements for aldol addition over differently prepared TiO<sub>2</sub> catalysts. H. Zhang, D. Flaherty

### Section B

Parc 55 San Francisco

Powell I/II

#### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

*Cosponsored by CARB and ENFL*

S. L. Scott, *Organizer*

M. M. Abu-Omar, *Organizer, Presiding*

- 1:00 CATL 245.** Acrylonitrile production from biomass-derived intermediates. G. Beckham, M.J. Bidy, D. Brandner, A. Bratis, J.R. Dorgan, T. Eaton, E. Karp, L. Maniker, W. Michener, D. Salvachua, V. Sánchez i Nogué, E. Tan, D. Vardon, X. Wang

- 1:35 CATL 246.** Catalytic reductions of oxygenates with oxophilic metal complexes as catalysts. A.D. Sadow

- 2:10 CATL 247.** Selective hydrogenation of xylose to xylitol in the presence of Co/SiO<sub>2</sub> catalysts. K. De Oliveira Vigier, M. Audemar, F. Jérôme, S. Royer

- 2:30 CATL 248.** Vanadium-catalyzed aerobic oxidative C-C bond cleavage of 1,2-diols: A coupled theoretical and experimental study of an unprecedented direct two-electron oxidation. C. Diaz-Urrutia, P. Fleurat-Lessard, C. Michel, S. Gorelsky, I. Korobkov, A. Martinez, R. Baker

**2:50 Intermission.**

- 3:10 CATL 249.** C<sub>6</sub> diacids from homocitric acid lactone using relay heterogeneous catalysis. I. Thapa, S. Ntais, E. Baranova, M.K. Lau, C. Hass, J. Millis, R. Baker

- 3:45 CATL 250.** Catalytic approaches to complex molecules from carbohydrate biomass. M.R. Gagne

- 4:20 CATL 251.** Evolution of a heterogeneous Cu-based lignin hydrogenolysis catalyst in supercritical methanol. Z. Jones, J.A. Barrett, J. Zhang, P.C. Ford, S.L. Scott

- 4:40 CATL 252.** Anatase TiO<sub>2</sub> activated by gold particles for selective hydrodeoxygenation of guaiacol to phenolics. Z. Zhang, J. Mao, J. Zhou, Z. Xia, Z. Wang, Z. Xu, W. Xu, P. Yan, K. Liu, X. Guo

### Section C

Parc 55 San Francisco

Market Street

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

##### Electrocatalysis

*Cosponsored by COMP*

T. Bligaard, C. M. Friend, C. Kumar, Organizers

A. Vojvodic, *Presiding*

- 1:00 CATL 253.** Analysis of the mechanism of electrochemical oxygen reduction and development of Ag- and Pt-alloy catalysts for low temperature fuel cells. S. Linic

- 1:30 CATL 254.** Engineering complex, layered metal oxides for high temperature electrochemical oxygen reduction and evolution. E. Nikolla

**2:00 Intermission.**

- 2:15 CATL 255.** Transition-metal compounds as electrocatalysts. A. Vojvodic

**2:45 CATL 256.** Improving our understanding of electrochemical reaction barriers. A. Peterson, P. Lindgren, G. Kastlunger, M. El Khatib

**3:15** Intermission.

**3:30 CATL 257.** Spectroscopy and microscopy at the solid-vapor and solid-liquid interface. M. Salmeron

**4:00 CATL 258.** Machine learning approach to electrocatalyst discovery. H. Xin

## Section D

Parc 55 San Francisco

Cyril Magnin I

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Novel Photocatalytic & Photoelectrode Materials

Cosponsored by COLL, ENFL, I&EC and INOR

S. Ardo, G. Dukovic, D. Esposito, Organizers

I. Sharp, Organizer, Presiding

**1:00 CATL 259.** Photocatalysis induced by direct electron emission from diamond surfaces. R.J. Hamers

**1:30 CATL 260.** High throughput discovery of solar fuels photoanodes. J. Gregoire

**2:00 CATL 261.** Solar fuels photoanodes prepared by inkjet printing of copper vanadates. P. Newhouse, D. Boyd, A. Shinde, D. Guevarra, L. Zhou, E. Soedarmadji, G. Li, J. Neaton, J. Gregoire

**2:15 CATL 262.** Polymer photocatalysts for water splitting: lessons from experiment and theory. M.A. Zwijnenburg, R. Sprick, D. Adams, A.I. Cooper

**2:30 CATL 263.** Molybdenum disulfide as a protection layer and catalyst for gallium indium phosphide solar water splitting photocathodes. R.J. Britto, J. Young, D. LaFehr, J. Benck, C. Hahn, T.G. Deutsch, T.F. Jaramillo

**2:45** Intermission.

**3:00 CATL 264.** Is it photocatalysis or is it photosynthesis? Developing design criteria for enhanced solar energy conversion and photocatalytic devices. F.E. Osterloh, Z. Zhao, M.A. De Melo Junior

**3:30 CATL 265.** Sculpting photocatalysts on the nano scale. L. Amirav

**4:00 CATL 266.** Multicatalytic, light-driven upgrading of butanol to 2-ethylhexenal and hydrogen under mild aqueous conditions. G. Hafenstine, K. Ma, A.R. Harris, O. Yehezkeili, E. Park, D. Domaille, J. Cha, A.P. Goodwin

**4:15 CATL 267.** Nanocrystalline CoO photocatalyst: Role of facets in overall water splitting. K. Park, A. Kolpak

**4:30 CATL 268.** Nanostructured non-precious metal silicon photocathodes for solar water splitting. T. Hellstern, P. Chakthranont, L. King, I. Narkeviciute, R.J. Britto, D. Palm, C. Hahn, T.F. Jaramillo

## Section E

Parc 55 San Francisco

Cyril Magnin II

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

Cosponsored by ENVR and I&EC

M. Guerrero-Perez, F. Tao, Organizers

M. A. Banares, Organizer, Presiding

**1:00 CATL 269.** Operando beyond catalysis: Spectroscopic characterization of separation measurements in membranes combined with modelling. M. Daturi, C. Le Gullouzer, P. Bazin, S. Thomas, A. Vimont, G. Clet

**1:40 CATL 270.** Operando membrane spectroscopy: A novel technique for identifying membrane structure-function relationships. C. O'Brien, I. Lee, Z. Dunbar

**2:00 CATL 271.** Modeling catalysts under a pressure of gas. P. Sautet

**2:40** Intermission.

**3:00 CATL 272.** New aspects of environmental TEM in catalyst chemistry. S. Takeda, R. Aso, N. Kamiuchi, H. Yoshida, K. Soma

**3:40 CATL 273.** Development of a reaction cell for in-situ/operando studies of surface of a catalyst under a reaction condition and during catalysis. F. Tao

## Section F

Parc 55 San Francisco

Mission II/III

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Organic Oxygenates

Cosponsored by COLL and ENVR

S. L. Scott, C. Sievers, Organizers

A. Savara, Organizer, Presiding

**1:00 CATL 274.** Elucidation of the mechanism and kinetics of catalyzed reactions: Application of experimental and theoretical approaches. A.T. Bell

**1:40 CATL 275.** Mechanisms of lignin and furan derivative upgrade on metal surfaces. D.G. Vlachos, G. Gu, G. Jenness

**2:20 CATL 276.** Catalysis in a cage: The dynamic nature of active copper sites in zeolites during NOx SCR with ammonia. A.A. Parekh, C. Paolucci, I. Khurana, J.D. Albarracín-Caballero, J.R. Di Iorio, A. Shih, H. Li, S. Li, A. Yezerets, W.N. Delgass, J.T. Miller, F. Ribeiro, W.F. Schneider, R. Gounder

**3:00 CATL 277.** Theoretical investigation of the catalytic hydrode-oxygenation of levulinic acid over Ru(0001) surface. A. Heyden

**3:40 CATL 278.** Collision theory in liquids and the molecular origin of the selectivity difference between AuPd and Pd for benzylic alcohol oxidation. A. Savara, C.E. Chan-Thaw, I. Rosssetti, L. Prati, A. Villa

**4:00 CATL 279.** Hydrode-oxygenation of phenol through FeXMo<sub>2</sub>-XP bimetallic phosphide catalyst: A Density Functional Theory (DFT) study. V. Jain, N. Rai

**4:20 CATL 280.** Characterization of active centers in the zeolite SSZ-13. F. Goeltl, I. Hermans, M. Mavrikakis

## Synthesis & Characterization of Materials for Energy Applications

### Novel Architectures, Materials & Synthetic Routes/In Operando & Surface Sensitive Analysis

Sponsored by ANYL, Cosponsored by CATL

#### ACS Award Lectures

Sponsored by COLL, Cosponsored by CATL and WCC

### Catalytic Materials from Molecular Insight

Sponsored by COMP, Cosponsored by CATL, MPPG† and PHYS

### Functional Porous Materials for Sustainable Energy

Sponsored by ENFL, Cosponsored by CATL and MPPG†

### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG† and PMSE

### Support & Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG†

### State-of-the-Art Methods for Modeling Materials Chemistry

Sponsored by COMP, Cosponsored by CATL and MPPG†

## TUESDAY EVENING

### Section A

Moscone Center

Hall D

#### Poster Session

E. Nikolla, S. L. Scott, Organizers

6:00 - 8:00

**CATL 281.** Acetone sensing mechanism of PdO at temperatures below 250°C. C. Tsai, Y. Chen, I. Cheng, F. Pan

**CATL 282.** Design of highly-stable and reactive Pt catalysts dispersed on CeO<sub>2</sub>-TiO<sub>2</sub> interface. M. Yoo, H. Ha, H. Kim

**CATL 283.** DFT Study on single atom Au/Co<sub>3</sub>O<sub>4</sub>(111) catalyzing CO oxidation. W. Hu, X. Cao, P. Hu

**CATL 284.** DFT corroborated study for the synthesis of cyclic carbonate from epoxide and CO<sub>2</sub> using a mixed Cu(II) amino acid-imidazolite MOF catalyst. D. Park, A.C. Kathalikkattil, H. Woo

**CATL 285.** Degradation of herbicide Basagran 480 with iron oxide nanoparticles. M. Ocampo, L. Payan, I. Hernández, V. Garibay, R. Suárez, L. González

**CATL 286.** Structure and catalytic activity of molybdenum carbide and oxycarbide nanoparticles in ZSM-5 for natural gas conversion to aromatics. Y. Zheng

**CATL 287.** Enhanced activity and stability of CuO-ZnO-ZrO<sub>2</sub> catalyst by addition of graphene oxide for CO<sub>2</sub> hydrogenation to methanol. T. Witton, S. Bumrungrasalee, W. Donphai, M. Chareonpanich, J. Limtrakul

**CATL 288.** CO Adsorption induced Pd-Au swapping in Pd-core@Au-shell nanoparticles. H. An, H. Ha, M. Yoo, H. Kim

**CATL 289.** Magnesium modified HZSM-5 with superior on-stream stability for fluid catalytic cracking naphtha hydro-upgrading. Q. Lü, Y. Yue, Y. Zhou, H. Liu, X. Bao

**CATL 290.** Higher alcohol synthesis via Fischer-Tropsch metal surface modification of MoP catalyst. E. Valle, M. Duyar, T.F. Jaramillo

**CATL 291.** Efficient reversible hydrogen carrier system based on amine reforming of methanol. S. Kar, J. Kothandaraman, R. Sen, A. Goeppert, G. Olah, S.G. Prakash

**CATL 292.** Insights from a QM/MM Investigation of ethane dehydrogenation pathways on Ga/H-MFI. E. Mansoor, M.P. Head-Gordon, A.T. Bell

**CATL 293.** Nanostructured carbon decorated molybdenum sulfide for the catalytic decomposition of water to produce hydrogen and for supercapacitive applications. J. Candler, K.S. Siam, P.K. Kahol, R. Gupta

**CATL 294.** Methane pyrolysis using catalytic melts for CO<sub>2</sub> free hydrogen production. D.C. Upham, M.J. Gordon, H. Metiu, E.W. McFarland

**CATL 295.** Cobalt-nitrogen doped 3D porous carbon prepared with self-generated nanoparticles as sacrificial templates for hydrogen generation. Z. Zhang, F. Wang, S. Yang, M. Dou, J. Ji

**CATL 296.** Heterogeneous organo-catalysis: Sustainable pathway to furanics from biomass. S. Verma, R.S. Varma

**CATL 297.** Methanol synthesis from CO<sub>2</sub> and H<sub>2</sub> on Au/ZnO: Mechanistic insights from the analysis of adsorbed species formed under reaction conditions. A.M. Abdel-Mageed, D. Widmann, A. Rezvani, R.J. Behm

**CATL 298.** Competition between Reverse Water Gas Shift (RWGS) reaction and CO<sub>2</sub> methanation on Ru/TiO<sub>2</sub>: Temperature induced structural changes. A.M. Abdel-Mageed, D. Widmann, K. Wiese, A. Hauble, R.J. Behm

**CATL 299.** Studies on preparation and catalytic cracking performance of small particle USY zeolite. G. Wang, S. Cui, B. Liu

**CATL 300.** Environmental TEM study of nanoparticles using modified *in-situ* E-TEM chips. Q. Wu, J. Cen, C.J. Ridge, D. Zakharov, X. Tong, M. Lindsay, A. Orlov

**CATL 301.** Lower valence metal doping of bulk Cr<sub>2</sub>O<sub>3</sub>: Charge compensation and oxygen vacancy formation. J.J. Carey, M. Nolan

**CATL 302.** Hierarchical multicomponent catalysts: Structure design, function realization and catalytic applications. G. Wang, H. Gao, S. Fan, D. Jia, J. Wang, L. Tan, W. Dong

**CATL 303.** Catalytic conversion of sugar stream to hydrocarbons. A.B. Padmaperuma, M.A. Liiga, D.L. Auberry

**CATL 304.** Withdrawn.

**CATL 305.** Carbon dioxide capture and conversion using CNT based catalysts. Z. Zhou, K.J. Stowers

**CATL 306.** Flower-like CuO/titania nanotube arrays for water splitting application. W. Chiu, H. Chiu, C. Lee

**CATL 307.** Porous structure-dependent electrocatalytic activity of cobalt and nitrogen co-doped carbon electrocatalyst for oxygen reduction reaction. Y. Song, M. Dou, X. Wen, F. Wang

† Cooperative Cosponsorship

- CATL **308**. Withdrawn.
- CATL **309**. Cu/ZnO core-shell catalysts for methanol synthesis from CO<sub>2</sub>: Structure-Activity relationship. R. Gaikwad, D. Koziej, M. Niederberger, A. Urakawa
- CATL **310**. Preparation of carbon molecular sieve composite membrane for N<sub>2</sub>/F-gases separation. S. Kim, P. Lee, S. Nam, H. Park, Y. Park
- CATL **311**. 2D-Nanosheets with palladium nanoparticles for C-C coupling reactions. D. Yim, F. Raza, J. Park, H. Kim, H. Lee, J. Kim
- CATL **312**. Benzene in olefin metathesis by Ru-based catalysts. A. Poater, J. Poater, R. Chauvin
- CATL **313**. One-step conversion from Ni/Fe polyphthalocyanine to N-doped carbon supported Ni-Fe nanoparticles for highly efficient water splitting. F. Wang, Z. Zhang, Y. Qin, M. Dou, J. Ji
- CATL **314**. Direct conversion of olefins and CO<sub>2</sub> over a supported catalyst. C. Nguyen-Sorenson, K.J. Stowers
- CATL **315**. Synthesis of hierarchical zeolite Y by acid dealumination for cracking reactions. K. Sunny, A. Dabbawala, I. Ismail, M. Khaleel, S. Al Hassan
- CATL **316**. Control synthesis of nano-sized Zeolite-Y using starch gel as the sole template for catalytic cracking applications. K. Youssed, A. Dabbawala, I. Ismail, M. Khaleel, S. Al Hassan
- CATL **317**. Withdrawn.
- CATL **318**. Metal modified zirconium hydrogen phosphate for the oxygen evolution reaction. J. Sanchez, M. Ramos, I. Narkeviciute, J.L. Colon, T.F. Jaramillo
- CATL **319**. Control of catalyst deactivation by wet methods. G. Owusu, A. Baker, A. Alba-Rubio
- CATL **320**. Synthesis of aggregated organosilica nanotubes and their application in catalysis. A. Manchanda, C. Gunathilake, M.E. Gangoda, P. Ghimire, M. Jaroniec, M. Kruk
- CATL **321**. Probing oxidation states of metal/SiO<sub>2</sub> hybrid nanocatalyst under CO oxidation with in situ FTIR spectroscopy. S. Oh, S. Back, W. Doh, S. Moon, J. Kim, Y. Jung, J. Park
- CATL **322**. Atomic structure of the Pt/ $\gamma$ -Al<sub>2</sub>O<sub>3</sub> interface through a combined experiment and theory approach: A model catalyst study. H. Ayoola, C.S. Bonifacio, Q. Zhu, J. Kas, K. Kisslinger, D. Su, E. Stach, J.J. Rehr, W. Al-Saidi, J. Yang
- CATL **323**. Density functional theory study of reactivity of CeO<sub>2</sub>-supported Pt nanoparticles for the CO oxidation. H. Ha, M. Yoo, H. An, H. Kim
- CATL **324**. Withdrawn.
- CATL **325**. Withdrawn.
- CATL **326**. Sacrificial coating strategy toward enhancement of metal-support interaction for ultrastable Au nanocatalysts. W. Zhan, Y. Guo, Y. Guo, W. Li
- CATL **327**. One-pot growth of 3D reduced graphene oxide foams embedded with MoS<sub>2</sub> and Ni-doped MoS<sub>2</sub> nanocatalysts for hydrogen evolution reaction. C. Li, J.B. Grantham, W. Zhao
- CATL **328**. Reactions of enolized carboxylic acids with electrophiles on metal oxide surface. A. Cohen, A. Ignatchenko, O.A. Fraser
- CATL **329**. Selective hydrogenation of dienes and trienes using partially poisoned palladium nanoparticle catalysts. T. Chen, Y. Shon
- CATL **330**. Screening of binary alloy thin films for electrochemical CO<sub>2</sub>/CO reduction. S. Nitopi, L. Wang, D.C. Higgins, C. Morales Guio, A. Landers, T. Hatsukade, C. Hahn, T.F. Jaramillo
- CATL **331**. Multifunctional homogeneous-heterogeneous polymer catalysts for biomass conversion. S. Kalidindi, A. Alba-Rubio
- CATL **332**. Graphene-based porous adsorbents for CO<sub>2</sub> capture. H. Abbo, G. Kelly, S. Titinchi
- CATL **333**. Vapor phase deposition of silver-copper nanoparticles for the oxygen reduction reaction. B. Gibbons, D.C. Higgins, M. Wette, B. Clemens, T.F. Jaramillo
- CATL **334**. Facile *in-situ* synthesis of amorphous manganese oxides nanosheets on polyester fibers and their application in oxidative decomposition of formaldehyde. L. Jinge, P. Zhang
- CATL **335**. Tungsten doped manganese oxides as efficient catalysts for removing formaldehyde at ambient temperature. F. Liu
- CATL **336**. Reaction study of MnOx nanoparticles on Co<sub>3</sub>O<sub>4</sub>: New route to low pressure CO<sub>2</sub> conversion. S. Dalieh, W. Ralston, W. Liu, G. Melael, G.A. Somorjai
- CATL **337**. Effect of acid sites on platinum catalyzed C-C bond transformations. A. Flores-Betancourt, G.A. Somorjai, J. Thierry
- CATL **338**. Aqueous-phase Pt(111)-catalyzed methanol dehydrogenation thermodynamics and kinetics using a combined DFT/MD model. C. Bodenschatz, R. Getman
- CATL **339**. Surface modification scanning by pretreatment on FePt alloy nanoparticles for CO oxidation. X. Liu, H. Zhu, S. Dai, M. Chi, G. Lu
- CATL **340**. Enhanced catalytic performance of Pt/TiO<sub>2</sub> catalyst in water gas shift reaction by incorporation of PRGO. J. Park, R. Hwang, K. Yi
- CATL **341**. Kinetics of Ni-based oxygen carrier with MgO contents for chemical looping combustion. J. Park, R. Hwang, K. Yi
- CATL **342**. Alginate as Ag<sub>3</sub>PO<sub>4</sub>/g-C<sub>3</sub>N<sub>4</sub> immobilizing agents applied in the photodegradation of diclofenac under visible irradiation. Z. Wei, J. Shi, H. Deng
- CATL **343**. Structure of directing agent and its effect on fabrication of nano-crystalline Y aggregates. X. Zhao, H. Zhang, R. Liu, X. Meng, Y. Gong, Z. Li
- CATL **344**. Selective catalytic oxidation of ammonia over MnOx-TiO<sub>2</sub> mixed oxides. W. Li, Y. Guo, Y. Guo, W. Zhan
- CATL **345**. Single polymer chain supported well-defined and multifunctional catalyst design for high precession olefin polymerization. A. Thakur, M. Terano, T. Taniike
- CATL **346**. Use of iron ore as Fischer-Tropsch synthesis catalyst. K. Ramutsidel, L. Xiaojun, X. Liu, D. Hildebrandt
- CATL **347**. Withdrawn.
- CATL **348**. On the mechanism of the catalytic oxidation of 1,2-dichloroethane over CeO<sub>2</sub>: A DFT+U study. L. Yin
- CATL **349**. Preparation of todorokite-type manganese dioxide and its application in gaseous ozone removal. Y. Liu, P. Zhang
- CATL **350**. Supporting the development of palladium catalysts in the direct heteroarylation synthesis of organic pi-conjugated materials. S.M. McAfee, A. Hendsbee, A. Payne, G. Welch
- CATL **351**. Kinetic study and multi-objective optimization of Fischer-Tropsch synthesis performance over Co-based catalyst using evolutionary optimization algorithm. N. Moazami, M. Wyszynski, K. Rahbar, A. Tzolakis
- CATL **352**. Phosphorous modification of ZSM-5 extrudates for prolonging catalytic lifetime in Methanol to Propene (MTP) reaction. Y. Song, J. Li, Y. Shang, Z. Zhao, X. Zhao, T. Ma, L. Zhang, Y. Gong
- CATL **353**. Influence of Al zoning in ZSM-5 on catalytic cracking of hexane. T. Ma, Z. Geng, Y. Song, L. Zhang, Y. Shang, Y. Gong
- CATL **354**. Synthesis of three-dimensionally ordered macroporous La<sub>1-x</sub>Ce<sub>x</sub>NiO<sub>3- $\delta$</sub>  and their excellent catalytic performance for the ethanol steam reforming. J. Shao, Y. Li
- CATL **355**. Doped Tansission metal oxide nano-catalysts used to improve performance of hybrid-model vehicle. P. Villarreal, S. Bashir, J.L. Liu
- CATL **356**. One-pot synthesis with size-control of palladium nanoparticles on reduced graphene oxide by spontaneous redox deposition. X. Zhang, W. Ooki, Y.R. Kosaka, A. Okonogi, T. Kondo, J. Nakamura
- CATL **357**. Synthesis of wrinkled mesoporous titanasilicate for selective oxidation of cyclohexene. Z. Wang, K.J. Balkus
- CATL **358**. Enhancing oxidation activity ceria through VO<sub>x</sub>-, CrO<sub>x</sub>- and MnO<sub>x</sub>-modification of CeO<sub>2</sub> (111). M. Nolan, V. Ganduglia-Pirovano
- CATL **359**. Microwave-assisted selective hydrogenation of furfural to furfuryl alcohol employing a green and noble metal-free Cu catalyst. J. Lopez-Sanchez, P.N. Romano, J.M. de Almeida, Y. Carvalho, P. Priece, E. Falabella S. Aguiar
- CATL **360**. Experimental verification of the poisoning effect of SO<sub>2</sub> on the CO<sub>2</sub> permeation through a Ce<sub>0.8</sub>Sm<sub>0.2</sub>O<sub>1.9</sub>-carbonate dual phase membrane. T. Chen, Y. Li
- CATL **361**. Activity, XPS and STEM data of Pd/Al<sub>2</sub>O<sub>3</sub> catalyst. A.C. Banerjee, M. Bozack
- CATL **362**. Size-controlled NHC-stabilized Ni and Cu NPs immobilized in CNTs Application in stereoselective hydrogenation. C. Claver, M. Diaz de los Bernardos, S. Pérez-Rodríguez, C. Godard, S. Castillon
- CATL **363**. Influence of mesoporosity in zeolites on the catalytic mechanism for the conversion of methanol to hydrocarbons. Z. Liu, X. Dong, Y. Han
- CATL **364**. Hydrogenation of CO<sub>2</sub> to methanol using Cu-based catalysts derived from bimetallic metal-organic framework precursor. H. Wang, C. Zhang, P. Gao, Y. Sun
- CATL **365**. Cobalt-nitrogen-doped 3D porous carbon networks derived from animal bones as an efficient electrocatalyst for oxygen reduction reaction. M. Dou, D. He, W. Shao, F. Wang
- CATL **366**. Multiwalled carbon nanotube/graphene oxide nanoribbon heterostructures as photocatalysts for CO<sub>2</sub> conversion. H. Liou, C. Sun, L. Chen, K. Chen
- CATL **367**. Efficient conjugated polymer methyl viologen electron transfer system for controlled photo-driven hydrogen evolution. H. Lu, S. Wang
- CATL **368**. Tungsten-doped manganese dioxide for ozone removal. Y. Yang, P. Zhang
- CATL **369**. Using tailored plasmonic photocatalysts for carbon dioxide hydrogenation. X. Li, X. Zhang, H. Everitt, J. Liu
- CATL **370**. Enhanced charge separation and visible light photon-to-current efficiency in high-performance WO<sub>3</sub> thin-film photoanodes. J. Cen, Q. Wu, D. Yan, W. Zhang, M. Liu, A. Orlov
- CATL **371**. Synthesis of leading perovskite oxygen reaction catalysts by spray pyrolysis: A simpler and successful technique. C.A. Sharpe, L.R. Sharpe
- CATL **372**. Synthesis and photocatalytic properties of Ni decorated CoS nanosheet. M. Zhukovskiy, M.K. Kuno
- CATL **373**. Role of domain size and titanium dopant in nanocrystalline hematite thin films for water photolysis. D. Yan, J. Tao, K. Kisslinger, J. Cen, Q. Wu, A. Orlov, M. Liu
- CATL **374**. Novel TiO<sub>2</sub> nanorod-nanotube hybrid array for artificial photosynthesis. M. Hasan, N. Wongsrissujarit, K. Yeung
- CATL **375**. Ionic compounds for electrochemical reduction of carbon dioxide. A. Landers, T. Hellstern, C. Hahn, T.F. Jaramillo
- CATL **376**. Efficient dual-site carbon monoxide electro-catalysts via interfacial nano-engineering. Z. Huang, Z. Wang
- CATL **377**. Mechanism of the photoredox catalytic radical coupling of benzyl bromides. G. Park, Y. You
- CATL **378**. Hot electrons flux under methanol oxidation; The effect of external bias on the activity and selectivity. S. Lee, H. Lee, J. Park
- CATL **379**. Effect of metal-nitrogen coordination on ORR electrocatalysis. J. Rosenberg, R. Paldí, J. Lu
- CATL **380**. Photocatalytic C-H arylation reactions under visible light using chemically treated amorphous/crystalline titanium dioxide. S. Bak, H. Lee
- CATL **381**. Photocatalytic degradation of organic pollutants in water using silver doped TiO<sub>2</sub>-coated core-shell magnetic nanocomposites. S. Titinchi, S. Noganta, H. Abbo

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- CATL 382.** Kinetic studies on asymmetric C=C hydrogenation of isophorone. F. Shuangshuang, Y. Lanshan, W. Fangzhu
- CATL 383.** Outstanding antibacterial performance of bipyramidal anatase TiO<sub>2</sub> with {101}-exposed facets. K. Chan, C. Lee, H. Chiu, J. Chen, C. Li, W. Lin
- CATL 384.** Developing an industrial TiO<sub>2</sub> coating process for ceramic tiles. R. Muñoz, R. Christoph, A. Hernández, S. Ventura
- CATL 385.** Manganese nitrate/TEMPO/2,2-bipyridine - catalyzed selective aerobic oxidation of primary alcohols into aldehydes. K. Lagerblom, E. Lagerpets, A. Parviainen, T. Repo
- CATL 386.** Efficient sugar release from softwoods by an integrated thermochemical and biological process. M. Hossain, T. Phung, S. Tulaphol, N. Sun, T. Prasomsri, N. Sathitsuksanoth
- CATL 387.** Pd-PEPSSI pre-catalysts bearing PIB-support: Synthesis, characterization and applicability in Buchwald-Hartwig type amination. J. Balogh, A.R. Hill, M.G. Raffique, R. Tuba, M. Al-Hashimi, H. Bazzi
- CATL 388.** Study in the catalytic asymmetric synthesis of optically active organophosphate triesters. T. Wei, K. Nakayama
- CATL 389.** Exploring CO<sub>2</sub> reductive catalysis for square planar complexes: A theoretical investigation using nitrogen-doped carbon nanotube models. Y. Chan
- CATL 390.** BIAN-NHC Ruthenium Complex for ring closing (RCM) and Ring Opening Metathesis Polymerization (ROMP). A.R. Hill, J. Balogh, R. Tuba, M. Al-Hashimi, H.S. Bazzi
- CATL 391.** Ru-Protein-Catalyst hybrids designed for solar hydrogen production: Efforts to understand how electron transfer pathways effect photocatalytic function. S.R. Soltan, P.D. Dahlberg, J. Niklas, O. Poluektov, K.L. Mulfort, L.M. Utschig-Johnson
- CATL 392.** Novel transition-metal-free homo-polymerization of Pyrrolo[3,2-d:4,5-d']Bisthiazole (PBTz) using turbo-Grignard for organic electronics. S. Dey, S. Watkins, D. Sredojevic, E. Brothers, S.Y. Al Qaradawi, H.S. Bazzi, H. Bronstein, T.J. Marks, M.J. Heeney, M. Al-Hashimi
- CATL 393.** Efficient Ni(II)-LDH- and LTH-based catalysts: Synthesis, characterization and their performance in the Heck reaction. G. Varga, K. Karadi, A. Kukovec, Z. Konya, S. Muráth, P. Sipos, I. Palinko
- CATL 394.** Mechanistic pathways for the hydrogenation of CO<sub>2</sub> to formic acid by Ru(PTA)<sub>4</sub>Cl<sub>2</sub> catalyst in water and DMSO. R. Raju
- CATL 395.** Investigating catalyst monopoly in the copper(I)-catalyzed azide-iodoalkyne cycloaddition with automated in situ reaction monitoring technology. R. Chung, J. Hein
- CATL 396.** Using glycerol as a reducing agent for N-Oxide reductions. J. Park, K.J. Stowers
- CATL 397.** Development and implementation of high-pressure NMR spectroscopy for study of gas-containing catalytic reactions. S. Knapp, A. Brezny, C.R. Landis
- CATL 398.** Experimental studies on CO<sub>2</sub>, NO<sub>x</sub>, SO<sub>x</sub> adsorbing capacity of polyaniline-based materials. J. Huang, L. Gao, L. Shan, B. Meng, D. Xu, Y. Yu, Y. Min
- CATL 399.** Comparison of two experimental outreach kits for the discovery of inexpensive, effective catalysts for solar energy conversion. J.D. Schuttelfield, Christos, A. Leichtfuss, Z. Chambers
- CATL 400.** Withdrawn.
- CATL 401.** Development of robust covalently-linked N-heterocyclic carbenes and silica. A.K. Jones, R. Maglino, W. Cochran
- CATL 402.** Transformation of a novel catalytic Zn(II) metal-organic framework into a polymorph of HKUST-1. Y. Chen, Z. Zhang
- CATL 403.** Withdrawn.
- CATL 404.** Unexpected effects of mesoporosity on the catalytic performance of ZSM-5 for the fast pyrolysis of cellulose to aromatic hydrocarbons. T.C. Hoff, D.W. Gardner, R. Thilakarathne, J. Proano-Aviles, T.W. Hansen, R.C. Brown, J. Tessonier
- CATL 405.** Synthesis of novel phosphine ligands with an imidazolium tether for use in biphasic reaction media. M.E. Miller, C.J. Parnell, R.J. Rosso
- CATL 406.** Withdrawn.
- CATL 407.** Chemoselective oxidation of sulfides by simple metal-salen catalyst. Z. Bai, X. Bao
- CATL 408.** Withdrawn.
- CATL 409.** Oxidation/Knoevenagel condensation reaction sequence catalyzed by a bifunctional metal organic framework. Y. Luan
- CATL 410.** Manganese dioxide catalyst for airborne formaldehyde oxidation at room temperature. S. Rong, P. Zhang
- CATL 411.** Highly selective synthesis of diversely functionalized 1,3- and 1,4-alcohols by Regiodivergent Epoxide Opening (REO). F.R. Muehlhaus, A.R. Gansaeuer
- CATL 412.** Oxygen-deficient tungsten oxide as versatile and efficient hydrogenation catalyst. G. Ruijie, L. Pan, J. Zou
- CATL 413.** Non-metathetic synthetic applications and mechanistic inputs of Grubbs' type Ruthenium alkylidene catalysts. A. Bokka
- CATL 414.** Cationic ferrocenium salts for the catalytic activation of propargylic alcohols. M.J. Queensen, M. Stark, E. Bauer
- CATL 415.** Advances in organolithium cross-coupling reactions. D. Heijnen, V. Hornillos, F. Tosi, J. Buter, B. Feringa
- CATL 416.** Valorization of biomass derived lactones into fuels and chemicals. M. Haider, M. Alam, S. Gupta, A. Bohre, E. Ahmad, T.S. Khan, B. Saha
- CATL 417.** Cost-effective strategy to prepare high-efficient slurry-phase hydrocracking catalysts from acid-modified bauxite. X. Bao, Y. Yue, J. Li
- CATL 418.** Ammonia permselective membrane reactor for urea methanolysis to dimethyl carbonate. G. Zeng, Y. Sun
- CATL 419.** New class of porous and metal-free electrocatalyst for oxygen reduction reaction by enhanced amide functionalization on graphene. M. Ahmed
- CATL 420.** Synthetic strategies toward Fe-N/C electrocatalysts with abundant active sites for highly efficient oxygen reduction reaction. S. Joo
- CATL 421.** Understanding oxygen electrocatalyst mechanism of carbon network connected ternary alloy nanoparticles synthesized via supercritical reaction. J. Cho, G. Nam
- CATL 422.** Selectivity control of CO<sub>2</sub> reduction products by tuning nanostructure of Cu electrodes. K. Yang, W. Ko, J. Lee, J. Nah, S. Kim, H. Lee, M. Lee, K. Nam
- CATL 423.** Withdrawn.
- CATL 424.** Face-to-face, oriented hybridization of polyoxometalates with N-doped carbon nanotubes for efficient water oxidation. I. Kim, G. Lee, S. Kim, Y. Nam
- CATL 425.** Enhancing electrocatalytic activity of bifunctional Ni<sub>3</sub>Se<sub>2</sub> for overall water splitting through etching-induced surface nanostructuring. A.T. Swesi, J. Masud, M. Nath
- CATL 426.** Unraveling oxygen anion transport in nanostructured double perovskite electrodes for solid oxide fuel cells. M. Haider, U. Anjum, M. Agarwal, T.S. Khan
- CATL 427.** Hierarchical NiMo-based 3D electrocatalysts for highly-efficient hydrogen evolution in alkaline conditions. M. Fang, J.C. Ho
- CATL 428.** Unraveling inherent electrocatalysis of metal nanoparticles supported on a mixed conducting oxide for high-temperature fuel cell electrodes. Y. Choi, S. Cha, S. Lee, S.O. Kim, W. Jung
- CATL 429.** Time-series study for cleavage of -O-4 linkage during lignin disassembly with copper-doped porous metal oxide catalyst in supercritical methanol. Y. Gao, M. Foston
- CATL 430.** Highly efficient perovskite-hermatite tandem cells for unassisted solar water splitting. M. Gurudayal, L.H. Wong, N. Mathews, M. Graetzel, J. Ager
- CATL 431.** Understanding and tuning the activation of unsaturated C-C bonds over nickel intermetallic alloys. Y. Song, S. Laursen
- CATL 432.** Functionalization of 5-hydroxymethylfurfural by selective etherification. M.C. Allen, W. Gramlich, T.J. Schwartz
- CATL 433.** Inverse opal organometal halide perovskites. S. Schünemann, K. Chen, H. Tuysuz
- CATL 434.** On the aerobic selective transformation of ethanol over Me-containing vanadium oxide bronzes. J.M. Lopez-Nieto, L. Ruiz Rodriguez, T. Blasco, E. Rodriguez-Castellon
- CATL 435.** Photocatalytic hydrogen generation over mesoporous TiO<sub>2</sub> doped with Pd and Au. F. Guayaquil, B. Serrano Rosales, H. de Lasa
- CATL 436.** Design of photoelectrode for water splitting utilizing semiconductor hetero-junctions. J. Xiao, Y. Li
- CATL 437.** Photocatalytic hydrogen assessment for production using black sand as semiconductor: The application in photocatalysis process. J.E. Cabezas
- CATL 438.** Catalytic conversion of cellulose in supercritical ethanol over carbon-based solid sulfonic acid catalyst. Z. Wen, Y. Li
- CATL 439.** Bimetallic NiRh nanoparticle catalysts for fast contact time syngas production. T.H. Gardner, H. Ashfaq
- CATL 440.** Tuning the methane activation on Mo/ZSM-5: Effect of charge on Mo/Cy clusters. T.S. Khan, S. Mishra, S. Balyan, K.K. Pant, M. Haider
- CATL 441.** Ion implantation modification of the titanate nanotubes for visible light activity. M. Hasan, S. Ferdousi, K. Yeung
- CATL 442.** Reaction pathways of Kraft lignin depolymerization to platform chemicals on molybdenum-based catalysts in supercritical ethanol. K. Wu, Y. Li
- CATL 443.** Depolymerization of oxidized lignin catalyzed by formic acid exploits an unconventional elimination mechanism involving 3c-4e bonding: A DFT mechanistic study. Z. Wang
- CATL 444.** Catalytic Reductive Fractionation (CRF) of lignocellulose: A process and product overview. S. Van den Bosch, W. Schutyser, B.F. Sels
- CATL 445.** Photochemical applications of versatile carbon nitrides. A. Montoya, E.G. Gillan
- CATL 446.** Withdrawn. K. Stoerzinger, S. Chambers
- CATL 447.** Solvation effects on MWW-2D zeolite framework for dissociation of β-O-4 linkage. V. Jain, N. Rai
- CATL 448.** Illuminating catalysis: The photo-reduction of ketones and aldehydes using silver nanomaterials. M. Landry, A.H. Moores, C.J. Barrett
- CATL 449.** How the reaction media affects the methane pyrolysis and dry reforming processes: Gas-phase and molten salt media. N. Rahimi
- CATL 450.** Systematic understandings of surface reactivity of ceramics to promote C-O bond cleavage and control C=C double bond activation. Y. He, S. Laursen
- CATL 451.** Expedient conversion of alginic acid to furfural in Cu(II) biphasic systems using microwaves. C. Len, Y. Wang, F. Delbecq, R. Varma
- CATL 452.** Enhance visible light photocatalytic hydrogen production of CdS/ZnS heterostructure synthesized by hydrothermal method. J. Kundu, D. Pradhan
- CATL 453.** Withdrawn.
- CATL 454.** Spectroelectrochemical photoluminescence of reactive trap states in H-treated rutile TiO<sub>2</sub> nanowires. R.E. Rex, Y. Yang, F.J. Knorr, J.Z. Zhang, Y. Li, J. McHale
- CATL 455.** Template-free synthesis of hierarchical zeolite Y from natural aluminosilicate minerals. J. Yang, B. Li, H. Diao, X. Bao, H. Liu
- CATL 456.** Mechanochemical assembly through coordination cross-linking for ordered Co/C catalyst preparation. W. Li, Y. Guo, Y. Guo, W. Zhan, S. Dai
- CATL 457.** Withdrawn.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- CATL **458.** Unraveling structure sensitivity in phenol hydrogenation on Pd nanostructures. **M. Haider, S. Seshadri, S. Gupta, T.S. Khan, V. Prabhakaran**
- CATL **459.** Characterising Electron and Hole Localisation on Surface Modified TiO<sub>2</sub> Photocatalysts. **M. Nolan**
- CATL **460.** Facile template-free synthesis of CaFe<sub>2</sub>O<sub>4</sub> hierarchically hollow microspheres: Applications in visible light-driven degradation of gaseous 1,2-dichlorobenzene. **Z. Yin, X. Li**
- CATL **461.** Tunable polymeric solid acid catalysts for biomass hydrolysis and dehydration. **V. Anh, S. Wickramasinghe, X. Qian**
- CATL **462.** Visible light-responsive photodegradation of rhodamine B: Enhancement of activity and reusability of chlorophyll and Mg co-modified P25 catalysts. **T. Phongamwong, M. Chareonpanich**
- CATL **463.** Synthesis of dimethyl-oxa-norbornene and alternative paths from dimethylfuran to p-xylene. **L. Wang**
- CATL **464.** Withdrawn.
- CATL **465.** Hydrocarbon combustion in the presence of CO. **W.F. Maier**
- CATL **466.** Hexose dehydration to 5-hydroxymethylfurfural by niobia solid acid catalysts in aqueous media. **M. Tapia Reche, A. Osatiashiani, L.J. Durdell, M. Isaacs, A.F. Lee, K. Wilson**
- CATL **467.** Smart responsive nanocatalysts for self-regulation of high exothermic reactions. **L. Zhang, Z. Liu, L. Liu, X. Ju, W. Wang, R. Xie, L. Chu**
- CATL **468.** Withdrawn.
- CATL **469.** Catalytic production of amines from (ligno)cellulosic biomass. **M. Pelckmans, B.F. Sels**
- CATL **470.** First steps of the journey from homogeneous organocatalysis to tailored catalytic materials. **R. Mas-Balleste, J.J. Alemán, J. Luis-Barrera**
- CATL **471.** Size and monodispersity-dependent durability and generalized dispersion power law of supported catalysts undergoing Ostwald ripening. **S. Hu, W. Li**
- CATL **472.** Rational design and fabrication of Ti<sub>3+</sub>-doped and Ag<sub>3</sub>PO<sub>4</sub> QDs-sensitized TiO<sub>2</sub> for highly efficient photocatalysis and PEC water splitting. **S. Guoqiang, J. Zou, L. Pan, X. Zhang**
- CATL **473.** Improve the catalytic performance by utilizing the synergy between metal facet and oxide support facet for enhanced catalytic performance. **Q. Zhang**
- CATL **474.** Visible light photocatalysis using a commercially available iron compound. **J.K. Pagano, R. Waterman**
- CATL **475.** Constructing anatase TiO<sub>2</sub> p-n homojunction: Applications in photoelectrochemical and photocatalytic hydrogen generation. **S. Wang, J. Zou, S. Li, Y. Fang, Y. Li, Y. Qin, Z. Chen, X. Zhang**
- CATL **476.** Withdrawn.
- CATL **477.** Photo-Catalytic hydrogen production: The role of plasmonic metals in the reaction. **H. Idriss**
- CATL **478.** N-heterocyclic carbene - functionalized Ru/K-Al<sub>2</sub>O<sub>3</sub> catalysts: Preparation, surface characterization, and tunable selective hydrogenation performances. **S. Muratsugu, J.B. Ernst, F. Wang, M. Tada, F. Glorius**

- CATL **479.** Single source precursor approach for the synthesis of bimetallic molybdate catalysts. **A.W. Ablett, A.M. Moneeb, A. Alabdulrahman, A. Bagabas, C.K. Perkins**
- CATL **480.** Deactivation of supported Ru catalysts during the selective CO methanation (SelMeth): Separating structural and adlayer effects. **A.M. Abdel-Mageed, D. Widmann, S.E. Olesen, I. Chorkendorff, R.J. Behm**
- CATL **481.** Withdrawn.
- CATL **482.** Withdrawn.
- CATL **483.** Multidimensional thin film hybrid electrodes with MoS<sub>2</sub> multilayer for electrocatalytic hydrogen evolution reaction. **E. Ahn, B.S. Kim**
- CATL **484.** Synthesis and characterization of WO<sub>3</sub>-ZrO<sub>2</sub>-TiO<sub>2</sub> nanotubes as efficient photocatalyst in the degradation of paraquat dichloride. **N.A. Eleburuike, W. Wan Abu Bakar, R. Ali**

- CATL **485.** Effect of Ag shell thickness on photocatalytic degradation of organic compounds using Au@Ag core-shell bimetallic nanoparticles immobilized on electrospun TiO<sub>2</sub> nanofibers. **N. Singh, M. Mishra, R.K. Gupta**
- CATL **486.** Withdrawn.
- CATL **487.** Withdrawn.
- CATL **488.** High temperature calcined hematite nanotubes via the Kirkendall effect for efficient photoelectrochemical water splitting. **C. Li, T. Wang, J. Gong**
- CATL **489.** Kinetic and thermodynamic insights into catalytic conversion of food waste to hydroxymethylfurfural. **I. Yu, D. Tsang**
- CATL **490.** Construction of CdS and oxygen-defected CdWO<sub>4</sub> for Z-scheme hydrogen evolution under visible light. **Z. Jingwen, J. Zou**
- CATL **491.** Enhancing phenol photo-oxidation with palladium core-shell in TiO<sub>2</sub> on Taylor flow system. **M.T. Yilleng, D. Rooney, H. Manyar, E. Gimba, G. Ndukwe**
- CATL **492.** Efficiency of Ni-nanoparticles deposited on a hierarchically porous carbon doped with nitrogen for kraft lignin hydrogenolysis in flow and batch systems. **S.M. Lama, M. Antonietti**

## WEDNESDAY MORNING

### Section A

Parc 55 San Francisco  
Cyril Magnin III

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

Photocatalysis  
Cospponsored by COMP

T. Bligaard, C. M. Friend, C. Kumar, *Organizers*  
F. E. Osterloh, *Presiding*

**8:00 CATL 493.** Plasmonic light focusing for enhancing and controlling catalysis on non-plasmonic metal nanoparticles. **P. Christopher, K. Li**

**8:30 CATL 494.** Mapping of photocatalytic processes: Kinetics and surface chemistry dictate the interfacial charge transfer at semiconductor surface. **P.V. Kamat, C.J. Karwacki**

**9:00** Intermission.

**9:15 CATL 495.** Porous photocatalysts for gas phase or aqueous reactions. **R. Caruso**

**9:45 CATL 496.** Surface photovoltage spectroscopy as a screening tool for solar energy conversion materials and photocatalysts. **F.E. Osterloh, Z. Zhao, M.A. De Melo Junior, Y. Guo**

**10:15** Intermission.

**10:30 CATL 497.** Ethanol photoreaction over anatase TiO<sub>2</sub>(101) and rutile TiO<sub>2</sub>(110) single crystals. A combined STM and online mass spectrometry study. **H. Katsiev, G. Harrison, A. Wilson, G. Thornton, H. Idriss**

**11:00 CATL 498.** Engineering titania nanostructure to tune and improve its photocatalytic activity. **M. Cargnello, C. Wrasman, I. Levin, A.C. Johnston-Peck**

### Section B

Parc 55 San Francisco  
Cyril Magnin II

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

##### Spectroscopy & Microscopy of Photocatalytic & PEC Materials

Cospponsored by COLL, ENFL, I&EC and INOR

S. Ardo, D. Esposito, I. Sharp, *Organizers*  
G. Dukovic, *Organizer, Presiding*

**8:00 CATL 499.** Ultrafast optical spectroscopy of charge transfer kinetics and charge transport at electrode/electrolyte interfaces. **T. Cuk**

**8:30 CATL 500.** Dynamics of photoelectrochemical water splitting on SrTiO<sub>3</sub>. **X. Chen, D. Aschaffenburg, T. Cuk**

**8:45 CATL 501.** Charge transport and reaction mechanisms of inorganic photocatalytic assemblies by transient infrared and optical spectroscopy. **H.M. Frei**

**9:15 CATL 502.** Understanding optical properties and photocarrier dynamics in emerging copper-based photoelectrodes. **C. Jiang, J.K. Cooper, I. Sharp**

**9:30** Intermission.

**9:45 CATL 503.** Imaging and quantifying the reactivity of chemical and structural perturbations on operating water oxidation photoanodes. **J. Rodriguez Lopez, X. Zhou, B.H. Simpson**

**10:15 CATL 504.** Probing surface plasmon enabled resonant excitation and chemical transformation using *in situ* vibrational spectroscopy. **T.E. Tesema, B. Kafle, M.G. Tadesse, T.G. Habteyes**

**10:30 CATL 505.** Nanoscale imaging of charge carrier transport in bismuth vanadate photoanodes via photoconductive atomic force microscopy. **J. Eichhorn, J.K. Cooper, L. Hess, D. Larson, I. Sharp, F. Toma**

**10:45 CATL 506.** Charge transfer of ZrO<sub>2</sub>Coll light absorber - Co<sub>3</sub>O<sub>4</sub> catalyst assemblies coupled by molecular wires across silica separation membrane. **G. Katsoukis, H.M. Frei**

**11:00 CATL 507.** Excited electron dynamics in the 1T-2H heterophase of monolayer MoS<sub>2</sub>: Time dependent density functional theory study for photocatalytic mechanism process. **M. Choi, D. Shin, J. Im, H. Chang, N. Park**

### Section C

Parc 55 San Francisco  
Market Street

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

##### In situ Characterization Tools

Cospponsored by COMP

T. Bligaard, C. M. Friend, C. Kumar, *Organizers*  
S. Meng, *Presiding*

**8:00 CATL 508.** *In Situ* and *operando* electron microscopy imaging and spectroscopy of catalysts. **P.A. Crozier**

**8:30 CATL 509.** Single molecule fluorescence microscopy of a single catalyst particle: Role of defects and solvents on the proton transfer processes in zeolites. **B.M. Weckhuysen**

**9:00** Intermission.

**9:15 CATL 510.** Frontiers of *in situ* analytical electron microscopy for energy materials. **S. Meng, M. Chi**

**9:45 CATL 511.** Watching catalysts work: Using environmental transmission electron microscopy to understand nanotube growth. **E. Stach**

**10:15** Intermission.

**10:30 CATL 512.** Seeing is believing: Atomic-scale imaging of catalysts under reaction conditions. **I. Groot**

**11:00 CATL 513.** In situ liquid imaging of catalysts in the scanning transmission electron microscope. **I. Arslan**

**11:30 CATL 514.** Raman and infrared spectroscopies as *in situ* and *operando* tool to characterize catalysts at work and reactions. **M.A. Banares**

### Section D

Parc 55 San Francisco  
Cyril Magnin I

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

##### Fundamental Structure-Activity Relationships: The Interface of Operando with Physical Sciences

Cospponsored by ENWR and I&EC

M. A. Banares, M. Guerrero-Perez, *Organizers*  
F. Tao, *Organizer, Presiding*

**8:00 CATL 515.** Real-time and imaging XAFS and related X-ray techniques for fuel cell nanoparticle catalysis. **Y. Iwasawa**

**8:40 CATL 516.** Withdrawn.

**9:00 CATL 517.** Catalytic EXAFS study under reaction conditions. **M. Guerrero-Perez, E. Mikolajska, R. Lopez-Medina, E. Rojas, M.A. Banares**

**9:20** Intermission.

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

9:40 CATL 518. Withdrawn.

10:00 CATL 519. Operando spectroscopy during ethylene polymerization by supported CrOx/SiO<sub>2</sub> catalysts: Role of promoters. A. Chakrabarti, I.E. Wachs

10:20 CATL 520. Surface morphology and catalytic activity on Pt<sub>3</sub>Ni(111) surface under CO oxidation probed with ambient pressure STM. J. Kim, W. Park, M. Noh, S. Lee, W. Doh, Y. Jung, J. Park

## Section E

Parc 55 San Francisco  
Mission I

### Single-Site Heterogeneous Catalysts Mechanisms of Bond Activation

A. Hock, *Organizer, Presiding*

8:00 CATL 521. Hydrodeoxygenation of bio-oil model molecules and reduction of nitric oxide on single atom sites. F. Tao

8:30 CATL 522. Rh-based single-site catalysis in faujasite – a surprisingly complex chemistry. V. Markova, A. Govindasamy, S. Dinda, A. Genest, N. Roesch

8:50 CATL 523. Methanol partial oxidation catalyzed by singly-dispersed Pd on ZnO(100). T.S. Rahman, T.B. Rawal, S. Hong, S. Acharya

9:10 CATL 524. Origin of low temperature CO oxidation activity on Ir single atoms – Experimental and computational study. Y. Lu, X. Ma, L. Kovarik, H. Xin, A.M. Karim

9:30 Intermission.

9:40 CATL 525. Immobilization strategies for surface-supported molecular palladium cross-coupling catalysts. A. Marquard, R.H. Goldsmith

10:00 CATL 526. Mechanistic study of hydrogen reaction on single-atom catalyst. C. Liao, M. Tsai, K. Sasaki, W. Chen

10:20 CATL 527. Coordinatively unsaturated Al<sup>3+</sup> sites anchored subnanometric ruthenium catalyst for hydrogenation of aromatics. N. Tang, Y. Cong, Q. Shang, T. Zhang

10:40 CATL 528. Preparation of Nanosheet ZSM-5 zeolites and their properties for catalytic cracking of hydrocarbons. Y. Tian, G. Li, L. Wang, X. Zhang, G. Liu

## Section F

Parc 55 San Francisco  
Mission II/III

### Elucidation of Mechanisms & Kinetics on Surfaces

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## Organic Oxygenates

*Cosponsored by COLL and ENVR*

A. Savara, S. L. Scott, *Organizers*

C. Sievers, *Organizer, Presiding*

8:00 CATL 529. Surface reaction of biomass derived oxygenates on metal oxide catalysts. J. So, G. Foo, J. Copeland, C. Sievers

8:40 CATL 530. Mechanistic studies of benzyl alcohol oxidation to probing changes to the active site in supported Au catalysts: Support effects and proton shuttling. B.D. Chandler, M.Y. Santos, A. Tombo, S. Luikart, C. Pursell

9:20 CATL 531. Systematic trends in the surface chemistry of transition metals mixed with p-block elements in atomically ordered solids (ceramics and intermetallic alloys) towards unsaturated carbon-carbon bonds for olefin and aromatic production and functionalization. Y. He, Y. Song, S. Laursen

10:00 CATL 532. Molecular-level insights into the mechanism and microkinetics of aqueous-phase Pt(111)-catalyzed methanol dehydrogenation. C. Bodenschatz, R. Getman

10:20 CATL 533. Mechanistic analysis of oxidative ketone cleavage over supported vanadates. J. Bond, A. Chatzidimitriou, R. Zhu

11:00 CATL 534. Active site cooperativity in selective sugar transformations by oxide and zeolite-based catalysts. G. Li, E. Hensen, E. Pidko

11:40 CATL 535. Mechanistic and spectroscopic evidence for active site identity and reactive intermediate structures during C-O bond rupture in small oxygenates. M.E. Witzke, A. Almithn, C. Coonrod, M. Triesenberg, D. Hibbits, D. Flaherty

## Synthesis & Characterization of Materials for Energy Applications

### Fundamental & Molecular Models for Advanced Energy Materials/Novel Architectures, Materials & Synthetic Routes

*Sponsored by ANYL, Cosponsored by CATL*

### Functional Porous Materials for Sustainable Energy

*Sponsored by ENFL, Cosponsored by CATL and MPPG‡*

## 13th International Symposium on Heavy Oil Upgrading, Production & Characterization

*Sponsored by ENFL, Cosponsored by CATL*

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

### Technique Development in Interfacial Science

*Sponsored by COLL, Cosponsored by CATL*

### State-of-the-Art Methods for Modeling Materials Chemistry

*Sponsored by COMP, Cosponsored by CATL and MPPG‡*

## WEDNESDAY AFTERNOON

### Section A

Parc 55 San Francisco

Cyril Magnin III

### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

### Transition Metal & Metal Oxide Catalysis

*Cosponsored by COMP*

T. Bligaard, C. M. Friend, C. Kumar, *Organizers*

D. J. Stacchiola, *Presiding*

1:00 CATL 536. Well-defined transition metal-based heterogeneous catalysts: From isolated sites to atomically-precise clusters. Z.R. Jones, S.L. Scott

1:30 CATL 537. Understanding CO<sub>2</sub> reduction on transition metals. K. Chan

2:00 CATL 538. Catalytic processes in oxide systems a new set of chemical descriptors. N. Lopez

2:30 Intermission.

2:45 CATL 539. Utilizing machine learning to accelerate a genetic algorithm for discovery of catalysts. P.C. Jennings

3:15 CATL 540. Catalysis and the nature of mixed-metal oxides at the nanometer level. D.J. Stacchiola

### Section B

Parc 55 San Francisco

Cyril Magnin II

### General Papers

S. L. Scott, *Organizer*

E. Nikolla, *Organizer, Presiding*

1:00 CATL 541. Design and preparation of Au@MnO<sub>2</sub> yolk-shell nanoparticles with enhanced catalytic activity for CO oxidation. M. Gong, C. Wang

1:20 CATL 542. High pressure stoichiometric hydrogenation of carbon dioxide to methanol. R. Gaikwad, A.B. Bansode, A. Urakawa

1:40 CATL 543. Catalytic reduction of CO<sub>2</sub> on Bi surface: A DFT study. W. Oh, C. Rhee, J. Han, B. Shong

2:00 CATL 544. Water and CO<sub>2</sub> activation at surface modified TiO<sub>2</sub> composites. M. Nolan, S. Rhatigan, W. Daly

2:20 CATL 545. Understanding kinetics and selectivity of NiZn bimetallic catalysts for hydrogen evolution via dehydrogenation of methylcyclohexane to toluene. L. Cavallo, A. Jedidi

2:40 CATL 546. Room temperature reversible electrocatalytic H<sub>2</sub> oxidation/production achieved with molecular complexes containing aromatic amino acids in the outer coordination sphere. N.P. Boralugodage, A. Dutta, B. Ginovska, G. Buchko, M.J. O'Hagan, S. Rauegi, W.J. Shaw

3:00 Intermission.

3:15 CATL 547. Deoxygenation of coal bed methane: The structure evolution and catalytic performance of LaCoO<sub>3</sub> perovskite catalyst. Y. Guo, W. Li, Y. Guo, W. Zhan

3:35 CATL 548. Density functional theory study of the interactions of C, O, and CO with nickel surface alloys. L.H. Sprowl, B. Adam, J. Tucker, L. Arnadottir

3:55 CATL 549. Kinetic consequences of oxygen and carbon in C-H bond cleavage and C-H bond formation on transition metal and alloy clusters. W. Tu, P. Lachkov, Y. Chin

4:15 CATL 550. Y-doped CeO<sub>2</sub> nanorod catalyzed oxidative dehydrogenation of cyclohexane and cyclohexene. Z. Wang, K.J. Balkus

4:35 CATL 551. New insights of aldol reactions catalyzed by heterogeneous gold catalysts. R. Ye, D. Toste, G.A. Somorjai

## Section C

Parc 55 San Francisco

Market Street

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Devices, Assemblies & Hybrid Processes

*Cosponsored by COLL, ENFL, I&EC and INOR*

S. Ardo, G. Dukovic, I. Sharp, *Organizers*

D. Esposito, *Organizer, Presiding*

1:00 CATL 552. Sunlight-driven hydrogen formation by membrane-supported photoelectrochemical water splitting. N.S. Lewis

1:30 CATL 553. Modelling of particle-based photoelectrochemical and photocatalytic water splitting. S. Haussener

2:00 CATL 554. Withdrawn.

2:15 CATL 555. Towards evaluating reaction kinetics in photocatalytic CO<sub>2</sub> reduction: Influence of CO<sub>2</sub> partial pressure and light intensity. J. Strunk

2:30 CATL 556. Hybrid photo-electrochemical and photo-voltaic cells (HPEV cells). G. Segev, J.W. Beeman, K.A. Walczak, J. Greenblatt, I. Sharp

2:45 Intermission.

3:00 CATL 557. High photoelectrochemical water splitting efficiencies: Materials development and measurement challenges. J.A. Turner, T.G. Deutsch, J. Young, H. Doescher, M. Steiner

3:30 CATL 558. Development of solar fuels photoanodes through combinatorial integration of Ni-La-Co-Ce oxide and Ni-Fe-Co-Ce oxide catalysts on BiVO<sub>4</sub>. J. Haber, D. Guevarra, A. Shinde, L. Zhou, G. Li, G. Liu, I. Sharp, J. Neaton, F. Toma, J. Gregoire

3:45 CATL 559. Efficient spontaneous water splitting using solid-state Z-scheme photocatalyst sheet. Y. Li, Q. Wang, T. Hisatomi, I. Sharp, K. Domen

4:00 CATL 560. Nanostructured tandem Si-Ta<sub>3</sub>N<sub>5</sub> photoanodes for solar water splitting. I. Narkeviciute, P. Chakhranont, A. Mackus, C. Hahn, B. Pinaud, S.F. Bent, T.F. Jaramillo

4:15 CATL 561. Enhanced visible-light driven antibiotic activity of graphitic carbon nitride (g-C<sub>3</sub>N<sub>4</sub>) films derived from urea. J.H. Thurston, K. Cornell, N.M. Hunter

4:30 CATL 562. Tailoring the semiconductor interface for energetic tuning and improved stability purposes. J. Gu

Cospponsored by ENVR and I&amp;EC

M. A. Banares, M. Guerrero-Perez, F. Tao, *Organizers*B. M. Weckhuysen, *Presiding***8:00 CATL 592.** Reaction mechanism for SCR of NO with NH<sub>3</sub> by supported V<sub>2</sub>O<sub>5</sub>-WO<sub>3</sub>/TiO<sub>2</sub> catalysts. M. Zhu, M.E. Ford, U. Tumuluri, Z. Wu, I.E. Wachs**8:40 CATL 593.** Operando spectroscopy and DFT studies for assessment of mechanistic phenomena on ammonia reduced NO by vanadia SCR. S.B. Rasmussen, L. Aranson, M. Daturi, P. Bazin, R. Portela, H. Falsig, P.G. Moses, M.A. Banares**9:00** Intermission.**9:20 CATL 594.** Operando Raman-FTIR study of gold catalysts supported on titania and ceria for VOC-related odor elimination. Q. Wang, P. Avila, M.A. Banares, K. Yeung**9:40 CATL 595.** Integration of operando studies of catalyst surface during catalysis and DFT calculations for mechanistic understanding at a molecular level. F. Tao**10:00 CATL 596.** Determining the mechanism of multistep catalytic reactions with high spatial resolution operando IR and X-ray microscopy measurements. E. Gross

## Section D

Parc 55 San Francisco

Cyril Magnin I

**Elucidation of Mechanisms & Kinetics on Surfaces****Mechanisms: Metals**

Cospponsored by COLL and ENVR

S. L. Scott, C. Sievers, *Organizers*A. Savara, *Organizer, Presiding***8:00 CATL 597.** Aluminum nitride hydrolysis enabled by hydroxyl-mediated surface proton hopping. C. Bartel, C. Muhich, A.W. Weimer, C. Musgrave**8:20 CATL 598.** Surface plasmon resonance spectroscopy as a platform for characterization of nanometal catalyzed cross-coupling reactions. A. Dadgar**8:40 CATL 599.** Withdrawn.**9:00** Intermission.**9:20 CATL 600.** Size Controlled Co Nanoparticles for Fischer-Tropsch Synthesis: Transient Kinetics for Mechanistic Insight. W. Ralston, G. Melaeet, T. Saephan, G.A. Somorjai**9:40 CATL 601.** Borated Pt subnanoclusters on metal oxides: Coke prevention via minimizing dehydrogenation of alkenes and C-sticking. M. Ha, E.T. Baxter, J. Dadras, E. Jimenez-Izal, S.L. Anderson, A. Alexandrova**10:00 CATL 602.** Oxygen activated ultra-fast palladium nanoparticle catalyzed cross-coupling of organolithium reagents: A mechanistic insight. F. Tosi, D. Heijnen, B. Feringa**10:20** Intermission.**10:40 CATL 603.** Selective, stable and active Ni-based catalysts for low temperature alkene dimerization. I. Agirrezabal-Telleria, E. Iglesia**11:00 CATL 604.** Understanding the role of the second metal element in Pt-alloy catalysts for propane dehydrogenation. Z. Zhao, S. Zha, J. Gong**11:20 CATL 605.** Understanding the structures and reaction mechanism of the metal nanoparticle encapsulated UiO-66(-NH<sub>2</sub>). D. Chen, P. Yang, F. Zhang, F. Wang, Q. Xiao

**11:40 CATL 606.** Atomic control of intermetallic surfaces towards chemoselective hydrogenation of nitroarenes to functionalized anilines. Y. Pei, T. Goh, R. Maligal Ganesh, X. Li, Z. Qi, C. Xiao, W. Huang

### Section E

Parc 55 San Francisco  
Mission I

#### Elucidation of Mechanisms & Kinetics on Surfaces

##### Oxides

*Cosponsored by COLL and ENVR*

A. Savara, S. L. Scott, *Organizers*

C. Sievers, *Organizer, Presiding*

**8:00 CATL 607.** DFT insight into the Mars-van-Krevelen mechanism of anaerobic and aerobic reaction of polyoxometalates. I. Efremenko

**8:20 CATL 608.** Structure-function relationships for supported copper oxide catalysts for alkane oxidative dehydrogenation. S. Nauert, J.M. Notestein

**8:40 CATL 609.** Catalytic degradation of malachite green on binary ZnO-La<sub>2</sub>O<sub>3</sub>: Thermodynamics, kinetics and mechanism. J. Thomforde, A. Chaparadza

9:00 Intermission.

**9:20 CATL 610.** Formaldehyde oxidation mechanism on Au-doped CeO<sub>2</sub>: A DFT study. J. Meizan, W. Song, J. Liu

**9:40 CATL 611.** Influence of surface defects on copper oxidation via coordinated *in situ* ETEM and atomistic simulation methods. M. Curnan, C.M. Andolina, Q. Zhu, J. Yang, W. Al-Saidi

**10:00 CATL 612.** Unraveling the catalytic origin of NbOPO<sub>4</sub> catalyst in biomass conversion by density functional theory. Z. Chen, H. Wang, P. Hu

**10:20 CATL 613.** Ethanol gas sensing mechanism of PdO nanoflake thin film at temperatures below 250°C. I. Cheng, J. Wang, C. Tsai, Y. Chen, F. Pan

### Section F

Parc 55 San Francisco  
Mission II/III

#### Single-Site Heterogeneous Catalysts

##### Computational & Spectroscopic Study of Single Atom Sites

A. Hock, *Organizer, Presiding*

**8:00 CATL 614.** Boron nitride nanomesh: a robust template for monodisperse oxide cluster adsorption. M. Müller, J. Balajka, A. Hemmi, M. Schmid, U. Diebold, S. Mertens

**8:20 CATL 615.** Growth and stability of titanium oxide nanoclusters on graphene/Ru(0001). R.T. Frederick, Z. Novotny, F. Netzer, G.S. Herman, Z. Dohnalek

**8:40 CATL 616.** Withdrawn.

**9:00 CATL 617.** Selective Oxidation of Benzyl Alcohol to Benzaldehyde by manganese oxide nanoparticles as catalyst. K.A. Omer

9:20 Intermission.

**9:30 CATL 618.** Polyoxometalates as single site catalysts: Evidence for proton cluster synergy. T.J. Wilke, M.A. Barteau

**9:50 CATL 619.** Preparation, structure, and surface chemistry of Ni-Au single atom alloys. Z. Wang, M. Darby, A. Therrien, M. El Soda, A. Michaelides, M. Stamatakis, E.H. Sykes

**10:10 CATL 620.** PtNi/NiO Clusters coated by small sized hollow silica: Novel design for efficient catalytic hydrogen production from hydrolysis of ammonia-borane. G. Yuzhen, R. Lu

**10:30 CATL 621.** Tailored design of Pd catalyst supported on chemically modified silica hollow microspheres with penetrating macroporous shells for NBR hydrogenation. J. Chen, T. Cheng, A. Cai, Z. Wu, H. Liu, P. Yuan

#### Functional Porous Materials for Sustainable Energy

*Sponsored by ENFL, Cosponsored by CATL and MPPG†*

#### 13th International Symposium on Heavy Oil Upgrading, Production & Characterization

*Sponsored by ENFL, Cosponsored by CATL*

## THURSDAY AFTERNOON

### Section A

Parc 55 San Francisco  
Cyril Magnin III

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

##### Machine Learning Tools for Catalyst Genome

*Cosponsored by COMP*

T. Bligaard, C. M. Friend, C. Kumar, *Organizers*  
J. Hachmann, *Presiding*

**1:00 CATL 622.** Automated materials property prediction using thermodynamic density of states and machine learning. S. Curtarolo, C. Toher

**1:30 CATL 623.** Statistical learning aided design of catalyst chemistry. K. Rajan

2:00 Intermission.

**2:15 CATL 624.** Data-driven *in silico* tools for the rational design of catalytic systems and the exploration of chemical space. J. Hachmann

**2:45 CATL 625.** Open-source tools for generating and analyzing large materials data sets: FireWorks, MatMethods, and MatMiner. A. Jain

3:15 Intermission.

**3:30 CATL 626.** Quantum machine learning. O. von Lilienfeld

**4:00 CATL 627.** Dark reactions project: A machine learning approach to materials discovery. A.J. Norquist, J. Schrier, S. Friedler

### Section B

Parc 55 San Francisco  
Cyril Magnin II

#### General Papers

S. L. Scott, *Organizer*

E. Nikolla, *Organizer, Presiding*

**1:00 CATL 628.** Catalytic reaction study via strong metal-support interactions of nanocatalysts. K. An

**1:20 CATL 629.** Characterization of soft-templated mesoporous zeolites: Techniques and insights. J. O'Brien, S.L. Kobaslija, S. Fernandez, M. Ostraat

**1:40 CATL 630.** Titanium-based organic frameworks for chemical transformations. S. Verma, R.S. Varma

**2:00 CATL 631.** Metal organic frameworks and their catalysis applications in water. M.M. Reynolds, M. Neufeld, H. Rubin

**2:20 CATL 632.** Comparative characterization of catalytic properties of colloidal and supported gold nanoparticle catalysts by ligand adsorption method. S. Chakraborty, S.M. Ansar, C.L. Kitchens

2:40 Intermission.

2:55 CATL 633. Withdrawn.

**3:15 CATL 634.** Palladium(II)-catalyzed directed anti-hydrochlorination of unactivated alkynes with *In Situ* generated HCl. A.L. Cantu, J. Derosa, K. Engle

**3:35 CATL 635.** Co-Catalyst of layered oxide and spinel for NOx reduction to N<sub>2</sub> through N<sub>2</sub>O. M.P. Rowe, T.C. Peck, M. Jones

**3:55 CATL 636.** Direct synthesis of hydrogen peroxide from hydrogen and oxygen over a Palladium-based bimetallic heterogeneous catalyst. C. Zhang

**4:15 CATL 637.** Implicit and explicit solvation models for computing free energies of activation and reactions at solid-liquid interfaces. M. Saleheen, A. Heyden

**4:35 CATL 638.** Enhanced activity of Ce-incorporated MOR in DME carbonylation through tailoring the distribution of Bronsted acid. S. Huang, Y. Li, X. Ma, S. Wang, Z. Yujun

**4:55 CATL 639.** Copper-Catalyzed Hydroamination of alkynes and allenes. Scope and mechanism studies. F. Monnier

### Section C

Parc 55 San Francisco  
Market Street

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

##### Engineering Operando to Larger Scale: Shaped Catalysts & Process Control

*Cosponsored by ENVR and I&EC*

M. A. Banares, M. Guerrero-Perez, F. Tao, *Organizers*

D. J. Stacchiola, *Presiding*

**1:00 CATL 640.** Identification of sulfur atoms as catalytically active sites for proton reduction on amorphous molybdenum sulfide. B. Yeo

1:40 CATL 641. Withdrawn.

**2:00 CATL 642.** Low-temperature methane combustion over Pd/H-ZSM-5: Active Pd sites with specific electronic properties modulated by acidic sites of H-ZSM-5. Y. Guo, W. Li, Y. Guo, W. Zhan

2:20 CATL 643. Withdrawn.

### Section D

Parc 55 San Francisco  
Cyril Magnin I

#### Elucidation of Mechanisms & Kinetics on Surfaces

### Oxidation Reactions

*Cosponsored by COLL and ENVR*

S. L. Scott, C. Sievers, *Organizers*

A. Savara, *Organizer, Presiding*

**1:00 CATL 644.** Quantitative spectroscopic analysis of the role of oxy-carbon surface species in the mechanism of propane oxidation over Pt/Al<sub>2</sub>O<sub>3</sub>. C. O'Brien, I. Lee

**1:40 CATL 645.** Kinetic and spectroscopic evidence for periodic trends in olefin epoxidation over group IV and V \*BEA. D. Bregante, P. Priyadarshini, D. Flaherty

**2:00 CATL 646.** Tuning carbon monoxide preferential oxidation properties on platinum alloy nanoparticle catalyst via engineering the active sites. Z. Peng, S. Hwang, Y. Pan, X. Shen, E. Yurchektrud

**2:20 CATL 647.** Adsorption and decomposition of dimethyl methylphosphonate on metal oxide surfaces under atmospheric conditions. A.R. Head, L. Trotochaud, R. Tsyshkevsky, Y. Yu, O. Karslioglu, M. Kukla, H. Bluhm

3:00 Intermission.

**3:20 CATL 648.** Control of metal-oxide interfaces for ceria-based nanocatalysts. S. Lee, J. Seo, W. Jung

**3:40 CATL 649.** Unprecedented CO oxidation performance of Pd/CeO<sub>2</sub> prepared by flame spray pyrolysis. G. Spezzati, Y. Su, J. Hofmann, E. Hensen

4:00 CATL 650. Withdrawn.

**4:20 CATL 651.** Mechanistic studies of H<sub>2</sub> oxidation to understand the role of water in CO PROx. T. Whittaker, J. Saavedra, C. Pursell, B.D. Chandler

### Section E

Parc 55 San Francisco  
Mission I

#### Elucidation of Mechanisms & Kinetics on Surfaces

##### Beyond Hydrocarbons

*Cosponsored by COLL and ENVR*

A. Savara, S. L. Scott, *Organizers*

C. Sievers, *Organizer, Presiding*

**1:00 CATL 652.** Quantitative assessment of the role of dissolved oxygen in catalytic reduction of 4-nitrophenol. E. Menumero, R.A. Hughes, S. Neretina

**1:20 CATL 653.** Competitive adsorption of sulfur compounds in diesel on corner sites of Ni-Mo-S, Co-Mo-S and MoS<sub>2</sub> nanocluster - A mechanism study based on DFT calculations. S. Ding, Y. Zhou, Q. Wei

**1:40 CATL 654.** Gallium modified USY zeolites as an effective co-support for ultra deep hydrodesulfurization catalysts on inferior diesels-its high isomerization selectivity. W. Zhou, Y. Zhou, Q. Wei

2:00 Intermission.

**2:20 CATL 655.** NH<sub>3</sub>-SCR Mechanism on Cu-SAPO-18 catalysts: A DFT+U study. J. Deng, W. Song, Z. Zhao, L. Zhao, J. Liu

**2:40 CATL 656.** Mechanistic study of selective catalytic reduction of NOx with NH<sub>3</sub> over Mn-TiO<sub>2</sub>: A combination of experimental and DFT study. H. Zheng, W. Song, J. Liu, Z. Zhao

† Cooperative Cosponsorship

**3:00 CATL 657.** Cu-catalyzed etching of graphene layers through carbon hydrogenation. **G. Cheng**, I.G. Calizo, A.R. Hight Walker

**3:20 CATL 658.** Distinctive catalysis of supported Pt and Au nanoparticles in aerobic oxidation of polyols. **B. Xu, S. Liu, Z. Yuan**

## CELL

### Division of Cellulose and Renewable Materials

**M. Roman**, Program Chair

#### OTHER SYMPOSIA OF INTEREST:

**Chemistry of Cellulosic Natural Products** (see AGFD, Wed)

**Carbohydrate-Based Hybrid Materials for Nanomedicine** (see CARB, Mon, Tue)

**Carbohydrate-Based Nanomaterials & Drug-Delivery Vehicles** (see CARB, Wed)

## SUNDAY MORNING

### Section A

Moscone Center  
252/260

#### Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar Drug Delivery

*Cosponsored by CARB*

*Financially supported by EPNOE, Eastman Chemical Company, VT Fralin Life Science Institute, VT College of Natural Resources and Environment, VT Department of Sustainable Biomaterials, Carbohydrate Polymers (Elsevier)*

P. E. Fardim, O. J. Rojas, *Organizers*

C. M. Buchanan, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 1.** Polysaccharides in drug delivery: An overview. **M.F. Wempe**

**8:30 CELL 2.** Polysaccharides in drug delivery: Applications of cellulose derivatives for oral drug delivery. **G. Ilevbare-Okoh**

**8:55 CELL 3.** From computational modelling towards mechanistic design of polymers for oral drug delivery. **L.I. Mosquera-Giraldo**, C.H. Borca, X. Meng, Y. Dong, K.J. Edgar, L.V. Slipchenko, L. Taylor

**9:20 CELL 4.** Withdrawn.

**9:45** Intermission.

**10:00 CELL 5.** Cellulose nanocrystal conjugates for drug delivery and bioimaging applications. **M. Roman**

**10:25 CELL 6.** Supramolecular design of cellulose hydrogel microspheres. **P.E. Fardim**, P. Trivedi, J. Schaller, J. Gustafsson

**10:50 CELL 7.** Immunosensor based on cellulose nanofibrils for C-reactive protein detection. **Y. Zhang, O.J. Rojas**

**11:15 CELL 8.** Self assembly of *A. Tequilana* fructans and encapsulation of ibuprofen for targeting oral drugs to the colon. **G. Toriz Gonzalez**, C. Miramontes-Corona, J. Ferrer, A. Escalante, E. Delgado, R.I. Corona-Gonzalez, A. Soltero

### Section B

Moscone Center  
262

#### Processing & Properties of Biobased Composites & Blends

*Financially supported by EPNOE*

J. R. Barone, P. R. Navard, *Organizers, Presiding*

**8:05 CELL 9.** Effect of ethylene glycol-water mixed solvent on the synthesis of iron oxide/carbon nanocomposites and their adsorption performance. **S. Liu**

**8:30 CELL 10.** Solvent-exchanged porous bacterial cellulose nanopaper as reinforcement for polymers. **A. Santmarti**, M. Hervy, K. Lee

**8:55 CELL 11.** Water-based dissolution of wood cellulose and design of novel cellulose-based nanocomposite materials. **M. Norgren**, J. Yang, C. Costa, A. Eivazhollah, F. Carlsson, C. Dahlström, B. Medronho, H. Edlund, B. Lindman

**9:20 CELL 12.** Facile Method for the Suspension, Dispersion, and Fabrication of Cellulose-based Plastics. **D.H. White**, C.J. Huntley, **M.L. Curry**

**9:45** Intermission.

**10:00 CELL 13.** Cellulose/vaterite nanocomposites: Sonochemical synthesis, and their applications in drug delivery and protein adsorption. **L. Fu**, M. Ma, F. Xu, X. Zhang

**10:25 CELL 14.** Simple synthesis method towards amino-functionalized carbon dots: Carbonization of chitosan. **X. Liu**, J. Pang, F. Xu, X. Zhang

**10:50 CELL 15.** Synthesis and characterization of hydroxypropyl methylcellulose/xyloglucan blend films for release of gentamicin drug. **S. Kondaveeti**

**11:15 CELL 16.** How can a single methyl group drastically modify the microstructure of a biocomposite and affect its mechanical properties? **A. Gallos**, J. Beaugrand, G. Paes, F. Allais

### Section C

Moscone Center  
270

#### Cellulose Structure & Biosynthesis

##### In the Plant Cell Wall

*Cosponsored by BIOL, BIOT, CARB and ENFL*

*Financially supported by Department of Energy - Office of Science*

P. Langan, H. M. O'Neill, J. Zimmer, *Organizers*

N. Carpita, D. Cosgrove, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 17.** 3D Nano-architecture and mechanical properties of *Arabidopsis thaliana* plant cell walls by cryo-electron tomography of vitreous sections. **M. Auer**

**8:30 CELL 18.** Visualizing cellulose microfibril movements during stress-induced and endoglucanase-induced extensions of plant primary cell walls. **D. Cosgrove**

**8:55 CELL 19.** Advances in combining neutron scattering with molecular simulations to understand cell wall structure. **P. Langan**, B. Evans, H.M. O'Neill, R. Shah, S. Pingali, V. Urban, D. Sawada, J. Smith, L. Petridis, D. Vural, B.H. Davison

**9:20 CELL 20.** Microfibril orientation, spacing and bundling in secondary cell walls: Implications for catalytic deconstruction. **B.S. Donohoe**, J.D. Hinkle, P.N. Ciesielski, M.F. Crowley, N.S. Mosier, C. Chapple, M. Himmel

**9:45** Intermission.

**10:00 CELL 21.** Polymorphic structures and pectin interactions of cellulose in primary plant cell walls from multidimensional solid-state NMR. **T. Wang**, P. Phyto, H. Yang, S. Kiemle, D. Cosgrove, J.D. Kubicki, **M. Hong**

**10:25 CELL 22.** Mesoscale order of cellulose microfibrils in plant cell walls: Sum Frequency Generation (SFG) vibrational spectroscopy study. **S.H. Kim**

**10:50 CELL 23.** Density functional theory modeling of cellulose polymer assembly. **J.D. Kubicki**, H. Watts, H. Yang, D. Oehme, L. Petridis, Y.G. Yingling

**11:15 CELL 24.** Impact of alterations in lignin deposition on cellulose organization of the plant cell wall. **J. Liu**, J. Kim, J. Cusumano, C. Chapple, **L. Makowski**

### Section D

Moscone Center  
272

#### Nanocellulose Processing & Analysis

##### Novel Processes

*Cosponsored by AGFD, ANYL, CHAS and I&EC*

*Financially supported by TAPPI*

W. Y. Hamad, T. Lindström, M. Roman, *Organizers*

M. Bortner, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 25.** Deep eutectic solvents in nanocellulose production. **J.A. Sirviö**, M. Visanko, T. Selkälä, H. Liimatainen

**8:30 CELL 26.** Ionic liquid-cellulose-in-oil microemulsions: Molecular weight dependence and directed morphology of cellulose nanoparticles. **J.R. Alston**, N. Redeker, M. Khan, J.M. Mabry

**8:55 CELL 27.** Imidazole: A new tunable reagent for producing nanocellulose. **J. Mao**, H. Abushammala, H. Hettegger, T. Rosenau, M. Laborie

**9:20 CELL 28.** One pot generation of hydrophobic nanocellulose by a multi-functional agent. **J.Y. Fukuda**

**9:45** Intermission.

**10:00 CELL 29.** Cellulose nanostructure obtained by enzymatic hydrolysis: The effects of treatment time. **D. Rosa**, C. Bauli, D. Rocha

**10:25 CELL 30.** Investigation of surface interactions of micro/nano-cellulose with metal ions at micro-nano-molecular scale. **C. Zhu**, A. Mathew

**10:50 CELL 31.** Phosphated cellulose nanocrystals: Isolation and bioengineering applications. **S. Camarero-Espinosa**, T. Kuhnt, B. Rothen-Rutishauser, J. Foster, C. Weder

**11:15 CELL 32.** Development of the continuous production process Kyoto process of CNF reinforced plastics. **H. Yano**, F. Nakatsubo, T. Semba, K. Kitagawa

**11:40** Concluding Remarks.

### Section E

Moscone Center  
274

#### New Horizons in Sustainable Materials

##### Renewable Polymers: Isolation, Structure & Properties

*Cosponsored by POLY*

M. G. Laborie, S. H. Rennecker, N. Robitaille Brown, *Organizers*

N. Sathitsuksanoh, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 33.** Plant oil-based acrylic monomers for free radical polymerization. **Z. Demchuk**, I. Tarnavchyk, O. Shevchuk, V. Kirianchuk, A.S. Voronov

**8:30 CELL 34.** Emulsion copolymerization of vinyl acetate with hydrophobic plant oil-based monomers: Effect of plant oil unsaturation of reaction kinetics. **K. Kingsley**, O. Shevchuk, I. Tarnavchyk, A. Voronov

**8:55 CELL 35.** Random copolymerization of lactones and hydroxyacid bioaromatics using one-pot Ring Opening Polymerization (ROP) polycondensation method. **H. Nguyen**, G. Short, P. Qi, S.A. Miller

**9:20 CELL 36.** Water pre- and post-hydrolysis of birch wood to produce high-purity cellulose and xylan-based compounds for material and chemical applications. **M. Borrega**, H. Sixta

**9:45** Intermission.

**10:00 CELL 37.** Wood-based hemi-celluloses as renewable source for functional materials. **T. Nypelo**, H. Amer, C. Laine, T. Tammelin, J. Konnerth, U. Henniges, A. Pothast, T. Rosenau

**10:25 CELL 38.** Multifunctional materials based on wood derived biopolymer. **H. Zhu**, L. Yang, L. Chen

**10:50 CELL 39.** Novel one step method to prepare carboxycellulose nanofibers from raw biomass and their applications in heavy metal ions remediation. **P. Sharma**, B.T. Chu, B.S. Hsiao

**11:15 CELL 40.** Tertiary amine catalysts for oxidizing the unsaturated components in cellulosic pulp. **G. Afsahi**, K.J. Ruuttunen, T. Vuorinen

**11:40** Concluding Remarks.

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## Section F

Mosccone Center  
276

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

*Cosponsored by AGFD*

J. Campos-Teran, O. J. Rojas, *Organizers*

M. L. Auad, *Organizer, Presiding*

E. A. Moura, *Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 41.** Development of novelty Fique textile fabrics for clothing applications. **M. Restrepo**, M.C. Amaya, J. Manrique, P. Garián, L. Velez, R. Zuluaga Gallego, C. Castro Herazo

**8:30 CELL 42.** Novel recycling process for cotton polyester blended waste textiles. **S. Haslinger**, M. Hummel, H. Sixta

**8:55 CELL 43.** Nanocellulose recovery from industrial bagasse of agave tequilana. **B.C. Sulbaran**, J. Hernandez, **G. Toriz Gonzalez**, O.J. Rojas, M.A. Escalante

**9:20 CELL 44.** Biocatalytic functionalization of softwood galactoglucomannan through transglycosylation and enzyme engineering. **J. Morrill**, A. Rosengren, S. Butler, H. Stålbland

**9:45** Intermission.

**10:00 CELL 45.** Electrodes with nanostructures used in the electrochemical analysis of pesticides in aquifers means of organic and conventional banana production in Costa Rica. **R. Zamora**, R. Starbird

**10:25 CELL 46.** Modified soy protein as encapsulate excipient in pharmaceutical applications. **M. Anaya Castro**, I. Alic, S. Fullana-Girod, V. Durrieu

**10:50 CELL 47.** Incorporating cellulosic passion fruit residues into pectin edible plastics. **D.R. Munhoz**, F.K. Moreira, L.H. Mattoso

**11:15 CELL 48.** Residues from agroindustry as reinforcement in foams based on PBAT/PLA blend. **T.T. Freitas**, R. Coiado, G. Lazo, R. Oliveira, **E.A. Moura**

## SUNDAY AFTERNOON

## Section A

Mosccone Center  
252/260

### Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

#### Tissue Engineering

*Cosponsored by CARB*

*Financially supported by EPNOE, Eastman Chemical Company, VT Fralin Life Science Institute, VT College of Natural Resources and Environment, VT Department of Sustainable Biomaterials, Carbohydrate Polymers (Elsevier)*

C. M. Buchanan, O. J. Rojas, *Organizers*

P. E. Fardim, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 CELL 49.** Tubular biocellulose hydrogels act as temporarily implanted in vivo scaffolds and cause regeneration of bile duct by body own tissue. **D.O. Klemm**, F. Rauchfuss, F. Kramer, K. Petzold-Welcke, W. Fried, U. Settmacher

**1:30 CELL 50.** Nano-designed polysaccharide-based constructs for tissue engineering applications. **J.F. Mano**

**1:55 CELL 51.** Chemoenzymatic strategy to design alginates for tissue engineering. **G. Skjak-Brak**

**2:20 CELL 52.** Manufacturing, characterization and use of substrates for regenerative medicine based on the specific properties of polysaccharide derivatives and biodegradable polymers. **R. Kargl**, T. Mohan, C. Nagaraj, A. Dobaj Štiglic, A. Olschewski, U. Maver, **K. Stana Kleinschek**

**2:45** Intermission.

**3:00 CELL 53.** Glycosaminoglycan nanostructures as mimics of the vascular endothelial glycocalyx. **M. Kipper**

**3:25 CELL 54.** Polysaccharide based micro-nano structures for tissue engineering. **S.G. Kumbar**

**3:50 CELL 55.** Development and characterization of biomembranes combining chitosan and natural nanoliposomes for tissue engineering applications. **F. Cleymand**, E. Velot, P. Menu, E. Arab-Tehrany, J.F. Mano

**4:15 CELL 56.** Bottom-up fabrication of hybrid polysaccharide/peptide amphiphile supramolecular multilayered biomaterials by combining self-assembly and layer-by-layer assembly approaches. **J. Borges**, M.P. Sousa, G. Cinar, S. Caridade, M.O. Guler, J.F. Mano

## Section B

Mosccone Center  
262

### Processing & Properties of Biobased Composites & Blends

*Financially supported by EPNOE*

J. R. Barone, P. R. Navard, *Organizers, Presiding*

**1:05 CELL 57.** Role of non-cellulosic components on the microstructure and physical properties of natural fibres and their biocomposites. **N. Le Moigne**, J. Acéra Fernandez, A. Caro-bretelle, R. El Hage, A. Le Duc, M. Lozachmeur, P. Bono, A. Bergeret

**1:30 CELL 58.** Influence of biochemical and histological characteristics on the properties of miscanthus-polypropylene composites. **J. Girones**, L. Vo, E. Gineau, G. Mouille, S. Arnout, C. Lapiere, M. Brancourt, P.R. Navard

**1:55 CELL 59.** Lignin- polyvinyl alcohol photo-cured composite films. Effect of lignin and UV curing agent quantity on the mechanical, optical and chemical properties. **A. Suarez**, L.Y. Perez

**2:20 CELL 60.** Challenges of utilizing different lignins and blends for carbon fibers. **M. Cho**, L. Ji, M. Karaaslan, F.K. Ko, S. Rennecker

**2:45** Intermission.

**3:00 CELL 61.** Molecular dynamics simulation study of moisture effects on chain mobility in hemicellulose-based bio-nanocomposites as observed by  $^{13}\text{C}$  CP/MAS NMR relaxometry. **P. Chen**, C. Terenzi, L. Berglund, J. Wohler

**3:25 CELL 62.** What defines fiber quality in wood refining? **M. Tasooji**, C.E. Frazier

**3:50 CELL 63.** Withdrawn.

**4:15 CELL 64.** Treatments of cellulosic fibers to reduce the water absorption in composite reinforcement. **M. Ardanuy**, H. Ventura, J. Claramunt

## Section C

Mosccone Center  
270

### Cellulose Structure & Biosynthesis Evolution of Synthases & Fine Structure of Microfibrils

*Cosponsored by BIOL, BIOT, CARB and ENFL*

*Financially supported by Department of Energy - Office of Science*

N. Carpita, D. Cosgrove, H. M. O'Neill, J. Zimmer, *Organizers*

P. Langan, *Organizer, Presiding*

C. H. Haigler, *Presiding*

**1:00** Introductory Remarks.

**1:05 CELL 65.** Evolutionary perspectives on functional differentiation of CESA proteins. **A.W. Roberts**

**1:30 CELL 66.** Using animal models to study cellulose biosynthesis. **K. Nakashima**

**1:55 CELL 67.** Aminoethyl cellulose in bacteria: Structure, biosynthesis, and implications. **L. Cegelski**

**2:20 CELL 68.** How many twists in cellulose biosynthesis can we still expect? **U. Römling**

**2:45** Intermission.

**3:00 CELL 69.** Patterns in cellulose fibril formation. **M.F. Crowley**, M. Himmel, L. Bu

**3:25 CELL 70.** Can an 18-chain cellulose microfibril explain the scattering/diffraction data? **Y. Nishiyama**, Y. Ogawa, T. Kuribayashi

**3:50 CELL 71.** Relations between co-crystallization and multiscale hydration in celluloses isolated from plants. **M.M. Oliveira**, A.A. Curvelo, **C. Driemeier**

**4:15 CELL 72.** Understanding the mechanical induction of macromolecular defects in cellulose nanofibrils by molecular dynamics simulation and scanning probe microscopy. **P.N. Ciesielski**, R. Wagner, V. Bharadwaj, M. Himmel, J. Killgore, M.F. Crowley

## Section D

Mosccone Center  
272

### Nanocellulose Processing & Analysis

#### Process Parameters

*Cosponsored by AGFD, ANYL, CHAS and I&EC*

*Financially supported by TAPPI*

M. Bortner, T. Lindström, M. Roman, *Organizers*

W. Y. Hamad, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 CELL 73.** Limiting factors for cellulose nanocrystal yield assessed via TEMPO-mediated oxidation of microcrystalline cellulose. **E. Kontturi**, R. Salminen, M. Reza, J. Peyre, T. Pääkkönen

**1:30 CELL 74.** Characterization and patterning of anthraquinone functionalized cellulose nanocrystals. **A. Sulkkanen**, Y. Si, G. Sun, G. Liu

**1:55 CELL 75.** Surface polarity engineering of crystalline nanocellulose using a food-grade surfactant for improved sustainable biocomposites. **K. Chi**, J.M. Catchmark

**2:20 CELL 76.** Microfibrillated cellulose produced with a high consistency enzymatic process. **T.C. Maloney**, K. Dimic-Misic, S. Ceccherini, J. Kuusisto, A. Suurnäkki, O. Mattila, S. Grönqvist

**2:45** Intermission.

**3:00 CELL 77.** Determination of hydrophobicity in amphiphilic nanocellulose imparted by Aqueous Counter Collision (ACC). **T. Kondo**, K. Tsuboi, S. Yokota

**3:25 CELL 78.** Understanding cell wall longitudinal structure for producing cellulose nanofibrils by disk milling with dilute acid prehydrolysis. **J. Zhu**

**3:50 CELL 79.** Cellulose fibre in situ fibrillation by twin screw extrusion. **F. Rol**, O. Nechyporchuk, B. Karakashov, N. Belgacem, J. Bras

**4:15 CELL 80.** Influence of monosaccharide composition in TEMPO-mediated oxidation to produce cellulose nanofibrils from corn husk and banana rachis. **C. Gomez Hoyos**, J. Velázquez-Cock, A.M. Serpa Guerra, R. Zuluaga Gallego, C. Castro Herazo

**4:40** Concluding Remarks.

## Section E

Mosccone Center  
274

### New Horizons in Sustainable Materials

#### Nanocellulose Materials & 3D Structures

*Cosponsored by POLY*

M. G. Laborie, N. Robitaille Brown, N. Sathitsuksanoh, *Organizers*

S. H. Rennecker, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 CELL 81.** Environmental effects on the organization and structure of mechanically adaptable biopolymer networks. **Z. Walsh**, L. Averous

**1:30 CELL 82.** Hydrodynamic stability of reacting multilayer flows in a Hele-Shaw cell. **J. MacKenzie**

**1:55 CELL 83.** 3D printing of cellulose nanocrystals and nanocomposites. **G. Siqueira**, D. Kokkinis, R. Libanori, M. Hausmann, S. Gladman, A. Neels, P. Tingaut, T. Zimmermann, J. Lewis, A. Studart

**2:20 CELL 84.** Cellulose nanofibril-cell adhesive peptide conjugates for 3D bioprinted tissue models. **E. Karabulut**, A. Sousa Morais, P. Gatenholm

**2:45** Intermission.

**3:00 CELL 85.** Functional lignocellulosic materials: Engineering smart bio-hybrids from a natural anisotropic scaffold. **E. Cabane**, T. Keplinger, S. Kostic, M. Vidiella del Bianco, S. Vitas, Y. Wang, I. BURGERT

**3:25 CELL 86.** Non-enzymatically digestible micro-patterning cell scaffolds by inkjet-printing of chitinous nanocrystals. **Y. Teramoto**, S. Suzuki, T. Katsuragawa

**3:50 CELL 87.** Chemical modifications for the synthesis of functional materials from sustainable nano/cellulose. **K. Zhang**

**4:15** Introduction of the KINGFA Awardee.

**4:20 CELL 88.** Optimizing both thermal and colloidal stability of cellulose nanocrystal through acid hydrolysis. **E.D. Cranston**, O. Vanderfleot, M.S. Reid

## Section F

Mosccone Center  
276

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

Cosponsored by AGFD

M. L. Auad, O. J. Rojas, *Organizers*

J. Campos-Teran, *Organizer, Presiding*

K. A. Oksman, *Presiding*

**1:00** Introductory Remarks.

- 1:05** CELL **89**. Biomass conversion into functional bioplastics and gels. U.M. Edlund
- 1:30** CELL **90**. Effect of the culture medium in the production of bacterial cellulose from kombucha. J. Gutiérrez-Castañeda, M. Hernández-Guerrero, S. Revah, J. Campos-Teran, G. Viguera
- 1:55** CELL **91**. Sugar produced from corn cob pretreated with the combination of electron beam irradiation and enzymes. E.S. Pascoal, E.K. Kleingensind, E.A. Moura, A.B. Lugão, R.C. Rodrigues
- 2:20** CELL **92**. Chromatographic purification of sugar cane bagasse alkaline extract. V. Oriez, P. Pontalier, J. Peydecastaing
- 2:45** Intermission.
- 3:00** CELL **93**. Energy efficient separation process of nanofibrils from bioresidues and their use in biocomposites. K.A. Oksman, L. Berglund, Y. Aitomäki
- 3:25** CELL **94**. Torrefaction analysis of woody biomasses from fast-growing plantations of Costa Rica. R. Moya, A. Rodríguez-Zúñiga, A. Puente
- 3:50** CELL **95**. Scaled-up production of biodegradable pectin plastics using continuous casting. L.B. Norcino, D.R. Munhoz, F.K. Moreira, L.H. Mattoso
- 4:15** CELL **96**.  $\alpha$ -Eleostearic acid extraction by saponification of tung oil and its subsequent polymerization. A. Murawski, R. Quirino

### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG $\ddagger$ , ORGN and PROF

## SUNDAY EVENING

### Section A

Mosccone Center  
Hall D

#### General Posters

M. Roman, *Organizer*

**7:00 - 9:00**

- CELL **97**. Aminoethyl cellulose: *E. coli*'s building material for a biofilm matrix. W. Thongsomboon, L. Cegelski
- CELL **98**. From cellulose tissue papers to nanoporous membrane actuators. H. Lin, J.W. Dunlop, J. Yuan
- CELL **99**. Understanding protein adsorption to TEMPO-oxidized cellulose microfibrils. S. Cobos, B. Nemmaru, S.P. Chundawat, D. Athanasopoulos

- CELL **100**. Combined steam and dry reforming of methane over nickel-based catalysts for upgrading biomass gasification-derived syngas. E. Terrell, C. Theegala
- CELL **101**. Acetic acid as a pre-catalyst to promote cellulose dissolution. Y. Hu, S. Acharya, N. Abidi
- CELL **102**. Molecular dynamics study of chitin crystal models in ionic liquids. T. Uto, K. Yamamoto, J. Kadokawa
- CELL **103**. Preparation of amylose-grafted chitin nanofiber gels. N. Egashira, K. Yamamoto, J. Kadokawa
- CELL **104**. Chemoenzymatic synthesis and gelation behavior of amylose-grafted poly( $\gamma$ -glutamic acid). T. Shouji, J. Kadokawa, K. Yamamoto
- CELL **105**. Withdrawn.
- CELL **106**. Polyamide-polysiloxane-copolymers as examples for partially biobased thermoplastic elastomers. M.A. Hasböck, C. Zollfrank
- CELL **107**. Antibacterial chitosan films containing quaternary ammonium salts modified nanocrystalline cellulose. L. Ying, X. Ren, G. Buschle-Diller
- CELL **108**. Facile synthesis of high strength and oxygen-barrier performance of hot-water wood extract films. G. Chen, G. Fu, X. Qi, F. Peng, C. Yao, R. Sun
- CELL **109**. Kinetics of chain scission and of total oxidative damage in the Fenton-induced degradation of cereal  $\beta$ -glucan. S. Boulos, N. Burkhardt, L. Nystroem
- CELL **110**. Drug delivery mechanism of sulfathiazole in films. M.L. Auad, M. Barde, M. Davis, S. Rangari
- CELL **111**. 3D Porous structures based on lignin. M.L. Auad, I. Flipponen, T. Hinkle, C. Upp
- CELL **112**. What are the ranges and basis of auxeticity in the phases of cellulose microfibrils? A. Asamoah
- CELL **113**. Laccase-polymerization of ultrasound extracted bamboo substrates. J. Fu, A. Cavac-Paulo
- CELL **114**. Toward development of new generation of peat granular products for waste water remediation: Reaction mechanism of peat surface with cations of heavy metals. V.G. Goncharov, H.J. Leopold, L. Kildyshova, I.V. Kolomitsyn
- CELL **115**. Preparation and characterization of antibacterial films by pretreatment of dioxane from *Phyllostachys pubescens*. Q.W. Li, G. Hui, R. Jun, G. Ying
- CELL **116**. High strength of biocomposite film prepared from hemicelluloses and cellulose. R. Jun, G. Ying, Q.W. Li, H. Gao
- CELL **117**. Grafting of polyoxazoline on chitin nanofiber film to form organo- and hydrogels. J. Yoshida, K. Yamamoto, J. Kadokawa
- CELL **118**. Novel approach to achieve thermoplastic arabinoxylan. M.E. Borjesson, G.J. Westman, A. Larsson, A. Ström
- CELL **119**. Development and investigation of a cellulose-based low adhesion coating for adhesive tapes. S. von Gradowski, M. Nau, M.A. Biesalski
- CELL **120**. Influence of nanofibrillation degree on nanocellulosic aerogel properties. J. Desmaison, B. Seantier, A. Dufresne, J. Bras

- CELL **121**. Direct comparison of protein and lignocellulose fibers as reinforcements in polymer matrix composites. A.M. Davis, L.E. Hanzly, B.L. DeButts, J.R. Barone
- CELL **122**. Technical lignins modified by hydroxymethylation for the production of high pressure laminates: Synthesis, characterization and mathematical modeling. M. Taverna, V.V. Nicolau, D. Estenoz
- CELL **123**. Dimensional stability analysis of flax fiber reinforced polypropylene composites. A.M. Davis, L.E. Hanzly, B.L. DeButts, J.R. Barone
- CELL **124**. Evaluating seafood industry waste products as valuable sources of chitin and chitosan. B. Barnes, P. Sharma, U. Onuchukwu, V. Volkis
- CELL **125**. Mussel-inspired polysaccharide derivatives as examples of novel strong bioadhesives. M. Petzold, C. Zollfrank
- CELL **126**. Disruption of cellulose fibers structure by Lytic Polysaccharide Monooxygenase (LPMO) enzymes. A. Villares, C. Moreau, C. Bennati-Granier, S. Garajova, B. Saake, J. Berrin, B. Cathala
- CELL **127**. Easy process to cellulose-silica hybrid aerogels. A. Berkefeld, M. Schestakow
- CELL **128**. Algae-based biorefinery of *Chlorella vulgaris*. G. Vaca Medina, C. Mathieu, C. Raynaud
- CELL **129**. Fabrication of CNC/glycerol thin films as substrate for electronic applications. M. Rivera, V. Pantojas
- CELL **130**. Optimization of phenolics extraction from walnut shells through ultrasound treatment. H. Han, F. Zhang, Y. Wang, J. Jensen, M. Rakita, Q. Han, S. Janaswamy, Q. Xu
- CELL **131**. Cellulose nanofiber surface functionalization for functional medical membrane applications. H. Durand, H. Le Drezen, N. Belgacem, E. Zeno, J. Bras
- CELL **132**. Effects of catalytic fast pyrolysis derivatives on mechanical, thermal and surface properties of nanocellulose films. R. Zhang, N. Wilson, M.R. Nimlos, M. Himmel, P.N. Ciesielski
- CELL **133**. Impact of vanillin on the rheological and phase behavior of Cellulose Nanocrystals (CNCs). J. Mao, R. Ma, M. Laborie
- CELL **134**. Enhancement of PVA/MMT composite film by chitin nanowhiskers. Y. Guan, H. Gao, L. Zhang
- CELL **135**. Withdrawn.
- CELL **136**. Aqueous dispersions of TEMPO-oxidized cellulose nanofibrils with various metal counterions, and their super deodorant performances. A. Sone, T. Saito, A. Isogai
- CELL **137**. Microwave-hydrothermal rapid synthesis of cellulose/Ag nanocomposites and their antibacterial activity. L. Fu, Y. Liu, S. Liu, M. Ma
- CELL **138**. Withdrawn.
- CELL **139**. Sustainable polymer synthesized from gemini monomers. Z. Wang
- CELL **140**. Analysis of Liquid Fuels from Thermal Depolymerization of Polypropylene in a Bench-Scale Reactor. S.M. Cardinali, J.M. Lemas, S. Ramesh, J.E. Holm, C.J. Pope

- CELL **141**. Conductive films prepared from cellulose, graphite and polyaniline nanoparticles with highly thermal stability and antibacterial activity. J. Chen, J. Liu, W. Zhang, K. Wang, X. Qian, R. Sun
- CELL **142**. Recycling of non-metallic fraction of printed circuit boards as reinforcement in poly(methyl methacrylate) composites. C. Loyo, C. Arroyo, V. Valle, M. Aldas
- CELL **143**. Applications of cellulose waste. Development of insulation panels. L. Beltrami, R. Grether, A. Guillarducci, N. Ulibarrie
- CELL **144**. Controlling latex morphology with cellulose nanocrystals and methyl cellulose. S.A. Kedzior, B. Morgan, E. Joy, Z. Hu, E.D. Cranston
- CELL **145**. Synthesis of encapsulated bio-pesticides/fertilizers based on superabsorbent crosslinked alginate microbeads. P. Joshi, M.L. Auad
- CELL **146**. Characterization of cellulose membrane filters deposited by electrospinning. J.L. Berrios-Rivera, V. Pantojas
- CELL **147**. Sequential fractionation of lignin macromolecules with organic solvents and investigation of their potentials for utilization as lignin-PLA copolymers. S. Park, J. Choi
- CELL **148**. Development of reinforced rigid polyurethane foam composite based on cabuya fiber. A. Proano
- CELL **149**. Biopolymer synthesis: Esterification of wood cellulose from different guatemalan tree species with phthalic anhydride and their use as triclosan adsorbents in aqueous solutions. C.E. Torres, J. Carrera, S. Toledo
- CELL **150**. Cleavage of  $\beta$ -O-4 ether bonds in acidic lithium bromide trihydrate for lignin depolymerization. N. Li, X. Yang, X. Lin, X. Pan
- CELL **151**. Conductive hydrogels for use in tissue engineering and biocompatible electronics. B. Cleary, M.L. Auad
- CELL **152**. Preparation of electrospun mats of functionalized Nano-Crystalline Cellulose (NCC). R. Farag, Z. Jiang, B. Jackson, K. Brown, M.L. Auad
- CELL **153**. Cellulose nanocrystal thin film swelling to probe particle-particle interactions in solvents and aqueous media. M.S. Reid, S.A. Kedzior, M. Villalobos, E.D. Cranston
- CELL **154**. Characterization of edible film based on zein and chitosan. L. Pinho, M. Oliveira, W.Q. Oliveira, R. Furtado, M.S. Bastos, F. R.W.
- CELL **155**. Pre-treatments to create porous cellulose fibres for nanocellulose production. M. Miranda, C. Driemeier, A.J. Carvalho, N. Belgacem, J. Bras

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**CELL 156.** Succinylation of glucmannans from spruce for hydrogel formation. A. Escalante, K. Markstedt, P. Gatenholm, G. Toriz Gonzalez

**CELL 157.** Biomass potential for the development of advanced materials and bio-based products. M. Kurečić, S. Hribernik, M. Božić, A. Ojstršek, T. Kos, M. Mešič, K. Stana Kleinschek

**CELL 158.** Gelation of 3D printed nanocellulose induced by crosslinked hemicellulose. K. Markstedt, A. Escalante, G. Toriz Gonzalez, P. Gatenholm

**CELL 159.** Effect of the change of the crystalline structure on the infrared spectra by ATR of cellulose from banana rachis, corn husk and bacterial cellulose. A.M. Serpa Guerra, C. Gómez Hoyos, J.A. Velasquez-Cock, P. Gañán, C. Castro Herazo, R. Zuluaga Gallego

**CELL 160.** Bacterial nanocellulose based bioink for 3D bioprinting. K. Markstedt, D. Hägg, T. Kondo, G. Toriz Gonzalez, P. Gatenholm

**CELL 161.** Characterization of wood and cellulose from different eucalyptus species. R. Teixeira Mendonça, I. Carrillo, M. Pereira

**CELL 162.** Biomaterial polymer blends for material extrusion 3D printing. P. Tayeb, L. Pai, A.H. Tayeb

**CELL 163.** Solution/aggregate behavior of spruce xylan as function of isolation/purification conditions. S. Kishani, A. Escalante, G. Toriz Gonzalez, L. Wagberg, P. Gatenholm

**CELL 164.** Extraction and characterization of nanocellulose from different biomass sources. M. Alwohaibi, C.J. Huntley, M.L. Curry

**CELL 165.** Synthesis and fabrication of CNF-based plastic nanocomposites. D.H. White, C.J. Huntley, M.L. Curry

**CELL 166.** Molecular blending and reinforcing effect of lignin in ductile epoxy resins. F. Ansari, R. Rojas Escontrillas, L. Berglund

**CELL 167.** TEMPO-oxidized Nanofibrillated Cellulose Film (NFC) incorporating Graphene oxide (GO) nanofillers. Y. Kim, Y. Kim

**CELL 168.** Enhanced solar driven water evaporation rates through graphitic surface film suspensions. R. Christoph, A. Hernández, R. Muñoz, S. Ventura

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## MONDAY MORNING

### Section A

Moscone Center  
252/260

### Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

#### Structure

*Cosponsored by CARB*

*Financially supported by EPNOE, Eastman Chemical Company, VT Fralin Life Science Institute, VT College of Natural Resources and Environment, VT Department of Sustainable Biomaterials, Carbohydrate Polymers (Elsevier)*

C. M. Buchanan, P. E. Fardim, *Organizers*

O. J. Rojas, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 169.** Repeating unit of cellulose is glucose, and why that matters. A.D. French

**8:30 CELL 170.** Findings on the way of cellulose ether analysis. P. Mischnick, K. Voiges, S. Gangula

**8:55 CELL 171.** Withdrawn.

**9:20 CELL 172.** Rheo-optical and optical studies of cellulose derivatives. P.R. Navard, T. Budtova

**9:45** Intermission.

**10:00 CELL 173.** Insights in the control of glycosaminoglycan structure. R.J. Linhardt

**10:25 CELL 174.** Precision biomaterials based on synthetic heparan sulfate oligosaccharides. G. Boons

**10:50 CELL 175.** New views of plant cell wall non-cellulosic polysaccharide and proteoglycan structure from studies of pectin biosynthetic enzymes and plants modified in their expression. D. Mohnen, M. Atmodjo, A. Biswal, R. Amos, K. Engle, L. Tan

**11:15 CELL 176.** Conversion of agricultural by-products to methyl cellulose. A. Biswas, H. Cheng, R. Furtado, C.R. Alves

### Section B

Moscone Center  
262

### Processing & Properties of Biobased Composites & Blends

*Financially supported by EPNOE*

P. R. Navard, *Organizer*

J. R. Barone, *Organizer, Presiding*

**8:05 CELL 177.** Mechanical properties improvement of natural rubber/pineapple leaf fiber composites: Effects of silane treatment of fiber and incorporation of carbon black. N. Hariwongsanupab, K. Mougín, T. Amornsakchai, M. Vallat, S. Thanawan, G. Schrodj

**8:30 CELL 178.** Substitution of formaldehyde in phenolic thermosets with innovative and bio-based lignin-to-vanillin derived compounds. S. Caillol

**8:55 CELL 179.** Manufacturing strong regenerated cellulose fibers reinforced with cellulose nanocrystals. J. Bhardwaj, R. Richardson, J. Li, S. Rahatekar

**9:20 CELL 180.** Micro and nano composites using cotton materials loaded in polylactic acid and applications in 3D printing. A. Kearns, R.A. Venditti, J. Jur, N. Farahbakhsh

**9:45** Intermission.

**10:00 CELL 181.** Design, fabrication and test of degradable starch based tube for a biomedical application. L. Chaunier, D. Velasquez, S. Guessasma, A. Bizeau, F. Faure, A. Meddahi-Pelle, D. Lourdin

**10:25 CELL 182.** Blend configuration in polymeric materials with very high lignin-derivative contents. S. Sarkanen, Y. Wang, Y. Chen

**10:50 CELL 183.** Lignin acidolysis predicts formaldehyde generation in pine wood. C.E. Frazier, G. Wan

**11:15 CELL 184.** Amyloid reinforced polyvinyl alcohol nanocomposites. B.L. DeButts, J.R. Barone

### Section C

Moscone Center  
270

### Cellulose Structure & Biosynthesis Mechanism of Synthesis

*Cosponsored by B/OL, BIOT, CARB and ENFL*

*Financially supported by Department of Energy - Office of Science*

N. Carpita, D. Cosgrove, P. Langan, H. M. O'Neill, *Organizers*

J. Zimmer, *Organizer, Presiding*

A. W. Roberts, *Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 185.** Structure and function of cellulose synthase. J. Zimmer

**8:30 CELL 186.** Cellulose microfibril formation in vitro by a single heterologously expressed plant cellulose synthase isoform. P. Pallinti, S. Cho, S. Diaz-Moreno, M. Kumar, B. Nixon, V. Bulone, J. Zimmer

**8:55 CELL 187.** All-atom structural models of plant cellulose synthase and cellulose synthase complex. A. Singh, S. Deshmukh, Y.G. Yingling

**9:20 CELL 188.** Organization of domains in CESA proteins of the plant cellulose synthesis complex. H.M. O'Neill, V. Vandavasi, J. Du, Q. Zhang, A. Singh, B. Nixon, Y.G. Yingling, L. Petridis, P. Langan, C.H. Haigler

**9:45** Intermission.

**10:00 CELL 189.** Progress toward structural understanding of cellulose synthesis by plants. B. Nixon, M. Kumar, J. Du, S. Cho, V. Vandavasi, H.M. O'Neill, P. Purushotham, J. Zimmer

**10:25 CELL 190.** Cellulose structure and biosynthesis in oomycetes: Similarities and differences with higher plants. V. Bulone

**10:50 CELL 191.** Protein structural controls of plant cellulose synthesis. C.H. Haigler

**11:15 CELL 192.** Structure of the catalytic domain of a plant Cesa. P.S. Rushton, C. Rayon, A.T. Olek, L. Makowski, H. Kim, J. Badger, D. Kihara, C. Steussy, C.V. Stauffacher, N. Carpita

### Section D

Moscone Center  
272

### Nanocellulose Processing & Analysis Properties

*Cosponsored by AGFD, ANYL, CHAS and I&EC*

*Financially supported by TAPPI*

M. Bortner, W. Y. Hamad, T. Lindström, *Organizers*

M. Roman, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 193.** Solid-State and structural characterization of cellulose nanocrystals. W.Y. Hamad

**8:30 CELL 194.** Comparing crystallinities of CNCs by Raman, NMR, and XRD. U.P. Agarwal, T. Larsson, J. Stevanic Srdovi

**8:55 CELL 195.** Analysis of modified cellulose nanocrystals. W. Thielemans

**9:20 CELL 196.** Characterization of nanocelluloses using small-angle neutron, x-ray and dynamic light scattering techniques. Y. Mao, K. Liu, C. Zhan, L. Geng, B.T. Chu, B.S. Hsiao

**9:45** Intermission.

**10:00 CELL 197.** Occupational health and safety characterization and assessment of CNC's from North American producers. B. O'Connor

**10:25 CELL 198.** European perspective on Environmental, Health and Safety (EHS) aspects on Cellulose Nanofibrils (CNF). H. Kangas, M. Pitkänen, J. Catalan, H. Norppa

**10:50 CELL 199.** TEMPO-Oxidized Cellulose Nanofiber (TOCN) materials show good biomedical applications. N. Ruizhi, L. Yi, S. Yamasaki, J. Lin, T. Saito, A. Isogai

**11:15 CELL 200.** Different size-unified cellulose nanocrystals obtained via a multistage separation. Y. Hu, N. Abidi

**11:40** Concluding Remarks.

### Section E

Moscone Center  
274

### Functional Lignocellulosics & Nanotechnology

### Tuning Interfacial Phenomena with Ligno-Nanocellulosic Materials

*Cosponsored by CARB and COLL*

*Financially supported by EPNOE*

M. K. Ek, E. Filpponen, T. Nypelo, S. Peresin, S. Spirk, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 201.** Nanocellulose- Silver hybrid structuration for stable suspension and transparent conductive material design. J. Bras, F. Hoeng, A. Denneulin

**8:30 CELL 202.** Control of the surface properties of cellulose nanocrystals by acylation with functional vinyl esters: Application to the design of innovative fillers or Pickering surfactants. G. Sebe, J. Brand, B. Dhueige, A. Werner, V. Héroguez

**8:55 CELL 203.** Click-Thiols as an approach to implement novel functionalities within bio-derived scaffolds. S. Kostic, J.K. Berg, K. Casdorff, V. Merk, I. Burgert, E. Cabane

**9:20** CELL **288**. Parametric analysis and mechanism of dispersion of single-walled and multi-walled carbon nanotubes by cellulose nanocrystals. J. Mougel, B. Patricia, I. Capron, B. Cathala, O. Chauvet

**9:45** Intermission.

**10:00** CELL **289**. Exclusive surface modification of cellulose nanopapers by adsorption of polymers from non-aqueous solvents. K.S. Kontturi, K. Biegaj, A. Mautner, R.T. Woodward, B.P. Wilson, K. Lee, J. Heng, A. Bismarck, E. Kontturi

**10:25** CELL **290**. New insights on the effects of chemical structure on the properties of cellulose nanofibrils: Characterization, mechanical performance and barrier properties. V. Lopez Duran, P.A. Larsson, L. Wågberg

**10:50** CELL **291**. Tannic acid – A transformative additive when combined with cellulose nanocrystals: From hydrophobic nanoparticles to dried oil powders. E.D. Cranston, Z. Hu, R.H. Pelton

**11:15** CELL **292**. Cellulose nanoparticles stabilized in a hydrophobic polymer matrix through synthetic functionalization. B. Teipel, R. Vano, M. Kirby, B. Zahner, E. Teipel, N. Nagabandi, K. Holder, M. Akbulut

## Section F

Moscone Center  
276

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

Cosponsored by AGFD

M. L. Auad, J. Campos-Teran, *Organizers*

O. J. Rojas, *Organizer, Presiding*

G. Toriz Gonzalez, *Presiding*

**8:00** Introductory Remarks.

**8:05** CELL **293**. Dissolution and processing of lignocellulose using an ionic liquid solvent: Towards the production of high performance materials. M. Hummel, S. Helsten, S. Asaadi, Y. Ma, E. Walger, S. Haslinger, H. Sixta

**8:30** CELL **294**. Enzymatically produced lignosulfonate based paper coatings for substitution of petroleum based additives. A. Ortner, K. Hofer, S. Kopacic, G. Nyanhongo, W. Bauer, G.M. Guebitz

**8:55** CELL **295**. Surface wrinkling phenomena in spherical lignin nano- and micro-particles obtained by aerosol flow synthesis. T. Kämäräinen, M. Ago, B. Tardy, J. Seitsonen, O.J. Rojas

**9:20** CELL **296**. Wood waste: Resource of biopolymers and high value materials. L. Couret, B. Cathala, E. Bonnin, C. Belloncle, M. Irlé

**9:45** Intermission.

**10:00** CELL **297**. Valorization of lignin and cellulose in acid-steam-exploded corn stover by a moderate alkaline ethanol post-treatment based on an integrated biorefinery concept. S. Yang, T. Yuan, R. Sun

**10:25** CELL **298**. Functional materials from spruce hemicelluloses: Crosslinkable xylans and glucoman-nans. G. Toriz Gonzalez, A. Escalante, P. Gatenholm, K. Markstedt

**10:50** CELL **299**. Withdrawn.

## LPS: Chemistry, Synthesis & Applications

Sponsored by CARB, Cosponsored by CELL

### Carbohydrate-Based Hybrid Materials for Nanomedicine

Sponsored by CARB, Cosponsored by CELL

### Biomass & Biofuel Processing

Sponsored by ENFL, Cosponsored by CELL, MPPG† and WCC

## TUESDAY AFTERNOON

### Section A

Moscone Center  
252/260

### Design & Control in Polysaccharide Chemistry: Anselme Payen Award Symposium in honor of Kevin J. Edgar

#### Novel Derivatives for Demanding Applications

Cosponsored by CARB

Financially supported by EPNÖE, Eastman Chemical Company, VT Fralin Life Science Institute, VT College of Natural Resources and Environment, VT Department of Sustainable Biomaterials, Carbohydrate Polymers (Elsevier)

P. E. Fardim, O. J. Rojas, *Organizers*

C. M. Buchanan, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **300**. Olefin cross-metathesis: Mild, efficient and modular pathway to a new world of polysaccharide derivatives for drug delivery applications. Y. Dong, L.I. Mosquera-Giraldo, L. Taylor, K.J. Edgar

**1:30** CELL **301**. Overview of TEMPO-mediated oxidation of polysaccharides. A. Isogai

**1:55** CELL **302**. Synthesis, properties, and applications of cellulosic diblock copolymers. H. Kamitakahara

**2:20** CELL **303**. Self-healing materials from cellulose. G. Wenz, D. Hafner

**2:45** Intermission.

**3:00** CELL **304**. Oxidative enzymes – route to functional polysaccharides. M. Tenkanen, A. Ghafar, I. Nikkilä, K. Parikka, K. Mikkonen

**3:25** CELL **305**. Functionalized and sequence-defined polysaccharides by glycosynthase-catalyzed polymerization. A. Planas

**3:50** CELL **306**. Design and control in polysaccharide chemistry. K.J. Edgar

### Section B

Moscone Center  
262

### Processing & Properties of Biobased Composites & Blends

Financially supported by EPNÖE

P. R. Navard, *Organizer*

J. R. Barone, *Organizer, Presiding*

J. Bras, *Presiding*

**1:05** CELL **307**. Comparison of biobased multiphase systems based on different thermoplastic polysaccharides (starch, chitosan and alginate) obtained by thermomechanical mixing. L. Averous, E. Pollet

**1:30** CELL **308**. Melt processing of functional protein/polymer blends. J.K. Pokorski, P. Lee

**1:55** CELL **309**. Compression molded composites from waste polyester and cotton textiles. H. Xu, M. Palakurthi, L. Xu, Y. Yang

**2:20** CELL **310**. Crucial role of processing regimes and compatibilization for toughening highly lignin filled polyethylene blends. J. Ganster, J. Erdmann

**2:45** Intermission.

**3:00** CELL **311**. Morphological and structural investigation of cellulose I and II nanocrystals. W. Flauzino Neto, J. Putaux, M. Mariano, Y. Ogawa, H. Otaguro, D. Pasquini, A. Dufresne

**3:25** CELL **312**. Thin ply bacterial cellulose-reinforced polylactide nanocomposites. M. Hervy, F. Bock, K. Lee

### Section C

Moscone Center  
270

### Advances in Polysaccharides: Practice & Applications

#### New Developments in the Industrial Sector

Cosponsored by AGFD, CARB, MPPG†, PMSE and POLY

A. Biswas, H. Cheng, *Organizers*

H. Cheng, *Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **313**. New family of cellulosic excipients for poorly-soluble actives. R.L. Sammler, T. Chatterjee, W. Porter, K. O'Donnell

**1:30** CELL **314**. New understanding of syneresis in cellulose ether hydrogels. C.E. Mohler, R.L. Sammler, T. Sanders Jr, B. Huebner-Keese, J.D. Moore, T. Boomgaard

**1:55** CELL **315**. Development of extrudable derivatives of Hypromellose Acetate Succinate (HPMC-AS) polymer excipient for use in drug solubilization enhancement. T.A. Bruigel, F.J. Kolpak, S.K. Sahoo, Q. Schwing, D. Tewari

**2:20** CELL **316**. Bacterially derived medical devices: How commercialization of cellulose requires redefining standard industrial practice. W. Czaja, D. Inselman, E. Shwarz

**2:45** Intermission.

**3:00** CELL **317**. Development of cellulose-based bioplastic featuring high optical characteristics of traditional Japanese lacquerware: Urushi black bioplastic. K. Toyama, M. Iji, Y. Shimode, H. Hamada

**3:25** CELL **318**. New approaches to measure domain sizes in multi-component cellulosic derivatives using NMR. S. Schantz, J. Schlagnitweit, M. Tang, M. Baias, A.J. Rossini, S. Richardson, L. Emsley

### Section D

Moscone Center  
272

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Cosponsored by AGFD, ANYL and POLY

Financially supported by HORIBA Instruments Incorporated; University of Tokyo, Japan; Invention AB; U.S. Forest Service

U. P. Agarwal, A. Isogai, T. Larsson, *Organizers*

T. J. Elder, *Organizer, Presiding*

W. T. Winter, *Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **319**. Monitoring structural changes during fibrillation of cellulose pulp into cellulose nanofibrils. J. Mao, B. Heck, H. Abushamma, G. Reiter, M.G. Laborie

**1:30** CELL **320**. Use of *in vitro* biosynthetic systems to understand cellulose formation and properties. V. Bulone

**1:55** CELL **321**. Structure-property relationships of nanocellulose fibrils. G. Nyström

**2:20** CELL **322**. Withdrawn.

**2:45** Intermission.

**3:00** CELL **323**. Changes in the supra-molecular structure of cellulose I during TEMPO-oxidation. Bringing together NMR, MD, and XRD results. T. Larsson, J. Wohlerl, M. Bergenstråhle

**3:25** CELL **324**. Mechanical performance of CNF films revealed by Raman spectroscopy. S.J. Eichhorn, T. Tammelin, N. Wanasekara, A. Lewandowska, V. Kunnari, T. Kalijunen

### Section E

Moscone Center  
274

### Functional Lignocellulosics & Nanotechnology

#### Dispersions, Gels, Foams, Colloids & Films

Cosponsored by CARB and COLL

Financially supported by EPNÖE

M. K. Ek, E. Filpponen, S. Peresin, S. Spirk, *Organizers*

T. Nypelo, *Organizer, Presiding*

A. King, *Presiding*

**1:05** CELL **325**. Structural evaluation of cellulose-coated oil-in-water emulsions formed from solution. Y. Cohen, S. Napso, G. Alfassi, H. Miyamoto, D. Rein, R. Khalifin

**1:30** CELL **326**. Organisation of cellulose ester monolayers on solid substrates upon Langmuir-Schaefer deposition. E. Niinivaara, B.P. Wilson, A. King, E. Kontturi

**1:55** CELL **327**. Photo-induced thiol-ene functionalization towards superhydrophobic and slippery lubricant-infused nanocellulose films. J. Guo, W. Fang, A. Welle, W. Feng, E. Filpponen, O.J. Rojas, P. Levkin

**2:20** CELL **328**. Effect of cellulose nanocrystal chirality on the stereochemistry of surface-tethered polymers. J.O. Zoppe, A.V. Dupire, H.A. Klok

**2:45** Intermission.

**3:00 CELL 329.** Tailoring the surface wettability of cellulose paper/nanopaper via photo-induced click reactions. **J. Guo, L. Johansson, E. Filpponen, P. Levkin, O.J. Rojas**

**3:25 CELL 330.** Nanocellulose as rheology modifier of drilling fluids – Thermostability of nanocellulose dispersions. **K. Syverud, E. Heggset, G. Chinga-Carrasco**

### Section F

Moscone Center  
276

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

Cosponsored by AGFD

M. L. Auad, J. Campos-Teran, *Organizers*

O. J. Rojas, *Organizer, Presiding*

C. G. Hunt, *Presiding*

**1:00** Introductory Remarks.

**1:05 CELL 331.** Potential use of pulp and paper industry side streams in composites. **L. Wikström, J. Keränen**

**1:30 CELL 332.** Experimental test of limited oxidant diffusion mechanism of decay resistance in acetylated wood. **C.G. Hunt, S. Lacher, K. Hirth, L. Lorenz, E. Engelund Thybring, S.L. Zelinka**

**1:55 CELL 333.** Biocatalytic films based on lignin, cationic polymers and immobilized lipase layers. **M.H. Sipponen, T. Leskinen, J. Valle-Delgado, M.K. Österberg**

**2:20 CELL 334.** Identification of accumulated carbohydrate degradation products during the processing of cellulose using an ionic liquid solvent: Towards solvent recycling. **E. Walger, S. Hellsten, J. Witos, S. Wiedmer, M. Hummel, H. Sixta**

**2:45** Intermission.

**3:00 CELL 335.** Industrial biorefinery of lignocellulose for production of biomaterials in China. **R. Sun**

**3:25 CELL 336.** Wood component separation by dilute acid prehydrolysis with *p*-cresol. **H. Tomoyuki, H. Nonaka**

### LPS: Chemistry, Synthesis & Applications

Sponsored by CARB, Cosponsored by CELL

### Biomass & Biofuel Processing

Sponsored by ENFL, Cosponsored by CELL, MPPG $\ddagger$  and WCC

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## WEDNESDAY MORNING

### Section A

Moscone Center  
252/260

### Bio-based Gels & Porous Materials

#### Biopolymer Hydrogels

Cosponsored by AGFD, CARB, COLL, PMSE and POLY

Financially supported by EPNOE

T. Budtova, F. Liebner, *Organizers*

N. Abidi, R. Sun, *Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 337.** Insight into mild condition dissolution of high molecular weight cellulose in ionic liquid based solvent system. **S. Acharya, Y. Hu, N. Abidi**

**8:30 CELL 338.** Soft gelation of cellulose/DMAc/LiCl solution. **R. Liu, C. Zhang, J. Xiang, H. Kang, Y. Huang**

**8:55 CELL 339.** Cellulose gels and cryogels via physical and chemical cross-linking. **D. Ciolacu, C. Rudaz, M. Vasilescu, T. Budtova**

**9:20 CELL 340.** New cellulosic sponge and foam made from cellulose fibers through a simple freezing/thawing method. **A. Tejado, A. Aramburu, Y. de Miguel**

**9:45** Intermission.

**10:00 CELL 341.** Rheological behavior of thermosensitive hydrogel suspensions based on Cellulose Nanocrystals with adsorbed thermo-responsive polymer. **E. Gicquel, B. Jean, J. Engström, C. Martin, A.E. Carlmark, J. Bras**

**10:25 CELL 342.** Nanocellulose based electrospun membranes for water purification: Tailoring of porosity and functionality. **A. Mathew**

**10:50 CELL 343.** Robust, dynamic hydrogels with modified cellulose nanocrystals as crosslinkers. **K. Zhang**

**11:15 CELL 344.** Lignin-based hydrogels with super-swelling capacities. **J. Dominguez-Robles, A. Jaaskelainen, A. Rodríguez, T. Tamminen, T. Litiä, E. Larrañeta, M.S. Peresin**

### Section B

Moscone Center  
262

### Processing & Properties of Biobased Composites & Blends

Financially supported by EPNOE

J. R. Barone, P. R. Navard, *Organizers, Presiding*

**8:05 CELL 345.** Potential of cellulosic nanocomposites materials from cassava pulp. **K. Kasemwong, K. Piyachomkwan**

**8:30 CELL 346.** Various shapes of chitosan based nanocomposites and their hemostatic ability. **Y. Bao, S. Wu, X. Shi, H. Deng, Y. Du**

**8:55 CELL 347.** Degradation kinetics of compression-molded date pits composites. **A. Mohamed, S. Hussain, M. Alamri**

**9:20 CELL 348.** Fiber, a wonderful from plantain crop residues. Alternative for human sustainable development. **O.E. Suarez Moreno, M. Correa Velez**

**9:45** Intermission.

**10:00 CELL 349.** Cotton-based cellulose nanomaterials for applications in composites and electronics. **N. Farahbakhsh, R.A. Venditti, J. Jur**

**10:25 CELL 350.** Interfacial thickness for tailoring the reinforcing properties of nanocellulose in polymer matrix. **H. Soeta, T. Saito, A. Isogai**

**10:50 CELL 351.** Transparent, macro to nano moldable composites reinforced by cellulose nanofibers. **S.K. Biswas, H. Yano**

**11:15 CELL 352.** Functional cellulose nanocrystal reinforcing fillers in polymer nanocomposite films. **J.A. Sirviö, M. Visanko, J.P. Heiskanen, H. Liimatainen**

### Section C

Moscone Center  
270

### Advances in Polysaccharides: Practice & Applications

#### Novel Biocatalytic & Biopolymeric Approaches

Cosponsored by AGFD, CARB, MPPG $\ddagger$ , PMSE and POLY

A. Biswas, H. Cheng, *Organizers*

G. W. Selling, *Presiding*

**8:05 CELL 353.** Chemo-enzymatic synthesis and functional properties of well-defined human milk oligosaccharides. **G. Boons**

**8:30 CELL 354.** Chemo-enzymatic synthesis of homogeneous hyaluronan polysaccharides and their biological applications. **J. Fang, P.G. Wang**

**8:55 CELL 355.** Chemoenzymatic synthesis of carbohydrates and glycoconjugates. **X. Chen**

**9:20 CELL 356.** Structure and property of new dextrans obtained by enzymatic synthesis. **P. Faucard, F. Grimaud, A. Roland-Sabaté, M. Remaud-Siméon, G. Potocki-Véronèse, D. Lourdin**

**9:45** Intermission.

**10:00 CELL 357.** Enzymatic production of oligosaccharides and polysaccharides for food ingredient applications. **R. DiCosimo**

**10:25 CELL 358.** Synthesis of well-defined unnatural polysaccharides by phosphorylase-catalyzed enzymatic polymerization. **J. Kadokawa**

**10:50 CELL 359.** Combined enzymatic-ionic liquid treatments to increase the accessibility and reactivity of pulp fibers. **R. Wahlström, J. Rahikainen, K. Kruus, A. Suurnäkki**

**11:15 CELL 360.** Dendrimer-like biopolymers: A new arena for biomaterial development. **Y. Yao**

### Section D

Moscone Center  
272

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Cosponsored by AGFD, ANYL and POLY

Financially supported by HORIBA Instruments Incorporated; University of Tokyo, Japan; U.S. Forest Service

T. J. Elder, A. Isogai, T. Larsson, *Organizers*

U. P. Agarwal, *Organizer, Presiding*

O. J. Rojas, *Presiding*

**8:00** Introductory Remarks.

**8:05 CELL 361.** Cellulose crystallinity: What does it mean? **M.F. Crowley, M. Himmel, L. Bu, Y. Zhang, L. Makowski**

**8:30 CELL 362.** Visualization of dynamic changing in formation of cell wall cellulose and callose along with arrangements of microtubules with GFP on surfaces of protoplast cells. **T. Kondo, S. Tagawa**

**8:55 CELL 363.** Explicit modeling and underdetermined (scattering) data to approach a complex reality. **Y. Nishiyama**

**9:20 CELL 364.** Folding of xylan onto cellulose fibrils in plant cell walls revealed by solid-state NMR. **T.J. Simmons, J. Mortimer, O.D. Bernardinelli, A. Poppler, S.P. Brown, E. Azevedo, R. Dupree, P. Dupree**

**9:45** Intermission.

**10:00 CELL 365.** Cellulose II formation by cellulose synthase: Negative data can make themselves positive? **T. Imai, J. Sugiyama**

**10:25 CELL 366.** Towards an improved understanding of cellulose swelling, dissolution and regeneration at the molecular level. **T. Rosenau, A. Potthast**

**10:50 CELL 367.** Evolution of our understanding of native celluloses. **R.H. Atalla**

### Section E

Moscone Center  
274

### Functional Lignocelluloses & Nanotechnology

#### Dispersions, Gels, Foams, Colloids & Films

Cosponsored by CARB and COLL

Financially supported by EPNOE

M. K. Ek, E. Filpponen, T. Nypelo, S. Spirk, *Organizers*

S. Peresin, *Organize, Presiding*

T. J. Elder, *Presiding*

**8:05 CELL 368.** Hydrolysis assisted by hydrogen chloride vapor on different cellulose polymorphs. **E. Kontturi, E. Niinivaara, S.A. Arshath, A. Bismarck**

**8:30 CELL 369.** Crosslinking as a facilitator for novel (nano)cellulose-based applications. **P.A. Larsson, J. Erlandsson, V. Lopez Duran, J. Henschen, N. Tchangan Cervin, Z. Al-Ansari, A.J. Svagan, L. Wagberg**

**8:55 CELL 370.** Withdrawn.

**9:20 CELL 371.** Oriented all-cellulose film based on ramie fiber with high mechanical property and transparency. **X. Yang, L. Berglund**

**9:45** Intermission.

**10:00 CELL 372.** Sample geometry dependency on the measured tensile properties of cellulose nanopapers. **M. Hervy, A. Santmarti, P. Lahtinen, T. Tammelin, K. Lee**

**10:25 CELL 373.** Enzymatic and chemical modification of nanosized colloidal lignin particles. **J. Valle-Delgado, T. Leskinen, A. Paananen, M.K. Österberg, M. Mattinen**

**10:50 CELL 374.** Partial dissolution as a reinforcing chemistry for CNF films. **H. Örelma, A. Korpela, V. Kunnari, A. Harlin, T. Tammelin, A. Suurnäkki**

**11:15 CELL 375.** Water-resistant nanocellulose films with inter-fibrillar interactions via multivalent metal ions. **M. Shimizu, T. Saito, A. Isogai**

‡Cooperative Cosponsorship

## Section F

Moscone Center  
276

### Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems

Cosponsored by AGFD

J. Campos-Teran, O. J. Rojas, *Organizers*

M. L. Auad, *Organizer, Presiding*

J. Lopez-Sanchez, *Presiding*

**8:00** Introductory Remarks.

**8:05** CELL **376**. Wood-derived hemi-celluloses as green binders in wood adhesives. L. Fogelström, E. Norström, J. Holmqvist, S. Pendergraph, J. Brücher, E.E. Malmstrom

**8:30** CELL **377**. Novel thermoset polymeric networks from fast pyrolysis bio-oil. M.L. Auad, M. Barde, B. Sibaja

**8:55** CELL **378**. Development of clay-like extrudable wood fiber material. K. Kawamura, K. Takayanagi, H. Nonaka

**9:20** CELL **379**. Synthesis and characterization of bio-oil-based self-curing epoxy resin. Y. Celikbag, S. Meadows, M. Barde, S. Adhikari, G. Buschle-Diller, M. Auad, B. Via

**9:45** Intermission.

**10:00** CELL **380**. Valorization of starchy, cellulosic, and sugary food waste into value-added chemicals. I. Yu, D. Tsang

**10:25** CELL **381**. Microcellular foaming of arabinoxylan with  $\text{scCO}_2$ . L. Hardelein, A. Ström, A. Larsson

**10:50** CELL **382**. Transforming biomass to chemicals and fuels with light and catalysis. J. Lopez-Sanchez

**11:15** CELL **383**. Agricultural and industrial residues: Cellulose fiber and its nanocrystals. D. Rosa, J. Nunes de Macedo, A. Souza

### Carbohydrate-Based Nanomaterials & Drug-Delivery Vehicles

Sponsored by CARB, Cosponsored by CELL

### Biomass & Biofuel Processing

Sponsored by ENFL, Cosponsored by CELL, MPPG‡ and WCC

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
252/260

### Bio-based Gels & Porous Materials

#### Biopolymer Organogels

Cosponsored by AGFD, CARB, COLL, PMSE and POLY

Financially supported by EPNOE

T. Budtova, *Organizer*

F. Liebner, *Organizer, Presiding*

H. Mansur, *Presiding*

**1:05** CELL **384**. Withdrawn.

**1:30** CELL **385**. Multifunctional hydrogel dressing material for treatment of chronic wound. I.S. Stefanov, S. Pérez-Rafael, T. Tzanov

**1:55** CELL **386**. Hierarchically porous nanocellulose materials for cartilage applications. N. Naseri, A. Mathew

**2:20** CELL **387**. Cellulose-based hydrogels with encapsulative cyclooligosaccharides to enhance the efficient release of hardly soluble drugs. D. Jeong, S. Joo, S. Jung

**2:45** Intermission.

**3:00** CELL **388**. Biomass-derived highly stretchable and elastic hydrogels with effective antimicrobial activity. Y. Si, Z. Zheng, G. Sun

**3:25** CELL **389**. Preparation of cellulose and chitin-CdTe quantum dots films and antibacterial effect on *Staphylococcus aureus* and *Pseudomonas aeruginosa*. P. Wansapura, N. Abidi, R. Dassanayake, A. Hamood, P. Tran

**3:50** CELL **390**. Cellulose aerogels via self-assembling and electrospinning. F. Jiang, Y. Hsieh

**4:15** CELL **391**. Nanocellulose composite hydrogels – Tailoring of mechanical properties of tissue scaffolds. E. Heggset, K. Syverud

### Section B

Moscone Center  
262

### Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry

#### Advanced Materials & Structures

Cosponsored by MPPG‡ and POLY

L. A. Lucia, *Organizer*

A. Ayoub, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **392**. Reactive extrusion of zein with glyoxal and polyethylene maleic anhydride. G.W. Selling, K. Utt

**1:30** CELL **393**. Melt-processing of cellulose pulp and polycaprolactone composites: Wet feeding approach to improve the filler dispersion. G. L. Re, S. Spinella, F. Vilaseca, L. Berglund

**1:55** CELL **394**. Reactive extrusion compatibilization of cellulose acetate/water soluble polymer blends. R. Quintana Vicente, O. Pensenarie, Y. Lemmouchi, L. Bonnaud, P. Dubois

**2:20** CELL **395**. Reactive compatibilizers in the creation of wood fiber plastic composites. J. Pawlak, Y. Wang

**2:45** Intermission.

**3:00** CELL **396**. Liquid assisted extrusion process of cellulose nanocomposites. K.A. Oksman, N. Herrera, A. Singh

**3:25** CELL **397**. New insights in melt processing of cellulose nanomaterial based nanocomposites. A. Dufresne

**3:50** CELL **398**. Extrusion technology for nanocomposite containing renewable lignocellulosic materials. R.A. Venditti

**4:15** CELL **399**. Processing of (nano) biocomposite foams by continuous supercritical  $\text{CO}_2$  assisted extrusion. N. Le Moigne, M. Sauceau, M. Chauvet, M. Benyakhlef, E. Rodier, J. Pages

**4:40** Concluding Remarks.

### Section C

Moscone Center  
270

### Advances in Polysaccharides: Practice & Applications

### Novel Materials & Methodologies

Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

A. Biswas, H. Cheng, *Organizers*

W. J. Orts, *Presiding*

**1:05** CELL **400**. Polysaccharide-surfactant association – basics and applications. B. Lindman, T. Nylander, M. Miguel, F. Antunes, F. Cuomo

**1:30** CELL **401**. Creating cost-effective agriculturally-derived nanocomposites for commodity applications. W.J. Orts, G.H. Tonoli, G.M. Glenn, K.M. Holtman, L.F. Torres, D.F. Wood

**1:55** CELL **402**. Functional cel-lulosic arabinoxylan fiber from agricultural biomass. M.P. Yadav, R. Moreau, K.B. Hicks, M. Kale

**2:20** CELL **403**. Strategies toward cellulose nanofibers, porous fibers and hybrids. Y. Hsieh

**2:45** Intermission.

**3:00** CELL **404**. UV-absorbing materials based on natural molecular sunscreens and chitosan. S.C. Fernandes, V. Bulone

**3:25** CELL **405**. Higher value films prepared from poly(vinyl alcohol) and amylose-fatty acid derivatives inclusion complexes. G.W. Selling, G. Fanta, F.C. Felker, W.T. Hay

**3:50** CELL **406**. Bio-based sources for *p*-xy-lene. P.B. Smith, D.R. Henton, A. Dumitrascu, D.A. Hucul, M. Masuno, R. Smith, J. Bissell

**4:15** CELL **407**. Chemical platform for the production of Bio-PET. R. Smith

### Section D

Moscone Center  
272

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Cosponsored by AGFD, ANYL and POLY

Financially supported by HORIBA Instruments Incorporated; University of Tokyo, Japan; Innventia AB; U.S. Forest Service

U. P. Agarwal, T. J. Elder, A. Isogai, T. Larsson, *Organizers*

M. G. Laborie, N. Robitaille Brown, *Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **408**. Single-sourced nanocelluloses: Process-linked characteristics and behaviors. Y. Hsieh

**1:30** CELL **409**. Interactions between cellulose and random and block copolymers: Antifouling and friction. M. Vuoriluoto, H. Orelma, L. Johansson, O.J. Rojas

**1:55** CELL **410**. Conformational energy distribution for crystals of cellobiose and analogs. A.D. French

**2:20** CELL **411**. Three-dimensional alignment of lamella single crystals of cellulose II using magnetic field. M. Wada, S. Wakiya, K. Kobayashi, S. Kimura, M. Kitaoka, R. Kusumi, F. Kimura, T. Kimura

**2:45** Intermission.

**3:00** CELL **412**. New model for untangling cellulose ultrastructure. U.P. Agarwal

**3:25** CELL **413**. Dynamic FTIR as a tool to assess the interaction of lignin in wood pulps. L. Salmén

**3:50** CELL **414**. Modeling the meso-scale architecture of lignocellulose to elucidate its impact on transport phenomena and biomass conversion processes. P.N. Ciesielski, M.F. Crowley, B.S. Donohoe, M. Himmel

**4:15** CELL **415**. Chemical microscopy of polysaccharide surfaces using TOF-SIMS. P.E. Fardim

### Section E

Moscone Center  
274

### Functional Lignocellulosics & Nanotechnology

#### Responsive Materials & Biosensors

Cosponsored by CARB and COLL

Financially supported by EPNOE

M. K. Ek, T. Nypelo, M. S. Peresin, *Organizers*

E. Filpponen, S. Spirk, *Organizers, Presiding*

**1:05** CELL **416**. Investigation of the thermodynamics of the interaction of (modified) cellulose nanocrystals with natural polymers. W. Thielemans

**1:30** CELL **417**. Cellulose-inorganic hybrid structures as promising thermoelectric materials. T. Tammelin, M. Gestranis, M. Putkonen, B.P. Wilson, M. Karpinen, E. Kontturi

**1:55** CELL **418**. Nanocellulose mediated layer-by-layer chip modification for cellular *in-vitro* diagnostics. T. Pettersson, H. Ramachandraiah, A. Russom

**2:20** CELL **419**. Multi-layered polysaccharide based nanofilms for the treatment of chronic venous ulceration. J. Stana, J. Stergar, L. Gradišnik, R. Kargl, V. Flis, T. Mohan, K. Stana Kleinschek, U. Maver

**2:45** Intermission.

**3:00** CELL **420**. Graft modification of cellulose nanocrystals with carbon dioxide responsive polymers via living radical polymerization. O. Garcia-Valdez, J. Arredondo, P.G. Jessop, P. Champagne, J. Bouchard, M.F. Cunningham

**3:25** CELL **421**. Quantitative modeling of water transport in ultrathin cellulose nanofibril films. M. Hakalahti, E. Kontturi, T. Tammelin

**3:50** CELL **422**. Impact of water vapor adsorption on physically treated cellulose thin films. D. Reishofer, R. Resel, G. Drexler, W. Fischer, T. Tammelin, E. Kontturi, S. Spirk

**4:15** CELL **423**. Elaboration of cellulose nanocrystals CNC/Ge-imogolites multilayered thin films. C. Mauroy, C. Levard, C. Moreau, B. Cathala, J. Rose

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**Section F**

Moscone Center  
276

**Valorization of Renewable Resources & Residuals into New Materials & Multiphase Systems**

Cosponsored by AGFD

M. L. Auad, O. J. Rojas, *Organizers*

J. Campos-Teran, *Organizer, Presiding*

G. Toriz Gonzalez, *Presiding*

**1:00** Introductory Remarks.

**1:05** CELL **424**. Alkylation of unsaturated fatty compounds.

**1:30** CELL **425**. Valorization of industrial biomass ash in structural materials. **H. Uvegi**, P. Chaunsali, R. Osmundsen, J. Ochsendorf, E. Olivetti

**1:55** CELL **426**. Adsorption and viscoelastic studies of gold Nanoparticles (NP) and Bovine Serum Albumin (BSA) complexes at chitosan-alginate-cellulose films. **D. Gómez-Maldonado**, R. López-Simeon, A. Topete, **J. Campos-Teran**

**2:20** CELL **427**. Sustainable hybrid bio-composites for automotive applications. **A. Rodríguez Uribe**, S. Vivekanandhan, M. Misra, A. Mohanty

**2:45** Intermission.

**3:00** CELL **428**. Reactive film-forming maleimido dextrans for cysteine-containing surfaces adsorbing BSA. **T. Elschner**, F. Obst, T.J. Heinze, **R. Kargl**, K. Stana Kleinschek

**3:25** CELL **429**. Morphological and thermo-chemical changes upon autohydrolysis and microemulsion treatments of coir and EFB residual biomass to isolate lignin-rich Micro and Nano Fibrillar Cellulose (MNFC). **A. Tripathi**, A. Ferrer, S.A. Khan, O.J. Rojas

**3:50** CELL **430**. Effect of cellulose nanofibril morphology on the strength and stiffness of macroscopic filaments. **N. Mittal**, T. Kaldeus, F. Lundell, D. Soderberg

**4:15** CELL **431**. Role of lignin on functional and physicochemical properties of enzymatic modified soy protein film. **E. Zadeh**, Y. Kim

**Section G**

Moscone Center  
130

**Frontiers in Glycoanalytics****MS & NMR Methods**

Cosponsored by ANYL, CARB<sup>‡</sup> and MPPG<sup>‡</sup>

Financially supported by Agilent Technologies; Bruker BioSpin Corporation; Postnova Analytics, Incorporated; Rigaku Corporation; Waters Corporation; Wyatt Technology Corporation

G. Boons, M. Roman, *Organizers, Presiding*

**1:10** Introductory Remarks.

**1:15** CELL **432**. MS techniques in structure analysis of complex glycans. **F. Viaplana**, A. Martínez-Abad, A. Ruthes

**1:55** CELL **433**. Advancing glycopeptide characterization using high sensitivity HILIC-MS methods. **W. Alley**, Y. Yu, M. Lauber

**2:20** CELL **434**. Infrared spectroscopy integrated to mass spectrometry: An innovative platform for *de novo* carbohydrate sequencing. **I. Compagnon**

**2:45** Intermission.

<sup>‡</sup> Cooperative Cosponsorship

**3:00** CELL **435**. Examining glycan structure and dynamics with NMR: A tutorial. **J.H. Prestegard**

**3:40** CELL **436**. Asparagine-linked glycosylation of immunoglobulin G and the Fc gamma receptors impacts immune system activation. **A.W. Barb**

**4:05** CELL **437**. NMR Analysis of substituent distribution in polysaccharide derivatives. **S. Liu**, K.J. Edgar

**4:30** CELL **438**. Solid-state NMR methods to determine glycan structure, intermolecular interactions and protein binding in plant cell walls. **T. Wang**, P. Phyo, Y. Chen, D. Cosgrove, M. Hong

**Carbohydrate-Based Nanomaterials & Drug-Delivery Vehicles**

Sponsored by CARB, Cosponsored by CELL

**Biomass & Biofuel Processing**

Sponsored by ENFL, Cosponsored by CELL, MPPG<sup>‡</sup> and WCC

**THURSDAY MORNING****Section A**

Moscone Center  
252/260

**Bio-based Gels & Porous Materials****Aero-, Cryo- & Xerogels**

Cosponsored by AGFD, CARB, COLL, PMSE and POLY

Financially supported by EPNOE

F. Liebner, *Organizer*

T. Budtova, *Organizer, Presiding*

C. Freire, *Presiding*

**8:05** CELL **439**. Cellulose nanofiber - towards tailored release of small molecules. **A. Svagan**, L. Wagberg, J. Wohler, A. Mullertz, D. Bar shalom, K. Löbmann

**8:30** CELL **440**. Nanocellulose aerogels with thermal superinsulating properties obtained by spray freeze-drying. **C. Jiménez-Saeices**, B. Saentier, **B. Cathala**, Y. Grohens

**8:55** CELL **441**. Anisotropic cellulose ester aerogels with tunable mechanical properties via controlled solvent exchange. **A. Tripathi**, S.A. Khan, O.J. Rojas

**9:20** CELL **442**. 2,3-Dicarboxyl nano cellulose: A novel source material for transparent, birefringent and thermally superinsulating aerogels. **S. Plappert**, J. Nedelec, **F. Liebner**

**9:45** Intermission.

**10:00** CELL **443**. Functional aerogels based on nanocellulose and platinum nanoparticles/graphene oxide for catalytic applications. **R. Pinto**, A.A. Silvestre, M. Simões, P. Marques, **C. Freire**

**10:25** CELL **444**. Fabrication of functionalized aerogels from cellulose and whole biomass for absorbing formaldehyde from indoor air. **Y. Liao**, X. Pan

**10:50** CELL **445**. Superhydrophobic nanocellulose-silica composite aerogels for efficient water-in-oil emulsions separation. **S. Zhou**, F. Xu

**11:15** CELL **446**. Cellulose Aerogel Reinforced Polymers (CARPs). **M. Schestakow**, L. Ratke

**Section B**

Moscone Center

**Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry****Commercial & Versatile Technology**

Cosponsored by MPPG<sup>‡</sup> and POLY

L. A. Lucia, *Organizer*

A. Ayoub, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05** CELL **447**. Twin-screw extrusion: A versatile tool for the pre-treatment of biomass. **A. Rouilly**, V. VanDenBossche, P. Evon, M. Rigal

**8:30** CELL **448**. Using reactive extrusion to manufacture greener products - from laboratory fundamentals to commercial scale. **R. Narayan**

**9:20** CELL **449**. Extrusion of protein plastics. **M.S. Hedenqvist**, E. Johansson, W. Newson, M. Gällstedt, R. Kuktaite, H. Ullsten, H. Türe

**9:45** Intermission.

**10:00** CELL **450**. Silicone-based cellulose materials: Processes & characterizations. **E. Fleury**, C. Barres, A. Rachini, X. Zhou, J. Bernard, S. Deng, A. Charlot

**10:25** CELL **451**. Withdrawn.

**10:50** CELL **452**. Thermomechanical extrusion pretreatment for production of ethanol and arabinoxylan from corn fiber. **G. Ryu**

**11:15** CELL **453**. Optimizing high shear and other process parameters for reactive mixing and nanocomposite dispersion. **A. Farahanchi**, B. Calderon, J. Gug, M.J. Sobkowicz

**11:40** Concluding Remarks.

**Section C**

Moscone Center  
270

**Advances in Polysaccharides: Practice & Applications****New Functional Materials**

Cosponsored by AGFD, CARB, MPPG<sup>‡</sup>, PMSE and POLY

H. Cheng, *Organizer*

A. Biswas, *Organizer, Presiding*

**8:05** CELL **454**. Design of new functional polysaccharide nanoparticles for biomedical imaging applications. **M. Bozic**, M. Bracic, R. Kargl, U. Jantčić, D. Tkaucic, T. Elschner, S. Hribernik, T. Mohan, K. Stana Kleinschek

**8:30** CELL **455**. Chitin-Glucan nanoparticles from fungi in membrane and water treatment operations. **A. Mautner**, N. Yousefi, W. Wan Nawawi, A. Bismarck

**8:55** CELL **456**. Cellulose functional materials with multiple stimuli responsive and their applications in sensors. **H. Kang**, P. Li, R. Liu, Y. Huang

**9:20** CELL **457**. Adsorption of IgG antibodies on cellulose thin film surface. **V. Raghawanshi**, Z. Huang, G. Garnier

**9:45** Intermission.

**10:00** CELL **458**. Development of cellulose helical architectures in nature. **S. Vignolini**

**10:25** CELL **459**. Free-standing multilayered membranes from renewable polymers, towards tissue engineering applications. **M.P. Sousa**, F. Cleymand, J.F. Mano

**10:50** CELL **460**. Structural features of polycarboxylic acids as cross-linking agents of cellulose. **G. Sun**, C. Zhao, H. Qi, B. Ji, K. Yan

**11:15** CELL **461**. PEGylation of chitosan via nitroxide chemistry in aqueous media. **O. Garcia-Valdez**, A. Darabi, M.F. Cunningham, **P. Champagne**

**Section D**

Moscone Center  
272

**Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla**

Cosponsored by AGFD, ANYL and POLY

Financially supported by HORIBA Instruments Incorporated; University of Tokyo, Japan; Innventia AB; U.S. Forest Service

U. P. Agarwal, T. J. Elder, A. Isogai, *Organizers*

T. Larsson, *Organizer, Presiding*

Y. Hsieh, *Presiding*

**8:00** Introductory Remarks.

**8:05** CELL **462**. New development of wood chemistry promoted by TOF-SIMS. **D. Aoki**, Y. Matsushita, K. Kuroda, **K. Fukushima**

**8:30** CELL **463**. Following in-situ hydrophobisation of plant cell walls by Raman imaging. **N. Gierlinger**, B. Prats-Mateu, M. Felhofer, P. Bock

**8:55** CELL **464**. On the mechanisms of cellulose dissolution in aqueous media. **B. Lindman**, B. Medronho, L. Alves, M. Norgren, H. Edlund

**9:20** CELL **465**. Construction of cellulose based nanofibrous materials via green route. **L. Zhang**

**9:45** Intermission.

**10:00** CELL **466**. Polymerization of cellulose and lignin on a chip: Morphological studies. **N. Robitaille Brown**, S. Basu, O. Omodiji, C. Anderson, Y. Zhu, J.M. Catchmark, J. Zimmer

**10:25** CELL **467**. Crystal deformation and transformation of cellulose allomorphs derived from stability of molecular chain sheets. **T. Uto**, T. Yu

**10:50** CELL **468**. Imaging mass spectrometry analysis of woody cell wall using <sup>13</sup>CO<sub>2</sub> pulse labeling. **M. Takeuchi**, M. Norisada, A. Isogai

**11:15** CELL **469**. Withdrawn.

**Section E**

Moscone Center  
274

**Functional Lignocellulosics & Nanotechnology**

- 9:50 CHED **22**. Development of an assessment tool to measure student proficiency in green chemistry concepts and skills. **L. Armstrong**, G. Kerstiens, M.T. Robak, M.C. Douskey, A.M. Baranger
- 10:10 CHED **23**. Enhancing the next generation of green scientists. **D. Paul**
- 10:30 CHED **24**. Models for integrating toxicology into chemistry courses. **A.S. Cannon**, **A. McCarthy**
- 10:50 CHED **25**. Fundamentals and challenges for a sustainable chemical enterprise. **M. Sabahi**, **E. Reichmanis**

**Section E**

San Francisco Marriott Marquis  
Nob Hill A

**Research in Chemistry Education  
New & Noteworthy in 2015-2016**

- D. P. Cartrette, D. R. Mulford, *Organizers*  
G. T. Rushton, M. N. Stains, M. Teichert, J. Walker, *Presiding*
- 8:30 Introductory Remarks.
- 8:35 CHED **26**. Biochemistry instructors' perceptions of analogies and their classroom use. **M. Orgill**, T.J. Bussey, G.M. Bodner

- 9:15 CHED **27**. Affective learning and organic chemistry achievement: Testing models of reciprocal causation. **J.R. Raker**, S. Villafañe, X. Xu

9:55 Intermission.

- 10:10 CHED **28**. Using digital badges for assessment of hands-on skills in the laboratory. **M.H. Towns**, S. Hensiek, C.J. Harwood, B. DeKorver, J. Fish
- 10:50 CHED **29**. Improving critical thinking via authenticity: The CASPIE research experience in a military academy chemistry course. **A. Chase**, H. Clancy, R.P. Lachance, B. Mathison, M. Chiu, G.C. Weaver, D. Sears, J.E. Dietz
- 11:30 Concluding Remarks.

**Section F**

San Francisco Marriott Marquis  
Nob Hill B

**NMR Spectroscopy in the Undergraduate Curriculum**

*Financially supported by Bruker; ThermoFisher Scientific; JEOL; Anasazi Instruments*

L. J. Anna, D. P. Soulsby, A. S. Wallner, *Organizers, Presiding*

- 8:30 Introductory Remarks.
- 8:35 CHED **30**. Practical use of <sup>13</sup>C benchtop NMR spectroscopy in an undergraduate laboratory. **P.J. Bowyer**, B. Manz, A. Coy, H. Robert
- 8:55 CHED **31**. Hands-on NMR experience without the NMR: Using MestreNova to teach an undergraduate organic structure elucidation course without an on-site high field NMR. **K.N. Maloney**
- 9:15 CHED **32**. NMR spectroscopy and complementary computational tools: Delta for 1D processing, ChemDoodle for predictions, and ChemSpider for interactive literature spectra. **J. Bennett**
- 9:35 Intermission.
- 9:50 CHED **33**. Withdrawn.

- 10:10 CHED **34**. Biochemical NMR spectroscopy course for upper level undergraduates that combines both classroom and laboratory learning. **B.J. Stockman**
- 10:30 CHED **35**. Extending <sup>1</sup>H-NMR analysis into an upper-division biochemistry course to investigate enzyme stereoselectivity and active-site architecture. **T.J. Gries**
- 10:50 CHED **36**. Applications of quantitative NMR in chemical education. **C. Nicholson**, R. Hill, S. Barrington
- 11:10 Concluding Remarks.

**Section G**

San Francisco Marriott Marquis  
Nob Hill C

**Undergraduate Research Papers**  
*Cosponsored by SOCED*

- C. V. Gauthier, N. L. Snyder, *Organizers*  
J. V. Ruppel, *Organizer, Presiding*
- 8:30 Introductory Remarks.
- 8:35 CHED **37**. Mechanistic studies of Niemann-Pick C1. **M.N. Trinh**, F. Lu, M.S. Brown, J.L. Goldstein
- 8:45 CHED **38**. Tissue-specific CRISPR/Cas9 mutants: A tool to study the role of epigenetics in stem cells. **C. Torres Caban**, A. Doi, H. Horvitz
- 8:55 CHED **39**. Effect of BET inhibitor in drug resistant breast cancer. **L.A. Acevedo-Soto**, S.S. Akhand, M.K. Wendt
- 9:05 CHED **40**. Improved radiosynthesis of 3'-deoxy-3'-[<sup>18</sup>F]fluorothymidine and its *in vivo* application as a proliferation imaging marker in positron emission tomography. **A. Nguyen**, J. Mishra, Z. Visco, A.L. Vävere, E. Butch, S.E. Snyder

9:15 Intermission.

- 9:30 CHED **41**. Examination of genes related to T-ALL in the 8q24 region. **J. Bautista**, R. Sieg, J. Blackburn
- 9:40 CHED **42**. Antimicrobial and colloidal properties of novel polycationic amphiphiles. **B. Ashamole**, E. Rogers, E. Ogunjirin, K. Seifert, K.L. Caran
- 9:50 CHED **43**. Study of fluorescent quaternary ammonium amphiphiles to gain insight into the mechanism of antibacterial activity. **M.K. Lauer**, E. Rogers, C. Kubow, K. Seifert, K.L. Caran
- 10:00 CHED **44**. Investigating antimicrobial properties of the human galectin-9. **J. Van Riper**, N. Kamili, C. Gerner-Smidt, C. Arthur, S. Stowell, A. Blenda

10:10 Intermission.

- 10:25 CHED **45**. Effect of glutamine and γ-glutamylglutamine on NIH-3T3 cell metabolism. **N. Kowalkowski**, R. Penney, G. Boysen
- 10:35 CHED **46**. CYP2C9 and the mutations that affect NSAID oxidation efficiency. **B. James**, G.P. Miller, M.D. Perry
- 10:45 CHED **47**. Characterization of hydro-gelating nucleopeptides. **S. Schrecke**, S. Brown, J.E. Smith-Carpenter
- 10:55 CHED **48**. Effect of 1,2-dithiolane modifications on peptide self-assemblies. **R.R. Neves**, A. Calixte, J.E. Smith-Carpenter
- 11:05 Intermission.

- 11:20 CHED **49**. Investigating trends in DNA backbone structure and dynamics for ideal drug binding: A <sup>31</sup>P NMR study of the CRE sequence. **G. Spurzem**, M. Kyinn, A. Pincus, M.E. Hatcher
- 11:30 CHED **50**. Inhibition of palmitate-induced lipotoxicity. **J. Neufeld**, A.K. Stoeckman
- 11:40 CHED **51**. Investigation of the effect of AuNVs conjugated with modified gp100 peptide and with modified PEG on induced IL-12 cytokine production. **A.A. Garcés**, E. Reiser Evans, J.M. Almeida, A.Y. Lin, A. Foster, R. Drezek
- 11:50 CHED **52**. Towards further understanding of kinase activity during oxidative stress: Senthesisid of the highly active ERK2 substrates sub-D and sub-S. **O. Tornow**, A.J. Wommack
- 12:00 Concluding Remarks.

**Section H**

San Francisco Marriott Marquis  
Nob Hill D

**Eye Tracking Research in Chemistry Education**

- J. R. Vandenplas, *Organizer*  
S. J. Hansen, *Organizer, Presiding*
- 8:30 Introductory Remarks.
- 8:35 CHED **53**. Eye movement patterns in solving science ordering problems. **H. Tang**, **E. Day**, L.K. Kendhammer, J.N. Moore, S.A. Brown, N.J. Pienta
- 8:55 CHED **54**. Assessing pupillometry data using multimodel inference. **J. Karch**, J. Garcia, H. Sevian
- 9:15 CHED **55**. Use of scan path analysis to determine biochemistry expert-novice differences in reading metabolic pathways. **K.J. Linenberger**  
**Cortes**, K. Kammerdiener
- 9:35 Intermission.

- 9:40 CHED **56**. Impact of expertise on allocation of attention during multiple-choice problem solving. **J.R. Vandenplas**, T.C. Pentecost, J. Vogl

- 10:00 CHED **57**. Where did you look? **S.J. Hansen**

- 10:20 CHED **58**. Use of eye-tracking to aid in the articulation of visual representations. **J.J. Reed**, J.R. Raker, K.L. Murphy

- 10:40 CHED **59**. Using R to perform advanced analysis of eye tracking data. **H. Tang**, N.J. Pienta

11:00 Concluding Remarks.

**Blending Chemistry & Culture: Undergraduate Research Abroad through ACS IREU Program**

*Sponsored by IAC, Cosponsored by CHED*

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy**

*Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>1</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>2</sup> and WCC*

**Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet**

*Sponsored by ENVR, Cosponsored by CHED*

**Undergraduate Symposium**

*Sponsored by AGFD, Cosponsored by CHED*

**Incorporating Polymer Science into the Classroom**

**Undergraduate Curriculum**

*Sponsored by POLY, Cosponsored by CHED, MPPG<sup>2</sup> and PMSE*

**SUNDAY AFTERNOON**

**Section A**

San Francisco Marriott Marquis  
Golden Gate C2

**High School Program**

*Cosponsored by WCC*

S. B. Mitchell, *Organizer*  
J. L. Ball, *Organizer, Presiding*

- 1:00 CHED **60**. Tracing the steps to the Conant Award. **D. Cullen**, G.T. Rushton
- 1:10 CHED **61**. **Award Address** (James Bryant Conant Award in High School Chemistry Teaching sponsored by the American Chemical Society). Making connections that matter! **L.E. Slocum**

- 1:50 CHED **62**. Deep impact: Summer research with high school students. **L.S. Ott**

- 2:10 CHED **63**. Designing three-dimensional assessments. **M. Cooper**
- 2:35 Intermission.

- 2:45 CHED **64**. Establishing a culture of laboratory safety in secondary education. **K.M. Lopez**

- 3:05 CHED **65**. Sex, drugs, and the high school chemistry curriculum. **M. Wynn**
- 3:35 CHED **66**. Advanced materials for corrosion prevention. **S.C. Rukes**

4:15 Concluding Remarks.

**Section B**

San Francisco Marriott Marquis  
Salons 3/4

**State of the Art: Applying Chemistry Education Research to Practice**

*P. L. Daubenmire, Organizer*  
*D. G. Harrington, Organizer, Presiding*

- 1:30 CHED **67**. Supporting students' reasoning with mathematical models through simulation-focused collaborative learning activities. **N.M. Becker**

- 2:10 CHED **68**. Using discourse analysis to inform the design of active learning materials. **R.S. Cole**, C. Stanford, A.C. Moon, M.H. Towns

2:50 Intermission.

