**2:10 INOR 593.** Ring-opening reactions of quinoline and isoquinoline with a low-valent titanium alkyl complex. T. Kurogi, M. Baik, D.J. Mindiola

**2:30 INOR 594.** Probing the stability & reactivity of early first-row transition metal centers in low-coordinate environments supported by silylaryl-amido ligands. I.C. Cai, T.D. Tilley

**2:50 INOR 595.** Oxidative group transfer reactions on macrocyclic N-heterocyclic tetracarbene chromium complexes. G. Elpitiya, D.M. Jenkins

**3:10 INOR 596.** Synthesis of benzoylphosphine via insertion of sodium phosphoethynolate (Na[OCp]) into a zirconium benzyne complex. J. Kieser, R.J. Gilliard, H. Grützmacher, J.D. Protasiewicz

**3:30 INOR 597.** Hydroboration reactivity of niobium bis(NHC)borate complexes. J.A. Ziegler, R.G. Bergman, J. Arnold

**3:50 INOR 598.** Planar Ti<sub>2</sub>P<sub>2</sub> core assembled by reductive decarbonylation of  $\pi$ -O-C $\equiv$ P. L. Grant, B. Pinter, B. Manor, H. Grützmacher, D.J. Mindiola

**4:10 INOR 599.** Computational study of extreme  $\pi$ -loading and imido reactivity in CCC-NHC Ta bis(imido) pincer complexes. C.E. Webster, G. Liang, T.R. Helgert, J.A. Denny, G.M. Lang, T.K. Hollis

**4:30 INOR 600.** Probing Group 4 mixed ligand (Cp, halide, alkoxide) complexes for multiple bonding character and catalytic activity. N.C. Boyde, T.P. Hanusa

**Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory**
**Experimental Characterization**

Sponsored by PHYS, Cosponsored by INOR

**Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark**

Sponsored by NUCL, Cosponsored by INOR

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC

**ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer**

Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY

**Support & Activator Effects on Metal Mediated Polymerization**

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG<sup>†</sup>

**Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis**
**Mechanistic Studies of Catalysis in Photocatalytic & Photoelectrodes**

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

**Undergraduate Research Posters Inorganic Chemistry**

Sponsored by CHED, Cosponsored by INOR and SOCED

## MONDAY EVENING

## Section A

Mosccone Center  
Hall D

**Sci-Mix**

S. A. Koch, *Organizer*

**8:00 - 10:00**

220-222, 224-226, 229-233, 236, 244, 273, 275-276, 280, 288, 293, 308-309, 319, 323, 328-329, 332-334, 336, 358-359, 362, 365, 379, 382, 384, 388, 390, 394, 396-397, 408-414, 416-418, 422, 424, 429, 440-442, 445, 455, 463, 466, 472, 475, 477, 480, 485-486. See previous listings.

818, 820, 838-843, 846-847, 850-851, 858, 860-864, 880-881, 884, 896, 898, 902-906, 908, 918, 922, 924, 927, 931, 934, 937-938, 941, 947, 949, 952, 954, 961, 967, 968-969, 972, 976, 979-980, 982, 984, 987, 990, 1001-1002, 1004, 1006-1008, 1016-1019, 1021, 1024-1026, 1032, 1034, 1037-1041, 1043-1047, 1051, 1056-1057, 1061-1063, 1066, 1071-1072, 1232. See subsequent listings.

## TUESDAY MORNING

## Section A

Mosccone Center  
2009

**Gabor A. Somorjai Award for Creative Research in Catalysis: Symposium in honor of John E. Bercaw**

N. Hazari, *Organizer*

A. Hazari, *Organizer, Presiding*

**8:30 INOR 601.** Thermodynamic efficiency, chemoselectivity and turnover frequency in chemical and electrochemical catalysis: Synergistic principles for catalyst development and optimization. S.S. Stahl

**8:55 INOR 602.** Recent advances in Ti-catalyzed nitrene transfer reactions. I. Tonks, E. Beaumier, H. Chiu, Z.W. Davis-Gilbert, X. See, A.C. Wotal

**9:20 INOR 603.** Selective indium and zinc catalysts for controlled polymerization of cyclic esters. P. Mehrkhodavandi, T. Ebrahimi, L. Chile, A. Kremer, S. Hatzikiriaos

**9:45 INOR 604.** Selective catalytic trimerization of alkenes. J.A. Labinger

**10:10 Intermission.**

**10:25 INOR 605.** Cobalt-catalyzed methods for the polyborylation of hydrocarbons. P.J. Chirik, N. Palmer, S. Krautwald

**10:50 INOR 606.** Group 4 metal complexes for the formation of block copolymers. P. Diaconescu

**11:15 INOR 607.** Mechanism of formic acid dehydrogenation by a diiridiumtrihydride catalyst. J. Celaj, Z. Lu, E.A. Kedzie, T.J. Williams

**11:40 INOR 608.** Metal-oxos in chemistry and biology. H.B. Gray

**12:05 Concluding Remarks.**

## Section B

Moscone Center  
2011

**Celebrating 60 Years of the Division of Inorganic Chemistry**

**Award Winners**

M. J. Clarke, *Organizer*

D. C. Crans, *Organizer, Presiding*

K. Bowman-James, K. N. Raymond, *Presiding*

**8:00** Introductory Remarks.

**8:05 INOR 609.** Synthesis of multinary transition metal chalcogenide nanoparticles for applications in photovoltaics. M. Braun, L. Korala, A.L. Prieto

**8:35 INOR 610.** Probing anisotropy in molecular magnetism. K.R. Dunbar

**9:05 INOR 611.** Learning from computational studies of NMR chemical shifts: The case of a main group atom in transition metal complex. C. Raynaud, S. Halbert, C. Cooperet, O.G. Eisenstein

**9:35 INOR 612.** Chemical surprises at the frontier of the periodic table. J.L. Kiplinger

**10:05** Intermission.

**10:20 INOR 613.** X-ray spectroscopic studies of biological dinitrogen reduction in molybdenum and vanadium nitrogenases. S. DeBeer

**10:50 INOR 614.** Pyridinol based ligands for transition metal catalyzed reduction of CO<sub>2</sub> and related substrates: Elucidating the role of Lewis Acids. E.T. Papish, S. Siek, D.B. Burks, C. Boudreaux, D.L. Gerlach, G. Liang, D.B. Grotjahn, C.E. Webster

**11:20 INOR 615.** Technetium, the first radioelement in the periodic table. A.P. Sattelberger, E. Johnstone, M.A. Yates, F. Poineau, K. Czerwinski

**11:50 INOR 616.** Design of azurin that spans the entire 2V range of physiological redox potentials and its application in engineering a copper protein that performs fast and reversible S-nitrosylation. Y. Lu, P. Hosseinzadeh, S. Tian, J. Liu

## Section C

Moscone Center  
2016

**Undergraduate Research at the Frontiers of Inorganic Chemistry**

**Bioinorganic Chemistry**

A. K. Bentley, C. Nataro, S. R. Smith, *Organizers*

S. A. Toledo, *Presiding*

**9:00 INOR 617.** Structural, spectroscopic and reactivity studies of the first structural model of the resting state of Nickel Acireductone Dioxygenase (Ni-ARD). D. Ivan, S.A. Toledo, V. Lynch

**Technical program information known at press time.**

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**9:20 INOR 618.** Protein charge effects on Rieske protein reduction potentials. K.R. Hoke, A.L. Watkins, R.J. Quarles

**9:40 INOR 619.** Modelling the O-O bond formation step in the oxygen-evolving complex. E. Hanada, J. Kovacs

**10:00 INOR 620.** Trinuclear ruthenium complexes with diimine ligands: Experimental and computational investigations of biological activity. F.A. Beckford

**10:20** Intermission.

**10:35 INOR 621.** Improved photocatalytic activity of hybrid P450 biocatalysts by tuning the Ru(II)-polypyridyl photochemical properties. H. Shalan, A. Colbert, T. Nguyen, M. Kato, L.E. Cheruzel

**10:55 INOR 622.** Copper transport into the avian oocyte: A second cargo for the vitamin transporter riboflavin binding protein. S.R. Smith, M. Benore

**11:15 INOR 623.** Photosensitizer-Embedded polyacrylonitrile nanofibers as an antimicrobial non-woven textile. S. Stanley, R. Ghiladi

**11:35 INOR 624.** Synthesis and conformational analysis of peptides appended to a novel, rigid, cyclic, bimetallic ring system. T.P. Curran, A.P. Lawrence, T.S. Murtaugh, W. Ji, N. Pokharel, L.M. Davidson, J.P. Sanderson-Brown, P.R. Handali, V. Nguyen, C. Gober, J. Suirot

**11:55 INOR 625.** Rare and unusual square planar copper (I) complexes. P.A. Cheung, R. Berger, J.D. Gilbertson

**12:15** Concluding Remarks.

## Section D

Moscone Center  
2018

**ACS Award for Distinguished Service in the Advancement of Inorganic Chemistry: Symposium in honor of William B. Tolman**

L. M. Berreau, *Organizer*

P. L. Holland, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 626.** Mechanistic studies of Cu(II)/O<sub>2</sub>-promoted oxidative aliphatic carbon-carbon bond cleavage reactions. L.M. Berreau

**9:00 INOR 627.** Reactivity of mononuclear nonheme cobalt(III)-superoxo complexes. W. Lee, C. Wang, K. Yeh

**9:25 INOR 628.** Bio-inspired heterodinuclear NiFe catalysts for H<sub>2</sub> production. D. Brazzolotto, L. Wang, M. Gennari, F. Meyer, M. Orto, V. Artero, C. Duboc

**9:50 INOR 629.** Why are O<sub>2</sub> and N<sub>2</sub> so different? K.H. Theopold, F. Dai, E.S. Akturk, Y. Hung, D.C. Cummins, G.P. Yap

**10:15** Intermission.

**10:30 INOR 630.** Cu(III) as a biological oxidant? L. Chiang, W. Keown, C. Citek, J.B. Gary, E.C. Wasinger, T.P. Stack

**10:55 INOR 631.** Modeling nitric oxide signaling chemistry at copper and zinc sites. T.H. Warren

**11:20 INOR 632.** Studies on the mechanism of Ti-catalyzed nitrene transfer reactions. I. Tonks, E. Beaumier, Z.W. Davis-Gilbert, A. Koley, A.J. Pearce, T.A. Wheeler, A.C. Wotal

**11:45 INOR 633.** Bioinspired small molecule activation for energy-related catalysis. F. Meyer

## Section E

Moscone Center  
2020

**Inorganic Nanomaterials: Structure & Function in 0, 1 & 2 Dimensions**

*Financially supported by Chemistry of Materials*

K. R. Kittilstved, E. J. McLaurin, *Organizers*

B. Gupton, K. J. Koski, *Presiding*

**8:30 INOR 634.** Chemistry of nanoconfined water molecules in 1-D metal organic nanotubes. T. Forbes

**9:00 INOR 635.** Fabrication, characterization and application of carbon nanoparticles for the detection of heavy metal ions in aqueous media. A. Wanekaya, A.M. Simpson, K. Ghosh

**9:30 INOR 636.** Micelle encapsulation: A versatile platform for generating multifunctional nanoparticles. J.O. Winter

**10:00** Intermission.

**10:15 INOR 637.** Novel properties and applications of plasmonic metal nanostructures: A case study and recent progress on Hollow Gold Nanospheres (HGNs). J.Z. Zhang

**10:45 INOR 638.** Synthesis of Core@Shell nanocatalysts with intermetallic interiors. S.E. Skrabalak

**11:15 INOR 639.** Controlling nanoscopic and atomic segregation of Pt within Pt-Ni rhombic dodecahedra and nanoframes for fuel cell catalysis. P. Yang, N. Becknell, Z. Niu