- 3:05 CHED **69**. Incorporating research on misconceptions into the classroom through the development and use of concept inventories. **C.J. Luxford**

- 3:45 CHED **70**. Student assessments to measure concept retention. **S.E. Lewis**

- 4:25 CHED **71**. Designing and using assessments items that provide evidence about depth of understanding. **M. Cooper**

**The Importance of Role Models & Mentors in Reaching Gender Equity in Chemical Sciences: A Symposium in Honor of Judith Iriarte-Gross**

Sponsored by WCC, Cosponsored by CHED, CMA and PROF

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSEI, POLY, PRES<sup>2</sup> and WCC

**Textbooks & the Practice of Science: Before, During & After Gutenberg**

Sponsored by CINF, Cosponsored by CHED and HIST<sup>2</sup>

**Withycombe-Charalambous Graduate Student Symposium**

Sponsored by AGFD, Cosponsored by CHED

**Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet**

**Physical & Chemical Processes**

Sponsored by ENVR, Cosponsored by CHED

**Incorporating Polymer Science into the Classroom**

**High School & Community College**

Sponsored by POLY, Cosponsored by CHED, MPPG<sup>2</sup> and PMSE

**SUNDAY EVENING**

**Section A**

Moscone Center  
Hall D

**General Posters**

T. A. Miller, *Organizer*

**7:00 - 9:00**

**CHED 124.** Teaching basic chemistry with MOOCS platform: An example of active learning. Z. Owen

**CHED 125.** Steps to change a large lecture class to an active learning class. E.P. Kippenhan

**CHED 126.** Transforming the undergraduate chemistry experience through active learning: Evaluating pedagogical reforms within general and organic chemistry. K. McCance, E.D. Niemeyer

**CHED 127.** Using a guided inquiry and experimental approach to teaching vibrational-rotational spectroscopy. T.L. Longin

**CHED 128.** Assessing the effects of guided inquiry lab experiments on student learning quantum mechanics. A. Mansfield, S. Meyer, A.W. Jarrot, K.H. Bennett, C.J. Stromberg

**CHED 129.** Accelerating organic synthesis and purification in the undergraduate organic chemistry lab-Fischer esterification. J.E. Silver, R. Klopfer, O. Mneimne, F. Nancy, L.M. Esther, R.L. Lewis

**CHED 130.** Microwave-assisted iodolactonization: A discovery-based green chemistry laboratory experiment. C. Wang, Y. Lin

**CHED 131.** Surface tension, viscosities and refractive index of binary liquid systems. H. Bascal

**CHED 132.** Investigating surface areas of nanoscale materials through a simple laboratory experiment. D.S. Heroux

**CHED 133.** Measuring the thermal properties of polymers made from lactide and glycolide: An undergraduate chemistry experiment using differential scanning calorimetry. B.K. Mohney, P.S. Corbin

**CHED 134.** Tale of two metabolites: Using the separation of urea and cholesterol to bridge the gap between general and organic chemistry. N. Edwards, F. Yezpez Castillo

**CHED 135.** Thienyl phosphine palladium (II) complexes: An introduction to hybrid materials in undergraduate laboratories. B. Boardman

**CHED 136.** Substitution of organic solids with low toxicity compounds for binary phase diagrams in the undergraduate physical chemistry laboratory. B.E. Dalesandro, S.E. Hayik

**CHED 137.** Expanding student access to instrumentation through the incorporation of portable infrared spectroscopy into the curriculum. S. Meyer, A. Mansfield, K.H. Bennett, C.J. Stromberg

**CHED 138.** Biochemistry scavenger hunt. S.E. Evans

**CHED 139.** 3D printable resources for chemical educators: Supporting laboratory learning activities via user-friendly devices. L.A. Porter

**CHED 140.** Eliciting conceptual understanding via chemistry outreach: The development and implementation of a novel data collection method. J.M. Pratt, E.J. Yezierski

**CHED 141.** Themed demonstration shows to increase community involvement. B.J. Bellott

**CHED 142.** Chemical communication through infographics. D. Diatta, S. Le, T. Le, R. Singiser

**CHED 143.** Infographics: Complex chemistry made simple. M. Delgadoillo, Y. Khan, K. Nguyen, J.J. Meyers

**CHED 144.** Science & culture: Engaging students with a local zoological park. P.J. Carlson, R. Bishop, L. Robinson, D. O'Gwynn

**CHED 145.** Promise of palladium and the triumph of rhodium: Framing chemical research for public consumption through art. D.B. Cordes

**CHED 146.** Maximizing potential: Building a bridge to success in the STEM field for the children of immigrant families through mentoring. R. Romero

**CHED 147.** Advanced Authentic Research (AAR) program: A public school district research program. J.V. Choe

**CHED 148.** Effects of introducing dye sensitized solar cells for renewable energy research to middle school students. M.L. Grimminger

**CHED 149.** CSI dognapping workshop: A Sandia outreach program. J.M. Sears, T.J. Boyle, B.A. Hernandez-Sanchez

**CHED 150.** Recruiting and supporting potential STEM teachers for south-western Illinois. S.D. Wiediger, J.S. Krim, K. Barry, S.M. Locke, L. Cummings, T. Voepel

**CHED 151.** Students' understandings of atomic orbital representations for carbon. Z. Allred, S. Bretz

**CHED 152.** Modular 3D printed secondary structures for protein modeling. P. Woodruff

**CHED 153.** Enthalpy and entropy changes in dissolving and precipitation reactions: Students' macroscopic observations and explanations. T.N. Abell, S. Bretz

**CHED 154.** Students' use of symbolic and particulate representations to characterize bonding. G.H. Allen, C.J. Luxford, S. Bretz

**CHED 155.** Cartoon character representations for the chemical structures of vitamins and other biologically significant molecules. R.J. Schroeder

**CHED 156.** Chemisthenics: A literal VSEPR exercise. C. Rezsnyak

**CHED 157.** Comparison of adaptive and traditional online homework systems in a preparatory chemistry course. K.A. Kaiser

**CHED 158.** Development of online pre-laboratory activities in organic chemistry to improve students' preparation for laboratory. J. Chaytor, M. Al Mughalaq, H. Butler

**CHED 159.** Tweet, for science!: A social media course for scientists at Caltech tackling inreach and outreach online. O. Wilkins, M.E. Davis, S. Mojarad

**CHED 160.** Transitioning to eBooks: Student use of various textbook features. E. Day, N.J. Pienta

**CHED 161.** Real-life examples as applied to general chemistry. A. Burns

**CHED 162.** Trying on teaching: Being a learning assistant at a two-year college. C.P. Schick, K. Stennette, A. Palmer

**CHED 163.** From failure to success in general chemistry: Learning strategies to the rescue. E. Cook, S.E. McGuire

**CHED 164.** Teaching for success in solving organic synthesis problems. N. Bode, A.B. Flynn

**CHED 165.** Flip your general chemistry class the easy way. J. Moore, M.A. Rau, L. Oxtoby, K. Kennedy

**CHED 166.** Withdrawn.

**CHED 167.** Incorporating new technologies into the chemistry curriculum at Elmira College. C.E. Stitts

**CHED 168.** Teaching from this side of the fence: The benefits experienced by chemistry undergraduate teaching assistants. S.B. Philipp, C.V. Rich, T.R. Tretter

**CHED 169.** Using screencasts to supplement classroom instruction. D.B. King

**CHED 170.** Bridging chemistry. R.R. Srinivasan, T. Nicholas, M. Rowane, L. Robinson, R. Juarez, D. Meyer

**CHED 171.** XUPharmPrep: A summer bridge program for first-year chemistry-prepharmacy majors. M.R. Adams

**CHED 172.** Expansion of the science resource center into a STEM resource center. S. Richards, P.J. Iles, L.D. Giddings, R. Holcomb, M. Alvarez, R.V. Valcaroe, R. McFarland, N.R. Bastian

**CHED 173.** Does a better chemistry pre-test score mean a better grade in organic chemistry? J.A. Jensen

**CHED 174.** Characterizing the alignment between inorganic chemistry faculty's learning goals and assessments. J.H. Torres King, E.J. Yezierski

**CHED 175.** Organic chemistry students' understandings of molecular stability and reactivity in the context of substitution reactions. M. Popova, S. Bretz

**CHED 176.** Associations between faculty beliefs about learning and instructional practice: Results from a national survey of postsecondary chemistry faculty. R. Gibbons, S. Villafane-Garcia, E. Laga, M.N. Stains, K.L. Murphy, J.R. Raker

**CHED 177.** Investigation of absolute and relative scaling conceptions in an anatomy and physiology course. J.M. Trate, V. Fisher, A. Blecking, P. Geissinger, K.L. Murphy

**CHED 178.** Exploring the roles of gender and prior knowledge on general chemistry students' cognitive structures. S. McLane, A. Milkey, M. Seibel, B. Kung, G. Gulacar

**CHED 179.** Investigating and supporting students' understanding of the physical basis of interactions. A. Dragon, J. Pagdanganan, J.A. Loertscher, V.M. Thorsell

**CHED 180.** Factors influencing the persistence and performance of chemistry majors. B. Brando, A.M. Baranger, A. Stacy

**CHED 181.** Developing domain-specific reasoning and problem solving skills in organic chemistry. M.R. Helix, A.M. Baranger

**CHED 182.** Withdrawn.

**CHED 183.** Upgrading the role of teaching assistant in science teacher education: In-field teaching exercise in groups of students with different levels of competence. G. Hornung

**CHED 184.** Using discovery, discussion, lab model at the elementary level. K.M. Hutchinson-Anderson

**CHED 185.** Response and non-response rates in national surveys of postsecondary chemistry faculty: Implications for data analysis. S. Srinivasan, K.L. Murphy, J.R. Raker

**CHED 186.** Developing a small batch approach to ACS Examination norms: A case study in inorganic chemistry. K.A. Marek, K.L. Murphy, J.R. Raker, J.J. Reed

**CHED 187.** Report on the four-year old, science-developed, science-education minor at UCLA. A.A. Russell, J.W. Pang

**CHED 188.** Investigating retention of concepts between the first and second semesters of organic chemistry. W. Hollis, W.E. Brenzovich

**CHED 189.** Measures of success for an alternative starting point for at-risk STEM majors. B.A. Davis, J.K. Vohs, M.A. Fisher

**CHED 190.** Math preparation for a GOB course as a predictor of success. W.J. Donovan

**CHED 191.** Advancing graduate education in the chemical sciences with a modularized curriculum. C.V. Rice, M.T. Ashby, M. Maher, R. Halterman

**CHED 192.** NSF Graduate Research Fellowship Program for chemistry and chemical engineering students. T.B. Higgins, T.D. Kim, D. Rickey

**CHED 193.** National Science Foundation programs that support chemistry education. D. Rickey, T.B. Higgins, T.D. Kim

**CHED 194.** Impact of undergraduate research internships at Lawrence Berkeley National Laboratory. L.E. Cote, A.M. Baranger, E.M. Stone, M. Helix, C. Flood

- CHED **195.** Research intensive honors program in chemistry. T.S. Sempertegui Plaza, J.E. Haky, D. Chamely Wiik, M. Cudic, M.C. Rodriguez
- CHED **196.** Impacts of CUREs in chemistry and biology courses at three regional institutions. E.M. Bowers, J. Tomasik, D.J. Lecaptain, A. Mueller, K. Cissell, D.S. Karpovich, A.L. Martin, A.J. Ross, T. Sivy, J. Gittins, B.S. Harkness, K. Nitz, J. VanHouten
- CHED **197.** *Drosophila melanogaster* food choice and survival on different sugars and sugar derivatives: An unorthodox learning experience for students not majoring in chemistry. B. Budy, J. Minbirole, J.S. Rhoad, P. Khol, J. Ribakova
- CHED **198.** Fostering a sustainable and active membership in the Puerto Rico Section. A.G. Colon, O.J. Morales Martinez, H.A. Ocasio Rodriguez, S. Chaparro-Ruiz, J. Feng Baez, M. Leon, B. Ramos, E. Ferrer Torres, J.I. Ramirez Domenech
- CHED **199.** Cooking the books: An honors seminar on the chemistry of cooking. S. Hubbard

## MONDAY MORNING

### Section A

San Francisco Marriott Marquis  
Salons 1/2

#### ACS Award for Achievement in Research for the Teaching & Learning of Chemistry: Symposium in honor of Marcy H. Towns

Cosponsored by WCC

S. Bretz, *Organizer*

M. Cooper, *Presiding*

8:30 Introductory Remarks.

8:35 CHED **200.** Characterization of STEM faculty's conceptions and use of writing in STEM classes. A.C. Moon, S.A. Finkenstaedt-Quinn, A. Ruggles Gere, G.V. Szymczak

8:55 CHED **201.** Undergraduate students' goals for their chemistry laboratory coursework. B.K. Dekorver, M.H. Towns

9:15 CHED **202.** Achievement emotions in undergraduate organic chemistry. J.R. Raker

9:35 CHED **203.** Examining students' reasoning with mathematical models in the context of chemical equilibrium. N.M. Becker

9:55 Intermission.

10:15 CHED **204.** I will go out having learned something: Reflections on student learning in physical chemistry. R.S. Cole

10:35 CHED **205.** Planting seeds that make a difference! L.E. Stocum

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

10:55 CHED **206.** Framing the case: The importance of theory in structuring case studies in chemistry. D.J. Wink, J.V. Choe, M.T. Dianovsky, S. Lucas, M. Snow, L. Schroeder, G. Clark

11:15 CHED **207.** Increasing the influence and impact of CER: Developing high school teachers as chemistry education researchers. E.J. Yeziorski

### Section B

San Francisco Marriott Marquis  
Salons 3/4

#### ACS-CEI Award for Incorporating Sustainability into Chemistry Education

Cosponsored by CEI

S. O. Obare, *Organizer, Presiding*

K. Aubrecht, *Presiding*

8:30 Introductory Remarks.

8:35 CHED **208.** Green chemistry commitment: Addressing sustainability from the molecular-level to institutional-scale. I.J. Levy

9:10 CHED **209.** Incorporation of novel education approaches, including on-line gaming tools and 3D printing, into graduate and undergraduate courses focused on sustainable materials. A. Orlov

9:40 CHED **210.** Socio-scientific issues-based chemistry teaching for incorporating education for sustainable development and green chemistry into secondary chemistry classrooms. I. Eilks

10:10 Intermission.

10:20 CHED **211.** Withdrawn.

10:50 CHED **212.** Sustainability and green chemistry education: Innovative and contextualized experiences from the undergraduate and postgraduate courses at the Federal University of São Carlos, Brazil. V. Zuin

11:20 CHED **213.** Incorporation of green chemistry and sustainability into the chemistry curriculum at Illinois Wesleyan University and globally. R.S. Mohan

11:50 CHED **214.** International perspective on green chemistry and sustainability education. G.M. Bodner

12:25 Concluding Remarks.

### Section C

San Francisco Marriott Marquis  
Salon 5

#### Fundamentals of Chemistry Outreach Education: From Program Design to Assessment

Cosponsored by CCA, LSAC, SOGED and YCC

E. J. Brush, E. S. Garcia Sega, S. Nellutla, *Organizers*

E. Sega, *Presiding*

8:30 Introductory Remarks.

8:40 CHED **215.** MOFs @ CCs: Community college outreach through crystallographic research. D.R. Manke

9:00 CHED **216.** Combining 3D printing and a chemistry lab to get home-schooled high school students excited about college. J.D. Mendez

9:20 CHED **217.** Outreach is HIP. E.A. Alemán, K. Stone

9:40 CHED **218.** Service learning across programs: A model for communicating aerosol chemistry. B. Hames, H. Weizman

10:00 Intermission.

10:15 CHED **219.** Informal STEM education: Resources for outreach, engagement and broader impacts. J.R. Bell

10:35 CHED **220.** Unexpected outcomes: Development and evaluation of STEM programs that promote confidence and build friendships. S.S. Grathoff, M.R. Wilhelm

10:55 CHED **221.** Symposium workshop on the fundamentals of chemistry outreach education: I. Program design. E.J. Brush, E. Sega, S. Nellutla

### Section D

San Francisco Marriott Marquis  
Salon 6

#### Advances in e-Learning & Online Chemical Education

L. A. Morsch, P. Sorensen, *Organizers*

D. A. Canelas, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 CHED **222.** Marvin JS and Smartwork5: Tools for online chemistry education. A.D. Costache, E. Hoffmann, C. Pruis

8:55 CHED **223.** Assignment-based repeated retrieval for learning chemistry. J. Hearn, E.L. Brown

9:15 CHED **224.** Learn how using WebAssign, Google Classroom and maybe even a little slack can make teaching general chemistry better for both students and faculty. A.T. Griffin

9:35 CHED **225.** Chem101: Next-generation classroom engagement tools built for chemistry students. J. Weinberg

9:55 Intermission.

10:10 CHED **226.** Computer simulations to help students learn general chemistry topics. J. Selco

10:30 CHED **227.** Learning organic mechanisms through spaced assignments. E.L. Brown

10:50 CHED **228.** PubChem as an educational resource for chemical information literacy. S. Kim, E. Bolton, S.H. Bryant

11:10 CHED **229.** Mobile animation tool: An app for creating and sharing chemical particulate animations. J. Winter

11:30 Concluding Remarks.

### Section E

San Francisco Marriott Marquis  
Nob Hill A

#### Chemistry Education Research: Graduate Student Research Forum

J. Donnelly, M. Popova, *Organizers, Presiding*

8:30 Introductory Remarks.

8:35 CHED **230.** Implementation of next generation science standards in high schools: Exploratory study. A. Pierce, C.E. Brown

8:55 CHED **231.** Evaluation of the teacher-scholar program: An integrated peer-learning program in the UC Berkeley College of Chemistry. S.M. Tischhauser, S.E. Limfat, S. Dilip, P. Marsden, M.T. Robak, A.M. Baranger

9:15 CHED **232.** Structural equation model for level of inquiry in undergraduate laboratory experiences and beliefs about chemistry on intent to pursue a post-baccalaureate degree. A.R. Lunsford

9:35 CHED **233.** Affects of gender and sexual orientation on belonging uncertainty in general chemistry. J.A. Kroll, K.L. Plath

9:55 Intermission.

10:05 CHED **234.** IRT as a tool to improve student performance. B. Ohlsen, C.H. Atwood

10:25 CHED **235.** Targeting the general chemistry bottom quartile through homework-based metacognitive training. B. Casselman, C.H. Atwood

10:45 CHED **236.** Considering the relationship between structure, properties, and function: How students connect these ideas across their introductory chemistry and biology courses. K.P. Kohn, S. Underwood, M. Cooper

11:05 CHED **237.** Team members' perceptions of how communication relates to the success of an interdisciplinary grant collaboration: The ChAnGE Chem project. N. Millick, M. Orgill, S. Barakat

11:25 CHED **238.** Evaluating the impact of a redesigned chemistry course sequence for undergraduate life science majors. C. Schnobelen, C. Hrycyna, J.A. Chmielewski, G.M. Bodner

11:45 Discussion.

11:55 Concluding Remarks.

### Section F

San Francisco Marriott Marquis  
Nob Hill B

#### Curricular Innovations in Undergraduate Chemical Education Impacted by NSF

R. K. Boggess, *Organizer*

C. A. Burkhart, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 CHED **239.** NSF S-STEM at Union College: Multidimensional mentoring model for student SUCCESS. J.D. Kehlbeck, S. Amanuel, G. Bizer, P. Catravas, R. Cortez, S. Kirkton

8:55 CHED **240.** Successful S-STEM scholarship program for undergraduate students at varying stages of degree progress. A. Kubatova, R. Simmons, D. Pedersen

9:15 CHED **241.** Increasing student success through the CSU S-STEM program. K. Mardis

9:35 Intermission.

9:50 CHED **242.** Infinity scholars, an NSF funded project that includes interdisciplinary undergraduate research. R.R. Klepper

10:10 CHED **243.** Seminar series for guiding students' development and exploration of chemistry careers. P. Tandler, J.A. Lupica, M.J. Dunphy

10:30 CHED **244.** Fostering interdisciplinary and investigative thinking and learning for first and second year chemistry students. K.S. Owens, A. Murkowski, A.M. Johansen, H. Price

10:50 Intermission.

‡Cooperative Cosponsorship

## Analytical Chemistry

Cosponsored by ANYL and SOCED

N. Di Fabio, *Organizer*

12:00 - 2:00

- CHED 352.** Identification of volatile organic compounds present in cigarette smoke via purge-n-trap coupled with GC/MS. P. Skersick, C.H. Lisse
- CHED 353.** Quantitative identification of volatile organic compounds and free base nicotine present in electronic-cigarette vapor via GC/MS detection. E. Smith, C.H. Lisse
- CHED 354.** Self-assembly of mono-layers on graphene with pyrene and cyclodextrin derivatives. E. Swanson, X. Zhen, P. Buhlmann
- CHED 355.** Analysis of e-cigarette fluid with Direct Sample Injection (DSI) GC-MS/MS. K. Rogers, K. Biscaglia, L. Huang
- CHED 356.** Quantification of B-vitamins in multivitamin dietary supplements through HPLC-MS. T. Vu, S. Pribil, K.J. Sorauf
- CHED 357.** Withdrawn.
- CHED 358.** Comparison of Oasis WCX and Oasis HLB sorbents for polar organic chemical integrative samplers and for solid phase extraction of wastewater for detection and quantification of amphetamine-type stimulants. M. Fulmer, A. Loftis, J. Donegan, T.H. Boles
- CHED 359.** Withdrawn.
- CHED 360.** Withdrawn.
- CHED 361.** Investigating into the effect of aging and grain content on the chemical composition of whiskey. W. Pugh, R. Lahti
- CHED 362.** Comparison of Bisphenol A concentrations in Zebrafish tissue and the surrounding water using UPLC-MS/MS. E. Dornisch, S. Ramakrishnan, M. Gessel
- CHED 363.** The isolation and determination of two related compounds from the leaf gel of *aloe cameronii*. A. Theberge, A. Trowbridge, R.L. Bretz
- CHED 364.** Characterizing dissolved organic material in local lakes and streams through excitation-emission fluorescence spectroscopy and parallel factor analysis. S. Pribil, T. Vu, K. Sorauf
- CHED 365.** Chemically-induced droplet coalescence in a droplet microfluidic device. D.G. Horvath, D. Pluhar, P. Abbyad
- CHED 366.** Using SPME-GC/MS to identify attractive odorants in the bacterial food sources of *C. elegans*. S. Worthy, G. Rojas, E. Glater, C.J. Taylor
- CHED 367.** Covalent modification of multiwall carbon nanotubes with  $\beta$ -cyclodextrin for enhanced electrochemical detection of uric acid. S. Gillespie, M.A. Schwarzmann, A. Kane, C. Bowles, M. Trawick, M.B. Wayu, M.C. Leopold
- CHED 368.** Neurochemical study of zebrafish using fast-scan cyclic voltammetry. M. Furgurson, M. Shin, M.A. Johnson
- CHED 369.** Development of a facile method for the screening of prescription medications of abuse employing a portable GC/MS. R. Shen, S. Michalsky, D.C. Collins
- CHED 370.** Eliminating backflash in gas chromatography through the use of zero-solvent-volume thermal desorption injectors. S. Michalsky, A. Tolzmann, S. Grover, D.C. Collins
- CHED 371.** Development of layer-by-layer design of xerogel-based amperometric first generation biosensors on wire electrodes. G.E. Conway, M.C. Leopold
- CHED 372.** Edible oil fingerprinting using direct infusion ESI-MS and principal component analysis. M. McNamara, L. Loukotkova, G. Gamboa da Costa
- CHED 373.** Method development for the analysis of Bisphenol A (BPA) in milk. A.M. Encerrado, W. Lee
- CHED 374.** Analysis of FAME and sterol content in biodiesels using PCA. A. Clifford, A.M. Hupp
- CHED 375.** Analysis of raw materials in a veterinary topical analgesic. A. Franzen, E. Westemeier, J. Erickson, J.E. Larson
- CHED 376.** Green chemistry analysis of metal complexes by MALDI-TOF. C. Jernigan, G.R. Dubay
- CHED 377.** Comparative studies on the interactions of nanoceramics (metal oxides) with hemoglobin. T. Batte, E.E. Mojica
- CHED 378.** Evaluation on the interaction of nanomaterials with enzymes (catalase and lipase) using optical spectroscopy. K. Chhe, E.E. Mojica
- CHED 379.** Method development for analysis of illicit drugs/amphetamines in biological samples. L. Reilly, E.E. Mojica
- CHED 380.** Discrimination of fluoroquinolone antibiotics using Raman spectroscopy. A.E. Kuptsow, E.E. Mojica
- CHED 381.** Phenol content and its relationship to the antioxidant activities of different commercial tea samples. A. Villaggi, E.E. Mojica
- CHED 382.** Quantification of quorum sensing components produced by bacterial biofilms. K. Kough, J.A. Stenken
- CHED 383.** Monitoring the water quality of selected Billion Oysters Project (BOP) restoration sites. J. Zapata, E. Jones, G. DiMeglio, R. Kline, L.B. Birney, E.E. Mojica
- CHED 384.** Carboxylic acid multi-walled carbon nanotubes modified with  $\beta$ -cyclodextrin for the detection of uric acid on an electrochemical sensor. M.A. Schwarzmann, S.D. Gillespie, M.B. Wayu, L. Hughes, M.C. Leopold
- CHED 385.** NMR studies with  $^1J_{CC}$  coupling and computational modeling to identify preferred tautomers in austrocortinin. G. Versfeld, J.R. Powell, J.K. Harper
- CHED 386.** First generation amperometric biosensor to detect galactosemia. T. Munoz, C. Steele, W. Case, M.C. Leopold
- CHED 387.** Chemical and structural analysis of metronidazole and its derivatives. S. Azimi, D. Athanasopoulos, R.K. Upmancis
- CHED 388.** Evaluation of novel massive projectiles for nanoscale secondary ion mass spectrometry. A. Vinjamuri, M. Eller, G.D. Shuffield, E.A. Schweikert
- CHED 389.** Analysis of a series of dietary supplements via energy dispersive X-ray Fluorescence Spectroscopy (EDXRF). W. Bair, S. Maurice, E. Roberts-Kirchhoff, M.A. Benvenuto
- CHED 390.** Analysis of a series of coins of the Byzantine Empire via energy dispersive X-ray Fluorescence Spectroscopy (EDXRF). W. Bair, J. Pothoof, G. Nguyen, M. Bhagwagar, M.A. Benvenuto
- CHED 391.** Development of metal ion specific sol-gel targets for trace metal total reflection X-ray fluorescence analysis. A. Butler, A. Arndt, R.N. Dansby-Sparks
- CHED 392.** GC-MS analysis of cyanuric acid in swimming pool waters. D. Chun, C. Lehr
- CHED 393.** Determining extracellular sulfatase SULF1 concentration as a biomarker to detect the onset of breast cancer using an electrochemical approach. A. Nguyen, K. Vu, K. Gardiner, Z. Huang, Z. Wang
- CHED 394.** Exploration of the upper mass limit of CRAFT1 through protein cross-section analysis. B. Pope, D.V. Dearden
- CHED 395.** Improving the technique of simultaneous chromatography and electrophoresis by employing vertical sealing margins to achieve a flat-continuous solvent flow profile. R.E. Soto Alvarez, J.D. St. Jeor, E. Naef, D.C. Collins
- CHED 396.** Incorporating statistics to probe solvent mechanisms. A. Lonski, M.J. D'Souza
- CHED 397.** Evaluating the relationship between chemical profiles and cryptic species of *Sarcophyton* soft corals in Palau using both supervised and unsupervised statistical learning. E.M. Maloney, J. Chari, R.T. Botts, T.S. Davis, O.A. Alvarado, B.J. Chicoine, C. Brayton, C.S. McFadden, K.N. Maloney
- CHED 398.** Use of polynomial regression techniques to predict solvent mechanisms for benzoyl cyanide. E. Brandenburg, M.J. D'Souza
- CHED 399.** Spectroscopic properties of hydroxycinnamic acids under acidic, neutral, and basic conditions. J. Farshi, E.E. Mojica
- CHED 400.** Geochemical analyses at Eagle Cave, TX: X-ray diffraction and accelerator mass spectrometry radiocarbon dating. J. DeYoung, K.L. Steelman
- CHED 401.** Raman spectroscopy and density functional theory calculations of phenolic acid derivatives. S.J. Pace, E.E. Mojica
- CHED 402.** Evaluation of different methods in the extraction of active compounds from bee propolis. L.O. Wyan, E.E. Mojica
- CHED 403.** Binding of oxytetracycline and doxycycline with nanoceramics. H.N. Tonn, H.B. Jufer, E.E. Mojica
- CHED 404.** Analysis of sulfa drugs using Raman spectroscopy and Density Functional Theory (DFT) calculations. A.R. Javornik, E.E. Mojica
- CHED 405.** Sample preparation and analysis of NSAIDs (Non-Steroidal Anti-Inflammatory Drugs) in environmental water samples. E. Jones, E.E. Mojica
- CHED 406.** Building a low cost Raman spectrometer. S. Thibado, J.R. Williams
- CHED 407.** Investigation of charcoal-based electrically conductive paint. A. Arslanian, W.E. Schatzberg
- CHED 408.** Strengths and weaknesses of glass pH probes quantified: An advanced undergraduate chemistry laboratory. A. Corral, J.C. Goeltz
- CHED 409.** Improving a method for detecting fish exposed to cyanide via thiocyanate ion excretion using High Performance Liquid Chromatography (HPLC). R.J. Metivier, N.E. Breen, A. Rhyne
- CHED 410.** Lead detection by hair analysis. D.L. Sullivan, D.J. Schauer
- CHED 411.** Analyzing the binding relationship between curcuminoids and HSA by steady state fluorescence spectroscopy. G.J. Myres, O. Michels, M. Amman, M. Roozbeem
- CHED 412.** Molecular dynamics simulation study of chiral recognition by dipeptide-based molecular micelles. K. Krause, J. Ingle, E. Billiot, F.H. Billiot, Y. Fang, K.F. Morris
- CHED 413.** Isolation of possible antifungal compounds from *Aloe barbadensis*. H. Hirata, R.L. Bretz
- CHED 414.** Analysis of wastewater samples for opioids using collection by passive and grab sampling and extraction by reversed-phase and mixed-mode sorbents. W. Parker, K. Moffitt, A. Loftis, T.H. Boles
- CHED 415.** Identification and characterization of analyte binding sites in chiral molecular micelles. J. Ingle, K. Krause, E. Billiot, F.H. Billiot, Y. Fang, K.F. Morris
- CHED 416.** Withdrawn.
- CHED 417.** Structure relationship study comparing binding affinities of pyridine-2,6-dicarboxylic acid (DPA) with DPA derivatives to develop alternative small chelating molecules. K. Page, M. Kirkland, S.G. Tajc
- CHED 418.** Fluorescent detection of hydrogen sulfide ( $H_2S$ ). M. Maher, D. Newman, K. Peterson
- CHED 419.** Spectrophotometric method for the determination of nitrite with a single reagent. D.A. Habboush, R. Alahmadi, S. Alsenani
- CHED 420.** Performance enhancing supplements: Do we need stronger regulations? K. Baran
- CHED 421.** Derivatization, DLLME, and GC-FID analysis of mercury in fish tissue. A. Narro, L.A. Curry
- CHED 422.** Effect of pH on properties of amino acid based surfactants. Z. Ramos, C. Lewis, E. Billiot, F.H. Billiot, K.F. Morris
- CHED 423.** Spectroelectrochemical analysis of trace metals in gunshot residue. C.E. Ott, J.N. Richardson
- CHED 424.** Preparation of organo-silica monolithic columns for applications in capillary liquid chromatography using thiol-ene click reaction. A. Burkus-Matesevac, Z. Zajickova
- CHED 425.** Theoretical analysis of the standard reduction potential for the irreversible redox process of methionine. R. Krupa, J. Roberts, L.A. Sombers
- CHED 426.** Testing agreements between NMR and mass spectrometry HX method. L. Downer, M. Weerasinghe, D.D. Weis
- CHED 427.** Using High Pressure Liquid Chromatography (HPLC) for the analysis of artificial sweeteners and caffeine in soft drinks, carbonated waters, and singles to go packets. D. Martin, R. Chinni
- CHED 428.** Development of a paper-based analytical device for heparin. C. Norris, J.M. Esson
- CHED 429.** GC-MS analysis of Chinese baijiu liquor flavored as American bourbon whiskey. C. Nowlin, R.L. Silvestri
- CHED 430.** Production and analysis of aluminum fluoride phosphate glasses synthesized by a sol-gel method. J. Fletcher, C.B. Brennan, N. Marrero-Silva

- CHED 431.** Fixed-time kinetic spectrophotometric determination of biotinylated aptamers. **B. Mandella, D. Spikerman, A.G. Cavinato**
- CHED 432.** Degradation of tetracyclines in anaerobic digestion using solid phase extraction and HPLC. **C. Cruse, E.D. Conte, A.J. Abdurheem, C. Fullington**
- CHED 433.** Study of L-phenylalanine-based ionic liquids as stationary phases for GC. **K. Raut, I. Kimaru**
- CHED 434.** Determination of the dissociation constants of triprotic acids with broadly ranging  $pK_a$ s. **H. Do, G.Z. Goloverda, V.L. Kolesnichenko**
- CHED 435.** Determination of BAC in varying hemoglobin levels. **K. Klein, K. Opel**
- CHED 436.** Detection and quantification of amphetamine in buried rat brain, heart, and liver at different stages of decomposition. **C.R. Mendralla, K. Scott, M. Drumm**
- CHED 437.** Optimizing cloud point extraction for stripping anodic voltammetry of transition metals. **C. Quartermaine, M. Hawkins, C.A. Rusinek, A.F. Bange**
- CHED 438.** Withdrawn.
- CHED 439.** Towards an arsenic-specific aptasensor based on AuNPs/thiol interactions. **K. Vega-Figueroa, I. Mayorga, A. Rivera, E. Nicolau**
- CHED 440.** Analysis of catalytic isomerization and degradation of methyl-parathion by mixed metal oxide nano-fibers using LC-MS methods. **M.M. Allard, C.C. Perry, S. Merlos**
- CHED 441.** Analysis of kinase substrate peptides by capillary electrophoresis. **S. Cook, C.T. Culbertson**
- CHED 442.** Survey of the chemical and physical properties of deep eutectic solvents. **A. Beyer, J. Salazar, M.E. Johl**
- CHED 443.** Spectroelectrochemical determination of lead and zinc through attenuated total internal reflectance stripping voltammetry. **R.J. Shaffer, J.N. Richardson**
- CHED 444.** Analysis of fish oil supplements for omega-3 content and heavy metal contamination. **V. Stafford, J.R. Williams**
- CHED 445.** Electrochemical properties of amines on planar platinum surfaces. **K. Wong, M. Ma, E.C. Landis**
- CHED 446.** CO-extraction of lead and cadmium by cloud point extraction as a pre-concentration method for analysis by square wave stripping voltammetry. **M. Hawkins, C. Quartermaine, A.F. Bange, C.A. Rusinek**
- CHED 447.** Design and development of sarcosine sensors utilizing nanomaterials. **E. Doll, N. Labban, M. Pannell, H. Kerins, M.B. Wayu, J.A. Pollock, M.C. Leopold**
- CHED 448.** Extraction and analysis of agarita (*Mahonia trifoliolata*). **M.A. Boyle, N.A. Leed, B. Leverett, B. McBurnett**
- CHED 449.** Comparison of the caffeine content of popular brewing methods. **T.L. Self, K. Cossey, C. Mills**
- CHED 450.** Determination of illicit drug metabolites in wastewater using GC-MS following a Dean-Stark extraction. **M. Wiernusz, G.P. Foy**
- CHED 451.** Determination of cadmium in water samples by spectrophotometric methods. **T. Rutherford, S. Hubbard**
- CHED 452.** Design of the time-of-flight mass spectrometer using chemically developed semi-conductive electrode as a multi-potential ion guide. **D.V. Kravchuk, J. Nederhoff, M. Flesch, C. Hanson**
- CHED 453.** Minimizing diacetyl formation in beer by controlling fermentation parameters. **S.M. Brennan, R.A. Hunter**
- CHED 454.** HPLC analysis of juglone in black walnut hull supplements. **A. Dixon, Y. Liu**
- CHED 455.** Exploring Solid Phase Analytical Derivatization (SPAD) as a sample preparation method for quantitative analysis by GC-MS. **A. Bieber, Y. Mei-Ratiff**
- CHED 456.** Determination of lead concentration in water samples using spectrophotometric and electrochemical methods. **A. Engelkes, S. Hubbard**
- CHED 457.** Analysis of reducible species within natural dissolved organic matter using attenuated total reflection Fourier transform infrared spectroscopy. **D. Fleischmann, D.R. Baluha**
- CHED 458.** Comparative study of heavy metal levels in various eye cosmetic products. **A. Lipniskis, M.A. Fisher**
- CHED 459.** Applying chemistry to questions in neuroscience: HPLC-DAD/MS analysis of *Passiflora incarnata*. **K.A. Perrotta, A. Weiss, S. Cameron, A. Halpern, T. Luck, P. Maehler, A.J. Stavros, C.M. Ingersoll, J.A. Teissere**
- CHED 460.** Aptamer selection assisted by graphene oxide. **J.K. Carter, B. Mandella, D. Spikerman, A. Harris, G. Rodriguez, A.G. Cavinato**
- CHED 461.** Electrospinning of quantum dot-doped organic polymers for differential detection of targeted chemicals. **M. Lister, D. Morris, M. Hicks, J. McNeal, D.E. Riegner**
- CHED 462.** Optimization of sarcosine oxidase isolation and purification for use in amperometric biosensors. **N. Labban, E. Doll, H. Kerins, M. Pannell, W. Mulugeta, J.A. Pollock, M.C. Leopold**
- CHED 463.** Investigation of biodiesel-diesel blends using GCMS and PCA. **C. Brown, R. Dean, A.M. Hupp**
- CHED 464.** Analysis of petroleum products in lakes of the Wasatch watershed, Salt Lake City, Utah. **R.M. Hyde, L. Miller**
- CHED 465.** Enhanced reproducibility for the analysis of polycyclic aromatic hydrocarbons in river water. **D. Herrick, D.A. Carter, A. Salazar**
- CHED 466.** Molecularly imprinted polymers for dopamine recognition. **T. Cheek, G. Mwangi**
- CHED 467.** Dietary effects on urinary sulfate levels in pigs measured by a conductometric method. **J. Garcia, T.A. Parker, K.A. Guay, L.D. Schultz**
- CHED 468.** NMR spectroscopy as a screening agent for designer opioids. **M. Chambers, L. Huang**
- CHED 469.** How poisonous is milkweed? Spectrophotometric determination of cardiac glycosides in *Asclepias syriaca*. **H.G. Bowler, M.P. Gonella, M.A. Everest**
- CHED 470.** Proteomics and transcriptomics: Techniques for the discovery of neuropeptide receptors in the American lobster, *Homarus americanus*. **C.Q. Corban, P.S. Dickinson, A.E. Christie, E.A. Stemmler**
- CHED 471.** Quantitation and characterization of anthocyanins in medical cannabis flowers cultivated in eastern Oregon. **D. Spikerman, B. Mandella, R. Hunt, J. Riggle**
- CHED 472.** Surface-enhanced fluorescence enhancement studies on silver dendrites. **D. Allen, D. Rios, S. Shtoyko, S. Raut, I. Gryczynski**
- CHED 473.** Forensic discrimination and quantification of EDTA in dried bloodstains using diffuse reflectance infrared fourier transform spectroscopy, attenuated total reflectance, and liquid chromatography-mass spectrometry. **C.O. Granger, C.E. Witt, J. McOutcheon**
- CHED 474.** Polyaniline-gold nanocomposites doped with ferricyanide for electrochemical and optical biosensing measurements. **R. Quezada, R. West**
- CHED 475.** Pre-equilibration affinity capillary electrophoresis method to probe molecular interactions of heparin to histidine. **A. Schrader, A.K. Korir**
- CHED 476.** Analysis and quantification of microbeads in commercial products and the environment through FTIR spectroscopy. **J. Strickler, G.P. Foy**
- CHED 477.** Quantitative analysis of chloride concentrations by a chloride ion selective electrode and ion chromatography in southeastern Wisconsin. **M. Tveit, C.A. Blaine**
- CHED 478.** HPLC-UV and LC-MS analysis of resveratrol and piceid isomers in Japanese knotweed. **J. Luchetta, D.E. Mencer, W. Terzaghi, K. Klemow, M. Yatison, D. Pupaza, A. Mikolon, A. Ford**
- CHED 479.** Analyzing the levels of mercury (Hg) in rice and rice products consumed by residents and students in St. Lawrence County New York. **J. Wilson, N. Gao**
- CHED 480.** Identification of individuals by gas chromatography-mass spectrometry analysis of fingerprint residues. **T. Kuhns, S. Zentz, R. Thomas, K. Sarago, J. Saffle, M. Akers, D.S. Egolf**
- CHED 481.** Qualitative determination of the adherence of VOCs to building materials. **J. Turner, C.H. Lisse**
- CHED 482.** Stability of AH-7921 in polar organic solvents. **M. Murphy, H.L. Ciallella, K. Scott**
- CHED 483.** Method development for analyzing vibrational modes of unattached violin plates. **M. Flesch, J. Rollison, C. Hanson**
- CHED 484.** Stability of synthetic cathinones in beverages. **L. Rutter, K. Scott**
- CHED 485.** Analysis of heat dried blood stains through forensic blood testing and DNA profiling techniques. **B. Bosley, M. Wright, F.L. Musko**
- CHED 486.** Surface enhanced Raman spectroscopy using silver and gold nanoparticles. **E.S. Breeden, L.H. Rickard**
- CHED 487.** Vibrational spectroscopy studies of the role of water in metal ion extraction into room-temperature ionic liquids. **M.L. Rigney, M.L. Dietz, C.A. Hawkins**
- CHED 488.** NMR investigation of the effect of pH on micelle formation by an amino acid-based surfactant. **G. Rothbauer, E. Rutter, F.H. Billiot, E. Billiot, Y. Fang, K.F. Morris**
- CHED 489.** Method development for analyzing vibrational modes of violins throughout construction process. **J. Rollison, M. Flesch, C. Hanson**
- CHED 490.** Use of membrane fusion to understand the role of lung surfactant protein B in lipid trafficking. **K. Kroning, O.H. Braide**
- CHED 491.** Identification of pigments and the level of degradation in the painting Saint Peter. **D. Seigneur, S.J. Gravelle**
- CHED 492.** Detection of date rape drugs in hair using supercritical fluid extraction and gas chromatography/mass spectrometry. **J. Knudsen, G.P. Foy**
- CHED 493.** Benchtop deposition of patterned thin films of pentacene. **R. Mendoza, N. Rowland, M.V. Lee**
- CHED 494.** Influence of salt on the stability of oil-in-water emulsions containing wley protein-xanthan-locust bean complexes. **K.R. Griffin, M. Krempel, H. Khouryieh, K. Williams**
- CHED 495.** Analysis of metal content of red wines from the winemaking process by ICP-OES. **S. Kvasnovsky, G.P. Foy**
- CHED 496.** Cavity ring-down spectrometry of gas-phase ions prepared via electrospray ionization. **B. Rose, L.A. Ligon, T.G. Spence**
- CHED 497.** Supercritical fluid and organic extraction and liquid chromatographic-UV/Vis analysis of stevioside from *Stevia Rebaudiana* leaves. **L.R. Stauring, G.P. Foy**
- CHED 498.** Electrochemical studies of ferrocenyl chalcones immobilized in Nafion®. **A. Molina-Villarino, J.C. Aponte-Santini, I. Montes, A.R. Guadalupe-Quiñones**
- CHED 499.** Electrochemical water quality analysis of the Susquehanna River and Laurel Hill Creek. **S.J. Sujansky, K. Rublein, L.K. Lee**
- CHED 500.** Comparison of methods for the capture of e-cigarette emissions for the determination of constituents using gas chromatography-mass spectrometry. **C. Cummings, M. Bida, A.G. DiFrancesco, I. Rahman, R.J. Robinson, T.E. Pagano**
- CHED 501.** Top-down and bottom-up proteomics for the identification of crustacean neuropeptides and precursor-related peptides predicted by transcriptomics. **J.M. Michels, C. Rivera, P.S. Dickinson, A.E. Christie, E.A. Stemmler**
- CHED 502.** Deposition of nickel nanoparticles on carbon nano-onions via the rotating disk slurry electro-deposition technique for non-enzymatic glucose sensing. **J.J. Soto Perez, C. Vélez, C.R. Cabrera**
- CHED 503.** Sensitivity comparison of GC-MS and GC-FID/ECD. **S. Salske, K.E. Molter**
- CHED 504.** Construction and alignment of a total internal reflection fluorescence microscope. **K. Griffith, K. Fogarty**
- CHED 505.** Withdrawn.

† Cooperative Cosponsorship

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

- CHED 506.** Identification and characterization of Plutonian and Titan tholins via LDMS and  $^{15}\text{N}$  NMR. **J. Nederhoff**, D.V. Kravchuk, M. Flesch, J. Sebree, C. Hanson
- CHED 507.** Quenching of electrochemiluminescence in aqueous solution by nitrate explosives. **K.A. Abrams**, K.D. Sienerth
- CHED 508.** Determination of heavy metals in CoverGirl and Bare Minerals cosmetic product. **J. Litz**, K. Chichester
- CHED 509.** Spectroscopic and spectrometric analysis of two illuminated manuscripts from the 15<sup>th</sup> and 16<sup>th</sup> centuries. **B.R. Wydra**, A.M. Fleshman
- CHED 510.** Characterization of reactions responsible for aging in wood-based pyrolysis oil. **L.R. Nguyen**, J. Joseph, M.J. Rasmussen, P. Speight, B.G. Frederick, E.A. Stemmler
- CHED 511.** Analysis of complex molecules utilizing a 60 MHz FT NMR: How far can we push the magnet? **A. Quintero**, T. Munguia
- CHED 512.** Evaluation and refinement of the procedure used to prepare training samples for arson detection K-9s. **E.A. Chance**, S.D. Oo, D.W. Carpenetti
- CHED 513.** Analytical methods for characterization of synthesized gold nanoparticles in nonpolar solvents. **S. Bonson**, N. Orloff, P.J. Kreke
- CHED 514.** Extraction of pesticides in local and imported fruits followed by GCMS analysis. **K. Greeley**, C.D. King
- CHED 515.** Second step dissociation constant ( $pK_a$ ), and related thermodynamic quantities of TES buffer from 5 to 37°C. **Y. Kang**, T. Wehmeyer, R.N. Roy, L. Roy
- CHED 516.** Forensic analysis of trash bags: Microscopical discrimination of trash bags. **D. Daley**, M. Clothier, W. Rowe
- CHED 517.** Aptamers as versatile probes for small-molecules and nucleic acids. **A. Gee**, M. de Pina, N. Hughes, D. Daley, M.F. Ali
- CHED 524.** Effect of peptide conformational change to a solvent diffusion rate in a silica sol-gel matrix. **R. Sah**, E. Esquivel, R. Singh, K. Smyth, K. Yokoyama
- CHED 525.** Towards a bacteria retardant implant surface. **A.A. Schultz**, E.S. Gawalt, N. Reger
- CHED 526.** Extraction and identification of vitamin K<sub>1</sub> from black cohosh. **A. Jones**, P.S. Biser
- CHED 527.** Preventing gene expression through the interruption of DNA binding. **O. Perdue**, A. Stewart, A. Murray
- CHED 528.** Characterization of in vitro amyloid fibril formation from bovine serum gamma globulin using thioflavin T fluorescence and polyacrylamide gel electrophoresis. **C. Schieffer**, M.E. Lee
- CHED 529.** Expression of ER $\alpha$  and ER $\beta$  in hippocampus and amygdala during altered energy states between sexes. **M. Bhardwaj**, S. Marshall, K. Krollick, H. Shi
- CHED 530.** Drug adsorption to spherical supported lipid bilayers. **J. Yin**, A.A. Fuller, G.Y. Stokes
- CHED 531.** Effects of amyloid beta oligomers on the oxidation of lipids. **S.E. Cuddeback**, K.M. Matera
- CHED 532.** Stabilization of A $\beta$  peptide aggregates using phenolic compounds. **I.R. O'Leary**, K.M. Matera
- CHED 533.** Validation of downregulated genes and putative tumor suppressor genes in pancreatic cancer using quantitative reverse transcriptase-PCR. **W.W. Andersen**, A. Smith, K. Dhanwada, N. Goonesekere
- CHED 534.** Adenovirus mediated delivery of an engineered DNA sequence for pancreatic cancer treatment. **T. Becker**, M.A. Kennedy
- CHED 535.** Expression and purification of glutathione reductase of *Plasmodium falciparum*. An antimalarial drug target of Methylene Blue (MB). **R. Mowmn**, N. Prieto
- CHED 536.** Early detection of pancreatic cancer. **A. Rivers**, M. Veite, M.A. Kennedy
- CHED 537.** Sunscreen chlorination alters its absorptive properties. **A.A. Pohl**, G.H. Purser, R.J. Sheaff
- CHED 538.** Effects of chromium-binding peptide on enzymes of the insulin signaling cascade. **L.C. Scott**, P.E. White, J.B. Vincent
- CHED 539.** Determining binding affinity of complement factor C1q and prion protein: Implications in down-regulating prion expression on Follicular Dendritic Cells. **G. Bourne**, G.F. Burton
- CHED 540.** Enzymatic hydrolysis of 2,2-diphenylethyl glucosinolate. **C.A. Klingaman**, M.J. Wagner, J.R. Mays
- CHED 541.** Withdrawn.
- CHED 542.** Chemical and bioactive capability of twenty mushroom species from the Lower Rocky Mountain region. **O.Z. Schaefer**, A. Leontyev
- CHED 543.** Comparing self-assembled monolayers on gold sensor chips for surface plasmon resonance analysis. **A. Fordehase**, J.R. Williams
- CHED 544.** Use of thioredoxin solubility tag on lysyl oxidase: Effects on activity and solubility. **A. Hussain**, K.M. Lopez
- CHED 545.** Coupling qPCR to split aptamer ligation for the detection of steroid targets. **K. Jones**, E. Kimbrough, J.M. Heemstra
- CHED 546.** Membrane assisted polymerization of amino acids. **B. Malley**, S.E. Maurer
- CHED 547.** Investigations of the effects of copper(II) on *Penicillium spinulosum* chitinase activity. **B.J. Trujillo**, M. Cruz, S. Walker, S.J. Bonetti
- CHED 548.** Characterization of recombinant ENL YEATS domain and its protein-protein interaction with Paf1. **E. Peltan**, S.M. Grigsby, Z. Nikolovska Coleska
- CHED 549.** Identification of CDK and VEGFR inhibitors for the treatment of vascular pathologies. **M. Ismail**, V.C. Miles, U. Chaudhry, A. Ahmad, E. LeMelle, H. Conway, K. Lam, T. Walden, R. Komati, M. Bratton, M. Mottamal, G. Wang, H. McFerrin, J. Sridhar
- CHED 550.** Characterization of dilated cardiomyopathy linked R25 mutants of phospholamban. **M. Exline**, K. Ha
- CHED 551.** Effects of N-terminal disease mutations on HspB1 polydispersity. **R. Klevit**, A. Clouser, T.H. Chu
- CHED 552.** Magnetic silicone nanospheres for in vivo drug delivery. **K. Pieri**, B. Evans
- CHED 553.** Porphyrin-based Photodynamic Antimicrobial Chemotherapy (PACT) and its effects on various bacterial morphologies. **J.A. Smith**, C.E. Stiltz, A.M. Wilson, E.A. Dano, J.P. Rynders
- CHED 554.** Synthesis of novel cell-penetrating sequences with selective binding to Helix 69. **A. Abu-kwaik**, C.S. Chow, H. Seo, N. Muthunayake
- CHED 555.** Characterization of a human G protein-coupled receptor. **M. Doleschal**, T. Frielle
- CHED 556.** Expanding the NMR metabolome with enriched and improved growth media. **K. McMahon**, F. Bhinderwala, R. Powers
- CHED 557.** Investigation of structure/function relationships in the retaining glycosyltransferase MshA from *Corynebacterium glutamicum*. **C.M. Petersen**, P.A. Frantom
- CHED 558.** Solubility studies of a zinc-finger antiviral protein cloned with and without solubility tag. **R. Sargsyan**, D. Lawrence
- CHED 559.** Sugar metabolism in cells lacking the tumor suppressor p27kip1. **E. Loe**, R.J. Sheaff
- CHED 560.** Synthesis of solvatochromic probes to label the mycobacterial cell wall. **A. Utz**, S. Keyser, C.R. Bertozzi
- CHED 561.** Expression and purification of DPAP-1. **D. Coleman**, H. Prieto
- CHED 562.** Designing a plasmid to study long range oxidation in DNA. **M. Safaeipour**, K. Hernandez, P. Lee, E. Stemp
- CHED 563.** Incorporation of non-polar porphyrin molecules into liposomes. **S.N. Khayyo**, P.K. Kerrigan, J. Batarseh, A. Novaj, S. Maio, R. Guglielmo, V. Khayyo
- CHED 564.** Characterization of Malaria DHFR Mutants. **S. Akhlaq**, H. Prieto
- CHED 565.** Quantification of DNA products using ion-pair reverse phase liquid chromatography. **H. Wienkers**, M. Bestwick
- CHED 566.** Determining amyloidogenicity of Islet Amyloid Polypeptide (IAPP) across mammalian species. **D.A. Moffet**, E. Njoo, D. Rinauro, S. Pilcher, L. Palato, B. Johnstone, K. Menefee, A. Tun
- CHED 567.** Targeting cells lacking the p27kip1 tumor suppressor using metformin. **S. Sullivan**, R. Khattab, R.J. Sheaff
- CHED 568.** Effects of macromolecular crowding on the inhibition of malate dehydrogenase. **K. Wilber**, D.W. Seybert
- CHED 569.** Role of nitroxides in mitochondrial oxidative stress. **M. Abdulrahim**, T.E. Goodwin, A.A. Caro
- CHED 570.** Effect of oleocanthal extract from extra-virgin olive oil on the aggregation of amyloid-beta proteins. **A. Cicchini**, M.A. Fisher
- CHED 571.** Expression of myxoma virus leukemia-associated protein in the presence and absence of solubility tags. **R. Zietoon**, D. Lawrence
- CHED 572.** Using *C. elegans* as a model for avolition. **H. Sumner**, J. Scott, K. Weeks
- CHED 573.** Role of the eIF2 kinase PERK on whole body and hepatic stress responses to dietary methionine restriction. **C. Kerber**, A. Pettit, T. Anthony, E. Mirek
- CHED 574.** Engineering Taq polymerases for the reverse transcription of 2' modified DNA. **E. Lewis**, S.L. Rosenblum, H.E. Chia, A.M. Leconte
- CHED 575.** Enzyme folding improves catalytic activity of enzyme cargos in virus-like particle nano-reactors. **A. Hernandez**, D. Patterson, C. Hjorth, J. Bird, T. Douglas
- CHED 576.** Cloning and expression of *Pseudomonas aeruginosa* elastase in *E. coli* for examining inflammatory response of lung tissue. **C. Hjorth**, D. Draper, A. Hernandez, J. Bird, A. Azghani, D. Patterson
- CHED 577.** Using site-saturation mutagenesis to identify residues that contribute to cephalosporin activity in class C beta-lactamases. **S. Kim**, S.T. Lefurgy
- CHED 578.** Investigating *B. fungorum* antibiotic resistance with transposon mutagenesis. **L. Wethekam**, K.M. Specht
- CHED 579.** Cytochrome c's role in a putative apoptosis pathway of *P. falciparum*. **M. Yilmaz**, H. Prieto
- CHED 580.** Investigating the diversity of antibiotic resistance genes in cultures derived from activated sludge bacterial communities following exposure to low doses of triclosan. **B. McGivern**, J. Beni, T. LaPara, J. Donato

## Section I

Moscone Center

Hall D

### Undergraduate Research Posters

#### Biochemistry

Cosponsored by BIOL and SOCED

N. Di Fabio, Organizer

12:00 - 2:00

- CHED 518.** Determination of the menstrual cycle's effects on hemoglobin levels. **A.K. Perry**, P. Faber
- CHED 519.** Directed evolution of the haloalkane dehalogenase from *C. crescentus*. **M. Ahsan**, E.C. Mundorff
- CHED 520.** Withdrawn.
- CHED 521.** Engineering firefly luciferase for improved bioluminescent imaging. **C. Morrissey**, C. Fick, A.M. Leconte, T.S. Wu, E.A. Warner, M. Liu
- CHED 522.** Sucrose metabolism in kombucha tea. **P.R. Cheek**, J. Inlow
- CHED 523.** Investigation into the binding of recombinant intimin and translocated intimin receptor proteins involved in infection by enteropathogenic and enterohemorrhagic *E. coli*. **C. Redmond**, L. O'Brien

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- CHED **581.** Ficoll induced aggregation in bovine serum albumin and not B-phycoerythrin. K. Blake, H. Boukari, M.J. D'Souza, Z. M'rah, E. Jhamba
- CHED **582.** Exploring the interactions of cytochrome c with diacylphosphatidylglycerol lipids. B.M. Abbott, J.J. Breen
- CHED **583.** Retinoic acid receptor gamma reciprocally regulates cellular adhesion and proliferation in K562 cells. V. Niedzwiedz, R. Mayo, M.D. Kelley
- CHED **584.** Analysis of the NF- $\kappa$ B transcription factor in the endangered coral *Orbicella faveolata*. E.G. Salas, L. Williams, T. Gilmore
- CHED **585.** Role of phosphorylation in lipid droplet protein activity. P. Stangl, A.K. Stoeckman, D. Mashek
- CHED **586.** Synthesis of syndecan 1 vector and its effect on the metastasis signal. N. Nemmers, D.C. Speckhard
- CHED **587.** Withdrawn.
- CHED **588.** Experimental measurements of protein electrostatics in GFP using vibrational Stark effect spectroscopy. D. Fernandez, C. Lum
- CHED **589.** Role of IL-17a in fecal microbiota transplant mediated clearance of *C. Difficile* infection. M.S. Saffern, E.G. Pamer, M.C. Abt
- CHED **590.** Math anxiety and cortisol as a biomarker. M.A. Davis, C. Lechak, D. Bateman
- CHED **591.** Protein dynamics in Superoxide Dismutase (SOD1). L. Cervantes, E. Healy
- CHED **592.** Analysis of novel inhibitors of *Borrelia burgdorferi* BGP protein: Potential new antibiotics to treat Lyme disease. T. Firica, E. Lines, J. Gonzalez, S. Schwarz, J.H. Thurston, D. Xu, K. Cornell
- CHED **593.** Analysis of microbial changes in the human oral cavity. Z. Weiss, K. Opel, D. Singleton, B. Gray
- CHED **594.** Investigations of the unique farming behavior of *Dictyostelium discoideum*. M. Van Horn, L. Morris, P.L. Kuhlman
- CHED **595.** Analysis of emergent electronic properties of self-assembling nucleopeptides. S. Brown, S. Singh, P. Patra, J.E. Smith-Carpenter
- CHED **596.** Specifically targeting cells lacking the tumor suppressor p27kip1 using metabolic inhibitors. J. Parackal, R.J. Sheaff
- CHED **597.** Evolution of membrane stability in the origins of life. T. Zaniewski, S.E. Maurer
- CHED **598.** Gas chromatography-mass spectrometry analysis of oxidation-reduction products of cholesterol in M624 human melanoma cells. A. Garlow, K.S. George Parsons
- CHED **599.** Identification of Nonribosomal Peptide Synthetase (NRPS) enzymes to find naturally occurring secondary metabolites. J. Kolasinski, W. Lloyd, J. Donato
- CHED **600.** Detection and analysis of glyoxylic acid uptake in *Calliphora vomitoria* larvae. H. Byczynski, A.L. Smalley
- CHED **601.** Design of dimethoxytrityl derivative to improve the selectivity in RNA phosphoramidite. A.M. Hodge, V.K. Dunlap
- CHED **602.** Broadening the scope of sortase-mediated ligations using natural sortase homologs. N. Horvath, K. Nikghalb, J. Prelesnik, P. Filipov, J. Antos
- CHED **603.** Apoptotic cascade: The role of metal ions on caspases. C.C. Williams, M. Davis Mcgibony
- CHED **604.** Effects of chelation of Fe(II) and Fe(III) by melanin films on electrochemical characteristics for Parkinsonism disease applications. C. Schinnerer, G. LeBlanc, G. Ludewick, H. Fisher
- CHED **605.** Determination of phosphorylation site on Vascular Endothelial cadherin (VE-cadherin) using mass spectrometry. M. Dolan, C. Minogue
- CHED **606.** Interaction of a water-soluble porphyrin with various DNA sequence: A spectroscopic study. M.K. Wright, J. McCue, S.M. Basu
- CHED **607.** Measurement of beta-oxidation catalyzed by lipid bodies of *Brassica napus* using HPLC. C.M. LaRussa, G.A. Giles
- CHED **608.** Structural analysis of neurotransmitter-stabilized A $\beta$  oligomers. M. Alinutt, K.M. Matera
- CHED **609.** Cytotoxicity of novel naphthoquinones. A. Rowe, J. Alao, J.C. Dicesare, R.J. Sheaff
- CHED **610.** Altering the conformational ensemble of the calmodulin binding protein PEP-19. D. Ordonez, N. Rathke, C. Mitchell, T. Dunlap
- CHED **611.** Deoxyribozyme Sero1C and photoreversion of cytosine dimers. R. Sapia, Y. Gerasimova
- CHED **612.** Catalytic activity and thermal stability of chymotrypsin encapsulated in self-assembled lithocholic acid nanotubes. L. Stiff, Q. Lu, G.E. Collins, R.L. Siefert
- CHED **613.** Interaction points between stromally exposed CpTatC and precursor signal peptide. G. Thomas, A. Habtemichael, C. Dabney-Smith
- CHED **614.** Characterization of jhp0715, a putative member of the futasoline pathway in *Helicobacter pylori*. C. Khalil, A. Roberts
- CHED **615.** Investigation of the structural features necessary for a positive THC assay. Z. Zhou, C. Lassiter, B.L. Martinez
- CHED **616.** Investigation of human pol eta's role in translesion synthesis past cisplatin-induced DNA damage. K. Bryson, S. Lone
- CHED **617.** Synthesis of chitosan coated nanodiamonds to prevent *Staphylococcus aureus* and *epidermidis* infection in bone implants. P.O. Méndez, E. Nicolau, J. Santillan, V. Ortiz, Y. Rodriguez
- CHED **618.** Development of an undergraduate peptide synthesis lab for organic and biochemistry courses. S. Bingaman, B.M. Day, J.F. Larrimore, M.J. Crawford
- CHED **619.** Cloning isoprenoid synthesis genes from *Thermoplasma volcanium* using the FX-cloning method. O. Blomquist, C. Banach, J.A. Himmelberger
- CHED **620.** Withdrawn.
- CHED **621.** Impact of BosR mutations on its DNA binding properties. S.E. Evans, D. Xenos
- CHED **622.** Development of a sensitive assay to detect tRNA modifications in cell culture. J.B. Mamaril, T.R. Vornheder, J. Burchett, M.P. Guy
- CHED **623.** Characterization of a terpene synthase from *Fischerella muscicola* PCC 9339. S.D. Knapic, M.L. Hillwig
- CHED **624.** Examining the effect of insulin on membrane association of islet amyloid polypeptide. E. Hegedus, M. Gessel
- CHED **625.** Characterization of a haloalkane dehalogenase superfamily enzyme from *Mycobacterium tuberculosis*. G. Kaur, A. Roberts
- CHED **626.** Development of a fluorescence assay for the evaluation of nucleotide-analog incorporation during the elongation stage of RNA synthesis by hepatitis C virus NS5B RNA polymerase. M.N. Kenyon, M.L. Hillwig
- CHED **627.** Withdrawn.
- CHED **628.** Differential carbon metabolism in cells lacking the tumor suppressor p27kip1. K. Counter, R.J. Sheaff
- CHED **629.** Directed evolution of haloalkane dehalogenase from *Caulobacter crescentus* towards smaller, chlorinated substrates. M. Rahman, Y. Xiong, E.C. Mundorff
- CHED **630.** Low level DNA analysis from public and private surfaces by real time PCR. C. Bowman, K. Opel
- CHED **631.** Macromolecular crowding effects on Lactate Dehydrogenase (LDH). S.A. Shaik, D.W. Seybert
- CHED **632.** Withdrawn.
- CHED **633.** Imatinib activity against cells lacking the tumor suppressor p27kip1. A. Lignieres, R.J. Sheaff
- CHED **634.** Analysis of carbohydrates in the beer brewing process using HPLC. K. Alderfer, N. Fresco, J.A. Himmelberger
- CHED **635.** Development and identification of affibody molecules that target crotalid snake venoms. A.F. Sullivan, M. Sudduth, K.A. Noren, C.J. Noren, E. Osborne
- CHED **636.** Characterization of methylenetetrahydrofolate reductase oligomers utilizing hydrogen/deuterium exchange coupled with liquid chromatography and mass spectrometry. C. Jeon, E.E. Trimmer, E.M. Marzluff
- CHED **637.** Investigating mycobacterial L,D-transpeptidases in cell wall biosynthesis. R.L. Marshburn, L. Basta
- CHED **638.** Applying FRET to quantify dimer swapping in the auxin signaling pathway. M. Chiriboga, K. Piemonte, O. Charawi, J.P. Ellis
- CHED **639.** Analysis of mutations in *E. Coli* carbamoyl phosphate synthetase I. B.J. Davis, B.A. Smith
- CHED **640.** Biological effects and chemical aspect of Peruvian teas. S. Jimenez, E. Davis, L. Nogaj, S. Deprele
- CHED **641.** Aggregation mechanisms of amyloid-beta and insulin. V. Grove, K.M. Matera
- CHED **642.** Effect of combination disulfiram-copper treatment on ARV-7 expression in castration-resistant prostate cancer. Y.K. Elghoul, Q. Dou
- CHED **643.** Synthesis of a series of 2-acetyl-thiazole thiosemicarbazone ligands and their characterization by NMR spectroscopy and MIC studies. A.K. Buckner, A.R. Nesbitt, E.C. Lisic
- CHED **644.** Investigation of varying metal organic frameworks for the use as a slow release mechanism for insulin. W. Adrian, Z. Mensing
- CHED **645.** Oxidative DNA-protein crosslinking induced by oxidation of 8-oxoguanine by Os(phen)<sub>2</sub>dppz<sup>3+</sup> via the flash-quench technique. M. Safaeipour, E. Kroll, J. Dominguez, E. Stemp
- CHED **646.** Classifying the mode of inhibition of DNA methyltransferase inhibitors. J. Hoover, M.A. Fisher
- CHED **647.** Biological characterization of novel naphthoquinones as potential chemotherapeutics. R. Bacani, J. Alao, J.C. Dicesare, R.J. Sheaff
- CHED **648.** Investigation of the structure and function of P-Rex2: Implications for a molecular mechanism of PTEN inhibition. T. Diethrich, D. Needle, S.M. Ensel, D.S. Waugh, G. Miller
- CHED **649.** Insulin effects on cell metabolism in cells lacking the tumor suppressor p27kip1. R. Khattab, S. Sullivan, R.J. Sheaff
- CHED **650.** Expression of antioxidants in CMV infected heart cells. I. Naron, K. Weeks
- CHED **651.** Characterization of potential allosteric effectors of bacterial MTN. K.R. Bertagnoli, S. Nick, P. Erstad, D. Xu, J.H. Thurston, K. Cornell
- CHED **652.** Effect of vitamin D3 on paclitaxel potency in triple negative breast cancer cell lines. C. Wilhelm, J. Kelts
- CHED **653.** Use of budding and fission yeast to study the roles of eukaryotic tRNA modifications. T.R. Vornheder, M.E. Thomas, K. McElheney, S. Russell, M.P. Guy
- CHED **654.** Systematic analysis of mechanisms of small heat shock protein function in *Dictyostelium discoideum*. B. Lyda, K.M. Scaglione, J. Bruns Scaglione
- CHED **655.** Validation of qPCR rapid bacterial quantification through viable *E. coli* cell count in the *Saginaw Bay Watershed*. T. Lefevre, T. Sivy
- CHED **656.** Using a fluorescent probe to monitor DNA photoadducts. L. Lin, N.J. Greco
- CHED **657.** Synthesis and photophysical evaluation of 6-aryl-2'-deoxyuridine nucleosides. F. Balarezo, N.J. Greco
- CHED **658.** Interactions of the fragile X mental retardation protein with BACE1 mRNA and miR-124-3p. P. Zakutansky, M. Mihailescu
- CHED **659.** Exploring the role of Gln120 in *Enterobacter cloacae* P99 cephaloporphinase by site-saturation mutagenesis. A. Brodovskaya, S.T. Lefurgy
- CHED **660.** Incorporation of 3'OMe-NTP by mutant DNA polymerases. A. Weiden, H. Schultz, H.E. Chia, S. Rosenblum, A.M. Leconte

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

- CHED **661**. Biophysical investigation of DNA local structure. L. Radford, I.O. Okeke, M. Hatcher
- CHED **662**. Heme pocket interactions with fluoride in the hemoglobins from *Lucina pectinata*. K. Frankenfield, K. Williams, D.M. Rivera, J. Lopez Garriga, J. Cerda
- CHED **663**. Effect of the plant polyphenols on CYP2E1-dependent oxidative stress. N. Horan, A.A. Caro
- CHED **664**. Role of copper and tor signaling in reactive oxygen species induced cell aging. M.E. Walsler, M. Bestwick
- CHED **665**. Effect of mitochondrial CYP2E1 overexpression on mitochondrial oxidative stress in HepG2 cells. P. Gitz, A.A. Caro
- CHED **666**. Quantification of the in vitro inhibitory effects of the Erythrina crista-galli lectin on HIV-1 reverse transcriptase. M. Vazquez Camacho, R. Ynalvez
- CHED **667**. Effect of exogenous testosterone administration on blood DHT levels and prostate hyperplasia in adult male mice. J. Angelillo, B.A. Davis
- CHED **668**. Monitoring *htrA* RNA thermometer activity using a  $\beta$ -galactosidase assay in *Escherichia coli*. Y. Nguyen, R.M. Mitton-Fry
- CHED **669**. Quantifying risk factors for Alzheimer's disease using neuroimaging data. L.D. Bienski, O. Alzate, L. Smith, R. Barbosa, L. Rattanavong
- CHED **670**. Selectivity of protein sulfhydrylation. T. Johnson, C. Kevill, X. Shen
- CHED **671**. Analysis and assignment of the  $^1\text{H}$ - $^{15}\text{N}$  HSQC of the PDZ-1 domain from zonula occludens protein 1. L. Morin, M. Wheelock, T. Steele, A. Long, A.L. Jansma
- CHED **672**. Expression of a membrane protein mutant in *Burkholderia cenocepacia*. C. Barcelo, K.M. Specht
- CHED **673**. G-quadruplex specific ligands attenuate supramolecular G-DNA assembly. E.M. Kalb, T.C. Marsh
- CHED **674**. Role of metformin binding in reducing the extent of nonenzymatic glycation of albumin. A. Jensen, M. Finkbeiner, S. Becker, R.W. Holman, K. Rodnick
- CHED **675**. Stimulation of human 8-oxoguanine DNA glycosylase by AP endonuclease: Effect of polymorphisms. E. Klein, K.A. Haushalter
- CHED **676**. Effects of  $\Delta\text{tor}1$  on yeast longevity via chronological lifespan assay. A. Keyes, M. Bestwick
- CHED **677**. Nanoscale modifications to the RsaA S-layer protein enhance lead binding in whole cells. A. Coblenz, K. Templeton, E. Bailey, C. DeAlba, W. Jenkins, J.A. Cappuccio
- CHED **678**. Binding of small aromatic molecules to phytochemical capped gold nanoparticles. N. Anderson, M.A. Fisher
- CHED **679**. Antibacterial activity studies of 2-[[4-(1-methylethyl) phenyl] methylene]-hydrazinecarboxamide in *Escheria coli*. K. Fernandez, T. Munguia
- CHED **680**. Effects of membrane composition on pore-forming polypeptides. Z. Maxwell, S. Swain, M. Gessel
- CHED **681**. Electrochemical studies of L-cysteine/zinc interactions in aqueous media. M. Doan, G.T. Cheek
- CHED **682**. Determination of the molecular pathway causing phosphorylation of zonula occludin 1 and disassembly of tight junctions in diabetes. O. Ogline, R.L. McCann
- CHED **683**. Construction of a His-tagged expression plasmid for *sfnA*B of the Staphyloferrin A biosynthetic pathway. C.A. Dombroski, J. Cederberg, D.J. Schedler, W. Kittleman
- CHED **684**. Preparation and purification of a protein kinase inhibitor-GST fusion protein for a bio-layer interferometry binding study. D. Stoesz, G. Li, G. Veglia, M.B. Neibergall
- CHED **685**. Mechanistic insight into taurine as an anti-glycation agent. S. Becker, M. Finkbeiner, A. Jensen, R.W. Holman, K. Rodnick
- CHED **686**. Viral silencing suppressor specificity for shared structures of miRNA and siRNA. A. Whitehill, J.M. Vargason
- CHED **687**. Investigating mycobacterial L,D-transpeptidases in cell wall biosynthesis. P. Stater, L. Basta
- CHED **688**. Effect of Peruvian teas on mammalian cells. D. Morales, K. Araujo, S. Deprele, L. Nogaj
- CHED **689**. Comparison of the iron oxidation mechanisms in heteropolymer ferritins of different H to L ratios. A. Farghli, M. Mehlenbacher, B. Smith, M. Poli, P. Santambrogio, P. Arosio, S. Levi, F. Bou-Abdallah
- CHED **690**. Effect of the plant polyphenol catechin on CYP2E1-dependent oxidative stress. C. Schwab, A.A. Caro
- CHED **691**. Characterization of glutathione inhibition of oxidative DNA-protein crosslinking. M. Safaeipour, J. Jauregui, S. Castillo, M. Bekarian, M. Sanchez, E. Stemp, E. Tiznado
- CHED **692**. Characterization of the malA enzyme from *Bdellovibrio bacteriovorus* through the synthesis and analysis of maltose and  $\alpha$ -methyl-glucopyranoside derivatives. J. Jepson, J.E. Hanson
- CHED **693**. Evaluation of the generation of superoxide anion by CYP2E1 using the spin probe CPH. C. Ryan, A.A. Caro
- CHED **694**. Drug binding to cytochrome P450: Sample annealing studies using EPR. D.W. White, M. Bowman
- CHED **695**. Effect of CYP2E1 overexpression on mitochondrial biogenesis in HepG2 cells. L. Davis, A.A. Caro
- CHED **696**. Baculovirus expression, amplification, and protein purification of recombinant rat serotonin transporter containing a single point-mutation for future crosslinking studies. E. Cooper, E. Castellano, M. Cascio
- CHED **697**. Docosahexaenoic acid induces mitochondrial biogenesis in HepG2 cells that overexpress cytochrome P450 2E1. J. Anderson, A.A. Caro
- CHED **698**. Withdrawn.
- CHED **699**. Investigating the growth rate of MntH knockout mutant of *E. coli*. A. Edobor, M. Nguyen, B. Cadena, D. Duran, P. Lee
- CHED **700**. Metal ion cofactor requirements for snake venom phosphomonoesterase. I. McVinney, R.A. Kopper
- CHED **701**. Elucidating structure-function relationships of the phosphorylated human protein MEK1 through the integration of biotechnologies. A. Gallant, S. Aiello, A. Ringer McDonald, J. Oza
- CHED **702**. Inhibition of oxidative DNA-protein crosslinking via vitamin C. M. Serrano, M. Martinez, P. Perez, E. Kroll, J. Ordenana, E. Stemp
- CHED **703**. Over-expression and purification of *E. coli* recombinant protein RecR and its interlocking mutants using various protein chromatographic methods. S. Koo, C. Jaipersaud, J. Trabucco
- CHED **704**. Withdrawn.
- CHED **705**. Benefits of floatation tanks as novel tools for stress reduction. T. Makkapati, P. Lin, C. Wohlrab, J. Feinstein, A. Alarbi, W. Potter
- CHED **706**. Purification of horseradish peroxidase for biochemistry lab. N. Lo, A.L. Miller
- CHED **707**. Expression, purification, and characterization of codon optimized DszB from *N. asteroides*. K. Idrizi, D. Hoang, J. Gumpf, L.M. Watkins
- CHED **708**. Structural, enzymatic, and inhibitory study of *M. tuberculosis* Rv3802c. C.M. Schreidah, C.M. Goins, D.R. Ronning
- CHED **709**. Novel heme-anion complexes of cytochrome c'. C. Norman, B.N. Mees, J. Vardenega, C. Mitchell, D. Bedolla Sotelo, B. Mandella, Z. Nilsson, C. Andrew
- CHED **710**. Two-dimensional analysis of apolipoproteins using gel electrophoresis and SDS-PAGE. N.B. Nguyen, R. Chandra
- CHED **711**. Mechanism of oxygen reduction in copper amine oxidases. K.E. Gazica, M.M. Saugstad, S.A. Mills
- CHED **712**. Effect of  $\text{Ca}^{2+}$  signaling on Rho GTPases during neuroregeneration. J. Tobin, B. Avery
- CHED **713**. Determining which part of the region between the GlnS and ChiP genes downregulates *rhoS* in *Escherichia coli*, TsiR or the 5' UTR of ChiP. C. Diop, C. Peterson
- CHED **714**. Cloning and expression of the predicted aspartate hydroxylase ORF1 from *Streptomyces verticillus*. P. Nguyen, C.T. Calderone
- CHED **715**. Synthesis of sulfated sialic acid glycodendrimers to interfere with bacterial biofilm formation. R. Suasin, K.D. McReynolds
- CHED **716**. Withdrawn.
- CHED **717**. In vitro analysis of the thyroid hormone receptor in mitochondrial transcription. D. LeGrady, M. Bestwick
- CHED **718**. Site-Directed mutagenesis in the rat serotonin transporter. K. Spirik, M. Cascio
- CHED **719**. Exploration into preventing bacterial adhesion on nitric oxide releasing polymers. L. Paricio, B.H. Neufeld, M.M. Reynolds
- CHED **720**. Withdrawn.
- CHED **721**. Effects of porphyrins as photodynamic agents. T. White, J.E. Bradshaw, T.E. Hayes
- CHED **722**. Male sex hormones regulate human endothelial nitric oxide synthase system through the modulation of cationic amino acid transporter-1. L. Levy, D.W. Estes
- CHED **723**. Antibacterial assessment of cyclogossine A, a cyclic heptapeptide from *J. gossypifolia*. E. Barksdale, C.L. Telzow, A.J. Wommack
- CHED **724**. Structural analysis of novel inhibitors through docking of homology modeled yeast  $\alpha$ -glucosidase. J. Turner, S. Kennedy
- CHED **725**. Investigating inhibitor resistance to proteasome subunit Rpn13. T. Engdahl, P. Dickson, T.J. Kodadek
- CHED **726**. Proteases in venomous snake species of Arkansas. A. Katke, R.A. Kopper
- CHED **727**. Developing an efficient method for the incorporation of a series of fluorotyrosines in peptides via solid phase peptide synthesis. N. Chau, A. Colla, J.P. Schwans
- CHED **728**. Analysis of UV degradation of amino acids in membranes. R. Bowman, S.E. Maurer
- CHED **729**. Pulse amplitude modulation fluorometry as a means to determine photosynthetic modes of *Chlorella vulgaris*. P.E. Adkins, D. Kolling, B. Woodworth, A. Holland, A. Stevenson
- CHED **730**. TEV mutant production. L. Hongsermeier, D.C. Speckhard
- CHED **731**. Analysis of tyrosinase inhibition with extracted catechins from gray smith apples. S. Maxwell, R.E. Riggsby
- CHED **732**. Biosynthetic study of the formation of the azinomycin epoxide moiety. M. Antoniv, C. Watanabe
- CHED **733**. Engineering metalloproteins for fuel catalysis using SLICE and CHIP template. E. Reale, J. Kleingardner
- CHED **734**. Rationally designing DNA polymerases for 2'-modified DNA synthesis. S. Rosenblum, H.E. Chia, E.L. Lewis, M. Liu, M. Cao, A.M. Leconte
- CHED **735**. Bacterial growth studies of gut microbes including *Lactobacillus rhamnosus* GG and *Escherichia coli* HS using UV-VIS spectrophotometry and Quantitative PCR (QPCR). D. Parikh, K. Djambazova, P. Aggarwal, S. Kim
- CHED **736**. Expression of periplin 2 in *Escherichia coli* and purification by nickel affinity chromatography. A. Clements, A.K. Stoeckman, C. Najt, M.B. Neibergall
- CHED **737**. Characterization of 1-amino-9,10-anthraquinone in the A<sub>1</sub> site of PS I complexes of the plastoquinone-containing mutants of *Synechocystis* sp. PCC 6803. A. Montoya, P. Kerns, E. Gosselin, T.W. Johnson
- CHED **738**. Redox regulation of plasmid copy number and conjugative transfer. A. Bruefach, B. Buttaro

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

CHED **739.** Structural investigations on ER membrane complex subunit 9. S. Conticello, C. Murphy, K.R. Gallagher

CHED **740.** Development and analysis of a novel protein fusion system for the expression and purification of proteins. C.G. Toomey, C. Chant, A. Chant

CHED **741.** Methods of expression and purification of PEP-19: A calmodulin binding partner. C.D. Mitchell, T. Dunlap

CHED **742.** Regulation of tumor suppressor p27kip1 by transglutaminase. R. Al-Refai, R. Patel, L. Zhang, R.J. Sheaff

CHED **743.** Inhibition of oxidative DNA damage via green tea. P. Perez, M. Serrano, M. Martinez, E. Kroll, J. Ordenana, E. Stemp

CHED **744.** Weight of fatty acids: An examination of a high-fat diet and cognition. D. Williams, A. Darkazalli, J. Boggs, L.A. Zuraw, C. Sims-Robinson

CHED **745.** Altering the conformational ensemble of Pep-19 using calcium. N. Rathke, T. Dunlap

CHED **746.** Effect of Rad 23 selectivity to polyubiquitin chain linkage on Far-1 degradation in yeast. Y. Liu

### Undergraduate Research Posters

#### Biotechnology

Cosponsored by BIOT and SOCED

N. Di Fabio, Organizer

#### 12:00 - 2:00

CHED **747.** Preparation and study of protein-based nanotechnology for cost-effective water treatment. T. Mai, K. Duran, D. McWhinney, J. Hollingsworth

CHED **748.** Development of a low-cost molecular cloning vector for easy pathway overexpression in *E. coli*. C. McCutcheon, J.A. Jones

CHED **749.** Expression in *E. coli* and purification of full-length or partial *Medicago truncatula* cDNA-encoded Anthocyanin Reductase (ANR) using MBP fusions. P.S. Whitehead, E.P. Landers, L. Chandler, N.L. Paiva

CHED **750.** Low-cost modification of a lab scale bioreactor to simulate oxygen gradient heterogeneities present in large scale industrial bioreactors. A. Armstrong, I.M. Reizman

CHED **751.** Diversity of predator-escape behaviors and habitat influences on hindlimb skeleton morphology. A. Biyari, E. Dewar

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

CHED **752.** Electronic signatures of nucleobase codons in single-walled carbon nanotubes for rapid genome sequencing. A. Ortiz, M. Dorco

CHED **753.** Development of cell based microfluidic devices to study the effect of alcohol on C2C12 muscle cell differentiation. E.L. Smith, A. Sarangan, O. Kielbasa, J.E. Smith

CHED **754.** Development of split-protein biosensors for the detection of DNA. P.V. Halas, E.K. Dell, S.C. Meyer

CHED **755.** Constructing peptide-based molecular building blocks for the controlled assembly of nanomaterials. J. Bird, L. Laperriere, H.N. Gray, S.C. Butler, D. Patterson

CHED **756.** Synthesis of functionalized NBD-556 for the binding of HIV-1 gp120 on a solid support. J. Cuyler, S.G. Tajc

CHED **757.** Protein-Polymer conjugates using grafting-to and grafting-from approaches. M. Paeth, M. Lucius, D. Konkolewicz

CHED **758.** Expression of site-specifically phosphorylated reflectin A1 via an expanded genetic code. B. Concepcion, M. Kamranikia, R. Levenson, D. Morse, J. Oza

CHED **759.** Metabolic engineering in cyanobacteria: Utilizing quorum sensing to control production of 2,3-butanediol. J. Beauchamp, A. Carroll, M. Kanno, S. Atsumi

CHED **760.** Cobalt electron mediators for use in Photosystem-I biophotovoltaics. M. Alarcon, N.G. Brady, M. Vaughn, B. Bruce, J.J. Bergkamp

CHED **761.** Biosynthesis of polyhydroxyalkanoate with *Pseudomonas putida*. M. Cheung, M. Mendoza, I. Alanis

## Section I

Moscone Center  
Hall D

### Undergraduate Research Posters

#### Chemical Education

Cosponsored by SOCED

N. Di Fabio, Organizer

#### 12:00 - 2:00

CHED **762.** Learning in the moment: Identifying and improving student conceptual knowledge construction in general chemistry. B.L. Minshall, J.H. Torres King, E.J. Yezierski

CHED **763.** Etching of metals by chemical and electrochemical methods: A laboratory activity for middle and high school students. B.O. Wise, G.B. Freese, K.W. Kittredge

CHED **764.** Educational study on the use of models to teach molecular shape. D. Dils, L. McAfee, B. Adair, L.A. Zuraw

CHED **765.** Guided inquiry approach to design student-friendly coupling methods for 2,2'-bipyridines as precursors for Ru-complexes. E. Rinaldi, B. Aukuszi

CHED **766.** Quantitative analysis of the impact of classroom salon on introductory chemistry student performance. B. Walters, A. Blecking

CHED **767.** Design elements of online learning systems that increase student use and perceptions of optional online study materials. C. Hansen, R. Bodilly, R. Sansom

CHED **768.** StudentsGiveHope.org: A platform for S.T.E.M. education, inspiration, and student-led medical innovation. B.M. Samudio, H. Lakkis, A. Nicholas, C. Billings, F. Abbott, J. Idrovo, J. Schaffer, L. Mergens, M. Lozanchik, P. Kim, T. Yamanishi, T. Kirkevold, Y. Lakkis

CHED **769.** Novel stereochemistry experiment for sophomore organic chemistry lab. A.A. Seba, J.E. Blue, A. Burns, H. Hall, C. Nicholson

CHED **770.** Students' perception of how science writing heuristic pre-labs prepare them for lab. N. Bonde, D.I. Del Carlo

CHED **771.** Evaluation and improvement of online homework for foundations of inorganic chemistry. M. Strumolo, S.G. Sobel

CHED **772.** Examining ink and paper chemistry in middle and high school chemistry. G.B. Freese, B.O. Wise, K.W. Kittredge

CHED **773.** Use of *in silico* Structure Activity Relationship (SAR) project in medicinal chemistry course at Winona State University: Molecular docking simulation and analysis of human dopamine D3 receptor-rotigotine analog binding. T. Provost, M.E. Lee

CHED **774.** Measuring learning outcomes in chemistry outreach in K-6 elementary school students. M. Nafea, M. Tomaraei, R. McFarland, R. Ali, P. Robinson, D. West, P.J. Iles, R.V. Valcarce, L.D. Giddings, N.R. Bastian, M. Alvarez, R. Holcomb

CHED **775.** 3-D printed macroscopic model of an atomic force microscope. D. Gruber, T.J. Perez, W.J. Miller

CHED **776.** QR codes as a conduit to assess student comprehension of real-world applications of first semester freshman level chemistry concepts. F.M. Yarbbery, S.G. Freyaldenhoven, M. Massey

CHED **777.** Single vs. mixed approaches to form colored silver nanoparticle films. H. Skipper, M. Roca

CHED **778.** Using screencasts and simulations to help chemistry students understand chemical kinetics. M. Biesbrock, D.G. Herrington, J.R. Vandenplas, R.D. Sweeder

CHED **779.** Empowering undergraduates to be green chemistry ambassadors through community outreach. M.C. Enright, C. Hsu

CHED **780.** Faculty expectations for meaningful learning in the undergraduate chemistry laboratory: How do students' experiences compare? J. Orzel, E. Gross, K.R. Galloway, S. Bretz

CHED **781.** Eliciting higher order reasoning in the chemistry laboratory. K. Collins, R. Sansom

CHED **782.** Green, cascade synthesis of a grandifloracin precursor: An undergraduate experiment. G.G. Castro, D.A. Vosburg

CHED **783.** Impact of chemistry/mathematical video-lectures on student-based learning in a freshman level chemistry course. F.M. Yarbbery, A.H. Stebbins, L. Christman

CHED **784.** Inter-institutional collaborative chemistry assignments. T.K. Chasteen, C. Egler, L.A. Morsch, B. McCollum, D. Skagen, B. Shokoples

CHED **785.** Construction of a low-cost LEGO microcomputer controlled visible absorption spectrometer. M. Buell, D. Albert

CHED **786.** Effect of video-based instruction on student performance in a college chemistry laboratory. F.M. Yarbbery, K. Walden, M. Massey

CHED **787.** Pedagogical analysis of exam question format of multiple choice or open response in organic chemistry. K. Tang, S. Xie

CHED **788.** Examining the connection between what the team members of an interdisciplinary collaboration identified as their goals and how they thought those goals should be evaluated: The ChAnGE Chem project. S. Barakat, N. Millicik, M. Orgill

CHED **789.** Exploring standards and standardization in the physical chemistry laboratory. M.E. Gasbarre, B. Ramos, C.J. Hayes

CHED **790.** Thermoelectric generators and Peltier coolers for the physical chemistry teaching laboratory. J.R. Frey, R.J. Noll

CHED **791.** Generation of nitrosyl and nitril halides using heterogeneous reaction chemistry: A spectroscopic and computational project for the physical/atmospheric chemistry laboratory. T.M. Sytsma, A. Li, J.A. Ganske

CHED **792.** Heat capacity ratio measurement. T. Adams, B. May

CHED **793.** Investigating students' choice of representations for problem solving in organic chemistry. M. Plekker, J.R. Vandenplas

CHED **794.** Synthesis of fluorescein and other dyes for spectroscopic analysis. P. Ruffier, D.B. Cordes

CHED **795.** Investigating how chemistry teachers change the use of Johnstone's levels in their descriptions of practice during a longer-term professional development program. N.W. Spurgus, D.J. Frank, J.M. Pratt, E.J. Yezierski

CHED **796.** Validation of acetaminophen using HPLC, an undergraduate experiment. N. Akanda, J. Zhang

CHED **797.** Development of instrumental analysis lab experiment for the determination of organo-arsenic compounds. S. Goldsberry, B.M. Hopkins

CHED **798.** Investigation of analgesic separations: A forensic case study. R. Davies, A.M. Hupp

CHED **799.** Development of high performance liquid chromatography methods for a Waters Alliance 2695 running Empower 3 software. S. Shreiber, T.E. Dermota

CHED **800.** Everything but the kitchen sink! Development of an analytical chemistry capstone lab testing student understanding of course topics. E. Lewis, J.A. Goodnough

CHED **801.** Chemistry in television. C. Albrecht, S. Wuerz

CHED **802.** Analytical chemistry and public perception. M. Montes, S. Wuerz

CHED **803.** Myths and misunderstandings in chemistry. C. Ryan, S. Wuerz

CHED **804.** Environmental footprint of drinking water. C. Aparicio, S. Wuerz

CHED **805.** Water taste and water quality. G. Reyes, S. Wuerz

CHED **806.** Popular understanding of water quality. L. Parsons, S. Wuerz

CHED **807.** In-class demonstrations. A. Koehn, S. Wuerz

†Cooperative Cosponsorship

- CHED 808.** Student knowledge of factors for success in chemistry. S. Barrett, S. Wuerz
- CHED 809.** Filtered available phosphate by FIA: A partnership between chemistry and geology. J. Onyeagba, P.J. Iles, R. Kochambilli, L.D. Giddings, R.V. Valcarce, N.R. Bastian, M. Alvarez, R. Holcomb
- CHED 810.** Utilizing 3-D printing to enhance classroom instruction of dynamic nature of proteins. J. Green, M. Guthrie, L. Manner, J. Bowden, S.S. Ruebush
- CHED 811.** Dip coater. M. Bresnahan, B. Veldman
- CHED 812.** Impact of mindset on the persistence of STEM majors. J. Hackleman, B. Brando, A. Stacy, A.M. Baranger
- CHED 813.** Connecting dots to community through chemistry at St. Xavier University, Chicago. P.M. Brehm, B. Alappat
- CHED 814.** Role models and mentors matter for Tennessee girls in STEM. J.M. Iriarte-Gross, T. Thomas, K. Owens, R. Marlin, A. Williams
- CHED 815.** Synthesis and analysis of fullerenes in the undergraduate physical chemistry laboratory. T.J. Fuhrer, A. Lambert, H. Bell, C. Roper
- CHED 816.** Using a ranking task coupled with semi-structured interviews to characterize upper-division chemistry students' modeling practices in quantum chemistry: A mixed-methods study. C. Crickmore, M.N. Muniz, J. Beck
- CHED 817.** Diffraction: A butterfly experiment. B.A. Bober, M.O. McAnally, I. Jones, H. Shi, M. Su, B. Negru
- CHED 818.** What chemical facts does the public need to know? M. Winkelman, S. Wuerz
- CHED 819.** Chemical safety and chemical disposal. A. Argueta, S. Wuerz
- CHED 820.** Chemical storage in home, shop, and public areas. J. Montoya, S. Wuerz
- CHED 821.** Magic in chemical education. A. Morris, S. Wuerz
- CHED 822.** Factor analysis for academic success in chemistry. B. Claro-Martinez, S. Wuerz
- CHED 823.** Withdrawn.
- CHED 824.** Binary liquid-vapor phase diagrams with desktop gas chromatography. B.A. Rowland, P. Bayliss
- CHED 825.** Philatelic table of the elements as a teaching tool: Topics in health and medicine. B.T. Winn, L.G. French
- CHED 826.** Implementing preferred VARK learning modalities in organic chemistry. K. Page, S.K. Hamilton
- CHED 827.** Timing of homework completion vs. performance in general chemistry. M.N. Cosio, V.M. Williamson
- CHED 828.** Optimize of teaching contents and the develop of teaching methods to the compulsory course of general chemistry in universities. D. Tang, Z. Sun, Z. Yu, H. Lv
- CHED 829.** Microwave-assisted Fischer indole synthesis for the organic chemistry laboratory. M. Rico Mendoza, M.T. Wentzel
- CHED 830.** Implementing a flipped classroom and active learning techniques in general chemistry to augment student success at a mid-sized rural university. E. Bladorn, C. Chatha, V. Cherrette, H. Dailey, J. Lopez, H. Mills, C. Park, H. Park, A. Rose, S. Sherry, R. Skorheim, M. Smith, E.C. Wasinger
- CHED 831.** Assessing the levels of models upper-division chemistry students develop and apply in the context of the hydrogen atom: A qualitative investigation. J. Kirsch, J. Beck, M.N. Muniz
- CHED 832.** Effect of online homework on students' performance in introductory chemistry. H. Syu, B. Adair, S.T. Mabrouk
- CHED 833.** Spinning towards low-cost spin coaters. H. Speerstra, B. Veldman
- CHED 834.** Biochemistry research in the general chemistry lab classroom: A pilot study. J. Callus, S. Juris, K. Spencer, J. Tomasik
- CHED 835.** Using analgesia as a theme in the first semester of organic chemistry laboratory. N. Akanda, R. Blough, J. Orlandi, M.J. Castaldi, J.K. Murray
- CHED 836.** Computer-aided Design (CAD), fabrication, and testing of an inexpensive 3D printed filter fluorometer. M.H. Hakim, D.A. Rourke, L.A. Porter
- CHED 837.** Conceptual understanding and context: Free energy. K. Wilson, J. Nyachwaya
- CHED 838.** Role of porphyrins in teaching organic chemistry. Z.J. Gregg, J.C. Quirke, J.M. Quirke
- CHED 839.** Homemade antacid tablets for the antacid titration lab. J. Thom, A. Kwong, W.J. Miller
- CHED 840.** Complete binary phase diagram laboratory for undergraduate physical chemistry courses. T.P. Dorch, B. Veldman
- CHED 841.** Effectiveness of chemical demonstrations in increasing student interest in science. D.G. Watson, Y. Gibson, M. Taylor
- CHED 842.** Development and implementation of popular diets case studies in a biochemistry course for dietetics majors. K. Franklin, A. Gamez, R.M. Hyslop, C.E. Brown
- CHED 843.** Prototyping a simple and inexpensive colorimeter from 2D designs via laser cutting and engraving. H. Irtija, E.D. Banks, L.A. Porter
- CHED 844.** Sustainability in the laboratory: Assessing green chemistry integration in the general chemistry curriculum. M.C. Rivas, L. Armstrong, G. Kerstiens, M.T. Robak, M.C. Douskey, A.M. Baranger
- Section I**  
Moscone Center  
Hall D
- Undergraduate Research Posters**  
**Computational Chemistry**  
*Cosponsored by COMP and SOCED*  
N. Di Fabio, Organizer
- 12:00 - 2:00**
- CHED 845.** Generation of new liver X receptor ligands using state-of-the-art computational methods. M. Ndukwe, K. Riley
- CHED 846.** Computational studies of formaldehyde reactions with HCN, ammonia, and pyrrole relevant to prebiotic chemistry. K. Thrush, H. Loli, J. Kua
- CHED 847.** Characterization of the structure of vinyl cations. C. Lodder, B.N. Norris
- CHED 848.** Impact of DNA strand length on duplex stability in solution and in a microarray environment via molecular simulation. B. Rivard, S. Cooper, L. Pelletier, J.M. Stubbs
- CHED 849.** Searching for a Möbius conformation of cyclometaphenylene. S. Cho, S.M. Bachrach
- CHED 850.** Nitrogen-substituted bisaryl dienes in the Diels-Alder reaction. Z. Zayat, S.M. Bachrach
- CHED 851.**  $\alpha$ -Conotoxins peptide mutants as Parkinson's therapeutics: A molecular dynamics study. S. Walker, O.M. McDougal, M. King
- CHED 852.** Energy landscape of unsubstituted seven-membered ring oxocarbenium ion. E. Castele, K.A. Woerpel, J.D. Evansack
- CHED 853.** Theoretical energy determination of hydroxy-peroxy radicals derived from  $\alpha$ -terpenol using *Ab initio* and density functional theory calculations. A. Alejandro, C. Wilson, S. Drake, K. Dowda, R.S. Dabell, J.C. Hansen
- CHED 854.** Temporary anion states in the field of permanent dipole and quadrupole moments. D.C. Hiener, M.C. Fair, M.F. Falcetta
- CHED 855.** Conventional strain energies of the oxaphosphetanes and the oxadiphosphetanes. B. Nash, A. Smyly, D.H. Magers, S.A. Smith
- CHED 856.** Investigation of hydroxy-peroxy radicals derived from *R-limonene*: A theoretical approach. C. Calderon, A. Alejandro, M. Dick, T. Murphy, M. Synelnikov, M. Russon, R.S. Dabell, J.C. Hansen
- CHED 857.** Conventional strain energy in ketene acetals and ketene amins. S.G. Travis, S.A. Smith, D.H. Magers
- CHED 858.** Precision-biased statistical coupling analysis for use in rational protein design. O. Chapman, A.M. Leconte, A. Cavalcanti
- CHED 859.** Molecular simulations reveal the importance of disulfide bridging in PrpW, a putative redox switch for plasmid replication. S. Dornblaser, B. Buttaro, V.A. Voelz
- CHED 860.** Using electronics and sterics to affect the cyclization of angularly benzannulated enediynes. T. Keel, M.H. Daly, B.F. Gherman, J.D. Spence
- CHED 861.** Computational investigation of isoquinoline alkaloids and scaffold replaced derivatives as LXR modulators. D.A. Spadoni, C. Todd, F. Payton-Stewart
- CHED 862.** Propagation of hyperbolic secant wave packets: Visualizing the quantum momentum and potential field with numerical analytic continuation. W. Garrett, C. Lechak, B.A. Rowland
- CHED 863.** Theoretical study of aerosol seeding via homoassociation of methane sulfonic acid. C.M. Kotte, H.K. Hernandez-Soto
- CHED 864.** Computational characterization of the form of Ag(phen) for amination and aziridination reactions. P.M. Birschnbach, J. Scanlon
- CHED 865.** Structure-based prediction of small molecule modulators of DNMT3A. Y. Markov, A. Schlessinger
- CHED 866.** Theoretical study of ligand effects on homogeneous hydrogenation catalyzed by iron-pyridone complexes. E.F. Curl, L. Boisvert, T.V. Harris
- CHED 867.** Mathematical model for copper homeostasis in *Pseudomonas aeruginosa*. J.C. Roth, B. Kozemzak, J. Parmar, P. Mendes
- CHED 868.** Effect of ligand chemistry in mononuclear metal catalysts on the intramolecular features of the water oxidation mechanism. K. Hunter, J. Alvarado, E.A. Jarvis
- CHED 869.** ONIOM model of malonate decarboxylation: Significance of the hydrogen bonding buckle. L. Andreola, I. Pathiraja, S.M. Frestine, A. Tamez, D.J. Fox, J.D. Evansack
- CHED 870.** Interaction energies of tricyclohexane complexes: Effects of substituent groups. A. Jimenez, K.R. Jorgensen
- CHED 871.** Effect of vacancy defects on ion transfer in carbon nanotubes. B.A. Collins, T.D. Shepherd
- CHED 872.** Coarse-grain simulations of confined water within carbon nanotube systems. J. Chisholm, T.D. Shepherd
- CHED 873.** Is a planar  $C_{16}N_{12}$  possible? M. Alsarraj, M. Vaziri, J. Song
- CHED 874.** Inductive and hyperconjugative effects on carbocations. J.J. Nysschen, B.A. Modhera, E.D. Glendening
- CHED 875.** Energetic and structural analysis of metallo-heterofullerene derivatives of  $C_{20}$ ,  $C_{18}M$  ( $M = 3d$  transition metals). J. McDonald, K.A. Beran
- CHED 876.** TD-DFT potential energy surfaces and nonadiabatic dynamics of indole by surface hopping with Newton-X. K.M. Vorwerk, W. Kernerly
- CHED 877.** Computational quantum chemistry studies of metal oxide clusters. S. Partovi, L.M. Thompson, H.P. Hratchian
- CHED 878.** Thermodynamic properties of the loss of  $CH_3SH$  from protonated methionine. D. Devore, P.B. Armentrout, J. Johnston
- CHED 879.** Withdrawn.
- CHED 880.** Theoretical study of the formation of  $CH_3SO_3H$  from the reaction of  $CH_3SO_2H$  and OH radical. W.L. Rebelsky, H.K. Hernandez-Soto
- CHED 881.** Computational study of CO adsorption on a platinum-modified faujasite zeolite. K.A. Parrish, M.D. Fellows, H.K. Hernandez-Soto
- CHED 882.** Gas-phase transition states of proline tripeptides. P. Arcoria, J.C. Poutsma, V.H. Wysocki, A. Somogyi
- CHED 883.** Influence of hyperconjugative and inductive effects on the acidities of carboxylic acids. R.C. Rudisell, E.D. Glendening
- CHED 884.** Effects of basis set on the energy levels of highly charged ions. J. Ortiz-Soto, J.I. Vega-Sánchez, N.A. Lopez, J.A. Santana
- CHED 885.** Theoretical investigation of  $N_2C=CO_2$ . V. Nguyen, D. Corey, J. Song
- CHED 886.** Exploring metal surface catalytic effects on Li-S batteries with DFT calculations. C.R. Bernard, J.A. Santana

- CHED **887**. Absorption and fluorescence of indole and tryptophan by TD-DFT. **J. Gerard, W. Kennerly**
- CHED **888**. Density functional theory investigation of the interaction between acetone and chloroform. **M.E. Furgione, R.J. Olsen**
- CHED **889**. Characterizing the Jahn-Teller effect in manganese trifluoride: A molecular modeling approach suitable for early undergraduate and AP high school chemistry students. **K.A. Shaikh, S. Warrick, L. Gurung, D. Kwak, J.A. Bumpus**
- CHED **890**. Solvent effects in the dynamics on potentials with post-transition state valley ridge inflection points. **F. Malik, Z.C. Kramer, B.K. Carpenter, G.S. Ezra, S. Farantos, S. Wiggins**
- CHED **891**. Computational study of the mechanistic effect of fluorine groups on the ring-opening polymerization of  $\epsilon$ -caprolactone with Al-centered catalysts. **C. Ortiz, A. Longo, J.M. Fritsch, B. Wilson**
- CHED **892**. Computational modeling of sodium laurate surfactant in the presence of aqueous divalent cations at the oil-water interface. **K.T. Chippindale, K.E. Johnson**
- CHED **893**. Thermodynamics and SN2 mechanism of the loss of ammonia from protonated methionine. **A.A. Chen, P.B. Armentrout, J. Johnston**
- CHED **894**. MR-MP energy levels of ions in the Li, Be and B isoelectronic sequences. **N.A. Lopez, J.I. Vega Sánchez, J. Ortiz-Soto, J.A. Santana**
- CHED **895**. Using molecular dynamics simulations to investigate novel reaction events: A case study with iron carbonyls. **J. Liu, L. Wang**
- CHED **896**. Investigation of micelle formation using molecular modeling and NMR. **C. Lewis, F.H. Billiot, E. Billiot, K.F. Morris, Y. Fang**
- CHED **897**. Computational investigations of aldol reactions of aromatic enolates and aldehydes. **A. Zolfaghari, N.M. Wachter, S. Mazumder**
- CHED **898**. Elucidation of electrochromic materials utilizing TDDFT. **A.L. Tomlinson, A.R. Green**
- CHED **899**. Computational studies of oxygen bond lengthening with group-10 metal clusters. **D. Gray, M. Paul**
- CHED **900**. Withdrawn.
- CHED **901**. Parameter development for pseudouridine. **A. Ustoyev, M.C. Nagan**
- CHED **902**. Molecular modeling studies on the realkylation of Aged-Acetylcholinesterase (AChE) by Quinone Methide Precursors (QMPs). **R. Hopper, I. Pelfrey, R. McCauslin, R.J. Yoder**
- CHED **903**. DFT analysis of various porpholactone isomers. **R.F. Lalissee, M. Guberman-Pfeffer, J. Gascon, C. Bruckner**
- CHED **904**. Protein-ligand docking with HADDOCK: The effects of input protein conformational differences on the success of docking. **K.R. Reinke, J. Grinstead, A. Borvin**
- CHED **905**. Substitution group effect on the inhibition of ubiquitin C-terminal hydrolases for Parkinson's disease study: Synthesis and computational analysis. **M. Liang, D. Xiao**
- CHED **906**. Utilization of molecular dynamics to examine the physical properties of hydrocarbon mixtures from 293-373 K. **J. Winkler, T. Knippenberg**

### Undergraduate Research Posters

#### Environmental Chemistry

Cosponsored by ENVR and SOCED

N. Di Fabio, *Organizer*

12:00 - 2:00

- CHED **907**. Correlation study between particulate matter and PAH concentrations through the bio-monitoring of pine tree leaves. **R. Moran, S. Cortez, S. Deprele**
- CHED **908**. Differential impact of chitin and chitosan on heavy metal pollution in water samples. **J. Caldwell, J. Mendez**
- CHED **909**. Continued investigation of the mechanism of biosorption of lead. **T. Robertson, D.J. Schauer**
- CHED **910**. Atmospheric applications of deliquescence relative humidity determined by quartz crystal microbalance. **A.C. Burrows, H. Holst, C.M. Strollo**
- CHED **911**. Impact of the position of the chloro-substituent in chloroformate reactivity. **J. Wirick, M.J. D'Souza**
- CHED **912**. Withdrawn.
- CHED **913**. Changes to As, Cu, Fe, Mn and Zn concentrations in soil resulting from the application of poultry manure. **R.D. Foust, K. Hull**
- CHED **914**. Soil analysis for the greater Albion Community Garden Network. **R. Ford, K.M. Metz**
- CHED **915**. Assessment of heavy metals in subsistence-harvested alaskan pinniped vibrissae. **C. Gotluru, T. Juneja, P. Ferdinando, K. Cash, K. Sekou, A. Hiron, D.G. Giarikos**
- CHED **916**. Laboratory simulation of the open limestone channel at abandoned mine: Swank 13. **J.M. Schulte, P. Youmbi, D. Madl, R. Krupa, J.Z. Bandstra, E.P. Zovinka**
- CHED **917**. Study on the synthesis of ADA chelating cellulose and its adsorptive capability. **L. Yi, S. Wenjian, P. Yang, J. Fangyuan, L. Xiaoxiao**
- CHED **918**. Inventory platform manages chemical risks, addresses chemical accountability, and measures cost-effectiveness. **L. Neff, K. Roeske, M.J. D'Souza**
- CHED **919**. Singlet oxygenation of Lipitor and Lescol. **G.D. Tejeda, K.E. O'Shea**
- CHED **920**. Factors controlling the regioselectivity and rate of arene bromination by aqueous BrCl and related brominating agents: Influence of steric effects. **K.R. Martin-Culet, J.D. Sivey**
- CHED **921**. Investigating lead sources near a secondary lead smelting site: Using antimony as a pathfinder element. **D. DeWilde, K. Ryncarz, N. Aist, M. Ketterer, S. Youtsey**
- CHED **922**. Examination of the composition of the lipid component of natural organic matter using ultrafiltration with organic solvents and NMR analysis. **A. Kub, J. Rice**
- CHED **923**. Distinguishing between dissolved reactive phosphate and bioavailable phosphate for the development of a biophosphate sensor. **A. Cooper, E. White, C. Lemus, H. Goodson**
- CHED **924**. Photocatalytic degradation of tetracycline using floating PMMA-TiO<sub>2</sub> microspheres. **A.C. Hartley, J.D. Glover, J.E. Boyd**
- CHED **925**. Assessment of hydroxyl radicals production during ultrasonic irradiation for potential treatment of diphenhydramine pollution. **J.M. Rosado, D. Cui, K.E. O'Shea**
- CHED **926**. Photochemical degradation of oil in seawater. **D. Chang, S. Hok, T. Bui, A. Lam, M. Eclevia, W.J. De Bruyn, C.D. Clark**
- CHED **927**. Using 3-component hydrocarbon mixtures to model the properties of catalytic hydrothermal conversion fuels. **S.Y. Ye, M. McLaughlin, D.J. Luning Prak**
- CHED **928**. Ozone in Sequoia National Park: Linking ozone production in the San Joaquin Valley to trends in vegetative impacts in Sequoia National Park from 2000-2016. **C. Buysse, S. Pusede, A. Kotsakis**
- CHED **929**. Effects of anthropogenic activities on the water quality of the Huron River and its contributing streams. **J. Vites, O. Hajihassani**
- CHED **930**. Withdrawn.
- CHED **931**. Groundwater pollution reduction through biochar adsorption of herbicide Dacthal. **O.O. Harrison, E. Baker, S.K. Saha, A. Saha**
- CHED **932**. Modeling the kinetics of trace metal ion speciation: The influence of calcium ion on disjunctive ligand exchange. **L. Rea, N.E. Boland**
- CHED **933**. Human effect on potentially toxic metal concentrations in the soils of Scotland. **K. McCarthy, C. Davidson**
- CHED **934**. Viability of fecal coliform bacteria in beach sand and lake sediments. **C.M. McManus, D.S. Karpovich, J.L. McEvoy**
- CHED **935**. Determination of the mechanism for trihalomethanes and nicotinamide in basic medium for a water disinfection device. **M. Dorko, S. Espy**
- CHED **936**. Effect of silver nanoparticles with varying capping agents on the growth of kale (brassica oleracea). **A. Agloro, A.L. Smalley**
- CHED **937**. Fate and toxicity of BPA in two native plants, blue bush lake beans (*Phaseolus vulgaris*) and switchgrass (*Panicum virgatum*), to explore their phytoremediation potential. **J.C. Murphy, A.K. Merrill, P. Das**
- CHED **938**. Phase transitions of biologically-derived components in sea spray aerosols and investigation into the chemical complexity of aged SSA. **M. Alves, A. Estillere, J. Trueblood, V.H. Grassian**
- CHED **939**. Quantification of 11-nor-9-carboxy-tetrahydrocannabinol in wastewater from Washington State to estimate consumption patterns of cannabis use. **A. LaRock, J. Sadetsky, D. Westerman, D.A. Burgard**
- CHED **940**. Quantification of THC-COOH to estimate cannabis consumption trends via wastewater based drug epidemiology. **J. Sadetsky, A. LaRock, R. Carpenter, D.A. Burgard**
- CHED **941**. Urban and rural land use contributions to phosphorus and E. coli pollution: A case study on Bad Axe Creek. **M. Dobulis, E.M. Greeson, K.L. Kwiatkowski, T. Benedict, O. Bishop, A. Yankley, K. Underwood, C.M. McManus, T. Sivy, D.S. Karpovich**
- CHED **942**. Synthesis of amino acids coupled to 2,6-pyridine dicarboxylic acid, and evaluation of their affinity towards metals. **E. Luta, A. Stedman, S.G. Tadj**
- CHED **943**. Graphene-doped polyethylene electrodes used to produce hydroxyl radicals for water purification. **A. Wallace, L. Slaymaker, R.J. Hamers**
- CHED **944**. Characterizing heavy metal sequestration in a bioswale at Pomona College. **Z. Evans, H. Van Ryswyk, M. Los Huertos**
- CHED **945**. Analyzing the atmosphere of crystal cave: Understanding sources and sinks of trace gases. **A.W. Jarnot, S. Hughes, D.R. Blake**
- CHED **946**. Environmental drivers of cyanobacterial blooms and toxin production in Lake Winnebago, Wisconsin. **A. Tomczyk, S.L. Bartlett, R.M. Kutzner, J. Piatt, T.R. Miller**
- CHED **947**. Algal toxin dynamics and environmental indicators in Green Bay, Wisconsin. **R. Kutzner, S.L. Bartlett, A. Tomczyk, J. Piatt, T.R. Miller**
- CHED **948**. Estimation of the source of atmospheric inputs of selected metals and metalloids to the Pacific northwest (USA). **M. Sousa, C. Welty, D. Price, M. Cummings, F.M. Dunnivant**
- CHED **949**. Absorption and translocation of lead (II) Nitrate within *Coniandrum sativum*. **J. Wilson, D.J. Schauer**
- CHED **950**. Chemistry of imidazole forming reactions and reactive uptake of hydrocarbons. **A. Sager, J.M. Ackendorf, M. Galloway**
- CHED **951**. Photolysis of the suburban-use herbicide trifluralin on retail mulch surfaces. **M. Kaur, F. Pavlovici, K.J. Bisceglia**
- CHED **952**. Gadolinium complexes for catch-and-release of phosphates. **C. Zeller, K. Peterson, S. Harris, V.C. Pierre**
- CHED **953**. Synthesis of water-stable material-organic framework at room temperature. **N. Le, K.T. Jackson, D. Eseoanu, F. Mensah**
- CHED **954**. Effect of substrate on the growth of *Manilkara bidentata* at Finca Nolla Camuy, Puerto Rico: Applications in environmental chemistry. **F.A. Portero Camacho, K.R. Reyes Sanchez, R.J. Mayer Arzuaga**

† Cooperative Cosponsorship

- CHED **955**. Total conversion of mixed algae lipids to biofuels over heterogeneous catalysts. **E. Timmel**, D.S. Heroux
- CHED **956**. Kinetic studies of the photolysis of dicarbonyls. **M. Ryan**, C.M. Strollo
- CHED **957**. Optimization of a cellular phone-based method for nitrate/nitrite detection using paper-based fluidic devices. **K.L. Kwiatkowski**, Z. Velasco, K. Cissell
- CHED **958**. Withdrawn.
- CHED **959**. Determining metal content in abandoned mine soils. **C. Lupse**, K. Brotherton, J.D. Leyba
- CHED **960**. Investigation of 3,4-Methylenedioxymethamphetamine (MDMA) in Minnesota's natural waters by headspace solid-phase microextraction (HS-SPME) GC-MS. **M. Hanson**, N.R. Lien
- CHED **961**. Caffeine and its metabolites as biomarkers: Analyzing caffeine, theobromine, and theophylline concentrations in wastewater discharge of the Winona, MN area waters and the development of greener analytical techniques. **A. Paulson**, J.L. Franz
- CHED **962**. Quantification of levoglucosan in PM<sub>2.5</sub> atmospheric aerosols using GC/MS: Seasonality of a biomass burning tracer in Central Arkansas. **J. Gann**, A. Gatmaitan, J. Higgins, D. Hughes, C.D. Hatch
- CHED **963**. Selective quantification of chlorine and bromine in water using halogen trapping agents. **R.P. Dias**, N.A. Race, J.D. Sivey
- CHED **964**. Measurement of multicomponent aerosol optical properties using pulsed laser cavity ring-down spectroscopy. **H.E. Kay**, A.N. Jarman, J. DeYoung, J.A. Land, K.S. Dooley
- CHED **965**. Effect of ozonization on the potential toxicity of biochar. **A. Pullin**, O. Sacko, J.W. Lee
- CHED **966**. Spatial determination of organic matter on sediment particles by scanning electron microscope analysis. **M.M. Clay**, F.M. Dunnivant
- CHED **967**. Heavy metal analysis of fish inhabiting varying light depth zones of the ocean. **M. Sousa**, C. Welty, F.M. Dunnivant
- CHED **968**. Dissolution of uranyl silicate minerals in uranyl peroxide nanocluster forming environments. **C.J. Parker**, H.L. Lobeck, E. Balboni, P.C. Burns
- CHED **969**. Formation of unanticipated ring cleavage products during OH<sup>•</sup> and SO<sub>4</sub><sup>•-</sup> water treatment. **B. Skeel**, J. Van Buren, C. Prasse, D.L. Sedlak
- CHED **970**. Determination of metal concentrations in sediments of Big Walnut Creek. **H. Quinn**, J.M. Esson, M. Hoggarth, K. Svitana, K. Lathrop, N. Hess
- CHED **971**. Novel compounds extracted from endophytes of *Bassia Scoparia*. **K. Hardy**, M.D. Halling
- CHED **972**. Multi-Regression factors influencing textile dye adsorption on activated carbon. **S. Aanonsen**, P.A. Sneltsinger, E. Alkhatib, A. Alanazi
- CHED **973**. Traces of chemical compounds in Carraizo Reservoir and Sergio Cuevas Water Treatment Plant in Puerto Rico. **N.M. Casellas-Cruzado**, G. Infante-Méndez
- CHED **974**. Studies on the organic matter in soils along a hypersaline lagoon. **A. Colon Santiago**, D. Soto Bonilla, W. Colon Colon, J.I. Ramirez Domenech
- CHED **975**. Enhancement of atmospheric nucleation by ion pairs. **M.A. Olson**, J. Schlecht, S. Pavlenko, S.J. Keasler
- CHED **976**. Fat from the Green iguana (*Iguana iguana*) as potential source of lipids for production of biodiesel. **L. Renta Morales**, L. Romero, L. Torres
- CHED **977**. Investigating the structure of humic acid using a molecular probe. **C. Zdunich**, J. LaFontaine, G. Chilom
- CHED **978**. Effect of humic acid treatment on the removal of methylene blue from aqueous solution. **R. Wolsleger**, O. Ruiz, G. Chilom
- CHED **979**. Novel compounds extracted from endophytes isolated from *Juniperus osteosperma*. **S.A. Ellsworth**, M.D. Halling
- CHED **980**. Chemical and optical properties of model brown carbon systems characterized by UV/visible spectroscopy and aerosol mass spectrometry. **H. Welsh**, M. Alexander, L. Hawkins
- CHED **981**. Natural homemade teeth whitening: A comparison of natural and commercial products. **M. Nafea**, M. Tomaraei, P.J. Iles, L.D. Giddings, R.V. Valcaro, N.R. Bastian, M. Alvarez, R. Holcomb
- CHED **982**. Investigating the effects of copper-based nanoparticles/compounds in zucchini (*Cucurbita pepo*). **M. Hernandez Molina**, C. Tamez, J.A. Hernandez, J. Peralta, J.L. Gardea-Torresdey
- CHED **983**. Heavy metal indication through colored complexes and its bioinspiration implications. **M.R. Reeves**, D.J. Schauer
- CHED **984**. Relationship between pH and the extent of hydration of atmospheric photosensitizers. **M. Ippolito**, M. Galloway
- CHED **985**. Comparison of organophosphate pesticide presence in honey using QuEChERS and gas chromatography mass spectrometry. **C. Westgate**, S.A. Waratuke
- CHED **986**. Environmental photochemistry of the polycyclic musks tonalide and galaxolide. **B.G. Anderson**, S.W. Beck, C.J. Heiling, D. Martinovic-Weigelt, K.H. Wammer
- CHED **987**. Environmental photochemistry of dienogest: Photolysis, regeneration, and product bioactivity. **M.K. Hankard**, S.M. Berg, N.C. Pflug, D.M. Cwiertny, D. Martinovic-Weigelt, K.H. Wammer
- CHED **988**. Aqueous photolysis of the steroid gestrione in the presence of sodium azide. **J. O'Brien**, S.M. Berg, N.C. Pflug, D.M. Cwiertny, K.H. Wammer
- CHED **989**. Abandoned heavy metal mine releases to the Middle Fork of the Salmon River. **D. Price**, M. Sousa, C. Welty, F.M. Dunnivant
- CHED **990**. Phytoremediation potential of switchgrass (*Panicum virgatum*) a native plant, to clean-up Bisphenol-A (BPA) contaminated aquatic systems. **A.K. Merrill**, J.C. Murphy, P. Das
- CHED **991**. Synthesis of platinum(II) water soluble luminescent dye for sensing. **J. Oh**, J.E. McGarrah
- CHED **992**. Survey of radiogenic metals in Salt Lake County, Utah. **B. Mower**, P.J. Iles, L.D. Giddings, R.V. Valcaro, N.R. Bastian, M. Alvarez, R. Holcomb
- CHED **993**. Analysis of drinking water samples for perfluorooctanoic acid and 1,2,3,-trichloropropane by LC-MS in the Clovis metropolitan area. **B. Flynn**, D. Fujino, J. Ghuman, K. Johnson, J. Krauthammer, D. Dormedy
- CHED **994**. Electronic cigarette solution and vapor analysis with GC-MS and LC-MS. **M. Lazernik**, P. Cole, M. Jones, B. Shamp, D. Dormedy
- CHED **995**. Evaluation of pectin as a target for biosorption of heavy metals. **M. Zerbe**, D.J. Schauer

Hall D

### Undergraduate Research Posters

#### Geochemistry

Cosponsored by GEOC and SOCED

N. Di Fabio, Organizer

12:00 - 2:00

CHED **996**. Water adsorption on goethite: CCN activation from Frenkel, Halsey and Hill activation theory. **R. Tumminello**, R. Meredith, C.D. Hatch

CHED **997**. Nitrate reduction in prebiotic chemistry. **V. Aguirre**, S. Churchman, M.M. Baum, D. VanderVelde, L.M. Barge

CHED **998**. Water adsorption on montmorillonite: Comparison of washed and unwashed clays. **M. Cassingham**, R. Tumminello, J. Kim, C.D. Hatch

CHED **999**. Modeled impacts of sulfuric acid leaching solution on two groundwater types in the Upper Cienega Creek Watershed. **C. Morel**, R. Tucci, J. McIntosh

CHED **1000**. Sulfide-induced abiotic methylmercury transformation. **C. Kanzler**, A. Graham

### Undergraduate Research Posters

#### Green Chemistry & Sustainability

Cosponsored by CEI and SOCED

Financially supported by IEC Green Chem; Green Chemistry Institute

N. Di Fabio, Organizer

12:00 - 2:00

CHED **1001**. Obtaining electricity from solar energy utilizing household products. **D. Romero**, E. Zuniga, E. Stemp, A. Calderon

CHED **1002**. Oxidative dimerization of 1-(2-thienyl)pyrene. **L.M. Rhoda**, J.G. Rowley

CHED **1003**. Green synthesis of novel analogues of resveratrol: Toward unlocking new treatments for degenerative diseases. **E. Barth**, L. Daley, S.P. George, D. Paull

CHED **1004**. Pressure controlled continuous flow reactor synthesis of amides from aniline derivatives. **M. Turk**, M.T. Wentzel

CHED **1005**. Microwave synthesis and functionalization of vinyllogous imines. **B. Lanigan**, A. Delawder, M. Manpadi

CHED **1006**. Green microwave nitration as an undergraduate organic chemistry lab procedure. **M. Nauman**, I.J. Levy

CHED **1007**. Towards green multistep synthesis in the Organic Chemistry laboratory curriculum: Conversion of alcohols to ketones via conventional heating. **L.T. Walsh**, I.J. Levy

CHED **1008**. Coffee grounds to ethanol: Green chemistry in the undergraduate lab. **D. Schultz**, A.E. Fischer

CHED **1009**. Application of natural fiber welding for the generation of novel horse hair composite structures. **M.C. Scully**, A.G. Burn, P.J. Fahey, D.P. Durkin, F. Vollrath, H.C. De Long, P.C. Trulove

CHED **1010**. Empirical model of Polymer Electrolyte Membrane Fuel Cells (PEMFC) using vulcan/Pt/Ce(III) catalysts in ethanol. **L. Lotti Diaz**, Y. Garcia Herrera, R. Guzman Blas

CHED **1011**. Development of a greener diary synthesis of diarylioxazoles. **B. Leon**, K. McCord, N. Aoki, M. Bell, E. Petillo, L. Bastin

CHED **1012**. Greening the synthesis of virstatin: Finding an alternative solvent to dimethyl formamide. **M.T. McCauley**, K.A. Daus

CHED **1013**. Mechanochemical oxidation leading to porphyrins. **S. Everett-Hannah**, T.D. Hamilton

CHED **1014**. Withdrawn.

CHED **1015**. Synthesis of room temperature ionic liquids. **O. Alquzah**, T.R. Hayden

CHED **1016**. Flipping pre-labs for organic chemistry. **T. Edwards**, T.R. Hayden

CHED **1017**. Improving efficiency in the synthesis of oxindole-3-acetic acid: A key intermediate in the synthesis of 3-bromooxindole-3-acetic acid. **N. Ivanowsky**, E.J. Brush

CHED **1018**. Green dissolution techniques for the analysis of lead, arsenic, and cadmium in contaminated soils. **J. Andrews**, J.D. Leyba

CHED **1019**. Withdrawn.

CHED **1020**. Synthesis of camphor using ionic liquids. **F.C. Mayville**, B.N. Gillott, K.M. Cappuccino, B.A. Dierolf

CHED **1021**. Influence of water in preparation of metal-organic frameworks. **E.A. Morley**, D.J. Strong, J.D. Heglund, D.A. Mellinger, J.J. Pak

CHED **1022**. 3D Printing dye-sensitized solar cells. **P. Kurriss**, J. Loebelenz, J.C. Warner

CHED **1023**. Fischer esterification using solar irradiation. **C.R. Buckner**, D.J. Swartling

CHED **1024**. Thermal stability of white turnip peroxidase in the presence of calcium chloride and ethylene glycol. **C. Munson**, A. Hoffman

CHED **1025**. Investigating the breakdown of cellulose materials in environmentally benign conditions. **C.L. Boyd**, A.A. Talorico, J.K. Berch

CHED **1026**. Ionic liquids as green extractants of biofuels. **J. Melessa**, A. Everett, D. Stapleton, A. Young, D. Thomas, R. Wolsleger, D. Warner, A.T. Koppisch, R.E. Del Sesto

CHED **1027**. Recycling AgCl waste into AgNO<sub>3</sub>. **S. Max**, J. Esbenshade

CHED **1028**. Surfactants with reversible linkers for micelle-facilitated organic synthesis. **J.G. Hagggett**, K. Craig, L. Krings, H. Martin, D. Brownholland

- CHED 1029.** Synthesis of a proline-surfactant conjugate for stereoselective micelle-catalyzed organic reactions. **A.J. Szczodrowski, D. Brownholland**
- CHED 1030.** Solventless Wittig reaction. **P. Liang, W. Liang, S. Xie**
- CHED 1031.** Green modifications to the Hajos pathway to an important steroid intermediate. **C.H. Cooper, J.K. Berch**
- CHED 1032.** Low toxicity extraction solvents for recovery of precious materials and environmental contaminants. **G. Ifijeh, C. Nwokolo, R.E. Del Sesto**
- CHED 1033.** Dehydration of alcohols by solar irradiation. **S.M. Amin, D.J. Swartling**
- CHED 1034.** Mechanochemical synthesis of porphine and bis-pocket porphyrin. **D. Cordero, T.D. Hamilton**
- CHED 1035.** Room temperature ionic liquids as a green alternative for the extraction of acetaminophen. **V. Harris, T. Hayden**
- CHED 1036.** Thermal decomposition pathways of guaiacol and 4-methylguaiacol under fast pyrolysis and gasification conditions. **A. Nguyen, C. Luong, E.B. Ledesma**
- CHED 1037.** Evaluating replacement anti-freeze additives for use in silicone fluid mixtures: Low temperature behavior of isolated and bulk water species. **C.E. Miller, T.M. Alam**
- CHED 1038.** Synthesis and investigation of the bactericidal properties of quaternary ammonium chloride monomers for thin-film copolymer coatings. **M. Jung, C.L. Horgan, K. Hixon, N.E. Lee, S. Walker, R.W. Gurney**
- Section I**  
Moscone Center  
Hall D  
**Undergraduate Research Posters**  
**Inorganic Chemistry**  
*Cosponsored by INOR and SOCED*  
N. Di Fabio, *Organizer*  
**12:00 - 2:00**
- CHED 1039.** Size and shape analysis of inorganic materials for solar energy conversion. **S. Mackley, F.E. Osterloh**
- CHED 1040.** Preparation and characterization of an iron oxide nanoparticle-bound copper(II) cyclam complex for phosphate ester hydrolysis. **M. Cruz Reyes, B.R. Bodsgard**
- CHED 1041.** Coordination chemistry of verdazyl polypyridyl analogs: Monometallic systems and self assembled grids. **D.J. Brook, S. Shtargot, C. Fleming, G. Wantaniyakul, B. Ploof**
- CHED 1042.** Potential green catalyst for the bleaching of cotton. **D. Abraham, J.H. Davis**
- CHED 1043.** Tetra-substituted porphyrin with exo-dentate binding groups: Toward catalytic metalloporphyrin assemblies. **N. Maxi, T.D. Hamilton**
- CHED 1044.** Comparison of commercial zeolite 4a and zif-95 on separation of methane from carbon dioxide and nitrogen. **M. Yang, F. Tian**
- CHED 1045.** Investigation of HKUST-1 and related composites with protein adsorption. **R. Rupasinghe, Z. Mensinger**
- CHED 1046.** Synthesis of imidazole, triazole, and benzimidazole salts. **S. Steger, M.A. Guino-o**
- CHED 1047.** Dilithium (citrate) crystals and their relatives. **A. Cigler, J. Kaduk**
- CHED 1048.** Synthesis and spectroscopic investigation of substituted salen and phthalocyanine chelating ligands. **O. Staples, D. Perales, F.A. Fasulo, K. Wyss, J.M. Sears, T.J. Boyle, R.A. Kemp**
- CHED 1049.** Probing the interaction of vanadate with alcohols and amines via  $^{51}\text{V}$ -NMR spectroscopy: An inorganic laboratory exercise. **M.E. Donaldson, A. Taylor, C.M. Davis**
- CHED 1050.** Synthesis of a seven coordinate catalyst for bleaching. **R. Guthrie, J.H. Davis**
- CHED 1051.** Continuing catalytic studies for the production of cyclic organic molecules using  $[(\text{C}_6\text{F}_5)_2\text{C}_2\text{H}_4]\text{Co}(\text{CO})_2$  as a catalyst. **O.P. Fry, E. Hawrelak**
- CHED 1052.** Withdrawn.
- CHED 1053.** Optimization of the crystallization of aluminum oxometallic clusters. **M. Cole, E. Eitheim, T. Forbes**
- CHED 1054.** Synthesis and NMR characterization of a new series of thiazole-2-carboxaldehyde thiosemicarbazone ligands and their Pd(II) complexes. **K.L. Lawson, E.C. Lisic**
- CHED 1055.** Speciation of mixed metal hydroxo-aquo aluminum clusters. **A. Samuel, B. Fulton, D.W. Johnson, A.F. Oliveri, C. Colla, C.K. Perkins**
- CHED 1056.** Fabrication and analysis of a photovoltaic cell with a bismuth vanadate photo-anode and potassium iron(III) hexacyanoferrate(II) cathode. **J. Denney, K.E. Peterman**
- CHED 1057.** New series of tungsten aryloxide pyridine complexes that exhibit contact shifted paramagnetic  $^1\text{H}$  NMRs. **J. Herder, T. Graybill, M. Genzink, C. Kriley, G.J. Balaich**
- CHED 1058.** Synthesis and NMR characterization of a new ligand, 2-acetylpyrazine-tert-butylthiosemicarbazone, and its palladium (II) complex,  $[\text{Pd}(\text{APZ-tBTSC})\text{Cl}]$ . **S. Grossarth, A.R. Nesbitt, E.C. Lisic**
- CHED 1059.** Synthesis, characterization, and unusual solvation and luminescent properties of terbium amine complexes. **L.A. Ligon, J.J. Stace**
- CHED 1060.** Exploring the coordination chemistry of a bulky succinimide ligand. **C. Martin, X. Khani, G.J. McManus**
- CHED 1061.** Synthesis and characterization of tris(4,4-dichloro-2,2-bipyridine) ruthenium (II). **J. Bence, D.G. Giarikos**
- CHED 1062.** Direct observation of ion pairing in aqueous solutions of lithium carbonate. **L. Fredenburg, J.C. Goeltz**
- CHED 1063.** Synthesis and reactivity of bromofumaronitrile (1-bromo-1,2-dicyanoethylene): Useful synthon for dicyanoacetylene. **J. Lois, J.P. Fitzgerald**
- CHED 1064.** Coordination chemistry of group 12 thiocyanate complexes containing bicyclic isothioureas. **E. Rojas, P.M. Secondo**
- CHED 1065.** Synthesis and characterization of a series of tris(3-phenylpyrazolyl)borato zinc(II) oxocyclohexadienolate complexes derived from *in situ* oxidation of parent catecholate complexes. **D. Isaacs, M. Bezpalko, N.A. Piro, W.S. Kassel, W.G. Dougherty**
- CHED 1066.** 5-acetyl-imidazol-2-ylidene-4-olate ligand (IMes-acac): Synthesis, coordination chemistry and evaluation of the electronic communication. **S. DePeter, V. Mallardo, A. Nano, G. Dahm, N. Lukan, S. Bellemin-Laponnaz, V. César**
- CHED 1067.** Synthesis and application of copper metal-organic framework for naked eye, colorimetric detection of toxic organic molecules. **K. Curtin, J.K. Vohs**
- CHED 1068.** Synthesis, characterization and electrochemistry of a ruthenium porphyrin carbon-bound diazeniumdiolate porphyrin complex. **N. Xu, A. Bevak, B. Armstrong, E.G. Abucayon, G.B. Richter-Addo**
- CHED 1069.** Temperature dependence of solution processed formamidinium iodide based perovskite thin films. **M.C. So, C. Hutcherson**
- CHED 1070.** Green chemistry catalysts for transfer hydrogenation reactions. **K. Idrees, E. Rajaseelan**
- CHED 1071.** Computational and experimental studies of methyltrioxorhenium catalyzed olefin hydrogenation. **K. Idrees, N. Lambic, E.A. Ison**
- CHED 1072.** Effects of solvent treatment on morphology of Methylammonium Lead Iodide (MAPbI<sub>3</sub>) perovskite thin films. **V. Cherrette, M.C. So**
- CHED 1073.** Synthesis and characterization of rhodium(III) complexes using mixed polypyridyl ligands. **P. Nunez, D. Amarante**
- CHED 1074.** Synthesis of tin phosphide and tin nanomaterials. **C. Stevens, B.A. Hernandez-Sanchez, R.A. Kemp, D.A. Dickie, T.N. Lambert**
- CHED 1075.** Importance of the zinc metal center and thione/selone antioxidant properties. **A.M. Owen, J.M. Murphy, B. Stadelman, J.L. Brumaghin**
- CHED 1076.** Synthesis and reactivity studies of rhodium complexes supported by a PNSi pincer ligand. **B. Morse, C.J. Pell, O. Ozerov**
- CHED 1077.** Development of a solid state educational lab. **M.M. Scanlan, B.J. Bellott**
- CHED 1078.** Synthetic and structural studies of low-melting ionic materials with carborane cluster anions. **M. Raymond, A.R. Talosig, A.S. Svetlanova-Larsen**
- CHED 1079.** Electrocatalytic reduction of CO<sub>2</sub> by  $[\text{Pd}(\text{dpk})\text{Cl}]$  and  $[\text{Pd}(\text{dpk})_2\text{Cl}_2]^{2-}$ . **R. Higgins, R.M. Granger**
- CHED 1080.** Catalytic activity of 1,3-bis(2-pyridyl)imidazolin-2-ylidene supported metal complexes. **R. Carbone, R.J. Swails**
- CHED 1081.** Coordination chemistry of group 12 thiocyanate complexes containing benzimidazole and its anionic analog. **T. Lyons, P.M. Secondo**
- CHED 1082.** Structure and activity of complexes supported by neutral and cationic N-heterocyclic carbene ligands. **S. Kariofillis, R.J. Swails**
- CHED 1083.** Imidazole for pyridine: Its influence on the coordination of nickel(II) aromatic oxime complexes. **A.A. Ibarra, M.J. Prushan**
- CHED 1084.** Applications of duplex pincer chemistry. **K. Motley, J. Lohrman, K. Bowman-James**
- CHED 1085.** Polynuclear inorganic and organometallic complexes of ruthenium and their biological activity. **F.A. Beckford, M. Niece**
- CHED 1086.** Palladium complexes of multidentate resorcinarene surfactants. **A. Benedict, A.V. Skinner, B. Ramjee**
- CHED 1087.** Microwave assisted syntheses of CB<sub>11</sub> carborene derivatives. **A.B. Shaff, M.A. Juhasz**
- CHED 1088.** Discoveries in the antimicrobial properties of ZnO plate and rod morphologies. **A. Schnoebelen, A.T. Bloemer, B. Torrance, P. Window, W.L. Cody, E. Steinmiller**
- CHED 1089.** Synthesis of ligands from the amides of 2,6-pyridinedicarboxylic acid. **H. Sturm, J. Feder, J. Bodwin**
- CHED 1090.** Preparation and reactivity of platinum(II) complexes with dipropylentriamine ligands. **A. Zahn, K. Williams**
- CHED 1091.** Structural analysis of vanadium and peptide complexes. **A. Brechbill, J.A. Dabrowski**
- CHED 1092.** Synthesis and characterization of novel fluoro-bridged copper(II) complexes. **B. Johnson, L. Yang**
- CHED 1093.** Synthesis and characterization of copper(II) complexes supported by pyridylamide ligands. **G. Williams, L. Yang**
- CHED 1094.** Switchable catalysis and related processes. **A. Laughlin, J.L. Brosmer, P. Diaconescu**
- CHED 1095.** Simultaneous electrodeposition and recrystallization of silicon on gallium. **M. Cain, G. LeBlanc**
- CHED 1096.** Systematic microwave-assisted synthesis of rhodium(I) and iridium(I) complexes with ambipolar polyimine ligands and the effect of the ligand's functional groups on their photophysical properties. **B. Hua, G.A. Salazar-Garza, C.M. Williams, V. Nesterov, M.A. Omary**
- CHED 1097.** Solid state synthesis of copper sulfide using a NaCl-KCl flux. **S.A. Donnelly, B.J. Bellott**
- CHED 1098.** Heterogeneous MOF built from heterotritopic linkers and infinite secondary building units. **M.B. Morla, N.R. Catarineu, O.M. Yaghi**
- CHED 1099.** Electrocatalytic conversion of CO<sub>2</sub> using molecular manganese carbonyl based catalysts. **P.J. Smith, M. Stanbury, E. Gouré, J. Compain, S. Chardon-Noblat**
- CHED 1100.** Peculiar properties of quantum dots: Cadmium sulfide/zinc sulfide nanoparticles. **K. Parson**
- CHED 1101.** UMCM-1 protein adsorption and the effects of post-synthetic modifications of UMCM-1-NH<sub>2</sub> on protein adsorption properties. **A. Helmin, Z. Mensinger**
- CHED 1102.** Dye sensitized solar cells: A push towards lowering cost and improving efficiency. **K.L. Digan, C.A. Sweet, C.J. Timpson**

‡ Cooperative Cosponsorship

- CHED 1103.** Synthesis of monometallic nickel (II) halide complexes with secondary phosphines as building blocks for hydrogenase mimics. **A. Frantz, N. Downes, T.W. Chapp**
- CHED 1104.** IR study of the particle-polymer interface in MOF mixed matrix membranes. **A.P. Odegard, J.C. Moreton, S. Cohen, L.B. Benz**
- CHED 1105.** Microwave assisted metal nanoparticle synthesis. **L. Felix, M.O. Montes**
- CHED 1106.** Cytotoxicity and uptake of platinum compounds in cancer cell lines. **H. Evie, B. Duke, K. Williams, B.B. Williams**
- CHED 1107.** Synthesis and characterization of  $[Rh(bopy)_2(dppz)]^{3+}$  and  $[Rh(bopy)_2(phi)]^{3+}$  (*bopy* = 2-Benzoylpyridine): New potential metallointercalators supported by a mixed nitrogen/oxygen donor ligand. **M.R. Norton, S.C. Haefner**
- CHED 1108.** Synthesis and characterization of some new iodobismuthates. **M. Barnhill, L. Peterson**
- CHED 1109.** Synthesis of polymerizable phosphines from inexpensive starting materials. **H.K. Nguyen, J.W. Gohdes**
- CHED 1110.** Synthesis of amido(thio) urea based rhenium (I) tricarbonyl complexes. **W. Evans, M.O. Odago**
- CHED 1111.** Employing flexible ligands to construct metal-organic frameworks. **A.J. Soares, G.J. McManus**
- CHED 1112.** Photophysics of cobalt-zirconium heterobimetallic materials with ancillary amine ligands. **M. Bedford, N. Celia, A. Stone, A. Hill**
- CHED 1113.** Optimization of trivalent americium oxidation by sodium bismuthate. **N. Byrne, P.I. Molina, K. Kozma, M.D. Nyman, L.M. Mascavage**
- CHED 1114.** Ruthenium polypyridyl complexes: Synthesis, spectroscopic characterization, and reactivity with CT-DNA. **J. Khuri, H. Acquaye**
- CHED 1115.** Remarkably sensitive  $^{13}C$  NMR approach to quantifying electronic characteristics of isocyanide ligands. **Z. Wood, J.C. Applegate, N.R. Erickson, M.D. Hart, M.V. Barybin**
- CHED 1116.** Synthesis and coordination chemistry of new sterically hindered Schiff-base ligands. **M. Suchewski, C.A. Bradley**
- CHED 1117.** Small molecule reactivity of  $Cp^*Co(I)$  fragments. **A. Kayser, C.A. Bradley**
- CHED 1118.** Development of a biomimetic hydrolysis catalyst consisting of a zinc containing molecular imprint polymer. **B. Doherty, J.W. Gohdes**
- CHED 1119.** Palladium-catalyzed cross-coupling reactions: A clean synthetic method to assemble complex organic molecular frameworks. **P. Pham, M. Young**
- CHED 1120.** Preparation of metal-organic frameworks containing N-heterocyclic carbene catalysts. **K. Campbell, B. Crabb, T. Sarver, M. Shoukry, M.C. Perry, L.G. Beauvais**
- CHED 1121.** Developing materials for the purification of natural gas: Thermodynamic and kinetic studies of small molecule binding to iron phosphine complexes. **R. Gustafson, J.W. Gohdes**
- CHED 1122.** Spin crossover and valence tautomerism in discrete and extended polymeric systems. **A. Nguyen, B. Ploof, D.J. Brook**
- CHED 1123.** Manganese(III) polymolybdate based single chain magnets. **B. McKenna, S. Nellutla**
- CHED 1124.** Synthesis and characterization of silylated drug derivatives. **C.L. Burton, D.L. Austin, K. Gwilt, W.W. Brennessel, B.M. Kraft**
- CHED 1125.** Systematic investigation into the bonding, electronic structure, and reactivity of metal/soft-donor biomimetic complexes. **H.C. Williams, E. Hanna, J. Brown-McDonald**
- CHED 1126.** Withdrawn.
- CHED 1127.** Investigation of group 13 bonding properties with bulky N-heterocyclic carbenes following the synthesis and characterization of an imidazolium salt precursor. **D. Carone, J.K. Vohs**
- CHED 1128.** Computational and experimental analysis of vanadium (V) dipicolinate using  $^{51}V$  NMR spectroscopy. **M. Feinman, J.M. Fautsch**
- CHED 1129.** Preparation of zeolitic materials from Western Pennsylvania coal fly ash. **A.M. Krol, D.A. Polvani**
- CHED 1130.** Further investigation of transition-metal substituted polyoxotungstates in non-polar solvents using 2D DOSY P-31 NMR and density functional theory. **W.B. Swanson, J.R. Verdi, M.M. Kozik**
- CHED 1131.** New multifunctional bis(amidine) ligands for highly luminescent coinage metal assemblies: Synthesis, structures, and coordination behavior. **A. Calderon, O. Ugarte Trejo, N. Bhuvanesh, M. Stollenz**
- CHED 1132.** Investigation of antimicrobial properties of copper (II) ions in polyvinyl acetate. **K. Nelson, J.M. Fautsch**
- CHED 1133.** Energy-conserving inorganic pigments. **M.C. Bixby, J.L. Hunting**
- CHED 1134.** Electron-rich organometallics: Featuring multiple isocyanozulene ligands terminated with thiol anchoring groups. **K. Hicks, M.V. Barybin**
- CHED 1135.** Molecular tweezers for catalytic hydrogenation and dehydrogenation. **T. Bader, B. Haslp, G.M. Edverson**
- CHED 1136.** Synthesis and x-ray crystal structure studies of dinitrosyl iron complexes based on 1, 10 - phenanthroline derivatives. **C.A. Koroni, L. Li**
- CHED 1137.** Base-metal thiolate complexes using ONS and SNS ligands: Synthesis and amine-borane dehydrogenation catalysis. **H. Keita, U.K. Das, R. Baker**
- CHED 1138.** Immobilization of porphyrins in sol-gel matrices. **M. Schellman, C.H. Lisse**
- CHED 1139.** Isomers and their interconversions for eight-coordinate, dodecahedral, rhenium(V) centers supported by four or five hydride ligands. **A. Scorzelli, B. Macalush, G.A. Moehring**
- CHED 1140.** Influence of  $\alpha$ -methyl substitution on nickel(II) complexes derived from 2-pyridinemethanamine. **S. Lozowski, M.J. Prushan**
- CHED 1141.** Intramolecular hydrogen exchange at rhenium(V) pentahydride complexes stabilized by a primary amine ligand. **D.J. Streisel, A. Petrou, G.A. Moehring**
- CHED 1142.** Synthesis and structural characterization of (dppp)  $PtHSnPh_3$ . **S. Hocharoon, T.A. Mobley, K.E. Gilbert**
- CHED 1143.** Synthesis of Ru(II)(4,4'',4''-tritylbutyl-2,2',6',6'',2''-terpyridine) catalysts for CO<sub>2</sub> reduction studies. **V. Caro, T. Schneider, J. Nganga, A.M. Angeles Boza**
- CHED 1144.** Quaternary diamond-like sulfides: New candidate materials for infrared nonlinear optical devices. **M.M. Cribbs, J. Glenn, J.A. Aitken**
- CHED 1145.** Synthesis of new rhodium catalysts for mechanistic investigation of dihydrogen evolution. **J. Hopkins, Y. Peng, D. Lionetti, J.D. Blakemore**
- CHED 1146.** Progress towards tetradentate chiral metal complexes as Lewis acid catalysts. **B. Estepa Bernabeu, C. Streu**
- CHED 1147.** Structural and spectroscopic studies of copper(II) complexes with ligands derived from 3,3'-Binicotinic acid. **R.J. Rabuska, S.P. Watton, K. Jakobowski**
- CHED 1148.** Attempted synthesis and isolation of binuclear chromium quinone compounds for the purpose of oxidizing simple alcohols. **L.M. Whitt, R.F. Johnston**
- CHED 1149.** Investigation of titanium complexes containing 2-iminoimidazoline ligands with sterically hindering side groups. **C. Mazzone, J.K. Vohs**
- CHED 1150.** Sol-gel synthesis with applications to fireworks. **M.R. Glenn, G. Gould, K.A. Wozniak**
- CHED 1151.** Radiolysis of cosmic ice analogs of ammonia. **R. Tano-Menka, M. Thompson, C. Arumainayagam**
- CHED 1152.** Fabrication and characterization of ceria-containing aerogels. **L. Posada, M.K. Carroll, A.M. Anderson, B.A. Bruno**
- CHED 1159.** Hydroxy-pyridine-carboxylate iridium complexes as extremely active, tunable and pH-responsive water oxidation catalysts. **R. Hutchinson, G. Menendez Rodriguez, A. Macchioni**
- CHED 1160.** Attempts towards the preparation of substituted cyclohexane-1,3-diones as building blocks for dihydropyridine synthesis. **E. Janeira, H. Arndt**
- CHED 1161.** Synthesis of cholesterol functionalized gold nanoparticles for the treatment of cardiovascular disease. **R. Kress, D. Graham**
- CHED 1162.** Encapsulation of hydrophilic cargo within poly(lactic-co-glycolic acid) *micro- and nanoparticles*. **M.J. Austin, S. Schubert, M. Leiske, A. Traeger, U.S. Schubert**
- CHED 1163.** Exploring the protein-protein interactions of PqsR in *Pseudomonas aeruginosa*. **K. Senn, B. Woo, S. Chng**
- CHED 1164.** Investigating the optical properties of riboflavin interacting with metallic nanoparticles. **R. Warnock, G. Massaro, L. Latterini**
- CHED 1165.** Mild two-step quaternization of amine-tethered metal-organic frameworks for anion-exchange applications. **M. Molenda, Z. Hu, D. Zhao**
- CHED 1166.** P-docelyloxybenzyl dimethylamine oxide (pDoAO) gel as pH sensitive artificial gland. **N.E. Caldero-Rodriguez, P. Gentili**
- CHED 1167.** Novel composite material used as a lithium ion battery anode. **N. James, C. Streb**
- CHED 1168.** Synthesis of novel conjugated small molecules based on 2,1,3-benzothiadiazole and 2,1,3-benzoxadiazole for organic photovoltaic applications. **M. Matar Abed, J. Cameron, N. Findlay, P. Skabara**

## Section I

Moscone Center

Hall D

### Undergraduate Research Posters

### International Research Experience (IREU)

N. Di Fabio, Organizer

12:00 - 2:00

**CHED 1153.** Biomass derived furfuryl alcohol/water azeotrope as reaction medium for copper-catalyzed Ullmann-type condensation. **S. Fusi, L. Vaccaro**

**CHED 1154.** Synthesis and modification of 4-hydroxyproline rich polypeptide oligomers. **M. Gaviria, H. Arndt**

**CHED 1155.** Biogenic synthesis of silver nanoparticles using herb extracts. **L. Browder, D. Yong Wei Ying, W.S. Chin**

**CHED 1156.** Investigating the biosynthesis of terrein in *Aspergillus terreus*. **M. Villanueva, E. Skellam, R. Cox**

**CHED 1157.** Density functional theory: Determination of electrolyte redox potentials for rechargeable magnesium batteries. **A.T. Berry, J. Mueller**

**CHED 1158.** Synthesis of super potent antibiotic cystobactamide 861-2. **A. Deyett, A. Kirschnig**

## Section I

Hall D

### Undergraduate Research Posters

### Medicinal Chemistry

Cosponsored by MEDI and SOCED

N. Di Fabio, Organizer

12:00 - 2:00

**CHED 1169.** Synthesis and characterization of novel flavonoid derivatives as acetylcholinesterase inhibitors for the treatment of Alzheimer's disease. **J. DePhillips, S. Martin, A. Denning, J. Minnick**

**CHED 1170.** T-0632 Amine analogs as potential agonists for the GLP-1 receptor. **C. Lepore, G. Towers, D.R. Haines**

**CHED 1171.** Withdrawn.

**CHED 1172.** Kinetics of doxorubicin degradation in various conditions. **C. Green, E. Csuhi**

**CHED 1173.** Progress towards the synthesis of a novel bromo substituted aurone as a promising cyclooxygenase-2 inhibitor. **S. Forbes-Pentecost, M. Polk, C. Mills, S. Stephenson**

**CHED 1174.** Disaggregation of lysozyme amyloid fibrils by combined drug delivery of curcumin and epigallocatechin gallate via multilayer Ca-alginate hydrogel micro-encapsulation. **A.J. Ferriol-Alonso, C.M. Osorio-Cantillo**

- CHED 1175.** Structure-based drug design of novel therapeutics targeting metastatic breast cancer. L. Hosek, K. Tawara, M. King, D.L. Warner, C.L. Jorczyk
- CHED 1176.** Thiamine as a carrier for drug delivery to cancer cells. K. Hernandez, J. Ayala-Rosa, S. Jarwan, S.H. Abdelwahed
- CHED 1177.** Liquid-liquid extraction and analysis of the antioxidant, resveratrol, from red wine made at various fermentation temperatures. F.C. Mayville, E.N. Sauschuck, A.M. Myers
- CHED 1178.** Investigation on the organometallic reagents involved in transmetalation of the Michael addition pertaining to artemisinin synthesis. L.S. Gifford, D. Fish
- CHED 1179.** Synthesis and evaluation of ketone body esters for the treatment of neurological disorders. E. Higgins, S. Ulrich
- CHED 1180.** Exploration of trans-2-(1,2,3-triazolyl)-cyclohexanols as potential inhibitors for fungal glycosidases. M. Huey, B. Nguyen, M.R. Ruyonga, N.M. Samoshina, V.V. Samoshin
- CHED 1181.** Synthesis of multi-target ligands for the treatment of Alzheimer's disease. K. Stupar, D. Fish
- CHED 1182.** Identification of new inhibitors for low molecular weight protein tyrosine phosphatase isoform A. M. Olson, H.V. Jakubowski, E.J. McIntee
- CHED 1183.** Inhibition of CYP2A6 by alpha-substituted analogs of trans-cinnamic aldehyde. G. Moeen, S. Black, K. Ebisuya, J.M. Chan, J. Harrelson
- CHED 1184.** Effects of cannabinoids on TGFβ-complex protein, endoglin, in Ewing's sarcoma. W. Willis, J. Little, J. Rubin, M.D. Perry, L. Hensley
- CHED 1185.** Progress towards the synthesis of aspernigrin A and structural analogs. R.S. Arnold, Z. Cross, D. Lemen, B. Marburger, L.M. Martin, D. McDermond, A.M. Reeve
- CHED 1186.** Proteolytic activity of metal chelators as inhibitors of rattlesnake venom. Y. Flores, K. Combrink
- CHED 1187.** Synthesis and toxicological analysis of 5' sulfamoylated adenosine scaffolds for *MtBPL* drug development. M. Fuller, M. Bockman, S. Dawadi, C.C. Aldrich
- CHED 1188.** Assessing specificity of indazole derivatives as inhibitors to CYP2E1. H. Hart, G.P. Miller
- CHED 1189.** Development of small peptidomimetic molecules targeting the CDYL2 chromodomain via massively parallel synthesis. A. Estevez Davila, S.V. Frye, K.D. Barnash, L.A. Ingerman
- CHED 1190.** Poly(ethylene glycol) functionalized-4',4"-difluorobenzotriazine analogues. E. Houchen, N.M. Paul
- CHED 1191.** Progress toward the synthesis of a photosensitive ALK5 inhibitor. J. Newson, A. Rola, C. Streu
- CHED 1192.** Infection of T follicular helper cells during acute SIV infection of infant macaques by the oral route. M. Warren, B. Phillips, K. DeParis
- CHED 1193.** Ionic liquids as antimicrobial materials. C. Migliori, D. Stapleton, J. Melessa, K. Merrett, L. Simmons, Z. Pearson, G. Ilijeh, A. Everett, A. Young, D. Warner, D. Fox, A.T. Koppisch, R.E. Del Sesto
- CHED 1194.** Synthesis of novel ALK5 inhibitors. T. Hall, L. Kelsey, C. Streu
- CHED 1195.** Design and synthesis of a non-covalent macrocyclic proteasome inhibitor. M. Palmer, R. Dorn, M. Rocha, G. Merrill-Steskal, M.G. Gotz
- CHED 1196.** Acid-labile oleoyl-PEG orthoester micelles for controlled drug delivery. F.M. Ippoliti, L.E. Prevette
- CHED 1197.** Investigating leaving group effects towards a covalently binding Toll-like receptor agonist. A. Bhattacharya, A.C. Chon, A.P. Esser-Kahn
- CHED 1198.** De novo design of novel NOP receptor agonists for the treatment of post-traumatic stress disorder. M.R. Koebel, A. Cooper, S. Sirmulla
- CHED 1199.** Identification of potentially novel antimicrobial molecules produced by isolated *Streptomyces*. M. Almaraz, G. Palmer
- CHED 1200.** Extraction, quantification, and antioxidant analysis of annonacin from fruit of the North American Pawpaw (*Asimina triloba*). F.C. Mayville, E.C. Charamut, C.R. Kovaleski
- CHED 1201.** Withdrawn.
- CHED 1202.** Using light to kill cancer-development of a novel photodynamic therapy agent. A. Hamilton, J.E. Bradshaw
- CHED 1203.** Possible breast cancer photodynamic therapy agents: H<sub>2</sub>TTP-A4OH and H<sub>2</sub>TTP-A6OH. M. Richards, J.E. Bradshaw
- CHED 1204.** Targeted Inhibition of COX-2. C. Armstrong, C. Streu
- CHED 1205.** Explaining chemical space with light: Light-activated molecules to probe biosystems. M. Zafferani, C. Streu
- CHED 1206.** Metal chelate inhibitors of rattlesnake venom. J.G. Escobar, K. Combrink
- CHED 1207.** Synthesis of nonsteroidal analogs of CAMSA as anti-*Clostridium difficile* agents. A. Taylor, I. Donkor
- CHED 1208.** Design and synthesis of novel liver X receptor ligands. K.A. Payne, K.M. Lamark, D.A. Spadoni, D. Adams, R. Komati, K. Riley
- CHED 1209.** Rifamycin derivatives to treat *Mycobacterium abscessus*. K.N. Elizondo, K. Combrink, A. Ramirez-Ramos, S. Spring, F. Maurer
- CHED 1210.** Synthesis of oxazolidinones containing tricyclic fused rings. M.C. Audi, T. Lesmeister, A.N. Roux, J.T. Ippoliti
- CHED 1211.** Synthesis of potential AAC(6)-Ib inhibitors to combat bacterial resistance to aminoglycoside antibiotics. M. Simes, L. Miers, K.J. Labby
- CHED 1212.** Effects of FDA-approved compounds on biofilm formation and antibiotic sensitivity in *Staphylococcus haemolyticus*. L. Nguyen, M.S. Blackledge
- CHED 1213.** Development of a medicinal chemistry lab to demonstrate the effects of molecular weight and polarity on lipophilicity. A. Schrader, B. Buckner, M. Manpadi
- CHED 1214.** Synthesis of several polyamine analogs as possible growth inhibitors for breast cancer cells. F.C. Mayville, E. Phillips, E. Brown, A.L. Bielski
- CHED 1215.** Fragment library docking with HADDOCK: Identifying protein binding hotspots and improving site sampling. E. Elder, A. Bonvin, J. Grinstead
- CHED 1216.** Effect of cannabinoid treatment on CD99 expression in Ewing's sarcoma. D. Dwelle, L. Hensley
- CHED 1217.** Synthesis and structural analysis of novel quercetin antioxidant and antitumor agent: Antitumor activity on mouse T2A and T3PA cancer cells. E. Tharnish, C. Parry, A. Thomas, M. Grossmann, C. Kriley, M.M. Majreck, E. Reinheimer
- CHED 1218.** Dual COX-2/SEH inhibitor treats kidney damage in type 2 diabetic rats. K. Craig, A. Khan, J. Imig
- CHED 1219.** Investigation of FDA-approved small molecules as modulators of virulence in Methicillin-Resistant *Staphylococcus aureus* (MRSA). K. Gillard, T. Wilson, P. Vigueira, A. Sarkar, M.S. Blackledge
- CHED 1220.** DNA intercalation and Topoisomerase I inhibition studies of aryl sulfonamides. A. Jefferys, A. Hurley Predecki
- CHED 1221.** Computational and SRB analysis of novel naphthoquinone analogues. B. Tuhlei, M. Manpadi, Z. Medcalf
- CHED 1222.** Synthesis and analysis of tautomericly ambiguous cytosine-based analogs to induce viral mutagenesis. C.M. Clem, W.R. Fernandez, S.M. Hardage, S.E. Kuhn, V.K. Dunlap
- CHED 1223.** Cellular response to spider silk scaffolds. D. Montag, K. Hafner, M. Kennedy, D. Dean
- CHED 1224.** Computational simulations of chiral drug metabolism by mutated CYP2C9. A. Holcomb, G.P. Miller, M.D. Perry
- CHED 1225.** Mechanistic study of genetic response induced by novel naphthoquinone analogues. D.B. Sitapara, A. Delawder, J. Sparks, M. Manpadi
- CHED 1226.** Small molecule modulation of virulence behaviors in *Staphylococcus epidermidis*. R. Ulrich, M. Behrens, M.S. Blackledge
- CHED 1227.** Expression of β-cat-enin from diabetic and cancerous cells in the presence of glucose. R. Stahl, K.S. George Parsons
- CHED 1228.** Novel excipients that reduce the viscosity of concentrated monoclonal antibody formula novel excipients that reduce the viscosity of concentrated monoclonal antibody formulations. H.F. Gezaghagne, A.M. Larson, A.K. Weight, K. Love, C. Wescott, A. Bonificio
- CHED 1229.** Pillaring classic honeycomb SBLs as a method to 3-periodic MOFs. E.A. Alonso, J.F. Eubank
- CHED 1230.** Isolation of curcuminoids from turmeric *Curcuma longa*. S.A. Saey, N.Y. Ayala, B.E. Sturgeon
- CHED 1231.** Evaluation of antimicrobial properties of *Combretum laxum* extracts. J.G. Escobar, A.K. Addo-Mensah
- CHED 1232.** Synthesis and study of triple-headed, double-tailed amphiphiles as potent antiseptics. S.D. Kendrick, R. Elizabeth, K. Seifert, K.L. Caran
- CHED 1233.** Synthesis of novel casein kinase 1 inhibitors for treatment of Alzheimer's disease. C. Gettridge, J. Sridhar
- CHED 1234.** *In vitro* studies on non-toxic polysaccharide based drug/gene delivery systems: Safety/toxicity studies. R. Srinivasan, L. Hernandez, J. Murphy, J. Orona
- CHED 1235.** Changes in mechanical and chemical properties of rat femur and tibia bones exposed to simulated microgravity and cosmic radiation. H.N. Heacock, R. Mehta, B. Hill, P. Chowdhury, M. Dobretsov, L.M. Benzmilller, J. Barajas, S. Freyaldenhoven
- CHED 1236.** Energetics of molecular recognition of substituted-warfarins by serum albumin as a model for blood ADME drug properties. E. Munyaneza, E.J. Valente, K.M. Bishop, R. Bishop
- CHED 1237.** Molecular diversity of kavalactones from kava-kava root extractions. R. Bishop, M.A. Bowser, K.N. Brunck, L.C. Bishop, P. Vigueira, A. Sarkar, M.S. Blackledge
- CHED 1238.** Progress on the synthesis of a methoxatraxate-phenylalanine derivative for the treatment of glioblastoma in antibody-directed enzyme prodrug therapy. M.J. Rouffet, S. Frantz, P. Katherine, M. Dorrell
- CHED 1239.** Chemical analysis and antimicrobial activity of Maine *Ulva lactuca* after prolonged storage. J. Woolf, A.M. Deveau, K.M. Burkholder, Z. Miller-Hope, C. Russell, E. Lloyd
- CHED 1240.** Anti-bacterial synergy of medicinal herbs. B. Niemi, A.B. Waghe
- CHED 1241.** Synthesis and analysis of MTN inhibitors: A potential new class of antibiotics to treat drug resistant infections. R.B. Mukuna, H. Dossett, N. Hunter, P. Erstad, D. Xu, J.H. Thurston, K. Cornell
- CHED 1242.** Accumulation of phytochemical compounds in *Calendula officinalis* grown under differential light and nitrogen conditions. P. Tuladhar, S. Shrestha
- CHED 1243.** Isolation and modification of mithramycin SA. L. Hartline, P. Daniels, S. Brooks, A. Foster, D. Scott
- CHED 1244.** *Heracleum maximum* and *Psoralea corylifolia*: Toxicity/phototoxicity evaluation. B. Pinsky, G. Jones, C. King, J. Hoffmann, M. Morrow, P. Dhar
- CHED 1245.** Synthesis of 2-(2-trifluoromethylsulfonamido)phenylbenzimidazole derivatives as potential IspF inhibitors. M.J. Rouffet, C. Dunham
- CHED 1246.** Enhancing antibacterial properties using herbal extracts. J. Knapp, A.B. Waghe
- CHED 1247.** Antibiotic and hyaluronidase-inhibiting fractions from the *Rhododendron* flower. R. Wetzel, A. Hoffman

## Nanochemistry

Cosponsored by SOCED

N. Di Fabio, Organizer

12:00 - 2:00

**CHED 1248.** EPR Characterization of incorporated membrane proteins into STMA-lipid nanoparticles. A. Bali, A.F. Craig, I. Sahu, D. Konkolewicz, G. Lorigan

- CHED 1249.** Employ of nanotechnology as a resource of improvement for the agricultural sector: Enhancement on the early growth of *Abelmoschus esculentus* treated seeds using green synthesized gold nanoparticles. **J. G. Noel-Torres**, C.N. Burgos-Feliciano, C. Pellicier-Rodríguez, C.M. Osorio-Cantillo
- CHED 1250.** Synthesis of functionalized superparamagnetic cobalt ferrite nanoparticles and optimization for specific phosphoprotein enrichment. **K. Dani**, B. Chen, S. Jin
- CHED 1251.** Infrared and surface-enhanced infrared absorption study of dopamine adsorption on Cu nanostructures. **M. Lindsey**, D. Perry
- CHED 1252.** Synthesis and characterization of core/shell, copper indium sulfide/silver gallium sulfide nanocrystals. **E. Searles**, S. Hughes
- CHED 1253.** Developing methods to examine the toxicity of CuInS<sub>2</sub>/ZnS nanocrystals using *Danio Rerio* (zebrafish) embryos. **C. Peterson**, S. Hughes
- CHED 1254.** Control of the surface density of thioctic acid on gold nanoparticles and its effect on stability and catalytic activity. **A. Crawford**, J. Park
- CHED 1255.** Use of scanning tunneling spectroscopy to characterize doped ZnO nanorods for solar cell applications. **A. Carr**, E. Adcock Smith, J.A. Phillips, K. Roberts, E.V. Iski
- CHED 1256.** Application of thermally stable silver halide monolayers to polycrystalline gold. **H.R. Morgan**, L.E. Jackson, J.A. Phillips, E.V. Iski
- CHED 1257.** Effect of gold nanoparticles and sudafoed on *Daphnia Magna*. **J. Chabrier Rodriguez**, R.M. Perez-Ortiz, N. Cardona, P. Ostolaza, J.I. Ramirez Domenech, E. Ferrer Torres
- CHED 1258.** Synthesis and characterization of mesoporous zirconia. **J. Roach**, D.S. Heroux
- CHED 1259.** Neurodevelopmental toxicity of low concentration silver nanoparticles in embryonic zebrafish (*Danio rerio*). **T. Hemphill**, V. Nicolae, A. Latta, S. Robertson, R. Manteca, C.C. Pena, J.J. Pak, M.A. Thomas, J.D. Harris
- CHED 1260.** Investigation of mixed monolayer systems on Au(111). **D. Fitzgerald**, E. Krisanda, C. Szytko, G. Avila-Bront
- CHED 1261.** Novel characterization of silver & gold nanoparticles utilizing a laser system. **R. Maharaj**, M.O. Montes, K.A. Beran
- CHED 1262.** Effect of ZnO nanoparticle morphology on photodegradation of Janus Green B Azo Dye. **H.V. Anderson**, C.C. Pena, J.D. Harris, J. Cowan, J.J. Pak, J. Croteau, D. Butt
- CHED 1263.** Enhancing drug delivery using antibiotic-incorporated silver nanofibers. **K. LaiHing**, J. Lewis, A. White
- CHED 1264.** Synthesis of magnetic nanoparticles for biomolecule attachment and future biosensors. **K. Burch**, G. LeBlanc, D. Wirth
- CHED 1265.** Characterization and photothermal effects of gold nanoparticles with gallic acid ligands. **E. Evans**, E. Hysi, B. Mellis
- CHED 1266.** Effects of silver nanoparticles and orphenadrine on *Daphnia Magna*. **G.M. Santiago Rivera**, Y. Santos-Vazquez, R.M. Perez-Ortiz, E. Ferrer Torres, J.I. Ramirez Domenech
- CHED 1267.** Synthesis and characterization of Au:Ag core-shell nanoparticles with 4-aminothiophenol Surface Enhance Raman Spectroscopy (SERS) tag. **M. Gladding**, B.D. Gilbert
- CHED 1268.** Stability of insulin bound on nanodiamonds. **A.T. Arshi**, B. Negru, M. Su, H. Shi, I. Jones
- CHED 1269.** Azide functionalization of nanoporous gold. **N.J. Chevalier**, D.T. Favre, E.C. Landis
- CHED 1270.** Synthesis and characterization of quantum dot@hexaniobate nanopods. **K. Moore**, T.T. Brown, J.B. Wiley
- CHED 1271.** Identification of novel folate-binding proteins. **K. Holton**, L.M. Watkins
- CHED 1272.** Silver halide monolayers: An EC-STM study of stability on a Au(111) surface. **L.E. Jackson**, J.A. Phillips, H.R. Morgan, G.H. Jones, E.V. Iski
- CHED 1273.** Characterization of DAPI and PACA as novel, hidden, tag molecules for SERS spectroscopy of silver-coated, gold nanoparticles. **V. Wood**, B.D. Gilbert
- CHED 1274.** Synthesis and characterization of redox-responsive porphyrin-loaded polysilsesquioxane nanoparticles for photodynamic therapy. **C.N. Mena**
- CHED 1275.** Electrochemical control of phase change properties in nanoparticles of silver selenide. **J. Yungbluth**, G. LeBlanc
- CHED 1276.** Soft microspheres with discrete fluorescent nanospheres for measuring forces during phagocytosis. **D. Hay**, B. Evans
- CHED 1277.** Growth of *Shewanella oneidensis* in the presence of toxic metals: A basis for sustainable semi-conducting nanoparticle biosynthesis. **A.M. Bell**, S. Lampa-Pastirk
- CHED 1278.** Synergistic enhancement of antibiotic activity with silver nanoparticles. **E. Stuffle**, G. Vildor, C. Stewart, K. LaiHing
- CHED 1279.** Nanodiscs stabilize *Anabaena* sensory rhodopsin trimers for regulatory binding studies. **A. Aguiar**, J.M. Massey, J. Andersen, E. Sandoval, J.A. Cappuccio
- CHED 1280.** Study of metalloporphyrins on gold surfaces via scanning tunneling spectroscopy. **L. Joseph**, D. Del Sesto
- CHED 1281.** Investigating the hard corona of novel nano-vehicles in model biological fluids. **A.W. Cheema**, N.T. Flynn, A.C. Webb
- CHED 1282.** Binding and thermodynamic studies of myoglobin with polyethylene glycol coated iron oxide nanoparticles. **A. Vanyo**, A. Fazal
- CHED 1283.** Effect of polyethylene glycol-coated magnetic nanoparticles on the catalytic activity of myoglobin. **A.A. Charbonneau**, A. Fazal
- CHED 1284.** Using plasmon molecular resonance to increase LSPR sensitivity. **A. Gray**, P. Hall-Osberg
- CHED 1285.** Chemical modifications to tailor electronic structure of 2-dimensional nano-materials. **S.S. Esdaille**, T. Schiros
- CHED 1286.** Comparing the synergistic enhancement of antibiotic activity between biologically and chemically synthesized silver nanoparticles. **G. Vildor**, K. LaiHing
- CHED 1287.** Infusion of silver-gold bimetallic nanoparticles in organic nanofibers for antimicrobial use. **C. Stewart**, E. Stuffle, K. LaiHing
- CHED 1288.** Gold nanoparticle depuration in wood frog (*L. sylvaticus*) tadpoles after post-exposure habitation in fresh water. **K.T. Lerner**, P.P. Fong, L.B. Thompson
- CHED 1289.** Incorporation of silver-based antibiotic in organic nanofibers for drug enhancement. **K. LaiHing**, A. Saunders, S. Parkins
- CHED 1290.** SERS detection of graphene oxide in acid-catalyzed sol-gels. **B. Wyatt**, E.J. Atkinson
- CHED 1291.** Monolayer deposition of colloidal quantum dots by spray-coating. **A.S. Abrams**, R.E. Mow, G.P. Murray, S.H. Tan, H. Van Ryswyk
- CHED 1292.** Scattering mediated absorption in photonic crystals. **N. Eldabagh**, J.J. Foley, K.R. Fernando
- CHED 1293.** Synthesis of gold and silver nanotriangles using plant extracts. **D. Perillo**, M. Schiza
- CHED 1294.** Quantifying the thermodynamics of the surface modification of oleate-capped CdSe quantum dots with dodecylphosphonic acid via isothermal titration calorimetry. **Z.B. Di Giusto**, J.D. Keene
- CHED 1295.** Hierarchical SnS nanostructures for efficient energy devices. **A.M. DeGrauw**, L.L. Whittaker
- CHED 1296.** Effect of silver nanoparticles on migratory properties of cultured fibroblasts. **O. Creech**, L. Seballos, B. Sharma
- CHED 1297.** Quantum dot growth using cysteine polymers in a one pot method. **S. Yang**, R. Nevarez, M. Garica, I. Gasparyan, Y. Nowry, P. Lee
- CHED 1298.** Effect of capping agents on the antibacterial properties of silver nanoparticles. **H.P. Nguyen**, A.L. Smalley
- CHED 1299.** Hybrid dual-layer zinc oxide dye-sensitized solar cells. **C. Tan**, K.W. Huang, H. Van Ryswyk
- CHED 1300.** Covalent immobilization of graphene on patterned SAMs for investigation of frictional properties. **M.L. Grandon**, M.B. Elinski, M. Negrito, Z. Liu, J.D. Batteas
- CHED 1301.** Hydrothermal synthesis and characterization of two dimensional tin sulfide nanosheets. **E. Juarez Diaz**, Y. Zayas Ortiz, N. Trejo, J.D. Dwyer, E.S. Aydil
- CHED 1302.** Nanotechnology and art in chemical education. **J. Garcia**, J. Liu, E. Chan, F. Schwebel, F. Mongue, J. Blatti, A. Quinonez, T. Kwan
- CHED 1303.** Partially poisoned palladium nanoparticles for selective chemical conversion: Hydrogenation of C=C bonds. **H. Nguyen**, Y. Shon
- CHED 1304.** Temperature effects on C<sub>60</sub> fullerene in alkane, alkene, fatty acid, and vegetable oil solutions. **L.D. Bienski**, C.L. Aronson, R. Ferrer, L.A. Pajarillo, B.S. Blackwell, J. Ballard, M. Kennedy, V. Te
- CHED 1305.** Gingivitis prevention: Integration of iron (II, III) oxide nanoparticles into commercial mouthwash. **J. Nguyen**, M. Osinski
- CHED 1306.** Effect of fluoxetine-conjugated gold nanoparticles on aquatic organisms. **R.J. Gawel**, P.P. Fong, L.B. Thompson
- CHED 1307.** Quantification of polyelectrolyte adsorption to gold nanoparticle surfaces. **C.M. Harris**, F.E. McFeaters, K. Andresen, L.B. Thompson
- CHED 1308.** Raman characterization of binary hydrates. **K. Keefe**, N. Ismail, C.A. Koh
- CHED 1309.** Towards improving drug delivery technology with dual-payload gold nanoparticles. **C. Akers**, D. Scott
- CHED 1310.** Seeded synthesis of nanomites by combining top-down and bottom-up strategies. **W.E. Scholl**, C.A. Lancaster, M.A. Ticknor, J.S. Shumaker-Parry
- CHED 1311.** Creation of PEG-capped aluminum nanoparticles for tissue engineering and energetics applications. **I. Stochl**, S. Sell, S.W. Buckner, P.A. Jelliss
- CHED 1312.** Study of the Impact of surface charge of silica nanoparticles on enhanced oil recovery (EOR). **L.M. Aponte-Reyes**, L.M. Aponte-Cruz, P. Loman-Cortes, J.L. Vivero-Escoto, M.P. Alvarez
- CHED 1313.** Characterizing the nanomechanical properties of  $\beta$ -amyloid aggregation on various lipid surfaces by atomic force microscopy. **B.S. Flaherty**, E.A. Yates
- CHED 1314.** Gold nanoshapes synthesis for surface enhanced Raman applications. **M. Snyder**, M. Schiza
- CHED 1315.** Doping of 2D nanomaterials: Investigation of chemical environment and electronic structure effect. **N. Cassel**, W. Archibald, S. Sambasivan
- CHED 1316.** Interactions of myoglobin with nanodiamond particles. **C. Sylvia**, B. Negru, M. Su, H. Shi, I. Jones
- CHED 1317.** Art of adsorption: Protein attachment onto charged nanodiamonds. **S.M. Trikha**, B. Negru, M. Su, H. Shi, I. Jones
- CHED 1318.** Novel solution for powering our planet: Comparative study of a novel titania sol and a titania powder for the improved efficiency of dye-sensitized solar cells. **L. Joseph**, L. Klein
- CHED 1319.** Ultraviolet-Visible characterization of Buckminsterfullerene C<sub>60</sub> dissolved in organic monomers. **C.L. Aronson**, L.D. Bienski, L.A. Pajarillo, B.S. Blackwell, Z. Jones, R. Muzquiz, C. Anding, M. Bryant, R. Ferrer
- CHED 1320.** Synthesis of fluorescent, gallic acid capped gold nanoparticles. **K. Vazquez**, J. Hollingsworth, W. Crawford, B. Mellis

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- CHED **1321**. Effect of Ligand Identity on Quantum Dot Sensitized Solar Cell Performance. N. Hendrix, J. Snyder, K. Schnitzenbaumer
- CHED **1322**. Microwave assisted growth of cobalt doped ZnO nanorods. S. Huang, E. Adcock Smith, K. Roberts
- CHED **1323**. Evaluation of the effect of Ag, Au and ZnO nanoparticles on the kinetic of degradation of allura red AC and brilliant blue FCF dyes in wastewater. A. Rosado-Torres, J. Pacheco-Torres, J. Tirado-Robles, M. Santiago-Mercado, C.M. Osorio-Cantillo
- CHED **1324**. Metallic nanoparticle production by CVS protibiotic. H. Peng, M.O. Montes
- CHED **1325**. Glycerol mediated synthesis and applications of silver citrate nanoparticles. V.M. Wartenweiler, S. Laing, H. May
- CHED **1326**. Infrared and surface-enhanced infrared absorption study of dopamine adsorption on silver nanostructures. G. Cartwright, D. Perry
- CHED **1327**. Synthesis of gold, silica and silica@gold core shell nanoparticles for functionalization with anti-cancer drugs. F.D. Rodriguez, N.N. Sosa Cintron, E. Ferrer Torres, M.P. Alvarez, C. Osorio Cantillo, J.I. Ramirez Domenech
- CHED **1328**. Effect of the interaction of ZnO nanoparticles and the gentamicin in growing populations of *Staphylococcus aureus*. E. Ferrer Torres, S. Figueroa Gonzalez, C. Osorio Cantillo, J.I. Ramirez Domenech
- CHED **1329**. Stabilization of 4',6-Diamidino-2-Phenylindole (DAPI) in base-catalyzed sol-gels containing silver nanoparticles vs. solution using Surface Enhanced Raman Spectroscopy (SERS). D. Mason, E.J. Atkinson
- CHED **1330**. Surface-Enhanced infrared absorption studies of copper nanostructures formed by oblique-angle deposition. B. Branch, D. Perry
- CHED **1331**. Development of nanomaterials research project at a community college. J. Orozco, D. Mikhail, M. Ramos, S. Sanders, B. Bekker, S. Fan
- CHED **1332**. Withdrawn.
- CHED **1333**. Synthesis, characterization and antimicrobial activity of drug-loaded calcium alginate nanocapsules: Perspectives on their potential biomedical use. A. Anaya, T. Palacios-Hernández, M. Méndez-Rojas, A. Aburto Platas
- CHED **1334**. Study of protein-nanodiamond attached on silica surface with attenuated total reflection spectroscopy. M. Hallberg, B. Negru, M. Su, H. Shi, I. Jones
- CHED **1335**. Electrooptical dynamics of 4-cyano-4'-pentylbiphenyl mounted on ZnSe functionalized with alkanethiol self-assembled monolayers. E.C. Rossomme, A.R. Noble
- CHED **1336**. Antibacterial properties of metallic nanoparticle-doped MOFs in water. J. Walker, K. Couser, N. Le, K.T. Jackson
- CHED **1337**. Colloidal synthesis: A route towards nanometric cathode material for multivalent batteries. J. Bolotnikov, G. Nolis, J. Cabana
- CHED **1338**. Toxicological study of green synthesized silver and gold nanoparticles on germination and early growth of *Sesamum indicum* seeds. J. Pacheco-Torres, M. Santiago-Mercado, C. Torres-Martinez, C.M. Osorio-Cantillo