**11:45 INOR 640.** Using nanowire arrays as a sensitive tool for understanding copper-antimony anode materials. E.D. Jackson, A.L. Prieto

**12:15** Concluding Remarks.

## Section F

Moscone Center  
2022

**Emergent Phenomena in the Solid State**

B. C. Melot, *Organizer*

E. E. Rodriguez, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 641.** Understanding the impact of crystal chemistry on the physical properties of garnets. B.C. Melot

**9:10 INOR 642.** Mixed-Valence and chemical-pressure effects on magnetic properties of ThCr<sub>2</sub>Si<sub>2</sub>-type pnictides. X. Tan, A. Yaroslavtsev, K. Kovnir, M. Shatruk

**9:50 INOR 643.** Density functional investigation on the magnetic anisotropy in rare-earth-free metal borides with the Ti<sub>3</sub>Co<sub>2</sub>B<sub>2</sub>-type structure. Y. Zhang, B. Fokwa

**10:10 INOR 644.** Ground state magnetism in S = 1/2 Li<sub>4</sub>MgReO<sub>6</sub> system with orthorhombic crystal structure. J. Milam-Guerrero, C.J. Blood, P. Nguyen, J.P. Carlo, G. Luke, B.C. Melot, S. Derakhshan

**10:30** Intermission.

**10:50 INOR 645.** Structural and electronic instabilities in electron-doped Sr<sub>2</sub>Ir<sub>2</sub>O<sub>7</sub>: Emergent phenomena at the edge of the spin-orbit Mott state. S. Wilson

**11:30 INOR 646.** Electron doping a kagome spin liquid. Z. Kelly, M.J. Gallagher, T. McQueen

**11:50 INOR 647.** Magnetic properties of osmium mixed-metal double perovskites. C. Thompson, X. Fu

## Section G

Moscone Center  
2024

**ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler**

**Materials Chemistry of Solutions & Solids for a Sustainable Future**

*Cosponsored by BMGT<sup>1</sup>, MPPG, PRES and PROF<sup>2</sup>*

J. L. Bryant, J. C. Giordan, *Organizers*

S. E. Hayes, B. L. Maddux, *Organizers, Presiding*

**8:30** Introductory Remarks.

**8:40 INOR 648.** Nonlinear optical borates based oxides for solid state laser frequency conversion in the UV range. G. Aka, J. Ren, P. Loiseau

**9:00 INOR 649.** Atomic solid state energy scale. J.F. Wager, D.A. Keszler

**9:20 INOR 650.** Chalcogenide semiconductors as p-type transparent conductors, absorbers and alloys. J. Tate

**9:40 INOR 651.** Characterization of CSMC resists and other nano-material structures: Results and methods. E.L. Garfunkel

**10:00** Intermission.

**10:30 INOR 652.** Solution-Deposition of disordered RuO<sub>x</sub> nanoskins: An example from the fourth quadrant of electronic materials. D.R. Rolison

**10:50 INOR 653.** New functional materials as a design problem. A. Zunger

**11:10 INOR 654.** Creating a one-stop platform for computed XAS and NMR materials data and comparison algorithms on the Materials Project. K. Persson

**11:30 INOR 655.** Solid-state NMR of thin metal oxide films from prompt inorganic condensation. B.A. Hammann, Y. Afriyie, M. Kast, C.K. Perkins, P. Plassmeyer, D.W. Johnson, D.A. Keszler, C. Page, S.W. Boettcher, S.E. Hayes

**11:50 INOR 656.** Metal-oxo clusters from across the periodic table. M.D. Nyman

**12:10 INOR 657.** Aqueous inorganic coordination clusters: Synthesis, solution speciation, structure, and their use as inks for materials. D.W. Johnson

## Section H

Moscone Center  
3000

**Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes & Future Challenges**

*Cosponsored by BIOL*

*Financially supported by Northwestern U, U of California-Davis*

J. A. Telsler, *Organizer*

V. DeRose, *Organizer, Presiding*

**8:30 INOR 658.** Cytochrome P450 oxidations: A controlled burn of inert organic compounds. M. Green

<sup>‡</sup> Cooperative Cosponsorship

**9:00 INOR 659.** Bifunctional peroxidases (KatGs): A challenging family of enzymes for understanding putative evolutionary strategies in fine-tuning the oxidation reactions catalyzed by heme-Trp<sup>+</sup> intermediates and related e<sup>-</sup> transfer mediated by Trp<sup>+</sup>/Tyr<sup>+</sup>. P.C. Loewen, A. Ivancich

**9:30 INOR 660.** Mechanistic studies on the radical SAM enzyme CDG synthase. V. Bandarian

**10:00 INOR 661.** Decoding a secret handshake: Tracking protein-to-protein Cu(I) transfer by rapid x-ray absorption and intrinsic fluorescence techniques. K.N. Chacon

**10:20** Intermission.

**10:30 INOR 662.** How metal ions in the brain tip the toxic balance of the killer prion protein. G.L. Millhauser

**10:50 INOR 663.** On the use of Co(II) to elucidate Zn(II) enzyme mechanism. D.L. Tierney

**11:10 INOR 664.** Aromatic amino acid hydroxylases: Exploring the details of a catalytic cycle with EPR spectroscopy. J.L. McCracken

**11:30 INOR 665.** Taking snapshots of the water oxidation reaction in photosystem II with X-ray crystallography and X-ray spectroscopy. J. Yano, V.K. Yachandra

**12:00 INOR 666.** Ammonia binding to the OEC of Photosystem II, what does this tell us about water binding and O-O bond formation? R. Britt

## Section I

Moscone Center  
3010

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Conjugated Polymeric Materials

Cosponsored by PMSE

Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University

A. Facchetti, T. Lohr, Organizers

B. M. Savoie, Presiding

**9:00** Introductory Remarks.

**9:05 INOR 667.** Designing responsive piezo-materials from the bottom up: Learning from nonlinear optical materials. G. Hutchison, W.S. Horne, C.W. Marvin, H.M. Grimm

**9:35 INOR 668.** Polymers and polymer composites for flexible optoelectronic devices. A. Facchetti

**10:05 INOR 669.** Conjugated polymers and doping strategies for conductive layers and thermoelectric compositions. H.E. Katz

**10:35** Intermission.

**10:45 INOR 670.** Interfacial engineering of two-dimensional nanoelectronic heterostructures. M. Hersam

**11:15 INOR 671.** Electronic processes, morphologies and structural-functional correlations in low bandgap oligomers and polymers for OPV. L.X. Chen

**11:45 INOR 672.** Organic polymers for photovoltaics: Small structural differences yield large performance changes. J.R. Reynolds

## Section J

Moscone Center  
3012

### Chemistry is Central to Applied Materials

Cosponsored by MPPG<sup>2</sup>

C. J. Chang, Organizer

C. R. Bertozzi, M. A. Paley, Organizers,  
Presiding

**8:30 INOR 673.** Dynamic MOF SBUs as active sites for small molecule reactivity and catalysis. M. Dinca, E. Metzger, R. Comito, C. Brozek, H. Park, C. Hendon

**9:05 INOR 674.** Physical chemistry of nanocrystals with the graphene liquid cell. P. Alivisatos

**9:40 INOR 675.** Mucin-inspired thermoresponsive synthetic hydrogels induce stasis in human pluripotent stem cell colonies. S.P. Armes

**10:15** Intermission.

**10:30 INOR 676.** Interactions at the nano-bio interface. C.J. Murphy

**11:05 INOR 677.** Computationally guided discovery of metal-decorated metal-organic frameworks active for catalysis. L. Gagliardi, V. Bernales, M.A. Ortuno, A. Mavrandonakis, Z. Li, D. Yang, O.K. Farha, C.J. Cramer, B.C. Gates, J.T. Hupp

**11:40 INOR 678.** Grain boundary effects in electroreduction catalysis. M. Kanan

## Section K

Moscone Center  
3001

### Switchable Catalysts

J. A. Byers, P. Diaconescu, Organizers

A. J. Boydston, A. M. Spokoyne, Presiding

**8:30 INOR 679.** Switchable catalysis in precision polymerizations in aqueous and organic media. M. Sawamoto

**9:00 INOR 680.** Organomimetic boron cluster photosensitizers. A.M. Spokoyne

**9:30 INOR 681.** Stereocontrol in photochemical reactions. T.P. Yoon

**10:00 INOR 682.** Switchable catalysis in ATRP. K. Matyjaszewski

**10:30 INOR 683.** Redox-Switchable iron-based polymerization catalysis. J.A. Byers, A.B. Biernesser, K.R. Delle Chiaie, J.A. Kehl, M. Qi, A.W. Sudy

**11:00 INOR 684.** Factors controlling the activity of Fe-based catalysts for the polymerization of lactide and epoxides. C.J. Cramer, B. Dereli, M. Ortuño

**11:30 INOR 685.** Redox-mediated metal-free ring-opening metathesis polymerization. A.J. Boydston, L. Pascual, T. Kensy, D. Lee, J. Vandenbrande, N. Alrashdi

**12:00 INOR 686.** New avenues in synthesis via organic photoredox catalysis. D.A. Nicewicz

## Section L

Moscone Center  
3003

### Chemistry of Materials: Nanomaterials

C. G. Lugmair, Organizer

R. Beaulac, W. Feng, Presiding

**8:00 INOR 687.** Quantifying cation exchange of Cd<sup>2+</sup> in ZnTe: A challenge for accessing type II heterostructures. M. Enright, H. Sarsito, B. Cossairt

**8:20 INOR 688.** Room-temperature synthesis of metal chalcogenide nanocrystals from N-heterocyclic carbene synthons. H. Lu, R.L. Brutchey

**8:40 INOR 689.** Design of colloidal semiconductor nanocrystals for enhanced absorption and band edge tuning exceeding 2.0 eV. D. Kroupa, M.V. Vörös, N.P. Brawand, B. McNichols, E. Miller, J. Gu, A.J. Nozik, A. Sellinger, G.A. Galli, M.C. Beard

**9:00 INOR 690.** Colloidal synthesis of transition metal dichalcogenide nanostructures. Y. Sun, Y. Wang, D. Sun, B.R. Carvalho, C. Read, C. Lee, Z. Lin, K. Fujisawa, J.A. Robinson, V.H. Crespi, M. Terrones, R.E. Schaak

**9:20 INOR 691.** Design, fabrication and modification of advanced fluorescent polymer based on ordered quantum-dots from nanoscale to large production. S. Chen

**9:40 INOR 692.** Native phosphine surface ligand exchange on plasma-synthesized indium phosphide nanocrystals. N.R. Neale, N.D. Bronstein, L. Wheeler, N.C. Anderson

**10:00 INOR 693.** Single-enzyme direct biomineralization of metal chalcogenides nanocrystals with tunable optical properties. L. Spangler, Z. Yang, R. Dunleavy, A. Sadeghnejad, R. Chu, L. Lu, C.J. Kiely, B. Berger, S. McIntosh

**10:20** Intermission.

**10:35 INOR 694.** Synthesis and characterization of colloidal CsPbX<sub>3</sub> nanowires. D. Zhang, Y. Yang, Y. Bekenstein, Y. Yu, N. Gibson, A.B. Wong, S.W. Eaton, L. Dou, S.R. Leone, P. Alivisatos, P. Yang

**10:55 INOR 695.** 2D redox-active superatom frameworks. A. Champsaur, C.P. Nuckolls

**11:15 INOR 696.** Modulation of electrical and optical properties of tungsten disulfide. S. Chee, M. Son, G. Son, H. Jang, M. Ham