12:00 - 2:00

- CHED **1339**. Directed solid phase peptide synthesis of  $\alpha$ -conotoxin MII. J. Fothergill, O.M. McDougal
- CHED **1340**. Synthesis of quinoxalines and the analysis of their bond lengths via x-ray diffraction. J. DiSapio, R. Van Wart, G.A. Crundwell, N.M. Glagovich
- CHED **1341**. Design and synthesis of cyclic dipeptides for biomimetic epoxidation. C.R. Drisko, K.S. Huang
- CHED **1342**. Synthesis and metalation of *N*-methylbenzocarbaporphyrins. A.N. Latham, T.D. Lash
- CHED **1343**. Ozonolysis of cycloalkenes in the presence of unsaturated nucleophiles: Synthesis of tri-functional aldehyde-ester-alkene compounds. D.P. Soulsby, J. Ung
- CHED **1344**. Novel synthesis methods for naturally occurring THF derivatives. G. Pombar, Y. Yuan
- CHED **1345**. Exploring sequence effects in cucurbit[n]uril-peptide interactions. Z. Hirani, E.F. Babcock, A.R. Urbach
- CHED **1346**. Effects of neighboring sequence context on cucurbit[n]uril-peptide interactions. E.F. Babcock, Z. Hirani, A.R. Urbach
- CHED **1347**. One-pot dialkylation of cycloalkanones and their ring-closing metathesis to make bridged bicyclic compounds. D. Sacenti, A. Yoon, J.B. White
- CHED **1348**. Stereoselectivity of stilbene synthesis by palladium-catalyzed Heck reaction. K.J. Clark, N.S. Werner
- CHED **1349**. Rapid synthesis of *N*-(4-isopropylbenzyl)-*N*-methylformamide. S. Sundhagen, L.I. Bobyleva, M.M. Bobylev
- CHED **1350**. Examining syntheses and photochemical reactivity of 5,6-diethynylquinoxalines. A.J. Cortes, B.F. Gherman, J.D. Spence
- CHED **1351**. C<sup>1</sup>-C<sup>7</sup> Diradical cyclization of an anthracen-9-yl substituted enyne-enone. M.R. Hutchinson, B.F. Gherman, J.D. Spence
- CHED **1352**. Investigating cyclization channels of substituted enyne-enone derivatives. F. Sakdamart, B.F. Gherman, J.D. Spence
- CHED **1353**. Altering scents: Modifying the ionones and studying the effect on fragrance. S. Crosio, J.D. Pike
- CHED **1354**. Developing a colorimetric competitive displacement assay to screen for catalytic peptides. A. Gest, L. Witus
- CHED **1355**. Synthesis of silylated tetrahydropyrans from organosilanes. J. Hampton, A. Diez-Varga, C. Diez-Poza, V. Diez-Lebrato, G. González-Gil, A. Barbero
- CHED **1356**. Synthesis and characterization of mixed short and medium chain fatty acid triacylglycerols. G. Cabrera, R.P. D'Amelia, W.F. Nirode, L. Huang
- CHED **1357**. DNA-templated synthesis of macrocycles. S. Griffin, K.S. Huang
- CHED **1358**. One-pot synthesis of tetramisole-derived organocatalysts from amino alcohols. R. Morris, M. Paeth, P. Willoughby
- CHED **1359**. Progress toward the synthesis of deoxypodophyllotoxin. B. Rencher, D.I. Saavedra, M. Andrus
- CHED **1360**. Assessment of the handedness of *ortho*-phenylene folding. R. Pandian, G. Vemuri, C. Hartley
- CHED **1361**. NMR analysis of pyrrolizidine alkaloid monoesters from the plant family Boraginaceae. C.J. Burghard, P. Cantrell, L. Johnson, R.B. Kelley
- CHED **1362**. Progress towards the synthesis of F4-4. P.J. Hurst, D.I. Saavedra, M. Andrus
- CHED **1363**. Gold-catalyzed cycloetherification of epoxides. T. Silva, J.R. Vyvyan
- CHED **1364**. Mechanistic investigation of the formation of *N*-sulfonyl aldimines from aldehydes and iminoiodinanes. K.A. Scott, M.D. Hopkins, B. DeMier, A.A. Lamar
- CHED **1365**. Investigation of the effect of iminoiodinane reagent on the synthesis of *N*-sulfonyl aldimines from aldehydes. B. DeMier, M.D. Hopkins, K.A. Scott, A.A. Lamar
- CHED **1366**. Mild chlorination of arenes using organic dyes as visible-light photoredox catalysts. A.T. Bensalah, A.A. Lamar
- CHED **1367**. Rapid synthesis of *N*-methyl-*N*-(4-trifluoromethylbenzyl)formamide. S. Park, L.I. Bobyleva, M.M. Bobylev
- CHED **1368**. Rapid synthesis of *N*-vanillylbutylamide. J. Choi, L.I. Bobyleva, M.M. Bobylev
- CHED **1369**. Synthesis of calcitroic acid to determine its potential for prevention of colon cancer. V. Senych, O.B. Yu, L. Arnold
- CHED **1370**. Extending the substrate scope of the Chan-Lam cross-coupling reaction using photoredox catalysis. J. Marshall, A.J. Wommack, A. Schiro
- CHED **1371**. Synthesis and nucleic acid binding applications of diversely functionalized macrocyclic heteroarylopeptides. A.A. Fuller, C. Bosmajian, A. Mohan
- CHED **1372**. Synthesis of indolyl/indazolyl (N1 substituted) quinolones (C6 substituted) for study as possible anticancer/antibiotic/antimicrobial agents. L. Ito, K. Reicher, P. Schulzetenberg, T.M. Trygstad
- CHED **1373**. Induced-fit binding of cucurbit[7]uril to insulin B1-11 in aqueous solution. A.R. Karla, A.R. Urbach
- CHED **1374**. Applying a new amination method for the efficient synthesis of calothrixin B. M. Dekarske, L.M. Mori Quiroz, M.D. Clift
- CHED **1375**. Synthetic receptors and cyclic peptides. E. Boms, A.T. Bockus, A.R. Urbach
- CHED **1376**. PIB-bound pybox ligands. M. Gullely, T. Malinski, D. Bergbreiter
- CHED **1377**. Convergent synthesis of *trans*-alkene peptide isosteres. S.E. Huth, B.R. Sculimbrenne
- CHED **1378**. Enantioselective catalytic phosphorylation. P.J. Endres, B.R. Sculimbrenne
- CHED **1379**. Novel route to acridines. K. Berger, J. Jaye, G. McCormick, E.H. Fort
- CHED **1380**. Kinetic scheme of the decarboxylative cross-ketonization of carboxylic acids with zirconia catalyst. O.A. Fraser, A. Cohen, A. Ignatchenko
- CHED **1381**. Analysis of the structure activity relationship between novel malonamides and their fluorescence characteristics. B.I. Gomez, J. Jennings, A.K. Franz
- CHED **1382**. Destruction of organophosphorus nerve agents using metal-organic frameworks. C. Whitaker, A. Brady, L. Webb
- CHED **1383**. Synthesis and photophysical studies of solvatochromic compounds containing fluorene-quinoxaline donor-acceptor chromophores. S.R. Johnson, L.M. Wickham, J.M. Nadeau
- CHED **1384**. Synthesis of thioether-substituted dibenzo[*fg,op*]naphthacene liquid crystals. C. Henry, P. Repasky, C. Hartley
- CHED **1385**. Synthesis of a perylenebisimide ligand for improving the light absorption properties of luminescent solar concentrators. H. Towns, R.C. Chambers
- CHED **1386**. Controlling the handedness of *ortho*-phenylene helices through substitution at the termini. E.B. Stopler, G. Vemuri, C. Hartley
- CHED **1387**. Synthesis and photocharacterization of a photodynamic oxytocin antagonist. R. Ryan, C. Streu, M. Kazmierczak
- CHED **1388**. Solid-state studies of benzonitrile oxides and their dimers: Crystal structure of a 1,2,4-oxadiazole. M. Neuzil, W.H. Ojala
- CHED **1389**. Solid-state structures and reactivity of halogenated benzonitrile oxides: Crystal structure of *bis*(3-chlorophenyl)furoxan. M. Stodolka, W.H. Ojala
- CHED **1390**. Solid-state chemistry of dimers of a sterically hindered benzonitrile oxide. K. Idzorek, W.H. Ojala
- CHED **1391**. Synthesis of a PFTase substrate containing a terminal olefin capable of tetrazine ligation. S. Auger, J. Wollack
- CHED **1392**. Evidence for formyl and  $\alpha$ -hydrogen bonding in asymmetric organic reactions from single crystal X-ray diffraction and density functional theory. J. Cosme-Silva, J.D. Evanscek, J. Rohde, B. Vernier, M. Novak, M. Kanzelberger
- CHED **1393**. Bioorthogonal synthesis of novel fluorophores. S.S. Rubeck, X. Shang, J. Guo
- CHED **1394**. Synthetic methodologies for pyrazolones analogues as potential drug candidates for pulmonary fibrosis. T. Bader, C.P. Jasperse, H. Abdulsalam
- CHED **1395**. Development of new analgesic drugs. M. Langereis, M. Hossain

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡ Cooperative Cosponsorship

- CHED **1396**. *N*-Heterocyclic carbene-catalyzed conversion of  $\alpha$ -amino alcohols to their corresponding epoxides. S.T. Goralski, B.M. Saliba, K.R. Overly
- CHED **1397**. Natural products to combat leishmaniasis: Synthesis of espinatol-based anti-parasitics. A.T. Hargis, G.R. Naumiec
- CHED **1398**. Use of peptoids for the detection of aromatic water contaminants. A.A. Fuller, K. Tenorio, J. Huber
- CHED **1399**. Synthesis of macrocyclic aromatic oligoamides. A.A. Fuller, D. Tian, J. Tobias
- CHED **1400**. Synthesis of 3-alkoxybenzoporphyrins. R.A. Tomlovich, T.D. Lash
- CHED **1401**. Synthesis and characterization of 5-(3'-thienyl)pentanoic acid capped lead sulfide nanoparticles for polymeric photovoltaic cells. M.J. Strauss, R.W. Kopitzke, J. Zernke
- CHED **1402**. Synthesis of heterodisubstituted pyridines via cyclization of methyl ketones, DMSO, and ammonium salts. H. Cole, H. Clause, B. Bowers, S.K. Goforth
- CHED **1403**. Synthesis of *O*-acylated amino acid surfactants with hydrophobic  $\alpha$ -alkenyl chains. C. Young, A.P. Szczepanski, D. Brownholland
- CHED **1404**. Microwave-assisted gold(I)-catalyzed Friedel-Crafts-like arylation of benzylic alcohols to afford 1,1-diarylmethanes. R.G. Iafe, J.V. Oakley, T. Stanley
- CHED **1405**. Synthesis of silylthynyl substituted *anti*-indaceno-dibenzothiophenes. S. Durham, C.K. Frederickson, J. Marshall, M.M. Haley
- CHED **1406**. 1,3-Dipolar cycloadditions to 1,4-quinones. C. Wasacz, W. McMahon
- CHED **1407**. Synthesis and evaluation of peptides for RNA world hypothesis. M.Z. Jorge, R. Patel, K. Sweeney, U. Muller, J.G. Schellinger
- CHED **1408**. Analysis of pyrrolizidine alkaloids in *Cryptantha maritima*. C.R. Barton, M.M. Lease, M.E. Hillman, J.D. Jacobs, O.E. Starks, R.B. Kelley
- CHED **1409**. Synthesis of naphthalene diimides with varying core substitutions for use in donor acceptor aromatic interactions. M. Stern, J.J. Reczek
- CHED **1410**. Development of a novel aldehyde C-H bond functionalization reaction using an organocatalytic methods for the nucleo-acylation of alkenes. N.P. Biewer, K. McMahon
- CHED **1411**. Studies of xenocoumarin-1-benzylideneacetone Michael adduct formation. C. DeShambo, M. VanMieghem, M. Cherney, A. Koopmann, K.A. Bichler, S. Forst, J. McGraw
- CHED **1412**. Rapid synthesis of *N*-methyl-*N*-(3-trifluoromethylbenzyl)formamide. T.A. Dostert-Azzarello, L.I. Bobyleva, M.M. Bobylev
- CHED **1413**. Photochemical reactivity profiles of quinoxalenediynes isomers. S.A. Valenzuela, B.F. Gherman, J.D. Spence
- CHED **1414**. Synthesis of (-)-duryne and homologues. T. Schempp, D.B. Ball
- CHED **1415**. Tailor-made GNRs: Controlled conversion of polydiacetylenes into graphene nanoribbons. R. Mccurdy, R. Jordan, S. Khan, Y.F. Rubin
- CHED **1416**. Rapid synthesis of *N*-(2-chlorobenzyl)-*N*-methylformamide. E.Y. Mojica, L.I. Bobyleva, M.M. Bobylev
- CHED **1417**. Rapid synthesis of *N*-methyl-*N*-(2-naphthylmethyl)formamide. B. Hatfield, L.I. Bobyleva, M.M. Bobylev
- CHED **1418**. Synthesis of a degradation product of benzobicyclon. C. Park, J. Kalbfleisch, L. Rubottom, J.J. Gladfelder, D.B. Ball
- CHED **1419**. Progress towards the synthesis of a desmethyl englerin A analog. E.B. Pimentel, M. Andrus, D. Wilcox
- CHED **1420**. Visible-light-promoted formation of  $\alpha$ -tertiary amines via a *N*-centered radical approach. C.E. Keating, M.M. Tierney, A.A. Lamar
- CHED **1421**. Preparation of diligand model compounds. K. Zhang, J. Pence, R. Lamb, Y. Zhu
- CHED **1422**. Tandem Ugi-Smiles Diels-Alder reactions: Evaluation of substrate scope. A. Fox, S. Luesse
- CHED **1423**. Synthesis of 6- and 7-(4-aryl)-*N*-acetylglucosylamides. M. Covington, L. Desrochers, N. Kumar, D. Black, T.E. Goodwin
- CHED **1424**. Towards a chlorin-based fluorophore synthesis for pharmacokinetic diagnosis in neglected tropical diseases. S.M. Bridges, G.R. Naumiec
- CHED **1425**. Chemical synthesis of the cyclic peptide stylissamide X, a cell migration inhibitor. K. Warrick, J. Chaytor
- CHED **1426**. Dialkyltriazene decomposition leading to bromoarenes: A boron tribromide-mediated process. V. Kuipers, A.L. Korich
- CHED **1427**. Stereoselective synthesis of fluorinated  $\beta$ -lactams and  $\beta$ -aminoesters. A.C. Sigler, J.C. Easdon
- CHED **1428**. Sulfonated maleimides: New monomers for thermally robust polymers. J. Linville, A.L. Korich
- CHED **1429**. Total synthesis of a series of  $^{13}\text{C}$ -labeled isotopomers of xanthohumol: The primary prenylated chalcone in the inflorescence of hops plants. D. Ellinwood, P.R. Blakemore
- CHED **1430**. Formation of trisubstituted naphthalenes: Development of a new benzannulation strategy. P. Mansour, A.L. Korich
- CHED **1431**. Preparation of keto sulfoxonium ylides from carboxylic acids. A. Krahn, M. Paeth, R. Enright, P. Willoughby
- CHED **1432**. Synthesis of small-molecule inhibitors of botulinum neurotoxin. K. Recabo, E. Slick, S.M. Ensel
- CHED **1433**. Novel synthesis of ferrocenyl epoxides derivatives to explore their biological potential as anticancer and antioxidant compounds. J. Davila, I. Montes-González, J.C. Aponle-Santini
- CHED **1434**. Bisphosphorylimides as organocatalysts for asymmetric Friedel-Crafts reactions. R.G. Iafe, L. Ahlberg, C. Thompson, G. Diaz, B. Klasic
- CHED **1435**. Synthesis of linker molecules connect nanomaterials for solar PV cells. D. Melchor, X. Herrera, E. Juetta, J. Zhang
- CHED **1436**. *N*-Propylmaleamic Acid (NPMA): Concentration dependent chemical shift variability of vinyl protons. L. Pilarz, W.A. Price
- CHED **1437**. Synthesis of amino acid radical precursors. K.N. Carter, C.M. Foscue
- CHED **1438**. Total synthesis of cladocin C. J. Mease, H. Burdge, K.P. Reber
- CHED **1439**. Synthetic studies on squamostanin C. Y. Hu, P.J. Miller, K.J. Quinn
- CHED **1440**. Total synthesis and biological evaluation of tryptamide derivatives. Z. Shen, E.K. Leggans
- CHED **1441**. Exploration of  $\alpha$ -glucosidase inhibitors via synthesis of C-linked  $\beta$ -D-glucose analogs. B. Pero, J. Chaytor
- CHED **1442**. Progress toward the synthesis of guignardianone E. S. Lewis, C.J. Nichols
- CHED **1443**. Comparing transverse relaxation ( $T_2$ ) times between low and high field NMR's for reaction of chlorosulfonyl isocyanate with alkenes. Z. Beavis, S. Van Home, D.F. Shellhamer
- CHED **1444**. Efforts toward the total synthesis of (+)-bovidic acid. A.B. Millham, K. Nicastrì, K.J. Quinn
- CHED **1445**. Relationship between biaryl ligand structure and reactivity in under-air direct arylation. J. McAfee, J. Fritz
- CHED **1446**. Aldol reactions: A lab aimed at second semester organic chemistry. J. Burroughs, R.V. Macri
- CHED **1447**. Measuring the cell death of novel indolyl amines. B. Lowder, T. Bishop, M. Dosso, T. Tolentino, C.R. Whitlock
- CHED **1448**. Rapid synthesis of *N*-(4-bromobenzyl)-*N*-methylformamide. H. Lee, L.I. Bobyleva, M.M. Bobylev
- CHED **1449**. Rapid synthesis of *N*-(3-chlorobenzyl)-*N*-methylformamide. T.A. Skinner, L.I. Bobyleva, M.M. Bobylev
- CHED **1450**. Investigation of potential cofomers for synthesis of sulfa drug cocrystals. A. DeMaet, D. Admond
- CHED **1451**. Progress toward the total synthesis of (+)-cryptofoline and development of natural product analogues. K. Nicastrì, C.N. Ndi, J. Torres, P.R. Hanson
- CHED **1452**. Inverted bis-Au cavities: Cavity-dependent catalysis. L. Digal, M.P. Schramm, T. Iwasawa
- CHED **1453**. Search for resonance in vinylsilyl anions: Synthesis of silyl substituted 9-methylenefluorene. C. Fowler, E. Gulotty, W.R. Winchester
- CHED **1454**. Synthesis and study of a vinylsilole. J. Robertson, C. Duke, W.R. Winchester
- CHED **1455**. Design and synthesis of new ternary cocrystals using carboxyphenols. P. Sperstad, D. Admond
- CHED **1456**. Investigating analogs of eflornithine, an irreversible inhibitor of ornithine decarboxylase. L. Oxtoby, L. Liu, N. Gerstner, J.M. Schomaker
- CHED **1457**. Synthesis of 2-substituted quinoline-4-carboxylic acids from 5- and 7-fluoroisatins and benzylideneacetones via the Pfitzinger reaction. A. Imanishimwe, L. Desrochers, T.E. Goodwin
- CHED **1458**. Synthesis of 2-substituted, 3-methylquinoline-4-carboxylic acids from 5- and 6-bromo-, chloro- and fluoro-isatins via the Pfitzinger reaction. A. Shuler, L. Desrochers, T.E. Goodwin
- CHED **1459**. Intermolecular halogen bonding and non-conventional hydrogen bonding in arylene ethynylene oligomers. Z. Kehoe, G. Woller, E. Bosch, N.P. Bowling
- CHED **1460**. Electrophilic alkylations in aqueous-surfactant solutions. Z. Gregg, E. Ballard
- CHED **1461**. New approaches to the synthesis of *N*-heterocyclic carbene. G. Schlicht, M.O. Odago
- CHED **1462**. Synthesis of 2-cycloheptatrienyl iminodiacid, a potential switchable organic linker for Metal Organic Frameworks (MOFs). A.R. Satterfield, B. Meeker, D. Jackson, R.W. Morrison
- CHED **1463**. Synthesis and reactions of some 1,2-dicyaldiaziridines. S.M. Bonser, I. Jacome Ottati
- CHED **1464**. Utilization of nucleobase interactions to develop energy and electron transfer systems. H.M. Owens, C.M. Lawrence
- CHED **1465**. Thermodynamic and structural impact of  $\alpha,\alpha$ -dialkylated residue incorporation in a  $\beta$ -hairpin peptide. S. Schetter, G.A. Lengyel, G.D. Gette
- CHED **1466**. Synthetic strategies towards the synthesis of guanacastepene A. M. Shinn, T.V. Ovaska
- CHED **1467**. Withdrawn.
- CHED **1468**. Research-derived experiments for the undergraduate teaching laboratory. D.G. Hamilton, S.E. Carter
- CHED **1469**. Synthesis of a photolabile derivative of T-0632 to study GLP-1R. S. Eslami, G. Towers, D.R. Haines
- CHED **1470**. Exploring the edge-modification of graphene. P.N. Rudd, J. Reczek
- CHED **1471**. Synthesis of 1,3,4-oxadiazoles using dibromotriphenylphosphorane. E. Bliss, K. Merringer, E. Peters, B. Sowers, R.E. Grote
- CHED **1472**. Synthetic studies toward 2-bromo-4,5-dimethylaniline en route to humanamycin A. G.J. Baldree, S.M. Kennedy
- CHED **1473**. Evaluation of imines as cation sensors in water samples. M. Seidel, N. Rosenfeld, A. Gaynor, J. Bennett
- CHED **1474**. Estimating imine basicity trends by multinuclear NMR. N. Capra, J. Bennett

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

- CHED 1475.** Introduction of MOM and MEM protecting groups via acid-catalyzed transacetalization using solid acid catalyst. **J.M. Edgcomb, K.G. Fossnacht, G.L. Milligan**
- CHED 1476.** Synthesis of *bis*-3,4-(2'-acetoxybenzoyl) furoxan. **A.A. Richards, N.M. Wachter**
- CHED 1477.** Advancing organic chemistry laboratory techniques using the open source arduino platform. **D.M. Lutz, C. Konow, C.E. Stills**
- CHED 1478.** Dioxane-mediated *N*-formylation. **B. King, A.G. Wenzel**
- CHED 1479.** Withdrawn.
- CHED 1480.** Synthesis and NMR characterization of new bromopyridine thiosemicarbazone compounds. **J.T. Kimrey, E.C. Liscic**
- CHED 1481.** Calculation of extinction coefficients for meso-substituted porphyrins in different solvents. **A. Novaj, S.N. Khayyo, P.K. Kerrigan, J. Batarseh, S. Maio, R. Guglielmo**
- CHED 1482.** Peripheral functionalization of AzaBODIPY for 2D and 3D assemblies. **D. McKinzev, F. D'Souza, S. Shao**
- CHED 1483.** Synthesis and reactions of dicyanopyrazines. **A.T. McGrath, A.M. Schoffstall**
- CHED 1484.** Approach to the synthesis of new isatin-linked chalcones. **D. Wade, L. Desrochers, T.E. Goodwin**
- CHED 1485.** Relative reactivity of a series of SNC-Rh(I) and Ir(I) pincer complexes in catalytic transfer hydrogenation and arene borylation. **K. Barko, P.L. Osburn**
- CHED 1486.** Synthesis of sulfonamides utilizing green, one-pot methods. **B. Tomiczek, J.K. Vohs**
- CHED 1487.** Searching for chemical signals in orang-utans (*Pongo spp.*). **P. Ravikumar, A. Umuhire-Juru, S.B. Bradley, G. Banes, T.E. Goodwin**
- CHED 1488.** Exploring the utility of halogen bonding in the creation of abiotic helices. **A. Schneider, E. Bosch, N.P. Bowling**
- CHED 1489.** Synthesis of photolabile T-0632 derivatives to aid GLP-1R active site exploration. **L. Bancroft, D.R. Haines**
- CHED 1490.** Synthesis of 2-substituted quinoline-4-carboxylic acids from 5- and 6-bromo-, chloro-, and iodo-isatins via the Pfiztinger reaction. **G. Stanton, L. Desrochers, T.E. Goodwin**
- CHED 1491.** Intramolecular halogen bonding of 2,1,3-benzothiadiazole containing molecules. **L. Mancheski, S. Giebel, E.D. Speetzen, E. Bosch, N.P. Bowling**
- CHED 1492.** Progress toward the synthesis of the heterocycle Choi. **J.M. Spehar, M.S. Leonard**
- CHED 1493.** Isolation of novel compounds from *Garcinia binucao* via enzymatic extraction. **M. Lesko, K.M. Halligan**
- CHED 1494.** Chemoselective hydrodehalogenation and deuterodehalogenation of aryl halides using borohydrides and supported metal catalysts. **J. Garcia, D.B. Cordes**
- CHED 1495.** Synthesis of 2-substituted quinoline-4-carboxylic acids from 5- and 7-fluoroisatin via the Pfiztinger reaction. **D. Shah, M. Abdulrahim, L. Desrochers, T.E. Goodwin**
- CHED 1496.** Microwave synthesis of  $\beta$ -fluoroamides from alkenes. **A. Trimble, M.L. Druelinger**
- CHED 1497.** Effects of solvents on the iron-catalyzed *N*-demethylation of opiate alkaloids. **B. Evangelisti, K.M. Halligan**
- CHED 1498.** Discovery of a novel mechanism for cyclopropyl ring opening. **G.W. Larson, J.T. Ippoliti**
- CHED 1499.** Two-step synthesis of flavonoids using task-specific ionic liquids. **R.N. Manchanayakage, R. Potenzino**
- CHED 1500.** Effects of alkyl chain length on carbohydrate organogel formation and properties. **N. Toupin, J. Chaytor**
- CHED 1501.** Transesterification of hypophosphorous esters: A methodology study. **A.V. Carmona, N. Neris, S. Deprele**
- CHED 1502.** Synthesis of an ethylene-linked calixarene dicavitand scaffold for dimeric Template-Assembled Synthetic Proteins (TASPs). **E.J. Peterson, N.A. Yakelis, J. Freeman**
- CHED 1503.** Preparation of biocompatible nanoparticle aggregates. **A. Taylan, A.G. Wenzel, J.M. Berlin**
- CHED 1504.** Organocatalytic hydroamination reactions of dienes. **S. Srivastava, A.G. Wenzel**
- CHED 1505.** Synthesis of indolyl-malonamides and analysis of their metal binding properties. **M. Frame, J. Jennings, A.K. Franz**
- CHED 1506.** Synthesis of octavalent dendrimers for glycosylation. **J. Cerney, K.D. McReynolds**
- CHED 1507.** Synthesis of small functionalized molecules using copper-catalyzed Atom Transfer Radical Addition (ATRA). **M. Baldwin, T. Pintauer, S. Fischer**
- CHED 1508.** Nickel-catalyzed borylation of aryl *O*-sulfamates. **K.R. Holman, P. Burree, J. Edmondson, K. Hill, A.L. Silberstein**
- CHED 1509.** Synthesis of cellobiose and lactose terminated glycodendrimers. **L. Gwarada, K.D. McReynolds**
- CHED 1510.** Modified click-style Sonogashira coupling reactions involving silyl-protected alkynes. **M.J. Mio, K.M. Barbour, R. Beltman, Y.M. Brikho, N.R. Boynton, N.H. Hussein, M.M. Payne, B.M. Ross, K.M. Sultier**
- CHED 1511.** Synthesis of a novel chiral ferrocene ligand. **B. Davies, C. Denler, J. Sturdevant, N.E. Carpenter**
- CHED 1512.** Synthesis of ferrocenyl-substituted *N*-heterocyclic carbenes. **D. Saugar, M.O. Odago**
- CHED 1513.** Design, synthesis and biological evaluation of berberine analogs as anticancer agents for triple negative breast cancer. **D. Bradford, F.L. Payton**
- CHED 1514.** Synthesis of *N*-(*N*'-(3-propyl)-*N*'-methylimidazole-2-thione) diethylenetriamine tetraacetic acid for the reduction of nuclear waste. **R.K. Pontius, M.M. Sibley, M. Wetzler**
- CHED 1515.** Synthesis and electrochemistry of pyrazinium salts. **N. Wagner, M. Worke, C. McCauley, V.A. Sichula**
- CHED 1516.** Design, synthesis, and biological evaluation of berberine analog as an anticancer agent. **N. Tran, F.L. Payton**
- CHED 1517.** Investigation of substituted furaldehydes in the Passerini-Smiles reaction. **W. Friederich, C. Summers, S. Luesse**
- CHED 1518.** Facile synthesis of resveratrol analogues and inducing osteogenesis in mesenchymal stem cells. **L. Daley, E. Barth, G. Cabezas, D. Paull**
- CHED 1519.** Investigation of catalysts and conditions for the synthesis of hindered imines and application to the preparation of the camphor imines of hindered substituted benzylamines. **S.A. Corlett, I.F. Germek**
- CHED 1520.** Chasing a universal method for the mono-substitution of symmetrical diols. **L. Daley, D. Paull**
- CHED 1521.** Facile ring opening of cyclic ethers using sodium borohydride and iodine. **A. Ramayani, M. Cummings, N. Nigam, P. Dhar**
- CHED 1522.** Approaches to molecular interlocking in the solid state. **D.G. Hamilton, D. Sibai**
- CHED 1523.** Synthesis and electrochemical properties of a homologous series of cyanine-type and anthracenyl compounds with thienyl moieties. **N.B. Burman, J.G. Rowley**
- CHED 1524.** Synthesis of furan derivatives and the kinetics of their Diels-Alder reactions with *N*-(4-fluorophenyl) maleimide. **T.R. Jones, W. Hollis, P.A. Deck**
- CHED 1525.** Magnetic anisotropy of *C*-nitroso compounds. **C.E. Owens, S.C. Blackstock, A. Kelley**
- CHED 1526.** New triphenylamine derivatives for use in nondoped organic light emitting diodes. **A. Dahi, V.A. Sichula**
- CHED 1527.** Synthesis of novel paraben derivatives. **M. Bache, S. Merrill, K. Pate**
- CHED 1528.** Development of an enantioselective allenolate claisen rearrangement. **I. Laufer, A.G. Wenzel**
- CHED 1529.** Preliminary characterization of fossilized plant exudates by <sup>13</sup>C nuclear magnetic resonance spectroscopy. **T.V. Nguyen, J.B. Lambert**
- CHED 1530.** Synthesis of a novel chiral anthracene-based ligand for incorporation in supramolecular assemblies. **A. Stamoulis, R.M. Triano, K.N. Raymond**
- CHED 1531.** Steric and catalytic effects of alcohols on the transamination of naphthalimides. **T.N. Kysely, B.A. Smith, D.E. Lewis**
- CHED 1532.** Amide formation studies en route to HunanAMYCIN A. **S.K. Gillis, J.E. Thames, S.M. Kennedy**
- CHED 1533.** Green synthesis of novel fluorescent, photochromic, and thermochromic imines and diimines. **W. Evans, J. Bennett**
- CHED 1534.** Green synthesis of substituted benzoin analogs and qualitative analysis with redox indicators for organic chemistry laboratory. **G. Chesser, J. Bennett**
- CHED 1535.** Structure determination of a family of bioactive lipids isolated from the larvae of the Argentine cactus moth, *Cactoblastis cactorum*. **D. Cervasio, T. Schwertfeger, T. Potter, M. Todd, F.M. Rossi**
- CHED 1536.** Facile synthesis of benzo-fused sulfur-containing heterocycles. **S. Alam, F. Robertson**
- CHED 1537.** Complete synthesis of *S*-(+/-)-lycoperic acid. **J. Singh, R.W. Denton**
- CHED 1538.** Synthesis of new precursors to the pyramidalized alkene pentacyclo[4.3.0.0<sup>2,4</sup>.0<sup>3,8</sup>.0<sup>5,7</sup>]non-4-ene (2). **C. Stow, R. Kontos, M.A. Forman**
- CHED 1539.** Intramolecular hydroamination of unfunctionalized alkenes in the presence of gold catalysts. **M.M. Zendali, A.G. Wenzel**
- CHED 1540.** Progress towards the synthesis of a Baeyer-Villiger enzyme mimic. **M. Khan, F. Robertson**
- CHED 1541.** Structural determination in donor-acceptor columnar liquid crystals series. **M. Hill, J. Rezek**
- CHED 1542.** Toward spin bearing polymers as components of spintronic systems. **K. Sai, W. Guan, R. Mac, Y. Chen, T.F. Horn, D.J. Brook**
- CHED 1543.** Towards the synthesis of Stachybotrin D. **S. Coody, D.C. Bromfield-Lee**
- CHED 1544.** Studies en route to alter-solanol derivatives. **S.M. Kennedy, T.C. Bentzel, B.L. Frey**
- CHED 1545.** Chasing enantioselectivity: Synthesis of chiral  $\alpha$ -quaternary carboxylic acid building blocks. **E. Barth, D. Paull**
- CHED 1546.** 6-Gingerol extraction, isolation, and reduction to 6-gingerdiols. **C.D. White, E. McGuffie, T. Harris, J.J. Krikke, D.G. Kovacs**
- CHED 1547.** Oxadiazole based liquid crystals: Phase behavior and efforts to improve the synthetic route to the target compounds. **G. Reyes, E. Scharrer**
- CHED 1548.** Synthesis of indole derivatives and 1,2-aminoalcohols via *N*-tosyl 2-alkenylaniline oxides. **L.N. Hines, C.J. Monceaux, C. Tutwiler**
- CHED 1549.** Has anybody seen my gal? Ready access to lincosamide analogs from diacetone galactose. **C. Love, Z. Cannone, J. Portelinha, A.M. Angeles Boza, M. Peczu**
- CHED 1550.** Colorimetric studies of isoniazid-based anion sensors. **J. Warner, M.O. Odago**
- CHED 1551.** Synthesis of a new molecule, 2,3-Butanedione Tertbutyl-Thiosemicarbazone (BDMO-tBTS) and characterization by a new 500 MHz nuclear magnetic resonance spectrometer. **H.M. McFadden, A. Susnjari, E.C. Liscic**
- CHED 1552.** Synthesis of fatty acid polyamides. **E. Corral, J. Arriaga, R. Kim, A. Keshishian, A. Oganiesyan**
- CHED 1553.** Synthesis and characterization of D-glucosamine derived lipids as low molecular weight gelators. **P. Kozlowski, J. Morris, A. Chen, G. Wang**
- CHED 1554.** Synthesis and purification of glycodendrimers. **U. Farah, K.D. McReynolds**
- CHED 1555.** Synthesis and characterization of ferrocenyl curcumin analogues as potential antioxidant and antibacterial compounds. **X. Santiago-Maldonado, J. Rivera, I. Montes**
- CHED 1556.** UV/Visible spectra and the solvatochromic properties of various 2,6-diaryl-3*H*-imidazo[4,5-*d*]pyridines. **J. Orlandi, J.K. Murray, M.J. Castaldi, M. Bauman**
- CHED 1557.** Synthesis of polyhydroxylated indolizidine using ruthenium catalyzed dihydroxylation reaction. **C. Giannetti, L.J. Liotta**

- CHED **1558**. Synthesis of acet-  
ylenic and pyridyl bicyclobu-  
tanes. G. Giardino, L.J. Tilley
- CHED **1559**. Lowering the cata-  
lyst loading in cobalt-catalyzed  
Kumada couplings. S.D. Chafin,  
K.P. Zachariah, M.C. Perry
- CHED **1560**. Synthesis of a novel  
N-heterocyclic carbene ligand for  
the use of enantioselective catal-  
ysis. M. Licata, P.J. Lombardi
- CHED **1561**. Synthesis and proper-  
ties of triazine based dendrimers  
constructed using hydrazine  
linkers. A.V. Ananin, M.B. Steffensen
- CHED **1562**. Investigation of regiose-  
lective and stereoselective additions  
to (1R)-(-)-nopol, a bicyclic steri-  
cally hindered alkene. D. Joaquin-  
Castaneda, K.C. Sorensen-Stowell
- CHED **1563**. Reactions of  
6-oxoverdazyls for use as spin  
probes. A. Herrera, T. Pan, D.J. Brook
- CHED **1564**. Kinetic study of reactivity  
of *para*-substituted iodo-phenyl-  
alkynes in the copper (I)-catalyzed  
azide-alkyne cycloaddition reac-  
tion. H. Rossiter, A. Nazarova, V. Fokin
- CHED **1565**. Synthesis of UIO-67 derivatives  
for site-isolated reactions. C.E. Lemmon,  
S.A. Larson, M.C. Perry, L.G. Beauvais
- CHED **1566**. Synthesis of methoxy-  
tetrahydrane by coupling and  
elimination of dibromosilylcylo-  
butane. E. Hickey, L.J. Tilley
- CHED **1567**. Synthesis of water-soluble  
tetrasulfonated calix[4]arenes with a  
reactive methylene-bridge substit-  
uent. J.D. Sundberg, J.L. Fantini
- CHED **1568**. Concise synthesis of  
COX inhibitor BRL-37959. D. Hinz,  
S. Ahmed, M. Hossain
- CHED **1569**. Synthesis of novel oxazo-  
lidinone antibacterials. J.K. Bardwell,  
T.J. Higgins, C.T. Ippoliti, E.J. Keil,  
T.J. Ogorek, A.M. Heuer, J.T. Ippoliti
- CHED **1570**. Copper(I)-catalyzed  
silylations using disilanes. B. Thomas,  
B. McCarty, R. Van Hoveln
- CHED **1571**. Protection of primary  
amines with high molecular weight  
silanes. A. Pancoast, M.T. Wentzel
- CHED **1572**. How do ether and amine  
bridges affect the conjugation in  
monomacrocyclic dendrimers? A. Smyly,  
B. Nash, D.H. Magers, S.A. Smith
- CHED **1573**. Synthesis of esters and  
amides using both flow and micro-  
wave reactors. E. Peters, M.T. Wentzel
- CHED **1574**. Progress towards the  
synthesis and chemistry of some novel  
diaziridines. S.M. Bonser, J.F. Urena
- CHED **1575**. Evaluating the impact of tether  
position on the intramolecular oxazolium  
salt/azomethine ylide cycloaddition  
sequence. S.E. Rourk, D.L. Warner
- CHED **1576**. Three-component  
coupling of an arylboronic acid,  
aryl halogen and ketene to form  
benzyl phenyl ketone deriva-  
tives. P.A. Shelton, B. Martin, E. Fussell
- CHED **1577**. Pyridine derivatives as sources  
of nucleophilic fluorine. B. Maki, S. Marrujo
- CHED **1578**. Synthesis of all-trans  
cyclobutyl systems and investiga-  
tion of electron-withdrawing sub-  
stituents. M.S. Wolf, L.J. Tilley
- CHED **1579**. Synthesis and optimization of a  
new synthetic route to modified thymidine  
monomers. M. Magnuson, M.P. Maddox
- CHED **1580**. Factors determin-  
ing the Wagner-Jauregg reac-  
tion. S. Johnson, S. Tartakoff
- CHED **1581**. Progress toward the  
synthesis of pyrrole-based alkaloid  
natural products. B. Maki, A. Garcia
- CHED **1582**. Mercury-free hydration  
of terminal alkynes. P.A. Shelton,  
B. Ide, J. Thompson, S. Sulcer
- CHED **1583**. Investigation of the formation  
of an imine between an aldehyde with  
a conjugated pi bond and a primary  
amine. H. Hobbs, K.C. Sorensen-Stowell
- CHED **1584**. Synthesis and evaluation of  
phenylglycine-derived amino-oxazo-  
lines as anti-oxidants. B. Maki, Y. Xiu
- CHED **1585**. Surfactant synthesis of hypo-  
phosphite esters involving phosphorus  
chemistry. A. Gonzalez, S. Deprele, V. Lee
- CHED **1586**. Synthesis of [2.1.2]-bicyclic  
heterocycles inspired by Lycojaponicum  
natural products. B. Maki, J. Alcon
- CHED **1587**. Comparison of iodina-  
tion methods on aryl heterocycles:  
The curious synthesis of 2,3,4-trio-  
do-5-methylthiophene. N. LeValley,  
J.B. Benedict, D.G. Patel
- CHED **1588**. Microwave-assisted general  
synthesis of highly-substituted anthraqui-  
none derivatives. A. Delahunty, J.J. Reczek
- CHED **1589**. Synthesis and phase  
behavior of new oxadiazole-based  
liquid crystals possessing multiple  
lateral groups. R. Grate, E. Scharrer
- CHED **1590**. Three component separation  
of an unknown sample in order to refresh  
student techniques before organic II  
laboratory. P.A. Shelton, S. Belton, J. Crews
- CHED **1591**. Far-red emitting squaraine  
dye: Synthesis, optical properties,  
and cyanide sensing. M.A. Valencia,  
T. Liu, X. Liu, K.D. Belfield
- CHED **1592**. Isoxazole-based inhibi-  
tors of the neuraminidase enzyme  
of the influenza virus. P. Rahman,  
J. Singh, R.W. Denton, A. Glanzer
- CHED **1593**. Synthesis and characterization  
of 5-(3'-thienyl)-1-mercaptopentane  
capped lead sulfide nanoparticles for  
polymeric photovoltaic cells. S.W. Steele,  
M.J. Strauss, J. Zemke, R.W. Kopitzke
- CHED **1594**. Benzylic amide synthesis using  
a heterogeneous catalyzed continuous  
flow reactor. M.T. Wentzel, J. Scheeler
- CHED **1595**. Fluorination of 2-hydroxybenzyl  
alcohol. S. Hernandez, R.E. Rosenberg
- CHED **1596**. Alteration of HMBC parameters  
to show  $^4J_{H-C}$  and  $^5J_{H-C}$  correlations for  
the structural elucidation of a fungal sec-  
ondary metabolite. E.J. Sperry, A. Jordan
- CHED **1597**. Better way to syn-  
thesize ketones. L. Farber,  
S. Baer, S. Zupetz, M. Filja
- CHED **1598**. Tetra-*meso*-substituted  
porphyrins via mechanochemistry:  
Reaction homology and applications of  
a porous catalyst. Q. Su, T.D. Hamilton
- CHED **1599**. Pre-monomer peptido-  
mimetic synthesis using thiol-ene  
click chemistry. X. Liu, L. Witus
- CHED **1600**. Regioselective ring opening  
of phenyl aziridines. A.J. Wong,  
J.A. Tarahomi, M.E. Hart
- CHED **1601**. Synthesis of thiol and  
carboxylate ligands for nanocrystals  
in luminescent solar concentra-  
tors. E. Woodward, R.C. Chambers
- CHED **1602**. Solid-state chemis-  
try of dimers of reactive nitrile  
oxides. S. Whitcomb, W.H. Ojala
- CHED **1603**.  $^{13}C$  Kinetic isotope effects  
and the mechanism of the Cope-type  
hydroamination of alkynes. R. Rivera,  
D. Singleton, Y. Nieves-Quinones
- CHED **1604**. Equilibrium constants in  
the Diels-Alder reactions of furan  
derivatives with *N*-(4-fluorophenyl)  
maleimide. W. Hollis, D. Stum, P.A. Deck
- CHED **1605**. Comparison of new isatin  
thiosemicarbazone derivatives: NMR  
structure determination. A. Susnjar,  
H.M. McFadden, E.C. Lisic

12:00 - 2:00

- CHED **1606**. New method for  
measuring acidity in metha-  
nol. C.G. Lamunu, E.D. Lorance
- CHED **1607**. Measuring adsorption phenom-  
ena using femtoliter arrays. G.M. Nishioka,  
K.S. Huggler, T.N. Dao, C.W. Sokolik
- CHED **1608**. Doping of a thermotropic  
liquid crystal with ferromagnetic plate-  
lets. M. Van Winkle, A. de la Cotte, A.G. Yodh
- CHED **1609**. Barriers to bond rotation  
in *N,N*-dimethylbenzamides probed  
using temperature dependent  $^1H$ -NMR  
spectroscopy. W.T. Grubbs, M. Ma
- CHED **1610**. Determination of acid and  
base effects on the surface chemistry of  
silver nanoparticles. P. Kraj, M.K. Parker,  
J.D. Mims, R. Vaiti, C.S. Seney
- CHED **1611**. Polyphosphate mediation in  
synthesis of doped alloy semiconductor  
nanoparticles. P. Kraj, D. Moore
- CHED **1612**. GC/QQQ limits of  
detection for biomolecules in  
abiotic aerosols. M.C. Roach,  
T.M. Christensen, J. Sebree
- CHED **1613**. Survey of proline conforma-  
tional behavior in protonated gas-phase  
XxxProGlyGly. A.E. Glass, K.A. Dickerson,  
D.A. Hales, T.J. El-Baba, D.E. Clemmer
- CHED **1614**. Synthesis of biofunction-  
alized self-assembled monolayers on  
zinc selenide. A. Merrill, A.R. Noble
- CHED **1615**. Fluorescence studies  
on a series of carboxylic acid  
dyes. R. Ashmore, M. Elioff
- CHED **1616**. Analysis of the quantum yield  
and photodegradation of anthraqui-  
none-based dyes. M. Thomas, S.J. Soback
- CHED **1617**. Coupling reactions catalyzed  
by palladium nanoparticle/carbon micro-  
sphere composites. S. Murphy, K.M. Metz
- CHED **1618**. Synthesis and characterization  
of lipid-coated nanoparticles as drug  
delivery vehicles. C. Munjar, B.D. Gilbert
- CHED **1619**. Plasma-assisted atomic  
layer deposition of GeS<sub>2</sub> thin films from  
GeCl<sub>4</sub> and H<sub>2</sub>S precursors in a student  
designed PAALD chamber. B. Poulter,  
M. Gonzalez, R. Rodriguez
- CHED **1620**. Millisecond enzyme  
kinetics in picoliter volumes. R. Law,  
J. Nguyen, T. George, P. Abbyad
- CHED **1621**. Underpotential deposition of  
nickel on electrodeposited p-type Cu<sub>2</sub>O  
films and its effects on photocatalytic  
activities and stability of p-type Cu<sub>2</sub>O  
films. N. Budin, S. Hilston, A. Fillingier
- CHED **1622**. Hyperfine analysis and global  
fitting of near-infrared electronic spectra  
of AuS. A. Parsons, S. Gleason, T.D. Varberg
- CHED **1623**. Properties of antioxidant deep  
eutectic solvents. D. Jones, J.C. Goeltz
- CHED **1624**. Mixed self-assembled mono-  
layers formed through the coadsorption  
of decylthiocyanate and octanethiol on  
Au(III) surfaces. R. Ginther, A.F. Raigoza
- CHED **1625**. Characterization of  
single-walled carbon nanotube-por-  
phyrin complexes with different  
metal centers. R. Selzer, R. Polvere
- CHED **1626**. Using ATR-IR spec-  
troscopy to study heteroge-  
neous catalysts. E. Christoffersen,  
J. Lindale, D.G. Kovacs
- CHED **1627**. Gas-phase measurement  
of the barrier to *cis*-trans inter-  
conversion of proline in a tetra-  
peptide. K.A. Dickerson, A.E. Glass,  
D.A. Hales, T.J. El-Baba, D.E. Clemmer
- CHED **1628**. Determination of the limiting  
equivalent conductivity and thermo-  
dynamic equilibrium constant for the  
formation of LaCl<sub>2</sub><sup>+</sup> ion-pairs at 25 °C  
using lanthanum chloride/sodium chloride  
mixtures. B. Durante, G.H. Zimmerman
- CHED **1629**. Synthesis and photophysics of  
lanthanide/transition metal heterobimetal-  
lic complexes. K. Burke, C. Heaney, A. Hill
- CHED **1630**. Tracking ultraviolet degrada-  
tion of *p*-aminobenzoic acid and two  
derivatives. G.F. Jocas, S.J. Soback
- CHED **1631**. Solvent mediation of uni-  
molecular helical exchange dynam-  
ics in the synthetic helical peptide  
Z-Aib<sub>6</sub>-β-Ala-OME. C. Foster-Spence,  
M.C. Rotondaro, J. Dickovick, M.A. Kubasik
- CHED **1632**. Fundamental structural studies  
of thiolate-protected gold clusters using  
Raman spectroscopy. L. Tsang, N. Hammer
- CHED **1633**. Withdrawn.
- CHED **1634**. Drugs and light: Predicting  
the photosensitivity of tolbutamide  
and sulfisoxazole using the change  
in dipole moment by Stokes shift  
analysis. A. Costley, A. Bills
- CHED **1635**. Characterization of the  
*N*<sup>6</sup>-methyl-formamidopyrimidine  
lesion. H. Pan, S.N. Bamberger,  
R.S. Bowen, C.K. Malik, T.L. Johnson-  
Salyard, C.J. Rizzo, M.P. Stone
- CHED **1636**. Microfluidic vibrational strong  
coupling of organometallic complexes in  
aqueous solutions. S.R. Casey, J.R. Sparks
- CHED **1637**. Study on the effect of  
salt concentration on the adsorp-  
tion and rupture of phospho-  
lipid vesicles on a silicon dioxide  
surface. A. Krone, I. Alhallak, P.J. Kett
- CHED **1638**. Detection of  
trace amounts of NO<sub>2</sub> using  
CW-CRDS. J. Kozubal, J.B. Dudek

- CHED 1639.** Investigating the photophysical properties of indolizine-squaraines. **R. Nelson, L.E. McNamara, T. Rill, A. Huckaba, N. Hammer, J.H. Delcamp**
- CHED 1640.** Quantification of binary solution non-ideality through temperature dependent measurements of viscosity, molar volume, and refractive index of mixtures of hexane/hexan-1-ol and anisole/methanol. **H.S. Slocumb, C.K. Kalcic, S.A. Price, G.R. Van Hecke**
- CHED 1641.** Systematic binary isobaric solid-liquid phase diagrams of straight-chained carboxylic acids. **C.M. Adams, G.R. Van Hecke**
- CHED 1642.** Ring opening metathesis polymerization of a ciprofloxacin-conjugated copolymer for pulmonary intracellular antibiotic delivery. **N. Warner, M. Zhao, D.M. Ratner, D.J. O'Leary**
- CHED 1643.** Synthesis and characterization of silver triangular nanoprisms. **M. Bruening, L. Peng, R.P. Van Duyne**
- CHED 1644.** Synthesis and characterization of lipid and silver coated gold nanoparticles with pMBA tags. **A.B. Smith, B.D. Gilbert**
- CHED 1645.** Spectroelectrochemical behavior of electrodeposited Zn on indium tin oxide surfaces and modeling of nanoparticle aggregation via Maxwell-Garnett theory. **C.M. Schneps, J.S. Kegerreis, J.N. Richardson**
- CHED 1646.** Thermodynamic effects of pendent chain length in the aggregation of perylene diimide derivatives. **X. Xu, J.M. Szarko**
- CHED 1647.** Spectroscopic and computational studies of the hydrogen bonding interactions of hydroxyethyl ethers. **A. Williams, J.T. Kelly, N. Hammer, S.R. Davis**
- CHED 1648.** Stable isotope chemistry in Titan haze aerosol. **A. Wold, T. Gautier, J. Stern, J. Sebree, M. Trainer**
- CHED 1649.** Synthesis and characterization of gadolinium-silica precipitation tubes. **C. Sabal, D.P. Weller, J.J. Pagano**
- CHED 1650.** Temperature and electric field dependence of asymmetric stretching of nitrate ion. **K. Jones, M.J. Nee**
- CHED 1651.** Phase transitions of barium hydrogen phosphate, a ferroelectric material, characterized by nuclear spin-lattice relaxation measurements. **A. Knoerdel, S. Holmes, R. Iuliucci, C.R. Dybowski**
- CHED 1652.** Rovibronic quantum chemical analysis of the anion  $\text{CCNH}_2^-$ . **C. Stephan, M.K. Bassett, R.C. Fortenberry**
- CHED 1653.** Ruthenium-based donor compounds as building blocks for proton-coupled electron transfer. **N. Odewade, E.R. Young**
- CHED 1654.** Green graphene-in-a-blender: Facile and simple method for the production of high quality 2-dimensional materials. **B. Hatfield, M. Puglia, C.V. Kumar**
- CHED 1655.** Fabrication and optical properties of aluminum nanocrystals. **C.D. Coplan, M.M. Swartz, M. Rodriguez, S. Blair, J.S. Shumaker-Parry**
- CHED 1656.** Spectroscopic and computational study of chlorine dioxide/water interactions. **S. Sutton, W.E. Cleland, N. Hammer**
- CHED 1657.** Improved efficiency in organic photovoltaics via luminescent/photovoltaic device coupling. **T. Morrissey, D.A. Rider, D.L. Patrick**
- CHED 1658.** Supramolecular assembly of donor-acceptor energy transfer system. **E.B. Conklin, E.R. Young**
- CHED 1659.** Thermal decomposition products of gas-phase acetoin. **S. Cole, M. Ellis, J. Sowards, L.R. McCunn**
- CHED 1660.** Effect of pH on the reversible metachromasy of crystal violet on  $\text{TiO}_2$ . **K. Plotzke, S. Coon**
- CHED 1661.** Spectroscopic and thermodynamic investigations of a mixed surfactant/polymer system at the oil-water interface. **C. Steen, B. Schabes, G.L. Richmond**
- CHED 1662.** Probing local secondary structure of transmembrane alpha helices of the S21 pinholin protein using electron paramagnetic resonance spectroscopy. **R. Serafin, D. Drew, R. McCarrick, G. Lorigan**
- CHED 1663.** Synthesis, NMR characterization, and kinetic studies of creatine pyroglutamate. **M. Gao, A.S. Wallner**
- CHED 1664.** Molecular structure and electronic properties of anthocyanidins for use as photosensitizers. **K. Calvelo, E.A. Jarvis**
- CHED 1665.** Role of low-energy ( $\gamma$ ). **C. Buffo, S. Baniya, C.R. Arumainayagam**
- CHED 1666.** Photodissociation dynamics of OCS at 230nm. **J. Johnstone, W. Wei, C.J. Wallace, S.W. North**
- CHED 1667.** Fluorescence anisotropy decay of FMN in LOV domains from *Rhodobacter sphaeroides* and *Chlamydomonas reinhardtii*. **K. Marincin, W.H. Newhart, S.K. Bailey, J. Johannsen, C.K. Johnson**
- CHED 1668.** Application of the Pitzer ion-interaction theory for the aqueous solution of  $\text{HCl} + \text{LaCl}_3$ ,  $\text{HCl} + \text{PrCl}_3$ ,  $\text{HCl} + \text{NdCl}_3$ ,  $\text{HCl} + \text{SmCl}_3$  at 25°C. **L. Roy, R.N. Roy, D. Gregory, C. Himes**
- CHED 1669.** Non-resonant two-photon excitation of phototriggers. **E.R. Lorenzo, S. Senadheera, A.L. Houk, R.S. Givens, C.G. Elles**
- CHED 1670.** Determination of rate constants for acetylperoxy/hydroperoxy self reactions and cross reaction via infrared kinetic spectroscopy. **J. Cowen, F.J. Grieman, A.O. Hui, M. Okumura, S.P. Sander**
- CHED 1671.** Theoretical and experimental study of  $\text{CH}_3\text{SO}_3\text{H}-\text{H}_2\text{SO}_4$  aerosol formation. **M.D. Fellows, H.K. Hernandez-Soto**
- CHED 1672.** Molecular dynamics simulations of polyisobutylene. **H. Ponce, M.M. Fuson**
- CHED 1673.** Effects of sodium chloride on the behavior of methylglyoxal at the air-water interface. **G. Lindquist, B. Gordon, N.A. Valley, S. Wren**
- CHED 1674.** Using evanescent-wave cavity ring-down spectroscopy and a chemical gradient to determine the free energy of adsorption of phosphotungstic acid to clean and silane-modified silica. **R.J. Korlewitz, M.A. Everest**
- CHED 1675.** Temperature dependency of laser optics. **N. Almeter, J. Orr**
- CHED 1676.** Covalency and rovibrational spectra of noble gas compounds. **C.M. Novak, R.C. Fortenberry**
- CHED 1677.** Photodegradation of bisphenol derivatives with gold-loaded titanium oxide nanoparticles. **M. McCausland, D. Brown**
- CHED 1678.** Sequential adsorption of decyl thiocyanate and octanethiol on Au(111). **D. Zoltek, A.F. Raigoza**
- CHED 1679.** Raman analysis of cobalt-zirconium heterobimetallic materials. **I. Bogacz, M. Bedford, N. Celia, A. Stone, C. Jahncke, A. Hill**
- CHED 1680.** Investigation of the reaction of formamide on pyrite. **N. Haddad, H.M. Bevssek**
- CHED 1681.** Stabilization of hexamethylene triperoxide diamine through addition of alkyl functional groups. **C. Downing, M. Dorko**
- CHED 1682.** Determining the feasibility of supercritical carbon dioxide + water for extracting organic compounds in extraterrestrial environments: A Monte Carlo simulation study. **K.J. Mei, J.M. Stubbs**
- CHED 1683.** Application of the CAF to viscosity and conductivity data of solutions containing Li salt and pyrrolidinium-based ionic liquids. **C.J. Van Hoozen, A.J. Lowry, A.M. Fleshman**
- CHED 1684.** Novel natural gas compressor: Interactions between water and natural gas contaminants. **D. Gallegos, D. Brown**
- CHED 1685.** Using the compensated Arrhenius formalism to investigate viscosity and conductivity trends in imidazolium-based ionic liquids. **W.J. Hatcher, A.M. Fleshman**
- CHED 1686.** Design and application of a novel nitrogen gas adsorption device. **S.S. Ward, B. Zanca, K.E. King, A. Leenig, A. Olaitan, K.S. Molek**
- CHED 1687.** Effect of solid catalyst concentration in a triphase catalytic reaction. **I. Blackburn, N. Shabestary**
- CHED 1688.** Pressure dependent ionic conductivity of complex lithium oxide solid electrolyte materials. **C.D. Torres, J. Ostrander, D.C. Teeters**
- CHED 1689.** Evidence of Fe<sup>3+</sup>-induced decomposition of two significant greenhouse gases. **C.L. Emmerling, A.B. Eden, W.S. Taylor**
- CHED 1690.** Identification of vibrational frequencies for  $\text{CH}_3\text{CHI}_2$  and  $\text{CH}_2\text{CHI}$  using matrix-isolation spectroscopy. **M. Avina, X. Zhang, S. Buchhorn, F.J. Grieman, S.P. Sander**
- CHED 1691.** MD study of the effect of alkyl aromatic content on thermophysical properties of surrogate catalytic hydrothermal conversion fuels. **M.Z. Gustafson, B.H. Morrow, D.J. Luning Prak, S. Maskey, J.A. Harrison**
- CHED 1692.** Thermodynamic characterization of a novel anthracycline/DNA binding mechanism. **J. Finan, S. Glazier**
- CHED 1693.** Correlation between the change in dipole moment and photosensitivity of ciprofloxacin: A better molecular predictor of photosensitivity in pharmaceutical drugs. **M. Nguyen, A. Bills**
- CHED 1694.** Characterization of oxide layers on zinc selenide. **M.A. Steves, S. Zwart, N. Hegglin, A.R. Noble**
- CHED 1695.** Colors in chaos: An in-depth study of chemical oscillations. **G. Misiewicz, S. Glazier, D. Look**
- CHED 1696.** Unique hot carrier distributions from scattering mediated absorption. **K.R. Fernando, J.J. Foley, N. Eldabagh**
- CHED 1697.** Raman spectroscopic and computational study of the electron withdrawing effects on halogen bonding. **K. Allen, S. Nguyen, T.L. Ellington, G.S. Tschumper, D.L. Watkins, N. Hammer**

12:00 - 2:00

- CHED 1698.** Optimizing the procedure of electrospinning an antimicrobial nitric oxide wound care patch. **D.E. Blum, K. Malone, N. Beres**
- CHED 1699.** Synthesis and characterization of linear and branched valine-based poly(ester urea)s for hernia mesh repair. **L.L. Robinson, N.Z. Dreger, M. Wade, D. Luong, M. Becker**
- CHED 1700.** Synthesizing amikacin containing polymers for targeted drug delivery using ring opening metathesis polymerization. **D. Urman, R. Long, O. Ogba, D.M. Ratner, D.J. O'Leary**
- CHED 1701.** Dynamic Thiol-Michael chemistry for thermoresponsive re-healable and malleable networks. **B. Zhang, Z. Digby, J. Flum, P. Chakma, J. Saul, J. Sparks, D. Konkolewicz**
- CHED 1702.** Preparation of sodium dodecylsulfate micelle encased poly-pyrrole oligomers. **G. Ahmad, D. Moore**
- CHED 1703.** Effects of wound dressings on the rate of wound healing in rats. **M. Ware, K. Malone**
- CHED 1704.** Synthesis of generation 3-bis MPA dendrimers as a platform for novel nanotherapeutic drug delivery systems. **B.V. Redmond, J. Jackson, J. Manono, S. DiMaggio**
- CHED 1705.** Dispersion of pristine multi wall carbon nanotube by chain end modified poly (N-isopropyl acrylamide). **R. Francis, N. Joy**
- CHED 1706.** Calixarene-core star polymers: Building blocks for micelles and drug delivery. **C.L. Turpin, L.L. Hepp, P.S. Corbin**
- CHED 1707.** Sulfonated polyether ether ketone/expanded polyether ether ketone composite proton exchange membrane casting procedure. **E. Frampton, J. Romeo, A. Vong, J.H. Doan, E.S. Smotkin**
- CHED 1708.** Electrochemical polymerization of thiophene derivatives attached to lead sulfide nanoparticle. **T. Johnson, M.J. Strauss, S.W. Steele, J. Zinke, R.W. Kopitzke**

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

†Cooperative Cosponsorship

- CHED 1709.** Investigation of doped silica aerogels for drug delivery systems. **Y.T. Paung, M.K. Carroll, A.M. Anderson**
- CHED 1710.** Surface modification of ion conducting ceramic particles. **S. Veroneau, Y. Na, R.D. Miller**
- CHED 1711.** Characterization of metal-logs: Evaluation of thermal stability and analysis of supramolecular interactions. **N.E. Boissy, J. Crane**
- CHED 1712.** Calix[4]arene-based covalent porous polymers for water purification. **D. Shetty, I. Jahovic, A. Trabolski**
- CHED 1713.** Facile synthesis of functional amphiphilic poly(valerolactone)s for drug delivery applications. **A. Morrell, A. Yiu, J. Hao**
- CHED 1714.** Synthesis of functional poly( $\delta$ -valerolactone)s via post-polymerization modification. **A. Yiu, A. Morrell, J. Hao**
- CHED 1715.** Lipid membrane interaction thermodynamics of cell-penetrating peptides. **A. Folska, L.E. Prevette**
- CHED 1716.** Binding affinity of polycation-coated Au nanoparticles to gram positive bacterial cell walls. **H. Ganzel, L.E. Prevette**
- CHED 1717.** Thermal analysis of linear high molecular weight poly-DPCPD (dicyclopentadiene) and its brominated derivatives. **D. Barvaliya, H.J. Schanz**
- CHED 1718.** Preparation of peptide-based biomaterials via microwave-assisted RAFT polymerization. **A.S. Magsumbol, E.M. Giles, A. Jameson, A.F. Ennis, J.G. Schellingher**
- CHED 1719.** New generations of anion-responsive liquid crystals. **A. Steen, A. Kinge, S. Cordero, L. Lam, K.A. Grabias, P. Cohn**
- CHED 1720.** Ionic conductivities of LiClO<sub>4</sub> polymer electrolytes for lithium-ion battery applications. **O. Vande Stouwe, L.J. Lyons**
- CHED 1721.** Towards getting control: Strategies for reproducible hydrogel networks. **J. Cubuk, M. Jani, D. Shah, H. Zhu, S. Qavi, R. Foudazi, S. Rajaraman, P. Cohn**
- CHED 1722.** Electrospinning alginate-based fibers for biomedical applications. **W.B. Weeks, K. Penton, A. Wilson, S.K. Hamilton, G. Buschle-Diller**
- CHED 1723.** Diarylethene conjugated polymers: The effect of the co-monomer on photochromic and redox properties. **A. Sidari, D.G. Patel**
- CHED 1724.** Phototunable azo polymers of intrinsic microporosity. **O. Chaarawi, M. Haaf**
- CHED 1725.** Organic light-emitting diodes and the effects of sidechains on polymer solubility. **P. Dang, E. Evans, G. Benito, A. Nguyen, C.A. Young**
- CHED 1726.** Differential scanning calorimetric analysis of elastomers for optimization of extended use. **A.K. Dent, D. Lindt**
- CHED 1727.** Frontal polymerization of acrylate monomers. **J. Jochum, B. McFarland**
- CHED 1728.** Direct arylation polymerization of benzodithiophene. **C.L. Cicha, T.M. Pappenfus**
- CHED 1729.** GPC Analysis of styrene polymerization using various initiators for undergraduate polymer laboratory. **G. Pearson, K. Allen**
- CHED 1730.** Electropolymerization and characterization of polyaniline-TiO<sub>2</sub> nanocomposites for corrosion protection. **E. Taylor, A.O. Sezer**
- CHED 1731.** Conjugate number effects on nanoparticle activity and stimuli response. **J. Jackson, B.V. Redmond, J.N. Shropshire, J.M. Manono, S.C. Dimaggio**
- CHED 1732.** Using multi-step synthesis for the production of hydrogels with adhesive properties. **M. Alcantar, J.M. Deardorff, C.H. Lisse**
- CHED 1733.** Synthesis of synthetic mimics enriched tryptophan copolymers for the use in antimicrobial studies. **J. Ewing, S.G. Mankoci, A. Joy**
- CHED 1734.** Analysis of solvent storage properties of polyurea-shell microcapsules containing a free-radical initiator core. **T. Halligan, B. McFarland**
- CHED 1735.** Synthesis of 1st and 2nd generation PAMAM (polyamidoamine) dendrimers. **P. McClimon, D.J. Oostendorp**
- CHED 1736.** Synthesis of kanamycin ROMP polymers for site-specific drug delivery. **R. Long, D. Urman, O. Ogba, D.M. Ratner, D.J. O'Leary**
- CHED 1737.** Nitrogen containing graphitic-like materials. **J. Brophy, J.O. Hoberg, B.A. Parkinson**
- CHED 1738.** Synthesis of stimuli-response nanomaterials as potential drug-delivery agents. **J.N. Shropshire, K. Watson, B.V. Redmond, J. Jackson, J. Manono, S. DiMaggio**
- CHED 1739.** Study of the active form of the polymerization catalyst formed between Tp<sup>+</sup>Rh(cod) and phenylacetylene using MALDI-TOF-MS. **W.J. Buck, J.D. Freeman, R.M. Tarkka**
- CHED 1740.** Characterization and optimization of expanding foams. **T. Naudet, D. Cuomo, D.E. Riegner**
- CHED 1741.** Castor oil as a renewable alternative to poly(ethylene oxide) in isosorbide-derived thermoset polymers. **J. Swartz, P. Wilbon, J. Brutman, M.A. Hillmyer, J.E. Wissinger**
- CHED 1742.** Controlled polymerization of D,L-lactide with a titanium(IV) tartrate. **B. Benson, B.M. Chamberlain**
- CHED 1743.** Withdrawn.
- CHED 1744.** Synthesis and characterization of polyaniline-MnO<sub>2</sub> nanocomposite for supercapacitors. **K. Hager, A.O. Sezer**
- CHED 1745.** NdCl<sub>3</sub> 3TEP-TIBA catalyst system for coordination polymerization of diene and vinyl monomers. **A. Yang, R.N. Kularatne, M.C. Stefan**
- CHED 1746.** Characterizing oligo (ethylene oxide) oxanorbornyl homopolymers and diblock copolymers for solid electrolyte supports. **R.A. Zhuraviev, D.A. Waldow**
- CHED 1747.** Removal of organic micropollutants in water with a microporous polymer as a platform for an undergraduate teaching lab. **E. Bravo, M. Haaf, A. Alsaiee, M. Klemes, W.R. Dichtel**
- CHED 1748.** Nanostructured lithography through self assembly of diblock copolymers. **L.R. Steiner, A. Christy, J.D. Harris, D. Estrada**
- CHED 1749.** Withdrawn.
- CHED 1750.** Toward photochromic nanohybrids based on upconverting nanoparticle: Nanocargos for drug delivery. **S. Zaid, C. Coudret**
- CHED 1751.** Biomedical applications of thiol-acrylate polymerization. **J.Z. Gombada, L.A. Garber, J.A. Pojman, D. Hayes**
- CHED 1752.** Design of supercapacitor separators based on polymeric-ceramic bio/composites: Enhancing performance for applications in biomedical implantable devices. **E.O. Ortiz Quiles, C.O. Alvarez-Sanchez, J. Lasalde-Ramirez, R. Masso-Ferret, E. Nicolau**
- CHED 1753.** Improving properties of poly-valerolactone through aryl ring stacking. **P. Sitarik, K. Allen**
- CHED 1754.** Synthesis of nanocrystal polymer ligands for dispersant-free LSCs. **F. Son, D.A. Rider, A. Morren, D.L. Patrick**

### Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

Sponsored by PROF, Cosponsored by ANYL<sup>+</sup>, BIOL<sup>+</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>+</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>+</sup>, POLY, PRES<sup>+</sup> and WCC

### The Write Thing to Do: Ethical Considerations in Authorship & the Assignment of Credit

Sponsored by CINF, Cosponsored by CHED, CPRM and ETHX<sup>+</sup>

### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

### Characterization of Natural Organic Matter

Sponsored by ENVR, Cosponsored by CHED

### Textbooks & the Practice of Science: Before, During & After Gutenberg

Sponsored by CINF, Cosponsored by CHED and HIST<sup>+</sup>

### Environmental Chemistry: Undergraduate & Graduate Classroom, Laboratory & Local Community Learning Experiences

Sponsored by ENVR, Cosponsored by ANYL and CHED

## MONDAY EVENING

### Section A

San Francisco Marriott Marquis  
Salons 1/2

### Innovating Materials for the Next Generation: Bringing Practical Applications into the Chemistry Classroom

Cosponsored by PMSE, POLY and RUBB

Financially supported by IPEC

S. C. Rukes, Organizer, Presiding

5:00 Introductory Remarks.

5:05 **CHED 1755.** Materials, materials: They are everywhere. **E.J. Escudero, S.C. Rukes**

5:25 **CHED 1756.** Cars: A rolling evolution of material choices. **A. Nydam, S.C. Rukes**

6:05 Intermission.

6:10 **CHED 1757.** Evolution of aircraft materials: Why are we building plastic airplanes? **A. Nydam, S.C. Rukes**

6:50 **CHED 1758.** Polymers, polymers everywhere. **D. Moore**

7:30 Intermission.

7:35 **CHED 1759.** Chemistry connections: Inspiring students with innovation. **K. Anderson, M. Enright**

8:15 **CHED 1760.** Composites and conductive materials: Making everyday materials do more. **S.C. Rukes**

8:30 **CHED 1761.** Nanotechnology for drug delivery. **S.C. Rukes**

8:45 Concluding Remarks.

### Section B

Moscone Center  
Hall D

### Successful Student Chapters

Cosponsored by SOCED

N. Di Fabio, Organizer

8:00 - 10:00

**CHED 1762.** Mississippi College ACS Student Chapter. **A. Smyly, B. Nash, S.G. Travis, T.D. Selby**

**CHED 1763.** Chemistry within the community: Successful student chapter at Eastern University, PA. **A. Crawford, K. Martinez, J. Bundens**

**CHED 1764.** Observing the effect of STEM outreach for grade 5-8 students through the Bridgewater State University chemistry club. **K. Dooley, P. Kurriss, E.J. Brush**

**CHED 1765.** Erskine College ACS student chapter: Outreach constantly, not periodically. **K. Squiggins, A. Houston, T. Hayden, J.E. Boyd**

**CHED 1766.** Universidad del Sagrado Corazon ACS Student Chapter: A new engine for chemistry in our society. **J.M. Rosado, I.J. Ovalle, B.M. De Llovio**

**CHED 1767.** Scientific community involvement. **B. Esterlen, B.J. Bellott**

**CHED 1768.** Missouri Western State University Alchemist Club: Transmuting students into scientists. **J. Moore, J. Wagner, M. Svay, N. Chapman, D. Stasko**

**CHED 1769.** Building a successful ACS student affiliate through community outreach, community service and professional development. **S. Cunnginham, D. West, N. Elmore, H. Hsieh, R. Ali, T. Nielsen, R. McFarland, R.V. Valcarce, P.J. Iles, L. Giddings, N.R. Bastian, W. Sanders, S. Richards, M. Alvarez, R. Holcomb**

**CHED 1770.** Increasing interest in chemistry. **J. Kuang-Nguyen, R. Hutchison, J.A. Darsey, D. Soni, O. Cossio**

**CHED 1771.** Successful ACS student chapter at Wilkes University: Community outreach events that apply green chemistry principles and science education. **J. Colvin, R. Hohol**

**CHED 1772.** Morehead State University. **B. Nicely, M.T. Blankenbuehler**

**CHED 1773.** Saint Vincent College Chemistry Club. **J. Centore, D. Fish, B. Tomiczek, G. Ngo, D. Carone**

- CHED 1774.** Keep calm and make bonds: Chemistry at Xavier University of Louisiana. V.C. Miles, T. McClelland, S. Bertrand, D.D. Daley, J. Adkins, I. Gill, M. Ndukwe, B.V. Redmond, M.R. Adams, C.M. Lawrence
- CHED 1775.** ACS-San Germán Chapter: Sustainable growth. A. Acosta, E. Franceschini-Silva, R. Flores-Morales, N. Irizarry, M. Jusino, M. Martinez-Mercado, I. Otero, C. Perez-Rodríguez, P. Silvestry, S. Vargas-Padilla, E. Velez, N. Caraballo, A.M. Gonzalez
- CHED 1776.** ACS UPR-RP Student Chapter: Inspiring tomorrow's society through chemistry. R. Colon Morillo, A. Gonzalez Lopez, F. Serrano Martinez, N.I. Alvarez Colon, C. Aponte Ortiz, M. Rivera Cora, K.M. Collazo Maldonado, J. Cosme Silva, E. Pagan Colon, D. Rosario Berrios, L.S. Martir Ramirez, L.A. Nieves Santiago, T.M. Dominguez Gonzalez, E. Albino Rivera
- CHED 1777.** SIUE Chemistry Club: Spreading chemistry knowledge on campus and in the community. E. Baldwin, B. Florea, H. Lupton, K. Link, E. Ross, M.W. Jones
- CHED 1778.** Angelo State University Green Chemistry Student Chapter. A.F. Sullivan, B.R. Holle, D. Herrick, K.A. Boudreaux, E. Osborne
- CHED 1779.** Saint Francis University Chemistry Club: Don't worry about it dad. R. Krupa, H. Schorr, W. Shee, E.P. Zovinka
- CHED 1780.** Santa Monica College Chemistry Club: A growing student chapter. S. Purucker, C. Vaughan, M. Martinez, T. Pecorelli
- CHED 1781.** Otterbein Student Chapter. E. Isaac, R. Grote, J.M. Esson
- CHED 1782.** South Dakota School of Mines and Technology: A successful student chapter of the American Chemical Society based on outreach and education promoting an appreciation of chemistry. T. Johnson, K. Giorgio, J. Meyer, T. Ryther, S. Jenkins, H. Leppert, M. Acevedo
- CHED 1783.** Eastern Oregon University ACS Student Member Chapter: Promoting community outreach and professional networking. D. Spikerman, B. Mandella, C.J. Burghard, A. Courtois, A.G. Cavinato
- CHED 1784.** DeSales University's ACS student chapter activities during the fall 2015 and spring 2016. F.C. Mayville, E.N. Sauschuck, A.M. Myers
- CHED 1785.** Chemistry in the Heidelberg University community. A.F. Bauer, C. Chandler, K. Scrudgers, D.E. Blum, M.N. Hogle, E.N. Riffle, N. Beres
- CHED 1786.** ACS Inter Ponce Student Chapter Forensic Chemistry Division. R.M. Perez-Ortiz, M.A. Reyes Caraballo, Y. Santos-Vazquez, G.M. Santiago Rivera, J.J. Ramirez Domenech, E. Ferrer Torres
- CHED 1787.** Pasadena City College Chemistry Club. L. Lupercio, L. Ramirez, D. Cagan, V.I. Jaramillo
- CHED 1788.** Chemistry, the Flint Water Crisis, and you. C. Wilhelm, A. Maxwell, D. Corey, N. Alawwa, M. Alsarraj, W. Yahr, T. Sanson, M.R. Wilhelm, J.L. Tischler, S.S. Grathoff
- CHED 1789.** University of Minnesota, Morris ACS Chemistry Club: Chemistry beyond the classroom. H. Goemann, D. Schultz
- CHED 1790.** Loras College American Chemical Society affiliated Chemistry Club. C. O'Bryan, B. Al-bazbob, B. Anderson
- CHED 1791.** Withdrawn.
- CHED 1792.** Mission of the College of Mount Saint Vincent science club. B. Hoyland, W. Lang, P. Nunez, P.K. Kerrigan
- CHED 1793.** Canisius College Student Chapter of the American Chemical Society. W.B. Swanson, L.T. Evans, C.B. Turniel, T.M. Turniel, P.M. Sheridan
- CHED 1794.** Leading a successful ACS student chapter. D. Lewis, L. Louis, A.J. Sanders
- CHED 1795.** TCU Chemistry Club: Effective organization and communication methods for outreach. S. Price, A.T. Vu, H. Villegas, E.V. Akhminen, M. Barnett, K. Upton, B. Niebuhr, A. Hassan, C.N. Simmons, I. Al Farra, N. Schmitt, B.G. Janesko, K.N. Green, J. Fry
- CHED 1796.** Chemistry is central at the University of Central Oklahoma: Successful student chemistry club chapter activities. A. Arnold, C.D. Fleming, K. Kordtsimon, G.S. Rodriguez, D.R. Rundle, C.B. Frech
- CHED 1797.** Mythbusters: The age old question, fact or fiction? T.J. Orr, S.A. Armstrong, J.D. Hall, J.L. Sims, J.T. Jatko, R.J. Baltz, B.A. Kelley, Q. Saunyama, G.D. White, K. Ding
- CHED 1798.** University of Tennessee at Martin student member chapter. T. Rinehart, W.L. Kuenzinger, M.E. Short, B. Ide, S. Oliva, A.H. Shelton
- CHED 1799.** Growing the student affiliate chapter at Ferris State University. T. Stothers, J. Goyola, M.A. Thomson
- CHED 1800.** Development of an active and engaged chemistry club. S. Pribil, K. Sorauf
- CHED 1801.** Aquinas Chemistry Society. C.R. Jensen, A. Wagner, J. McAfee, B. Arnson, A. Brock, E.A. Jensen
- CHED 1802.** Emergent Point: Becoming chemistry citizens. A. Almodovar Ortiz, Y. Cruz Reyes, J.I. Ramirez Domenech, E. Ferrer Torres
- CHED 1803.** Sacred Heart University Student Affiliates are salt bridging chemistry into the community coast to coast. S. Aanonsen, S. Baer, C. Domville, C. Infrerra, F. Divisconti, R. Russo, S. Zupetz, M. Filja, H. Jia, C. Rose, B. Kalach, L. Farber
- CHED 1804.** ACS Student Chapter at The University of Texas at Tyler. P. Hightower, R. Williams, L. Johnson, L.E. Boyd
- CHED 1805.** Best of both worlds: Adapting Detroit Mercy Chemistry Club activities to incorporate urban and suburban surroundings. M.J. Mio, R. Beltman, S.M. Fudalla, D.N. Maxwell, G. Nguyen, J. Pothoof, K.M. Suiter, R. Zouabi, K.R. Evans
- CHED 1806.** Igniting change: Gordon College's ACS chapter's influence on campus and the community. I. Ngo, V. Curfman, L.T. Walsh, K. Elliott, E. Percival, I.J. Levy
- CHED 1807.** Fostering a successful ACS chapter at a private liberal arts institution. A. Narro, D. Chavez, D. Ivan, J. Belmares, A. Roth-Rodriguez, M. Kopecki Fjetland
- CHED 1808.** Chemistry Club: Coming together to synthesize a brighter future. C. ACS Student Chapter, A.P. Zurmuhle, N. Eddy, J. Tran, P. Rodas, S. Jinata, G. Singh, B.F. Gherman, C.J. Kellen-Yuen
- CHED 1809.** Student Members of the American Chemical Society: Hofstra Chapter 2016-2017. S. Kim, A. Gaglio, M. Chambers, M. Kaur, A. Sica, A. Xiang, M. McNamara
- CHED 1810.** Small liberal arts college approach. J. Tobin, H. Fasiang, A. Horowitz
- CHED 1811.** Molloy Chemical Society at Saint Joseph's University. R. Kontos, C. Stow, M. Graziani, A. Sargent
- CHED 1812.** ChEmory: Emory University's undergraduate chapter of the American Chemical Society. S. Gupta, J. Fu, D. Salgueiro, K. Woolard, A. Kim, D.R. Mulford
- CHED 1813.** Promotion of a chemistry major identity through the Student Chemists Association at The College of New Jersey. K.M. Fomchenko, T.M. Townsend, M. Casale, A.R. O'Connor, B.C. Chan
- CHED 1814.** Student Affiliates of the American Chemical Society: Washington & Jefferson College 2016. J.D. Goltz, A.M. Krol, T. Yeung, J. Hosfelt, D.A. Polvani
- CHED 1815.** Student members of the American Chemical Society: University of Arizona Chapter. S. Avetian, J. Lopez, J.R. Pollard
- CHED 1816.** Angelo State University ACS Student Chapter. D. Herrick, A.F. Sullivan, E. Osborne, K.A. Boudreaux
- CHED 1817.** Barry University Chemistry Club: Sharing our passion for chemistry. E. Paulus, D. Cordero, N. Maxi, R. Gutierrez, T.D. Hamilton, G.H. Fisher
- CHED 1818.** Methods to improve university student engagement and contribution to scientific enrichment. N. Diaz, H.R. Aguilar
- CHED 1819.** Chemistry and camaraderie: Student activities at the University of New England. M. Wright, J. Woolf, B. Rivard, A.E. Keirstead
- CHED 1820.** Activities of the Monmouth University Chemistry Club. K. Muratore, B. Macalush, O. Adetunji, A. Scorzelli, G.A. Moehring, D. Szwajkajzer
- CHED 1821.** University of Northern Iowa ACS Student Chapter: Creating successful chemists. A. Wold, E. Dutton, J. Nederhoff, W.W. Andersen, M. Flesch, K. Plotzke, J. Prybil
- CHED 1822.** University of Utah ACS Student Chapter. A.M. DeGrauw, T. Xu, R. Reynolds, S. Lee, M. Pham, W.E. Scholl, A. Loret, H.L. Sebahar, T. Richmond
- CHED 1823.** University of Tampa American Chemical Society Chapter's outreach in the greater Tampa Bay area. W. Smith, N. Zembol, L. Henchey, J.A. Struss
- CHED 1824.** Solving the mystery of chemistry: Illinois Valley Community College Chemistry Club. K. Murphy, T. Perry, J. Meyer, S. Nelson, A. Ochuba, G. Braboy, M.E. Jollif, P.K. Yong
- CHED 1825.** Strategic anabolic reaction: Incorporation of a Division of Biotechnology to the ACS student chapter from the Interamerican University of PR Ponce Campus. L. Rivera Vazquez, J. Costas Feliciano, M. Barriera Diaz, J.I. Ramirez Domenech, E. Ferrer Torres
- CHED 1826.** Coloring the minds of our youth through chemistry. K. Weeber, N. Lygeris
- CHED 1827.** Suffolk University engaged with chemistry 2016-2017. K. Jenkins, K. Vu, A. Biyari, J. Bautista, N.M. Reed
- CHED 1828.** Chemistry marathon! J.K. Vale, L. Santos
- CHED 1829.** Green legacy: An optimal alternative for the UPR-Aguadilla. K. Negron-Teron, W. Lopez-Perez, B.J. Ramos-Santana, C.R. Ruiz-Martinez
- CHED 1830.** Putting the fun in funding: Finding new ways to fund the Detroit Mercy Chemistry Club. M.J. Mio, R. Beltman, S.M. Fudalla, D.N. Maxwell, G. Nguyen, J. Pothoof, K.M. Suiter, R. Zouabi, K.R. Evans
- CHED 1831.** Starting the year off with several bangs: The ACS Student Chapter at Sacramento City College. A. Thomas, S. Cook, I. Qureshi, G. Cruz-Velasquez, N. Le, V. Alino, W.J. Miller
- CHED 1832.** Solving mysteries through chemistry. T. Williams, A. Hudson, D. Whitman, C.K. Saner
- CHED 1833.** Expansion of the sphere of influence: KU Chemistry Club member recruitment and retention. R. Latimer, E. Lorenzo, P.R. Hanson, R.S. Black
- CHED 1834.** Successful student chapter: University of New Mexico student chapter of the American Chemical Society. A. Rauch, J. Platero, K. Thompson, J. Meyer-Hagen, J. Terr, L.J. Whalen
- CHED 1835.** Northeastern University Student Affiliates of the American Chemical Society: Building connections and foundations within our communities. J. Compton, B. Laramee, C. Gallin, T. DeLano, D. Dang
- CHED 1836.** Building professionals through their involvement with the FIU BBC-Science Club. M. Michel, S.N. Ike, J. Glenn, C. Cazimir, K. Pierrelouis, D. Read, V. Perez, M. Delgado, M. Exposito
- CHED 1837.** Centenary College of Louisiana: A tradition continued. V. Robert, H. Deshautelle, G. Doucet, M. Abo-Zahrah, T.M. Ticich
- CHED 1838.** SMACS @ FSU. A. Lette, B.M. Day, B.N. Norris
- CHED 1839.** Park University CHEM club success 2016-2017. J. Pham, G.S. Stelmacovich, A.N. McMullen, M.M. Klein, D.K. Howell, G.D. Claycomb
- CHED 1840.** Creating bonds within the UCSD American Chemical Society - Student Affiliates. D. Nguyen, T.J. Bussey, S. Brydges
- CHED 1841.** American Chemical Society Student Chapter at the University of St. Thomas, Houston, TX. P. Zaibag, A.V. Hernandez, N.B. Nguyen, T.J. Pham, M. Guirette, K. Vazquez, C.A. Young, J. Hollingsworth
- CHED 1842.** Colorado State University Chemistry Club: Collaborate, network, and connect. R. Schiffhauer, J. Brookhart, A. Detmer, N. Knostman, L. Monterosa Zavaleta, L. Paricio, M. Plonski, A. Rauker, I.M. Sitarik, B.P. Reynolds
- CHED 1843.** Achievements of KSU SAACS in fall 2016 for students in chemistry-related fields and local educational institutions. P. Jean, A. Calderon
- CHED 1844.** Using chemistry as a tool to stimulate interest, engage minds, encourage involvement and motivate to achieve. A. Almaguer, C. Garcia, M. Zamora, T.M. Rodriguez, U. Swamy

CHED **1845.** Carroll University Chemistry Club. N.P. Biewer, C. Garcia, K. McCarthy, L. Glodowski, C. Kraska, R.M. Kutzner, V.M. Wartenweiler, K.E. Molter

CHED **1846.** Efforts of a chapter to preserve its Outstanding award: The ACS Student Chapter of the University of Puerto Rico at Cayey. W.M. Lopez, M. Leon, E. Rivera Tirado

CHED **1847.** Western Washington University Student Chapter of the American Chemical Society. C. Crickmore, R. Blazevic, S.R. Emory, E. Raymond

CHED **1848.** Santa Clara University Student Member Chapter: Creating a successful balance of events to promote student involvement in the chemistry community. C. Dubois, J. Yin, L.S. Brunauer

CHED **1849.** Success through serving and sharing is instrumental: A Waynesburg experience. K. Wilson, B. Bosley, A. Narehood, K. Houser, J. Gearhart, E.A. Baldauff

CHED **1850.** Science is universal. C. LeBlanc, M. Yurkevicius, C. Murphy, C.K. O'Shea

CHED **1851.** Gruen Chemistry Society: Student affiliate activities at Olivet College. M.C. Carr, K.J. Nault, E.R. Cole, J.L. Elliston, S.M. Lewis

CHED **1852.** Truman State University Student Affiliate Chapter. S. DeBie, L. Chapman, T. Humphry

CHED **1853.** Chronicles of the jurassic outreach expedition in south Texas. M. Ochoa, A. Chrysler-Martinez, A. Hut, K. Moreno, L. Avila

CHED **1854.** Dynamic activities of the ACS student chapter at Inter American University of Puerto Rico - Metropolitan Campus. K.A. Parga Rivera, K.A. Lopez-Perez

CHED **1855.** Broadening the undergraduate impact of Nitany Chemical Society. C. Poirier, G. Leone

CHED **1856.** Activities for the Henderson State University student affiliate chapter. W. Garrett, J. Stephens, D. Bateman, B.A. Rowland

CHED **1857.** Student Affiliates of the American Chemical Society - South Dakota State University. F. Poppinga, A. Kub, L. Dirks, J. Soukup, M. Radtke

CHED **1858.** Celebrating NCW 2016 at University of Puerto Rico Humacao. L. Flores, A. Figueroa, J. Ramos, K. Orta, O. Rivera, J. Suarez

CHED **1859.** Ouachita Baptist University Student Chapter: Sharing chemistry. J.C. Bradshaw, A. Cole

CHED **1860.** Warriors Chemistry Club at Stanislaus State: Inspiring the next generation through chemistry awareness. J. Vivar, K. Chan, J.Y. Lo, S.K. Mendez, J. Godinez, K. Soares, E.A. Aleman

CHED **1861.** Lock Haven University of Pennsylvania Chemistry Club. S. Shreiber, T. Adams, S. Sujansky, K. Range

CHED **1862.** SMSU Chemistry Club: Inspiring future chemists one hydrogen balloon at a time. R.M. Sears, M.M. Bruns, V.J. Henry, N.J. Beyer

CHED **1863.** Chain reaction: Impacting the community through chemistry. G.E. Alvarez, T. Massas Le'Cleres, I. Rios Cruz, R.M. Zamora, A. Rivera, O. Alvarez, M. Rodriguez, A. Cruz, P. Velez Vega, P. Maldonado, P. Goyco, L. Perez, C. Beauchamp Perez, N.E. Crespo Rosado, D. Cordero DaSilva, A. Altiery, N. Tristani, J. Torres Candelaria

CHED **1864.** American Chemical Society student chapter at Peninsula College. B. Weintraub

CHED **1865.** Professional development through industrial speakers. C.M. Schreidah, J. Fife, E. Kenney, J. Culp, M. Klingberg, S. Cassidy, A. Prokay, G. LaFleur, E.P. Kippenhan

CHED **1866.** American Chemical Society Student Chapter of Idaho State University. P. Ropski, S. Spradlin, B. Poulter, E.A. Morley, W.C. Spence, J.J. Pak, C.M. Evilla

CHED **1867.** Kappa Epsilon Mu (K.E.M.) Club at Texas Woman's University: Reaching the community through chemistry. K. Slavens, D.B. Hernandez, T. Nguyen, S. Scott, K. Reyes, N. Mirsaleh-Kohan

CHED **1868.** Creating a triple bond: Linking PLU students with professional development, community outreach, and green chemistry. K. Cameron, O. Egejuru, C. Flanery, J. Wong, A.M. Munro

CHED **1869.** ACS Student Chapter at the University of Central Florida. R. Sapia, S.M. Kuebler, J. Lear, P. Velez, M. Tedlie, G. Versfeld, P. Vazquez

CHED **1870.** Illinois State University ACS Student Chapter year in review 2015-2016. A. Bruno, W.T. Darrow, A. Mandl, A.N. Latham, E. Jugovic, Z.E. Lawton, S. Huffman

CHED **1871.** For the students, by the students: Actively working to develop resources for CMU chemistry undergrads. S. Bedford, J. Groenevelt, J. Callus

CHED **1872.** Club activities and community outreach by ACS student chapter of Midland College. Z. Hunter, M. Ennis, K. Marrufo, A. Jones, S. Esan, J. Espinoza, D. Gable, J. Anderson, P. Nandakumar

CHED **1873.** Wayne State University American Chemical Society Student Affiliates. Y.K. Elghoul, A.R. Breckenridge, A. Dao, J.L. Stockdill

CHED **1874.** ACS UMET chapter: Engaging undergraduate students, pre-colleges, and kids for science through chemistry activities. A.C. Aponte, J.G. Medina-Feliciano, B. Hopgood, J. Morales, O.M. Primera-Pedrozo, M. Falero-Gil

CHED **1875.** When things go wrong: Navigating the realm of insurance and liability in student chapters. S. Taylor, N. Higdon, L. Laverman

CHED **1876.** Inception of an ACS Student Chapter at San Diego Miramar College. G.L. Smith, L. Yang, M. Troester, M.K. Antisdal

CHED **1877.** Southeastern Oklahoma State University ACS Student Members: 50 Years of chemistry from the savage storm. E.P. Landers, L. Chandler, K.L. Gaskill, P.S. Whitehead, M.D. Madewell, S.A. Eaves, N.L. Paiva

CHED **1878.** Delta State University ACS gives back: National Chemistry Week. A. Camarillo, A. Griffin, K. Penton, W.B. Weeks, S.K. Hamilton

CHED **1879.** ACS-UPRB Walking towards new directions by improving education in green chemistry. V.M. Blasky-López, J.C. Estarellas San Miguel, N.I. Estarellas-San Miguel, R. Gracia-Colón, A. Muñiz-Santiago, B. Padilla-Maldonado, K. Rodríguez-Robles, J. Oyola Cintron, L.I. Santiago-Pérez

CHED **1880.** UCA ACS: Serving as chemistry ambassadors in Central Arkansas. R. Mayo, J. DeYoung, S. Margis, R. Senn, S. Turner, G.R. Naumeic, K.L. Steelman, F.M. Yarberry

CHED **1881.** Cooking up a love for chemistry through culinary, mentoring, and community outreach events. J. Ulrich, L. Posada, K. Bolduc, B.L. Gay, J. Partridge, A. Huisman

CHED **1882.** GGC game changing: Georgia Gwinnett College chemistry outreach. D. Breaud, K. Coscia, N. Davis, W. Jones, A. Ko, J. Massey, J. Moon, R.K. Kalman, G.E. Rudd

CHED **1883.** Student Chapter of the American Chemical Society at Minot State University. S. Park, H. Lee, J. Torgunrud, S. Sundhagen, B. Hatfield, E.Y. Mojica, T. Dostert, T.A. Skinner

CHED **1884.** ACS UPR-Aguadilla: The challenge of innovation from the legacy to the future. R. Pitre-Yulfo, M.S. Arocho-Caban, B.J. Ramos-Santana, C.R. Ruiz-Martinez

CHED **1885.** Florida Southern College ACS student chapter growth 2016-2017. I. Mauzy, S.F. Wilson, K. Martinet, A. Branch, M. Hewett, K. Alexander, J.F. Eubank

CHED **1886.** Green island promoting green chemistry. C.G. Cortes Bula, C. Torres Martinez, A. Almodovar Ortiz, J.I. Ramirez Domenech, E. Ferrer Torres

CHED **1887.** UTPB Chemistry Club: Promoting chemistry in West Texas. C.B. Taylor, R. Maharaj, J. McDonald, D. Vinson

CHED **1888.** Demos in the den: Visual demonstration of chemistry in an auditorium. M. Sautter, D. McKinze, L. Gao

CHED **1889.** Solving mysteries through chemistry. A. Bajaj, M.J. D'Souza

## Section C

Moscone Center  
Hall D

## Sci-Mix

I. J. Levy, T. A. Miller, C. M. Muzzi, *Organizers*

8:00 - 10:00

**128, 136, 138, 142, 149, 152, 155, 159-160, 168, 172, 178, 187, 189, 192-193, 333, 344, 369, 393, 464, 468, 474, 509, 580, 589-590, 592, 644, 669, 721-722, 754, 767, 774, 778, 790, 793, 812, 814, 826, 835, 838, 889, 892, 896, 913, 919, 961, 965, 967, 997, 1003, 1037, 1055, 1113, 1121, 1150, 1175, 1219, 1238, 1241, 1259, 1305-1306, 1331, 1333, 1340, 1385, 1387, 1422, 1429, 1433-1434, 1475, 1510-1511, 1526, 1545, 1549, 1589, 1592, 1607, 1620, 1631, 1642, 1648, 1654, 1689, 1695, 1699, 1721, 1725, 1746, 1748, 1751-1752.** See previous listings.

## TUESDAY MORNING

### Section A

San Francisco Marriott Marquis  
Salons 1/2

### George C. Pimentel Award in Chemical Education: Symposium to honor Thomas A. Holme

S. Bretz, *Organizer*

M. Cooper, *Presiding*

8:30 Introductory Remarks.

**8:35 CHED 1890.** Silent students in the active learning chemistry classroom. J.S. Hutchinson, C. Owens, A. Munson, L. Tran Lu, K. Kincaid

**8:55 CHED 1891.** Chemical education: To infinity and beyond. M.D. Koppang

**9:15 CHED 1892.** Identity, inter-sectional, and the culture of science. M.G. Grunert Kowalske

9:35 Intermission.

**9:45 CHED 1893.** Measuring chemical representations use among organic chemistry students to understand how they interpret different aspects of molecular structures. J. Baluyut, J. Polifka, T. Holme

**10:05 CHED 1894.** Utilizing the Anchoring Concepts Content Map to track chemistry students' concept development and retention rates in general chemistry and organic chemistry. C.J. Luxford

**10:25 CHED 1895.** Comparison of representation use in biochemistry textbooks and associated assessment questions. K.J. Linenberger Cortes

10:45 Intermission.

**10:55 CHED 1896.** Aligning assessments: Advancing the capacity for criterion-referenced chemistry assessments. J.J. Reed

**11:15 CHED 1897.** Chemistry assessment in the digital age. L. Lockwood

**11:35 CHED 1898.** No Holme is an island: Systems thinking in chemistry education. P.G. Mahaffy

### Section B

San Francisco Marriott Marquis  
Salons 3/4

### ACS Award for Encouraging Disadvantaged Students into Careers in the Chemical Sciences: Symposium in honor of Sandra Y. McGuire

*Cosponsored by CMA and WCC*

I. M. Warner, *Organizer, Presiding*

8:30 Introductory Remarks.

**8:40 CHED 1899.** LSU LA-STEM research scholars program: Reflections on program origin and early interactions with Professor Sandra McGuire. I.M. Warner, M.B. Crawford, S.E. McGuire, Z.S. Wilson-Kennedy, G. Thomas

**9:05 CHED 1900.** How to mentor students, support achievement, and lose weight: The remarkable mentoring of Sandra Y. McGuire. M.H. Towns

**9:30 CHED 1901.** Designing metacognition-based learning strategies to aid in the recruitment, retention, and graduation rates of STEM students with specialized learning accommodations. A. Kelley

9:55 Intermission.

**10:10 CHED 1902.** Chronic underrepresentation in STEM? Fix our institutions, not our students. J.T. Matsui

**10:35 CHED 1903. Award Address** (ACS Award for Encouraging Disadvantaged Students into Careers in the Chemical Sciences sponsored by The Camille & Henry Dreyfus Foundation, Inc.). Metacognition: The key ingredient for academic success for underrepresented (and all) students! S.E. McGuire

**11:20** Concluding Remarks.

## Section C

San Francisco Marriott Marquis  
Salon 5

### GSSPC: Water Sustainability

#### Chemists in Pursuit of Clean Water

*Cosponsored by CEI and PRES*

*Financially supported by Georgetown University Department of Chemistry, Graduate Education Advisory Board*

I. Brekalo, J. P. England, Z. S. Sakhaei, Organizers

A. Adcock, Z. De los Santos, S. E. Ingram, Organizers, Presiding

J. Nelson, Presiding

**8:45** Introductory Remarks.

**8:50 CHED 1904.** Chemical contaminants in drinking water - from risk to rule. C. Sham

**9:20 CHED 1905.** Aquatic photochemistry: Pollutants, products, and policy. K.P. McNeill

**9:50 CHED 1906.** Safe and sustainable drinking water: How can we do it? S.D. Richardson

**10:20** Intermission.

**10:35 CHED 1907.** Supramolecular receptors for anions: The commercialization pathway of a nitrate-sensing molecule towards pollution prevention in precision agriculture. D.W. Johnson

**11:05 CHED 1908.** Technologies for enabling water reuse. J. Wilbur

**11:35** Concluding Remarks.

## Section D

San Francisco Marriott Marquis  
Salon 6

### Advances in e-Learning & Online Chemical Education

D. A. Canelas, L. A. Morsch, Organizers  
P. Sorensen, Organizer, Presiding

**8:30** Introductory Remarks.

**8:35 CHED 1909.** Lessons learned in 16 years of teaching chemistry online with a hands on laboratory component. R.R. Klepper

**8:55 CHED 1910.** CCCE OLCs. R.E. Belford, J.L. Muzyka

**9:15 CHED 1911.** Refining online chemistry strategies. J.E. Alexander, J.J. Wenz

**9:35** Intermission.

**9:55 CHED 1912.** Using traditional and 3D printed physical models in an online introductory chemistry course. J.D. Mendez

**10:15 CHED 1913.** Develop-your-own dynamic and engaging YouTube channel as an Open Educational Resource (OER) supplementing general and organic chemistry courses. D. Jackson

**10:35 CHED 1914.** From chemists know to shredded science: Using accessible online outreach videos to ignite interest in and aid understanding of chemical concepts. G. Grazioli

**10:55** Concluding Remarks.

## Section E

San Francisco Marriott Marquis  
Nob Hill A

### Advances in Teaching Organic Chemistry

S. F. Hornbuckle, Organizer, Presiding

**8:30 CHED 1915.** Using YouTube to promote student self-reflection in organic chemistry. D. Konkolewicz

**8:50 CHED 1916.** Working smarter, not harder: Teaching organic chemistry. S. Tong, R.M. Kissling

**9:10 CHED 1917.** Reducing extraneous cognitive load in undergraduate organic chemistry: Redistribution, not reduction. C. Filloux

**9:30** Intermission.

**9:45 CHED 1918.** Integrating biological applications into the organic chemistry laboratory using affordable instrumentation. E. Nam, M.P. Hill

**10:05 CHED 1919.** Design and evaluation of a mobile learning paradigm aimed at improving organic chemistry laboratory instruction at undergraduate level. H. Weizman, S. Wang

**10:25 CHED 1920.** Investigating student misconceptions in understanding acid-base reactions in undergraduate organic chemistry courses using various formative and summative assessment tools. M. Chatterjee, L. Katz, H. Shaaban, R. Ruvinsky

**10:45** Intermission.

**11:00 CHED 1921.** Undergraduate teaching assistants as part of the teaching-service model in large introductory organic chemistry courses. R.M. Kissling, S. Tong

**11:20 CHED 1922.** Probing the origin of student pattern recognition in the organic chemistry classroom. L.M. McNulty, J.J. Esteb

**11:40 CHED 1923.** Using organic chemistry to teach medical diagnosis skills. M. Ilies

**12:00** Concluding Remarks.

## Section F

San Francisco Marriott Marquis  
Nob Hill B

### Perspectives on Climate Change Literacy & Education: Local to International

*Cosponsored by CEI and IAC*

K. E. Peterman, Organizer

G. P. Foy, Organizer, Presiding

**8:30** Introductory Remarks.

**8:35 CHED 1924.** Geopolitical implications of climate change. K. O'Keefe, G.P. Foy, K.E. Peterman

**8:55 CHED 1925.** Tackling climate change illiteracy through a space lens. M. Sobhy, G.P. Foy, K.E. Peterman

**9:15 CHED 1926.** Climate policy at the boundary between science and society. A.N. Henderson, G.P. Foy, K.E. Peterman

**9:35 CHED 1927.** Indigenous peoples' role in climate change adaptation. N. Kovil, G.P. Foy, K.E. Peterman

**9:55 CHED 1928.** Energy & sustainability: An introductory course on the intersection of energy, climate, and society. B. Venkataraman

**10:15** Intermission.

**10:25 CHED 1929.** Sustainable food at COP22: Mapping the discussion. H.P. Melton, K.E. Peterman, G.P. Foy

**10:45 CHED 1930.** Health ramifications of climate change evaluated at the 22<sup>nd</sup> Conference of Parties (COP22). T. Yurasits, K.E. Peterman, G.P. Foy

**11:05 CHED 1931.** Climate justice at COP22. M. Smith, K.E. Peterman, G.P. Foy

**11:25 CHED 1932.** Withdrawn.

**11:45 CHED 1933.** Sustainable energy as the focus for a first year seminar. G.A. Moehring

**12:05** Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Nob Hill C

### Advancing Undergraduate Research Research Supportive Curricular Innovations

*Cosponsored by PROF*

*Financially supported by Council on Undergraduate Research*

B. L. Gourley, Organizer

R. M. Jones, Organizer, Presiding

**8:30** Introductory Remarks.

**8:35 CHED 1934.** Guided inquiry and drug discovery: A semester-long laboratory sequence for advanced undergraduates. M.S. Blackledge, K. Fogarty

**8:55 CHED 1935.** Theory and experiment laboratory: Modeling the research experience in a capstone curricular laboratory. B.L. Gourley

**9:15 CHED 1936.** Research-based organic chemistry laboratory. M. Bader, P.T. Pham

**9:35 CHED 1937.** Course-Based undergraduate research experience (CURE) in organic chemistry. L.C. Brown

**9:55 CHED 1938.** Petrochemical incorporation to grow material and characterization bound analytical curriculum: A new attempt to serve dual educational functions. M. Jiang

**10:15 CHED 1939.** Peptidomimetics from the classroom to the lab: Successful research outcomes from an upper-level class at a primarily undergraduate institute. D. Guarracino

**10:35** Intermission.

**10:50 CHED 1940.** Self-assembly of camptothecin-linked dipeptides. N.M. Paul, K.L. Neidrich, K.R. Boggs, A. Shieh, J.R. Parquette

**11:10 CHED 1941.** Another round of whiskey for the house: Community college students continue research on experimental new whiskey flavors. R.L. Silvestri

**11:30 CHED 1942.** Withdrawn.

**11:50 CHED 1943.** Leveraging student interest in environmental topics for undergraduate research in an interdisciplinary environmental research cluster. D.P. Pursell, K. Zimmermann, N. Khan, S. Park

**12:10 CHED 1944.** Developing an interdisciplinary medicinal chemistry undergraduate research program at a small, private, liberal arts university. J.R. Mays

### The Importance of Role Models & Mentors in Reaching Gender Equity in Chemical Sciences: A Symposium in Honor of Judith Iriarte-Gross

*Sponsored by WCC, Cosponsored by CHED, CMA and PROF*

### Producing Knowledgeable, Well-Rounded, T-Shaped Chemists for the 21st Century: Current Perspectives from High School, Undergraduate & Graduate Educators

*Sponsored by PROF, Cosponsored by BMGT, CHED and PRES*

### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

### Environmental Analytical Chemistry

*Sponsored by ENVR, Cosponsored by CHED*

### Processes, Technologies & Sensors for Food-Energy-Water Nexus Research

*Sponsored by ENVR, Cosponsored by CEI and CHED*

## TUESDAY AFTERNOON

### Section A

San Francisco Marriott Marquis  
Salons 1/2

### George C. Pimentel Award in Chemical Education: Symposium to honor Thomas A. Holme

S. Bretz, Organizer, Presiding

**1:30** Introductory Remarks.

**1:35 CHED 1945.** Developing student conceptual understanding in the physical chemistry laboratory. A. Grushow, S.S. Hunnicutt, R.M. Whitnell

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡ Cooperative Cosponsorship

**1:55 CHED 1946.** Stability and change: Investigating the blending of mathematics and chemical knowledge in the context of reasoning about chemical kinetics. M.H. Towns, K. Bain, A.C. Moon

**2:15 CHED 1947.** Adventures in assessment: Moving beyond my students liked it. J.E. Lewis

**2:35** Intermission.

**2:45 CHED 1948.** Holme-made assessment strategies: It would be really neat if. C.F. Bauer

**3:05 CHED 1949.** ACS Exams Online: Enhanced delivery, scoring and use of ACS Exams. D. Hart, K.L. Murphy

**3:25 CHED 1950.** ACS Exams: A tradition of excellence in research. K.L. Murphy, J.R. Raker

**3:45** Intermission.

**3:55 CHED 1951. Award Address** (George C. Pimentel Award in Chemical Education sponsored by Cengage Learning & the ACS Division of Chemical Education). Evidence and change, or the lack thereof. T. Holme

## Section B

San Francisco Marriott Marquis  
Salons 3/4

### The Role of Research Experiences in the ACS Certified Degree

T. J. Wenzel, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 1952.** Role of undergraduate research in the certified chemistry major. T.J. Wenzel

**1:55 CHED 1953.** Research experiences in the chemistry and biochemistry curriculum at Barnard College: A structure that supports student learning, faculty development, and safety for a diverse population. R.N. Austin

**2:15 CHED 1954.** Undergraduate research for CPT approval and for preparing minority students for success in PhD programs. C.G. Gutierrez, L.M. Tunstad

**2:35 CHED 1955.** Five phases for integrating the scientific method and communication skills with research experiences. B. Vernier, M.N. Srnec, A. Carlson, G.A. Buckholtz, E.S. Gawalt, J.D. Evanseck

**2:55** Intermission.

**3:10 CHED 1956.** Improving undergraduate education through innovative research experiences. N.T. Salzameda

**3:30 CHED 1957.** Starting a research program at primarily undergraduate institution: Practical strategies and supportive policies. M.L. Kovarik

**3:50 CHED 1958.** Use of active learning pedagogies and undergraduate research experiences to promote student success in chemistry at North Carolina A&T State University. S.O. Fakayode, M. Kanipes-Spinks

**4:10 CHED 1959.** It's research that makes the Gator chemistry major. L. McElwee-White

**4:30** Concluding Remarks.

## Section C

San Francisco Marriott Marquis  
Salon 5

### GSSPC: Water Sustainability

#### Chemists in Pursuit of Clean Water

*Cosponsored by CEI and PRES*

*Financially supported by Georgetown University Department of Chemistry, Graduate Education Advisory Board*

Z. De los Santos, J. P. England, Z. Sakhaei, *Organizers*

A. Adcock, I. Brekalo, S. E. Ingram, Z. S. Sakhaei, *Organizers, Presiding*

J. Nelson, *Presiding*

**1:45** Introductory Remarks.

**1:50 CHED 1960.** Role of polymeric structure in reverse osmosis water purification membranes. B.J. Sundell

**2:20 CHED 1961.** Nanoscale Zero-Valent Iron (nZVI) and iron oxide nanoparticle surface reactions and modification for environmental remediation. B.E. Koel

**2:50 CHED 1962.** Cactus mucilage: Cleaning water in a sustainable approach. N. Alcantar

**3:20** Intermission.

**3:35** Panel Discussion.

**5:05** Concluding Remarks.

## Section D

San Francisco Marriott Marquis  
Salon 6

### Course-Based Undergraduate Research Experiences (CUREs) in Chemistry

R. Waterman, *Organizer*

J. M. Heemstra, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 1963.** Student-designed research projects for freshman chemistry majors at UC-Berkeley. M.C. Douskey, M.T. Robak, A.M. Baranger, L. Armstrong, G. Kerstiens

**1:55 CHED 1964.** Partnership between a two-year transfer program and research faculty to develop a course-based research experience for general chemistry. K.S. Owens, A. Murkowski, A.M. Johansen, H. Price, L. Gitelman

**2:15 CHED 1965.** Freshman and authentic research, teaching biomedical chemistry through a sequence of course-based research experiences. S.C. Flynn, M. Fegley, N. Stamp

**2:35 CHED 1966.** Freshman-level research-based laboratories and the transition from student to researcher within the ReBUILDetroit program. A.L. Feig, K. Abraham, J. Andreoli, S. Chang, S. Conant, K.R. Evans, A. Fusaro, W. Hao, J. Kagey, G. Kuleck, K.C. Lanigan, A. Mathur, A. Matti, J. Thomson, D. Tomco, S. Welch

**2:55 CHED 1967.** Development of a bioinformatics driven research project as an introductory level course-based research experience. A. Leconte

**3:15** Intermission.

**3:30 CHED 1968.** Applying chemical instrumentation in the museum. K.L. Braun

**3:50 CHED 1969.** Embedding the study of heavy metal water contamination into the analytical chemistry laboratory curriculum. P. Cleary

**4:10 CHED 1970.** Research in an inorganic laboratory class. R. Waterman, J.K. Pagano

**4:30 CHED 1971.** Integrating hazard identification and risk assessment into course-based undergraduate research. S. Sigmann, D.E. Wheeler

**4:50 CHED 1972.** Integrating research opportunities into the inorganic chemistry curriculum at The College of New Jersey. A.R. O'Connor, B.C. Chan

## Section E

San Francisco Marriott Marquis  
Nob Hill A

### Advances in Teaching Organic Chemistry

S. F. Hornbuckle, *Organizer, Presiding*

**1:30 CHED 1973.** Learner-centered approach to teaching undergraduate organic chemistry. A. Brown

**1:50 CHED 1974.** Teaching organic chemistry with collaborative problem solving in the large lecture setting at UC Berkeley. M.T. Robak, A.M. Baranger

**2:10 CHED 1975.** Making organic chemistry accessible by promoting student learning through group problem solving. R. Broyer

**2:30** Intermission.

**2:45 CHED 1976.** Deriving of electrostatic potential maps and use of these as a means to predict reactivities between species. K.K. Bagga

**3:05 CHED 1977.** Evaluation of the relationship between spatial pattern recognition and learning stereochemical principles. J.J. Esteb, L.M. McNulty

**3:25 CHED 1978.** Determination of optical purity of  $\alpha$ -methylbenzylamine by formation of the camphor imine: An undergraduate organic chemistry experiment. S.A. Corlett, I.F. Germek

**3:45** Intermission.

**4:00 CHED 1979.** Spectroscopy by the numbers. N.M. Paul, C.S. Callam

**4:20 CHED 1980.** Back to basics: Improving learning in the organic chemistry laboratory. A.M. Reeve

**4:40 CHED 1981.** Using analgesics as a corner stone theme for the first semester of Organic Chemistry lecture and lab. R. Blough, M.J. Castaldi, J.K. Murray

**5:00** Concluding Remarks.

## Section F

San Francisco Marriott Marquis  
Nob Hill B

### Writing in Chemistry

S. A. Finkenstaedt-Quinn, *Organizer*

A. C. Moon, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 1982.** Faculty practices and beliefs about the effectiveness of writing in promoting student learning in STEM disciplines. S.A. Finkenstaedt-Quinn, G.V. Shultz, A. Ruggles Gere

**1:55 CHED 1983.** Modification of a junior-level capstone course to incorporate scientific writing. B. Wile

**2:15 CHED 1984.** Essay writing in the chemistry classroom to enhance learning and raise awareness of social issues affected by chemistry. A.L. Smalley, B.R. Fox

**2:35** Intermission.

**2:50 CHED 1985.** Interactive writing in a two-semester chemical analysis course sequence: Journal-formatted laboratory reports and literature reviews. R.W. Schaeffer

**3:10 CHED 1986.** Writing-to-learn with Calibrated Peer Review®. A.A. Russell

**3:30 CHED 1987.** When does this matter in real life? Using chemical knowledge to make fuel choices. R. Sansom

**3:50** Intermission.

**4:05 CHED 1988.** Expanding the students understanding and appreciation of chemistry through reading and writing. K.K. Bagga

**4:25 CHED 1989.** Use of the science writing heuristic to support instruction aligned to NGSS and the International Baccalaureate's MYP. N. Hike, D.J. Wink, S. Hughes-Phelan

**4:45 CHED 1990.** Development and implementation of a writing-to-learn intervention in introductory quantum mechanics. A.C. Moon, E. Zotos, S.A. Finkenstaedt-Quinn, A. Ruggles Gere, G.V. Szymczak

**5:05** Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Nob Hill C

### Advancing Undergraduate Research

#### Focus on Early Access to Research & Broadening Participation of Under-Represented Groups

*Cosponsored by CMAA, PROF and WCC*

*Financially supported by Council on Undergraduate Research*

R. M. Jones, *Organizer*

B. L. Gourley, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 1991.** Undergraduate researchers engaging in chemistry education research. S.E. Lewis, R. Queini, A. Dickerson

**1:55 CHED 1992.** Best practices for mentoring undergraduates in international research placements. J.C. Goeltz, R.S. Duran

**2:15 CHED 1993.** Implementation of the Henderson State University STEM bridge: Challenges and success in the first year. D. Bateman, B.A. Rowland

**2:35 CHED 1994.** Introducing incoming students to research via the Summer Opportunity for Intellectual Activity program. M.R. Prinsell, L.J. Moore

**2:55 CHED 1995.** FUTURE program: Engaging underserved populations through early research experiences. A.J. Reig

**3:15 CHED 1996.** Providing early research experiences for undergraduates. L.J. Silverberg

**3:35** Intermission.

**3:50 CHED 1997.** Rethinking the summer research experience for the new majority. M. Konkile

- 4:10 CHED 1998.** Global women and STEM undergraduate research training model. S. Deprele
- 4:30 CHED 1999.** Broadening participation in undergraduate STEM research at the community college. C.J. Foley, N. Leonhardt
- 4:50 CHED 2000.** Leveraging CREST-center funding to advance undergraduate research at multiple Minority Serving Institutions. K.R. Cousins, T. Usher, D.C. Smith, R. Zhang, P.K. Dixon
- 5:10 CHED 2001.** Collaborative field research: A gateway for undergraduate research experiences. J.C. Ingram, P. Beamer, K. Chief

#### Simulations, Animations & other Visualizations in Educating about Chemistry SAVE Chemistry!

R. Tasker, *Organizer*

R. M. Kelly, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2002.** Animation perspectives: Making sense of contrasting molecular animations through commentaries. R.M. Kelly

**1:55 CHED 2003.** Development of interactive visualizations for use in chemistry courses. Z. Alghoul

**2:15 CHED 2004.** Simulations in chemistry. T. Gupta, G.R. Albing, Z.P. Ziolkowski

**2:35** Intermission.

**2:50 CHED 2005.** SwissChemCubes - how to play with and use it in classrooms. M.T. Müller, A. Togni

**3:10 CHED 2006.** Atomarium - 2D- and 3D Visualizations. M.T. Müller, A. Togni

**3:30 CHED 2007.** Tactile experiences with crystallography to SAVE chemistry! A. Sarjeant, P.A. Wood, S. Ward, A.G. Maloney

**3:50 CHED 2008.** Augmented reality chemistry: The use of augmented reality to generate 3-D molecular models from 2-D representations. D. Behmke

**4:10** Intermission.

**4:25 CHED 2009.** Using simulations in teaching physical chemistry. T. Engel

**4:45 CHED 2010.** Illustrating chemical evolution through collaboration with artists. B.J. McFarland

**5:05 CHED 2011.** Withdrawn.

**5:25** Concluding Remarks.

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

#### Source Water Quality

#### Using Chemistry Education Research to Inform the Design & Use of Assessment Materials

S. Villafane-Garcia, *Organizer*

J. J. Reed, *Organizer, Presiding*

S. Villafañe, *Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2012.** State of assessment use in postsecondary chemistry education. R. Gibbons, J.J. Reed, E. Laga, J. Vega, K.L. Murphy, J.R. Raker

**8:55 CHED 2013.** Bringing the other elements to shore: Development of the anchoring concept content map for inorganic chemistry. K.A. Marek, K.L. Murphy, J.R. Raker, B.A. Reisner

**9:15** Intermission.

**9:30 CHED 2014.** Encounters with substances: Patterns in chemical identity thinking. C. Ngai, H. Sevan

**9:50 CHED 2015.** Making predictions and constructing explanations: An investigation into introductory chemistry students' understanding of structure-property relationships. R. Colvin, S. Underwood, M. Cooper

**10:10 CHED 2016.** Developing assessments to characterize student reasoning about interdisciplinary phenomena. S.M. Underwood, E. Scott, C. Anderson, K. Mashood, R. Matz, V. Sawtelle

**10:30** Concluding Remarks.

#### Communicating Science in the Twenty-First Century to Diversified Audiences

*Cosponsored by CPRC, CWD and PRES*

A. E. Neybert, C. A. Supalo, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2017.** Diversity in communities when communicating science. D.J. Nelson

**8:55 CHED 2018.** Withdrawn.

**9:15 CHED 2019.** Using text-to-speech to provide scaffolding for blind students comprehension of organic chemistry molecular drawings. A.E. Neybert, N. TenBroek, C.A. Supalo

**9:35 CHED 2020.** Tools of a blind chemist. M.S. Minkara

**9:55** Intermission.

**10:10 CHED 2021.** Science study Includes the blind and visually impaired student. D. Posont, F. Wurtzel

**10:30 CHED 2022.** Project BLAST: A proactive approach to improving access to science and engineering for blind students. J. Principato

**10:50 CHED 2023.** Utilizing infographics to advance scientific communication skills. R.M. Jones

**11:10 CHED 2024.** Teaching students to break down the chemistry of everyday events via infographics. J.J. Meyers, R. Singiser

**11:30 CHED 2025.** Communicating chemical concepts through Braille and other tactile approaches. H. Wohlers, C.A. Supalo, L. Walton, C. Weceles, G. Williams

**11:50** Concluding Remarks.

### Section C

San Francisco Marriott Marquis  
Salon 5

#### Strategies Promoting Success of Two-year College Students

L. J. Anna, T. Higgins, A. M. Palmer, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2026.** Reaching the hearts and minds of students with case studies and laboratory activities set in local and contemporary contexts. T.J. Terry

**8:55 CHED 2027.** Developing and implementing open educational resources (OER) for an introductory chemistry course at a two-year community college. K.J. Smith

**9:15 CHED 2028.** Tool box approach for student success in chemistry. J.E. Alexander

**9:35** Intermission.

**9:50 CHED 2029.** Identifying, recruiting, and motivating undergraduate researchers at a community college through collaboration with the honors program. D.J. Schauer

**10:10 CHED 2030.** Honors modules to infuse research into the curriculum and entuse students in chemistry. L.J. Anna, A. Palmer

**10:30 CHED 2031.** Establishing an ongoing substantive chemistry research program at a two-year college. C.L. Aronson, L.D. Bienski

**10:50** Intermission.

**11:05 CHED 2032.** Sharing portable instrumentation to expand instrumentation access and build stronger ties between two-year and four-year institutions. C.J. Stromberg, K.H. Bennett, D.J. Ellis, P. Wood, W. Nellis, P. Sheppard, C.A. Bradley

**11:25 CHED 2033.** National Science Foundation programs that support chemistry education at community colleges. T.B. Higgins, T.D. Kim, D. Rickey

**11:45** Concluding Remarks.

### Section D

San Francisco Marriott Marquis  
Salon 6

#### Course-Based Undergraduate Research Experiences (CUREs) in Chemistry

J. M. Heemstra, *Organizer*

R. Waterman, *Organizer, Presiding*

**8:30 CHED 2034.** Design, synthesis, and evaluation of small molecule sortase inhibitors: A CURE for the undergraduate organic chemistry lab. J. Antos, S.A. Reed

**8:50 CHED 2035.** CURE for the undergraduate organic chemistry laboratory. L.M. Stanley

**9:10 CHED 2036.** Discovery-based research using fragment synthesis and protein-observed <sup>19</sup>F NMR in an undergraduate organic laboratory. W.C. Pomerantz, S. Bur

**9:30 CHED 2037.** Leveraging CUREs to increase capacity for traditional undergraduate research experiences and generate student co-authored publications. J.M. Heemstra

**9:50 CHED 2038.** Known structure, unknown function: A research-based undergraduate biochemistry laboratory course. L.M. Columbus, C. Mura, C. Price

**10:10** Intermission.

**10:25 CHED 2039.** CURE in chemical biology. P.J. Beuning

**10:45 CHED 2040.** Discovery-based laboratory exercise using the colorful violacein pathway. J.A. Jones

**11:05 CHED 2041.** Bringing a stress-response research project into the biochemistry laboratory. R.E. Connor

**11:25 CHED 2042.** Luminescence screening for bioactive compounds: A research-based experiment for undergraduates. J.A. Prescher

**11:45 CHED 2043.** Taking a new research direction in the Biochemistry II teaching lab. B.J. McFarland

### Section E

San Francisco Marriott Marquis  
Nob Hill A

#### Research in Chemistry Education

D. P. Cartrette, D. R. Mulford, *Organizers*

M. Mack, *Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2044.** Influence of an international field research experience on high school teachers' understandings of the practices of science and engineering. M. Orgill, J. Adams, S. Nealy, C. Kardash

**8:55 CHED 2045.** Evolution of high- and low-achieving students' knowledge structures over general chemistry courses. O. Gulacar, M. Seibel, B. Kung, A. Milkey, S. McLane

**9:15 CHED 2046.** Evaluating students' awareness of and attitudes toward scientific research at a public, open-access college. M. Anzovino

**9:35 CHED 2047.** Students' understanding of energy in chemical reactions and processes. K. Bain, H. Hamby, T. McCord, M.H. Towns

**9:55** Intermission.

‡ Cooperative Cosponsorship

**10:10 CHED 2048.** Exploring learning outcomes when using multimedia for chemistry reaction mechanisms. A. Bongers, A.B. Flynn

**10:30 CHED 2049.** Peeking inside the black box: Making learning visible using an ethnographic perspective. L. Fallot, M.Z. Kalainoff, E.M. Kowalski

**10:50 CHED 2050.** Patterns of reactions: A card sort task to explore students' connections across organic chemistry reactions. K.R. Galloway, M.W. Leung, A.B. Flynn

**11:10** Concluding Remarks.

## Section F

San Francisco Marriott Marquis  
Nob Hill B

### Undergraduate Laboratory Experiments Involving Advanced Materials

*Cosponsored by MPPG<sup>2</sup>*

W. J. Miller, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2051.** Laboratory experiments making applied materials. G. Lisensky

**9:20 CHED 2052.** Introducing green and nongreen aspects of noble metal nanoparticle synthesis: An inquiry-based laboratory experiment for chemistry and engineering students. I.E. Pavel Sizemore, S. Paluri, M. Newsome

**9:40** Intermission.

**9:55 CHED 2053.** Introduction of galvanic replacement reactions at the nanoscale to undergraduate students: Synthesis of hollow metal nanostructures. J. Chen

**10:15 CHED 2054.** Quantifying gold nanoparticle concentration in suspensions using smartphone colorimetry. C. Knutson, A.R. Campos, T.R. Knutson, A.R. Mozzetti, C.L. Haynes, R. Penn

**10:35 CHED 2055.** Undergraduate laboratory experiment modules for probing gold nanoparticle interfacial interactions. D. Zhang

**10:55** Intermission.

**11:10 CHED 2056.** Introducing undergraduates to functionalizing nanoparticle surfaces for solar cell applications. J. Zemke

**11:30 CHED 2057.** Fabrication and characterization of solution processed perovskite solar cells by undergraduates at California State University, Chico. M.C. So, J. Barnett, V. Cherrette, C. Hutcherson

**11:50 CHED 2058.** Investigating bandgap energies, materials, and design of light-emitting diodes. E.P. Wagner

**12:10** Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Nob Hill C

### Advancing Undergraduate Research

*Cosponsored by CMA, PROF and WCC*

*Financially supported by Council on Undergraduate Research*

R. M. Jones, *Organizer*

B. L. Gourley, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2059.** Senior undergraduate research and assessment at Florida Southern College. D.C. Bromfield-Lee, A. Le

**8:55 CHED 2060.** Innovative undergraduate research program at Tennessee Tech. E.C. Lisic

**9:15 CHED 2061.** Undergraduate research in STEM fields at Georgia Southern University: A fifteen-year prospective from a former program director. M. Davis Mcgibony

**9:35 CHED 2062.** Transformative impact of developing and implementing a comprehensive undergraduate research program. B.E. Holmes, G.L. Heard

**9:55 CHED 2063.** Assessing undergraduate research in chemistry: A comparison study. R.M. Jones

**10:15 CHED 2064.** Using undergraduate research to enhance STEM education at the institutional and system-wide level. M.R. Malachowski, K.K. Karukstis, J. Osborn, E. Ambos

**10:35** Intermission.

**10:50 CHED 2065.** Organizing, assessing, and enriching undergraduate research experiences. K.D. Schurmeier

**11:10 CHED 2066.** Dreams, realities and strong contributions to diversity in STEM: Impact of an undergraduate research office at a Hispanic serving institution. L.E. Echegoeyen, L. Diaz-Martinez, G. Corral

**11:30 CHED 2067.** Using case studies to understand undergraduate research experiences. S.L. Johnson, G.M. Bodner

**11:50 CHED 2068.** Investigation of learning outcomes from undergraduate research experiences. M.R. Helix, L.E. Cote, E.M. Stone, A.M. Baranger

**12:10** Discussion.

**12:25** Concluding Remarks.

## Section H

San Francisco Marriott Marquis  
Nob Hill D

### Research on Learning in the Lab

*Cosponsored by IAC<sup>2</sup>*

M. J. Chrzanowski, S. Sandi-Urena, *Organizers*  
S. Sandi-Urena, *Presiding*

**8:30** Introductory Remarks.

**8:35 CHED 2069.** Withdrawn.

**8:55 CHED 2070.** Scenarios as a tool for investigating risk perception in the general chemistry laboratory. S. Haxton, S.D. Wiediger

**9:15 CHED 2071.** Analysis of diverse and independent laboratory learning environments using Langer's mindfulness theory. E. Jimenez Alvarado, S. Sandi-Urena

**9:35** Intermission.

**9:50 CHED 2072.** Impact of nature of science instruction on the chemistry laboratory experience. G. Kerstiens, A.M. Baranger, M.C. Douskey, M.T. Robak, L. Armstrong

**10:10 CHED 2073.** Investigating the effect of a project-based laboratory curriculum on students' value of science. J.H. Carmel, J.S. Ward, A. Pollock, L.A. Posey, M. Cooper

**10:30 CHED 2074.** Exploring meta-cognitive activity in a collaborative third year organic chemistry laboratory. K. Mathabathe, M. Potgieter, M. Rollnick

**10:50 CHED 2075.** Learning in the tertiary level chemistry laboratory: Findings from phenomenology research. M.J. Chrzanowski, S. Sandi-Urena

**11:10** Concluding Remarks.

### Active Learning in the Undergraduate Analytical Chemistry Curriculum

*Sponsored by ANYL, Cosponsored by CHED*

## WEDNESDAY AFTERNOON

San Francisco Marriott Marquis  
Salon 1/2

### Using Chemistry Education Research to Inform the Design & Use of Assessment Materials

S. Villafane-Garcia, *Organizer*

J. J. Reed, *Organizer, Presiding*

S. Villafañe, *Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2076.** Fidelity of implementation: An overlooked construct in chemical education research. M.N. Stains

**1:55 CHED 2077.** Assessment of process skills in student responses to open-ended exam questions. J.A. Schmidt-McCormack, R.S. Cole, C. Fish, A.M. Falke, J. Lantz

**2:15 CHED 2078.** Community-produced assessment instrument for biochemistry: Linking research and practice. J.A. Loertscher, J.E. Lewis, A. Mercer, V.M. Thorsell

**2:35** Intermission.

**2:50 CHED 2079.** Response process validity study for a cross-disciplinary assessment. J.M. Trate, V. Fisher, A. Blecking, P. Geissinger, K.L. Murphy

**3:10 CHED 2080.** Evaluating the psychometric evidence of the approaches to teaching inventory and the implications for psychometrics in chemistry education research. J. Harshman, M.N. Stains

**3:30** Concluding Remarks.

### Section B

San Francisco Marriott Marquis  
Salon 3/4

### Communicating Science in the Twenty-First Century to Diversified Audiences

*Cosponsored by CPRC, CWD and PRES*

A. E. Neybert, C. A. Supalo, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2081.** Auxiliaries of wisdom: Challenges of science education at an Orthodox Jewish College. J.M. Newman

**1:55 CHED 2082.** Developing and advocating for non-visual techniques in general and organic chemistry. E.D. Schlenker

**2:15 CHED 2083.** Chemistry a la CART: Making chemistry accessible for d/Deaf and hard of hearing. M.A. Postlewaite

**2:35 CHED 2084.** Developing hands-on learning modules for blind and visually impaired high school and undergraduate chemistry students. R. Dabke, S. Melaku, J. Schreck, Z. Gebeyehu, K.K. Griffin

**2:55** Intermission.

**3:10 CHED 2085.** Creation and assessment of a concept-based chemistry curriculum. P.K. Morehouse

**3:30 CHED 2086.** Game-based learning in chemistry. T. Gupta, G. Albing, J. Rosenbaum

**3:50 CHED 2087.** Service dogs in the chemistry laboratory. P.A. Redden

**4:10 CHED 2088.** Bridging the Sino-American divide in green chemistry: A parable of overcoming activation barriers in language, creeds, philosophies, diversity, and handicaps. L.A. Lucia

**4:30 CHED 2089.** Signaling safety in the chemistry classroom. A.A. Eroy-Reveles, J. Nagy, M. Estrada

**4:50** Concluding Remarks.

### Section C

San Francisco Marriott Marquis  
Salon 5

### Strategies Promoting Success of Two-year College Students

L. J. Anna, T. Higgins, A. M. Palmer, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2090.** Student affective state and reading ability: Implications for prerequisites and instruction in introductory and general chemistry classes. J. Ross, C. Lai, L. Nuñez

**1:55 CHED 2091.** Impact of in-class calculation work-sheet in chemistry and physical science courses on student success. G. Gyanwali

**2:15 CHED 2092.** Rules for success for teachers and students in a two-year college. M.J. Kenney

**2:35** Intermission.

**2:50 CHED 2093.** Strategies for overcoming significant challenges faced by the two-year college student. D. Lewis, L. Louis, J.L. Sams, A.J. Sanders

**3:10 CHED 2094.** Opening doors to STEM teaching with a learning assistant program. C.P. Schick

**3:30 CHED 2095.** NSF scholarship programs for community college students and minority serving institutions. T.B. Higgins, T.D. Kim, D. Rickey

**3:50** Concluding Remarks.

### Section D

San Francisco Marriott Marquis  
Salon 6

### Course-Based Undergraduate Research Experiences (CUREs) in Chemistry

R. Waterman, *Organizer*

J. M. Heemstra, *Organizer, Presiding*

**1:30 CHED 2096.** Incorporating research-like experiences in a physical chemistry for the life sciences course. J.G. Rowley

**1:50 CHED 2097.** Integrating paper microfluidics research into the undergraduate curriculum: CUREs at Cal State LA. F.A. Gomez, W. Lee, K. Parducho

**2:10 CHED 2098.** Drugs and cells: A cross-disciplinary, medicinal chemistry laboratory course. T.W. Funk, J. Brandauer

**2:30 CHED 2099.** Distributed drug discovery experiments in undergraduate organic chemistry laboratories. W.L. Scott, A.A. Fuller, A.B. Dounay, M. O'Donnell, J.G. Samaritoni

**3:10** Intermission.

**3:30 CHED 2100.** Two-photon absorption spectroscopy on curcumin in solution: A state-of-the-art physical chemistry experiment. J. Donnelly, F. Hernandez

**3:50 CHED 2101.** Superlab: Junior-year integrated laboratory at Haverford College. C.H. Londergan

**4:10 CHED 2102.** Bringing the outdoors in: A multi-institution, multi-course, collaborative effort to integrate water quality projects into laboratory curricula. T. Sivy, A. Lukowski, E.M. Greeson, J. Tomasiak

**4:30 CHED 2103.** Integrated research lab at Guilford College: A course-based research experience for organic, inorganic, and physical chemistry students. A.G. Glenn, G.H. Webster, R.M. Whitnell

**4:50** Concluding Remarks.

### Section E

San Francisco Marriott Marquis  
Nob Hill A

#### Research in Chemistry Education

D. P. Cartrette, D. R. Mulford, *Organizers*

R. Komperda, *Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2104.** Effect of self-explaining on scientific-skill development: Longitudinal study via latent transition analysis. A. Villalta-Cerdas

**1:55 CHED 2105.** Persistence in STEM: Development of a longitudinal model integrating self-efficacy, outcome expectations and performance in chemistry gateway courses. S. Srinivasan, K.L. Murphy

**2:15 CHED 2106.** Roles of personal and contextual factors in the characterization of the impact of the Cottrell Scholars Collaborative New Faculty Development Workshop. J. Harshman, M.N. Stains

**2:35** Intermission.

**2:50 CHED 2107.** Anxiety and enjoyment: Exploring students' academic emotions in general chemistry. S. Villafane-Garcia, X. Xu, J.R. Raker

**3:10 CHED 2108.** Describing student experiences in a project-based organic chemistry laboratory. N.L. Burrows, S.R. Mooring

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**3:30 CHED 2109.** Withdrawn.

**3:50** Concluding Remarks.

### Section F

San Francisco Marriott Marquis  
Nob Hill B

#### Undergraduate Laboratory Experiments Involving Advanced Materials

*Cosponsored by MPPGF*

W. J. Miller, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2110.** Raman microscopy study of graphene: An upper-level undergraduate experiment. H. Liu, M.M. Ward

**1:55 CHED 2111.** Fabrication of polyvinylpyrrolidone micro-/nanostructures utilizing microcontact printing. W.C. Sanders

**2:15 CHED 2112.** Low-catalyst concentration atom transfer radical polymerization in the undergraduate laboratory: Synthesis of well-defined epoxide-containing polymers and their postpolymerization modification to fluorescent materials. N.V. Tsarevsky, S.R. Woodruff, P. Wisian-Nelson

**2:35** Intermission.

**2:50 CHED 2113.** Withdrawn.

**3:10 CHED 2114.** Colorimetric ion sensing in undergraduate analytical chemistry. M.O. Odago

**3:30 CHED 2115.** Solvent-water-partitioning of different pH-indicators: A classroom and a self-experiencing laboratory sequence. M.T. Müller, B. Escher

**3:50** Intermission.

**4:05 CHED 2116.** Analysis of metal oxide and organic UV absorbers in commercial sunscreens. R. Quinones

**4:25 CHED 2117.** It does rain in Southern California. J. Ashcroft, B. Last, R. Ehrmann, A. Cakmak, E. Bautista

**4:45 CHED 2118.** Simple experiment to introduce nanophytotoxicity to first-year undergraduate students. S. Ross, M. Owen, B. Pedersen, G. Liu, W.J. Miller

**5:05** Concluding Remarks.

### Section G

San Francisco Marriott Marquis  
Nob Hill C

#### Eliciting Attentiveness from Cyber-Savvy Students without Using Electronic Tools

K. Kostecka, *Organizer*

C. E. Cannon, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2119.** Old school teaching (and learning!). P.F. Brandt

**1:55 CHED 2120.** Facilitating the formation of an e-free classroom community: A chemistry classroom exercise. B. Budy

**2:15 CHED 2121.** Course Preparation Assignments as a teaching tool in one-semester undergraduate biochemistry courses. N.J. Ronkainen

**2:35 CHED 2122.** Sneaking in the science. P.A. Redden

**2:55 CHED 2123.** Discussions during lecture in a large-enrollment chemistry course and during lab in a small-enrollment tribal college chemistry course. M.A. Griep, B. DeVore-Wedding

**3:15** Intermission.

**3:30 CHED 2124.** Physical presence and chemistry of art, color, and artifact conservation. M.J. Welsh

**3:50 CHED 2125.** Short writes and journals as effective teaching tools in nutritional chemistry. C.E. Cannon

**4:10 CHED 2126.** Science and science fiction in the classroom. D.A. Katz

**4:30 CHED 2127.** Use of science and science fiction based television and movie clips in the instruction of non-chemistry majors. K. Kostecka

**4:50** Concluding Remarks.

### Section H

San Francisco Marriott Marquis  
Nob Hill D

#### General Papers

S. A. Fleming, *Organizer*

V. Feng, *Presiding*

**1:30** Introductory Remarks.

**1:35 CHED 2128.** Determination of the overall antioxidant strength of teas combining metal nanoparticles, plasmonics, and fluorescence: Designing new experiments for the physical chemistry laboratory. J. Donnelly, F. Hernandez

**1:55 CHED 2129.** Fluorescent carbon dots: A new material to teach nanotechnology throughout chemistry curriculum. V. Feng, J. Kuether, R. Tapia Hernandez, S.N. Pham, B. Zhi, M. Krause, C.L. Haynes

**2:15 CHED 2130.** Fine-grained analysis of general chemistry texts' treatment of rates of change concepts in reaction kinetics. S. Seethaler, J. Czworkowski, L. Wynn

**2:35** Intermission.

**2:50 CHED 2131.** Guided inquiry experiment involving the intrinsic viscosity of a polymer in aqueous solution. A.L. Marsh

**3:10 CHED 2132.** Determination of essential minerals and toxic elements in Aggie Farm produce by ICP-OES: A problem based and guided inquiry learning experience in instrumental analysis laboratory course. S.O. Fakayode, N. Nickolas, L. Hordge, T. Jackson, D. Keyes, M. Duncan

**3:30 CHED 2133.** Withdrawn.

**3:50 CHED 2134.** Design of a rime-of-flight secondary ion mass spectrometer for hands-on undergraduate instruction. M.V. Lee

#### How Do We Teach Collaboration? Best Practices for Educating Future Researchers & Innovators

*Cosponsored by CHED*

*Financially supported by NSF Centers for Chemical Innovation*

B. Hames, M. Krause, D. Watt, *Organizers*  
M. DeBoever, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:10 CHED 2135.** Outreach as a cross-disciplinary collaboration: Design and implementation of an interactive aerosol chemistry display. H. Weizman, B. Hames

**8:30 CHED 2136.** Weaving chemistry, biology, and microbiology labs into common themes: Illustrating relevance across disciplines. K.V. Waynant, D. Felton, P. Hartzell, M. Ederer

**8:50** Intermission.

**9:00 CHED 2137.** Review on training undergraduate and graduate students to conduct interdisciplinary research. R.Y. Lai, P. Dussault, M. Schubert, A.E. Holmes

**9:20 CHED 2138.** Postdoctoral training within Nebraska MRSEC: A review. R.Y. Lai, J. Bosley

**9:40 CHED 2139.** Beyond the bench: Educating students in collaborative, innovative team science. J.M. Amador, M. Dolgos, D.A. Keszler, J.C. Giordan

**10:00** Intermission.

**10:10 CHED 2140.** Keys to successful collaboration: Insights from the Centers for Chemical Innovation. M. DeBoever, B. Hames, M. Krause, D. Watt

#### Current Best Practices for Chemistry REU Programs

*Cosponsored by PRES*

M. A. Griep, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 CHED 2141.** Coordination of the chemistry REU program at the University of Nebraska-Lincoln. M.A. Griep

**8:25 CHED 2142.** How a partnership model for REU programs can lead to chemistry careers for underserved students. J.B. Halpern, S. Sinex, P. Sabila

**8:45 CHED 2143.** Summer International REU Program in the United Kingdom: Successes, challenges and best practices. M. Crowe, A.G. Glenn, T.A. Nile

**9:05 CHED 2144.** Summer REU program integrating deaf and hearing participants in chemistry research. K.L. Caran, G. MacDonald

**9:25** Intermission.

‡ Cooperative Cosponsorship

9:40 CHED **2145**. Multi-Institution REU site on environmental/green chemistry. J.A. Rice, D. Asunskis, G.P. Nora

10:00 CHED **2146**. We can work(shop) it out: Benefits of technical workshops to REU programs. M.W. Peczu, J. Gascon, C. Bruckner, G.A. Crundwell

10:20 CHED **2147**. Providing laboratory safety education to REU audiences. R. Stuart, S.B. Sigmann

10:40 Concluding Remarks.

San Francisco Marriott Marquis  
Sierra C

### Engaging Students in Physical Chemistry

Cosponsored by PHYS

C. M. Teague, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 CHED **2148**. Development of a guided inquiry experiment on symmetry and spectroscopy. C.M. Teague

8:55 CHED **2149**. Measuring the speed of sound and heat capacity ratio of gases by acoustic interferometry: A physical chemistry laboratory experiment. T.D. Varberg, B.W. Pearman, I.A. Wyse, K.L. Moffett

9:15 CHED **2150**. Incorporating science writing into the physical chemistry laboratory course. A.M. Fleshman

9:35 CHED **2151**. Incorporating research projects into an undergraduate physical chemistry laboratory course. M. Wilker

9:55 Intermission.

10:10 CHED **2152**. Connecting the dots in physical chemistry survey using narrative and authentic research. B.J. McFarland

10:30 CHED **2153**. Learning physical chemistry through data analysis. J. Selco

10:50 CHED **2154**. Engaging students in connecting representational levels for better understanding of thermodynamics. R.S. Cole, C. Stanford, A.C. Moon, M.H. Towns

11:10 CHED **2155**. Development of foundational and in-depth guided inquiry activities for physical chemistry. A.L. Marsh

11:30 Concluding Remarks.

### Instructors & Researchers: Advancing Graduate Student Education

G. Bhattacharyya, S. J. Hansen, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 CHED **2156**. Fighting the battle to disconnect science education with the descriptor K-12. G.M. Bodner

8:25 CHED **2157**. Becoming a graduate student in chemistry as a blind learner: Surfacing interventions for success from an autoethnographic case. C.A. Supalo

8:45 CHED **2158**. Guiding career planning and preparation: ACS Development of Individual Development Plan (IDP) resources. C.Y. Kuniyoshi, J.L. Wesemann, N.S. Goroff, N. Bakowski

9:05 CHED **2159**. Withdrawn.

9:25 Intermission.

9:40 CHED **2160**. Community: Promoting the success of students of color in graduate programs. L. Winfield, K.M. Jackson

10:00 CHED **2161**. Enhancing graduate education and broadening participation at Louisiana State University through LA-BRIDGE. G. Thomas, Z.S. Wilson-Kennedy, I.M. Warner, A. Wright

10:20 CHED **2162**. Withdrawn.

10:40 CHED **2163**. Discipline-specific graduate course on teaching methods: Cultivating change agents in chemical education. S. Brydges, H. Dembinski, M. Boerneke, K. Finzel, C. Weinstein, R. Peacock

11:00 Concluding Remarks.

### General Papers

S. A. Fleming, *Organizer*

M. L. Curry, *Presiding*

8:00 Introductory Remarks.

8:05 CHED **2164**. Withdrawn.

8:25 CHED **2165**. Improving scientific communication skills in students through professionalism in chemistry II. S. Gamagedara

8:45 CHED **2166**. What is the real cost of contingent faculty? Evaluation of the impact of teaching professionals on undergraduate socialization. K. Van Kirk

9:05 CHED **2167**. Promoting STEM education through an early STEM college hands-on research internship experience. S.O. Fakayode, J. Tinsley, V. Abiera, D. Mehta, J. Smith, N. Whitehead, B. Elzey, E. Appah

9:25 Intermission.

9:40 CHED **2168**. Molecular modeling across the undergraduate curriculum. T. Madison, E.P. Wagner

10:00 CHED **2169**. Reciprocal peer tutoring in general chemistry: Benefits to information retention and lowered student test anxiety. D.W. Carpenetti

10:20 CHED **2170**. Design and implementation of an undergraduate peer-learning program at UC Berkeley. P. Marsden, M.T. Robak, A.M. Baranger, S. Tischhauser

10:40 CHED **2171**. Research Experiences for Teachers (RET) site: Sustainable electronics. A.L. Curry, I. Hua, M.L. Curry

## Section F

San Francisco Marriott Marquis  
Sierra J

### General Papers

S. A. Fleming, *Organizer*

J. E. Owens, *Presiding*

8:00 Introductory Remarks.

8:05 CHED **2172**. Illuminating the photoredox-catalyzed Chan-Lam coupling reaction: Building understanding of a modern organic synthesis method. J. Marshall, P.M. Lundin, M.S. Blackledge, A.J. Wommack

8:25 CHED **2173**. Using the Suzuki-Miyaura reaction to introduce organic chemistry laboratory students to reaction development of a pharmaceutically active compound. P.M. Lundin

8:45 CHED **2174**. Detecting olive oil adulteration: A senior research project. R. Indralingam, C.T. Michael

9:05 CHED **2175**. Combining coffee bean trace element profiles and origins as sources of data for teaching principle component analysis. C.J. Taylor

9:25 Intermission.

9:40 CHED **2176**. Team-based learning in two upper-division chemistry elective courses: Mass spectrometry and environmental chemistry. J.E. Owens

10:00 CHED **2177**. Calculating charge densities for solvatochromic dyes: A computational chemistry project for the physical chemistry curriculum. B. Findley, T.F. Nedder

10:20 CHED **2178**. Identifying student misconceptions and analyzing student thought processes during construction and application of molecular orbital diagrams. A.D. Spurlock, J.L. Jenkins

10:40 CHED **2179**. Guided inquiry approach to understanding fluorescence spectroscopy. M.P. Hill, E. Nam

## Section G

San Francisco Marriott Marquis  
Sierra K

### General Papers

S. A. Fleming, *Organizer*

S. M. Tremain, *Presiding*

8:00 Introductory Remarks.

8:05 CHED **2180**. Elemental nucleogenesis is made simple with cartoon drawings of the quarks making hydrogen's protons and neutrons continuing on in heavier elements showing interesting trends in the chart of the nuclides. R.J. Schroeder

8:25 CHED **2181**. Reinforcing the foundations of chemical knowledge. K.D. Revell

8:45 CHED **2182**. How to maximize class time and bridge learning gaps using just-in-time-teaching. R. Glazener

9:05 CHED **2183**. Using student group presentations in biochemistry for program level assessment. S.M. Tremain

9:25 Intermission.

9:40 CHED **2184**. Using a shortened periodic table to teach general chemistry. M.J. Kenney

10:00 CHED **2185**. Preparation and characterization of cobalt coordination complexes: An advanced inorganic laboratory project. W.A. Neiwert

10:20 CHED **2186**. Withdrawn.

10:40 CHED **2187**. Teaching atomic structure as a threshold concept in chemistry for biologists. E. Loizidou, H. Jones

## Section H

San Francisco Marriott Marquis  
Sierra E

### The General Chemistry Course for a Changing World

D. A. Katz, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 CHED **2188**. Steps toward integrating the general chemistry course. D.A. Katz

8:25 CHED **2189**. General chemistry pedagogy to engineering students via polymer structure-property relationships. C.L. Aronson, R. Muzquiz, L.D. Bienski

8:45 CHED **2190**. Withdrawn.

9:05 Intermission.

9:20 CHED **2191**. Adaptive learning: Reflections and indications. E.C. Gravelly, G.P. Redd, T.C. Redd

9:40 CHED **2192**. Some considerations for teaching general chemistry in the global communities of the second machine age. C.A. Supalo

10:00 CHED **2193**. Pathways to success in general chemistry. K.L. Stone, S.E. Shaner, C.M. Fendrick

10:20 CHED **2194**. Introductory chemistry through social contexts. B. Venkataraman

10:40 Concluding Remarks.

#### Cannabis: Emerging Challenges in Regulations, Product Analysis & Processing

*Cosponsored by CCS and SCHB<sup>‡</sup>*

J. Marcu, E. M. Pryor, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 CHAS 14.** Residual solvent contaminants in cannabis concentrates. J.T. Fishedick, D. Egerton

**1:55 CHAS 15.** Cannabis grow facilities: Identification and handling of hazardous wastes, a problem for Environmental Health Departments. D. Keenan, M. Duazo

**2:15 CHAS 16.** Thermal decomposition of THC on preparation of a distilled hash oil: A case study. D. Lane

**2:35** Intermission.

**2:50 CHAS 17.** THCA and CBDA: More than simply inactive precursors. G. Moreno

**3:10 CHAS 18.** Emerging challenges in cannabis regulations. R. Mirkarimi

**3:30 CHAS 19.** CANN History: The first year as a subdivision at the ACS. E.M. Pryor, J. Marcu, M.J. Wilcox, E.L. Oltermann, A. Pham

**3:50** Panel Discussion.

### Nanocellulose Processing & Analysis

#### Fundamentals

*Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC*

## MONDAY EVENING

### Section A

Moscone Center

Hall D

#### Sci-Mix

J. M. Pickel, *Organizer*

**8:00 - 10:00**

**CHAS 20.** Perception of risk in a quantitative analytical teaching laboratory. S. Haxton, S.D. Wiediger

**CHAS 21.** Absence of safety education in chemistry curriculum, and *Normalization of Deviance*. R.H. Hill

**CHAS 22.** Revisiting and revising The Safety Ethic. R.H. Hill

**CHAS 23.** Assessing risk for undergraduate research and demonstrations. R. Stuart, S.B. Sigmann

**CHAS 24.** Division of Chemical Health and Safety information poster. J.M. Pickel

**CHAS 25.** Cannabis analysis: A complex job under complex circumstances. M.J. Wilcox, J. Marcu

**CHAS 26.** Implementing sustainable practices in hands-off academic research labs. K.A. Miller

**CHAS 27.** Safety as a core value of a student chapter. C. Wilhelm

**CHAS 28.** Improving the safety culture of the University of California, Irvine through a graduate safety fellowship. T. Endean

**CHAS 29.** Assessing secondhand marijuana smoke using biological markers. B. Wei, L. Wang

## TUESDAY MORNING

### Section A

Park Central San Francisco

Olympic

#### Information Flow in Environmental Health & Safety

*Cosponsored by CCS and CINF<sup>‡</sup>*

R. Stuart, *Organizer, Presiding*

**9:00** Introductory Remarks.

**9:10 CHAS 30.** Chemical safety requires a system, not a solution. R. Stuart

**9:35 CHAS 31.** Chemical information necessary to establish laboratory ventilation control bands. E. Sweet

**10:00 CHAS 32.** Reaction safety information: Engaging the community in collecting and sharing of safety learnings. C. Nitsche, G. Whittick, M. Manfredi

**10:25** Intermission.

**10:35 CHAS 33.** Chemical management applications for the University of California. P. Painter, C. Carcamo

**11:00 CHAS 34.** Comparing GHS hazard statements between different sources. B.S. Clark, B. Murphy, P.D. Tran, D. Berleant, R. Stuart, R.E. Belford

**11:25 CHAS 35.** Talking chemical safety: Terminologies and keywords in various information sources. L. McEwen

**11:50** Panel Discussion.

## TUESDAY AFTERNOON

### Section A

Park Central San Francisco

Olympic

#### Information Flow in Environmental Health & Safety

*Cosponsored by CCS and CINF<sup>‡</sup>*

R. Stuart, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 CHAS 36.** Consult the SDS. S. Sigmann

**2:00 CHAS 37.** Graduate student perspective on the ACS online tool Hazard Assessment in Research Laboratories. K. Leahy

**2:25 CHAS 38.** Unique one-stop access to a multitude of chemical safety resources. A. Lederman

**2:50** Intermission.

**3:05 CHAS 39.** EPA CompTox chemistry dashboard: An online resource for environmental chemists. A.J. Williams, C. Grulke, J. Smith, K. Mansouri, A. McEachran, K. Dionisio, K. Phillips, G. Patlewicz, J. Fitzpatrick, T. Martin, A. Richard, J. Edwards

**3:30 CHAS 40.** Exposure driven risk assessment of nanoparticles: Towards a re-equilibration of the traditional risk = hazard x exposure equation. A. Mason, C. de Garidel-Thoron, S. Pekar, M. Auffan, J. Rose, M. van Tongeren, P.K. Westerhoff

**3:55 CHAS 41.** Assessing the activity and toxicity profile of small-molecules using freely accessible software and data: The contributions of chemical ontologies, metabolism prediction, and spectra prediction. Y. Djoumbou Feunang

### Recent Developments in TSCA Regulation: New Requirements for Chemicals in Commerce

*Sponsored by CHAL, Cosponsored by CHAS, ENWR and I&EC*

## WEDNESDAY MORNING

**Should I Move My Computational Chemistry or Informatics Tools to the Cloud?**

Sponsored by COMP, Cosponsored by CINF

**SUNDAY EVENING****Section A**Park Central San Francisco  
Franciscan I & II**CINF Scholarships for Scientific Excellence: Student Poster Competition**S. J. Chalk, *Organizer***6:30 - 8:30****CINF 44.** Application of spectral and diffusion geometry descriptors to shape-based virtual screening. **M. Seddon**, D. Cosgrove, M. Packer, V.J. Gillet**CINF 45.** Evaluating performance of chemical fingerprinting methods and machine learning algorithms for *in silico* prediction of Ames mutagenicity. **D. Mehta**, P. Volarath, K. Arvidson**CINF 46.** Shape described by numbers – Comparing the shape fingerprint and shape multipole methods. **J. Zarnicka**, A.G. Leach, S.J. Enoch**CINF 47.** Water, water, everywhere... Modeling water molecules in protein-ligand complexes. **E. Nittinger**, P.A. Gibbons, V. Tsui, D.F. Ortwin, M. Rarey**CINF 48.** Mobilizing EPA's Comptox Chemistry Dashboard data on mobile devices. **K. Blinov**, **A. McEachran**, A.J. Williams**CINF 49.** Free online access to experimental and predicted chemical properties through the EPA's CompTox Chemistry Dashboard. **K. Mansouri**, C. Grulke, R. Judson, A.J. Williams**CINF 50.** Cheminformatics modeling of closantal analogues potentially relevant for creating river blindness. **M.A. Kuenemann**, S. Kuchibhotla, P. Kyaw Zin, D. Fourches**CINF 51.** Generation of structure-based pharmacophores in unbound state (apo) protein binding sites. **T. Seidel**, V. Reiner, G. Ibis, T. Langer**CINF 52.** Visualization in CDD vault: A new reactive web platform for multidimensional drug discovery data mining and visualization. **W.W. Smith**, B.A. Bunin, K. Gregory**CINF 53.** Investigating transport properties with multi-scale computable mesh models from heterogeneous structural datasets. **C. Lee**, J. Moody, J. McCammon, M. Holst, R.E. Amaro**CINF 54.** Toward automated verification of curated chemical property data. **A. Loyola**, S.J. Chalk**CINF 55.** Withdrawn.**CINF 56.** Semantically capturing NIST SRD 81 data using the SciData data model. **T. Schumann**, S.J. Chalk**MONDAY MORNING****Section A**Park Central San Francisco  
Metropolitan I**Advances in High-Throughput Screening**

Cosponsored by COMP and MEDI

R. J. Bienstock, S. Sirimulla, *Organizers*, *Presiding***8:15** Introductory Remarks.**8:20 CINF 57.** Maximizing PubChem for drug discovery. **S. Kim**, E. Bolton, S.H. Bryant**8:45 CINF 58.** Web servers and high throughput virtual screening. **R.J. Bienstock****9:10 CINF 59.** Recent advances in Autodock Vina molecular docking software. **S. Sirimulla****9:35** Intermission.**9:45 CINF 60.** Hyperspace, warp speed and time warp: Searching the chemical universe at ludicrous speed. **C. Detering****10:10 CINF 61.** PubChem BioAssay: What it takes to build a public HTS data warehouse. **Y. Wang****10:35 CINF 62.** Confidently targeting high quality hits from high-throughput screening. **M.D. Segall**, T. Mansley, P. Hunt, E. Champness**11:00** Intermission.**11:10 CINF 63.** Discovery of novel inhibitors of the galactokinase from high throughput and *in silico* screening. **M. Shen**, X. Hu, Y. Zhang, L. Liu, M. Boxer, M.D. Hall**11:35 CINF 64.** Structural modeling and identification of small molecule agonists of human relaxin family peptide receptor 1. **X. Hu**, C. Myhr, E. Barnaeva, I. Agoulnik, M. Ferrer, J.J. Marugan, N. Southall, A. Agoulnik**Section B**Park Central San Francisco  
Metropolitan II**Advances in Data Visualization**E. Davis, *Organizer*, *Presiding***8:10** Introductory Remarks.**8:15 CINF 65.** Expanding the target dimension: How to visualize a lot of models. **A. Clark****8:40 CINF 66.** Visualizing molecules in and out of context. **C. Batchelor**, N. Bailey, P. Corbett, **J. White**, J. Boyle**9:05 CINF 67.** Withdrawn.**9:30 CINF 68.** Scaffold histories: Visualizing temporal trends in scaffold properties. **B. Zdrzil**, R. Guha**9:55** Intermission.**10:10 CINF 69.** Shoring up the (data) base: Advances in materials data processing and visualization. **P. Schaal**, R. Padilla, S.J. Chalk, M. Klinge**10:35 CINF 70.** Data visualisation: Saying it all in a bite-sized chunk. **E. Champness**, M.D. Segall, P. Hunt, T. Mansley**11:00 CINF 71.** Scalable web-based molecular graphics and visualization of structure quality metrics. **A.S. Rose**, A.R. Bradley, Y. Valasatava, J. Duarte, A. Prlic, P. Rose**11:25 CINF 72.** Semi-interactive creation of 2D protein-ligand pose diagrams with PoseView-2. **T. Otto**, **M. Rarey****11:50** Concluding Remarks.**Section C**Park Central San Francisco  
Metropolitan III**Textbooks & the Practice of Science: Before, During & After Gutenberg**Cosponsored by CHED and HIST<sup>†</sup>R. E. Belford, G. D. Patterson, *Organizers*  
T. Gupta, *Organizer*, *Presiding***8:45** Introductory Remarks.**8:50 CINF 73.** Extensible electronic textbook. **R.E. Belford**, J.L. Holmes**9:10 CINF 74.** Supporting transmission of knowledge for chemical safety education: An information workflow supplement to the laboratory textbook. **L. McEwen**, S.B. Sigmann, R. Stuart**9:30 CINF 75.** Chemistry in context: How do we most effectively engage the non-science majors? **B.D. Fahman****9:50 CINF 76.** Facts versus foundation -- The evolution of learning needs for contemporary science students. **A.S. Tseng****10:10** Intermission.**10:25 CINF 77.** Indian textbooks: From the beginnings to the modern times. **P. Roy Chowdhury****10:45 CINF 78.** Alchemy to chemical science: The advance of texts for over 5,000 years in China from the oracle bones to e-learning resources and methodologies. **R.J. Rusay**, B. Koo, R. Daugherty, G. Dasgupta, D.S. Larsen**11:05 CINF 79.** Instructor support is key to adoption of open educational systems. **J.B. Halpern**, D.S. Larsen**Should I Move My Computational Chemistry or Informatics Tools to the Cloud?**

Sponsored by COMP, Cosponsored by CINF

**MONDAY AFTERNOON****Section A**Park Central San Francisco  
Metropolitan I**Advances in High-Throughput Screening**

Cosponsored by COMP and MEDI

R. J. Bienstock, S. Sirimulla, *Organizers*, *Presiding***1:15** Introductory Remarks.**1:20 CINF 80.** Spectral and diffusion geometry descriptions of molecular shape. **M. Seddon**, D. Cosgrove, M. Packer, V.J. Gillet**1:45 CINF 81.** Rapid, accurate, precise and reliable relative free energy prediction using ensemble based thermodynamic integration. **A.P. Bhati**, S. Wan, D.W. Wright, **P.V. Coveney****2:10 CINF 82.** Advanced HTS triage methods to identify false negative compounds. **L. Zhang**, M. Boehm, F.E. Lovering**2:35** Intermission.**2:45 CINF 83.** Withdrawn.**3:10 CINF 84.** Combining *de novo* design and macromolecular target prediction for high-throughput virtual screening. **G. Schneider**, L. Friedrich, A. Button, P. Schneider**3:35 CINF 85.** Chemical biology informatic approaches to enable high-throughput screening: Focused compounds sets, target enrichment, and hit expansion. **P. Kutchukian**, A. Wassermann, I. Wallace, C. Chang, W.L. Pettrilli, T. Kreamer, M. Kansara, C.L. Waller, J.E. Imbriglio, M. Glick**4:00** Intermission.**4:10 CINF 86.** AbbVie target prediction tool. **A. Seal**, **R. Gupta**, D. Debe, P. Hajduk**4:35 CINF 87.** Open innovation drug discovery: Structure blinded virtual screening. **N.I. Franklin****5:00** Concluding Remarks.**Section B**Park Central San Francisco  
Metropolitan II**The Write Thing to Do: Ethical Considerations in Authorship & the Assignment of Credit**Cosponsored by CHED, CPRM and ETH<sup>†</sup>J. N. Currano, P. A. Mabrouk, *Organizers*, *Presiding***1:10** Introductory Remarks.**1:15 CINF 88.** Authorship issues in academia of low and lower middle-income countries. **L. Anestidou****1:40 CINF 89.** What constitutes authorship? Guidance from the Committee on Publication Ethics (COPE). **H.L. Tierney****2:05 CINF 90.** Teaching students where credit is due: Attribution 101 for the mash-up generation. **J.N. Currano****2:30 CINF 91.** Influence of graduate students on authorship decision-making in undergraduate research partnerships. **A. Andes**, P.A. Mabrouk, A. Pattani**2:55** Intermission.**3:10 CINF 92.** Authorship issues and conflict in the U.S. academic chemical community. **J. Seeman**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

<sup>†</sup> Cooperative Cosponsorship

3:35 CINF **93**. ORCID iDs & Project Credit: Contributor badges and getting credit for your work. C. Craig

4:00 CINF **94**. Do not lose your invention by improperly naming inventors on the patent. X. Pillai

4:25 CINF **95**. Hey—You stole my invention! Avoiding ethical pitfalls in determining inventorship, authorship, and honoring Non-Disclosure Agreement (NDA) obligations. J.L. Krieger

4:50 Discussion.

5:05 Concluding Remarks.

## Section C

Park Central San Francisco  
Metropolitan III

### Textbooks & the Practice of Science: Before, During & After Gutenberg

*Cosponsored by CHED and HIST<sup>2</sup>*

T. Gupta, G. D. Patterson, *Organizers*

R. E. Belford, *Organizer, Presiding*

1:50 Introductory Remarks.

1:55 CINF **96**. Developing and assessing effective cyberlearning within the Libretxts libraries. D.S. Larsen

2:15 CINF **97**. Textbooks in transition: A new low-cost model for distributing chemistry textbooks and tools. M.A. Bishop

2:35 CINF **98**. Democratization of learning and re-embedding the textbook. B. McCollum

2:55 CINF **99**. MindTap general chemistry: Integrating scientific exploration and problem-solving within a textbook. W.J. Vining, S.M. Young, R. Day

3:15 Intermission.

3:30 CINF **100**. What should a textbook for 21st-century students look like? J. Moore, C.L. Stanitski

3:50 CINF **101**. High school students and critical reading of science misinformation and inaccurate claims. A.S. Tseng

4:10 CINF **102**. Textbooks and the SI base units. A challenge for authors and editors. P.F. Rusch

4:30 CINF **103**. Panel discussion on textbooks of the future. R.E. Belford

4:50 Concluding Remarks.

### Data Science Challenges in Computational Chemistry

*Sponsored by COMP, Cosponsored by CINF*

### Should I Move My Computational Chemistry or Informatics Tools to the Cloud?

*Sponsored by COMP, Cosponsored by CINF*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

E. Alvaro, *Organizer*

8:00 - 10:00

28, 44-45, 48-51, 53-54, 56, 86-87, 91, 101. See previous listings.

108, 121, 139, 160. See subsequent listings.

## TUESDAY MORNING

### Section A

Park Central San Francisco  
Metropolitan I

### Text-Mining & Natural Language Processing for Chemical Information: From Documents to Knowledge

R. J. Bienstock, J. L. Nauss, *Organizers, Presiding*

9:00 CINF **104**. From documents to knowledge. J.L. Nauss

9:25 CINF **105**. Improving chemical names matching for verification, rating, and validation of PubChem compound records. L. Zaslavsky, D.M. Lowe, C. Wei, Z. Lu, E. Bolton

9:50 CINF **106**. Advanced grammars for state-of-the-art Named Entity Recognition (NER). R.A. Sayle, D.M. Lowe

10:15 Intermission.

10:30 CINF **107**. Mining protein interactions from biomedical literature using semantic similarity. C. Schmitt, S. Cox, L. Christopherson, E. Scott, S. Firrincielli, N. Baker, E. Tutubalina, A. Tropsha

10:55 CINF **108**. Automatic extraction of bioactivity data from patents. D.M. Lowe, S. Senger, R.A. Sayle

11:20 CINF **109**. Text-mining strategies to support computational research in chemical toxicity. N. Baker, T. Knudsen, A.J. Williams, K. Crofton

### Section B

Park Central San Francisco  
Metropolitan II

### Open Access: Current Landscape, Challenges & Future Directions

G. Baysinger, E. Kajosallo, *Organizers*

Y. Li, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 CINF **110**. Increasing public access to federally-funded R&D results – The Department of Energy's Access Model and DOE PAGES. B. Hitson, J. Gilmore, C. Robinson, S. Studwell

9:05 CINF **111**. Building communities and infrastructure to support openness. S. Bowman

9:35 CINF **112**. Open access reporting: Improving the accuracy of data collection during the publishing process. M. Qiu, S. Akay, M. Blickem, S. Monasky

10:05 Intermission.

10:20 CINF **113**. Getting more than what you're paid for: Technologies driving revenue in an OA landscape. J. Wilcock

10:50 CINF **114**. CHORUS – Driving the uptake and monitoring of public access by leveraging established standards and infrastructure for cost efficiency. S. King

11:20 CINF **115**. Tales from the front lines: Supporting open access journals & repositories with research metrics. A. Michalek

11:50 Concluding Remarks.

### Section C

Park Central San Francisco  
Metropolitan III

### Advanced Materials: Issues in Nanoinformatics & Nanosafety Data

Y. Cohen, M. G. Hicks, R. Liu, L. McEwen, *Organizers, Presiding*

8:10 Introductory Remarks.

8:15 CINF **116**. Meeting the challenges of nanoinformatics. J. Rumble

8:40 CINF **117**. Conceptual analysis and chemical information: A case study in nanoscience. J.R. Bursten

9:05 CINF **118**. Nanoinformatics platform for environmental impact assessment of engineered nanomaterials. M. Bilal, P. Church, H. Liu, R. Liu, Y. Cohen

9:30 CINF **119**. Materials informatics: Computational and cheminformatics approaches towards properties assessment and rational design of advanced materials. B. Rasulev

9:50 Intermission.

10:05 CINF **120**. QNAR models for the rational design of nanomaterials. D. Fourches

10:30 CINF **121**. Data visualization tool for exploring how nanomaterial properties correlate with toxicity in zebrafish assays. G. Lowry, S. Karcher, C. Hendren, M. Wiesner, B. Harper, S. Harper

10:55 CINF **122**. Investigation of the interactions of macrophage and silver nanowires. E. Ogorodnik, G. Liu

11:20 CINF **123**. Flexible database management system for nanoinformatics research and data integration. P. Church, M. Bilal, R. Liu, Y. Cohen

11:45 CINF **124**. Tools and approaches for data deposition into nanomaterial databases. V. Tkachenko, R. Zakharov, A. Kabanov, K. Mills, T. Hickey, A. Tropsha

### Information Flow in Environmental Health & Safety

*Sponsored by CHAS, Cosponsored by CCS and CINF*

## TUESDAY AFTERNOON

### Section A

Park Central San Francisco  
Metropolitan I

### Text-Mining & Natural Language Processing for Chemical Information: From Documents to Knowledge

R. J. Bienstock, J. L. Nauss, *Organizers, Presiding*

2:00 CINF **125**. Making the old new again: Modern technology provides access to historical chemical information. S.P. Kuhn, J. Tinsley, K.C. Schwall

2:25 CINF **126**. Evolution of SciFinder to meet the changing needs for scientific information. P.Y. Ayala, Y. Wu, G. Gao, J.W. Taylor

2:50 CINF **127**. Trends and relations. P. Corbett, N. Bailey, C. Batchelor, J. White, J. Boyle

3:15 Intermission.

3:30 CINF **128**. ChemAnalyzer: A text analytics platform for chemical surveillance. S. Gaurav, T. Roy, J. Zeng, L. E. Charles, M. Henry, K. Han, C. Corley

3:55 CINF **129**. Addition of chemical search capabilities to PATENTSCOPE: Turning a full-text search system into a chemistry database. J. Eiblmaier, C. Mazenc, D. Geppert, L. Isenko, H. Saller

4:20 CINF **130**. ChemExtractor: Enhanced rule-based capture and identification of PDF based property data. S.J. Chalk, T. Schumann, A. Loyola, M. Bastien, J. Turner

### Section B

Park Central San Francisco  
Metropolitan II

### Open Access: Current Landscape, Challenges & Future Directions

G. Baysinger, Y. Li, *Organizers*

E. Kajosallo, *Organizer, Presiding*

1:15 Introductory Remarks.

1:20 CINF **131**. Open up the open access conversation at a STEM-focused university. Y. Li

1:50 CINF **132**. Work in progress: Status of open access at a major research university. G. Baysinger

2:20 CINF **133**. Qualitative analysis of the Berkeley Research Impact Initiative (BRII) open access fund at UC Berkeley. S. Tepitzky

2:50 CINF **134**. Open software in chemistry: Challenges and opportunities. L. Soto

3:20 Intermission.

3:35 CINF **135**. Using Caltech's institutional repository to track OA publishing in chemistry. D. Wrublewski, G.S. Porter

4:05 CINF **136**. Impact of recent changes at MIT Libraries on MIT open access policy. E. Kajosallo

4:35 CINF **137**. What price open access: Findings from the Pay It Forward Project. I. Anderson

5:05 Concluding Remarks.