**11:35 INOR 697.** Chiral semiconductor helices at the meso-scale. W. Feng, J. Kim, X. Wang, H.A. Calcaterra, Z. Qu, L. Meshi, N. Kotov

**11:55 INOR 698.** Photoredox processes involving colloidal quantum dots: Surface states, structural inhomogeneities, and ultrafast hole extraction. C. Mi, M. Saniepay, P. Dutta, Y. Tang, J.A. McGuire, R. Beaulac

**12:15 INOR 699.** Synthesis of heterostructured nanocrystals with pre-programmable compositions and spatial arrangements. X. Li, R.E. Schaak

### Metalloprotein-Initiated Signaling Transduction Response to Redox Stress

Sponsored by BIOL, Cosponsored by INOR

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

## Applications & Devices

Sponsored by PHYS, Cosponsored by INOR

### Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Sponsored by NUCL, Cosponsored by INOR

### Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

Sponsored by NUCL, Cosponsored by INOR and PRES

### Support & Activator Effects on Metal Mediated Polymerization

Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG<sup>2</sup>

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Molecular & Bio-Inspired Photocatalysts

Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR

### Deposition & Etching of Nanostructures

Sponsored by COLL, Cosponsored by INOR

## TUESDAY AFTERNOON

### Section A

Moscone Center  
2009

### Chemistry of Materials: Synthesis & Properties

C. G. Lugmair, Organizer

B. Boardman, J. M. Szarko, Presiding

**1:30 INOR 700.** Highly efficient emitters for Organic Light Emitting Diodes (OLEDs) based on intramolecular rotation and spin-state inversion. M. Bochmann, A.S. Romanov, D. Di, L. Yang, D. Credgington, M. Linnolahti

**1:50 INOR 701.** Boron containing perovskite single crystal for thermal neutron detection. M.L. Higgins, F. Ely, M. Quevedo-Lopez

**2:10 INOR 702.** Molecular doping approach for metal oxide photosensitization. D. Jung, L.M. Saleh, Z. Berkson, J. Hwang, M.F. El-Kady, E. Titarenko, Y. Shao, K. McCarthy, A.I. Wikstrom, J. Guo, I.B. Martini, S. Kraemer, E.C. Wegener, J. Ciston, J.L. Brosmer, J.I. Zink, J.T. Miller, X. Duan, R.B. Kaner, B.F. Chmelka, A.M. Spokoyne

**2:30 INOR 703.** Sensitized Eu<sup>III</sup> and Tb<sup>III</sup> emission by functionalized polycarbonate-based materials. R.A. Tigaa, X. Aerken, A. Fuchs, A. De Bettencourt Dias

**2:50 INOR 704.** Crystal structure effects on the Davydov splitting of electronically active conjugated systems. J.M. Szarko, A. Austin, X. Zhu, F.C. Spano, N. Hestand, M. Zdilla

**3:10 INOR 705.** Broadband white-light emission in two-dimensional layered lead-bromide perovskites. T. Hu, M.D. Smith, E. Dohner, M. Sher, X. Wu, M. Trinh, A. Fisher, J. Corbett, X. Zhu, H. Karunadasa, A. Lindenberg

**3:30** Intermission.

**3:45 INOR 706.** Microparticle-assisted synthesis of GQD-AgNP nanohybrids with enhancing light-matter coupling for SERS-based detection. W. Chiang, K. Lin

- 4:05 INOR 707.** Direct polymerization of cobalt chalcogenide clusters for hybrid photovoltaic materials. **B. Boardman**, D.A. Corbin
- 4:25 INOR 708.** Aiming for the heteroatom control in the synthesis of polyoxometalates. **L. Vilà Nadal**, J. Mathieson, L. Cronin
- 4:45 INOR 709.** Luminescent gold(I)-thiophenolate coordination polymers as phase change materials and precursors for the formation of multifunctional nanocomposites. **A. Demessence**, O. Veselska, N. Guillou, M. Monge, G. Ledoux, A. Fateeva, P. Bordet
- 5:05 INOR 710.** Insulator-to-semiconductor transition in a porous vanadyl Prussian Blue analog upon air exposure. **M. Manumphil**, C. Leal Cervantes, M.R. Hudson, C.M. Brown, H.I. Karunadasa
- 5:25 INOR 711.** Preparation and properties of tetrathiafulvalene radical cation heavy metal (Pb, Bi) iodide hybrid materials. **H. Evans**, J. Labram, A. Lehner, S. Smock, M.L. Chabinyr, R. Seshadri, F. Wudl

### Section B

Moscone Center  
2011

#### Celebrating 60 Years of the Division of Inorganic Chemistry

##### Recent Officers

M. J. Clarke, D. C. Crans, *Organizers*  
B. T. Donovan-Merkert, S. Koch, D. J. Mindiola, *Presiding*

##### 1:30 Introductory Remarks.

- 1:35 INOR 712.** Bioinorganic systems for artificial photosynthesis. **K. Bren**, S. Chakraborty, P. Lamberg, B. Kandemir, T. Krauss
- 2:05 INOR 713.** Generation and characterization of primary copper(I)-dioxygen adducts. **K.D. Karlin**
- 2:35 INOR 714.** Spectroscopic studies of molecular magnetism. **Z. Xue**, S.E. Stavretis, D.H. Moseley, A.A. Podlesnyak, C.M. Brown, L.L. Daemen, Y. Cheng, A.J. Ramirez-Cuesta, X. Wang, C.M. Hoffmann, S.O. Diallo, K. Thirunavukkuarasu, Q. Chen, H. Zhou, J. Ludwig, D. Smirnov, Z. Zhu, M. Guo, J. Tang, H. Cui, F. Fei, X. Chen

**3:05 INOR 715.** Coordination chemistry of Fe(II) and Fe(III) MRI contrast agents. **J.R. Morrow**, P.B. Tsitovich, E. Snyder

##### 3:35 Intermission.

- 3:50 INOR 716.** Synergism of two alkali metals in self-assembly of novel supersized heterometallic sandwich compounds. **M.A. Petrukhina**
- 4:20 INOR 717.** Photomechanical Effects from Ruthenium Sulfoxide Polymers. **M. Livshits**, J. Shin, J. Rack

**4:50 INOR 718.** Visible light-induced solid-state CO-releasing compounds. **L.M. Berreau**, S. Anderson, M. Larson

**5:20 INOR 719.** Excited state reactivity of transition metal complexes. **C. Turro**

### Section C

Moscone Center  
2016

#### Organometallic Chemistry: New Ligand Platforms

##### Pincer Ligands

N. S. Radu, *Organizer*

O. Ozerov, A. Rahman, *Presiding*

**1:30 INOR 720.** Pyrazine-based gold(III) pincer complexes: Synthesis and Luminescence. **J. Fernandez-Cestau**, L. Currie, L. Rocchigiani, B. Bertrand, M. Bochmann, T. Penfold

**1:50 INOR 721.** Pincer multifunctionality, together with reduced Fe, cleaves N<sub>2</sub>. **B.J. Cook**, C. Chen, A. Hickey, **K.G. Caulton**

**2:10 INOR 722.** New chemistry of pincer-supported rhenium. **A.J. Kosanovich**, W. Shih, O. Ozerov

**2:30 INOR 723.** C-H activation and functionalization with PNP rhodium pincers: Stoichiometric reactivity and catalysis. **J. Gair**

**2:50 INOR 724.** New insight into C-H borylation with iridium pincer complexes. **O. Ozerov**, L.P. Press, A.J. Kosanovich, C. Lee

**3:10 INOR 725.** Bis-N-heterocyclic carbene pincers as versatile ligand platform for uniquely active ester hydrogenation homogeneous catalysts. **R. van Putten**, G. Filonenko, L. Lefort, E. Hensen, E. Pidko

**3:30 INOR 726.** Development of new cobalt pincer complexes for catalytic applications. **Y. Li**, J.A. Krause, **H. Guan**

**3:50 INOR 727.** Iron pincer complexes with isonitrile ancillary ligands for formic acid and methanol dehydrogenation. **N. Smith**, N. Hazari

**4:10 INOR 728.** Computational investigation of ester and amide hydrogenation by aliphatic Fe and Ru PNP complexes. **Z. Culaikova**, E. Clot, K.I. Goldberg, O.G. Eisenstein

**4:30 INOR 729.** Hydrogenation of carboxylic carbonyl derivatives (C=O, C≡N) catalyzed by iron and cobalt pincer complexes or particles. **H. Dai**, J.A. Krause, **H. Guan**

**4:50 INOR 730.** Synthesis and studies of naphthoquinone and anthraquinone derived iridium Pincer catalysts for the conversion of ethanol to butanol. **A. Rahman**, W.D. Jones, M. Wiklow-Marnell

**5:10 INOR 731.** Synthesis and characterization of new C. C. N Pincer-type palladium complexes containing N-heterocyclic carbene ligands. **J. Yan**, Z. Zhu, Y. Wang, J. Niu, X. Zhu, X. Hao, M. Song

### Section D

Moscone Center  
2018

#### ACS Award for Distinguished Service in the Advancement of Inorganic Chemistry: Symposium in honor of William B. Tolman

P. L. Holland, *Organizer*

L. M. Berreau, *Organizer, Presiding*

##### 1:30 Introductory Remarks.

**1:35 INOR 732.** Nacnac doesn't fall far from the tree: Activation of N<sub>2</sub> with diketiminato complexes. **P.L. Holland**

**2:00 INOR 733.** Inorganic chemistry: A salute and a challenge. **R. Eisenberg**

**2:25 INOR 734.** Nickel-sulfido and nickel-selenido complexes: Preparation, spectroscopy and C-H activation. **C.G. Riordan**

**2:50 INOR 735.** Greater than the sum of their parts: Heterodinuclear polymerization catalysts. **C.K. Williams**

##### 3:15 Intermission.

**3:30 INOR 736.** Innovation and potential career paths in industry. **N. Aboeella**

**3:55 INOR 737.** Copper transport in methanotrophic bacteria. **G.E. Kenney**, L.M. Dassama, S.Y. Ro, **A.C. Rosenzweig**

**4:20 INOR 738.** Factors controlling the activity of Al-based catalysts for the ring-opening transesterification polymerization of caprolactone. **C.J. Cramer**, B. Dereli, C. Dunbar, J. Freeze, M. Johnson, M. Mandal, D. Marell, H. Vazquez Lima

**4:45 INOR 739.** How is metal covalency reflected in ligand field parameters? **F. Neese**, E. Sutorina, M. Atanasov

### Section E

Moscone Center  
2020

#### Bioinorganic Chemistry: DNA, RNA & Inorganic Drugs

S. A. Koch, *Organizer*

J. P. Selegue, A. D. Tinoco, *Presiding*

**1:30 INOR 740.** Synthesis, characterization and DNA interaction studies of potential anticancer titanium complexes with biologically relevant ligands. **M. Mahroof-Tahir**, L. Sreerama, **Z.E. Mahmoud**, A. Al Dawood, **E.M. Looli**

**1:50 INOR 741.** Inter-duplex distance distributions in metal-modified peptide nucleic acids measured by double electron-electron resonance. **A. Sargun**, A. Jarvi, S.K. Saxena, C. Achim

**2:10 INOR 742.** Identifying cancer-relevant DNA damage via a charge transfer mechanism involving [4Fe4S] cluster proteins. **E. Tse**, J.K. Barton

**2:30 INOR 743.** Divalent copper complexes as Influenza A inhibitors. **J.D. Lynch**, N.A. Gordon, K.L. McGuire, S.K. Wallentine, G.A. Mohl, R.G. Harrison, D.D. Busath

**2:50 INOR 744.** N-Heterocyclic carbene gold(I) complexes conjugated to DNA-aptamers for targeted drug delivery. **W. Niu**, X. Chen, W. Tan, A.S. Veige

**3:10 INOR 745.** Regulating photochemistry and nucleic acid targeting of Ru(II) complexes. **P.C. Glazer**

##### 3:30 Intermission.

**3:40 INOR 746.** Build-In fluorescent M24L8 octahedral metal organic molecular cages for nuclear-penetrating PH-responsive drug delivery. **Y. Fang**

**4:00 INOR 747.** Ruthenium complexes as new pH-dependent switchable metal-iodrugs. **F. Martinez-Peña**, A.M. Pizarro

**4:20 INOR 748.** Expanding the therapeutic potential of the iron chelator deferasirox in the development of aqueous stable Ti(IV) anticancer complexes. **A.D. Tinoco**, S. Loza, A.M. Vázquez, S.C. Perez, Y. Delgado, K. Gaur, K.I. Rivero, L.J. Negron, T.B. Parks, C. Munet-Colon

**4:40 INOR 749.** Low-symmetry boron subphthalocyanines as fluorescent imaging probes and precursors for designer metallophthalocyanines. **L. Sejdarami**, K. McAuliffe, R. Szlag, M.A. Kaster, **E.R. Trivedi**

**5:00 INOR 750.** Mixed polypyridyl/N-heterocyclic carbene complexes as potential cytotoxic pro-drugs. **J.P. Selegue**, R.T. Ryan, J. Mahmoud, P.C. Glazer

**5:20 INOR 751.** Targeting ErbB tyrosine kinases with platinum-functionalized small molecule inhibitors. **M. Yang**, H. Wu, T.K. West, C.M. Furdul, G.L. Kucera, U. Bierbach

### Section F

Moscone Center  
2022

#### Emergent Phenomena in the Solid State

E. E. Rodriguez, *Organizer*

B. C. Melot, *Organizer, Presiding*

**1:30 INOR 752.** Structure and magnetic properties of the 3d transition metal formate-chlorides. **K. Kovnir**

**1:50 INOR 753.** Site identity and importance in fluorite-related transparent conductors. **K. Rickert**, A. Dolgonos, **K.R. Poeppelmeier**

**2:10 INOR 754.** Withdrawn.

**2:50 INOR 755.** Soft chemical control of iron-based superconductors and related compounds. **S. Clarke**

##### 3:30 Intermission.

**3:50 INOR 756.** Competing orders in the 12 Fe based superconducting family under chemical doping and external pressure. **N. Ni**

**4:30 INOR 757.** Hydride route for the synthesis of 122 iron arsenide superconductors. **Y. Zaikina**, M. Kwong, B. Baccam, S. Kauzlarich

**4:50 INOR 758.** Layered transition metal chalcogenides based on square lattices as functional materials. **X. Zhou**, B. Wilfong, H.K. Vivanco, **E.E. Rodriguez**

##### 5:25 Concluding Remarks.

### Section G

Moscone Center  
2024

#### ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

#### Chemists Leading the Charge: Chemists Using Business Acumen & Transformative Research to Address Societal Needs

*Cosponsored by BMGT, MPPG, PRES and PROF*

S. E. Hayes, B. L. Maddux, *Organizers*

J. L. Bryant, J. C. Giordan, *Organizers, Presiding*

**1:30 INOR 759.** Opening overview: Chemists using business acumen and transformative research to address societal needs. **J.C. Giordan**

**1:40 INOR 760.** Importance and value of fundamentally inspired use, use-inspired, and market-informed research. D.A. Keszler

**2:00 INOR 761.** Science behind oxide transistors for displays. J.F. Wager

**2:10 INOR 762.** Science behind materials for ink jet printing. J.E. Abbott

**2:20 INOR 763.** Transformative science behind metal-based EUV photoresists. S.T. Meyers

**2:30 INOR 764.** Science behind tunneling electronics. B. Cowell

**2:40 INOR 765.** Interactive panel: Chemists using business acumen and transformative research to address societal needs. J.C. Giordan, D.A. Keszler, J.F. Wager, J.E. Abbott, S.T. Meyers, B. Cowell, J.L. Bryant

**3:10** Intermission.

**3:30 INOR 766.** Opening overview for panel 2: Next generation innovators. J.C. Giordan

**3:40 INOR 767.** Panel 2: Research to innovation CSMC legacy: Training the next generation. M. Dolgos, J.M. Amador, J.C. Ramos, J.C. Giordan

**4:10 INOR 768.** Office hours with the speakers. J.C. Giordan, D.A. Keszler, J.F. Wager, S.T. Meyers, J.E. Abbott, B. Cowell, M. Dolgos, J.M. Amador, J.C. Ramos, J.L. Bryant

## Section H

Moscone Center  
3000

### Spectroscopic Elucidation of Metalloenzyme Mechanism: Current Successes & Future Challenges

*Cosponsored by BIOL*

*Financially supported by Northwestern U, U of California-Davis*

V. DeRose, J. A. Telsler, *Organizers*

J. Stubbe, *Presiding*

**1:30 INOR 769.** Multifrequency pulse EPR studies of the water oxidizing complex in photosynthesis. W. Lubitz, N. Cox, D. Pantazis, F. Neese

**2:00 INOR 770.** Progress in high-field EPR and ENDOR spectroscopy to study the radical transfer in class I ribonucleotide reductases. M. Bennati

**2:30 INOR 771.** Nuclear resonance vibrational spectroscopy as a tool for the characterization of low frequency modes in iron proteins. V. Schünemann

**3:00 INOR 772.** Nuclear magnetic spectroscopic elucidation of MhuD mechanism. M.D. Liptak

**3:20** Intermission.

**3:30 INOR 773.** Spectroscopic approaches to understanding sulfur insertion into aliphatic carbon centers in the biosynthesis of lipoic acid. S.J. Booker

**4:00 INOR 774.** Novel outcomes and mechanisms emerging from dioxygen activation by non-heme-di-iron enzymes. J.M. Bollinger, C. Krebs

**4:30 INOR 775.** Unprecedented [FeS] cluster in the core of the hepatitis B infection. M. Pandelia, C. Ueda

**4:50 INOR 776.** Elucidating the mechanisms and magnetic properties of di-iron-oxo proteins via computational quantum chemistry. J.H. Rodriguez

**5:10 INOR 777.** Nuclear Resonance Vibrational Spectroscopy (NRVS) of FeFe hydrogenase: New evidence on enzyme intermediates. S.P. Cramer

## Section I

Moscone Center

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Materials for Energy Conversion

*Cosponsored by PMSE*

*Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University*

A. Facchetti, T. Lohr, *Organizers*

J. R. Reynolds, *Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 778.** Nitrogen fixation at room temperature, pressure in water using light. M.G. Kanatzidis

**2:05 INOR 779.** Creation of structurally defined two-dimensional assemblies. V.P. Conticello

**2:35 INOR 780.** Photosensitization of a CO<sub>2</sub> reduction catalyst with red and near-infrared light using rylenediimide radical anions and dianions. N. LaPorte, J. Martinez, C.M. Mauck, B.T. Phelan, R. Young, M.R. Wasielewski

**3:05** Intermission.

**3:15 INOR 781.** New Polymer Chemistries for Solid Battery Electrolytes. B.M. Savoie

**3:45 INOR 782.** Solution-processed metal oxide materials for large-area flexible electronics and hydrogen energy devices. M. Yoon

**4:15 INOR 783.** Novel synthetic approaches for efficient semiconducting materials. A. Dudnik

## Section J

Moscone Center  
3012

### Chemistry of Materials: Materials for Energy & Catalytic Applications

C. G. Lugmair, *Organizer*

B. Baruah, Y. Zhou, *Presiding*

**1:30 INOR 784.** Porous benzoxazoles as oxygenation catalysts: Case of amine self-coupling. S. Subramanian, H.A. Patel, Y. Song, C.T. Yavuz

**1:50 INOR 785.** High power factor and enhanced thermoelectric performance of SnTe: Synergistic effect of resonance level and valence band convergence. K. Biswas

**2:10 INOR 786.** Diffusion of cations in 2D/3D perovskite films made by melt infiltration. E. Keenan, J. Hu, J. Zhi, D.B. Mitzi, W. You

**2:30 INOR 787.** New 2D hybrid perovskite systems for optoelectronic applications. C. Lerner, S.T. Birkhold, S.P. Harm, I.L. Moudrakovski, L.M. Schoop, P. Mayer, L. Schmidt-Mende, B.V. Lotsch

**2:50 INOR 788.** Stabilization of the metastable perovskite phase of Formamidinium Lead Triiodide (FAPbI<sub>3</sub>) via surface functionalization. Y. Fu, J. Zhai, M. Shearer, S. Jin

**3:10 INOR 789.** Interfaces and their influence on oxide ion diffusion in ceria. A.K. Lucid, G.W. Watson

**3:30** Intermission.

**3:45 INOR 790.** Engineering carbon sheets supported iron nanoparticles for direct synthesis of light olefins. Y. Zhou, C. Wang, S. Natesakhawat, J. Leske, D. Kauffman, C. Matranga

**4:05 INOR 791.** Cotton fabric immobilized ZnO@AuNP for heterogeneous catalysis. B. Baruah, D. Agyeman, S. Baruah

**4:25 INOR 792.** Structural informatics: Its role in understanding metal-organic complexes. S. Vyas, A. Sarjeant

**4:45 INOR 793.** Charge density mismatch synthesis and application to UZM-35, a material containing both 10MR and 12MR pores. C.P. Nicholas

**5:05 INOR 794.** Advancing marine hydrokinetic energy technology through materials chemistry. B.A. Hernandez-Sanchez, M.R. Hibbs, P.B. Savage

**5:25 INOR 795.** Hierarchical structured MnO<sub>2</sub> nanoparticle-embedded SiO<sub>2</sub> nanofibrous membranes with flexibility and enhanced catalytic performance. D. Lyve, X. Wang, R. Zhang, B. Ding

## Section K

Moscone Center  
3001

### Switchable Catalysts

J. A. Byers, P. Diaconescu, *Organizers*

C. Chen, B. K. Long, *Presiding*

**1:30 INOR 796.** ROP of  $\beta$ -lactones: From syndiotactic homopolymers to blocky and chemically tunable alternating copolymers. C. Jaffredo, R. Ligny, S.M. Guillaume, J. Carpentier

**2:00 INOR 797.** Cationic indium catalysts for formation and polymerization of functionalized monomers. P. Mehrkhodavandi, I. Yu, C. Chang, C. Diaz Lopez

**2:30 INOR 798.** Exploring the chemical space of redox-switchable catalysts. N. Fey, P. Diaconescu

**3:00 INOR 799.** Rare-earth metal-based catalysts for ring-opening polymerization of lactide monomers. J. Okuda

**3:30 INOR 800.** Lewis acid and redox control in olefin polymerization. C. Chen

**4:00 INOR 801.** Modulating polyolefin microstructure and composition via redox-active catalysts. W.C. Anderson, J. Kern, S. Roy, B.K. Long

**4:30 INOR 802.** Design and development of metal-free light controlled polymer systems. J. Read De Alaniz

**5:00 INOR 803.** Stereo- and temporal switch coordination polymerization of conjugated dienes and styrene. D. Cui, B. Liu, C. Yao

## Section L

Moscone Center  
3003

### Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

N. J. Deyonker, A. R. O'Connor, *Presiding*

**1:30 INOR 804.** Catalytic and mechanistic evaluation of norbornene polymerization initiated by cationic ( $\pi$ -Allyl) group 10 complexes containing dialkylbiaryl phosphine ligands. A.R. O'Connor, C. Lee, M. Kunitomo, N.B. Jones, G.L. Heard