### Information Flow in Environmental Health & Safety

*Sponsored by CHAS, Cosponsored by CCS and CINF*

## WEDNESDAY MORNING

### Section A

Park Central San Francisco  
Metropolitan I

### Public-Private Partnerships: Fostering Drug Discovery & Data Sharing

*Cosponsored by COMP*

R. J. Bienstock, B. A. Bunin, *Organizers, Presiding*

8:30 Introductory Remarks.

8:40 CINF **138**. CCDC: A public-private research partnership. P. Davie, I. Bruno

---

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

---

**9:05 CINF 139.** PubChem BioAssay: Grow with the support of the community. **Y. Wang**

**9:30 CINF 140.** Selection of cross-docking candidates and comparison of evaluation metrics in Continuous Evaluation of Ligand Pose Prediction (CELPP). **S. Liu, J. Wagner, C. Churas, S.M. Gathiaka, J. Grethe, M. Chiu, H. Yang, S. Burley, R.E. Amaro, M.K. Gilson**

**9:55 Intermission.**

**10:05 CINF 141.** Synthetically accessible virtual inventory (SAVI). **Y. Pevzner, W. Ihlenfeldt, M.C. Nicklaus**

**10:30 CINF 142.** Cross-platform HELM editor empowers HELM adoption. **J. Lee, R. Hotchandani**

**10:55 CINF 143.** HELM: A line-notation and software infrastructure for managing biopolymers. **J. Milton**

**11:20 CINF 144.** Tangled up in data: Enabling strong collaborations with transparent information sharing. **J. Neitz**

### Section B

Park Central San Francisco  
Metropolitan II

#### General Papers

**E. Alvaro, Organizer, Presiding**

**8:15** Introductory Remarks.

**8:20 CINF 145.** Withdrawn.

**8:40 CINF 146.** PubChem's literature and patent information for drug discovery. **S. Kim, P.A. Thiessen, T. Cheng, B. Yu, B.A. Shoemaker, J. Wang, E. Bolton, Y. Wang, S.H. Bryant**

**9:00 CINF 147.** QUDT toolkit: Development of framework to allow management of digital scientific units. **S.J. Chalk, R. Hodgson, S. Ray**

**9:20 CINF 148.** Mapping the 3D structures of small molecule binding sites. **J. Meyers, N. Brown, J. Blagg**

**9:40 CINF 149.** Predictions are tough, especially about the future: Assessing model quality, need for rapid automated model updates, and distributed computing. **V.R. Polyakov, E.J. Martin**

**10:00** Intermission.

**10:15 CINF 150.** HLA-triggered adverse drug reactions: Challenges and opportunities for molecular modeling. **G. Van Den Driessche, D. Fourches**

**10:35 CINF 151.** Can machine learning methods usefully rank small molecules for their selective growth inhibition of cancer cell lines with the BRAF V600E gene mutation? **J. Langham**

**10:55 CINF 152.** Using the Structured Product Labeling format to index versatile chemical data. **V. Tkachenko, Y. Borodina, A.J. Williams**

**11:15 CINF 153.** Reinventing the IUPAC Gold Book. **S.J. Chalk, M. Kinnan, L. McEwen, H.A. Lawlor, D. Martinsen**

**11:35 CINF 154.** Computational screening of hydrogen storage in experimental metal-organic frameworks. **Y. Chung**

### Section C

Park Central San Francisco  
Metropolitan III

#### Assessment of Chemistry Collections & Services

**V. F. Scalfani, A. B. Twiss-Brooks, Organizers, Presiding**

**8:30** Introductory Remarks.

**8:35 CINF 155.** What about the books? Usage trends of chemistry monographs among graduate students in an era of transition. **D.W. Flaxbart**

**9:00 CINF 156.** Matching chemistry collections and user needs: A data-driven approach. **E. Alvaro**

**9:25 CINF 157.** Assessment of chemistry thesis and dissertation titles for collection development. **V.F. Scalfani**

**9:50** Intermission.

**10:05 CINF 158.** Chemistry library as rallying point: Assessing how to save a branch library. **J.R. Garritano**

**10:30 CINF 159.** Withdrawn.

**10:55 CINF 160.** Assessing data management practices and needs through data management plans. **B. Westra**

**11:20** Concluding Remarks.

## WEDNESDAY AFTERNOON

### Section A

Park Central San Francisco  
Metropolitan I

#### Public-Private Partnerships: Fostering Drug Discovery & Data Sharing

*Cosponsored by COMP*

**R. J. Bienstock, B. A. Bunin, Organizers, Presiding**

**1:30** Introductory Remarks.

**1:35 CINF 161.** Extracting medicinal chemistry knowledge by a secure matched molecular pair analysis platform: Standardization enables merging with public data. **A. Dossetter, E.J. Griffen, A.G. Leach, S. Montague**

**2:00 CINF 162.** Enabling precision drug repurposing through innovative public-private partnerships. **D.J. Wild, J.J. Yang**

**2:25 CINF 163.** Innovative medicines initiative: From semantic data integration to risk assessment. **D. Digles, D. Goldmann, B. Zdravil, G.F. Ecker**

**2:50** Intermission.

**3:00 CINF 164.** Present and futuristic collaborative drug discovery informatics innovations (CDD vault + bioassay express). **B.A. Bunin**

**3:25 CINF 165.** Supporting compound optimisation in not-for-profit and academic research. **M.D. Segall, T. Mansley, P. Hunt, K. Chibale, T. Paquet, J. Duffy**

**3:50 CINF 166.** tranSMART platform for translational medicine: An open source, open data and open science platform. **R. Potenzzone, K. Elliston**

**4:15** Discussion.

**4:30** Concluding Remarks.

### Section B

Park Central San Francisco  
Metropolitan II

#### General Papers

**E. Alvaro, Organizer, Presiding**

**1:00 CINF 167.** VIMAL: A cheminformatics toolkit for design of novel antiviral agents through textmining of scientific literature. **M. Karthikeyan, R. Pahujani, R. Vyas**

**1:20 CINF 168.** Know the breadth of your sources: The CAS content collection is your comprehensive resource. **E.N. Cheeseman**

**1:40 CINF 169.** Streamlining pharmaceutical supply chain processes: The emerging application of solid-state structural informatics. **M.J. Bryant, A.G. Maloney, N. Feeder**

**2:00 CINF 170.** Open Science Data Repository - the platform for materials research. **V. Tkachenko, R. Zakharov, I. Presniakov, S. Kalmykov**

**2:20 CINF 171.** Software tool that provides the critical information needed to enable toxicity-focused research. **N. Vaidya**

**2:40** Intermission.

**2:55 CINF 172.** Chemistry Validation and Standardization Platform Version 2.0. **V. Tkachenko, R. Zakharov, C. Grulke, A.J. Williams**

**3:15 CINF 173.** Withdrawn.

**3:35 CINF 174.** ZINC: A free database of commercially available compounds for virtual screening. **J.J. Irwin**

**3:55 CINF 175.** Biomedical literature mining for protein-protein interactions analysis using electronic mailing system. **M. Karthikeyan, R. Vyas**

## MONDAY MORNING

### Section A

Park Central San Francisco  
Stanford

#### Non-Traditional Careers in Chemistry

**K. E. Bianco, Organizer**

**R. Franz, Presiding**

**9:00 CHAL 2.** Alternative careers in chemistry, an international perspective. **R. Franz**

**9:30 CHAL 3.** A PhD is not enough—Working at the intersection of science and business. **J. Chen**

### Section B

Park Central San Francisco  
Stanford

#### Patent Challenges & Chocolate: A Sweet & Sour Symposium

**J. J. Hasford, Organizer, Presiding**

**10:30 CHAL 4.** Interplay between patent office IPR challenges and district court patent infringement cases. **J.J. Hasford**

**11:00 CHAL 5.** Chocolate: Food of the Gods - 2016 Helen Free Award Lecture. **H.M. Peters, S.B. Peters**

### Chemical Forensics

#### Investigations of Alleged Use & Source Attribution of Chemical Weapons

*Sponsored by ANYL, Cosponsored by CHAL and PRES*

## MONDAY AFTERNOON

### Section A

Park Central San Francisco  
Stanford

#### The Use of Scientific Information in IP-Related Matters

**E. N. Cheeseman, Organizer, Presiding**

**1:30 CHAL 6.** What exactly are you looking for? Searching for chemical information. **E.N. Cheeseman**

**2:00 CHAL 7.** Patent claims reciting scientific information: The now heightened definiteness requirement. **T.A. Ostomel**

**2:30 CHAL 8.** Your next breakthrough starts here – CAS content and solutions foster discovery and innovation. **K. Zielenbach**

**3:00 CHAL 9.** Survey of biosequence in patent claims and the impact on biosequence search methods. **K.L. Hoppe**

**3:30 CHAL 10.** Patents and basic scientific research: Discovery versus invention. **P. Campbell**

**4:00 CHAL 11.** Importance of Markush searching for FTO purposes. **P.F. Blasi**

### Chemical Forensics

#### Chemical Attribution Signatures of Illicit Drugs & Toxic Chemicals

*Sponsored by ANYL, Cosponsored by CHAL and PRES*

## CHAL

### Division of Chemistry and the Law

**K. Bianco and J. Kennedy, Program Chairs**

#### SOCIAL EVENTS:

**Luncheon, 12:00 PM:** Mon

**Reception, 6:00 PM:** Mon

#### BUSINESS MEETINGS:

**Business Meeting, 5:00 PM:** Sun

## SUNDAY AFTERNOON

### Section A

Park Central San Francisco  
Stanford

#### Strengthening Your Patent Rights in Light of Recent Federal Circuit Court Decisions

**A. H. Berks, Organizer**

**X. Pillai, Organizer, Presiding**

**A. Berks, Presiding**

**1:00 CHAL 1.** Review of recent Federal Circuit decisions relevant to what scientists need to know about patent filing and prosecution. **X. Pillai, A. Berks**

## MONDAY EVENING

## Section A

Moscone Center  
Hall D

## Sci-Mix

K. E. Bianco, J. L. Kennedy, *Organizers*

8:00 - 10:00

CHAL **12.** Chocolate: Food of the gods. H.M. Peters, S.B. Peters

CHAL **13.** National Inventors Hall of Fame 2017. H.M. Peters, S.B. Peters

## TUESDAY MORNING

## Section A

Park Central San Francisco  
Stanford

### An International Perspective: Patent Eligible Subject Matter & Opposition Procedures

K. E. Bianco, *Organizer*

J. Gledhill, *Organizer, Presiding*

9:00 CHAL **14.** Patent opposition and invalidation procedures: What is the same and what differs in Australia, Europe, the United States, and China? K.E. Bianco, L. Wall, J. Gledhill, S. Zou

10:00 CHAL **15.** Hot topics in international patent law: What is allowable patent eligible subject matter? K.E. Bianco, J. Gledhill, L. Wall, S. Zou

11:00 CHAL **16.** Silicon Valley Regional Office of the U.S. Patent and Trademark Office. J. Cabeca

## Chemical Forensics

### Chemometrics & Statistics for Signature Discovery & Exploitation

*Sponsored by ANYL, Cosponsored by CHAL and PRES*

## TUESDAY AFTERNOON

## Section A

Park Central San Francisco  
Stanford

### Recent Developments in TSCA Regulation: New Requirements for Chemicals in Commerce

*Cosponsored by CHAS, ENVR and I&EC*

I. Hantman, *Organizer, Presiding*

2:30 CHAL **17.** Recent developments in TSCA regulation: New requirements for chemicals in commerce. I. Hantman, D.K. Liu, K. Matthews, M. Doa

## Section B

Park Central San Francisco  
Stanford

### Protecting & Capitalizing on Your Intellectual Property

J. L. Kennedy, *Organizer, Presiding*

12:00 CHAL **18.** Chemical patents: How to navigate the changing legal landscape to protect your chemical technology. J.L. Kennedy

12:30 CHAL **19.** Creating an intellectual property strategy and portfolio. J.L. Kennedy, J. Link

1:00 CHAL **20.** Licensing: Capitalizing on patents, trade secrets, and other intellectual property. J. Link

## Chemical Forensics

### Isotopic & Elemental Profiling for the Source Attribution of Materials

*Sponsored by ANYL, Cosponsored by CHAL and PRES*

## WEDNESDAY MORNING

## Section A

Park Central San Francisco  
Stanford

### Cannabis Law: Navigating Complex Regulatory & Legal Issues in States with Legal Cannabis Programs

J. Marcu, *Organizer, Presiding*

9:00 CHAL **21.** Clinical and analytical confirmation of new psychoactive substances. S. Vucinic

9:30 CHAL **22.** Navigating complex issues in states with legal cannabis programs. R. Mirkarimi

10:00 CHAL **23.** Using GxP management software in conjunction with quality assurance data to maintain regulatory compliance and support process improvement in the cannabis industry. J. Applen

10:30 CHAL **24.** Patient Focused Certification (PFC) – Quality standards of cannabis products for medical use. J. Marcu, S. Sherer, P. Kubu

11:00 CHAL **25.** Intellectual property issues (and solutions) for cannabis companies. R. Micheletti

## WEDNESDAY AFTERNOON

## Section A

Park Central San Francisco  
Stanford

### A Decade of U.S. Supreme Court Patent Jurisprudence

R. G. Bone, *Organizer, Presiding*

2:45 CHAL **26.** Survey of a decade of U.S. Supreme Court patent cases. R.G. Bone

3:15 CHAL **27.** Highlights of the last decade of Supreme Court patent jurisprudence. R.G. Bone

## Section B

Park Central San Francisco  
Stanford

### The Many Faces of CHAL: Where Chemistry Meets the Law

J. L. Kennedy, *Organizer*

K. E. Bianco, *Organizer, Presiding*

1:00 CHAL **28.** What is substantially similar? Interpreting federal law governing unscheduled drug-like chemicals that are substantially similar to listed controlled substances. G.B. Dudley

1:30 CHAL **29.** Impact of national printing inks ordinance on food packaging materials and packaged foods: New national rules during the time at harmonization of the EU rules. K. Salmen

2:00 CHAL **30.** Pharmaceutical products and compendial standards. S. Ramakrishna, L.M. Santos, R.A. Femia

## COLL

## Division of Colloid and Surface Chemistry

R. Nagarajan, *Program Chair*

## OTHER SYMPOSIA OF INTEREST:

ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend (see CATL, Sun, Mon)

Chemical Principles of Environmental, Cellular & Organismal Nanotoxicology (see ENVR, Wed)

Deposition & Etching of Nanostructures (see INOR, Wed)

Janus Particles: Synthesis, Characterization & Applications (see PMSE, Sun, Mon)

Molecular Engineering of Peptide Assembly (see PMSE, Mon, Tue, Wed)

Plasmonic Nanomaterials: From Physical Chemistry Fundamentals to Societal Impacts (see PHYSS, Wed, Thu)

## SOCIAL EVENTS:

Social Hour with Poster Session, 6:00 PM: Sun

Luncheon, 12:00 PM: Tue

## BUSINESS MEETINGS:

COLL Program & Executive Committee Meeting, 4:00 PM: Sat

Business Meeting, 5:30 PM: Sun

## SUNDAY MORNING

## Section A

Moscone Center  
2002

### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, S. Muralidharan, M. Nieh, A. N. Parikh, N. Srividya, *Organizers*

K. Morigaki, D. Y. Sasaki, *Presiding*

8:30 COLL **1.** Rationally designed peptoids insert into edge and face of bicelle structure. H. Najafi, S.L. Servoss

8:50 COLL **2.** Transport across droplet interface lipid bilayers via a pH gradient. S. Dixit, B. Guo, B. Tasseff, G.W. Faris

9:15 COLL **3.** Second harmonic generation studies of water-soluble peptoids adsorbed to phospholipid membranes. G.Y. Stokes, A.A. Fuller, A. Calkins, J. Rangel, M.R. Landry

9:40 COLL **4.** Lipid structure, lateral order and inter-membrane forces. U. Raviv, L. Fink

10:05 COLL **5.** Probing model membrane local dynamics. T. Gutberlet, M. Trapp, J. Peters, D. Posselt

10:30 COLL **6.** Tubulin on biomimetic mitochondrial membranes: Structural features and identification of lipid binding domain. D.P. Hoogerheide, S. Noskov, D. Jacobs, H. Nanda, T.K. Rostovtseva, S.M. Bezrukov

10:55 COLL **7.** Cell-free expression of biologically active integral membrane protein. A. Vaish, C. Chen, S. Guo

11:20 COLL **8.** Determining the mRNA nanoparticle structure using SANS and SAXS. Y. Xia, C.J. Bowerman, J. Chan, C. Clemente, A. Esposito, E. Miracco, B. Kangarlou, M. Nieh, E. Cheung, O. Almarsson

## Section B

Moscone Center  
2004

### Colloidal Nanoparticle Synthesis & Assembly

#### Nanoparticle Synthesis

H. Htoon, Y. Sun, S. Wu, *Organizers*

H. Fan, *Organizer, Presiding*

H. Zhang, *Presiding*

8:30 COLL **9.** How is the metal precursor reduced during a synthesis of colloidal nanocrystals? Y. Xia

9:00 COLL **10.** Crystal phase-controlled synthesis of novel noble metal nanomaterials. H. Zhang

9:30 COLL **11.** Synthesis of branched and polyhedral Pd-Cu nanostructures by seed-mediated co-reduction. M. Kunz, S.E. Skrabalak

9:50 COLL **12.** Solvent effect on ligand-metal interactions in Pd nanoparticle synthesis. W. Li, S. Ivanov, S. Mozaffari, A.M. Karim

10:10 COLL **13.** Colloidal synthesis of anisotropic noble metal nanostructures. Q. Zhang

10:30 COLL **14.** Salt-triggered deposition of polymer-coated noble metal nanoparticles on solid surfaces. B. De Geest

10:50 COLL **15.** Exotic syntheses of supported metal nanoparticles via metal-in-Li solutions. T. Xu

11:10 COLL **16.** Seeded growth of catalytically active copper-based nanostructures. J. Chen

11:40 COLL **17.** Designer noble metal nanostructures: Controlled synthesis and beyond. Y. Yin

## Section C

Moscone Center  
2006

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

#### Surface Science is Alive & Well

*Cosponsored by CATL*

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

8:30 COLL **18.** Surface science meets homogeneous catalysis: Cooperative properties of electrophilic organometallic ensembles. T.J. Marks

9:00 COLL **19.** First-principles, microkinetic modeling, and experiments for reaction mechanisms and improved catalysts. M. Mavrikakis

**9:30 COLL 20.** Sum frequency generation microscopy of surfaces. S. Baldelli

**10:00 COLL 21.** Surface spectroscopy and surface microscopy of catalytic processes: From model to technological materials, from UHV to *operando* conditions. G. Rupprechter, C. Rameshan, K. Foelttinger, Y. Suchorski

**10:30 COLL 22.** Vinyl acetate formation pathways and selectivity on model metal and alloy catalyst surfaces. W.T. Tysoe

**11:00 COLL 23.** Surface science for the 21<sup>st</sup> century. M. Salmeron

## Section D

Mosccone Center  
2008

### Chemistry & Physics of Tribology

#### Tribology Perspectives & Tribochemistry

F. Mangolini, M. Ruths, *Organizers, Presiding*

**8:30 COLL 24.** Lowering friction while saving the world: New approaches to lubrication. N.D. Spencer

**9:05 COLL 25.** Thermal and shear effects in boundary film formation. W.T. Tysoe

**9:40 COLL 26.** Measuring atomic wear of graphene using local stress and heat. S. Raghuraman, M.B. Elinski, J.D. Batteas, J. Felts

**10:00 COLL 27.** Tribochemistry of GaN, a surprisingly wear resistant semiconductor. G. Zeng, X. Yang, B.E. Koel, D. Borovac, C. Tan, N. Tansu, B. Krick

**10:20 COLL 28.** Optimization of a ReaxFF reactive force field for modeling tribochemical reactions of Cu-S and Cu-thiol/alkoxy systems. J. Yeon, W.T. Tysoe, A. Martini

**10:40 COLL 29.** Tribochemical aspects of mechanical mixing in tribological contacts. M. Dienwiebel, P. Stoyanov, P. Romero, R. Merz, P. Stemmer, M. Moseler

**11:00 COLL 30.** Effect of hydrogen and oxygen partial pressure on the tribochemistry of silicon oxide-containing hydrogenated amorphous carbon. F. Mangolini, K. Koshigan, M.H. Van Benthem, J. Ohlhausen, J.B. McClimon, J. Hilbert, J. Fontaine, R. Carpick

**11:20 COLL 31.** Wear mechanisms and regime transitions for self-mated silicon nitride lubricated by ionic liquid/water mixtures. A. Arcifa, A. Rossi, N.D. Spencer

**11:40 COLL 32.** Mechanochemistry at sliding interfaces – Tribo-polymerization of adsorbed molecules upon mechanical shear. S.H. Kim

## Section E

Mosccone Center  
2010

### Coacervation: Physics, Chemistry & Biology

R. Stewart, *Organizer*

P.L. Dubin, *Organizer, Presiding*

**8:30 COLL 33.** RNA-based complex coacervates. C.D. Keating

**9:10 COLL 34.** Spanning length scales in polymeric complex coacervate self-assembly. T.K. Lytle, J. Madinya, C.E. Sing

**9:40 COLL 35.** Sequence-encoded phase behavior of intrinsically disordered proteins. R.V. Pappu

**10:10 COLL 36.** Asymmetric segregation of P-granules by position dependent phase separation. F. Julicher

**10:40 COLL 37.** Intra- and intermolecular electrostatic complexes of cationic antimicrobial peptides with their anionic propeptides. N. Gomes de Oliveira Júnior, O. Franco, R. de Vries

**11:10 COLL 38.** Intrinsic disorder and overcrowding. V.N. Uversky

## Section F

Mosccone Center  
2012

### Applied Biosensing Based on Functional Colloids

R. Alvarez Puebla, L. Liz Marzan, J. Sagalés, G. F. Strouse, *Organizers*

W. Parak, *Organizer, Presiding*

**8:30 COLL 39.** Composite porous colloids for SERS-based biosensing. L. Liz Marzan

**9:00 COLL 40.** Functionalizing various metallic nanostructures with highly effective multi-coordinating polymers. W. Wang, A.K. Kapur, X. Ji, H.M. Mattoussi

**9:30 COLL 41.** Towards SERS-enabled diagnostics: Quantitative detection of glucose and other biomarkers. A. Henry

**9:50 COLL 42.** *In-situ* SERS detection at picoliter scale using substrate-less Ag nanoparticle-based liquid marbles. X. Ling

**10:20 COLL 43.** Low frequency vibrational mode surface enhanced Raman spectroscopy characterization of gold interactions with aqueous halides. M. Chan, W. Leng, P.J. Vikesland

**10:40 COLL 44.** High throughput optofluidic Surface-Enhanced Raman Spectroscopy (SERS) interrogation: Proof of concept via lectin detection of cancerous cells. M. Willner, K. McMillan, M. Zagnoni, D. Graham, P.J. Vikesland

## Section G

Mosccone Center  
2001

### Interfacial Phenomena & the Oil-Water Interface

*Financially supported by The Dow Chemical Company*

C. Acevedo, C. J. Tucker, *Organizers*

C. E. Mohler, *Organizer, Presiding*

**8:30 COLL 45.** Nanoengineering water-in-diesel/biodiesel microemulsion interfaces to minimize particulate and NOx emissions from diesel engines to minimize atmospheric pollution. P.A. Sermon

**8:50 COLL 46.** *Ulloborus walckenaerius* bioinspired attachable, self-standing, nanofibrous membrane for versatile use in oil-water separation. M. Tenjimbayashi, K. Sasaki, J. Abe, S. Shiratori

**9:10 COLL 47.** Interfacial interactions of granular particles with floating crude oil under different granular flow regimes. D. Boglaenko, B. Tansel

**9:30 COLL 48.** Fabricating reservoir micromodels by *in situ* grown calcium carbonate nanocrystals in microfluidic channels. W. Wang, S. Chang

**9:50 COLL 49.** Effects of confinement and composition on oil/water interface in nanopore environment. A. Alizadehmojarad, L. Vukovic

**10:10 COLL 50.** Impact of microemulsions on mobilization, emulsification, and solubilization of oil in heterogeneous rocks. T. Qin, L. Goual

**10:30 COLL 51.** Nanoengineering at the oil-water interface to maximize hydrocarbon production. P.A. Sermon, G. Georgiades

**10:50 COLL 52.** pH-responsive polymer coated nanoparticles for controlled emulsification of heavy oil. L. Qi, C. Song, G.J. Hirasaki, R. Verduzco

**11:10 COLL 53.** Surfactant Enhanced Oil Recovery (EOR): Role of reservoir wettability and oil-water interfacial tension in designing efficient surfactant systems. C. Acevedo, W. Yu, P.D. Patil

**11:30 COLL 54.** Formulation and utility of microemulsions in cleaning applications. C.J. Tucker, M.H. Keefe, K. Harris

## Section H

Mosccone Center  
2003

### Nanoscale Chemical Patterning & Characterization

S. A. Claridge, *Organizer*

W. Liao, *Organizer, Presiding*

**8:30 COLL 55.** Biodegradable and biocompatible regular nanopatterned surfaces for selective cell enrichment. G. Sicilia, A. Grabowska, I. Notingher, M. Alexander, M. Marlow

**8:50 COLL 56.** Tailoring 5–10 nm chemically orthogonal surface patterns on layered materials using sitting phases of polymerizable amphiphiles. J. Bang, K.K. Rupp, S.R. Russell, S.W. Choong, T.C. Davis, T. Hayes, A.G. Porter, J.T. Brooks, S.A. Claridge

**9:10 COLL 57.** Artificial membranes composed of fluid and polymerizable lipids: Fractional polymerization produces nanoscale domains with retained fluidity and enhanced stability. S.S. Saavedra

**9:40 COLL 58.** Chemical lift-off lithography and sensors. W. Liao

**10:10 COLL 59.** Patterning arrays of geometrically complex nanostructures on planar surfaces. P.S. Cremer, Z. Zhao, Y. Cai

**10:40 COLL 60.** Self-assembly of proteins into periodic nanostructures through spatially-confined nanofluids. J. Li

**11:10 COLL 61.** Modified soft lithographic approach for Surface-Enhanced Infrared Spectroscopy (SEIRA) substrates and their application to live cell monitoring. V. Colvin, N. Taheri, A. Bohoul

**11:40 COLL 62.** Characterizing and manipulating mercaptoalkanoic acid molecular ruler multilayers using scanning probe lithography. J.E. Neuman, A.M. Patron, C.P. Causey, T.J. Mullen

## Section I

Mosccone Center  
2005

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Colloids

R. Nagarajan, *Organizer*

U. Scheler, *Presiding*

**8:30 COLL 63.** Counterion-specific counterion condensation. U. Scheler

**9:00 COLL 64.** Carbonate rock wettability investigated with finer spatial resolution. O.B. Wani, C. Lai, M. Almahri, M. Chiesa, S. Al Hassan

**9:20 COLL 65.** Light scattered by hedgehog particles. J. Bahng, D. Montjoy, W. Chang, S. Link, N. Kotov

**9:40 COLL 66.** Cross-linked cationic diblock copolymer worms are superflocculants for micrometer-sized silica particles. N. Penfold, Y. Ning, P. Verstraete, J. Smets, S.P. Armes

**10:00 COLL 67.** Spray coating of colloidal and organic layers. W. Ohm, P. Zhang, S. Yu, A. Plech, D. Soderberg, S. Roth

**10:20 COLL 68.** Elucidating the reactivity and solution dynamics of redox active polymers and colloids. M. Burgess, E. Montoto, K. Hernandez-Burgos, J. Schuh, T. Wei, N. Gavvalapalli, J. Moore, J. Lewis, R. Ewoldt, J. Rodriguez Lopez

**10:40 COLL 69.** Particle zeta potentials remain finite in saturated salt solutions. A. Garg, C. Cartier, K.J. Bishop, D. Velegol

**11:20 COLL 70.** Issue of interchangeable use of reactivity assessment assays for nanoparticle colloids in liquid solution. X. Bi, P.K. Westerhoff

**11:40 COLL 71.** Propagation and separation of charged colloids by cylindrical gel electrophoresis. D.A. Bikos, T.G. Mason

**12:00 COLL 72.** Morphology and properties of fibers obtained by emulsion electrospinning. A. Samanta

## Section J

Mosccone Center  
2007

### Deposition & Etching of Nanostructures

*Cosponsored by INOR*

L. McElwee-White, A. V. Walker, *Organizers*

H. Fairbrother, *Organizer, Presiding*

#### 8:30 Introductory Remarks.

**8:35 COLL 73.** New strategies for selective deposition of nanoscale materials. F. Minaye Hashemi, D. Bobb-Semple, S.F. Bent

**9:05 COLL 74.** Using surface chemistry to direct the morphology of thin films and nanoobjects of energy materials. A.V. Walker

**9:35 COLL 75.** Laser-assisted focused electron beam induced synthesis: Photothermal enhancements to athermal electron beam induced reactions. P.D. Rack

#### 10:05 Intermission.

**10:20 COLL 76.** Time is of the essence: Using a fourth dimension to improve chemical vapor deposition. H. Pedersen

‡ Cooperative Cosponsorship

**10:50 COLL 77.** Real-time XPS monitoring of atomic layer deposition of  $\text{HfO}_2$  on Si surfaces. P. Shayesteh, J. Gallet, F. Bournel, J. Schnadt

**11:10 COLL 78.** Directed deposition and etching of functional nanostructures using electron beam and plasma irradiation. C.J. Lobo

### Mineral-Water Interface Chemistry

#### A Tribute to Glenn Waychunas

Sponsored by GEOC, Cosponsored by COLL and ENVR

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis, & Spectroscopy

Sponsored by PROFI, Cosponsored by ANYL<sup>+</sup>, BIOL<sup>+</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>+</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>+</sup>, POLY, PRES<sup>+</sup> and WCC

#### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

#### Honoring the Contribution to Single Crystal Catalysis

Sponsored by CATL, Cosponsored by COLL and WCC

#### Separation of Macromolecules & Particulates

Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE

#### Janus Particles: Synthesis, Characterization & Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG<sup>+</sup>

#### Synthesis of Catalysts by Non-Traditional Methods

#### Nanoparticle Catalysts

Sponsored by CATL, Cosponsored by COLL and INOR

#### Elucidation of Mechanisms & Kinetics on Surfaces

#### Theory

Sponsored by CATL, Cosponsored by COLL and ENVR

## SUNDAY AFTERNOON

### Section A

Moscone Center  
2002

#### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, S. Muralidharan, M. Nieh, A. N. Parikh, N. Srividyaa, *Organizers*

M. L. Longo, A. B. Subramaniam, *Presiding*

**2:00 COLL 79.** Lipid non-lamellar phases at the solid/liquid interface - structure and dynamics. T. Nylander, O. Soltwedel, M. Kaneva, C. Hirst, J. Holdaway, M. Yanez Arteta, M. Wadsater, J. Barauskas, H. Frielinghaus, O. Holderer

**2:25 COLL 80.** Stimulus-responsive behavior of giant vesicles consisting of amphiphilic diblock copolymers. E. Yoshida

**2:50 COLL 81.** Selective blood vessel deletion using liposomes: Studying the effect of liposome composition on *in vivo* behavior. A. Kros

**3:15 COLL 82.** Physical clotting of blood cells using associating biopolymers as the connective glue: An investigation into the mechanism using optical microscopy. S.R. Raghavan

**3:40 COLL 83.** Elastic and viscous properties of lipid bilayers: Application of neutron spin echo spectroscopy. M. Nagao, E.G. Kelley, R. Ashkar, R. Bradbury, P. Butler

**4:05 COLL 84.** Kinetic pathways of self-assembled systems by time-resolved small-angle scattering techniques. R. Lund

**4:30 COLL 85.** Neutron and X-ray scattering approaches for interdisciplinary structural biology. T. Forsyth

**4:55 COLL 86.** Opening the SANS toolbox for studying mRNA nanoparticle structure. C.J. Bowerman, Y. Xia, J. Chan, C. Clemente, A. Esposito, E. Miracco, B. Kangarou, M. Nieh, E. Cheung, O. Almarsson

### Section B

Moscone Center  
2004

#### Colloidal Nanoparticle Synthesis & Assembly

Y. Sun, S. Wu, *Organizers*

H. Fan, H. Htoon, *Organizers, Presiding*

**2:00 COLL 87.** Silicon nanocrystal assemblies. B.A. Korgel

**2:30 COLL 88.** Induction and microwave heating in syntheses of CdSe quantum dots: Effects of extreme high heating rate on their nucleation and growth kinetics. H. Luo, B.A. Kebede, E.J. McLaurin, V. Chikan

**2:50 COLL 89.** Enhanced emission of nanocrystal solids featuring slowly diffusive excitons. N.N. Kholmicheva, M. Zamkov

**3:10 COLL 90.** Detecting material state change in surface coated tensile samples using ultrasoft CdSe quantum dots. T. Frecker, C. Brubaker, I. Njoroge, G. Jennings, D. Adams, S.J. Rosenthal

**3:30 COLL 91.** Ligand-induced freeze of gold nanostars and their SERS activities. X. Meng, C. Jiang

**3:50 COLL 92.** Chiral inorganic nanostructures. N. Kotov

**4:20 COLL 93.** Organic nanophotonic materials and devices. Y. Zhao

**4:50 COLL 94.** Study of Au nanoparticles self-assembly by in-situ transmission electron microscopy. Y. Liu, Y. Sun, X. Lin, T. Rajh

**5:20 COLL 95.** Synthesis and assembly of plasmonic metal oxide nanocrystals. D.J. Milliron

### Section C

Moscone Center  
2006

#### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

#### Catalyst Design

Cosponsored by CATL

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**2:00 COLL 96.** Dynamic evolution of catalytic surfaces. C.M. Friend

**2:30 COLL 97.** Metal nanoparticle catalysts based on classically immiscible and metastable alloys. S.M. Humphrey, G. Henkelman, P. Kunal, H. Li, H. Guo, G.W. Piburn

**3:00 COLL 98.** Catalysis on singly dispersed bimetallic sites. F. Tao

**3:30 COLL 99.** Ordered bimetallic catalysts for selective hydrogenation and dehydrogenation reactions. W. Huang

**4:00 COLL 100.** Ideal catalysts beyond single crystals: MOFs with metal oxide-like nodes. D. Yang, V. Bernales, C.J. Cramer, O.K. Farha, J.T. Hupp, L. Gagliardi, B.C. Gates

**4:30 COLL 101.** Catalyst synthesis by atomic layer deposition. P.C. Stair

**5:00 COLL 102.** New nanostructures for increased selectivity and stability in catalysis. F. Zaera

### Section D

Moscone Center  
2008

#### Chemistry & Physics of Tribology

#### Theoretical & Computational Advances in Tribology

F. Mangolini, *Organizer*

M. Ruths, *Organizer, Presiding*

C. M. Mate, *Presiding*

**2:00 COLL 103.** Scale dependence of friction and contact of nanometer to millimeter radius tips. T.A. Sharp, J. Monti, L. Pastewka, M.O. Robbins

**2:35 COLL 104.** Limits of Lifshitz theory. O. Siles-Brugge, C. Hunter, G.J. Leggett, N.H. Williams

**2:55 COLL 105.** Effect of load on current across gold-graphite nanocontacts. A. Martini, X. Hu, V. Zade, H. Kang, M. Lee

**3:30 COLL 106.** Examination of DLC adhesion and wear using MD and in-situ nanoindentation. J.D. Schall, R. Bernal, P. Chen, P. Tsai, Y. Jeng, R. Carpick, J.A. Harrison

**3:50 COLL 107.** Nonequilibrium molecular dynamics simulations of organic friction modifiers. J. Ewen, C. Gattinoni, H. Spikes, N. Morgan, D. Dini

**4:10 COLL 108.** Molecular dynamics simulations of multiply alkylated cyclopentane-based lubricant oils. V. Oklejas, P.P. Frantz, S.V. Didziulis

**4:30 COLL 109.** Dynamics and thermodynamics of lubricants in flow: A molecular and tribological approach. Y. Guo, L. di Mare, J. Wong

**4:50 COLL 110.** Withdrawn.

### Section E

Moscone Center  
2010

#### Coacervation: Physics, Chemistry & Biology

P. L. Dubin, R. Stewart, *Organizers*

Y. Wang, *Presiding*

**2:00 COLL 111.** Entropy the assembler (of polyelectrolytes). J.B. Schlenoff

**2:30 COLL 112.** Simple coacervation of polyguanidiniums and organic polyphosphates. R. Stewart, J.P. Jones, G.M. Weerasakare, I. Song

**3:00 COLL 113.** Exploring the coacervation/precipitation interface. P.L. Dubin, F. Cornet, A.J. Malanowski

**3:30 COLL 114.** Material dynamics in complex coacervates. S.L. Perry

**4:00 COLL 115.** Complex coacervation as a dynamic reservoir of intrinsically disordered proteins. S. Han

**4:30 COLL 116.** Coacervates from biopolymers for cartilage tissue regeneration. Ö. Karabiyik Acar, A. Kayitmazer, G. Kose

### Section F

Moscone Center  
2012

#### Applied Biosensing Based on Functional Colloids

R. Alvarez Puebla, L. Liz Marzan, W. Parak, J. Sagalés, *Organizers*

G. F. Strouse, *Organizer, Presiding*

**2:00 COLL 117.** Plasmonic supercrystals for SERS detection. R. Alvarez Puebla

**2:30 COLL 118.** Nanoparticles and stem cells, a powerful combination? W. Parak

**2:50 COLL 119.** Control of primary particle spacing in gold nanoparticle clusters for both high NIR extinction and full reversibility. E. Moaseri, B. Changalvaie, T. Truskett, K.P. Johnston

**3:10 COLL 120.** Modeling of degradation of virus and amyloid fibril by pre-designed nanoparticles. S. Sen, P. Kral

**3:30 COLL 121.** Spectroscopic quantification of surface groups on micro- and nanoparticles with conventional and cleavable reporter. T. Behnke, M. Moser, N. Nirmalananthan, U. Resch-Genger

**4:00 COLL 122.** *In vivo* biomolecule corona onto clinically-used blood-circulating liposomes. M. Hadjidemetriou, K. Kostarelos

### Section G

Moscone Center  
2001

#### Interfacial Phenomena & the Oil-Water Interface

Financially supported by The Dow Chemical Company

C. Acevedo, C. E. Mohler, C. J. Tucker, *Organizers, Presiding*

**2:00 COLL 123.** Continuous fabrication of hierarchical and asymmetric bijel structures via Solvent Transfer-Induced Phase Separation (STRIPS). K.J. Stebe

**2:30 COLL 124.** Molecular structure and bonding at nanoemulsion and planar oil/water interfaces. G.L. Richmond

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

- 3:00 COLL 125.** Molecular structures of polymer surfaces in different chemical environments. **Z. Chen**
- 3:30 COLL 126.** Molecular studies of the assembly of co-surfactants at the oil-water interface. **R. Ciszewski, B. Muller, G. Richmond**
- 3:50 COLL 127.** Mass transfer of lipid-based amphiphiles to water-triglyceride interfaces. **T. Xu, S.R. Dungan**
- 4:10 COLL 128.** Investigating mass transfer and microstructures formation at liquid/liquid interfaces using FT-IR imaging spectroscopy. **R. Toor, M. Schmitt, R. Denoyel, M. Antoni**
- 4:30 COLL 129.** Specific anion effects on caffeine partitioning between aqueous and cyclohexane phases. **Y. Zhang, B.A. Rogers, N.O. Johnson, T.P. Light, T.S. Thompson, G. MacDonald**
- 4:50 COLL 130.** Protein mixture segregation at coffee ring: Real-time imaging of protein ring precipitation by mid-FTIR spectromicroscopy. **S. Choi, G. Birarda**
- 5:10 COLL 131.** Surface and interfacial exploration of a smooth liquids repellent sol-gel coating. **C. Urata, A. Hozumi**

## Section H

Moscone Center  
2003

### Nanoscale Chemical Patterning & Characterization

S. A. Claridge, *Organizer*

W. Liao, *Organizer, Presiding*

- 2:00 COLL 132.** Self-assembly in confined spaces: Using defects to advantage. **N. Nakatsuka, H. Cao, W. Liao, A. Vaish, T.J. Mullen, P.S. Weiss, A.M. Andrews**
- 2:30 COLL 133.** Controlling biomolecular structure and function at the bio/abio interface. **L.J. Webb**
- 3:00 COLL 134.** Probing nano-environments with high-throughput single-molecule tracking. **D.K. Schwartz**
- 3:30 COLL 135.** Stable by design: Understanding the role of monomer architecture in stabilizing noncovalent monolayers toward thermal and solvent processing of layered materials. **S.R. Russell, T. Villarreal, S.A. Claridge**
- 3:50 COLL 136.** Optically directed assembly of colloidal particles. **Y. Zheng**
- 4:20 COLL 137.** Laser directed crystallization and patterning of methylammonium lead halide perovskites from solution. **S. Chou, B. Swartzentruber, M.T. Janish, K.C. Meyer, L. Biedermann, S. Okur, B. Burckel, C.B. Carter, B. Kaehr**
- 4:40 COLL 138.** Tarnishing silver into semiconducting hybrid chalcogenides. **J. Hohman**
- 5:10 COLL 139.** Bottom-up preparation of ordered Rh(I) diisocyanide coordination polymers on gold surfaces and their conductivity and electrochemical stability. **G. Lee, C.P. Kubiak**

## Section I

Moscone Center  
2005

### Nanostructure Engineering & Surface Chemistry for Spectroscopy, Imaging & Alternative Energy Harvesting & Conversion

Financially supported by MilliporeSigma-Energy Materials; CH Instruments, Inc.; The University of Alabama (Chemistry, College of Arts & Science)

N. Hammer, S. Pan, *Organizers*

C. M. Hill, *Presiding*

- 2:00 COLL 140.** Investigation of charge-transfer complexes between TCNQ and indium phosphide quantum dots. **L. Beck, E.J. McLaurin**
- 2:20 COLL 141.** Anchoring group affects triplet energy transfer from semiconductor nanocrystals to molecules. **Z. Huang, X. Li, P. Xia, M.L. Tang**
- 2:40 COLL 142.** Long-range exciton transport in cesium lead halide perovskite nanocrystals organized in ordered nanoscale assemblies. **E. Penzo, A. Loujice, E. Barnard, N. Borys, A. Schwartzberg, R. Buonsanti, S. Cabrini, A. Weber-Bargioni**
- 3:00 COLL 143.** Stable n-type thermoelectric multilayer thin films with high power factor from carbonaceous nanofillers. **C. Cho, C. Yu, J.C. Grunlan**
- 3:20 COLL 144.** Rational design of Bi<sub>2</sub>Te<sub>3</sub>/graphene quantum dot hybrid nanosheet for enhanced thermoelectric performance. **S. Li, T. Fan, X. Liu, J. Luo, F. Liu, H. Meng, Y. Liu, F. Pan**

### 3:40 Intermission.

- 3:50 COLL 145.** Polarized optical spectroscopy of semiconducting polymers in an aligned mesoporous silica system for the study of polaron dynamics. **K. Winchell, M.E. Voss, B.J. Schwartz, S.H. Tolbert**
- 4:10 COLL 146.** Ultrasensitive probing of the local electronic structure of nitrogen doped carbon and its applications to 2D electronics, catalysis and bio-physics. **S. Lee, R.A. Mori, B.K. Alpert, M.L. Baker, J. Berry, H. Cho, E. Denison, W.B. Doriese, J.W. Fowler, K.J. Gaffney, B. Gao, J. Gard, G.C. Hilton, K.D. Irwin, Y.I. Joe, S. Kaya, C. Kenney, J. Knight, T. Kroll, D. Li, R. Marks, M. Minitti, K. Morgan, D. Nordlund, G. O'Neil, H. Ogasawara, P. Pianetta, C. Reintsema, T. Schiros, D. Schmidt, D. Sokaras, Y. Song, D.S. Swetz, C. Titus, J. Ullom, T. Weng, C. Williams, A. Wolcott, B.A. Young**
- 4:30 COLL 147.** Probing the local electronic structure of a porphyrin-based single-layer covalent organic framework using STS. **C. Chen, T. Joshi, H. Li, H. Li, A.D. Chavez, Z. Pedramrazi, J.E. Bredas, W.R. Dichtel, M. Crommie**
- 4:50 COLL 148.** Structure formation, phase behavior, and dynamics of liquid crystals confined to nanopores. **H. Duran, T. Yildirim, M. Steinhart, H. Butt, G. Floudas**
- 5:10 COLL 149.** NiS doped 3D MoS<sub>2</sub>/graphene nanostructured hybrids as high performance hydrodesulfurization catalysts. **S. Lonkar, V. Pillai, S. Al Hassan**
- 5:30 COLL 150.** Flexible impedance biosensor for folate receptor detection in cancer diagnostic. **J.J. Fuentes-Rivera, C.R. Cabrera, G. Hernandez**

## Section J

Moscone Center  
2007

### Deposition & Etching of Nanostructures

Cosponsored by INOR

H. Fairbrother, L. McElwee-White, *Organizers*

A. V. Walker, *Organizer, Presiding*

- 2:00 COLL 151.** Deposition of self-assembled monolayers on TiO<sub>2</sub> in air and solution: Implications for photoreactivity and CO<sub>2</sub> photoreduction. **M.A. Hines, E.S. Skibinski, W.J. DeBenedetti**
- 2:30 COLL 152.** Microplasma-based deposition of functional nanomaterials for energy storage applications. **K.E. Mackie, M.J. Gordon**
- 2:50 COLL 153.** Deposition of mixed metal nanostructures from bimetallic precursors using electrons: Insights from surface science. **H. Fairbrother, J.A. Spencer, I. Unlu, R. Kumar, R. Thorman, O. Ingolfsson, S. Barth, K. Johnson, L. McElwee-White**
- 3:20 Intermission.**
- 3:35 COLL 154.** Selectivity in liquid phase etching of III-V materials on the path to developing a gas phase self-limited etching method. **A.J. Muscat**
- 4:05 COLL 155.** Surface chemistry issues relevant to ALD processes. **F. Zaera**
- 4:25 COLL 156.** From fundamental electron-induced chemistry to novel unconventional FEBID precursor materials. **J. Warneke, M. Rohdenburg, G.E. Johnson, J. Laskin, P. Swiderik**

### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG<sup>†</sup>, ORGN and PROF

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL<sup>‡</sup>, BIOL<sup>‡</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC

### Mineral-Water Interface Chemistry A Tribute to Glenn Waychunas

Sponsored by GEOC, Cosponsored by COLL and ENVR

### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

### Honoring the Contribution to Single Crystal Catalysis

Sponsored by CATL, Cosponsored by COLL and WCC

### Janus Particles: Synthesis, Characterization & Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG<sup>†</sup>

### Separation of Macromolecules & Particulates

Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE

### Synthesis of Catalysts by Non-Traditional Methods

### Model Catalysts, Microporous Materials & Oxides

Sponsored by CATL, Cosponsored by COLL and INOR

### Elucidation of Mechanisms & Kinetics on Surfaces

Surface Science

Sponsored by CATL, Cosponsored by COLL and ENVR

## SUNDAY EVENING

### Section A

Moscone Center  
Halls B/C

### Fundamental Research in Colloids, Surfaces & Nanomaterials

R. Nagarajan, *Organizer*

6:00 - 8:00

- COLL 157.** Influence of biomimetic brush nanostructures on the tribology of natural fiber bio-interfaces. **C. Cazeneuve, J. Vazquez, N. Baghdadli, G.S. Luengo**
- COLL 158.** Coacervation and precipitation in polysaccharide-protein systems. **F. Comert, A.J. Malanowski, F. Azarikia, P.L. Dubin**
- COLL 159.** miRNA sensing plasma modified magnetic micromotor. **L. Oksuz, G. Yurdabak Karaca, F. Kuralay, U. Koc, E. Uygun, A. Uygun Oksuz**
- COLL 160.** Nanotransformation of vancomycin for overcoming Gram-negative bacteria intrinsic resistance. **J. Hoyo, K. Ivanova, M. Fernandes, A. Francesko, T. Tzanov**
- COLL 161.** Fabrication of vanadium oxide thin films from colloidal vanadium oxide (VO<sub>2</sub>) nanocrystals for smart window applications. **Y. Jung, S. Chung**
- COLL 162.** Organic-inorganic microcapsules via immobilizing biocomponent colloidal particles at oil-water interface. **Y. Wu, J. Shen**
- COLL 163.** Templated formation of fullerene stripes with tunable nanometer spacing onto physisorbed monolayers. **C. Fang, M. Zimmt**
- COLL 164.** Forming supported lipid multilayers by self-spreading. **T. Liu, C. Hu, B. Sani**
- COLL 165.** Manganese-engineered iron oxide nanoparticles as T<sub>1</sub>-T<sub>2</sub> dual-modal contrast agents. **C. Lu**
- COLL 166.** Water buffer action under nanoscale confinement studied by fluorescent pH indicator. **J. Fu, L. Zhang**
- COLL 167.** Quartz Crystal Microbalance with Dissipation (QCM-D) study of bacterial attachment process on surfaces of different hydrophilicity. **Y. Lee**
- COLL 168.** Synthesis of CeO<sub>2</sub> supported noble metal nanoparticles using mixed-valent Mn<sub>2</sub>O<sub>3</sub> phase via galvanic replacement reaction. **D. Lee, I. Lee**
- COLL 169.** Control of dynamic wetting behaviors on smooth surface for liquid manipulator and slippery surface with multi functionality. **M. Tenjimbayashi, R. Togasawa, M. Higashi, S. Shiratori**
- COLL 170.** Anisotropic emission-tuned polymer nanoparticles through a scalable direct approach. **J.D. Ruiz Perez, S. Mecking**

<sup>†</sup> Cooperative Cosponsorship

- COLL 171.** Biofunctionalized silica-nanopores: Synthesis and characterization by solid state CP-MAS-NMR. **M. Brodrecht**, H. Breitzke, B. Kumari, T. Gutmann, G. Buntkowsky
- COLL 172.** Investigation of a nanoscale surface area coverage by a self assembly of amyloidogenic peptides. **P.J. Shevlin**, K. Brown, M. Abdelmalik, A. Olatunbosun, K. Yokoyama
- COLL 173.** Investigation of reversible self-assembly of amyloidogenic peptides at nano-scale interface. **J. Battaglia**, **J. Ehret**, M. Endo, A. Islam, K. Yokoyama
- COLL 174.** Fabrication of antifreeze infused hydrophilic polymer/nanoparticle composite anti-icing coating for solar cells via spray layer by layer method. **T. Yamazaki**, T. Moriya, T. Matsubayashi, M. Komine, M. Tenjimbayashi, S. Shiratori
- COLL 175.** Shea butter infused with natural oils to generate a novel and natural antimicrobial moisturizer. **A. Tremblay**, K. Melkonian, J.J. Rizzo
- COLL 176.** Effect of silica size on superhydrophobic property of filter media for water oil/separation. **P. Seeharaj**
- COLL 177.** Withdrawn.
- COLL 178.** Fabrication of nanoporous carbon as electrodes for supercapacitors. **P. Suwannasarn**, S. Wongkasemjit, T. Chaisuwan
- COLL 179.** Silver nanoplate shape control: Use of halide ions to promote vertical growth. **Y. Park**, S. Park, M. Kim
- COLL 180.** Luminescent solar concentrators using ZnTe/CdSe/CdS core/shell quantum dots. **A. McDarby**, D. Khon, M. Zamkov
- COLL 181.** Infusion of native oils to synthesize novel antimicrobial surfaces. **K. Velez**, J.J. Rizzo
- COLL 182.** Tuning localized surface plasmon resonances in Sn-doped  $\text{In}_2\text{O}_3$  through radial distribution of dopant atoms and core/shell architectures. **B. Crockett**, A. Jansons, K.M. Koskela, J.E. Hutchison
- COLL 183.** Pilot-plant study of using protein to reduce the lipophilic contaminants in paper mills. **A.H. Tayeb**, O.J. Rojas, L. Pal, M. Hubbe
- COLL 184.** Unraveling the importance of controlled architecture in bimetallic multilayer electrode toward efficient electrocatalyst. **M. Gu**, B. Kim
- COLL 185.** Rational design and fabrication of  $\text{TiO}_2$  p-n homojunction for photoelectrochemical and photocatalytic water splitting. **L. Pan**, G. Shen, J. Zou, X. Zhang
- COLL 186.** Preparation of 2D porous  $\text{Co}_2\text{O}_4$  nanofoils via graphene mimicking. **T. Han**
- COLL 187.** Morphological control of colloidal aluminum nanocrystals. **D. Renard**, C.J. Desantis, B. Clark, M. McClain, N.J. Halas
- COLL 188.** Room-temperature formation of Cu-Ag bimetallic heterostructured nanocrystals via galvanic exchange. **W.T. Osowiecki**, X. Ye, A. Alivisatos
- COLL 189.** Effect of ZnS on structural and optical properties of  $\text{CuInS}_2$  quantum dots. **A. Nguyen**, C.D. Heyes
- COLL 190.** Combined ionic and hydrogen bonding in polymer multilayer thin film for high gas barrier and stretchiness. **C. Cho**, F. Xiang, J.C. Grunlan
- COLL 191.** Direct amination of HPHT ND surfaces for biodetection. **P. Tran**, E.S. Favre, A. Hernandez, D. Nordlund, A. Wolcott
- COLL 192.** Assessment of color strength and pigment stabilization using microencapsulation of anthraquinone dyestuffs with epoxy resin. **S. Liao**
- COLL 193.** Control of cesium lead halide perovskite nanocrystal morphology and photonic properties. **M.J. Jurow**, A. Pan, J. Kang, A. Buyanin, M.A. Koc, M. Salmeron, P. Alivisatos, L. Wang, Y. Liu
- COLL 194.** Use of a simple and general approach to modify the surfaces of monodisperse metal oxide nanocrystals with a wide variety of silane coupling agents. **A.W. Jansons**, K.M. Koskela, R. Maust, J.E. Hutchison
- COLL 195.** Nano-tribological properties of single monolayers and mixed monolayers of octadecylcarboxylic acid and octacosanoic acid. **R. Thomas**, L. Clark, T. Perry, E.S. Gawalt, **M. Lim**
- COLL 196.** Synthesis and characterization of novel hydrogel beads for selective interactions with carbonaceous nanomaterials. **K.C. Tvrđy**, J. Rowland, N. Sundquist
- COLL 197.** Exploration of the growth mechanism of  $\text{AgGaS}_2$  semiconductor nanoparticles. **S. Paderick**, S. Hughes
- COLL 198.** Tuning the optical properties of  $\text{AgGaS}_2$  nanocrystals. **S. Hughes**, S. Paderick, M. Kessler
- COLL 199.** Tunable whiteness coloration behavior on rutile  $\text{TiO}_2$  ceramic pigment. **Y. Kim**, R. Yu, J. Yun
- COLL 200.** Describing the mechanisms involved in Amot associated membrane binding and fusion. **S. Sears**, A.C. Kimble Hill
- COLL 201.** Ferrocene-modified PEI microgels. **N. Sahiner**, S. Demirci, M. Yildiz
- COLL 202.** Decrystallization of crystals using gold nano-bullets and the metal-assisted and microwave-accelerated decrystallization technique. **N. Thompson**, Z. Boone-Kukoyi, R. Shortt, C. Lansiquot, B. Kioko, E. Bonyi, K. Aslan
- COLL 203.** Tailoring the surface architecture of gold nanoparticles to engage nanoparticle-cell interactions. **K.L. Kinnison**, G.W. Marquart, M.R. Mackiewicz
- COLL 204.** Withdrawn.
- COLL 205.** Withdrawn.
- COLL 206.** Withdrawn.
- COLL 207.** Laponite bioactive nanocomposites for orthopedic applications. **J.T. Wilk**, M.E. Hagerman
- COLL 208.** Withdrawn.
- COLL 209.** Probing the catalytic properties of Ni-based bimetallic phosphides for deep hydrodesulfurization. **P.J. Topalian**, D. Lyanage, S. Brock, M.E. Bussell
- COLL 210.** Dabrafenib drug release system based on gold nanoparticle carriers for treatment of melanoma cancer. **L. Running**, R. Espinal, M.R. Hepel
- COLL 211.** Controlled release of lenvatinib from multi-functional nanoparticles monitored by surface-enhanced Raman scattering. **T. Santiago**, **T. Durgan**, M.R. Hepel
- COLL 212.** Growth of  $\text{SiO}_2$  shells on fluorescent nanodiamond cores for biodetection. **P.J. Sandoval**, A.A. Len, A. Arreola, D. Nordlund, P. Cigler, A. Wolcott
- COLL 213.** Room temperature monolayer ZnS growth on CdS and CdSe cores. **M. Augspurger**, N. Razzgoniaeva, M. Zamkov, D. Khon
- COLL 214.** Ligand influence on the branching of gold nanocages. **L.M. Bouchet**, J. Berqueiro, E.A. Glitscher, M. Calderon
- COLL 215.** Proposing a two-molecule multiplexed neuromorphic system: The first step towards a chemically based artificial brain. **N. Nakatsuka**, C. Zhao, J. Abendroth, H. Chen, K.M. Cheung, S. Dominik, **L. Scarabelli**, K. Yang, B. Zhu, H. Yang, Y. Yang, M. Stojanovic, P.S. Weiss, A.M. Andrews
- COLL 216.** Synthesis of  $\text{MoS}_2/\text{Fe}_3\text{O}_4$  nanocomposites with peroxidase-like activity for applications in  $\text{H}_2\text{O}_2$  and glucose detection. **V. Nandwana**, W. Huang, E.W. Roth, V.P. Dravid
- COLL 217.** Hydrothermal formation of various metal oxides using oxalic acid as a capping agent. **Z. Zander**, D. McCarthy, B.G. DeLacy
- COLL 218.** Production and characterization of activated carbon containing polyvinyl alcohol microcapsules. **Q.T. Truong**, **C.A. Zoto**, N. Orbey, A. Moinaro, J. Ogilvie Battersby
- COLL 219.** Single step dipping method of fabricating  $\text{Fe}_3\text{O}_4/\text{PVDF-HFP}$  composite porous material for magnetically controllable oil-water separation. **J. Li**, M. Tenjimbayashi, S. Shiratori
- COLL 220.** Synthesis and characterization of metallic nanoparticles using dendrimer-templating technology. **S. Merlus**, M.L. Curry, A. Ethridge
- COLL 221.** Synthesis and surface properties of poly(methyl methacrylate-butyl acrylate)/polythiourethane core-shell nanoparticles by new click reaction with soap-free emulsion polymerization. **J. Kook**, Y. Kim, K. Hwang, J. Kim, J. Lee
- COLL 222.** High density immobilization of oligonucleotides on semiconductor and gold nanoparticles within seconds. **A. Sedighi**, U.J. Krull
- COLL 223.** *In situ* synthesis of Ag nanocrystal-embedded metal-organic framework microneedles showing electrical bistability properties. **S. Park**, K. Park, S. Im, M. Kim
- COLL 224.** One-step synthesis of silver nanoplates with high aspect ratios: Using coordination of silver ions to enhance lateral growth. **Y. Park**, B. Lee, M. Kim
- COLL 225.** Sum-frequency vibrational spectroscopy of electrified water interfaces. **H. Wang**, W. Liu, Y. Shen
- COLL 226.** Withdrawn.
- COLL 227.** Systematic examination of bimetallic architecture in Pt-Pd nanocatalysts. **J. Legere**, S.E. Skrabalak
- COLL 228.** Reporting rotational dynamics of intracellular cargos with Janus particles. **Y. Gao**, S.M. Anthony, Y. Yi, Y. Yu
- COLL 229.** Smart colorimetric patches based on plasmonic nanoparticle-decorated thermoresponsive microgels. **A. Choe**, J. Yeom, M. Kim, H. Ko
- COLL 230.** Antibacterial layer-by-layer coating of nanoparticles. **K. Ivanova**, A. Ivanova, T.J. Heinze, T. Tzanov
- COLL 231.** Optical properties and controllable chiro-optical handedness of symmetric and asymmetric dimer nanocrystals. **P.F. Stevenson**, M. Swartz, C. Coplan, V.A. Tamma, V.A. Apkarian, J.S. Shumaker-Parry
- COLL 232.** Peelable temporary coatings by waterborne self-crosslinkable urethane dispersions. **S. Shin**, H. Oh
- COLL 233.** Identification of Gram-positive bacterial cell wall components responsible for interactions with cationic nanoparticles. **K. Johnson**, E. Caudill, J.A. Pedersen, C.L. Haynes, V. Feng
- COLL 234.** Impact of natural organic matter on the interaction of functionalized diamond nanoparticles with model bacterium *S. oneidensis* MR-1. **J. Kuether**, R. Tapia Hernandez, A.C. Mensch, J.A. Pedersen, R.J. Hamers, V. Feng
- COLL 235.** Adsorption and decomposition of a chemical warfare agent simulant on copper and molybdenum oxides. **L. Trotochaud**, A.R. Head, R. Tsyshkevsky, S. Pletincx, Y. Yu, O. Karstioglu, B.W. Eichhorn, M.M. Kuklja, H. Bluhm
- COLL 236.** Withdrawn.
- COLL 237.** Encapsulation of responsive liquids in coaxial nanofibers via electrospinning. **J. Lundin**, D. Ratchford, R. Ananth, R. Casalini, J.H. Wynne
- COLL 238.** Efficient photocatalytic activity of  $\text{SnO}_2$ -deposited ZnS nanoparticles. **J. Lee**, J.K. Kim, D. Jeong, **D. Jang**
- COLL 239.** Carbon nanomaterials for biomedical applications as antioxidants and drug delivery vehicles. **L.G. Nilewski**, W.K. Sikkema, E.L. Samuel, A.S. Jaillov, K. Mendoza, R. Zhang, R. Huq, C. Beeton, M. Sharpe, D. Baskin, T.A. Kent, J.M. Tour
- COLL 240.** Magnetically induced heat generation in magnetic nanoparticles for environmental remediation. **K.J. Coopersmith**, G. Larsen, S. Hunyadi Murph
- COLL 241.** Fabrication of Si nanopillar array for ultralow reflectivity. **F. Teng**, N. Li, L. Liu, D. Xu, N. Lyu
- COLL 242.** Nucleobase and nucleotide coordinated Au(I/III) nanoparticles for anticancer therapeutics. **Y. Huang**, W. Yeh
- COLL 243.** Identification of promising electrografting precursors for the modification of electrode surfaces. **S.E. Shaner**, S.N. Doden, M. Moin, F. Mujid, J.E. Newhouse
- COLL 244.** Synthesis and characterization of ceramic-coated  $\alpha$ -FeOOH yellow pigments. **Y. Kim**, R. Yu, J. Yun
- COLL 245.** Zwitterionic polymers for chronic wound management. **K. Ruseva**, K. Ivanova, E. Vasileva, **T. Tzanov**

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

- COLL 246.** Solvent free synthesis of nanostructured MoS<sub>2</sub>/S-TiO<sub>2</sub> photocatalysts for visible light driven water splitting and dye removal. V. Pillai, S. Lonkar, S. Al Hassan
- COLL 247.** Second harmonic generation studies of indomethacin adsorption to phospholipid membranes. A.D. Fearon, G.Y. Stokes
- COLL 248.** Targeted detection of mRNA biomarkers using graphene oxide and upconversion nanoparticles. A. Kanaras, P. Vilela, A. El-Sagheer, T. Brown, T. Millar, O. Muskens
- COLL 249.** Synthesis of large spherical and anisotropic gold nanoparticle dimers using a seeded-growth method. J. Midelet, A. Heuer-Jungemann, A. El-Sagheer, T. Brown, M. Werts, A. Kanaras
- COLL 250.** Aptamer-gold nanoparticle colorimetric assay evaluation of the role of DNA, small molecule targets, and gold nanoparticle interactions via NMR. J.E. Smith, B. Orzech, D. Russel, C. Medley
- COLL 251.** Modification of zinc oxide nanoparticles with perfluorophosphonic acids. D. Shoup, R. Quinones
- COLL 252.** Modification of nitinol nanoparticles with self-assembled alkylphosphonate films. S. Garretson, R. Quinones
- COLL 253.** Withdrawn.
- COLL 254.** Withdrawn.
- COLL 255.** Designing a model cell membrane to investigate the absorption of nanoparticles in our skin. B. Yoder, A. Sostarecz
- COLL 256.** pH-induced conformational switch in novel amide-based amphiphiles and their potential application in liposomes for targeted drug delivery. C. van Beek, M. Beltran-Sanchez, N.M. Samoshina, V.V. Samoshin
- COLL 257.** Two-dimensional nanoparticle array and cluster formation by supercritical fluid deposition. J. Wang, G. Brown, C.M. Wai, S. Apt
- COLL 258.** Epoxide chemistry on the Si(100)-(2x1) surface. J.L. McCracken, A.J. Pohlman, S.M. Casey
- COLL 259.** Targeted delivery of chemotherapeutic drugs and adjuvants using gold nanoparticle carriers. M. Palmer, A. Marotta, A. Ortiz, M.R. Hepel
- COLL 260.** Static light scattering studies of the aggregation process in the isotropic phase of chromonic surfactants in water. L.E. Stevenson, G.R. Van Hecke, K.K. Karukstis
- COLL 261.** Withdrawn.
- COLL 262.** Highly active cuprous oxide photocathode for the selective photoelectrochemical reduction of carbon dioxide. S. Alden, D.A. Rider
- COLL 263.** Stabilization and reaction of small molecules on TiO<sub>2</sub>/Au(111) inverse model catalysts. J. Wilke, D. Boyle, D. Schlosser, V.H. Lam, W. Andahazy, A.E. Baber
- COLL 264.** Phenothiazine cored poly(aryl ether) dendrons: Phase selective gelation, hydrophobization, oil spill recovery, antiwetting property and formation of fluorescent ink. N. Lakshmi
- COLL 265.** Synthesis of perfluoro-acrylate-silane co-polymer nanocapsules using emulsifier-free emulsion polymerization: Water-oil repellent and surface properties. Y. Kim, J. Kook, K. Hwang, J. Ahn, J. Lee
- COLL 266.** Synthesis of lanthanum doped titanate nanotube through a facile hydrothermal route. N. Wongsrisujarit, M. Hasan, K. Yeung
- COLL 267.** Performance enhancement of fluorescent dyes using nanoparticle encapsulation strategies for LED applications. X. Ning, J. Chittigori, Y. Li, G. Horner, R. Sharma, C. Ullal, L. Schadler
- COLL 268.** Synthesis of carboplatin like Pt<sup>2+</sup> complexes with azide and alkyne functionalities for nanomedical applications. M.T. Wlodarczyk, O. Camacho-Vanegas, S.A. Dragulska, A. Jarzecki, P.R. Dottino, J.A. Martignetti, A.J. Mieszawska
- COLL 269.** Field theory for ligand alignment on nanoparticles: Prospects for self-assembly driven by phase transitions. P. Satish, J. Haberstroh, P.L. Geissler
- COLL 270.** Delivery of biomolecules into solid-supported lipid bilayers using nanolipoprotein particles. A. Dang, M. Coleman, T. Kuhl
- COLL 271.** Polyelectrolyte multilayers for controlled FGF-2 release and improved cell attachment on cell culture surfaces. I. Ding, A.M. Peterson
- COLL 272.** Removal kinetics of 2-Chloroethylthyl Sulphide (CEES) by iron oxide nanoparticles. S. Kim, Y. Choe, K. Baek, Y. Lee
- COLL 273.** Assembly and disassembly of fluorescent graphene oxide for optical detection of enzymatic activity. J. Ju, S. Jeon, T. Kang, H. Kim, M. Kim, S. Lee, J. Kim
- COLL 274.** Modification of the surface of zinc oxide nanoparticles in order to increase efficiency of solar cells. G. Behnke, R. Quinones
- COLL 275.** Alkyl desorption from Si(100)-2x1 by nonadiabatic hydrogen elimination. A. Pohlman, D. Kaliakin, S.A. Varganov, S.M. Casey
- COLL 276.** Aqueous multiphase emulsion droplets as cellular mimics: Production and utilization. C. Crowe, P. Torre, R. Poudyal, P.C. Bevilacqua, S.S. Mansy, C.D. Keating
- COLL 277.** Novel DNA origami structure for Doxorubicin delivery. S. Palazzolo, V. Kumar, C. Russo Spena, M. Hadla, S. Bayda, G. Corona, V. Canzonieri, G. Toffoli, F. Rizzolo
- COLL 278.** Label-free detection and quantification of specific proteins in complex biological fluids through clogging in cellulose paper. J. Pazzi, M. Xu, W. Cheung, A.B. Subramaniam
- COLL 279.** Paper-based growth of liposomes and proteoliposomes using PAPYRUS in ionic buffers. M. Xu, A.B. Subramaniam
- COLL 280.** Photochemical study of silver nanoparticles formed from the reduction of silver ions by humic acid. R. Leslie, D. Pullman
- COLL 281.** Nanoparticle system based on tripeptide oil in water emulsion to deliver Au nanocrystals and taxol for cancer therapy. S.A. Dragulska, M.T. Wlodarczyk, R. Uljin, A.J. Mieszawska
- COLL 282.** Decoupling mechanisms of palladium nanoparticle synthesis on a biotemplate. E. Retzlaff-Roberts, O. Adigun, G. Novikova, L. Wang, B. Kim, J. Ilavsky, J. Miller, S. Loesch-Fries, M.T. Harris
- COLL 283.** Direct correlation of atomic structure and emission dynamics in single colloidal core/shell nanostructures. K.R. Reid, J.R. McBride, S.J. Rosenthal, J. Macdonald, A.D. LaCroix
- COLL 284.** Effect of fluctuations on excited state rates in core/shell quantum dots. A. Balan, H. Eshet, J.H. Olschansky, E. Rabani, A. Alivisatos
- COLL 285.** Adsorption and decontamination of alpha-synuclein from medically and environmentally-relevant surfaces. H. Phan, S.L. Bartelt-Hunt, J.C. Bartz, J. Ayers, B. Giasson
- COLL 286.** Effects of ice-binding proteins from cold-adapted insect *Tenebrio molitor* on calcite crystallization. A. Kishishita, J. Lugo, X. Wen
- COLL 287.** Characterization of ordered naphthalene diimide films deposited in soils substrates from floating films at the air-water interface. J. Dillenburger, A. Muentner Edwards, J. Reczek
- COLL 288.** Investigations of cationic gemini surfactants by NMR relaxation and diffusion. B.J. Schepers, S.J. Bachofer, M.D. Lingwood
- COLL 289.** Modular approach for the attachment of protein domains to the exterior of the P22 virus-like particle scaffold. D. Patterson, M. Hicks, M. Terra, B. Western, P. Krugler, T. Douglas
- COLL 290.** Zinc chalcogenide nanostructures as flame retardant coatings. Y. Wang, T. Athauda, Y. Vasquez, Q. Wang
- COLL 291.** Withdrawn.
- COLL 292.** Giant Nanocrystal Quantum Dots (gNQDs) as Förster Resonance Energy Transfer (FRET) donors. M. Chern, T. Nguyen, A. Mahler, A.M. Dennis
- COLL 293.** Advances in correlating the optical and structural behavior of single quantum dots. N. Orfield, J.R. McBride, N. Mishra, S.M. Click, S. Majumder, H. Htoon, J.A. Hollingsworth
- COLL 294.** Potential of indium tin oxide nanoparticles to produce reactive oxygen species in environmental systems as a result of Sn level and location. J. Grundy, C. Ngan, N.B. Saleh, L.E. Katz, M. Kirisits, C. Saez Cabezas, D.J. Milliron
- COLL 295.** Effect of micelle polydispersity on first order phase transitions in polyelectrolyte-colloid systems. D. Marco, P.L. Dubin
- COLL 296.** Modification of magnetite nanoparticle surface through Sn<sub>2</sub> substitution of the hydroxide functional group with a chloride group. I. Rios Cruz, P. Velez Vega, C. Beauchamp Perez, G.E. Alvarez, T. Massas Le'Cleres, F. Roman, V. Fernandez-Alos, O. Perales
- COLL 297.** Asymmetric silica encapsulation toward colloidal Janus nanoparticles: Concave nanoreactor for template-synthesis of electrocatalytic hollow Pt nanodendrite. J. Koo, D. Kim, K. Jin Goo, I. Lee
- COLL 298.** Functional interphases based on peptidomimetic-coated gold surfaces. C. Sugnaux, A. Kelleghan, P. Messersmith
- COLL 299.** pH-responsive Fenton reaction performing polymeric micelles: Applications in anticancer and antibacterial therapy. D. Yoo, J. Noh, E. Jung, D. Lee
- COLL 300.** Potential of nontoxic materials to treat dental hypersensitivity and promote tooth remineralization. A.D. Fritza, K. Rashwan, B. Karels, G. Sereda
- COLL 301.** Substitution effects in aniline on electrochromic properties of hybrid flexible device. A. Uygun Oksuz, E. Eren, C. Alver, G. Yurdabak Karaca
- COLL 302.** Removal of car batteries heavy metals contaminants from aqueous solutions with composite chitosan/alginate coated magnetite beads. K.M. Molina, V. Fernandez-Alos, F. Roman
- COLL 303.** Antitumoral activity of (-)-epicatechin loaded chitosan nanoparticles *in vitro* and *in vivo*. A. Perez Ruiz, I. Olivares Corichi, F. Ganem Rondero, J. Suarez Sandoval, J. García Sánchez
- COLL 304.** Morphology-controlled self-assembly and synthesis of photocatalytic nanocrystals. Y. Zhong, J. Wang, F. Bai
- COLL 305.** Morphology-controlled synthesis and metalation of porphyrin nanoparticles with enhanced photocatalytic performance. J. Wang, Y. Zhong, F. Bai
- COLL 306.** Investigation into the synthesis and oxidative toxicity associated with colloidal C<sub>60</sub> nanoparticles. S. Irving, K. Shumard, K.D. Ausman
- COLL 307.** Study on protein conformation and bio-activity of antibodies immobilized on varied nanofibrous membranes. C. Zhao, Y. Deng, B. Pan, Y. Si, G. Sun
- COLL 308.** Microfluidic multifunctional capacitive sensors using ionic liquid electrodes and CNT/PDMS composites for simultaneous sensing of pressure and temperature. S. Yoon, S. Chang
- COLL 309.** Surface modification of conductive polymer thin films by femtosecond laser direct writing. S. Chae, J. Choi, H. Kim
- COLL 310.** Photothermal heating of nanoparticles for activation of initiators for radical polymerization. T.M. Steeves, R.C. Steinhardt, A. Esser-Kahn
- COLL 311.** Ambient STM study of sequentially adsorbed octanethiol and biphenylthiol monolayers on Au(111). G. Avila-Bront
- COLL 312.** Rotating disk electrode characterization of soluble redox active polymers for use in nonaqueous redox flow batteries. J. Davila, K. Hernandez-Burgos, E. Montoto, J. Moore, J. Rodriguez Lopez
- COLL 313.** Synthesis of WS<sub>2</sub> by low-pressure chemical vapor deposition. Z. Luo, J. Qian, Z. Sun, D. Zhang
- COLL 314.** Effect of substituents on anthracene transmitters on triplet transfer from CdSe nanocrystals. P. Xia, Z. Huang, X. Li, J.J. Romero, V.I. Vullev, G.S. Pau, M.L. Tang
- COLL 315.** X-ray imaging observation of interfacial changes between epoxy and metal particles during thermal curing. S. Lee, Y. Kim, H. Lee, H. Kim, D. Noh
- COLL 316.** Effects of OH and Cl adsorption on the surface structure of α-Fe<sub>2</sub>O<sub>3</sub>: A density functional theory study. Q. Pang, H. DorMohammadi, O. Isgor, L. Arndt
- COLL 317.** Solid-liquid equilibrium of binary mixtures with curved interface. F. Liu, L. Zargarzadeh, H. Chung, J.A. Elliott

- COLL 318.** Peptide loaded microgels as antimicrobial surface coatings. **L. Nyström**, R. Nordstrom, G. Frenning, B. Saunders, R. Alvarez-Asencio, M.W. Rutland, M. Malmsten
- COLL 319.** Coexisting coacervate systems to model aqueous phase separated compartments in biology. **G.A. Mountain**, C.D. Keating
- COLL 320.** Responsive nanogels as carriers for antimicrobial peptides. **R. Nordstrom**, L. Nyström, B. Saunders, M. Malmsten
- COLL 321.** Withdrawn.
- COLL 322.** Three dimensional (3D) plasmonic hot spot for label-free sensing and effective photothermal killing of multiple drug resistant superbugs. **S.J. Jones**, S.S. Sinha, A. Pramanik, P.C. Ray

## Section B

Moscone Center  
Halls B/C

### Colloidal Nanoparticle Synthesis & Assembly

H. Fan, H. Htoon, Y. Sun, S. Wu, *Organizers*

6:00 - 8:00

- COLL 323.** Asymmetric and multi-compartment polymersomes as structural analogues of eukaryotic cells. **A. Peyret**, E. Ibarboure, S. Lecommandoux
- COLL 324.** Assessing the influence of oxidizing agents when preparing colloidal spinel-type  $MgMn_2O_4$  nanocrystals. **G. Nolis**, J. Bolotnikov, J. Cabana
- COLL 325.** Hollow silica particles: Measurement of mechanical stability through mercury porosimetry, and development of a low cost, scalable process for hollow silica. **J. Lasio**, F. Woerner, A. Allgeier, C. Chan, J.D. Londono
- COLL 326.** Polyampholyte microgels: From molecular design to ionic traps and switches. **A. Pich**, W. Xu
- COLL 327.** Tannin-mediated layer-by-layer assembly of titania nanocrystals for efficient UV-protective colloidal materials. **H. Son**, B. Koo, J. Lee, K. Kim, J. Jang, M. Yoon, J. Cho, J. Kim, Y. Nam
- COLL 328.** Withdrawn.
- COLL 329.** Development of supramolecular particles made from guanosine derivatives to study and modulate the immune system. **M. Acosta Santiago**, S.E. Quiñonez González, J.M. Rivera
- COLL 330.** Fabrication and characterization of platinum coated with solution processed graphene. **Y. Zhang**
- COLL 331.** Electron microscopy in color: Revealing chemical complexity in emergent nanocrystal systems utilizing advanced STEM-EDS. **J.R. McBride**, K. Reid, S.J. Rosenthal
- COLL 332.** Hybrid lipid-coated silver nanoparticles differentially shielded from Ag<sup>+</sup> release. **M.R. Mackiewicz**, T.J. Miesen
- COLL 333.** Gadolinium oxide nanocrystals as T<sub>1</sub> MRI contrast agents: Balancing colloidal stability with surface accessibility. **V. Colvin**, N. Taheri, G. Stinnett, R. Paultler, P. Decuzzi, I. Al-Dhahir, A. Mendoza-Garcia
- COLL 334.** Engineering a thermoresponsive nanogel with a photothermal core for cancer cell specific binding. **Z. Yu**, D. Tang, K.J. Shea, X. Qi, H. Gu

- COLL 335.** Magnetic nanocapsule: A novel theranostic agent in biomedicine. **V. Nandwana**, A. Singh, J. Higham, M.M. You, T.S. Zheng, S. Shankar, V.P. Dravid
- COLL 336.** Using molecular dynamics to investigate the effect of intra- and inter-strand hydrogen bonding on sequence-chirality specific adsorption of single-stranded DNA (ssDNA) onto Single-Walled Carbon Nanotubes (SWCNTs). **K. Hinkle**, F.R. Phelan
- COLL 337.** Chiroptical responses of helical arrays of plasmonic nanoparticles around anisotropic nanopillars. **A. Jung**, C. Kim, B. Yeom
- COLL 338.** Solution-processed photovoltaic devices utilizing Semiconductor Excitonic Nanoshells (SENS). **N. Razgoniaeva**, M. Zankov
- COLL 339.** Hybrid nano-antibacterials to control biofilm-associated infections. **K. Ivanova**, J. Hoyo, T. Tzanov
- COLL 340.** Withdrawn.
- COLL 341.** Oxidation state dependence of capping agent for site-selective silica coating of gold nanorods. **J.G. Hinman**, J. Eller, J. Li, J. Li, C.J. Murphy
- COLL 342.** Precisely tuning size, dopant incorporation, and radial distribution of dopants in metal oxide nanocrystals via a continuous, living growth synthesis. **A.W. Jansons**, B. Crockett, K.M. Koskela, J.E. Hutchison
- COLL 343.** Biopolymer hydrogels embedded with lignin-silver nanocomposites with broad activity against antibiotic-resistant clinical isolates. **T. Tzanov**, P. Petkova, K. Ivanova, N. Slavin, H. Bach, I.S. Stefanov
- COLL 344.** Microwave-assisted synthesis and characterization of nanomaterials. **P.N. Njoki**, P. Nwokogu, T. Williams, R. Yehdego
- COLL 345.** Nitrogen enriched hierarchically nanoporous carbon derived from one-pot sol-gel synthesis of polybenzoxazine precursor for CO<sub>2</sub> capture and storage. **T. Chaisuwan**, S. Wongkasemjit, N. Manmuanpom
- COLL 346.** Occlusion of sulfate-based diblock copolymer nanoparticles within calcite: Effect of varying the surface density of anionic stabilizer chains. **S.P. Armes**, Y. Ning
- COLL 347.** Core@Shell architecture: Enhancing catalytic performance. **K. Koczur**, J. Legere, D. Chen, E.W. Harak, S.E. Skrabalak
- COLL 348.** Biocatalytic synthesis and characterization of ultra-long-chain fatty acid sugar alcohol monoesters. **Z. Guo**
- COLL 349.** Interaction of size-tailored PEGylated iron oxide nanoparticles with lipid membranes and cells. **N. Gal**, A. Scheberl, A. Lassenberger, L. Herrero Nogareda, E. Reimhult
- COLL 350.** Aqueous synthesis, characterization and optimization of novel nanostructures for water purification. **T. Eldred**, J.C. Poler
- COLL 351.** MRI reporter contrast agents for ultrasound ablative therapy. **J. Wang**, J. Yang, G. Anthony, S. Sammet, W.C. Trogler, A. Kummel
- COLL 352.** *Sapindus mukorossi* fruit extract mediated synthesis of silver nanoparticle and study of its catalytic and antibacterial activity. **A. Mitra**, G. Dinda, D. Halder, N. Pal, C. Vazquez Vazquez, M. Lápez-Quintela

- COLL 353.** Autocatalytic sol-gel synthesis of organic-inorganic hybrid material. **R. Francis**, G.P. Gopalan
- COLL 354.** Synthesis and adsorption studies of quaternized magnetic cellulose nanocomposite as adsorbent for hexavalent chromium removal. **J. Wanathampong**, T. Witton, K. Kasemwong
- COLL 355.** Hybrid microemulsion (uE)/sol-gel chemistry to synthesize and harvest CaTiO<sub>3</sub>:Cr<sup>3+</sup> NIR nanophosphors. **P.A. Sermon**, J. Eloi
- COLL 356.** Effects of the template removal methods and pH on formation of hierarchical porous silica using natural rubber as template. **C. Phattharachindanuwong**, N. Hansupalak, C. Warakulwit, J. Plank, Y. Chisti
- COLL 357.** Miniaturised continuous processing units for rapid synthesis and purification of liposomes. **N. Dimov**, E. Kastner, Y. Perrie, N. Szita
- COLL 358.** Nanoparticle synthesis and harvesting from W/O microemulsions (uE). **P.A. Sermon**, M. Worsley, J. Eloi

## Section C

Moscone Center  
Halls B/C

### Basic Research in Colloids, Surfactants & Nanomaterials

R. Nagarajan, *Organizer*

6:00 - 8:00

- COLL 359.** Platonic micelles: A novel aggregation behavior of sulfonatocalix[4]arene-based micelles. **S. Fujii**, K. Sakurai
- COLL 360.** Visible light photoactivity of 1-D TiO<sub>2</sub> by targeted decoration of transition metal nanodots. **M. Hasan**, S. Ferdousi, K. Yeung
- COLL 361.** Effects of osmolytes on caffeine partitioning thermodynamics. **T.S. Thompson**, A.P. Allsbrook, Y. Zhang
- COLL 362.** Elucidating distinct Au(111) and TiO<sub>2</sub>/Au(111) surface sites for the selective oxidation of ethanol to acetaldehyde. **D. Boyle**, J.A. Wilke, V.H. Lam, A.E. Baber

## Section D

Moscone Center  
Halls B/C

### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

A. H. Flood, S. L. Tait, *Organizers*

6:00 - 8:00

- COLL 363.** Tuning dynamic two-dimensional supramolecular self-assemblies at surfaces by molecular design. **H.D. Castillo**, J. Dobscha, J.M. Espinosa Duran, S. Kim, S. Debnath, Y. Liu, D.C. Ashley, Y. Serada, B. Hirsch, M. Baik, D. Lee, K. Raghavachari, P. Ortoleva, A.H. Flood, S.L. Tait
- COLL 364.** Controllable self-assembly of peptid material. **F. Jiao**, H. Jin, P. He, C. Chen, J.J. De Yoreo
- COLL 365.** Towards the design, synthesis, and characterization of the self-assemblies of shape-persistent tricarbo macrocycles. **J. Dobscha**, H.D. Castillo, Y. Liu, J.M. Espinosa-Duran, S. Debnath, Y. Serada, K. Raghavachari, P. Ortoleva, S.L. Tait, A.H. Flood

- COLL 366.** Self-assembly of designed helical-repeat protein on mica characterized using atomic force microscopy. **S. Zhang**, H. Pyles, D. Baker, J.J. De Yoreo
- COLL 367.** Rapid electro-formation of robust and transparent biopolymer gels in prescribed shapes. **A. Gargava**, H. Mani, S.R. Raghavan
- COLL 368.** Synthetic lipids for liposome derivatization, targeting and triggered release towards drug delivery applications. **M. Best**, A.M. Bayer, S. Alam, S. Whitehead
- COLL 369.** Interfacial carbene reactions on hard and soft material interfaces. **A. Shestopalov**
- COLL 370.** Carboranethiol self-assembled monolayers on gold surfaces. **N. Sohrabnia**, A. Yavuz, A. Yilmaz, **M. Danisman**
- COLL 371.** Withdrawn.

## Section E

Moscone Center  
Halls B/C

### Deposition & Etching of Nanostructures

*Cosponsored by INOR*

H. Fairbrother, L. McElwee-White, A. V. Walker, *Organizers*

6:00 - 8:00

- COLL 372.** Interfacial stress induced metal thin film surface reorganization. **J. Chen**, I. Tevis, M. Thurgon
- COLL 373.** Size and aging effects on antimicrobial efficiency of silver nanoparticles coated on polyamide fabrics activated by atmospheric DBD plasma. **A. Zille**, M. Fernandes, A. Francesco, T. Tzanov, M. Fernandes, F. Oliveira, L.M. Almeida, A.P. Souto, N. Carneiro, T. Amorim, M.F. Esteves
- COLL 374.** Hot Splash Coating (HSC): A method to create thin layers of doped carbon on metal surfaces. **M.R. Alves**, R. Silva

## Section F

Moscone Center  
Halls B/C

### Nanoscale Chemical Patterning & Characterization

S. A. Claridge, W. Liao, *Organizers*

6:00 - 8:00

- COLL 375.** Control of surface energy to optimize post CMP cleaning efficiency for microelectronics fabrication. **S. Ozbek**, T. Walker, **G. Basim**

## Section G

Moscone Center  
Halls B/C

### Interfacial Phenomena & the Oil-Water Interface

*Financially supported by The Dow Chemical Company*

C. Acevedo, C. E. Mohler, C. J. Tucker, *Organizers*

6:00 - 8:00

- COLL 376.** Self-propelled ionic gel at air-water interface. **K. Furukawa**, T. Teshima, Y. Ueno

## MONDAY MORNING

## Section A

Moscone Center  
2002

## Biomembrane Synthesis, Structure, Mechanics &amp; Dynamics

J. Katsaras, S. Muralidharan, M. Nieh, A. N. Parikh, N. Srividya, *Organizers*

K. Gawrisch, N. Malmstadt, *Presiding*

**8:30 COLL 377.** Lipid phase separation enhances fusion. Z. Imam, L.E. Kenyon, G. Ashby, M. Mendicino, F. Nagib, J.C. Stachowiak

**8:50 COLL 378.** Molecular interactions between model cell membranes and nanoparticles. Z. Chen

**9:15 COLL 379.** Phospholipid flippases of the human erythrocyte. S. Cook, M. Hosek, J. Lyles, J. Paterson, S. Smriti, M.L. Zimmerman, D.L. Daleke

**9:40 COLL 380.** Exploring the interactions of transition metal ions with lipid membranes. P.S. Cremer, M. Poyton, X. Cong, A. Sendek, S. Pullanchery, A. Baxter, S. Sun

**10:05 COLL 381.** Model system for separating viral membrane binding and fusion. S.G. Boxer, R. Rawle, P. Kasson, E. Webster

**10:30 COLL 382.** Stochastic molecular mechanisms in membrane traffic. J. Stachowiak

**10:55 COLL 383.** Blue fluorescent amino acid for studying membrane protein structure and dynamics. F. Gai

**11:20 COLL 384.** Novel application of cellulose paper as a platform for fabricating giant liposomes. K. Kresse, M. Xu, J. Pazzi, M. Garcia-Ojeda, A.B. Subramaniam

**11:45 COLL 385.** Investigating the mechanism of electromechanical coupling in voltage-gated ion channels by time-resolved x-ray & neutron interferometry. J.K. Blasie

## Section B

Moscone Center  
2004

## Colloidal Nanoparticle Synthesis &amp; Assembly

H. Htoon, Y. Sun, S. Wu, *Organizers*

H. Fan, *Organizer, Presiding*

Z. Jiang, *Presiding*

**8:30 COLL 386.** Enriching Ag nanocrystals with gold. D. Qin, X. Sun, Y. Wu

**9:00 COLL 387.** Configurational behavior and charge correlation of Zwitterionic brushes at the solid-water interface. W. Chen, J. Mao, J. Yu, M.V. Tirrell

**9:30 COLL 388.** Shape switchable patchy particles. X. Zheng, D. Pine, M. Weck

**9:50 COLL 389.** General strategy for assembling metal chalcogenide capped semiconductor nanocrystals into open, mesoporous films with precisely controlled properties. J. Ondry, S. Robbenolt, Y. Yan, E. Harr, H. Kang, S.H. Tolbert

**10:10 COLL 390.** Reversible self-assembly of monodisperse gold nanoparticle clusters in aqueous solution via pH-tunable interactions between surface ligands. E. Moaseri, B. Changalvaie, J. Bollinger, L. Johnson, T. Truskett, K.P. Johnston

**10:30 COLL 391.** Two-dimensional bipyramid plasmonic nanoparticle superstructure with four distinct orientational packing orders. Q. Shi

**10:50 COLL 392.** Watching nanoparticle growth with tandem *in situ* SAXS-XAS. T. Li

**11:20 COLL 393.** Multimodal resonant soft x-ray scattering for soft materials. C. Wang

**11:50 COLL 394.** Self-assembly of two-dimensional nanoparticle superlattice membranes: A study by synchrotron x-ray scattering. Z. Jiang

## Section C

Moscone Center  
2006

## Molecular Surface Science, Nanomaterials &amp; Catalysis: Symposium in honor of Gabor Somorjai at 80

## Soft Interfaces

*Cosponsored by CATL*

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**8:30 COLL 395.** Investigations of water structure at lipid interfaces. P.S. Cremer, S. Pullanchery, S. Sun

**9:00 COLL 396.** Interactions of surfactants and polyelectrolytes at water surface studied by surface tension and phase-sensitive sum frequency generation. K. Chou

**9:30 COLL 397.** Biomedical surface analysis: Recent advances and opportunities for characterizing immobilized proteins and functionalized gold nanoparticles. D.G. Castner

**10:00 COLL 398.** Surface-modified nanoparticles for biomedical imaging. P. Chen

**10:30 COLL 399.** Structure and function of surface immobilized peptides and enzymes in air. Z. Chen

**11:00 COLL 400.** *In-situ* surface spectroscopy and imaging: From electrocatalytic to live cell interfaces. D.H. Gracias

## Section D

Moscone Center  
2008

## Hierarchical Self-Assembly of Organic Monolayers, Bilayers &amp; Films: Theory &amp; Experiment

S. L. Tait, *Organizer*

A. H. Flood, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:40 COLL 401.** Hierarchical self-assembly of functionalized tricarbazolo triazolophane macrocycles at the liquid-solid interface. H.D. Castillo, J. Dobscha, B. Hirsch, Y. Liu, J.M. Espinosa-Duran, S. Debnath, Y. Serada, K. Raghavachari, P. Ortoleva, A.H. Flood, S.L. Tait

**9:00 COLL 402.** Predicting crystalline structures of organic photovoltaic materials involving alkoxybenzotrioles via multiscale computer-aided design. J.M. Espinosa Duran, H.D. Castillo, J. Dobscha, S. Debnath, S.L. Tait, A.H. Flood, K. Raghavachari, P. Ortoleva

**9:20 COLL 403.** First-principles modelling of supramolecular organic assembly driven by electrostatic interactions. A. De Vita

**9:50 COLL 404.** Electronic effects in the self-assembly of strong donor/acceptor mixtures on metal surfaces. R. Otero

**10:20 COLL 405.** Playing with electrons: How physics meets organic chemistry in the engineering of molecular interfaces. W. Hofer

**10:50 COLL 406.** Electronic structure of two-dimensional pi-conjugated networks: Impact of lattice symmetry. J.E. Bredas

**11:20 COLL 407.** Tuning charge transport in supramolecular assemblies of porphyrins on Au. J.D. Batteas

**11:50 COLL 408.** Entropic intermixing in a binary molecular system: A two-dimensional hydrogen-bonded molecular substitutional solid solution. J. MacLeod, J. Lipton-Duffin, D.F. Percepichka, F. Rosei

**12:10 COLL 409.** Self-assembly under confinement: Nanocorrals for understanding fundamentals of 2D crystallization. L. Verstraete, J. Greenwood, B. Hirsch, S. De Feyter

## Section E

Moscone Center  
2010

## Coacervation: Physics, Chemistry &amp; Biology

P. L. Dubin, *Organizer*

R. Stewart, *Organizer, Presiding*

**8:30 COLL 410.** Build-up and breakdown of a cytoskeleton in complex coacervate synthetic cells. J. Groen, E. Te Brinke, E. Spruijt, W. Huck

**9:00 COLL 411.** Actin encapsulation and assembly in polypeptide coacervates. S. Srivastava, P. McCall, S.L. Perry, D. Kovar, M. Gardel, M.V. Tirrell

**9:30 COLL 412.** Cell-like structures by coacervation: Polymer microcapsules with addressable inner compartments that can harbor biomolecules, colloids or microbial species. S.R. Raghavan, A. Lu, W.E. Bentley

**10:00 COLL 413.** Protein coacervation in the processing of biomolecular composites. A. Miserez, B. Gabryelczyk, C. Hao

**10:30 COLL 414.** Alternative solvent for biology. T. Nott, T. Craggs, P. Farber, J. Forman-Kay, A. Baldwin

**11:00 COLL 415.** Measuring the intracellular dew point: Phase transitions in cells. C. Brangwynne

## Section F

Moscone Center  
2012

## Applied Biosensing Based on Functional Colloids

R. Alvarez Puebla, W. Parak, J. Sagalés, G. F. Strouse, *Organizers*

L. Liz Marzan, *Organizer, Presiding*

**8:30 COLL 416.** Designing bio-functionalised colloids for biosensing. M. Stevens

**9:00 COLL 417.** Functionalizing iron oxide with genomic DNA: Materials for drug capture. C. Blumenfeld, M.D. Schulz, S. Hettis, R.H. Grubbs

**9:20 COLL 418.** Silica coated ferromagnetic nanoparticles in trace glycoprotein recovery for LC-MS. N. Sortedahl, E.J. Rodriguez, P. Wei, Y. Hua, D.A. Egas, M.J. Wirth

**9:40 COLL 419.** Synthesis, characterization and functionalization of inorganic, water soluble nanoparticles. J. Huehn, N. Feliu, W. Parak

**10:00 COLL 420.** Interpreting sensing mechanisms in nucleic acid-wrapped nanotube sensors through computational approaches. A. Alizadehmojarad, A. Beyene, E.G. Tindall, M.P. Landry, L. Vukovic

**10:20 COLL 421.** Fluorescent nanodiamond labelled with gold nanoparticles for enhanced optical and electron microscopy imaging. W. Liu, T. Weil

**10:40 COLL 422.** Understanding the interaction of nanoparticles and cells. N. Feliu, W. Parak

## Section G

Moscone Center  
2001

## Interfacial Phenomena &amp; the Oil-Water Interface

*Financially supported by The Dow Chemical Company*

C. Acevedo, C. E. Mohler, C. J. Tucker, *Organizers, Presiding*

**8:30 COLL 423.** Amphiphilic block copolymers at the oil-water interface. P. Alexandridis

**9:00 COLL 424.** Dynamic and thermodynamic factors controlling transient Marangoni flow at the oil/water interface under convective diffusion surfactant adsorption conditions. R.D. Tilton, G. Duner, S. Garoff, T.M. Przybycien

**9:30 COLL 425.** Dynamics of oil-water interfaces: Adsorption, polymerization, and transport. T. Squires

**10:00 COLL 426.** Formation of multi-nanoemulsions for colloidal synthesis. M. Zhang, P. Malo de Molina, M.E. Helgeson

**10:30 COLL 427.** Exploring the interfacial synergy between polymers and surfactants. B. Schabes, C. Steen, G. Richmond

**10:50 COLL 428.** Pickering nanemulsions using bespoke sterically-stabilized diblock copolymer nanoparticles. S.P. Armes

**11:10 COLL 429.** One-step formation of stable multiple emulsions. P.M. Guenoun, M. Protat, N. Bodin, N. Pantoustier, J. Dailant, F. Gobeaux, F. Malloggi, P. Perrin

**11:30 COLL 430.** Microemulsion interfacial tension and characteristic length scale model using a microscopic curvature approach and the HLD concept. V. Torrealba, R.T. Johns

**11:50 COLL 431.** Determining the dynamic interfacial tension during droplet/bubble generation using T-junction and co-flowing microchannels. K. Wang, X. Wang, L. Yang, G. Liu, G. Luo

## Section H

Moscone Center  
2003

### Nanoscale Chemical Patterning & Characterization

S. A. Claridge, W. Liao, *Organizers*  
S. Claridge, *Presiding*

**8:30 COLL 432.** Generation of patterned multifunctional surfaces using orthogonal click chemistries. K. Brooks, J. Yatvin, C.D. McNitt, R.A. Reese, C. Jung, V. Popik, J.J. Locklin

**8:50 COLL 433.** Bioinspired interfaces with controlled anisotropic wetting at scales <10 nm for ultrathin patterned films. S.W. Choong, S.R. Russell, J. Bang, J.O. Bechtold, J.K. Patterson, S.A. Claridge

**9:10 COLL 434.** Programming polymer nanoarchitectures by DNA origami technology. Y. Tokura, Y. Jiang, A. Welle, M.H. Stenzel, K.M. Krzemien, J. Michaelis, R. Berger, C. Barner-Kowollik, Y. Wu, T. Weil

**9:30 COLL 435.** Polymer pen chemical lift-off lithography. X. Xu, Q. Yang, K.M. Cheung, C. Zhao, N. Wattanatorn, J.N. Belling, J. Abendroth, L. Slaughter, C.A. Mirkin, A.M. Andrews, P.S. Weiss

**9:50 COLL 436.** Nanoimprint lithography using DNA nanostructure templates. H. Liu

**10:20 COLL 437.** Bottom-up approach to high density array of patterned polymer brushes. P. Gopalan

**10:50 COLL 438.** Surface assembly and packing preferences of fibrinogen mediated by the periodicity and alignment of block copolymer nanodomains. J. Hamm, T. Xie, A. Vora, P.J. Mulcahey, C. Liu, D.P. Sanders

**11:20 COLL 439.** Monolayer assembly of polyaromatics by shear-induced alignment and by 2D porous networks. C. Chen

## Section I

Moscone Center  
2005

### Nanostructure Engineering & Surface Chemistry for Spectroscopy, Imaging & Alternative Energy Harvesting & Conversion

*Financially supported by MilliporeSigma-Energy Materials; CH Instruments, Inc.; The University of Alabama (Chemistry, College of Arts & Science)*

N. Hammer, S. Pan, *Organizers, Presiding*

**8:30 COLL 440.** Actuable DNA origami-nanoparticle composites for energy harvesting and storage. A. Dehankar, J. Johnson, C. Castro, J.O. Winter

**8:50 COLL 441.** Studies of electrochemical reactions at individual nanostructures via combined electroanalytical and optical methods. C.M. Hill

**9:20 COLL 442.** Nanoelectrochemical techniques for high-resolution imaging and characterization of catalytic nanostructures. M.V. Mirkin, T. Sun, M. Zhou, Y. Yu, D. Wang, H. Xin

**9:50 COLL 443.** Detecting small molecule binding with membrane proteins. N. Tao

**10:20** Intermission.

**10:30 COLL 444.** Gold nanoparticle assisted delayed luminescence in conjugated polymers. L. Rothberg, R. Chakraborty

**11:00 COLL 445.** Growth of highly fluorescent gold and silver nano-clusters. D. Mishra, F. Aldeek, G. Palui, H.M. Mattoussi

**11:30 COLL 446.** Competitive partial charge transfer interactions with hydrogen-bonded solvent networks. N. Hammer

## Section J

Moscone Center  
2007

### ACS Award in Colloid Chemistry: Symposium in honor of Nicholas A. Kotov

P. Podsiadlo, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 COLL 447.** Colloidal assembly in alchemical space. S.C. Glotzer

**9:05 COLL 448.** Control of DNA-functionalized nanoparticle assembly. M. Olvera De La Cruz

**9:35 COLL 449.** Large-scale nanocrystal arrays. P. Mulvaney, C. Kinnear, H. Zhang, A. Roberts, T. James, J. Cadusch

**10:05** Intermission.

**10:15 COLL 450.** Surface patterning of nanoparticles with polymer patches. E. Kumacheva

**10:45 COLL 451.** Can particles mimic atoms and molecules? Z. Nie, C. Yi, S. Zhang, Y. Yang

**11:15 COLL 452.** Stimuli-responsive materials by nanoscale assembly and disassembly. Y. Yin

**11:45** Concluding Remarks.

### Mineral-Water Interface Chemistry

#### A Tribute to Glenn Waychunas

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

### Science for a Sustainable Energy Future

#### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC*

### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

### Honoring the Contribution to Nanocatalysis

*Sponsored by CATL, Cosponsored by COLL and WCC*

### Janus Particles: Synthesis, Characterization & Applications

*Sponsored by PMSE, Cosponsored by COLL and MPPG<sup>2</sup>*

### Functional Lignocellulosics & Nanotechnology

### Tuning Interfacial Phenomena with Ligno-Nanocellulosic Materials

*Sponsored by CELL, Cosponsored by CARB and COLL*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Surface Science

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## MONDAY AFTERNOON

## Section A

Moscone Center  
2002

### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, S. Muralidharan, M. Nieh, N. Srividya, *Organizers*

A. N. Parikh, *Organizer, Presiding*

J. Stachowiak, *Presiding*

**2:00 COLL 453.** Development of a porous photocatalytic matrix for encapsulation of membrane-bound proteins. K.E. Johnson, S. Gakhar, S.H. Risbud, M.L. Longo

**2:20 COLL 454.** Time-resolved second harmonic microscopy of molecular transport through living cell membranes. H. Dai

**2:45 COLL 455.** Chemical imaging of the lipid composition at the site of influenza budding. M.L. Kraft, A.N. Yeager, P.K. Weber, J. Zimmerberg

**3:10 COLL 456.** Modulating effects of small molecules on the structure and dynamics of lipid-membranes. X. Cheng

**3:35 COLL 457.** Crowding-induced mixing of lipid bilayers: Examination of mixing energy, reversibility, and dynamics. M.L. Longo

**4:00 COLL 458.** Effects of defects on lipid biomembranes. M. Nieh, Y. Xia, F. Heberle, J. Katsaras

**4:25 COLL 459.** Super-resolution stimulated emission depletion-fluorescence correlation spectroscopy reveals nanoscale membrane reorganization induced by pore-forming proteins. N. Kumar Sarangi, I. Ilangumaran Ponmalar, S. Visweswariah, J. Kumar Basu, G.K. Ayappa

**4:50 COLL 460.** Nanosafety and toxicity assessment by using spontaneous beating cardiomyocytes. S. Zou

## Section B

Moscone Center  
2004

### Colloidal Nanoparticle Synthesis & Assembly

H. Htoon, Y. Sun, S. Wu, *Organizers*

H. Fan, *Organizer, Presiding*

O. Chen, *Presiding*

**2:00 COLL 461.** Epitaxially connected quantum dot superlattices. T. Hanrath, F. Wise, L. Kourkoutis, F. Escobedo, K. Whitham, B. Savitzky

**2:30 COLL 462.** Nanocube superlattices of CsPbBr<sub>3</sub> perovskites and pressure-induced phase transformation at atomic and mesoscale levels. O. Chen, Y. Nagaoka, K. Hills-Kimball, R. Tan, R. Li, Z. Wang

**3:00 COLL 463.** Self-assembly of actinyl peroxide nanoclusters with cationic surfactant. Y. Gao, J. Szymanowski, T. Zhang, P.C. Burns, T. Liu

**3:20 COLL 464.** Stimuli-responsive colloidal architectures and porous membranes by melt-shear organization. S. Vowinkel, D. Scheid, M. Gallei

**3:40 COLL 465.** Framework stability vs. collapse: Quantifying the role of nearest-neighbor nanocrystal bonding as a key factor in determining order in mesoporous colloidal nanocrystal frameworks. T.E. Williams, D. Ushizima, P. Ercius, C. Zhu, D.J. Milliron, B. Helms

**4:00 COLL 466.** Assembly of free-standing, flexible, citrate-capped gold nanoparticle films at the air-water interface. L. Beecher, J.J. Houlihan, V.A. Apkarian, J.S. Shumaker-Parry

**4:20 COLL 467.** Complex superparamagnetic particle architectures: Obtaining novel properties by controlled assembly and combination of nano-building-blocks to nanostructured entities. K. Mandel

**4:40 COLL 468.** Nanoparticles, nanorods and shish-kebabs with precisely controlled dimensions, compositions, and architectures. Z. Lin

**5:10 COLL 469.** Synthesizing dual-emitting quantum dots on indium phosphide cores. A.M. Dennis, R. Toufanian, M. Chern, T. Nguyen, A. Mahler

## Section C

Moscone Center  
2006

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

### Catalysts for Selective Chemical Transformations

*Cosponsored by CATL*

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**2:00 COLL 470.** Biomimetic catalysis in green organic transformations. J.E. Backvall

**2:30 COLL 471.** Fischer-Tropsch synthesis on cobalt catalysts-on the effect of water revisited. A. Holmen, E. Rytter

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**3:00 COLL 472.** Aspects of the Fischer Tropsch reaction mechanism in the light of chemical transient kinetics. N. Kruse

**3:30 COLL 473.** Selective hydrocarbon oxidation catalysis by Au atomic and nanoclusters. H. Kung, M.C. Kung

**4:00 COLL 474.** Probing the role of particle size in nickel phosphide hydrotreating catalysts. M.E. Bussell, P.J. Topalian, D. Liyanage, S. Brock

**4:30 COLL 475.** Competing forces in chiral surface chemistry: Enantiospecific adsorption versus enantiomer self-aggregation. A.J. Gellman, Y. Yun

**5:00 COLL 476.** Hot electron-mediated surface chemistry on solid-gas and solid-liquid interfaces. J. Park

## Section D

Moscone Center

2008

### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

A. H. Flood, *Organizer*

S. L. Tait, *Organizer, Presiding*

**2:00 COLL 477.** Chemisorption impacts on physisorption: Perturbations of 2D self-assemblies at the liquid-solid interface. B. Hirsch, A. Braganca, J. Greenwood, O. Ivasenko, T. Phan, S. De Feyter

**2:20 COLL 478.** Nanoconfined self-assembly on a grafted graphitic surface under electrochemical control. T. Huynh, T. Phan, O. Ivasenko, S. F. L. Mertens, S. De Feyter

**2:40 COLL 479.** Surface-confined molecular nanostructures: Influencing molecule-surface interactions as well as electronic surface properties. M. Stoehr

**3:10 COLL 480.** Hierarchical assembly of Xe atoms in an atomically precise array of quantum boxes. T. Jung, L.H. Gade, M. Stoehr, J. Lobo Checa, J. Bjoerk, E. Ortega, E. Meyer, S. Kawai, S. Nowakowska, A. Waeckerlin

**3:40 COLL 481.** Templated 2D supramolecular assembly of fullerenes on graphite by five-coordinate gallium-porphyrin monolayers. J. Kamm, M.D. Hopkins

**4:00 COLL 482.** Supramolecular control of interfacial structure in organic semiconductors. D.F. Perepichka

**4:30 COLL 483.** Hierarchical self-assembly of novel organic polycyclic aromatic molecular systems into 1D and 2D nanomaterials. H.P. Rathnayake, H. Sims, J. Sharpsteen, P. Chinnappan

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**4:50 COLL 484.** Adsorption of n-alkanes on the surface of h-boron nitride: A thermodynamic and molecular dynamics study. N.A. Strange, J.Z. Larese

**5:10 COLL 485.** Multiscale and hierarchical organic materials by design, synthesis, and self-assembly. A.H. Flood, J. Dobscha, H.D. Castillo, J.M. Espinosa-Duran, Y. Sereda, S. Debnath, K. Raghavachari, P. Ortoleva, S.L. Tait

## Section E

Moscone Center

2010

### Coacervation: Physics, Chemistry & Biology

P. L. Dubin, R. Stewart, *Organizers*

S. L. Perry, *Presiding*

**2:00 COLL 486.** Resistance to cold cataract in the eye lens proteins of a cold-adapted fish. R.W. Martin, J. Bierma, A. Ledray, A. Kiss

**2:30 COLL 487.** Design and optimization of polyphosphate coacervates for use in biomedical devices. M. Filiaggi, A. Momeni

**3:00 COLL 488.** Complex coacervate for cardiac regeneration. Y. Wang

**3:30 COLL 489.** Discovery of a family of new LCST peptide polymers: Coacervation behavior and self-assembly. A. Chilkoti

**4:00 COLL 490.** Engineering Pickering emulsions using protein/polysaccharide complexes. Q. Huang

**4:30 COLL 491.** Functionality of protein-polysaccharide hydrogels. S.L. Turgeon, X. Le, C.J. Souza, L. Rioux

**5:00 COLL 492.** Using coacervation to achieve surface-selective particle deposition. L. Piculell

## Section F

Moscone Center

2012

### Applied Biosensing Based on Functional Colloids

L. Liz Marzan, W. Parak, J. Sagalés, G. F. Strouse, *Organizers*

R. Alvarez Puebla, *Organizer, Presiding*

**2:00 COLL 493.** Super Temporal-Resolved Microscopy (STReM) for measuring fast interfacial dynamics. C.F. Landes

**2:30 COLL 494.** New luminescence nanothermometers in different biological windows. f. Diaz, O. Savchuk, J. Carvajal, M. Aguilo

**3:00 COLL 495.** Improving surgery via selective detection of ovarian tumors using fluorescent nanoparticles. J.M. Berlin

**3:30 COLL 496.** Liver specific MRI contrast agents based on Mn<sup>2+</sup> containing nanoparticles. I. Lee

**4:00 COLL 497.** Targeted sensing and drug delivery using smart nanoparticles. A. Heuer-Jungemann, A. El-Sagheer, P. Lackie, T. Brown, A. Kanaras

## Section G

Moscone Center

2001

### Interfacial Phenomena & the Oil-Water Interface

Financially supported by The Dow Chemical Company

C. Acevedo, C. E. Mohler, C. J. Tucker, *Organizers, Presiding*

**2:00 COLL 498.** Strategies for making smart foams, emulsions and multiphase gels stabilized by functional particles. O.D. Velev

**2:35 COLL 499.** Probing hydrophobic interactions at solid/water/oil/air interfaces and surface interaction mechanisms of deformable emulsion droplets. H. Zeng, A. Faghhinejad, C. Shi, L. Zhang, L. Xie, J. Huang, X. Cui

**3:05 COLL 500.** Ion specific effects in Winsor III microemulsions. B. Trotter, M. Kadhum, B.J. Shiau, J.H. Harwell

**3:35 COLL 501.** How molecular structure of surfactants determine the dynamics and viability of wettability alteration. S. Das, Q. Nguyen, R.T. Bonnecaze

**4:05 COLL 502.** Effects of salinity on oil recovery: Experimental and theoretical studies of crude oil-water-calcite surface restructuring and associated physical and (electro)chemical interactions. J.N. Israelachvili, S. Chen, Y. Kaufman, D. Seo, A. Schrader, K. Kristiansen, H. Dobbs, N. Cadirov, J. Boles

**4:35 COLL 503.** Simple-to-apply wetting model to predict the thermodynamically stable and the metastable contact angles on textured/rough/patterned surfaces. Y. Kaufman, S. Chen, H. Mishra, A.M. Schrader, D. Lee, S. Das, J.N. Israelachvili

**4:55 COLL 504.** Molecular and colloidal phenomena at aqueous interfaces of structured oils. N.L. Abbott

## Section H

Moscone Center

2003

### Nanoscale Chemical Patterning & Characterization

S. A. Claridge, W. Liao, *Organizers*

S. Claridge, *Presiding*

**2:00 COLL 505.** New dimensions in patterning: Placement and metrology of chemical functionality at all scales. P.S. Weiss

**2:30 COLL 506.** Construction of highly ordered surface molecular nanostructures: From non-covalent interaction to covalent bond. D. Wang, L. Wan

**3:00 COLL 507.** Chemical orthogonality at the molecular limit: Structural lessons from the membrane applied to layered material interfaces. S.A. Claridge

**3:30 COLL 508.** Controlling molecular self-assembly on graphene and graphite at the nanoscale: Combining bottom-up and top-down strategies. S. De Feyter

**4:00 COLL 509.** Surface mass spectrometry and STM characterizations of compositionally patterned monolayers and their post-assembly chemical modifications. M. Zimmt, J. He, C. Fang, R.A. Shelp, O. Fejfar

**4:30 COLL 510.** Subsurface structure fingerprint of 2D materials and heterostructures by their nanomechanical response. Q. Tu, B. Lange, H. Kim, Y.G. Yingling, V. Blum, S. Zauscher

**4:50 COLL 511.** Quantitative connections between Raman spectroscopy and scanning tunneling microscopy in chemisorption on graphite. A. Brown, B. Hirsch, P. Walke, S. De Gendt, S. De Feyter

**5:10 COLL 512.** Chemisorption on graphitic substrates imaged at the single molecule level. B. Hirsch, A. Braganca, K. Tahara, T. Ishikawa, Y. Tobe, M. Melle-Franco, S. De Feyter

## Section I

Moscone Center

2005

### Nanostructure Engineering & Surface Chemistry for Spectroscopy, Imaging & Alternative Energy Harvesting & Conversion

Financially supported by MilliporeSigma-Energy Materials; CH Instruments, Inc.; The University of Alabama (Chemistry, College of Arts & Science)

N. Hammer, S. Pan, *Organizers, Presiding*

**2:00 COLL 513.** Optically transparent ultramicroelectrode for studying local electrochemical events of single Au nanoparticle using combined methods of electrochemistry and dark field scattering microscopy. Y. Ma, S. Pan

**2:20 COLL 514.** Structural plasmonics studied using ultrafast spectroscopy beyond the diffraction limit. K.L. Knappenberger

**2:50 COLL 515.** Directional charge-separation in organic semiconductor nanowire crystals. M. Barnes

**3:20 COLL 516.** Long-range catalytic communications within and between single nanocatalysts. P. Chen

**3:50** Intermission.

**4:00 COLL 517.** Observation of local redox events at individual plasmonic nanoparticles using spectroelectrochemistry methods. S. Pan

**4:30 COLL 518.** Photophysical investigation of electron ejection efficiencies of novel organic near-IR absorbing dyes into TiO<sub>2</sub> based semiconductor surfaces for dye-sensitized solar cell applications. L.E. McNamara, H. Cheema, J.H. Delcamp, N. Hammer

**4:50 COLL 519.** Mechanistic insights into multiple blinking states in small core-shell and core-multishell quantum dots. C.D. Heyes

**5:10 COLL 520.** Organo-Metal Halide (OMH) Perovskite Quantum Dots (PQDs): Effective surface passivation using peptides. J.Z. Zhang

## Section J

Moscone Center

2007

### ACS Award in Colloid Chemistry: Symposium in honor of Nicholas A. Kotov

P. Podsiadlo, *Organizer, Presiding*

**2:00** Introductory Remarks.

**2:05 COLL 521.** Non-additive interactions at chemically and structurally complex interfaces. N.L. Abbott

‡ Cooperative Cosponsorship

- 2:35 COLL 522.** Programmable materials from DNA bonds and nanoparticle atoms. C.A. Mirkin
- 3:05 COLL 523.** Nanoparticle assembly: Bridging size scales and dimensionalities. M. Niederberger
- 3:35** Intermission.
- 3:45 COLL 524.** Making all the puzzle pieces fit: Shape directed assembly of anisotropic nanocrystals into multi-component superlattices. C.B. Murray, T. Paik, N.J. Greybush, Y. Wu, S. Najm, C.R. Kagan
- 4:15 COLL 525.** Synthetic methodology for colloidal synthesis of inorganic nanomaterials: Limitations and opportunities. V. Srivastava, I. Fedin, H. Zhang, D.V. Talapin
- 4:45 COLL 526.** Building materials from colloidal nanoparticles. L. Cademartiri
- 5:15** Concluding Remarks.

### Science for a Sustainable Energy Future

#### Chemical & Biological Conversions Approaches to Energy Conversion

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES<sup>2</sup> and WCC

#### ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer

Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY

#### ACS Award in Surface Chemistry: Symposium in honor of Cynthia M. Friend

#### Honoring the Contribution to Nanocatalysis

Sponsored by CATL, Cosponsored by COLL and WCC

#### Janus Particles: Synthesis, Characterization & Applications

Sponsored by PMSE, Cosponsored by COLL and MPPG<sup>2</sup>

#### Functional Lignocellulosics & Nanotechnology

#### Modification & Analytics

Sponsored by CELL, Cosponsored by CARB and COLL

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Mechanistic Studies of Catalysis in Photocatalytic & Photoelectrodes

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

#### Elucidation of Mechanisms & Kinetics on Surfaces

#### Mechanisms

Sponsored by CATL, Cosponsored by COLL and ENVR

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

R. Nagarajan, *Organizer*

8:00 - 10:00

**11, 31, 44, 107, 135, 139, 145, 160-162, 165-166, 168-170, 178, 182-183, 187-188, 192-194, 200, 202, 215, 218, 221-222, 227-229, 231, 235, 239-240, 243, 246, 248, 257, 264, 267-271, 275-276, 280-281, 284, 290, 293-294, 298, 306-307, 310, 314, 316, 323, 338, 388, 417, 420, 466, 511.** See previous listings.

**593-594, 665, 699.** See subsequent listings.

## TUESDAY MORNING

### Section A

Moscone Center  
2002

#### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, S. Muralidharan, M. Nieh, A. N. Parikh, N. Srividya, *Organizers*

D. L. Daleke, C. Naumann, *Presiding*

**8:30 COLL 527.** Pattern recognition of membrane images to deduce cellular signaling status. G. Liu, Y. Liu, D. Hanna, M. Lohrer

**8:55 COLL 528.** Spontaneous phospholipid membrane formation by histidine ligation. A. Bhattacharya, N.K. Devaraj

**9:15 COLL 529.** Hydrogel-assisted membrane protein reconstitution for studying GPCR dependence on lipid composition. N. Malmstadt

**9:40 COLL 530.** Dimerization of a GPCR in membranes investigated by SANS. O. Soubias, J. Nickels, W.E. Teague, Jr., K.L. Weiss, K.G. Hines, J. Katsaras, K. Gawrisch

**10:05 COLL 531.** Toward a quantitative continuum model for membrane shape fluctuations. F.L. Brown

**10:30 COLL 532.** Interfacing proteins with *de novo* membrane formation. N.K. Devaraj

**10:55 COLL 533.** Hybrid model membrane combining micropatterned lipid bilayer and hydrophilic polymer brush. K. Morigaki, T. Nishimura, F. Tamura, Y. Tanimoto, K. Ando, Y. Sudo, F. Hayashi, Y. Iwasaki

**11:20 COLL 534.** pH-dependent behavior of lipid bilayer coatings on mesoporous silica nanoparticles. D.Y. Sasaki, C. Ashley, E. Carnes, S. Sankhagowit, C. Ting

**11:45 COLL 535.** Investigating electrostatic interactions between PIP<sub>2</sub> and the EphA2 receptor tyrosine kinase. X. Shi, S. Christie, R. Lingerak, G. Gilmore, P.G. Rodriguez, J. Muller-Greven, M. Buck, B. Wang, A.W. Smith

### Section B

Moscone Center  
2004

#### Colloidal Nanoparticle Synthesis & Assembly

Y. Sun, S. Wu, *Organizers*

H. Fan, H. Htoon, *Organizers, Presiding*

**8:30 COLL 536.** Designed nanoparticles architectures by self-assembly. O. Gang

**9:00 COLL 537.** Exploring plasmon-exciton coupling at the surface of TiO<sub>2</sub> nanorods. B.G. DeLacy, D. McCarthy, Z. Zander, Y. Rao, H. Fang, H. Dai

**9:30 COLL 538.** Room temperature, scalable cation exchange in PbS and CdSe quantum dots using a silver(I) complex. A.L. Morris, W.R. Tilluck, S.E. Benjamin, C. Lin, H. Hamo, E. Lozano, P.G. Van Patten

**9:50 COLL 539.** Controlled assembly of metallic nanoaggregates and their use in understanding cell uptake of nanoparticles. J.M. Berlin

**10:10 COLL 540.** Synthesis and assembly of gold nanoparticles/polymers: Spheres, prisms, octahedra, and rods...oh my! S.M. Budy, D. Hamilton, Y. Cai, M.K. Knowles, S.M. Reed

**10:30 COLL 541.** Transforming layered to nonlayered two-dimensional materials: Cation exchange of SnS<sub>2</sub> to Cu<sub>2</sub>SnS<sub>3</sub>. Y. Wang, Y.V. Morozov, M. Zhukovskiy, R. Chatterjee, S. Draguta, P. Tongying, S. Rouvimov, M.K. Kuno

**10:50 COLL 542.** DNA-assembled chain-like nanoparticle architectures with tailororable organizations. C. Tian, M. Cordeiro, D. DiMarzio, M. Liu, H. Xin, J. Lhermitte, C. Ma, O. Gang

**11:10 COLL 543.** Fabrication and application of inorganic nanoparticle superstructures. Z. Tang

**11:40 COLL 544.** Synchrotron-based x-ray techniques for in-situ superlattice discovery and processing of nanocrystal assemblies. Z. Wang

### Section C

Moscone Center  
2006

#### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

#### Surface Science of Functional Interfaces

Cosponsored by CATL

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**9:00 COLL 545.** Functionalizing surfaces with polymeric layers. N.D. Spencer

**9:30 COLL 546.** Alkyl-cyclens as effective sulfur- and phosphorus-free additives in engine oils for improved boundary lubrication. Y. Chung, Q.J. Wang, T.J. Marks, M. Delferro, M. Desanker, J. Lu, X. He

**10:00 COLL 547.** When surfaces get rough: Studies of the assembly and frictional properties of SAMs and graphene SAM-composites on surfaces with nanoscale roughness. J.D. Batteas

**10:30 COLL 548.** Depositing nanostructures using electron beams: Insights from surface science. H. Fairbrother

**11:00 COLL 549.** Surface structure dependence in oxide catalysis: Comparison of methanol reaction on CeO<sub>2</sub> oriented surfaces and nano crystallites. S.H. Overbury

**11:30 COLL 550.** Water speciation and mechanochemical reactions at/in multicomponent silicate glass surfaces. S.H. Kim

### Section D

Moscone Center  
2008

#### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

S. L. Tait, *Organizer*

A. H. Flood, *Organizer, Presiding*

**8:30 COLL 551.** Topochemical synthesis of a two-dimensional polymer via [2+2] cycloaddition on the multigram scale. R. Lange, G. Hofer, T. Weber, N. Juergensen, U. Lemmer, G. Hernandez-Sosa, D. Schlüter

**8:50 COLL 552.** Structure elucidation of two-dimensional polymers synthesized at the air/water interface. V. Mueller, F. Shao, M. Moradi, R. Lange, R. Zenobi, T. Jung, B.T. King, D. Schlüter

**9:10 COLL 553.** Self-assembly and on-surface polymerization of bromine-functionalized pyrene derivatives on noble metal surfaces. B. Tran, T. Pham, F. Song, M. Nguyen, M. Kivala, M. Stoehr

**9:30 COLL 554.** Charged induced formation of crystalline network polymers. A.A. Raja, D. Kim, S. Subramanian, C.T. Yavuz

**9:50 COLL 555.** Exploring molecular assembly at surfaces. F. Rosei

**10:20 COLL 556.** Hierarchy of interactions and templation effects in supramolecular assembly at surface: From organic monolayers to thin films. G. Costantini

**10:50 COLL 557.** Sophisticated photoreponsive system made of supramolecular assembly of photochromic diarylethene at solid/liquid interface. K. Matsuda

**11:20 COLL 558.** Understanding intermolecular interactions driving the self-assembly of alkoxybenzotrienes on graphene. S. Debnath, J.M. Espinosa-Duran, J. Dobscha, H.D. Castillo, S.L. Tait, A.H. Flood, P. Ortoleva, K. Raghavachari

**11:40 COLL 559.** Stimuli responsive phase behavior in hydrogen-bonded bicomponent supramolecular networks. G. Velpula, J. Teyssandier, K.S. Mali, S. De Feyter

**12:00 COLL 560.** Structural transformations and self-assembly of interfacial methanol ice on hydrophobic surfaces. D. Yang, X. He

### Section E

Moscone Center  
2010

#### ACS Award for Research at an Undergraduate Institution: Symposium in honor of Maria Hepel

S. Andreescu, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 COLL 561.** Electroanalytical characterization of environmental chemical processes of engineered nanoparticles. A. Karimi, K. Kirk, E. Andreescu

**8:55 COLL 562.** Search for new properties and applications of micro- and nanohydrogels. M. Karbarz, E. Zabost, K. Kaniewska, M. Mackiewicz, K. Marcisz, Z. Stojek

**9:15 COLL 563.** Quasi-adiabatic proton exchange membrane fuel cell fixture for automotive cold-starts. C.A. Rice, A.O. Pistono

**9:35 COLL 564.** Nanocarbon bowls: Functionalization, structures, applications. M.A. Petrukhina

**9:55** Intermission.

**10:10 COLL 565.** Functionalized porous organometallic compounds as inhibitor of cell division. S. Bashir, B. Martinez, J.L. Liu

**10:30 COLL 566.** Relationship between phosphorous and metals in Lake Auburn. A. Bazilio

**10:50 COLL 567.** Characterization of three pathogenic L-ferritin mutants that cause neuroferritinopathy. F. Bou-Abdallah

**11:10 COLL 568.** Thread- and paper-based devices for use in enzyme assays for Point-of-Care (POC) diagnostic devices. A. Gonzalez, M. Gaines, C. Liu, L. Estala, F.A. Gomez

**11:30 COLL 569.** Modification of the paper-based NanoCerc antioxidant assay for high-throughput use: An analysis of twenty-four green teas for antioxidant activity throughout six consecutive infusions. E. Sharpe, F. Hua, S. Schuckers, E. Andreescu, R. Bradley

## Section F

Moscone Center  
2012

### Applied Biosensing Based on Functional Colloids

R. Alvarez Puebla, W. Parak, J. Sagalés, G. F. Strouse, *Organizers*

L. Liz Marzan, *Organizer, Presiding*

**8:30 COLL 570.** Genome-wide DNA methylation variations upon engineered nanomaterials and their implications in nanosafety assessment. S. Liu

**9:00 COLL 571.** Catalytic enhancement of multi-enzyme cascades co-localized on colloidal quantum dots. J. Vranish, M. Ancona, E. Oh, I. Medintz

**9:20 COLL 572.** Antibiofouling manganese oxide nanoparticles: Synthesis, characterization, and potential applications for T<sub>2</sub>-weighted MR imaging of tumors. X. Shi, P. Wang, J. Yang, B. Zhou, Y. Hu, F. Xu, L. Xing, M. Shen, G. Zhang

**9:40 COLL 573.** Quantum dot (QD)-fullerene (C<sub>60</sub>) conjugates for imaging real-time changes in cellular membrane potential. O.K. Nag, M. Stewart, A. Huston, J. Delehanty, A. Efros, K. Susumu, P. Dawson

**10:10 COLL 574.** Cerium oxide nanoparticles as novel biosensing tools: Properties, sensing mechanism and applications. A. Othman, G. Bulbul, A. Hayat, E. Andreescu

**10:30 COLL 575.** GlycoNanoparticle barcodes for pathogen identification. M.I. Gibson

## Section G

Moscone Center  
2001

### Chemistry & Physics of Tribology

#### Lubricants & Lubrication: From Macro to Nano

M. Ruths, *Organizer*

F. Mangolini, *Organizer, Presiding*

J. Yu, *Presiding*

**8:30 COLL 576.** Friction and lubrication from the nano (molecular) through the micro (µm-mm) to the macro (geological) scales, and over large time and velocity scales. J.N. Israelachvili

**9:05 COLL 577.** Nanorheology of complex fluids at interfaces: Bulk behavior and complex slip length. B. Cross, C. Barraud, F. Restagno, E. Charlaix

**9:25 COLL 578.** Binary and ternary systems with ionic liquids in confinement. M. Han, R.M. Espinosa-Marzal

**9:45 COLL 579.** Shear banding of piezoviscous fluids as a stability problem. B. Galiniche, L. di Mare, J. Wong

**10:05 COLL 580.** Local rheology of lubricants. J. Wong

**10:25 COLL 581.** Anomalous spreading kinetics of polymer lubricant films. C.M. Mate, B.A. Noble, B. Raeymaekers

**10:45 COLL 582.** Quantitative analysis of Raman spectra of fatty acid lubricants under pressure. R.X. Rammeloo, K. Guha, C.D. Bain

**11:05 COLL 583.** Controlling friction and adhesion using two-dimensional responsive microgels. S. Giasson

**11:25 COLL 584.** Interfacial properties of fluid lubricants on bearing material surfaces. J.M. Helt

**11:45 COLL 585.** Formulation chemistry for ultra-stable ester-based oils. T.E. Karis

**12:05 COLL 586.** Relation between adsorption and nanoscale tribological performance of organic friction modifiers. A. Pham, P. Nalam, V. Castillo, B. Thiebaut, R.M. Espinosa-Marzal

## Section H

Moscone Center  
2003

### Deposition & Etching of Nanostructures

*Cosponsored by INOR*

L. McElwee-White, A. V. Walker, *Organizers*

H. Fairbrother, *Organizer, Presiding*

**8:30 COLL 587.** Plasma-assisted atomic layer deposition for energy conversion and storage devices. M. Creatore

**9:00 COLL 588.** Tin alkyls as a tin source in hybrid molecular beam epitaxy. T. Wang, R.P. Harkins, A. Prakash, C.J. Cramer, B. Jalan, W.L. Gladfelter

**9:20 COLL 589.** Evidence for surface-plasmon-mediated precursor dissociation in ultrashort-pulsed-laser-induced surface chemistry. S. Randolph, M. Straw, A. Botman, J. Filevich

**9:50** Intermission.

**10:05 COLL 590.** Metalorganic chemical vapor deposition of 2D materials: Challenges and new approaches. J. Redwing

**10:35 COLL 591.** Atomic Layer Etching (ALE) using sequential thermal reactions: Atomic Layer Deposition (ALD) in reverse. S.M. George, Y. Lee, J. DuMont, N. Johnson, D. Zywotko

**10:55 COLL 592.** Sequential infiltration synthesis for nanoscale patterning. J. Elam, S.B. Darling, Y. Tseng, Q. Peng, M. Biswas, J. Libera, A. Mane, L. Ocola

## Section I

Moscone Center  
2005

### Nanostructure Engineering & Surface Chemistry for Spectroscopy, Imaging & Alternative Energy Harvesting & Conversion

*Financially supported by MilliporeSigma-Energy Materials; CH Instruments, Inc.; The University of Alabama (Chemistry, College of Arts & Science)*

N. Hammer, S. Pan, *Organizers*

S. Pan, *Presiding*

**8:30 COLL 593.** Insight into the recombination kinetics of colloidal silicon nanocrystals. S. Brown, J.B. Miller, E. Hobbie

**8:50 COLL 594.** Simultaneous time-dependent surface enhanced Raman spectroscopy, metabolomics and proteomics reveal cancer cell death mechanisms associated with Au-nanorod photo-thermal therapy. Y. Wu, M.R. Ali, M.A. El-Sayed

**9:10 COLL 595.** Synthesis of gold nanoprism with dual effects of plasmon resonance and non-linear optical property to improve the performances of organic solar cell. B. Gong, Y. Tai

**9:30 COLL 596.** Three dimensionally assembled gold nanostructures for visible light-driven water oxidation. H. Son, Y. Nam

**9:50** Intermission.

**10:00 COLL 597.** Plasmon-coupled resonance energy transfer: A real-space real-time computational electrodynamic approach. W. Ding, L. Hsu, G.C. Schatz

**10:20 COLL 598.** Development and molecular understanding of Plasmonic Photothermal Therapy (PPTT) in combating cancer. M.R. Ali, M.A. El-Sayed

**10:40 COLL 599.** Assembly of ring-like nanostructure arrays via drop evaporation method. Y. Bao, N. Scherer, T. Witten

**11:00 COLL 600.** Photo-oxidative degradation of single giant quantum dots. N. Orfield, S. Majumder, J.R. McBride, J.A. Hollingsworth, H. Htoon

**11:20 COLL 601.** Highly sensitive surface-enhanced Raman scattering substrate of Ag thin film fabricated by gas-timing RF magnetron sputtering. C. Sapharoenkun, A. Klamcheun, A. Treetong, P. Kasamechonchung, T. Wutikhun, P. Ukahapunyakul

**11:40 COLL 602.** ALD-protected polyoxometalate water oxidation catalysts immobilized on light-absorbing metal oxide thin films for enhanced durability and photocurrent density. S.M. Lauinger, B. Piercy, W. Li, M.D. Losego, D. Wang, C.L. Hill

## Section J

Moscone Center  
2007

### ACS Award in Colloid Chemistry: Symposium in honor of Nicholas A. Kotov

P. Podsiadlo, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 COLL 603.** Nanoparticles' interactions with viruses. F. Stellacci

**9:05 COLL 604.** Nanoscale metal-organic frameworks: Emerging materials for catalysis. Z. Tang

**9:35 COLL 605.** Molecular mechanisms in formation of metal oxide colloids in sol-gel processes. V. Kessler, G. Seisenbaeva

**10:05** Intermission.

**10:15 COLL 606.** Toward the self-assembly of layered multi-nano-composite films with complex anisotropies. R. Blell, M. Rémi, H. Hu, S. Bharani, V. Lemaire, M. Pauty, O. Félix, G. Decher

**10:45 COLL 607.** Surface enhanced Raman scattering on cuprous oxide nanomaterials. C. Jiang

**11:15 COLL 608.** Seeded growth and chemical transformations in metal nanoparticles. L. Liz Marzan

**11:45** Concluding Remarks.

### Mineral-Water Interface Chemistry

*Sponsored by GEOC, Cosponsored by COLL and ENVIR*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Molecular & Bio-Inspired Photocatalysts

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Functional Lignocellulosics & Nanotechnology

#### Tuning Interfacial Phenomena with Ligno-Nanocellulosic Materials

*Sponsored by CELL, Cosponsored by CARB and COLL*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Electrons

*Sponsored by CATL, Cosponsored by COLL and ENVIR*

## TUESDAY AFTERNOON

### Section A

Moscone Center  
2002

### ACS Award Lectures

*Cosponsored by CATL and WCC*

R. Nagarajan, *Organizer*

H. Fairbrother, *Presiding*

**2:00** Introduction of Awardee.

**2:05 COLL 609. Award Address** (ACS Award in Colloid Chemistry sponsored by Colgate-Palmolive Company). Self-assembly of nanoparticles. N. Kotov

**2:50** Introduction of Awardee.

**2:55 COLL 610. Award Address**  
(ACS Award in Surface Chemistry sponsored by the ACS Division of Colloid & Surface Chemistry). Understanding of selective oxidation catalysis through surface science. C.M. Friend

**3:40** Introduction of Awardee.

**3:45 COLL 611. Award Address**  
(ACS Award for Research at an Undergraduate Institution sponsored by Research Corporation for Science Advancement). From nanogravimetry, photovoltaics, and plasmonics to elastic light scattering and Raman spectroscopy for theranostics and environmental remediation. M.R. Hepel

**4:30** Introduction of Awardee.

**4:35 COLL 612. Nano Letters Award**  
Lecture: Cool chemical transformations and hot carrier upconversion: Emerging plasmonic methods to improve renewable energy technologies. J. Dionne

## Section B

Mosccone Center  
2004

### Deposition & Etching of Nanostructures

*Cosponsored by INOR*

H. Fairbrother, L. McElwee-White, *Organizers*

A. V. Walker, *Organizer, Presiding*

**2:00 COLL 613.** Cage molecule self-assembly. P.S. Weiss

**2:30 COLL 614.** Development of photo-activated iodo-ene reaction for molecular layer deposition. M. Lillethorup, D.S. Bergsman, S.F. Bent

**2:50** Intermission.

**3:05 COLL 615.** Perfluoropentacene films on gold surfaces grown by supersonic molecular beam deposition. A. Yavuz, N. Sohrabnia, G. Bracco, M. Danisman

**3:25 COLL 616.** Patterning diverse metallic materials directly from solution using laser thermal voxels. L.D. Zarzar, B. Swartzentruber, B. Donovan, P. Hopkins, B. Kaehr

**3:45 COLL 617.** Hybrid Monte Carlo and continuum modeling of electron-beam induced processes using liquid reactants. T.T. Hastings, S. Estandiarpour, E. Cao, S. Lami

### Mineral-Water Interface Chemistry

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Novel Photocatalytic & Photoelectrode Materials

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Functional Lignocellulosics & Nanotechnology

### Dispersions, Gels, Foams, Colloids & Films

*Sponsored by CELL, Cosponsored by CARB and COLL*

### Elucidation of Mechanisms & Kinetics on Surfaces

## Organic Oxygenates

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## WEDNESDAY MORNING

### Section A

Mosccone Center  
2002

### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, S. Muralidharan, A. N. Parikh, N. Srividiya, *Organizers*

M. Nieh, *Organizer, Presiding*

J. Nickels, *Presiding*

**8:30 COLL 618.** Examining cell migration and cell junction dynamics using polymer gel-supported lipid bilayers. K.D. Shilts, Y. Ge, C. Naumann

**8:50 COLL 619.** Artificial biomembrane microsystems for highly sensitive analysis of membrane proteins. R. Watanabe

**9:15 COLL 620.** Synthesis and characterization of supported lipid bilayer membranes from complex lipid mixtures. G. Hardy, J. Shapter, M. Alam, S. Zauscher

**9:40 COLL 621.** Modulation of lipid membrane structure and dynamics in the presence of amyloid- $\beta$  peptide. T. HauB, M.A. Barrett, N.A. Dencher

**10:05 COLL 622.** Probing membrane protein organization and dynamics in planar model membranes using single molecule-sensitive confocal detection techniques. C. Naumann, Y. Ge, K. Shilts

**10:30 COLL 623.** Fusion processes of proteoliposomes into supported planar lipid bilayers. R. Tero, K. Fukumoto, M. Yoshida, A. Hirano-Iwata, M. Niwano

**10:55 COLL 624.** Topographic control of membrane functions. R. Ashkar, M. Zhermenkov, R.G. Toomey, R. Pynn, J. Katsaras, J. Carrillo, B. Sumpter

**11:20 COLL 625.** Tubule formation and retraction in the interaction of supported lipid bilayers with SDS. E.J. Eis, J. Churchwell, M. Staykova, C.D. Bain

**11:45 COLL 626.** Interfacial structure of water confined between phospholipid-coated surfaces probed by infrared-visible Sum Frequency Generation (SFG) spectroscopy. N. Dhopatkar, X. Shi, J. Brown, X. Li, A.W. Smith, A.N. Dhinojwala

### Section B

Mosccone Center  
2004

### Colloidal Nanoparticle Synthesis & Assembly

### Synthesis & Growth

Y. Sun, S. Wu, *Organizers*

H. Fan, H. Htoon, *Organizers, Presiding*

**8:30 COLL 627.** In situ study of colloidal nanoparticle growth and assembly. H. Zheng

**9:00 COLL 628.** Polymer-assisted deposition: A simple process for a wider range of electronic materials. Q. Jia

**9:30 COLL 629.** *In situ* Variable-Temperature Liquid Cell Transmission Electron Microscopy (VT-LCTEM) study of size-stabilized Covalent Organic Framework (COF) nanoparticle nucleation and growth during solvothermal synthesis. L.R. Parent, B.J. Smith, C. Park, W.R. Dichtel, N.C. Gianneschi

**9:50 COLL 630.** Paramagnetically amplified optical activity of chiral nanoparticles. J. Yeom, A. Farias de Moura, N. Kotov

**10:10 COLL 631.** Photoluminescence blinking and polarization anisotropy of single colloidal semiconductor nanoplatelets. Z. Hu, A. Singh, J.A. Hollingsworth, H. Htoon

**10:30 COLL 632.** Migration and structural evolution of carbon-encapsulated Fe nanoparticles via *in situ* TEM. R.V. Grieshaber, Z. Liu, J. Yang

**10:50 COLL 633.** Two-phase synthesis of metal sulfide nanoparticles. L. Bian, J. Maier, S. Marra, K. Ring, P. Goulet

**11:10 COLL 634.** Multi-shelled metal oxides hollow microspheres: Synthesis and applications. D. Wang, J. Wang, R. Yu, H. Zhao

**11:40 COLL 635.** Effect of ligand asymmetry in the properties of nanoparticle membrane. X. Lin, Z. Jiang, J. Wang, S. Deshmukh, P. Karjanaboos, G. Kamath, Y. Wang, H. Chan, B. Narayanan, S. Sankaranarayanan, H. Jaeger

## Section C

Mosccone Center  
2006

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

### Technique Development in Interfacial Science

*Cosponsored by CATL*

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**8:30 COLL 636.** High-energy-resolution x-ray absorption spectroscopy: A powerful method to push the frontiers of in-situ x-ray absorption spectroscopy of catalysts. S.R. Bare, D. Sokaras, T. Kroll, A. Gallo, A.S. Hoffman, B.C. Gates

**9:00 COLL 637.** Degree of rate control: A tool for analyzing microkinetic models and high-throughput computational screening of catalyst materials. C.T. Campbell, Z. Mao

**9:30 COLL 638.** High spatial resolution mapping of catalytic reactions on single nanoparticles. E. Gross

**10:00 COLL 639.** Monitoring real-time dynamics of nanoparticle formation via trading space with time strategy and synchrotron x-ray absorption spectroscopy technique. S. Bakhti, N. Destouches, M. Ahmed, S. Alayoglu

**10:30 COLL 640.** Time-resolved characterization of hierarchical diffusion and reactions in acidic zeolites and zeotypes with Temporal Analysis of Products (TAP) experiments. E. Redekop, J. Martinez, M. Morten, B.T. Bleken, R. Fushimi, M. Mykland, U. Olsbye

**11:00 COLL 641.** Solution calorimetry methods for the study of catalytic solid-liquid interfaces. R.M. Rioux

## Section D

Mosccone Center  
2008

### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

A. H. Flood, *Organizer*

S. L. Tait, *Organizer, Presiding*

**8:30 COLL 642.** Tuning the physical properties of MoS<sub>2</sub> membranes through organophosphonate-based surface functionalization. S. Schwarzwälder, R. Csiki, S. Zhao, K. Larsson, J. Schwartz, M. Stutzmann, U. Wurstbauer, A. Cattani-Scholze

**8:50 COLL 643.** Bottom-up hierarchical self-assembly of zwitterionic dendrimers into stimuli responsive dynamic nanotubes. S. Eghtesadi, M. Kashfipour, X. Sun, S. Lillard, T. Liu

**9:10 COLL 644.** 2D phase evolution and solvation in dimethyl formamide-lithium ethylene dicarbonate films on Ag(111). J.E. Reutt-Robey

**9:40 COLL 645.** Functionalization of 2D materials: The molecular approach. S. De Feyter

**10:10 COLL 646.** Supramolecular arrays and heterostructures on hexagonal boron nitride. P. Beton, V. Korolokov, J. Kerfoot, M. Baldoni, N. Besley, E. Besley, N.R. Champness, L. Yang, T. Taniguchi, K. Watanabe

**10:40 COLL 647.** Self-assembly and post-assembly chemical transformation of reactive compositionally patterned monolayers. M. Zimmt, C. Fang, J. He, R.A. Shelp, Y. Yang

**11:10 COLL 648.** Hierarchy in the self-assembly of novel chiral dyes for photovoltaic applications. D. Amabilino, F. Pop

**11:40 COLL 649.** Structure and function of bilayer organic photovoltaics. M.E. Thompson

## Section E

Mosccone Center  
2010

### Basic Research in Colloids, Surfactants & Nanomaterials

### Biomolecular Systems

R. Nagarajan, *Organizer*

K. S. Raja, *Presiding*

**8:30 COLL 650.** Biophysical properties of salt-induced simple coacervation of interfacial mussel adhesive proteins. B. Yang, H.J. Cha

**8:50 COLL 651.** Effect of additives on the crystal morphology of amino acids: A theoretical and experimental study. E. Constance, M. Mohammed, K. Aslan

**9:10 COLL 652.** Adsorption behaviors of mussel proteins on biomaterials with different surface chemistries: A fundamental understanding of mussel inspired adhesive designs. Y. Wei, C. Lin, Y. Lai, Y. Tang, P. Wang, D. Li, Y. Huang

**9:30 COLL 653.** Sponge mimetic tubules: Programmable stigmergy scaffolds for 3D marine, mammalian cell culture and bioelectronics. K.S. Raja, K. Punia

**9:50 COLL 654.** Dynamic interactions of amelogenin with hydroxyapatite surfaces are dependent on protein phosphorylation and solution pH. **A.E. Gerdon**, C.P. Connelly, T. Cicuto, J.D. Leavitt, A. Petty, A. Litman, H. Margolis

**10:10 COLL 655.** Investigation of oligomerization of amyloidogenic peptides at nanoscale gold colloidal interface. **K. Yokoyama**

**10:30 COLL 656.** Hydrodynamic effects in concentrated protein solutions with repulsive and attractive interactions. **D. Corbett**, P.J. Davis, C. van der Walle, S. Uddin, A. Pluen, R. Curtis

**10:50 COLL 657.** Effects of macromolecular crowding on a coacervation-based model for intracellular organization. **A. Marianelli**, B. Miller, C.D. Keating

**11:10 COLL 658.** Effects of phosphatidylcholine vesicles on adsorption kinetics at an air-water interface. **J. Staton**, S.R. Dungan

**11:30 COLL 659.** New colloidal approaches for human norovirus cleanup and deactivation using surfactants and copper-ion based disinfectants. **B. Mertens**, M. Moore, L. Jaykus, O.D. Velev

**11:50 COLL 660.** Spin selectivity in DNA-mediated charge transport: Base sequence and structure relationships. **J. Abendroth**, N. Nakatsuka, M. Ye, D. Kim, E. Fullerton, A.M. Andrews, P.S. Weiss

## Section F

Mosccone Center  
2012

### Applied Biosensing Based on Functional Colloids

R. Alvarez Puebla, L. Liz Marzan, W. Parak, J. Sagalés, G. F. Strouse, *Organizers*

N. Feliu, *Presiding*

**8:30 COLL 661.** Connecting the triangle. **J. Sagalés**

**8:50 COLL 662.** Optical visualization and quantification of enzyme activity using dynamic droplet lenses. **L.D. Zarzar**, J. Kalow, X. He, J. Walsh, T.M. Swager

**9:10 COLL 663.** Sandwich immunoassays for infectious disease diagnostics using noble metal nanoparticles. **C. Yen**, H. de Puig, J.O. Tam, M. Sanchez, M. Carre, J. Gomez-Marquez, I. Bosch, L. Gehrke, **K. Hamad-Schifferli**

**9:40 COLL 664.** Measuring heparin activity with a nanoparticle-functionalized catheter. **J. Wang**, F. Chen, **J.V. Jokerst**

**10:10 COLL 665.** Highly quenching nickel-gold core-shell magnetic plasmonic nanoparticles for biosensing. **P.N. Vakil**, G.F. Strouse

**10:30 COLL 666.** Enhanced energy coupling within a nanometal plasmon field for molecular ruler and in-vitro event mapping technologies. **G.F. Strouse**

## Section G

Mosccone Center  
2001

### Chemistry & Physics of Tribology

#### Biotribology, Biomimetic Systems & Lubrication in Aqueous Media

F. Mangolini, M. Ruths, *Organizers*

B. Krick, J. Wong, *Presiding*

**8:30 COLL 667.** Updating the mechanics of cartilage and joint lubrication. **D. Burris**

**9:05 COLL 668.** Colloid-probe AFM on gels and humidity-dependent AFM on hydrophilic networks: Aqueous tribology and glass-rubber transitions. **G.D. Haugstad**

**9:25 COLL 669.** Nanotribological studies of polymer brushes fabricated by near-field and interferometric lithography. **Z. Zhang**, O. Al Jaf, S.P. Armes, **G.J. Leggett**

**9:45 COLL 670.** Wear protection without surface modification: Is it possible? **X. Banquy**, J. Faivre, B. Shrestha, J. Burdyska, G. Xie, F. Moldovan, L. David, T. Delair, S. Benayoun, K. Matyjaszewski

**10:05 COLL 671.** Effect of multivalent counterions to the structure and lubrication properties of polystyrene sulfonate brushes. **J. Yu**, M.V. Tirrell

**10:25 COLL 672.** Tactile and hair-hair friction behavior of hair fibers. **N. Nordgren**, L. Skedung, N. Baghdadi, M.W. Rutland, **G.S. Luengo**

**10:45 COLL 673.** Effects of 3D surface patterning on the tribology of human stratum corneum and the topology of a polyurethane skin surface model. **R. Jin**, I. Liao, X. Xu, C. Cazeneuve, J.C. Chang, J. Langer, **M. Ruths**, **G.S. Luengo**

## Section H

Mosccone Center  
2003

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Nanomedicine

R. Nagarajan, *Organizer*

K. Slowinska, *Presiding*

**8:30 COLL 674.** Harnessing shape and bi-specific antibodies for improved cell-targeting efficiency of poly(ethylene glycol) capsules. **D. Song**, J. Cui, Y. Ju, H. Sun, K. Thurecht, F. Caruso

**8:50 COLL 675.** Galectin-1-based tumor-targeting for gold nanostructure mediated theranostics. **S.V. Jenkins**, D. Nedosekin, R. Dings, J. Chen, R. Griffin

**9:10 COLL 676.** Stem cell/nanoparticle conjugates for targeted cancer therapy. **J.M. Berlin**

**9:30 COLL 677.** Thermo-responsive hybrid peptide nanoparticles in targeting-free cell selection and uptake. **K. Slowinska**

**9:50 COLL 678.** Screening of prostate cancer cells using Zn(II) sensing SERS nanoprobe. **P.C. Ray**

**10:10 COLL 679.** Drug delivery using layered structured nanomaterials. **J.L. Colon**, J. Gonzalez, Y. Kan, V. Bakhmoutov, A. Clearfield

**10:30 COLL 680.** Probing the stability of liposomal spherical nucleic acids for therapeutic design. **B. Meckes**, R. Banga, C.A. Mirkin

**10:50 COLL 681.** Development and characterization of free-standing nano films loaded with iron nanoparticles for magnetic drug targeting. **M. Sakuragi**, H. Murayama, K. Taguchi, K. Kusakabe

**11:10 COLL 682.** Synthesis and biomedical application of metal and metaloxide nanocrystals. **Q. Zhang**, S. Tong, Y. Hu, G. Bao, **V. Colvin**

**11:30 COLL 683.** Nanolipoprotein particles for delivery of therapeutics to the brain. **S.F. Gilmore**, N.A. Be, H.A. Enright, M.A. Malfatti, A. Rasley, J. Osburn, S. Peters, N.O. Fischer

**11:50 COLL 684.** Formulation and study of highly stable, semifluorinated nanoemulsions with theranostic applications. **A.R. Barres**, S. Mecozzi

## Section I

Mosccone Center  
2005

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Polymer Materials & Gels

R. Nagarajan, *Organizer*

T. J. McCarthy, *Presiding*

**8:30 COLL 685.** Ice adhesion reducing polymers and prepolymers based on siloxanes and F-POSS. **R. Simons**, S. Li, L. Russel, S. Bateman, J. Seebergh, D. Berry

**8:50 COLL 686.** Withdrawn.

**9:10 COLL 687.** Rediscovering silicenes: Water repellency and water permeability. **P. Bian**, **T.J. McCarthy**

**9:30 COLL 688.** Development of new multi-functional polycarbonate platforms. **N. Park**, J. Hedrick

**9:50 COLL 689.** Withdrawn.

**10:10 COLL 690.** Directly linear alignment as different deacetylation of chitosan under electric field. **Y. Chun**, Y. Ko, T. Do, U. Choi

**10:30 COLL 691.** Stimuli-responsive cyclodextrin-modified microgels: Functional carriers with dynamic crosslinks and binding domains. **A. Pich**, D. Schmitz

**10:50 COLL 692.** Shape stability and mechanical properties of rhombic dodecahedron multilayer hydrogel capsules at various pH. **N. Gupta**, J. Chen, V.A. Kozlovskaya, B. Xue, E.P. Khariampieva

**11:10 COLL 693.** Synthesis of monolithic  $Cu_2(OH)_2Br$  aerogels. **T.M. Fears**, J.D. Colvin, S.O. Kucheyev

**11:30 COLL 694.** Synthesis of poly(2-methoxyethyl acrylate)-based hydrogel particles for bio-coatings and carriers. **T. Kureha**, D. Suzuki

**11:50 COLL 695.** Gelation of vegetable and mineral oils by an efficient and versatile low-molecular-mass gelator. **D. Bajani**, J. Dey

### Bio-based Gels & Porous Materials Biopolymer Hydrogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

#### Deposition & Etching of Nanostructures

*Sponsored by INOR, Cosponsored by COLL*

### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

*Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Spectroscopy & Microscopy of Photocatalytic & PEC Materials

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Chemical Principles of Environmental, Cellular & Organismal Nanotoxicology

*Sponsored by ENVR, Cosponsored by COLL*

### Mineral-Water Interface Chemistry

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

### Functional Lignocellulosics & Nanotechnology

#### Dispersions, Gels, Foams, Colloids & Films

*Sponsored by CELL, Cosponsored by CARB and COLL*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Organic Oxygenates

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## WEDNESDAY AFTERNOON

### Section A

Mosccone Center  
2002

### Biomembrane Synthesis, Structure, Mechanics & Dynamics

S. Muralidharan, M. Nieh, A. N. Parikh, N. Srividya, *Organizers*

J. Katsaras, *Organizer, Presiding*

R. Ashkar, *Presiding*

**2:00 COLL 696.** Preparation, characterization, and application of nanopore-supported phospholipid bilayers. **D. Bryce**, J.P. Kitt, J.M. Harris

**2:20 COLL 697.** Biomimetic construction of phospholipid membranes. **R.J. Brea Fernández**, C.M. Cole, A.K. Rudd, N.K. Devaraj

**2:45 COLL 698.** Interplay of structure and dynamics in mixed lipid bilayers. **E.G. Kelley**, R. Ashkar, R. Bradbury, P. Butler, M. Nagao

**3:10 COLL 699.** Neutron scattering to study membrane systems: From lipid vesicles to living cells. **J. Nickels**, S. Chatterjee, C.B. Stanley, S. Qian, X. Cheng, D. Myles, R.F. Standaert, J. Elkins, J. Katsaras

**3:35 COLL 700.** Human lipoproteins at model cell membranes: Role of the lipoprotein class on lipid dynamics. **K. Browning**, T. Lind, S. Maric, S. Malekhaat-Häffner, G.N. Fredrikson, E. Bengtsson, M. Malmsten, M. Cardenas

**4:00 COLL 701.** Lipoprotein structure dependency on lipid cargo and exchange dynamics: Implications for atherosclerosis development. **S. Maric**, T. Lind, J. Lyngso, E. Bengtsson, G.N. Fredrikson, M. Moulin, M. Haertlein, T. Forsyth, J. Pedersen, M. Cardenas

‡ Cooperative Cosponsorship

**4:25 COLL 702.** Probing the structure and dynamics of proteins using neutron scattering. **M. Sharp**

**4:50 COLL 703.** Effect of cholesterol on the elastic and viscous properties of dimyristoylphosphatidylcholine bilayers. **R. Bradbury, M. Nagao, E.G. Kelley**

## Section B

Moscone Center  
2004

### Colloidal Nanoparticle Synthesis & Assembly

Y. Sun, S. Wu, *Organizers*

H. Fan, H. Htoon, *Organizers, Presiding*

**2:00 COLL 704.** Observation of nucleation and growth during the formation of cadmium selenide and iron oxide nanoparticles and their use for biomedical imaging. **H. Weller**

**2:30 COLL 705.** Suppressed-blinking green-emitting giant quantum dots: From synthesis to structure to function. **J.A. Hollingsworth, N. Mishra, N. Orfield, J.R. McBride, C. Hanson, S. Click, Z. Hu, H. Htoon**

**3:00 COLL 706.** Tunable quasi-amorphous photonic materials with pigmentary colloidal nanostructures. **J. Han, E. Lee, J. Dudoff, M. Bagge-Hansen, J.R. Lee, A.J. Pascall, J.D. Kuntz, T. Willey, M.A. Worsley, Y.J. Han**

**3:20 COLL 707.** Chemical intercalation of superatomic solids. **E. O'Brien, X. Roy**

**3:40 COLL 708.** Self-assembly of nanoparticles via co-crystallization with proteins. **H. Kim, V. Colvin**

**4:00 COLL 709.** Reversible and precise self-assembly of Janus metal-organosilica nanoparticles through a linker-free approach. **H. Hu, Q. Zhang**

**4:20 COLL 710.** New class of branched and nanofibrous dendrimeric polymer particles with extraordinary adhesive and structure-building capabilities. **S. Roh, S.D. Stoyanov, O.D. Velev**

**4:40 COLL 711.** Controlling size in nanoparticle syntheses using the extended LaMer mechanism. **D. Huber**

**5:10 COLL 712.** Colloidal superparticles from colloidal crystallization in closed systems. **Y.C. Cao**

## Section C

Moscone Center  
2006

### Molecular Surface Science, Nanomaterials & Catalysis: Symposium in honor of Gabor Somorjai at 80

### Electrons & Photons in Interfacial Science

*Cosponsored by CATL*

S. H. Kim, R. M. Rioux, *Organizers, Presiding*

**2:00 COLL 713.** Surface bonding and chemistry for pyridine-catalyzed CO<sub>2</sub> reduction on GaP. **B.E. Koel**

**2:30 COLL 714.** Intercalation of metal ions into the interlayer region of layered manganese oxide for improved water oxidation electrocatalysis. **D.R. Strongin, A.C. Thenuwara, S. Shumlas, I.G. McKendry, R.C. Remsing, M. Zdilla, Q. Kang, M.L. Klein, E. Borguet, N. Attanayake, J. Sun, L. Frazier**

**3:00 COLL 715.** Understanding the surface reactions of the lithium-air battery and its consideration for usage in an automotive application. **C.J. Brooks, Q. Xu, E. Kreidler**

**3:30 COLL 716.** Experimental and computation studies of the reaction of hydrogen and organic peroxide on molybdenum hydrogen bronze surfaces. **N.F. Materer, A.W. Apblett**

**4:00 COLL 717.** Systematic approaches to modify the surface and electronic structure of TiO<sub>2</sub> nanocrystals. **C. Balasanthiran, S. Varapragasam, S. Mia, R.M. Rioux, J.D. Hoefelmeyer**

**4:30 COLL 718.** Photoelectrical response of mesoporous metal oxides decorated with size controlled platinum nanoparticles under argon and oxygen gas. **A. Sapi, A. Kukovec, Z. Konya**

## Section D

Moscone Center  
2008

### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

S. L. Tait, *Organizer*

A. H. Flood, *Organizer, Presiding*

**2:00 COLL 719.** 4D nanolithography using a flow-through polymer printer. **A.B. Braunschweig**

**2:30 COLL 720.** Colored soaps for photonics. **M. Presselt, F. Herrmann-Westendorf, M. Kaufmann, S.K. Das, M.L. Hupfer, B. Dietzek**

**2:50 COLL 721.** Metal-organic coordination chains at surfaces: Chemical activity of single-site transition metal centers. **S.L. Tait, C. Tempas, L. Chen, T.W. Morris, C.G. Williams, M. Wang, D.L. Wisman, B.J. Cook, A.V. Polezhaev, K.G. Caulton**

**3:20 COLL 722.** Computational design of metal-ligand coordination centers for catalytic applications. **T.S. Rahman**

**3:50 COLL 723.** Two-dimensional organic heterostructures and Co-crystals. **A. Enders**

**4:20 COLL 724.** Axial binding to supported metal porphyrins at the solution-solid interface. **K. Hipps, U. Mazur Hipps**

**4:50 COLL 725.** Development of fragment-based quantum chemical models for understanding supramolecular interactions and self-assembly. **K. Raghavachari, A. Sengupta, S. Debnath**

**5:20 COLL 726.** Tuning the exchange coupling of transition metal complexes to gold substrates by magnetic fields. **T. Pope, K. Yang, H. Chen, L. Liu, D. Wang, L. Tao, W. Xiao, X. Fei, H. Luo, S. Du, T. Xiang, W. Hofer, H. Gao**

**5:40 COLL 727.** Theoretical studies of adsorption and self-assembly of probe organic molecules at metal oxide surfaces. **X. Gong, Y. Yu, Q. Cuan**

## Section E

Moscone Center  
2010

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Bionanomaterials

R. Nagarajan, *Organizer*

P. Kral, *Presiding*

**2:00 COLL 728.** Enhanced immobilization of His-tagged enzymes using porous nickel silicate covered magnetic nanoparticles. **M. Shin, B. Kang, N. Yoon, M. Kim, J. Ki, S. Han, J. Ahn, S. Haam**

**2:20 COLL 729.** Diffusion of biomolecules in vesicle assembled RNA-based coacervates. **F. Pir-Cakmak, W.M. Aumiller, B. Davis, C.D. Keating**

**2:40 COLL 730.** Atomistic modeling of highly specific bio-active nanoparticles and micelles. **P. Kral**

**3:10 COLL 731.** Controlling colloidal drug aggregate stability and protein adsorption. **A. Ganesh, J. Logie, C. McLaughlin, B. Shoichet, M.S. Shoichet**

**3:30 COLL 732.** Investigation of silk fibroin thin films for the improvement of bioactive peptide-based biosensors. **L. Soblosky, J.R. Uzarski**

**3:50 COLL 733.** Oligonucleotide - peptide complexes: Phase control by hybridization. **J. Viereg, M.J. Lueckheide, A. Marciel, L. Leon, M.V. Tirrell**

**4:10 COLL 734.** Ultra-rapid crystallization of L-alanine using monomode microwaves, indium tin oxide, and metal-assisted and microwave-accelerated evaporative crystallization. **C. Lansiquot, Z. Boone-Kukoyl, R. Shortt, N. Thompson, H. Ajifa, B. Kioko, E. Constance, T. Clement, B. Ozturk, K. Aslan**

**4:30 COLL 735.** Synthesis of platinum (II) - nuclear localization sequence peptide hybrid for nanoparticle development and anticancer therapy. **M. Wlodarczyk, O. Camacho-Vanegas, S. Dragulska, A. Jarzecki, P.R. Dottino, J.A. Martignetti, A.J. Mieszawska**

**4:50 COLL 736.** Design and evaluation of trigger-responsive DNA-drug nanostructures. **X. Tan, X. Lu, F. Jia, X. Liu, Y. Sun, J. Logan, K. Zhang**

**5:10 COLL 737.** Production of protein nanofibers using new timesaving methodologies for the design of innovative biomedical applications. **N.H. Silva, T. Carvalho, A.A. Silvestre, I. Marrucho, C. Freire**

## Section F

Moscone Center  
2012

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Carbon Materials

R. Nagarajan, *Organizer*

J. R. Uzarski, *Presiding*

**2:00 COLL 738.** Carbon nanotube-quantum dot nanohybrids: Coupling with single particle control in aqueous solution. **A. Attanzio, M. Palma**

**2:20 COLL 739.** Fabrication of laser-induced graphene under controlled gas atmosphere - from superhydrophilic to superhydrophobic. **Y. Li, D. Luong, J. Zhang, J.M. Tour**

**2:40 COLL 740.** Fabrication of carbon nanotubes conductive patterns by extrusion printing method. **A. Aldabahi, M. Panhuis, C. Fan**

**3:00 COLL 741.** Multiplexed graphene-based nanomaterials for discriminatory sensing: A combined fundamental and applied experimental approach. **J.R. Uzarski, E. Nailon, S. McGraw, M. Wiederoder, T. Lawton, C. Bright**

**3:30 COLL 742.** Withdrawn.

**3:50 COLL 743.** Shear thickening behavior of graphene nanoplatelets and carbon nanotubes containing fumed silica suspensions. **M. Zabet, K. Trinh, H. Toghiani, T. Lacy, C.U. Pittman, S. Kundu**

**4:10 COLL 744.** Plasma-enhanced graphene and graphene oxide based conducting polymer composites for solar cell and biosensor applications. **A. Ungun Oksuz, S. Cogal, G. Celik Cogal, S. Tunc, F. Kuralay, S. Erten Ela, M. Ormastova, S. Ahmad**

**4:30 COLL 745.** Synthesis and characterization of water-based dispersions of high-purity, thin graphene oxide sheets from different graphitic sources. **D. Jasim, K. Kostarelos**

**4:50 COLL 746.** Bioinspired Polydopamine (PDA) chemistry meets Ordered Mesoporous Carbons (OMCs): A benign surface modification strategy for versatile functionalization. **Y. Song, G. Ye, J. Wang, K. Matyjaszewski**

## Section G

Moscone Center  
2001

### Chemistry & Physics of Tribology Tribology in Extreme Environments & Advances in Solid Lubrication

F. Mangolini, M. Ruths, *Organizers*

X. Banquy, S. Didziulis, *Presiding*

**2:00 COLL 747.** Aging effects on the transient frictional behavior of MoS<sub>2</sub>-based solid lubricants for use in extreme environments. **M. Dugger**

**2:35 COLL 748.** Understanding friction in MoS<sub>2</sub>: Structure, oxidation and run-in. **J. Curry, M. Sidebottom, H. Luftman, N. Strandwitz, N. Argibay, B. Krick**

**2:55 COLL 749.** Lubricant effects in space system performance. **S.V. Didziulis, P.P. Frantz, V. Oklejas, J.M. Helt**

**3:15 COLL 750.** Interactions between oil-soluble phosphonium-phosphate ionic liquids and steel in the mixed and boundary lubrication regime. **S. Berkebile, N. Murthy, J. Mogonye**

**3:35 COLL 751.** Linking microstructure to wear-induced pitting corrosion in aged 2507 super duplex stainless steel. **J.M. Shockley, D. Horton, K.J. Wahl**

**3:55 COLL 752.** Amazing friction properties of graphene and water. **M. Salmeron, J. Park**

**4:30 COLL 753.** Effect of thickness and chemical reduction of graphene oxide on nanoscale friction. **J. Park, S. Kwon, H. Lee**

**4:50 COLL 754.** Studies of the dynamic frictional properties of 2D nanomaterials. **M.B. Elinski, Z. Liu, M. Negrito, J.D. Batteas**

**5:10 COLL 755.** Boron nitride nanomesh model system for stiction and adhesion. **S. Mertens**, A. Hemmi, S. Muff, O. Groening, S. De Feyter, J. Osterwalder, T. Greber

**5:30 COLL 756.** Understanding the influence of environment and surface patterning on the tribological behaviour of silicon-oxide containing diamond-like carbon (a-C:H:Si:O) films. **K. Koshigan**, J. Lengaigne, R. Carpick, J. Fontaine, J. Sapieha, L. Martinu

### Section H

Moscone Center  
2003

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Nanomedicine

R. Nagarajan, *Organizer*

M. Ruths, *Presiding*

**2:00 COLL 757.** Antioxidant carbon nanomaterials for treating autoimmune disorders. **L.G. Nilewski**, R. Huq, E.L. Samuel, W.K. Sikkema, R. Pautler, D.B. Corry, C. Beeton, J.M. Tour

**2:20 COLL 758.** Characterization of amphiphilic copolymer micelles for drug delivery. **X. Xu**, B. Gupta, S. Kaur, J. Nguyen, R. Jin, A.C. Watterson, **M. Ruths**

**2:40 COLL 759.** Tuning the drug uptake and release from silica nanostructures as a function of etching medium. **H. Thawani**, V. Patel, S. Singh, **A. Karakoti**

**3:00 COLL 760.** Filomicelles deliver retinoids and chemotherapeutics to durably control carcinoma cell fate. **P. Nair**, D.E. Discher

**3:20 COLL 761.** Influences of serum proteins on the uptake of Fe<sub>3</sub>O<sub>4</sub> nanoparticles by human breast cancer cells. **L. Guo**, T. Wang, N. He

**3:40 COLL 762.** Hyperthermia properties of superparamagnetic ferrite (MFe<sub>2</sub>O<sub>7</sub>) nanoparticles synthesized via the thermal decomposition method. **S. Sabale**, V. Jadhav, X. Yu

**4:00 COLL 763.** Microwave heating of synthetic skin for potential treatment of gout using the metal-assisted and microwave-accelerated decrystallization technique. **S. Toker**, Z. Boone-Kukoyi, N. Thompson, H. Ajifa, T. Clement, B. Ozturk, K. Aslan

**4:20 COLL 764.** Novel platelet-repellent polyphenolic surfaces and their micropattern for platelet adhesion detection. **L. Yang**, L. Han, L. Jia

**4:40 COLL 765.** Modeling of polymer based micelles and DNA delivery medicines. **Y. Han**, P. Kral

**5:00 COLL 766.** Surface modification of nanoscale diamond for biolabeling with the nitrogen vacancy center. **P. Tran**, P.J. Sandoval, J. Hnatek, E.S. Favre, A. Arreola, A.A. Len, I. Laaguidi, A. Hernandez, D. Nordlund, **A. Wolcott**

**5:20 COLL 767.** Classification of bacteria by surface enhanced Raman spectroscopy and principal component analysis. **S.J. Jones**, S.S. Sinha, P.C. Ray

### Section I

Moscone Center  
2005

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Colloidal Assembly

R. Nagarajan, *Organizer*

S. A. Santer, *Presiding*

**2:00 COLL 768.** Light driven diffusion: Manipulation of particle assembly. **S.A. Santer**

**2:20 COLL 769.** Block copolymer morphology switch via colloidal assembly and local reorganization. **D. Wright**, J.P. Patterson, M. Touve, A. Carlini, N.C. Gianneschi

**2:40 COLL 770.** Tailored nanoparticles by wet chemical particle technology: From lab to pilot scale. **K. Mandel**

**3:00 COLL 771.** Multipole re-expansion model for assembly of dielectric particles in external electric field. **G. Goel**, A. Nayeer, A. Ranjak, S. Gupta

**3:20 COLL 772.** Patchy particles via cluster fusion. **Z. Gong**, T. Hueckel, G. Yi, S. Sacanna

**3:40 COLL 773.** Modeling of magnetization in self-assembled magnetic nanocubes. **C. Wang**

**4:00 COLL 774.** Reconfigurable colloids via stimulated dewetting. **M. Yousef**, T. Hueckel, G. Yi, S. Sacanna

**4:20 COLL 775.** Burstable nanostructured micro-raspberries: Toward redispersible, adjustable nanoparticles from dry powders. **C. Stauch**, T. Ballweg, R. Luxenhofer, K. Mandel

**4:40 COLL 776.** Inducing an order-order morphological transition via chemical degradation of amphiphilic diblock copolymer nano-objects. **L.P. Ratcliffe**, C. Couchon, S.P. Armes, J.M. Paulusse

### Bio-based Gels & Porous Materials

#### Biopolymer Organogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

#### Deposition & Etching of Nanostructures

*Sponsored by INOR, Cosponsored by COLL†*

#### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

*Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL*

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Devices, Assemblies & Hybrid Processes

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Functional Lignocellulosics & Nanotechnology

#### Responsive Materials & Biosensors

*Sponsored by CELL, Cosponsored by CARB and COLL*

#### Elucidation of Mechanisms & Kinetics on Surfaces

#### Mechanisms: Hydrogenation

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## WEDNESDAY EVENING

### Chemical Principles of Environmental, Cellular & Organismal Nanotoxicology

*Sponsored by ENVR, Cosponsored by COLL*

#### Mineral-Water Interface Chemistry

#### A Tribute to Glenn Waychunas

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

#### General Session

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

## THURSDAY MORNING

### Section A

Moscone Center  
2002

### Biomembrane Synthesis, Structure, Mechanics & Dynamics

J. Katsaras, M. Nieh, A. N. Parikh, N. Srividya, *Organizers*  
S. Muralidharan, *Organizer, Presiding*

**9:00 COLL 777.** Controlled drug release from magneto-liposomes via ultrasound generation. **G. Podaru**, V. Chikan, P. Prakash

**9:20 COLL 778.** Mechanical characterization of self-assembled surfactant micelles at graphite surfaces via atomic force microscopy. **B.L. Micklavzina**, M.L. Longo, S. Zhang, H. He

**9:40 COLL 779.** Carbon nanotube enhancement of water and ion permeability of diblock copolymer membranes. **J. Sanborn**, R. Tunuguntla, X. Chen, A.N. Parikh, A. Noy

**10:00 COLL 780.** Shape morphogenesis in giant lipid vesicles in an osmotic field gradient. **S. Hong**, V. Sharma, V. Nguyen, D. Gettel, J. Sanborn, A.N. Parikh

**10:20 COLL 781.** Single-molecule detection of biomarker molecules in a nanometric gap structure with fluid lipid membrane. **K. Ando**

**10:40 COLL 782.** Phase separation and curvature generation in biphasic giant lipid vesicles reconstituting plant plasma membrane lipids. **S. Emami**, V. Ngassam, A.N. Parikh

**11:00 COLL 783.** Evaluating the interactions of lipid raft and proteins involved in phototransduction by using a micropatterned model membrane. **Y. Tanimoto**

**11:20 COLL 784.** Morphological consequences of surface-mediated spinodal decomposition inside giant vesicles. **W. Su**, D. Gettel, M. Chabanon, S. Hong, P. Rangamani, A.N. Parikh

**11:40 COLL 785.** Small molecule induced fusion of a model protocell membrane composed of fatty acids: A new insight into the membrane fusion monitored through fluorescence lifetime imaging microscopy. **N. Kundu**, N. Sarkar

### Section B

Moscone Center  
2004

### Colloidal Nanoparticle Synthesis & Assembly

H. Fan, H. Htoon, Y. Sun, S. Wu, *Organizers*  
F. Bai, Y. Jang, *Presiding*

**8:30 COLL 786.** Modeling nanoparticle assembly: Using polymer coatings, interfaces, and pressure to build 1D, 2D, and 3D nanostructures. **J.M. Lane**

**9:00 COLL 787.** Constructing theranostics based on fluorescent carbon nanodots. **Z. Sun**

**9:30 COLL 788.** Engineering bimetallic nanocrystals as artificial enzymes for colorimetric detection of disease biomarkers. **X. Xia**, H. Ye

**10:00 COLL 789.** Tuning functional nanoparticulate and nanoporous structures using atomic layer deposition. **Y. Jiang**

**10:20 COLL 790.** Atomistic modeling of nanoparticle formation, modification and self-assembly in liquid cells. **P. Kral**

**10:40 COLL 791.** Modeling of self-assembly dynamics of charged nanoparticles in liquid cells. **F. Sanoj**

**11:00 COLL 792.** Modeling the nucleation and growth of palladium nanoparticles in the presence of capping ligands. **S. Mozaffari**, W. Li, C. Thompson, A.M. Karim

**11:20 COLL 793.** Cellulose nanocrystal-derived stimulus-responsive cholesteric microgels having catalytic properties. **S. Cho**, Y. Li, M. Seo, E. Kumacheva

**11:40 COLL 794.** Controlled self-assembly of porphyrin and applications. **F. Bai**

### Section C

Moscone Center  
2006

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Surface Studies

R. Nagarajan, *Organizer*

T. Lawton, *Presiding*

**8:30 COLL 795.** Probing heterogeneity and bonding at silica surfaces through single-molecule investigation of base-mediated linkage failure. **K. Lupo**, D. Hinton, J. Ng, N. Padilla, R.H. Goldsmith

**8:50 COLL 796.** Balancing multiple orthogonal functions simultaneously on a single surface. **T. Lawton**, J.R. Uzarski, S. Filocamo

**9:10 COLL 797.** Optimization of micro/nanocapsules attachment by tailoring the surface nature of textiles. **W. Akbar**, R. Ihnfeldt, **G. Basim**

**9:30 COLL 798.** Determining optimum surface preparations to control the selectivity of ethanol chemistry over TiO<sub>2</sub>/Au(111). **A. Baber**, D. Boyle, J. Wilke, V.H. Lam

**9:50 COLL 799.** Directing and morphing bouncing water droplets using chemically patterned surfaces. **T. Dong**, T.J. McCarthy

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

**10:10 COLL 800.** Rapid covalent surface modifications using the Piers-Rubinsztajn reaction. **D. Flagg**

**10:30 COLL 801.** Single-nanogap level characterization of ultra-dense Nanogap-Enhanced Raman Scattering (NERS) array surface. **Y. Suh**

**10:50 COLL 802.** Reactions of persistent carbenes with silicon surfaces. **A.V. Zhukhovitskiy**, M. Mavros, K.L. Queeney, T. Wu, T.A. Van Voorhis, J.A. Johnson

**11:10 COLL 803.** On the role of non-bulk interfacial structures in rutile-anatase TiO<sub>2</sub> interfaces. **M. Nolan**, K.A. Gray

**11:30 COLL 804.** *In situ* chemical imaging of energy and environmental interfaces. **X. Yu**

**11:50 COLL 805.** CuInS<sub>2</sub>-ZnS-based electro optic devices: Surface, surface and surface. **G. Zaiats**, J.B. Hoffman, S. Kinge, P.V. Kamat

## Section D

Moscone Center  
2008

### Hierarchical Self-Assembly of Organic Monolayers, Bilayers & Films: Theory & Experiment

A. H. Flood, *Organizer*

S. L. Tait, *Organizer, Presiding*

**8:30 COLL 806.** From standing to sitting: Leveraging iterative phase segregation to create hierarchically nanostructured synthetic materials. **S.A. Claridge**

**8:50 COLL 807.** Effect of the first layer on polyelectrolyte multilayer structure. **X. Lyu**, A.M. Peterson

**9:10 COLL 808.** Partitioning of organic solutes into bilayers formed by non-ionic surfactants. **J. Siewmann**, M.S. Minkara, R.K. Lindsey, S.N. Jamadagni, D.M. Eike, P.H. Koenig

**9:40 COLL 809.** Beyond self-assembly: 2D chemical interactions and patterns, a computational approach to complex systems. **F. Zerbetto**

**10:10 COLL 810.** Understanding polymorphic accessibility and stability in molecular semiconductor thin films. **Y. Loo**

**10:40 COLL 811.** Principles and applications of grazing incidence small angle and wide angle x-ray scattering. **B. Lee**

**11:10 COLL 812.** Rational design of block copolymer compatibilizers for ternary blend polymer bulk heterojunction solar cells. **D. Kipp**, R. Verduzco, **V. Ganesan**

**11:40 COLL 813.** Nano-phase behavior of surface-adsorbed, monodisperse oligodimethylsiloxane-based block molecules. **J. Teyssandier**, J.A. Berrocal, B. de Waal, E.W. Meijer, S. De Feyter

**12:00 COLL 814.** Fast, facile, and scalable fabrication of slippery liquid-infused surfaces using layer-by-layer assembly enabled by in-situ proton transfer. **G.H. Zhu**, N. Zacharia

## Section E

Moscone Center  
2010

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Self-Assembly

R. Nagarajan, *Organizer*  
K. Sakurai, *Presiding*

**8:30 COLL 815.** Platonic micelles: Glutamic acids bearing calix[4]arene micelle: pH-controllable aggregation number corresponding to regular polyhedra. **S. Fujii**, K. Sakurai

**8:50 COLL 816.** Platonic micelles: Thermodynamic consideration of the micelles with the discrete aggregation numbers and mon-dispersity. **K. Sakurai**

**9:10 COLL 817.** Synthesis of epoxy-functional diblock copolymer nano-objects via polymerisation-induced self-assembly and their use as Pickering emulsifiers. **F. Hatton**, K. Thompson, S.P. Armes

**9:30 COLL 818.** Time-resolved small-angle x-ray scattering studies of the micellar nucleation event during polymerization-induced self-assembly. **M.J. Derry**, O. Mykhaylyk, S.P. Armes

**9:50 COLL 819.** pH-resolved self-assembly of microbial glycolipids: Mechanistic insights. **N. Baccile**

**10:10 COLL 820.** Hydrogen bonding asymmetric star-shape derivative of bile acid leads to supramolecular fibrillar aggregates that wrap into micrometer spheres. **T.T. Myllymäki**

**10:30 COLL 821.** Self-assembly of zwitterionic sulfobetaine siloxane onto silica nanoparticles for application as a versatile antifouling coating system. **B. Knowles**, P. Wagner, S. MacLaughlin, M. Higgins, P. Molino

**10:50 COLL 822.** Self-assembled protein vesicles made from recombinant fusion proteins. **Y. Jang**, W. Choi, J. Champion

**11:10 COLL 823.** Novel readily biodegradable disulfonate surfactants. **W. Yu**, Y. Cheng, E. Daugs, A. Argenton

**11:30 COLL 824.** Novel liposome-based Surface Enhanced Raman spectroscopy (SERS) substrate. **W. Lum**, I. Bruzas, Z. Gorunmez, S. Unser, L. Sagle

**11:50 COLL 825.** Block copolymer templated mono- and bimetallic catalysts for fuel cell electrocatalysis. **D.A. Rider**

## Section F

Moscone Center  
2012

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Metal Nanomaterials

R. Nagarajan, *Organizer*  
L. Cademartiri, *Presiding*

**8:30 COLL 826.** Initial growth of Au nanostructures on TiO<sub>2</sub>(110)-1x1 surface at elevated temperature. **X. Tong**

**8:50 COLL 827.** Polymer-like nanowires. **L. Cademartiri**

**9:10 COLL 828.** Functional and structural characterization of multi-functional gold nanoparticles. **L. Calzolari**, R. Capomaccio, I. Ojea Jimenez, D. Gilliland

**9:30 COLL 829.** Frugal innovation: Synthesis and applications of under-cooled metal particles. i. Tevis, J. Chen, C. Frankiewicz, A. Martin, **M. Thuo**

**9:50 COLL 830.** Withdrawn.

**10:10 COLL 831.** Chemical identity of surfactants control the electronic behaviors of the metallic core in gold nanoparticles. **B.J. Lear**, A. Cirri

**10:30 COLL 832.** Assessment of the physical stability of metal and metal oxide films for enhanced signal detection in colorimetric bioassays. **E. Bonyi**, Z. Kukoyi, O. Daodu, K. Aslan

**10:50 COLL 833.** Size and shape dissolution of silver nanoparticles. **Y. Hu**, Q. Zhang, V. Colvin

**11:10 COLL 834.** Hidden electrostatic asymmetry of gold nanorods. **J. Kim**, M. Lien, M. Han, S. Magonov, Y. Zhu, H. Ferguson, J. Schotland, Y. Chang, T. Norris, N. Kotov

**11:30 COLL 835.** Comparative roles of Zr(IV) and Ni(II) hetero-metal substituted polyoxometalates in oxidation solutions. **S.L. Giles**, J. Lundin, P.E. Pehrsson, R.B. Balow, W.O. Gordon, G.W. Peterson, B.T. Rasley, J.H. Wynne

**11:50 COLL 836.** Multi-stage transformation and lattice fluctuation at AgCl-Ag nanoparticle interface. **J.S. Du**, J. Park, Q. Kim, V.P. Dravid, D. Yang, D.A. Weitz

## Section G

Moscone Center  
2001

### Basic Research in Colloids, Surfactants & Nanomaterials

R. Nagarajan, *Organizer*

K. C. Tvrdy, *Presiding*

**8:30 COLL 837.** Novel sol-gel derived TiO<sub>2</sub>-SiO<sub>2</sub> particle systems for direct ink writing compositionally tailored GRIN glasses. **J.F. Destino**, T. Yee, N. Dudukovic, C. Meyers, D. Nguyen, E. Duoss, R. Dylla-Spears

**8:50 COLL 838.** New algorithm to model quantum growth dot dynamics. **K.C. Tvrdy**, N. Weeks

**9:10 COLL 839.** Damping of quantum dot acoustic phonons by chalcogenide surface ligands. **K. Schnitzenbaumer**, G. Dukovic

**9:30 COLL 840.** Microfluidic discovery platform: Toward nanoparticle functionalization through closed loop optimization. **K. Park**, S. Izor, J.D. Watt, D. Huber, D.H. Wang, L. Tan, R.A. Vaia

**9:50 COLL 841.** First steps in the Fischer-Tropsch reaction catalyzed by ultra-small ruthenium nanoparticles: A DFT study. **L. Cusinato**, L.M. Martínez-Prieto, B. Chaudret, I. Del Rosal, **R. Poteau**

**10:10 COLL 842.** Magnetic nanoparticles as contrast agents for reservoir imaging. **S. Al Hassan**, M. Subrati, G. Papavassiliou, D. Gournis, S. Pantelides, H. Kim

**10:30 COLL 843.** Characterization of nanoparticle interactions and thin film properties using MP-SPR. **N. Granqvist**, A. Jokinen, J. Kuncova-Kallio, J.W. Sadowski

**10:50 COLL 844.** Controlled nanoparticle morphology transitions induced by high-pressure ice-segregation. **J. Snitker**, M.O. Montes

**11:10 COLL 845.** Inorganic-organic hybrid electrical devices based on nanoparticle arrays for switchable current and spin transport. **R.C. Bruce**, C.A. Hacker

**11:30 COLL 846.** 2µm Ultrathin silica shells doped with iron (III) for low threshold of CPS and color doppler ultrasound performance and notable biodegradability. **C. Huang**, J. Yang, J. Wang, J. Oviedo, W.C. Trogler, A. Kummel, M. Kim

## Section H

Moscone Center  
2003

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Colloids in Environment & General Papers

R. Nagarajan, *Organizer*

K. Mandel, *Presiding*

**8:30 COLL 847.** Superparamagnetic carrier particles for water purification, resources recovery and substance sensing in fluids. **K. Mandel**

**9:00 COLL 848.** Colloidal gold nanorods uptake study on *C. fluminea* filter-feeding bivalve clams: Effect of aspect ratio and surface coating. **S. Abtahi**, P.J. Vikesland, C.J. Murphy, N.B. Saleh

**9:20 COLL 849.** Plasma modified catalytic micromotors. **L. Oksuz**, G. Yurdabak Karaca, E. Uygun, U. Koc, F. Kuralay, A. Uygun Oksuz

**9:40 COLL 850.** Thermochemistry of MAX and MXene phases. **G. Sharma**, M. Naguib, D. Feng, Y. Gogotsi, A. Navrotsky

**10:00 COLL 851.** Incorporating oxygenates into diesel fuel systems via stable reverse micelles. **M. Webb**, T. Riffi, W.J. Orts, **K. Aramthanapon**

**10:20 COLL 852.** Effect of viscosity on the propulsive motion of catalytic Janus motors. **P. Chatterjee**, E. Tang, P. Underhill

**10:40 COLL 853.** Manipulating single molecular junctions using electrochemical environments. **Y. Zang**, M.S. Inkpen, L. Venkataraman

**11:00 COLL 854.** Effect of moisture on the hydrolysis of basic salts. **X. Shi**, K. Lackner

**11:20 COLL 855.** Moisture-swing thermodynamics. **H. Azarabadi**, K. Lackner

## Section I

Moscone Center  
2005

### Basic Research in Colloids, Surfactants & Nanomaterials

#### Synthesis of Colloids & in Colloidal Media

R. Nagarajan, *Organizer*

M. Stefiik, *Presiding*

**8:30 COLL 856.** Organometallic route to layered zinc hydroxides and their exfoliated monolayers in apolar solvents. **A. Leung**, S.D. Pike, A.J. Clancy, H. Yau, M. Shaffer, C.K. Williams

**8:50 COLL 857.** Precision tunable nanomaterials from persistent micelle templates. **M. Stefiik**

**9:10 COLL 858.** Facile, single-pot preparation of nanoporous silica with AgNPs at the core and curst for controlled Ag<sup>+</sup> ion release. **M. Salman Haider**, G.N. Shao, K. Hee Taik

**9:30 COLL 859.** Selective electropolymerization of aniline on an ITO electrode using magnetic nanoparticles and a varying magnetic field. **D. Wirth**

**9:50 COLL 860.** Morphology, structure, and optical properties of 2D SnS nanoplates synthesized via a hot-injection method. **N. Trejo, A. Hunter, M. Nguyen, C. Wrasman, J. Dwyer, E.S. Aydil**

**10:10 COLL 861.** Synthesizing and screening high mobility nanoparticles. **D. Garcia-Rojas, G. Escalera, A. Mendoza-Garcia, C. Masterson, V. Colvin**

**10:30 COLL 862.** Surfactant-induced shape changes in oil droplets caged in deformable polymer shells as templates for the synthesis of anisotropic polymer particles. **X. Guo, N.L. Abbott, D.M. Lynn**

**10:50 COLL 863.** Synthesis and chemical transformation of nickel nanoparticles embedded in silica. **B.B. Lynch, B.D. Anderson, W.J. Kennedy, J.B. Tracy**

**11:10 COLL 864.** Carboxylate decomposition: A critical step in high temperature synthesis of metal oxide nanocrystals. **C. Masterson, A. Mendoza-Garcia, V. Colvin**

**11:30 COLL 865.** Synthesis and characterization of metal-doped synthetic melanin nanoparticles. **Z. Wang, Y. Li, Y. Huang, N.C. Gianneschi**

**11:50 COLL 866.** Effect of solution composition on Pu oxide nanoparticle morphology. **T. Parsons-Moss, J. Shusterman, D. Olive, Z. Dai, M. Zavarin, A. Kersting**

#### Bio-based Gels & Porous Materials

##### Aero-, Cryo- & Xerogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

##### Elucidation of Mechanisms & Kinetics on Surfaces

##### Mechanisms: Metals

Sponsored by CATL, Cosponsored by COLL and ENVR

##### Oxides

Sponsored by CATL, Cosponsored by COLL and ENVR

##### Functional Lignocellulosics & Nanotechnology

##### Responsive Materials & Biosensors

Sponsored by CELL, Cosponsored by CARB and COLL

## THURSDAY AFTERNOON

#### Bio-based Gels & Porous Materials

##### Open-Porous Carbon Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

##### Elucidation of Mechanisms & Kinetics on Surfaces

##### Oxidation Reactions

Sponsored by CATL, Cosponsored by COLL and ENVR

##### Beyond Hydrocarbons

Sponsored by CATL, Cosponsored by COLL and ENVR

##### Functional Lignocellulosics & Nanotechnology

#### (nano)Paper: From Fundamentals to Applications/Antimicrobial, Functional Materials

Sponsored by CELL, Cosponsored by CARB and COLL

## COMP

### Division of Computers in Chemistry

**H. Woodcock, M. Feig and J. Shen,**  
Program Chairs

#### BUSINESS MEETINGS:

Business Meeting, 3:00 PM: Sat

#### SOCIAL EVENTS:

Social Hour, 7:00 PM: Sat

## SUNDAY MORNING

### Section A

InterContinental San Francisco  
Twin Peaks

#### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

##### Allosteric Regulation & Mechanisms

Cosponsored by PHYS

C. Chang, Organizer

G. Verkhrivker, Organizer, Presiding

8:30 Introductory Remarks.