**1:50 INOR 805.** Palladium-catalyzed hydrophosphorylation of alkynes: Scope, limitation and mechanism. L. Han

**2:10 INOR 806.** Can alkylation of the N-H functionality within M/NH bifunctional Noyori-type catalysts lead to improved activity? P.A. Dub, J.C. Gordon

**2:30 INOR 807.** Hydroarylation of olefins with (pyridyl-indole) Pt<sup>II</sup> complexes. B.A. Suslick, A.L. Liberman-Martin, T.D. Tilley

**2:50 INOR 808.** Mechanistic elucidation of Pd-catalyzed reactions using high resolution electrospray ionization mass spectrometry. K.L. Walker, L.M. Dornan, M.J. Muldoon, R.N. Zare, R.M. Waymouth

**3:10 INOR 809.** Polymer-supported palladium (II) carbene complexes: Catalytic activity, recyclability and selectivity in C-H acetoxylation of arenes. M.H. Majeed, P. Shayesteh, R.L. Wallenberg, A.R. Persson, N. Johansson, L. Ye, J. Schnadt, O.F. Wendt

**3:30 INOR 810.** Mechanism of Pd-catalyzed decarbonylation of esters to linear  $\alpha$ -olefins. M.A. Ortuno, B. Dereli, A. John, H.E. Johnson, M.A. Hillmyer, W.B. Tolman, C.J. Cramer

**3:50 INOR 811.** Modeling the selectivity of the Pd-based hydroxycarbonylation of pentenoic acids to adipic acid. B. Pudasaini, A. Genest, N. Roesch

**4:10 INOR 812.** Is an exhaustive conformational search necessary for proposing catalytic mechanisms? An investigation of intramolecular Heck catalysis in the formation of colleteic acid derivatives. N.J. Deyonker, T. Ling, R.N. Waltman, F. Rivas

**4:30 INOR 813.** Solvent influence into the C<sub>55</sub>-X (X= Cl or Br) bond activation of x-pyridine species by neophylpalladacycle: An experimental study. O. Serrano

**4:50 INOR 814.** Mechanistic study of the bis(trineopentylphosphine)palladium catalyzed Buchwald-Hartwig amination reaction. H. Hu, K.H. Shaughnessy

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

#### Theory & Modeling

*Sponsored by PHYS, Cosponsored by INOR*

### Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

*Sponsored by NUCL, Cosponsored by INOR*

### Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

*Sponsored by NUCL, Cosponsored by INOR and PRES*

### Deposition & Etching of Nanostructures

*Sponsored by COLL, Cosponsored by INOR*

### Support & Activator Effects on Metal Mediated Polymerization

*Sponsored by PMSE, Cosponsored by CATL, INOR and MPPG<sup>2</sup>*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

#### Novel Photocatalytic & Photoelectrode Materials

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

## TUESDAY EVENING

## Section A

Moscone Center  
Hall D

## Inorganic Spectroscopy

V. C. Popescu, *Organizer*

5:30 - 7:30

**INOR 815.** Influence of charge transfer in the photoluminescence of lead-free  $Ba_{1-x}Ca_xTi_{1-y}Zr_yO_{3-\delta}$  electro-ceramics. G. Herrera Pérez, J.G. Murillo, G. Zaragoza-Galán, G. Tapia-Padilla, A. Reyes-Rojas, L.E. Fuentes-Cobas

**INOR 816.** Characterizing the inner filter effect in quantum dot-polymer composites for use as a displacement sensor. M.A. Koc, P. Alivisatos

**INOR 817.** Single-molecule investigation of initiation dynamics of an organometallic catalyst. J. Ng, S. Upadhyay, A. Marquard, K. Lupo, D. Hinton, N. Padilla, D. Bates, R.H. Goldsmith

**INOR 818.** Mössbauer spectroscopy: Predictive property models from experimental design and statistical learning. J. Proppe, M. Reiher

**INOR 819.** Measuring of the energy transfer efficiency between plasmon nanoparticles and quantum dots using Sample-Transmitted Excitation Photoluminescence (STEP). P. Moroz, M. Zamkov

**INOR 820.** Withdrawn.

**INOR 821.** Photophysical effects of varying imine based ligands with cuprous halides to form vividly-colored/brightly-phosphorescent coordination polymers. L.E. Scoggins, M. Wilk, Z. Henry, V. Nesterov, M. Omary

**INOR 822.** TDDFT studies of earth abundant photocatalysts. C. Nite, A.K. Rappe

**INOR 823.** Theoretical study of tris(1,3-propanedionato)chromium(III) for insight into Cr(III)-based photocatalysts. J. Nite, A.K. Rappe

**INOR 824.** Thermal polarized vibrational microspectroscopy of weddellite and whewellite single crystals. G. Kumí, N. Aljuhani, A. Obaid

**INOR 825.** Mössbauer spectroscopy of iron-selone and iron-thione complexes capable of preventing oxidative DNA damage. V.C. Popescu, M. Cohara, J.L. Brumaghim, B. Stadelman

**INOR 826.** Reexamination of the red band of CuO: Analysis of the [16.5]  $^2\Sigma^- X^2\Pi$  transition of  $^{63}\text{CuO}$  and  $^{65}\text{CuO}$ . J.C. Harms, E.M. Grames, S. Yun, B. Ahmed, J.J. O'Brien, L.C. O'Brien

**INOR 827.** Analysis of some new electronic transitions observed using intracavity laser spectroscopy (ILS): Possible Identification of HCuN. J.C. Harms, E.M. Grames, J.J. O'Brien, L.C. O'Brien

**INOR 828.** XESCA: X-ray emission spectroscopy for chemical analysis. S. Lee

## Section B

Moscone Center  
Hall D

## Organometallic Chemistry: New Ligand Platforms

N. S. Radu, *Organizer*

5:30 - 7:30

**INOR 829.** Highly selective and sensitive colorimetric chemosensor for detection of  $\text{Co}^{2+}$  in a near-perfect aqueous solution. M. Kim, H. Cho, C. Kim

**INOR 830.** Colorimetric chemosensor for the sequential recognition of mercury (II) and iodide in aqueous media. H. Ahn, S. Hwang, M. Yang, C. Kim

**INOR 831.** Simultaneous bioimaging recognition of cation  $\text{Al}^{3+}$  and anion  $\text{F}^-$  by a fluorogenic method. J. Kang, H. Jeong, D. Yun, C. Kim

**INOR 832.** Highly sensitive benzimidazole-based chemosensor for the colorimetric detection of Fe(II) and Fe(III) and the fluorometric detection of Zn(II) in aqueous media. H. Jang, J. Chae, A. Kim, C. Kim

**INOR 833.** Highly selective fluorescence sensor for  $\text{Al}^{3+}$  and  $\text{CN}^-$  in aqueous solution: Biological applications and DFT calculations. J. Jung, J. Yun, P. Kim, C. Kim

**INOR 834.** Pillarplexes: A metal-organic class of supramolecular hosts. P.J. Altmann, A. Pöthig

**INOR 835.** Unprecedented metal-ligand cooperation of a (PPP)Ni scaffold: Formation of P-E bonds (E = N or P). Y. Kim, Y. Lee

**INOR 836.** First-row metal complexes of poly(guanidiny)aryl ligands. J.E. Allen, L. Wilkinson, W.S. Kassel, N.A. Piro

**INOR 837.** Solvent free hydrosilylation of tertiary, secondary and primary amides using BIAN [Bis(Arylimino)-Acenaphthene] based iron complexes. A. Saini, M. Findlater

**INOR 838.** Synthesis of a novel multitopic nonchelating N-heterocyclic carbene. D. Tapu, A. Carter, R. Justice, R. Hooper, O. Kuykendall, M. Baker, G. Bettler, A. Changas, A. Mason

**INOR 839.** New annulated N-heterocyclic carbenes and their transition metal complexes. G. Bettler, A. Changas, O.J. Buckner, C. Boudreaux, B. Norvell, D. Tapu

**INOR 840.** Toward the synthesis of a new anionic N-heterocyclic carbene and its corresponding metal complexes. A. Carter, A. Mason, D. Tapu, M. Baker, G. Bettler, A. Changas

**INOR 841.** Synthesis and Characterization of Cr(0) terminated  $\pi$ -linkers based on linear oligoazulenic frameworks. N.R. Erickson, M.V. Barybin

**INOR 842.** Heterobimetallic complexation of a mercapto and isocyno functionalized linear 6,6'-biazulenic  $\pi$ -linker: Synthesis, redox behavior, and spectroscopic characterization. J.C. Applegate, N.R. Erickson, M.V. Barybin

**INOR 843.** Novel mesoionic/remote N-heterocyclic carbene ligands and their ruthenium(II) aqua complexes. T.C. Cao, D.B. Grotjahn

## Section C

Moscone Center  
Hall D

## Main Group Chemistry

T. W. Hudnall, *Organizer*

5:30 - 7:30

**INOR 844.** Aluminium carboxylates as precursors for the synthesis of aluminium-oxo-cages. T.L. Precht, A.J. Peel, D. Wright, A. Wheatley

**INOR 845.** Reactivity of an acyclic silylsilylene toward ethylene: Migratory insertion into the Si-Si bond. D. Wendel, S. Inoue, B. Rieger

**INOR 846.** Borylated N-Heterocyclic Carbenes(NHCs) - Synthesis and migration studies. W. Liu, C. Chiu

**INOR 847.** Synthesis and characterization of energetic nitroformate salts. A. Baxter, I. Martin, K.O. Christe, R.M. Haiges

**INOR 848.** Triazenyl radicals stabilized by N-heterocyclic carbenes. J. Back, E. Lee

**INOR 849.** Silylene stabilized boron cations: Synthesis and reactivity studies. H. Tsai, C. Chiu

**INOR 850.** Acid-catalyzed hydroxylation of iodododecaborate. Z.S. Lincoln, J.A. Dopke, R.J. Staples

**INOR 851.** Ruthenium-catalyzed substitutions of icosahedral dodecaborates. D.C. Adams, J.A. Dopke, R.J. Staples

**INOR 852.** Synthesis and characterization of salts derived from 5[chloroalkyl]tetrazoles. Y.O. Ahmed, C. Gibson, S. Schneider, S. Deplazes

**INOR 853.** Synthesis and characterization of new derivatized 1,1dimethylhydrazinium salts. Y.O. Ahmed, C. Gibson, S. Schneider, S.F. Deplazes

**INOR 854.** Withdrawn.

**INOR 855.** Polyphosphazenes as antibacterial films. P. Nance, P. Wisian-Neilson

**INOR 856.** Stabilization of heavier main group analogues by London dispersion force interactions. R.E. Tureski, P.P. Power

## Section D

Moscone Center  
Hall D

## Organometallic Chemistry: Synthesis &amp; Characterization-Late Transition Metals

N. S. Radu, *Organizer*

5:30 - 7:30

**INOR 857.** 1,3,6-Trisubstituted fulvene derived *ansa*-metallocene ligands: A new route for the synthesis of *ansa*-ytterbocenes and -samarocenes. S.K. Adas, G.J. Balaich

**INOR 858.** Cyclopentadienyl pyridazines and oxazines and their applications in energy and advanced electronics. N.C. Tice, E.M. Collins, C.A. Snyder, D.L. Smith

**INOR 859.** Influence of the dicopper core on the reactivity of copper(II) hydrides. A.J. Jordan, P.K. Thompson, C.M. Wyss, J.P. Sadighi