**8:45 COMP 1.** Allosteric mechanisms in receptor function and modulation: Toward a new pharmacology. **J. Changeux**

**9:30 COMP 2.** Allosteric functional mechanisms of molecular machines in the cell membrane. **H. Weinstein, M.V. LeVine, G. Khelashvili, M.A. Cuendet, A. Razavi**

**10:00 COMP 3.** Allostery driven by metal ions: Getting transition metal ions around cells safely. **K.M. Merz**

10:30 Intermission.

**10:50 COMP 4.** Dissecting and controlling protein allostery. **N. Dokholyan**

**11:20 COMP 5.** Entangled relationships: Protein flexibility, allostery, and mutation. **D. Livesay**

**11:50 COMP 6.** Toward rational allosteric engineering of molecular motor and switch protein function. **B. Grant**

### Section B

InterContinental San Francisco  
Fremont

#### Catalytic Materials from Molecular Insight

Cosponsored by CATL, MPPG<sup>†</sup> and PHYS

K. Honkala, B. Liu, Organizers

B. Liu, Presiding

**8:30 COMP 7.** Advances in density functional theory for molecules and materials. **N. Mardirossian, M.P. Head-Gordon**

**9:05 COMP 8.** New discovery tools for transition metal catalyst design. **T.Z. Gani, J.P. Janet, E. Ioannidis, H.J. Kulik**

**9:40 COMP 9.** Automated surface structure determination and reaction path identification. **B. Hammer**

10:15 Intermission.

**10:35 COMP 10.** Formation and structure of black anatase TiO<sub>2</sub>: A combined force field and first principles study. **S. Selcuk, X. Zhao, A. Selloni**

**11:10 COMP 11.** Discovery of new polymer photocatalysts for water splitting: The role of computational chemistry. **P. Guiglion, A. Monti, M.A. Zwijnenburg**

**11:45 COMP 12.** Theoretical water splitting mechanisms on manganese oxide clusters. **C.M. Aikens, A. Fernando, M. Just, K. Skinner, A.Z. Clayborne, T.N. Haddock**

### Section C

InterContinental San Francisco  
Howard

#### Strong Electron Correlation & Nonadiabatic Dynamics

Cosponsored by PHYS

G. Gidofalvi, E. Hohenstein, Organizers

A. E. DePrince, Organizer, Presiding

**8:30 COMP 13.** On-the-fly CASPT2 nonadiabatic dynamics. **T. Shiozaki**

**9:10 COMP 14.** Reaching towards FeMoCo. **Z. Li, S. Guo, A. Sokolov, G.K. Chan**

**9:50 COMP 15.** Reduced-order formulation of multi-reference perturbation theory via tensor hypercontraction. **C. Song, T.J. Martinez**

10:15 Intermission.

**10:30 COMP 16.** Coupled cluster theory for hundreds of atoms. **F. Neese**

**11:10 COMP 17.** Generalized active space method for affordable multi-reference calculations. **L. Gagliardi**

**11:50 COMP 18.** Construction of R12 geminal-projected particle-hole creation operators for many-electron systems using diagrammatic factorization approach. **M.G. Bayne, A. Chakraborty**

### Section D

InterContinental San Francisco  
Cathedral Hill

#### Computational Studies of Water

D. J. Sindhikara, Organizer

V. Mouchlis, Presiding

**8:30 COMP 19.** Thermodynamic characterization of water in biomolecular recognition. **R. Abel, S. Mondal, C. Masse, J. Greenwood, G. Harriman, M. Ashwell, S. Bhat, T. Beuming, R. Wester, L. Frye, R. Kapeller, R. Friesner**

**9:10 COMP 20.** Protein hydration free energies in explicit vs implicit solvent - a direct comparison. **P. Setny**

**9:40 COMP 21.** Testing a desolvation term in molecular docking on a model cavity. **T.E. Balus, M. Fischer, R.M. Stein, T.B. Adler, C.N. Nguyen, A. Cruz, M.K. Gilson, T.P. Kurtzman, B. Shoichet**

10:10 Intermission.

**10:25 COMP 22.** Conserved H<sub>2</sub>O in protein-ligand complexes: An evaluation of water prediction tools. **E. Nittinger, P.A. Gibbons, V. Tsui, M. Rarey, D.F. Ortwine**

**10:50 COMP 23.** Water prediction validated by x-ray crystallography in the B1 domain of neuropilin-1. **A. Chan**

**11:15 COMP 24.** Comparing water dynamics in cryo-EM and x-ray derived molecular models. **F. Tofoleanu, F.C. Pickard, S. Subramaniam, B. Brooks**

**11:40 COMP 25.** Toward a force-field validation engine: Attach-Pull-Release calculations of host-guest binding thermodynamics. **J. Yin, M.K. Gilson**

### Section E

InterContinental San Francisco  
Laurel Hill

#### Computer-Aided Peptide Design In-Silico Peptide Modeling

Cosponsored by CINF

Q. Deng, S. N. Ha, Organizers, Presiding

**8:30 COMP 26.** BRIKARD: A kinematics-based algorithm for the conformational sampling and design of macrocycles. **E. Coutias**

**9:00 COMP 27.** Computational modeling of cyclic peptides. **S. McHugh, D. Slough, H. Yu, J. Rogers, Y. Lin**

**9:30 COMP 28.** Fragment-centric topographical mapping of protein-peptide interaction interfaces. **Y. Zhang**

10:00 Intermission.

**10:15 COMP 29.** Relative binding free energies from flexible peptide binding simulations. **A. Perez, J.A. Morrone, Q. Deng, S.N. Ha, K. Dill**

**10:45 COMP 30.** Recent advances in structure-based prediction of protein-peptide binding affinities. **T. Beuming, H. Li, E. Feyfant**

**11:15 COMP 31.** Stapled peptides: Specific reagents, potential therapeutics. **C. Verma**

### Section F

InterContinental San Francisco  
Nob Hill

#### Should I Move My Computational Chemistry or Informatics Tools to the Cloud?

Cosponsored by CINF

R. Alvarez, J. M. Blaney, Organizers

E. Metwally, V. Shanmugasundaram, Organizers, Presiding

8:30 Introductory Remarks.

**8:35 COMP 32.** Computational & data sciences in the cloud - To be or not to be. **R.K. Kondru**

**9:05 COMP 33.** Lessons learned in using Cloud BigCompute to transform computational chemistry research. **J. Stowe**

**9:35 COMP 34.** Getting our heads into the cloud: GSK experiences using cloud computing for structure based drug design. **A.P. Graves**

10:05 Intermission.

**10:20 COMP 35.** Practical lessons learned on a long and winding road to The Cloud. **N.R. Labello, G.A. Bakken**

**10:50 COMP 36.** Design anywhere: A mobile app for drug design. **H. Zhang, J. Lajiness, J. Hughes, M. Lajiness, J. Wang**

<sup>†</sup> Cooperative Cosponsorship

11:20 **COMP 37.** Accelerating discovery in the cloud: A cohesive workflow for the virtual screening and refinement of computationally-intensive libraries. E. Metwally

#### Materials Informatics & Computational Modeling

Sponsored by CINF, Cosponsored by COMP and POLY

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

#### Quantum Dynamics in Large Scale Systems

#### Simulating Electrons on Large Scale

Sponsored by PHYS, Cosponsored by COMP

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>

## SUNDAY AFTERNOON

### Section A

InterContinental San Francisco  
Twin Peaks

#### Undergraduate Research & National Meeting Roundtable

E. C. Sherer, *Organizer*  
M. C. Nagan, *Organizer, Presiding*

1:30 Introductory Remarks.

1:35 **COMP 38.** Introduction to quantum chemistry. A.E. DePrince

2:25 **COMP 39.** Molecular mechanics in computational chemistry: An overview for undergraduates. C.L. Simmerling

3:15 Discussion.

4:05 Intermission.

4:20 Panel Discussion.

5:10 Concluding Remarks.

### Section B

InterContinental San Francisco  
Fremont

#### Catalytic Materials from Molecular Insight

Cosponsored by CATL, MPPG<sup>2</sup> and PHYS

B. Liu, *Organizer*  
K. Honkala, *Organizer, Presiding*

1:30 **COMP 40.** Insight into catalyst activity and selectivity drawn from molecular modeling. A.T. Bell

2:05 **COMP 41.** First-principles based multiscale multiparadigm methods with applications to complex material. W.A. Goddard

2:40 **COMP 42.** First principles kinetic modeling of methane oxidation over Pd and PdO. M. Jorgensen, M. Van den Bossche, H. Gronbeck

3:15 Intermission.

3:35 **COMP 43.** Mechanism of CO and CO<sub>2</sub> hydrogenation over copper-based catalysts. F. Studt

4:10 **COMP 44.** Crystal phase effect on CO activation for Fischer-Tropsch synthesis. J. Liu, W. Li

4:45 **COMP 45.** Gold particle size effect for CO oxidation: A first-principles study. J. Liu, E. Hensen, I. Filot

### Section C

InterContinental San Francisco  
Howard

#### Strong Electron Correlation & Nonadiabatic Dynamics

Cosponsored by PHYS

A. E. DePrince, G. Gidofalvi, *Organizers*  
E. Hohenstein, *Organizer, Presiding*

1:30 **COMP 46.** Accurate nonadiabatic dynamics. D.R. Yarkony

2:10 **COMP 47.** Painless modeling of dynamics near conical intersections. B.G. Levine, G.A. Meek

2:50 **COMP 48.** Energy dissipation at metal surfaces: The surprisingly high non-adiabaticity of Na diffusion on Cu(111). S.P. Rittmeyer, K.U. Reuter

3:15 Intermission.

3:30 **COMP 49.** Dynamics of electron transfer near a metals surface. J.E. Subotnik, W. Dou, W. Ouyang

4:10 **COMP 50.** Single-reference dynamics of strongly correlated systems: How far can we go? M. Barbatti

4:50 **COMP 51.** New theoretical approaches to simulate photoinduced proton-coupled electron transfer reactions. P. Huo

### Section D

InterContinental San Francisco  
Cathedral Hill

#### Computational Studies of Water

#### Binding & Biology

D. J. Sindhikara, *Organizer*

F. L. Kearns, *Presiding*

1:30 **COMP 52.** Methods and models for condensed phase simulation of water. T.L. Head-Gordon

2:00 **COMP 53.** Capturing dynamics, along with thermodynamics, in the Implicit Solvent using the SuperPosition Approximation (IS-SPA) model. P.T. Lake, M. McCullagh

2:30 **COMP 54.** Good from far, far from good: Comparing quantum and classical hydration of model ions. R.C. Remsing

3:00 Intermission.

3:15 **COMP 55.** Modeling radical interactions with water. J. Arey, P. Tentscher

3:35 **COMP 56.** New dissociative water model. O. Akin-Ojo

3:55 **COMP 57.** Rate theory in two-dimensional reaction coordinate space: Applications to ion-pairing. S. Roy, M.D. Baer, C.J. Mundy, G.K. Schenter

4:15 **COMP 58.** Enhanced modeling of water in two-dimensions with rose potentials. C.J. Fennell

4:35 **COMP 59.** How to model chemical reactions in electrolytes? S. Ringe, H. Oberhofer, K.U. Reuter

### Section E

InterContinental San Francisco  
Laurel Hill

#### Computer-Aided Peptide Design

#### Computational Approaches to Peptide ADME

Cosponsored by CINF

Q. Deng, S. N. Ha, *Organizers, Presiding*

1:30 **COMP 60.** ADME analysis of therapeutic peptides: Preserving product value. J.H. Hochman

2:00 **COMP 61.** Factors for governing cell permeability and oral bioavailability in macrocycles. S. Lokey

2:30 **COMP 62.** High throughput method for the indirect detection of intramolecular hydrogen bonding. S. Sciabola

3:00 Intermission.

3:15 **COMP 63.** Property trends among permeable cyclic peptides. A. Mathiowetz

3:45 **COMP 64.** Mechanism-based ADME/PK prediction, with applications to macrocycles. M.P. Jacobson

4:15 **COMP 65.** Design of technology-compatible cyclic peptide scaffolds with oral bioavailability. A. Golosov

4:45 **COMP 66.** PepSee — A new tool for peptide analysis & design. M. Gastreich, M. Skovgaard

### Section F

InterContinental San Francisco  
Nob Hill

#### Should I Move My Computational Chemistry or Informatics Tools to the Cloud?

Cosponsored by CINF

R. Alvarez, E. Metwally, *Organizers*

J. M. Blaney, V. Shanmugasundaram, *Organizers, Presiding*

1:30 Introductory Remarks.

1:35 **COMP 67.** Cloud first strategy that accelerates informatics and computations in drug discovery. J. Feng

2:05 **COMP 68.** High performance and/or cloud computing for free energy prediction using molecular dynamics simulations? S. Wan, D.W. Wright, S.J. Zasada, A.P. Bhati, P.V. Coveney

2:35 **COMP 69.** Lessons learned in developing and delivering a secure, multi-tenant environment for drug discovery R&D informatics. W.W. Smith, B.A. Bunin

3:05 Intermission.

3:20 **COMP 70.** What's with all this GPU-accelerated cloud computing stuff? M.E. Berger

3:50 **COMP 71.** Cloud is the only place for computational chemistry: Why this is a once-in-a-lifetime opportunity for the field to leap forward. P.C. Hawkins, A.G. Skillman, R. Tolbert, J. LaFon, C. Bruce, A. Nicholls

4:20 **COMP 72.** Enhancing internal computational capabilities with the cloud. J. Duca, D. Chin, C. Hajdin, S. Litster

#### Materials Informatics & Computational Modeling

Sponsored by CINF, Cosponsored by COMP and POLY

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

#### Quantum Dynamics in Large Scale Systems

#### Simulating Quantum Nuclei on Large Scale

Sponsored by PHYS, Cosponsored by COMP

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>

## MONDAY MORNING

### Section A

InterContinental San Francisco  
Twin Peaks

#### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Dynamics & Modeling of Allosteric Systems

Cosponsored by PHYS

C. Chang, G. Verkhivker, *Organizers*  
Z. Luthey-Schulten, *Presiding*

8:30 **COMP 73.** Energy landscape theory: From folding to function in genetic networking. P.G. Wolynes

9:00 **COMP 74.** Touring the protein folding landscape: The view depends on how and where you look. S. Marqusee

9:30 **COMP 75.** Exploring allostery from protein folding to function using coarse-grained models. C.L. Brooks

10:00 Intermission.

10:20 **COMP 76.** Exploring protein function: The convergence of structure based models and co-evolutionary information. J.N. Onuchic

10:50 **COMP 77.** Significance of neuronal structural complexity and spatial heterogeneity in modulating dopamine reuptake dynamics. C. Kaya, M.H. Cheng, E. Block, T. Bartol, T. Sejnowski, A. Sorkin, J.R. Faeder, I. Bahar

11:20 **COMP 78.** Exploring fitness and free energy landscapes of proteins for allostery and binding. R.M. Levy

### Section B

InterContinental San Francisco  
Fremont

#### Catalytic Materials from Molecular Insight

Cosponsored by CATL, MPPG<sup>2</sup> and PHYS

K. Honkala, *Organizer*  
B. Liu, *Organizer, Presiding*

8:30 **COMP 79.** First-principles modeling and design of catalytic materials. P. Sautet

9:05 **COMP 80.** Electroreduction of CO<sub>2</sub> to hydrocarbons and alcohols. E. Skulason, J. Hussain, H. Jonsson

**9:40 COMP 81.** Engineering metal/SnO<sub>x</sub> interfaces for electrochemical CO<sub>2</sub> reduction. H. Xin, S. Wang

**10:15** Intermission.

**10:35 COMP 82.** Structure, stability, and reactivity of nano-structured oxides supported on metals. A. Vojvodic

**11:10 COMP 83.** Toward modeling practical catalysis from first principles. W. An, Y. Liang, H. Kim, S. Liu, P. Liu

**11:45 COMP 84.** Electrochemical reduction of nitric oxide on Pt-surfaces: A combined DFT and KMC approach. H. Chun, V. Apaja, A.Z. Clayborne, J.P. Greeley, K. Honkala

## Section C

InterContinental San Francisco  
Howard

### Strong Electron Correlation & Nonadiabatic Dynamics

*Cosponsored by PHYS*

A. E. DePrince, E. Hohenstein, *Organizers*  
G. Gidofalvi, *Organizer, Presiding*

**8:30 COMP 85.** DMRG: Orbital selection, dynamic correlation, and nuclear gradients. M. Reiher

**9:10 COMP 86.** Wavefunction forms based on identities from combinatorics. P. Ayers

**9:50 COMP 87.** Coupled-Cluster Valence Bond Singles and Doubles (CCVB-SD): Block-tensor based implementation and application to polyacenes. J. Lee, D. Small, M.P. Head-Gordon

**10:15** Intermission.

**10:30 COMP 88.** New vistas on the strong correlation problem. G.E. Scuseria

**11:10 COMP 89.** Perturbative multireference similarity renormalization group approaches for ground and excited states. C. Li, K.P. Hannon, F.A. Evangelista

**11:50 COMP 90.** GPU-accelerated state-averaged complete active space self-consistent field and derivative methods enable accurate, large-scale nonadiabatic dynamics simulations. J.W. Snyder, E. Hohenstein, B. Curchod, B. Fales, R.M. Parrish, T.J. Martinez

## Section D

InterContinental San Francisco  
Cathedral Hill

### Computational Studies of Water

#### Phenomena & Properties

D. J. Sindhikara, *Organizer*

T. E. Balus, *Presiding*

**8:30 COMP 91.** Water structuring above planar hydrophobic surfaces. U. Schnupf, J. Brady

**8:55 COMP 92.** Monte Carlo simulations probing the liquid/vapor interface of water/hexane mixtures. M.S. Minkara, D.J. Stein, C.J. Peters, J. Siepmann

**9:20 COMP 93.** Surface potential of water with *ab initio* molecular dynamics. T.T. Duignan, M.D. Baer, G.K. Schenter, C. Mundy

**9:45 COMP 94.** Deviation of the surface tension of water suggests the possible emergence of a new form of liquid upon supercooling. F. Wang

**10:10** Intermission.

**10:25 COMP 95.** Modelling the refractive index of the air-water interface. F. Longford, J.W. Essex, C. Skylaris, J.G. Frey

**10:45 COMP 96.** Understanding the sensitivity of nucleation free energies to the molecular model in water and ion/water systems. S.J. Keasler, M.A. Olson, J. Schlecht, S. Pavlenko, J. Siepmann

**11:05 COMP 97.** Hydrophobic polymer collapse: Unravelling molecular mechanisms for osmolyte protection and denaturation. N. van der Vegt

**11:25 COMP 98.** Fluctuation phenomena and structure of revPBE water at ambient and high pressure (up to 360 MPa). M. Galib, G.K. Schenter, J. Fulton, C.J. Mundy

**11:45 COMP 99.** Predictive description of electronic properties in aqueous solutions. T. Pham, M. Govoni, R. Seidel, S.E. Bradforth, E. Schwegler, G.A. Galli

## Section E

InterContinental San Francisco  
Laurel Hill

### Drug Design

#### Docking & Protein-Ligand Interaction Analysis

M. R. Landon, Y. Tseng, *Organizers*

T. Abramyan, *Presiding*

**8:30 COMP 100.** Protein-ligand scoring with convolutional neural networks. D. Koes, M. Ragoza, E. Idrobo, J. Hochuli, J. Sunseri

**8:55 COMP 101.** Predicting hot and warm spots on proteins for fragment binding. P. Rathi, F. Ludlow, R.J. Hall, C. Murray, P. Mortenson, M. Verdonk

**9:20 COMP 102.** PlayMolecule DeepSite: Protein binding site detector using 3D convolutional neural networks. G. De Fabritiis

**9:45** Intermission.

**10:05 COMP 103.** Understanding protein-ligand binding at the molecular level: Using swap-based methods to visualise binding free energy components. C.J. Woods, M. Malaisree

**10:30 COMP 104.** Docking - old hat or hats off. C. Lemmen, C. Detering, M. Gastreich

**10:55 COMP 105.** Interrogating protein ligand interactions- Knowledge base from PDB/CSD and energy decomposition methods. J.H. Voigt, U. Schmitz

**11:20 COMP 106.** Development of a novel CHARMM-based flexible receptor-flexible ligand docking procedure. S.K. Vankayala, J.D. Larkin, H.L. Woodcock

## Section F

InterContinental San Francisco  
Nob Hill

### Should I Move My Computational Chemistry or Informatics Tools to the Cloud?

*Cosponsored by CINP*

R. Alvarez, V. Shanmugasundaram, *Organizers*

J. M. Blaney, E. Metwally, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 COMP 107.** Steps to getting science in the cloud at Merck. R. Pete, S.A. Johnson, B. Sherborne

**9:05 COMP 108.** Deploying large-scale binding-affinity calculations to the cloud. B.T. Hannigan

**9:35 COMP 109.** Xcellerate informatics: A cloud-based solution for clinical data integration and real-time monitoring of clinical trials. D.K. Agrafiotis

**10:05** Intermission.

**10:20 COMP 110.** Cyrus's journey to the cloud: How we got there and what we've learned. L. Nivon

**10:50 COMP 111.** Distributed computing resources, from grid to cloud: Welcome to the HPC world! E. Arnout

**11:20 COMP 112.** Druggability assessment of the structural proteome with inclusion of light protein flexibility. A.C. Cheng, F. Boulnois, K. Loving, A. Lin

### Advances in High-Throughput Screening

*Sponsored by CINP, Cosponsored by COMP and MED*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

*Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>3</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>4</sup>, POLY, PRES<sup>5</sup> and WCC*

### Quantum Dynamics in Large Scale Systems

#### Fragmentation & Linear Scaling: Ab Initio & DFT

*Sponsored by PHYS, Cosponsored by COMP*

### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>*

## MONDAY AFTERNOON

### Section A

InterContinental San Francisco  
Twin Peaks

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Theory & Experiment

*Cosponsored by PHYS*

C. Chang, G. Verkhivker, *Organizers*

I. Bahar, *Presiding*

**1:30 COMP 113.** Allosteric effects of weak transient protein-protein interactions: Crowding in cells and evolutionary consequences. E. Shakhnovich, S. Bhattacharyya, S. Bershtein

**2:00 COMP 114.** Ribosome biogenesis in replicating cells: Integration of experiment and theory. Z. Luthey-Schulten

**2:30 COMP 115.** Systematic perturbation of a fundamental biological switch. T. Kortemme

**3:00** Intermission.

**3:20 COMP 116.** Role of electrostatics in allosteric regulation. M.P. Jacobson

**3:50 COMP 117.** Molecular principles for optimizing protein-DNA interactions. K. Levy

**4:20 COMP 118.** Mediation of allosteric communication by inter-domain bridges. J. Guo, C. Guo, H. Zhou

**4:50 COMP 119.** Phospholipase A2: A unique paradigm of allosteric regulation by membranes. V. Mouchlis, J. McCammon, E.A. Dennis

## Section B

InterContinental San Francisco  
Fremont

### Catalytic Materials from Molecular Insight

*Cosponsored by CATL, MPPG<sup>2</sup> and PHYS*

K. Honkala, B. Liu, *Organizers*

A. Z. Clayborne, *Presiding*

**1:30 COMP 120.** Catalyst design on the computer. J.K. Norskov

**2:05 COMP 121.** Static or dynamic? A first-principles multiscale modeling perspective on the nature of the surface of operating catalysts. K.U. Reuter

**2:40 COMP 122.** First principles analysis of reactivity trends at the interface between metal nanoparticles and topped oxide supports. J. Greeley, D.S. Choksi, P. Majumdar, Z. Zhao, Y. Cui, W.F. Schneider, F. Ribeiro

**3:15** Intermission.

**3:35 COMP 123.** Catalysis of ice formation. A. Michaelides

**4:10 COMP 124.** First-principles insights to the CO oxidation on oxidized Rh. A. Hellman

**4:30 COMP 125.** Group additivity for adsorbed polyols at a Pt(111) surface under aqueous conditions. B. Schweitzer, G. Gu, S. Steinmann, C. Michel, P. Sautet, D.G. Vlachos

**4:50 COMP 126.** General structure-activity relationships for transition metal oxides. V. Fung, F. Tao, D. Jiang

## Section C

InterContinental San Francisco  
Howard

### Strong Electron Correlation & Nonadiabatic Dynamics

*Cosponsored by PHYS*

A. E. DePrince, G. Gidofalvi, *Organizers*

E. Hohenstein, *Organizer, Presiding*

**1:30 COMP 127.** Nonadiabatic dynamics of photoinduced proton-coupled electron transfer processes. S. Hammes-Schiffer

**2:10 COMP 128.** Nonadiabatic molecular dynamics for spin-forbidden processes. D. Fedorov, R. Zaari, S.A. Varganov

**2:50 COMP 129.** Can quantized vibrational effects be obtained from Ehrenfest mixed quantum-classical dynamics? J.J. Goings, D.B. Lingerfelt, X. Li

**3:15** Intermission.

**3:30 COMP 130.** Charge transfer dynamics, excited state energetics, and organic photovoltaics. N. Ananth

**4:10 COMP 131.** Optomechanical control of photochemical quantum yields in a biological chromophore model. M. Olivucci, L. Frutos, A. Valentini

<sup>‡</sup>Cooperative Cosponsorship

4:50 **COMP 132.** Quantum dynamics in CS<sup>+</sup> collision with H using time dependent wave packet dynamics. **R. Kaur, D. Thogluva**

## Section D

InterContinental San Francisco  
Cathedral Hill

### Data Science Challenges in Computational Chemistry

*Cosponsored by CINF*

M. Feig, *Organizer*

C. L. Simmerling, G. Vacek, *Organizers, Presiding*

1:30 **COMP 133.** Meaningful state space discretization at the macro-cluster level. H. Liu, M. Li, J. Fan, S. Huo

2:00 **COMP 134.** Building Markov state models of diffusion processes in many-particle systems from generic order parameters. J.F. Rudzinski, M. Radu, K. Kremer, T. Bereau

2:30 **COMP 135.** Understanding and applying multistate reweighting in a broad molecular simulation context. M.R. Shirts

3:00 Intermission.

3:15 **COMP 136.** Cluster analysis of molecular simulation trajectories for systems where both conformation and orientation of the sampled states are important. T. Abramyan, J. Snyder, A.A. Thyparambil, S. Stuart, R.A. Latour

3:45 **COMP 137.** HTMD: High-throughput molecular dynamics for molecular discovery. G. De Fabritiis

4:15 **COMP 138.** Geometric searching in large collections of protein-ligand interfaces. T. Inhester, E. Nittinger, M. Rarey

4:45 **COMP 139.** Proper data extraction and curation in an era of linked open data – Are we there yet? B. Dzdrzil, G.F. Ecker

## Section E

InterContinental San Francisco  
Laurel Hill

### Drug Design

#### Computational Methods & Approaches

M. R. Landon, Y. Tseng, *Organizers*

J. L. Paulsen, *Presiding*

1:30 **COMP 140.** Common hits approach: Combining pharmacophore modeling and molecular dynamics simulations. M. Wieder, A. Garon, U. Perricone, T. Seidel, S. Boresch, T. Langer

1:55 **COMP 141.** Protein binding sites dynamics in drug discovery. D. Janezic, J. Konc

2:20 **COMP 142.** New approaches for binding site and ligand prediction and their use in drug discovery. J. Konc, D. Janezic

2:45 Intermission.

3:05 **COMP 143.** pmemdGT: An efficient and accurate GPU-accelerated thermodynamics integration simulation package. T. Lee, D.M. York

3:30 **COMP 144.** Efficient free energy perturbation Hamiltonian replica exchange molecular dynamics method for absolute binding affinity predictions. W. Jiang

3:55 **COMP 145.** Calculating the absolute binding free energies for octa-acids and guests. F. Tofoleanu, J. Lee, F.C. Pickard, G. Koenig, J. Huang, M. Baek, C. Seok, B. Brooks

4:20 **COMP 146.** Hybrid quantum and classical free energies: Separating the wheat from the chaff with configuration space overlaps. C. Cave-Ayland, C. Skylaris, J.W. Essex

## Section F

InterContinental San Francisco  
Nob Hill

### Should I Move My Computational Chemistry or Informatics Tools to the Cloud?

*Cosponsored by CINF*

R. Alvarez, E. Metwally, *Organizers*

J. M. Blaney, V. Shanmugasundaram, *Organizers, Presiding*

1:30 Introductory Remarks.

1:35 **COMP 147.** Using the cloud for massive scale-up of computationally intensive physics-based simulations. V. Eylich, J. Watney, Y. Zhao, L. Wang, S. Mondal, S. Bhat, R. Abel

2:05 **COMP 148.** CHARMM interface and graphics: A flexible web-user interface for education and application of molecular simulation and multi-scale modeling. J. Smock, V. Schalk, Y. Pevzner, B.T. Miller, H.L. Woodcock

2:35 **COMP 149.** AceCloud: Molecular dynamics simulations in the cloud. M. Harvey, G. De Fabritiis

3:05 Intermission.

3:20 **COMP 150.** Virtual screening in the cloud with Pharmit. D. Koes

3:50 **COMP 151.** Research informatics: Get ready for the cloud! M. Van Daelen

4:20 Discussion.

4:40 Concluding Remarks.

### Advances in High-Throughput Screening

*Sponsored by CINF, Cosponsored by COMP and MEDI*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC*

#### Quantum Dynamics in Large Scale Systems

#### Fragmentation & Linear Scaling: Semiempirical & DFTB

*Sponsored by PHYS, Cosponsored by COMP*

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>*

#### Undergraduate Research Posters

#### Computational Chemistry

*Sponsored by CHED, Cosponsored by COMP and SOCED*

## MONDAY EVENING

### Section A

Moscone Center

Hall D

### Sci-Mix

H. L. Woodcock, *Organizer*

8:00 - 10:00

236, 240-247, 261, 267, 277, 283-284, 286, 290, 305-306, 310-312, 331, 341, 345, 347, 349, 353-357, 360, 362, 365, 368, 375, 377, 383, 389-391, 396-398, 402-403, 406, 410, 416-417, 419, 421, 424, 426. See subsequent listings.

## TUESDAY MORNING

### Section A

InterContinental San Francisco

Twin Peaks

#### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Theory & Experiment

*Cosponsored by PHYS*

C. Chang, G. Verkhivker, *Organizers*

H. Weinstein, *Presiding*

8:30 **COMP 152.** Structural mechanisms of the allosteric regulation of Ras. J. Kuriyan

9:00 **COMP 153.** Ancient origins of allosteric activation-Exploitation for novel cancer drugs. D. Kern

9:30 **COMP 154.** Fractal nature of protein interior and its implications for allostery. A. Kornev, S.S. Taylor

10:00 Intermission.

10:20 **COMP 155.** How EGF and insulin activate their receptors. D. Leahy, J. Kavran, P. Byrne

10:50 **COMP 156.** Genetically tunable frustration controls allostery in an intrinsically disordered transcription factor. V.J. Hilser

11:20 **COMP 157.** Role of intrinsically disordered proteins in allosteric regulation of cellular signaling. P.E. Wright

### Section B

InterContinental San Francisco

Fremont

#### Catalytic Materials from Molecular Insight

*Cosponsored by CATL, MPPG<sup>2</sup> and PHYS*

B. Liu, *Organizer*

K. Honkala, *Organizer, Presiding*

1:30 **COMP 158.** Computational catalysis: Rigor and relevance. J. Sauer

2:05 **COMP 159.** Diesel oxidation catalysts with improved low temperature activity identified from computational screening. Y. Song, J.S. Arevalo, W. Epling, L. Grabow

2:40 **COMP 160.** Operando catalysis: Computing the state of a zeolite catalyst at reaction conditions. W.F. Schneider, C. Paolucci, H. Li, S. Li

3:15 Intermission.

3:35 **COMP 161.** Complete catalytic cycle for fast and standard NH<sub>3</sub>-SCR reaction. H. Falsig

4:10 **COMP 162.** Understanding diffusion during catalytic fast pyrolysis of biomass over H-ZSM-5 by multiscale modeling. L. Bu, B. Knott, P.N. Ciesielski, M.R. Nimlos, D. Robichaud, S. Kim

4:30 **COMP 163.** Adsorption and activation of water on cuboctahedral rhodium and platinum nanoparticles. A.S. Bazhenov, L. Lefferts, K. Honkala

4:50 **COMP 164.** Structural study of the Ziegler-Natta catalyst. V. D'Anna, P. Sauter

## Section C

InterContinental San Francisco  
Howard

### Strong Electron Correlation & Nonadiabatic Dynamics

*Cosponsored by PHYS*

A. E. DePrince, E. Hohenstein, *Organizers*

G. Gidofalvi, *Organizer, Presiding*

8:30 **COMP 165.** Direct patching exchange-correlation potential in density functional theory. C. Huang

9:10 **COMP 166.** Unpaired densities in singlet polyradicals: Local electron correlation treatment in extended multi-reference approaches in comparison with quasi correlated tight binding. H. Lischka

9:50 **COMP 167.** Derivative coupling vectors from a Davidson approach. J.A. Kammeraad, P.M. Zimmerman

10:15 Intermission.

10:30 **COMP 168.** Time-dependent two-component relativistic spin dynamics. X. Li

11:10 **COMP 169.** Excited-state dynamics of mPflou fluorescent protein. S. Faraji, A. Krylov

11:50 **COMP 170.** Nonadiabatic couplings and the choice of density functional: Exchange cannot be neglected. A.V. Akimov

## Section D

InterContinental San Francisco  
Cathedral Hill

### Molecular Mechanics

#### Sampling Long Time Scales

M. Feig, *Organizer*

J. V. Vermaas, *Presiding*

8:30 **COMP 171.** Enhancing conformational sampling by modifying the underlying velocity distribution: Digitally filtered hybrid Monte Carlo. C.S. Pervane, J.W. Essex

8:55 **COMP 172.** Novel enhanced sampling approach for cryptic site discovery on protein targets. F. Gervasio

9:25 **COMP 173.** Rapid protocol for free energy calculations via multi-dimensional expanded ensemble simulations. B. Radak, B. Roux

9:55 Intermission.

10:10 **COMP 174.** MS-Fold: Protein structure prediction guided by covalent labeling mass spectrometry data. M. Marletti, S.H. Hinckley, V.H. Wysocki, S. Lindert

10:40 **COMP 175.** Fast free energy calculations from proximal distribution functions. S. Ou, B.M. Pettitt

**11:10 COMP 176.** Unraveling the mechanistic basis of the CRISPR-Cas9 system via molecular simulations. **G. Palermo, Y. Miao, R. Walker, M. Jinek, J. McCammon**

**11:40 COMP 177.** pH-dependent conformational change and its impact on *E. coli* glycinamide ribonucleotide transformylase catalytic activity. **P. Gupta, A.E. Roitberg**

### Section E

InterContinental San Francisco  
Laurel Hill

#### ACS Award for Computers in Chemical & Pharmaceutical Research: Symposium in honor of Yvonne C. Martin

*Cosponsored by BIOL, MEDI and WCC*

D. J. Kempf, Y. C. Martin, *Organizers*

T. R. Stouch, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:40 COMP 178.** QSAR: How my success relied on pillars built by Yvonne Connolly Martin. **G. McGaughey**

**9:05 COMP 179.** Big data, small data: Pharmacology-based similarity measures and statistically-derived amino acid weightings to inform kinase selectivity. **M. Torrent**

**9:30 COMP 180.** Integrated hit generation: Iterative design of experiments, screening sets, and compounds. **J.M. Jansen, P.S. Lee, V.R. Polyakov, L. Tian, E.J. Martin**

**9:55** Intermission.

**10:10 COMP 181.** Recent advances in applying computation to (bio) catalyst design. **K.W. Lexa**

**10:35 COMP 182.** Innovation/evolution of cheminformatics evergreens. **M. Lee**

**11:00 COMP 183.** Impact of quantitative drug design: Mighty oaks from little acorns grow. **M. Holloway**

**11:25** Concluding Remarks.

### Section F

InterContinental San Francisco  
Nob Hill

#### State-of-the-Art Methods for Modeling Materials Chemistry

*Cosponsored by CATL and MPPG<sup>‡</sup>*

B. G. Janesko, J. A. Keith, *Organizers, Presiding*

**8:30 COMP 184.** Multi-scale modeling of nanomaterials: From DFT to molecular dynamics simulations. **F. Martin-Martinez, Z. Qin, G. Jung, M.J. Buehler**

**8:55 COMP 185.** Reliable computational design of biological-inorganic materials to the large nanometer scale using INTERFACE-FF. **H. Heinz**

**9:20 COMP 186.** Advances in atomic-scale methods for materials chemistry. **S.B. Sinnott**

**9:45 COMP 187.** Inference-boosted first-principles molecular dynamics for chemo-mechanical modelling. **A. De Vita**

**10:10** Intermission.

**10:30 COMP 188.** Modeling the formation of sodium and calcium aluminosilicate gels at the mesoscale using coarse-grained Monte Carlo. **K. Yang, C. White**

**10:45 COMP 189.** Simulations of polymer membranes with chain altering and conservative Monte Carlo moves. **A. Bick, L. Subramanian**

**11:10 COMP 190.** Solvation and encapsulation of photoactive species: Insights from excited state DFTB. **N. Garcia, A. Banducci, Z. Pollard, K. Komoto, T. Kowalczyk**

**11:35 COMP 191.** Recent DFTB extension for improving accuracy and boosting the efficiency for computational applications to nanomaterials. **T. Frauenheim**

**12:00 COMP 192.** Entropy sampling for zeolite-catalyzed reactions at operating conditions. **K. De Wispelaere, T. Bligaard, J.K. Norskov, V. Van Speybroeck**

**12:15 COMP 193.** Self-adaptive Reactive Force Fields (SERFF): Force matching for molecular dynamics simulation of reactive materials. **N. Goldman**

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

##### Single Crystal Catalysis

*Sponsored by CATL, Cosponsored by COMP*

##### Quantum Dynamics in Large Scale Systems

##### Large-Scale Simulations in Materials Systems

*Sponsored by PHYS, Cosponsored by COMP*

## TUESDAY AFTERNOON

### Section A

InterContinental San Francisco  
Twin Peaks

#### Material Science

##### Properties

C. M. Aikens, *Organizer*

R. C. Remsing, *Presiding*

**1:30 COMP 194.** Breaking badly: DFT-D2 gives sizeable errors for tensile strengths in bulk solids. **B.M. Wong, N. Ilawe**

**2:00 COMP 195.** Simulation of shock-wave properties in fused silica using soft-core potential. **S. Izvekov, E.F. Byrd, N. Weingarten, B.M. Rice**

**2:30 COMP 196.** Reactive modeling of silica formation. **J. Deetz, R. Faller**

**3:00** Intermission.

**3:30 COMP 197.** Nanoscale charge balancing mechanism in alkali substituted C-S-H gels from first-principles calculations. **O. Ozcelik, C. White**

**4:00 COMP 198.** Impact of environment on mechanical and physical properties of polyethylene: Comparison between experiments and simulation. **A. Shamloo, A. Soldera, D. Rodrigue**

**4:30 COMP 199.** Computational studies of crystallization on the nanoscale. **J. Delhommelle, C. Desgranges**

**5:00 COMP 200.** Modeling and simulations of functionalized magnetic nanoparticles as drug delivery systems. **K. Karathanou, Z. Cournia**

### Section B

InterContinental San Francisco  
Fremont

#### Catalytic Materials from Molecular Insight

*Cosponsored by CATL, MPPG<sup>‡</sup> and PHYS*

K. Honkala, B. Liu, *Organizers*

A. Z. Clayborne, *Presiding*

**8:30 COMP 201.** Catalysis by functionalized nanoparticles. **N. Lopez**

**9:05 COMP 202.** Computational design of nanoalloy catalysts from DFT, genetic algorithms and machine learning. **T. Vegge, P.C. Jennings, T. Bligaard, H.A. Hansen**

**9:40 COMP 203.** Subnanometer metal clusters as catalysts for energy conversion and storage. **L.A. Curtiss, C. Liu, P. Zapol, S. Vajda**

**10:15** Intermission.

**10:35 COMP 204.** Alloying supported Pt clusters with boron: Coke antagonist. **A. Alexandrova, M. Ha, E. Jimenez-Izai**

**11:10 COMP 205.** Revealing the pathway of CO<sub>2</sub> reduction in a multicenter iron carbonyl catalyst using an *ab initio* nano-reactor. **L. Wang, M.E. Hutchings, Y. Qiu**

**11:30 COMP 206.** Ab initio study of the hydrogen-producing mechanisms of cobaloximes in acetonitrile-water mixtures. **J. Chen, P. Sit**

**11:50 COMP 207.** Protein-environment effect on catalysis performance in H<sub>2</sub>-producing [NiFe] hydrogenases. **S. Qiu, L.M. Azofra, D.R. MacFarlane, C. Sun**

### Section C

InterContinental San Francisco  
Howard

#### Strong Electron Correlation & Nonadiabatic Dynamics

*Cosponsored by PHYS*

G. Gidofalvi, E. Hohenstein, *Organizers*

A. E. DePrince, *Organizer, Presiding*

**1:30 COMP 208.** Two-electron reduced density matrices in electronic structure and dynamics. **D.A. Mazziotti**

**2:10 COMP 209.** Using single-excitation wavefunctions to compute exciton-binding energies in singlet fission materials. **N. Mayhall**

**2:40 COMP 210.** Strong correlation in coupled F-centers. **B.G. Janesko**

**3:10** Intermission.

**3:25 COMP 211.** Quantum chemistry strategies: Addressing strongly correlated transition metal and heavy element species. **C. Plascencia, S. Yuwono, G. Schoendorff, A.K. Wilson**

**4:05 COMP 212.** Recent developments with the multifacet graphically contracted function electronic structure method. **R. Shepard, S.R. Brozell, G. Gidofalvi**

**4:45 COMP 213.** Multi-reference electron correlation with large active spaces from time-dependent perturbation theory with density matrix renormalization group. **A. Sokolov, G. Chan**

### Section D

InterContinental San Francisco  
Cathedral Hill

#### Quantum Mechanics

A. E. DePrince, *Organizer*

N. J. Deyonker, *Presiding*

**1:30 COMP 214.** Atropisomerization of 8-membered dibenzolactam: Experimental NMR and theoretical DFT study. **A. Buevich**

**1:55 COMP 215.** Computational study of the photoelectron spectra of Europium-oxide, -hydride, and -hydroxide. **H. Harb, L.M. Thompson, H.P. Hratchian**

**2:20 COMP 216.** Reaction mechanism of group II introns hydrolytic splicing investigated by QM/MM MD simulations. **L. Casalino, G. Palermo, U. Roethlisberger, A. Magistrato**

**2:45 COMP 217.** Reactive first principles Monte Carlo simulations of nitrogen/oxygen and hydrogen sulfide/carbon dioxide mixtures. **E. Fetisov, M. Shah, I.W. Kuo, C. Knight, J. Siepmann**

**3:10** Intermission.

**3:25 COMP 218.** Combining quantum and QSAR methods for prediction of acid dissociation constants. **L. Hosseini-Gerami, R. Leth, P. Hunt, M.D. Segall**

**3:50 COMP 219.** Computational investigation of o-aminomethylphenylboronic acid saccharide receptors. **J. Larkin**

**4:15 COMP 220.** TINKTEP: Polarizable QM/MM based on linear-scaling DFT and the AMOEBA force field. **J. Dziedzic, M.P. Head-Gordon, T.L. Head-Gordon, C. Skylaris**

**4:40 COMP 221.** Solvent/enzyme-perturbed transition state sampling and its applications. **Z. Yang, Y. Li, J. Park, C. Doubleday, K.N. Houk**

### Section E

InterContinental San Francisco  
Laurel Hill

#### ACS Award for Computers in Chemical & Pharmaceutical Research: Symposium in honor of Yvonne C. Martin

*Cosponsored by BIOL, MEDI and WCC*

D. J. Kempf, T. R. Stouch, *Organizers*

Y. C. Martin, *Organizer, Presiding*

**1:30 COMP 222.** Collaborating to bring resources to neglected diseases research. **D.J. Kempf**

**2:00 COMP 223.** NTD drug discovery booster: A novel approach for hit to lead chemistry. **B. Perry**

**2:30 COMP 224.** Combining strengths of phenotype and target-based approaches to discover novel TB drugs. **J. Sacchettini**

**3:00** Intermission.

**3:15 COMP 225.** Antitubercular 3-(4-aminophenyl)oxazolidin-2-ones: Progress towards better, safer TB agents. **C.B. Cooper**

**3:45 COMP 226.** Tylosin analogs as anti-filarial agents: Medicinal chemistry optimization and candidate selection. **T.W. Von Geldern, D.J. Kempf, K. Marsh, H.E. Morton, L. Ford, J. Turner, S. Ward, M. Taylor, A. Hoerauf, S. Specht**

<sup>‡</sup>Cooperative Cosponsorship

**4:15 COMP 227. Award Address** (ACS Award for Computers in Chemical & Pharmaceutical Research sponsored by ACS Division of Computers in Chemistry). CADD and chemoinformatics within an inter-institution collaboration for TB drug discovery. Y.C. Martin

## Section F

InterContinental San Francisco  
Nob Hill

### State-of-the-Art Methods for Modeling Materials Chemistry

Cosponsored by CATL and MPPG<sup>†</sup>

B. G. Janesko, J. A. Keith, *Organizers, Presiding*

**1:30 COMP 228.** Recent advances in the quantum simulation of materials. G.E. Scuseria

**1:55 COMP 229.** Making density-functional embedding theory applicable to spin-polarized materials and covalent materials. C. Huang, A.B. Munoz, M. Pavone

**2:20 COMP 230.** Ab-initio materials spectra. J. McClain, T. Berkelbach, Q. Sun, G. Chan

**2:45 COMP 231.** Alchemy, chemical space, and quantum mechanics. O. von Lilienfeld

**3:10** Intermission.

**3:30 COMP 232.** Finite-temperature *ab initio* many-body perturbation and coupled-cluster calculations of condensed matter. S. Hirata

**3:55 COMP 233.** Self-consistent many-body methods for bond-making and breaking. P. Rinke

**4:20 COMP 234.** Fast and accurate quantum Monte Carlo methods for material science. D. Alfe, A. Zen, M. Gillan, S. Sorrella, A. Michaelides

**4:45 COMP 235.** Extending the applicability of quantum Monte Carlo methods to large molecules. C. Filippi

### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

#### Electrocatalysis

Sponsored by CATL, Cosponsored by COMP

#### Quantum Dynamics in Large Scale Systems

#### Large-Scale Simulations in Biological Systems

Sponsored by PHYS, Cosponsored by COMP

## TUESDAY EVENING

### Section A

Moscone Center  
West Hall

#### Chemical Computing Group Graduate Student Travel Awards

K. N. Kirschner, C. L. Simmerling, *Organizers*

**6:00 - 8:00**

**COMP 236.** QM-NEW: An efficient and accurate QM/MM free energy estimator and its application to pKa predictions. F.L. Kearns, P.S. Hudson, S. Boresch, H.L. Woodcock

**COMP 237.** Automatic and systematic construction of active spaces from the atomic valence orbitals. E.R. Sayfutyarova, G. Chan

**COMP 238.** Controlling coherent electron transfer in bi-nuclear platinum complexes. P.J. LeStrange, D.B. Lingerfelt, X. Li, L.X. Chen

**COMP 239.** Molecular simulations provide crucial insights into the mechanisms of biocatalysis in ionic liquids. K. Sprenger, J. Pfandner

## Section B

Moscone Center  
West Hall

### COMP Poster Session

H. L. Woodcock, *Organizer*

**6:00 - 8:00**

**COMP 240.** Investigating the fluorescence mechanism of boron-nitrogen based glucose chemosensors and non-traditional hydrogen bonding in B<sub>2</sub>H<sub>6</sub>-benzene complexes. F.L. Kearns, C. Robart, M.T. Kemp, J. Larkin, H.L. Woodcock

**COMP 241.** New approach for detection and visualization of aggregation-prone regions. C. Williams

**COMP 242.** Microsecond molecular dynamic simulations on the second hydride transfer transition state of *Pseudomonas mevalonii* 3-hydroxy-3-methylglutaryl reductase using Q2MM. T. Quinn, B.E. Haines, J. Lei, H. Jiang, X. Huang, P. Helquist, O. Wiest

**COMP 243.** Benchmarking excited state absorption via LR/RT-TDDFT for a series of organic chromophores. J. Asher, D.N. Bowman, N. Govind, C.J. Cramer

**COMP 244.** Steric effects in the computational modeling of enediyne cyclization reactions. K. Hoang, C.Q. Li, B.F. Gherman, J.D. Spence

**COMP 245.** Hybridity calculation of catalysts using DFT methods. H. Fallah, K.R. Brereton, A.J. Miller, T.R. Cundari

**COMP 246.** Modeling 10000 antibodies in about an hour: Leveraging the power of the Amazon Cloud. E. Metwally

**COMP 247.** Improving drug design by predicting exposed polarity. F. Ruggiu, B. Shirley, J.M. Jansen, H.E. Moser

**COMP 248.** Prediction of API oxidative liability: *In silico* approach towards antioxidant selection, a collaboration of the Medicinal Chemistry, Formulation Sciences and DMPK departments at AbbVie. H. Geneste, L. Asmus, G. Backfisch, M. Degenhardt, F. Oellien

**COMP 249.** Design of novel inhibitors for the aldehyde dehydrogenases. E. Selner, C. Magee, L.W. Peterson, M.L. Cafiero

**COMP 250.** DFT analysis of the selectivity of known bioactive ligands in the sulfotransferase and catechol-o-methyltransferase enzymes. C. Pinckney, C. Magee, L.W. Peterson, M.L. Cafiero

**COMP 251.** Towards more accurate models of organic electro-optic materials: Computing the hyperpolarizabilities of dimer and tetramer charge-transfer chromophores. J. Maat, C. Isborn, X. Sosa Vazquez

**COMP 252.** Design and synthesis of novel inhibitors for the tyrosine hydroxylase enzyme. R. Evans, L.W. Peterson, M.L. Cafiero

**COMP 253.** Analysis of random alloy nanoparticles as catalysts for oxidation reduction reactions. F. Al-Qaithi, J. Duncan, B. Corona, C. Lee, E. Trevino, G.A. Henkelman

**COMP 254.** Exponential relationships capturing atomistic short-range repulsion from the Interacting Quantum Atoms (IQA) method. A. Wilson, P. Popelier

**COMP 255.** Withdrawn.

**COMP 256.** Machine-learning-assisted characterization of chemical transitions: Inhomogeneous mechanisms underlying reactions in homogeneous solution. J. Zhang, Z. Zhang, Y. Gao

**COMP 257.** Computational outlook on ferroelectricity: Transition state optimizations and charge analysis. M. Romero, D. Miller, E. Zurek

**COMP 258.** New approaches to the computational chemistry and computer-assisted application of calculation for steroids. E.J. Parish, G. Ren, Y. Lo, M. Hsiao, H. Honda, T. Wei

**COMP 259.** Novel application of mathematical model to the development of biosensor for high blood cholesterol. G. Ren, Y. Lo, H. Honda, E.J. Parish

**COMP 260.** Interplay between crystallization and glass transition in bimetallic nanoalloys. S. Bechelli, C. Desgranges, J. Delhommelle

**COMP 261.** Molecular simulation of gas adsorption in metal-organic frameworks. G. Karuppasamy, C. Desgranges, J. Delhommelle

**COMP 262.** Nitrogen-doped graphene nanoflakes: Electronic and optical properties depending on flake sizes and dopant positions. C. Lin

**COMP 263.** Hydrogen placement on potential organic ferroelectric NUBHOH. M. Ynfante-Corral

**COMP 264.** Activity coefficients of sodium chloride (NaCl) at varying concentrations and temperatures calculated using molecular dynamics simulations. A. Kasinski, P.B. Moore, R.L. Napoleone

**COMP 265.** Investigating the hydration of polyamide 6 using theoretical difference infrared spectroscopy. B. Thomsen, Y. Sugita, K. Yagi

**COMP 266.** Simulating the binding pathways of sialic acid and oseltamivir to H274Y neuraminidase with molecular dynamics simulations. D.F. Dacres, E.M. Lewis, R. Wenner, A.W. Van Wynsberghe

**COMP 267.** Polypeptide bonding to surface studied by computational analysis of x-ray photoelectron spectra. I. Tolbatov, D. Chipman

**COMP 268.** Solvation free energies via alchemical free energy calculations: Applications and challenges. G. Duarte Ramos Matos, D.Y. Kyud, G. Calabró, D.L. Mobley

**COMP 269.** Mechanistic analysis of a palladium-catalyzed enantioselective decarboxylative allylic alkylation reaction. A. Sargent, A.T. Morehead

**COMP 270.** Computing aqueous absorption spectra: Effect of solute polarity and basis set on convergence with respect to the amount of explicit solvent. J. Milanese, C. Isborn

**COMP 271.** Ionization potential optimized hybrid exchange-correlation functional: Improving the accuracy of both core excitation energies and ground state properties. Y. Jin, R.J. Bartlett

**COMP 272.** Localizing frustration in proteins using coevolutionary information. B. Sirovetz

**COMP 273.** Ab initio molecular dynamics simulations, reaction energy profiles and reaction rates constants expressions relevant to Titan's atmosphere: CH + C<sub>2</sub>H<sub>2</sub> and H + CH<sub>2</sub>CCH<sub>3</sub>. X. Torres-Garcia, J.M. Lopez-Encarnacion

**COMP 274.** Divergent mechanistic pathways in a metal-catalyzed hydroacylation reaction. E. Bolger, A.T. Morehead, A. Sargent

**COMP 275.** DFT, CCSD and CASSCF investigations of 1,1 elimination transition state geometries and post-transition state complexes of hydrofluorocarbons. M. Nestler, G.L. Heard, B.E. Holmes

**COMP 276.** Vanddraabe: Identification and statistical analysis of structurally conserved waters via R. E.X. Esposito

**COMP 277.** Plunger method for simulating polymer crystal-melt interfacial tensions. Q. Chen, D. Kozuch, S. Milner

**COMP 278.** Fullerene based materials for cathodic applications in lithium ion battery. P. Sood, K. Kim, S.S. Jang

**COMP 279.** Towards understanding the chemical physics of the spinach fluorogenic RNA aptamer. K. Range, I. Bieker, D.M. York

**COMP 280.** Molecular dynamics simulation study of Normetanephrine (NMN) on amyloid-beta 40 monomer aggregation for treatment of Alzheimer's disease. K. Shim, J. Kim, C. Shin, J.R. Kim, S.S. Jang

**COMP 281.** Analysis of the role of the electronic structure on lithium diffusion in Li10GP2S12 and -Li3PS4 solid electrolytes. A.T. Hall, N. Leclerc, N. Adelstein

**COMP 282.** Novel approaches to the bioinformatics application of spreading factor in the domain identification and functional prediction. Y. Lo, G. Ren, H. Shyu, H. Honda, T. Wei

**COMP 283.** Density functional solution for nondynamic and strong correlation. J. Kong, E. Proynov, F. Liu

**COMP 284.** Automating isotope effects computations and analyses. A. Brueckner, S. Cevallos, O. Ogbia, D.J. O'Leary, P. Cheong

**COMP 285.** Atomic-scale simulations of self-assembling peptide-conducting polymer hybrid materials. H. Pan, Z. Pollard, E. James, A. Murphy, T. Kowalczyk

**COMP 286.** Color-based illustration of the maximum overlap method. Z. Pollard, K. Le, T. Kowalczyk

**COMP 287.** Accurate estimate of ligand-binding affinity using alchemical free energy calculation via metadynamics. Y. Tanida, A. Matsuura

**COMP 288.** Modeling rhodium-catalyzed hydroacylation of formylstyrene: Competitive formation of indanone and tetralone products. T. Shoopman, A.T. Morehead, A. Sargent

**COMP 289.** Transition state of a 17 minute timescale drug unbinding event. S. Lotz, A. Dickson

**COMP 290.** Visualization of convolutional neural network scoring of protein-ligand binding. J. Hochuli, M. Ragoza, D. Koes

**COMP 291.** Auto generation of Markush structure for maximizing composition patent claim. P. Wang, Y. Tseng

**COMP 292.** Putting electrostatics and water at the center of structure-based drug design. T. Cheeseright, M.D. Mackey, G. Tedesco, P. Tosco, S. Tomasio

- COMP 293.** Understanding the behaviour of multifunctional gold nanoparticles (AuNPs). **A. Raman**, C. Jaime, V.F. Puentes
- COMP 294.** Effect of ethanol infiltration into dentin collagen fibrils using molecular dynamics simulation. **J. Liu**, S. Davis, H. Du, E. Cho, Z. Abrams, M. Lee, J. No, S. Jee, S.S. Jang
- COMP 295.** Novel Zn binding moiety for LpxC identified by data mining, virtual screening, and experimental validation. **P.S. Lee**, C. Bellamacina, J. Bojkovic, Z.K. Sweeney, J. Fu, L. Xie, W. Shu, K. Uehara, L. McDowell, A. Lingel
- COMP 296.** Impact of sequence homology on DNA microarray hybridization interactions: A Monte Carlo molecular simulation study. **K.J. Mei**, C. Lucy, M. Pham, **J.M. Stubbs**
- COMP 297.** Investigation of rhodium catalysts and reactants for hydroacylation reactions. **E. Schneider**, J. Scanlon
- COMP 298.** Sulfur bonds: Exploration of a novel non-covalent intermolecular bond and its role in drug development. **M.R. Koebel**, G. Schmadeke, S. Sirimulla
- COMP 299.** Mixed reality visualization application for drug discovery research. **G. Uranga**, S. Sirimulla
- COMP 300.** Connectivity-based hierarchy to eliminate systematic errors: Accurate combustion properties of biofuel molecules using DFT. **S. Debnath**
- COMP 301.** Molecular dynamics simulation of the behavior of copper atoms in hydrated zeolite Cu-SSZ-13. **D. Clavijo Gutierrez**, A. Chaparro, E. Jaramillo
- COMP 302.** Quantum mechanical calculations of UV-VIS spectra of conjugated molecules. **I. Bieker**, B. May
- COMP 303.** Synthesis and structure prediction of a novel, potentially electroactive, organic material. **S. Jacinto**, K.R. Cousins, T. Usher
- COMP 304.** Ab initio characterization of halogen bonds involving molecular ionic halogen bond donors. **K. Tran**, K. Riley
- COMP 305.** CMDnavigator: A tool for interactive analysis and visualization of peptide data. **A.S. Bayden**, D.J. Diller, J.H. Audie, K. Diller
- COMP 306.** Spatially extended active sites: Building favorable electrostatic interactions in natural and designed enzymes. **T.A. Coulther**, P.J. Beuning, **M.J. Ondrechen**
- COMP 307.** Mixed lithium indium halides as solid-electrolytes: Computational experiments on drivers of Li<sup>+</sup> diffusion. **T.C. Alves**, A. Zevgolis, **N. Adelstein**
- COMP 308.** Identification of promiscuous enzymes for the aza-Morita-Baylis-Hillman reaction. **K. Ozturk**, S. Sayin, **N. Celebi-Olcum**
- COMP 309.** Estimating kinetic rates for  $\beta$ -cyclodextrin. **H. Pratt**, B.R. Jagger, C. Lee, R.E. Amaro
- COMP 310.** Conformational dynamics of histone lysine methyltransferases by millisecond-timescale molecular dynamics on Folding@home. **R.P. Wiewiora**, S. Chen, K. Beauchamp, M. Luo, J.D. Chodera
- COMP 311.** Multiscale estimation of kinetic rates of trypsin with benzamide using a hybrid molecular dynamics, brownian dynamics, and milestoning approach. **B.R. Jagger**, L. Votapka, A. Heyneman, R.E. Amaro
- COMP 312.** Prediction of pH dependent NMR chemical shifts. **E. Artikis**, C.L. Brooks
- COMP 313.** Generic interface streamlines access to results from expertly prepared 3D models. **T. Mansley**, E. Champness, C. Leeding, P. Hunt, N. Foster, M. Segall
- COMP 314.** Computational studies of electrochemical initiation of reactions involving nitrogen-radical precursors. **S. Calderon**, H.P. Hratchian
- COMP 315.** Bond dissociation enthalpies of halomethanes, haloethanes, haloethenes, and haloacetylene. **K.R. Jorgensen**
- COMP 316.** Photocatalytic and electronic implications from first principles characterization of oxygen depletion localized on TiO<sub>2</sub> brookite nanoparticle surfaces. **K.G. Johnson**, E.A. Jarvis
- COMP 317.** Ab initio characterization of intramolecular and energetic features of the water oxidation mechanism for mononuclear ruthenium and iron catalysts. **K. Hunter**, E.A. Jarvis
- COMP 318.** Computational study of how  $\beta$ -loop dynamics regulate HCV polymerase activity in the presence and absence of thumb-site-II inhibitors. **N. Ibrahim**, J. Li, K. Johnson, S. Kirmizialtin
- COMP 319.** DFT design of inhibitors of the LpxC enzyme. **C. Dishuck**, R. Roldan, A.J. Dewar, L.W. Peterson, M.L. Cafiero
- COMP 320.** DFT study of the selectivity of phenylalanine hydroxylase. **M.C. Perchik**, L.W. Peterson, M.L. Cafiero
- COMP 321.** Modeling excited states of the OH radical reaction with cyclopentadiene and the cyclopentadienyl radical. **P.B. Orndorff**, J.B. Foresman
- COMP 322.** DFT study of the selectivity of the tyrosinase active site. **D. Wilson**, S. Fields, L.W. Peterson, M.L. Cafiero
- COMP 323.** Linkage isomerization in phosphine substitution reactions of CpRu(PPh<sub>3</sub>)<sub>2</sub>NCS. **D. Dang**, R.U. Kirss
- COMP 324.** DFT study of the selectivity of monoamine oxidase B (MAOB). **S. Jelinek**, M. Morris, L.W. Peterson, M.L. Cafiero
- COMP 325.** Structural insights of a PI3K/mTOR dual inhibitor with the morpholino-triazine scaffold. **T. Takeda**, Y. Wang, S.H. Bryant
- COMP 326.** Effect of Gly to Ser mutations at the integrin-binding site on type I collagen. **A. Mekkat**, H. Yu, B. Brodsky, Y. Lin
- COMP 327.** Mechanism for the stereoselectivity in metal-salen catalyzed electroreductive cyclization reactions. **L. Bellini**, M.N. Cihak, B.E. Silva, B.F. Gherman, J.A. Miranda
- COMP 328.** Withdrawn.
- COMP 329.** Approach for analyzing protein pockets using properly interacting probe molecules. **H. Sato**, A. Matsuura
- COMP 330.** Elucidating the mechanism of protein unfolding and translocation by the ClpY ATPase during protein degradation. **Y. Shih**, G. Stan
- COMP 331.** Quantum mechanical investigation of the inner sphere reduction mechanism of the [(NSNSN)Co(III)Cl<sup>+</sup>] and [(NSSSN)Co(III)Cl<sup>+</sup>] cations by iron(II). **W. Smith**, T.A. Jackman, O. Sode
- COMP 332.** Molecular simulation of transport of DNA grafted nanoparticles. **S. Ciobotarescu**, J. McLaughlin, C. Desgranges, J. Delhomelle
- COMP 333.** Molecular simulations of bubble formation in metastable liquids. **B. Gonzalez**, L. Huber, C. Desgranges, J. Delhomelle
- COMP 334.** Subset system study of diisopropylammonium bromide: An organic ferroelectric crystal. **C.M. Sanchez**
- COMP 335.** Investigation of different binding kinetics among the neuraminidase inhibitors. **G. Kang**, A.W. Van Wynsberghe
- COMP 336.** Examining the binding pathways of peramivir to wild-type neuraminidase through molecular dynamics simulations and MM/GBSA analysis. **R. Wenner**, A.W. Abera, B.J. Banman, A.W. Van Wynsberghe
- COMP 337.** DFT study of the selectivity of DOPA-decarboxylase. **E. Harrison**, A.R. Ritter, L.W. Peterson, M.L. Cafiero
- COMP 338.** Modeling material properties and charge transfer for lithium-ion batteries. **L. Raguette**, R. Jom
- COMP 339.** Analysis of MM/GBSA free energy calculations to investigate the binding pathways of neuraminidase. **E.M. Lewis**, P.F. Marris, L.M. Krause, A.W. Van Wynsberghe
- COMP 340.** Novel approaches to the computer assisted informatics of oxysterol and 7-ketocholesteryl benzoate. **E.J. Parish**, G. Ren, Y. Lo, H. Honda
- COMP 341.** Automated selection of active orbital spaces. **C.J. Stein**, M. Reiher
- COMP 342.** Computational studies of the UV/visible absorption spectra of selected merocyanine dyes. **I. Tolbatov**, S. Grimme
- COMP 343.** Examining ligand recognition in RNA aptamers via molecular dynamics simulations. **P. Gasper**, A.A. Chen
- COMP 344.** Development of a coarse-grained model of polypeptides for studying self-assembly in solution. **P. Du**, R. Kumar
- COMP 345.** Fragment ER: Efficient and accurate binding free energy calculation method for protein-ligand complex. **T. Masuda**, R. Tanimura, N. Matubayasi
- COMP 346.** Accurate absorption spectra of aqueous estrogen derivatives via molecular dynamics/EOM-CCSD. **D. Ruskka**, M. Paul, S.N. Eustis
- COMP 347.** Visualising the molecular drivers behind drug resistance. **M. Malaisree**, C.J. Woods
- COMP 348.** Predicting polythiophene electronic structures: Statistical model screening for the efficient discovery of OPV materials. **M. Cole**, I. Kanal, G. Hutchison
- COMP 349.** Molecular simulation study of the 3,4-dihydroxymandelic acid on amyloid beta 40 monomer for treatment of Alzheimer's disease. **E. Tumurbaatar**, J. Kim, C. Shin, S. Jang, J.R. Kim
- COMP 350.** Modelling UV-vis spectra for a series of alkenyl substituted pyrroles. **R. Fair**
- COMP 351.** Computationally predicted signatures of EGFR exon 20 insertions in non small cell lung cancer and its response to irreversible inhibitors. **B. Su**, D. Huang, P. Wang, O. Lin, Y. Tseng
- COMP 352.** Longtime simulation of dynamical fractures in vault nanoparticles through multiscale molecular dynamics. **J.M. Espinosa Duran**, A. Abi Mansour, P. Ortoleva
- COMP 353.** Molecular modeling of small molecule inhibitors of the Hv1 proton channel. **V.T. Lim**, A.D. Geragotelis, N. Lim, J.A. Freitas, D.L. Mogley, D. Tobias
- COMP 354.** In silico measurements of the ionic current in a K<sup>+</sup> ion channel using weighted ensemble simulations. **S. Capponi**, H. Siddiqi, J. Adelman, J. Rosenberg, M. Grabe
- COMP 355.** Ligand- and receptor-based virtual screening for inhibitors of the signal transducer and activator of transcription 5 (STAT5). **E. Gianti**, G. Fiorin, M.L. Klein, R.J. Zauhar
- COMP 356.** Incorporating continuum solvent-based receptor desolvation into molecular docking. **R. Stein**, T.E. Balias, B. Shoichet
- COMP 357.** Evaluating use of tens to hundreds of active ligands in pharmacophore hypothesis perception. **E.T. Mack**, S.L. Dixon, C.D. Von Bargen, M.P. Repasky
- COMP 358.** Density functional theory study of the binding of tyrosine and phenylalanine with graphene. **D.A. Daggag**, J. Lazare, T. Dinadayalane
- COMP 359.** Molecular modeling of multicompartiment micelle nanoreactors. **C.P. Callaway**, P. Sood, S. Jang
- COMP 360.** Identification of ZIKA virus inhibitors using insilico screening. **M. Rivera**, S. Sirimulla
- COMP 361.** Non-adiabatic QM/MM: A hybrid approach to doing non-adiabatic excited state dynamics. **D.A. Tracy**, J. Bjorgaard, S. Tretiak, A.E. Roitberg
- COMP 362.** Rationalization and visualization of non-bonded interactions using extended Hückel theory. **A. Ajamian**, C. Williams, P. Labute, N. Li
- COMP 363.** Simulations of small molecule diffusion in polyelectrolyte solutions. **P.K. Walhout**, Z. He, A.A. McMillan, T.D. Sedlacker
- COMP 364.** Python program for solving problems in computer-aided peptide design. **A.S. Bayden**, J.H. Audie, D.J. Diller
- COMP 365.** Effects of virion structural changes on binding events related to molecular mechanisms of influenza infections by brownian dynamics simulations. **S.E. Kochanek**, J.D. Durrant, R.E. Amaro
- COMP 366.** IKK $\beta$  dynamic structure regulates NF- $\kappa$ B pathway in inflammatory response. **T.T. Nguyen**, J. Schiffer, G. Ghosh, R.E. Amaro

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**COMP 367.** Engineering increased activity into a ketosteroid isomerase homologue through predictive computational methods. **G. Levine**, T.A. Coulther, P.J. Beuning, M.J. Ondrechen

**COMP 368.** Information-driven fully flexible HADDOCKing: Performance on a benchmark of protein-ligand complexes. **J. Grinstead**, A. Thureau, J.P. Rodrigues, K.R. Reinke, A.F. Ramsing, T.L. Wormwood, A. Bonvin

**COMP 369.** Docking studies of camodulin and fulvic acid. **F.C. Zhang**, L. Liu, Y. Wu

**COMP 370.** First-principles study of di-substituted donor moieties on NLO properties: Theoretical paradigms of interactive computation. **M. Janjua**

**COMP 371.** Study on the interaction between resveratrol and CopC by spectroscopic and docking methods. **Z. Song**, **F.C. Zhang**

**COMP 372.**  $C_{60}$ Pd: A novel heterogeneous catalytic material for Suzuki-Miyaura reaction. **M.C. Padole**, P. Deshpande

**COMP 373.** Withdrawn.

**COMP 374.** PYCED: An efficient technique to simulate charge and exciton dynamics coupled with DFT methods for large systems. **P. Ramos**, M. Pavanello

**COMP 375.** Theoretical investigation of electron-nuclear dynamics in the  $[Au_{10}(SH)_6]^{-1}$  thiolate-protected gold nanocluster. **R.D. Senanayake**, A.V. Akimov, C.M. Aikens

**COMP 376.** Withdrawn.

**COMP 377.** Predicting *N*-methylated cyclic peptide structures to inform force field development. **D. Slough**, H. Yu, S. McLugh, Y. Lin

**COMP 378.** ALKBH7 variant related to prostate cancer exhibits altered substrate binding. **A. Walker**, P. Silvestrov, T.A. Müller, R.H. Podolski, G. Dyson, R.P. Hausinger, G.A. Cisneros

**COMP 379.** Withdrawn.

**COMP 380.** Supramolecular effects in radical chemistry. **G. Gomes**, I. Alabugun

**COMP 381.** Withdrawn.

**COMP 382.** *In silico* discovery of high performance organic polymers for optical applications. **M. Afzal**, J. Hachmann, C. Cheng

**COMP 383.** Linear absorption spectra from explicitly time-dependent equation-of-motion coupled-cluster theory. **D.R. Nascimento**, A.E. DePrince

**COMP 384.** Withdrawn.

**COMP 385.** Plasmonic resonances: A systematic analysis of metallic nanoparticles using real-time, time-dependent DFTB. **N. Ilawe**

**COMP 386.** Withdrawn.

**COMP 387.** Kirkwood Buff derived force field for some biologically important oxo anions. **N. Naleem**, P.E. Smith

**COMP 388.** Withdrawn.

**COMP 389.** Scaffold repurposing of ring-constrained nucleosides: A molecular modeling perspective. **A. Ciancetta**, D. Tosh, K.A. Jacobson

**COMP 390.** Systematic parameterization of lignin for the CHARMM force field. **J.V. Vermaas**, L. Petridis, G. Beckham, M.F. Crowley

**COMP 391.** Elucidating the functional roles of spatial organization in cross-membrane signal transduction by a hybrid simulation method. **Y. Wu**

**COMP 392.** Insights into the nature of glass formation from ultra-efficient simulations of the supercooled state. **D.S. Simmons**, J. Hung, T.K. Patra, J. Mangalala, V. Meenakshisundaram

**COMP 393.** Toward polarizable AMOEBA thermodynamics at fixed charge efficiency using a dual force field approach: Application to peptides and proteins. **J.M. Litman**, S.D. LuCore, C. O'Connell, **M.J. Schnieders**

**COMP 394.** Understand protein functions by comparing the similarity of local structural environments. **Y. Wu**

**COMP 395.** Large-scale v2RMD-driven CASSCF methods. **A.E. DePrince**

**COMP 396.** Ligand residence times from simulation using loosely coupled parallel trajectories. **A. Dickson**

**COMP 397.** Elucidating mechanisms of RNA recognition and processing in the exosome complex via enhanced sampling molecular dynamics simulations. **L. Vukovic**

**COMP 398.** Incorporation of sigma hole scoring function in Autodock Vina. **S. Sirimulla**

**COMP 399.** Hard-sphere Monte Carlo model of nanomaterial toxicity. **N. Assefa**

**COMP 400.** Investigating the structure of PEI-nucleic acid gene delivery complexes using molecular dynamic simulations. **N. Walker**

**COMP 401.** Elucidating binding mechanisms of ABA analogues: Activation of Pyl5 receptor by pyrabactin and quinabactin. **M. Meigooni**, C. Zhao, D. Shukla

**COMP 402.** Binding site protonation and self-correcting occlusion control the Na<sup>+</sup>/K<sup>+</sup>-pump selectivity. **H. Rui**, P. Artigas, B. Roux

**COMP 403.** Towards a rational design of macrolide antibiotics in order to combat the bacterial resistance. **A. Pavlova**, J.M. Parks, A.K. Oyelere, J. Gumbart

**COMP 404.** Physiologically relevant transmembrane potential modelling of complex lipid bilayer systems. **X. Lin**, A. Gorfe

**COMP 405.** Interaction affinity of biological molecules with 2D materials. **N. Saikia**, K. Waters, U. Saikia, M. Seel, R. Pandey

**COMP 406.** Comparative analysis of the structural determinants of endogenous cannabinoids and activity of illicit drugs on cannabinoid receptors. **V.K. Yadav**, K.M. Elokely, M.L. Klein

**COMP 407.** Catalytic mechanism of RNase A transphosphorylation. **M. Huang**, D.M. York

**COMP 408.** Implementation of analytical gradient for FMO RI-MP2 method. **B.Q. Pham**, M.S. Gordon

**COMP 409.** Modeling and simulation of AcrB multi drug transporters functional dynamics. **S. Jamshidi**, M. Sutton, K.M. Rahman

**COMP 410.** Through-space and through-bond stabilization of cis alkenyl anions. **H. Villegas**, K.B. Wiberg, B.G. Janesko

**COMP 411.** Community participation in the D3R Continuous Evaluation of Ligand Pose Prediction (CELPP) competition. **J. Wagner**, S. Liu, S.M. Gathiaka, R. Malmstrom, M.K. Gilson, R.E. Amaro

**COMP 412.** Simulation of the interaction between polymer-encapsulated air microbubble and blood cell in the blood vessel. **Z. Wang**

**COMP 413.** Unified framework for computer-aided biologics design. **A. Deschenes**

**COMP 414.** Challenges in the discovery of macrocyclic cyclophilin inhibitors. **U. Schmitz**, D. Shivakumar

## Section C

Moscone Center

West Hall

### NVIDIA GPU Award

M. E. Berger, C. L. Simmerling, *Organizers*

6:00 - 8:00

**COMP 415.** Multiscale modeling of poly(ethylene oxide) with ionic liquids: GPU enabled first-principles force fields. **C. Son**, J. McDaniel, J.R. Schmidt, Q. Cui, A. Yethiraj

**COMP 416.** GPU implementation of molecular docking with applications to receptor flexibility and energy landscape sampling. **J. Sunseri**, D. Koes

**COMP 417.** Calculation of host-guest binding free energies via the AMOEBA polarizable force field. **M.L. Laury**, J.W. Ponder

**COMP 418.** ANAKIN-ME: Using deep learning to develop a fully-transferable and chemically accurate GPU-accelerated potential. **J.S. Smith**, O. Isayev, A.E. Roitberg

**COMP 419.** GPU-enabled real-time electron dynamics of nitrogen-doped graphene nanoflakes. **S.I. Allec**, B.M. Wong

## Section D

Moscone Center

West Hall

### OpenEye Outstanding Junior Faculty Award

C. L. Simmerling, *Organizer*

6:00 - 8:00

**COMP 420.** Multiscale simulations to elucidate enzymatic processing of DNA and RNA. **M. De Vivo**

**COMP 421.** Accounting for water in early stage drug discovery and design. **T.P. Kurtzman**

**COMP 422.** Accelerating real-time electron dynamics calculations of large plasmonic systems. **B.M. Wong**

**COMP 423.** Multireference quantum chemistry and conical intersections at the nanoscale. **B.G. Levine**

**COMP 424.** Elucidating heterogeneous ice nucleation mechanisms using large scale rare event simulations. **S. Sarupria**, B. Glatz, R. Defever, W. Hanger, L. Ngo, A. Apon

## Section E

Moscone Center

West Hall

### Wiley Computers in Chemistry Outstanding Postdoc Award

C. L. Simmerling, *Organizer*

6:00 - 8:00

**COMP 425.** Electronic transitions in the condensed phase: Real-time and linear-response time-dependent density functional theory. **M. Provorse**, C. Isborn

**COMP 426.** Phospholipases A<sub>2</sub> a pharmaceutical target to diminish inflammation. **V. Mouchlis**, J. McCammon, E.A. Dennis

## WEDNESDAY MORNING

### Section A

InterContinental San Francisco

Twin Peaks

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Dynamics & Modeling of Allosteric Systems

*Cosponsored by PHYS*

G. Verkhivker, *Organizer*

C. Chang, *Organizer, Presiding*

8:30 **COMP 427.** Allosteric through the lens of a computational microscope. **R.E. Amaro**

9:00 **COMP 428.** Discrete molecular dynamics approach to the study of protein conformational changes. **M. Orozco**

9:30 **COMP 429.** Molecular simulations of membrane sensing and remodeling dynamics. **G. Hummer**, R. Covino, A. Bahrami, R. Bhaskara, J. Köfinger

10:00 Intermission.

10:20 **COMP 430.** ATP hydrolysis as a driver of conformational change, an example of GroEL. **J. Liu**, K. Kavran, Y. Wang, K. Jia, **R.L. Jernigan**

10:50 **COMP 431.** Conformational transition in kinase from explicit solvent simulations and Markov model analysis. **Q. Cui**

11:20 **COMP 432.** Surveying key residues for protein allosteric using rigid residue scan method. **P. Tao**

### Section B

InterContinental San Francisco

Fremont

### Material Science

#### Organic

C. M. Aikens, *Organizer*

A. Abbaspour Tamijani, *Presiding*

8:30 **COMP 433.** Functional group dependent conductance of stilbene: A first-principles transport study. **M.R. Neupane**, C. Carlin, C.B. Rinderspacher, J. Andzelm

9:00 **COMP 434.** Design principles for organic photovoltaic materials from ab initio simulations. **M.B. Goldey**, D. Reid, J.J. De Pablo, G.A. Galli

9:30 **COMP 435.** DFT evidence of unforeseen bending in linearly fused polycyclic rings of hexasilabenzenoids. **A. Gupta**, J. Arora

10:00 Intermission.

**10:30 COMP 436.** Identification of next-generation materials for organic solar cells via a collaborative theory-experimental approach. **S.A. Lopez**, N.C. Davy, A. Oh, A. Aspuru-Guzik, Y. Loo

**11:00 COMP 437.** Theory linked with experiment in discovering new functional organic/organometallic materials. **K.R. Cousins**, T. Usher, R. Zhang, D. Miller, D.C. Smith

**11:30 COMP 438.** Capturing the role of temperature in crystal polymorph stability using molecular modeling. **E. Dybeck**, N. Abraham, N.P. Schieber, **M.R. Shirts**

**12:00 COMP 439.** Predicting relative polymorph stability using multi-state reweighting methods and Jacobian mapping. **N.P. Schieber**, E. Dybeck, M.R. Shirts

### Section C

InterContinental San Francisco  
Howard

#### Drug Design

#### Structure-Based Approaches

M. R. Landon, Y. Tseng, *Organizers*

C. Dickson, *Presiding*

**8:30 COMP 440.** Structural insight into sodium-dependent sugar transporters and their inhibition mechanism. **P. Bisignano**, C. Ghezzi, A. Paz, C. Kalyanaraman, M.P. Jacobson, R. Friemann, J. Abramson, E. Wright, M. Grabe

**8:55 COMP 441.** Structural insight into KRAS A146 mutations from molecular simulations. **T. Abramyan**, K. Rossman, D. Kireev

**9:20 COMP 442.** Interdependence of inhibitor recognition in HIV-1 protease subsites. **J.L. Paulsen**, F. Leidner, D. Ragland, N. Kurt Yilmaz, C.A. Schiffer

**9:45** Intermission.

**10:05 COMP 443.** Systematic investigation of increased protein flexibility in protein-ligand docking with mixed-resolution Monte Carlo. **J.M. Spiriti**, D.M. Zuckerman

**10:30 COMP 444.** Computational investigation of the DNA binding domain of p53: A drive towards novel therapeutics. **J.W. Essex**, M.P. Cridle, Z. Ouaray, C. Verma

**10:55 COMP 445.** Origin of preferential binding of aryl chloride groups in serine protease S1 pockets: An application of Fragment Symmetry-Adapted Perturbation Theory (F-SAPT) to drug protein binding. **D.L. Cheney**, D.F. Sitkoff, R.M. Parrish, C. Sherrill

**11:20 COMP 446.** Dealing with x-ray data in structure-based design: Estimating and visualizing electron density support. **A. Meyder**, E. Nitinger, G. Lange, R. Klein, **M. Rarey**

### Section D

InterContinental San Francisco  
Cathedral Hill

#### Molecular Mechanics

#### Foldamers, Carbohydrates, Macrocycles & Cyclic Peptides

M. Feig, *Organizer*

J. F. Rudzinski, *Presiding*

**8:30 COMP 447.** Computational investigations of functional arylamide foldamers. **V. Pophristic**, Z. Liu, A. Abramyan, S. Makeneni

**9:00 COMP 448.** Mutations tuning the structure and dynamics of amylin fibrils. **F. Tofeleanu**, Y. Yuan, B. Brooks, N. Buchete

**9:30 COMP 449.** Molecular dynamics modeling of fluorescent rosette nanotubes. **A. Gonzales**, B. Legesse, T. Yamazaki, H. Fenniri

**9:55** Intermission.

**10:10 COMP 450.** Developing enhanced sampling methods for cyclic peptides. **S. McHugh**, J. Rogers, H. Yu, Y. Lin

**10:35 COMP 451.** Cyclization, docking, and sampling macrocycles with prime. **D.J. Sindhikara**, T. Day, K. Borrelli

**11:05 COMP 452.** Seeing the invisible: Dynamics of glycans on neuronal NMDA receptors. **A. Sinitskiy**, N. Stanley, V.S. Pande

**11:35 COMP 453.** Revealing the *T. reesei* Cel6A hydrolysis mechanism via transition path sampling. **H. Mayes**

### Section E

InterContinental San Francisco  
Laurel Hill

#### Quantum Mechanics

A. E. DePrince, *Organizer*

D. Nascimento, *Presiding*

**8:30 COMP 454.** Intersystem crossings kinetics in complex systems: Implementation of minimum energy crossing point search within the fragment molecular orbital method. **D.S. Kaliakin**, Y. Alexeev, D.G. Fedorov, S.A. Varganov

**8:55 COMP 455.** One- and three-electron bonding in conjugated hydrocarbons. **M. Alkan**, A. Rogachev

**9:20 COMP 456.** Nonadiabatic molecular dynamics with delta-SCF excited states. **A.V. Akimov**

**9:45 COMP 457.** Nonadiabatic transition state theory: Application to intersystem crossing in  $C_2CS$ . **A.O. Lykhin**, S.A. Varganov

**10:10** Intermission.

**10:25 COMP 458.** Electronic structure of single molecule magnets. **B. Vlaisavljevich**, D.E. Freedman, S.T. Liddle, L. Gagliardi, T. Shiozaki

**11:00 COMP 459.** Computational study of metal-oxo reactive species in porous media with strongly correlated methods. **K.D. Vogiatzis**, L. Gagliardi, E. Pidko

**11:35 COMP 460.** Modelling the pump-probe spectroscopy of opsin mimics. **B. Demoulin**, G. Cerullo, I. Rivalta, M. Garavelli

### Section F

InterContinental San Francisco  
Nob Hill

#### State-of-the-Art Methods for Modeling Materials Chemistry

*Cosponsored by CATL and MPPG<sup>‡</sup>*

B. G. Janesko, J. A. Keith, *Organizers, Presiding*

**8:30 COMP 461.** Calculations of NMR shifts in metallic and insulating solids. **P. Blaha**

**8:55 COMP 462.** Computational studies of metal oxide clusters as models for surface defect sites: Modeling electron detachment with efficient electronic structure methods. **H.P. Hratchian**

**9:20 COMP 463.** Nonlinear properties from TDDFT: Trials and tribulations. **S.M. Parker**, F.U. Furché

**9:45 COMP 464.** Scalable all-electron theory of real-world molecules and materials - examples: Light harvesting and NMR. **V. Blum**

**10:10** Intermission.

**10:30 COMP 465.** Functional 2D and 3D borides. **P.J. Robinson**, Z. Cui, **A. Alexandrova**

**10:55 COMP 466.** Challenges in calculating the bandgap of triazine-based carbon nitride structures. **S.N. Steinmann**, S. Melissen, T. Le Bahers, P. Sautet

**11:10 COMP 467.** Optical properties of highly absorbing Helquat derivatives: *Ab initio* study. **D. Galaktionov**, E. Muchová, P. Slavicek

**11:25 COMP 468.** Finding intersystem crossing points between two single-reference potential energy surfaces. **X. Sheng**, L.M. Thompson, H.P. Hratchian

**11:40 COMP 469.** Describing a strongly correlated model material system with a mean-field method. **J. Kong**, E. Proynov, J. Yu, R. Pachtar

**12:05 COMP 470.** *Ab initio* modeling of charge transport defects in quantum dot arrays. **M.B. Goldey**, N.P. Brawand, M. Voros, G.A. Galli

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

*Sponsored by CATL, Cosponsored by COMP*

#### Photocatalysis

*Sponsored by CATL, Cosponsored by COMP*

*Sponsored by CATL, Cosponsored by COMP*

#### Public-Private Partnerships: Fostering Drug Discovery & Data Sharing

*Sponsored by CINF, Cosponsored by COMP*

## WEDNESDAY AFTERNOON

### Section A

InterContinental San Francisco  
Twin Peaks

#### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Inhibition & Therapeutic Applications of Allosteric Mechanisms

*Cosponsored by PHYS*

C. Chang, G. Verkhrivker, *Organizers*

R. E. Amaro, *Presiding*

**1:30 COMP 471.** PROGNOSTIX: A pipeline for personalized diagnostics and drug. **J. Skolnick**

**2:00 COMP 472.** Investigating allosteric regulation and cryptic pocket formation through enhanced sampling simulations. **F. Gervasio**

**2:30 COMP 473.** Prediction on allosteric and cryptic sites on ligand-free protein structures. **S. Vajda**, D. Kozakov, D.R. Hall

**3:00** Intermission.

**3:20 COMP 474.** Computational riboswitch detection and design using inverse RNA folding simulations with ligand binding information. **M. Drory**, I. Kifer, S. Sengupta, Z. Yakhini, **D. Barash**

**3:50 COMP 475.** Fine-tuned allosteric regulation of neuronal NMDA receptors with potential therapeutic importance. **N. Stanley**, A. Sinitskiy, B.D. Sellers, V.S. Pande

### Section B

InterContinental San Francisco  
Fremont

#### Material Science

#### Electron Transfer & Nanoparticles

C. M. Aikens, *Organizer*

M. Provorse, *Presiding*

**1:30 COMP 476.** Functional mode hot electron transfer theory. **J. Elenewski**, J. Cai, W. Jiang, **H. Chen**

**2:00 COMP 477.** Scaling relationships for nonadiabatic energy relaxation times in warm dense matter: Toward understanding the equation of state. **A.V. Akimov**

**2:30 COMP 478.** Investigation of many-body correlation in excitonic and biexcitonic systems using electron-hole multicomponent coupled-cluster theory (eh-mcCC). **B.H. Ellis**, A. Chakraborty

**3:00 COMP 479.** Unraveling excitation energy transfer mechanisms in plasmonic nanoantennas. **N. Ilawe**, M.B. Oviedo, B.M. Wong

**3:30** Intermission.

**4:00 COMP 480.** Luminescence properties of  $Au_{30}(SH)_{24}$  and  $Au_{22}SH_{18}$  nanoparticles. **K. Weerawardene**, C.M. Aikens

**4:30 COMP 481.** Theoretical study of the chiroptical activity of BINAP- and DIOP-stabilized undecagold clusters. **N. Karimova**, C.M. Aikens

**5:00 COMP 482.** Double ring tubular structures of boron clusters stabilized by metal atom doping:  $M@B_{14}$  ( $M = Cr, Fe, \text{ and } Ni$ ). **P. Saha**, A. Rahane, N. Sukumar, V. Kumar

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

<sup>‡</sup>Cooperative Cosponsorship

## Section C

InterContinental San Francisco  
Howard

## Molecular Mechanics

## Membrane-Interacting Proteins &amp; Peptides

M. Feig, *Organizer*

S. Lindert, *Presiding*

**1:30 COMP 483.** Structure-kinetic relationships of passive membrane permeation from multiscale modeling. C. Dickson, V. Hornak, R.A. Pearlstein, J. Duca

**2:00 COMP 484.** Modeling permeability through outer-membrane channels in gram-negative pathogens. S. Acosta-Gutierrez, I. Bodrenko, S. Susruta, G. Mallocci, M. Scorciapino, M. Ceccarelli

**2:25 COMP 485.** Studying the substrate specificity and reactivity of MycG: A multifunctional enzyme. S. Yang, J.M. Grandner, M. Demars, D.H. Sherman, K.N. Houk

**2:50** Intermission.

**3:05 COMP 486.** Graded activation and free energy landscapes of a muscarinic G protein-coupled receptor. Y. Miao, J. McCammon

**3:35 COMP 487.** Structural insights into conformation and dynamics of the cannabinoid CB2 receptor through an extended MD simulation of CP 55, 940-CB2 complex. P. Pandey, K. Roy, R.J. Doerksen

**4:05 COMP 488.** Cell-scale computational modeling methodologies for living membranes. J.V. Vermaas, E. Tajkhorshid

**4:35 COMP 489.** Oncogenic mutations differentially affect bax monomer, dimer, and oligomeric pore formation in the membrane. M. Zhang, J. Zheng, R. Nussinov, B. Ma

## Section D

InterContinental San Francisco  
Cathedral Hill

## Quantum Mechanics

A. E. DePrince, *Organizer*

J. Larkin, *Presiding*

**1:30 COMP 490.** QM cluster model examination of constrained biphenyl dihedral rotation within a modified threonyl-tRNA synthetase: A transition state trapped? T.J. Summers, N.J. Deyonker

**2:05 COMP 491.** High-level characterization of the properties of R-X... $\pi$  interactions in protein-ligand complexes. K. Riley, K. Tran

**2:30 COMP 492.** Improved energy decomposition analysis for studying covalent bonds. D.S. Levine, M.P. Head-Gordon

**2:55** Intermission.

**3:10 COMP 493.** Developments in stochastic coupled cluster theory. A.J. Thom

**3:35 COMP 494.** Electron propagator theory and correlation-bound anions. J.V. Ortiz

**4:00 COMP 495.** Improving efficiency of semi-direct MP2 through over-subscription. E. Fought, V. Sundriyal, M. Sosonkina, T.L. Windus

**4:25 COMP 496.** Development of a many-body carbon dioxide potential and its application to clusters up to (CO)<sub>13</sub>. O. Sode

## Section E

InterContinental San Francisco  
Laurel Hill

## Drug Design

## Structure-Activity Relationships &amp; Pharmacophores

M. R. Landon, Y. Tseng, *Organizers*

J. M. Spiriti, *Presiding*

**1:30 COMP 497.** Combining protein interaction potentials with water analysis in structure-based design. T. Cheeseright, M.D. Mackey, G. Tedesco, S. Tomasio, P. Tosco

**1:50 COMP 498.** Optimization of shape fingerprints for protein-ligand systems. J. Zarnicka, A.G. Leach, S.J. Enoch

**2:10 COMP 499.** Deep learning profile-QSAR 2.0 IC<sub>50</sub> predictions as accurate as 4-pt IC50s: Applications to polypharmacology. E.J. Martin, V. Polyakov, L. Tian

**2:30 COMP 500.** Towards in-silica screening of molecule permeation through outer membrane channels in Gram-negative bacteria. I. Bodrenko, S. Acosta Gutierrez, T. D'Agostino, S. Samanta, S. Salis, G. Mallocci, M. Scorciapino, M. Ceccarelli

**2:50** Intermission.

**3:10 COMP 501.** Withdrawn.

**3:30 COMP 502.** GPCR activation: Principle component analysis as a diagnostic signature correlated with SAR. D.L. Harris, J.B. Thomas, Y. Zhang, E. Gay, S. Runyon

**3:50 COMP 503.** Molecular simulation of EFdA and related analogs to determine the structural basis of HIV-1 drug resistance. D. Das, Y. Takamatsu, S. Kohgo, S. Hattori, H. Hayashi, K. Matsuda, S. Sarafianos, H. Mitsuya, K. Maeda

**4:10 COMP 504.** Automated extraction of pharmacophores and toxophores from large-scale *in vitro* pharmacology data. A. Dossetter, E.J. Griffen, A.G. Leach, J. Stacey, L. Reid, S. Montague

## Section F

InterContinental San Francisco  
Nob Hill

## State-of-the-Art Methods for Modeling Materials Chemistry

*Cosponsored by CATL and MPPG<sup>†</sup>*

B. G. Janesko, J. A. Keith, *Organizers, Presiding*

**1:30 COMP 505.** Towards a chemically accurate description of reactions of molecules with transition metal surfaces. G. Kroes

**1:55 COMP 506.** Towards accurate and reliable simulations water at interfaces, and more.... A. Michaelides

**2:20 COMP 507.** Understanding and eliminating delocalization error in transition metal chemistry. T.Z. Gani, Q. Zhao, H.J. Kulik

**2:45 COMP 508.** Development of a general framework for coupling machine learning and *ab initio* approaches in materials chemistry. A. Kolpak

**3:10** Intermission.

**3:30 COMP 509.** ANAKIN-ME: A general purpose and chemically accurate deep learned potential. J.S. Smith, O. Isayev, A.E. Roitberg

**3:55 COMP 510.** Efficient parallelization of the calculation of exact exchange for plane-wave DFT. T.A. Barnes, J. Deslippe, P. Kent, D. Prendergast

**4:10 COMP 511.** Application of *ab initio* many-body perturbation theory with Gaussian basis sets to the singlet and triplet excitations of organic molecules. S. Hamed, T. Rangel, F. Bruneval, J. Neaton

**4:25 COMP 512.** QM/MM simulations of TADF materials. P. de Silva, T. Zhu, T.A. Van Voorhis

**4:50 COMP 513.** Accurate level alignment at molecule-metal interfaces from an optimally-tuned range-separated hybrid functional. Z. Liu, D.A. Egger, S. Refaely-Abramson, L. Kronik, J. Neaton

**5:05 COMP 514.** Hybrid functional pseudopotentials. L. Tan, J. Yang, A.M. Rappe

## Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

## Transition Metal &amp; Metal Oxide Catalysis

*Sponsored by CATL, Cosponsored by COMP*

## Public-Private Partnerships: Fostering Drug Discovery &amp; Data Sharing

*Sponsored by CINP, Cosponsored by COMP*

## THURSDAY MORNING

## Section A

InterContinental San Francisco  
Twin Peaks

## Allosteric Interactions &amp; Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

## Inhibition &amp; Therapeutic Applications of Allosteric Mechanisms

*Cosponsored by PHYS*

C. Chang, G. Verkhivker, *Organizers*

M. P. Jacobson, *Presiding*

**8:30 COMP 515.** Computer-aided discovery of allosteric modulators for a muscarinic G-protein-coupled receptor. Y. Miao, J. McCammon

**9:00 COMP 516.** Structure-based design of allosteric K-Ras inhibitors. A. Gorfe

**9:30 COMP 517.** Kinase allostery atlas. D. Kozakov

**10:00** Intermission.

**10:20 COMP 518.** Mechanisms for allosteric inhibition of protein tyrosine phosphatase 1B. H.P. Hendrickson, J. Lipchok, B. Douglas, I. Rivalta, N. Ten, V.S. Batista, J. Loria

**10:50 COMP 519.** Order in the disordered polybasic domain of K-Ras. P.S. Srivastava, Y. Zhou, H. Liang, K. Cho, J. Hancock, A. Gorfe

**11:20 COMP 520.** Exploring the therapeutic landscape of chromatin via integrative computational modeling: An allosteric regulation from transition metal agents. G. Palermo, Z. Adhiksan, T. Riedel, Z. Ma, R. Muhammad, U. Roethlisberger, P. Dyson, C. Davey

## Section B

InterContinental San Francisco  
Fremont

## Material Science

## Functional Materials &amp; High-Throughput Screening Methods

C. M. Aikens, *Organizer*

N. Saikia, *Presiding*

**8:30 COMP 521.** Assessing the potential of LaCrO<sub>3</sub> as a *p*-type semiconducting oxide. A.L. Gavin, G.W. Watson

**9:00 COMP 522.** Interatomic potential for a perovskite electrolyte derived from first principles. A.K. Lucid, G.W. Watson

**9:30 COMP 523.** High-throughput screening of transparent conducting oxides. C. Sutton, R.J. Baldock, L.M. Ghiringhelli, M. Scheffler

**10:00 COMP 524.** Gibbs energies of solids through materials informatics. C. Bartel, A. Deml, S. Miller, J. Rumpitz, A.W. Weimer, S. Lany, C. Musgrave, V. Stevanovic, A. Holder

**10:30** Intermission.

**11:00 COMP 525.** *In silico* design of 3D covalent organic frameworks for gas adsorption applications. R. Mercado, R. Fu, B. Smit

**11:30 COMP 526.** Understanding of spectacular gas adsorption/separation phenomena in metal-organic frameworks. R. Pillai, G. Maurin, S. Krause, S. Kaskel, J. Yoon, J. Chang

**12:00 COMP 527.** Cryptands as cathode materials for batteries. H. Gokturk

## Section C

InterContinental San Francisco  
Howard

## Molecular Mechanics

## Force Fields

M. Feig, *Organizer*

F. Tofoleanu, *Presiding*

**8:30 COMP 528.** Toward more accurate force fields through direct chemical perception. D.L. Mobley, C. Bannan, C. Zanette, C.I. Bayly, J.D. Chodera, M.R. Shirts, J. Fass, B. Manubay, P. Eastman, M.K. Gilson

**9:00 COMP 529.** Systematic exploration of hydration thermodynamics and kinetics of various approximate polarization schemes. F.C. Pickard, A.C. Simmonett, G. Koenig, J. Huang, B. Brooks, J.W. Ponder

**9:30 COMP 530.** Consistent integration of experimental and *ab initio* data into effective molecular force fields. L. Vlicek

**10:00** Intermission.

**10:15 COMP 531.** Refined AMBER force field (FUJ) force field for phospholipids. N. Kamiya, H. Fujitani

**10:45 COMP 532.** Force field development for water interacting with Pt surfaces. A.W. Goetz, R.F. de Morais, B. Schweitzer, P. Fleurat-Lessard, P. Sautet, S. Steinmann, C. Michel

**11:15 COMP 533.** Biocompatible force field for thiolated gold nanoclusters in macromolecular environments. J. Gascon

**11:45 COMP 534.** Thermodynamic calculations of cyclodextrin host-guest binding: A comprehensive evaluation of force field performance. N.M. Henriksen, M.K. Gilson

## Section D

InterContinental San Francisco  
Cathedral Hill

## Quantum Mechanics

A. E. DePrince, *Organizer*  
J. J. Foley, *Presiding*

**8:30 COMP 535.** Strong-field ionization in molecules using range-separated time-dependent density functional theory. A. Sissay, A. Bruner, P. Abanador, F. Mauger, M. Gaarde, K. Schafer, K. Lopata

**9:05 COMP 536.** Non-linear conductivity of metals from real-time time-dependent density functional theory. X. Andrade, A.A. Correa

**9:30 COMP 537.** Excited state absorption from real-time time-dependent density functional theory simulations: Predicting molecular optical response by excited state density propagation. D.N. Bowman, J. Asher, S. Fischer, N. Govind, C.J. Cramer

**9:55 COMP 538.** Quantum mechanical models with statistical effects and statistical models without quantum effects. J. Parkhill

**10:30** Intermission.

**10:45 COMP 539.** Linear-response, stability and single-particle excited states in noncollinear spin density functional theory. G. Scalmani, F. Egidi, M.J. Frisch, X. Li

**11:10 COMP 540.** Many-pair expansion: A systematically improvable correction scheme for including strong and long-range correlations in DFT. P. de Silva, T. Zhu, T.A. Van Voorhis

**11:35 COMP 541.** Unconventional Kohn-Sham theory: Implementation and application of complex-restricted and general orbital density functional theories. L.W. Bertels, M.P. Head-Gordon

**12:00 COMP 542.** Polarizabilities of  $\pi$ -conjugated chains revisited: Improved results from broken-symmetry, range-separated DFT. B.M. Wong, M.B. Oviedo, N. Ilawe

## Section E

InterContinental San Francisco  
Laurel Hill

## Drug Design

## Applications

M. R. Landon, Y. Tseng, *Organizers*  
M. Korczynska, *Presiding*

**8:30 COMP 543.** Molecular simulations disclose a novel mode of one-stranded intercalation in nucleosomes that is DNA topology dependent. G. Palermo, Z. Ma, Z. Adhiksan, B. Murray, T. von Erlach, P. Dyson, C. Davey, U. Roethlisberger

**8:50 COMP 544.** Withdrawn.

**9:10 COMP 545.** Rational bioavailability design: Optimizing bioavailability in lead op with Global Sensitivity Analysis of Physiologically-Based PK (GSA of PBPK). E.J. Martin, P. Daga, B. Madej

**9:30 COMP 546.** Is alternative binding sapping the strength of current oxime countermeasures? B.J. Bennion, T. Carpenter, F.C. Lightstone, T. Nguyen, C.A. Valdez

**9:50** Intermission.

**10:10 COMP 547.** Rational bioavailability optimization using physiologically-based pharmacokinetics simulations. B.D. Madej, E.J. Martin

**10:30 COMP 548.** Ligand based drug discovery of novel dengue-2 NS2B-NS3 protease inhibitors. M.M. Nawil, S. Abdul Hamid, M. Hariono, R. Othman, S. Othman, R. Yusuf, N.A. Rahman, H. Wahab

**10:50 COMP 549.** Virtual fragment screening and linking discovers Jumonji histone demethylase inhibitors. M. Korczynska, D.D. Le, M. Siklos, N. Younger, E. Gregori-Puigjané, A. Tumber, T. Krojer, S. Velupillai, C. Gileadi, R. Nowak, E. Iwasa, S.B. Pollock, I. Ortiz Torres, U. Oppermann, B. Shoichet, D.G. Fujimori

**11:10 COMP 550.** Molecular drug design targeting a bacterial RNA structure: Atomic resolution mechanistic studies of highly selective unnatural ligand mimic of the *E. coli* FMN riboswitch. L. Xiao

### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

## Biomass Catalysis

*Sponsored by CATL, Cosponsored by COMP*

## THURSDAY AFTERNOON

## Section A

InterContinental San Francisco  
Twin Peaks

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

## Mechanisms &amp; Molecular Simulations

*Cosponsored by PHYS*

C. Chang, G. Verkhivker, *Organizers*  
S. Vajda, *Presiding*

**1:30 COMP 551.** Glutamate receptor ion channel activation mechanism revealed by computer experiment. X. Wu, B. Brooks

**2:00 COMP 552.** CaMKII: A molecular dynamics study of the effects of phosphorylation on its dodecameric form. I. General

**2:30 COMP 553.** Computational tools for the evaluation of laboratory-engineered biocatalysts. M. Garcia-Borras, A. Romero-Rivera, S. Osuna

**3:00** Intermission.

**3:20 COMP 554.** Constant-pH simulations on capability class computers: First applications. B. Radak, J. Phillips, W. Jiang, K. Schulten, B. Roux

**3:50 COMP 555.** Directional motion in chiral molecules out of equilibrium. D. Slochow, M.K. Gilson

## Section B

InterContinental San Francisco  
Fremont

## Material Science

## Surfaces &amp; Catalysts

C. M. Aikens, *Organizer*  
A. Shamloo, *Presiding*

**1:30 COMP 556.** Growth mechanism of small PdGa bimetallic clusters on MgO (100) surface. N. Kumar, D. Chatteraj, I. Kaul, C. Majumder, P. Ghosh

**2:00 COMP 557.** Surface characterization of supported catalysts: The interplay between modeling and experiments. V. D'Anna, C. Michel, P. Sautet

**2:30 COMP 558.** Density-functional study of the La<sub>2</sub>Zr<sub>7</sub>O<sub>7</sub> low-index faces. Y. Mantz, Y. Duan

**3:00 COMP 559.** Formation and diffusion of oxygen vacancies in complex transition-metal oxides from diffusion quantum Monte Carlo. J.A. Santana, J. Krogel, P. Kent, F. Reboredo

**3:30** Intermission.

**4:00 COMP 560.** Decorating the (110) facet of rutile-type crystallites with CH<sub>4</sub>: A first-principles investigation. A. Abbaspour Tamijani

**4:30 COMP 561.** Dynamics of self-assembled guanine nucleobases on graphene. N. Saikia, K. Waters, S.P. Karna, R. Pandey

**5:00 COMP 562.** Computational study of the binding of methane and aromatic amino acids with graphene. T. Dinadayalane, J. Lazare, D. Daggag

## Section C

InterContinental San Francisco  
Howard

## Molecular Mechanics

## Protons &amp; Electrons

M. Feig, *Organizer*  
A. Levit, *Presiding*

**1:30 COMP 563.** Assessing and optimizing efficiency in nonequilibrium molecular dynamics/Monte Carlo simulations. B. Radak, B. Roux

**1:55 COMP 564.** High-performance molecular dynamics at constant pH and constant redox potential using AMBER. V.D. Cruzeiro, M. Amaral, A.E. Roitberg

**2:20 COMP 565.** Unraveling the dynamics of the redox conformational protection of nitrogenase. F. Feixas, M. Gimferrer, P. Salvador, M. Garcia-Borras

**2:45 COMP 566.** Self-activated mechanism for efficient nucleic acids polymerization. V. Genna, P. Visosich, E. Ippolito, P. Carloni, M. Devivo

**3:10** Intermission.

**3:25 COMP 567.** NH<sub>3</sub> binding to the S<sub>2</sub> state of the O<sub>2</sub>-evolving complex of Photosystem II points at H<sub>2</sub>O binding during the S<sub>2</sub> → S<sub>3</sub> transition: Insights from QM/MM, EXAFS, and femtosecond x-ray diffraction. M. Askerka, D. Vinyard, J. Wang, G.W. Brudvig, V.S. Batista

**3:50 COMP 568.** Thermal isomerization relaxation of azobenzene derivatives studied with QM/MM and transition path sampling. A. Muzdalo, P. Saalfrank, M. Santer

**4:15 COMP 569.** Structural and electronic features of Mg<sup>2+</sup>-RNA binding motifs: Insights from combined classical molecular dynamics and quantum mechanics simulations. L. Casalino, G. Palermo, N. Abdurakhmonova, U. Roethlisberger, A. Magistrato

## Section D

InterContinental San Francisco  
Cathedral Hill

## Quantum Mechanics

A. E. DePrince, *Organizer, Presiding*

**1:30 COMP 570.** Large-scale selected configuration interaction based on a Davidson-Liu flow. R.M. Parrish, T.J. Martinez

**2:05 COMP 571.** Complex basis functions for metastable electronic states: Methodology and applications. A. White, C.W. McCurdy, M.P. Head-Gordon

**2:30 COMP 572.** Excited states for orbital-optimized second-order perturbation theory. E. Ramos, M.P. Head-Gordon

**2:55 COMP 573.** Unique electronic dynamics from scattering mediated absorption. J.J. Foley

**3:30** Intermission.

**3:45 COMP 574.** Geminals for dispersion interactions and long-range correlation. J.F. Gonthier, M.P. Head-Gordon

**4:10 COMP 575.** Hybrid classical/quantum approach for large-scale studies of quantum systems with density matrix embedding theory. N.C. Rubin

**4:35 COMP 576.** Examining the excited state deactivation pathways of 5-hydroxymethylcytosine. J. Mato, K. Keipert, M.S. Gordon

**5:00 COMP 577.** Theoretical studies of the catalytic transition metal nanoparticles with flexible structures. G. Wei, Z. Liu

## Section E

InterContinental San Francisco  
Laurel Hill

## Drug Design

## Applications

M. R. Landon, Y. Tseng, *Organizers*  
P. Bisignano, *Presiding*

**1:30 COMP 578.** Exploiting water density fluctuations in ion channel drug design. E. Gianti, L. Delemotte, M.L. Klein, V. Carnevale

**1:55 COMP 579.** Adding pharmacophores to shape and electrostatics - too much of a good thing? T. Cheeseright, M.D. Mackey, S. Tomasio

**2:20 COMP 580.** Investigation of the molecular electrostatic potentials and the average electron densities of non-classical bioisosteres. A.A. Arabi, C.F. Matta

**2:45** Intermission.

**3:05 COMP 581.** From protons to fragments with XModeScore: How we can use x-ray data coupled with quantum mechanics to explore these elusive species in binding. L. Westerhoff, O. Borbulevych

**3:30 COMP 582.** Key role of the  $\beta$ 5- $\beta$ 6 loop conformation in the substrate specificity of OXA-48-like enzymes: Implications for the  $\beta$ -lactamase-mediated antibiotic resistance. L. Dabos, R. Bonnin, L. Dortet, T. Naas, B.I. Iorga

**3:55 COMP 583.** *In silico* analysis of Z-77 variants for optimal inhibition of *E. coli* beta-glucuronidase. K.T. Lane, H. Gullickson

4:20 COMP **584**. 2A but not 2B: Towards structure-based discovery of new Serotonin receptor modulators. **A. Levit**, D. Wacker, J.D. McCorvy, B.L. Roth, B. Shoichet

#### Designed Catalysis: Materials Genome Approach to Heterogeneous Processes

#### Machine Learning Tools for Catalyst Genome

Sponsored by CATL, Cosponsored by COMP

## ENFL

### Division of Energy and Fuels

D. J. Heldebrant, Program Chair

#### OTHER SYMPOSIA OF INTEREST:

Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials (see CATL, Mon, Tue)

Chemistry & Physical Chemistry of Thermal Processes for the Circular Carbon Economy (see CELL, Mon)

Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis (see CATL, Mon, Tue, Wed)

Rising Star Award Symposium (see WCC, Mon)

Science for a Sustainable Energy Future: Energy Storage (see PRES, Mon)

#### SOCIAL EVENTS:

Executive Committee Meeting, 4:00 PM: Sun

Dinner, 6:00 PM: Tue

#### BUSINESS MEETINGS:

Program Meeting, 12:00 PM: Sun

Business Meeting & Social, 12:00 PM: Mon

## SUNDAY MORNING

### Section A

Grand Hyatt San Francisco  
Belvedere

#### Advanced Analytical Techniques for Determination of Minor & Trace Elements in Petroleum Value Chain

J. Casey, Organizer

J. Nelson, Organizer, Presiding

8:30 Introductory Remarks.

8:35 ENFL **1**. Recent improvements of the ICP/MS capabilities of the 8800 for the petroleum industry. **L. Charles-Philippe**, C. Sanchez Rodriguez, F. Chainet, M. Milland, L. Ayouni, S. Carboneaux, J. Todoli, A. Desprez

9:20 ENFL **2**. Determination of trace elements in petroleum feedstocks by ICP-MS: From total content towards their distribution. **F.A. Lopez-Linares**, L. Poirier, M.M. Boduszynski, C.E. Rechsteiner, M. Moir, D. Leong, C.F. Ovalles, E. Rogel, J. Nelson

9:50 ENFL **3**. Use of GC-ICP-MS for analysis of petroleum and petrochemicals in a service laboratory. **W. Geiger**, B. McElmurry, J. Anguiano

10:20 Intermission.

10:40 ENFL **4**. Using the MS/MS capabilities of the Agilent 8900 ICP-QQQ for ultra-trace analysis of elements in the petroleum value chain. **M. Kelinske**, J. Nelson

50 high to low-abundance minor, trace and ultra-trace elements in crude oils by ICP-OES and QQQ-ICP-MS: New methods of geochemical fingerprinting. **J. Casey**, Y. Gao

11:30 ENFL **6**. Simultaneous measurement of twenty-five trace elements in aviation turbine engine and diesel fuels by inductively coupled plasma tandem mass spectrometry. **G.T. Eldridge**, R.K. Larsen, M.E. Peretich, R.P. Shah, A. Metz

11:55 ENFL **7**. Measurement of copper in aviation turbine engine fuel by inductively coupled plasma tandem mass spectrometry and comparison to graphite furnace atomic absorption spectrometry. **A. Metz**, R.K. Larsen, M.E. Peretich, G.T. Eldridge

### Section B

Grand Hyatt San Francisco  
Filmore C

#### C1 Catalysis

Cosponsored by CATL

K. Ding, N. Kumar, Organizers

J. J. Spivey, Organizer, Presiding

K. Ding, Presiding

8:30 Introductory Remarks.

8:35 ENFL **8**. Strategies to selectively oxidize methane to methanol. **J.A. Lercher**

9:15 ENFL **9**. Nature of active sites and mechanism of selective methane oxidation by Cu and Fe-modified zeolite catalysts. **A. Szecsenyi**, G. Li, J. Gascon, E. Hensen, **E. Pidko**

9:35 ENFL **10**. Copper oxide clusters as active catalytic sites of Cu/MOR zeolite for methane to methanol conversion: Size matters? **D. Palagin**, A.J. Knorpp, A.B. Pinar, M. Ranocchiaro, J.A. van Bokhoven

9:55 ENFL **11**. Defining the active sites of low-temperature methane hydroxylation in iron and copper zeolites. **B.E. Snyder**, P. Vanelderen, J. Woertink, B.F. Sels, R.A. Schoonheydt, E.I. Solomon

10:15 Intermission.

10:30 ENFL **12**. Biological methane oxidation. **A.C. Rosenzweig**

11:10 ENFL **13**. Chemical transformation of shale gas components under mild conditions in liquid. **F. Tao**

11:40 ENFL **14**. Direct conversion of methane to methanol and ethanol. **C. Okolie**, Y. Belhseine, L. Kovarik, E. Stavitski, **C. Sievers**

### Section C

Grand Hyatt San Francisco  
Orpheum

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Cosponsored by CATL, MPPG<sup>†</sup> and PMSE

Y. H. Hu, R. T. Koodali, H. Wang, Organizers

Y. Li, Y. Ng, Presiding

8:30 Introductory Remarks.

8:35 ENFL **15**. Acid treatment enables suppression of electron-hole recombination in hematite for photoelectrochemical water splitting. **Y. Li**

9:15 ENFL **16**. Nanostructured hybrid electrodes for photoelectrochemical CO<sub>2</sub> conversion: Synthetic aspects and structure-property relationships. **E. Kecszenovity**, A. Kormanyos, B. Endrodi, **C. Janaky**

9:45 ENFL **17**. Vitamin C as a surface modifier for solar hydrogen production. **T. Dramstad**, D. Harts, B. Selvaratnam, R.T. Koodali

10:05 Intermission.

10:15 ENFL **18**. Bismuth-based ternary oxide for photocatalytic and photoelectrochemical water splitting. **Y. Ng**

10:55 ENFL **19**. Engineering nanomaterials for energy conversion. **X. Zheng**

11:25 ENFL **20**. Structure and properties of hydrothermally prepared MoS<sub>2</sub> thin films on gold substrate. **A.S. Ichimura**, R. Stadia, J. Macias, B. Gunn, A. Newaz, C. Tassone

11:55 ENFL **21**. Photoelectrocatalytic reduction of CO<sub>2</sub> on organic/inorganic nanocomposite photoelectrodes. **A. Kormanyos**, D. Hursan, K. Rajeshwar, C. Janaky

12:15 Concluding Remarks.

### Section D

Grand Hyatt San Francisco  
Curran

#### Catalysis for Unconventional Energy Sources

Cosponsored by CATL and MPPG<sup>†</sup>

X. Wang, Organizer

Y. H. Hu, Organizer, Presiding

F. Li, Presiding

8:30 Introductory Remarks.

8:35 ENFL **22**. Thermochemical studies of catalyst stability and function. **A. Navrotsky**

9:15 ENFL **23**. Mn-containing mixed metal oxides for chemical looping oxidative dehydrogenation of ethane. **F. Li**

9:45 ENFL **24**. Sustainable production of bio-based alcohols, esters, aromatics and polyols from lignin: The art of the right catalyst. **Y. Li**, R. Ma, X. Ma

10:15 Intermission.

10:30 ENFL **25**. Visible light photocatalytic production of H<sub>2</sub>. **Y.H. Hu**

11:10 ENFL **26**. Catalyzing energy storage for optimum use of intermittent renewable energy resources. **M. Isaacson**

11:50 ENFL **27**. Light absorbers, interfaces, and catalysts for solar-to-fuel conversion: First-principles calculations. **Y. Ping**

12:20 Concluding Remarks.

### Section E

Grand Hyatt San Francisco  
Sequoia

#### Subsurface Technologies for Recovery of Fossil & Geothermal Energy

Cosponsored by CATL and GEOC

C. Fernandez, M. A. Reynolds, Organizers

C. Fernandez, Presiding

8:30 Introductory Remarks.

8:35 ENFL **28**. Results from Newberry volcano EGS demonstration, 2010-2015. **T. Cladouhos**, S. Petty, M.W. Swyer, M. Uddenberg, K. Grasso, Y. Nordin

9:10 ENFL **29**. TOGA: Compositional simulation of three-phase, multi-component, and non-isothermal processes for carbon dioxide utilization and storage in partially depleted oil and gas reservoirs. **C. Oldenburg**, L. Pan

9:35 ENFL **30**. Experiments, simulations, and reduced physics modeling for risk assessment of well integrity at CO<sub>2</sub> storage sites. **N. Huerta**, J. Iyer, V. Vasylykivska, S.A. Carroll, W.L. Du Frane, B. Kutchko, L. Li, H. Mason, P. Roy, S.D. Walsh

10:00 ENFL **31**. Development of an electrochemical sensor for downhole tracer and pH measurements in real-time. **R.F. Hess**, B. Klammer, L. Goldfarb, W.C. Corbin, T.J. Boyle, W.G. Yelton, A.T. Cashion

10:25 Intermission.

10:30 ENFL **32**. Caustic-cracking likely cause of failure in geothermal production casing – well redesign and cementing changes key to replacement well success. **D. Bour**, M. Gao, R. Krishnamurthy, R. Rudolf, R. Hausler

11:05 ENFL **33**. Made-to-order metal-organic frameworks for gas capture and storage. **M. Eddaoudi**, D. Alezi, Y. Belmabkhout

11:30 ENFL **34**. Self-healing polymer-cement composites for geothermal wells and their properties. **M. Childers**, K.A. Rod, M.T. Nguyen, M. Elbakshwan, S. Gill, W. Um, J. Chun, V. Glezakou, T.J. Roosenendaal, T. Wietsma, P.K. Koech, N. Huerta, B. Kutchko, C. Fernandez

11:55 ENFL **35**. Microbial consortia encapsulated with ultralight kaolinite proppant for in-situ microbially enhanced methane recovery. **K. Han**, J. Fierrez, A. Szendrei, V. Nguyen, J. McLennan, T.D. Sparks

12:20 Concluding Remarks.

### Section F

Grand Hyatt San Francisco  
Cypress

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

Cosponsored by CATL, COMP, GEOC and MPPG<sup>†</sup>

V. Glezakou, R. Rousseau, Organizers

S. Raugai, Presiding

8:30 ENFL **36**. Reaction dynamics of CO<sub>2</sub> in amine solutions from DFT-based simulations. **W. Andreoni**, C. Ma, F. Pietrucci

9:15 ENFL **37**. Understanding the structure and dynamics of CO<sub>2</sub>-reactive aprotic heterocyclic anion ionic liquids: A molecular simulation study. **E. Maginn**, **Q. Sheridan**, W.F. Schneider

10:00 Intermission.

10:30 ENFL **38**. March toward task-specific CO<sub>2</sub> capture solvents. **V. Glezakou**, R. Rousseau, D.C. Cantu, D. Malhotra, D.J. Heldebrant, P.K. Koech

11:05 ENFL **39**. Polymorphic transitions of CO<sub>2</sub> molecular crystals: Thermodynamics, kinetics and confinement effects. **I. Gimondi**, **M. Salvalaglio**

#### Cellulose Structure & Biosynthesis in the Plant Cell Wall

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

#### Electrocatalysis for Energy Generation & Storage

**Oxygen Reduction**

Sponsored by CATL, Cosponsored by ENFL

**SUNDAY AFTERNOON****Section A**Grand Hyatt San Francisco  
Belvedere**Advanced Analytical Techniques for Determination of Minor & Trace Elements in Petroleum Value Chain**J. Casey, *Organizer*J. Nelson, *Organizer, Presiding*

1:30 Introductory Remarks.

**1:35 ENFL 40.** Comparison of existing methods for analysis of finished biofuels using Microwave Plasma Atomic Emission Spectroscopy (MP-AES) - moving the biofuels industry forward. **T. Alleman, G. Gilleland**

**2:00 ENFL 41.** Multi-elemental determination of petroleum products using the Agilent 5110 ICP-OES. **E. Kulikov, N. Divodolich, P. Lowenstern**

**2:25 ENFL 42.** Elemental analysis of asphaltene by tandem LIBS- LA-ICP-OES. **F.A. Lopez-Linares, J. Gonzalez, J.R. Chirinos, D. Oropeza, D. Quarles, C. Ovalles, E. Rogel, R.E. Russo**

**2:50 ENFL 43.** Determination of total chloride in petroleum crude samples by Combustion Ion Chromatography (CIC). **M. Dutta, A. Pathiparampil, S.H. Roby, F.A. Lopez-Linares**

**Section B**Grand Hyatt San Francisco  
Filmore C**C1 Catalysis**

Cosponsored by CATL

K. Ding, J. J. Spivey, *Organizers*N. Kumar, *Organizer, Presiding*K. Ding, *Presiding*

**1:30 ENFL 44.** Methane activation by oxide catalysts: The role of coadsorption. **H. Metiu, S. Chretien, H.H. Kristoffersen**

**2:10 ENFL 45.** *In-situ* studies of Ni-Ce-O catalysts for the reforming of methane: Insights from TR-XRD, XANES, and NAP-XPS. **J. Rodriguez, Z. Liu, S.D. Senanayake, D. Grinter**

**2:50 ENFL 46.** Au@PdO<sub>2</sub> with PdO<sub>2</sub>-rich shell and Au-rich core embedded in Co<sub>3</sub>O<sub>4</sub> nanorods for catalytic oxidation of methane. **Y. Zhu**

3:10 Intermission.

**3:25 ENFL 47.** Oxidative coupling of methane on Na<sub>2</sub>WO<sub>4</sub>/Mn/SiO<sub>2</sub> catalyst: Mechanistic studies and a new reactor concept. **R. Schomaecker**

**4:05 ENFL 48.** Theoretical study on oxidative coupling of methane using MgO. **H. Aljama, J.K. Norskov, F. Abild-Pedersen**

**4:25 ENFL 49.** Oxidative coupling of methane over tungsten-based nanomaterials. **W. Liu, W. Falston, G. Melaet, G.A. Somorjai**

**4:45 ENFL 50.** Pulsed regeneration of Mo/HZSM-5 methane dehydroaromatization catalysts. **E. Hensen, N. Kosinov**

**Section C**Grand Hyatt San Francisco  
Orpheum**Advanced Materials & Technologies for Solar Energy Conversion & Storage**Cosponsored by CATL, MPPG<sup>†</sup> and PMSEY. H. Hu, R. T. Koodali, H. Wang, *Organizers*Y. Ng, N. Wu, *Presiding*

1:30 Introductory Remarks.

**1:35 ENFL 51.** Tuning charge separation and migration in semiconductors for solar energy conversion. **N. Wu**

**2:15 ENFL 52.** Nanostructured carbon based materials for photocatalytically reduce carbon dioxide to fuels. **H. Li**

2:35 ENFL 53. Withdrawn.

**2:55 ENFL 54.** Finite temperature modeling of metal oxides for solar thermochemical water splitting. **S. Miller, K. Sun, A.W. Weimer, C. Musgrave**

3:15 Intermission.

**3:25 ENFL 55.** Multicomponent transport in membranes for solar fuels devices. **D. Miller, B. Beckingham**

**3:45 ENFL 56.** Phase-pure and photoactive scheelite from atomic layer deposition. **M. Stefik**

**4:05 ENFL 57.** Reinforced perovskite solar cells designed with integrated polymer scaffolding for robust, efficient photovoltaics. **A. Printz, N. Rolston, B. Watson, R. Dauskardt**

**4:25 ENFL 58.** Empirical extraction of the spatial collection efficiency of photovoltaic and photoelectrochemical devices. **G. Segev, H. Dotan, D. Klotz, D. Grave, Y. Levy, B. Stannowski, A. Rothschild**

**4:45 ENFL 59.** Photothermal-enhanced catalysis in core-shell plasmonic hierarchical Cu<sub>2</sub>S<sub>3</sub> microsphere@zeolitic imidazole framework-8. **F. Wang, Y. Huang, Q. Li, Y. Wang, D. Xu**

**5:05 ENFL 60.** Photoelectrochemical properties and behavior of  $\alpha$ -SnWO<sub>3</sub> photoanodes synthesized by hydrothermal conversion of WO<sub>3</sub> films. **Z. Zhu, P. Sarker, C. Zhao, L. Zhou, R. Grimm, M. Huda, P. Rao**

5:25 Concluding Remarks.

**Section D**Grand Hyatt San Francisco  
Curran**Catalysis for Unconventional Energy Sources**Cosponsored by CATL and MPPG<sup>†</sup>Y. H. Hu, X. Wang, *Organizers*M. Fan, X. Fan, *Presiding*

1:30 Introductory Remarks.

**1:35 ENFL 61.** Catalyst design for liquid fuels from lignin: Hydrogenolysis without hydrogenation. **S.L. Scott, Z.R. Jones, A. Chamas, L. Qi, M.B. Foston**

**2:15 ENFL 62.** Non-conventional: Catalytic upgrading of biomass pyrolysis vapour enabled by non-conventional energy (microwave). **X. Fan**

**2:45 ENFL 63.** Strategies of removing surface states from photoanodes. **Y. Li, X. Yun, H. Chen, Y. Li**

**3:15 ENFL 64.** High-yield synthesis of Pt-based two-dimensional nanoplates for methanol electro-oxidation reaction. **L. Chen, Q. Zhang**

3:35 Intermission.

**3:50 ENFL 65.** New approach to reduction in CO<sub>2</sub> capture cost. **M. Fan, M.A. Assiri, S. Toan, Q. Lai, A.G. Russell**

**4:30 ENFL 66.** Synthesis and characterization of high density multicyclic fuels based on sesquiterpanes and alkyl diamondoids. **B.G. Harvey, K.W. Harrison, M.C. Davis, W.W. Merriman**

5:00 Concluding Remarks.

**Section E**Grand Hyatt San Francisco  
Sequoia**Innovative Chemistry & Materials for Electrochemical Energy Storage****Cathode Materials**Cosponsored by MPPG<sup>†</sup> and PMSEJ. Guo, E. Pomerantseva, *Organizers*Y. Mo, *Organizer, Presiding*

1:30 Introductory Remarks.

**1:35 ENFL 67.** Combining reversible oxygen charge transfer and Li-excess to achieve high capacity cathodes. **G. Ceder**

**2:05 ENFL 68.** Conversion cathodes for next-generation Li and Li-ion batteries. **E. Zhao, F. Wu, J. Lee, H. Kim, W. Gu, G. Yushin**

2:35 ENFL 69. Withdrawn.

**2:55 ENFL 70.** Cu(bpy)V<sub>4</sub>O<sub>10</sub>: A 3D metal-organic framework as a cathode material for Li-ion batteries. **H. Zhou, T. Young, S. Ang, T. Froedge, B. Yan**

3:15 Intermission.

**3:25 ENFL 71.** In situ TEM studies of electrochemistry at nanoscales. **R. Shahbazian Yassar**

**3:55 ENFL 72.** Sodium-ion Batteries (SIB): Battery systems poised for grid storage. **C.S. Johnson, E. Lee**

4:25 ENFL 73. Withdrawn.

**4:55 ENFL 74.** Li-O<sub>2</sub> batteries based on oxyhalogen-sulfur chemistry. **X. Wang, S. Meng**

**Section F**Grand Hyatt San Francisco  
Cypress**Computations for CO<sub>2</sub> Capture, Conversion & Sequestration**Cosponsored by CATL, COMP, GEOC and MPPG<sup>†</sup>V. Glezakou, R. Rousseau, *Organizers*C. Skylaris, *Presiding*

**1:30 ENFL 75.** Aminasilicone CO<sub>2</sub> capture solvents. **R.J. Perry**

**2:15 ENFL 76.** Dual nature of extended solvent structure in CO<sub>2</sub>-binding organic liquids: Thermodynamic vs kinetic stability. **D.J. Heldebrant, D. Cantu, D. Malhotra, V. Glezakou, R. Rousseau, P.K. Koehn**

**2:50 ENFL 77.** Energetically efficient non-aqueous amine-based solvents as carbon dioxide capture material. **D. Malhotra, P.K. Koehn, D.J. Heldebrant, V. Glezakou, D.C. Cantu, R. Rousseau, F. Zheng, M. Bearden**

**3:15 ENFL 78.** Computational aided design and synthesis of advanced carbon capture solvents. **J. Page, D. Malhotra, D.C. Cantu, P.K. Koehn, V. Glezakou, R. Rousseau, D.J. Heldebrant**

3:40 Intermission.

**4:00 ENFL 79.** CO<sub>2</sub> interactions for capture, conversion, or sequestration: From proteins and metal organic frameworks to scrubbers and beyond. **A.K. Wilson**

**4:35 ENFL 80.** Weak interactions of CO<sub>2</sub> with functional groups of porous materials: Computational studies with correlated methods. **K.D. Vogiatzis**

**5:05 ENFL 81.** New advances in carbon dioxide capture using diamine-appended metal-organic frameworks. **P.J. Milner, J.R. Long**

**Hollyweird Chemistry**

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

**Cellulose Structure & Biosynthesis****Evolution of Synthases & Fine Structure of Microfibrils**

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

**Electrocatalysis for Energy Generation & Storage****CO<sub>2</sub> Reduction**

Sponsored by CATL, Cosponsored by ENFL

**MONDAY MORNING****Section A**Grand Hyatt San Francisco  
Belvedere**Advances in Chemistry of Energy & Fuels****Separations**D. J. Heldebrant, *Organizer, Presiding*

8:30 Introductory Remarks.

**8:35 ENFL 82.** Controlling cooperative CO<sub>2</sub> adsorption in diamine-appended Mg<sub>2</sub>(dobpdc) metal-organic frameworks. **R.L. Siegelman, T. McDonald, M.I. Gonzalez, J. Martell, P.J. Milner, J.A. Mason, J.R. Long**

**8:55 ENFL 83.** Polyphosphazene based membranes for gas separations. **H.B. Nulwala, Z. Li, D. Luebke, H. Alilcock**

**9:15 ENFL 84.** Synthesis of a novel monolith combined activated carbon and zeolite-NaUSY for CO<sub>2</sub> capture by Electric Swing Adsorption (ESA). **Q. Zhao, F. Wu, P. Webley**

**9:35 ENFL 85.** DFT studies of CO<sub>2</sub> reduction pathways on Cu-based electrodes. **A.R. Asthagiri**

**9:55 ENFL 86.** Fabrication of zeolite membranes for propylene/propane separation. **S. Shrestha, P.K. Dutta**

**10:15 ENFL 87.** Catalytic removal of eibenzothiophene using CoMoS<sub>2</sub> synthesized using elemental sulfur. **J.G. Parsons, J.S. Sollner, D.F. Gonzalez, J.H. Leal, T.M. Eubanks**

**10:35 ENFL 88.** Hydrate formation in microcapsules for temperature-sensitive release of encapsulants. **Y. Seo, J. Park, S. Kim, S. Lee**

† Cooperative Cosponsorship

**10:55 ENFL 89.** Dynamic windows based on reversible metal electrodeposition with fast switching, neutral color, and excellent durability. **C. Barile**, T.S. Hernandez, M.T. Strand, D.J. Slotcavage, M.D. McGehee

**11:15** Concluding Remarks.

Filmore C

### C1 Catalysis

*Cosponsored by CATL*

K. Ding, J. J. Spivey, *Organizers*

N. Kumar, *Organizer, Presiding*

K. Ding, *Presiding*

**8:30 ENFL 90.** Unexpected C1 catalysis. **P.C. Stair**

**9:10 ENFL 91.** Understanding the role of interfaces in gold nanocluster catalysis through gas phase CO oxidation. **Z. Wu**

**9:40 ENFL 92.** Synergy and anti-synergy between palladium and gold in nano-particles dispersed on a reducible support. **J. Carter**, S. Althabhan, E. Nowicka, S. Freakley, D. Morgan, P. Shah, S. Golunski, C.J. Kiely, G. Hutchings

**10:00 ENFL 93.** Role of water in CO oxidation and PROx over Au catalysts: Developments in hydrogen purification from methane. **B.D. Chandler**, J. Saavedra, T. Whittaker, C. Pursell

**10:20** Intermission.

**10:30 ENFL 94.** Methanol to gasoline transformation study over modified zeolite. **E. Sulman**, V. Doluda, N. Lakina, M. Sulman

**10:50 ENFL 95.** Promotion mechanisms of iron oxide-based high temperature water-gas shift catalysts by chromium and copper. **M. Zhu**, T. Rocha, T. Lunkenbein, R. Schloegl, A. Knop-Gericke, **I.E. Wachs**

**11:30 ENFL 96.** Conversion of methanol on zeolites containing transition metals. **E.P. Schreiner**, R.F. Lobo

**11:50 ENFL 97.** Mechanistic understanding of H-MOR with enhanced stability for carbonylation of dimethyl ether. **Y. Li**, S. Huang, X. Ma

**12:10 ENFL 98.** Impact of copper oxidation states on the reactivity in partial oxidation of methanol. **H. Chi**, C.M. Andolina, J. Li, G. Zhou, G. Vesper, J. Yang

### Advanced Materials & Technologies for Solar Energy Conversion & Storage

*Cosponsored by CATL, MPPG<sup>+</sup> and PMSE*

R. T. Koodali, H. Wang, *Organizers*

Y. H. Hu, *Organizer, Presiding*

G. Cao, *Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 99.** Control and understand the impacts of nano and microstructures on perovskite solar cell performance. **G. Cao**

**9:15 ENFL 100.** Aliphatically linked conjugated small molecules for crystal structure engineering and stability enhancement in organic solar cell. **X. Jeanbourquin**, A. Gasperini, A. Rahmanudin, K.A. Sivula

**9:35 ENFL 101.** Assessing the use of polymer/ceramic composites as a hybrid material for supercapacitor separator. **E.O. Ortiz-Quiles**, C.O. Alvarez-Sanchez, J. Lasalde-Ramirez, R. Masso-Ferret, E. Nicolau

**9:55** Intermission.

**10:10 ENFL 102.** Novel carbon nanomaterials for 3<sup>rd</sup> generation solar cells. **Y.H. Hu**

**10:50 ENFL 103.** Small Urbach energies in CH<sub>3</sub>NH<sub>3</sub>PbI<sub>3-x</sub>Br<sub>x</sub> perovskites that remain constant under degradation. **C.M. Sutter-Fella**, D. Miller, Q. Ngo, E. Roe, F. Toma, I. Sharp, M. Loneragan, A. Javey

**11:10 ENFL 104.** Single walled carbon nanotubes in TiO<sub>2</sub> nanofiber photoelectrodes for high performance perovskite and dye-sensitized solar cells. **T.J. Macdonald**, M. Batmunkh, J. Shapter, T. Nann, I.P. Parkin

**11:30 ENFL 105.** Silicon nanowires for solar-to-fuel conversion. **Y. Su**, C. Liu, S. Brittan, J. Tang, A. Fu, N. Kornienko, Q. Kong, H. Zhang, P. Yang

**11:50** Concluding Remarks.

### Catalysis for Unconventional Energy Sources

*Cosponsored by CATL and MPPG<sup>+</sup>*

Y. H. Hu, X. Wang, *Organizers*

S. Chen, X. Fan, *Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 106.** Reductive disassembly of lignin to fuels and chemicals with porous metal oxide catalysts. **P.C. Ford**, J.A. Barrett, C.M. Berni, M.A. Chui

**9:15 ENFL 107.** Why use sugars to make renewable fuels and materials when the CMF and levulinic acid platforms are one step from raw biomass? **M. Mascal**

**9:55 ENFL 108.** Performance of mesoporous alumina supported iron catalyst on Fischer-Tropsch synthesis: Effect of CO<sub>2</sub> and CH<sub>4</sub> content in syngas. **S. Badoga**, A.K. Dalai

**10:15** Intermission.

**10:30 ENFL 109.** Structural engineering of functional nanomaterials for effective electrocatalytic reduction of oxygen. **S. Chen**

**11:10 ENFL 110.** Understanding and promoting methane activation using nanocrystal catalysts. **M. Cargnello**, E.D. Goodman, J.H. Maalouf, V.V. Miller, A.R. Riscoe, J.J. Willis, C. Wrasman, L. Wu, A. Yang

**11:40 ENFL 111.** CO conversion into liquid hydrocarbons using Co-containing catalyst synthesized in subcritical conditions. **E. Sulman**, A. Stepacheva, A. Gavrilenko, M. Markova, V. Molchanov, M. Sulman

**12:00** Concluding Remarks.

### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Flow Batteries & Organic Electrodes

*Cosponsored by MPPG<sup>+</sup> and PMSE*

J. Guo, E. Pomerantseva, *Organizers*

Y. Mo, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 112.** Lithium redox flow battery as an emerging technology for large-scale energy storage. **G. Yu**

**9:05 ENFL 113.** Asymmetric sulfonated Diels-Alder poly(phenylene)s: Effect of membrane morphology on vanadium redox flow battery performance. **T.D. Largier**, C.J. Cornelius

**9:25 ENFL 114.** Manipulate the chemical composition and substrate nature to push the cycling stability limit of polypyrrole. **T. Liu**, Y. Song, Y. Li, X. Liu

**9:45 ENFL 115.** Reaction mechanism of Sb-based negative electrode materials for Na batteries investigated by operando x-ray absorption spectroscopy: What can we really learn? **L. Stievano**, A. Darwiche, M. Sougrati, C. La Fontaine, L. Monconduit

**10:05** Intermission.

**10:15 ENFL 116.** Selective block polysulfone anion exchange membranes: Electro-transport characterization and performance in vanadium redox flow batteries. **T.D. Largier**, W. Khan, C.J. Cornelius

**10:35 ENFL 117.** Sulfur polymers for stable lithium-sulfur batteries. **M. Preefer**, B. Oschmann, R. Seshadri

**10:55 ENFL 118.** Organic materials for energy storage: Exploiting steric strain to tune oxidation potentials. **A. Prins**, N.J. Mortimer, D.R. Henton, A. Dumitrascu, T.F. Guarr

**11:15 ENFL 119.** Unraveling charge storage in organic radical polymers for battery electrodes. **J.L. Lutkenhaus**, F. Li, S. Wang

**11:35 ENFL 120.** Electrochemical swing process for carbon capture using a polymer-based battery. **S. Voskian**, T. Hatton

### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Cosponsored by CATL, COMP, GEOC and MPPG<sup>+</sup>*

V. Glezakou, R. Rousseau, *Organizers*

M. Salvalaglio, *Presiding*

**8:30 ENFL 121.** Fate of dissolved carbon dioxide in water under extreme conditions. **G.A. Galli**

**9:15 ENFL 122.** Polymeric carbon dioxide at high pressures. **S. Scandolo**

**9:50 ENFL 123.** Molecular simulations of the reactivity of H<sub>2</sub>O-bearing supercritical CO<sub>2</sub> fluids with silicate minerals. **S.N. Kerisit**, E.J. Bylaska, A.R. Felmy, T. Schaefer, J. Loring

**10:25** Intermission.

**10:45 ENFL 124.** Multiscale simulation approaches in the ONETEP linear-scaling DFT program. **C. Skylaris**

**11:20 ENFL 125.** Molecular dynamics and possible catalytic chemistry by molten metals or salts. **H. Metiu**, E.W. McFarland, M.J. Gordon, V. Agarwal, D.C. Upham, H.H. Kristoffersen

## Science for a Sustainable Energy Future

### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVF, GEOC, I&EC, MEDI, MPPG<sup>+</sup>, ORGN and PROF*

### Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

### Cellulose Structure & Biosynthesis

#### Mechanism of Synthesis

*Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL*

### Electrocatalysis for Energy Generation & Storage

#### Oxygen Evolution

*Sponsored by CATL, Cosponsored by ENFL*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

### Chemistry & Physical Chemistry of Thermal Processes for the Circular Carbon Economy

*Sponsored by CELL, Cosponsored by ENFL and ENVF*

## MONDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Belvedere

### Advances in Chemistry of Energy & Fuels

#### Chemical Looping, Cracking & Gasification

D. J. Heldebrant, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 126.** Investigation of unique phase formation for trimetallic copper iron manganese oxygen carrier. **W. Benincosa**, R.V. Siritwardane, H. Tian, J. Riley

**1:55 ENFL 127.** Investigation on the reducibility and regenerability of ferrites as oxygen carrier. **Y. Cao**

**2:15 ENFL 128.** Reactivity and recyclability of Cu-based oxygen carrier in solid fuels Chemical Looping with Oxygen Uncoupling (CLOU). **P. Wang**, B.H. Howard, N. Means, D. Shekawat, D. Berry

**2:35 ENFL 129.** Kinetic analysis of the interactions between calcium ferrite and coal char for chemical looping gasification applications: Identifying reduction routes and modes of oxygen transfer. **J. Riley**, R.V. Siritwardane, H. Tian, W. Benincosa

**2:55** Intermission.

**3:00 ENFL 130.** Behavior and catalytic effects of alkaline metals during co-gasification of coal and biomass. **X. Ran**, J. Feng, **W. Li**

**3:20 ENFL 131.** Exploration on the mechanism of deacidification during catalytic cracking of high acidic crude. X. Wei, A. Mao

**3:40 ENFL 132.** Design and synthesis of Vanadium-Titanium-incorporated Mesoporous Silica (VTI/MCF) catalysts for the oxidative dehydrogenation of propane to propylene. Z. Xie, Z. Zhao

**4:00** Concluding Remarks.

## Section B

Grand Hyatt San Francisco  
Filmore C

### C1 Catalysis

*Cosponsored by CATL*

K. Ding, *Organizer*

N. Kumar, J. J. Spivey, *Organizers, Presiding*

**1:30 ENFL 133.** Natural gas conversion to higher-value products: Challenges and opportunities. J.J. Spivey, Z. Wang, S. Kanitkar, N. Kumar, D. Berry, D. Shekawat, D. Haynes

**2:10 ENFL 134.** Co<sub>2</sub>C nanostructures with facet effect for Fischer-Tropsch to olefins. F. Yu, Y. An, Z. Li, L. Zhong, Y. Sun

**2:30 ENFL 135.** Metal organic framework-mediated synthesis of cobalt catalysts for higher oxygenates synthesis. Z. Wang, G. Laddha, S. Kanitkar, J.J. Spivey

**2:50 ENFL 136.** Elucidating the nature of Fe species during pyrolysis of the Fe-BTC MOF into highly active and stable Fischer-Tropsch catalysts. T. Wezendonk, M. Makkee, F. Kapteijn, J. Gascon

**3:10** Intermission.

**3:25 ENFL 137.** Selective formation of long-chain hydrocarbons from CO<sub>2</sub> hydrogenation over TiO<sub>2</sub> supported Co-Cu-K catalysts. Z. Shi, P. Gao, S. Dang, L. Zhong, H. Wang, Y. Sun

**3:45 ENFL 138.** CO<sub>2</sub> electrocatalytic and photoelectrocatalytic conversion for oxygenate synthesis. W. Chen, X. Bai, R. Ge, W. Wei, Y. Sun

**4:05 ENFL 139.** Electronic structure tuned electrochemical CO<sub>2</sub> reduction on silver-based electrodes. Z. Wang, J. Zhou

**4:25 ENFL 140.** CO<sub>2</sub>-utilized chemical looping reforming with phase transition of Fe<sub>3</sub>O<sub>4</sub>-NiO to NiFe<sub>2</sub>O<sub>4</sub> in perovskite catalysts. J.W. Lee, D. Kang, H. Lim

**4:45** Concluding Remarks.

## Section C

Grand Hyatt San Francisco  
Orpheum

### Advanced Materials & Technologies for Solar Energy Conversion & Storage

*Cosponsored by CATL, MPPG<sup>‡</sup> and PMSE*

R. T. Koodali, H. Wang, *Organizers*

Y. H. Hu, *Organizer, Presiding*

J. Z. Zhang, *Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 141.** Origin of instability and surface chemistry approach to stabilization of organ-metal halide perovskites. J.Z. Zhang

**2:15 ENFL 142.** Picosecond light-induced rotational disordering in the hybrid perovskites. A. Lindenberg

**2:45 ENFL 143.** Multiscale patterned photoelectrodes for enhanced light harvesting in mesoscopic solar cells. J. Kang, S. Jang, Y. Son, A. Lim, J. Kim, J. Jeong, M. Choi, Y. Sung

**3:05 ENFL 144.** Phase change capsule with water-absorbable polymeric shell for thermal energy storage and delivery. T. Do, Y. Ko, U. Choi

**3:25** Intermission.

**3:40 ENFL 145.** Overcoming the mechanical fragility of perovskite solar cells using novel cross-linking chemical additives and scaffolds. B. Watson, N. Rolston, K. Bush, A. Printz, R. Dauskardt

**4:00 ENFL 146.** Exploring highly efficient hydrogen peroxide generation on reduced graphene oxide electrocatalysts. H. Kim, B.D. McCloskey

**4:20 ENFL 147.** Nanostructured promoted titania photocatalysts for solar fuels. R. Trofimovaite, C.M. Parlett, M. Isaacs, S. Kumar, A.F. Lee

**4:40 ENFL 148.** Hybrid organic-inorganic quantum dot superlattices for photovoltaics. D. Yang, Z. Guan, M. Law, A. Abelson

**5:00 ENFL 149.** Tailored annealing and surface treatment of Bi<sub>2</sub>S<sub>3</sub> thin film to enhance optoelectronic performance. Z. Zhu, S. Iyemperumal, A.D. Carl, L. Zhou, R. Grimm, N.A. Deskins, P. Rao

**5:20** Concluding Remarks.

## Section D

Grand Hyatt San Francisco  
Curran

### ENFL Distinguished Researcher Award: Symposium in honor of Mieczyslaw M. Boduszynski

C. F. Ovalles, *Organizer*

M. M. Boduszynski, M. Moir, *Organizers, Presiding*

C. Ovalles, *Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 150.** Do asphaltenes really exist? M. Moir

**2:05 ENFL 151.** Confirmation of the Boduszynski continuum by high-resolution Fourier transform ion cyclotron resonance mass spectrometry. R.P. Rodgers, Y. Corilo, D.C. Podgorski, S. Rowland, P.M. Lalli, A.C. Clingenpeel, J. Lu, A.G. Marshall

**2:35 ENFL 152.** Equivalent distillation: Examining the properties of non-distillable materials in crude oils. E. Rogel, J. Vien, M. Roye, T. Miao

**3:05** Intermission.

**3:25 ENFL 153.** Compatibility of heavy oils and bitumen. Blending, refining and upgrading. P. Rahimi

**3:55 ENFL 154.** Insights from Dr. M. M. Boduszynski that influenced research on instrumental induced thermal cracking and large paraffins' existence. L.A. Carbognani

**4:25 ENFL 155.** From a dream to a fact: Direct measurement of vanadium and nickel distribution in VGO's. F.A. Lopez-Linares, M.M. Boduszynski, C.E. Rechsteiner, M. Moir, D. Leong, L. Poirier, J. Nelson

**4:55 ENFL 156.** Preparative separation of petroleum residua and asphaltene fractions using inert supports. Mietek's pioneer work. C.F. Ovalles, E. Rogel, M. Moir

**5:25** Concluding Remarks.

## Section E

Grand Hyatt San Francisco  
Sequoia

### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Capacitors

*Cosponsored by MPPG<sup>‡</sup> and PMSE*

J. Guo, Y. Mo, *Organizers*

E. Pomerantseva, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 157.** Development of pseudocapacitance in oxide materials. B. Dunn

**2:05 ENFL 158.** MnO and MnNCN for Li-ion capacitors. G. Cao

**2:35 ENFL 159.** Understanding supercapacitor by joint density functional theory. C. Zhan, Y. Zhang, P.T. Cummings, D. Jiang

**2:55 ENFL 160.** Highly-integrated and flexible 3D supercapacitors prepared with vertically aligned CNTs and reconfigurable solid state electrolyte films. H. Kim, S. Hong, R. Lavall, Y. Jung

**3:15 ENFL 161.** 3-Dimensional nonwoven and textile substrates associated with iridium oxide nanoparticles for the improvement of specific capacitance. S. McGraw, K. Chow, D. Wickramasinghe, R. Czerw, K. Senecal

**3:35** Intermission.

**3:45 ENFL 162.** Improving the capacitance of graphene aerogel electrodes via a facile ion-intercalation strategy. T. Liu, C. Zhu, M.A. Worsley, Y. Li

**4:05 ENFL 163.** Fabrication of an advanced, high-performance all-solid-state asymmetric supercapacitor with polypyrrole wrapped cobalt vanadium oxide hydrate as positive and graphene nanoplatelets as negative electrode for power device applications. A. Maitra, B.B. Khatua

**4:25 ENFL 164.** Facilitated charge transport in PANI/ $\alpha$ -Ni(OH)<sub>2</sub>/iron oxide doped reduced graphene oxide composite based hybrid pseudocapacitive electrode material for supercapacitor with excellent power characteristics. A.K. Das

**4:45 ENFL 165.** On the double layer capacitance of graphite. H. Liu

**5:05 ENFL 166.** Nickel tungstate nanoparticles decorated reduced graphene oxide nanocomposite as anode material for Li-ion battery. R. Kumar

## Section F

Grand Hyatt San Francisco  
Cypress

### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Cosponsored by CATL, COMP, GEOC and MPPG<sup>‡</sup>*

V. Glezakou, R. Rousseau, *Organizers*

S. N. Kerisit, *Presiding*

**1:30 ENFL 167.** Interactions of CO<sub>2</sub> with metal oxide nanoclusters, metal organic frameworks, and clays. L. Flores, K.S. Thanthirivatte, J.G. Murphy, W.B. Copeland, D.A. Dixon

**2:05 ENFL 168.** Computational studies of electrochemical reduction of CO<sub>2</sub> to CO using transition metal dichalcogenide nanoflakes. C. Liu, L.A. Curtiss

**2:30 ENFL 169.** CO<sub>2</sub> activation employing a silylium-phosphine frustrated Lewis pair. P. Hunt

**3:05** Intermission.

**3:25 ENFL 170.** Tuning activity and selectivity toward CO<sub>2</sub> conversion: Going from metal, metal alloy to metal-oxide. S. Kattel, B. Yan, J.G. Chen, J. Rodriguez, P. Liu

**4:00 ENFL 171.** Regulation of the redox properties of tungsten-alkylidyne complexes by ligand design. B. Rudsteyn, H.B. Vibbert, R. May, E. Wasserman, I. Warnke, M.D. Hopkins, V.S. Batista

**4:25 ENFL 172.** Nitrogenase reduction of N<sub>2</sub> and CO<sub>2</sub>. S. Raugel, L.C. Seefeldt, B.M. Hoffman

## Section G

Moscone Center  
Halls B/C

### Advances in Chemistry of Energy & Fuels

D. J. Heldebrandt, S. J. Riley, *Organizers*

**2:00 - 4:00**

**ENFL 173.** Application of the immobilized lipase on graphene oxide/Zn<sub>0.4</sub>Fe<sub>1.6</sub>O<sub>4</sub> composite nanoparticles to produce biodiesel in nonaqueous media. R.K. Sharma, N. Kumar, C.A. O'Neill, K. Gaur, M. Saxena, G. Morell, K. Griebenow

**ENFL 174.** Integrated electrochemical-biological systems for the production of fuels and chemicals from CO<sub>2</sub>. A.D. Antoniak-Pablant, F. Kracke, J. Deutzmann, T.F. Jaramillo, A. Spormann

**ENFL 175.** High performance terpenoid biofuel production by oleaginous yeast *Rhodospiridium toruloides*. X. Zhuang

**ENFL 176.** Production of biodiesel from vegetable oil. V. Martinez, G.C. Peña

**ENFL 177.** Lipid analyses of assembled and naturally occurring algal communities cultivated in agricultural wastewater. A.R. Good, P.K. Thomas, G.P. Dunn, K. Feris, M.P. Callahan

**ENFL 178.** Withdrawn.

**ENFL 179.** Withdrawn.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

<sup>‡</sup> Cooperative Cosponsorship

- ENFL **180.** Simultaneous production of biodiesel and valuable co-products from *in-situ* transesterification of wet microalgae. H. Im, J. Park, B. Kim, J.W. Lee
- ENFL **181.** Tremella-like N,O-codoped hierarchical porous carbon nanosheets derived from cattle bone for fast and stable sodium storage. J. Niu, J. Liang, R. Shao, M. Dou, F. Wang
- ENFL **182.** Analysis of oxygenates in bio-oils. A.B. Padmaperuma, M.V. Orlate, T. Lemmon, M. Swita, S.D. Burton, B.A. Hofstad
- ENFL **183.** Production, blending, and upgrading of advanced renewable fuels for the co-optimization of fuels and engines. E. Monroe, R.W. Davis, A. George, J.M. Gladden
- ENFL **184.** Enhancement of methane production by varying operating conditions in anaerobic digesters fed with cow manure and barley. B. Tütal, Ç. Akyol, O. Ince, E. Ozbayram, P. Kurt Polat, K. Yagdi, B. Ince
- ENFL **185.** Effects of alkylamine electrolyte additives on activity and selectivity in electrochemical carbon dioxide reduction. J. Lin, C. Hahn, T.F. Jaramillo
- ENFL **186.** Mechanism of CO<sub>2</sub> reduction monitored by rapid-scan FT-IR spectroscopy on two different catalysts: Cobalt(II) tetraaza macrocyclic complexes and copper nanoparticles. H. Sheng, H.M. Frei
- ENFL **187.** Effects of the performance of hydrogen selective membrane for CO<sub>2</sub> capture on the techno-economics of integrated gasification combined cycle. G. Lee, J. Park, K. Hwang, J. Park, M. Park
- ENFL **188.** Waste and cost reduction by reprocessing used motor oil into a synthetic diesel fuel. J.K. Shurtleff
- ENFL **189.** High resolution mass spectrometric analysis of crude oil vacuum resid and its chromatographically separated fractions using an orbitrap mass spectrometer. M. Hurt
- ENFL **190.** Perspective of methane hydrate formation kinetics with promoters: A perspective of methane hydrate formation kinetics with promoters. P. Rangsunvigit, A. Siangjai, K. Inkong, S. Kulprathipanja
- ENFL **191.** Study on the origin of corrosive hydrogen chloride in crude oil distillation from the viewpoint of organic chlorides. B. Wu, J. Zhu, R. Ma
- ENFL **192.** Functionalization of asphaltenes by acid treatment. M.N. Siddiqui
- ENFL **193.** Pitch-based nitrogen-doped mesoporous carbon for flue gas desulfurization. X. Song
- ENFL **194.** Influence of ensemble and ligand effects of PdAu catalyst on formic acid dehydrogenation: Experimental and computational studies. C. Yoon, H. Ham
- ENFL **195.** Formic acid dehydrogenation over PdNi alloy catalysts: Experiments and theoretical investigation. C. Yoon, D. Lim, R. Tamarany
- ENFL **196.** Developing catalysts and methods for low temperature electrochemical oxidation of methane. M.J. Boyd, C. Hahn, T.F. Jaramillo
- ENFL **197.** Hydrodesulfurization of dibenzothiophene using lanthanum doped CoMoS<sub>2</sub> catalysts. C. Valdes, D.F. Gonzalez, J.G. Parsons
- ENFL **198.** CeO<sub>2</sub>/graphene and Nb<sub>2</sub>O<sub>5</sub>/graphene supported Pt and PtCo catalysts towards methanol and ethanol oxidation and oxygen reduction reactions. V. Kepeniene, L. Tamasauskaitė Tamasiunaite, A. Selskis, E. Norkus
- ENFL **199.** Gas agents effect of co-gasification of coal and biomass on alkali metal migration and its catalytic performance. L. Wang, J. Feng, W. Li
- ENFL **200.** Catalytic methane decomposition and oxidative regeneration by CO<sub>2</sub> over nickel-carbon core-shell catalyst. J.W. Lee, D. Kang, H. Lim
- ENFL **201.** Structural and elemental influence of various MOFs on the performance of Fe@C catalysts for Fischer-Tropsch synthesis. T. Wezendonk, M. Makkee, F. Kapteijn, J. Gascon
- ENFL **202.** High-performance hydrogen evolution from MoS<sub>2</sub><sub>(21-3)</sub> P<sub>x</sub> solid solution. R. Ye, Y. Liu, M.J. Yacaman, B.I. Yakobson, J.M. Tour
- ENFL **203.** Adsorption and dehydrogenation of ethane, propane and butane on Rh<sub>13</sub> clusters supported on unzipped graphene oxide and TiO<sub>2</sub>(110): A DFT study. C. Chang, M. Tsai
- ENFL **204.** Synthesis of mesoporous silica-supported and size-constrained bismuth vanadate for photocatalytic oxygen evolution and environmental remediation applications. D. Harts
- ENFL **205.** Earth-abundant nickel-iron hybrid catalysts for solar fuels production. B. Weintraub
- ENFL **206.** Activation and stabilization of copper chalcocopyrite light absorbers for photoelectrochemical hydrogen production. D. Palm, T. Hellstern, A. DeAngelis, N. Gaillard, T.F. Jaramillo
- ENFL **207.** Polyvinyl chloride and cubic ZnSnO<sub>3</sub> nanoparticles based nanocomposite as high output power and durable piezoelectric nanogenerator. S. Paria
- ENFL **208.** Vanadium-doped zinc oxide nanosheets-polymer composite for piezoelectric energy harvesting. J. Nah, S. Shin, Y. Kwon, M. Lee
- ENFL **209.** Synthesis and application of freestanding 3D Fe-coordinated nitrogen doped carbon for energy storage and Oxygen Reduction Reaction (ORR) using iron doped poly(1,8-diaminonaphthalene) precursor. C. Ortuno-Quintana, K. Ramirez, J. Lu
- ENFL **210.** Electrochemical behavior of shape controlled Pt-Rh nanoparticles for ammonia oxidation in alkaline medium for direct alkaline fuel cell application. R.A. Martinez-Rodriguez, F.J. Vidal-Iglesias, J. Solla-Gullón, C.R. Cabrera, J.M. Feliu
- ENFL **211.** Withdrawn.
- ENFL **212.** Desymmetrized bay-annulated indigo donor-acceptor materials: Methodology, self-assembly, and use in organic electronics. M. Kolaczowski, B. He, M. Roders, A. Ayzer, Y. Liu
- ENFL **213.** Highly efficient radial-junction microwire solar cells by acid based doping process. I. Hwang, K. Seo
- ENFL **214.** Fabrication of ceramic selective emitter for a thermophotovoltaic system with enhanced efficiency. K. Park, J. Kim, D. Kim, Y. Kim
- ENFL **215.** Organic photovoltaic properties of 6-(2-thienyl)-4H-thieno[3,2-b]indole based conjugated polymers containing fluorinated benzothiadiazole. A. Yi, S. Chae, I. Jeong, J. Kim, H. Suh, H. Kim
- ENFL **216.** Nanostructured tungsten carbide for Pt-free counter electrode of dye-sensitized solar cells. J. Kim, J. Kang, M. Lee, Y. Son, J. Jeong, A. Lim, H. Park, Y. Sung
- ENFL **217.** Fabrication of cobalt oxides embedded carbon nanofibers for high performance energy storage devices. C. Ranaweera, C. Zhang, S. Bhoyate, A. Jimenez, P.K. Kahol, R. Gupta
- ENFL **218.** Improving performance of 2-cyanoethyltrimethoxysilane (CNETMS)-based capacitors through the incorporation of charge blocking layers. Y. Park, M. Kathaperumal, J.W. Perry
- ENFL **219.** Flexible energy storage device based on nanostructured cobalt sulfide. S. Alogayli, C. Ranaweera, Z. Wang, P.K. Kahol, K.S. Siam, R. Gupta
- ENFL **220.** Vanadium hexacyanoferrates Prussian blue analogues for multiple-redox enabled high performance aqueous rechargeable batteries. J. Lee, G. Ali, D. Kim, H. Jung, K. Chung
- ENFL **221.** Synchrotron-based x-ray diffraction study on the effect of cobalt substitution in the electrochemical performance of NaFeO<sub>2</sub> as a cathode material for Na-ion batteries. D. Susanto, G. Ali, W. Choi, W. Chang, K. Chung
- ENFL **222.** Perfluorinated anion-based single-ion conducting polymers. I. Popovs, X. Sun, S. Dai
- ENFL **223.** Effect of TiO<sub>2</sub> morphology @ Ti foam anode on the performance of lithium ion battery. K. Nam, H. Choe
- ENFL **224.** High energy capacity flexible lithium-ion batteries using silicon particle anode. J. Im, K. Cho, S. Yoon, E. Hwang, Y. Kwon, Y. Lee, J. Ahn
- ENFL **225.** Application of PEG-based solid polymer electrolyte to all-solid-state Li-O<sub>2</sub> batteries. S. Cho, J. Yom, W. Yoon
- ENFL **226.** Improvement of cycling performances of high-voltage lithium-ion battery using fluorinated functional additives. J. Im, J. Ahn, K. Cho, S. Yoon, E. Hwang, Y. Kwon
- ENFL **227.** Wearable fibrous lithium ion batteries. S. Ha, G. Lee, C. Lee, S. Kim, Y. Lee
- ENFL **228.** Kinetic analysis of irreversible behavior in silicon monoxide anode by GITT, EIS and CV for lithium ion battery. J. Yom, S. Cho, W. Yoon
- ENFL **229.** Solid polymer electrolytes for multifunctional material systems. W. Andrews, C.C. Browder
- ENFL **230.** Li<sub>2</sub>ZrO<sub>5</sub>: A cathode material for lithium-ion batteries. Y.E. Chipangura, A. Stein, N. Tran
- ENFL **231.** Carbon nanofibers as current collector for Li/deep eutectic catholyte battery system. K. Kawase, J. Abe, Y. Kobayashi, S. Shiratori
- ENFL **232.** SnO<sub>2</sub> nanoneedle@carbon nanofiber composite material as self-standing anode material for lithium-ion batteries. K. Takahashi, J. Abe, K. Kawase, Y. Kobayashi, S. Shiratori
- ENFL **233.** Morphology and electrochemical property of carbon/iron oxide composites fabricated by electrodeposition. Y. Kobayashi, J. Abe, K. Kawase, K. Takahashi, S. Shiratori
- ENFL **234.** Sub-10-nm Co<sub>3</sub>O<sub>4</sub> nanoparticles/graphene composites as high-capacity anodes for lithium ion batteries. K. Jang, J. Jang, H. Song, K. Cho, F. Auxilia, M. Ham
- ENFL **235.** Ether and siloxane functional IIs in propylene carbonate for Li-ion batteries. S.N. Chavan, D. Mandal
- ENFL **236.** Etching of aluminum cathode current collector and its electrochemical properties for Li-ion batteries. S. Yoon, K. Cho
- ENFL **237.** Electrochemical characteristics of the self-standing iron oxide/carbon composite electrospun nanofibers. J. Abe, K. Kawase, S. Shiratori
- ENFL **238.** Computational experiments on drivers of Li<sup>+</sup> diffusion using lithium-oxyhalide anti-perovskites. Z. Mehmedović, N. Adelstein
- ENFL **239.** Simplified correlation equations for density, transport, and thermal properties of supercritical carbon dioxide in geothermal heat extraction and carbon sequestration applications. P.X. Tran, M. Massoudi, P. Wang, M.L. McKoy
- ENFL **240.** First-principles calculations of thermoelectric properties of Bi<sub>2</sub>Te<sub>3</sub> and PbTe. H. Kim, G. Choi, M. Ha, W. Lee
- ENFL **241.** Development of a kinetic model for the hydrodechlorination of trichloromethane over Pt-Pd/KIT-6. H. M. Son, S. Sung, S. Lee, J. Cho, S. Kim, J. Bae, M. Park

### Rising Star Award Symposium

Sponsored by WCC, Cosponsored by BIOL, ENFL and PROF

### Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

#### Lignin Conversion & Upgrading

Sponsored by CATL, Cosponsored by CARB and ENFL

#### Cellulose Structure & Biosynthesis

#### Synthase Trafficking & Synthesis of plant (1->3),(1->4)-D-glucans

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

#### Electrocatalysis for Energy Generation & Storage

#### Fuel Cells, Electrolytes & Batteries

Sponsored by CATL, Cosponsored by ENFL

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Mechanistic Studies of Catalysis in Photocatalytic & Photoelectrodes

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## MONDAY EVENING

## Section A

Moscone Center  
Hall D

## Sci-Mix

D. J. Heldebrant, *Organizer*

8:00 - 10:00

23, 27, 48, 54, 57, 82, 96, 98-99, 104-105, 107, 117, 120, 126, 165, 174, 183, 186. See previous listings.