**INOR 860.** Unusual reactivity of PCP-supported rhenium carboxylates. A.J. Kusanovich, W. Shih, O. Ozerov

**INOR 861.** Activation of small molecules by 2-[[dicyclohexylphosphino]ethyl]trimethyl ammonium chloride iridium complexes. J. Knapp, S.H. Schreiner

**INOR 862.** Comparative reactivity studies of iridium(I) and rhodium(I) complexes stabilized by chelating diphosphine ligands. K. Olsen, S.H. Schreiner

**INOR 863.** Synthesis, characterization and reactivity of group ten phosphinoferrrocene - carbonyl complexes. E. Kober, S.H. Schreiner

**INOR 864.** Synthetic and structural comparisons between first row transition metal dithiolato complexes and group 14 metallocenes. J. Pratt, P.P. Power

## Section E

Moscone Center  
Hall D

## Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

5:30 - 7:30

**INOR 865.** Single step access to long-chain  $\alpha,\omega$ -dicarboxylic acids by catalytic isomerizing hydroxycarbonylation. V. Goldbach, L. Falivene, L. Caporaso, L. Cavallo, S. Mecking

**INOR 866.** Carbon dioxide hydrosilylation catalyzed by iron. T. Jurado, J.J. Garcia

**INOR 867.** Robust catalyst for the dehydrogenation of neat formic acid. J. Celaje, Z. Lu, E. Kedzie, J. Lo, N. Terrile, T.J. Williams

**INOR 868.** Olefin oligomerization catalysis: Ligand design, organometallic chemistry, and catalysis. T.C. Wambach, T.D. Tilley

**INOR 869.** Ammonia formation from a bulky triphenolate amine transition-metal nitrido complex. D. Bae, E. Lee

**INOR 870.** 1,5-Regioisomer of the click reaction: Valuable ligand precursors for new Ru-MIC complexes. L. Suntrup, S. Hohloch, B. Sarkar

**INOR 871.** Computational studies of rhodium-catalyzed hydrogenation and carbon dioxide activation. M. Trenerry, M.T. Whited, B.L. Taylor

**INOR 872.** Hydrogenation of unsaturated triglycerides via catalytic hydrogen transfer from glycerol. V. Cherepakhin, T.J. Williams

**INOR 873.** Highly efficient synthesis of N-alkylation of aromatic amines with primary alcohols catalyzed by an ionic ruthenium pincer complex. F. Yang, Y. Wang, Y. Ni, X. Cao, S. Lu, X. Hao, M. Song

**INOR 874.** Synthesis and electrochemistry of ruthenium 2,2'-bipyridine-6,6'-dicarboxylate catalysts using different phosphorus ligands. S. Yazdani, J.M. Kamdar, E.R. Paulson, A.L. Rheingold, D.B. Grotjahn

**INOR 875.** Kinetic investigation of the dehydrogenative borylation of terminal alkynes. B.J. Foley, N. Bhuvanesh, O. Ozerov

**INOR 876.** Tunable catalysis with dimethyl tetraguanidinate paddlewheel complexes. M. Humphries, E. Wusterbarth, B.R. Smith, J.T. Njardarson, D.L. Lichtenberger

**INOR 877.** Catalytic aerobic oxidation by self-sensitized tellurium containing chromophores. L. Lutkus, T. McCormick

**INOR 878.** Reactivity and catalytic studies of transition metal complexes with a triazene ligand functionalized with pyrazole. L.J. Medrano-Castillo, M.A. Collazo-Flores, D. Chávez, D.B. Grotjahn, A.L. Rheingold, V. Miranda-Soto, M. Parra Hake

**INOR 879.** Butterfly [2Fe-2S] cluster-based electrocatalysts with fast rates for hydrogen production. K.E. Clary, O. In-noi, J.M. Marx, K.J. Haller, D.H. Evans, R.S. Glass, D.L. Lichtenberger

‡Cooperative Cosponsorship

**INOR 880.** Rhodium complexes with N-heterocyclic carbene and triazenide ligands as catalysts for alkyne hydrothiolation. **J.P. Camarena-Diaz**, D.B. Grotjahn, A.L. Rheingold, J. Perez-Torrente, R. Castarlenas, L.A. Oro, V. Passarelli, M. Parra Hake, V. Miranda-Soto

**INOR 881.** Oxidation of an iridium hydride pincer complex by O<sub>2</sub>: A DFT study. **J. Williams**, A.M. Wright, K.I. Goldberg, T.R. Cundari

**INOR 882.** Development of novel Pd and Pt catalysts for efficient conversion of methane to methanol. **J. Chen**, **J. Park**, **M. Klosinski**, R. Giron, Y. Lee, B. Rawal, J. Lee, K.W. Jung

## Section F

Moscone Center

Hall D

### Inorganic Catalysts

S. A. Koch, *Organizer*

5:30 - 7:30

**INOR 883.** Olefins from biodiesel: Decarbonylation using a ruthenium catalyst. **B. Benson**, A. John, W.B. Tolman

**INOR 884.** Reduced copper metal-organic frameworks: A heterogeneous catalyst for click chemistry. **K. Xie**, Q. Fu, P. Webley, G.G. Qiao

**INOR 885.** Study on synthesis and catalytic cracking performance of Y zeolite with sheet-like morphology. **S. Cui**, G. Wang, B. Liu

**INOR 886.** Copper nanocrystals embedded in metal-organic frameworks for highly selective CO<sub>2</sub> hydrogenation to methanol. **B. Rungtaweeworanit**, J. Baek, G.A. Somorjai, O.M. Yaghi

**INOR 887.** Mesoporous cobalt oxide with controlled porosity: Efficient catalyst for peroxide free alkene epoxidation under aerobic conditions. **C. Weerakkody**, S.L. Suib

**INOR 888.** Copolymerization of cyclohexene oxide and succinic anhydride using Schiff base Zn complex. **A. Virachotikul**, P. Wongmahasirikun, K. Phomphrai

**INOR 889.** Synthesis of cyclic poly( $\epsilon$ -caprolactone) using tin(II) complex containing soft sidearm initiator. **T. Ungpittagul**, K. Phomphrai

**INOR 890.** Investigation of ring-opening mechanism using x-ray crystallography. **K. Udomsasporn**, K. Phomphrai

**INOR 891.** Cobalt, nickel, and iron Schiff Base complexes for hydrogen production in aqueous solution. **A. Graves**, O. Taghavi, W.T. Eckenhoff

**INOR 892.** Synthesis of aluminum complexes supported by salicylaldehyde ligands for the polymerization of cyclic esters. **P. Pitsitsozon**, P. Wongmahasirikun, K. Phomphrai

**INOR 893.** Electrocatalytic generation of hydrogen gas by cobalt porphyrin-based Metal-Organic Framework (MOF) and amorphous polymer. **Y. Wu**

**INOR 894.** Studies of a low-valent Molybdenum(VI)-dioxo complex as a deoxydehydration catalyst. **R. Tran**, S.M. Kilyanek

**INOR 895.** Novel bi-functional catalyst based on Co<sub>3</sub>O<sub>4</sub> core - MnO<sub>2</sub> shell for rechargeable Li-air battery. **Y. Lee**, D. Kim, S. Ha, S. Kim, Y. Lee

**INOR 896.** Impact of rare-earth dopants on the catalytic activity of CeO<sub>2</sub> nanoparticles for both CO oxidation and preferential CO oxidation reactions. **J. Yoo**, K. Kim, J. Han, W. Jung

**INOR 897.** Aqueous solution palladium catalyzed Suzuki cross coupling reactions: Reaction optimization of base and the effects of base concentration. **T. Olson**, J.G. Parsons

**INOR 898.** Effects of acid strength and position of an intramolecular acidic functional group on the catalytic reduction of CO<sub>2</sub> to CO. **S. Lense**, I.A. Guzei, K. Thao, J. Andersen, M. Schultz

**INOR 899.** Inverse Frustrated Lewis Pair (FLP) approach for catalytic metal-free hydrogenation of imines. **S. Mummadi**, D. Kenefake, R. Diaz, C. Krempner

**INOR 900.** Role of water in the selective oxidation of benzyl alcohol over gold nanoparticle supported catalysts. **A. Tombo**, M.Y. Santos, B. Chandler, C. Pursell

**INOR 901.** Withdrawn.

**INOR 902.** Withdrawn.

**INOR 903.** Characterizing the kinetic capabilities of supported gold nanoparticle catalysts using benzyl alcohol oxidation. **M.Y. Santos**, B.D. Chandler, C. Pursell, A. Tombo

## Section G

Moscone Center

Hall D

### Environmental & Energy-Related Inorganic Chemistry

S. A. Koch, *Organizer*

5:30 - 7:30

**INOR 904.** Impedance studies of silyl/carbonate electrolyte blends. **M. Treichel**, C.A. Ortiz, L.J. Lyons

**INOR 905.** Nitrous oxide removal with titanium oxide. **H. Gokturk**

**INOR 906.** Synthesis and characterization of magnetic nanocomposites for energy storage applications. **B. Shen**, S. Sun

**INOR 907.** Development of a chemosensor device to aid in combatting the trade of fish caught by cyanide fishing. **C. Flynn**, C.A. Sweet, A.R. McCabe, C. Murphy

**INOR 908.** Design of biotemplated titanium dioxide nanoparticles for potential application as anodes in dye-sensitized solar cells. **A. Reyes-Oliveras**, G. De Jesus-Morales, V. López-Mejias

**INOR 909.** Photophysical studies on homoleptic phenylimidazolinato Ir(III) complexes: Electronic effect of terphenyl groups at the phenylimidazolinato ligand. **S. Kim**, Y. Cho, C. Kim, H. Son, S.O. Kang

**INOR 910.** New types of deep blue phosphorescent Ir complexes with sulfonfyl group in phenyl unit of phenyl pyridine ligand: Photodynamic studies of sulfonfyl group effect and their application to solid-state display. **J. Kim**, Y. Cho, S. Yi, C. Kim, H. Son, S.O. Kang

**INOR 911.** Iridium photosensitizers for artificial photosynthesis: Design monomeric and bimetallic Ir-complexes and Ir-dendrimers. **Y. Cho**, C. Kim, H. Son, C. Pac, S.O. Kang

**INOR 912.** Widely controllable syngas (H<sub>2</sub> + CO) production by a dye-sensitized TiO<sub>2</sub> hybrid system with Re(I) and Co(III) dual molecular catalysts under visible-light irradiation. **J. Lee**, D. Won, W. Jung, H. Son, C. Pac, S.O. Kang

**INOR 913.** Role of porphyrin antenna for photocatalytic CO<sub>2</sub> reduction in a hybrid catalyst system: Protection from photo-bleaching. **D. Won**, J. Lee, H. Son, C. Pac, S.O. Kang

**INOR 914.** Photosensitization effects of Ir(III) complexes in selective reduction of CO<sub>2</sub> by Re(I)-complex-anchored TiO<sub>2</sub> hybrid catalyst. **H. Cheong**, S. Kim, Y. Cho, D. Cho, C. Kim, H. Son, C. Pac, S.O. Kang

**INOR 915.** Photophysical studies on homoleptic phenylimidazole iridium(III) complexes: Electronic effect of planar bulky phenylimidazole ligand. **M. Son**, S. Kim, Y. Cho, J. Kim, S. Yi, C. Kim, H. Son, S.O. Kang

**INOR 916.** Molecular engineering of squaraine dyes for efficient far-red and near-IR sensitization in photocatalytic CO<sub>2</sub> reduction. **M. Cho**, H. Son, C. Pac, S.O. Kang

**INOR 917.** Measuring lithium and fluoride diffusion in electrolytes for use in lithium-ion batteries with PFG-STE NMR. **S.A. Beecher**, L.J. Lyons

**INOR 918.** Coupling of chromophoric dyes with applied bias or microwave heating to increase DSSC photo-conversion efficiency. **C.A. Sweet**, C. Flynn, C.J. Timpson, C. Murphy

**INOR 919.** Effect of aliphatic ligand length on triplet energy transfer from PbSe nanoparticles to rubrene. **N. Megerdich**, M. Mahboub, M. Tang

**INOR 920.** Structure, dynamics, and electrochemistry of psychrophilic cytochromes. **S.J. Barth**, J. Chou, S.K. Lone, K.S. Montero, G.J. Salerno, M.C. Buzzeo, J.S. Magyar

**INOR 921.** Bioinspired preparation of melanin-like nanoparticles used for highly nitrogen-doped porous carbon spheres: Enhanced CO<sub>2</sub> capacities and efficient oxygen reduction catalyst. **H. Kim**, M. Kim, M. Kang, Y. Sung, W. Yoo

## Section H

Moscone Center

Hall D

### Electrochemistry

B. L. Lucht, *Organizer*

5:30 - 7:30

**INOR 922.** Vanadium oxide and vanadium oxynitride composite as electrode materials for lithium ion batteries. **W. Huang**, S. Yen, C. Lee, H. Chiu

**INOR 923.** Synthesis, characterization and electrocatalytic performance of binary transition metal borides. **H. Park**, B. Fokwa

**INOR 924.** Exploring electrocatalytic N<sub>2</sub> activation under mild synthetic conditions. **A. Nielander**, J. McEaney, T.F. Jaramillo

**INOR 925.** Rutile TiO<sub>2</sub> Nanorod arrays grown on graphite foil as binder-free flexible electrode for sodium-ion batteries. **Y. Ching Tai**, M. Yang, H. Chiu, C. Lee

**INOR 926.** Molecular rectification: Chemical synthesis and characterization of donor-sigma-acceptor molecules. **G. Ren**, E.J. Parish, H. Honda, H. Shyu, T. Wei

**INOR 927.** Characterization of a dicopper dihydroxide water oxidation electrocatalyst. **S.J. Koepke**, P.E. VanNatta, A. Shrestha, M.T. Kieber-Emmons

**INOR 928.** Electrochemical characterization of selenocystine reactivity at modified gold surfaces. **K. Frommer**, K. Lynch, E. Wiita, M.C. Buzzeo

**INOR 929.** Withdrawn.

## Section I

Moscone Center

Hall D

### Bioinorganic Chemistry: DNA, RNA & Inorganic Drugs

S. A. Koch, *Organizer*

5:30 - 7:30

**INOR 930.** Elucidation of the cell death pathways induced by aqueous-stable titanium(IV) compounds as potential anticancer agents. **Y. Delgado**, A.D. Tinoco

**INOR 931.** Glycoconjugates of organometallic ruthenium-arene complexes. **L. Miller**, L. Kennington, L. Wisniewski, M. Burnatowska-Hledin, A.L. Eckermann

**INOR 932.** Synthesis, characterization, and in-vitro antitumor activity of copper(II) complexes possessing alky-substituted polypyridyl ligands. **J.F. Eichler**, N. Angel, M. Baird, R.M. Khatib

**INOR 933.** Functionalised peptidomimetic metalohelices. **H. Song**, S. Allison, S. Shepherd, R. Phillips, P. Scott

**INOR 934.** Photodynamic therapy of cancer using sterically strained ruthenium complexes. **R.S. Khnazyer**, N. Mansour, S. Mehanna, R.I. Taleb, M. Mroueh, M. ElSibai, C.F. Daher

**INOR 935.** Design, synthesis and characterization of multifunctional platinum-[benz]acridine agents. **X. Yao**, M.W. Wright, M. Yang, J. Lee, C.M. Furdul, U. Bierbach

**INOR 936.** Synthesis, characterization, and binding properties of metal-based G4 intercalators containing a phosphonium tether. **G.M. Marqus**, M. Dixon, M. Powers, C.H. Leung

**INOR 937.** Fluorinated pyrrolic macrocycles for biological imaging: Optical properties and aggregation in solution. **M.A. Kaster**, R. Szlag, K. McAuliffe, E.R. Trivedi

**INOR 938.** Rhenium-oxo and gold corroles: Synthesis, spectroscopy, and application to photodynamic therapy. **R.F. Einrem**, A. Alemayehu, O.A. Gederaas, A. Ghosh

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

INOR **939**. Synthesis and application of silver nanoclusters from DNA templates containing Ag(I)-mediated base pairs. **J. León**, D. Gonzalez-Abradelo, G. Wilde, M. Peterlechner, C. Strassert, J. Müller

INOR **940**. From cations to clusters: Ag<sup>+</sup>-mediated DNA base pairings and fluorescent silver clusters. **S. Swasey**, X. Chen, A. Karpenko, S.M. Copp, O. Lopez-Acevedo, E. Gwinn

INOR **941**. Acid-labile linker design for targeted delivery and release of platinum-acridine anticancer agents. **H. Wang**, M. Yang, U. Bierbach

INOR **942**. Anticancer properties of organorhenium picolinato, nicotinato and tryptophanato complexes. **M. Stevenson**, S. Pramanik, S.K. Mandal

INOR **943**. Cytotoxic properties of organorhenium flufenamato and ibuprofenato complexes on breast cancer cells. **S. Parnell**, S. Pramanik, S.K. Mandal

INOR **944**. Anticancer properties of organorhenium mefenamato and tolfenamato complexes. **T. Hinton**, S. Pramanik, S.K. Mandal

INOR **945**. Chemical biology of Cu(II) complexes with imidazole or thiazole containing ligands: Synthesis, crystal structures and comparative biological activity. **L.A. Tyler**, A. Lewis, M. McDonald, S. Scharbach, S. Hamaway, K.M. Fox, J. Tanski, L. Cassimeris

## Section J

Moscone Center  
Hall D

### Bioinorganic Chemistry: Proteins & Enzymes & Model Systems

S. A. Koch, *Organizer*

5:30 - 7:30

INOR **946**. Square planar copper (I) complexes with geometric constraints pertinent to copper proteins. **P. Cheung**, R. Berger, J.D. Gilbertson

INOR **947**. Synthetic models of Ni-thiolate coordination units in biology. **R.A. Steiner**, T.C. Harrop

INOR **948**. Electronic ground state determination of a novel paramagnetic iron(III)-superoxo complex by Mössbauer spectroscopy, EPR, and DFT. **H. Stout**, S.T. Kleespies, C. Chiang, W. Lee, L. Que, E. Munck, E.L. Bominaar

INOR **949**. Electronically versatile benzenedithiolates on electronic and coordination structures of metal complexes: Mimicking the electronic interplay in [FeFe]hydrogenase active site. **Y. Liu**, K. Chu, M.H. Chiang

INOR **950**. Withdrawn.

INOR **951**. Nitrite reduction by a PDI complex with a proton-responsive secondary coordination sphere. **M. Delgado**, Y.M. Kwon, J.D. Gilbertson

INOR **952**. Probing Pterin reduction dynamics in synthetic molybdenum cofactor models. **A.L. Nagelski**, D.R. Gisewhite, B.R. Williams, S.J. Nietzer Burgmayer

INOR **953**. Increasing the coordination kinetics of the Acetylene Hydratase (AH) model complex via pseudo-hydroxylation. **T. Marshall**, M.A. Cranswick

INOR **954**. Mechanistic insight into nitrite to nitric oxide conversion at copper(I) and copper(II) sites. **Z. Sakhaei**, S. Kundu, J. Donnelly, T.H. Warren

INOR **955**. Extended broken symmetry approach to modeling structures and spectroscopic properties of oxidized and reduced 2Fe-2S clusters from ferredoxin. **R.A. Wheeler**, B.R. Jagger, A.M. Koval

INOR **956**. New metal complexes of tridentate N,N,O scorpionate ligands. **S.E. Sherman**

INOR **957**. Chemosensors for Ni(II) employing N/S-based donors. **E. Broering**, T.C. Harrop

INOR **958**. Synthesis and reactivity studies of nickel-selenium complexes. **L. Cordeiro**, G.P. Yap, C.G. Riordan

## Section K

Moscone Center  
Hall D

### Coordination Chemistry: Characterization & Applications

S. A. Koch, *Organizer*

5:30 - 7:30

INOR **959**. Transition metal complexes with triamidoborane-bridged diphosphines: Coordination chemistry, reactivity, and XAS studies. **K. Lee**, C.M. Donahue, A.V. Blake, S.R. Daly

INOR **960**. Scavenging for triiodide *via in situ* crystallization of tripladium(II) cyclophane molecules in photo-cyclopropanation reactions. **H. Lee**, O. Jung

INOR **961**. Combined effects of peripheral fluorine and central metal on phthalocyanine properties. **R. Szlag**, M.A. Kaster, E.R. Trivedi

INOR **962**. Withdrawn.

INOR **963**. Synthesis, characterization and anticancer studies of tris-dithiocarbamate ruthenium(III) complexes. **P.A. Ajibade**

INOR **964**. Coordination complexes with guanidine-type ligands towards cleavage of aryl-heteroatom bonds found in naturally occurring feedstocks. **K.D. Feller**, B. Barry

INOR **965**. Complexes with bis-guanidine-type ligands towards insertions into sp<sup>2</sup>-heteroatom bonds. **J. Bruggen**, B. Barry

INOR **966**. Nanojar reactivity with acidic compounds and their conjugate base ligands. **C.K. Hartman**, G. Mezei

INOR **967**. Probing slow magnetic relaxation in a series of mononuclear uranium (V) compounds. **D. Lussier**, J.R. Long, D.K. Shuh

INOR **968**. Vanadium-Dependent Haloperoxidase Enzymes: A Review of Mechanism, Structure-Functional Relationships, and Coordination Environments. **K. Doucette**, C. Wallace, C.C. McLauchlan, D.C. Crans

INOR **969**. Coordination chemistry of the rhodizonate anion with Pb(II) and lanthanides: From understanding complexation to analytical applications. **J.A. Silverman**, E.V. Govor, K. Kavallieratos

INOR **970**. Theoretical computations of tunable bimetallic systems. **C. Feng**, M.B. Pastor, **Q. Zhao**

## Section L

Moscone Center  
Hall D

### Lanthanide & Actinide Chemistry

A. De Bettencourt Dias, *Organizer*

5:30 - 7:30

INOR **971**. Actinide mediated C-X activation chemistry. **J.M. Dorhout**, M.J. Monreal, D.E. Morris, B. Scott, K.D. Abney, J.L. Kiplinger

INOR **972**. Very low-temperature lanthanide and actinide borates from boric acid flux. **A.T. Chemya**, S.S. Galley, T.E. Albrecht-Schmitt

INOR **973**. Gas phase chemistry of the Ln(III)-TMGA/TMTGA complexes. **X. Chen**, Q. Li, Y. Gong

INOR **974**. Design and synthesis of tri-substituted benzene compounds used as extractants in nuclear waste remediation. **B.G. Wackerle**, S.M. Biros

INOR **975**. Development of bidentate ligands containing soft donor atoms for actinide chelation. **C.C. Miller**, S.M. Biros, J.E. Bender

INOR **976**. Hyp/Sb for separation of heavy metals. **E.G. Leach**, S.M. Biros, J.E. Bender

INOR **977**. Synthesis and characterization of (2-methoxyphenyl)diphenylphosphine derivatives for nuclear waste remediation. **E. Christoffersen**, S.M. Biros, J.E. Bender