242, 271, 275, 279, 286-287, 293, 294, 300, 316, 327, 333, 340, 358, 367, 381, 398, 410, 412, 421, 442, 446-447, 455. See subsequent listings.

## TUESDAY MORNING

## Section A

Grand Hyatt San Francisco  
Belvedere

## Advances in Chemistry of Energy &amp; Fuels

## Fuel Cells, Photocatalysts &amp; Hydrogen

D. J. Heldebrant, *Organizer*

Z. Li, *Presiding*

8:30 Introductory Remarks.

8:35 ENFL 242. Catalytic hydrogen generation from formic acid and its subsequent utilization to produce electricity: An indirect formic acid fuel cell. M. Czaun, A. Goepfert, B. Yang, J. Kothandaraman, S. Greenberg, S.G. Prakash, G. Olah

8:55 ENFL 243. Withdrawn.

9:15 ENFL 244. Synthesis of bio-inspired covalently functionalized graphene nanohybrid and comparison of the effect of different electron transfer pathway on the photocatalytic hydrogen production efficiency. J. Yan

9:35 ENFL 245. Ligand engineering of lead chalcogenide nanoparticle solar cells. M. Voros, N.P. Brawand, G.A. Galli

9:55 ENFL 246. Effect of geometrical site confinement in high-efficient iron-doped cobalt oxides electrocatalysts toward oxygen evolution reaction. S. Hong, Y. Hsu, H. Chen

10:15 ENFL 247. Superior performance of borocarbonitrides,  $B_xC_yN_z$ , as stable, low-cost metal-free electrocatalysts for the hydrogen evolution reaction. H. Chakraborty, M. Chhetri, S. Maitra, U. Waghmare, C. Rao

10:35 Intermission.

10:40 ENFL 248. Molecular modeling of activated carbon-based electrochemical double layer capacitors. S. Schweizer, L. Subramanian, J. Hill

11:00 ENFL 249. Exploration of inorganic and hybrid porous materials as proton conductors. S. Devautour-Vinot, P. Mileo, D. Damanesco Borges, R. Semino, G. Maurin, F. Paesani, H. Jobic, N. Stenou, F. Nouar, C. Serre

11:20 ENFL 250. Nanoporous Sn and SbSn anode for Li and Na ion batteries through one-step selective etching. T.C. Lin, J.B. Cook, E. Detsi, J. Weker, S.H. Tolbert

11:40 ENFL 251. Inkjet printing assisted fabrication of hierarchical Ni@MnO<sub>2</sub> dendritic nanostructured electrode for flexible micro-supercapacitor with artistic design. Y. Lin, Y. Gao, Z. Fan

12:00 ENFL 252. Open porous hierarchical SiC@nanographene@phosphorus structure and its electrochemical performance as a Li-ion anode. D. Zhao, B. Li, J. Zhang, C. Niu

12:20 Concluding Remarks.

## Section B

Grand Hyatt San Francisco  
Filmore C

## Functional Porous Materials for Sustainable Energy

Cosponsored by CATL and MPPG<sup>‡</sup>

N. L. Rosi, S. Shanmugam, *Organizers*

R. Motkuri, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 253. Reticular materials for clean energy and water. O.M. Yaghi

9:05 ENFL 254. Single site catalysis in metal-organic frameworks. C.J. Doonan, A. Burgun, C. Sumbly

9:25 ENFL 255. Metal organic frameworks: Functional porous materials for energy-efficient and selective gas capture and separation. B. Li, H. Wang, J. Li

9:45 ENFL 256. Encapsulation of bio-catalysts into nanoporous materials. C. Tsung

10:05 Intermission.

10:15 ENFL 257. Metal-organic frameworks for artificial photosynthesis. W. Lin

10:35 ENFL 258. Metal organic framework derived, nitrogen doped carbon for high stability room temperature sodium-sulfur battery. Y. Zhu

10:55 ENFL 259. First principles-based computational design concept for highly functional materials for energy systems. B. Han

11:15 ENFL 260. Fundamentals and applications of electrically conductive two-dimensional MOFs. M. Dinca, D. Sheberla, L. Sun, M. Campbell, E. Miner

11:35 Concluding Remarks.

## Section C

Grand Hyatt San Francisco  
Orpheum

## Advanced Materials &amp; Technologies for Solar Energy Conversion &amp; Storage

Cosponsored by CATL, MPPG<sup>‡</sup> and PMSE

R. T. Koodali, H. Wang, *Organizers*

Y. H. Hu, *Organizer, Presiding*

Z. Wu, *Presiding*

8:30 Introductory Remarks.

8:35 ENFL 261. Exploring two-dimensional materials as novel photocatalysts for hydrogen production from water splitting. Z. Wu

9:15 ENFL 262. Exploring new opportunities in organic-inorganic hybrid perovskites. T. Xu

9:45 ENFL 263. Thin films of methylammonium lead halide perovskite via hydrolysis of N-methylformamide as source of methylammonium ions. S. Accornero, M. Arciniegas, M. Prato, S. Marras, L. Manna

10:05 ENFL 264. Efficient TiO<sub>2</sub> thin films prepared via adsorptive self-assembly for photovoltaic self-cleaning and anti-soiling applications. R. Isaifan, T. Rhadfi, A. Samara, B. Aissa, A. Abdallah

10:25 ENFL 265. Phase-stabilized  $\alpha$ -CsPbI<sub>3</sub> quantum dots and fabrication of all-inorganic perovskite devices. A. Marshall, A. Swarnkar, E. Sanehira, J. Luther

10:45 Intermission.

11:00 ENFL 266. 2D layer as a protection against film degradation on perovskite solar cells. M.S. Holanda, A. Nogueira

11:20 ENFL 267. Dense silica barrier films for improved efficiency and stability of perovskite solar cells deposited in ambient air. N. Rolston, A. Printz, S. Dong, B. Watson, R. Dauskardt

11:40 ENFL 268. Flexible crystalline silicon photovoltaics with vertically aligned microwire array. I. Hwang, H. Um, K. Seo

12:00 ENFL 269. Neutral-color semi-transparent crystalline silicon solar cells. K. Lee, N. Kim, H. Um, I. Hwang, K. Seo

12:20 Concluding Remarks.

## Section D

Grand Hyatt San Francisco  
Curran

## Applications of X-Ray &amp; Neutron Scattering Techniques in Energy Technologies

## Catalysis

Cosponsored by ANYL

K. Herwig, *Organizer*

R. E. Winans, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 270. Characterization of Pt/C during electrocatalytic hydrogen addition reactions. J. Fulton, N. Singh, D.M. Camaioni, N. Govind, D.C. Cantu, R. Rousseau, M. Balasubramanian, S. Russell, C.T. Campbell, J.A. Lercher

9:05 ENFL 271. Following chemistry and catalysis in metal-organic frameworks using advanced synchrotron x-ray scattering tools. A. Platero Prats, K.W. Chapman, D.M. Camaioni, C.J. Cramer, O.K. Farha, J. Fulton, L. Gagliardi, J.T. Hupp, C. Lu, A.B. Martinson, A. Stein, D.G. Truhlar

9:35 ENFL 272. VISION challenge: The world's first high-throughput inelastic neutron scattering spectrometer. A. Ramirez-Cuesta, Y. Cheng, L. Daemen

10:05 Intermission.

10:20 ENFL 273. Investigation on catalytic metal nanoparticle synthesis. H. Zhao, Y. Lei

10:50 ENFL 274. *In situ* isotope-contrasted stroboscopic studies of the local atomistic structure of catalytic materials. D. Olds, K. Page, A. Päcklar, P. Peterson, J.R. Neilson

11:20 ENFL 275. Characterizing the local structure and reactivity of nanoscale catalysts through combined x-ray scattering and vibrational spectroscopy measurements. P. Chupas

11:50 Concluding Remarks.

## Section E

Grand Hyatt San Francisco  
Sequoia

## Innovative Chemistry &amp; Materials for Electrochemical Energy Storage

## Solid-State Electrolytes &amp; Beyond Li

Cosponsored by MPPG<sup>‡</sup> and PMSE

J. Guo, Y. Mo, *Organizers*

E. Pomerantseva, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 276. Quest for novel electrolytes - Challenges and opportunities. S. Meng

9:05 ENFL 277. Stability and cycling of metallic lithium with an inorganic solid electrolyte. N.J. Dudney, M. Chi, E. Herbert, J. Sakamoto

9:35 ENFL 278. Novel alkali superionic conductor solid electrolytes. S. Ong, Z. Zhu, I. Chu

10:05 ENFL 279. 3D all solid state Li-ion microbatteries. A. Talin

10:35 Intermission.

10:45 ENFL 280. Understanding Li<sup>+</sup> diffusion behavior in amorphous and crystalline Li<sub>3</sub>PS<sub>4</sub> solid electrolytes, via *ab-initio* simulations. N. Leclerc, N. Adelstein

11:05 ENFL 281. Aluminum triflate in diglyme: A potential electrolyte for Al-ion batteries. E.J. Menke, L. Reed, A. Arteaga

11:25 ENFL 282. Synthesis of a magnesium battery electrolyte without need for conditioning or promoters. T. Hou, C.W. Monroe

11:45 ENFL 283. Fundamental investigations of magnesium electrode/electrolyte interface using *operando* ambient pressure x-ray photoelectron spectroscopy. Y. Yu, A. Baskin, C. Valero-Vidal, N. Hahn, K.R. Zavadil, B.W. Eichhorn, D. Prendergast, E.J. Crumlin

12:05 ENFL 284. Sodium electrolyte degradation: Evaluating pure electrolyte degradation through a safe and convenient NMR technique. P.L. Barnes, H. Xiong, K. Smith, E.J. Dufek

## Section F

Grand Hyatt San Francisco  
Cypress

## Biomass &amp; Biofuel Processing

Cosponsored by CELL, MPPG<sup>‡</sup> and WCC

J. Fu, S. Turn, *Organizers, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 285. Demonstration of fast pyrolysis technologies at pilot-scale. E. Wilcox, T. Dunning

8:55 ENFL 286. Fast pyrolysis: Comparing effects of feedstock and run conditions on fast pyrolysis products produced at the pilot scale. T. Dunning, E. Wilcox

9:15 ENFL 287. Lignocol: Low ash, low sulfur coal replacement from fast pyrolysis of biomass. M.R. Rover, A. Friend, R.G. Smith, R.C. Brown

9:35 ENFL 288. Ex-situ catalytic fast pyrolysis in a DCR - Effect of pyrolysis conditions. M. Jarvis, J. Olstad, Y. Parent, K.A. Magrini

9:55 Intermission.

10:10 ENFL 289. Upgrading biomass pyrolysis vapors to fungible hydrocarbon intermediates. K.A. Magrini, M. Jarvis, J. Olstad, Y. Parent, S. Deutch, M. Yung, K. Iisa

<sup>‡</sup>Cooperative Cosponsorship

**10:30 ENFL 290.** Recovering and upgrading biogenic carbon from pyrolysis waste streams to produce chemical intermediates. **C. Mukarakate**, A. Starace, R.J. Evans, K.A. Magrini

**10:50 ENFL 291.** Biofuel production by catalytic pyrolysis vapor upgrading: Effects of nickel loading and pretreatment on modified ZSM-5. **M. Yung**, A. Starace, C. Mukarakate, K.A. Magrini

**11:10 ENFL 292.** Constant volume pyrolysis of biomass for the production of char with high fixed-carbon content. **M. Legarra Arizaleta**, S. Van Wesenbeeck, S. Turn, T.J. Morgan

### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

#### Carbohydrate Processing & Upgrading of Biomass-Derived Molecules

Sponsored by CATL, Cosponsored by CARB and ENFL

#### Cellulose Structure & Biosynthesis

#### Biochemistry & Cellular Biology

Sponsored by CELL, Cosponsored by BIOL, BIOT, CARB and ENFL

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Molecular & Bio-Inspired Photocatalysts

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

## TUESDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Belvedere

#### Advances in Chemistry of Energy & Fuels

#### Batteries

D. J. Heldebrant, *Organizer*  
Z. Li, *Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 293.** First-principles molecular dynamics of non-arrhenius Li<sup>+</sup> diffusion in solid electrolytes for batteries. **A. Zevgolis**, N. Adelstein

**1:55 ENFL 294.** Nanoporous LiMn<sub>2</sub>O<sub>4</sub>: An extrinsically pseudocapacitive cathode material for Li-ion batteries. **B. Lesel**, J. Ko, J.B. Cook, Y. Yan, B. Dunn, S.H. Tolbert

**2:15 ENFL 295.** Electrochemical activation and reduction of SF<sub>6</sub> in nonaqueous Li cells for primary energy delivery. **B. Gallant**, Y. Li

**2:35 ENFL 296.** Withdrawn.

**2:55** Intermission.

**3:05 ENFL 297.** Withdrawn.

**3:25 ENFL 298.** Large-scale preparation of redox active organics for symmetric nonaqueous redox flow batteries. **J. Saraidaridis**, R. Straker, C.S. Sevov, J. Suttill, M.S. Sanford, M.C. Willis, C.W. Monroe

**3:45 ENFL 299.** Self-healing polymer for high capacity anodes. **C. Wang**

**4:05 ENFL 300.** Effect of ion stabilization and thermal annealing on cycling behavior of bilayered vanadium oxides in Na-ion batteries. **M. Clites**, E. Pomerantseva

**4:25 ENFL 301.** Morphology tailored porous hollow Cu<sub>2</sub>O nanospheres fabricated by Ostwald ripening for Li-ion battery applications. **P. Rai**, S. Shilpa, A. Sharma

**4:45** Concluding Remarks.

### Section B

Grand Hyatt San Francisco  
Filmore C

#### Functional Porous Materials for Sustainable Energy

Cosponsored by CATL and MPPG<sup>2</sup>

R. Motkuri, S. Shanmugam, *Organizers*

N. L. Rosi, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 302.** Design and synthesis of amine-functionalized porous materials for carbon capture. **Y. Sun**, H. Zhou

**2:00 ENFL 303.** Metal organic frameworks for carbon activation and conversion. **A.J. Morris**, J. Zhu, P. Usov

**2:20 ENFL 304.** Diamine-appended metal-organic frameworks as cooperative adsorbents for energy-efficient CO<sub>2</sub> separations. **J. Martell**, P.J. Milner, R.L. Siegelman, J.R. Long

**2:40 ENFL 305.** Withdrawn.

**3:00** Intermission.

**3:10 ENFL 306.** Functional Metal-Organic Frameworks (MOFs): Design and preparation. **O.K. Farha**

**3:30 ENFL 307.** Amine functionalized porous polymer microspheres for enhanced CO<sub>2</sub> capture. **N.A. Dogan**, E. Ozdemir, **C.T. Yavuz**

**3:50 ENFL 308.** Porous materials for capture of fluorinated species. **O. Miljanic**

**4:10 ENFL 309.** Production of stable metal organic heat carrier nanofluids. **S.K. Nune**, P. McGrail, M. Nandasiri, J. Jenks, N. Phillips

**4:30** Concluding Remarks.

### Section C

Grand Hyatt San Francisco  
Orpheum

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Cosponsored by CATL, MPPG<sup>2</sup> and PMSE

R. T. Koodali, H. Wang, *Organizers*

Y. H. Hu, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 310.** Withdrawn.

**2:15 ENFL 311.** Ionic-liquid electrolyte solidified by surface modified nanoparticles for dye-sensitized solar cells. **Y. Lin**, Y. Fang, P. Ma

**2:35 ENFL 312.** Rapid microwave-hydrothermal synthesis of TiO<sub>2</sub>-MgO for photocatalytic energy and environmental remediation applications. **B. Selvaratnam**, R.T. Koodali

**2:55 ENFL 313.** Effect of ligands on photochemical charge transfer in CdSe quantum dot films – A surface photovoltage spectroscopy study. **B. Nail**, M.J. Greaney, H. Lu, J. Zhao, S.E. Bradforth, R.L. Brutchey, F.E. Osterloh

**3:15** Intermission.

**3:30 ENFL 314.** Thin film upconversion sensitized by zinc-blende CdSe nanocrystals. **J. Tamayo**, L. Chen, J.J. Locklin, P. Xia, M. Tang

**3:50 ENFL 315.** Solar energy harvesting scheme utilizing low dimensional micro- and nano-structures. **Y. Chueh**

**4:10 ENFL 316.** Hybrid (organic/inorganic) electrode design from bacterially precipitated CdS for PEC/storage applications. **Y. Feng**, E. Ngaboyamahina, K. Marusak, J.T. Glass, S. Zauscher

**4:30 ENFL 317.** Impact of monolayer of alkyl amine on the crystalline orientation and performance of CH<sub>3</sub>NH<sub>3</sub>PbI<sub>3</sub> solar cells. **M. Ong**, Q. Liu, A. Lopez, X. Wang, D. Jiang, F. Zhou

**4:50** Concluding Remarks.

### Section D

Grand Hyatt San Francisco  
Curran

#### Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies

#### Energy Sources & Combustion

Cosponsored by ANYL

K. Herwig, R. E. Winans, *Organizers*

A. Ramirez-Cuesta, *Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 318.** Solvent swelling and surface energies in sequentially processed polymer:fullerene solar cells: Controlling vertical phase segregation in organic photovoltaics. **P. Yee**, M.T. Fontana, R. Huber, J.C. Aguirre, S.A. Jenekhe, B.J. Schwartz, S.H. Tolbert

**2:05 ENFL 319.** *In-situ* SAXS studies of the density fluctuations of supercritical n-heptane. **S. Lee**, S. Lee, R.E. Winans

**2:35 ENFL 320.** *In-situ* x-ray scattering and neutron imaging of combustion: Nanoparticles/soot and their formation and phase transitions. **F. Ossler**

**3:05** Intermission.

**3:20 ENFL 321.** New insights into thermal effect of crude oil adsorbed clay minerals by *in situ* USAXS/SAXS study. **S. Lee**, R.J. Klingler, J. Ilavsky, R.E. Winans, T. Fischer, D.K. McCarty, M.O. Wigand

**3:50 ENFL 322.** Effect of surfactant adsorption on pore accessibility and water uptake in organic-rich shales. **S. Das**, J. Adeoye, B. Ellis

**4:20 ENFL 323.** XRF analysis of water pretreated/leached banagrass to determine the effect of temperature, time and particle size on the removal of inorganic elements. **T.J. Morgan**, L.K. Andersen, H. Cui, S. Turn

**4:50** Concluding Remarks.

### Section E

Grand Hyatt San Francisco  
Sequoia

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### 2D Energy Storage Materials

Cosponsored by MPPG<sup>2</sup> and PMSE

J. Guo, Y. Mo, *Organizers*

E. Pomerantseva, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 324.** 2D materials for energy storage and electrochemical actuation. **M. Chhowalla**

**2:05 ENFL 325.** Few layered black phosphorus nanosheets for Li/Na storage. **A. Yan**

**2:35 ENFL 326.** Two-dimensional transition metal carbides – New materials for electrochemical capacitors. **M. Lukatskaya**, Y. Gogotsi

**3:05** Intermission.

**3:15 ENFL 327.** Nanostructured bilayered V<sub>2</sub>O<sub>5</sub> cathode for rechargeable batteries: Na- and Mg- ion case. **S. Tepavcevic**, Y. Liu, V. Stamenkovic, C.S. Johnson, **T. Rajh**

**3:45 ENFL 328.** Design of materials for energy storage. **C.S. Ozkan**

**4:15 ENFL 329.** Layered nanocomposites for energy storage. **N. Kotov**

**4:45 ENFL 330.** High performance electrochemical capacitors based on conductive two-dimensional frameworks. **M. Lukatskaya**, D. Feng, T. Lei, Z. Bao

### Section F

Grand Hyatt San Francisco  
Cypress

#### Biomass & Biofuel Processing

Cosponsored by CELL, MPPG<sup>2</sup> and WCC

J. Fu, S. Turn, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 ENFL 331.** Effect of feedstock and pyrolysis-catalyst on the yield of hydro-treated refinery intermediate. **R.J. French**, D. Carpenter, D. Howe, T.L. Westover

**1:55 ENFL 332.** Pd nanoparticles stabilized in polymeric matrix in fatty acid hydrodeoxygenation. **A. Stepacheva**, V. Matveeva, J. Wärnå, P. Mäki-Arvela, D. Murzin, **E. Sulman**

**2:15 ENFL 333.** Quantitative depolymerization of uncondensed technical lignin at 120 °C with supported nickel catalysts. **L. Shuai**

**2:35 ENFL 334.** Deoxygenation of triglycerides in catalytic cracking process with enhanced hydrogen transfer activity. **I. Shimada**, S. Kato, N. Hirazawa, Y. Nakamura, H. Ohta, K. Suzuki, T. Takatsuka

**2:55** Intermission.

**3:10 ENFL 335.** Magnetically recoverable catalysts for cellulose conversion into ethylene- and propylene glycols. **E. Sulman**, O. Manaenkov, J.J. Mann, Y. Losovyj, B. Stein, O. Kislitzka, D.G. Morgan, M. Pink, Z. Shifrina, V. Matveeva, L. Bronstein

**3:30 ENFL 336.** Next-generation biomass fractionation with deep eutectic solvents. **M.B. Foston**, J. Meyer

**3:50 ENFL 337.** Catalytic pulping of wood. **R.C. Johnston**, J.M. Parks, A. Rudie, J.J. Bozell, **T.J. Elder**

**4:10 ENFL 338.** Co-extraction of hemicelluloses and polyphenolic compounds from four hardwood species using pressurized hot water: Influence of the process on extraction yields and mechanisms. **N. Beaufils**, L. Candy, P. Pontalier, L. Rigal, G. Vilarem

#### Catalytic Conversion of Lignocellulosic Biomass to Fuels, Chemicals & Materials

Sponsored by CATL, Cosponsored by CARB and ENFL

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Novel Photocatalytic & Photoelectrode Materials

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

## WEDNESDAY MORNING

### Section A

Grand Hyatt San Francisco  
Belvedere

#### Advances in Chemistry of Energy & Fuels

##### Fuel Life Cycle & Analysis

D. J. Heldebrant, *Organizer*

A. Padmaperuma, *Presiding*

8:30 Introductory Remarks.

8:35 ENFL 339. Molecular characterization of Dissolved Organic Matter (DOM) in petroleum refinery wastewater by FT-ICR MS with  $\pm$ ESI and +APPI ionization. C. He, Z. Fang, Y. Li, S. Zhao, Q. Shi

8:55 ENFL 340. Impact of biodiesel blends on chemical composition of nitro-PAH and carbonyl compound emissions and stimulation of inflammatory responses in cells. Y. Han, J. Kasumba, N.K. Fukagawa, B. Holmen

9:15 ENFL 341. Computational analysis of the combustion and atmospheric decomposition of the cis and trans isomers of hydroxyalkenylperoxy radicals. S. Mondal, A. Davis

9:35 ENFL 342. Comprehensive analysis of molecular compositional changes of crude oils during biosouring. J. Nowak, P. Shrestha, R. Weber, J.D. Coates, A. Goldstein

9:55 Intermission.

10:00 ENFL 343. Effects of thermal cracking of N-decane on ignition delay time in shock tube. P. Shan-Shan, G. Liu, X. Zhang, L. Wang, G. Li

10:20 ENFL 344. Distribution, qualitative, and quantitative analyses of chlorides in distillates from ZJ crude oil. R. Ma, J. Zhu, B. Wu, X. Li, J. Xue

10:40 ENFL 345. Hindered diffusion of sulfur-containing compounds in residue fractions through membranes and catalyst. Z. Chen, K. Yuan, M. Zheng, B. Wang, C. Xu

11:00 Concluding Remarks.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

### Section B

Grand Hyatt San Francisco  
Filmore C

#### Functional Porous Materials for Sustainable Energy

Cosponsored by CATL and MPPG<sup>†</sup>

R. Motkuri, N. L. Rosi, *Organizers*

S. Shanmugam, *Organizer, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 346. New family of catalysts for solar fuels: Cofactor-like catalysts on mesoporous MOF supports. J.T. Hupp, O.K. Farha, A. Peters

9:00 ENFL 347. Porosity gradient within metal-organic frameworks. C. Liu, N.L. Rosi

9:20 ENFL 348. Surface modification of metal-organic framework nanoparticles through controlled radical polymerization: A general approach. T. Li, S. He

9:40 ENFL 349. Porous and layered materials for gas sorption and separation applications. E. Muthusamy

10:00 Intermission.

10:10 ENFL 350. Functional metal-organic frameworks for the energy-intensive separations. M. Eddaoudi, A. Cadiau, K. Adil, Y. Belmabkhout, P. Bhatt

10:30 ENFL 351. Dehydrobenzoannulene-based covalent organic frameworks. P. McGrier

10:50 ENFL 352. Reusable photocatalytic metal-organic frameworks for organic transformations. X. Yu, S. Cohen

11:10 ENFL 353. Robust metal organic frameworks for adsorption chiller applications. R. Vemuri, J. Zheng, P. McGrail

11:30 Concluding Remarks.

### Section C

Grand Hyatt San Francisco  
Orpheum

#### 13th International Symposium on Heavy Oil Upgrading, Production & Characterization

Cosponsored by CATL

C. Mesters, Y. Zhang, *Organizers*

J. J. Adams, *Organizer, Presiding*

Y. Zhang, *Presiding*

8:30 Introductory Remarks.

8:35 ENFL 354. Basic research of solvent deasphalting coupling fluidization thermal conversion process for heavy oil. H. Song

8:55 ENFL 355. Subsurface upgrading of heavy oils via solvent deasphalting. C.F. Ovalles

9:15 ENFL 356. Effect of solvent and solvent-to-bitumen ratio on the liquefying point of asphaltenes in the solvent deasphalting process. A. Turuga, A. De Klerk

9:35 ENFL 357. Nature of virgin and generated asphaltenes from thermal and/or steam catalytic cracking of Athabasca bitumen vacuum residue and its deasphalted oil. L.A. Carbognani, E. Rogel, C. Ovalles, F.A. Lopez-Linares, J. Carbognani, P. Pereira Almaco, J. Vien, A. Pradhan

9:55 ENFL 358. Propane-Steam Assisted Gravity Drainage (propane-SAGD) as a follow-up process to SAGD. T. Kar, C. Ovalles, I. Benson, B. Hascakir

10:15 Intermission.

10:30 ENFL 359. 1350 F<sup>+</sup> by in-line filtration coupled with ICP-MS. F.A. Lopez-Linares, L. Poirier, C.F. Ovalles, E. Rogel, J. Nelson

10:50 ENFL 360. Heat induced fouling of crude oils related to asphaltene stability and composition. J.J. Adams, P. Eaton, J.F. Schabron

11:10 ENFL 361. Fouling apparatus to measure heat induced asphaltene fouling of crude oils. J.J. Adams, R. Grimes, J.F. Schabron

### Section D

Grand Hyatt San Francisco  
Curran

#### Applications of X-Ray & Neutron Scattering Techniques in Energy Technologies

##### Fuel Cells

Cosponsored by ANYL

K. Herwig, R. E. Winans, *Organizers*

S. Lee, *Presiding*

8:30 Introductory Remarks.

8:35 ENFL 362. Using neutron imaging to understand transport phenomenon in fuel cell and batteries. D.L. Jacobson, D. Hussey, J. LaManna, E.M. Baltic

9:05 ENFL 363. Using small angle x-ray scattering as a key tool to develop next generation polymer electrolyte membrane for electrochemical energy conversion. A.M. Herring, A. Motz, Y. Liu, H. Sarode, T. Pandey

9:35 ENFL 364. X-ray absorption spectroscopy characterization of bimetallic iron-nickel nanoparticle electrocatalysts. L.F. Greenlee, S. Candelaria

10:05 Intermission.

10:20 ENFL 365. Revealing oxygen anion transport pathways in SOFC materials through in-situ neutron diffraction. S. McIntosh, A. Huq, A. Tomkiewicz, M. Tamimi, C. Sarno

10:50 ENFL 366. Application of high resolution neutron imaging to polymer electrolyte fuel cells. R. Mukundan, D. Spornjak, D. Hussey, D.L. Jacobson, R. Borup

11:20 Concluding Remarks.

### Section E

Grand Hyatt San Francisco  
Sequoia

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

##### Electrolytes & Interface

Cosponsored by MPPG<sup>†</sup> and PMSE

Y. Mo, E. Pomerantseva, *Organizers*

J. Guo, *Organizer, Presiding*

8:30 ENFL 367. Anion-redox batteries and lithium metal protection. J. Li

9:00 ENFL 368. Spontaneously formed interfacial phases for energy applications. J. Luo

9:30 ENFL 369. Crosslinkable organic-inorganic hybrid as binders for thermal stability-enhanced ceramic coated separator. B. Jung, S. Yang, H. Choi, B. Lee, M. Park, S. Han

9:50 ENFL 370. Development of a highly conductive PEO-based solid polymer electrolyte. C.C. Browder

10:10 ENFL 371. Stabilizing water in batteries. K. Xu

10:40 ENFL 372. Computational study of the operation mechanism of tris(trimethylsilyl) phosphite as a multi-functional additive for lithium-ion batteries. D. Kim, H. Park, W.I. Choi, B. Roy, J. Seo, I. Park, Y. Kang, M. Koh

11:00 ENFL 373. Interface identification of the solid electrolyte interphase on graphite. E. Zvereva, D. Caliste, P. Pochet, T. Deutsch

11:20 ENFL 374. Substituent effects on the enhanced thermal stability of organosilicon electrolytes for lithium-ion batteries. S.L. Guillot, A. Peña-Hueso, M. Usrey, R.J. Hamers

11:40 ENFL 375. Insights into the sodium-oxygen battery cathode electrochemistry. J.E. Nichols, B.D. McCloskey

12:00 ENFL 376. High-loading sulfur-graphene oxide electrodes toward practical Li/S cells. Y. Hwa, E.J. Cairns

### Section F

Grand Hyatt San Francisco  
Cypress

#### Biomass & Biofuel Processing

Cosponsored by CELL, MPPG<sup>†</sup> and WCC

J. Fu, S. Turn, *Organizers, Presiding*

8:30 Introductory Remarks.

8:35 ENFL 377. Determination of bio-originated fuel content using a modified direct LSC method in the presence of quenching. C. Doll, C.W. Wright, S.M. Morley, B. Wright

8:55 ENFL 378. Transportation fuels derived from biomass: Qualitative and quantitative analysis of reactive species. A.B. Padmaperuma, M.V. Olarte

9:15 ENFL 379. Assessing factors responsible for lignocellulosic biomass saccharification: Fluorescence is brilliant. T. Auxenfans, B. Chabbert, G. Paes

9:35 ENFL 380. Fluorescent probes dynamics to determine biomass characteristics impact on lignocellulosic enzymes activity and mobility. M. Herbut, G. Paes

9:55 Intermission.

10:10 ENFL 381. Sustainable technologies towards a biorefinery: Extraction and tunable enrichment of microalgal triacylglycerides using supercritical carbon dioxide. T.A. Kwan, J.B. Zimmerman

10:30 ENFL 382. Kinetics of phosphate precipitation from the nutrients-rich algal hydrolysate. A. Teymouri, B. Stuart, S. Kumar

10:50 ENFL 383. Maximizing atom (N, P, & C) economy via process integration in the conversion of microalgae to bioproducts and biofuels. A. Teymouri, C.R. Talbot, A. Samarantunga, B. Stuart, S. Kumar

11:10 ENFL 384. Parametric optimization of syngas production from algal biomass gasification via central composite design. A. Raheem, R. Harun, M. Zhao

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Spectroscopy & Microscopy of Photocatalytic & PEC Materials

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

<sup>†</sup> Cooperative Cosponsorship

## WEDNESDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Belvedere

## Advances in Chemistry of Energy &amp; Fuels

## Biomass &amp; Biofuels

D. J. Heldebrant, *Organizer*

A. Padmaperuma, *Presiding*

## 1:30 Introductory Remarks.

**1:35 ENFL 385.** Potential additives to improve biofuels properties and their effects on fuel characteristics. J. Fu, S. Turn

**1:55 ENFL 386.** Lignin-derived multi-cyclic high density biofuel by alkylation and hydrogenated intramolecular cyclization. G. Nie, J. Zou, X. Zhang

**2:15 ENFL 387.** Chemical reactions and structural identification of a coniferyl alcohol dimer causing instability in wood-derived pyrolysis oils. J. Joseph, M. Rasmussen, E.A. Stemmler, B. Jensen, B.G. Frederick

**2:35 ENFL 388.** Preparation of bimetallic catalysts and activity test on hydrodeoxygenative upgrading of bio-oil. S. Oh, J. Choi

## 2:55 Intermission.

**3:05 ENFL 389.** Tailor-made organic heterogeneous catalysts for the continuous-flow production of alkyl levulinates. L. Vaccaro, A. Marroccoli, V. Trombettoni

**3:25 ENFL 390.** Sterically protected and electronically activated azamacrocyclic catalysts for lignin depolymerization: A new approach to biomass valorization. M. Chorghade

**3:45 ENFL 391.** Performance and structural evaluation of the torrefaction of bamboo under a high gravity (higee) environment using a rotating packed bed. M.G. de Luna, M.V. Pillejera, W. Chen

**4:05 ENFL 392.** Development of novel nitrogenous base-tethered cobalt-Schiff base complexes for the selective catalytic cleavage of lignin. R.E. Key, J.J. Bozell

## 4:25 Concluding Remarks.

## Section B

Grand Hyatt San Francisco  
Filmore C

## Functional Porous Materials for Sustainable Energy

*Cosponsored by CATL and MPPG<sup>2</sup>*

N. L. Rosi, S. Shammugam, *Organizers*

R. Motkuri, *Organizer, Presiding*

## 1:30 Introductory Remarks.

**1:35 ENFL 393.** Porous metal-organic framework materials for gas storage and separation. B. Chen

**1:55 ENFL 394.** Metal-organic framework templated low temperature CO oxidation catalysts. C.W. Abney, J.T. Patterson, G. Veith, R. Unocic, S. Dai

**2:10 ENFL 395.** Synthesis of benzobisoxazole-linked two-dimensional covalent organic frameworks & their properties for carbon-dioxide capture. D. Pyles, J. Crowe, L. Baldwin, P. McGrier

**2:25 ENFL 396.** Microporous graphene-like frameworks for gas and energy storage applications. A. Coskun

## 2:40 Intermission.

**2:50 ENFL 397.** Advanced porous organic polymers: Task-specific design and functionalization. S. Ma

**3:10 ENFL 398.** Hierarchical porous carbon materials platform with exceptional surface area and pore volume for energy and environmental applications. L. Estevez, J. Zheng, A. Garcia, R. Vemuri, S. Jeong, W. Xu, P. Bhattacharya, X. Li, Y. Shin, R. Motkuri, J. Zhang

**3:25 ENFL 399.** Microporous materials for the effective adsorption and separation of CO<sub>2</sub> from flue gases. S. Proding, M.A. Derewinski, R. Motkuri

## 3:40 Concluding Remarks.

## Section C

Grand Hyatt San Francisco  
Orpheum

## 13th International Symposium on Heavy Oil Upgrading, Production &amp; Characterization

*Cosponsored by CATL*

C. Mesters, Y. Zhang, *Organizers*

J. J. Adams, *Organizer, Presiding*

Y. Zhang, *Presiding*

**1:30 ENFL 400.** Monitoring production and transportation of heavy crude oil using near infrared spectroscopy. T. Miao, A.R. Pradhan, M. Moir, E. Lee

**1:50 ENFL 401.** Comparisons and structural characterization of petroleum cut samples from different origins: Impact of hydrotreatment processes. F. Albrieux, J. Barbier, J. Ponthus

**2:10 ENFL 402.** Molecular composition building strategies for petroleum feedstock. S. He, L. Zhang, Q. Shi, S. Zhao

**2:30 ENFL 403.** Molecular characterization of sulfur-containing compounds in vacuum residue by FT-ICR MS and GC×GC-TOFMS. X. Cai, W. Wang, J. Zhou, Z. Liu, Y. Liu, S. Tian

**2:50 ENFL 404.** Characterization and behavior of interfacially active asphaltenes from crude oil. J.J. Adams, J.F. Schabron, J. Loveridge, R. Grimes, L. Goual, G. Javanbakht

**3:10 ENFL 405.** Molecular-level analysis of petroleum interfacially active species reveals the components responsible for stable emulsion formation. R.P. Rodgers, Y. Corilo, D.C. Podgorski, S. Rowland, P.M. Lalli, W.K. Robbins, A.C. Clingenpeel

## 3:30 Intermission.

**3:45 ENFL 406.** Study of asphaltene retention on iron oxide under poor solvent conditions. E. Rogel, M. Roye

**4:05 ENFL 407.** Influence of metal halides on coke formation. G. Carvalho do Prado, Riya, M. Hyrve, A. De Klerk

**4:25 ENFL 408.** Reservoir rock-asphaltene interaction impacts asphaltene stability. B. Hascakir

## Section D

Grand Hyatt San Francisco  
Curran

## Applications of X-Ray &amp; Neutron Scattering Techniques in Energy Technologies

## Gas Storage &amp; Ion Conduction

*Cosponsored by ANYL*

R. E. Winans, *Organizer*

K. Herwig, *Organizer, Presiding*

## 1:30 Introductory Remarks.

**1:35 ENFL 409.** Characterizing phase transitions in metal-organic frameworks and nanoparticle superlattices. J.A. Mason, J.R. Long, C.A. Mirkin

**2:05 ENFL 410.** Neutron scattering studies of hydrogenous materials for next-generation energy storage. M. Dimitrievska, W. Tang, H. Wu, W. Zhou, T.J. Udovic

**2:35 ENFL 411.** Functional porous materials for guest storage, selectivity and catalysis. S. Yang

## 3:05 Intermission.

**3:20 ENFL 412.** Neutron scattering to probe battery interfaces and dynamics. G. Veith, J. Browning, M. Doucet, J. Kim

**3:50 ENFL 413.** Neutron scattering studies on atomic-scale proton diffusion processes in a solid oxide electrolyte. N. Jalarvo, Y. Cheng, J. Balachandran, P. Ganesh, C.A. Bridges, M. Paranthaman, Z. Bi, D. Gout, O. Gourdon

## 4:20 Concluding Remarks.

## Section E

Grand Hyatt San Francisco  
Sequoia

## Innovative Chemistry &amp; Materials for Electrochemical Energy Storage

## Anode Materials &amp; Li-S

*Cosponsored by MPPG<sup>2</sup> and PMSE*

Y. Mo, E. Pomerantseva, *Organizers*

J. Guo, *Organizer, Presiding*

## 1:30 Introductory Remarks.

**1:35 ENFL 414.** Design principles of non-graphitic carbon electrodes for energy storage. Z. Li, Z. Jian, C. Bomnier, P. Greaney, X. Ji

**2:05 ENFL 415.** Enhanced performance of high volumetric energy density sulfur cathode for Li-sulfur batteries. D. Lv, J. Liu, Q. Li, S. Chen, G. Graff, J. Zhang, J. Liu

**2:35 ENFL 416.** Boron doped fullerene based materials for electrochemical applications. P. Sood, K. Kim, S.S. Jang

**2:55 ENFL 417.** Electrospinning-assisted and self-assembled construction of hybrid SnO<sub>2</sub>-Co<sub>3</sub>O<sub>4</sub> nanotubes for greater lithium storage properties. J. Zhang

**3:15 ENFL 418.** High-performance Ge microwire Li-ion battery anodes as prepared by the electrochemical liquid-liquid-solid deposition process at T = 80 °C. L. Ma, E. Fahrenkrug, E. Gerber, A. Crowe, F.A. Venable, B.M. Bartlett, S. Maldonado

## 3:35 Intermission.

**3:45 ENFL 419.** Discrete nanographene encapsulated Si nanoparticles and their properties as Li-ion battery anode. B. Li, D. Zhao, C. Niu

**4:05 ENFL 420.** Rational design of silicon nanolayer embedded microporous carbon micro-cages for high energy and power lithium-ion batteries. Y. Son, J. Ma, J. Cho

**4:25 ENFL 421.** Overcoming micro-silicon particle fracture within graphene cages for stable battery anodes. Y. Li, Y. Cui

**4:45 ENFL 422.** Edge plane-activated graphite/Si composite for lithium ion battery anodes: Toward fast charge capabilities at high energy density electrodes. J. Cho, N. Kim

**5:05 ENFL 423.** Low-cost tire-derived carbon/metal oxide composite electrodes for improved high-capacity lithium-ion battery anodes. Y. Li, A.M. Levine, R. Lee, K. Akato, A.K. Naskar, S. Dai, M. Paranthaman

## Section F

Grand Hyatt San Francisco  
Cypress

## Biomass &amp; Biofuel Processing

*Cosponsored by CELL, MPPG<sup>2</sup> and WCC*

J. Fu, S. Turn, *Organizers, Presiding*

## 1:30 Introductory Remarks.

**1:35 ENFL 424.** Operational issues using biomass-derived feedstocks in a Davison circulating riser. J. Olstad, M. Jarvis, Y. Parent, K.A. Magrini

**1:55 ENFL 425.** Potential applications of alkali metal sorbents (Li<sub>2</sub>ZrO<sub>3</sub>, Li<sub>2</sub>SiO<sub>3</sub>, and Na<sub>2</sub>ZrO<sub>3</sub>) as bifunctional material for biomass gasification. M.H. Memon, M. Zhao

**2:15 ENFL 426.** Novel alkaline thermal treatment of biomass for hydrogen production with carbon capture and storage potential. A.A. Park, M. Stonor, J.G. Chen

**2:35 ENFL 427.** Reversibility of the reaction catalyzed by the molybdenum-containing formate dehydrogenase from *Cupriavidus necator* (*Ralstonia eutropha*). X. Yu, D. Niks, R. Hille, A.K. Mulchandani

## 2:55 Intermission.

**3:10 ENFL 428.** Role of materials derived from biodiesel production on cold flow properties of model biodiesel. M. Senra, L. Soh, R. Elias, S. McCartney

**3:30 ENFL 429.** Homogeneous catalytic biodiesel production from wet spent coffee grounds by integrating lipid extraction and conversion. J. Park, B. Kim, J.W. Lee

**3:50 ENFL 430.** Combined production of levulinic acid and sulfonated carbon from glucose in one-pot reaction. S. Kang, G. Zhang, F. Qin, X. Fu, H. Yin, Y. Xu

## Light-Driven Chemistry: Photoelectrochemistry &amp; Photocatalysis

## Devices, Assemblies &amp; Hybrid Processes

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## THURSDAY MORNING

## Section A

Grand Hyatt San Francisco  
Belvedere

**Advances in Chemistry of Energy & Fuels**
**Fuels & Lubricants**

D. J. Heldebrant, *Organizer*

A. Padmaperuma, *Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 431.** Composition-property relationships of hydrocarbon fuels based on GC×GC-MS/FID. X. Shi, G. Liu, X. Zhang, L. Wang, G. Li

**8:55 ENFL 432.** Characterization of petroleum using borate fusion and ICP-OES analyses. J. Anzelmo, P. Daigle, J. Pitre

**9:15 ENFL 433.** Correlating crude oil and kerogen properties to asphaltene fractions using infrared spectroscopy and chemometrics. R. F. Dias, J. E. Birdwell

**9:35 ENFL 434.** Contribution to the total acid number of petroleum phenols and its response in electrospay mass spectrometry analysis. M. Hu, C. Xu, Q. Shi

**9:55 ENFL 435.** Molecular composition analysis of lubricant base oils by using RICO redox derivatization followed by ESI FT-ICR MS. S. Ma, C. S. Hsu, Y. Zhou, Q. Shi

**10:15** Intermission.

**10:25 ENFL 436.** Computer-aid gasoline molecular composition reconstruction on the basis of GC-FID data. C. Cui, L. Zhang, Q. Shi, S. Zhao

**10:45 ENFL 437.** Multiobjective feature selection approach to Quantitative Structure Property Relationship (QSPR) for predicting the octane number of compounds found in gasoline. Z. Liu, L. Zhang, A. Elkamel, S. Zhao, C. Xu

**11:05 ENFL 438.** Developing a high- and low-cetane classifier for biologically produced chemicals using variable quality training data. L. S. Whitmore, R. L. McCormick, R. W. Davis, J. M. Gladden, B. A. Simmons, A. George, C. Hudson

**11:25 ENFL 439.** Aluminum nanoparticles as energy additive of jet fuel: Synthesis, stability, ignition, and propulsion performance. X. E. J. Zou, X. Zhang

**11:45 ENFL 440.** Understanding and characterization of 100 low lead aviation fuels for general aviation. C. Huang

**12:05** Concluding Remarks.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## Section B

Grand Hyatt San Francisco  
Union Square

**Functional Porous Materials for Sustainable Energy**

*Cosponsored by CATL and MPPG<sup>†</sup>*

R. Motkuri, S. Shanmugam, *Organizers*

N. L. Rosi, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 441.** Linker engineering on metal-organic frameworks as a platform for sustainable catalysis. W. Huang, L. M. Stanley, X. Li, R. Van Zeeland

**8:55 ENFL 442.** Investigating bulk-like vapor-liquid coexistence in microporous metal-organic frameworks via molecular simulations and NMR relaxometry. E. Braun, S. K. Schnell, J. A. Reimer, B. Smit

**9:10 ENFL 443.** Withdrawn.

**9:25 ENFL 444.** Adsorptive desulfurization over mesoporous materials. G. Liu, Y. Shi, X. Zhang

**9:40** Intermission.

**9:50 ENFL 445.** Porous metal-organic frameworks for Li-O<sub>2</sub> and Li-ion batteries. Y. Wang, Y. Zhao, Q. Li

**10:05 ENFL 446.** Synthesizing particulate carbon with controlled morphology. H. Ho, A. K. Naskar

**10:20 ENFL 447.** Cobalt-containing Porous Organic Polymer (POP) as precursor of new electrode catalyst for oxygen reduction reaction. Y. Yuan, D. Liu

**10:35 ENFL 448.** Synthesis and characterization of SBA-15 supported catalysts for styrene oxidation. S. Sharma, V. Chaudhary

**10:50** Concluding Remarks.

## Section C

Grand Hyatt San Francisco  
Sunset

**13th International Symposium on Heavy Oil Upgrading, Production & Characterization**

*Cosponsored by CATL*

C. Mesters, Y. Zhang, *Organizers*

J. J. Adams, *Organizer, Presiding*

Y. Zhang, *Presiding*

**8:30 ENFL 449.** Detailed characterization of vacuum residue through hydrotreatment and hydrocracking for marine fuel application. W. Weiss, I. Merdrignac, J. Barbier

**8:50 ENFL 450.** Study on the FCC process in a downer reactor. C. Zhang, W. Qian, F. Wei

**9:10 ENFL 451.** Development of functionalized polymers for the removal of nitrogen and sulfur compounds from bitumen-derived heavy gas oil. P. Misra, S. Badoga, A. Dalai, J. Adjaye

**9:30 ENFL 452.** Customized catalyst for MIP process to increase cleaner gasoline and propylene production. J. Gong, W. Jiang

**9:50 ENFL 453.** Acceleration of TiO<sub>2</sub>-catalyzed oil upgrading in microdroplets. Y. Lai, Z. Zhou, C. Basheer, R. Zare

**10:10** Intermission.

**10:25 ENFL 454.** High-resolution mapping of core and shale samples: Combination of laser-induced breakdown spectroscopy with infrared microscopy for advanced characterization. F. A. Lopez-Linares, D. Quarles, J. Gonzalez, T. Miao, L. Poirier

**10:45 ENFL 455.** Carbon dioxide storage in heavy oil reservoirs. B. Hascakir

**11:05** Concluding Remarks.

## Section D

Grand Hyatt San Francisco  
Curran

**Innovative Chemistry & Materials for Electrochemical Energy Storage**
**Electrochemical Catalysis & Energy Conversion**

*Cosponsored by MPPG<sup>†</sup> and PMSE*

Y. Mo, E. Pomerantseva, *Organizers*

J. Guo, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ENFL 456.** Construction and intelligent manipulation of nanocarbon composite electrodes toward energy storage and mechanical conversion devices. G. Wu

**8:55 ENFL 457.** Solar-driven water oxidation and decoupled hydrogen production mediated by an electron-coupled-proton buffer. L. Cronin

**9:15 ENFL 458.** Facile synthesis of 3D PtBi intermetallic nanoplates with highly catalytic activity toward methanol/ethanol oxidation. X. Yuan, Q. Zhang

**9:35 ENFL 459.** Series of ionomers and their SiO<sub>2</sub>-TiO<sub>2</sub> inorganic-organic nanocomposites for PEM fuel cells. F. Huang, T. D. Largier, B. Motealleh, C. J. Cornelius

**9:55** Intermission.

**10:05 ENFL 460.** Synthesis and characterization of Au-Ru core-branched nanoparticles for oxygen evolution reaction catalysts. L. Glog, S. Cheong, Y. Li, C. Zhao, J. Gooding, R. Tilley

**10:25 ENFL 461.** Valence- and element-dependent water oxidation behaviors: *In-situ* x-ray scattering, absorption and electrochemical impedance spectroscopies. H. Chen

**10:45 ENFL 462.** Sulfonated poly(phenylene)s/novel branched polysulfone-based polymer blend for PEM fuel cell. B. Motealleh, T. D. Largier, F. Huang, C. J. Cornelius

**11:05 ENFL 463.** High-performance flexible thermoelectric generator based on carbon nanotube yarn. J. Choi, Y. Jung, H. Kim, C. Park

## ENVR

**Division of Environmental Chemistry**

S. Obare and S. Al-Abed, *Program Chairs*

## OTHER SYMPOSIA OF INTEREST:

**ACS-CEI Award for Incorporating Sustainability into Chemistry Education** (see CHED, Mon)

**Perspectives on Climate Change Literacy & Education: Local to International** (see CHED, Tue)

**Environmental Challenges & Solutions in Unconventional Oil & Gas Development** (see GEOC, Wed, Thu)

**Elucidation of Mechanisms & Kinetics on Surfaces** (see CATL, Sun, Mon, Tue, Wed, Thu)

**Mineral-Water Interface Chemistry: A Tribute to Glenn Waychunas** (see GEOC, Sun, Mon, Tue, Wed)

**Chemistry & Physical Chemistry of Thermal Processes for the Circular Carbon Economy** (see CELL, Mon)

## SOCIAL EVENTS:

**Reception**, 6:00 PM: Tue

**Breakfast**, 7:45 AM: Mon

## BUSINESS MEETINGS:

**Program Planning Committee Meeting**, 2:00 PM: Sun

**Long Range Planning Committee Meeting**, 3:00 PM: Sun

**Executive Committee Meeting**, 7:00 PM: Sun

## SUNDAY MORNING

## Section A

San Francisco Marriott Marquis  
Salons 10/11

## Tribute to Jerry Schnoor

J. G. Burken, D. M. Cwiertyny, C. L. Just, *Organizers, Presiding*

**8:30 ENVR 1.** Climate change adaptation for infrastructure: A grand challenge for civil and environmental engineering. D. A. Dzombak, C. Samaras

**9:00 ENVR 2.** Mechanisms governing algal mitigation of atmospheric CO<sub>2</sub> in shallow saline lakes of the Chilean Altiplano region. A. L. Prieto, A. de la Fuente

**9:20 ENVR 3.** Substrate specificity of kinetic isotope effects associated with the dioxygenation of (nitro)aromatic contaminants is due to uncoupling of O<sub>2</sub> activation. S. G. Pati, H. E. Kohler, A. Pabis, P. Paneth, R. E. Parales, T. B. Hofstetter

**9:40 ENVR 4.** Carbon and nitrogen isotope fractionation reveals the biodegradation of 2,4-dinitroanisole. T. B. Hofstetter, J. Bolotin, M. Palatucci, J. C. Spain

**10:00** Intermission.

**10:15 ENVR 5.** From phytoremediation to nanotechnology: A tribute to Jerald Schnoor. J. L. Gardea-Torresdey

**10:45 ENVR 6.** Nanoparticle surface affinity as a predictor of trophic transfer. N. Geitner, S. Marinakos, C. Guo, N. O'Brien, M. Wiesner

<sup>†</sup>Cooperative Cosponsorship

**11:05 ENVR 7.** Impact of cerium oxide nanoparticles on the uptake and accumulation of cadmium in soybean (*Glycine max L.*). X. Ma, L. Rossi, P. Schwab

## Section B

San Francisco Marriott Marquis  
Salons 12/13

### Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

#### Oxidation Processes

Financially supported by Sciex China

D. D. Dionysiou, J. Fang, *Organizers*

V. K. Sharma, *Organizer, Presiding*

A. T. Stone, *Presiding*

#### 8:30 Introductory Remarks.

**8:40 ENVR 8.** Bi<sub>2</sub>WO<sub>6</sub>-graphene nanocomposites with laminar structure for environmental remediation. B. Ren, M. Nadagouda, D.D. Dionysiou

**9:05 ENVR 9.** Photocatalytic inactivation mechanisms of bacteria as well as the decomposition of Antibiotic-Resistance Genes (ARG). G. Li, H. Yin, Q. Jiang, T. An

**9:30 ENVR 10.** Activation of peroxides by phosphate ion for water purification. Y. Yang, J. Kim, J.J. Pignatello

**9:50 ENVR 11.** Degradation of the typical macrolide antibiotic roxithromycin by UV/H<sub>2</sub>O<sub>2</sub>: Reaction kinetics and degradation byproducts. W. Li, X. Xu, Y. Tang, Y. Zhang

#### 10:10 Intermission.

**10:25 ENVR 12.** Overlooked oxidation states of chemical elements in treatment plants and the environment: Interconnections between speciation and reactivity. A.T. Stone, X. Xia, W. Liao

**10:50 ENVR 13.** Catalytic ozonation processes not relying on hydroxyl radical oxidation. T. Zhang

**11:15 ENVR 14.** Role of the propagation reactions on the hydroxyl radical formation in the ozonation and catalytic ozonation of real waters. Y. Liu, J. Ma, J. Jiang, L. Zhang

**11:35 ENVR 15.** Reaction kinetics and degradation pathway of antipyrine during chlorine dioxide disinfection process. X. Jia, L. Zhang, L. Feng, Y. Liu

## Section C

San Francisco Marriott Marquis  
Salons 14/15

### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

Cosponsored by CHED

Financially supported by AEESP

M. J. McGuire, F. L. Rosario, *Organizers*

J. A. Pedersen, *Organizer, Presiding*

#### 8:00 Introductory Remarks.

**8:10 ENVR 16.** Three decades of research at CIRSEE Suez on taste and odor in drinking water, under the umbrella of Prof. I.H. Mel Suffet. A.L. Bruchet

**8:35 ENVR 17.** Estimates of threshold, recognition and objection concentrations for crude 4-methylcyclohexanol and methyl t-butyl ether in water. M.J. McGuire, I.H. Suffet

**9:00 ENVR 18.** Chemical spill of crude MCHM into the Elk River. J. Rosen

**9:25 ENVR 19.** From Philly to smell A - tracking, measuring, and controlling non-H2S odor nuisances. J. Witherspoon, S. Cowden, I.H. Suffet

**9:50 ENVR 20.** Importance of sensory analysis and odor activity values in the determination of odorants causing nuisance in the wastewater treatment process. T. Vitko, Y. Zhou, I.H. Suffet

#### 10:15 Intermission.

**10:30 ENVR 21.** Determination of the primary odor nuisances from wastewater treatment plants. Y. Zhou, T. Vitko, I.H. Suffet

**10:55 ENVR 22.** Occurrence and fate of sensory compounds in water reuse. S.W. Krasner, A. Jia, C. Lee, T.R. Slifko

**11:20 ENVR 23.** Two phase interactions: A lynchpin of environmental chemistry. I.H. Suffet

## Section D

San Francisco Marriott Marquis  
Golden Gate C1

### Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer

Y. Chin, *Organizer*

D. M. McKnight, *Organizer, Presiding*

#### 8:00 Introductory Remarks.

**8:10 ENVR 24.** In defense of DOM molecular models. J. Leenheer

**8:45 ENVR 25.** Investigation of the effect of solvent polarity and temperature on the optical properties of dissolved organic matter. J.A. Korak, G. McKay, P.R. Erickson, D.E. Latch, K.P. McNeill, G. Aiken, F.L. Rosario

**9:10 ENVR 26.** Carbon tracing: Environmental applications of wet oxidation total organic carbon cavity ring-down spectroscopy. C. Conaway

**9:35 ENVR 27.** High resolution mass spectrometry of leachate from soils subject to simulated wildfire heating. J. Webster, R. Young, T. Borch, F.L. Rosario

#### 10:00 Intermission.

**10:10 ENVR 28.** Using the reverse osmosis/electrodialysis method to isolate natural organic matter from rivers and estuaries in coastal Georgia. E.M. Perdue, S. Driver

**10:45 ENVR 29.** Isolation of Dissolved Organic Matter (DOM) with XAD resins: Early studies. E.M. Thurman

**11:10 ENVR 30.** Classification analysis of humic substances fractionated using size exclusion chromatography based on numerical descriptors generated from the data of Fourier transform mass spectrometry. I.V. Perminova, A.V. Kudryavtsev, M. Kazachkov, A. Konstantinov, E. Belyaeva, A. Gaspar, P. Schmitt-Kopplin, G. Abbt-Braun, F. Frimmel

**11:35 ENVR 31.** Dependence of reduced sulfur in Everglades dissolved organic matter on sulfate enrichment. B. Poulin, J.N. Ryan, K.L. Nagy, T. Dittmar, A. Stubbins, W. Orem, D.P. Krabbenhoft, G. Aiken

## Section E

San Francisco Marriott Marquis  
Sierra A

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEESP

D. D. Dionysiou, X. He, K. E. O'Shea, X. Quan, *Organizers*

G. Li Puma, D. Minakata, *Organizers, Presiding*

#### 8:00 Introductory Remarks.

**8:05 ENVR 32.** Molecular modeling of aqueous radical chemistry: Estimating chemical properties and elucidating reaction pathways. J. Arey, P. Tentscher, J.J. Guerard, D. Trogolo

**8:40 ENVR 33.** Linking treatment to toxicology - Screening for toxic transformation products formed during oxidative treatment of organic contaminants. C. Prasse, B. Drew-Ford, D. Nomura, D.L. Sedlak

**9:05 ENVR 34.** Effect of solution conditions on reactive oxidant production during chlorine photolysis. D. Manley, C.K. Remucal

**9:30 ENVR 35.** Enhancing photocatalytic degradation of the cyanotoxins microcystin-LR and nodularin with the addition of sulfate-radical producing oxidants. M.G. Antoniou, I. Boraie, D.K. Pantelide, M. Abhishek, C. Edwards, L. Lawton

#### 9:55 Intermission.

**10:10 ENVR 36.** Mechanistic insight into reactivity of chlorinated radicals in UV/chlorine advanced oxidation system. D. Minakata, D. Kamath, S. Maetzold, D. Perram

**10:45 ENVR 37.** Ag/AgCl @ chiral TiO<sub>2</sub> nanofibers plasmonic photocatalyst for removal of contaminants of emerging concern in simulated and urban wastewater. G. Li Puma, D. Wang, Y. Li

**11:10 ENVR 38.** Impact of halides on the degradation of amino acid residues in biomolecules. Y. Komaki, J. Choe, W. Mitch

**11:35 ENVR 39.** Investigation of radical chloramine reaction kinetics and thermodynamics under advanced oxidation processes. J. Gleason, S.P. Mezyk, K.P. Ishida

## Section F

San Francisco Marriott Marquis  
Sierra B

### Contaminants of Emerging Concern in Natural & Engineered Systems

Cosponsored by AGRO, ANYL and CEI

L. M. Blaney, A. J. Hernandez, *Organizers, Presiding*

#### 8:30 Introductory Remarks.

**8:35 ENVR 40.** Mineral-catalyzed hydrolysis of organophosphorus flame retardants - a potential major fate-controlling sink in soil and aquatic environments. Y. Fang, E. Kim, T.J. Strathmann

**8:55 ENVR 41.** Drug co-binding at mineral surfaces. J. Xu, R. Marsac, D. Costa, J. Boily, F. Wu, K. Hanna

**9:15 ENVR 42.** Discrete molecular dynamics to screen for co-contaminant risk potential of nanomaterials in agriculture. N. Geitner, M. Wiesner

**9:35 ENVR 43.** Molecular dynamics simulation and experimental study of the adsorption of phthalate esters on clay surfaces. J. Willemsen, I.C. Bourg

#### 9:55 Intermission.

**10:15 ENVR 44.** Fixed-bed adsorption of contaminants of emerging concern from water using Cu<sup>2+</sup> amino grafted SBA-15. K. Ortiz-Martinez, F. Roman, A.J. Hernandez

**10:35 ENVR 45.** Development of pH-responsive block copolymers membranes reinforced with nanocellulose for the adsorption of emerging contaminants. J. Herrera, L. Rivera, E.O. Ortiz Quiles, E. Nicolau

#### 10:55 ENVR 46. Withdrawn.

#### 11:15 ENVR 47. Withdrawn.

**11:35 ENVR 48.** Simultaneous removal of multiple contaminants of emerging concern via biofiltration. K. Greenstein, J. Lew, E. Dickenson, E. Wert

#### 11:55 Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Sierra C

### Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation

Cosponsored by ANYL

T. Anumol, R. Marfil-Vega, T. M. Young, *Organizers, Presiding*

**8:00 ENVR 49.** Identification of known, suspected, and unknown contaminants by nontarget analysis of Polar Organic Chemical Integrating Sampler (POCIS) extracts. E.T. Furlong, L.K. Kanagy, W.T. Foreman, D.A. Alvarez

**8:25 ENVR 50.** Broad-scope screening for organic contaminants in wastewater at the sub-sewershed scale to identify source contributions. J. Teerlink, C. Alaimo, T.M. Young

**8:50 ENVR 51.** Organic contaminants monitoring during water treatments by UHPLC-HRAM: From influent to effluents. D.D. Yang, T. Anumol

**9:15 ENVR 52.** When does a GAC filter become a biofilter for removing seasonal trace organics? Application of LC/QTOF analysis to evaluate (bio-) filter performance. R. Marfil-Vega, M. Surmeier, O. Schneider, E. Dickenson

**9:40 ENVR 53.** Non-targeted analysis reveals a novel bacterial metabolite of pyrene implicated in genotoxicity of bioremediated soil. Z. Tian, A. Gold, J. Nakamura, Z. Zhang, J. Vila, D. Singleton, L. Collins, M. Aitken

#### 10:05 Intermission.

**10:20 ENVR 54.** LC/Q-TOF-MS for the identification of environmental metabolites and degradation products. I. Ferrer, E.M. Thurman, J. Zweigenbaum

**10:45 ENVR 55.** Identifying Poly- and Perfluoroalkyl Substances (PFAS) transformation products in a wastewater treatment plant. E. Houtz, M. Wang, W. Duong, J. Park

**11:10 ENVR 56.** Quantitative comparison of perfluorinated organic compounds in drinking water between tandem triple quadrupole MS/MS and high resolution mass spectrometry using orbitrap technology-knowns and unknowns. E. George

**11:35 ENVR 57.** Comprehensive targeted and untargeted analysis of Per- and Polyfluoroalkyl Substances (PFASs) in Australian Wastewater and recycled water. **T. Coggan, T. Anumol, B. Clarke**

## Section H

San Francisco Marriott Marquis  
Sierra J

### Green Chemistry & the Environment

*Cosponsored by CEI*

*Financially supported by AEESP*

A. M. Balu, R. Luque, *Organizers*

S. O. Obare, *Organizer, Presiding*

T. Dittrich, D. Vardon, *Presiding*

**8:00** Introductory Remarks.

**8:05 ENVR 58.** Orientation of organic synthesis in water. **C. Len**

**8:40 ENVR 59.** Purification of environmental contaminants from post combustion carbon capture solvents. **S. Bhatnagar, J. Thompson, F. Onneweer, M. Combs, K. Abad, H. Nikolic, K. Liu**

**9:00 ENVR 60.** Bio-based  $\gamma$ -valerolactone and furfuryl alcohol as novel reaction media. **L. Vaccaro, S. Santoro**

**9:20 ENVR 61.** Bimetallic Ru-Sn/AC for the aqueous phase catalytic conversion of microbial acids to alcohols. **D. Vardon, A. Settle, T. Eaton, V. Vorotnikov, G. Beckham**

**9:40** Intermission.

**9:55 ENVR 62.** Measurement of heterocyclic aromatic amines as tracers of anthropogenic contributions to fine particulate matter. **D. Thai, J. Miller-Schulze, A. Lai, M.R. Olson, J.J. Schauer**

**10:15 ENVR 63.** Microwave-induced target oriented synthesis of curcumin-pyrazole derivatives: Potentially important for neuroprotective properties in Alzheimer's disease. **B. Dayal, B. Patel**

**10:35 ENVR 64.** Inorganic-organic microcapsule emulsion for surface and air disinfections. **W. Han, Y. Lai, Q. Chang, H. Leung, Y. Li, Y. Yang, C. Wu, K. Yeung, J. Kwan, C. Chao, Z. Yang**

**10:55 ENVR 65.** Fe-assisted hydrothermal liquefaction of oil palm empty fruit bunch to bio-oil. **Y. Miyata, K. Sagata, M. Hirose, Y. Yamazaki, A. Nishimura, N. Okuda, Y. Arita, Y. Hirano, Y. Kita**

**11:15 ENVR 66.** Kinetic study on the adsorption of humic acid fractions onto clay minerals. **M. ElSayed, M. Khalaf, J. Rice**

**11:35 ENVR 67.** Formation of metal-humate complexes in sediments and environmental impact of heavy metal adsorption in the presence of humic acids. **J. Hizal Yücesoy, R. Apak**

## Section I

San Francisco Marriott Marquis  
Sierra K

### Have Great Lakes Restoration Programs Been Successful? The Case of Legacy & Emerging Pollutants

J. J. Pagano, *Organizer*

K. C. Hornbuckle, *Organizer, Presiding*

**8:00 ENVR 68.** Trends of legacy and emerging contaminants in the Great Lakes based on passive sampling of air and water. **R. Lohmann, C. McDonough, Y. Liu, M. Khairy, P.A. Helm, D.C. Muir**

**8:30 ENVR 69.** Organophosphate flame retardants in the lower Great Lakes: Spatial distribution and air-water exchange. **C.A. McDonough, P.A. Helm, D. Muir, R. Lohmann**

**8:50 ENVR 70.** Spatial and temporal trends of particle phase organophosphate ester concentrations in the atmosphere of the Great Lakes. **A. Salamova, A. Pevery, M. Venier, R.A. Hites**

**9:10 ENVR 71.** Pharmaceuticals and personal care product chemicals in waters and fish in a Great Lakes urban wetland. **D.C. Muir, X. Wang, D. Simmons, J. Sherry**

**9:30 ENVR 72.** GLFMSP Legacy and emerging chemical trends. **B.S. Crimmins, S. Fernando, C. Zhou, H. Zhou, S. Fakouri Baygi, B. Parvizian, P.K. Hopke, T. Holsen, J.J. Pagano, M. Milligan**

**9:50** Intermission.

**10:00 ENVR 73.** How do we reduce chemicals of concern in the Great Lakes after picking the low hanging fruit? **M.L. Diamond, P.A. Helm, L. Jantunen, D. McGoldrick, J. Truong, A. Soehl**

**10:20 ENVR 74.** Concentration trends and elimination rates for polychlorinated dioxins/furans, and dioxin-like polychlorinated biphenyls in Lake Ontario salmonid eggs: 2004-2015. **A.J. Garner, J.J. Pagano**

**10:40 ENVR 75.** Airborne PCBs and OH-PCBs inside and outside rural schools and urban schools near Lake Michigan. **R.F. Marek, A. Awad, N. Herkert, P.S. Thorne, K.C. Hornbuckle**

**11:00 ENVR 76.** Impact of waves on contaminant fate in Great Lakes beach environments. **D.M. O'Carroll, C. Robinson, S. Malott**

**11:20 ENVR 77.** Biomonitoring legacy and emerging Great Lakes contaminants in susceptible Great Lakes populations. **Z. Li, W. Wattigney, S. Naik, E. Irvin-Barnwell, A. Ragin-Wilson**

**11:40 ENVR 78.** GLRI success: Educating government and business towards reducing PBDEs and other chemicals of concern in the Great Lakes and beyond. **A. Blum, M.L. Diamond, G. Peaslee, A. Soehl**

## Mineral-Water Interface Chemistry

### A Tribute to Glenn Waychunas

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

*Sponsored by PROF, Cosponsored by ANYL<sup>+</sup>, BIOL<sup>+</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>+</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>+</sup>, POLY, PRES<sup>+</sup> and WCC*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Theory

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## SUNDAY AFTERNOON

### Section A

San Francisco Marriott Marquis  
Salons 10/11

### Tribute to Jerry Schnoor

J. G. Burken, D. M. Cwiertny, C. L. Just, *Organizers, Presiding*

**1:30 ENVR 79.** My academic journey with electron transfer on Fe minerals and my U. Iowa colleague, Jerry Schnoor. **M. Scherer, L.N. Andrade, Z. Zhou, J.D. Culpepper, D. Latta**

**2:00 ENVR 80.** Modeling adsorption of copper on goethite in natural water systems: Effect of solution chemistry. **J. Han, S.M. Nomaan, L.E. Katz**

**2:20 ENVR 81.** Adsorption, aggregation, and morphological transformation of graphene and graphene oxide with binding pollutants in water. **B. Chen, K. Yang, W. Jun, X. Zhu**

**2:40 ENVR 82.** Advancing materials and reactor design for catalytic technologies for treatment of nitrate-contaminated water. **T.J. Strathmann, C.J. Werth, A. Bergquist, X. Huo**

**3:00** Intermission.

**3:15 ENVR 83.** Environmental applications of nanoparticle-enabled sensing. **P.J. Vikesland, H. Wei, W. Leng, V.R. Breazal, M. Willner**

**3:45 ENVR 84.** Formation and properties of iron(III)-precipitates and their effects on the distribution and fate of phosphorus and arsenic in rice fields and in water treatment. **S.J. Hug, A.C. Senn, R. Kaegi, A. Voegelin**

**4:05 ENVR 85.** Comparison of trace compound migration through a natural aquifer sand. **P. Behra**

### Section B

San Francisco Marriott Marquis  
Salons 12/13

### Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

### Iron & Manganese Chemistry

*Financially supported by Sciex China*

D. D. Dionysiou, J. Fang, V. K. Sharma, *Organizers*

D. A. Reckhow, T. Zhang, *Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 86.** Iron(III)-based metal organic frameworks as heterogeneous Fenton-like catalysts for organic pollutant degradation. **C. Gao, X. Guan**

**2:00 ENVR 87.** Activation of manganese oxidants with bisulfite for enhanced oxidation of organic contaminants: The involvement of Mn(III). **X. Guan**

**2:25 ENVR 88.** Role of dissolved Mn(III) in transformation of organic contaminants: Non-oxidative versus oxidative mechanisms. **E. Hu, F. He**

**2:45 ENVR 89.** Cd(II) removal by manganese dioxide formed in situ from permanganate by thiosulfate: Influence of permanganate: Thiosulfate molar ratio. **P. Wang, J. Jiang, J. Ma, H. Cheng, Z. Huang, B. Jia**

**3:05** Intermission.

**3:20 ENVR 90.** Implementation of ferrate for drinking water treatment. **J.E. Tobiason, D.A. Reckhow, J. Goodwill, Y. Jiang, J. Cunningham, X. Mai**

**3:45 ENVR 91.** Synergetic effect of the oxidation of fluoroquinolone antibiotics by a combined use of ferrate(VI) and peroxymonosulfate. **M. Feng, Z. Wang, V.K. Sharma**

**4:10 ENVR 92.** Ferrate(VI) interactions with Natural Organic Matter (NOM) in drinking water treatment. **Y. Deng, Y. Liang, C. Li, T. Waite**

**4:35 ENVR 93.** Withdrawn.

## Section C

San Francisco Marriott Marquis  
Salons 14/15

### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

#### Physical & Chemical Processes

*Cosponsored by CHED*

*Financially supported by AEESP*

M. J. McGuire, J. A. Pedersen, *Organizers*

F. L. Rosario, *Organizer, Presiding*

**1:30 ENVR 94.** Granular activated carbon adsorption of specific organic compounds: A forty year retrospective of the 1979 National Academy of Science report. **R.S. Summers**

**1:55 ENVR 95.** Fate of contaminants of emerging concern and geosmin in GAC biofilters: The roles of sorption and biodegradation. **R.M. Hozalski, B. Ma, W. Arnold**

**2:20 ENVR 96.** Prediction of the adsorption capacities of organic pollutants on activated carbons in natural waters: Model development and validations. **T. Lin, W. Bunmahotama, W. Hung**

**2:45 ENVR 97.** Predicting adsorption isotherms from adsorbent and adsorbate properties. **D. Knappe, I. Mezzari, T. Speth**

**3:10** Intermission.

**3:25 ENVR 98.** Can GAC be used to control priority unregulated DBPs in drinking water? **S.D. Richardson, A.A. Cuthbertson, S.Y. Kimura, H.K. Liberatore, C. Joseph, D. Knappe, B.D. Stanford, R.S. Summers, E. Dickenson**

**3:50 ENVR 99.** Mn(II) oxidation in Fenton and Fenton-type systems: Identification of reaction efficiency and reaction products. **J. Pena, C.M. Van Gucht**

**4:15 ENVR 100.** Sequential manganese desorption-Adsorption in anthracite coal and silica sand filter media. **C.J. Gabelich, F. Gerringer, C. Chou**

**4:40 ENVR 101.** Treating ion-exchange waste brines with a reduction-coagulation-filtration process using ferrous chloride. **N. Homan, P.G. Green, T.M. Young**

**5:05 ENVR 102.** Ozone-derived NDMA in water reuse: Formation and mitigation. **E. Marti, J.R. Batista, E. Dickenson**

## Section D

San Francisco Marriott Marquis  
Golden Gate C1

### Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer

Y. Chin, D. M. McKnight, *Organizers*  
K. Cawley, *Presiding*

**1:30 ENVR 103.** X-ray Raman spectroscopy: An alternative approach for characterizing the carbon chemistry of organic matter. E.J. O'Loughlin, B. Mishra, W.T. Cooper, M. Tfaily, J. Jastrow, R.A. Gordon, M. Balasubramanian, K.M. Kemner

**2:05 ENVR 104.** Forces holding organic matter molecules together: Involvement of exceptionally strong hydrogen bonds. J.J. Pignatello, J. Ni

**2:30 ENVR 105.** Petroleum as a surrogate to unlock the compositional and structural continuum of dissolved organic matter. D.C. Podgorsek, P. Zito, M.A. Tarr, R.G. Spencer

**2:55 ENVR 106.** Electrochemical characterization of natural organic matter and its role as an electron transfer mediator in biogeochemical process. P.G. Tratnyek, A.S. Pavitt, J.T. Nurmi

**3:20** Intermission.

**3:30 ENVR 107.** Reactivity of natural organic matter determined by electrospray ionization coupled to Fourier transform ion cyclotron resonance mass spectrometry. P.G. Hatcher

**4:05 ENVR 108.** Withdrawn.

**4:30 ENVR 109.** PARAFAC analysis of irradiation- and oxidation-induced changes in fluorescent dissolved organic matter extracted from poultry litter. K. Mangalgiri, S. Timko, M. Gonsior, L.M. Blaney

**4:55 ENVR 110.** Characterization of organic matter in wastewater from unconventional oil and gas production. W.H. Orem, M. Varonka, A. Bates, T. Schell, M. Engle

**5:20** Concluding Remarks.

## Section E

San Francisco Marriott Marquis  
Sierra A

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

*Financially supported by AEESP*

D. D. Dionysiou, G. Li Puma, D. Minakata, K. E. O'Shea, *Organizers*

X. He, X. Quan, *Organizers, Presiding*

**1:30 ENVR 111.** Ozone regeneration of GAC for prolonged adsorption of brominated THMs. X. He, M. Elkouz, M. Inyang, E. Dickenson, E. Wert

**2:05 ENVR 112.** Development of a computer-based prediction platform for transformation products during ozonation of micropollutants: Kinetics and mechanisms. M. Lee, L. Blum, E. Schmid, K. Fenner, U. von Gunten

**2:30 ENVR 113.** Ozonation of substituted phenolic model compounds: Yields and toxicology of *p*-benzoquinones and polyphenols. P.R. Tentscher, B. Escher, N. Bramaz, K. Schirmer, M. Bourgin, U. von Gunten

**2:55 ENVR 114.** Synergy during the oxidative degradation of organics using ozone combined a carbon nanotube electrochemical filter. B.M. Chaves, M.W. Dezotti, C.D. Vecitis

**3:20** Intermission.

**3:35 ENVR 115.** Mineralization as a mechanism for TOC removal: Study of ozone/ozone-peroxide oxidation using FT-IR. S.A. Carr

**4:00 ENVR 116.** Comparison of the kinetics of the UV/chlorine and the UV/H<sub>2</sub>O<sub>2</sub> processes in the degradation of PPCPs in simulated water and real water. K. Guo, Z. Wu, B. Yao, W. Song, C. Shang, J. Fang

**4:25 ENVR 117.** Chloramine chemistry in AOP treated wastewaters. L. Twaigt, S.P. Mezyk, K.P. Ishida

**4:50 ENVR 118.** Impact of the UV photolysis of monochloramine on 1,4-dioxane removal: New insights into potable water reuse. S.D. Patton, W. Li, K.D. Couch, S.P. Mezyk, H. Liu

## Section F

San Francisco Marriott Marquis  
Sierra B

### Contaminants of Emerging Concern in Natural & Engineered Systems

*Cosponsored by AGRO, ANYL and CEI*

L. M. Blaney, A. J. Hernandez, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 119.** Using fluorescent dissolved organic matter and contaminants of emerging concern to identify leaking wastewater collection systems. K. He, N. Rogers, L.M. Blaney

**1:55 ENVR 120.** Transport and transformation of pharmaceuticals and other contaminants of emerging concern from wastewater discharge through surface water to drinking water intake and treatment. E.T. Furlong, S.T. Glassmeyer, D.W. Kolpin, M. Mills, M. Zimmerman, T. Jones-Lepp, M. Waldron

**2:15 ENVR 121.** Contaminants of emerging concern in Portuguese rivers. A.R. Ribeiro, J. Sousa, M. Barbosa, M.R. Pereira, A.M. Silva

**2:35 ENVR 122.** Estimating the Seattle, WA legal recreational cannabis market share using wastewater-based epidemiology. D.A. Burgard, J.R. Williams, C.J. Banta-Green

**2:55 ENVR 123.** Use of chemical fate & transport research in environmental risk assessment. E.M. Wong, E.L. Libelo, M. Titcombe Lee

**3:15** Intermission.

**3:35 ENVR 124.** Bioaccumulation and estrogenicity of hormones and UV-filters in *Procambarus clarkii*. K. He, A. Timm, L.M. Blaney

**3:55 ENVR 125.** Mixtures of contaminants of emerging concern commonly detected in Great Lakes tributaries reduce reproductive potential in wild and laboratory exposed fishes. H.L. Schoenfuss, L.C. Wang, Z.G. Jorgenson, S.J. Choy, J. Banda, D.J. Gefell, M. Annis, W. Tucker, S.M. Elliott, M.E. Brigham

**4:15 ENVR 126.** Spatio-temporal occurrence, bioaccumulation, and trophic transfer of select contaminants of emerging concern in a semi-arid river influenced by snow-melt. S. Haddad, C. Scott, B. Burket, S. James, G. Saari, L. Kristofco, K. Chambliss, M. Luers, C. Rogers, B.W. Brooks

**4:35 ENVR 127.** Evaluating the impacts of metformin and mixtures of other dominant contaminants of emerging concern in Milwaukee Estuary and Lake Michigan. R. Klaper, J. Crago, N. Niemuth

**4:55 ENVR 128.** Application of water cooling towers for monitoring environmental releases of tritium. R. Brigmon, D. Kaplan, C. Milliken, T. Jannik, H.A. Brant, B. Viner

**5:15** Concluding Remarks.

### Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation

*Cosponsored by ANYL*

T. Anumol, R. Marfil-Vega, T. M. Young, *Organizers, Presiding*

**1:30 ENVR 129.** Unknown microcystin screening using LC-MS/MS, triggered information dependent acquisition, and confirmation by Q-TOF analysis with Personal Compound Database and Library. R.A. Trenholm, B. Vanderford

**1:55 ENVR 130.** Expanding targets of UPLC-ToF-MS metabolomics and <sup>15</sup>N labeling in Cyanobacterial Harmful Algal Bloom (CHAB) research: Microcystins and beyond. W.K. Strangman, A. Stewart, J.L. Wright

**2:45 ENVR 131.** Method development of a 2D LC HRMS extraction and detection method for organophosphorus flame retardants in environmental water samples. L. Mullin, M. Mella, C. Mallet, D. Stevens, I. Ericston Jogsten, G. Cleland

**3:10 ENVR 132.** Identification of emerging contaminants from the waste water influenced Tioga River using high resolution accurate mass LC/MS and statistical analysis. J. Zweigenbaum, T. Anumol, L. Kennedy

**3:35** Intermission.

**3:50 ENVR 133.** Comprehensive workflow for micropollutant identification and prioritization using HR/AM tandem mass spectrometry and cheminformatics. L. Ferguson, G.J. Getzinger

**4:15 ENVR 134.** Smart target method development for detection of antiviral compounds in aqueous environmental samples based on suspect screening and HRMS. D. Barcelo, B. Zonja, J. Guillen, M. Lopez de Alda

**4:40 ENVR 135.** LC-HRMS data combined with cluster analysis to compare wastewater treatment efficiency. J.E. Schollée, M. Bourgin, C.S. McArdell, J. Hollender

**5:05 ENVR 136.** Using the US EPA's CompTox Dashboard to support identification and screening of emerging organic contaminants in the environment. A. McEachran, J. Sobus, S. Newton, M. Strynar, A.J. Williams

## Integrated &amp; Sustainable Environmental Remediation

Cosponsored by CEI

S. K. Brar, R. Galvez, *Organizers*  
M. Cledon, *Organizer, Presiding*

1:30 Introductory Remarks.

1:35 ENVR **148**. Effect of synergistic interaction between Ce and Mn on the CO<sub>2</sub> capture of calcium-based sorbent: Textural properties, ability of donating electrons, and generation of oxygen vacancy. H. Guo, J. Feng, Y. Zhao, X. Ma, S. Wang

1:55 ENVR **149**. Chemical and adsorptive characterization of solids to capture greenhouse gases under standard conditions of temperature and pressure. B. Delgado, A. Avalos Ramirez, R. Lagacé, A. Giroir-Fendler, S. Godbout

2:15 ENVR **150**. Biodegradation of hexabromocyclododecane by *Rhodospseudomonas palustris* sp. R. Wang, T. Chang, Y. Peng, Y. Shih

2:35 ENVR **151**. Withdrawn.

2:55 ENVR **152**. Assessment of changes in ecotoxicity of dredged marine sediment by sediment treatments for TPH removal. K. Kim, G. Joo, B. Jeong, K. Nam, Y. Choi

3:15 Intermission.

3:30 ENVR **153**. Sediment contaminant accumulation in stormwater catchment basins: New implications for management guidelines. V. Craver, L. Schiffman, V. Kasaraneni, T. Boving

3:50 ENVR **154**. Advanced study of unconventional oil behaviour in regard to surface water oil spills. R. Galvez

4:10 ENVR **155**. Integrated municipal solid waste management: Renewable energy and activated carbons for leachate treatment. J.L. Goldfarb, C. Gopu

4:30 ENVR **156**. Removal of chlortetracycline from water using immobilized laccase onto adsorptive membrane. M. Taheran, M. Naghdi, S.K. Brar, E.J. Knystautas, M. Verma, R.Y. Surampalli, J.R. Valero

4:50 ENVR **157**. Electrochemical deposition for the recovery and separation of metals: A novel approach for reclaiming rare earth and specialty elements from industrial waste and processing streams. M. O'Connor, R. Coulthard, D. Plata

5:10 ENVR **158**. Withdrawn.

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG, ORGN and PROF

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Novel Reactions, Methodologies &amp; Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

## Mineral-Water Interface Chemistry

## A Tribute to Glenn Waychunas

Sponsored by GEOC, Cosponsored by COLL and ENVR

## Elucidation of Mechanisms &amp; Kinetics on Surfaces

## Surface Science

Sponsored by CATL, Cosponsored by COLL and ENVR

## MONDAY MORNING

## Section A

San Francisco Marriott Marquis  
Salons 10/11

## Tribute to Jerry Schnoor

J. G. Burken, D. M. Cwiertny, C. L. Just, *Organizers, Presiding*

8:00 ENVR **159**. Nanoparticle surface affinity as a predictor of nanoparticle fate, biouptake and trophic transfer. M. Wiesner, N. Geitner, A. Turner, N. O'Brien

8:30 ENVR **160**. Analytical and toxicological studies of emerging water disinfection byproducts halobenzoquinones. X. Li, W. Wang, J. Li, G. Huang, L. Blackstock-Jmaiff, I. Vander Meulen, J. Zhang

8:50 ENVR **161**. DLVO energy of interaction of macromolecule-coated silver nanoparticles. T. Zhu, D. Lawler

9:10 ENVR **162**. Waste acid as the energy source for desalination, softening and mechanical work. A.K. Sengupta, M. German

9:30 Intermission.

9:45 ENVR **163**. Phytorensic methods from the air: Hyperspectral Image (HSI) comparison of plant responses to energetics exposure and drought stress. P. Manley, A. Ghulam, Z. Yin, M.Y. Berezin, C.E. Johnson, J.G. Burken

10:15 ENVR **164**. Differential response of *Arabidopsis thaliana* to Polychlorinated Biphenyls (PCBs) and their hydroxylated metabolites (OH-PCBs). B. VanAken, S. Subramanian, J.L. Schnoor

10:35 ENVR **165**. Photolysis of 2,4-dinitroanisole and its metabolites in *Arabidopsis* leaves. H. Schroer, C.L. Just

10:55 ENVR **166**. Innovations in passive sampling for bioavailable contaminants in sediments. D.D. Reible, X. Shen, M. Rakowska, S. Yan

## Section B

San Francisco Marriott Marquis  
Salons 12/13

## Oxidation Processes, Nanoparticles &amp; Membranes in Water &amp; Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

## Advanced Oxidation Processes

Financially supported by Sciex China

D. D. Dionysiou, J. Fang, V. K. Sharma, *Organizers*

Y. Lee, W. Mitch, *Presiding*

8:00 Introductory Remarks.

8:05 ENVR **167**. Understanding chloramine-driven photochemistry for water reuse applications. H. Liu

8:30 ENVR **168**. Transformation of benzophenone-4 by chlorine, chloramine, and UV/chlorine. J. Lu, Y. Ji

8:50 ENVR **169**. Comparison of UV/free chlorine, UV/monochloramine, and UV/hydrogen peroxide advanced oxidation processes for contaminant degradation under scenarios relevant to potable reuse. Y. Chuang, W. Mitch

9:10 ENVR **170**. Investigation of the iopamidol degradation by UV/chlorine. X. Kong, J. Jiang, J. Ma, J. Fang

9:30 ENVR **171**. Reactive chlorine species significantly contributes to the degradation of trimethoprim in the UV/chlorine process. Z. Wu, K. Guo, C. Shang, J. Fang

9:50 Intermission.

10:05 ENVR **172**. Radical chemistry of the UV/chlorine process on the degradation of micropollutants in water treatment. J. Fang, K. Guo, Z. Wu, M. Pan, Z. Ren, C. Shang

10:30 ENVR **173**. Formation and conversion of sulfate radical and hydroxyl radical in UV/peroxymonosulfate system. Y. Guan, J. Ma

10:55 ENVR **174**. Degradation of chlorophenol by hydroxylamine and peroxymonosulfate. L. Chen, J. Zhang, P. Wang, Y. Huang, B. Wu

11:15 ENVR **175**. Kinetic study of hydroxyl and sulfate radical-mediated oxidation of pharmaceuticals in wastewater effluents. L. Lushi, B. Yao, S. Hou, J. Fang, S. Yan, W. Song

11:35 ENVR **176**. Denitration and renitration processes in sulfate radical-based oxidation of nitroaromatic compounds. Y. Ji

## Section C

San Francisco Marriott Marquis  
Salons 14/15

## Chemistry of Water Treatment from Sorption to Taste &amp; Odor: Symposium honoring the Contributions of Mel Suffet

## Physical &amp; Chemical Processes

Cosponsored by CHED

Financially supported by AEESP

J. A. Pedersen, F. L. Rosario, *Organizers*

M. J. McGuire, *Organizer, Presiding*

8:00 ENVR **177**. Efficient anaerobic membrane bioreactor treatment of municipal wastewater for energy and biosolids reduction. P. McCarty, J. Kim, C. Shin, J. Bae

8:25 ENVR **178**. Optimization of urban groundwater recharge systems that infiltrate combined stormwater and recycled water through surface spreading basins. J.L. Bradshaw, R.G. Luthy

8:50 ENVR **179**. Thermal air oxidation during biomass char formation and its effects on adsorption of organic compounds. J.J. Pignatello

9:15 ENVR **180**. Modeling organic contaminant sorption by biochar and activated carbon: Insights into concentration independent removal and isotherm curvature. K. Shimabuku, J. Paige, M. Luna Agüero, R.S. Summers

9:40 ENVR **181**. Advanced oxidation-driven transformation of Contaminant Candidate List (CCL<sub>2</sub>) compounds in drinking water. K. Linden, U. von Gunten, H. Mestankova, A.M. Parker, S. Canonica, K. Schirmer

10:05 Intermission.

10:20 ENVR **182**. Toxicity profiles and metastable disinfection byproducts. D.A. Reckhow, Y. Yu

10:45 ENVR **183**. Regeneration of strong base ion exchange resin for hexavalent chromium removal. J.A. Korak, M. Arias-Paic

11:10 ENVR **184**. Options for hydrogen sulfide remediation in complex water matrices. L.E. Schweitzer

11:35 ENVR **185**. Water disinfection: From laboratory bench to full scale. Where we are and where we need to go. C.N. Haas, B. Farouk, W. Wei

## Section D

San Francisco Marriott Marquis  
Golden Gate C1

## Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer

Y. Chin, D. M. McKnight, *Organizers*  
R. M. Cory, *Presiding*

8:00 Introductory Remarks.

8:10 ENVR **186**. What can simple measurements of DOM tell us when made in new ways? B. Bergamaschi

8:45 ENVR **187**. Characterization of dissolved organic matter during municipal wastewater treatment. C.K. Remucal, A. Maizel, S. Berg

9:10 ENVR **188**. Characterization of fluorescent DOM in textile dyeing wastewater. C. Cheng, J. Wu, B. Liu, J. Tang, K.M. Saleem

9:35 ENVR **189**. Reactivity towards N-Nitrosamines of bulk and trace organics of wastewater origin. P.K. Westerhoff, J. Rice, D. Hanigan, A. Dotson

10:00 Intermission.

10:10 ENVR **190**. National Ecological Observatory Network (NEON): Dissolved organic matter quantity and quality. K. Cawley

10:45 ENVR **191**. Relationships between microbial activity, nutrients, and organic matter chemistry in urban-impacted rivers. R.S. Gabor, R. Smith, J.F. Shah, P.D. Brooks

11:10 ENVR **192**. Concentration-discharge relationships during the recession of an extreme flood in the Boulder Creek Watershed: Patterns of lithologic solute concentrations contrast with decreases in concentration and changes in chemical quality of dissolved organic material. G. Rue, D.M. McKnight, N. Rock, R.S. Gabor, M. Tfaily

11:35 ENVR **193**. Pb and Hg mobilization by dissolved organic matter in an ombrotrophic peatland. J. Jeremiason, S.D. Sebestyen, E. Baumann, E. Seelen, A. Agather

‡ Cooperative Cosponsorship

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEEP

D. D. Dionysiou, X. He, G. Li Puma, D. Minakata, X. Quan, *Organizers*

K. E. O'Shea, *Organizer, Presiding*

A. Pintar, *Presiding*

**8:00 ENVR 194.** Improved electron-hole separation/migration in anatase TiO<sub>2</sub> nanotube/reduced graphene oxide composites for efficient photocatalytic degradation of bisphenol A. G. Zerjav, S. Arshad, P. Djinovic, I. Junkar, J. Kovac, J. Zavasnik, A. Pintar

**8:35 ENVR 195.** Nitrogen doped porous carbon with peroxymonosulfate activation capability for effective water treatment. G. Wang, X. Quan, S. Chen, H. Yu

**9:00 ENVR 196.** Post-illumination activity of SnO<sub>2</sub> nanoparticle-decorated Cu<sub>2</sub>O nanocubes by H<sub>2</sub>O<sub>2</sub> production in dark from photocatalytic memory. L. Liu, W. Sun, W. Yang, Q. Li, J. Shang

**9:25 ENVR 197.** Photocatalytic removal of triclosan and triclocarban by zinc oxide and nitrogen-doped reduced graphene oxide. M. Hwangbo, T. Alivio, Y. Shi, S. Banerjee, K. Chu

**9:50** Intermission.

**10:05 ENVR 198.** Efficient contaminant degradation by hydrogen peroxide activated graphite-supported Fe-TAML catalyst. Y. Chang, C. Miller, D. Waite

**10:30 ENVR 199.** Evaluations of biotrickling filters for the removal of mixtures of trihalomethanes under two environmental conditions. B. Mezgebe, G. Sorial, E. Sahle-Demessie

**10:55 ENVR 200.** Reactivity of trichloramine (NCl<sub>3</sub>) with amino acids prior to advanced oxidation process treatment. L. Watts, J. Gleason, S.P. Mezyk, K.P. Ishida

**11:20 ENVR 201.** Photocatalytic activity enhancement of ZnO thin films under visible light using Bi<sub>2</sub>O<sub>3</sub> dots. J.C. Medina, N.S. Portillo-Veléz, M. Bizarro, A. Hernández-Gordillo, S.E. Rodil

## Section F

San Francisco Marriott Marquis

### Contaminants of Emerging Concern in Natural & Engineered Systems

Cosponsored by AGRO, ANYL and CEI

L. M. Blaney, A. J. Hernandez, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 ENVR 202.** Role of Mn-oxide controlling the pathways of glyphosate degradation. H. Li, D. Jaisi

**8:55 ENVR 203.** Kinetic study of thermal monochloramine reactions with nitrogenous compounds. J. Gleason, S.P. Mezyk, K.P. Ishida

**9:15 ENVR 204.** Impact of sulfate ions on electrochemical oxidation of recalcitrant organic compounds using boron-doped diamond anodes. A. Farhat

**9:35 ENVR 205.** Effect of chlorination and chloramination on the removal of micropollutants in wastewater treatment plants. N. Bilgin Saritas, E. Aydin, E. Pehlivanoglu Mantas

**9:55** Intermission.

**10:15 ENVR 206.** Investigation of radical chlorine species reactions in advanced oxidation processes. S.P. Mezyk, J. Castillo, J. Gleason, K.P. Ishida

**10:35 ENVR 207.** Coupled titanium dioxide photocatalysis and filtration to mitigate organic matter and estrogens. C. Johnson, P.J. McNamara, B. Mayer

**10:55 ENVR 208.** Kinetic study of organo-phosphate flame retardant reactions with hydroxyl radicals. S.P. Mezyk

**11:15 ENVR 209.** Regulated and unregulated halogenated disinfection byproduct formation from chlorination of high salinity groundwaters. A. Szczuka, W. Mitch

**11:35** Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Sierra C

### Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation

Cosponsored by ANYL

T. Anumol, R. Marfil-Vega, T. M. Young, *Organizers, Presiding*

**8:00 ENVR 210.** Characterization of nitro-substituted polycyclic aromatic hydrocarbons from standard diesel particulate matter using liquid chromatography orbitrap mass spectrometry. M.S. Bataineh

**8:25 ENVR 211.** Identifying trace environmental contaminants in CO<sub>2</sub> capture solvents from coal-fired power plants using high resolution Time-of-Flight Mass Spectrometry (TOF-MS). J.G. Thompson, S. Bhatnagar, K. Liu

**8:50 ENVR 212.** Utilization of soft and hard ionization techniques with 2-dimensional gas chromatography and high-resolution mass spectrometry for unknown identification in hydraulic fracturing fluid, flowback and produced water samples. J. Rosenblum, K. Linden, A.J. Dane, E. Thurman, I. Ferrer

**9:15 ENVR 213.** Nontarget analysis of hydraulic fracturing flowback waters throughout the fracturing process using LC-QToF-MS. K. Oetjen, P.C. Winkler, T.Y. Cath, J. Blotvogel, T. Borch, R. Young, C.P. Higgins

**9:40 ENVR 214.** Identifying endocrine disrupting compounds in treated sewage sludge using non-targeted LC/MS/MS and CALUX cell-based bioassays. G. Pecora, T.M. Young, T. Anumol

**10:05** Intermission.

**10:20 ENVR 215.** Exploring the great unknown: Role of NTA in ensuring water safety. S.A. Snyder

**10:45 ENVR 216.** Resolving masses and bottlenecks for long-term LC-MS monitoring with the enviMass workflow version 3.2. M.J. Loos, S. Ruppe, J. Mazacek, H. Singer

**11:10 ENVR 217.** Suspect and non-target screening of organic contaminants in stormwater runoff and exposed fish. E.P. Kolodziej, B. Du, J. Lofton, J. McIntyre, N. Scholz, J. Davis, J.E. Baker

**11:35** Discussion.

**11:55** Concluding Remarks.

## Section H

San Francisco Marriott Marquis  
Sierra J

### Sulfidation of Metal-Based Engineered & Natural Nanomaterials: Implications for Their Fate & Effects in the Environment

Y. Bi, P. K. Westerhoff, *Organizers*

D. Fan, P. G. Tratnyek, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 ENVR 218.** Rates, mechanisms, and impacts of sulfidation of metal and metal oxide nanoparticles on their fate and effects in wastewater treatment plants and freshwater wetland mesocosms. G. Lowry, J.P. Stegemeier

**8:35 ENVR 219.** Formation and oxidative stability of metal sulfide nanoparticles and 2D nanosheets. Z. Wang, Y. Zhang, E. Gray, A. Peterson, R. Hurt

**9:05 ENVR 220.** Dissolution behavior of silver nanoparticles and formation of secondary sulfidated silver nanoparticles in municipal wastewater by single particle ICP-MS. S. Ghoshal, M.M. Azodi

**9:25 ENVR 221.** Silver nanoparticles fate at the solution/biofilm/mineral interface. M. Desmau, G. Alexandre, C. Levard, G. Ona-Nguema, V. Vidal, M. Auffan, P.J. Eng, M.F. Benedetti

**9:45 ENVR 222.** Electroanalytical methods in characterization of metal sulphide nanoparticles in water environment. M. Margués, I. Coha, M. Lovrić, I. Ciglenecki

**10:05** Intermission.

**10:20 ENVR 223.** Spectroscopic investigation of the mechanism and kinetics of the sulfidation of Fe<sup>III</sup>-(oxyhydr)oxide nanoparticles. N. Kumar, V. Noël, J. Pacheco, K. Maher, G.E. Brown

**10:50 ENVR 224.** Oxidation of synthetic iron(II) monosulfide at circumneutral pH when exposed to aerobic conditions: Fe-mineral transformations and oxidizing capacity of the system. C. Miller, R. Collins, D. Waite

**11:10 ENVR 225.** Reductive immobilization of hexavalent chromium by polysulfide-reduced iron (hydro) oxides. M. Shi, J. Li, J.S. Zheng

**11:30 ENVR 226.** Trichloroethene dechlorination by mechanochemically sulfidated zero valent iron: Reaction pathway, kinetics and electron efficiency. Y. Gu, F. He

## Section I

### Advances & Applications in Water Sensing Technologies for Drinking Water, Re-Use, Agri-Tech & Research

C. Moldaenke, W. Zhang, *Organizers*

M. E. Romero-Gonzalez, P. L. Schorr, *Organizers, Presiding*

**8:00 ENVR 227.** Advances in sensing technologies for water monitoring. M.E. Romero-Gonzalez

**8:20 ENVR 228.** Fluorescence spectroscopy: A tool to monitor presence of contaminants in water reuse systems. J. Wasswa, N. Mladenov

**8:40 ENVR 229.** Highly stable SERS nanoprobe for pH detection in confined water environment. H. Wei, M. Willner, L.C. Marr, P.J. Vikesland

**9:00 ENVR 230.** Ultra-trace electrochemical sensing of heavy metals using nanostructured bismuth doped carbon complex: Real time on site environmental application. K.M. Zeinu

**9:20 ENVR 231.** Optimization of coagulation process for the removal of Natural Organic Matter (NOM) characterized by Excitation-Emission Fluorescence Matrix (EEM) via 2-level Full Factorial Design (FFD) methodology. R.C. Go, C. Kan, M.G. de Luna

**9:40 ENVR 232.** Validation and optimization of an alternative method for NDMA analysis requiring less time, cost, and sample volume. S. Roback, M.H. Plumlee, H. Kodamatani, T. Fujioka

**10:00** Intermission.

**10:15 ENVR 233.** Development of NanoAptamer assay and portable analyzer for the detection of bisphenol A. H. Lim, E. Lee, S. Lee, B. Chua, A. Son

**10:35 ENVR 234.** Conjugated molecule based resistive sensor for microbial detection in water with *E. coli* as a case study. A.N. Mallya, D.C. Ramamurthy

**10:55 ENVR 235.** Molecular imprinted composite sol-gel layers for conductometric sensing of environmental toxins. A. Mujahid, T. Hussain, H. Munir

**11:15 ENVR 236.** Fluorometer using the pigment phycoerythrin as an early warning system for the appearance of difficult to treat cyanobacterial T&O compounds and cyanotoxins in comparison to UV-EEM online parameters as amino acids. C. Moldaenke, H. Dahlhaus, W. Schmidt, M. Wagner, S. Kueppers, P.L. Schorr

**11:35 ENVR 237.** Withdrawn.

## MONDAY AFTERNOON

### Section A

San Francisco Marriott Marquis  
Salons 10/11

#### Tribute to Jerry Schnoor

J. G. Burken, D. M. Cwiertny, C. L. Just, *Organizers, Presiding*

1:00 ENVR 238. Withdrawn

1:30 ENVR 239. Phytoforensic methods to affirm impacts of endophytic degradation in field phyto remediation process. S.L. Doty, M.J. Blaylock, J. Freeman, C. Cohu, J.G. Burken, A. Simon, J. Isebrands

1:55 ENVR 240. Health risk for residents via inhalation exposure to particle-bound hydrophobic organic compounds and heavy metals in a typical e-waste recycling zone. P. Luo, C. Huang, L. Bao, S. Li, E. Zeng

2:20 ENVR 241. Withdrawn.

2:45 Intermission.

3:00 ENVR 242. Trees as indicators of vapor intrusion risk. J.L. Wilson, M. Limmer, V. Samaranyake, J. Schumacher, J.G. Burken

3:25 ENVR 243. Use of environmental fate models in U.S. EPA TSCA new chemicals assessments. M. Card, E.L. Libelo, K. Mayo-Bean, D. Lynch

3:50 ENVR 244. Arsenic in geogenic soil from Hong Kong: Speciation, mobilization, and bioaccessibility. J. Cui, Y. Zhao, J. Li, D. Tsang, C. Poon, T. Chan, W. Wang, X. Li

4:15 ENVR 245. Modeling ion exchange equilibria in cross-linked cationic surfactant nanoparticle solutions. M. Chen, C.T. Jafvert

4:40 Panel Discussion.

#### Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

### Heterogeneous Catalytic Oxidation Processes in Water & Wastewater Treatment

Financially supported by Sciex China

J. Fang, V. K. Sharma, *Organizers*

D. D. Dionysiou, *Organizer, Presiding*

T. An, *Presiding*

1:00 Introductory Remarks.

1:05 ENVR 246. Three-dimensional MnO<sub>2</sub> porous hollow microspheres for enhanced activity as ozonation catalysts in water treatment. C. He, Y. Huang, W. Xu, X. Tan

1:30 ENVR 247. Enhanced degradation of organic micropollutants via heterogeneous photo-Fenton reactions on  $\alpha$ -FeOOH. W. Zhang, G. Zhang, P. Wang

1:55 ENVR 248. Comparison of catalytic ozonation by LaFeO<sub>3</sub> and LaCoO<sub>3</sub>: Benzotriazole degradation, elimination of bromate and reaction mechanism. Y. Zhang, Y. Xia, Q. Li, B. Xu, F. Qi

2:15 ENVR 249. Visible light activated nanosized bismuth titanates for photocatalytic degradation of bisphenol A. M.K. Patil, B. Ren, M. Nadagouda, D.D. Dionysiou

2:35 Intermission.

2:50 ENVR 250. Enhanced visible-light-responsive photocatalytic degradation of emerging pollutants by ZnFe<sub>2</sub>O<sub>4</sub>/TiO<sub>2</sub> heterostructures. R. Doong

3:15 ENVR 251. LaFeO<sub>3</sub> perovskite as a nanocatalyst for diclofenac degradation by heterogeneous activation of oxone process: Efficiency and mechanism. Y. Rao

3:40 ENVR 252. Efficient degradation of carbamazepine in aqueous solution by bismuth oxybromide-activated peroxide oxidation. X. Liu, J. Li, T. Zhang

4:00 ENVR 253. BiOI microspheres for pre-treatment of winery wastewater. A. Mera

4:20 ENVR 254. Degradation of dimethyl phthalate by peroxomonosulfate activated with Zn-NiOx. G. Zhang, J. Zhang, R. Zhou, Y. Zhang

### Section C

San Francisco Marriott Marquis  
Salons 14/15

#### Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet

##### Characterization of Natural Organic Matter

Cosponsored by CHED

Financially supported by AEEPS

M. J. McGuire, F. L. Rosario, *Organizers*

J. A. Pedersen, *Organizer, Presiding*

1:00 ENVR 255. Abbreviated review of photochemistry of natural organic matter then (1989) and now (2017). W.J. Cooper, B.A. Cottrell

1:25 ENVR 256. Environmental photochemistry of organic matter. F.L. Rosario

1:50 ENVR 257. Assessing dissolved organic matter photo-reactivity in a subtropical wetland ecosystem: Correlations between optical properties, antioxidant capacity, and the photochemical formation of reactive intermediates. G. McKay, W. Huang, C. Romera-Castillo, F.L. Rosario, R. Jaffe

2:15 ENVR 258. Post treatment challenges at advanced potable reuse plants: Corrosion, metals mobilization and the reappearance of disinfection byproducts. S. Roback, K.P. Ishida, M.H. Plumlee, J. Dadakis, W. Mitch, S.E. Fendorf, D. Hokanson

2:40 Intermission.

2:55 ENVR 259. Isolation and characterization of natural organic matter from Pony Lake, Antarctica. E.M. Perdue, S. Driver

3:20 ENVR 260. NOM: From unfiltered supplies to water boil orders. W.C. Becker

3:45 ENVR 261. Impact of pre-oxidation on the removal of regulated and emerging disinfection byproducts by activated carbon. E.M. Verdugo, M. Gifford, S.D. Richardson, R.S. Summers, B.D. Stanford, E. Dickenson

4:10 ENVR 262. Characterization and monitoring of dissolved organic matter at drinking water treatment plants: Methods and application. M. Philibert, C. Cazin, F. Zraïck

### Section D

San Francisco Marriott Marquis  
Golden Gate C1

#### Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer

D. M. McKnight, *Organizer*

Y. Chin, *Organizer, Presiding*

1:00 ENVR 263. Watershed tea in arctic lakes: Comparing carbon chemistry and cycling in red zinger vs. chamomile waters. R.M. Cory, C.P. Ward, J. Bowen, A. Trusiac, L. Treibergs

1:35 ENVR 264. Permafrost dissolved organic matter leachability and reactivity in the presence of various solutions from an Alaskan Sub-Arctic watershed. K.R. Gagne, J.J. Guerd

2:00 ENVR 265. Relating the reactivity of triplet excited states of dissolved natural organic matter to organic matter quality and land cover in mixed-use watersheds. A.J. McCabe, W. Arnold

2:25 ENVR 266. Cross-scale advances in CDOM biogeochemistry: From molecular to ecoregional perspectives. P.L. Brezonik, C.G. Griffin, J.C. Finlay, L.G. Olmanson, R.M. Hozalski, B.J. Allen, W. Arnold, M.E. Bauer

2:50 Intermission.

3:00 ENVR 267. From the Antarctic to the Arctic: An expeditionary approach to the environmental chemistry and reactivity of dissolved organic matter. D.M. McKnight

3:35 ENVR 268. Location matters: Groundwater flow direction (recharge vs. discharge) controls DOM and DIN gradients and cycling in the bed sediments of a groundwater flow-through lake. R.L. Smith, D.B. Kent, D.R. LeBlanc, J. Bohle, D.A. Repert, D. Stoilker, R. Hull, T.D. McCobb, J. Underwood, C. Conaway, A.P. Reed

4:00 ENVR 269. Evidence for conservative transport of dissolved organic carbon in major river basins in Maine. T. Huntington, C. Roesler, G. Aiken

4:25 ENVR 270. Is disturbance mobilizing or creating the aged carbon exported in streams? R.T. Barnes, D. Butman, P. Raymond, H. Wilson

4:50 Concluding Remarks.

### Section E

San Francisco Marriott Marquis  
Sierra A

#### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEEPS

D. D. Dionysiou, G. Li Puma, D. Minakata, K. E. O'Shea, X. Quan, *Organizers*

X. He, *Organizer, Presiding*

T. An, R. Pupo Nogueira, *Presiding*

1:00 ENVR 271. Application of photo-fenton process for the degradation of antibiotics and disinfection of anaerobic pre-treated hospital effluent. J.A. Perini, A.L. Tonetti, R. Pupo Nogueira

1:35 ENVR 272. Analogies and differences between bacterial and viral inactivation during photo-Fenton treatment of wastewater. S. Giannakis, C. Pulgarin

2:00 ENVR 273. Effect of porous structure on the heterogeneous Fenton oxidation regeneration of magnetic carbon. Y. Xiao, J.M. Hill

2:25 ENVR 274. Coupling photocatalysts and ferrate oxidation: Towards an innovative solution for wastewater treatment. T. Pigot

2:50 Intermission.

3:05 ENVR 275. Photochemical and photocatalytic transformation mechanism and risk assessment of typical synthetic musks in water: Theoretical study. G. Yanpeng, G. Li, T. An

3:40 ENVR 276. Theoretical study of the reaction of OH radicals with benzoic acid in the gas and aqueous phase. C. Wu, A. De Visscher, I. Gates

4:05 ENVR 277. Activation of Fe-tpena by hydrogen peroxide to form an unselective strong oxidant at circum-neutral pH. C. Miller, Y. Chang, D.P. de Sousa, C.J. McKenzie, D. Waite

4:30 ENVR 278. Degradation mechanisms of algal odorants of  $\beta$ -cyclocitral and  $\beta$ -ionone during UV photolysis and UV/chlorination reactions. T. Kim, T. Kim, M. Kim, K. Zoh

### Section F

San Francisco Marriott Marquis  
Sierra B

#### Contaminants of Emerging Concern in Natural & Engineered Systems

Cosponsored by AGRO, ANYL and CEI

L. M. Blaney, A. J. Hernandez, *Organizers, Presiding*

1:00 Introductory Remarks.

1:05 ENVR 279. Novel method for the quantification of the total *N-nitrosamines* concentration (TONO) in water. F. Breider, U. von Gunten

1:25 ENVR 280. Formation of vegetable-derived disinfection byproducts. Y. Komaki, J. Choe, W. Mitch

1:45 ENVR 281. NDMA precursor transformation and identification during reverse osmosis and UV/peroxide water treatment for indirect potable reuse. D. Hanigan, I. Ferrer, E. Thurman, S. Roback, K.P. Ishida, M.H. Plumlee, P.K. Westerhoff

**2:05 ENVR 282.** Study of N-Nitrosodimethylamine (NDMA) formation in the untreated surface water using preformed chloramines. **S. Prabakar, F. Samadi, A. Kruzic**

**2:25** Intermission.

**2:45 ENVR 283.** Fate of micropollutants in high-capacity wastewater treatment plants in Istanbul metropolitan area. **S.C. Tuzun, E. Aydin, E. Pehlivanoglu Mantas**

**3:05 ENVR 284.** Biotransformation of trace organic compounds in aerobic, anaerobic and anoxic conditions. **N. Lm, B. Vanderford, E. Dickenson, D. McAvoy**

**3:25 ENVR 285.** Prevalence and elimination of extracellular antibiotic resistance genes in five full-scale membrane reactors. **S. Zhou, Y. Wang**

**3:45 ENVR 286.** Roles played by ammonia oxidizers of a nitrifying activated sludge community in micropollutant biotransformation. **Y. Men, P. Han, S. Archermann, Y. Yu, D.E. Helbling, D.R. Johnson, M. Wagner, K. Fenner**

**4:05 ENVR 287.** Inhibition of the cometabolic transformation of 1,4-dioxane by *Rhodococcus rhodochrous* 21198 grown on isobutane. **M.F. Azizian**

**4:25** Concluding Remarks.

## Section G

San Francisco Marriott Marquis  
Sierra C

### Environmental Chemistry: Undergraduate & Graduate Classroom, Laboratory & Local Community Learning Experiences

*Cosponsored by ANYL and CHED*

*Financially supported by AEESP*

**M. A. Benvenuto, E. Roberts-Kirchhoff, Organizers, Presiding**

**1:00** Introductory Remarks.

**1:05 ENVR 288.** First-year, course-based chemistry research experience: Development and implementation of a research methods course for chemistry and biochemistry majors. **K.R. Evans, M.J. Mio, E. Roberts-Kirchhoff**

**1:25 ENVR 289.** First-year, course-based chemistry research experience: Implementation of a research-based chemistry laboratory course for chemistry and biochemistry students as part of a research coordination network. **K.C. Lanigan, A. Matti, D. Tomco, K.R. Evans**

**1:45 ENVR 290.** Introductory campus and distance-delivered course to engage first year undergraduates in environmental chemistry. **J.J. Guerard, S.M. Hayes**

**2:05 ENVR 291.** Community based undergraduate research: Measurement of hazardous air pollutants with regard to environmental justice. **K. Zimmermann, L. Young**

**2:25 ENVR 292.** Environmental toxicology experiments in the general chemistry laboratory curriculum UC-Berkeley. **M.C. Douskey, A.M. Baranger, M. Robak, L.B. Armstrong, G. Kerstiens, C.W. Tam, P. Pande**

**2:45 ENVR 293.** Incorporating environmental chemistry concepts into an analytical chemistry lecture/laboratory course. **D.E. Latch**

**3:05** Intermission.

**3:10 ENVR 294.** Can field sampling still be educationally valuable without obvious trends in the data? **S.J. Bachofer**

**3:30 ENVR 295.** Analysis of heavy metals in water using cloud point extraction and flame atomic absorption spectrometry. **A. Rihana-Abdallah, Z. Li**

**3:50 ENVR 296.** Semi-synthetic microcystins and their role in public health. **J. Westrick, J. Birbeck, G. O'Neill**

**4:10 ENVR 297.** Selenium removal from power plant waters using layered double hydroxide materials. **M. Li, L. Farnen, C.K. Chan**

**4:25 ENVR 298.** Real-time electronic sensor based on black phosphorus/Au NPs/DTT hybrid structure for arsenic ion detection. **G. Zhou, J. Chen**

**4:40** Concluding Remarks.

## Section H

San Francisco Marriott Marquis  
Sierra J

### Sulfidation of Metal-Based Engineered & Natural Nanomaterials: Implications for Their Fate & Effects in the Environment

**P. G. Tratnyek, P. K. Westerhoff, Organizers**

**Y. Bi, D. Fan, Organizers, Presiding**

**1:00** Introductory Remarks.

**1:05 ENVR 299.** Reactivity of nanoparticulate iron sulfide (mackinawite). **K.F. Hayes**

**1:35 ENVR 300.** Reactivity and bioavailability of mercury sorbed to or coprecipitated with iron sulfides. **N. Rivera, H. Hsu-Kim**

**2:05 ENVR 301.** Technetium stabilization in low solubility sulfide phases. **M. Asmussen, C. Pearce, J. Neweay, A. Lawter, R. Clayton, N.P. Qafoku**

**2:25 ENVR 302.** Environmental application and implication of sulfide modified nanoscale zerovalent iron. **Y. Su, A.A. Keller, X. Zhou, Y. Zhang**

**2:45** Intermission.

**3:00 ENVR 303.** Effects of sulfidation on the reactivity of iron and iron oxides with contaminants. **P.G. Tratnyek, D. Fan, Y. Lan, A. Agrawal**

**3:30 ENVR 304.** Understanding the effect of sulfidation on the reactivity of zero-valent iron materials. **W. Yan, Y. Han**

**3:50 ENVR 305.** Degradation of chlorinated hydrocarbons by nanoscale zero-valent iron treated with bisulfide and stabilized with carboxymethylcellulose. **A. Agrawal**

**4:10 ENVR 306.** From the lab to the field: Development of sulfidized nanoiron for 1,2-dichloroethane degradation. **D.M. O'Carroll, A. Nunez Garcia, C. de Boer, C. Kocur, H. Boparai, A. Chowdhury**

**4:40 ENVR 307.** Sulfidized nZVI particles for groundwater treatment: Synthesis, complex characterization and laboratory-scale testing. **J. Filip, J. Slunský, J. Nosek, J. Semerád, J. Kašlík, J. Oborná, J. Bachorik, I. Medrik**

## Section I

San Francisco Marriott Marquis  
Sierra K

### Nanomaterials in Consumer Products: Formulation, Characterization & Applications Across the Product Life Cycle

**S. Hussain, A. J. Kennedy, Organizers**

**C. Sayes, Organizer, Presiding**

**1:00** Introductory Remarks.

**1:10 ENVR 308.** Identification and quantification of ENPs in cosmetics, food and the environment: Critical assessment of FFF-ICPMS and single-particle (multi-element) ICPMS. **F. Von Der Kammer, A. Praetorius, M. Velimirovic, A. Gundlach-Graham, D. Günther, T. Hofmann**

**1:40 ENVR 309.** Development and application of methods that reliably measure graphene oxide release from aged polymer nanocomposites. **D.G. Goodwin, D. Jacobs, L. Sung**

**2:00 ENVR 310.** Aging of wood stains containing CeO<sub>2</sub> nanoparticles as UV filters. **L. Scifo, A. Mason, P. Chaurand, D. Borschneck, V. Vidal, C. Levard, J. Rose**

**2:20 ENVR 311.** TiO<sub>2</sub> nanoparticles in sunscreen lotion: Asymmetric flow field-flow fractionation hyphenated to ICPMS for their characterization. **M. Velimirovic, S. Wagner, M. Gráf, M. Ehler, F. Abdolapur Monikh Fazel, F. Von Der Kammer, T. Hofmann**

**2:40** Intermission.

**2:55 ENVR 312.** Environmentally relevant physicochemical transformations of silver nanoparticles used in consumer products. **S.R. Al-Abed, A. Gitipour, I. Radwan**

**3:25 ENVR 313.** Release and transformation of ZnO nanoparticles from coated surfaces during simulated dermal contact. **J.G. Clar, E. Baumann, A. Remsen, T. Treye, T. Luxton**

**3:45 ENVR 314.** Determination of anions on the surface of Printed Circuit Boards (PCBs) by IPC-TM- 650 method 2.3.28 using HPIC. **B. Huang, J. Rohrer**

**4:05 ENVR 315.** Influence of wear and tear on the release of silver nanoparticles from sports socks. **V. Gagnon, M. Button, D. O'Carroll, K. Weber**

**4:25 ENVR 316.** *In vitro* characterization of Reactive Oxygen Species (ROS)-generating capacity of commercially available MesoSilver™ used as dietary supplement. **H. Rong, S. Garg, T. Waite**

**4:45** Concluding Remarks.

## Science for a Sustainable Energy Future

### Chemical & Biological Conversions Approaches to Energy Conversion

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG, ORGN and PROF*

### Teaching, Researching & Community Building in the Global Chemical Enterprise

*Sponsored by IAC, Cosponsored by BMGT, ENVR, I&EC, PRES and PROF*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

## Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

*Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCG*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Mechanisms

*Sponsored by CATL, Cosponsored by COLL and ENVR*

### Undergraduate Research Posters

#### Environmental Chemistry

*Sponsored by CHED, Cosponsored by ENVR and SOCED*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

**S. O. Obare, Organizer**

**8:00 - 10:00**

**74.** See previous listings.

**632-634, 640-641, 645, 647, 649-650, 654, 659-666, 669-670, 675-677, 683, 687, 689-690, 710, 713, 715, 717, 720, 725, 735, 737-740, 746-747, 749, 752, 755, 758, 761-764, 770-772, 774-776, 778-780, 785, 789-790, 792, 794, 799-805, 812, 814-818, 820-821, 824-825, 829, 862, 864-865, 870, 878-882.** See subsequent listings.

## TUESDAY MORNING

### Section A

San Francisco Marriott Marquis  
Salons 10/11

### ACS Award for Creative Advances in Environmental Science & Technology: Symposium in honor of Dr. Douglas R. Worsnop

*Financially supported by ES&T Journal, ES&T Letters*

**M. Canagaratna, S. O. Obare, Organizers**

**J. L. Jimenez, Organizer, Presiding**

**8:00** Introductory Remarks.

**8:10 ENVR 317.** How clusters form atmospheric aerosol particles: Nucleation in the CLOUD experiment at CERN. **U. Baltensperger**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**8:35 ENVR 318.** Probing the formation, behavior, and evolution of organic particulate matter through high-resolution mass spectrometry. **N.M. Donahue**

**9:00 ENVR 319.** From aerosol mass spectrometry to global models of aerosol formation. **K. Carslaw**

**9:25 ENVR 320.** Highly oxidized molecules in atmospheric chemistry. **T.F. Mentel**

**9:50** Intermission.

**10:10 ENVR 321.** Why molecular structure matters in the chemistry of atmospheric organic aerosol formation. **P. Ziemann**

**10:35 ENVR 322.** Bringing on-line aerosol and gas measurements close to home. **J.P. Abbatt**

**11:00 ENVR 323.** Molecular description of SOA formation: From new particle growth rates to aqueous organic chemistry. **J. Thornton**

**11:20 ENVR 324.** Chemical changes arising from the heterogeneous oxidation of atmospheric organic aerosol. **J.H. Kroll**

**11:40 ENVR 325.** Atmospheric chemistry and role of isoprene hydroxy hydroperoxides: Prototype preindustrial VOC oxidation products. **F. Keutsch**

### Section B

San Francisco Marriott Marquis  
Salons 12/13

**Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma**

**Disinfection/Oxidation Byproducts Formation & Control**

*Financially supported by Sciex China*

**D. D. Dionysiou, V. K. Sharma, Organizers**

**J. Fang, Organizer, Presiding**

**S. D. Richardson, Presiding**

**8:00** Introductory Remarks.

**8:05 ENVR 326.** Relative effectiveness of ferrate, chlorine dioxide, zone and peroxone for control of disinfection byproduct precursors. **D.A. Reckhow, X. Ma, J. Bliss, J. Gao**

**8:30 ENVR 327.** Impacts of hydraulic fracturing on drinking water: High resolution-MS uncovers new chemical by-products of concern. **S.D. Richardson, H.K. Liberatore, M.J. Plewa, L.H. Cizmas, J.M. Vanbriesen**

**8:55 ENVR 328.** Titanium dioxide and zinc oxide nanoparticles: Disinfection byproduct formation in synthetic freshwater. **L.H. Cizmas, C. Gray, V.K. Sharma, T. McDonald**

**9:15 ENVR 329.** Ozone microbubbles: Mass transfer and formation of disinfection by-products. **P. Li, Y. Yang, C. Wu, Y. Wang**

**9:35 ENVR 330.** Determination of trace concentrations of oxyhalides and bromide in municipal and bottled waters using a compact ion chromatography system. **J. Hu, J. Rohrer**

**9:55** Intermission.

**10:10 ENVR 331.** Disinfection byproducts as challenge targets for AOP treatment during potable reuse. **W. Mitch, Y. Chuang**

**10:35 ENVR 332.** NDMA formation during chlorination and ozonation of N, N-dimethyl hydrazine compounds: Reaction kinetics, mechanisms, and implications for NDMA formation control. **Y. Lee**

**11:00 ENVR 333.** UV/PMS disinfection: An efficient method for inactivation of four kinds of dominant fungal spores in groundwater. **G. Wen, X. Xu, T. Huang**

**11:20 ENVR 334.** Enhanced bactericidal effect towards *E. coli* and removal of 1,1,1-trichloroethane by reduced graphene oxide supported FeCu. **A. Ahmad, X. Guo, Y. Xu**

### Section C

San Francisco Marriott Marquis  
Salons 14/15

**Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet**

**Environmental Analytical Chemistry**

*Cosponsored by CHED*

*Financially supported by AEESP*

**M. J. McGuire, J. A. Pedersen, Organizers**

**F. L. Rosario, Organizer, Presiding**

**8:00 ENVR 335.** Interaction of cationic pharmaceuticals with dissolved natural organic matter. **J.A. Pedersen, I. Christl, B. Liu**

**8:25 ENVR 336.** Development, validation, and implications of a broad spectrum screening method for Pharmaceuticals and Personal Care Products (PPCPs) in wastewater effluents, source waters, and finished drinking waters. **A.D. Eaton, A. Haghani**

**8:50 ENVR 337.** Things you can't do with a GC-M. **S.A. Snyder**

**9:15 ENVR 338.** Using dark matter accurate mass to discover NDMA precursors in wastewater. **E.M. Thurman, I. Ferrer, D. Hanigan, P.K. Westerhoff**

**9:40 ENVR 339.** Polarity rapid assessment method: A promising tool for characterizing NDMA precursors in water. **C. Chen, X. Liao, S. Li, E. Bei, J. Wang, X. Zhang**

**10:05** Intermission.

**10:20 ENVR 340.** Analysis of water quality: A journey beyond the Abbott's building. **C.D. Hertz**

**10:45 ENVR 341.** Analytical chemistry and stormwater modeling. **M.K. Stenstrom**

**11:10 ENVR 342.** Understanding how hydrophobic organic pollutants distribute in urban runoff by using perylene as a probe. **M. Hsu, I.H. Suffet**

**11:35 ENVR 343.** Disparate antibiotic resistance gene levels revealed across four major cities in California: A survey in drinking water, air, and soil at 24 public parks. **C.M. Echeverria Palencia, J.A. Jay, V. Thulsiraj, N.K. Tran, C.A. Erickson, I. Melendez, M.G. Sanchez, D. Walpert, T. Yuan, E. Ficara, N. Senthilkumar, M. Hernandez-Cira, D. Gamboa, H. Haro, S. Paulson, Y. Zhu**

### Section D

San Francisco Marriott Marquis  
Golden Gate C1

**Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer**

**Y. Chin, D. M. McKnight, Organizers**

**P. Maurice, Presiding**

**8:00** Introductory Remarks.

**8:10 ENVR 344.** Nanoscale metal-organic matter interactions. **H. Hsu-Kim, C. Jiang, U. Ndu**

**8:45 ENVR 345.** Radium and thallium binding to dissolved organic matter. **L. Martin, C. Simonucci, E. Viollier, M.F. Benedetti**

**9:10 ENVR 346.** Complexation with dissolved organic matter affects aqueous uranium speciation and adsorption. **K.M. Campbell, C. Fuller, J. Schaper, G. Aiken**

**9:35 ENVR 347.** Influence of dissolved organic matter on the stability of trace level hexavalent chromium in surface and ground water samples. **V.I. Furdul, S. Maedler**

**10:00** Intermission.

**10:10 ENVR 348.** Can we predict metal binding by DOM? **E. Tipping, S. Lofts, A. Stockdale**

**10:45 ENVR 349.** Detection of aqueous complexes of arsenic and iron with dissolved organic matter. **H.V. Kulkarni, N. Mladenov, O. Prakash, A. Herrea**

**11:10 ENVR 350.** Hg-DOM interactions during removal of Hg from natural and polluted ecosystems. **F. Diaz, L.E. Katz, D. Lawler**

**11:35 ENVR 351.** Photoreduction of Hg(II) and photodemethylation of methylmercury: The key role of thiol sites on dissolved organic matter. **D.E. Latch, J.D. Jeremiason, G. Aiken, J.C. Portner, A.J. Hiranaka, M.T. Dvorak, K.T. Tran**

### Section E

San Francisco Marriott Marquis  
Sierra A

**Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse**

*Financially supported by AEESP*

**D. D. Dionysiou, X. He, G. Li Puma, D. Minakata, X. Quan, Organizers**

**K. E. O'Shea, Organizer, Presiding**

**A. Sanroman, M. Valnice Boldrin Zanoni, Presiding**

**8:00 ENVR 352.** Withdrawn

**8:35 ENVR 353.** Photoelectrochemical cell for simultaneous electricity generation and heavy metals recovery from wastewater. **D. Wang, G. Li Puma**

**9:00 ENVR 354.** Enhanced photoelectrocatalytic degradation of organic pollutants in artificial photosynthesis systems. **L. Zeng, X. Li**

**9:25 ENVR 355.** Enhanced filtration performance of carbon nanotube-based membrane by electrochemical assistance. **F. Xinfei, X. Quan**

**9:50** Intermission.

**10:05 ENVR 356.** Withdrawn.

**10:40 ENVR 357.** Electrochemically enhanced microfiltration for water detoxification and fouling control in advanced wastewater treatment. **K. Choo, H. Park, H. Park**

**11:05 ENVR 358.** Removal of pharmaceuticals from different waters by conventional ozonation and an electro-peroxone process. **H. Wang, W. Yao, G. Yu, Y. Wang**

**11:30 ENVR 359.** Development of a novel high throughput Ti<sub>2</sub>O<sub>3</sub>-based reactive electrochemical filter: A case study on efficient mineralization of Perfluorooctanoate (PFOA). **H. Lin, C. Wang, J. Niu**

### Section F

San Francisco Marriott Marquis  
Sierra B

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

*Cosponsored by CEI, MEDI, ORGN and SCHB\**

*Financially supported by AEESP*

**S. O. Obare, Organizer**

**N. Vaidya, Organizer, Presiding**

**8:30** Introductory Remarks.

**8:40 ENVR 360.** Exemplifying green chemistry with sterically protected and electronically activated azamacrocyclic catalysts. **R. Chorghade, M. Chorghade**

**9:00 ENVR 361.** Overview of more sustainable and greener chemistry implementation in industry. **D.J. Constable**

**9:40 ENVR 362.** Seamless integration of green chemistry at Pfizer from development to discovery. **D.T. Richter**

**10:00 ENVR 363.** Design and evolution of the BMS process greenness scorecard. **D.K. Leahy, E. Simmons, V. Hung, W. Fleming, J. Sweeney, M. Miller**

**10:20** Intermission.

**10:35 ENVR 364.** Leading the textile and footwear industries towards zero discharge of hazardous chemicals: The ZDHC Foundation. **N. Sponsler**

**10:55 ENVR 365.** Data and tools needed to enable toxicity-aware product-development within different industries. **N. Vaidya**

**11:15 ENVR 366.** Recent green progress in the preparative and analytical separations industries. **J.P. McCauley**

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

### Innovative Materials & Technologies for Sustainable Water Purification

#### Adsorption Technologies

*Cosponsored by CEI*

B. P. Chaplin, J. Choe, J. Liu, D. Shuai, W. Zhang, *Organizers*

E. L. Cates, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 ENVR **367**. Measuring and modeling U(VI) adsorption to engineered iron oxide nanoparticles. Z. Pan, W. Li, J. Fortner, D. Giammar

8:25 ENVR **368**. Magnetic porous nanocomposites for water remediation. K. Ventura, R. Arrieta, V. Jabbari, D. Villagran

8:45 ENVR **369**. Removal of Cu<sup>2+</sup> in aqueous system by different amine types on silica nanotube. Y. Chun, Y. Ko, T. Do, U. Choi

9:05 ENVR **370**. Adsorption of chlorpheniramine and N-nitrosodimethylamine formation potential toward nano-sized graphene oxide-iron oxide particle and suspension. W. Chen, C. Li, C. Chen

9:25 ENVR **371**. Highly efficient and specific capture of radioactive iodine in water by using gold nanoparticle-immobilized dextran gel columns. J. Jeon, M. Choi, H. Shim, S. Yun, S. Park, D. Choi, B. Jang

9:45 Intermission.

10:00 ENVR **372**. Innovative materials for water treatment: From custom designed adsorbents to scalable membranes. A. Orlov, G. Ramakrishnan, S.M. Uchimiya

10:40 ENVR **373**. Silver binding affinity of silica/melanin nanoparticles. A.P. Zane, M. Morgan, E. Botts, D. Olivera, J. Hoyle

11:00 ENVR **374**. Removal of hexavalent chromium from aqueous solutions by a novel biochar supported nanoscale iron sulfide composite. Y. Gong, H. Lyu, J. Tang

11:20 ENVR **375**. Fluorinated nanoporous networks for charged organic contaminant removal from water. J. Byun, H.A. Patel, D. Thirion, C.T. Yavuz

11:40 ENVR **376**. Sorption of heavy metals using tungsten oxide based sorbents. C.K. Perkins, T. Reed, Z. Brown, A.W. Apblett

## Section H

San Francisco Marriott Marquis  
Sierra J

### From the Bench to the Field: Evaluating Innovative Remediation & Detection Technologies

S. R. Al-Abed, H. Henry, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 ENVR **377**. Case study comparing novel remediation technologies for boron contaminated groundwater. J.L. McKernan, Z. Hendren, A. Vengosh, C. Northeim, S. Fang

8:25 ENVR **378**. Enhanced non-fouling membranes for water purification and recycling. D. Battaglia, P. Clement, J. Lange, E.P. Giannelis

8:45 ENVR **379**. Magnetic nanocomposite materials as capture agents for organic pollutants in water treatment. A.M. Gutierrez, T. Dziubla, J. Hill

9:05 ENVR **380**. Bi-phase Catalyst for PCB removal from sediments and ground water. S.M. Lomnicki, B. Subramanian, S.R. Al-Abed, J.L. McKernan

9:25 Intermission.

9:45 ENVR **381**. Field study on the *in situ* treatment of a DNAPL source by nanoscale zero-valent iron: Effects of site oxidants. J. Ahn, C. Kim, H. Kim, K. Hwang, I. Hwang

10:05 ENVR **382**. Aspen Park Solvents long term cleanup of a DNAPL in fractured bedrock. P. Stevenson

10:25 ENVR **383**. On-site soil remediation experience in a large contaminated site with various solvents caused by illegal dumping of wastes. K. Kawamoto

10:45 ENVR **384**. From the bench to the field: Translating a novel plasmonic mercury sensor into a portable instrument for soils and sediments. J. Crosby, J. James, D. Lucas, C.P. Koshland

11:05 ENVR **385**. Monitoring trichloroethylene, benzene, and other VOCs in air using cavity ring-down spectroscopy and chemical dispersion. C.R. Viteri, A.E. Miller, M.A. Armen, B.A. Richman

11:25 ENVR **386**. Withdrawn.

## Section I

### Processes, Technologies & Sensors for Food-Energy-Water Nexus Research

*Cosponsored by CEI and CHED*

*Financially supported by Electric Power Research Institute (EPRI), National Science Foundation (NSF)*

W. J. Cooper, *Organizer*

S. Bushart, N. S. Rao, *Organizers, Presiding*

W. Cooper, *Presiding*

8:00 Introductory Remarks.

8:05 ENVR **387**. Intensive aquatic protein production using duckweed as a model platform. A. McQuilling, J. Lawson, S. Mukhtar, W. Grieco

8:25 ENVR **388**. Vibration-driven droplet motion on a flapping film for water collection. M. Derby, R. Huber, N. Doughramaji, X. Chen

8:45 ENVR **389**. Redox-based electrochemical technologies for energy-efficient water purification and wastewater treatment. X. Su, T.F. Jamison, T. Hatton

9:05 ENVR **390**. Highly permeable thin film composite membranes with nanocomposite barrier layer for desalination applications. K. Liu, H. Ma, B.S. Hsiao

9:25 ENVR **391**. Capacitive nutrient removal and recovery from anaerobic membrane bioreactor effluent. Z. Ge, Z. Ren

9:45 Intermission.

10:00 ENVR **392**. Olefin/paraffin separation properties of graphene oxide membranes. B. Yoo, S. Lee, H. Park

10:20 ENVR **393**. Toward energy-neutral and decentralized water re-use with flow-electrode capacitive deionization. K. Hatzell, M. Hatzell, M. Dixit, D. Moreno

10:40 ENVR **394**. Characterization and implications of cometabolic bio-methanol production by ammonia oxidizing bacteria. Y. Su, L. Arellano-Garcia, S. Sathyamoorthy, K. Chandran

11:00 ENVR **395**. Carbon nanotube enabled water treatment. S. Ragunath, S. Roy, S. Mitra

11:20 ENVR **396**. Algae cultivation on a pilot-scale Algal Turf Scrubber® from dairy wastewater for bioremediation and sustainable biofuel production. J. Yan

11:40 Concluding Remarks.

### Mineral-Water Interface Chemistry

*Sponsored by GEOC, Cosponsored by COLL and ENVR*

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

*Sponsored by CATL, Cosponsored by ENVR and I&EC*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Electrons

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## TUESDAY AFTERNOON

## Section A

San Francisco Marriott Marquis  
Salons 10/11

### ACS Award for Creative Advances in Environmental Science & Technology: Symposium in honor of Dr. Douglas R. Worsnop

*Financially supported by ES&T Journal, ES&T Letters*

J. L. Jimenez, S. O. Obare, *Organizers*

M. Canagaratna, *Organizer, Presiding*

1:30 ENVR **397**. Recent advances in atmospheric chemistry studies: Applications of mass spectrometric methods. J.T. Jayne

1:50 ENVR **398**. Dielectric spectroscopy and glass transitions of organic molecules and mixtures prepared from submicron particle deposition. P. Davidovits

2:10 ENVR **399**. Toward understanding aqueous-phase chemistry of secondary organic aerosol via aerosol mass spectrometry. Q. Zhang

2:30 ENVR **400**. Aerosol mass spectrometry of refractory black carbon particles: Black carbon particles in the atmosphere. T.B. Onasch

2:50 ENVR **401**. Aerosol composition and properties in the developing world. H. Coe

3:10 Intermission.

3:25 ENVR **402**. Bright future of the potential aerosol mass concept and chamber. W. Brune

3:50 ENVR **403**. Recent results on organic aerosol sources and properties, and on the experimental systems used to study them. J. Jimenez

4:15 ENVR **404**. Award Address (ACS Award for Creative Advances in Environmental Science & Technology sponsored by the ACS Division of Environmental Chemistry & the ACS Publications Journals Environmental Science & Technology & Environmental Science & Technology Letters). Mass spectrometry of atmospheric aerosol: 1 nanometer to 1 micron. D.R. Worsnop

## Section B

San Francisco Marriott Marquis  
Salons 12/13

### Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

#### Membrane & Adsorption Technologies

*Financially supported by Sciex China*

D. D. Dionysiou, J. Fang, V. K. Sharma, *Organizers*

S. Lin, L. Tang, *Presiding*

1:30 Introductory Remarks.

1:35 ENVR **405**. Membrane fouling behavior of composite coagulant PAC-PDMAAC under different membrane materials in coagulation-ultrafiltration combined process. X. Shen, B. Gao, Q. Yue

2:00 ENVR **406**. Anti-oil-fouling membranes in membrane distillation: Drivers, materials development, and force spectroscopy for mechanisms elucidation. S. Lin, Z. Wang

2:25 ENVR **407**. Bioinspired polydopamine and silver nanoparticles form *in situ* on membrane surface to mitigate biofouling. L. Tang, K.J. Livi, K. Chen

2:45 ENVR **408**. Preparation and properties of PVDF adsorption membrane. Y. Zhang

3:05 ENVR **409**. Development of nanocomposite membrane process for drinking water treatment. P. Wang, D. Song, Z. Sun, L. Ru, H. Wang, F. Wang, H. Jiang, J. Ma

3:25 Intermission.

3:40 ENVR **410**. Enhanced removal of trace antimony(V) in water by iron oxide supported by chitosan/cellulose acetate. J. Yang, H. Chen, Z. Li, R. Bai

4:05 ENVR **411**. Adsorption behavior of Cu(II) ions from aqueous medium on TEMPO-mediated oxidized cellulose nanofibers. P. Liu, A. Mathew, H. Sehaqui

4:25 ENVR **412**. Adsorption of Cs in water using functionalized, templated and magnetic mesoporous composites. K. Guo, F.X. Han, Z. Arslan, R. Zhang, Y. Zhang, C. Rogers

4:45 ENVR **413**. Ammonia nitrogen adsorption onto modified zeolites at low temperature. L. Qiu, Q. Qiu, L. Zhu, S. Zhang

5:05 ENVR **414**. Critical effect of solute species and concentrations on cation exchange behavior of thin-film composite membranes in forward osmosis. X. Lu, W. Cheng, Y. Yang, J. Ma

## Section C

San Francisco Marriott Marquis  
Salons 14/15

**Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet**

**Source Water Quality**

*Cosponsored by CHED*

*Financially supported by AEESP*

J. A. Pedersen, F. L. Rosario, *Organizers*

M. J. McGuire, *Organizer, Presiding*

**1:30 ENVR 415.** Wildfires: Burning questions regarding drinking water supplies and treatment. A.D. Revchuk, I.H. Suffet

**1:55 ENVR 416.** Laboratory simulation of wildfire heating: Effects on DOM and water treatment. A.K. Hohner, F.L. Rosario

**2:20 ENVR 417.** Effect of fire-impacted source water on ozonation kinetics in drinking water treatment. Z. Wu, M. Mizel, T.M. Young

**2:45 ENVR 418.** Mobilization of nitrogenous pyrogenic soil organic matter in wildfire-affected watersheds and its impact on the formation of haloacetonitriles. Y. Yu, F.L. Rosario

**3:10** Intermission.

**3:25 ENVR 419.** Evaluation of prevailing flush guidelines to reduce water lead exposures: Implications for regulations and public health outreach. A.L. Katner, K. Pieper, J. Parks, K. Brown, C. Hu, H. Lin, X. Wang, J. Diaz, M. Edwards

**3:50 ENVR 420.** Barriers to access to chemical data for source water vulnerability assessments. J. Rosen

**4:15 ENVR 421.** Mexico City: The case for integrative science and policy. T.J. Downs

**4:40 ENVR 422.** Federal framework for regulating acidization, a sister-technology to hydraulic fracturing. K. Abdullah, I.H. Suffet, M. Stenstrom, T. Malloy

## Section D

San Francisco Marriott Marquis  
Golden Gate C1

**Understanding Dissolved Organic Matter Reactivity: Honoring George Aiken, the DOM Whisperer**

Y. Chin, D. M. McKnight, *Organizers*

E. J. O'Loughlin, *Presiding*

**1:30 ENVR 423.** Comparison of the properties of different natural organic matter samples from the Suwannee River (GA, USA). P. Maurice

**2:05 ENVR 424.** Effects of dissolved organic matter on the fate and transformation of nanosized zero-valent iron in aqueous system. C. Kim, Y. Chin, J. Ahn, M.L. Wei-Haas, B. McAdams, I. Hwang

**2:30 ENVR 425.** Impact of Natural Organic Matter (NOM) on the formation and reactivity of iron oxide particles formed on Fe(III) and Fe(II) addition: Comparison of terrigenous NOM versus Algalenetic NOM. S. Garg, K. Wang, D. Waite

**2:55 ENVR 426.** Dark formation of hydrogen peroxide upon oxidation of dissolved organic matter. C. Chu, N. Walpen, M. Sander, K.P. McNeill

**3:20** Intermission.

**3:30 ENVR 427.** Exploring the relationships between the redox and mineral adsorption properties of DOM. B. McAdams, G. Aiken, J. Hudson, Y. Chin

**4:05 ENVR 428.** Dissolved organic matter-mediated solar degradation of endocrine-disrupting pollutants in natural waters. J. Gray, D.E. Latch, K. Daumit, G. Aiken

**4:30 ENVR 429.** Understanding DOM-organic contaminant attenuation of non-polar organic pollutants. M. Hsu, I.H. Suffet

**4:55 ENVR 430.** Effect of NOM and water hardness on Diffusive Gradient in Thin-Film (DGT) prediction of bioaccumulation by yellow lampmussel and fathead minnow. G.L. Mills, R. Philipps, R. Bringoff

**5:20** Concluding Remarks.

## Section E

San Francisco Marriott Marquis  
Sierra A

**Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse**

*Financially supported by AEESP*

X. He, G. Li Puma, D. Minakata, K. E. O'Shea, X. Quan, *Organizers*

D. D. Dionysiou, *Organizer, Presiding*

D. Hermosilla, *Presiding*

**1:30 ENVR 431.** 1,4-dioxane treatment by advanced oxidation processes: Current situation, future perspectives, and potential industrial implementation. D. Hermosilla, H. Barndök, N. Merayo, A. Blanco

**2:05 ENVR 432.** Withdrawn.

**2:30 ENVR 433.** TiO<sub>2</sub> Photocatalytic degradation of the flame retardant, tris (2-chloroethyl) phosphate: Kinetic and mechanistic studies. A. Abdullah, K.E. O'Shea

**2:55 ENVR 434.** Kinetic modeling of sunlight-assisted degradation of trace organic substances. H. Vo

**3:20** Intermission.

**3:35 ENVR 435.** Withdrawn

**4:00 ENVR 436.** Color-stripping of dye-containing wastewater by a new H<sub>2</sub>O<sub>2</sub>/Cu(II)-phenanthroline AOP. E. Walger, F. Molton, C. Duboc, N. Marlin, G. Mortha

**4:25 ENVR 437.** Withdrawn

**4:50 ENVR 438.** Is it time to replace traditional UV lamps by UV-Light Emitting Diodes (UVLEDs) in water treatment industry? Towards sustainable photovoltaic-powered UVLED photoreactors. M. Eskandarian

## Section F

San Francisco Marriott Marquis  
Sierra B

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

*Cosponsored by CEI, MEDI, ORGN and SCHB<sup>†</sup>*

*Financially supported by AEESP*

S. O. Obare, *Organizer*

N. Vaidya, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 439.** Sustainable applications of magnetic nano-catalysts and graphitic carbon nitrides. R.S. Varma

**1:55 ENVR 440.** Advancing greener peptide and oligonucleotide syntheses. M.E. Kopach

**2:15 ENVR 441.** Chemetry's Shuttle™ process: New technology platform to produce caustic soda and EDC while eliminating chlorine gas and saving energy. M.K. Leclerc

**2:35 ENVR 442.** Green process development using chiral resolution. N.A. Vaidya

**2:55 ENVR 443.** Evolution of chiral HPLC toward greener techniques. R. Romero

**3:15** Intermission.

**3:30 ENVR 444.** Biologics: The new frontier for green chemistry in the pharmaceutical industry. K. Budzinski, D. O'Connor

**3:50 ENVR 445.** Key consideration when choosing a manufacturing solvent in pharmaceutical manufacturing. A. Mehta

**4:10** Panel Discussion.

## Section G

San Francisco Marriott Marquis  
Sierra C

**Innovative Materials & Technologies for Sustainable Water Purification**

**Adsorption Technologies**

*Cosponsored by CEI*

E. L. Cates, J. Choe, J. Liu, D. Shuai, W. Zhang, *Organizers*

B. P. Chaplin, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 446.** Hemoglobin/iron oxide composite: Synthesis, characterization and adsorption of organic dyes. M. Essandoh, R.A. Garcia

**1:55 ENVR 447.** Cationic materials for reversible, selective perchlorate trapping. S. Oliver

**2:15 ENVR 448.** Selective silica separations from waste water using ion-exchange media. K. Sasan, T.M. Nenoff, P.V. Brady, J. Krumhansl

**2:35 ENVR 449.** Withdrawn.

**2:55** Intermission.

**3:10 ENVR 450.** Removal of oxyanion pollutants from water by bicomponent metal oxide adsorbents. Y. Zou, Y. Wang

**3:30 ENVR 451.** Removal of heavy metals from drinking water using hydrothermal char. M.T. Timko

**3:50 ENVR 452.** Rapid removal of phosphate from wastewater using magnetized fast pyrolysis biochar from waste Douglas fir. A.G. Karunanayake, M. Crowley, R. Anderson, T.E. Misna

**4:10 ENVR 453.** Withdrawn.

**4:30 ENVR 454.** Removal of perfluoroalkyl substances from water using molecularly engineered coatings on sand and silica. P. Edmiston

**4:50 ENVR 455.** Arsenic, cadmium, nickel and lead adsorption mechanism, kinetics and thermodynamics of copper based and iron based metal organic framework. A. Yurdusen, Y. Yurum

## Section H

San Francisco Marriott Marquis  
Sierra J

**From the Bench to the Field: Evaluating Innovative Remediation & Detection Technologies**

S. R. Al-Abad, H. Henry, *Organizers, Presiding*

**1:30 ENVR 456.** Unexpected ring cleavage products from OH<sup>•</sup> and SO<sub>4</sub><sup>•-</sup> treatment of contaminants. J. Van Buren, C. Prasse, B. Skeel, D.L. Sedlak

**1:50 ENVR 457.** Mechanisms on the impacts of alkalinity, pH and chloride on heterogeneous persulfate activation for groundwater remediation. W. Li, H. Liu

**2:10 ENVR 458.** Enhanced bioremediation of PAH contaminated soils: Combining novel molecular techniques with targeted bioaugmentation strategies. L. Redfern, C.K. Gunsch

**2:30 ENVR 459.** Investigating polychlorinated biphenyl biodegradation potential in contaminated sediments with chemical and molecular biology approaches. Y. Liang, A. Martinez, J. Ewald, A. Awad, J.L. Schnoor, T. Mattes

**2:50** Intermission.

**3:10 ENVR 460.** Metagenomic analysis of mobile elements and phage in Trichloroethene (TCE) dechlorinating communities. R. Keren, V. Brisson, M. Xinwei, M. Yujie, K. Yu, J.F. Banfield, L. Alvarez-Cohen

**3:30 ENVR 461.** Probing active acidophilic methanotrophs involved in chlorinated solvent biodegradation. Y. Shao, K. Chu

**3:50 ENVR 462.** Bioprocess development for 1,4-dioxane treatment: Bench through field investigation. F. Shirazi, A. Razavi, A. Gregg, C. McGrath, N. Hlavacek, J. Salanitro

**4:10 ENVR 463.** Biomarkers for validating natural and enhanced biodegradation of 1,4-dioxane in groundwater. P. Gedalanga, Y. Miao, A. Madison, T. Richards, W. Gierke, H. Holbrook, R. Mora, D. Chiang, S. Mahendran

**4:30 ENVR 464.** From infancy to full-scale demonstration: The twenty year development of electrokinetically-enhanced bioremediation for successful treatment of chlorinated solvents in clays and silts. N.D. Durant, J. Wang, E. Cox, D. Gent

## Section I

San Francisco Marriott Marquis  
Sierra K

**Science & Perception of Climate Change**

*Cosponsored by CEI and CHED*

*Financially supported by AEESP*

S. O. Obare, *Organizer*

E. Schoffers, *Organizer, Presiding*

**1:30 ENVR 465.** How culture shapes the climate change debate. A.J. Hoffman

**2:10 ENVR 466.** Climate science literacy: An imperative for the next generation. G.P. Foy

**2:40 ENVR 467.** Facing the new world of climate disruption. J.A. Bell

**3:00 ENVR 468.** Visualizing and understanding the science of climate change. P.G. Mahaffy

**3:30 ENVR 469.** Why do students respond favorably to attempts to teach climate change? G.M. Bodner

<sup>†</sup> Cooperative Cosponsorship

**3:55 ENVR 470.** Does science get lost in translation? How popular media frames the climate change debate. E. Schoffers

**4:15 ENVR 471.** Educating communities about the impact of climate change. C.M. Crudden

**4:35 ENVR 472.** ACS action needed to influence attitudes and behavior on climate change. B.Z. Shakhshiri

**5:00** Panel Discussion.

### Mineral-Water Interface Chemistry

Sponsored by GEOC, Cosponsored by COLL and ENVR

### Recent Developments in TSCA Regulation: New Requirements for Chemicals in Commerce

Sponsored by CHAL, Cosponsored by CHAS, ENVR and I&EC

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

Sponsored by CATL, Cosponsored by ENVR and I&EC

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Organic Oxygenates

Sponsored by CATL, Cosponsored by COLL and ENVR

## WEDNESDAY MORNING

### Section A

San Francisco Marriott Marquis  
Salons 10/11

### Great Achievements in Environmental Science & Technology: James J. Morgan Award Symposium

Financially supported by ES&T Journal, ES&T Letters

A. Grostern, Organizer

D. Sedlak, Organizer, Presiding

**8:00** Introductory Remarks.

**8:05 ENVR 473.** Biological and chemical activities of extracts from plastics collected from the North Pacific Gyre and plastics treated with UV-light. D. Schlenk, S.L. Coffin, J. Gan

**8:30 ENVR 474.** Explaining the presence of respiratory tract opportunistic bacterial pathogens in drinking water systems. L. Raskin, S. Haig, N. Kotlarz, J. LiPuma

**8:55 ENVR 475.** Stable isotope view of the formation of *N*-nitrosodimethylamine during water disinfection with chloramine. T.B. Hofstetter, S. Spahr, U. von Gunten

**9:20 ENVR 476.** Is bioremediation of PAH contaminated soil worth it? S. Simonich

**9:45 ENVR 477.** Photochemical conversions at the interfaces of semiconductor hybrids for environmental applications. W. Choi

**10:10** Intermission.

**10:25 ENVR 478.** Impacts of the Minamata Convention on mercury in Asia. N. Selin, A. Giang, L.C. Stokes, E.S. Corbitt, D.G. Streets, V.J. Karplus, D. Zhang, K.M. Mulvaney, M. Li, C. Li, S.Y. Kwon

**10:50 ENVR 479.** Investigation into the transfer of biological species from the ocean to the atmosphere: Mother nature's way of controlling climate? K.A. Prather, C. Gaston

**11:15 ENVR 480.** Working on environmental challenges as an engineer gone wrong. M.S. Mauter

**11:45** Concluding Remarks.

### Section B

San Francisco Marriott Marquis  
Salons 12/13

### Oxidation Processes, Nanoparticles & Membranes in Water & Wastewater Treatment: A Symposium in honor of Prof. Jun Ma

#### Nanoparticles & Nanomaterials

Financially supported by Sciex China

J. Fang, Organizer

D. D. Dionysiou, V. K. Sharma, Organizers, Presiding

**8:00** Introductory Remarks.

**8:05 ENVR 481.** Nanostructured eco-materials based on clay minerals: Synthesis and applications in organic contaminants transformation and heavy metal removal. C. Wang

**8:30 ENVR 482.** Application of natural organic matter coated magnetic iron oxide nanoparticles for the remediation of arsenic and selenium. M. Rashid, Y. Cai, G. Sterbinsky, K.E. O'Shea

**8:50 ENVR 483.** Withdrawn.

**9:10 ENVR 484.** Nanoparticles removed by  $AlCl_3$  in the process of coagulation. L. Zhang

**9:30 ENVR 485.** Advances of nano-sized metal oxides formed *in situ* for the enhanced coagulation of surface water and removal of heavy metals, algae. L. Wang, Y. Liu, J. Ma

**9:50** Intermission.

**10:05 ENVR 486.** Synthesis of novel carbon spheres and their supported Fe nanoparticles for removal of metronidazole. X. Wang

**10:25 ENVR 487.** N-doped carbon nanotubes for advanced oxidation processes. R.R. Rocha, O. Soares, A. Gonçalves, J. Órfão, J. Figueiredo, M.R. Pereira

**10:45 ENVR 488.** Catalytic effects of carbon nanomaterials in abiotic transformation of organic contaminants: Implications for water and wastewater treatments. W. Chen, L. Duan, C. Zhang, M.B. Tomson, P.J. Alvarez

**11:05 ENVR 489.** Development and application of layered carbon materials in advanced oxidation processes for water purification. F. Qi, B. Xu, Z. Song

**11:25 ENVR 490.** Investigations on oxidation processes, nanoparticles, and membranes in water and wastewater treatment with engineering applications. J. Ma, J. Jiang, P. Wang, Y. Zhou, Y. Gao, H. Cheng, X. Liu, D. Song

### Section C

San Francisco Marriott Marquis  
Salons 14/15

### Chemical Principles of Environmental, Cellular & Organismal Nanotoxicology

Cosponsored by COLL

C. Celle, L. L. Charlet, J. Simonato, C. Vulpe, Organizers

B. Gilbert, S. Lehman, Organizers, Presiding

D. Arndt, Presiding

**8:00 ENVR 491.** Contribution of phagolysosomal membrane permeability to micro and nanoparticle toxicity. A. Holian

**8:30 ENVR 492.** Structure activity relationships of engineered nanomaterials in inducing NLRP3 inflammasome activation and chronic lung fibrosis. T. Xia

**9:00 ENVR 493.** Imogolite nanotubes as model HARN: Synthesis strategies and toxicological assessment. A. Mason, C. Levard, E. Doelsch, A. Avellan, C. Mauroy, W. Liu, J. Rose, C. Santaella, W. Achouak

**9:20 ENVR 494.** Impact of silver nanowire length and diameter on rainbow trout RTgillW1 and RTgutGC cell lines. D. Arndt, D. Toybou, J. Simonato, C. Celle, B. Gilbert, L.L. Charlet, C. Vulpe, S. Lehmann

**9:40 ENVR 495.** Toward safer silver nanowires by design: Modulation of characteristics and evaluation of dermal toxicity. S. Lehmann, B. Gilbert, M. Viau, D. Toybou, J. Simonato, C. Celle, T. Maffei, L.L. Charlet

**10:00** Intermission.

**10:20 ENVR 496.** Spectroscopic insights into the role of defects in nano-bio interactions. R. Podila, J. Brown

**10:50 ENVR 497.** Identifying the molecular mechanisms responsible for differences in toxicity of complex nanomaterials across organisms. R. Klaper, J. Zozich, J. Crago, B. Curtis, V. Feng, M. Hang, R.J. Hamers, C.L. Haynes, E. Melby, C.J. Murphy, N. Niemuth, G. Orr, T.A. Qiu, K. Zhang

**11:10 ENVR 498.** Biological impact of nanoscale lithium-intercalating battery materials to model bacterium *Bacillus subtilis*. V. Feng, M. Hang, T. Linn, B. Miller, R.J. Hamers

**11:30 ENVR 499.** Integrated chemical and toxicological investigation of fullerene after UV/UV-chlorine drinking water treatment. C. Zhang, Q. Zhang

### Section D

San Francisco Marriott Marquis  
Golden Gate C1

### Novel Membrane Materials & Processes for Water Purification

D. Jassby, B. Mi, Organizers, Presiding

**8:00 ENVR 500.** Artificial water channel based membranes. M. Kumar, Y. Shen, T. Ren

**8:30 ENVR 501.** Artificial water channels exhibiting enhanced dipolar water translocation. M.D. Barboiu

**8:50 ENVR 502.** Two-dimensional  $MoS_2$  nanosheets: An emerging material for advanced water separation membranes. Z. Wang, S. Zheng, J. Urban, B. Mi

**9:10 ENVR 503.** Covalent organic frameworks as novel membrane materials. L. Valentino, M. Matsumoto, W.R. Dichtel, M. Abdulsalam, A. Livingston, B.J. Marinas

**9:30 ENVR 504.** Polycrystalline metal-organic framework membranes for water purification. D. Zhao, X. Wang

**9:50** Intermission.

**10:10 ENVR 505.** Development of polymer-graphene oxide based filter coatings for simultaneous removal of heavy metals, nitrate and microorganisms. D.F. Rodrigues, P. Bandara, E.T. Nades

**10:40 ENVR 506.** Understanding graphene oxide swelling properties in aqueous phase. S. Zheng, J. Urban, Q. Tu, S. Li, B. Mi

**11:00 ENVR 507.** Breathable graphene oxide toxicant barriers. R. Spitz, M. Cruz, N. Mahfouz, Y. Qiu, R. Hurt

**11:20 ENVR 508.** Co-assembly of graphene oxide and magnetic bimetallic nanoparticle for highly efficient removal of tetracycline. P. Tabrizian, S. Rahaman

### Section E

San Francisco Marriott Marquis  
Sierra A

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEESP

D. D. Dionysiou, X. He, G. Li Puma, K. E. O'Shea, X. Quan, Organizers

D. Minakata, Organizer, Presiding

N. H. Ince, Presiding

**8:00 ENVR 509.** Single, simultaneous and sequential applications of ultrasonic frequencies to eliminate pharmaceutical residues in water. N.H. Ince, A. Ziyhan Yavas

**8:35 ENVR 510.** Kinetic, product, and computational studies of the ultrasonically induced degradation of 4-methylcyclohexanemethanol (MCHM). D. Cui, A.M. Mebel, L.E. Arroyo-Mora, H. Holness, K. Furton, K.E. O'Shea

**9:00 ENVR 511.** High performance Magnéli phase reactive electrochemical membranes for oxidation and reduction of water contaminants. B.P. Chaplin, S. Nayak

**9:25 ENVR 512.** Co-effects of UV/ $H_2O_2$  and natural organic matter on the surface properties and colloidal stability of cerium oxide nanoparticles. X. Wu, C.W. Neil, H. Jung, Y. Jun

**9:50** Intermission.

**10:00 ENVR 513.** Abatement of polychloro-1,3-butadienes in aqueous solution by ozone, UV-photolysis, and advanced oxidation processes ( $O_3/H_2O_2$  and UV/ $H_2O_2$ ). M. Lee, T. Merle, D. Rentsch, S. Canonica, U. von Gunten

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**10:25 ENVR 514.** Treatment of 11-nor-9-carboxy- $\Delta^9$ -tetrahydrocannabinol (THC-COOH) through advanced oxidation processes. Y. Park, A. Mackie, G. Gagnon

**10:50 ENVR 515.** Withdrawn.

**11:15 ENVR 516.** Use of multivariable analysis (anova) to compare irradiation sources on diuron destruction by photocatalysis using TiO<sub>2</sub>-P25 Impregnated with Sm<sup>3+</sup>, Eu<sup>3+</sup> and Gd<sup>3+</sup>. J. Torres Torres, J. Arevalo Perez, H. Perez Vidal, I. Cuauhtemoc Lopez

**11:40 ENVR 517.** Treatment of emerging contaminants by UV/H<sub>2</sub>O<sub>2</sub> in water detoxification & reuse applications. Y. Huang, Y. Liu, W. Abdelraheem, K.H. Cochran, E.G. Xu, S.D. Richardson, D. Schlenk, D.D. Dionysio

### Aquatic Photochemistry

Cosponsored by GEOC

Financially supported by AEESP

W. Arnold, V. Lin, *Organizers*

K. P. McNeill, *Organizer, Presiding*

**8:30 ENVR 518.** Identification and toxicity testing of the photochemical degradation products of octyl methoxycinnamate, a common organic UV filter chemical. C. Berg, H. Stein, J. Maung, L. O'Connor, A. Pagano, M.G. Paulick, L. MacManus-Spencer

**8:50 ENVR 519.** Photochemical fate of lampricides in tributaries of the Great Lakes. C.K. Remual, M. McConville, A. Ward

**9:10 ENVR 520.** Effect of agricultural dissolved organic matter on the photolytic fate of poultry antibiotics. K. Mangalgi, L.M. Blaney

**9:30 ENVR 521.** p-Nitroanisole/pyridine and p-nitroacetophenone/pyridine actinometers revisited: Quantum yield corrections based on ferrioxalate. J.R. Laszakovits, S. Berg, J. O'Brien, K.H. Wammer, C.M. Sharpless

**9:50 ENVR 522.** Singlet oxygenation of dienes in water and methanol: Domoic acid, sorbate, and sorbic alcohol. M. Jaramillo, K.E. O'Shea

**10:10** Intermission.

**10:20 ENVR 523.** Photomineralization of 5-halogenosalicylic acids: A self-sustained reaction via the formation of Light Induced Secondary OH precursors (LIS-OH). R. Tafer, M. Sleiman, P. De sainte claire, P. Vicendo, A. Boulkamh, C. Richard

**10:40 ENVR 524.** Compound specific isotope analysis of aqueous photo-degradation of substituted chlorobenzenes. E. Passeport, N. Zhang, L. Wu, H. Herrmann, B. Sherwood Lollar, H. Richnow

**11:00 ENVR 525.** QSARs for phenols and phenolates: Oxidation potential as a predictor of reaction rate constants with photochemically produced oxidants. W. Arnold, Y. Oueis, M. O'Connor, J. Rinaman, M. Taggart, R. McCarthy, K. Foster, D.E. Latch

**11:20 ENVR 526.** Chemically accurate aqueous redox potentials for organic pollutants via high-speed cyclic voltammetry and Molecular Dynamics (MD)/Equation-of-Motion Coupled Cluster (IP-EOM-CCSD) simulations. M. Paul, D. Ruuska, S.N. Eustis

**11:40 ENVR 527.** Use of 4-(dimethylamino) benzonitrile to probe the photosensitizing and inhibitory effects of dissolved organic matter. S. Canonica, F. Leresche, L. Ludvíková, D. Heger, P. Klan, U. von Gunten

### Innovative Materials & Technologies for Sustainable Water Purification

#### Membrane & Other Treatment

Cosponsored by CEI

E. L. Cates, B. P. Chaplin, J. Liu, D. Shuai, W. Zhang, *Organizers*

J. Choe, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ENVR 528.** Pseudocapacitive deionization: Desalination of water using high capacity MnO<sub>2</sub> electrodes. S. Hand, R. Cusick

**8:55 ENVR 529.** Molecular insight of ethinyl-estradiol (EE2) interaction with polymer membranes in waste water purification. C.D. Domínguez Bope, A. Nalaparaju, N.K. Chun, Y. Cheng, B. Cao, L. Lu

**9:15 ENVR 530.** Effect of pre-ozonation and membrane modification with carbon nanotubes on fouling control. J. Guo

**9:35 ENVR 531.** Porous CNT Joule heaters in ionizable environments and their use in desalination: Frequency dependent stability and application in MD. A.V. Dudchenko, C. Chen, A. Cardenas, J. Rolf, D. Jassby

**9:55** Intermission.

**10:10 ENVR 532.** Next generation of water purification membranes made of 2D nanomaterials: Promises and challenges. B. Mi, S. Zheng, Z. Wang, C. Finnerly

**10:50 ENVR 533.** Toward a multi-layered multi-functional filter: Using cellulose acetate electrospun nanofibers and renewable nanomaterials for water purification. C. Fausey, J.B. Zimmerman

**11:10 ENVR 534.** Nanoscale zero-valent iron in mesoporous carbon (nZVI@C): Stable nanoparticles for precious metal extraction. W. Teng, J. Fan, W. Zhang, D. Zhao

**11:30 ENVR 535.** Preventing regrowth of nitrosamines during wastewater reuse by manipulating chloramine chemistry. D. McCurry

## Section H

San Francisco Marriott Marquis  
Sierra J

### Poly- & Per-Fluoroalkyl Substances: Where, What, When, Why, Who & How

K. Chu, L. S. Lee, J. Liu, V. Yingling, *Organizers, Presiding*

**8:00 ENVR 536.** Perfluoroalkyl ether carboxylic acids: Occurrence in the Cape Fear river watershed and fate in drinking water treatment processes. D. Knappe, M. Sun, L. Dudley, E. Arevalo, M. Strynar, A. Lindstrom

**8:25 ENVR 537.** Minnesota Poly- and Perfluoroalkyl Substance (PFAS) megaplume: A case study of PFAS fate and transport and implications for site investigation and drinking water treatment. V. Yingling

**8:50 ENVR 538.** Poly- and perfluoroalkyl substances in soil following aqueous film forming foam deployment during firefighting efforts after the train derailment in Lac-Mégantic, Québec. S. Mejia-Avenidaño, G. Munoz, S. Vo Duy, M. Desrosiers, S. Sauvé, J. Liu

**9:15 ENVR 539.** Estimating the number PFAS contaminated airports in Canada. S. Milley, P. Fortin, N. Battye, D. Looch, I. Koch, D. Reynolds, K. Weber

**9:40** Intermission.

**10:10 ENVR 540.** Biodegradability of Polyfluoroalkyl Phosphates (PAPs), fluorotelomer alcohol-based surfactants. M. Lewis, M. Kim, N. Wang, K. Chu

**10:35 ENVR 541.** Isomer-Specific biotransformation of N-Ethyl Perfluorooctane Sulfonamide Ethanol (EtFOSE) in aerobic soil. J. Liu, G. Zhong, W. Li, S. Mejia-Avenidaño

**11:00 ENVR 542.** Sorption of Poly- and Perfluoroalkyl Substances (PFASs) relevant to Aqueous Film Forming Foam (AFFF)-impacted groundwater by biochars and activated carbon. X. Xiao, B. Ulrich, B. Chen, C.R. Higgins

**11:25 ENVR 543.** Fate and transport modeling of co-occurring PFOS, MTBE, and BTEX in a fractured chalk aquifer. I. Ross, J. Burdick, J. McDonough, J. Miles, J. Hurst, E. Houtz

**11:50** Concluding Remarks.

## Section I

San Francisco Marriott Marquis

### Whole Organism Metrology to Support Nanotoxicology Research in the Environment

S. K. Hanna, C. M. Sims, *Organizers*

M. Johnson, B. C. Nelson, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:35 ENVR 544.** Agglomeration of *Escherichia coli* with positively charged nanoparticles can lead to artifacts in a standard *Caenorhabditis elegans* toxicity assay. S.K. Hanna, A.R. Montoro Bustos, A.W. Peterson, V. Reipa, L.D. Scanlan, S. Hosbas Coskun, T. Cho, M. Johnson, V.A. Hackley, B.C. Nelson, M.R. Winchester, J.T. Elliott, E. Petersen

**9:00 ENVR 545.** High-throughput single-cell ICP-MS methods development and application to study algae and nanoparticles interaction and toxicity to unicellular organism cyanobacteria. H. Shi, K. Li, H. Zhang, H. Jiang, C. Stephan

**9:25 ENVR 546.** Separation, sizing, and quantitation of engineered nanoparticles in an organism model using inductively coupled plasma mass spectrometry and image analysis. M. Johnson, S.K. Hanna, A.R. Montoro Bustos, C.M. Sims, L. Elliott, A. Lingayat, A.C. Johnston, B. Nikoobakht, J.T. Elliott, D. Holbrook, K.C. Scott, K.R. Murphy, E. Petersen, L. Yu, B.C. Nelson

**9:50** Intermission.

**10:05 ENVR 547.** Single cell and single particle ICP-MS analysis of nanohybrids. J. Lead

**10:30 ENVR 548.** Systems-level approach to characterizing effects of ENMs in terrestrial organisms and ecosystems. C.M. Rico, M.G. Johnson, J.R. Reichman, C.P. Andersen

**10:55 ENVR 549.** Nanoparticle uptake in plant cells: A nano-CT and hyperspectral imaging study. A. Mason, A. Avellan, C. Levard, F. Schwab, D. Borschneck, C. Perrine, C. Santaelia

**11:20 ENVR 550.** Novel image and data fusion method to improve spatial resolution and spectral content of biological images using ToF-SIMS. T.M. Millilo, R. Fischione, A. Montes, J.A. Gardella

### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL

### Mineral-Water Interface Chemistry

Sponsored by GEOC, Cosponsored by COLL and ENVR

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

### Fundamental Structure-Activity Relationships: The Interface of Operando with Physical Sciences

Sponsored by CATL, Cosponsored by ENVR and I&EC

### Elucidation of Mechanisms & Kinetics on Surfaces

### Organic Oxygenates

Sponsored by CATL, Cosponsored by COLL and ENVR

## WEDNESDAY AFTERNOON

### Section A

San Francisco Marriott Marquis  
Salons 10/11

### Pesticides in Surface Water: Monitoring, Modeling, Mitigation, Risk Assessment & Regulation

Financially supported by Compliance Services International (CSI)

Y. Luo, D. Young, *Organizers*

J. Gan, K. S. Goh, *Organizers, Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 551.** Agricultural and urban pesticide signatures in wadeable streams from regional stream-quality studies. L.H. Nowell, B.J. Mahler, P.W. Moran, M. Shoda, J.E. Norman, P.C. Van Metre, W.W. Stone

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡ Cooperative Cosponsorship

- 1:55 ENVR 552.** Reconnaissance study of current-use pesticides in 12 urban and agricultural surface water sites in California. M.L. Hladik, J. Orlando
- 2:15 ENVR 553.** Pesticides in wastewater: Linking pesticide use patterns to sewershed monitoring results. J. Teerlink, R. Budd, Y. Xie, C. Alaimo, T.M. Young
- 2:35 ENVR 554.** Influence of rainfall event characteristics on urban pesticide runoff. A. Gorgoglione, F. Bombardelli, T.M. Young
- 2:55 ENVR 555.** Concentrations of synthetic pyrethroids in surface water and sediment from agricultural and urban land use areas. J. Giddings, J. Frew, D. Campana, J. Wirtz, B. Finch
- 3:15** Intermission.
- 3:35 ENVR 556.** Passive samplers for *in situ* monitoring of pesticides in urban surface water. J. Gan, W. Lao, C. Liao, A. Xue, J. Richards, K.A. Maruya
- 3:55 ENVR 557.** Continuous Low Level Aquatic Monitoring (C.L.A.M.) samplers for organic contaminant screening in urban runoff: Development of an analytical approach. M. Vasquez, S. Mohammed, H. Tsai, G. Cho, M. Ensminger
- 4:15 ENVR 558.** Analyses of polar pesticides and glyphosate in Mekong Delta. N. Tran-Thi, M. Do, L. Truong, T. Nguyen, T. Nguyen, Q. Chau, L. Tran, D. Orange, P. Behra
- 4:35 ENVR 559.** Environmental monitoring of systemic insecticides in surface water ecosystems: Development and application of an ultrasensitive and automated analytical method. J.M. Montiel León, S. Vo Duy, G. Munoz, M. Amyot, S. Sauvé
- 4:55 ENVR 560.** Desorption of known persistent organic pollutants from atmospheric dust and black carbon into aquatic ecosystems. T. Togashi, C. Bowyer, R.A. Lyons
- 5:15** Concluding Remarks.

## Section B

San Francisco Marriott Marquis  
Salons 12/13

### Advances in Resource Recovery & Conservation in Water Systems

Cosponsored by AGFD, CEI and GEOC

S. Ahuja, L. M. Blaney, T. H. Boyer, *Organizers, Presiding*

**1:30** Introductory Remarks.

- 1:40 ENVR 561.** Urea hydrolysis characterization and inhibition by chemical addition. H. Ray, D. Saetta, T.H. Boyer
- 2:00 ENVR 562.** Urea hydrolysis inhibition in waterless urinals for water conservation and nutrient recovery. D. Saetta, T.H. Boyer
- 2:20 ENVR 563.** Electrochemical stripping to recover nitrogen from source-separated urine. W.A. Tarpeh, K.L. Nelson
- 2:40 ENVR 564.** Life cycle comparison of urine source separation and centralized wastewater treatment. T.H. Boyer, K. Landry
- 3:00** Intermission.
- 3:20 ENVR 565.** Advanced spatial modeling and lifecycle assessment for real world implementation of decentralized nitrogen recovery. O. Kavvada, W.A. Tarpeh, A. Horvath, K.L. Nelson

- 3:40 ENVR 566.** Solution to pollution is not dilution: An integrated system for total nutrient recovery from source separated urine. N. Jagtap
- 4:00 ENVR 567.** Mechanisms and modeling of pathogen fate in pilot scale nutrient recovery reactors. H. Bischel, K. Udert, T. Kohn
- 4:20 ENVR 568.** Physical-chemical interactions of biochar and pharmaceuticals in synthetic urine. A. Solanki, T.H. Boyer
- 4:40 ENVR 569.** Fate of human BK polyomavirus through urine diverted for fertilizer. H. Goetsch, N. Love, M. Imperiale, K. Wigginton
- 5:00** Concluding Remarks.

## Section C

San Francisco Marriott Marquis  
Salons 14/15

### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Advanced Analytical Techniques to Assess Chemical Profiles

Cosponsored by AGRO

K. L. Armbrust, G. P. Cobb, P. Saranjampour, *Organizers, Presiding*

- 1:30 ENVR 570.** Combining chemical and bioanalytical methods to screen for emerging contaminants in California's receiving waters. K.A. Maruya, A. Mehinto, M. Raphael, E.D. Nelson, E. Hoh, S.A. Snyder, R. Fadness, J. Lyons
- 1:55 ENVR 571.** Regional trends in sediment quality in southern California: Responses to multiple stressors. S. Bay, N.G. Dodder, D. Gillett, K. Schiff
- 2:20 ENVR 572.** Examining urban metabolism and contaminants of emerging concern in coastal environments: A pilot study in Hong Kong and Taipei. S. Burket, J. Zheng, K. Chambliss, S. Chung, B.W. Brooks
- 2:45 ENVR 573.** Dissolved PAHs and PBDEs in the Narragansett Bay Watershed using passive polyethylene samplers. W. Zhao, M. Khairy, M. Cai, R. Lohmann
- 3:10** Intermission.
- 3:30 ENVR 574.** Ecotoxicological assessment of Polycyclic Aromatic Hydrocarbons (PAHs) and metals in the Mississippi River coastal watershed and offshore shoaling regions of the northern Gulf of Mexico. L. Basirico, R.J. Portier, H. Rockett
- 3:55 ENVR 575.** Quantifying Polycyclic Aromatic Hydrocarbons (PAHs) distribution and accumulation in coastal Louisiana using natural radioisotope tracers. K. Maiti, P. Adhikari, W. Bam
- 4:20 ENVR 576.** Assessment of emerging contaminants from wastewater treatment systems along Louisiana coastal and estuarine waterways. M.S. Miles
- 4:45 ENVR 577.** Stereoisomer-specific distribution of 1,2,5,6,9,10-hexabromocyclododecane and 1,2-dibromo-4-(1,2-dibromoethyl)cyclohexane in sediment and marine organisms from the South China Sea. Y. Ruan, X. Zhang, J.C. Lam, B. Zhu, P.K. Lam
- 5:10 ENVR 578.** Distribution and abundance of microplastic pollution on Sandy Hook Bay beaches is higher than on New Jersey coastal beaches. K. Veasey, S. Rosenstein

## Section D

San Francisco Marriott Marquis  
Golden Gate C1

### Novel Membrane Materials & Processes for Water Purification

D. Jassby, B. Mi, *Organizers, Presiding*

- 1:30 ENVR 579.** Novel membranes with special wetting properties for anti-fouling and anti-wetting membrane distillation. Z. Wang, Y. Huang, S. Lin
- 2:00 ENVR 580.** Accurately determining convective heat transfer coefficients in membrane distillation cases. M.S. Mauter, M. Leitch, G. Lowry
- 2:20 ENVR 581.** Modification of permeate surface by hydrophilization to enhance flux in membrane distillation for desalination. S. Ragnath, S. Roy, S. Mitra
- 2:40 ENVR 582.** Desalting water with electric double-layers: Assessing impacts of material chemistry and operation strategies on capacitive deionization energy consumption and cost. S. Hand, R. Cusick
- 3:00** Intermission.

- 3:20 ENVR 583.** Sunlight enables reduced graphene oxide/bacterial nanocellulose ultrafiltration membranes to resist biofouling. Y. Jun, Q. Jiang, D. Ghim, S. Tadeipalli, H. Kwon, K. Liu, Y. Min, J. Luan, S. Singamaneni
- 3:50 ENVR 584.** Surfactant-stabilized oil separation from water using ultrafiltration and nanofiltration. X. Zhu, A.V. Dudchenko, D. Jassby

- 4:10 ENVR 585.** Integration of reactive ceramic membrane with ozonation for advanced treatment of reclaimed water. X. Zhang
- 4:30 ENVR 586.** Novel nanohybrids enables microwave radiation to disinfection water. N.B. Saleh
- 4:50 ENVR 587.** Integration of *in-situ* ozonation and ceramic UF membrane for effective algae and MC-LR removal and membrane fouling control in the treatment of algal-rich water. Z. Zhang, Y. Tao, X. Zhang

## Section E

San Francisco Marriott Marquis  
Sierra A

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEESP

- X. He, D. Minakata, K. E. O'Shea, X. Quan, *Organizers*
- D. D. Dionysiou, G. Li Puma, *Organizers, Presiding*
- A. Ghauch, *Presiding*
- 1:30 ENVR 588.** Degradation of antibiotics in UV-persulfate activated systems: Application to Chloramphenicol. A. Ghauch, M. Amasha, A. Baalbaki, R. El Asmar, O. Tantawi
- 2:05 ENVR 589.** Electrochemical enhancement of oxidation process using persulfate activated by nanosized zero-valent iron. C. Kim, I. Hwang
- 2:30 ENVR 590.** Selective degradation of sulfamethoxazole by peroxymonosulfate without activating agents: Self-activation and nonradical pathways. R. Yin, W. Guo, H. Wang, J. Chang, N. Ren

- 2:55 ENVR 591.** Activation of persulfate with vanadium species for PCBs degradation: A mechanistic study. G. Fang, W. Wu, C. Liu, Y. Deng, D. Zhou
- 3:20** Intermission.

- 3:35 ENVR 592.** Effect of synthesis parameters in the removal of 4-chlorophenol under visible light irradiation using ammonium iron (II) sulfate-doped nano-titania photocatalyst. F.A. Villaluz, M. Lu, M.G. de Luna
- 4:00 ENVR 593.**  $\beta$ -Bi<sub>2</sub>O<sub>3</sub> thin films on different substrates for photodegradation of organic dyes. T. Gadhil, L. Gómez, M. Bizarro, J.C. Medina, P. Jagdale, A. Hernández-Gordillo, A. Tagliaferro, S.E. Rodil
- 4:25 ENVR 594.** Evaluation of heterogeneous photocatalysis degradation of ketoprofen in aqueous solution with catalysts TiO<sub>2</sub>/Mo/Ag. A. Suarez, V. Rodriguez Gonzalez, E.F. Sarria, L. Clavijo
- 4:50 ENVR 595.** Micromotors as tools for efficient water decontamination. D. Vilela Garcia, J. Parmar, S. Sanchez
- 5:15** Concluding Remarks.

## Section F

San Francisco Marriott Marquis  
Sierra B

### Aquatic Photochemistry

Cosponsored by GEOC

Financially supported by AEESP

W. Arnold, K. P. McNeill, *Organizers*

V. Lin, *Organizer, Presiding*

- 1:30 ENVR 596.** Characterizing the role of photochemical processes in the oxidation of hydrocarbons released during the Deepwater Horizon disaster. C.P. Ward, C. Reddy
- 1:50 ENVR 597.** Time dependence of aldehyde and ketone photoproduct generation from crude oil-seawater systems under solar irradiation. X. Cao, M.A. Tarr
- 2:10 ENVR 598.** Steric hindrance reduces aquatic photochemical transformation rates of alkylated sulfur heterocycles. P. Saranjampour, K.L. Armbrust, B. Marx
- 2:30 ENVR 599.** Photolysis of aromatic pollutants in salty water and ice. T.F. Kahan, A. Stathis, P. Malley, J. Grossman
- 2:50 ENVR 600.** Petroleum provides model compounds to assess the compositional and structural controls of dissolved organic matter photoreactivity. P. Zito, M.A. Tarr, D.C. Podgorski
- 3:10** Intermission.

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**3:20 ENVR 601.** Investigating the photochemical pathways of organic sulfur in forming COS and CS<sub>2</sub> in natural waters. **M. Modiri Gharehveran, A. Shah**

**3:40 ENVR 602.** Counter-ions influence nitrate photolysis yields through altering interfacial concentrations. **K.M. Callahan, D. Tobias**

**4:00 ENVR 603.** Characterization of photooxidants in atmospheric particles. **R. Kaur, C. Anastasio**

**4:20 ENVR 604.** Is gas-aerosol particle interface the same as the air/water interface? **Y. Rao, Y. Wu, X. Li, Y. Wu, Y. Qian, H. Dai**

**4:40 ENVR 605.** From the desert to the city: Dust as a photochemical source of hydroxyl radical and singlet oxygen in aqueous aerosol. **S.A. Styler, S.R. Schneider, C.D. Cote**

## Section G

San Francisco Marriott Marquis  
Sierra C

### Innovative Materials & Technologies for Sustainable Water Purification

#### Photocatalytic

*Cosponsored by CEI*

E. L. Cates, B. P. Chaplin, J. Choe, J. Liu, W. Zhang, *Organizers*

D. Shuai, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ENVR 606.** Boosting the photocatalytic activity of m-BiVO<sub>4</sub> with Pd nanodomains and BiOBr nanosheets dual heterojunction: Highly efficient photocatalytic degradation of polychlorinated biphenyls. **E. Zahran, M. Palmi, S. Angarano, M.R. Knecht, L. Bachas**

**1:55 ENVR 607.** Tailored graphitic carbon nitride: Selective production of oxidative species and applications for organic micropollutant removal. **Q. Zheng, D. Shuai**

**2:15 ENVR 608.** Synthesis and application of highly reductive TiO<sub>2</sub>-based photocatalysts for hexavalent chromium and nitrate removal. **G. Chen, H. Liu**

**2:35 ENVR 609.** Microreactor-inspired photocatalytic PBR for intensified solar photocatalysis: A study of the effects of packing material on light absorption. **B. Ramos, S. Ookawara, A.S. Teixeira**

**2:55** Intermission.

**3:10 ENVR 610.** Towards multifunctionality in water treatment: Developing photoactive selective adsorbents for inorganic contaminants using nano-enabled biomaterials. **L. Pincus, J. Yamani, J.B. Zimmerman**

**3:30 ENVR 611.** Designing photocatalytic nano-adsorbents with greater specificity through shape and size using advanced spectroscopy techniques. **A.W. Lounsbury, N. Billmyer, J. Yamani, D. Peak, J.B. Zimmerman**

**3:50 ENVR 612.** Physical and chemical characterization of iron (III) oxide produced by SORAS technique for the removal of arsenic in drinking water. **E. Araya, J. Valverde-Cerdas, J.M. Cubero-Sesin, D. Méndez, L.G. Romero**

**4:10 ENVR 613.** Antimicrobial applications of visible-light-responsive photocatalysts. **H. Shen, D. Shuai**

## Section H

### Poly- & Per-Fluoroalkyl Substances: Where, What, When, Why, Who & How

K. Chu, L. S. Lee, J. Liu, V. Yingling, *Organizers, Presiding*

**1:30 ENVR 614.** Encapsulation of legacy and emerging perfluoroalkyl substances by cyclodextrins. **M.J. Weiss-Errico, Z. Hopkins, D. Knappe, K.E. O'Shea**

**1:55 ENVR 615.** Protective effects of  $\beta$ -cyclodextrin in biological systems contaminated with perfluoroalkyl substances. **M.J. Weiss-Errico, K.E. O'Shea**

**2:20 ENVR 616.** Novel approach to the enhancement of PFAS adsorption in groundwater systems. **Y. Aly, M.F. Simcik**

**2:45 ENVR 617.** Selective and fast adsorption of perfluorooctane sulfonate from wastewater by magnetic fluorinated vermiculite. **S. Deng, P. Meng, G. Yu**

**3:10** Intermission.

**3:40 ENVR 618.** Abiotic transformation of perfluorooctane sulfonate by catalyzed permanganate under amenable in-situ conditions. **S. Park, L.S. Lee**

**4:05 ENVR 619.** Remediation of per- and polyfluoroalkyl substances using heat-activated persulfate. **T. Bruton, D.L. Sedlak**

**4:30 ENVR 620.** Remediation of perfluorinated surfactants in groundwater by injection of nanoscale zerovalent iron particles. **Y. Zhang, Y. Zhi, J. Liu, S. Ghoshal**

**4:55 ENVR 621.** Degradation of Poly- and Per-Fluoroalkyl Substances (PFAS<sub>n</sub>) using photocatalyst zinc oxide. **K. Chu, Y. Shao**

**5:20** Concluding Remarks.

## Section I

San Francisco Marriott Marquis  
Sierra K

### Whole Organism Metrology to Support Nanotoxicology Research in the Environment

S. K. Hanna, M. Johnson, *Organizers*

B. C. Nelson, C. M. Sims, *Organizers, Presiding*

**1:30 ENVR 622.** Development of correlative optical microscopy and focused ion beam tomography for quantitation of metal nanoparticles in whole cells. **K. Jeerage, A. Sanders**

**1:55 ENVR 623.** Single cell ICP-MS: Quantifying exposure and dose of gold and silver nanoparticles to freshwater algae. **R. Merrifield, J. Lead, C. Stephan**

**2:20 ENVR 624.** Optofluidic Surface Enhanced Raman Spectroscopy (SERS) interrogation for targeted detection of individual cells. **M. Willner, D. Graham, M. Zagnoni, P.J. Vikesland**

**2:45 ENVR 625.** Quantitative analysis of the physicochemical properties of cerium oxide nanomaterials and their influence on nano-bio interactions. **C.M. Sims, R.A. Maier, A.C. Johnston-Peck, J.M. Gorham, S.K. Hanna, V.A. Hackley, B.C. Nelson**

**3:10** Intermission.

**3:25 ENVR 626.** Transfer and accumulation of TiO<sub>2</sub> nanoparticles along a marine benthic food chain. **J. Zhao, Z. Wang, B. Xing**

**3:50 ENVR 627.** Toxicity studies of silver nanoparticles on the anaerobic sulfate reducing bacteria *Desulfovibrio alaskensis*. **M.O. Montes, J.M. Snitker**

**4:15 ENVR 628.** Effects of pH and dissolved organic carbon on the toxicity of silver nanowires to *Daphnia magna*: Acute toxicity and spICP-MS measurement of silver nanowire uptake. **L.D. Scanlan, M.D. Montano, N. Karunaratne, M. Eng, T. Cun, J.Y. Hsu, C. ter Haar, B. Gilbert, C. Vulpe**

**4:40 ENVR 629.** Monitoring toxicity of oral magnetite nanoparticles *in vivo* using drosophila melanogaster. **X. Bi**

### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

*Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL*

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

### Fundamental Structure-Activity Relationships: The Interface of Operando with Physical Sciences

*Sponsored by CATL, Cosponsored by ENVR and I&EC*

### Elucidation of Mechanisms & Kinetics on Surfaces

#### Mechanisms: Hydrogenation

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## WEDNESDAY EVENING

### Section A

Moscone Center  
Hall D

### Accurate Mass/High Resolution Mass Spectrometry for Environmental Monitoring & Remediation

*Cosponsored by ANYL*

T. Anumol, R. Marfil-Vega, T. M. Young, *Organizers*

**6:00 - 8:00**

**ENVR 630.** Screening and quantitation of micro-pollutants from sewage water in the process of bank filtration using UHPLC-HRAM. **E. George**

**ENVR 631.** Assessment of biotransformation of macrolide antibiotics using target and non-target analyses by ultraperformance liquid chromatography/quadrupole-time-of-flight mass spectrometry and antibiotic bioassay. **S. Terzic, N. Udikovic-Kolic, I. Krizman, I. Senta, I. Mihaljevi, T. Smital, M. Ahel**

**ENVR 632.** Withdrawn

**ENVR 633.** Polypropylene glycol surfactants and their degradation products as potential indicator compounds for shallow groundwater impacted by hydraulic fracturing fluids. **J.D. Rogers, I. Ferrer, E.M. Thurman, J. Rosenblum, A.R. Bielefeldt, J.N. Ryan**

**ENVR 634.** Microcystin screening in water samples using LC-MS/MS and triggered information dependent acquisition for non-targeted variant detection. **R.A. Trenholm, B. Vanderford**

**ENVR 635.** Levels, profiles and potential risks of dioxins and dioxin-like compounds in atmosphere surrounding industrial sources. **G. Liu, M. Zheng, L. Yang, R. Jin, Q. Zhu**

**ENVR 636.** Determination and quantitative of plant metabolites by using triple quadrupole liquid chromatography coupled to mass spectrometry. **Y. Huang, L. Zhao, A.S. Adeleye, T. Anumol, A.A. Keller**

**ENVR 637.** Withdrawn

**ENVR 638.** Use of gas chromatography orbitrap mass spectrometry for small molecule discovery: Iodinated disinfection byproducts as case study. **C. Postigo, C. Cojocariu, S.D. Richardson, P. Silcock, D. Barceló**

**ENVR 639.** Python script to streamline non-targeted GCxGC/TOFMS data analysis of remediated soil samples. **I. Titalay, O. Ogba, L. Chibwe, E. Hoh, P. Cheong, S.L. Simonich**

### Section A

Moscone Center  
Hall D

### Advances & Applications in Water Sensing Technologies for Drinking Water, Re-Use, Agri-Tech & Research

P. L. Schorr, *Organizer*

**6:00 - 8:00**

**ENVR 640.** Withdrawn

**ENVR 641.** Nano-sized TiO<sub>2</sub> thin film synthesis and characterization on quartz slides, borosilicate beads and quartz cylinders for use in photocatalytic degradation of organic contaminants. **M. Russell, S.R. Kanel, D. Kempisty**

**ENVR 642.** Engineering analysis of water reuse through water sensing spectrophotometers. **P.L. Schorr**

### Section A

Moscone Center  
Hall D

### Advances in Resource Recovery & Conservation in Water Systems

S. Ahuja, L. M. Blaney, T. H. Boyer, *Organizers*

**6:00 - 8:00**

**ENVR 643.** Effect of humic analogue on microbial leaching of iron from hematite into seawater. **A. Aneksampant**

**ENVR 644.** Phosphorus recovery using pelletized adsorptive materials: Study of desorption for potential reuse. **E. Martin, M. Nadagouda, S. Chae**

**ENVR 645.** Integrated seawater aquaculture and agriculture as an avenue for food and energy security in arid regions. **Z. Almheiri**

**ENVR 646.** Efficacy of Hydrotalcite-based nanocomposites for sorbing heavy metal in industrial wastewater. **Y. Li, J. Ma, P.J. Alvarez**

**ENVR 647.** Phosphate ion exchange on cross-linked cationic surfactant micelles across dialysis membranes. **M. Chen, C.T. Javvert**

‡ Cooperative Cosponsorship

## Section A

Moscione Center  
Hall D

### Applications of Cheminformatics & Computational Chemistry in Environmental Health

C. Grulke, A. J. Williams, *Organizers*

6:00 - 8:00

ENVR **648.** Integrating chemometrics and computational chemistry in the workflow of suspect screening analysis of polycyclic aromatic hydrocarbon biotransformation products. I. Titaley, L. Chibwe, K.R. Glaesemann, P. Cheong, S.L. Simonich

ENVR **649.** Molecular dynamics study of the influence of activated carbon pore structures on dioxin adsorption. F. Gao, S. Ou, C. Liu, H. Li, B.J. Teppen, C.T. Johnston, S. Boyd

ENVR **650.** Progress towards a general model to predict hydroxylated polycyclic aromatic hydrocarbon stabilities. D. Walden, I. Titaley, O. Ogba, S. Simonich, P. Ha-Yeon Cheong

ENVR **651.** Delivering an informational hub for data at the National Center for Computational Toxicology. A.J. Williams, C. Grulke, J. Smith, K. Mansour, A. McEachran, G. Patlewicz, J. Fitzpatrick, A. Richard, J. Edwards

## Section A

Moscione Center  
Hall D

### Aquatic Photochemistry

Cosponsored by GEOC

Financially supported by AEESP

W. Arnold, V. Lin, K. P. McNeill, *Organizers*

6:00 - 8:00

ENVR **652.** FT-ICRMS analysis of photochemically degraded and burned surrogate oil. M.D. Seivert, C.A. Davis, A.M. McKenna, Y. Corilo, R.A. Snyder, W.H. Jeffrey, P.P. Vaughan

ENVR **653.** Direct and indirect photochemical transformation of imidazolium, pyridinium, pyrrolidinium, and piperidinium ionic liquids. S.G. Pati, W. Arnold

ENVR **654.** Formation of brown carbon in snow and ice through SOA-like chemistry. M. Barr, A.M. Grannas, V. Boschi

ENVR **655.** Photochemical transformation of nicotine in the wastewater effluent. L. Lushi, S. Yan, W. Song

ENVR **656.** Photoreactivity of plant elicitor acibenzolar S-methyl in solutions and on plant surfaces. M. Sleiman, M. Stawinoga, S. Wang, P. Goupil, C. Richard, P. De Sainte Claire

ENVR **657.** Removal of arsenic by UV photoreduction in the presence of dithionite. B. Jung, A. Abdel-Wahab

ENVR **658.** Photochemical reactions of hematite-soot mixtures in various environmentally representative scenarios. J. Rodriguez, J. Rodriguez, A. Reddy, H. Casique, A.M. Johansen

ENVR **659.** Fluorescence spectroscopy for determining photochemical degradation rates of natural and industrial crude oil with DOC and GC×GC/TOF-MS analysis. K. Snyder, N. Mladenov, A. Nour, C. Campbell, M. McConnell, R. Luna, E. Hoh

ENVR **660.** Modeling singlet oxygen production by dissolved organic matter. J.R. Laszakovits, Y. Chin, A. MacKay, C.M. Sharpless

ENVR **661.** Exploration of the role of ambient conditions in organic aerosol growth via photosensitized oxidation of VOCs. M. Galloway, M.G. Ippolito, J.M. Ackendorf, A. Sager

ENVR **662.** Antioxidant response to singlet oxygen production under light stress on the polyphasic rise of chlorophyll a fluorescence induction curves of *Botryococcus braunii*. F.M. Joaquin, G. Gulihur, K. Doble, V. Barcelo Bovea, K. Griebenow

ENVR **663.** Biological toxicity of extracts from photochemically degraded crude oil water accommodated fractions. P. Bann, S. Bifulco

ENVR **664.** Fractionation and biological toxicity studies of crude oil water accommodated fractions with dispersant. C. Brannon, P. Bann, S. Bifulco, J. Fair, M.D. Seivert, W.H. Jeffrey, P.P. Vaughan

## Section A

Moscione Center  
Hall D

### Bioprocesses for Engineered Nanomaterials in Soil-Plant Systems

J. C. White, B. Xing, Y. Yang, *Organizers*

6:00 - 8:00

ENVR **665.** *In-situ* study of the evolution of quantum dots in contact with the biofilm/mineral interface. M. Desmau, G. Alexandre, C. Levard, G. Ona-Nguema, V. Vidal, J. Stubbs, G. Charron, Y. Sivy, M.F. Benedetti

ENVR **666.** Effects of carbonaceous nanomaterials on soil-grown soybean and its symbiosis with nitrogen-fixing bacteria: A mesocosm study. Y. Wang, D.C. Bouchard, R.M. Nisbet, J.P. Schimel, J.L. Gardea-Torresdey, P. Holden

ENVR **667.** Molecular mechanisms underlying biotransformation of carbon nanotubes by *Mycobacterium vanbaalenii* PYR-1. Y. You, J. Angermann, B. Xing, S. Kim, O. Kweon, C. Cerniglia, Y. Yang

## Section A

Moscione Center  
Hall D

### Chemical Principles of Environmental, Cellular & Organismal Nanotoxicology

Cosponsored by COLL

C. Celle, L. L. Charlet, B. Gilbert, S. Lehman, J. Simonato, C. Vulpe, *Organizers*

6:00 - 8:00

ENVR **668.** Stability and cytotoxicity of synthesized CeO<sub>2</sub> nanoparticles in water. Y. Lin, L. Shen, Y. Shi

ENVR **669.** Predictive insight into the silver nanomaterial protein corona fingerprint. M.R. Findlay, D.N. Freitas, M. Mobed-Miremedi, K. Wheeler

ENVR **670.** Exploring impacts of complex nanomaterials using the nematode *C. elegans*. N. Niemuth, M. Hang, X. Zhang, R.J. Hamers, C.J. Murphy, R. Klaper

ENVR **671.** Characterization of biophysical characteristics that impact individual peptide binding to an engineered nanomaterial within a complex blood protein corona. M. Nguyen, K. Wheeler

ENVR **672.** Modeling the environmental fate of graphene oxide and its transformation products in surface waters. D.C. Bouchard, B. Avant, X. Chang, L. Guiney, Y. Han, M. Henderson, M. Hersam, C. Knights, S. Martin, J. Spear, R.G. Zepp

ENVR **673.** Characterization of the dissolution properties of copper oxide nanoparticles in cell culture media and their effects on *in-vitro* toxicity. S. Jang, W. Kim, E. Cho, S.I. Yang

ENVR **674.** Inhibition effects of silver nanoparticles and ions on toxic airborne fungi. E. Cho, J. Lee, S.I. Yang

ENVR **675.** Nanotoxicology of NMC, PAH-AuNP, Citrate-AuNP and *D. melanogaster*. B. Curtis, M. Hang, R.J. Hamers, X. Zhang, C.J. Murphy, R. Klaper

## Section A

Moscione Center  
Hall D

### Chemistry & Application of Advanced Oxidation Processes for Water Detoxification, Treatment & Reuse

Financially supported by AEESP

D. D. Dionysiou, X. He, G. Li Puma, D. Minakata, K. E. O'Shea, X. Quan, *Organizers*

6:00 - 8:00

ENVR **676.** Photodegradation of antibiotic in organic matter solution using H<sub>2</sub>O<sub>2</sub>/UV process. A.S. Batista, N. Silva, L. Gil da Barbara, I.V. Corrêa, A.S. Teixeira

ENVR **677.** Degradation of a toxic molecule in industrial effluents using UV/PS activated systems: Application to o-toluidine. A. Ghauch, A. Baalbaki, M. Amasha, S. Al Hakim, Y. Nehme, R. El Asmar

ENVR **678.** Withdrawn

ENVR **679.** Withdrawn

ENVR **680.** Withdrawn

ENVR **681.** Effects of bulk water temperature on PAH degradation by ultrasonically activated persulfate. W.P. Fagan, J. Zhao, L.K. Weavers

ENVR **682.** Withdrawn.

ENVR **683.** Gaseous VOC abatement in a Circulating Fluidized Bed (CFB) riser reactor: A Computational Fluid Dynamics (CFD) modeling approach. D. Matsumoto, L. Diniz, J.L. de Paiva, A.S. Teixeira, R. Guardani, T. Hewer

ENVR **684.** Photocatalytic decomposition of imidacloprid by TiO<sub>2</sub>-Fe<sub>3</sub>O<sub>4</sub> nanocomposite in a PV-UV-LED continuous photoreactor. M. Eskandarian, M. Fazli, M. Rasoulifard

ENVR **685.** Natural enhancement of Solar Disinfection (SODIS) via the photo-Fenton process towards bacterial and chemical contaminant elimination in developing countries. S. Giannakis, C. Pulgarin

ENVR **686.** Photocatalytic degradation of C.I. basic red 46 in thin film fixed bed photoreactor: Non linear regression analysis and intermediates. M. Berkani, M. Bouhelassa, B. Abdelkrim, M. Bouchareb, Y. Kadmi

ENVR **687.** Influence mechanisms of textile-dyeing sludge characteristics on degradation of anilines by integrated ultrasound-permanganate treatment. X. Ning, J. Liang, T. An, J. Sun, X. Lu, Y. Zhang

ENVR **688.** Efficient degradation of DBP by magnetic nano-fiber GO-MnFe<sub>2</sub>O<sub>4</sub> as ozonation catalyst in the water. Y. Ren, J. Ma, H. Zhang

ENVR **689.** Chloroperoxidase oxidative transformation of oxarsonone. Y. Tan, X. Wang, K.E. O'Shea

ENVR **690.** Bioactivity-oriented approach to investigate fate and transformation of selected personal care products during chlorination. L. Li, W. Han, K. Yeung

ENVR **691.** Simultaneous photocatalytic Cr(VI) reduction and ciprofloxacin oxidation over TiO<sub>2</sub>/FeO composite under aerobic conditions: Performance, durability, pathway and mechanism. Z. Diao

ENVR **692.** Elimination of analgesic residuals in water by ultrasound and ultrasound-assisted catalytic processes. A. Zilyan Yavas, N.H. Ince

ENVR **693.** Photocatalytic removal of toluene in a TiO<sub>2</sub>/SiO<sub>2</sub> circulating fluidized bed reactor. L. Diniz, D. Matsumoto, T. Hewer, A.S. Teixeira, J.L. de Paiva, R. Guardani

ENVR **694.** Withdrawn.

ENVR **695.** Application of iron mining residue for heterogeneous photo-fenton degradation of sulfathiazole and sulfamethazine. S.C. Ayala, P. Hammer, R. Pupo Nogueira

ENVR **696.** 17-Ethinylestradiol degradation promoted by persulfate activated with UV-light. C. Rackov, A.G. Camara, T.A. Ferreira, H.N. Maia de Oliveira, M. Vianna, O. Chivone-Filho, C.A. Oller do Nascimento

ENVR **697.** Semicontactor nanomaterials for solar photocatalytic activity. L. Gustin, B. Dallakoti, X. Cao, M.A. Tarr

ENVR **698.** Toxicity removal by electro-peroxone process. D. Amado Piña, G. Roa Morales, G. Santana Martínez, C. Barrera-Díaz, P. Balderas-Hernández, R. Romero Romero, R. Natividad

ENVR **699.** Ag nanoparticles stabilized with starch deposited on the TiO<sub>2</sub> and TiO<sub>2</sub>-CeO<sub>2</sub> systems. J.C. Arevalo Perez, J.G. Torres Torres, I. Sanchez Lombardo, A. Cervantes, A. Cordero, A.A. Silahua

ENVR **700.** Probing electron trapping energy states of TiO<sub>2</sub>-WO<sub>3</sub> composites and their consequences on photocatalytic activity for bisphenol A removal. G. Zerjav, S. Arshad, P. Djinic, A. Pintar

ENVR **701.** Removal of alkyl nitrate chemical contaminants in wastewaters using advanced oxidative processes. S. Arciva, B. Daws, S.P. Mezyk, M.P. Schramm

ENVR **702.** Bromine atom reactions under advanced oxidation process conditions. A. Lechner, S.P. Mezyk

ENVR **703.** Withdrawn.

ENVR **704.** Design of hierarchical photocatalyst for waste water treatment. B. Barbero, C.M. Parlett, A.F. Lee, K. Wilson

ENVR **705.** Withdrawn.

ENVR **706.** QSAR prediction of rate constants for the reaction of ozone with organic compounds using quantum chemical descriptors beyond HOMO. P.R. Tentscher, U. von Gunten

## Section A

Mosccone Center  
Hall D

**Chemistry of Water Treatment from Sorption to Taste & Odor: Symposium honoring the Contributions of Mel Suffet**

M. J. McGuire, J. A. Pedersen, F. L. Rosario, *Organizers*

6:00 - 8:00

**ENVR 707.** Photochemical reactivity of thermally-altered water soluble organic matter. **K.D. Couch**, F.L. Rosario, G. McKay, Y. Yu, A. Retuta

**ENVR 708.** Characterizing the properties and release kinetics of dissolved organic carbon from thermally treated soils in arid climates. **A. Retuta**, Y. Yu, F.L. Rosario

**ENVR 709.** Do all reduced sulfur compounds in foul air vary in the same manner over a daily fluctuation in the wastewater treatment process? **T. Vitko**

## Section A

Mosccone Center  
Hall D

**Clay Minerals Selectivity & Its Environmental Applications**

M. ElSayed, *Organizer*

6:00 - 8:00

**ENVR 710.** Use of NMR carbon-type distributions to assess the extent of preferential adsorption of natural organic matter components. **M. Khalaf**, G. Chilom, **J.A. Rice**

**ENVR 711.** Sorption of substituted pyridines to aluminosilicate clays: Building predictive models for cationic amines. **D. Haas Freeman**, J. Sullivan, D. Vasudevan

## Section A

Mosccone Center  
Hall D

**Contaminants in Urban & Coastal Estuarine Ecosystems**

*Cosponsored by AGRO*

K. L. Armbrust, P. Saranjampour, *Organizers*

6:00 - 8:00

**ENVR 712.** Determination of total copper concentration and copper speciation in Humboldt Bay, California through use of competitive ligand exchange-adsorptive cathodic stripping voltammetry. **M.A. Amezcua**, N. Tuttle, M.P. Hurst

**ENVR 713.** Soil degradation and sorption of azithromycin in simulated California river and river bed conditions. **M.L. Maier**, R.S. Tjeerdema

**ENVR 714.** Anti-depressant and legacy contaminant fate in the Gulf of Mexico. **J. Landry**, K.L. Armbrust

**ENVR 715.** Potential mechanisms of 2,6-dichloro-4-nitroaniline (Dicloran) phototoxicity to *Pimephales promelas* (Fathead Minnow). **E.N. Vebrosky**, K.L. Armbrust

**ENVR 716.** Analysis of metabolites of Polycyclic Aromatic Hydrocarbons (PAH) in fish bile: A 15-year temporal survey of PAH exposure in Puget Sound, WA. **C. Gallagher**, D. Da Silva

**ENVR 717.** From sediment to top predators: Broad exposure of polyhalogenated carbazoles in San Francisco Bay (U.S.A.). **Y. Wu**, H. Tan, R.A. Sutton, **D. Chen**

**ENVR 718.** Withdrawn.

## Section A

Mosccone Center  
Hall D

**Contaminants of Emerging Concern in Natural & Engineered Systems**

*Cosponsored by AGRO, ANYL and CEI*

L. M. Blaney, A. J. Hernandez, *Organizers*

6:00 - 8:00

**ENVR 719.** UV-driven antibiotic-to-antibiotic transformation pathways and kinetics of sulfonamides. **D. Ocasio**, H.A. Adejumo, K. Mangalgiri, K. He, L.M. Blaney

**ENVR 720.** Photolytic fate of organo-selenium and -tin chemicals and their carbon analogs in the natural environment. **M. Hopanna**, S. Steiny, L.M. Blaney

**ENVR 721.** Photocatalytic degradation of 1,4-dioxane and trihalomethanes by zinc oxide. **M. Hwangbo**, Y. Shi, E. Claycomb, B.S. Abada, K. Chu

**ENVR 722.** Occurrence and fate of low molecular weight aldehydes in potable water reuse systems. **E. Marron**, C. Prasse, D. Sedlak

**ENVR 723.** Occurrence of phthalic acid esters and alkylphenols in the Asan Lake region, Korea. **Y. Lee**, T. Kim, J. Lee, W. Choe, **K. Zoh**

**ENVR 724.** Withdrawn.

**ENVR 725.** Enabling time dependent predictions of emerging organic chemicals in the environment using the OrganoFate model. **R. Thakar**, D. Elsbury, K. Garner, A.A. Keller

**ENVR 726.** Toxicity and degradation of a polyalkylene glycol-based hydraulic fluid. **Y. Yang**, K.K. Das, R. Murnane, J. Hou, V. Edivveerasingam

**ENVR 727.** Identification of PAH oxidation products on secondary organic aerosols. **A. Kramer**, S. Simonich, A. Zellenyuk, K. Suski, D. Bell

**ENVR 728.** Hexachlorobutadiene in agricultural soils from the Yangtze River Delta of China. **J. Sun**, X. Li

**ENVR 729.** Adsorptive removal of contaminants of emerging concern from water with imprinted zeolite carbon composites functionalized with extra-framework Cu<sup>2+</sup>. **B. Fernandez-Reyes**, K.M. Gonzalez-Ramos, K. Ortiz-Martinez, A.J. Hernandez

**ENVR 730.** Predicting sorption of anionic pharmaceuticals to soils: An evaluation of potential probe compounds. **L. Alper**, A. Lopez, D. Vasudevan

**ENVR 731.** Characterizing in-situ methane-enhanced biostimulation potential for 1,4-dioxane biodegradation in groundwater. **V. Sadeghi**, D. Chiang, R. Mora

**ENVR 732.** Withdrawn.

**ENVR 733.** New analytical method for analysis of a broad range of chemicals found in Australian waters and wastewaters. **A. Kahl**

## Section A

Mosccone Center  
Hall D

**Environmental Chemistry: Undergraduate & Graduate Classroom, Laboratory & Local Community Learning Experiences**

*Cosponsored by ANYL and CHED*

*Financially supported by AEESP*

M. A. Benvenuto, E. Roberts-Kirchhoff, *Organizers*

6:00 - 8:00

**ENVR 734.** Seasonal differences in mercury concentrations in fish from Flint Creek, Alabama: Implications for monitoring. **P. Okweye**

**ENVR 735.** Measurement of hazardous air pollutants with regard to environmental justice policy in the Atlanta metropolitan region. **W. Hudson**, D. Patel, **K. Zimmermann**

**ENVR 736.** Adsorption of herbicide on the model solid/liquid interface. **P. Orlović-Leko**, K. Vidović, I. Ciglenečki

**ENVR 737.** Localized surface plasmon resonance and electrochemical analysis of electron transfer mediators. **D. Panfilov**, P.W. Hall

**ENVR 738.** Effects of wastewater treatment on Azithromycin. **E. Avila**, A. Hermelinda, M. Perri

**ENVR 739.** Withdrawn.

**ENVR 740.** Gas-phase mercury cycles during May at urban/industrial sites on Svalbard. **S. Le Cras**, M.H. Hermanson, A. Nikulina

**ENVR 741.** Synthesis of a series of podand ligands all incorporating long-chain aliphatic moieties. **G. Nguyen**, J. Pothoof, S. Tinawi, M.A. Benvenuto

**ENVR 742.** Analysis of mineral cosmetics with a handheld X-ray fluorescence analyzer. **S. Thomas**, **G. Nguyen**, D. Stokes, T. Tieu Ngo, M.A. Benvenuto, E. Roberts-Kirchhoff

## Section A

Mosccone Center  
Hall D

**From the Bench to the Field: Evaluating Innovative Remediation & Detection Technologies**

S. R. Al-Abed, H. Henry, *Organizers*

6:00 - 8:00

**ENVR 743.** Enhanced field screening methods of soil gas in petroleum hydrocarbon contaminated sites. **C.S. Chen**, C. Tien, C. Kuo

**ENVR 744.** Evaluation of oxidizer hazard in sorbents used to solidify transuranic waste for the waste isolation pilot plant. **B.A. Crawford**, T. Hayes, J. Lucchini, C. Chancellor, C. Poulos

**ENVR 745.** Development and demonstration of high pressure direct push jet injection for controlled emplacement of treatment agents in low-permeability geologic matrices. **N.D. Durant**, C. Ross, W. Slack

**ENVR 746.** Utilization of multivariate analysis for evaluating geo-material performance on fluoride removal from water. **E. Kim**, J. Park, S. Han, Y. Lim, K. Kong, J. Do

**ENVR 747.** Identification and quantification of polycyclic aromatic hydrocarbon breakdown products in thermally remediated soil from the Wyckoff/Eagle Harbor Superfund site. **L. Santiago Delgado**, E.L. Davis, S. Simonich

**ENVR 748.** Electrokinetic enhanced amendment transport at a contaminated field site. **D.M. O'Carroll**, A. Chowdhury, J. Gerhard, N. Head, A. Inglis, A. Nunez Garcia

## Section A

Mosccone Center  
Hall D

**General Posters**

S. R. Al-Abed, S. O. Obare, *Organizers*

6:00 - 8:00

**ENVR 749.** Removal of microcystin-LR using powdered activated carbon: Effects of water quality and activated carbon properties. **A. Bajracharya**, J.J. Lenhart

**ENVR 750.** Adsorption of fluoride in aqueous solution using Jamun (*Syzygium cumini*) seed derived activated carbon. **R. Araga**, C. Sharma

**ENVR 751.** Fabrication and characterization of surface-patterned thin-film composite membranes. **O. Heinz**, S.H. Maruf, M. Aghajani, A.R. Greenberg, Y. Ding

**ENVR 752.** Image analysis for assessment of nanomaterial uptake and elimination kinetics. **T. Kefela**, M. Mortimer, P. Holden

**ENVR 753.** Modification of graphene oxide with magnesium oxide: Synthesis, characterization, and demonstration with high-rate adsorption of methylene blue. **M. Heidarizad**, S.S. Sengor

**ENVR 754.** Caffeine analysis of wastewater using online SPE-LC high resolution mass spectrometry. **S. Spence**, P.R. Gardinali

**ENVR 755.** Correlation of chemical composition of wood smoke and diesel exhaust particulate matter with light absorbance and toxicity. **K. Kukowski**, B.C. Brinchnann, R. Cochran, J.A. Øvreik, A. Kubatova

**ENVR 756.** Factors affecting the fate of dissolved organic carbon in groundwater. **L.K. McDonough**, A. Baker, D. O'Carroll, M. Andersen

**ENVR 757.** Comprehensive real-time fenceline monitoring using SIFT-MS. **V.S. Langford**, B.J. Prince, D.B. Milligan, T. Wilks, T. Potter

**ENVR 758.** Removal of chromium(VI) and chromium(III) ions from aqueous solution using bio-char generated from agricultural waste products. **D.F. Gonzalez**, K. Flores, M. Gonzalez, A. Cantu, C. Serna, T.M. Eubanks, J.G. Parsons

**ENVR 759.** Effect of adsorber and desorber unit interactions on N-nitrosamine formation during amine-based carbon capture. **Z. Wang**, Z. Zhang, W. Mitch

**ENVR 760.** Characterization of heavy metal adsorption using precipitates in acid mine water from abandoned metal mine. **J. Kim**, J. Kim, C. Seo, J. Seo, Y. Kim

**ENVR 761.** Quantitative analysis of tetrabromobisphenol-A and tribromobisphenol-A in dust from consumer electronics. **E. Gaulke**, C.R. Butler, A. Schoffstall, L.E. Lowe, **J.E. Owens**

**ENVR 762.** Comparison of the persistence of caffeine in constructed wetlands versus convention wastewater treatment systems. **P.R. Alvaro**, C. Tripp, M.P. Hurst

‡ Cooperative Cosponsorship

- ENVR 763.** Reduction of ferric iron in aqueous soot slurries. H. Casique, A. Reddy, C. Neuman, **A.M. Johansen**
- ENVR 764.** Detailed examination of particulate matter from waste vegetable oil biodiesel combustion: Oxidative potential relationships to fuel feedstock and blend ratio composition. **B. Holmen**, B. Rukavina, J. Kasumba, J. Reed, Y. Han, N.K. Fukagawa
- ENVR 765.** Novel approaches to the study of bio-based products and anaerobic digestion per compost environment standard. E.J. Parish, G. Ren, H. Honda, **S. Lee**, Y. Lo
- ENVR 766.** Novel development to the application of life cycle approach to design greener products. G. Ren, E.J. Parish, **H. Honda**, Y. Lo
- ENVR 767.** Novel approaches to the application of estimation methods to reduce carbon emission on climate change. G. Ren, E.J. Parish, H. Honda, **Y. Lo**
- ENVR 768.** Influence of dissolved organic carbon on mercury transport in watersheds affected by historical gold and mercury mining in northern California. **C.N. Alpers**, J.A. Fleck, M. Marvin-DiPasquale, G. Aiken
- ENVR 769.** Identification of fungal genus level using DNA barcode method. D. Kim, D. Kang, J. Lee, E. Cho, S.I. Yang
- ENVR 770.** Relationships between dissolved organic matter and mercury cycling in California ecosystems affected by historic mining. **J.A. Fleck**, C. Alpers, M. Marvin-DiPasquale, G. Aiken
- ENVR 771.** Occurrence of micropollutants in the Han River, Seoul, Korea. **M. Kim**, S. Tak, T. Kim, J. Lee, W. Choe, Y. Lee, K. Zoh
- ENVR 772.** Light-based technology for surface disinfection. N. Wong, N. Zhan, **Q. Chang**, J. Kwan, K. Yeung
- ENVR 773.** Simplified method for concentrating volatile disinfection byproducts. **K.E. Furst**
- ENVR 774.** Biocomposite magnetic coated chitosan beads for removal of estrone products from water systems. **S.M. Rios-Bonilla**, V. Fernandez-Alos, O. Perales, F. Roman
- ENVR 775.** Effect of UV and chlorination-dechlorination tertiary treatment on pharmaceutical loads in Chicago WWTP effluent. **A. Welch**
- ENVR 776.** Evaluation of swellable organically modified silica passive samplers in complex matrices. **S. Pitell**, P. Edmiston
- ENVR 777.** Study of degradation products derived from hydrocortisone by ozonolysis. **T. Rahman**, T. Siddiquee
- ENVR 778.** Elimination of tetrakis (hydroxymethyl) phosphonium chloride from surface water using biochar as an adsorbent. **S.R. Akech**, O.O. Harrison, A. Saha
- ENVR 779.** Using waste products of the seafood industry to reduce anthropogenic carbon dioxide emissions. **B. Barnes**, P. Sharma, U. Onuchukwu, V. Volkis
- ENVR 780.** Investigation of anti-depressant load reduction in wastewater treatment plant effluent by hypochlorite disinfection. **R.A. Mole**, P. Edmiston
- ENVR 781.** Recyclable superparamagnetic adsorbent based on mesoporous carbon for sequestration of radioactive cesium. **S. Husnain**, W. Um, Y. Chang, Y. Chang
- ENVR 782.** Magnetite graphene oxide encapsulated in alginate beads for remediation of heavy metals contaminated wastewater. **C.V. Huong**, A.D. Dwivedi, T.T. Le, S. Seo, E. Kim, Y. Chang
- ENVR 783.** Comparing removal efficiencies of 1,4-dioxane and arsenite by nZVI-common oxidants system: Persulfate, peroxymonosulfate and hydrogen peroxide. **Y. Kang**, E. Kim, H. Yoon, D. Oh, Y. Chang
- ENVR 784.** Impacts of diverse nanoscale zero-valent iron on aquatic and terrestrial organisms: Physicochemical insight on nanomaterials. **H. Yoon**, M. Pangging, M. Jang, Y. Hwang, Y. Kang, J. Kim, Y. Chang
- ENVR 785.** Inhibition and gene expression of wastewater nitrifying enrichments exposed to cyanide. **V. Kapoor**, M. Elk, J. Santo Domingo
- ENVR 786.** Extraction chromatography using various thiosemicarbazone ligands for metal complexation and the potential environmental applications. **K. Richards**, E.C. Liscic
- ENVR 787.** Decomposition characteristics of model organic contaminants by persulfate/ZVI system. **Y. Kim**, H. Kwon
- ENVR 788.** Magnetization of silicotitanate for separation of cesium from aqueous phase using a magnetic separating system. **Y. Kim**, J. Kim, W. Lim, S. Choi, H. Kwon
- ENVR 789.** Detection of volatile arsenic-sulfur species in environments of high level of sulfide. **J. Zhang**, S. Jamison
- ENVR 790.** Chemical changes during anaerobic decomposition of hardwood, softwood, and old newsprint under mesophilic and thermophilic conditions. **F. De la Cruz**
- ENVR 791.** Implication of nanomaterial embedded polymer composites in the environment: Decomposition kinetics and nanorelease of environmentally aging CNT composites based of activation energy calculation. **C. Han**, E. Sahle-Demessie, A. Zhao, J. Wang
- ENVR 792.** Conceptual design of a cyclone separator for the separation and recovery of the immobilized anionic radionuclides using a flow analysis. **T. Park**, Y. Choi
- ENVR 793.** Influence of oxygen concentration in aqueous solutions of electrolyte on the process of singlet oxygen generation during electrochemical disinfection of contaminated water. **N. Barashkov**, T. Sakhno, I. Irgibayeva
- ENVR 794.** Development of an analytical method for the measurement of the metabolites of Organophosphate Flame Retardants (OPFRs) in human urine using liquid chromatography-tandem mass spectrometry. **J. She**
- ENVR 795.** Assessment of the interactions of herbicides with manganese dioxide to evaluate its availability as a possible remediation process. **E. Segura**, N. López-Santiago, A. Cenicerros, M.E. Gutierrez Ruiz
- ENVR 796.** Adsorption of copper and lead to ZnS nanomaterial. **J. Cantu**, J.G. Parsons
- ENVR 797.** Method development for the chromatographic/mass spectrometric detection of arsenic species in sulfidic waters. **A. Harper**, D. Bolden, J. Zhang
- ENVR 798.** Adsorption of chromium(VI) metal ions via amino modified biochar. **K. Flores**, D.F. Gonzalez, J.G. Parsons
- ENVR 799.** Analysis of heavy metal content in the Conasauga, Oostanaula and Coosa Rivers utilizing the PerkinElmer NexION 350D ICP-MS. W. Hudson, C. Fernandes, D. Jones, **K. Zimmermann**
- ENVR 800.** Alteration of membrane-adherent biofilm properties by acoustic cavitation. **A.N. Rosi**, I. Mergos, M. Olu, H. Verweij, P. Mouser, L.K. Weavers
- ENVR 801.** Oxidation of 3,5,6-trichloro-2-pyridinol by heat-activated persulfate. **R. Mogharbel**, F.M. Zullo, C. Yestrebtsky
- ENVR 802.** Reformulation of treatment system for remediation of polychlorinated biphenyls in paint. **A. Almutairi**, C.G. Lewis, K. Duranceau, C. Clausen, C. Yestrebtsky
- ENVR 803.** Dechlorination of octachlorodibenzofuran by zero valent magnesium in acidified ethanol system. **A. Mogharbel**, C. Yestrebtsky
- ENVR 804.** Wastewater analysis: Challenges and optimization of solid phase extraction methods. **C. Good**, P. Edmiston

### Green Chemistry & the Environment

Cosponsored by CEI

Financially supported by AEEESP

A. M. Balu, R. Luque, S. O. Obare, *Organizers*

6:00 - 8:00

**ENVR 805.** Withdrawn.

**ENVR 806.** Distribution of microplastic pollution in a tributary of the Three Gorges Reservoir: A case study in Xiangxi River. **K. Zhang**, H. Hu, X. Xiong, C. Wu, P.K. Lam

**ENVR 807.** Focal plane array-based micro-FT-IR imaging as an effective tool for microplastic monitoring within wastewater treatment facilities. **A.S. Tagg**, J.P. Harrison, M. Sapp, E.L. Bradley, C. Sinclair, J.J. Ojeda

**ENVR 808.** Bioactive compounds in okra seed extract as novel anti-hepatitis C virus agents. **B. Dayal**, K. Basun

**ENVR 809.** Microplastic size effect on sorption coefficient and toxicity of polychlorinated biphenyl. **R. Jiang**, W. Lin, E. Zeng

**ENVR 810.** Relative performance of different peroxide advanced oxidation processes on the Oil Sands Process-Affected Water (OSPW) remediation. **M. Meshref**, A. Singh, M. Belosevic, M. Mohamed Gamal El-Din

**ENVR 811.** Fe-assisted hydrothermal liquefaction and sequential catalytic cracking for production of light olefins from protein-rich microalgae. **Y. Hirano**, Y. Arita, Y. Kasai, N. Funakoshi, A. Nishimura, M. Taniguchi, K. Sagata, Y. Kita

**ENVR 812.** Nitrogen and sulfur content of natural organic matter. **S. Coleman**, J. Rice

**ENVR 813.** Reactions in poly( $\alpha$ -olefins): A replacement for alkane solvents. **T. Malinski**, M.L. Harrell, D.E. Bergbreiter

**ENVR 814.** Protecting palladium: Balancing stability and reactivity in support-tether design. **D. Paull**, S.P. George

**ENVR 815.** Influence of engineered nanoparticles on microorganism growth in the presence and absence of  $\beta$ -lactam antibiotics. **K. Current**, N.M. Dissanayake, S.O. Obare

**ENVR 816.** Influence of the engineered iron oxide nanoparticles on the growth and mutagenicity of microorganisms. **N.M. Dissanayake**, K. Current, S.O. Obare

**ENVR 817.** Conversion of carbon dioxide to formic acid mediated by light driven electron storage systems. **J.M. Arachchilage**, S.O. Obare

**ENVR 818.** Chemical speciation of anthropogenic nanoparticles. **S.O. Obare**

**ENVR 819.** Polymers that substantially degrade, decompose or depolymerize: Draft interpretation affecting the notification of new polymers under Canadian new substances notification regulations. **G. Hammond**

**ENVR 820.** Extracting calcium and strontium cations from hydraulic fracturing flowback water using pyridine based small molecules. **S.G. Tajc**

**ENVR 821.** Withdrawn.

**ENVR 822.** Monolithic aerogels of graphene-mixed metal oxides for air purification and disinfection. **W. Chen**, Z. Li, K. Yeung

### Innovative Materials & Technologies for Sustainable Water Purification

Cosponsored by CEI

E. L. Cates, B. P. Chaplin, J. Choe, J. Liu, D. Shuai, W. Zhang, *Organizers*

6:00 - 8:00

**ENVR 825.** Effects of biological decontamination on chemical contaminants in emergency drinking water. **E. Brack**, W. Zukas, N. Farhadi, M. McPartin, T. Tian

**ENVR 826.** Study on new method of TiO<sub>2</sub> nanorod arrays preparation and photocatalytic performance. **G. Wang**, Y. Shih, Y. Su

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**ENVR 827.** Nanoconfined water in graphene hydrogel as superadsorbents for water purification. J. Ma, Y. Sun, M. Yang, M. Zhang, F. Yu, F. Yang, K. Chu, J. Zheng

**ENVR 828.** Ceria nanoparticles for sustainable heavy metal water filtration application. M.J. King, L. MacManus-Spencer, M.E. Hagerman

**ENVR 829.** Reversible, selective trapping of perchlorate from water in record capacity by a cationic metal-organic framework. I. Colinas

**ENVR 830.** Withdrawn

**ENVR 831.** Cloning and expression of protocatechuate dioxygenase gene from *Klebsiella pneumoniae*: Application for degradation of sulfonated aromatic amines. S. Dixit, S. Garg

**ENVR 832.** Preparation and application of substrate-immobilized TiO<sub>2</sub> nano-photocatalysts for organic micropollutants removal. S. Hong

**ENVR 833.** Properties evolution of fresh nanoscale Zero-Valent Iron (nZVI) in aerobic and anaerobic water. A. Liu

**ENVR 834.** Synthesis of biochars using household and agricultural byproducts (orange peel, pistachio shells, and corn stover) and their application in lead adsorption from aqueous solutions. S. Mireles, H. Rivera, J. Kang, T. Trad, J.G. Parsons

**ENVR 835.** Withdrawn.

**ENVR 836.** Enhanced photoelectrochemical performance of the TiO<sub>2</sub> nanotube arrays sensitized with Fe<sub>3</sub>O<sub>4</sub>-graphene oxide for glycerol oxidation. N. Pico, M. Niño, Á. Meléndez

**ENVR 837.** Understanding on the effects of pH and organic carbon concentration on nutrients removal in SBR process for treating domestic wastewater. S. Lee, M. Park, S. Yeon, D. Park

**ENVR 838.** Individual water purification. W. Zukas, E. Brack, T. Tiano, J. Dunn, T. Oriard, Z. Gleason, K. Weitz, I. Norris

**ENVR 839.** Fundamental study on chromium biosorption by natural biomass. H. Yang, D. Park, N. Kim

**ENVR 840.** Modeling study of continuous biosorption process for metal removal and recovery by fermentation biowaste. N. Kim, J. Seo, H. Yang, D. Park

**ENVR 841.** Hydrothermal treatment of sewage sludge to improve biological nitrogen removal process. M. Park, S. Lee, S. Yeon, D. Park

**ENVR 842.** Optimization of anoxic-oxic process for the treatment of domestic wastewater with low C/N/P ratio. S. Yeon, S. Lee, M. Park, D. Park

### Integrated & Sustainable Environmental Remediation

*Cosponsored by CEI*

S. K. Brar, M. Cledon, R. Galvez, *Organizers*

6:00 - 8:00

**ENVR 843.** Comprehensive performance of vermiculite filter on treating typical pollutants. Y. Wang, M. Xing

**ENVR 844.** Iron stability on the inner surface of PVC-U drinking pipe. J. Wang, T. Tao

**ENVR 845.** Remediation of s-triazine herbicide spills via adsorption and biodegradation using hydrophobic bio-silica particles. S. Yeom, J.K. Sakkos, A. Aksan, L.P. Wackett

**ENVR 846.** Synthesis and application of chemically-modified solid wastes as filtering devices of antibiotics from wastewater. B. Sohn

**ENVR 847.** Synthesis and characterization of stabilized oxygen-releasing CaO<sub>2</sub> nanoparticles for soil remediation. C. Yeh, W. Chang, R. Wang, Y. Shih

**ENVR 848.** Synthesis of magnetic iron oxide nanoparticles for removal reactive black 5: Reaction mechanism. M. Chang, Y. Shih

**ENVR 849.** Soil organic matter in native prairies and prairie restorations: Structural studies of humic acids with carbon-13 NMR spectroscopy. A.K. Poladi, J.S. McConnell

**ENVR 850.** Soil organic matter in native prairies and prairie restorations: Humic and fulvic acid fractions. S. Bomma, K. Pallemati, N. Voleti, J.S. McConnell

**ENVR 851.** Soil organic matter in native prairies and prairie restorations: Organic carbon content. L.R. Morgan, B.M. Mullins, J.S. McConnell

**ENVR 852.** Distribution of soil phosphorus and nitrate in the Spring Lake watershed region of western Illinois. S. Nicioli, K.E. Ribordy, J. Boeckler, J.S. McConnell

**ENVR 853.** Metals removal from Acid Mine Drainage (AMD) using Bioelectrochemical System (BES). J. Liu, M. Peiravi

**ENVR 854.** Removal of oxyanion pollutants via cationic transition metal coordination polymers. D. Popple, S. Citrak, K. Tabler-Miller, A. Alvarenga, K. Stone-Hunter, S. Oliver

**ENVR 855.** Comparative analysis of compost and alkaline battery oxide amendments for reducing lead solubility and phytoavailability. N. Abo-Sido, C. Gallagher, G. Jerz, B. Love, D. Brabander

**ENVR 856.** CO<sub>2</sub> Mineralization and utilization by high-gravity carbonation process: Past, present and future. S. Pan, M. Wang, S. Pei, Y. Chen, P. Chiang

**ENVR 857.** Degradation of textile azo-dyes using enzymatic treatment with soybean peroxidase. L.G. Cordova Villegas, N. Biswas, K.E. Taylor

**ENVR 858.** Virucidal activity and mechanism of an antimicrobial surface coating. Q. Chang, H. Leung, J. Kwan, K. Yeung

### Novel Membrane Materials & Processes for Water Purification

D. Jassby, B. Mi, *Organizers*

6:00 - 8:00

**ENVR 865.** Novel membranes for sea water desalination via membrane distillation. S. Ragunath, S. Roy, S. Mitra

**ENVR 866.** Surface modification of reverse osmosis membrane by graphene oxide grafting with different oxidation degrees. W.H. Mak, D. Jun, B. McVerry, M. Kowal, X.W. Huang, R.B. Kaner

**ENVR 867.** Advanced membranes enabled by atomic layer deposition. Y. Wang

**ENVR 868.** Examining relationship of surface chemistry to silica scaling and combined silica-foulant fouling with modified RO membranes. A. Quay, T. Tong, M. Elimelech

## Section A

Moscone Center  
Hall D

### Pesticides in Surface Water: Monitoring, Modeling, Mitigation, Risk Assessment & Regulation

J. Gan, K. S. Goh, Y. Luo, D. Young, *Organizers*

6:00 - 8:00

**ENVR 869.** Flow-weighted sampling to measure efficacy of a constructed water quality treatment pond in Folsom, CA. M. Ensminger, L.R. Oki, S. Teh, J. Sisneroz, B. Pitton, L. Deanovic, M. Stillway, K.S. Goh

**ENVR 870.** Development of a California-based receiving waterbody model for pesticide registration evaluation. Y. Xie, Y. Luo, N. Singhasemanon, K.S. Goh

**ENVR 871.** Aquatic risk evaluation of new pesticide products as part of California pesticide registration – a preventive approach for surface water protection. N. Singhasemanon, Y. Luo, X. Deng

**ENVR 872.** Protecting surface water from pesticide contamination in California. K.S. Goh

**ENVR 873.** Analyses of surface water monitoring results for pesticides in agricultural areas of central coast and Southern California. X. Deng, D. Wang, K. Kelley, K.S. Goh

**ENVR 874.** Pesticide mitigation using wood-chip bioreactors in agricultural regions of California. S.D. Wagner, X. Deng, G. Bates, P. Krone-Davis, R. Clark, J. Adelaars, K.S. Goh

**ENVR 875.** Integrated vegetated ditch system reduces chlorpyrifos loading in agricultural runoff. B. Phillips

**ENVR 876.** Developing passive sampling methods for bioavailable current-used pesticides in sediment. W. Lao, G. Kim, K.A. Maruya

**ENVR 877.** Effectiveness of California's surface water regulations at lowering pyrethroid concentrations in surface waters. R. Budd, D. Wang, M. Ensminger

**ENVR 878.** Towards a spatio-temporal analysis of pesticide concentrations. S. Jiao, O. Sonmez, D. Long

**ENVR 879.** Analysis of 3 commercial tampon brands for presence of herbicide glyphosate. A. Corcoran, A. Hernandez, S. Koenig

### Pesticides in Surface Water: Monitoring, Modeling, Mitigation, Risk Assessment & Regulation

Financially supported by Compliance Services International (CSI)

K. S. Goh, D. Young, *Organizers*

J. Gan, Y. Luo, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 ENVR 895. Withdrawn.

8:25 ENVR 896. Examination of the relative contributions of aqueous and dietary uptake to pyrethroid accumulation in organisms at different aquatic trophic levels. J. Frew, J. Giddings

8:45 ENVR 897. Toxicity of pesticide mixtures in the USGS national water quality network. M. Shoda, W.W. Stone

9:05 ENVR 898. Characterization of sediment chemistry, sediment toxicity and macroinvertebrate communities in wadeable streams of the southeastern United States. P. Moran, N. Kemble, L.H. Nowell, I. Waite, C. Ingersoll, P. Van Metre, B.J. Mahler

9:25 ENVR 899. Electrolytic degradation of pesticides in surface water using an activated carbon-based electrode system. Y. Li, W. Mitch

9:45 Intermission.

10:05 ENVR 900. Urban surface water runoff mitigation of Fipronil and its primary degradation products. L. Greenberg, Z. Cryder, J. Richards, M. McGinnis, J. Gan

10:25 ENVR 901. Environmental fate of double-stranded RNA (dsRNA) biopesticides from RNA interference (RNAi)-based crop protection. K.M. Parker, M. Sander

10:45 ENVR 902. Mechanistic insight into remediation and isomerization of methyl-parathion by mixed metal oxide nanocomposites in aqueous solutions. S. Merlos, K. Nick, C.C. Perry, M.M. Allard

11:05 ENVR 903. Chirality in metolachlor can be used to date groundwater in agricultural settings. C.P. Rice, C.J. Hapeman, G. McCarty

11:25 ENVR 904. Implications of sorption nonlinearity on the environmental fate of penconazole. D.T. Kuo

11:45 Concluding Remarks.

## Section B

Mosccone Center  
3008

### Advances in Resource Recovery & Conservation in Water Systems

Cosponsored by AGFD, CEI and GEOC

S. Ahuja, L. M. Blaney, T. Boyer, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 ENVR 905. Nanowire-modified 3D electrode enabling low-voltage electroporation for water disinfection. Z. Huo, H. Hu, X. Xie

8:25 ENVR 906. Synthesis and microstructural characterization of novel manganese oxide coated titanium dioxide ceramic nanofiltration membranes for dye in wastewater filtration. J.K. Macharia, J. He, L. Achola, S.L. Suib

8:45 ENVR 907. Beneficial reuse of produced water from oil & gas fields. W. Stringfellow, M. Camarillo, N. Spycher, P.S. Nico

9:05 ENVR 908. Anaerobic digestion of renewable materials for biogas production: Experimental stage to the field. O.O. Adetule

9:25 ENVR 909. Microbial fuel cells integrate energy production with nutrient management in municipal wastewater plant sidestreams. K. Orner, C. Cools, J. Mihelcic, J.A. Cunningham

9:45 Intermission.

10:05 ENVR 910. Comparative transcriptomic analysis of lipid producing yeast *Cryptococcus albidus*. S. Vajpeyi, K. Chandran

10:25 ENVR 911. Silver recovery from laundry wastewater: Role of regeneration and detergent chemistry. T. Nawaz, S. Sengupta

10:45 ENVR 912. Selective removals of heavy metals (Pb<sup>2+</sup>, Cu<sup>2+</sup>, and Cd<sup>2+</sup>) from wastewater by gelation with alginate for effective metal recovery. F. Wang, X. Li

11:05 ENVR 913. Withdrawn.

11:25 ENVR 914. Effect of ion composition and electrode properties on electrochemical lithium ion recovery process for application in various source waters. S. Kim, J. Yoon

11:45 Concluding Remarks.

## Section C

Mosccone Center  
3002

### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Environmental Processes Affecting Chemical Availability & Toxicity

Cosponsored by AGRO

K. L. Armbrust, P. Saranjampour, R. A. Sutton, *Organizers, Presiding*

8:00 ENVR 915. Multiple stressors in coastal ecosystems: Measuring responses across biological scales and generations in model estuarine organisms. S. Brander

8:25 ENVR 916. Metal oxide nanomaterials in marine and estuarine organisms. C. Torres, G.N. Cherr

8:50 ENVR 917. Photolysis and phototoxicity of dibenzothiophene and 4,6-diethylidibenzothiophene in marine ecosystems. P. Saranjampour, E.N. Vebrosky, K.L. Armbrust

9:15 ENVR 918. Photolytic toxicological impacts of 2,6-dichloro-4-nitroaniline (Dicloran) in varying salinities on *Menidia beryllina* (Inland Silversides). E.N. Vebrosky, K.L. Armbrust

9:40 Intermission.

10:00 ENVR 919. Binding of antibacterial agents at Fe(III) oxyhydroxide surfaces: Experimental study and modeling. K. Hanna, R. Marsac, S. Martin, J. Boily

10:25 ENVR 920. Withdrawn.

10:50 ENVR 921. Synthesis, occurrence and risk assessment of chlorinated by-products of benzophenone-type UV filters in various aquatic matrices. M.M. Tsui, K. Ng, S. Chiu, T. Ma, Y. Ho, T. He, M.H. Lam, R. Kong, P.K. Lam, M.B. Murphy

11:15 ENVR 922. Physiological and behavioural impacts of Pacific ciguatera toxin-1 (P-CTX-1) on marine medaka (*Oryzias melastigma*). Y. Mak, J. Li, C. Liu, S. Cheng, P.K. Lam, J. Cheng, L. Chan

### Novel Membrane Materials & Processes for Water Purification

D. Jassby, B. Mi, *Organizers, Presiding*

8:30 ENVR 923. Structurally and synthetically designed next generation novel polyamides for reverse osmosis application. A. Roy

9:00 ENVR 924. High-performance thin-film composite forward osmosis membranes based on self-assembled amphiphilic block copolymer supporting substrate. Y. Hu, X. An

9:20 ENVR 925. Membrane surface modification by graphene oxide: *In situ* regeneration for ultra-micro fouling control. C. Finnerty, E. Garcia, C. Evans, R. Kaliff, B. Mi

9:40 ENVR 926. Carbon nanotubes-embedded, high-permeable polyamide thin-film composite membranes for desalination. H. Lee, T. Lee, H. Park

10:00 Intermission.

10:20 ENVR 927. Bacteria inactivation via x-ray-induced UVC radioluminescence: Toward in situ biofouling prevention in membrane modules. T. Johnson, E.A. Rehak, S. Sahu, D. Ladner, E.L. Cates

10:50 ENVR 928. Surface engineering of thin-film composite polyamide membranes with silver nanoparticles during their fabrication process for providing antifouling properties. Z. Liu, L. Qi, Y. Hu

11:10 ENVR 929. Photothermal and hydrophilic functionalization of reverse osmosis membranes for enhanced resistance of mineral scaling, organic, and bio-fouling. J. Ray, S. Tadepalli, S. Nergiz, K. Liu, L. You, Y. Tang, S. Singamaneni, Y. Jun

11:30 ENVR 930. Construction of a novel composite membrane with 3D structure for process intensification of membrane separation. C. Zhang, R. Xie, W. Wu, X. Li, Z. Liu, X. Ju, W. Wang, L. Chu

## Section E

### Applications of Cheminformatics & Computational Chemistry in Environmental Health

C. Grulke, A. J. Williams, *Organizer, Presiding*

8:00 ENVR 931. Generation of alternative assessment scores using T.E.S.T. and online data sources. T. Martin

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**8:25 ENVR 932.** Use of chemotypes for profiling and exploring the ToxCast chemical-assay landscape. **A. Richard**, C. Grulke, G. Patlewicz, C. Yang, A.J. Williams

**8:50 ENVR 933.** Identification and analysis of substructure fragments for developmental and reproductive toxicity endpoints within the Toxic Substances Control Act universe of chemicals. **D.T. Chang**, K.H. Markey, K. Mayo-Bean, W. Irwin, C. Baier-Anderson, C.J. Brinkerhoff, I. Shah, G. Patlewicz, A. Richard, S. Barone

**9:15 ENVR 934.** Ecological Threshold for Toxicological Concern (eco-TTC): Assessing the potential of a new tool for environmental hazard assessment. **A. Beasley**, D.T. Chang, M.G. Barron, S.E. Belanger, J.L. Brill, D. DeZwart, M. Embry, B.A. Farr, M. Halder, A. Kienzler, T.J. Norberg-King, R.R. Otter, H. Sanderson, P. Wilson

**9:40** Intermission.

**10:00 ENVR 935.** Cheminformatics technologies for chemical risk assessment. **D. Fourches**

**10:25 ENVR 936.** Using semi-automated curation workflows to collect, organize, and curate the data and models necessary to support the EPA CompTox chemical dashboard. **C. Grulke**, I. Thillainadarajah, R. Sayre, K. Mansouri, A.J. Williams, A. Richard

**10:50 ENVR 937.** Supporting read-across predictions of chemical toxicity using high-throughput text-mining. **N. Baker**, T. Knudsen, A.J. Williams, K. Crofton, G. Patlewicz

**11:15 ENVR 938.** New databases and software tools for exposomics and toxicological assessment. **Y. Djoumbou Feunang**, D.S. Wishart

**11:40** Panel Discussion.

## Section F

### Aquatic Photochemistry

*Cosponsored by GEOC*

*Financially supported by AEESP*

V. Lin, K. P. McNeill, *Organizers*

W. Arnold, *Organizer, Presiding*

**8:30 ENVR 939.** Biphenyl carboxylic acid probe pair for quantifying photochemically generated hydroxyl radical and excited triplet states in aqueous systems containing dissolved organic matter. **V. Lin**, M. Grandbois, K.P. McNeill

**8:50 ENVR 940.** Investigation of the coupled effects of molecular weight and charge transfer interactions on the optical and photochemical properties of dissolved organic matter. **G. McKay**, K.D. Couch, S.P. Mezyk, F.L. Rosario

**9:10 ENVR 941.** Fluorescence of humic acids in seawater. **L.T. Storchak**, D. Donaldson

**9:30 ENVR 942.** Photo-production of triplet excited states in effluent organic matter. **M. O'Connor**, K. Zimmerman, D.E. Latch, W. Arnold

**9:50 ENVR 943.** Transient absorption-based approach to estimate the photophysical properties of triplet dissolved organic matter. **M. Schmitt**, P.R. Erickson, K.P. McNeill

**10:10** Intermission.

**10:20 ENVR 944.** Using direct observation of singlet oxygen to determine triplet organic matter rate constants. **K.P. McNeill**, P.R. Erickson

**10:40 ENVR 945.** Inhibitory effect of dissolved organic matter on indirect phototransformations of organic contaminants. **S. Canonica**, U. von Gunten

**11:00 ENVR 946.** Development of the novel chemical probes for examining the triplet-excited state of organic matters. **H. Zhou**, L. Lian, S. Yan, **W. Song**

**11:20 ENVR 947.** Photochemical exposure of natural organic matter induces humification. **P.G. Hatcher**, D.C. Waggoner, N. DiDinato

**11:40 ENVR 948.** Photochemical formation of carbonate radical and its effects on the photo-bleaching of dissolved organic matter. **S. Yan**, W. Song, L. Lian, R. Li, Y. Liu

## Section G

### Innovative Materials & Technologies for Sustainable Water Purification

#### Catalytic

*Cosponsored by CEI*

E. L. Cates, B. P. Chaplin, J. Choe, D. Shuai, W. Zhang, *Organizers*

J. Liu, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 ENVR 949.** Bioinspired heterogeneous catalyst for perchlorate reduction: Continuous improvements with rational ligand design for the rhenium complex reaction center. **J. Liu**, T.J. Strathmann, M. Han, C. Ren

**8:55 ENVR 950.** New-TAML activators: Innovative high-performance, low-cost, biosafety-scrutinized solutions for worldwide reduction of micro-pollutants in water. **T.J. Collins**

**9:35 ENVR 951.** Removal of priority hazardous pollutants in municipal sewage effluent to meet environmental quality standards of the European Water Framework Directive using TAML Activators. **R. Kanda**

**10:00** Intermission.

**10:15 ENVR 952.** Design of longer-lived TAML catalysts. **M.A. DeNardo**

**10:35 ENVR 953.** Introducing New-TAML activators for ultra-dilute catalytic oxidation in global water treatment. **G.R. Warner**, A.D. Ryabov, J.A. Taylor, F.S. Vom Saal, T.J. Collins

**10:55 ENVR 954.** TAML activators for green oxidative degradation of propranolol: A comparative evaluation. **Y. Somasundar**, A.D. Ryabov, T.J. Collins

**11:15 ENVR 955.** Smart catalytic films for water purification. **L. Wright**

**11:35 ENVR 956.** Microwave assisted in-situ covalent functionalization of graphene with phenoxo-bridged dinuclear Iron complex: Preparation, characterization and evaluation. **J. Yu**, C.J. Miller, D. Waite

## Section H

Moscone Center  
3006

### Poly- & Per-Fluoroalkyl Substances: Where, What, When, Why, Who & How

K. Chu, L. S. Lee, J. Liu, V. Yingling, *Organizers, Presiding*

**8:30 ENVR 957.** Fast and ultrasensitive screening of novel fluoroalkylated surfactants in aqueous media: On-line solid phase extraction hyphenated to liquid chromatography high resolution mass spectrometry. **G. Munoz**, S. Vo Duy, M. Desrosiers, J. Liu, S. Sauv 

**8:55 ENVR 958.** Extraction and analysis of amphibians for four per/polyfluorinated alkyl acids. **C. de Perre**, L.S. Lee, G. Hoover, M. Chislock, B. Tornabene, S. Guffey, J. Hoverman, M. Sepulveda

**9:20 ENVR 959.** Perfluorinated Alkyl Substance (PFAS) cytotoxicity: The differential effects of linear and branched isomers. **G. Cantu**, Y. Xing, **D. Kempisty**

**9:45 ENVR 960.** Investigation and remediation of multiple PFAS source zones at an airport to safeguard an at risk water supply. **D. Atkinson**, J. Lemon, J. Miles, I. Ross, **E. Houtz**

**10:10** Intermission.

**10:40 ENVR 961.** Why it matters: Frequency, occurrence, transport, and implications of the 40 classes of recently-discovered per- and polyfluoroalkyl substances in aqueous film-forming foam impacted groundwater. **K.A. Barzen-Hanson**, C.P. Higgins, J.A. Field

**11:05 ENVR 962.** When do we need PFASs?: A policy and purchasing strategy for reducing their use. **A. Blum**, T. Bruton, A. Soehl, A. Lindeman

**11:30 ENVR 963.** Changing regulatory landscape of Per- and Polyfluoroalkyl Substances (PFAS). **S. Thomas**

**11:55** Concluding Remarks.

## Section I

Moscone Center  
2000

### Bioprocesses for Engineered Nanomaterials in Soil-Plant Systems

J. C. White, B. Xing, Y. Yang, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 ENVR 964.** Tuning NP properties for optimizing plant uptake and translocation. **G. Lowry**, E. Spielman-Sun, E. Lombi, J.M. Uhrine

**8:30 ENVR 965.** Withdrawn.

**8:55 ENVR 966.** Accumulation and transfer of engineered nanoparticles in terrestrial food chains: Correlating physiological and molecular response. **J.C. White**, B. Xing, O. Parkash, J.L. Gardea-Torresdey

**9:15 ENVR 967.** Interaction of CuO nanoparticles with floating plant: Toxicity, distribution and transformation. **J. Zhao**, Z. Wang, B. Xing

**9:35** Intermission.

**9:55 ENVR 968.** Leguminous crop interactions with engineered nanomaterials in soils. **P. Holden**, Y. Wang, D.C. Bouchard, R.M. Nisbet, J.P. Schimmel, J.A. Hernandez, J.L. Gardea-Torresdey

**10:20 ENVR 969.** Advances in the metrology for characterizing the uptake, translocation and genotoxicity of engineered nanomaterials in terrestrial plants. **B.C. Nelson**

**10:45 ENVR 970.** Examining the impact of copper oxide nanoparticles on carrot and lettuce growth and root hydraulic conductivity. **S.J. Parikh**, A.J. Margenot, M. Dumlao, D. Rippner, R.A. Davis, P.G. Green, J.L. Sutcliffe, A. McElrone

**11:10 ENVR 971.** Bioformation of silver nanoparticles by plant root systems as affected by growth conditions. **H. Guo**, B. Xing, L. He

**11:30 ENVR 972.** Detection of multi-walled carbon nanotubes uptake by lettuce. **K.K. Das**, Y. You, M. Torres, F. Barrios-Masias, B. Xing, Y. Yang

## Environmental Challenges & Solutions in Unconventional Oil & Gas Development

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## THURSDAY AFTERNOON

### Section A

Moscone Center  
2007

### Pesticides in Surface Water: Monitoring, Modeling, Risk Assessment & Regulation

*Financially supported by Compliance Services International (CSI)*

J. Gan, K. S. Goh, *Organizers*

Y. Luo, D. Young, *Organizers, Presiding*

**1:00** Introductory Remarks.

**1:05 ENVR 973.** Modeling spray drift and runoff related inputs of pesticides to receiving water. **X. Zhang**, K.S. Goh

**1:25 ENVR 974.** Pesticide uptake into runoff evaluated at the field scale. **D. Young**

**1:45 ENVR 975.** Improved modeling approaches for pesticide registration evaluation for surface water protection in California. **Y. Luo**, X. Yina, N. Singhasemanon, X. Deng, K.S. Goh

**2:05 ENVR 976.** Why are real-world surface water exposure distributions much lower than US EPA FIFRA Tier II EECs? An evaluation based on pyrethroid insecticides. **P. Hendley**, A.M. Ritter, D.A. Desmarteau, C.M. Holmes, J. Giddings, J. Wirtz, J. Frew

**2:25** Intermission.

‡ Cooperative Cosponsorship

**2:45 ENVR 977.** Daily models of agricultural chemical concentrations and loads in rivers draining the Central Valley, California to the San Francisco Bay-delta estuary: Before and during an extended drought. J. Domagalski

**3:05 ENVR 978.** Modeling pesticide loadings from the San Joaquin watershed using SWAT. J. Chen, M. Zhang

**3:25 ENVR 979.** Expedition into the realm of environmental monitoring data: How can we make sense and make use of the information contained in the data? D. Wang, J. Teerlink, N. Singhasemanon, K.S. Goh

**3:45 ENVR 980.** PURwebGIS: Simplifying a large agro-environmental spatio-temporal dataset for quick assessment and decision making. C. DeMars, M. Zhang

**4:05** Concluding Remarks.

## Section B

Moscone Center  
3008

### Advances in Resource Recovery & Conservation in Water Systems

*Cosponsored by AGFD, CEI and GEOC*

S. Ahuja, L. M. Blaney, T. H. Boyer, *Organizers, Presiding*

**1:00** Introductory Remarks.

**1:05 ENVR 981.** Linking crystal growth kinetics to quantitative sustainable design of Struvite precipitation systems. S. Agrawal, J. Guest, R. Cusick

**1:25 ENVR 982.** Recovering high-quality phosphorus- and nitrogen-laden fertilizers from poultry litter. U. Shashvatt, J. Benoit, H. Aris, L.M. Blaney

**1:45 ENVR 983.** Sustainable struvite control and recovery in wastewater treatment plants using residual biogas. S. Moore, L. Ma, V. Karanikola, R.G. Arnold, A.E. Saez, D. Moulis, J. Bish, J. Prevatt

**2:05 ENVR 984.** Fate and impact of contaminants of emerging concern during nutrient recovery via ion exchange from synthetic anaerobic effluent. Y. Tong, P.J. McNamara, B. Mayer

**2:25** Intermission.

**2:45 ENVR 985.** Two-stage process for phosphorus extraction and recovery from agricultural waste. S. Sengupta, J. Beaudry, U. Shashvatt, L.M. Blaney

**3:05 ENVR 986.** Calcium phosphate seed nuclei for selective phosphorus recovery at neutral pH. D. Kim, M. Cohen, M. Gu, I. Jeon, Y. Jun

**3:25 ENVR 987.** Customizable nutrient products recovered using ion exchange technology. A. Avila, P.J. McNamara, B. Mayer

**3:45 ENVR 988.** Application of the Donnan membrane principle for sustainable nutrient recovery. U. Shashvatt, L.M. Blaney

**4:05 ENVR 989.** Coupling of Pd nanoparticles and denitrifying biofilm promotes H<sub>2</sub>-based nitrate removal with greater selectivity towards N<sub>2</sub>. C. Zhou, B.E. Rittmann

**4:25** Panel Discussion.

**4:55** Concluding Remarks.

## Section C

Moscone Center  
3002

### Contaminants in Urban & Coastal Estuarine Ecosystems

#### Temporal & Spatial Assessment of Persistent-Bioaccumulative Chemicals in Coastal & Urban Waters

*Cosponsored by AGRO*

J. Meador, D. Muir, R. A. Sutton, *Organizers, Presiding*

**1:00 ENVR 990.** Legacy and emerging organic contaminants in urban estuaries: A global perspective. E. Zeng, L. Liu

**1:30 ENVR 991.** Survey of legacy pollutants in margin sediments of central San Francisco Bay. D. Yee, P. Trowbridge, J.A. Davis

**1:55 ENVR 992.** Continuous release of PCBs from New Bedford Harbor results in elevated concentrations in the surrounding air. A. Martinez, B. Hadnott, A. Awad, N. Herkert, K. Tomsho, K. Basra, M. Scammell, W. Heiger-Bernays, K.C. Hornbuckle

**2:20 ENVR 993.** Characterizing the advection of Polychlorinated Biphenyls (PCBs) from the sediments in the Lower Duwamish Waterway Superfund site. J. Apell, D. Shull, C. Grimmert, P.M. Gschwend

**2:45** Intermission.

**3:05 ENVR 994.** Perspectives on environmental monitoring and bioaccumulation of contaminants of emerging concern in urban coastal systems. B.W. Brooks, S. Burket, S. Haddad, C. Scott

**3:35 ENVR 995.** Application of non-targeted analysis approaches to assess input of organic micropollutants to San Francisco Bay. L. Ferguson, K. Overdahl, N. DeStefano, R.A. Sutton, J. Sun

**4:00 ENVR 996.** Tracking contaminant trends, spatial patterns, and pathways over 20 years of fish contaminant monitoring in San Francisco Bay. J. Sun, J.A. Davis, R. Mayfield

**4:25 ENVR 997.** San Francisco Bay area wastewater monitoring reveals previously unidentified pathway for pet spot-on flea treatments to reach estuaries. K.D. Moran, R.A. Sutton, A.M. Sadaria, R.U. Halden

## Section D

Moscone Center  
3004

### Novel Membrane Materials & Processes for Water Purification

D. Jassby, B. Mi, *Organizers, Presiding*

**1:00 ENVR 998.** Facile grafting of zwitterions onto membrane surface to improve antifouling properties for wastewater reuse. H. Lin, N. Shahkaramipour, S. Ramanan

**1:30 ENVR 999.** Withdrawn.

**1:50 ENVR 1000.** Quantifying bacterial adhesion to polymeric membranes by single-cell force spectroscopy. S. BinAhmed, A. Hasane, Z. Wang, S. Romero-Vargas Castrillon

**2:10 ENVR 1001.** Fouling-resistant ultrafiltration membranes by selective swelling of polystyrene-block-poly(ethylene oxide). H. Yang, Y. Wang

**2:30** Intermission.

**2:50 ENVR 1002.** Antifouling properties of molybdenum disulfide and graphene oxide for water filtration. I. Alam, L. Guiney, M. Hersam, I. Chowdhury

**3:20 ENVR 1003.** Evaluation of photocatalytic membrane fouling by humic acid. R. Zhu, A. Diaz, S. Solares, D. Shuai

**3:40 ENVR 1004.** Fabrication of micro-filtration membrane to mitigate organic fouling during water treatment. E. Igbiginun

**4:00 ENVR 1005.** Membrane surface charge and wettability parallel tuning through layer by layer assembly for antifouling. X. Zhu, B. Chen

## Section E

Moscone Center  
3016

### Applications of Cheminformatics & Computational Chemistry in Environmental Health

C. Grulke, A. J. Williams, *Organizer, Presiding*

**1:00 ENVR 1006.** Estimation of hydrolysis rate constants for carbamates. J. Patel, C. Tebes-Stevens, E.J. Weber

**1:25 ENVR 1007.** In silico alkaline hydrolysis reaction kinetics of HMX and RDX. M.K. Shukla, L. Sviatenko, L. Gorb, D. Leszczynska, J.R. Leszczynski

**1:50 ENVR 1008.** Using experimental data and computational chemistry to predict reactive sites of polycyclic aromatic hydrocarbons. I. Titaley, D. Walden, O. Ogba, P. Cheong, S.L. Simonich

**2:15 ENVR 1009.** What works best for predicting human skin sensitization potential of chemicals: *In vitro* data or *in silico* models? V.M. Alves, S. Capuzzi, E. Muratov, R.C. Braga, T. Thornton, D. Fourches, J. Strickland, N. Kleinstreuer, C.H. Andrade, A. Tropsha

**2:40** Intermission.

**3:00 ENVR 1010.** If it looks like, fits like and binds like a CYP450 ligand is it a CYP450 ligand? A molecular profiling case study using MOE. M.R. Goldsmith, C. Williams, D.T. Chang

**3:25 ENVR 1011.** Structure-based understanding of binding affinity and mode of estrogen receptor  $\alpha$  agonists and antagonists. S. Lee, M.G. Barron

**3:50 ENVR 1012.** Application of functional use predictions to aid in structure identification of chemicals in house dust. K. Phillips, A. McEachran, J. Sobus, K. Isaacs

**4:15 ENVR 1013.** OPERA: A QSAR tool for physicochemical properties and environmental fate predictions. K. Mansouri, C. Grulke, R. Judson, A.J. Williams

**4:40** Panel Discussion.

## Section F

Moscone Center  
3020

### Aquatic Photochemistry

*Cosponsored by GEOC*

*Financially supported by AEESP*

W. Arnold, K. P. McNeill, *Organizers*

V. Lin, *Organizer, Presiding*

**1:00 ENVR 1014.** Photomineralization of dissolved organic matter in acid mine drainage-impacted waters. C. Yuan, L.K. Weavers, P.G. Hatcher, Y. Chin

**1:20 ENVR 1015.** Photodegradation of pharmaceuticals in partially nitrated wastewater. P.I. Hora, P. Novak, W. Arnold

**1:40 ENVR 1016.** Trace metal removal in oxidative treatment systems driven by cathodic H<sub>2</sub>O<sub>2</sub> production and UV photolysis. J.M. Barazesh, C. Prasse, J. Wenk, D. Sedlak

**2:00 ENVR 1017.** Amorphous peroxo-titania as a visible light response photocatalyst for oxidation of organic compounds. J. Seo, H. Lee, H. Lee, M. Kim, C. Lee

**2:20 ENVR 1018.** Modeling the UV/H<sub>2</sub>O<sub>2</sub> oxidation of phenolic compounds in a continuous-flow reactor with reflecting wall. T. Zhang, R.G. Arnold, G. Diefenthal, A.E. Saez

**2:40** Intermission.

**2:50 ENVR 1019.** Aquatic photochemical transformations of thiols with dissolved organic matter. C. Chu, D. Stamatelatos, P.R. Erickson, M. Schmitt, K.P. McNeill

**3:10 ENVR 1020.** Photochemical damage of extracellular enzymes visualized by holistic proteomics techniques and enzymology. E. Janssen, C. Egli

**3:30 ENVR 1021.** Direct and indirect photochemical reactions in viral RNA measured with RT-qPCR and mass spectrometry. Z. Qiao, K. Wigginton

**3:50 ENVR 1022.** Modeling the endogenous sunlight inactivation rates of laboratory strain and wastewater *E. coli* and enterococci using biological weighting functions. A.I. Silverman, K.L. Nelson

**4:10 ENVR 1023.** Photochemical reactive oxygen species generation and redox transformation of iron by the organic exudate secreted by *Microcystis aeruginosa* in natural waters. K. Wang, S. Garg, D. Waite

## Section G

Moscone Center  
3022

### Innovative Materials & Technologies for Sustainable Water Purification

#### Catalytic & Electrochemical

*Cosponsored by CEI*

E. L. Cates, B. P. Chaplin, J. Choe, J. Liu, D. Shuai, W. Zhang, *Organizers*  
W. Zhang, *Presiding*

**1:00** Introductory Remarks.

**1:05 ENVR 1024.** Oxidant and disinfection byproduct production of a point-of-use electrochemical water treatment device. J. Bliss, D.A. Reckhow

**1:25 ENVR 1025.** Classification and quantification of electrochemical oxidants generating electrodes with chlorine generation. J. Kim, J. Yoon

**1:45 ENVR 1026.** Redox-mediated electrochemical methods for water purification and environmental remediation of nitrosamines and contaminants of emerging concern. X. Su, L. Bromberg, K. Tan, T.F. Jamison, L. Padhye, T. Hatton

**2:05 ENVR 1027.** Using electrolytic oxidation as pretreatment to improve As(III) removal by reverse osmosis membranes. Y. Hou, B. Mayer

**2:25 ENVR 1028.** Application of quinoid mediators to develop redox-active flow-electrodes for high-performance capacitive deionization. J. Ma, D. He, D. Waite, W. Tang, P. Kovalsky, C. Zhang

**2:45** Intermission.

**3:00 ENVR 1029.** Highly active palladium nanoparticles for catalytic reduction of *N*-nitrosodimethylamine. H. Ma, T. Wu, C. Na

**3:20 ENVR 1030.** Natural fiber welding of lignocellulose-supported Pd-based catalysts for water purification. D.P. Durkin, T. Ye, E.G. Larson, J. Choi, K.J. Livi, H.C. De Long, P.C. Trulove, H. Fairbrother, L. Haverhals, D. Shuai

**3:40 ENVR 1031.** Reduction of water-borne contaminants on graphitic carbon nitride supported Pd-based catalysts. T. Ye, D. Shuai

**4:00 ENVR 1032.** Catalytic destruction of emerging contaminants by structured palladium-based materials. X. Min, Y. Wang

### Section I

Moscone Center  
2000

#### Bioprocesses for Engineered Nanomaterials in Soil-Plant Systems

J. C. White, B. Xing, Y. Yang, *Organizers, Presiding*

**1:00 ENVR 1033.** pH-Dependent surface chemistry of biologically and environmentally relevant ligands on oxide nanoparticles. V.H. Grassian

**1:25 ENVR 1034.** Withdrawn.

**1:50 ENVR 1035.** Effect of humic acid on the remediation of hexabromocyclododecane contaminated soil using an integrated nano-bio system. Y. Chang, T.T. Le, H. Yoon, J. Kim

**2:15 ENVR 1036.** Three-dimensional surface enhanced Raman spectroscopy evaluation and visualization of gold nanoparticle transport in a silicon-based micromodel. M. Chan, W. Leng, S.L. Walker, P.J. Vikesland

**2:35 ENVR 1037.** Biodegradation of multi-walled carbon nanotubes by *Mycobacterium vanbaalenii* PYR-1. Y. You, K.K. Das, H. Guo, C. Chang, M. Navas-Moreno, J. Chan, P. Verburg, S.R. Poulson, X. Wang, B. Xing, Y. Yang

**2:55** Intermission.

**3:10 ENVR 1038.** Assessing the risk of engineered nanomaterials in the environment using the nanoFate model. A.A. Keller, K. Garner

**3:35 ENVR 1039.** Benefits and risks of agricultural use of carbon-based nanomaterials. M. Khodakovskaya

**4:00 ENVR 1040.** Impacts of copper oxide nanoparticles on soil enzyme activities across diverse ecosystems. A.J. Margenot, S.J. Parikh

**4:20 ENVR 1041.** Ecotoxicity of manufactured Al nanophases. A. Mason, C. Santaela, L. Shintu

**4:40 ENVR 1042.** Determining phytotoxicity of carbon nanotubes in heat and drought stressed crops. J.T. Jordan, P. Payton, J.E. Canas-Carrell, D. Tissue

#### Engineering Operando to Larger Scale: Shaped Catalysts & Process Control

*Sponsored by CATL, Cosponsored by ENVR and I&EC*

#### Elucidation of Mechanisms & Kinetics on Surfaces

*Sponsored by CATL, Cosponsored by COLL and ENVR*

## FLUO

### Division of Fluorine Chemistry

N. Vasdev, *Program Chair*

#### SUNDAY MORNING

##### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer, Presiding*

G. B. Hammond, *Presiding*

**8:00** Introductory Remarks.

**8:10 FLUO 1.** Studies on fluoroalkylations and fluorinations. S.G. Prakash

**8:40 FLUO 2.** Radical asymmetric functionalization of alkenes with Togni reagent. X. Liu

**9:10 FLUO 3.** Recent advances in hydrogen bond-controlled nucleophilic fluorination. G.B. Hammond

**9:40** Intermission.

**10:00 FLUO 4.** Underappreciated alkaline earth chemistry: Halides and organometallic systems. H.F. Schaefer

**10:30 FLUO 5.** Reactivity of the neutral hypercloso radical, 1-H-(2-6)F<sub>5</sub>-(7-12)-(CF<sub>3</sub>)<sub>6</sub>CB<sub>11</sub><sup>+</sup>. J. Plutnar, Z. Janoušek, A. Wahab, J. Ludvik, J. Michl

**11:00 FLUO 6.** Organometallic approaches to low global warming automotive refrigerants: Nickel complex-catalyzed production of C<sub>2</sub>-hydrofluoroalkenes from C<sub>2</sub>-fluoroalkenes and silanes. A.J. Sicard, R. Baker

**11:30 FLUO 7.** Enantioselective methods for carbon-fluorine bond construction. D. Toste

#### SUNDAY AFTERNOON

##### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*

T. Braun, J. Ichikawa, *Presiding*

**1:30 FLUO 8.** Reactions of transition metal and main group fluorides and oxofluorides with trimethylsilyl azide and cyanide. P. Deokar, R.M. Haiges, D.A. Dixon, M. Vasiliu, K.O. Christe

**2:00 FLUO 9.** Organic and organometallic cations in super acidic solutions. M. Malischewski, K. Seppelt

**2:30 FLUO 10.** Syntheses of fluorinated cyclopentanone derivatives via regioselective CF<sub>3</sub> insertion using transition metal difluorocarbene complexes. J. Ichikawa

**3:00 FLUO 11.** Activation of SF<sub>6</sub> at transition metal complexes. T. Braun, L. Zámostná, C. Berg

**3:30** Intermission.

**3:45 FLUO 12.** Chemical transformations with metal complexes of unusual silicon ligands. T.D. Tilley

**4:15 FLUO 13.** Metal-catalyzed and metal-mediated fluoroalkylation of arenes. J.F. Hartwig

**4:45 FLUO 14.** Synthesis and coordination properties of asymmetric mixed alkyl/perfluoroalkyl substituted pincer ligands. S. Debnath, T.A. Remick, N. Arulsamy, D.M. Roddick

#### SUNDAY EVENING

##### Section A

Moscone Center  
Hall D

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*

**8:00 - 10:00**

**FLUO 15.** Direct trifluoromethylation from fluoroforn with dimethyl-K. S. Qing, A.V. Matsnev, G. Lin, C. Liu, Y. Chen, J.S. Thrasher

**FLUO 16.** Synthesis and characterization of SF<sub>6</sub>-containing fullerene derivatives. S. Qing, N.J. DeWeerd, A.V. Matsnev, S.H. Strauss, O.V. Botalina, J.S. Thrasher

#### MONDAY MORNING

##### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*

N. Santschi, *Presiding*

**8:00 FLUO 17.** Difunctionalization-type electrophilic trifluoromethylation reactions of alkenes. M. Sodeoka

**8:30 FLUO 18.** Hypervalent iodine mediated fluorinations: Versatile tools for the exploration of novel reactivities. T. Gulder, A. Andries-Ulmer, C. Brunner

**9:00 FLUO 19.** Modulating the reactivity of hypervalent iodine reagents and carbonyl tethers with the trifluoromethyl group. Y. Li, U. Orzol, J. Waser

**9:30 FLUO 20.** Catalytic trifluoromethylation fluorination by benziodoxol reagents. K. Szabo

**9:45** Intermission.

**10:15 FLUO 21.** Exploring the amazing electronic structure and reactivity of hypervalent iodine compounds. H.P. Luethi

**10:45 FLUO 22.** CF<sub>3</sub> radical precursors and their reactions with primary radiolysis products – reversible addition of F<sub>2</sub>C<sup>+</sup> to an aromatic model system. N. Santschi, T. Nausser

**11:15 FLUO 23.** Award Address (ACS Award for Creative Work in Fluorine Chemistry sponsored by the ACS Division of Fluorine Chemistry). Contributing to organofluorine chemistry as an outsider. A. Togni

#### MONDAY AFTERNOON

##### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*

F. Qing, A. Stuart, *Presiding*

**1:30 FLUO 24.** New frontier in fluorine chemistry. K. Mikami

**2:00 FLUO 25.** Late-stage fluorination for PET imaging. T. Ritter

**2:30 FLUO 26.** Stereoselective carbonyl fluoroolefinations with fluorinated sulfone and sulfoximine reagents. Y. Zhao, Q. Liu, F. Jiang, J. Hu

**3:00 FLUO 27.** Silver-mediated oxidative trifluoromethylation and pentafluoroethylation of alcohols: Direct synthesis of alkyl trifluoromethyl (pentafluoroethyl) ethers. F. Qing

**3:30** Intermission.

**3:45 FLUO 28.** News about β-peptides with a glimpse at F-derivatives—research, a magical mystery tour. D. Seebach

**4:15 FLUO 29.** Intramolecular fluorocyclizations of alkenes with a stable hypervalent fluoroiodane reagent. A. Stuart, E.G. Hope, G.C. Geary, M. Urbonaite

**4:45 FLUO 30.** Strategic incorporation of fluorine into bioactive compounds for medicinal chemistry and drug discovery. I. Ojima

#### MONDAY EVENING

##### Section A

Moscone Center  
Hall D

#### Sci-Mix

J. T. Welch, *Organizer*

**8:00 - 10:00**

**15-16.** See previous listings.

‡ Cooperative Cosponsorship

48, 50-53. See subsequent listings.

## TUESDAY MORNING

### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*  
N. Shibata, *Presiding*

**8:00 FLUO 31.** Asymmetric desymmetrization via non-metallic C-F bond activation: Synthesis of 3,5-diaryl-5-fluoromethyl-oxazolodin-2-ones with quaternary carbon center. N. Shibata

**8:30 FLUO 32.** Perspective on fluoride reactivity. V. Gouverneur

**9:00 FLUO 33.** Access to heterocycles bearing emergent fluorinated substituents — as FAR as possible! E. Schmitt, F. Arbi, A. Panossian, J. Vors, S. Pazenok, F.R. Leroux

**9:30** Intermission.

**9:45 FLUO 34.** New reagents for difluoromethyl and difluoromethylene transfer. D.A. Vicio, P.T. Kaplan, L. Xu

**10:15 FLUO 35.** 2-Aryl-2-fluorocyclopropylamines: Synthesis, physicochemical properties and monoamine oxidase inhibitor potencies. G. Haufe

**10:45 FLUO 36.** Preparative fluoralkylation via visible light induced electron transfer. C. Stephenson

**11:15 FLUO 37.** Synthesis of  $\beta$ -SCF<sub>3</sub>  $\alpha$ -amino acids and  $\beta$ -SCF<sub>3</sub> amines by nucleophilic trifluoromethylsulfenylation of cyclic sulfamidates. D. Cahard

## TUESDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### ACS Award for Creative Work in Fluorine Chemistry: Symposium in honor of Antonio Togni

J. T. Welch, *Organizer*  
G. Haufe, *Presiding*

**1:30 FLUO 38.** From sulfur to selenium: New reagents for direct trifluoromethylchalcogenation. T. Billard

**2:00 FLUO 39.** Advance in (trifluoromethyl)dibenzoheterocyclic onium salt chemistry for electrophilic trifluoromethylating agents. T. Umemoto

**2:30 FLUO 40.** Recent progress in the chemistry of SF<sub>2</sub>CX<sub>2</sub>- and SF<sub>2</sub>N-containing compounds. A.V. Matsnev, S.P. Belina, S. Qing, C.A. Parrish, P. Dudzinski, G. Haufe, J.S. Thrasher

**3:00 FLUO 41.** Preparation and reactions of aryl tetrafluoro- $\lambda^6$ -sulfonyl compounds. Applications in materials science. K. Bonetti, A. Rehm, L. Zhong, J.T. Welch

### Section A

Grand Hyatt San Francisco  
Conference Theatre

#### General Papers

J. T. Welch, *Organizer*  
J. Welch, *Presiding*

**3:30 FLUO 42.** Accessing perfluoroalkyl nickel(II), (III), and (IV) complexes bearing a readily attached [C4F8] ligand. S. Yu, D.A. Vicio

**3:50 FLUO 43.** Synthesis and design of highly fluorinated biopolymers as <sup>19</sup>F MRI contrast agents. W.C. Pomerantz, S. Kirberger, M. Garwood, B. Weegman

**4:10 FLUO 44.** Corannulenes with strong electron-withdrawing groups. A. Haupt, M. Kutter, D. Lentz

**4:30 FLUO 45.** Mild, low-temperature radiofluorination of  $\alpha$ -diazocarbonyl compounds via copper-catalyzed H-F insertion. M.K. Nielsen, A.G. Doyle

**4:50 FLUO 46.** 1,1 and 1,3-difluorination reactions using fluoro-benziodoxol reagent. N. Ilchenko, M. Hedberg, B.O. Tasch, K.J. Szabo

**5:10 FLUO 47.** Ab initio study on enthalpies of formation for organofluorine compounds. K.R. Jorgensen

## TUESDAY EVENING

### Section A

Mosccone Center  
Hall D

#### General Posters

J. T. Welch, *Organizer*

**8:00 - 10:00**

**FLUO 48.** Synthesis of high specific activity 4-[<sup>18</sup>F]fluorophenylalanine using a new diaryliodonium salt precursor. B. Hu, A.L. Vavere, S.E. Snyder, S.G. DiMaggio

**FLUO 49.** Control of electrical properties by mixed self-assembled monolayers in a water motion active transducer. Y. Yang, J. Park, Y. Kim

**FLUO 50.** Synthesis of low-molecular fluorine-containing imidazoles. A.S. Bunev, E.V. Sukhonosova, S. Naumov

**FLUO 51.** Functionalization of fluoro-substituted imidazoles. A.S. Bunev, S. Naumov, G. Ostapenko, E.V. Sukhonosova

**FLUO 52.** Fluorination of aryl stananes using nucleophilic fluoride. R. Gamache, C. Waldmann, J. Murphy

**FLUO 53.** Analysis on the formation potential of disinfection byproducts in the chlorination of aquatic ciprofloxacin. H. Guo, Y. Liu, X. Cheng, T. Ke

## GEOC

### Division of Geochemistry

A. Ilgen, *Program Chair*

## SUNDAY MORNING

### Section A

San Francisco Marriott Union Square  
Union Square North

#### Mineral-Water Interface Chemistry

##### A Tribute to Glenn Waychunas

*Cosponsored by COLL and ENVR*

C. S. Kim, P. A. O'Day, *Organizers*  
B. Gilbert, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 GEOC 1.** X-ray absorption spectroscopy studies of sorption reactions at mineral-aqueous solution interfaces. G.E. Brown

**8:55 GEOC 2.** Withdrawn.

**9:15 GEOC 3.** Element speciation in atmospheric nanoparticles and implications for human health and biogeochemical cycling. P.A. O'Day, E. Reinoso-Maset, K. Nguyen, V. Leppert, H.J. Forman

**9:35 GEOC 4.** Cation effects on the reaction between birnessite and Mn(II). P. Yang, Q. Wang, M. Zhu

**9:55 GEOC 5.** Cation effects on the adsorption and oxidation of fulvic acid by manganese oxides. Q. Wang, P. Yang, M. Zhu

**10:15** Intermission.

**10:35 GEOC 6.** How does light control the mobility of Ni sorbed on birnessite? F. Marafatto, B. Gilbert, J. Pena

**10:55 GEOC 7.** Nanoscale iron hydroxides: Unique properties and contaminant scavenging mechanisms (a brief history). C.S. Kim

**11:15 GEOC 8.** Aggregation, surface structure and characterization of iron oxide nanoparticles: The effect of long term aging in aqueous media. L. Badakhshian, A. Quicksall

**11:35 GEOC 9.** Ligand effects on amorphous iron and aluminum hydr(oxide) precipitate characteristics. S. Yeo, T. Stewart, M. Bartolo, J. Herrboldt, L.E. Katz, D. Lawler

**11:55 GEOC 10.** Metal(loid) uptake by mineral surface coatings. D. Singer

### Section B

San Francisco Marriott Union Square  
Union Square South

#### Pore-Scale Geochemical Processes & the Implications to CO2 Geologic Storage

H. Deng, S. Molins, C. Steefel, *Organizers, Presiding*

**9:00** Introductory Remarks.

**9:05 GEOC 11.** Does enhanced characterization of reactive surface area improve prediction of mineral reaction rates in porous media? L.E. Beckingham, C. Steefel, E. Mitnick, A. Swift, M. Voltolini, L. Yang, L. Anovitz, J. Sheets, T. Kneafsey, D. Cole, S. Zhang, G. Landrot, J. Ajo-Franklin, D.J. DePaolo, S. Mito, Z. Xue

**9:45 GEOC 12.** DFT calculations of structure and dynamics of CO<sub>2</sub> adsorption on kaolinite and montmorillonite surfaces. L. Tribe

**10:05 GEOC 13.** Brine-biotite interactions under Geologic CO<sub>2</sub> Sequestration (GCS) conditions: Effects of phosphate. L. Zhang, D. Kim, Y. Kim, J. Wan, Y. Jun

**10:25** Intermission.

**10:45 GEOC 14.** Characterising pore scale mineral heterogeneity and solute transport to model reactive transport for CO<sub>2</sub> storage. S. Krevor, M. Boon, P. Lai, S. Franchini, B. Niu, A. Al-Menhali, C. Reynolds

**11:25 GEOC 15.** Interfacial interactions between cations and biotite under conditions relevant to subsurface CO<sub>2</sub> injection. Y. Min, Y. Jun

**11:45 GEOC 16.** Molecular dynamics simulation prediction of the solubility of gases (CO<sub>2</sub>, CH<sub>4</sub>, H<sub>2</sub>, noble gases) in nano-confined water. G. Gadikota, B. Dazas, I.C. Bourg

**12:05 GEOC 17.** Elucidating the mineralogical and transport controls on the evolution of porous media using pore scale simulation. S. Molins, D. Trebotich, G.H. Miller, C. Steefel

### Section C

San Francisco Marriott Union Square  
Savoy

#### Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants

E. E. Roden, Y. Yang, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 18.** Constraints on the coupled redox cycling of carbon and iron. S.E. Fendorf, M. Keiluweit

**8:45 GEOC 19.** Reactive oxygen species are ubiquitous along subsurface redox gradients. P.S. Nico, X. Yuan, J.A. Davis, D. Dwyvedi, K. Williams, A. Bhattacharya, P. Fox

**9:05 GEOC 20.** Biogeochemical controls on the stability of iron-bound soil organic carbon. S. Dunham-Cheatham, Q. Zhao, D. Obrist, Y. Yang

**9:25 GEOC 21.** Fate of ferrihydrite-bound organic carbon during microbial reduction. D. Adhikari, Q. Zhao, K.K. Das, J. Mejia, R. Huang, X. Wang, S.R. Poulson, Y. Tang, E.E. Roden, Y. Yang

**9:45** Intermission.

**10:00 GEOC 22.** Iron reduction enhances decomposition of occluded organic matter: Evidence from carbon stable isotopes. S.J. Hall, W. Huang

**10:40 GEOC 23.** Developing a mechanistic understanding of environmentally persistent free radical redox formation in soils at ambient conditions. U.G. Nwosu, R.L. Cook

**11:00 GEOC 24.** Biosnorkel mechanism—direct extracellular electron transfer by pyrogenic carbon. T. Sun, J.J. Guzman, A. Enders, L. Angenent, J. Lehmann

**11:20 GEOC 25.** Biogeochemical fate and stability of ferrihydrite-organic compound complexes. D. Wordofa, S. Dunham-Cheatham, S.R. Poulson, Y. Yang

**11:40 GEOC 26.** Soil organic carbon protection in the presence of iron oxides under aerobic conditions. S.S. Cronk, C. Gorski

## Section D

San Francisco Marriott Union Square  
Sutter 1-3

**Structure, Properties & Applications of Minerals with Layered Structure**

A. Fernandez-Martinez, N. Garg, B. Ma, C. White, *Organizers*

N. Birkner, R. Shivaramaiah, *Presiding*

**9:00 GEOC 27.** Layered double hydroxides and their significant role in geochemical processes. D.L. Sparks

**9:40 GEOC 28.** Withdrawn.

**10:10 GEOC 29.** Structural insights on Ni-Al LDHs using wavelet analysis. M. Siebecker, D.L. Sparks

**10:30** Intermission.

**10:45 GEOC 30.** Withdrawn.

**11:25 GEOC 31.** Withdrawn.

**11:45 GEOC 32.** Thermochemistry of Layered double hydroxides of Li with Al. R. Shivaramaiah, A. Navrotsky, M. Paranthaman, R. Riman, A.M. Anderko, L. Li

**Subsurface Technologies for Recovery of Fossil & Geothermal Energy**

Sponsored by ENFL, Cosponsored by CATL and GEOC

**Computations for CO<sub>2</sub> Capture, Conversion & Sequestration**

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>†</sup>

## SUNDAY AFTERNOON

## Section A

San Francisco Marriott Union Square  
Union Square North

**Mineral-Water Interface Chemistry**
**A Tribute to Glenn Waychunas**

Cosponsored by COLL and ENVR

B. Gilbert, C. S. Kim, *Organizers*

P. A. O'Day, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 GEOC 33.** Environmental surface and interface science at GeoSoilEnviroCARS. P.J. Eng, J. Stubbs

**1:55 GEOC 34.** Atomic structure of the chalcophanite (001) surface: A window into birnessite mineral growth. J. Stubbs, P.J. Eng

**2:15 GEOC 35.** Impacts of pH and surface coverage on the response of interfacial water structure to the adsorption of arsenate. T. Xu, J.G. Catalano

**2:35 GEOC 36.** Mechanisms of Fe(II)-catalyzed goethite recrystallization from stochastic simulation. K. Rosso, P. Zarzycki

**2:55 GEOC 37.** Isotope-resolved 57-Fe(II) interaction with single Fe(III)-(oxyhydr) oxide crystallites: Unraveling dissolution/recrystallization mechanisms. S. Taylor, X. Zhang, J. Liu, B. Arey, D.E. Perea, D.K. Schreiber, J.B. Clif, T. Wietsma, O. Qafoku, K.M. Rosso

**3:15** Intermission.

**3:35 GEOC 38.** Surface charge dynamics at the iron oxides/electrolyte interface. P. Zarzycki, K.M. Rosso

**3:55 GEOC 39.** Arsenopyrite-water interface chemistry: Roles of iron (hydr)oxides in arsenic mobility. Y. Jun, C.W. Neil, X. Wu

**4:15 GEOC 40.** Effect of solution and solid-phase conditions on the Fe(II)-accelerated transformation of ferrihydrite to crystalline iron oxides. D. Waite, R. Collins, A. Jones, D. Boland, W. Xiao, C. Glover

**4:35 GEOC 41.** Dominating role of weakly complexing ions at the mineral-water interfaces. S.C. Myneni

**4:55 GEOC 42.** Cesium adsorption on illite: Characterizing the slow adsorption sites. V. Amaral, B. Dazas, I.C. Bourg

## Section B

San Francisco Marriott Union Square  
Union Square South

**Pore-Scale Geochemical Processes & the Implications to CO<sub>2</sub> Geologic Storage**

H. Deng, S. Molins, C. Steefel, *Organizers, Presiding*

**1:30 GEOC 43.** Carbonation reactions and their effect on pore distributions in a cement exposed to CO<sub>2</sub> for 30+ years. A.G. Stack, M. Cheshire, L. Anovitz, W. Carey

**2:10 GEOC 44.** Phase and isotopic partitioning behavior of boron in supercritical CO<sub>2</sub> - water systems. B. Thomas, T. Phan, J. Gardiner, A. Hakala, C. Lopano

**2:30 GEOC 45.** Evidence for difference between precipitation in pores and in bulk solution. Q. Li, C. Steefel, Y. Jun

**2:50 GEOC 46.** Chemical controls on the fracture propagation rate in calcite. A. Ilgen, W. Mook, A. Tigges, C. Chisholm, K. Jungjohann

**3:10** Intermission.

**3:30 GEOC 47.** Leakage potential of cemented wells from carbon storage reservoirs. S.A. Carroll, J. Iyer, P. Roy, H. Mason, W.L. Du Frane, S. Walsh, J. Morris

**4:10 GEOC 48.** Coal cleat closure during supercritical CO<sub>2</sub> injection and associated permeability drop: From microscale observation to DEM predictions. Y. Zhang, M. Lebedev, Z. Zhang, M. Sarmadivaleh, A. Barifcani, S. Iglauer

**4:30 GEOC 49.** Reservoir scale numerical simulation of CO<sub>2</sub> injection into Lower Tuscaloosa formation in Mississippi, USA with experimentally validated modeling parameters. L. Zhang, Y. Soong, R. Dilmore

## Section C

San Francisco Marriott Union Square  
Savoy

**Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants**

E. E. Roden, Y. Yang, *Organizers*

S. Dunham-Cheatham, W. Xu, *Presiding*

**1:30 GEOC 50.** Linking carbon stability to iron redox reactions. D. Adhikari, Q. Zhao, K.K. Das, S. Xu, J. Mejia, R. Huang, X. Wang, S.R. Poulson, Y. Tang, D. Obrist, E.E. Roden, Y. Yang

**2:10 GEOC 51.** Geochemical and genomic analysis of coupled redox transformations of humic substances and iron oxides. J. Mejia, N. Stern, S. He, Y. Yang, E.E. Roden, M.A. Ginder-Vogel

**2:30 GEOC 52.** Effects of ammonia and variable redox conditions on mineral dissolution. S. Di Pietro, H. Emerson, Y. Katsenovich, J.E. Szecsody

**2:50 GEOC 53.** Organic matter transformations in wet tropical soils: The effects of redox fluctuation. A. Bhattacharyya, A. Campbell, Y. Lin, P.S. Nico, W. Silver, J. Pett-Ridge

**3:10 GEOC 54.** Coupled dynamics of iron and iron-bound organic carbon in forest soils during anaerobic reduction. Q. Zhao, D. Adhikari, R. Huang, A. Patel, X. Wang, Y. Tang, D. Obrist, E.E. Roden, Y. Yang

**3:40** Intermission.

**3:50 GEOC 55.** Contaminant dynamics in waters and sediments of acidic pit lakes. W.D. Burgos, J. Sánchez-España, I. Yusta

**4:30 GEOC 56.** Reducing sugar content in microbial Extracellular Polymeric Substances (EPS) plays a previously unrecognized role in abiotic reduction of environmentally concerned chemicals. F. Kang, X. Zhou, D. Zhu

**4:50 GEOC 57.** Redox properties of black carbon in promoting the abiotic transformation of organic pollutants. W. Xu, K. Ding

**5:10 GEOC 58.** Revisiting reduction of PCE and TCE by magnetite. J.D. Culpepper, D. Latta, D.M. Cwiertny, M. Scherer

## Section D

San Francisco Marriott Union Square  
Sutter 1-3

**Structure, Properties & Applications of Minerals with Layered Structure**

A. Fernandez-Martinez, N. Garg, B. Ma, C. White, *Organizers*

N. Birkner, R. Shivaramaiah, *Presiding*

**1:30 GEOC 59.** Crystal structures of defective lamellar compounds and their X-ray identification: Insights into mineral reactions and material reactivity. B. Lanson

**2:10 GEOC 60.** Manipulating the layered phases in low-CO<sub>2</sub> cements and related minerals. C. White, O. Ozcelik, N. Garg

**2:40 GEOC 61.** Connecting the microstructure and structure in clay minerals on heating to 1150 °C using in-operando multi-scale X-ray scattering techniques. G. Gadikota, A. Allen, F. Zhang

**3:00** Intermission.

**3:15 GEOC 62.** Rare earth recovery from phosphate fertilizer production waste. Z. Hu, A. Eslamianesh, R. Shivaramaiah, P. Antonick, R. Riman, A.M. Anderko, A. Navrotsky, D. DePaoli, J. Zhang

**3:45 GEOC 63.** Withdrawn.

**4:15 GEOC 64.** How soluble Mn(III)-pyrophosphate affects the formation of layered birnessite nanosheets by photochemically-assisted Mn oxidation? H. Jung, Y. Jun

**4:35 GEOC 65.** Effects of Zn presence on the structure and reductive transformation of birnessite. S. Zhao, Y. Tang

**Computations for CO<sub>2</sub> Capture, Conversion & Sequestration**

Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>†</sup>

## MONDAY MORNING

## Section A

San Francisco Marriott Union Square  
Union Square North

**Mineral-Water Interface Chemistry**
**A Tribute to Glenn Waychunas**

Cosponsored by COLL and ENVR

B. Gilbert, P. A. O'Day, *Organizers*

C. S. Kim, *Organizer, Presiding*

**8:00 GEOC 66.** Modeling mineral-water interface structure. J.D. Kubicki

**8:20 GEOC 67.** Development of rare events simulation tools to probe mineral surface reactivity. A. Wallace

**8:40 GEOC 68.** Water structure and dynamics at the hematite (1-102) surface. M.E. McBrierty, G.F. von Rudorff, J. Stubbs, P.J. Eng, J. Blumberger, K.M. Rosso

**9:00 GEOC 69.** Water structure and dynamics at the aqueous interface of ferrihydrite nanoparticles. C. Johnston

**9:20 GEOC 70.** Capturing the ultrafast vibrational decoherence of water at mineral interfaces. A. Boulesbaa, E. Borguet

**9:40** Intermission.

**10:00 GEOC 71.** Tracking site-specific reactions at mineral surfaces. J. Boily

**10:20 GEOC 72.** NMR at mineral interfaces: Chemical structure, speciation, dynamics, and reactivity. K.T. Mueller, N. Washton, J. Fagan

**10:40 GEOC 73.** Molecular-scale imaging of gibbsite nucleation at the mica-water interface using *in situ* atomic force microscopy. B. Legg, J.J. De Yoreo

**11:00 GEOC 74.** Mineral precipitation at mineral-water interfaces. A. Fernandez-Martinez, A. Koishi, Y. Hu, Y. Jun, G.A. Waychunas

**11:20 GEOC 75.** Understanding phosphate and silicate adsorption, precipitation and polymerization on mineral surfaces using differential pair distribution function analysis. M. Zhu, X. Wang

**11:40 GEOC 76.** Mineral-water interface studies: Quo vadis? G.A. Waychunas

## Section B

San Francisco Marriott Union Square  
Union Square South

**Advances in Treatment Processes for Metals & Metalloids**

Cosponsored by ENVR

K. Campbell-Hay, C. F. Wildman, *Organizers*

K. M. Campbell, C. Wildman, *Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 77.** Biogeochemical investigations of mine water attenuation in lignocellulose-based sulfate reducing bioreactors. J. Sharp, D. Drennan, R. Almstrand, L. Lee, L. Figueroa, I. Lee, J. Ladderud, S. Webb

**8:35 GEOC 78.** Novel approaches for the selective capture of transition metals from mine waters using low pH sulfur- and sulfate-reducing bioreactors. R. Holanda, A.L. Santos, B. Johnson

**8:55 GEOC 79.** Bioreactors for the treatment of hexavalent chromium at remote locations in South Africa. M.F. Deffaux, M. Erasmus, E. van Heerden

<sup>†</sup>Cooperative Cosponsorship

**9:25 GEOC 80.** Role of reduced chromium-organic complexes in performance of an *ex situ* bioreactor to remove hexavalent chromium. C.F. Wildman, M. Davidson, B. Marvin

**9:45 GEOC 81.** Treatment of uranium in groundwater with soluble phosphate: Successes and challenges at the field-scale. M. Hay, J. Gillow, P. Moran

**10:05** Intermission.

**10:25 GEOC 82.** Iron electrocoagulation for removal of dissolved selenium: Impact of oxygen level and pH. Y. Bae, N.M. Crompton, J.G. Catalano, D. Giammar

**10:45 GEOC 83.** Stabilization of metalliferous mine tailings during mesocosm-scale phytostabilization. R.A. Root, R. Maier, J.D. Chorover

**11:05 GEOC 84.** Withdrawn.

**11:25 GEOC 85.** Design and optimization of constructed wetlands for metal and metalloid treatment at the Minto Mine, in the Yukon, Canada. M. Haakensen, V. Friesen, R. Herbert

**11:55** Concluding Remarks.

## Section C

San Francisco Marriott Union Square  
Savoy

### Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants

E. E. Roden, Y. Yang, *Organizers*

A. Kappler, K. Weber, *Presiding*

**8:00 GEOC 86.** New light shed on important Earth-relevant redox reactions observed at the nanoscale. M.F. Hochella

**8:40 GEOC 87.** Effect of Fe-metabolizing microbes and humic substances on Cr-immobilization by biogenic and abiogenic magnetite. A. Kappler, K. Adaktylos-Surber, A. Sundman, J. Byrne

**9:00 GEOC 88.** Structural transformations of manganese oxides by small organic acids and the fate of trace metals. E. Flynn, J.G. Catalano

**9:20 GEOC 89.** Mineralogical transformation of MnO<sub>2</sub> during redox reactions with organic contaminants. S.J. Balgooyen, C.K. Remucal, M.A. Ginder-Vogel

**9:40 GEOC 90.** Nitrate photolysis drives fast abiotic oxidation of Mn<sup>2+</sup>(aq) to Mn(IV) and promotes the formation of δ-MnO<sub>2</sub> nanosheets. H. Jung, Y. Jun

**10:00** Intermission.

**10:20 GEOC 91.** Nitrogen mediated metal redox cycling. K.A. Weber, O. Healy, W. Yang, W. Silver

**11:00 GEOC 92.** Using time-resolved X-ray absorption spectroscopy to probe the mechanism of contaminant oxidation by δ-MnO<sub>2</sub>. Y. Wang, S. Benkaddour, F. Marafatto, J. Pena

**11:20 GEOC 93.** Rates and products of MnO<sub>2</sub> oxidation of Cr(III)-containing iron oxides. C. Pan, A. Qian, H. Liu, J. Catalano, D. Giammar

**11:40 GEOC 94.** Investigating the role of sediment manganese oxides as a potential predictor for future arsenic contamination of groundwater. E. Gillispie, M. Polizzotto, M.C. Jones

## Section D

San Francisco Marriott Union Square  
Sutter 1-3

### Formation, Structure & Reactivity of Biogenic Minerals

O. Duckworth, J. Pena, M. Polizzotto, C. Santelli, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 95.** Endolithic microbial communities from Mona Island (PR), touring of a geochemical paradox on various carbonate mineral substrates. E. Couradeau, D.W. Roush, B.S. Guida, F. Garcia-Pichel

**8:35 GEOC 96.** Elucidating the structural diversity of bacteriogenic iron oxides formed in circumneutral environments. A.H. Whitaker, O. Duckworth, F.M. Michel, D. Peak

**8:55 GEOC 97.** Biologically-driven schwertmannite precipitation in acid mine drainage pipelines: Trace metal implications. K.M. Campbell, C. Alpers, D. Nordstrom

**9:25 GEOC 98.** Sorption of arsenic to biogenic iron (oxyhydr)oxides produced in circumneutral environments. T. Sowers, J.M. Harrington, A.H. Whitaker, M. Polizzotto, O. Duckworth

**9:45 GEOC 99.** Iron biomineral formation by Fe(II)-oxidizing bacteria. A. Kappler, J. Byrne

**10:15** Intermission.

**10:35 GEOC 100.** Quantifying mycogenic manganese oxide reactivity through chemical and electrochemical measurements. B. Uster, E. Mitchel, M.Y. Andrews, R.L. Diaz, L.A. Sombers, O.W. Duckworth

**10:55 GEOC 101.** Atomistic perspectives on cation complexes, octahedral vacancies, and the interlayer water of phyllosilicates through molecular dynamics simulations. A.G. Newton, K. Kwon

**11:15 GEOC 102.** Organo-mineral interactions in *Pseudomonas putida*-bimessite composites: Implications for biogenic mineral reactivity. J. Pena, A. Simanova, A. Kroll

**11:35 GEOC 103.** Crystal structure and growth of ZnS nanoparticles formed via comparative biological and abiotic pathways. J. Xu, M. Murayama, C. Roco, H. Veeramani, M.F. Hochella

**11:55 GEOC 104.** Elemental sulfur biomineralization by phototrophs and chemolithotrophs: Model isolate and field studies. C. Chan, P.A. Henri, C.L. Marnocha, A. Levy, T.E. Hanson, A. Steele, J.L. Macalady

### Science for a Sustainable Energy Future

#### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF*

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>*

## MONDAY AFTERNOON

### Section A

San Francisco Marriott Union Square  
Union Square North/South

### 2017 Geochemistry Division Medal Symposium

S. N. Kerisit, *Organizer, Presiding*

A. Ilgen, *Presiding*

**1:00** Introductory Remarks.

**1:15 GEOC 105.** Phase transitions in layered Mn oxides: Implications for electron storage and transport in soils. P.J. Heaney, F.T. Ling, K. Kong, J. Post

**1:55 GEOC 106.** Biogeochemical transformation of metal(loid)s in a disturbed critical zone. J.D. Chorover, R. Root, C. Hammond, R. Maier

**2:35 GEOC 107.** Probing chemical and porosity changes at the bedrock saprolite interface. A. Stichter, S.L. Brantley

**3:15** Intermission.

**3:35 GEOC 108.** Lessons learned about using data to understand water issues related to shale gas development in Pennsylvania: From science to sociology. R.D. Vidic, S. Brantley, D. Yoxheimer, J. Pollak, K. Brasier

**4:15 GEOC 109.** Exploring the subsurface chemical landscapes where water and biota turn rock into soil. S.L. Brantley

### Science for a Sustainable Energy Future

#### Chemical & Biological Conversions Approaches to Energy Conversion

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF*

#### Computations for CO<sub>2</sub> Capture, Conversion & Sequestration

*Sponsored by ENFL, Cosponsored by CATL, COMP, GEOC and MPPG<sup>2</sup>*

#### Undergraduate Research Posters

#### Geochemistry

*Sponsored by CHED, Cosponsored by GEOC and SOCED*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

A. Ilgen, *Organizer*

**8:00 - 10:00**

**21, 31, 43, 73, 103.** See previous listings.

**129, 135, 157, 188-189, 197, 202, 211, 218, 285-286, 294, 322, 334, 340, 346, 360, 362.** See subsequent listings.

## TUESDAY MORNING

### Section A

San Francisco Marriott Union Square  
Union Square North

### Mineral-Water Interface Chemistry

*Cosponsored by COLL and ENVR*

J. Bracco, S. R. Higgins, S. Lee, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 110.** Quartz/aqueous solution interface-a microscopic to macroscopic perspective. M.L. Machesky, M.K. Ridley, N. Kabengi, N. Allen

**8:35 GEOC 111.** Silica/water interfaces investigated by DFT-MD simulations: Structure and SFG spectroscopy revealed in detail. M.P. Gaigeot

**8:55 GEOC 112.** Molecular origins of the zeta potential. M. Predota, M.L. Machesky, D. Wesolowski

**9:25 GEOC 113.** Effect of electrolyte concentration on the stern layer thickness at a charged interface. M.A. Brown

**9:45** Intermission.

**10:00 GEOC 114.** van der Waals wetting forces relevant to geologic carbon sequestration from inelastic x-ray scattering. B. Gilbert, P. Perera, P. Schuck, D. Sokaras, I.C. Bourg, T. Tokunaga

**10:30 GEOC 115.** Investigating water adsorption on surfaces using ambient-pressure XPS: Effects of humidity on copper and molybdenum oxides. L. Trotochaud, A.R. Head, S. Pletinco, O. Karslioglu, A. Waldner, H. Bluhm

**10:50 GEOC 116.** Heterogeneous nucleation rate of Mn(OH)<sub>2</sub> (s) controls structural match between Mn(OH)<sub>2</sub> (s) and quartz substrate. H. Jung, Y. Jun

**11:20 GEOC 117.** Interaction of bacterial cytochromes and iron oxide minerals. H. Wang, A. Johs, L. Liang

**11:40 GEOC 118.** MINFIT: A spreadsheet-based tool for parameter estimation in an equilibrium speciation software program. X. Xie, D. Giammar, Z. Wang

### Section B

San Francisco Marriott Union Square  
Union Square South

### Microbially-Driven Geochemical Reactions: Kinetics & Communities

D. Jones, J. Sánchez-España, B. M. Tebo, *Organizers*

W. D. Burgos, C. M. Hansel, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 119.** Kinetics and pathways of sulfur reactions linked to O, Fe, and C cycling affecting bioavailability. G.K. Druschel, F. Kafantaris, D. Fike, P. Schmitt-Kopplin, S. Dvorski

**8:35 GEOC 120.** Effect of climate change on coupled biogeochemistry of sulfur and mercury in organic soils. B.M. Toner, O.S. Furman, S. Psarska, A. Krupp, J.L. Gutknecht, S.D. Sebestyen, R.K. Kolka, E.A. Nater

**9:05 GEOC 121.** Isotopic and proteomic profiles of sulfate reducers cultivated at steady-state. W.D. Leavitt, S. Vencoeslau, J. Waldbauer, F. Boidi, D. Smith, A.S. Bradley

**9:35** Intermission.

- 9:55 GEOC 122.** Photosynthetic iron oxidation in the phylum chlorobi. **S. Crowe**, K. Thompson, R. Simister, A. Hahn, C. Morgan-Lang, S. Hallam
- 10:25 GEOC 123.** Geochemical and microbiological controls of oxygen production in cyanobacterial mats. **J.M. Klatt**, M. Medina, S. Grim, D. de Beer, G.J. Dick
- 10:55 GEOC 124.** Living on the edge: Model photoautotrophs from a Proterozoic ocean analog. **T. Hamilton**, C. Schuler, J. Havig, J. Macalady
- 11:25 GEOC 125.** Chemo-autotrophic and photo-autotrophic arsenotrophy in western USA soda lakes. **R.S. Oremland**

### Section C

San Francisco Marriott Union Square  
Savoy

#### Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants

- E. E. Roden, Y. Yang, *Organizers*  
M. Ginder-Vogel, A. Thompson, *Presiding*
- 8:00 GEOC 126.** Iron mineral transformations in organic-rich freshwater flocs induced by Fe(II) and sulfide. **L.K. Thomas-Arigo**, C. Mikutta, **R. Kretzschmar**
- 8:40 GEOC 127.** Key features of redox-fluctuating systems that influence iron cycling. **A. Thompson**, C. Meile, J. Wilmoth, D. Barcellos, C. Chen, B. Ginn, Y. Tang, C. Hodges
- 9:20 GEOC 128.** Quantifying the rate and extent of Fe<sup>2+</sup> catalyzed recrystallization of goethite: A combined experimental and modeling study. **P. Joshi**, M. Fantle, C. Gorski
- 9:40 GEOC 129.** Production of .OH from oxygenation of Fe<sup>2+</sup> under near-neutral conditions. **A. Qian**, S. Yuan, D. Giammar
- 10:00** Intermission.
- 10:20 GEOC 130.** Bioavailable Fe in nontronite decreases during consecutive Fe redox cycles. **B. Shi**, L. Wu, C.M. Smeaton, P. Van Cappellen
- 11:00 GEOC 131.** Availability of stored electrons in goethite under oxic conditions. **E. Tomaszewski**, S. Lee, H. Xu, **M.A. Ginder-Vogel**
- 11:20 GEOC 132.** Fe(II)-Fe(III) electron transfer in a low Fe clay mineral and its implications for U(VI) reduction. **D. Latta**, A. Neumann, W. Premaratne, M. Boyanov, E.J. O'Loughlin, K.M. Kemner, M. Scherer
- 11:40 GEOC 133.** Manganese and iron oxide-coated redox bars – tools to delineate soil reducing conditions and study the element sorption behavior in wetland soils. **K. Dorau**, T. Mansfeldt

Technical program information known at press time.  
The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

### Section D

San Francisco Marriott Union Square  
Sutter 1-3

#### 2017 Geochemistry Division Medal: Symposium in Honor of Dr. Susan Brantley

- S. N. Kerisit, A. Sitchler, *Organizers, Presiding*
- 8:30** Introductory Remarks.
- 8:35 GEOC 134.** Molecular modeling of multicomponent glass and glass surfaces for nuclear waste glass dissolution and glass-to-metal seals applications. **L.J. Criscenti**
- 8:55 GEOC 135.** Mineral surface topography related to weathering rate for a 3-D model crystal. **J.Z. Bandstra**
- 9:15 GEOC 136.** Silicate dissolution: Molecular modeling in the context of experimental and field dissolution and weathering. **J.D. Kubicki**
- 9:45 GEOC 137.** Atoms to pores concepts for mineral growth and precipitation. **A.G. Stack**
- 10:15** Intermission.
- 10:35 GEOC 138.** Lab-Field rate discrepancy revisited. **C. Steefel**
- 11:05 GEOC 139.** Effects of Na<sup>+</sup> and Ca<sup>2+</sup> on plagioclase dissolution under high salinity conditions: Implications for subsurface CO<sub>2</sub> injection. **Y. Min**, Y. Jun
- 11:25 GEOC 140.** Using u-series isotopes to quantify chemical weathering rates on Basse-Terre Island, French Guadeloupe. **L. Ma**

### TUESDAY AFTERNOON

#### Section A

San Francisco Marriott Union Square  
Union Square North

#### Mineral-Water Interface Chemistry

*Cosponsored by COLL and ENVR*

- J. Bracco, S. R. Higgins, S. Lee, *Organizers, Presiding*
- 1:30 GEOC 141.** Insights into mineral-water interface dynamics through coupled stable isotope and spectroscopic investigations. **K. Maher**, J. Nelson
- 2:00 GEOC 142.** Effects of nano-confinement and crystallinity on Zn isotope fractionation during adsorption onto silica surfaces. **J. Nelson**, L. Wasylenki, J.R. Bargar, G.E. Brown, K. Maher
- 2:30 GEOC 143.** Effect of interlayer cation size and charge on the intercalation of CO<sub>2</sub> and H<sub>2</sub>O into hectorite using computer molecular simulations. **N. Loganathan**, O. Yazaydin, G.M. Bowers, A.G. Kalinichev, J. Kirkpatrick
- 2:50 GEOC 144.** Reductive immobilization of hexavalent chromium by polysulfide-reduced nontronite. **M. Shi**, J. Li, J.S. Zheng
- 3:10 GEOC 145.** Real-time observations of Rb<sup>+</sup>/Na<sup>+</sup> exchange processes at the muscovite (001) – water interface. **S. Lee**, P. Fenter, K.L. Nagy, N.C. Sturchio
- 3:30** Intermission.
- 3:50 GEOC 146.** High resolution AFM imaging of ion adsorption and charge distribution at heterogeneous clay mineral-liquid interfaces. **I. Siretanu**, D. Ebeling, M. Andersson, D. van den Ende, F. Mugele

- 4:20 GEOC 147.** Impact of surface defects on the surface charge of gibbsite nanoparticles. **A. Klaassen**, F. Liu, D. van den Ende, F. Mugele, I. Siretanu

- 4:40 GEOC 148.** Aluminum oxyhydroxide-water interfaces: Structure, energetics, and effects of gamma-irradiation. **S.N. Kerisit**, M.P. Prange, Z. Shen, E.S. Ilton, X. Zhang, L. Kovarik, K.M. Rosso

- 5:10 GEOC 149.** Withdrawn.

#### Section B

San Francisco Marriott Union Square  
Union Square South

#### Microbially-Driven Geochemical Reactions: Kinetics & Communities

- D. Jones, J. Sánchez-España, B. M. Tebo, *Organizers*  
W. D. Burgos, C. M. Hansel, *Organizers, Presiding*
- 1:30 GEOC 150.** Deconstructing and reconstructing microbial communities that promote the natural attenuation of acidic mine waters. **B. Johnson**
- 2:00 GEOC 151.** Combined biogeochemical cycling of iron, sulphur, carbon and metal(oid)s (As, Pb, Cu, Zn, Cd, Ni, U, Th) in the water column of acidic pit lakes. **J. Sánchez-España**
- 2:30 GEOC 152.** Biological sulfide mineral transformations in acidic environments. **I. Sanchez Andrea**
- 3:00** Intermission.
- 3:20 GEOC 153.** Metal fluxes across the water-sediment interface in a reservoir affected by acid mine drainage: Reactive transport modeling. **E. Torres**, C. Ayora, A. Nardi, R.M. Couture, B. Shafei, P. Van Cappellen
- 3:50 GEOC 154.** Metagenomic and genomic characterization of novel organisms associated with sulfide mineral leaching in ore and waste rock from the Duluth Complex, Minnesota. **D. Jones**, E. Roepke, M. Sadowsky, P. Novak, J.V. Bailey
- 4:20 GEOC 155.** Microbial contributions to pyrrhotite oxidation. **K. Hobart**, D. Jones, J. Feinberg, J.V. Bailey

#### Section C

San Francisco Marriott Union Square  
Savoy

#### Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants

- E. E. Roden, Y. Yang, *Organizers*  
J. Mejia, L. Wu, *Presiding*
- 1:30 GEOC 156.** Electrochemical characterization of minerals and their redox reactions with solutes. **P.G. Tratnyek**, M. Bradley, J.Z. Bandstra, Y. Lan
- 2:10 GEOC 157.** Geochemical cycling and long-term stability of uranium, nickel and arsenic at the Cluff Lake, Saskatchewan uranium mine. **K. von Gunten**, T. Warchola, M. Donner, W. Hao, M. Cossio, C. Boothman, J. Lloyd, P. Blanchard, T. Siddique, K. Konhauser, D. Alessi
- 2:30 GEOC 158.** Effect of concentration and time on Pu desorption from goethite. **J. Begg**, M. Zavarin, A. Kersting

- 2:50 GEOC 159.** Electron transfer pathways facilitating U(VI) reduction by Fe(II) on the hematite (001) surface from first principles. **S. Taylor**, M.C. Marcano, U. Becker, K.M. Rosso

- 3:10 GEOC 160.** Pu(VI) hydroxamate complex formation at circumneutral pH. **K. Morrison**, M. Zavarin, Y. Jiao, A. Kersting

- 3:30** Intermission.

- 3:40 GEOC 161.** Role of secondary mineralization in the competitive inhibition of microbial uranium reduction by iron oxides. **K. Belli**, **M. Taillefert**

- 4:20 GEOC 162.** Time-Resolved synchrotron x-ray scattering and chemical analysis of redox reactions between aqueous Cr(III) and triclinic Na-birnessite. **K. Kong**, P. Heaney, F.T. Ling, J. Post, J. Stubbs, P.J. Eng

- 4:50 GEOC 163.** Arsenic release from contaminated sediments is limited by manganese redox buffering in Union Lake, New Jersey. **A. Keimowitz**, B. Mailloux, K.M. Wovkulich, J.S. Harkness, J.M. Ross, S.N. Chillrud

- 5:10 GEOC 164.** Assessment of the influence of climate change on mercury methylation on a molecular scale with a mechanistic reaction-transport model. **S. Helmrich**, D. Vlassopoulos, P.A. O'Day

#### Section D

San Francisco Marriott Union Square  
Sutter 1-3

#### 2017 Geochemistry Division Medal: Symposium in Honor of Dr. Susan Brantley

- S. N. Kerisit, A. Sitchler, *Organizers, Presiding*
- 1:30 GEOC 165.** From a single crater lake to a nation's water resources: Lessons from Susan Brantley about science and life. **G. Rowe Jr**
- 2:00 GEOC 166.** Calcite and sulfur precipitation due to weathering of granites in temperate climates. **V. Marcon**, X. Gu, H. Kim, S. Brantley
- 2:20 GEOC 167.** Atomistic-scale evaluation of the fracture toughness of silicates in aqueous environments. **J.M. Rimsza**, R. Jones, L.J. Criscenti
- 2:40 GEOC 168.** Nanometer to centimeter scale analysis and modeling of pore structures in Earth materials. **D. Cole**, L. Anovitz, G. Rother, A. Swift, X. Gu, S.L. Brantley
- 3:10** Intermission.
- 3:30 GEOC 169.** Role of organic matter and pyrite oxidation on deep shale weathering: A comparison of gray shale and black shale. **X. Gu**, S.L. Brantley
- 3:50 GEOC 170.** Snowmelt controls on concentration-discharge relationships and the balance of oxidative and acid-base weathering fluxes in an alpine catchment, East River, Colorado. **M. Winnick**, R. Carroll, K. Williams, R. Maxwell, W. Dong, K. Maher
- 4:10 GEOC 171.** Soil weathering as an engine for manganese contamination of well water in the North Carolina Piedmont. **M. Polizzotto**, E. Gillispie, N. Rivera, R. Austin, R. Bolich, O. Duckworth, P. Bradley, A. Amoozegar, D. Hesterberg

**4:30 GEOC 172.** Distribution and speciation of phosphorus in a granite weathering profile in a temperate climate. **Z. Zhang, C. Liu, Z. Zhao, M. Zhu**

## WEDNESDAY MORNING

### Section A

San Francisco Marriott Union Square  
Union Square North

#### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

Cosponsored by COLL, ENVR and NUCL

R. Penn, J. A. Soltis, *Organizers*

M. Conroy, F. N. Smith, *Organizers, Presiding*

**8:30 GEOC 173.** Mineral growth by nanoparticle aggregation: Calcium phosphate minerals. **F. Michel, A. Hoehner, O. Borkiewicz, J. Rakovan**

**9:00 GEOC 174.** Direction-Specific interaction force between nanocrystals. **X. Zhang, Y. He, M. Sushko, J. Liu, L. Luo, J.J. De Yoreo, S. Mao, C. Wang, K. Rosso**

**9:20 GEOC 175.** Sulfidization of ferric hydroxides – insights into a dynamic electron transfer process. **S. Peiffer**

**9:50** Intermission.

**10:10 GEOC 176.** Thermodynamics of nanophase manganese oxides: Sodium, potassium, and calcium birnessite and cryptomelane. **A. Navrotsky, N. Birkner**

**10:50 GEOC 177.** Interfacial reactions during Mn biogeochemical cycling: Impact on Mn oxide structures and reactivities towards trace metals. **M.A. Hinkle, E. Flynn, K.G. Dye, J. Post, C. Santelli, J.G. Catalano**

**11:20 GEOC 178.** Control of solution metal content on the nanostructure and reactivity of mixed Cu-Zn sulfides formed in low-temperature aqueous systems. **J. Xu, E. Klemm, M.F. Hochella**

**11:40 GEOC 179.** Formation, aggregation, and *in situ* dissolution behavior of abiogenically and biogenically produced ZnS nanoparticles. **J.R. Eskelsen, J. Moon, A.M. Jubb, B.O. Wilkins, M. Chiu, B. Gu, E.M. Pierce**

### Section B

San Francisco Marriott Union Square  
Union Square South

#### Microbially-Driven Geochemical Reactions: Kinetics & Communities

W. D. Burgos, C. M. Hansel, B. M. Tebo, *Organizers*

D. Jones, J. Sánchez-España, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 180.** Oxidative extracellular electron transfer - rethinking the role of microbes in biogeochemical cycles. **A. Bose**

**8:35 GEOC 181.** Microbial metabolite and metabolic byproducts promoted dissolution and transformation of Cr-containing minerals. **E. Saad, S. Chen, M. Zhu, C. Hansel, Y. Tang**

**9:05 GEOC 182.** Effect of soluble electron shuttles on Iron(III) reduction, methane production, and microbial community dynamics in wetland sediment microcosms. **T. Flynn, M.F. Sladek, Z.D. Jensvold, D.A. Antonopolous, J.C. Koval, C.W. Marshall, K.M. Kemner, E.J. O'Loughlin**

**9:25 GEOC 183.** Evidence for low molecular weight thiols as electron shuttles in dissimilatory iron reduction in natural sediments. **E. Eitel, M. Taillefert**

**9:45** Intermission.

**10:05 GEOC 184.** Fe(II) oxidation by zeta-proteobacteria and friends: Mechanisms and influences on biogeochemical cycles. **C. Chan, S.M. McAllister, B.K. Chiu, E.K. Field, S. Kato, S.W. Polson**

**10:35 GEOC 185.** Microbial iron redox metabolism in circumneutral pH environments. **E.E. Roden**

**11:05 GEOC 186.** Biodegradation of organic additives in the hydraulic fracturing system: These shale wells aint sterile! **P. Mouser**

**11:35 GEOC 187.** Uranium biomineralization by the acid tolerant *Caulobacter crescentus* OR37. **K. Morrison, M. Zavarin, A. Kersting, Y. Jiao**

### Section C

San Francisco Marriott Union Square  
Savoy

#### Mineral-Water Interface Chemistry

Cosponsored by COLL and ENVR

J. Bracco, S. R. Higgins, S. Lee, *Organizers, Presiding*

**8:00 GEOC 188.** Modeling the calcite-water interface: Ion adsorption, ion incorporation and mineral growth. **M. Andersson, S. Dobbenschütz, H. Sakuma, K. Sand, K. Diderksen, D. Tobler, M. Nielsen, J.J. De Yoreo, J. Rodriguez-Blanco, K. Bechgaard, S. Stipp**

**8:30 GEOC 189.** Solution-Chemistry control of Mg<sup>2+</sup>-calcite interaction mechanisms: Implication for biomineralization. **J. Xu, J. Wang, H. Teng**

**8:50 GEOC 190.** Solution chemistry of hydroxamic acid adsorption onto barite and calcite. **A. Wanhala, A.G. Stack**

**9:10 GEOC 191.** Role of actinide sorption kinetics in a dolomite/brine system and potential transport from nuclear waste repositories in salt. **T.M. Dittrich, M.P. Dugas, D.T. Reed**

**9:30 GEOC 192.** Experimental quantification of kinetic factors in the nucleation rate equation. **Q. Li, Y. Jun**

**9:50** Intermission.

**10:10 GEOC 193.** Lateral and vertical hydration structure of the barite (001)-water interface: An x-ray reflectivity and molecular dynamics study. **J. Bracco, S. Lee, P. Fenter, J. Stubbs, P.J. Eng, F. Heberling, A.G. Stack**

**10:30 GEOC 194.** Fast solvent exchange on a mineral-water interface coupled to process-based mineral precipitation models. **A.G. Stack, J.M. Borreguero, J. Bracco, S.R. Higgins**

**11:00 GEOC 195.** Investigation of the effect of varying ionic strength of background electrolytes on barite growth: A hydrothermal atomic force microscopy study. **S. Jindra, S.R. Higgins, J. Book**

**11:20 GEOC 196.** In situ nanoscale observations of gypsum dissolution by digital holographic microscopy. **P. Feng, A. Brand, L. Chen, J. Bullard**

### Section D

San Francisco Marriott Union Square  
Sutter 1-3

#### 2017 Geochemistry Division Medal: Symposium in Honor of Dr. Susan Brantley

S. N. Kerisit, A. Stöckhert, *Organizers, Presiding*

**8:30 GEOC 197.** Interaction of lignin with Fe(II) in the environment leads to the production of humic substances in natural waters, sediments, and soils via Fenton chemistry. **P.G. Hatcher, S.C. Myneri**

**9:00 GEOC 198.** Retention of CO<sub>2</sub> and CH<sub>4</sub> in kerogen and its importance in enhanced gas recovery. **L.J. Criscenti, T.A. Ho, Y. Wang**

**9:20 GEOC 199.** Effect of sea level rise on the production of organohalogenes in coastal wetlands. **D. Schlesinger, C. Joe-Wong, A.T. Chow, S.C. Myneri**

**9:40 GEOC 200.** Interactions of snow algae, microorganisms, and minerals in snowpack: Implications for Earth's albedo and potential biosignature formation. **E. Hausrath, Z. Harrold, A. Murray, O. Tschauer, A. Garcia, C. Barlett, J. Raymond**

**10:10** Intermission.

**10:30 GEOC 201.** Top-down and bottom-up controls on molybdenum isotope dynamics in the critical zone. **J. Pett-Ridge, E.K. King**

**10:50 GEOC 202.** Earthcasting solute fluxes and soil development in the critical zone. **P. Sullivan, Y. Goddard, J. Schott, Y. Shi, X. Gu, L. Jin, S. Billings, S. Brantley**

**11:10 GEOC 203.** Understanding inorganic carbon dynamics in natural and human-impacted critical zones. **L. Jin, A. Ortiz, N. Ogrinc, J. Kaye, L. Ma, E. Hasenmueller, P. Sullivan, S. Brantley**

#### Aquatic Photochemistry

Sponsored by ENVR, Cosponsored by GEOC

## WEDNESDAY AFTERNOON

### Section A

San Francisco Marriott Union Square  
Union Square North

#### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

Cosponsored by COLL, ENVR and NUCL

M. Conroy, F. N. Smith, *Organizers*

R. Penn, J. A. Soltis, *Organizers, Presiding*

**1:30 GEOC 204.** Synthetic nanoparticle analogues for studying biological response to airborne particulate matter. **A. Pattammattel, H. Zhang, H.J. Forman, V. Leppert, P.A. O'Day**

**1:50 GEOC 205.** Size-dependent mineral nanoparticle surface reactivity in aquifer systems. **K.A. Lewis, E.M. Defferari, A.L. Swindle, A. Elwood Madden**

**2:10 GEOC 206.** Characterizing reactivity of iron oxide nanoparticles. **R. Penn, A.M. Stemig, J.L. Voelz, J.H. Strehlau, C. Johnston, W. Arnold**

**2:30 GEOC 207.** Caesium-rich micro-particles: A window into the meltdown events at the Fukushima Daiichi Nuclear Power Plant. **S. Utsunomiya**

**3:00** Intermission.

**3:20 GEOC 208.** Behavior of nanoscale Al (oxy)hydroxide minerals under highly alkaline conditions as a function of metal substitution, surface coordination and solution chemistry. **C. Pearce, J. Hu, A.R. Felmy, A.E. Clark, X. Zhang, K. Page, H. Wang, A.G. Stack, D. Wesolowski, K. Rosso, S. Clark**

**3:50 GEOC 209.** Theoretical studies of prenucleation clusters. **S.E. Mason**

**4:20 GEOC 210.** Life cycle of Boehmite nano-particles in high level nuclear waste tanks: An electron microscopy study of their growth, aggregation and dissolution. **M. Conroy, J.A. Soltis, S. Chatterjee, F.N. Smith, E. Ilton, E. Buck**

**4:40 GEOC 211.** Theoretical study of gibbsite dissolution at high pH. **Z. Shen, K.M. Rosso, S.N. Kerisit**

### Section B

San Francisco Marriott Union Square  
Union Square South

#### Microbially-Driven Geochemical Reactions: Kinetics & Communities

W. D. Burgos, C. M. Hansel, B. M. Tebo, *Organizers*

D. Jones, J. Sánchez-España, *Organizers, Presiding*

**1:30 GEOC 212.** Intricate coupling of carbon, nitrogen and iron redox cycling underlying the biogeochemical dynamics of N<sub>2</sub>O. **S.D. Wankel, C. Buchwald, J. Karolewski, K.C. Grabb, C. Charoenpong, C. Hansel, W. Ziebis**

**2:00 GEOC 213.** Dually biominerals? Characterizing simultaneously produced fungal biogenic Mn oxides and Se(O). **C. Rosenfeld, M.A. Hinkle, B.R. James, C. Santelli**

**2:30 GEOC 214.** Microbial community profiling of bioreactors for process control and optimization. **M. Haakensen, V. Friesen**

**2:50 GEOC 215.** Long-term low dissolved oxygen concentration enriches and shifts nitrifier communities. **G. Liu, J. Wang**

**3:10** Intermission.

**3:30 GEOC 216.** Activity and phylogenetic diversity of microorganisms in subsurface fluids in the upper ocean crust. **J. Amend, A. Robador, S. Jungbluth, D. LaRowe**

**4:00 GEOC 217.** How heterotrophic microorganisms access sedimentary organic matter: A few known knowns, and plenty of known unknowns. **A.D. Steen**

**4:30 GEOC 218.** Microbial-driven organic carbon degradation in a tundra soil. **Z. Yang, B. Gu**

### Section C

San Francisco Marriott Union Square  
Savoy

#### Structure & Reactivity of Cementitious Materials from Advanced Characterization Techniques

N. Birkner, G. Nagabhushana, R. Shivaramaiah, *Organizers*

A. Fernandez-Martinez, B. Ma, *Presiding*

**1:30** Introductory Remarks.

- 1:35 GEOC 219.** Calcium silicate hydrates. **B. Lothenbach**
- 2:15 GEOC 220.** Hydration dynamics and morphology of cement pastes with engineered nano additives studied via advanced beamline techniques. **K. Kupwade-Patil, S. Chin, A.Y. Bumajdad, A. Jamsheer, O. Buyukozturk**
- 2:35 GEOC 221.** Effect of magnesium on the stability of C-S-H. **E. Bernard, A. Dauzères, I. Pochard, B. Lothenbach**
- 2:55 GEOC 222.** Experimentally Driven Building Block Model for Cementitious Materials. **D.B. Brommer, F. Martin-Martinez, K. Kupwade-Patil, M.J. Buehler, O. Buyukozturk**
- 3:15 GEOC 223.** Impact of alkalis on the atomic structure of calcium aluminosilicate gels: An x-ray pair distribution function investigation. **N. Garg, C. White**
- 3:35 Intermission.**
- 3:55 GEOC 224.** Tricalcium silicate hydration in absence and presence of aluminate ions: A step towards a molecular understanding of how the hydration rate of cement depends on its formulation. **E. Pustovgar, R.K. Mishra, M. Palacios, T. Matschei, R. Verel, H. Heinz, R.J. Flatt, J. d'Espinose de Lacaillerie**
- 4:15 GEOC 225.** Controlling cement hydration through the molecular structure of comb copolymer superplasticizers. **D. Marchon, P. Juilland, E. Gallucci, L. Frunz, R.J. Flatt**
- 4:35 GEOC 226.** Structure and reactivity of Portland cement components and cement blends from solid-state NMR spectroscopy. **J. Skibsted**
- 4:55 GEOC 227.** Characterization of Portland cement clinker by Electron Backscatter Diffraction (EBSD) analysis in the Scanning Electron Microscope (SEM). **C. Roessler, B. Moeser, H. Ludwig**
- 5:15 GEOC 228.** Simulations reveal the role of composition into the atomic-level flexibility of bioactive glass cements. **K. Tian, G. Chass, D. Di Tommaso**

## Section D

San Francisco Marriott Union Square  
Sutter 1-3

### General Geochemistry

A. Ilgen, *Organizer, Presiding*

### 1:30 Introductory Remarks.

- 1:35 GEOC 229.** Investigation of uranium uptake mechanisms by plants from abandoned mine lands in the Southwestern United States. **L. Rodriguez Freire, E. El Hayek, J.M. Blake, C. DeVore, S. Avasarala, A.M. Ali, M. Spilde, K. Artyushkova, A. Brearley, J.M. Cerrato**

## Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

- 1:55 GEOC 230.** Plutonium incorporation into goethite and hematite during crystallization from ferrihydrite Plutonium incorporation into goethite and hematite during crystallization from ferrihydrite. **E. Balboni, M. Zavarin, A. Kersting**
- 2:15 GEOC 231.** Lead, chromium, and arsenic accumulation associated with naturally accumulating iron-manganese oxide coatings on in-situ stream substrates comparing geothermal and non-geothermal waters. **M. Turpin, J.M. Blake, A.M. Ali, L. Crossey**
- 2:35 GEOC 232.** Some fish species in offshore Fukushima, Japan have the ability to accumulate a specific nuclide (radioisotope). **H. Katsura**
- 2:55 GEOC 233.** Metal(loid) release from coal mine spoil during simulated weathering. **S. Morrison, D. Singer, E. Herndon**
- 3:15 Intermission.**
- 3:35 GEOC 234.** Thermodynamic study of transition metal ion-exchanged zeolites A and Y. **L. Wu, A. Navrotsky**
- 3:55 GEOC 235.** Transformation of ZnO Nanoparticles (NPs) into Layered Double Hydroxide (LDH) precipitates on nano- $\gamma$ - $\text{Al}_2\text{O}_3$ : Implications for the fate of ZnO NPs under Al-enriched environment. **B. Wan, Y. Tang, R. Huang, X. Feng**
- 4:15 GEOC 236.** Oxygen isotope ratios of phosphate as proxy for polyphosphate cycling in bacteria. **G. Unal Tosun, Y. Bai, L.M. Stout, D. Jaisi**
- 4:35 GEOC 237.** NMR Correlation spectroscopy of liquids at geochemical pressures. **M.P. Augustine, G. Ochoa, W.H. Casey**

### Advances in Resource Recovery & Conservation in Water Systems

*Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC*

### Aquatic Photochemistry

*Sponsored by ENVR, Cosponsored by GEOC*

## WEDNESDAY EVENING

### Section A

Moscone Center  
Hall D

### 2017 Geochemistry Division Medal: Symposium in Honor of Dr. Susan Brantley

S. N. Kerisit, A. Sitchler, *Organizers*

### 6:00 - 8:00

- GEOC 238.** Phosphorus speciation in dust and source soils in the interior American west. **Z. Zhang, H. Goldstein, R. Reynolds, M. Zhu**

### Section A

Moscone Center  
Hall D

### Advances in Treatment Processes for Metals & Metalloids

*Cosponsored by ENVR*

K. Campbell-Hay, C. F. Wildman, *Organizers*

### 6:00 - 8:00

- GEOC 239.** Biogeochemistry of anti-mony(V) in microcosms under sulfidogenic conditions. **C.R. Johnson, D.A. Antonopolous, M. Boyanov, T. Flynn, J.C. Koval, K.M. Kemner, E.J. O'Loughlin**

- GEOC 240.** Passivation of uranium ore material surfaces with uranyl phosphate precipitation. **T. Kane, K.M. Campbell, M. Hay**

- GEOC 241.** Analysis of U(VI) adsorption to biochar using x-ray absorption spectroscopy and isothermal titration calorimetry. **M. Alam, D. Gorman-Lewis, N. Chen, K. Konhauser, D. Alessi**

- GEOC 242.** Release of metal(loid)s from coal fly ash and their transformation in aquatic boreal systems. **K.P. Milke, S.M. Hayes, J.J. Guerard**

- GEOC 243.** Geopolymer-based solutions for heavy metal waste solidification and stabilization. **M. Lacks, L.E. Katz, M. Juenger**

- GEOC 244.** Remediation of heavy metal contaminated soil with coupled soil washing and electro-kinetic field. **X. Mao, F.X. Han, X. Shao, Z. Arslan, K. Guo**

- GEOC 245.** Application of biodegradable chelators and vegetable oils in the removal of heavy metals from soils. **M. Sung, G. Liu, Y. Chen**

### Section A

Moscone Center  
Hall D

### Contaminants Transport, Uptake & Remediation at Contaminated Sites

*Cosponsored by ENVR*

B. H. Jeon, M. B. Kurade, Y. Sik Ok, D. Tsang, *Organizers*

### 6:00 - 8:00

- GEOC 246.** Uncovering the sources of elevated arsenic levels in classic Maya human remains. **C.C. Ivanovich, E.L. Smith, J. Monge, C. Halperin, B.R. Just, S.C. Myrneni**

- GEOC 247.** World oceans under serious threat: Debris polystyrene in ocean water and sand areas surrounding Japan. **K. Koizumi, M. Okada, K. Amamiya, K. Takatama, D.M. Karl, H. Katsura, S. Chung, K. Saido, T. Hiaki**

- GEOC 248.** Slow pyrolyzed biochar for Pb and As immobilization, and microbial community abundance of contaminated soils. **A. Igalavithana, Y. Xiao, A. El-Naggar, Y. Sik Ok**

- GEOC 249.** Efficacy of acetate-amended biostimulation for uranium sequestration: Combined analysis of sediment/groundwater geochemistry and bacterial community structure. **J. Xu, H. Veeramani, N. Qafoku, G. Singh, A. Pruden, M.F. Hochella**

- GEOC 250.** Optimizing magnetite formation for magnetite-based remediation of arsenic groundwater contamination. **A. Yusov, J. Jamieson, J. Sun, H. Prommer, B.C. Bostick**

- GEOC 251.** Hydrous zirconium oxide impregnated alginate beads for simultaneous sorption of hexavalent chromium and copper from aqueous solutions. **R. Kumar, K. Kim, J. Jang, B. Jeon**

- GEOC 252.** Simulated physical weathering effects on bioaccessibility and speciation of arsenic in mine tailings. **S. Hok, B. Lamb, N. Burtis, J. Cooper, C. Kim**

- GEOC 253.** Correlating arsenic bioaccessibility & bioavailability through *in vivo rat exposures*. **T. Oliaro, B. Lamb, D. Hok, F. Silva, M. Gothong, C. Kim**

- GEOC 254.** Biodegradation of fluoroquinolone antibiotic from aqueous media by an acclimated green microalgae *Chlorella vulgaris*. **J. Xiong, S. Saha, H. Kim, B. Jeon**

### Section A

Moscone Center  
Hall D

### Environmental Challenges & Solutions in Unconventional Oil & Gas Development

*Cosponsored by ENVR*

D. Alessi, J. Blotvogel, T. Borch, S. Flynn, *Organizers*

### 6:00 - 8:00

- GEOC 255.** Evaluating changes in groundwater and stream-water chemistry during natural-gas development of Pennsylvania's Marcellus shale. **J. Sohng, E. Barth-Naftilan, J. Saiers**

### Section A

Moscone Center  
Hall D

### Formation, Structure & Reactivity of Biogenic Minerals

O. Duckworth, J. Pena, M. Polizzotto, C. Santelli, *Organizers*

### 6:00 - 8:00

- GEOC 256.** Probing the sorption of metalloids onto synthetic and myco-genic manganese oxides. **C.E. Heath, B. Uster, O.W. Duckworth**

### Section A

Moscone Center  
Hall D

### General Geochemistry

A. Ilgen, *Organizer*

### 6:00 - 8:00

- GEOC 257.** Impact of calcium on the retention and stability of OM in Fe-(Ca)-OM adsorption complexes. **T. Sowers, J. Stuckey, D. Adhikari, Y. Yang, D.L. Sparks**

### GEOC 258. Withdrawn.

- GEOC 259.** Using NaCl as a model system to study stable mineral recrystallization. **P. Joshi, C. Gorski**

- GEOC 260.** Physiological extractions of metal(loid)s from coal fly ash in interior Alaska. **J. Sterle, S.M. Hayes, J.J. Guerard**

- GEOC 261.** Geochemical and hydro-logic controls on mercury methylation within an upper-Midwestern terrace fen. **S. Lopez, A. Graham**

- GEOC 262.** Molecular investigation of soil organic carbon composition, spatial variability, and depth distribution across a subalpine catchment. **H. Hsu, C. Lawrence, M. Winnick, J. Druhan, K. Williams, K. Maher**

- GEOC 263.** Study of heavy metals mobility in acid drainage and its geological interaction in Taxco, Mexico. **T. Rico, A. Ceniceros, M.E. Gutierrez Ruiz, L. Martínez-Jardines, F. Romero**

### GEOC 264. Withdrawn.

- GEOC 265.** Spatiotemporal variability in MeHg production in a Restored Oak Savanna Floodplain. **S. Van Helten, A. Graham**

- GEOC 266.** Kinetic studies on the spontaneous realumination of hydrothermally treated zeolite Y. **V.A. Mendiola, S. Crawford**

**GEOC 267.** Lessons learned from the natural analogue studies relevant to the Korean geological environments of granites and KAERI's disposal research. T. Park, M. Baik

**GEOC 268.**  $^{17}\text{O}$  NMR of the flat aluminum and gallium polyoxocations: Models for minerals. C. Colla, C. Fields, A. Oliveri, B. Phillips, W.H. Casey

**GEOC 269.** Biogeochemical trace element profiles of urban fruit trees: A resource to increase food security. H. Oettgen, C. Gallagher, D. Brabander

**GEOC 270.** Kinetic studies of long range metal cation migration through porous zeolitic materials using DRIFT spectroscopy. E.A. Gorrie, S. Nunes, S. Crawford

**GEOC 271.** SFG spectroscopy of Silica/water interfaces by DFT-MD simulations. S. Pezzotti

## Section A

Moscone Center  
Hall D

### Microbially-Driven Geochemical Reactions: Kinetics & Communities

W. D. Burgos, C. M. Hansel, D. Jones, J. Sánchez-España, B. M. Tebo, *Organizers*

6:00 - 8:00

**272.** Microbial communities associated with methylmercury production in two sulfate-impacted northern Minnesota lakes. D. Jones, G. Walker, N.W. Johnson, C. Mitchell, J. Coleman Wasik, J.V. Bailey

## Section A

Moscone Center  
Hall D

### Mineral Nucleation: Transient Intermediates & Phase Transitions

B. Legg, S. L. Riechers, *Organizers*

6:00 - 8:00

**GEOC 273.** Real-Time and in situ imaging of Akaganéite nanoparticle growth in aqueous solution using liquid cell transmission electron microscopy. F. Wang, M. Zhu

## Section A

Moscone Center  
Hall D

### Mineral-Water Interface Chemistry A Tribute to Glenn Waychunas

*Cosponsored by COLL and ENVR*

B. Gilbert, C. S. Kim, P. A. O'Day, *Organizers*

6:00 - 8:00

**GEOC 274.** Adsorption and oxidation of fulvic acid by birnessite under various pH conditions. Q. Wang, P. Yang, M. Zhu

**GEOC 275.** Investigations of organic ligands with iron oxide mineral/water interfaces using second harmonic and sum frequency generation spectroscopic techniques. A.L. Mifflin, K. Michaud, A. O'Neal, D. Antonio

**GEOC 276.** Mobility and toxicity of polyoxometalates of W and As, P, and Si. L. Davidson, E. Haque, A. Nghiem, B.C. Bostick

**GEOC 277.** Reactions of birnessite with Mn(II) under anoxic conditions. P. Yang, Q. Wang, M. Zhu

## Section A

Moscone Center  
Hall D

### Mineral-Water Interface Chemistry

*Cosponsored by COLL and ENVR*

J. Bracco, S. R. Higgins, S. Lee, *Organizers*

6:00 - 8:00

**GEOC 278.** Description of the corundum ( $\alpha\text{-Al}_2\text{O}_3$ ) - water interface from DFT-MD simulations. M.K. Ridley, D. Tunega

**GEOC 279.** Adsorption of oxalic acid on rutile surfaces. D. Biriukov, M. Predota, O. Krutil, M.K. Ridley, M.L. Machesky

**GEOC 280.** Impact of organic molecules on the colloidal stability of silica nanoparticles - simulations and experiments. D. Biriukov, M. Predota, O. Krutil, J.K. Rosenqvist, C.M. Jonsson

**GEOC 281.** Fate of trace metals during aluminum oxyhydroxide phase transitions: Implications for reactivity. F.N. Smith, D.G. Burt, S. Chatterjee, M. Conroy, J.A. Soltis, E. Ilton, E. Buck

**GEOC 282.** Mapping shale surface charge heterogeneity and surfactant adsorption via atomic force microscopy. S. Das, B. Ellis

**GEOC 283.** Calcite dissolution rate spectra measured by digital holographic microscopy. A. Brand, P. Feng, J.W. Bullard

**GEOC 284.** Development of a down-hole tool for measuring enthalpy in geothermal reservoirs. W.C. Corbin, G. Cieslewski, R.F. Hess, B. Klamn, L. Goldfarb, T.J. Boyle, W.G. Yelton

## Section A

Moscone Center  
Hall D

### Redox-Driven Environmental Geochemical Reactions for Metals, Major Elements & Organic Pollutants

E. E. Roden, Y. Yang, *Organizers*

6:00 - 8:00

**GEOC 285.** Ferrihydrite - Carbon dynamics in the presence of Fe(II). Z. Zhou, D. Latta, T. Borch, N. Noor, A. Thompson, R. Young, M. Scherer

**GEOC 286.** Reductive pathway to Mo deposition in anoxic sediments: Aqueous  $\text{Mo}^{\text{VI}}$  to insoluble  $\text{Mo}^{\text{IV}}$  via variable-composition Fe-Mo<sup>VI</sup>-S precipitates. P. Vue, A. Vezina, A. Chappaz, T.P. Vorlicek

**GEOC 287.** Redox properties of layer-type manganese oxide minerals. S. Benkaddour, F. Marafatto, Y. Wang, M. Sander, J. Pena

**GEOC 288.** Formation and reactivity of ferrihydrite-soil organic carbon-calcium ternary complexes. D. Adhikari, T. Sowers, J. Stuckey, D.L. Sparks, Y. Yang

**GEOC 289.** Electron doping goethite with Fe(II): Influence on goethite properties and reactivity. L.N. Andrade, D. Latta, A. Neumann, K. Rosso, M. Scherer

**GEOC 290.** Arsenic oxidation by the mighty manganese soils of graskop. M. Fischel, C. Dowling, D.L. Sparks

**GEOC 291.** Interactions of vanadium(V) with Fe(II)-bearing minerals. E.J. O'Loughlin, M. Boyanov, K.M. Kemner

## Section A

Moscone Center  
Hall D

### Structure & Reactivity of Cementitious Materials from Advanced Characterization Techniques

N. Birkner, G. Nagabhushana, R. Shivaramaiah, *Organizers*

6:00 - 8:00

**292.** Quantifying readily soluble calcium in class C fly ash by Inductively Coupled Plasma Optical Emission Spectroscopy (ICP-OES). L.N. Perry, P. Feng, P.E. Stutzman, J. Bullard

### Aquatic Photochemistry

*Sponsored by ENVR, Cosponsored by GEOC*

## THURSDAY MORNING

### Section A

San Francisco Marriott Union Square  
Union Square North

### Environmental Challenges & Solutions in Unconventional Oil & Gas Development

*Cosponsored by ENVR*

D. Alessi, J. Blotvogel, T. Borch, S. Flynn, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 **GEOC 293.** Withdrawn.

**8:35 GEOC 294.** Factors controlling the temporal change in chemical composition of Marcellus Shale produced water: Insights from laboratory experiments to field sites. T. Phan, A. Hakala

**8:50 GEOC 295.** Arsenic mobilization in carbonate-rich shales during hydraulic fracturing. W. Fan, K.F. Hayes, B. Ellis

**9:10 GEOC 296.** Geochemical modeling of arsenic incorporation during barite precipitation. F.T. Ling, H.A. Hunter, J.P. Fitts, A. Lanzirotti, A.S. Acerbo, C.A. Peters

**9:25 GEOC 297.** Effects of a phosphate-based scale inhibitor on brine-biotite interactions: Implications for  $\text{CO}_2$ -enhanced hydrocarbon recovery. L. Zhang, Y. Jun

9:40 Intermission.

**10:00 GEOC 298.** Chemical transformations in high volume hydraulic fracturing fluids. D.L. Plata, P. Mouser, M. Elsner, B. Drollette, A.J. Sumner

**10:20 GEOC 299.** Characterization of a hydraulically fractured well over a one year period: From fracturing fluid to produced water quality. K. Linden, J. Rosenblum, E. Thurman, I. Ferrer, G. Aiken

**10:40 GEOC 300.** Isolation, analysis, and fingerprinting of organic compounds from hydraulic fracturing fluids using solid phase extraction and liquid chromatography mass spectrometry. K. Sitterley, K. Linden, I. Ferrer, E. Thurman

**10:55 GEOC 301.** Ion mobility mass spectrometry of hydraulic-fracturing fluids. E.M. Thurman, I. Ferrer, J. Zweigenbaum, A. Boice, J. Fjeldsted

**11:10 GEOC 302.** Characterization of secondary precipitates in flowback water from hydraulic fracturing and their contribution to zebrafish embryo toxicity. S. Flynn, K. von Gunten, Y. He, E. Folkerts, T. Blewett, Y. Zhang, D. Ruan, J.W. Martin, G. Goss, D. Alessi

**11:25 GEOC 303.** Assessment of water quality and toxicity downstream of NPDES oil and gas produced water discharges. M. McLaughlin, J. Blotvogel, J. Argueso, T. Borch

**11:40 GEOC 304.** Biological toxicity associated with lake sediments impacted by oil & gas wastewater disposal. W.D. Burgos, L. Castillo-Meza, J. Vandenberg, N. Warner, M. McLaughlin, T. Borch

### Section B

San Francisco Marriott Union Square  
Union Square South

### Contaminants Transport, Uptake & Remediation at Contaminated Sites

*Cosponsored by ENVR*

M. B. Kurade, D. Tsang, *Organizers*

B. H. Jeon, Y. Sik Ok, *Organizers, Presiding*

8:00 Introductory Remarks.

**8:05 GEOC 305.** Removal mechanism for technetium ( $^{99}\text{Tc}$ ) using  $\text{Fe}(\text{OH})_2(\text{s})$  at the Hanford Site, WA, USA. W. Um

**8:35 GEOC 306.** Recovery of useful resources in shale gas produced water during water treatment. E. Chung

**9:05 GEOC 307.** Subsurface oil body delineation at a spill site using near-surface temperature gradients. E. Warren, B.A. Bekins

9:25 **GEOC 308.** Withdrawn.

9:45 Intermission.

**10:00 GEOC 309.** Contaminated site remediation by biochars derived from various types of sewage sludge. D. Tsang, J. Yoo

**10:25 GEOC 310.** Impacts of burning intensity on metal reactivity in wood ash. A. Rahman, E. El Hayek, R.J. Bixby, J.M. Blake, A.M. Ali, A.L. Clark, K. Artyushkova, E. Peterson, J.M. Cerrato

**10:45 GEOC 311.** Mechanisms of the reductive immobilization of hexavalent chromium by wheat straw biochar. M. Cossio, M. Alam, K. von Gunten, J. Kenney, A. Gorzsás, N. Chen, K. Konhauser, D. Alessi

**11:05 GEOC 312.** Uranium uptake and redistribution in the transformation of ferrihydrite to goethite. J.A. Soltis, E.S. Ilton, O. Qafoku, S. Spurgeon, E. Buck, J.J. De Yoreo

**11:25 GEOC 313.** Pentachlorophenol (PCP) removal and dechlorination patterns during oxygen-rich thermal treatment. J. Davis, L.E. Katz, H. Liljestrand

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**11:45 GEOC 314.** Simulation of heavy metal migration in MSWI bottom ash landfill site. H. Zhang

### Section C

San Francisco Marriott Union Square Savoy

#### Structure & Reactivity of Cementitious Materials from Advanced Characterization Techniques

N. Birkner, G. Nagabhushana, R. Shivaramaiah, *Organizers*

N. Garg, C. White, *Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 315.** CaSO<sub>4</sub> crystallization: From nano-bassanite to mega-gypsum. A.E. Van Driessche

**8:25 GEOC 316.** Quantifying the dissolution rates of cementitious minerals with *in situ* digital holographic microscopy: Tricalcium aluminate and tetracalcium aluminoferrite. A. Brand, P. Feng, J.W. Bullard

**8:45 GEOC 317.** Evidence of multiple sorption modes in AFm phases using Mo as structural probe. B. Ma, A. Fernandez-Martinez, S. Grangeon, L.L. Charlet

**9:05 GEOC 318.** Performance of alkali-activated Turkish Fly Ashes at high temperatures. C. Meral

**9:25 GEOC 319.** Swelling of Alkali-Silica Reaction (ASR) gels and the resulting damage in concrete. F. Rajabipour, A. Gholizadeh

**9:45** Intermission.

**10:05 GEOC 320.** Accurate determination of hydroxide concentration in activating solutions: New insights into metakaolin reactivity towards geopolymerization. J. Aupoil, J. Champenois, J. D'Espinose de Lacaillerie, A. Poulesquen

**10:25 GEOC 321.** Effect of temperature and calcium to silicon ratio on structure of calcium (aluminosilicate) hydrate at atomic scale and nano scale. J. Li, G. Geng, R. Myers, S. Ortoboy, C. Carraro, R. Maboudian, P. Monteiro

**10:45 GEOC 322.** Relating the viscoelastic properties of calcium-(aluminosilicate)-hydrate with molecular structure. P. Mondal

**11:05 GEOC 323.** Intermolecular interactions between nanolayers of calcium-silicate-hydrates using free energy perturbation method. S. Masoumi, A. Morshedifar, M. Abdolhosseini Qomi

**11:25 GEOC 324.** Viscoelastic properties of gamma-irradiated calcium silicate hydrates. E. Tajuelo Rodriguez, W. Hunnicutt, P. Mondal, Y. Le Pape

**11:45 GEOC 325.** Fundamental mechanisms of heat transport in calcium silicate hydrates. M. Abdolhosseini Qomi

### Section D

San Francisco Marriott Union Square Sutter 1-3

#### Mineral Nucleation: Transient Intermediates & Phase Transitions

S. L. Riechers, *Organizer*

B. Legg, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 GEOC 326.** Is classical nucleation theory valid for ice nucleation? L. Lupi, V. Molinero

**8:35 GEOC 327.** Withdrawn.

**9:05 GEOC 328.** Nucleation in the condensed phase: The role of local solvation in informing an accurate solution model for CaCO<sub>3</sub> solutions. C.J. Mundy, E. Fetisov, M.D. Baer, G.K. Schenter, J. Siepmann, S. Kathmann

**9:25 GEOC 329.** Dynamical nucleation in the condensed phase. G.K. Schenter, E. Fetisov, M.D. Baer, S. Kathmann, J. Siepmann, C.J. Mundy

**9:45** Intermission.

**10:05 GEOC 330.** Heterogeneous nucleation of CaCO<sub>3</sub>: Thermodynamics and kinetics. Y. Jun, Q. Li

**10:35 GEOC 331.** Nucleation and epitaxy-mediated phase transformation of a precursor cadmium carbonate phase at the calcite/water interface. S.L. Riechers, K. Rosso, S.N. Kerisit

**10:55 GEOC 332.** Pseudomorphic growth of cerussite during replacement of calcite micro-crystals. K. Yuan, S. Lee, V. De Andrade, N.C. Sturchio, P. Fenter

**11:15 GEOC 333.** Relaxation dynamics toward crystallization in amorphous carbonate precursors and the role of water. A. Koishi, A. Fernandez-Martinez, B. Ruta, F. Zontone, M. Jimenez-Ruiz

**11:35 GEOC 334.** Insight into CaCO<sub>3</sub> nucleation from the liquid-liquid phase diagram predicted by COSMO-RS. M. Andersson, S. Stipp, K. Dideriksen

#### Advances in Resource Recovery & Conservation in Water Systems

*Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC*

#### Aquatic Photochemistry

*Sponsored by ENVR, Cosponsored by GEOC*

## THURSDAY AFTERNOON

### Section A

San Francisco Marriott Union Square Union Square North

#### Environmental Challenges & Solutions in Unconventional Oil & Gas Development

*Cosponsored by ENVR*

D. Alessi, J. Blotvogel, T. Borch, S. Flynn, *Organizers, Presiding*

**1:30 GEOC 335.** Hydraulic fracturing, underground injection control, and drinking water interactions. R.B. Jackson, M. Kang, D. DiGiulio

**2:00 GEOC 336.** Effect of methane leakage on metal mobilization near a shale gas well. J. Woda, A. Wendt, S. Hynek, S. Brantley

**2:30 GEOC 337.** Sorption behavior of select aryl phosphates onto surficial soils from the Fox Creek area, AB, Canada. S.P. Funk, X. Wang, D. Alessi

**2:45 GEOC 338.** High resolution LC-MS analysis of microbial lipid biomarkers as evidence of deep shale microbial life. A. Hanson, J. Lipp, K. Hinrichs, P. Mouser

**3:00 GEOC 339.** Microbiological evaluation of hydraulic fracturing produced water from 17 Bakken Wells across a 6 month time frame. D. Lipus, D. Gulliver, K. Bibby, D. Ross, E. Khan, D. Roy, A. Vikram, R. Hammack

**3:15 GEOC 340.** Microbial community dynamics in the hydraulic fracturing water cycle of a newly fractured shale gas well in western Canada. C. Zhong, J. Li, S. Flynn, C. Nesbo, B. Lanoil, G. Goss, D. Alessi

**3:30** Intermission.

**3:50 GEOC 341.** Biodegradation of organic additives and hydrocarbons from flowback water of the Denver-Julesburg Basin: A laboratory study of shallow groundwater conditions. J.D. Rogers, J. Rosenblum, E.M. Thurman, I. Ferrer, A.R. Bielefeldt, J.N. Ryan

**4:10 GEOC 342.** Biodegradation challenges of dissolved organic carbon in hydraulic fracturing flowback and the identification of its recalcitrant fractions. J. Rosenblum, K. Linden, K. Sitterley, B. Ruyle, N. Hull

**4:25 GEOC 343.** *In situ* biodegradation of ethoxylated surfactants by halotolerant bacteria in a hydraulically fractured shale well. M. Volker, G.J. Getzinger, T. Metz, D.L. Plata, M. Borton, M. Wilkins, S. Welch, D. Cole, K. Wrighton, P. Mouser

**4:40 GEOC 344.** Emissions of air toxics, ozone precursors, and methane from production sites and new well drilling and completion activities in the Piceance and Denver-Julesburg basins of Colorado. J.L. Collett, A. Hecobian, A. Clements, Y. Zhou, K. Shonkwiler, L. MacDonald, N. Hilliard, Y. Desyaterik, B. Wells, D. Weber, J. Pierce, J. Ham

**5:00 GEOC 345.** Characteristics, sources, and formation of atmospheric aerosol in the Bakken oil and gas extraction region. A. Evansoski-Cole, K.A. Gebhart, B.C. Sive, Y. Zhou, S. Capps, D. Day, A. Prenni, M. Schurman, A. Sullivan, Y. Li, J. Hand, B. Schichtel, J.L. Collett

**5:15 GEOC 346.** Capturing methane from the atmosphere. H. Gokturk

### Section B

San Francisco Marriott Union Square Union Square South

#### Contaminants Transport, Uptake & Remediation at Contaminated Sites

*Cosponsored by ENVR*

B. H. Jeon, Y. Sik Ok, *Organizers*

M. B. Kurade, D. Tsang, *Organizers, Presiding*

**1:30 GEOC 347.** Mobility and phytoavailability of As and Pb in a contaminated soil using pine sawdust biochar under dynamic redox conditions. J. Rinklebe, J. Beiyuan, Y. Awad, F. Felix Beckers, D. Tsang, Y. Sik Ok

**2:00 GEOC 348.** Impact of biochar amendment on trace metals speciation in agricultural soils. D. Alessi, M. Alam, M. Cossio, B. Bishop, W. Hao, L. Swaren, K. Snihur, T. Warchola, K. von Gunten, S. Flynn, Y. Sik Ok, K. Konhauser

**2:30 GEOC 349.** Characterization of colloids in abandoned mine drainage. M.M. McGuire, S.L. Bradley, R.A. Bergin, R.M. Wendell, E.K. Herman

**2:50 GEOC 350.** Urinary metabolites of polycyclic aromatic hydrocarbons in pregnant women and its association with a biomarker of oxidative stress. Y. Guo, P. Wu, L. Shi, E. Zeng

**3:10** Intermission.

**3:25 GEOC 351.** Utilization of microalgae for the removal of Emerging Contaminants (ECs) from aqueous phase: A bioremediation approach. M.B. Kurade, M.M. El-Dalatony, S. Chang, B. Jeon

**3:50 GEOC 352.** Distribution of antimony in roadside soils. C. Foeldi

**4:10 GEOC 353.** Can nitrocellulose possibly control the release of energetic materials from fired munition residues? D.T. Kuo, M. Simini, H.E. Allen

**4:30 GEOC 354.** Reactive transport of U from co-occurring U(IV) and U(VI) phases in abandoned U mine waste sites. S. Avasarala, C. Hirani, A.M. Ali, P. Lichtner, A. Brearley, M. Spilde, E. Peterson, K. Artyushkova, J.M. Cerrato

**4:50 GEOC 355.** Engemetic behaviour of hexavalent chromium in a superfund site. J. Fischel

### Section C

San Francisco Marriott Union Square Savoy

#### Mineral Nucleation: Transient Intermediates & Phase Transitions

B. Legg, *Organizer*

S. L. Riechers, *Organizer, Presiding*

**1:30 GEOC 356.** Accelerated nucleation and polymorph selection with trace additives: Theory and simulation. G. Poon, T. Lemke, C. Peter, V. Molinero, B. Peters

**2:00 GEOC 357.** Impact of anionic and cationic impurities on the nucleation and growth of nano-Goethite. S.C. Myneni, N.M. Crompton, M. Frith, J. Majzlan, S.L. Bernasek

**2:30 GEOC 358.** Quantitative analyses of the mechanisms of iron (oxyhydr) oxide nucleation. J. Scheck, D. Gebauer

**3:00 GEOC 359.** Kinetic study of apoferritin-catalyzed biomineralization of  $\alpha$ -MnOOH nanoparticles. Y. Hui, H. Jung, Y. Jun

**3:30** Intermission.

**3:50 GEOC 360.** Withdrawn.

**4:10 GEOC 361.** First principles simulation of solid-state transformation of ferrihydrite to goethite. M. Sassi, A.M. Chaka, K.M. Rosso

**4:30 GEOC 362.** Chemical physics of condensed phase clusters. S. Kathmann

**4:50 GEOC 363.** Nucleation, growth, and transformation of calcium phosphate minerals in multi-scale nucleation sites of collagen fibrils. D. Kim, B. Lee, S. Thomopoulos, Y. Jun

**5:10 GEOC 364.** Withdrawn.

#### Advances in Resource Recovery & Conservation in Water Systems

*Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC*

#### Aquatic Photochemistry

*Sponsored by ENVR, Cosponsored by GEOC*

## HIST

## Division of the History of Chemistry

S. Rasmussen, Program Chair

## BUSINESS MEETINGS:

HIST Executive Committee Meeting, 5:00 PM: Sun

## SUNDAY MORNING

## Section A

Grand Hyatt San Francisco  
Warfield

## General Papers

S. C. Rasmussen, Organizer

J. S. Jeffers, Presiding

8:30 HIST 1. Concentration of power: Alchemy, mercantilism and the *Vitrum Causticum* of Ehrenfried Walter von Tschirnhaus. N. Zumbulyadis, A.F. Zumbulyadis

9:00 HIST 2. Pioneer of pyridine chemistry: Aleksei Yevgen'evich Chichibabin (1871-1945). D.E. Lewis

9:30 Intermission.

9:45 HIST 3. Overview of the discovery of ruthenium. P. Villarreal, C. Hahn

10:15 HIST 4. Richard Willstätter in Munich. M.O. Senge

10:45 HIST 5. History of cuprene: Polymerization of acetylene via electric discharge. S.C. Rasmussen

## SUNDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Warfield

## Golden Age of Industrial Chemistry

Cosponsored by SCC and YCC

J. E. Simpson, Organizer

M. Grandbois, Organizer, Presiding

1:30 Introductory Remarks.

1:45 HIST 6. Vladimir Nikolaevich Ipatieff: A sesquicentennial of contributions to the chemistry of high-pressure catalysis. C.P. Nicholas

2:15 HIST 7. J.B.F. Herreshoff and the expansion of the chemicals industry in early 20<sup>th</sup> century New York. P. Spellane

2:45 HIST 8. Golden age of chemistry: The miracle of instant! Polaroid and the amazing chemistry and innovations of instant photography. J.C. Giordan

3:15 Intermission.

3:30 HIST 9. Evolution of innovation. S.B. Butts

4:00 HIST 10. R&D at Union Carbide Tarrytown Technical Center 1959 - 1990. K.M. Lewis

4:30 Concluding Remarks &amp; Networking.

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

## Textbooks &amp; the Practice of Science: Before, During &amp; After Gutenberg

Sponsored by CINP, Cosponsored by CHED and HIST<sup>2</sup>

## MONDAY MORNING

## Section A

Grand Hyatt San Francisco  
Warfield

## Chemistry through the Eyes of Non-Chemists: Evolution of the Public Perception of Chemistry

D. Rabinovich, N. V. Tsarevsky, Organizers, Presiding

8:25 Introductory Remarks.

8:30 HIST 11. Public embracement of chemistry: An historical perspective. H.A. Lawlor

9:00 HIST 12. Chemistry's public image: A historical look through the pages of C&EN. M. Torrice

9:30 HIST 13. Eighteenth century textbook of chemistry for women: Compagnoni's *La Chimica per le Donne*. G.S. Girolami, V.V. Mainz

10:00 Intermission.

10:20 HIST 14. Once upon a Christmas cheery in the lab of Shakhshiri: Public engagement for 47 years and counting. B.Z. Shakhshiri

10:50 HIST 15. Image of chemistry in newspaper and magazine ads. N.V. Tsarevsky

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Textbooks &amp; the Practice of Science: Before, During &amp; After Gutenberg

Sponsored by CINP, Cosponsored by CHED and HIST<sup>2</sup>

## MONDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Warfield

## Chemistry through the Eyes of Non-Chemists: Evolution of the Public Perception of Chemistry

D. Rabinovich, N. V. Tsarevsky, Organizers, Presiding

1:30 HIST 16. Rashomon effect: Chemistry through the eyes of other chemists. J. Seeman

2:00 HIST 17. Viewing chemistry through artists' eyes. P. Goin, A. De Bettencourt Dias

2:30 HIST 18. Guilt by association: Dietary recommendations and missed opportunities. E. Schoffers

3:00 Intermission.

3:20 HIST 19. Changing images of chemistry in the public. B. Bensaude Vincent

3:50 HIST 20. Then and now: Art and the visual image of chemistry. T.I. Spector

4:20 HIST 21. Unlikely popularizer of resonance theory in France. P. Laszlo

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Textbooks &amp; the Practice of Science: Before, During &amp; After Gutenberg

Sponsored by CINP, Cosponsored by CHED and HIST<sup>2</sup>

## MONDAY EVENING

## Section A

Moscone Center  
Hall D

## Sci-Mix

S. C. Rasmussen, Organizer

8:00 - 10:00

26, 28, 32-34. See subsequent listings.

## TUESDAY MORNING

## Section A

Grand Hyatt San Francisco  
Warfield

## Chemistry through the Eyes of Non-Chemists: Evolution of the Public Perception of Chemistry

D. Rabinovich, N. V. Tsarevsky, Organizers, Presiding

8:30 HIST 22. My experience as science advisor for Breaking Bad. D.J. Nelson

9:00 HIST 23. Stealing the limelight: Interactions between theatre and chemistry. K. Shepherd-Barr

9:30 HIST 24. From the elements to the atomic fire: An operatic perception of chemistry. J. Andre

10:00 Intermission.

10:20 HIST 25. Science communication: The evolving role of postage stamps. D. Rabinovich

10:50 HIST 26. Periodic table of comic books. J.P. Selegue, F.J. Holler

11:20 HIST 27. Public perceptions of chemistry and the Chemical Heritage Foundation. R.S. Brashear

11:50 Concluding Remarks.

## TUESDAY AFTERNOON

## Section A

Grand Hyatt San Francisco  
Warfield

## Chemistry &amp; the Design of Physical Objects: Innovation from 1950 to the Present

S. Vasko, Organizer, Presiding

1:00 HIST 28. 100 Years of aluminum pioneers: From chemists to architects (1808-1908). M. Stacey

1:30 HIST 29. Chemical architecture: Experiments in urethane foam environments of the 1960s. G. Converse

2:00 HIST 30. Withdrawn.

2:30 Intermission.

2:45 HIST 31. Second skin: The science and cultural impact of stretch. C. Schneider

3:15 HIST 32. Ease: Using seam bonding technology to create durable shirts for a girl with autism. C. Glover, E. Riley, U. Desai, G. Jun

3:45 HIST 33. Trading innovation across chemistry and design: A content analysis of synthetic fiber advertisements. S. Vasko

4:15 Panel Discussion.

## WEDNESDAY MORNING

## Section A

Grand Hyatt San Francisco  
Warfield

## General Papers

S. C. Rasmussen, Organizer

N. Balasubramanian, Presiding

8:30 HIST 34. Was Markovnikov's Rule an inspired guess? ...No! D.E. Lewis

9:00 HIST 35. Paul Dirac: A man at the intersection of science and philosophy. T.J. Fuhrer

9:30 HIST 36. Periodic footprints in history, literature and cinema. L.R. Ohrstrom

10:00 Intermission.

10:15 HIST 37. Drug repurposing: A bibliometric analysis by text-mining PubMed. N. Baker, S. Ekins, A.J. Williams, A. Tropsha

10:45 HIST 38. History of water chemistry monitoring and education on the Yukon River Watershed. L. DeWilde

## I&amp;EC

## Division of Industrial and Engineering Chemistry

E. Rosenberg, Program Chair

## SUNDAY MORNING

## Section A

Grand Hyatt San Francisco  
Fillmore A

## I&amp;EC International Fellow Symposium: Honoring Professor Kew-Ho Lee

J. Dong, Organizer

J. Y. Lin, Presiding

8:00 I&EC 1. 30 Years of membrane research in KRICT. K. Lee

8:25 I&EC 2. Bicontinuous biphasic liquid media for catalysis and separations. D. Lee

8:45 Intermission.

9:00 I&EC 3. High pressure high temperature water gas shift reaction in a zeolite membrane reactor. A. Arvanitis, X. Sun, P. Smirniotis, J. Dong

9:20 I&EC 4. Graphene-based membranes for gas and liquid separation. H. Park

**9:40 I&EC 5.** Thin film nanocomposite membranes for forward osmosis and pressure retarded osmosis. H. Choi

**10:00 I&EC 6.** Gas separation properties of metal-organic framework membranes: A comparison with zeolite membranes. J.Y. Lin

### Nanocellulose Processing & Analysis

#### Novel Processes

Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC

## SUNDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Fillmore B

#### Ionic Liquids in Separations & Analysis

C. Hawkins, *Organizer*

M. L. Dietz, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 I&EC 7.** Thiol-yne click chemistry-mediated synthesis of cationic lipids for gene transfection purposes. J. Gaitor, L. Paull, S. Michael, S. Isern, A. Mirjafari

**1:25 I&EC 8.** Ionic liquids for separations of trivalent lanthanides and minor actinides: Combining performance and radiation stability. I.A. Shkrob

**1:45 I&EC 9.** Task-Specific Ionic Liquids (TSILs) for metal ion separations: A status report. M.L. Dietz, C. Hawkins

**2:05 I&EC 10.** Efficient enrichment of 1,3-propanediol from fermentation broths using imidazolium dibutylphosphate ionic liquid based methacrylate polymer membranes. H. Hawkins, L. Boyd, A. Masoumi, C. Slater, M.J. Savelski, B. Kanjilal, I. Noshadi

**2:25 I&EC 11.** Ionic liquids as washing media for biogas upgrading by near isothermal chemical absorption. M. Ahrens, T.J. Schubert, P. von Czarnecki, F. Orloff, M. Roschitz, F. Graf

**2:45 I&EC 12.** Cation effects on the post-separation mesoscale structure of an HDEHP-derived ionic liquid for removal of lanthanides from spent nuclear fuel. C.W. Abney, C. Do, H. Luo, S. Dai

**3:05** Intermission.

**3:15 I&EC 13.** Methimazole-based amphiphilic ionic liquid crystals. S.T. Nestor, B. Heinrich, L. Douce, A. Mirjafari

**3:35 I&EC 14.** Phosphonium ionic liquids in biorefinery applications. B. Schuur, X. Li, E. Reyhanitash

**3:55 I&EC 15.** Extraction chromatographic separation of metal ions using solid-supported ionic liquids: Progress and prospects. C.A. Hawkins, M.L. Dietz

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**4:15 I&EC 16.** Ionic liquid solvents for recovery and analysis of commodity chemicals. R.E. Del Sesto, A.T. Koppisch, D. Warner, J. Melessa, D. Thomas, D. Stapleton, C. Migliori, G. Ijijeh, C. Nwokolo, R. Wolsleger, A. Everett

**4:35 I&EC 17.** Tailoring ionic liquids for f-element separation. J. Dehaut, N.J. Williams, H. Luo, S. Dai

**4:55 I&EC 18.** Correlation between ionic liquid ionicity and Pt liquid-liquid extraction performances. I. Billard, N. Papaiconomou, P. Husson, J. Andasson, M. Traikia

**5:15** Concluding Remarks.

### Section B

Grand Hyatt San Francisco  
Fillmore A

#### I&EC Division Fellow Award Symposium: Honoring Professor Klavs Jensen

S. Shankar, *Organizer*

A. K. Chakraborty, *Presiding*

**1:00 I&EC 19.** Flow hydrogenations with enhanced stereoselectivity, chemoselectivity, and reactivity. J. Hawkins

**1:30 I&EC 20.** Mechanistic studies of catalytic organic reactions using reaction progress kinetic analysis. D.G. Blackmond

**2:00 I&EC 21.** Online sensing of palladium in flowing streams. C.J. Welch

**2:30 I&EC 22.** How to hit HIV where it hurts. A.K. Chakraborty

**3:00 I&EC 23.** Designing catalysts for activity and selectivity. A.T. Bell

**3:30 I&EC 24.** Catalysis for sustainable energy. J.K. Norskov

**4:00 I&EC 25.** Materials design – The last mile in translation from theory to practice. S. Shankar

**4:30 I&EC 26.** Automated screening, optimization, and production with multistep flow chemistry. K.F. Jensen

#### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG‡, ORGN and PROF

### Nanocellulose Processing & Analysis

#### Process Parameters

Sponsored by CELL, Cosponsored by AGFD, ANYL, CHAS and I&EC

## MONDAY MORNING

### Section A

Grand Hyatt San Francisco  
Fillmore A

#### 2017 ACS Sustainable Chemistry & Engineering Lectureship Awards: Symposium in honor of Gregg Beckham

S. C. Chmely, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 I&EC 27.** Lignin valorization via biological funneling. G. Beckham

**8:50 I&EC 28.** Aromatic monomers via stabilization of reactive intermediates in the acid catalyzed depolymerization of lignin. K. Barta

**9:20 I&EC 29.** Catalytic processing for the hybrid conversion of lignin into biodiesel. M. Foston

**9:50** Intermission.

**10:10 I&EC 30.** Stabilization with formaldehyde facilitates the high-yield production of monomers from lignin during integrated biomass depolymerization. J.S. Luterbacher

**10:40 I&EC 31.** Toward a fundamental understanding of carbonyl hydrogenation in condensed media. J. Bond, O.A. Abdelrahman

**11:10 I&EC 32.** Role of lignin in the performance of regenerating lignocellulosic materials. N. Labbé, J. Wang, R. Boy, J.K. Keum, D.A. Cullen, J. Chen, D. Harper, L. Tetard, T.G. Riels, A.K. Naskar

**11:40** Concluding Remarks.

### Section B

Grand Hyatt San Francisco  
Fillmore B

#### Symposium in honor of Michelle Cummings, ACT Fellow

Financially supported by Dow Corning Corporation

J. McDonald, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:10 I&EC 33.** Fluorosilicone polymers and fluorosilicone diblock copolymers. S. Clarson

**8:40 I&EC 34.** Fracture and thermal aging of resin-filled silicone elastomers. K.R. Shull

**9:10 I&EC 35.** Tailored silicone structures lead to tailored silicone properties. M.A. Brook, J. Morgan, A. Schneider, S. Laengert

**9:40** Intermission.

**9:55 I&EC 36.** Silsesquioxane copolymers for lighting. S. Swier

**10:25 I&EC 37.** Effects of time and temperature on mechanical properties of silicone hot-melt adhesives. G.V. Gordon, L. Yan, D.A. Dillard

**10:55 I&EC 38.** Role of thermal stability in siloxane applications. M.R. Cummings

**11:25** Concluding Remarks.

#### Science for a Sustainable Energy Future

##### Energy Storage

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

## MONDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Fillmore A

#### 2017 ACS Sustainable Chemistry & Engineering Lectureship Awards: Symposium in honor of Jinlong Gong

D. Flaherty, *Organizer, Presiding*

R. M. Rioux, *Presiding*

**1:30 I&EC 39.** Synthesis and processing of copper-based nanowires for use as transparent conductors. B.J. Wiley

**2:00 I&EC 40.** Collapsed polymer-directed synthesis of inorganic nanostructures with complex geometries. Z. Huang, Y. Liu, J. Gong, Z. Nie

**2:30 I&EC 41.** Preferential binding of Polyvinylpyrrolidone (PVP) is not responsible for shape control in Ag nanoparticle synthesis. Z. Chen, J. Chang, C. Bala, R.M. Rioux

**3:00 I&EC 42.** Dumpsites as 21st century mines: Affordable recovery of rare-earth and critical materials from e-waste. C. Frankiewicz, B. Chang, M. Thuo

**3:30 I&EC 43.** Production of chemicals from ethanol: Unexpected selectivity within aldol addition reaction networks. T. Moteki, A. Rowley, H. Zhang, D. Flaherty

**4:00 I&EC 44.** C-H bond activation in glucose oxidation over CuO. Y. Yang

**4:30 I&EC 45.** Effective charge carrier utilization in photocatalytic conversions. J. Gong

**5:15** Award Presentation and Remarks.

### Section B

Grand Hyatt San Francisco  
Fillmore B

#### ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer

Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY

J. Frommer, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 I&EC 46.** Award Address (ACS Award in Industrial Chemistry sponsored by the ACS Division of Industrial & Engineering Chemistry). Evolution of AFM in chemical analysis. J. Frommer

**1:50 I&EC 47.** Atomic force microscopy: Past, present, and future. M. Tortone

**2:20 I&EC 48.** Spectroscopy on the nanoscale with photo-induced force microscopy. T.R. Albrecht

**2:50 I&EC 49.** Advances in APM-mediated 3D nanoprinting. G. Liu

**3:20 I&EC 50.** Heatable scanning probes, from data storage to nanolithography. A. Knoll

**3:50 I&EC 51.** Manipulative force microscopy: Pulling molecular chains and nanoribbons. E. Meyer

‡ Cooperative Cosponsorship

4:20 **I&EC 52.** Quantitative and qualitative nanomechanical measurements with AFM: Recent advances and thoughts for future directions. D. Yablon

4:50 **I&EC 53.** Advances in AFM-based IR spectroscopy and mass spectrometry for high-resolution chemical characterization. E. Dillon

5:20 **I&EC 54.** Advances in ambient and liquid AFM: Nanoscale structure and dynamics. R. Proksch

5:50 Concluding Remarks.

96, 98, 103, 107, 116, 118, 121, 123, 125-126, 134, 136. See subsequent listings.

## TUESDAY MORNING

### Section A

Grand Hyatt San Francisco  
Filmore A

#### 2016 E.V. Murphree Award in Industrial & Engineering Chemistry: Symposium in honor of Michael M. Thackeray

Y. Shao-Horn, *Organizer, Presiding*

E. S. Takeuchi, *Presiding*

8:00 Introductory Remarks.

8:05 **I&EC 55.** Evolution of lithium-ion batteries: Personal reflections. M. Thackeray

8:35 **I&EC 56.** Development of manganese-rich, high-capacity lithium-ion cells. J. Croy

8:55 **I&EC 57.** Synthesis and analysis of NCM cathode materials for high performance Li-Ion batteries. M.A. Fetecenko

9:25 **I&EC 58.** Renaissance of  $\text{LiMn}_2\text{O}_4$  spinel. C.S. Johnson

9:45 **I&EC 59.** Gassing reactions of NCM cathodes operated at high voltage. H. Gasteiger

10:15 **I&EC 60.** Safe, high-voltage rechargeable batteries. J.B. Goodenough

10:45 **I&EC 61.** High energy density rechargeable batteries: A little history and a look into the future. M. Whittingham

11:15 **I&EC 62.** Investigating the complex chemistry of functional energy storage systems: The need for a multiscale (molecular- to meso-scale) perspective. E.S. Takeuchi, K.J. Takeuchi, A.C. Marschilok

11:35 **I&EC 63.** Simplify your experiments: Simple three electrode and full cell measurements for better understanding of lithium ion battery materials. M. Winter

12:05 **I&EC 64.** In operando neutron diffraction studies of battery materials. K. Edstrom

### Section B

Grand Hyatt San Francisco  
Fillmore B

#### 2017 ACS Sustainable Chemistry & Engineering Lectureship Awards: Symposium in honor of Helen Sneddon

S. G. Koenig, *Organizer, Presiding*

J. C. Colberg, *Presiding*

8:00 Introductory Remarks.

8:05 **I&EC 65.** Nickel-catalyzed asymmetric transfer hydrogenation of unsaturated bonds. J. Zhou

8:30 **I&EC 66.** Passing on the medicinal chemistry baton: University of Nottingham and GlaxoSmithKline collaborative research projects. T. McInally

8:55 **I&EC 67.** Supporting the transition to increased sustainability in common reactions. A.J. Watson

9:20 Intermission.

9:25 **I&EC 68.** Sustainable chemistry in pharmaceutical R&D: Successes, works in progress, and future challenges. H. Sneddon

10:00 **I&EC 69.** Synthesis of cyclic compounds by organocatalytic/multicomponent reactions sequence and photochemical approaches. M. Paixao

10:25 **I&EC 70.** Development of sustainable processes for pharmaceutical R&D. K. Wheelhouse

10:50 Intermission.

10:55 **I&EC 71.** Making medicines more sustainably: Efforts of the ACS Green Chemistry Institute Pharma Roundtable (GCIPR). S.G. Koenig

11:15 **I&EC 72.** Green chemistry at Pfizer – Applications to the oncology portfolio. P. Richardson

11:35 **I&EC 73.** Award Address (ACS Award for Affordable Green Chemistry sponsored by Dow Chemical Company & endowed by Rohm & Haas Company). Green synthesis of Viagra as a springboard for promoting green chemistry in the pharmaceutical industry. P. Dunn

11:55 Concluding Remarks.

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Molecular & Bio-Inspired Photocatalysts

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

Sponsored by CATL, Cosponsored by ENVR and I&EC

## TUESDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Filmore A

#### 2016 E.V. Murphree Award in Industrial & Engineering Chemistry: Symposium in honor of Michael M. Thackeray

Y. Shao-Horn, *Organizer*

Y. Lu, D. R. Rolison, *Presiding*

1:30 **I&EC 74.** Insights into lithium battery cathodes from powder diffraction data. B. David

2:00 **I&EC 75.** Tale of spinels: From Li-Ion to Mg battery electrodes. J. Cabana

2:30 **I&EC 76.** Simulated synthesis, characterization and performance of binary and ternary metal oxide electrodes. P. Ngoepe

3:00 **I&EC 77.** Revealing the conversion mechanism of  $\text{Co}_3\text{O}_4$  during lithiation from first principles calculations. C. Wolverton

3:30 **I&EC 78.** Spinel and layered manganates: New NMR approaches to characterize order and disorder. C.P. Grey

4:00 **I&EC 79.** Key challenges in the development of solid state lithium batteries. J. Janek

4:30 **I&EC 80.** Something from nothing: Enhancing cathode electrochemical charge storage with cation vacancies. D.R. Rolison, J.W. Long

4:50 **I&EC 81.** Activating Oxygen Redox for Energy Storage. Y. Shao-Horn

5:10 Concluding Remarks.

#### Recent Developments in TSCA Regulation: New Requirements for Chemicals in Commerce

Sponsored by CHAL, Cosponsored by CHAS, ENVR and I&EC

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

Novel Photocatalytic & Photoelectrode Materials

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

Sponsored by CATL, Cosponsored by ENVR and I&EC

## WEDNESDAY MORNING

### Section A

Grand Hyatt San Francisco  
Filmore A

#### I&EC Division Early Career Fellow Symposium: Honoring Dr. Leigh Martin

G. A. Fugate, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 **I&EC 82.** Probing the solution chemistry of f-element interactions with hydroxycarboxylic acids. K.L. Nash

8:25 **I&EC 83.** Recent advances in development of the sodium bismuthate process for the oxidation and separation of Am from used nuclear fuel. J. Law, B. Mincher, R. Tillotson, N. Schmitt

8:45 **I&EC 84.** Determining DTPA complexation kinetics. K. Larsson, S.P. Mezyk

9:05 **I&EC 85.** Gamma radiolysis of americium-nitric acid solutions. G.P. Horne, S.P. Mezyk, B. Mincher, T.S. Grimes

9:25 Intermission.

9:45 **I&EC 86.** Role of organic radical cation chemistry in separation ligand degradation. S.P. Mezyk, B. Mincher, P.R. Zalupski

10:05 **I&EC 87.** Savannah River site's quest to recover plutonium-244 from the mark-18A targets. N. Bridges

10:25 **I&EC 88.** Separation of minor actinides from lanthanides in acidic media using symmetric and asymmetric dithiophosphinic acid extractants. D.R. Peterman

10:45 Concluding Remarks.

#### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Spectroscopy & Microscopy of Photocatalytic & PEC Materials

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

#### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

#### Fundamental Structure-Activity Relationships: The Interface of Operando with Physical Sciences

Sponsored by CATL, Cosponsored by ENVR and I&EC

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

### 2017 E.V. Murphree Award in Industrial & Engineering Chemistry: Symposium in honor of Eleftherios T. Papoutsakis

Sponsored by BIOT, Cosponsored by I&EC

## WEDNESDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Filmore A

### I&EC Division Early Career Fellow Symposium: Honoring Dr. Leigh Martin

G. A. Fugate, *Organizer, Presiding*

2:00 Introductory Remarks.

2:05 I&EC **89**. Exploiting properties of alkali titanates for separations and biomedical applications. D.T. Hobbs, K.M. Taylor-Pashow, J.L. Drury, J.C. Wataha

2:25 I&EC **90**. Modified DTPA ligand systems for simplified trivalent actinide-lanthanide separations based on the TALSPEAK process. J. Jones, M.H. Langford, A. Geist, P. Panak, P. Kaden, C. Adam, N. Adam, C.A. Sharrad, L. Martin, L.S. Natrajan

2:45 I&EC **91**. Separations in advanced nuclear fuel cycles. C.A. Sharrad, A.C. Edwards, H. Lambert, Z. Bikbajeva, R. Foster, T. Kerry, R.C. Whitehead, L.M. Harwood

3:05 I&EC **92**. Real-time direct measurement of extraction kinetics and speciation in solvent extraction systems. M.P. Jensen, R.G. McDowell, L. Martin

3:25 Intermission.

3:45 I&EC **93**. Pertechnetate extraction from aqueous environments. P.D. Benny, S.C. Bottorff, L. Martin

4:05 I&EC **94**. Study of 4f series metal binding kinetic phenomena by a TALSPEAK extractant via UV-Vis spectrophotometry in a mixed liquid-liquid separation system. R.G. McDowell, S.P. Mezyk, L.R. Martin

4:25 I&EC **95**. Wear and tear: Degradation effects in f-element separation science. L. Martin

4:45 Concluding Remarks.

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Devices, Assemblies & Hybrid Processes

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

### Fundamental Structure-Activity Relationships: The Interface of Operando with Physical Sciences

Sponsored by CATL, Cosponsored by ENVR and I&EC

## WEDNESDAY EVENING

### Section A

Moscone Center  
Hall D

### General Posters

E. Rosenberg, *Organizer*

6:00 - 8:00

I&EC **96**. Anatase pigment production by hydrolysis of unenriched TiOSO<sub>3</sub> solution via short sulfate process. C. Tian

I&EC **97**. Metal-organic framework materials in microfluidics: Synthesis and functional integration. K. He, Z. Li, K. Yeung

I&EC **98**. High throughput water disinfection using pulsed electric field. H. Leung, Q. Chang, K. Yeung

I&EC **99**. Porous carbons prepared by soft-template method as electrodes for supercapacitor. S. Park, J. Lee

I&EC **100**. Carbon capture using ammonia activated carbons from polysaccharides. S. Park, J. Lee

I&EC **101**. Catalytic preparation of ammonium carbonate using urea as a raw material. S. Park, J. Lee

I&EC **102**. Alkylation of benzene with ethylene in the presence of zeolite catalyst: Mathematical modelling of reactor. E. Khebnikova, E. Ivashkina, I. Dolganova, I. Dolganov, S. Koshkin, E. Yurev

I&EC **103**. Sensing and removal of Hg<sup>2+</sup> from contaminated water, and beneficiation of the gettered material in organic reduction reaction and hydrogen production. A. Malek, T. Thomas, P. Edamana

I&EC **104**. Carbon-modified nanofiltration membrane-based advanced oxidation reactor for endocrine disrupting compound removal. Y. Li, W. Han, K. Yeung

I&EC **105**. Novel approaches to the chemical application of electrochemicals for conducting materials. E.J. Parish, G. Ren, H. Honda, M. Hsiao, T. Wei

I&EC **106**. Novel approaches to the chemical synthesis and characterization of D-sigma-A molecules for molecular rectification. E.J. Parish, G. Ren, Y. Lo, H. Honda, H. Shyu, T. Wei

I&EC **107**. Bactericidal activity and biosafety studies of high-intensity narrow-wavelength (Hi-NW) light. Q. Chang, N. Zhan, N. Wong, J. Kwan, K. Yeung

I&EC **108**. Self-assembled ionic liquid crystals and their ion transport behavior. S. Park, J. Lee

I&EC **109**. Investigating the stability of tris(acetylacetonato)vanadium(III) complex. J. Lee, J. Lee

I&EC **110**. Properties of metal complexes as the active materials for the redox flow batteries. J. Lee, J. Lee

I&EC **111**. Fate of triazole fungicides in softwood after environmental exposure. K. Kukowski, C.A. Sedgeman, V. Martinská, E.I. Kozliak, S. Fisher, A. Kubatova

I&EC **112**. Supported bicyclic amidine ionic liquids as a potential CO<sub>2</sub>/N<sub>2</sub> separation medium. J.A. Schott, C. Do-Thanh, S.M. Mahurin, D. Jiang, S. Dai

I&EC **113**. Withdrawn.

I&EC **114**. Novel approaches to the chemical synthesis and characterization of alkyl phenols derivatives with various side chains. G. Ren, E.J. Parish, H. Honda, M. Hsiao, T. Wei

I&EC **115**. Gels as precursors in the preparation of catalysts and their films. D.L. Perry, C. Perrino

I&EC **116**. Metal ions in inks studied by synchrotron x-ray fluorescence microprobe techniques. D.L. Perry, T. Wilkinson

## THURSDAY MORNING

### Section A

Grand Hyatt San Francisco  
Conference Theatre

### General Papers

E. Rosenberg, *Organizer*

F. K. Wood-Black, *Presiding*

8:00 Introductory Remarks.

8:05 I&EC **117**. Synthesis and evaluation of a series of ionic liquids functionalized with dipicolinate complexants. A.J. Ferry, C. Hawkins

8:25 I&EC **118**. Withdrawn.

8:45 I&EC **119**. Indirect Ocean Capture: Applications and analysis of membrane for CO<sub>2</sub> capture. C.P. de Lannoy, J. Rivest, M. Eismann, S. Karnitz, A. Jose, R. DeVaul, K. Cooper

9:05 I&EC **120**. Study on combined cooling and antisolvent crystallization of L-asparagine monohydrate. M. Lenka, D. Sarkar

9:25 I&EC **121**. Design and operation experience of hexagon structured cyclone separator using mathematical models and computational fluid dynamic methodology. T. Zhang, C. Liu, K. Guo

9:45 I&EC **122**. Porous carbons derived from biomass and their application for the carbon capture. S. Park, J. Lee

10:05 Intermission.

10:15 I&EC **123**. Non-uniform gas solids distribution and its effects on performance of fluidized bed reactors. C. Zhang, W. Qian, F. Wei

10:35 I&EC **124**. Prediction of the vapor-liquid equilibrium of chemical reactive systems containing formaldehyde using the COSMO-RS method. Z. Bai, H. Liu, Y. Liu, L. Wu

10:55 I&EC **125**. Understanding the activity of Na<sub>2</sub>WO<sub>4</sub>/Mn/SiO<sub>2</sub> catalyst for the oxidative coupling of methane based on the optimization of reaction parameters. S. Yoon, J. Choi, D. Suh, J. Ha, M. Park, K. Song

11:15 I&EC **126**. Selective ethylene oxidation to EDC in Chemetry's Shuttle™ process. M.K. Leclerc, T.A. Albrecht, E.A. Cole

11:35 I&EC **127**. Dry pressure drop within Winpak-mechanism and optimization. W. Qi, K. Guo, C. Liu

11:55 I&EC **128**. Transformation behavior of MoO<sub>3</sub> as oxygen carrier for chemical looping gasification of coal and its reaction mechanism. G. Wu, W. Li, T. Wiltowski

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

### Engineering Operando to Larger Scale: Shaped Catalysts & Process Control

Sponsored by CATL, Cosponsored by ENVR and I&EC

## THURSDAY AFTERNOON

### Section A

Grand Hyatt San Francisco  
Conference Theatre

### General Papers

E. Rosenberg, *Organizer*

F. K. Wood-Black, *Presiding*

1:30 Introductory Remarks.

1:35 I&EC **129**. Synthesis of 9-fluorenylmethanol and the coproduction of phenanthrene from crude anthracene. H. Mu, W. Li, C. Ye

1:55 I&EC **130**. Chaotropic agents for amidoxime adsorbent pre-treatments. R.T. Mayes

2:15 I&EC **131**. Modeling and optimization of ultrasound assisted crystallization of L asparagine monohydrate. S. Bhoi, D. Sarkar

2:35 I&EC **132**. Chromatographic purification of 5,6 cis-dihydrocyclohexane 1,3-diene, the precursor to poly(para-phenylene). B. Ikizer, A. Polanco, N. Orbey, C. Lawton

2:55 I&EC **133**. Reaction kinetics of formaldehyde-water-1,3,5-trioxane-sulfuric acid system at 371.15 K. X. Zhang, Y. Hu

3:15 Intermission.

3:25 I&EC **134**. Composite nano-particle synthesis for enhanced photo-catalytic activity of textiles. G. Basim, A. Cerhan

3:45 I&EC **135**. Experimental investigation of the effects of the geometry on liquid radial and axial distribution in modular catalytic structured packing. C. Liu, W. Xiang

4:05 I&EC **136**. Electroplating of active metals from aqueous systems for accessing materials of the future. H.B. Nulwala, X. Zhou, J. Watkins

4:25 I&EC **137**. Withdrawn.

### Operando Methodology at the Junction between Fundamental Chemistry & Chemical Engineering

### Engineering Operando to Larger Scale: Shaped Catalysts & Process Control

Sponsored by CATL, Cosponsored by ENVR and I&EC

‡ Cooperative Cosponsorship

## INOR

## Division of Inorganic Chemistry

S. Koch and N. Radu, Program Chairs

## OTHER SYMPOSIA OF INTEREST:

**Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark** (see NUCL, Sun, Mon, Tue)

**Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten** (see NUCL, Tue)

**Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory** (see PHYS, Sun, Mon, Tue, Wed)

**Metalloprotein-Initiated Signaling Transduction Response to Redox Stress** (see BIOL, Tue)

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium** (see PROF, Sun, Mon)

**Support & Activator Effects on Metal Mediated Polymerization** (see PMSE, Mon, Tue)

## SUNDAY MORNING

## Section A

Moscone Center  
2009

**Harry Gray Award for Creative Work in Inorganic Chemistry by a Young Investigator: Symposium in honor of Nilay Hazari**

W. H. Bernskoetter, A. Valentine, *Organizers*  
J. E. Bercau, *Presiding*

**9:00 INOR 1.** Towards a thermochemical hydrogen-affinity scale for oxide materials, and its implications in reactivity and catalysis. J.M. Mayer, J. Peper, J. Lora, S. Laga, D. Damatov, C. Valdez, J. Peng, B. Broudy

**9:25 INOR 2.** Bonding in pentalene complexes and their recent applications. J.C. Green

**9:50 INOR 3.** Small molecule activation with molybdenum complexes supported by diphosphine-arene ligands. T. Agapie

**10:15** Intermission.

**10:25 INOR 4.** Reversible C-H bond cleavage in the formation of cationic iridium alkoxycarbenes from ethers. N.D. Schley

**10:50 INOR 5.** Siderophore-Promoted release of titanium(IV) from metal oxide materials. A. Valentine

**11:15 INOR 6.** Electronic structures of diplatinum complexes. H.B. Gray

**11:40 INOR 7.** Near-miss synthesis of a noble gas compound in 1933: Could it have been Harry Gray award-worthy? J.A. Labinger

## Section B

Moscone Center  
2011

**Celebrating 60 Years of the Division of Inorganic Chemistry**

**The Early Days of the Division of Inorganic Chemistry (DIC)**

M. J. Clarke, *Organizer*

D. C. Crans, *Organizer, Presiding*

T. J. Marks, A. P. Sattelberger, *Presiding*

**8:30** Introductory Remarks.

**8:40 INOR 8.** Sixty years of inorganic chemistry. H.B. Gray

**9:10 INOR 9.** Synthesis and properties of selected transition metal complexes over half a century - a retrospective. S.J. Lippard

**9:40 INOR 10.** My experiences inside the Division of Inorganic Chemistry. D.J. Nelson

**10:10** Intermission.

**10:25 INOR 11.** Inorganic and supramolecular pincer chemistry. K. Bowman-James

**10:55 INOR 12.** Whither goes inorganic chemistry: What goes around, comes around. R. Eisenberg

**11:25 INOR 13.** How the Division of Inorganic Chemistry brought the ACS into the 21st Century: E-Lectons and the DIC's first ChemLuminary Award. M.J. Clarke

## Section C

Moscone Center  
2016

**Undergraduate Research at the Frontiers of Inorganic Chemistry**

**Coordination Chemistry**

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

B. B. Sears, *Presiding*

**9:00** Introductory Remarks.

**9:05 INOR 14.** Selective f-element extraction utilizing tripodal CMPO ligands. E.J. Werner, S.M. Biros, M. Patterson, A.K. Mulville, E.K. Connor

**9:25 INOR 15.** N-heterocyclic thione and selones: New tricks for old dogs. D. Rabinovich

**9:45 INOR 16.** Exploring the reactivity of hexaphenylcarbodiphosphorane with electron-deficient metallic species. G. Risica, C.D. Abernethy, M. Findlater

**10:05 INOR 17.** Structure and properties of coordination polymers containing conformationally flexible dipyrrolylamide ligands: An introductory undergraduate research program at Lyman Briggs College at Michigan State University. R.L. Laduca, T.A. Beard, J.Z. Travis

**10:25** Intermission.

**10:40 INOR 18.** Ligand replacement on 1D and 2D coordination polymers. B.J. Johnson, M. Johnson, N. Beattie

**11:00 INOR 19.** Synthesis, electronic structure, and reactivity of iron complexes bearing donor-modified BIAN ligands. H.M. Hoyt, G.N. Tran, C.C. Coady, M. Takemura, L. Darko, A. Volkov, E.Y. Martinez, W.R. Fuller, J.M. Darmon, C.E. Schulz, K.A. Wheeler

**11:20 INOR 20.** Synthesis and characterization of cobalt(II) SNS pincer model complexes for liver alcohol dehydrogenase. J.R. Miecznikowski, S. Bonitatibus, J. Jasinski, L. Li

**11:40 INOR 21.** Peptoid ligands: Bioinspired chelators for lanthanide and actinide complexation. A. Ricano, I. Captain, G. Deblonde, R.J. Abergel

## Section D

Moscone Center  
2018

**ACS Award in Inorganic Chemistry: Symposium in honor of Lawrence Que, Jr.**

M. J. Maroney, E. L. Que, *Organizers*

T. A. Jackson, J. Kovacs, *Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 22.** Diiron enzymes in antibiotic biosynthesis: Similar metal centers - different chemistry. A.J. Komor, C.J. Knoot, A. Jasniowski, B.S. Rivard, L. Que, J.D. Lipscomb

**9:00 INOR 23.** Mössbauer, EPR and DFT studies of Fe(V)=O, Fe(IV) Fe(IV) and Fe(III) Fe(IV) complexes of biological relevance. E. Munck

**9:25 INOR 24.** Metal selectivity in nickel trafficking proteins. M.J. Maroney, C.E. Carr, H.Q. Hu, H. Huang, R.C. Johnson, S.L. Ciurli, D.S. Merrell

**9:50 INOR 25.** DNA repair glycosylase MUTYH: From Fe-S clusters to MAP. S.S. David

**10:15** Intermission.

**10:30 INOR 26.** Mechanistic enzymology of tryptophan oxidizing enzymes. A. Liu

**10:55 INOR 27.** Gallium complexes targeting FepA: An inorganic approach to fighting antimicrobial resistance. V.C. Pierre

**11:20 INOR 28.** Metal scaffolds for biological sensing using <sup>19</sup>F magnetic resonance imaging. E.L. Que

**11:40 INOR 29.** Spectroscopic and kinetic studies of a bifunctional  $\alpha$ -ketoglutarate dependent non-heme iron enzyme, AsqJ. Y. Guo, J. Li, J. Lee, J. Dicks, R. Fan, W. Chang

**12:00 INOR 30.** Developing x-ray spectroscopic toolkits for mechanistic studies of cobalt and nickel catalysts. F. Li

## Section E

Moscone Center  
2020

**Inorganic Nanomaterials: Structure & Function in 0, 1 & 2 Dimensions**

*Financially supported by Chemistry of Materials*

E. J. McLaurin, *Organizer*

K. R. Kittilstved, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 31.** Mechanistic investigations of colloidal metal chalcogenide nucleation and growth. J.S. Owen, M.P. Campos, I. Reza

**9:05 INOR 32.** Germanium alloy nanocrystals and hollow spheres prepared via colloidal synthesis. S. Kauzlarich, K. Tabatabaei, K.A. Newton, X. Qi

**9:35 INOR 33.** Inorganic-Capped Luminescent InP nanocrystals. E.J. McLaurin

**10:05** Intermission.

**10:20 INOR 34.** High throughput nanomaterial synthesis and its application to technology. G.F. Strouse

**10:50 INOR 35.** Design of multi-functional nanocrystal membranes and the fabrication of thin film nanocrystal devices. C.B. Murray, Y. Wu, N. Gogotsi, T. Zhao, N.J. Greybush, D. Straus, D. Jishkariani, K.C. Elbert, C.R. Kagan

**11:20 INOR 36.** Dislocation-Driven growth of 1D, 2D and 3D nanomaterials and the applications in lead halide perovskite nanostructures. S. Jin, Y. Fu

**11:50 INOR 37.** Synthesis of magnetic semiconductor nanostructures. S.L. Stoll

## Section F

Moscone Center  
2022

**Sustainability in Electrocatalytic Fuel & Chemical Production**

*Cosponsored by CATL*

L. A. Berben, J. L. Dempsey, *Organizers*  
V. Thoi, *Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 38.** Why is Ni(cyclam)<sup>2+</sup> a better CO<sub>2</sub> reduction catalyst when supported on a mercury surface? B. Rudsteyn, Y. Wu, J. Froehlich, A. Zhanaidarova, W. Ding, V.S. Batista, C.P. Kubiak

**9:00 INOR 39.** Engineered biomolecular electrocatalysts for hydrogen evolution from water. K. Bren, Y. Guo, B. Kandemir, V. Fourmond

**9:25 INOR 40.** Paired electrochemical reactions: A lesson learned from microelectrode arrays and the on-site generation of chemical reagents. K.D. Moeller

**9:50 INOR 41.** Promoting selective electrocatalytic carbon dioxide reduction through modification of a metal's secondary and outer coordination spheres. C.C. McCrory

**10:15 INOR 42.** Towards electrocatalytic reduction of carbon dioxide to methanol: Adventures in hydricity. E.S. Wiedner, S.A. Burgess, M.J. Wilding, D.L. Miller, M. Helm, J.C. Linehan, A.M. Appel

**10:40** Intermission.

**10:55 INOR 43.** Mechanistic details of CO<sub>2</sub> reduction processes revealed by pulse radiolysis with time-resolved infrared detection. D.C. Grills, K.T. Ngo, J.J. Rochford

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**11:20 INOR 44.** Rational design of catalysts for fuel generation: Controlling the secondary coordination sphere. D.J. Harrison, E. Jarvis, Z.R. Relethford, C.A. Caputo

**11:40 INOR 45.** Mechanistic insight into the cleavage and coupling of CO with molybdenum complexes: Toward upgrading oxygenated C<sub>1</sub> precursors. T. Agapie

**12:05 INOR 46.** H<sub>2</sub> Evolution by metal chalcogenide coordination polymers, highly active molecular models of [NiFe] hydrogenases. S.C. Marinescu

### Section G

Moscone Center  
2024

#### F. Albert Cotton Award in Synthetic Inorganic Chemistry: Symposium in honor of Pingyun Feng

X. Bu, Q. Zhang, D. Zhao, *Organizers*

P. Yang, N. Zheng, *Organizers, Presiding*

**8:30 INOR 47.** Pingyun Feng - the quintessence of synthetic materials chemistry. G.D. Stucky

**9:00 INOR 48.** Nanostructured and single phase thermoelectrics. M.G. Kanatzidis

**9:20 INOR 49.** Interfacial assembly and engineering of ordered functional mesoporous materials. D. Zhao

**9:40 INOR 50.** Sol-gel assembly of metal chalcogenide nanoparticles into multicomponent architectures. J. Davis, S. Brock

10:00 Intermission.

**10:30 INOR 51.** Nanostructured and nanoporous materials for energy application. S.H. Tolbert

**10:50 INOR 52.** Synthesis and applications of conducting polymer nanofibers. R.B. Kaner, W.H. Mak, C. Lin, R. Li, D. Maung, X.W. Huang, K. Wang, Y. Wang, T. Farrell

**11:10 INOR 53.** Design and synthesis of novel porous materials for energy and environmental applications. T.M. Nenoff

**11:30 INOR 54.** Synthesis and substitution chemistry of complex bismuth sulfide iodides in sulfur/iodine melts. R.A. Groom, S.E. Latturer

**11:50 INOR 55.** Spark plasma sintering of Zintl phases. S. Kauzlarich, E.L. Kunz Wille, J. Cooley, D. Barrett, N. Grewal

#### Bioinorganic Chemistry

##### Proteins & Enzymes & Model Systems

S. A. Koch, *Organizer*

M. Knapp, F. Li, *Presiding*

**8:00 INOR 56.** Theoretical studies of the mechanism of the second half-reaction step of nitric oxide synthase: Nondynamical electron correlation drives the reaction to the intended products. I. Shamovsky, G. Belfield, R. Lewis, F. Narjes, L. Ripa, C. Tyrchan, L. Öberg, P. Sjö

**8:20 INOR 57.** Proton-facilitated transformations of molybdenum-oxo compounds as synthetic models for molybdoenzymes. F. Li

**8:40 INOR 58.** Metal capture and sensing in porous polymers for disease and environmental diagnostics. S. Lee, G. Barin, J.R. Long, C.J. Chang

**9:00 INOR 59.** Mechanistic investigations of guest binding in a self-assembled Ga<sub>4</sub>L<sub>4</sub> host reveals the first example of a conformational selection mechanism in a synthetic host. C.M. Hong, D.M. Kaphan, D. Toste, K.N. Raymond, R.G. Bergman

**9:20 INOR 60.** Engineering the alpha-ke-toglutarate oxygenase FIH for alternate rebound chemistry. M. Knapp

**9:40 INOR 61.** Urease inhibitors: In search for a key to control a nickel-enzyme. S.L. Ciuri

10:00 Intermission.

**10:10 INOR 62.** Iron-assisted CO<sub>2</sub> activation at a nickel center. C. Yoo, Y. Lee

**10:30 INOR 63.** Mechanistic, structural and computational studies of the catalytic multifunctional hemoglobin dehaloperoxidase from *Amphitrite ornata*. R.A. Ghiladi, L.M. Carey, N.L. McCombs

**10:50 INOR 64.** Mechanistic nuances of hydrogen atom abstraction by the copper(III)-hydroxide unit. D. Dhar, G.M. Yee, J.M. Mayer, C.J. Cramer, W.B. Tolman

**11:10 INOR 65.** Structure-function studies of tetranuclear iron clusters with a variable interstitial μ<sub>4</sub>-atom as models of biological active sites. C. Reed, T. Agapie

**11:30 INOR 66.** Bio-inspired nonheme iron catalyst: Electrophilic versus nucleophilic iron-based active oxidant – effect on alkane hydroxylation. S. Kal, L. Que

11:50 INOR 67. Withdrawn.

### Section I

Moscone Center  
3010

#### Chemistry of Materials: Materials for Energy & Catalytic Applications

C. G. Lugmair, *Organizer*

X. Chen, M. V. Sheridan, *Presiding*

**8:30 INOR 68.** Polydiacetylene-(phen) Ru(bpy)<sub>3</sub> for cofactor regeneration and CO<sub>2</sub> reduction as an artificial photocatalytic system. J. Kim, S. Kim, T. Anjong, H. Lee

**8:50 INOR 69.** Bismuth-based double perovskites for non-toxic photovoltaics. A. Slavney, T. Hu, A. Lindenberg, H. Karunadasa

**9:10 INOR 70.** Three-dimensional graphene nanoribbon-based materials and its applications. T. Yi

**9:30 INOR 71.** Pulsed-laser synthesis of advanced nanomaterials for water-oxidation catalysis and sunlight capture. A.M. Mueller, J.R. Winkler, H.B. Gray

**9:50 INOR 72.** Metal chalcogenide coordination polymers as catalysts for the hydrogen evolution reaction. C.A. Downes, S. Marinescu

10:10 Intermission.

**10:25 INOR 73.** All-in-one, derivatized tandem p<sup>+</sup>n-Si/SnO<sub>2</sub>@TiO<sub>2</sub> water splitting device. M.V. Sheridan, T.J. Meyer

**10:45 INOR 74.** General strategy for electrocatalytic hydrogen production integrated with oxidative organic upgrading. Y. Sun

**11:05 INOR 75.** Chemically tailoring two-dimensional transition metal dichalcogenides. X. Chen, A.R. McDonald

**11:25 INOR 76.** Polydopamine coatings for stabilizing the interface between cobalt-based water oxidation catalysts and electrode. I. Kim, Y. Nam

### Section J

Moscone Center  
3012

#### Coordination Chemistry: Synthesis & Characterization

S. A. Koch, *Organizer*

P. Yin, *Presiding*

**8:30 INOR 77.** Electron hopping through double-exchange coupling in a mixed-valence diiminobenzoquinone-bridged Fe<sub>2</sub> complex. A. Gaudette, I. Jeon, J.S. Anderson, G.J. Long, F. Grandjean, D. Harris

**8:50 INOR 78.** Enhancement of magnetic anisotropy in a heterobimetallic Mn-Bi complex. T. Pearson, M. Fataftah, D.E. Freedman

**9:10 INOR 79.** Redox series of gallium complexes: Characterization of four oxidation states and electrocatalytic hydrogen production by a Ga(III) complex in water. A. Arnold, L.A. Berben

**9:30 INOR 80.** Self-assembly processes: Connected spherical nano-sized supramolecules. B. Krämer, M. Scheer

**9:50 INOR 81.** Host-guest systems: Encapsulation of various templates by self-assembled supramolecules. H. Brake, M. Scheer

10:10 Intermission.

**10:20 INOR 82.** X-ray and neutron scattering study of the formation of giant molecular metal oxide clusters. P. Yin

**10:40 INOR 83.** Cobalt supramolecular triple-stranded helicate-based discrete molecular cage. H. Yoo

**11:00 INOR 84.** Synthesis, structure, and substitution reactivity of trinuclear molybdenum cluster compounds. J.R. Houston

**11:20 INOR 85.** Accessing a copper(III)-alkylperoxo complex. B.D. Neisen, D. Dhar, N.L. Gagnon, W.B. Tolman

**11:40 INOR 86.** Enhanced magnetic anisotropy and single-molecule magnet behavior in tetranuclear clusters featuring low-coordinate cobalt centers. K. Chakarawat, P. Bunting, J.R. Long

### Section K

Moscone Center  
3001

#### Lanthanide & Actinide Chemistry

*Cosponsored by WCC*

A. De Bettencourt Dias, *Organizer*

B. E. Cohen, L. Doerrer, J. Monteiro, *Presiding*

**8:30 INOR 87.** Comparing molecular and band-based approaches to the antenna effect in lanthanide coordination polymers. J. Einkauf, D.T. de Lill

**8:50 INOR 88.** Thiophene-based lanthanide complexes as photosensitizers for singlet oxygen generation. M.A. Gracia-Nava, A. De Bettencourt Dias

**9:10 INOR 89.** Broadband porphyrin dyes for near-infrared emission of lanthanide ions. R.W. Arachchi, A. Kukoyi, H. He

**9:30 INOR 90.** Lanthanide complexes of fluorinated alkoxide ligands. J. Weber, C. Kotyk, A.T. Royappa, A.L. Rheingold, L. Doerrer

9:50 Intermission.

**10:00 INOR 91.** Lanthanide-doped nanocrystals engineered for low fluence multiphoton imaging. B.E. Cohen, B. Tan, A. Fernandez-Bravo, E. Chan, P. Schuck

**10:20 INOR 92.** Template-directed synthesis of actinide nanoparticles. A. Herve, A. Braun, S. Alayoglu, C. Booth, D. Olive, M. Straub, S.G. Minasian

**10:40 INOR 93.** Challenges in the design of luminescent markers and cation sensors based on lanthanide complexes. J. Monteiro, D. Tapia, A. De Bettencourt Dias

**11:00 INOR 94.** Comparison of Li with K and Na in rare-earth metal reduction chemistry: Isolation of [Li(2,2,2-cryptand)]<sup>+</sup> in unique coordination environments. D.N. Huh, J.W. Ziller, W.J. Evans

11:20 Intermission.

**11:30 INOR 95.** New vistas in organometallic actinide chemistry. J.K. Pagano, K. Erickson, J. Xie, D.E. Morris, B. Scott, R. Wu, L. Gagliardi, R. Waterman, J.L. Kiplinger

**11:50 INOR 96.** Investigations of the electronic structure of actinide-aluminum bimetallics: Synthesis, reactivity and XAS characterization of actinide-alanate molecules and other actinide-aluminum materials. A.B. Altman, A. Brown, J. Arnold, S.G. Minasian, S. Pemmaraju, D. Prendergast, D.K. Shuh, T. Tylliszczak, D. Vine

**12:10 INOR 97.** Synthesis and reactivity of a homoleptic uranium(III) tris(aryl) complex. M. Boren, B. Parker, T.D. Lohrey, J. Arnold

### Section L

Moscone Center  
3003

#### Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

A. Poater, *Presiding*

**8:30 INOR 98.** Evolution of reactivity of olefin metathesis of Ru, and a step forward to other metals. A. Poater

**8:50 INOR 99.** Ruthenium-based olefin metathesis: Insight into catalyst decomposition. G.G. Lavoie, T.G. Larocque, A.C. Badaj

**9:10 INOR 100.** Synthesis, structure and characterization of new ruthenium(II) complexes and their catalytic activities towards selective C-O bond formation via activation of terminal alkynes. R.K. Jena, M. Bhattacharjee

**9:30 INOR 101.** Catalytic upgrading of ethanol to butanol: Mechanistic insights. H. Aitchison, D. Wass, R. Wingad

**9:50 INOR 102.** CO<sub>2</sub> and formic acid, a winning couple in reduction chemistry. T. Cantat

**10:10 INOR 103.** Mechanistic studies of oxidative arene vinylation catalyzed by late transition metals. B.A. Vaughan, S.K. Khani, J.B. Gary, J.D. Kammer, J. Chen, M.S. Webster-Gardiner, B.A. McKeown, R.J. Davis, T.R. Cundari, T.B. Gunnoe

**10:30 INOR 104.** Mechanistic study of thermal oxidative addition of si-h bond to mixed n-heterocyclic carbene oxazolonylborato rhodium bis(carbonyl) complex. A. Biswas

**10:50 INOR 105.** Cationic rhenium(III) complexes: Synthesis, characterization, and reactivity for catalytic hydrosilylation of aldehydes. D.E. Perez, E.A. Ison

**11:10 INOR 106.** Rh-catalyzed C-H cyanation of imidazopyridine using N-cyano-N-phenyl-p-methylbenzenesulfonamide as the cyano source. X. Shen, J. Qu, C. Liu, Y. Guo, X. Zhu, X. Hao, M. Song

**11:30 INOR 107.** Mechanistic studies of Rh(diphosphine)-catalyzed methanol reductive carbonylation. S. Chotchatchawankul, C.R. Landis

## Section M

Moscone Center  
2000

### Organometallic Chemistry: New Ligand Platforms

N. S. Radu, *Organizer*

R. Blanski, D. Mendoza-Espinosa, *Presiding*

**8:30 INOR 108.** Bicyclic (alkyl)(amino)carbenes (BicAACs): Introducing the first of a new family of stable carbenes. E. Tomas Gonzalez de Mendivil, M.M. Hansmann, R. Jazzar, M. Melaimi, G. Bertrand

**8:50 INOR 109.** Imidazolin-2-ylidenaminophosphines: A highly electron-rich phosphorus(III) superbase that splits CO<sub>2</sub>. P. Mehlmann, F. Dielmann

**9:10 INOR 110.** Withdrawn.

**9:30 INOR 111.** New class of N-heterocyclic carbenes featuring closo-carborane anions. S. Lee, V. Lavallo

**9:50 INOR 112.** Highly functionalized N-heterocyclic carbenes bearing icosahedral carborane anions. S.G. McArthur

**10:10 INOR 113.** Chiral acyclic diamino-carbene gold complexes as catalysts for enantioselective intramolecular hydroamination of alkenes: Systematic study of ligand substituent effects on enantioselectivities. A. Ruch, V. Nesterov, L.M. Slaughter

**10:30** Intermission.

**10:40 INOR 114.** Synthesis of back-functionalized imidazolium salts and NHC carbene complexes. R. Blanski, H. Phan, R.H. Grubbs

**11:00 INOR 115.** Novel phosphine ligand with NH linker for ligand cooperative catalysis. K. Ding, L. Alhthloul, D. Tyeer, S. Xu

**11:20 INOR 116.** Mono/di/tri-phosphine complexes of transition metals based on tris(3-methyl-1H-indol-2-yl) methane as a model system for the study of apical metal-H-C<sub>sp3</sub> interactions. E. Smirnova, J. Lloret-Fillol

**11:40 INOR 117.** Synthesis of Co and Mo hydroxycyclopentadienyl complexes and their catalytic activities in transfer hydrogenation. W. Wu, R.M. Waymouth, T. Seki, D. Solis, K. Nozaki, H. Ando, S. Kusumoto

**12:00 INOR 118.** P-P bond formation via unique metal-ligand cooperation. Y. Kim, Y. Lee

## Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

### Experimental Characterization

*Sponsored by PHYS, Cosponsored by INOR*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis, & Spectroscopy

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVIR, INOR<sup>1</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>2</sup> and WCC*

### Synthesis of Catalysts by Non-Traditional Methods

#### Nanoparticle Catalysts

*Sponsored by CATL, Cosponsored by COLL and INOR*

#### Deposition & Etching of Nanostructures

*Sponsored by COLL, Cosponsored by INOR*

## SUNDAY AFTERNOON

### Section A

Moscone Center  
2009

### Harry Gray Award for Creative Work in Inorganic Chemistry by a Young Investigator: Symposium in honor of Nilay Hazari

W. H. Bernskoetter, A. Valentine, *Organizers*

A. Hazari, *Presiding*

**1:30 INOR 119.** Operando NMR studies of hydroformylation. C.R. Landis, A. Brezny

**1:55 INOR 120.** Lewis acid additives in organotransition metal chemistry. G. Dobreiner

**2:20 INOR 121.** Gold(III) catalyst design for alkene and alkyne functionalization reactions. A. Nova

**2:45** Intermission.

**2:55 INOR 122.** Lewis acid-transition metal protomoe carbon dioxide functionalization. W.H. Bernskoetter, D. Jin

**3:20 INOR 123.** Proton-Assisted Reduction of CO<sub>2</sub> by Cobalt Aminopyridine Complexes. S.C. Marinescu, A. Chapovetsky

**3:45 INOR 124.** Catalytic hydrogenolysis of carbon oxygen bonds. D.M. Heinekey, K.I. Goldberg, J.M. Goldberg, L.M. Guard, T. Lekich

**4:10 INOR 125.** Molecular catalysts for water oxidation. G.W. Brudvig, R.H. Crabtree, S.B. Sinha, D.Y. Shopov, L.S. Sharninghausen, T. Michaelos, H. Lant, K. Fisher

### Section B

Moscone Center  
2011

### Celebrating 60 Years of the Division of Inorganic Chemistry

#### The Next Decades: 1990's & 2000's

M. J. Clarke, D. C. Crans, *Organizers*

B. E. Bursten, S. Ronco, M. Scott, *Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 126.** From siderophores to supermolecules, fifty years of coordination chemistry. K.N. Raymond

**2:05 INOR 127.** Electrochemically-promoted catalytic asymmetric hydrogenation using chiral organorhodium complexes. B.T. Donovan-Merkert

**2:35 INOR 128.** Solid state chemistry, Zintl phases, and the Division of Inorganic Chemistry. S. Kauzlarich

**3:05 INOR 129.** Surface chemistry of II-VI nanoplatelets and nanoribbons. Y. Zhou, Y. Yao, C. Morrison, W.E. Buhro

**3:35** Intermission.

**3:50 INOR 130.** Antimony(V) Lewis acids: Applications in anion sensing and small molecule activation. F.P. Gabbaï

**4:20 INOR 131.** Metalloprotein design: Examination of mononuclear redox centers. V.L. Pecoraro, A. Tebo, K. Koebke

**4:50 INOR 132.** Synthesis of new bismuth based materials. J. Walsh, S.M. Clarke, D.E. Freedman

**5:20 INOR 133.** Celebrating 60 Years - Inorganic chemistry at the National Science Foundation. C.A. Bessel

### Section C

Moscone Center  
2016

### Undergraduate Research at the Frontiers of Inorganic Chemistry

#### Organometallic Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*  
A. Johnson, *Presiding*

**1:30 INOR 134.** Synthesis and reactivity of compounds containing a κ<sup>2</sup>-1,1'-bis(diphenylphosphino) ferrocene ligand. K. Cabrera, C. Nataro

**1:50 INOR 135.** Synthesis and characterization of antimony(V) Lewis Acids. N. Capra, A.M. Christianson, F.P. Gabbaï

**2:10 INOR 136.** Heterogeneous and homogeneous phosphonothioate alcoholysis by supported molybdenum-peroxo complexes. L.Y. Kuo, A. Bennett

**2:30 INOR 137.** Evaluating the role of linker flexibility in base-free transfer hydrogenation of aldehydes and ketones catalyzed by Cp\*Ir(pyridinesulfonamide)Cl complexes. T.M. Townsend, A.R. O'Connor

**2:50 INOR 138.** Alkane functionalization with (<sup>99m</sup>phebox)Ir(OAc)<sub>2</sub>(OH)<sub>2</sub>. Z.H. Syed, A.M. Wright, S.B. Rubashkin, K.I. Goldberg

**3:10** Intermission.

**3:25 INOR 139.** Group VI metal complexes of tris(diisopropylphosphinomethyl)phenylborate. P.J. Fischer, S. Senthil, J.T. Stephan, M.D. Storlie, M.L. Swift, V.G. Young, Jr.

**3:45 INOR 140.** Reactivity of titanium-aluminum heterobimetallics. A. Brown, A.B. Altman, S. Hohloch, T.D. Lohrey, S.G. Minasian, J. Arnold

**4:05 INOR 141.** Palladium complexes of amine bis(phenolate) ligands: Complex isolation and catalytic evaluation. E. Collins, B.J. Graziano, A.K. Bowser, B. Wile

**4:25 INOR 142.** Synthesis, reactivity, and catalytic applications of isolable NHC-CuCF<sub>2</sub>H complexes. S. Kariofillis, J.R. Bour, M.S. Sanford

### Section D

Moscone Center  
2018

### ACS Award in Inorganic Chemistry: Symposium in honor of Lawrence Que, Jr.

M. J. Maroney, *Organizer*

E. L. Que, *Organizer, Presiding*

F. Li, *Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 143.** Rational design of biologically inspired catalysts for selective oxidation reactions. M. Costas, J. Serrano Plana, O. Cussó, A. Company, M. Milán

**2:00 INOR 144.** Biomimetic metal-oxygen intermediates in dioxygen activation chemistry. W. Nam

**2:25 INOR 145.** Spectroscopic, and/or crystallographic characterization of metastable intermediates involved in cysteinylate-ligated non-heme iron-promoted reaction mechanisms. M.N. Blakely, M.A. Dedushko, A.S. Ganas, G. Villar-Acevedo, P. Lugo-Mas, J. Kovacs

**2:50 INOR 146.** High valent metal oxo and nitrene cores in chemistry and biology. K. Ray

**3:15** Intermission.

**3:30 INOR 147.** Catching transient intermediates in non-heme iron oxidation chemistry with high speed Raman spectroscopy. D. Unjaroen, S. Padamati, J. Chen, A. Draksharapu, M. Swart, W.R. Browne

**3:55 INOR 148.** Insights into metalloenzyme function from bio-inspired manganese complexes. T.A. Jackson, D. Rice, A.A. Massie, M. Denler

**4:20 INOR 149.** Tuning the reactivity of high-valent nickel-oxygen adducts for hydrocarbon oxidation. A.R. McDonald

**4:40 INOR 150.** Relationship between electronic structure and reactivity in nonheme dioxygenase models. A.T. Fiedler, A.A. Fischer, S.V. Lindeman

**5:00 INOR 151.** Spectroscopic studies and oxidizing reactivity of two high-valent nickel-oxygen species. T. Corona, A. Draksharapu, S. Padamati, F.F. Pfaff, F. Acuña-Parés, V. Martin-Diaconescu, J. Lloret-Fillol, K. Ray, A. Company

### Section E

Moscone Center  
2020

### Inorganic Nanomaterials: Structure & Function in 0, 1 & 2 Dimensions

*Financially supported by Chemistry of Materials*

K. R. Kittilstved, E. J. McLaurin, *Organizers*

R. Beaulac, *Presiding*

**1:30 INOR 152.** Correlating structure and function in symmetric and asymmetric core/shell optical nanomaterials. J.A. Hollingsworth

**2:00 INOR 153.** Understanding localized surface plasmon resonance in doped metal oxide nanocrystals. D.J. Milliron

**2:30 INOR 154.** Controlling dopant-defect interactions in doped SrTiO<sub>3</sub> colloidal nanocrystals. K.R. Kittilstved

**3:00** Intermission.

**3:15 INOR 155.** Enhanced Multiple Exciton Generation in PbS/CdS Janus-like Heterostructure Nanocrystals. D. Kroupa, G. Pach, B. Chernomordik, **M.C. Beard**

**3:45 INOR 156.** Sample-Transmitted Excitation Photoluminescence (STEP) technique for quantifying the energy flow in nanocrystals and their solids. **M. Zamkov**

**4:15 INOR 157.** Optical Stark metrology of CdSe nanocrystal quantum dots: On the size-dependence of the oscillator strength. Y. Tang, M. Saniepay, C. Mi, R. Beaulac, **J. McGuire**

## Section F

Moscone Center  
2022

### Sustainability in Electrocatalytic Fuel & Chemical Production

*Cosponsored by CATL*

L. A. Berben, J. L. Dempsey, *Organizers*

E. S. Wiedner, *Presiding*

**1:30 INOR 158.** Use of polyoxometalates as redox-active reservoirs: Towards small molecule activation. **E.M. Matson**

**1:55 INOR 159.** Studies of electrocatalytic dioxygen reduction. **J.M. Mayer**, M.L. Pegis, C. Wise, D.J. Martin, S. Raugel, N. Kumar

**2:20 INOR 160.** Observing molecular vibrations of catalytic intermediates at electrode surfaces. **T. Cuk**, S. Pemmaraju, D. Prendergast, X. Chen, M. Waagele, D. Herlihy

**2:45** Intermission.

**3:00 INOR 161.** Hydricity as an activity descriptor for molecular hydrogen evolution electrocatalysts. C. Tsay, B. Ceballos, D. Cunningham, S. Ruelas, **J.Y. Yang**

**3:25 INOR 162.** Solar fuel devices with molecular catalysts – mechanistic insights. **L. Hammarstrom**

**3:50 INOR 163.** Designing small molecule electrocatalysts for selective C-H bond formation with CO<sub>2</sub>: [Fe<sub>2</sub>N(CO)<sub>12</sub>]<sup>-</sup>, [Fe<sub>2</sub>N(CO)<sub>12</sub>]<sup>2-</sup>, and the role of the hydride intermediate, [H-Fe<sub>2</sub>N(CO)<sub>12</sub>]<sup>-</sup> in catalysis. N.D. Loewen, A. Taheri, **L.A. Berben**

**4:15 INOR 164.** CO<sub>2</sub> splitting into CO and O<sub>2</sub>: From mechanistic studies to efficient electrolyzer. **C. Cyrille**

## Section G

Moscone Center  
2024

### F. Albert Cotton Award in Synthetic Inorganic Chemistry: Symposium in honor of Pingyun Feng

X. Bu, P. Yang, D. Zhao, N. Zheng, *Organizers*

Q. Zhang, *Organizer, Presiding*

**1:30 INOR 165.** Hybrid nanomaterials for treating resistant cancers. **W. Lin**

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**1:50 INOR 166.** Dynamic metal-organic frameworks: Design and properties. **X. Bu**

**2:10 INOR 167.** Oxygen evolution reaction electrocatalysis: Redefining intrinsic activity trends and illustrating design principles. **S.W. Boettcher**

**2:30 INOR 168.** Towards robust hierarchical porous metal-organic frameworks. **S. Yuan, H. Zhou**

**2:50 INOR 169.** Porous ionic liquids: Challenges and opportunities. **S. Dai**

**3:10** Intermission.

**3:40 INOR 170.** Organometallic chemistry of macrocycles, cages. **G. Jin**

**4:00 INOR 171.** Metal-Organic Frameworks (MOFs): Platforms for multifunctional materials. **B. Chen**

**4:20 INOR 172.** Luminescent coordination networks: Structure, functionality and applications. **W. Liu**, W.P. Lustig, Y. Fang, K. Zhu, **J. Li**

**4:40 INOR 173.** Development of metal-organic frameworks as a versatile platform for heterogeneous catalysis. **S. Ma**

## Section H

Moscone Center  
3000

### Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes & Future Challenges

*Cosponsored by BIOL*

*Financially supported by Northwestern U, U of California-Davis*

V. DeRose, *Organizer*

J. A. Telsler, *Organizer, Presiding*

**1:30 INOR 174.** High resolution x-ray spectroscopic studies of soluble methane monooxygenase. **S. DeBeer**

**2:00 INOR 175.** Mechanism and control in radical SAM enzymes. **J.B. Broderick**, M. Horitani, A.S. Byer, K.A. Shisler, T. Chandra, R.U. Hutchison, K.S. Duschene, A.R. Marts, W.E. Broderick, B.M. Hoffman

**2:30 INOR 176.** Structure of a heme peroxidase compound II. **H. Kwon**, J. Basran, A.J. Fielding, T.E. Schrader, A. Ostermann, M.P. Blakeley, P.C. Moody, **E. Raven**

**3:00 INOR 177.** Vibrational studies of the single turnover reaction cycle and substrate inhibition reaction in denitrifying NO reductases. **P. Moënne-Loccoz**

**3:20** Intermission.

**3:30 INOR 178.** Effects of heme conformation on spin state, spin distribution, and electron transfer in cytochromes. **K. Bren**, J. Kleingardner, B. Kandemir

**4:00 INOR 179.** Using biosynthetic models of heteronuclear metalloenzymes for spectroscopic elucidation of their mechanisms in multi-electron processes. **Y. Lu**, A. Bhagi-Damodaran, C. Cui, Y. Yu, **J. Reed**

**4:20 INOR 180.** Developing protein-based model systems to mimic hydrogenase, carbon monoxide dehydrogenase, and acetyl coenzyme A synthase. **H.S. Shafaat**, J.W. Slater, C.R. Schneider, A. Manesis, S.C. Marguet, M.J. Stevenson

**4:40 INOR 181.** Biosynthesis of the [FeFe]-hydrogenase active site. **D. Suess**

**5:00 INOR 182.** Nitrogen fixation by nitrogenase: The heart of the mechanism. **B.M. Hoffman**

## Section I

Moscone Center  
3010

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Homogeneous Catalysis

*Cosponsored by PMSE*

*Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University*

A. Facchetti, *Organizer*

T. Lohr, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 183.** Design and synthesis of phosphine-olefin ligands with planar-chiral metal complex scaffold and application in asymmetric catalysis. **M. Ogasawara**

**2:05 INOR 184.** Late stage functionalization of bioactive natural products under catalyst control. **M.R. Gagne**

**2:35 INOR 185.** Development of cooperative asymmetric catalysts. **S. Hong**

**3:05** Intermission.

**3:15 INOR 186.** Catalytic challenges in organoactinide chemistry. **M.S. Eisen**

**3:45 INOR 187.** Chemical transformation of dinitrogen mediated by pincer complexes. **S. Schneider**

**4:15 INOR 188.** Transition-metal-catalyzed functionalization using carbon dioxide. **Y. Tsuji**

## Section J

Moscone Center  
3012

### ACS Award in Organometallic Chemistry: Symposium in honor of Marcetta Y. Darensbourg

C. G. Riordan, *Organizer*

D. Mason, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 189.** Insights into the catalytic mechanisms of [FeFe] hydrogenase: Inspiration for the design of molecular catalysts. **W. Lubitz**, A. Adamska-Venkatesh, J.A. Birrell, C. Sommer, S. Rumpel, O. Rudiger, E. Reijerse

**2:00 INOR 190.** Control of the activity of [FeFe]-subsite analogues by interactions of their ligated cyanides. **C. Pickett**, J. Woods

**2:25 INOR 191.** Effect of the dithiolate cofactor on the reactivity, spectroscopy, and electrochemistry of models for the [FeFe]-hydrogenases. **T.B. Rauchfuss**, N. Lalaoui, C.P. Richers, M.R. Carlson, W. Wang

**2:50 INOR 192.** Computational modeling of hydrogenases and biometallic complexes. **M.B. Hall**

**3:15 INOR 193.** Effect of the outer coordination sphere on molecular catalysts: A tribute to Marcetta, the hydrogenase whisperer. **W.J. Shaw**, N. Boralogodage, A. Datta, B. Ginovska, S. Raugel

**3:40** Intermission.

**3:55 INOR 194.** Solar fuels science. **H.B. Gray**

**4:20 INOR 195.** Hydrogen evolution without metal-hydrides: Ligand-centered HER catalysts with transition metals and non-transition metals. **C.A. Grapperhaus**, A.Z. Haddad, B. Garabato, R.M. Buchanan, P.M. Kozlowski

**4:45 INOR 196.** Pyridine and pyrazine pincer coordination chemistry. **K. Bowman-James**

**5:10 INOR 197.** Redox-active ligand complexes in artificial photosynthesis and the reductive side of water splitting. **R. Eisenberg**, G. Li

## Section K

Moscone Center  
3011

### Chemistry of Materials: Metal Organic Frameworks

C. G. Lugmair, *Organizer*

I. Kim, T. Runcevski, *Presiding*

**1:30 INOR 198.** Effect of different synthesis methods and strategies on the properties of copper based and iron based metal organic frameworks. **A. Yuruden**, Y. Yurum

**1:50 INOR 199.** Redox active metal-organic frameworks with multi-components in order. **B. Tu**, Q. Li

**2:10 INOR 200.** Withdrawn.

**2:30 INOR 201.** *In Situ* diffraction and spectroscopic studies of metal-organic frameworks under variable temperature and gas pressure. **T. Runcevski**, J.R. Long

**2:50 INOR 202.** Coordination polymers featuring coordinatively unsaturated, low-valent metal centers. **D.W. Agnew**, J.S. Figueroa

**3:10 INOR 203.** General interfacial synthesis route to free-standing metal-organic framework membrane. **Z. Li**, W. Han, K. Yeung

**3:30** Intermission.

**3:45 INOR 204.** Self-assembled coordination polymer as intermediate in synthesis of porous oxide from bulk metal. **B. Chang**, J. Chen, I. Tevis, S. Cinar, S. Oyola-Reynoso, G. Rodriguez, A.J. Rossini, M. Thuo

**4:05 INOR 205.** Phosphine and arsine coordination materials with well-defined open metal sites: New examples with Pd(II) and Au(I). **S.M. Humphrey**, S.G. Dunning, E. Sikma, J. He

**4:25 INOR 206.** POMOFs and POMzites: A family of zeolitic polyoxometalate frameworks from a minimal building block library. **L. Cronin**

**4:45 INOR 207.** Coordinative alignment of molecules in chiral metal organic frameworks structure determination of molecules coordinated and aligned in MOFs by single crystal x-ray diffraction. **S. Lee**, E.A. Kapustin, O.M. Yaghi

**5:05 INOR 208.** Nanocasting in metal-organic framework materials. **A. Stein**, C. Malonzo, Z. Wang, W. Zhao, T.E. Webber, R. Penn

**5:25 INOR 209.** Nomenclature, terminology guidelines, and database issues for topology representations in metal-organic frameworks. **L.R. Ohrstrom**

‡ Cooperative Cosponsorship

## Section L

Mosccone Center  
3003

## Inorganic Catalysts

S. A. Koch, *Organizer*

J. Bluemel, E. V. Rybak-Akimova, *Presiding*

**1:30 INOR 210.** Mechanistic investigations of oxygen evolution at a manganese-doped cobalt cubane catalyst. E. Darby, A. Nguyen, S. Gul, J. Yano, T.D. Tilley

**1:50 INOR 211.** Pt NPs ligated by zwitterionic imidazolium-aminidates: A notable ligand effect in hydrogenation of carbonyl groups. L.M. Martínez-Prieto, B. Chaudret, J. Campora, P.W. van Leeuwen

**2:10 INOR 212.** Synthesis and characterization of tin (II) complexes supported by N<sub>2</sub>O<sub>2</sub> bis(phenoxy)-amine ligands for the ring-opening polymerization of lactide. S. Praban, K. Phomphrai

**2:30 INOR 213.** Computational study of the vanadium-catalyzed decomposition of alkyl hydroperoxides to ketones. M. Hermsen, A. Schmidt, A. Schäfer, T. Schaub

**2:50 INOR 214.** Dizinc lactide polymerization catalysts: Hyperactivity by control of ligand conformation and metallic cooperativity. A.A. Thevenon, C. Romain, M. Bennington, H. Davidson, A. White, S. Brooker, C.K. Williams

**3:10** Intermission.

**3:20 INOR 215.** One-pot synthesis of double-capped oligoesters using simple metal amides. P. Piromjitpong, K. Phomphrai

**3:40 INOR 216.** Mechanism for the oxidation of alcohols by a  $\mu$ -oxido-diiron(III)bis-phenolato polypyridyl complex. D. Unjaroen, A. Draksharapu, M. Swart, W.R. Browne

**4:00 INOR 217.** Towards inert C-H bond functionalization using main group multiple bonds. J. Chu, G. Menard

**4:20 INOR 218.** Immobilized Sonogashira catalyst systems. J. Bluemel, J.C. Pope

**4:40 INOR 219.** Kinetics and mechanisms of hydrocarbon oxidations with H<sub>2</sub>O<sub>2</sub>/HOAc catalyzed by iron and manganese complexes with rigid aminopyridine ligands. E.V. Rybak-Akimova, G. Yang, M. Piquette

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

#### Theory & Modeling

*Sponsored by PHYS, Cosponsored by INOR*

### Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

*Sponsored by NUCL, Cosponsored by INOR*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC*

### Synthesis of Catalysts by Non-Traditional Methods

### Model Catalysts, Microporous Materials & Oxides

*Sponsored by CATL, Cosponsored by COLL and INOR*

### Deposition & Etching of Nanostructures

*Sponsored by COLL, Cosponsored by INOR*

## SUNDAY EVENING

### Section A

Mosccone Center  
Hall D

### Undergraduate Research at the Frontiers of Inorganic Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

**5:30 - 7:30**

**INOR 220.** IONIC VIPEr workshops: Bringing current literature into the classroom. S. Poland, B.B. Sears, S.A. Toledo, A.R. Johnson

**INOR 221.** IONIC bonding: Building a lattice using attractive forces. A.R. Johnson, J.L. Stewart, A.K. Bentley, H.J. Eppley, E.R. Jamieson, C. Nataro, B.A. Reisner, S.R. Smith, L.A. Watson, N. Williams

### Section B

Mosccone Center  
Hall D

### Celebrating 60 Years of the Division of Inorganic Chemistry

D. C. Crans, *Organizer*

**5:30 - 7:30**

**INOR 222.** Highlights in inorganic chemistry from the 250 years that preceded the creation of the Division of Inorganic Chemistry. S.A. Koch

**INOR 223.** Cobalt and copper  $\sigma$ -complexes with a diphosphine-hydroxylane ligand. J. Kim, Y. Kim, Y. Lee

**INOR 224.** Trends in NMR chemical shifts of d<sup>9</sup> transition metal compounds. Z. Xue, T.M. Cook, A.C. Lamb

**INOR 225.** Effect of confinement on the acidity of organic and bio ligands. J. Salas, A. Cherem, M.D. Johnson

**INOR 226.** Selenium speciation in the Fountain Creek water and effects on fish species diversity. J. Carsella, S.J. Bonetti, D.C. Crans, S.J. Herrmann, D.R. Nimmo

**INOR 227.** Ruthenium complexes as potential anticancer prodrugs that are activated by low pH and light. J. Gray, F. Qu, J.A. Lundeen, N.S. Chambers, J. Park, Y. Kim, J.J. Paul, E.J. Merino, R.H. Schmeil, E.T. Papish

**INOR 228.** Group transfer and methylation reactions of a terminally bound zirconium methylidene complex. T. Kurogi, P. Carroll, D.J. Mindiola

**INOR 229.** Energy transfer from PbS nanocrystals to pentacene. X. Li, M. Tang

**INOR 230.** Diaquo ruthenium water oxidation catalysts with a novel bimimidazolyl backbone. J.M. Kamdar, C.E. Moore, A.L. Rheingold, D.K. Smith, D.B. Grotjahn

**INOR 231.** Withdrawn.

**INOR 232.** Withdrawn.

**INOR 233.** Correlating redox potential with <sup>51</sup>V NMR chemical shifts for vanadium (V) catecholates. J.T. Koehn, P. Chatterjee, C.N. Beuning, A. Waterhouse, T. Lucia, T.E. Polenova, D.C. Crans

**INOR 234.** Diverse array of nucleophilic reactivity featuring molecular titanium nitride complexes. L. Grant, P. Carroll, B. Manor, D.J. Mindiola

### Section C

Mosccone Center  
Hall D

### Undergraduate Research at the Frontiers of Inorganic Chemistry

#### Bioinorganic Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

**5:30 - 7:30**

**INOR 235.** Iron and cadmium binding in metalloprotein II and myohemerythrin from *Hediste diversicolor*. A. Krieger, B. Russell

**INOR 236.** Synthesis and evaluation of alkylnyl  $\beta$ -sheet mimetics coordinated to tungsten. E.C. Pedro, A.N. Boynton, S.M. Berk, T.P. Curran

**INOR 237.** Manganese corrole substituted myoglobin. J.M. Mason, K.L. Stone

**INOR 238.** Investigating dechlorination using bio-inspired nickel compounds. E. Gund, R. Griffin, C. Ye, K.M. Van Heuvelen

**INOR 239.** Copper (I) substitution at zinc (II) binding domains: Characterization of speciation and functional studies. M.L. Stevens, M.D. Storie, K.E. Splan

**INOR 240.** Preparation of synthetic conjugated myoglobin to promote new reactivity. K.L. Stone, J. Hua, H. Choudhry, J. Mason

**INOR 241.** Tandem C-H functionalizations by combining light-driven biocatalysis and photocatalysis. V. Alfaro, J. Faris, M. Melkie, C. Sulca, T. Banh, M. Kato, L.E. Cheruzel

**INOR 242.** Synthesis, characterization and photosensitization in a series of Ru(phen)<sub>2</sub>(quo)]<sup>+</sup> complexes. F. Delano IV, A. Koerner, A. Cardillo, R.N. Garner, B.B. Sears

**INOR 243.** Synthesis and investigation of novel hydroquinone ring-cleaving dioxygenase model complexes. N. Porter, T.E. Machonkin, A. Speelman, P.L. Holland

**INOR 244.** Copper binding and reactivity of de novo designed Due Ferri single chain (DFsc) proteins. B. Van Dyke, A.J. Reig

**INOR 245.** Biophysical characterization and catalytic reactivity of rubrerythrin and symerythrin model proteins. J. Pellegrino, K.A. Bell, R. Polinski, S. Cimerol, A. Jacobs, E.I. Solomon, A.J. Reig

**INOR 246.** Using model proteins to understand the structure-function relationships in 4-histidine/2-carboxylate diiron proteins. C. Philip, S. Hawkins, A.J. Reig

**INOR 247.** Structure-function relationships in G4DFsc variants containing a 4-His/3-carboxylate active site. K. OShea, J. Dorsheimer, K. Biernat, A. Jacobs, E.I. Solomon, Y. Wu, W.F. Degrad, A.J. Reig

**INOR 248.** Characterization of MnPC, a novel hydroquinone ring-cleaving dioxygenase. J. Duncan, E. Altman, T.E. Machonkin

**INOR 249.** Molybdenum pyranopterin dithiolene complexes: Synthetic model and investigation in the role of pterin reduction in the molybdenum cofactor. N. Nguyen, B. Williams, D. Gisewhite, S.J. Nieter Burgmayer

**INOR 250.** Mechanistic investigation of photochemical products from iron-iron hydrogenase model compounds. P. De La Torre, A. Nelson, C.F. Works

**INOR 251.** Synthesis and characterization of cobalt (II) salen and its possible interactions with persulfide species. A. Holm, V. Suarez, L. Alvarez, C.F. Works, J. Fukuto

**INOR 252.** Dechlorination abilities of biomimetic compounds. C. Ye, R. Griffin, K.M. Van Heuvelen

**INOR 253.** Investigating the reactivity of the ligating histidines at the Cu<sub>2</sub> site of cytochrome c oxidase. T. Devlin, L.M. Hunsicker Wang

**INOR 254.** Changes in reduction potential of the [2Fe-2S] cluster of the *Thermus thermophilus* Rieske protein using multiple non-covalent interactions. R. Shepherd, L.M. Hunsicker Wang

**INOR 255.** Exploring the effect of distal charges on the reduction potential of the Rieske protein from *Thermus thermophilus*. M. Hogsett, J. Munoz, L.M. Hunsicker Wang

**INOR 256.** Metal-organic supercontainers for neurobiological applications. J.W. Fanta, Z. Wang, B. Burrell

**INOR 257.** Mechanistic investigation of the solvent dependent photochemistry of iron-iron hydrogenase model compounds. B. Jolly, L. Ortiz, C.F. Works

**INOR 258.** Studying the active site of nickel-acireductone dioxygenase through nickel and zinc analogues: A structural and spectroscopic comparison study. A.J. Gremillion, S. Sanchez, S.A. Toledo, V. Lynch, C.L. Dorsey

**INOR 259.** Capturing an intermediate of the radical S-adenosyl-L-methionine enzyme lysine 2,3-aminomutase. C. Denler, A.S. Byer, J.B. Broderick

### Section D

Mosccone Center  
Hall D

### ACS Award for Distinguished Service in the Advancement of Inorganic Chemistry: Symposium in honor of William B. Tolman

L. M. Berreau, P. L. Holland, *Organizers*

**5:30 - 7:30**

**INOR 260.** Characterization of a copper(III)-phenoxide complex. N.L. Gagnon, D. Dhar, W.B. Tolman

**INOR 261.** Probing the effect of ligand electronics on the C-H reactivity of copper-oxygen cores. C. Elwell, W.B. Tolman

**INOR 262.** Analysis of novel tetradentate zinc catalysts used for the polymerization of rac-lactide. A.M. Luke, D.E. Stasiw, T. Rosen, M. Kol, W.B. Tolman

**INOR 263.** New strategy for the hydroxylation of strong C-H bonds. H. Sajjad, W.B. Tolman

**INOR 264.** Mechanistic analysis of the alternating copolymerization of epoxides with cyclic anhydrides utilizing a cocatalyst system. L.A. Mitchell, M. Fieser, D. Urness, M.J. Sanford, C.R. Dunbar, M. Mandal, C.J. Cramer, G.W. Coates, W.B. Tolman

**INOR 265.** Resonance Raman spectroscopy of copper(III)-hydroxide core and structural implications based on a unified Badger's rule. **A.D. Spaeth**, N.L. Gagnon, W.B. Tolman

**INOR 266.** Mechanistic studies of  $\epsilon$ -caprolactone polymerization by (salen)Al(OR) complexes and a predictive model for cyclic ester polymerizations. **J.A. Macaranas**, A.M. Luke, E.E. Marlier, M. Mandal, D. Marell, C.R. Dunbar, M. Johnson, Y.C. DePorre, M.O. Miranda, B.D. Neisen, C.J. Cramer, M.A. Hillmyer, W.B. Tolman

## Section E

Moscone Center  
Hall D

### ACS Award in Inorganic Chemistry: Symposium in honor of Lawrence Que, Jr.

M. J. Maroney, E. L. Que, *Organizers*

5:30 - 7:30

**INOR 267.** Green synthesis of Nd-La doped  $\text{Sr}_2\text{Cu}_2\text{Fe}_{28}\text{O}_{46}$  and Nd-La doped  $\text{Sr}_2\text{Mg}_2\text{Fe}_{28}\text{O}_{46}$  nanoparticles and comparison their magnetic and microwave absorbing properties with Nd-La doped  $\text{Sr}_2\text{CuMgFe}_{28}\text{O}_{46}$  nanoparticles. **P. Alimard**

**INOR 268.** Characterization of ( $\mu$ -oxo) heterobimetallic complexes derived from  $[\text{Fe}^{\text{V}}(\text{O})\text{TMC}]$  with Fe coordination numbers that depend on ligand topology. **A. Zhou**, J. Prakash, G. Rohde, J. Klein, S.T. Kleespies, A. Draksharapu, R. Fan, Y. Guo, C.J. Cramer, L. Que

**INOR 269.** Tuning the C—H bond cleavage ability of an oxoiron(IV) complex structural properties of an oxoiron(IV) complex supported by a pentadentate ligand. **W. Rasheed**, M. Puri, A. Draksharapu, L. Que

**INOR 270.** Inner side of high-valent metal-oxo reactivity. **M. Swart**, K. Ray

**INOR 271.** Exploring the  $\text{H}_2\text{O}_2$  interaction and catalytic activity of mononuclear Cu(II) coordination complexes containing N-rich ligand architecture. **N. Singh**, J. Niklas, O. Poluektov, K.M. Van Heuvelen, A. Mukherjee

**INOR 272.** Two isomers of oxoiron(IV) complex supported by tetramethylcyclam ligand: Interconversion and reactivity. **J. Prakash**, J. Klein, A. Draksharapu, C.J. Cramer, L. Que

**INOR 273.** Reversible formation an  $\text{Fe}^{\text{III}}\text{—O—Ce}^{\text{V}}$  intermediate from the reaction of  $\text{Fe}^{\text{V}}=\text{O}$  and  $\text{Ce}^{\text{III}}$ . **A. Draksharapu**, J. Klein, W. Rasheed, C.J. Cramer, L. Que

**INOR 274.** Factors influencing the electronic nature of the active oxidant in a bio-inspired non-heme mononuclear iron catalyst. **S. Kal**, S. Iyer, L. Que

**INOR 275.** Modulation of a weakly coupled peroxo-dicopper(II) complex by interaction with alkali metal ions. **L. D'Amore**, M. Swart, A. Brinkmeier, F. Meyer

**INOR 276.** Characterization of a novel  $\text{Fe}(\text{V})=\text{O}$  species using Mossbauer spectroscopy and Electron Paramagnetic Resonance (EPR) spectroscopy. **R. Fan**, J. Serrano Plana, A. Company, W.N. Oloo, L.A. Rueda, K.K. Meier, B. Verdejo, E.V. Garcia-España, M.G. Basallote, E.L. Bominaar, Y. Guo, L. Que, M. Costas, E. Munck

**INOR 277.** Roles of (L)Fe<sup>V</sup>(O) and (L)Fe<sup>III</sup>—OOAc intermediates in bio-inspired C—H and C=C oxidations. Kinetics and spectroscopy. **W.N. Oloo**, R. Banerjee, S. Lee, C. Kim, J.D. Lipscomb, L. Que

**INOR 278.** Elucidation of the mechanism of activation of oxygen by iron(II)polypyridylamine complexes in water. **D. Angelone**, J. Chen, A. Draksharapu, W.R. Browne, M. Swart

**INOR 279.** Elucidation of high-valent species involved in carboxylic acid-assisted nonheme iron catalysis. **S. Xu**, A. Draksharapu, W. Ching, L. Que

**INOR 280.** HDX-MS reveals metal-specific structural changes important to DNA binding by the cobalt and nickel responsive transcriptional regulator, RcnR. **H. Huang**, M.J. Maroney

**INOR 281.** Role of citrate and transferrin in determining Ti(IV) solubility, bioavailability, and its regulation. **S. Sharma**

**INOR 282.** Comparative reactivity studies of peroxomanganate(III) intermediates supported by two diazacycloalkane-based tetradentate ligands. **M. Denler**, T.A. Jackson, G. Wijeratne

**INOR 283.** O—O bond activation by a series of Mn complexes supported by amide-containing ligands. **J. Parham**, G. Wijeratne, T.A. Jackson

**INOR 284.** Metal-Assisted oxygen addition to an Fe(III)-thiolate. **M.N. Blakely**, G. Villar-Acevedo, M. Dedushko, W. Kaminsky, J. Kovacs

**INOR 285.** InP based heterostructures: Synthesis, electronic structure, and quantitative comparison of absorption properties. **R. Toufanian**, M. Chern, A.M. Dennis

**INOR 286.** Non-Covalent interactions in C-H oxidation reactions by metal-oxos: The curious case of CHD and DHA. **J. Klein**, B. Dereli, L. Que, C.J. Cramer

**INOR 287.** Exploring the structure-reactivity relationship of a series of N5-ligated oxomanganese(IV) complexes. **A.A. Massie**, M. Denler, T.A. Jackson

**INOR 288.** Tuning the proton-coupled electron-transfer reactivity of Mn(III)-hydroxo complexes via ligand perturbations. **D. Rice**, A. Burr, T.A. Jackson

**INOR 289.** Thermodynamics of reactivity of a series of hydroxo-manganese complexes in H atom abstraction. **A. Munasinghe**, D. Rice, J. Parham, T.A. Jackson

**INOR 290.** Withdrawn.

## Section F

Moscone Center  
Hall D

### Undergraduate Research at the Frontiers of Inorganic Chemistry

#### Coordination Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

5:30 - 7:30

**INOR 291.** Green chemistry in the advanced inorganic laboratory: Mechanochemical synthesis and characterization of homoleptic bis-chelate copper(I) complexes. **D.J. Rabaey**, D.E. Janzen

**INOR 292.** Synthesis and kinetic studies of a trinuclear tungsten metal cluster. **J. Nunez**, R.C. Brookins, J.R. Houston

**INOR 293.** Modifying the bridging anion of LnX<sub>3</sub>M 12-metallacrown-4 complexes. **J.J. Reed**, J.C. Lutter, C.I. Daly, C. Chow, A.H. Davis, A. Nimthong-Roldan, M. Zeller, J.W. Kampf, C.M. Zaleski, V.L. Pecoraro, T.T. Boron

**INOR 294.** Synthesis of a family of chiral aminoalcohols as ligands for titanium and tantalum catalyzed asymmetric hydroamination. **A.R. Johnson**, **C.S. Abelson**

**INOR 295.** Withdrawn.

**INOR 296.** Unique crystalline composite displaying four primary zoning events in the solid state and based upon self-assembled coordination polymers. **S. Cornell**, **S.R. Seidel**

**INOR 297.** Axial ligand interactions of cyclo-metallated Pd(II) complexes: Hemilabile oxathiacrowns vs inert but fluxional thiocrowns. **D.E. Janzen**, M.A. Bruening, A.A. Mamiya, D.A. da Silva Filho

**INOR 298.** Synthesis and characterization of SNS pincer ligand precursors and corresponding zinc(II) and copper(II) complexes. **J.R. Miecznikowski**, **T. Ostrowski**, M. Siu, K.A. Bayne, N.A. Bernier

**INOR 299.** Synthesis, characterization, and reactivity studies of iron dibromide complexes bearing para-substituted alpha-dimine ligands. **D. Soemardi**, S.M. Click, A. Beltran, K.A. Wheeler, H.M. Hoyt

**INOR 300.** Boron Schiff-Base complexes as detectors for toxic levels of selenate in water. **J. Bennett**, L. Jefferies

**INOR 301.** Synthesis of a lanthanide complex using  $\text{Eu}(\text{NO}_3)_3 \cdot 6\text{H}_2\text{O}$  with tripodal ligand 2-OHnaphththren ( $\text{tris}[N-(2\text{-hydroxynaphthalidene})\text{-2-aminoethyl}]\text{amine}$ ). **J.M. Armen**, P.M. Smith

**INOR 302.** Activating carbon dioxide using a cobalt complex supported by a macrocyclic tetraza ligand. **A. Amado**, F. Li, C. Dong

**INOR 303.** Syntheses, characterization, and oxygen reactivity of three coordinate SNS pincer copper(I) pincer complexes. **J.R. Miecznikowski**, **M.R. Smith**, M. Siu, N.A. Bernier, J. Jasinski, E. Reinheimer

**INOR 304.** Synthesis of a new cationic cobalt(III) coordination complex and its potential applications as an indole ring forming catalyst. **R.M. Miller**, H.P. Nash, **A. Morris**

**INOR 305.** Synthesis of new Fe and Co PONOP/PNP complexes: Towards the development of a first-row Guerbet catalyst. **T.M. Townsend**, C.E. Hayes, R. Baker, W.D. Jones

**INOR 306.** Excimer and exciplex formation involving  $[\text{Pt}(\text{bphen})\text{CN}_2]$  and  $\text{Ag}^+$  in solution. **E.J. Rourk**, J.K. Nagle

**INOR 307.** Synthesis of europium(III) silicates using microwave-assisted hydrothermal methods. **Z.J. Woessner**, P.M. Smith

**INOR 308.** Natural oxidation state analysis: Principles and applications. **M.K. Helli**, M. Nathan, **J.S. D'Acchioli**

**INOR 309.** Synthesis and reactivity of actinide guanidinate complexes. **A. Shiao**, N. Settineri, J. Arnold

**INOR 310.** Ionothermal synthesis and characterization of two new iron thiophosphates:  $[\text{EMIM}][\text{Fe}(\text{P}_2\text{S}_6)_2]$  and  $[\text{PMIM}][\text{FeP}_2\text{S}_6]$ . **S.R. Kang**, M.L. Major, **J.A. Cody**

**INOR 311.** Synthesis and characterization of thermotropic copper(II) heteroleptic metallomesogens with 2-ethylhexanoate ligands. **A. Beltran**, T.W. Clayton

**INOR 312.** Withdrawn.

**INOR 313.** Withdrawn.

**INOR 314.** Synthesis and characterization of hyper-coordinate silicon complexes. **K.J. Goosherst**, J.M. Fritsch

**INOR 315.** Progress toward the synthesis of potential AIE-active silafluorene derivatives. **H. Tracy**, J.L. Mullin, C.M. Prudente, **W. Lin**

**INOR 316.** Computational results of ADF modelling of AIE-active luminophores. **H. Tracy**, J.L. Mullin, C.M. Prudente, **T.W. Nelson**

**INOR 317.** Spectral characterization of potential AIE-active diphenylsilafluorene derivatives. **J.L. Mullin**, **H. Tracy**, C.M. Prudente, **N. Mathewson**

**INOR 318.** Withdrawn.

## Section G

Moscone Center  
Hall D

### Coordination Chemistry: Synthesis & Characterization

S. A. Koch, *Organizer*

5:30 - 7:30

**INOR 319.** Comparison of 2,2'-bipyridine and 1,10-phenanthroline ancillary ligands in ruthenium metal complexes containing the 4,4'-dihydroxy-2,2'-bipyridine ligand. **A.E. Kuhn**, D.J. Charboneau, M.J. Kasher, N.A. Piro, W.S. Kassel, T. Dudley, J.J. Paul

**INOR 320.** Synthesis, structure and catalytic applications towards *Cis-β*-ruthenium-salen complexes. **C. Lee**, C. Che

**INOR 321.** Synthesis of heterometallic 12-MC-4 complexes with ligand and counterion substitutions. **G. Van Trieste**, M. Zeller, C.M. Zaleski

**INOR 322.** Synthesis and luminescent study of lanthanide aluminum metallacrowns and metallacryptands. **J. Travis**, M. Zeller, C.M. Zaleski

**INOR 323.** Synthesis of novel mixed O, N, S donor ligands. **E. Jugovic**, C. Hamaker

**INOR 324.** NMR characterization of Ln-Mn-Na 12-metallacrown-4 complexes. **C. Atzeri**, V. Marzaroli, M. Quaretti, J. Travis, L. Di Bari, **C.M. Zaleski**, M. Tegoni

**INOR 325.** Reactivity trends dictated by structure that influence terminal ligand substitution of alkylidyne-capped trinuclear molybdenum(IV) clusters. **R.C. Brookins**, J.R. Houston

**INOR 326.** Theoretical and experimental investigation of Zn4Sb3 doped with metal elements. **K. Tsang**, R. Vellaisamy, R. Li

**INOR 327.** Synthesis and characterization of 1,3-diphenyl-6-aryl fulvene coordination complexes. **B.J. O'Connell**, S.K. Adas, G.J. Balaich, S.T. Iacono

**INOR 328.** Iron(II) pyridinediimine complexes with Lewis acids in the secondary coordination sphere. **K.T. Burns**, M. Delgado, J.M. Ziegler, J.D. Gilbertson

**INOR 329.** Binding modes of Ni-CO<sub>2</sub> adducts and their CO<sub>2</sub> activation. **C. Yoo**, Y. Kim, Y. Lee

**INOR 330.** Copper(II) reconfiguration of ligand conformations: Amplification and control of helicity by a single atom and solvent. **X. Duan**, T.M. Albelda, J.W. Canary

- INOR 331.** Effects of carrier ligands on cispaltin analog binding to cysteine and methionine. **A.C. Smith, K. Williams**
- INOR 332.** Analysis of S-Au-P bonding in phosphine gold(I) polyfluorothiolates: Backbonding and weak interactions. **G. Moreno-Alcantar, J.M. Guevara-Vela, H. Torrens**
- INOR 333.** Synthesis and structural characterization of chelating dinitrosyl iron complexes. **O. Becerra, L. Li**
- INOR 334.** Electron donor-acceptor properties of substituted pyridine ligands on *fac*-tricarbonylrhenium(II) systems. **J.R. Farrell, G. Kerins, K.L. Niederhoffer, L.A. Crandall, C.J. Ziegler**
- INOR 335.** Withdrawn.
- INOR 336.** Synthesis and characterization of multinuclear manganese carboxylate coordination compounds by incorporating the anion of 3-(dimethylamino)-1,2-propanediol. **M. Reagan, A. Saha**
- INOR 337.** Synthesis and characterization of novel sulfonamide ligands. **A. Penn, C. Hamaker**
- INOR 338.** Syntheses, structures, and electrochemical studies of N,N'-bis(alkylthiocarbamate) butane-2,3-dimine Cu(II) complexes as pendant alkoxy derivatives of Cu(ATSM). **N.S. Vishnosky, M.S. Mashuta, R.M. Buchanan, C.A. Grapperhaus**
- INOR 339.** Interactions between metal ions and ferrocenyl-histidine peptide conjugates. **A. Ferranco, H. Kraatz**
- INOR 340.** Synthetic control of coincidental formation of N-heterocyclic carbene-copper(II) complex within 2D and 3D metal-organic frameworks. **H. Lee, K. Kim, E. Lee**
- INOR 341.** Withdrawn.
- INOR 342.** Withdrawn.
- INOR 343.** Synthesis and characterization of transition metal complexes with cyclic boroguanidinate. **C.M. Donahue, S.R. Daly**
- INOR 344.** Low-symmetry subphthalocyanines as fluorescent probes and precursors for low symmetry phthalocyanines. **K. McAuliffe, E.R. Trivedi**
- INOR 345.** Synthesis, characterization, and growth kinetics of LiOH and KOH synthesized surface modified zinc oxide quantum dots. **A.D. Mena, D. Francis, D. McCall-Butler, C. Walter, J. Davis-Gunn, S. Cabrera, A.T. Royappa, P.P. Vaughan, A. Schrock, K.S. Molek**
- INOR 346.** Withdrawn.
- INOR 347.** Withdrawn.
- INOR 348.** Synthesis, characterization, and growth kinetics of NaOH and CsOH-synthesized surface-modified Zinc oxide quantum dots. **A.D. Mena, D. Francis, D. McCall-Butler, C. Walter, J. Davis-Gunn, S. Cabrera, A.T. Royappa, P.P. Vaughan, A. Schrock, K.S. Molek**
- INOR 349.** Synthesis and x-ray single crystal structure characterization of new platinum(II) complexes with O,N,N,O donor salen-type ligands. **G. Gonzalez Garcia, Y. Saldaña González, J. López J., A. González García**
- INOR 350.** Isomerization in gold(II) compounds with 1,2-bis(diphenylphosphine) ethylene and fluorinated thiolates. **G. Romo, G. Moreno-Alcantar, H. Torrens**
- INOR 351.** Withdrawn.
- INOR 352.** Molybdenum(IV)oxophthalocyanines for Szilárd-Chalmers production of <sup>99</sup>Mo. **V. Rosecker, P. Weinberger, J.M. Welch**
- INOR 353.** Study of multielectron redox chemistry through multiple bonded bimetallic asymmetric systems. **N. Rodriguez, D. Portillo, D. Villagran**
- INOR 354.** Synthesis and characterization of molybdenum bimetallic complexes with non-symmetric formamidate ligands. **I. Cervantes, D. Villagran**
- INOR 355.** Diverse electronic structure of ruthenium coordinated in situ generated redox active 1,2-dinitrosobenzene and 2-nitrosoanilido. **P. Ghosh, G.K. Lahiri**
- INOR 356.** Novel polycyclic thiones: Synthesis and complexation. **D. Tapu, R. Hooper, O. Kuykendall**
- INOR 357.** Synthesis and titration studies of arylazothioformamide ligands with various metals towards quantifying material purification. **N.A. Johnson, S.R. Wolfe, K.V. Waynant, J.G. Moberly, M.F. Roll**
- INOR 358.** Alterations of synthetic routes result in several new novel copper phenanthroline coordination complexes. **M. Wilk, S. Scott, K. Reyes, V. Nesterov, M. Omari**
- INOR 359.** Magnetic exchange between ions of the first transition series in dimeric compounds using naphthazarin as bridging ligand. **E.N. Jimenez-Alvarado, G. Valle-Bourrouet**
- INOR 360.** Synthesis and complexation of a new thione ligand. **P. Jean, B. Hunt, D. Tapu**
- INOR 361.** Functionalized pyridylphosphine ligands: Synthesis and coordination chemistry with late transition metals. **M. Bezpalko, W.S. Kassel**
- INOR 362.** Synthesis and characterization of heterobimetallic complexes supported by substituted trispyridylphosphines. **J. Leonard, A.K. Frampton, W.S. Kassel**
- INOR 363.** Synthesis and characterization of saccharinate complexes of dirhodium. **S.C. Haefner**
- INOR 364.** Synthesis and characterization of bimetallic ruthenium-platinum molecular cluster complexes with N-heterocyclic carbene complexes. **S. Etezadi, B. Captain**
- INOR 365.** Formation of radical anions on the dipyrin-1,9-dione scaffold of heme metabolites. **R. Gautam, E. Tomat**
- INOR 366.** Singlet fission-based frameworks. **R. Hernandez Sanchez, M. Trinh, D. Erdosy, X. Zhu, C.P. Nuckolls**
- INOR 367.** Synthesis and characterization of some dinitrosyl iron diphosphine compounds. **M.W. Jones, V. Acquah, N. Jourabchian, N. Khojandi**
- INOR 368.** Addition reactions of some dinitrosyl iron diphosphine complexes. **R. Manandhar, B. Alajmi, M.W. Jones**
- INOR 369.** Thiopyridazine based copper boratrane chemistry. **S. Holler, M. Tüchler, F. Belaj, K. Kirchner, N. Mösch-Zanetti**

## Section H

Moscone Center  
Hall D

## Undergraduate Research at the Frontiers of Inorganic Chemistry

## Organometallic Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

5:30 - 7:30

- INOR 370.** Examination of the relative impact of tris(diisopropylphosphinomethyl)phenylborate and tris(diphenylphosphinomethyl)phenylborate in salts of  $[M(CO)_3(PhBP_3)]$  ( $M = Cr, Mo, W$ ). **S. Senthil, J.T. Stephan, M.D. Storlie, M.L. Swift, V.G. Young, Jr., P.J. Fischer**
- INOR 371.** Bimetallic complexes of tris(diisopropylphosphinomethyl)phenylborate and tris(diphenylphosphinomethyl)phenylborate. **J.T. Stephan, S. Senthil, M.D. Storlie, M.L. Swift, V.G. Young, Jr., P.J. Fischer**
- INOR 372.** Macrocyclic osmium carbonyl complexes with dicarboxylate ligands. **D.M. Marolf, J.E. Johnstone, D.F. Zometa Paniagua, G.L. Powell**
- INOR 373.** Ligand development for iron catalyzed atom transfer radical polymerization. **M.R. Donley, S.E. Jenny, T. Dudley, D.L. Zubris**
- INOR 374.** New Insights into the reactivity of tris(triphenylphosphine)ruthenium(II) dichloride. **M. Aristov, K.B. Ghiassi, X.B. Powers, M.M. Olmstead, A.L. Balch**
- INOR 375.** Synthesis and reactivity of bis(NHC)borate titanium(IV) imido complexes. **M.G. Bernbeck, J.A. Ziegler, R.G. Bergman, J. Arnold**
- INOR 376.** Synthesis and crystal structure of (dippe)Pth(SnPh<sub>3</sub>). **A. Schmiechen, T.A. Mobley, I.A. Guzei**
- INOR 377.** Hydrogenation of carbon dioxide with ruthenium bis(pyridyl) isoindolene complexes. **J.L. Ciatti, J.B. Geri, N.K. Szymczak**
- INOR 378.** Synthesis and reactivity of Fe(TSPE)<sub>2</sub>HCl for natural gas purification. **B. Han, L.N. Zakharov, J.W. Gohdes**
- INOR 379.** Diiron carbonyl photochemical carbon monoxide releasing compound or PhotoCORM. **C. Stephenson, E. Duran, C.F. Works**
- INOR 380.** Late transition metal compounds with 1,1'-bis(phosphino)ferrocene ligands. **N. Lauricella, S. Hartlaub, C. Ryczek, A. Furneaux, J.D. Melton, N.A. Piro, W.S. Kassel, C. Nataro**
- INOR 381.** Substitution reactions of compounds containing 1,1'-bis(phosphino)ferrocene ligands. **N. Wamser, K. Cabrera, C. Nataro**
- INOR 382.** Assessing CMPO-based ligands for selective lanthanide extraction from acidic solution. **M. Patterson, O. Sode, S.M. Biros, E.J. Werner**
- INOR 383.** Synthesis and catalytic assessment of palladium complexes bearing bridging and pendant amine bis(phenolate) ligands. **E. Collins, B.J. Graziano, B. Wile**
- INOR 384.** B<sub>2</sub>(OR)<sub>2</sub> Reagents as tunable one-electron oxidants. **P. Chong, M. Messina, J.C. Axtell, Y. Wang, B. Upton, B.M. Hunter, S. Khan, J.R. Winkler, H.B. Gray, A. Alexandrova, H.D. Maynard, A.M. Spokoyin**

**INOR 385.** Synthetic and analytical studies of a series of organic quinone ligands for catalytic purposes. **J.N. Herring, W. Cross Lopez, S. Kruse, S.K. Hurst**

**INOR 386.** Dibenzo[a,j]xanthylum derivatives: Analytical studies and characterization. **W. Cross Lopez, J.N. Herring, S. Kruse, S.K. Hurst**

**INOR 387.** Novel phosphorous-based ligands for precious metal catalysts. **S. Kruse, J.N. Herring, W. Cross Lopez, S.K. Hurst**

**INOR 388.** Organophosphate alcoholysis by polymer-supported molybdenum peroxy complexes. **L. Miao, L.Y. Kuo**

**INOR 389.** Computational investigation of phosphonothioate-neurotoxin hydrolysis by monomeric MoO<sub>4</sub><sup>2-</sup>. **E. Bright, L.Y. Kuo**

**INOR 390.** Catalytic and electrochemical properties of pyridine substituted imidazolium salts and the corresponding NHC-M complexes. **R.J. Swails, S. Kariofilis, R. Cerbone, A. Conner, M. Sebald**

**INOR 391.** Synthesis of gold(III) complexes containing phenanthroline- or quinoline-based ligands. **K.M. Gilmore, R.L. Marley, J.E. Thompson, G.R. Donalson, A.R. McCormick, C.P. Owens, S.R. Weller, I. Nizalowski, A.L. Rheingold, D.R. Weinberg**

**INOR 392.** Comparison of C-H bond cleavage in a series of palladium carboxylate complexes. **I.L. Hunter, J. Jacobson, G.L. Bourne, A.N. Rainsberry, T. Kowalczyk, M.L. Scheuermann**

**INOR 393.** Synthesis and reactivity of molybdenum carbon dioxide complexes. **M.E. Graziani, X. Duan, L.J. Briggs, G.R. Lorzing, J.R. Vasta, M.A. Pogash, P.M. Graham**

## Section I

Moscone Center  
Hall D

## Switchable Catalysts

J. A. Byers, P. Diaconescu, *Organizers*

5:30 - 7:30

- INOR 394.** Redox switchable catalysts for the synthesis of block copolymers and crosslinked polymers. **K.R. Delle Chiaie, A.B. Biernesser, J.A. Byers**
- INOR 395.** Application of bulk electrolysis methods to redox-switchable catalysis. **S. Quan, J. Brosmer, P. Diaconescu**
- INOR 396.** Switchable di-zinc macrocycle catalysts: From highly active lactide polymerization to block copolymers. **A.A. Thevenon, C. Romain, M. Bennington, H. Davidson, A. White, S. Brooker, C.K. Williams**
- INOR 397.** Redox switchable copolymerization of cyclic esters and epoxides by a zirconium complex. **S. Quan, R. Zhang, P. Diaconescu**
- INOR 398.** Investigations into fast switching for the redox-switchable ring-opening polymerization of epoxides and lactides. **J.A. Kehl, J. Curley, M. Qi, J.A. Byers**
- INOR 399.** DFT studies of redox switchable copolymerization of cyclic esters and epoxides. **J. Wei, P. Diaconescu**
- INOR 400.** Ligand effect of a redox-controlled Al-based ROP catalyst. **A. Lai, P. Diaconescu**
- INOR 401.** Yttrium and indium alkoxide complexes as redox switchable catalysts. **S. Ro, A. Laughlin, P. Diaconescu**

INOR **402.** Polymerization through redox switchable catalysis. **M. Riffel, J. Wei, P. Diaconescu**

INOR **403.** Redox switchable polymerization reactions. **R. Dai, P. Diaconescu**

INOR **404.** Progress towards parameterizing flow reactor design for the efficient scale-up of photoredox catalysis methods. **T.M. Williams, A. Sun, C. Stephenson**

INOR **405.** Ferrocene-Chelating heteroscorpionate complexes in catalysis. **M. Abubekerov, P. Diaconescu**

INOR **406.** Hydroamination through redox-switchable catalysis. **Y. Shen, S.M. Shepard, P. Diaconescu**

### Section J

Moscione Center  
Hall D

**Gabor A. Somorjai Award for Creative Research in Catalysis: Symposium in honor of John E. Bercaw**

A. Hazari, N. Hazari, *Organizers*

5:30 - 7:30

INOR **407.** Understanding the mechanism of catalytically upgrading (bio)ethanol to butanol. **H. Aitchison, D. Wass, R. Wingard**

### Section K

Moscione Center  
Hall D

**Organometallic Chemistry: Applications to Materials & Polymer Science**

N. S. Radu, *Organizer*

5:30 - 7:30

INOR **408.** Single chain polyethylene nanocrystals. **M. Schutte, A. Godin, P. Kenyon, M. Krumova, I. Goettker Genannt, S. Mecking**

INOR **409.** Copolymerization of cyclohexene oxide with carbon dioxide catalyzed by dinuclear iron complex bearing a phenylene-bridged bis(tripodal  $N_2O_2$ ) ligand. **S. Zhan, Q. Jiang, Z. Song**

INOR **410.** Ethylene insertion polymerization in the presence of organic radicals - Exploiting mechanistic insights to influence microstructures. **S. Stadler, F. Ölscher, I. Göttker-Schnetmann, V. Monteil, S. Mecking**

INOR **411.** Model studies of catalytic olefin chain growth in the presence of biological impurities. **F.P. Wimmer, I. Göttker-Schnetmann, S. Mecking**

INOR **412.** Remote substituent effects in Ni(II)-catalyzed chain growth catalysis. **E. Schiebel, T. Wiedemann, I. Goettker Genannt, S. Mecking**

INOR **413.** Catalytic upgrading of fatty acids from renewable single cell oils. **J. Zimmerer, L. Williams, D. Pingen, S. Mecking**

INOR **414.** Development of coordinatively unsaturated, low-valent metal isocyanide MOFs. **A. Arroyave, D. Agnew, J.S. Figueroa**

INOR **415.** Withdrawn.

### Section L

Moscione Center  
Hall D

**Organometallic Chemistry: Applications to Organic Transformations**

N. S. Radu, *Organizer*

5:30 - 7:30

INOR **416.** Synthesis and characterization of organometallic compounds of coinage metals relevant to catalysis. **S. Martínez de Salinas Uzquiza, Á. Mudarra, M. Pérez-Temprano**

INOR **417.** Mechanistic studies on the oxidative addition of aryl halides to COBAL(Tl) complexes. **M. Perez-Temprano, J. San Jose, D. Gallego**

INOR **418.** Precision measurement of the C(sp<sup>3</sup>)-H activation kinetic isotope effect in a ruthenium-centered olefin metathesis catalyst via differential <sup>13</sup>C labeling. **C. Galvin, A. Johns, R.L. Pederson, J. Cannon, R.H. Grubbs, D.J. O'Leary**

INOR **419.** N-Heterocyclic Olefins (NHO) as ancillary ligands in catalysis and their application in transfer hydrogenation reactions. **J. E. A. M. Iglesias, N. Garcia Villalta, L.A. Oro**

INOR **420.** Iridium(III) bis-N-heterocyclic carbenes catalyzed transfer hydrogenation reactions. **N. Garcia Villalta, L.A. Oro, M. Iglesias, J. E. A.**

INOR **421.** Synthesis and reactivity of the aminovinyl carbenes toward alkynes in the Dötz reaction. **R.M. Padilla, J. Tamariz, F. Delgado, A. Feliciano**

INOR **422.** Reactivity of biaryl mono-phosphine complexes. **B.E. Silva, K. Sukert, H. Henriksen, D.B. Grotjahn**

### Section M

Moscione Center  
Hall D

**Undergraduate Research at the Frontiers of Inorganic Chemistry**

**Solid State & Materials Chemistry**

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

5:30 - 7:30

INOR **423.** Synthesis and characterization of metal-organic framework materials for aqueous heavy metal detection. **N.S. Morey, T.E. Bustamante**

INOR **424.** Singlet fission in a hybrid system with CdSe nanocrystals and functionalized chromophores. **D.S. Hamilton, X. Li, M.L. Tang**

INOR **425.** Design of Polyethylene Glycol (PEG)-grafted gold nanoparticles for biomedical applications. **J. Grundler, T. Lafferty, E. Park**

INOR **426.** Effects of seasonal variation of groundwater composition on gold nanoparticle surface chemistry. **E.R. Carlson, A.K. Bentley**

INOR **427.** Catalytic activity of ultrasmall copper nanoparticles. **A. Kale, G. Ferko, S.K. St Angelo**

INOR **428.** Dye encapsulation in metal-organic frameworks. **B.J. Johnson, K. Anderson, E. Goyke, K. O'Connor, N. Anderson, N. Beaulieu**

INOR **429.** Single step synthesis of Sb/Cu-doped ZnO and ZnS nanostructures on mica and n-GaN/Al<sub>2</sub>O<sub>3</sub> substrates by a simple vapor phase transport method. **H. Rivera-Marrero, T.M. Trad, M.J. Uddin**

INOR **430.** Withdrawn.

INOR **431.** Electrochemical characterization of manganese dioxide supercapacitors. **B.T. Hohman, R.S. Zickel, A.K. Bentley**

INOR **432.** Fabrication of hierarchical nanostructures for surface-enhanced Raman scattering biosensors. **K. Curtin, N. Wu**

INOR **433.** Understanding secondary structures of metal organic frameworks via tuning of ligand-ligand interactions. **M. Johnson, M.J. Voegtli, K. Tran, J. Jones, C. Bauer**

INOR **434.** Growth of microporous imidazolate frameworks in mild conditions via polymer-templating. **C. Bauer, K. Kwong, B. Doyle, H. Kim**

INOR **435.** Negative fingerprints development on reducing metal substrates. **N. Zuparova, L. Mullen, L. Bliss, A. Lafi, H. Abdou, A. Mohamed**

INOR **436.** Gold nanoparticle catalysts: Chemical properties and catalytic behavior. **M.N. Pollock, C. Peterson, C. Pursell, B.D. Chandler**

INOR **437.** Varying zinc sulfide nanocrystal shape, size, and surface chemistry to control copper doping via cation exchange. **H.M. Sizemore, K.N. Heupel, J.L. Jenkins**

INOR **438.** Ligand effects on the reactivity and synthesis of bimetallic molecular precursors for semiconductor materials. **J.L. Tennant, L.J. Maxton, A.W. Holland**

INOR **439.** Hydrogenation over metal oxide supported gold nanocatalysts. **A. Huther, H. Krause, C. Pursell, B.D. Chandler**

INOR **440.** Understanding growth behavior of alumina (Al<sub>2</sub>O<sub>3</sub>) and boehmite (AlO(OH)) nanoparticles. **M. Casillas, F.A. Fasulo, N.S. Bell, T.J. Boyle, L.J. Treadwell, B.A. Hernandez-Sanchez**

### Section N

Moscione Center  
Hall D

**ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler**

**Materials Chemistry of Solutions & Solids for a Sustainable Future**

J. C. Giordan, S. E. Hayes, B. L. Maddux, *Organizers*

5:30 - 7:30

INOR **441.** Film formation from peroxo hexatantalate precursors. **R.H. Mansergh, L.B. Fullmer, D. Park, J.M. Amador, M.D. Nyman, D.A. Keszler**

INOR **442.** Enhanced dehydroxylation and interface passivation of solution-processed dielectric metal oxide thin films using forming gas annealing. **J.C. Ramos, F. Luo, B.A. Hammann, D. Park, Y. Huang, S.E. Hayes, E.L. Garfunkel, D.A. Keszler**

INOR **443.** Amorphous niobium phosphate thin films from clusters in water. **D. Park, S. Goberna-Ferron, D. Fast, M. Dolgos, M.D. Nyman, D.A. Keszler**

INOR **444.** Aqueous solution-derived lanthanum zirconium oxide thin films on Self-Assembled Monolayers (SAMs). **M.C. Thomas, K.N. Woods, C. Page, Y.J. Chabal**

INOR **445.** Solution-processed low-refractive index alumina-based thin films for anti-reflective coatings. **C.K. Perkins, M.T. Gutierrez-Higgins, V. Gouliouk, R. Mansergh, D. Park, J.C. Ramos, C. Nanayakkara, Y.J. Chabal, D.A. Keszler**

INOR **446.** Improved synthesis of the elusive aluminum hydroxide octamer [Al<sub>8</sub>(OH)<sub>14</sub>(H<sub>2</sub>O)<sub>18</sub>]<sup>10+</sup> cluster. **E. Eitheim, C.K. Perkins, L.B. Fullmer, B. Fulton, C. Colla, A.F. Oliveri, D. Park, W.H. Casey, M.D. Nyman, T. Forbes, D.W. Johnson, D.A. Keszler**

INOR **447.** Understanding the effect of counterions on the hydrolysis of aqueous aluminum hydroxide clusters using QM computations. **L. Wills, J. Buchanan, C.K. Perkins, B. Fulton, D.A. Keszler, D.W. Johnson, P. Cheong**

INOR **448.** Reactions of hexatantalate and hexaniobate with hydrogen peroxide. **C.E. Malmberg, L. Wills, L.B. Fullmer, M.D. Nyman, P. Cheong**

INOR **449.** Proton-exchange rates on hydroxide bridges of mineral-like metal hydroxide clusters. **C.R. Fields, A. Oliveri, C. Colla, W.H. Casey, D.W. Johnson**

INOR **450.** Solution speciation of amphoteric early transition metal clusters. **D. Hutchison, M. Olsen, M.D. Nyman**

INOR **451.** Tin and alkyltin speciation on aqueous and nonaqueous solutions. **M. Olsen, D. Hutchison, S. Saha, M.D. Nyman, D.A. Keszler**

INOR **452.** Characterization of *n*-butyl-SnOOH for nanopatterning: Radiation behavior. **N. Kenane, D.A. Keszler**

INOR **453.** Characterization of *n*-butyl-SnOOH for nanopatterning: Solution precursor and film. **J.M. Amador, J.T. Diulus, M. Li, R.T. Frederick, S. Saha, E.L. Garfunkel, D.A. Keszler, G.S. Herman**

INOR **454.** Characterization of *n*-Bu-SnOOH: Solution precursor identity and film quality. **M. Li, J.M. Amador, R.T. Frederick, S. Saha, J.T. Diulus, D.A. Keszler, G.S. Herman, E.L. Garfunkel**

INOR **455.** Characterization of butyl tin photoresists with electron stimulated desorption and temperature programmed desorption. **R.T. Frederick, J.T. Diulus, S. Saha, J.M. Amador, M. Li, D.A. Keszler, E.L. Garfunkel, G.S. Herman**

INOR **456.** Withdrawn.

INOR **457.** Glass formation in basic halogenides of zirconium and hafnium. **J.A. Sommers, J.M. Amador, E.C. Fong, D.A. Keszler**

INOR **458.** Light emission from an electrical conductor. **V. Gouliouk, K.A. Stewart, R.G. Manley, D.G. Enicks, J.F. Wager, D.A. Keszler**

INOR **459.** Design meets nature: New tetrahedrite superabsorbents. **J. Heo, D.A. Keszler**

INOR **460.** Photochemical reaction coordinates of metal-organic complexes in solution revealed by femtosecond electronic and Raman spectroscopy. **L. Zhu, S. Saha, Y. Wang, N.D. Rozanov, D.A. Keszler, C. Fang**

INOR **461.** Effects of Organic Components on Novel Hybrid Organic-Inorganic Structures. **B. Barraza, R. Seshadri**

## Section O

Mosccone Center  
Hall D

## Sustainability in Electrocatalytic Fuel &amp; Chemical Production

Cosponsored by CATL

L. A. Berben, J. L. Dempsey, *Organizers*

5:30 - 7:30

INOR **462.** Silicon-based photoelectrochemical cell for enzymatic CO<sub>2</sub> conversion. J. Ko, E. Son, S. Kuk, C. Park

INOR **463.** Towards formic acid oxidation by surface attached Ni(P<sub>2</sub>N<sub>2</sub>)<sub>2</sub> complexes. F. Brunner, C.P. Kubiak

## Section P

Mosccone Center  
Hall D

## F. Albert Cotton Award in Synthetic Inorganic Chemistry: Symposium in honor of Pingyun Feng

Cosponsored by WCC

X. Bu, P. Yang, Q. Zhang, D. Zhao, N. Zheng, *Organizers*

5:30 - 7:30

INOR **464.** Constrained Volume self-assembly of organic-inorganic nanocomposites. R. Liu

INOR **465.** Facile synthesis of nanosheet AuPd/g-C<sub>3</sub>N<sub>4</sub> composites for photocatalytic H<sub>2</sub> evolution under visible-light irradiation. L. Ge, C. Han

INOR **466.** Photochemical method in preparing atomically dispersed catalysts. P. Liu, Y. Zhao, G. Fu, N. Zheng

INOR **467.** Design of (metallo)porphyrin-based coordination frameworks for electrochemical studies. Q. Lin

INOR **468.** Dichalcogenide ligand exchange on germanium nanoparticles. K.A. Newton, A.L. Holmes, S. Kauzlarich, W. Blacklock

INOR **469.** Aromatic guest molecules mediated synthesis of porous homochiral camphorate frameworks. J. Jin, X. Zhao, X. Bu

INOR **470.** Nanoporous carbon derived from a functionalized metal-organic framework as highly efficient oxygen reduction electrocatalyst. Y. Wang, P. Feng

INOR **471.** Applications of heterometallic MOFs in gas adsorption, separation and biodiesel preparation. Y. Wang, Q. Zhai, P. Feng

INOR **472.** Chirality in atomically precise noble nanoclusters. J. Yan, B.K. Teo, N. Zheng

INOR **473.** Multivariable modular design of pore space partition. X. Zhao, E.T. Nguyen, X. Bu, P. Feng

INOR **474.** Rational tuning of structure type in open framework chalcogenide. X. Chen, X. Bu, P. Feng

INOR **475.** Crystallography in MOF: Ordering guest molecules by coordination assisted orientation control. L. Wang, S. Cohen

INOR **476.** Electrochemiluminescence behaviors featuring the point defects of supertetrahedral chalcogenide nanocluster. Y. Liu

INOR **477.** Metal-free peralkylation of the closo-hexaborate dianion, B<sub>6</sub>H<sub>6</sub><sup>2-</sup>. J. Axtell

INOR **478.** Synthetic design of homochiral metal-organic frameworks. E.T. Nguyen, X. Zhao, X. Bu

INOR **479.** Novel metal organic frameworks through tetrameric magnesium clusters. A. Hong, X. Zhao, A. Hong, X. Bu

## Section Q

Mosccone Center  
Hall D

## Nanoscience

B. G. Trewyn, *Organizer*

5:30 - 7:30

INOR **480.** Synthesis, characterization, and application of dendrimer coated silica nanoparticles as fluorescent chemosensors. H. Deuermeyer, A. Luhrs, L.D. Margerum

INOR **481.** Ag-TiO<sub>2</sub> hybrid nanoparticles as active photocatalyst for hydrogen evolution. S. Varapragasam, S. Mia, C. Balasanthiran, R.M. Rioux, J.D. Hoefelmeyer

INOR **482.** Gold nanorods with a photoresponsive azobenzene shell via *in-situ* reduction of 4-nitrobenzenediazonium tetrafluoroborate. D.H. Wang, K. Park, R.A. Vaia, L. Tan

INOR **483.** Lead chalcogenide quantum dots: Measurements on a standardized sample. A. Marshall, J.C. Johnson, J. Luther, A.F. Fidler, V.I. Klimov, M.C. Beard

INOR **484.** Advantages of naked Ru<sup>0</sup> surfaces in catalysis and electrocatalysis. S. Anantharaj, S. Kundu

INOR **485.** Toward large-area Surface Enhanced Raman Spectroscopy (SERS) sensors: Fabrication of patterned, nanostructured surfaces. W. Mihalyi-Koch, A. Shadrav, A. Oh, F. Dawood

INOR **486.** Fabrication of highly nanostructured electrodes. P. Kharel, A. Talsania, D. Cahill, F. Dawood

INOR **487.** Carbon-based nanomaterials applications in the photo-triggered release of small molecule bioregulators. P. Huang, X. Zhao, X. Dang, N. Zheng, P.C. Ford

INOR **488.** Fundamental differences in the cation exchange behaviors of cadmium- and lead chalcogenide quantum dots. X.A. Aguilar, C. Lin, A.L. Morris, S.E. Benjamin, P.G. Van Patten

INOR **489.** Nanotethering to cadmium selenide for solar applications. D. Jackson, M.E. Hagerman, J.D. Kehlbeck

INOR **490.** Studying the surface effects of PEDOT:PSS on nanoporous LiMn<sub>2</sub>O<sub>4</sub>. V. Basile, B. Lesel, S.H. Tolbert

## Deposition &amp; Etching of Nanostructures

## Posters

Sponsored by COLL, Cosponsored by INOR

## MONDAY MORNING

## Section A

Mosccone Center  
Gateway Ballroom 103/104

## ACS Awards in Inorganic Chemistry: Plenary Session

S. A. Koch, N. S. Radu, *Organizers*

J. D. Protasiewicz, *Organizer, Presiding*

8:15 INOR **491. Award Address**

(ACS Award for Distinguished Service in the Advancement of Inorganic Chemistry sponsored by Strem Chemicals, Inc.). Copper-Oxygen complexes relevant to enzyme intermediates. W.B. Tolman

8:50 INOR **492. Award Address** (Harry Gray

Award for Creative Work in Inorganic Chemistry by a Young Investigator sponsored by the Gray Award Endowment). Rational development of pincer supported iron complexes for the reversible hydrogenation of carbon dioxide to formic acid and methanol. N. Hazari, W.H. Bernskoetter

9:20 INOR **493. Award Address**

(ACS Award in Inorganic Chemistry sponsored by Aldrich Chemical Company, LLC). Amazing nonheme high-valent iron-oxo landscape. L. Que

9:55 Intermission.

10:10 INOR **494. Award Address**

(ACS Award in Organometallic Chemistry sponsored by The Dow Chemical Company Foundation). Hydrogenase- and ACS-inspired bioorganometallic chemistry. M.Y. Darensbourg

10:40 INOR **495. Award Address**

(F. Albert Cotton Award in Synthetic Inorganic Chemistry sponsored by the F. Albert Cotton Endowment Fund). Crystalline semiconducting and porous materials: Synthesis, properties, and applications. P. Feng

11:10 INOR **496. Award Address** (Gabor

A. Somorjai Award for Creative Research in Catalysis sponsored by the Gabor A. & Judith K. Somorjai Endowment Fund). Mechanistic studies of 1-alkene trimerization and polymerization with organo-transition metal catalysts. J.E. Bercaw

11:40 INOR **497. Award Address**

(ACS Award in the Chemistry of Materials sponsored by E. I. du Pont de Nemours & Co.). Inorganic materials chemistry and innovation. D.A. Keszler

## Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Sponsored by NUCL, Cosponsored by INOR

## Multicenter Molecules &amp; Coupled Molecular Assemblies: Synthesis, Characterization &amp; Theory

## Synthesis

Sponsored by PHYS, Cosponsored by INOR

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Frontiers in Analytical &amp; Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>1</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>1</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>1</sup> and WCC

## Support &amp; Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG<sup>1</sup>

## Light-Driven Chemistry: Photoelectrochemistry &amp; Photocatalysis

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

## MONDAY AFTERNOON

## Section A

Mosccone Center  
2011

## Gabor A. Somorjai Award for Creative Research in Catalysis: Symposium in honor of John E. Bercaw

A. Hazari, *Organizer*

N. Hazari, *Organizer, Presiding*

1:30 Introductory Remarks.

1:35 INOR **498.** Stoichiometric and catalytic reactions mediated by water-soluble host-guest supramolecular systems. R.G. Bergman

2:00 INOR **499.** Organometallic chemist's nightmare: Chemistry in air, water, and heterogeneous environments. L. Do, A. Ngo, S. Bose, L. Yang

2:25 INOR **500.** Polymerization catalysts that benefit from dynamic ligand behavior. J.A. Byers, N.K. Szymczak, J.A. Kehl, A. Kaur, C.M. Manna, K.T. Tseng, L.V. Hale, A.B. Biernesser

2:50 INOR **501.** Biologically inspired clusters: Synthetic control of structure and effects on reactivity. T. Agapie

3:15 Intermission.

3:25 INOR **502.** Metal oxo cubanes as catalytic centers for oxygen evolution. T.D. Tilley, A. Nguyen

3:50 INOR **503.** Versatile redox chemistry of nanoscale cerium oxide. J.M. Mayer, D. Damatov, S. Laga, J. Peng

4:15 INOR **504.** One and two dimensional cobalt dithiolene frameworks for artificial photosynthesis. S.C. Marinescu, A.J. Clough, C.A. Downes

4:40 INOR **505.** From single atom based-catalysts to nanoparticles. E. Bunel

5:05 INOR **506.** Recent advances in olefin metathesis. R.H. Grubbs

## Section B

Mosccone Center  
2011

## Celebrating 60 Years of the Division of Inorganic Chemistry

## Former Young Investigators

M. J. Clarke, D. C. Crans, *Organizers*

J. R. Long, J. D. Protasiewicz, N. Radu, *Presiding*

1:30 Introductory Remarks.

1:35 INOR **507.** Multi-electron redox chemistry: Redox load distributions in cluster cores. T. Betley

2:05 INOR **508.** Metals and immunity: Explorations of a biological hexahistidine site. E.M. Nolan

2:35 INOR **509.** Plasmon enhanced solar steam generation and desalination. J. Zhu

**3:05 INOR 510.** Single-molecule magnets based on oligo- and polynuclear lanthanide complexes. E. Mazarakioti, J. Tang, G. Christou, **T. Stamatatos**

**3:35** Intermission.

**3:50 INOR 511.** Filled tetrahedral semiconductors: Solution phase synthesis of low dimensional intermetallics. J. Vela-Becerra

**4:20 INOR 512.** Graphite-Conjugated catalysis. Y. Surendranath

**4:50 INOR 513.** Synthesis, characterization, and reactivity of redox active 2,5-diminopyrrole ligands and complexes. J.S. Anderson, A.J. McNeece

**5:20 INOR 514.** Responsive chemical tools for COS and H<sub>2</sub>S delivery. M.D. Pluth

## Section C

Moscone Center  
2016

### Undergraduate Research at the Frontiers of Inorganic Chemistry

#### Solid State & Materials Chemistry

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*  
S. Poland, *Presiding*

**1:30 INOR 515.** Synthesis and properties of transition metal carbide bucky-paper. K.E. Madsen, B.M. Leonard

**1:50 INOR 516.** Super robust and water-soluble gold nanoparticles for biomedicine. L. Mullen, L. Bliss, N. Zuparova, B. Atallah, H. Abdou, A. Mohamed

**2:10 INOR 517.** Using carboxylate ligand sterics to control copper availability during cation exchange to yield Cu-doped ZnS nanocrystals. K.N. Heupel, H.M. Sizemore, J.L. Jenkins

**2:30 INOR 518.** Characterization of silver (I) and engineered Silver Nanoparticle (AgNP) binding to apo and metal reconstituted zinc finger peptides. Z. Amaris, G.A. Park, M. Eiken, K.E. Splan, K. Wheeler

**2:50** Intermission.

**3:05 INOR 519.** Coordination compounds and hybrid materials containing the hydrtris(3,5-dimethyl-1,2,4-triazolyl)borate ligand. E.T. Roberts, K.L. Salvatore, B.C. Chan, **B.A. Reisner**

**3:25 INOR 520.** Synthesis of UO<sub>2</sub>-Zrincaloy thin films to address pellet-cladding debonding. B. Klamm, R.F. Hess, T.J. Boyle, K. Hattar, R. Dingreville, D. Perales

**3:45 INOR 521.** Advances in manganese- and cobalt-based nanostructures for oxygen/hydrogen electrocatalysis. J.A. Vigil, T.N. Lambert

**4:05 INOR 522.** Understanding titanium and sulfur speciation in titanium trisulfide electrodes using x-ray spectroscopy. C. Wilson, V. Doan-Nguyen, J.D. Bocarsly, A. Lanzirrotti, R. Seshadri

**4:25 INOR 523.** Synthesis of quantum dot bioimaging agents to study bacteriophage. S. Mendoza, M. McKeown, M. Casillas, C. Stevens, J. Pelowitz, A. McBride, C. Ashley, B.A. Hernandez-Sanchez

## Section D

Moscone Center  
2018

### ACS Awards: Symposium in honor of Lawrence Que, Jr. & William B. Tolman

P. L. Holland, M. J. Maroney, *Organizers*,  
*Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 524.** Bioinorganic aspects of nitrogen oxide chemistry with heme and/or copper complexes. K.D. Karlin

**2:00 INOR 525.** Synthetic chemistry as a window into biology: Architectural complexity at the molecular level. A. Borovik

**2:25 INOR 526.** Cleaving and forming C-H bonds by moving protons and electrons. J.M. Mayer, J. Darcy, T. Markle, S. Kolmar

**2:50 INOR 527.** Oxygen activation and C-H bond cleavage by metalloenzymes and metalloporphyrins. J.T. Groves

**3:15** Intermission.

**3:30 INOR 528.** Bioinorganic spectroscopy: Activating metal sites for biological electron transfer. E.I. Solomon

**3:55 INOR 529.** Insights into the electronic structure of iron sulfur clusters using two-dimensional x-ray spectroscopy. S. DeBeer

**4:20 INOR 530.** Bio-inspired bimetallic complexes for activating H<sub>2</sub> and CO<sub>2</sub>. C. Lu, R. Cammarota, S. Desai, J. Xie, K. Vogiatzis, D. Pahlis, L. Gagliardi

**4:45 INOR 531.** Tracking mobile zinc in the brain - new probes, new biology. S.J. Lippard

## Section E

Moscone Center  
2020

### Inorganic Nanomaterials: Structure & Function in 0, 1 & 2 Dimensions

*Financially supported by Chemistry of Materials*

K. R. Kittilstved, *Organizer*

E. J. McLaurin, *Organizer, Presiding*

A. Greytak, *Presiding*

**1:30 INOR 532.** Chemically tunable 2D layered materials. K.J. Koski

**2:00 INOR 533.** Solution-Phase approaches to indium nitride nanomaterials: Chemical insights on a new mechanism. Y. Chen, Z. Liu, N.S. Karan, R. Beaulac

**2:30 INOR 534.** Linking the forward and reverse vapor-liquid-solid mechanisms in metal oxide nanostructures. L. Yu, B.M. Hudak, A.J. Riddle, S. Wang, Y. Chang, **B. Guiton**

**3:00** Intermission.

**3:15 INOR 535.** Patterns and plasmonics: Nanopatterning of silicon surfaces via directed self-assembly. F. Liu, E. Lubber, B. Olsen, J.M. Buriak

**3:45 INOR 536.** Responsive and reconfigurable materials from dimensionally confined colloidal nanocrystal assemblies. B. Helms, Z. Zhang, E. Goldfine, C. Huang, T. Russell

**4:15 INOR 537.** Nanomaterial surfaces in 0, 1, and 2 dimensions: Results from chromatography and functional imaging. A.B. Greytak

## Section F

Moscone Center  
2022

### Sustainability in Electrocatalytic Fuel & Chemical Production

*Cosponsored by CATL*

L. A. Berben, J. L. Dempsey, *Organizers*

C. A. Caputo, *Presiding*

**1:30 INOR 538.** Sustainable solar-to-fuels and solar-to-fertilizer production. D.G. Nocera

**1:55 INOR 539.** Reducing overpotential and maintaining high rates in nickel electrocatalysts for H<sub>2</sub> production. M.J. O'Hagan, A.P. Cardenas, A.M. Appel, R. Bullock, E.S. Wiedner

**2:20 INOR 540.** Unravelling PCET pathways of the hydride formation step in cobalt complexes relevant to solar fuel production. N. Elgrishi

**2:40 INOR 541.** Electrocatalytic reduction of CO<sub>2</sub> using cyclopentadienone iron complexes. R. Francke, A. Rosas-Hernández, H. Junge, M. Beller, M. Roemelt

**3:05 INOR 542.** Earth-abundant metal complexes with flexible ligand coordination for catalytic proton and carbon dioxide reduction. S. Saund, K. Ng, S. Goldschmidt, V. Thoi

**3:30** Intermission.

**3:45 INOR 543.** Variable temperature spectral and electrochemical studies of carbon dioxide reduction by [Fe<sub>4</sub>N(CO)<sub>12</sub>]-: Mechanistic investigations. A. Taheri, L.A. Berben

**4:05 INOR 544.** Bioinorganic approaches to solar-to-chemical conversion: Merging molecular catalysis with materials and biology. C.J. Chang

**4:30 INOR 545.** Catalytic production of hydrogen and reduction of carbon dioxide by dirhodium(II,II) complexes. C. Turro, K.R. Dunbar

**4:55 INOR 546.** Homogeneous water oxidation and CO<sub>2</sub> reduction: Catalysts and mechanisms. Y. Xie, D.W. Shaffer, D. Szalda, J.J. Concepcion

## Section G

Moscone Center  
2024

### F. Albert Cotton Award in Synthetic Inorganic Chemistry: Symposium in honor of Pingyun Feng

P. Yang, Q. Zhang, D. Zhao, N. Zheng, *Organizers*

X. Bu, *Organizer, Presiding*

**1:30 INOR 547.** Mo-S Complexes based on [MoO(S<sub>2</sub>)<sub>2</sub>] motif as MoS<sub>x</sub>-inspired electrocatalysts for hydrogen production. Y. Wu, B. Garrett

**1:50 INOR 548.** Compositional, structural, and geometrical design of crystalline porous materials. X. Bu

**2:10 INOR 549.** Controlled encapsulation of catalysts into metal-organic frameworks. C. Tsung

**2:30 INOR 550.** Controlling the structures and properties of gold/silver nanoclusters with unconventional protecting ligands. Q. Wang

**2:50 INOR 551.** Surfactant-thermal method to prepare crystalline inorganic materials. Q. Zhang

**3:10** Intermission.

**3:40 INOR 552.** Crystal engineering of titanium-oxo clusters. J. Zhang

**4:00 INOR 553.** Stabilization of isolated metal chalcogenide nanoclusters and their electrocatalytic applications for hydrogen evolution reaction and oxygen reduction reaction. T. Wu

**4:20 INOR 554.** Beyond multimetallic nanoparticles for catalysis: A general approach to stable high-index faceted multimetallic nanowires. X. Huang

**4:40 INOR 555.** Metal nanoclusters as a model system for investigating the surface structure and catalysis of metal nanoparticles. J. Yan, L. Ren, P. Yuan, L. Huang, N. Zheng

## Section H

Moscone Center  
3000

### Organometallic Chemistry: Applications to Materials & Polymer Science

N. S. Radu, *Organizer*

A. Dudnik, *Presiding*

**1:30 INOR 556.** Chiral Phospha[n]ferrocenophanes: New metallopolymers through ring-opening polymerizations. M. Cao, S. Sadeh, J. Quail, J. Müller

**1:50 INOR 557.** Asymmetric hybrid salen/phosphasalen initiators for the iso-selective ring-opening polymerisation of rac-lactide. C. Coleman, C.K. Williams, N.J. Long

**2:10 INOR 558.** Redox control of aluminum ring-opening polymerization: A combined experimental and DFT investigation. J. Wei, P. Diaconescu

**2:30 INOR 559.** Synthesis of (salen)In(OPh)(OtBu)<sub>2</sub> catalyst, and redox-switchable ring-opening polymerization of ε-caprolactone and other cyclic esters. S. Quan, R. Zhang, P. Diaconescu

**2:50 INOR 560.** Highly robust Pd(II) α-dimine catalysts for olefin (co) polymerization. S. Dai, C. Chen

**3:10 INOR 561.** Redox-controlled olefin (Co)polymerization catalyzed by ferrocene-bridged phosphine-sulfonate palladium complexes. M. Chen, C. Chen

**3:30 INOR 562.** Supported lanthanide catalysts: Role of the grafting on the stereochemical outcome of different polymerization reactions. I. Del Rosal, L. Maron

**3:50 INOR 563.** Investigation of a unique mechanism for the production of high molecular weight polyethylene using bis(pyridylimino)isoindolate iron(II) catalysts. J.A. Kehl, K.T. Tseng, L.V. Hale, A.B. Biernesser, N.K. Szymczak, J.A. Byers

**4:10 INOR 564.** Mechanistic studies of Pd(II)-catalyzed copolymerization of ethylene and vinylalkoxysilanes: Evidence for a β-silyl elimination chain transfer mechanism. Z. Chen, W. Liu, O. Daugulis, M. Brookhart

**4:30 INOR 565.** Non-chiral lithium aluminate reagents for the determination of enantiomeric excess of chiral alcohols. R. Garcia, D. Wright

**4:50 INOR 566.** Withdrawn.

**5:10 INOR 567.** Aqueous polyethylene nanocrystal dispersions from catalytic polymerization. P. Kenyon, A. Godin, S. Mecking

## Section I

Mosccone Center  
3010

**2017 Priestley Medalist: Symposium in honor of Tobin J. Marks**
**Supported Organometallics & Heterogeneous Catalysis**

Cosponsored by PMSE

Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University

A. Facchetti, T. Lohr, *Organizers*

M. Neurock, *Presiding*

**1:30 Introductory Remarks.**

**1:35 INOR 566.** Tuning nanoparticle alloys to enhance C-H bond activation for the catalytic dehydrogenation of ethane. V. Cybulskis, J.R. Gallagher, H. Tsent, B. Bukowski, Z. Wu, E.C. Wegener, A.J. Kropf, B. Ravel, J.P. Greeley, F. Ribeiro, J. Miller

**2:05 INOR 569.** Hydrogen and formaldehyde generation from bio-derived alcohols using supported molybdenum-oxo catalysts. T. Lohr, A. Mouat, M. Defferro, P.C. Stair, T.J. Marks

**2:35 INOR 570.** Integration of the three fields of catalysis: Heterogeneous, homogeneous, and enzyme. G.A. Somorjai

**3:05 INOR 571.** Catalysts synthesized by organometallic surface chemistry. P.C. Stair

**3:35 Intermission.**

**3:45 INOR 572.** Surface structural-chemical characterization of supported single-site organometallic catalysts. M. Defferro

**4:15 INOR 573.** Metallacyclobutane structure influence on the production of propylene via olefin metathesis over surface organometallic chemistry derived catalysts. C.P. Nicholas, M. Taoufik

**4:45 INOR 574.** Metal-organic Frameworks for Sustainable Catalysis. W. Lin

## Section J

Mosccone Center  
3012

**ACS Award in Organometallic Chemistry: Symposium in honor of Marcetta Y. Darensbourg**

D. Mason, C. G. Riordan, *Organizers*

M. R. Mackiewicz, X. Zhao, *Presiding*

**1:30 INOR 575.** Carbene-stabilization of elusive main group oxides. G.H. Robinson

**1:55 INOR 576.** On the contents of metal-seamed metal organic nanocapsules. J.L. Atwood, C. Zheng, A. Rathnayake, R. Patil, K. Sildigar, K. Feaster, C. Barnes, P. Atwood, D.A. Atwood

**2:20 INOR 577.** Exploiting the non-innocence of antimony ligands in organometallic catalysis. F.P. Gabbai

**2:45 INOR 578.** Dinitrosyl Iron Complexes (DNICs): Synthesis and spectroscopic characterization toward unveiling the catalytic roles of DNICs. W. Liaw

**3:10 INOR 579.** Platinum reagents modified for click chemistry: Towards high-throughput analysis of platinum drug targets. A.D. Moghaddam, K. Plakos, J.D. White, R. Cunningham, E. Reister, E. Sutton, M.M. Haley, V. DeRose

**3:35 Intermission.**

**3:50 INOR 580.** C-H activation by a discrete superoxonickel complex. C.G. Riordan

**4:15 INOR 581.** Pyridol derived N-heterocyclic amines and applications in coordination chemistry, catalysis, and medicine. K.N. Green, S.M. Brewer, H.M. Johnston, M.E. Burnett

**4:40 INOR 582.** Fun with devil's copper and the odd oxidations of sulfur. P.J. Farmer, M. Kumar

**5:05 INOR 583.** Hydrogenase/epoxide-CO<sub>2</sub> catalysis: Killing two birds with one cat. D.J. Darensbourg

## Section K

Mosccone Center  
3001

**Switchable Catalysts**

P. Diaconescu, *Organizer*

J. A. Byers, *Organizer, Presiding*

B. P. Fors, *Presiding*

**1:30 Introductory Remarks.**

**1:35 INOR 584.** Regulating polymer stereomicrostructures and polymerization activity and chemoselectivity by ion pairs and Lewis pairs. E.Y. Chen

**2:05 INOR 585.** Externally controlled chemistry: New methods for modulating polymerization and other transformations. C. Bielawski

**2:35 INOR 586.** Potential applications of switchable catalysts for sustainable energy and water production. M.A. Reynolds

**3:05 Intermission.**

**3:20 INOR 587.** Photocontrolled Cationic Polymerizations. B.P. Fors

**3:50 INOR 588.** Switchable polymerization catalysts: Selective block copolymers from monomer mixtures. C.K. Williams

**4:20 INOR 589.** Redox switchable catalysis applied to ring opening polymerization. P. Diaconescu

**4:50 INOR 590.** Mechanistic trends from computational chemistry for the design of redox switchable catalysts. T. Cantat

## Section L

Mosccone Center  
3003

**Organometallic Chemistry: Synthesis & Characterization-Early Transition Metals**

N. S. Radu, *Organizer*

T. K. Hollis, *Presiding*

**1:30 INOR 591.** Extreme  $\pi$ -loading as a design element for accessing imido reactivity: CCC-NHC Ta bis(imido) pincer complex synthesis and reactivity in oxidative amination. T.R. Helgert, J.A. Denny, G.M. Lang, G. Liang, C.E. Webster, T.K. Hollis

**1:50 INOR 592.** Diphenylacetylene reduction mediated by rare-earth naphthalene complexes supported by a ferrocene diamide ligand. J.L. Brosmer, W. Huang, P. Diaconescu