INOR **978**. Phosphine ligands for the extraction of f-block elements: Use in nuclear waste remediation. **A.R. Spyker**, S.M. Biros, J.E. Bender

INOR **979**. Novel synthesis, structure, and enhanced photoluminescence of lanthanide dicyanoaurates containing aurophilic interactions. **T. Hamby**, R. Sykora, J. Hendrich, E. Kost

INOR **980**. Optimizing hydrothermal reaction conditions for lanthanide coordination polymer formation: A study of the 1,4-benzenedicarboxylate system. **J. Einkauf**, D.T. de Lill

INOR **981**. Recovery and recycling of Pu-238 in spent nuclear fuel to increase the sustainability of nuclear reactors using extraction and luminescence techniques. **M. Hudson**, G. Deblonde, R.J. Abergel, S.M. Biros

INOR **982**. Design of lanthanide half-sandwich complexes exhibiting single-molecule magnetism. **R. Khoo**, J.R. Long

## Section M

Moscone Center  
Hall D

### Emergent Phenomena in the Solid State

B. C. Melot, E. E. Rodriguez, *Organizers*

5:30 - 7:30

INOR **983**. Structural, magnetic, and electrical properties of Pr<sub>2</sub>Fe<sub>1-x</sub>Mn<sub>x</sub>Sb<sub>2</sub> (x = 0.5, 1.0). **I.W. Oswald**, S. Li, B. Lv, J. Chan

INOR **984**. Metastable layered metal chalcogenides: From superconductivity to ferromagnetism. **B. Wilfong**, X. Zhou, H.K. Vivanco, E.E. Rodriguez

INOR **985**. Antimony nets and transition metal sublattices: The structure and properties of Ln<sub>2</sub>Fe<sub>4-x</sub>CoxSb<sub>5</sub> (Ln = La-Pr; x < 1.5). **K. Benavides**, S. Li, J.V. Burnett, B. Lv, J. Chan

INOR **986**. Evolution of the magnetic properties in the series M<sub>2</sub>FeB<sub>2</sub> (M = V, Nb, Mo, Ta and W). **J. Scheifers**, V. Shukla, B. Fokwa

INOR **987**. Topochemical intercalation and ion-exchange of layered iron sulfides via low-temperature hydrothermal routes. **X. Zhou**, B. Wilfong, H.K. Vivanco, E.E. Rodriguez

INOR **988**. Effect of ionicity on magnetism of K<sub>2</sub>MnS<sub>2</sub>. **A. Bhutani**, P. Behera, K. Kihlstrom, M. Smylie, U. Welp, W. Kwok, E.E. Rodriguez, A. Huq, D. Shoemaker

INOR **989**. Intercalation chemistry of CoSe and Co<sub>1-x</sub>Fe<sub>x</sub>Se mixed phase. **H.K. Vivanco**, B. Wilfong, X. Zhou, E.E. Rodriguez

INOR **990**. Structural design of magnetoelectric multiferroics in garnets. **A.J. Neer**, B.C. Melot

INOR **991**. Synthesis and characterization of Hf<sub>2</sub>Ru<sub>5-x</sub>M<sub>2</sub>B<sub>2</sub> (M = Fe, Co, Ni) -towards rare-earth-free magnets. **P. Shankhari**, B. Fokwa

INOR **992**. Red, white, and blue: Controlling the luminescence of doped rare-earth oxychloride nanocrystals by ligand selection and compositional modulation. **G.V. Villalpando**, G.R. Waetzig, G.A. Horrocks, S. Banerjee

INOR **993**. Properties and design of multifunctional phyllosilicates. **E. Howard**, B.C. Melot

## Section N

Moscone Center  
Hall D

### Chemistry is Central to Applied Materials

C. R. Bertozzi, C. J. Chang, M. A. Paley, *Organizers*

5:30 - 7:30

INOR **994**. Self-healing metallogels as the recyclable materials for selective dye adsorption and separation. **C.K. Karan**, M. Bhattacharjee

INOR **995**. Withdrawn.

INOR **996**. TAAILs - Tunable aryl-alkyl ionic liquids: A new generation of ionic liquids. **T. Strasser**

INOR **997**. Effects of calcination intensity on rutile TiO<sub>2</sub> white pigment production via short sulfate process. **C. Tian**

INOR **998**. Highly selective Ru/TiO<sub>2</sub> catalysts for HDO of phenolic compound: Effects of support structure and partial substitution of nickel for ruthenium. **S. Husremovic**, R.C. Nelson, B.G. Frederick, R.N. Austin, A. Mahdavi, S. Ki

INOR **999**. Novel approaches to the chemical syntheses of azamacrocyclic compounds and derivatives. **G. Ren**, E.J. Parish, Y. Lo, **H. Honda**, T. Wei

INOR **1000**. Calcium cobalt hexacyanoferrate cathodes for rechargeable divalent ion batteries. **J. Thiebaut**, P. Padigi, N. Kuperman, G.M. Goncher, D. Evans, R. Solanki

INOR **1001**. Graphene-On-Silica, CMOS-integrable, thermal-guiding structures: Applications in Boolean-Logic and neuromorphic computation. **D. Loke**, J. Skelton, T. Chong, S. Elliott

INOR **1002**. Difluoroboron  $\beta$ -diketone poly lactides as luminescent oxygen sensing materials for wound imaging. **C.A. DeRosa**, S.A. Seaman, A.S. Mathew, C.M. Gorick, Z. Fan, J.N. Demas, S.M. Peirce, C. Fraser

## Section O

Moscone Center  
Hall D

### Chemistry of Materials

C. G. Lugmair, *Organizer*

#### 5:30 - 7:30

INOR **1003**. White light emission of lead(II) metal-organic frameworks. **A. P. Peedikakkal**, J.J. Vittal

INOR **1004**. Interface-facilitated hydrothermal synthesis of large-area graphene-like carbon nanosheets from toluene. **H. Gao**, G. Wang, S. Fan, C. Dong, A. Li, X. Zhu, X. Li

INOR **1005**. Effect of electrodeposition variables on the topography and photoelectron kinetics of zinc oxide nanorods grown on graphene. **C. Villarreal**, **D. Pirzada**, **A. Wong**, A.K. Mulchandani

INOR **1006**. Crystal structure features and luminescent properties of the copper-doped Ca-Eu apatite. **M. Pogosova**, F. Azarmi

INOR **1007**. Structure and reducibility of CeO<sub>2</sub> doped with trivalent cations. **A.K. Lucid**, G.W. Watson

INOR **1008**. Facile fabrication of recyclable magnetic oxide@MOF nanocomposites for aerobic oxidation of benzylic C-H bonds. **G. Wang**, S. Fan, H. Gao, J. Wang, D. Jia

INOR **1009**. Polydopamine-induced CaCO<sub>3</sub> mineralization and its application for the synthesis of nanostructured electrocatalysts. **J. Ko**, C. Park

INOR **1010**. Molecular origins of superacidity in sulfated MOF-808. **C. Trickett**, C. Yan, T. Popp, J. Jiang, A. Hu, J.A. Reimer, M.D. Fayer, O.M. Yaghi

INOR **1011**. Polyttypism in the Nowotny-Juza Compounds: Synthetic and Computational Investigation of Solution Phase I-II-V Semiconductors. **A. White**, G.J. Miller, J. Vela Becerra

INOR **1012**. Alkali bismuth dichalcogenides: Emerging energy materials for photovoltaics and thermoelectrics. **B. Rosales**, J. Vela-Becerra

INOR **1013**. Ge<sub>1-x</sub>Sn<sub>x</sub>/II-VI Core-shell nanostructures: Towards near IR active direct band gap semiconductors. **H. Andaraarachchi**, L. Men, J. Vela-Becerra

INOR **1014**. Withdrawn.

INOR **1015**. Cesium germanium iodide perovskite nanocrystals: Photovoltaics beyond organolead perovskites. **L. Men**, B. Rosales, N. Gentry, J. Vela-Becerra

INOR **1016**. 3D Macroporous TiO<sub>2</sub>@CeO<sub>2</sub> and TiO<sub>2</sub>@AuNP composite fabrication and application. **B. Baruah**, D. Corella, M. Geiger

INOR **1017**. Synthesis and characterization of cationic silver(I) coordination polymers for photoluminescent properties. **E. Soe**, J. Kim, S. Oliver

INOR **1018**. Organo-oxo tin cluster reactivity: Insight into cluster formation, degradation, and interconversion. **M.C. Sharps**, J.E. Hutchison, D.W. Johnson

INOR **1019**. Modelling defects in LaMnO<sub>3</sub> for solid oxide fuel cell cathodes. **A.L. Gavin**, G.W. Watson

INOR **1020**. Single molecular Wells-Dawson-like heterometallic cluster for the preparation of multifunctional carbon materials: A T1- and T2-weighted dual mode magnetic resonance imaging agent and drug delivery system. **Q. Zhang**, **Y. Ling**, **Y. Zhou**

INOR **1021**. Two principles of reticular chemistry uncovered in a metal-organic framework of heterotritopic linkers and infinite secondary building units. **N.R. Catarineu**, A. Schoedel, P. Urban, M.B. Morla, C. Trickett, O.M. Yaghi

INOR **1022**. Novel approaches to the chemical synthesis of polycyclic electron-donor for nanoelectronic materials study. **E.J. Parish**, G. Ren, Y. Lo, **H. Honda**, **M. Hsiao**, T. Wei

INOR **1023**. Size tunable submicro/micro TiO<sub>2</sub>-related spheres synthesized by sol-gel process and the applications. **Y. Chen**, K. Chan, H. Chiu, C. Lee

INOR **1024**. Integration of oriented anatase TiO<sub>2</sub> electron transport layer into perovskite solar cells to improve carrier separation. **H. Dehnashi**, **M.L. Mayer**, A. Yore, Y. Tran, M. Howard, A. Newaz, A.S. Ichimura

INOR **1025**. Environmentally friendly and versatile method for the synthesis of transition metal alloys and their hybrid nanoparticles. **A. Penn**, J. Sharpsteen, H.P. Rathnayake

INOR **1026**. Photoelectrochemical mechanism for instability of blue-phosphorescent Ir(III) complexes in electroluminescence devices. **S. Kim**, H. Bae, S. Park, J. Kim, J. Kim, Y. Jung, S. Sul, S. Ihn, C. Noh, S. Kim, Y. You

INOR **1027**. Fabrication and application of graphene oxide composite films. **J. Shen**, Y. Feng, C. Ma, D. Zhang, Z. Xiao, Z. Hui, **Y. Liu**, **Y. Min**

INOR **1028**. In situ one-pot synthetic approach towards multivariate Zr-MOFs. **Y. Sun**, H. Zhou

INOR **1029**. Hyperpolarized silicon nanoparticles as biocompatible contrast agents for <sup>29</sup>Si magnetic resonance imaging. **H. Seo**, I. Choi, D. Kim, Y. Lee

INOR **1030**. Mesoporous aluminosilicate nanoparticles hosting glow discharge plasma reduced silver nanoparticles for desulfurization of liquid hydrocarbon fuels. **J. Hauser**, D. Tran, E. Conley, J. Saunders, K. Bastillo, S. Oliver

INOR **1031**. Bottom-up synthesis approach to convert layered metal-organic framework materials into hierarchical porous structures. **Z. Li**, K. He, W. Han, K. Yeung

INOR **1032**. Discovery of earth abundant catalysts towards the implementation of a hydrogen economy. **T. Soucy**, J. Mondschlein, J. McEnaney, C. Badding, R. Schaeck

INOR **1033**. Preparation and structural studies of hexyldecylamine/oleic acid capped ruthenium sulfide nanocrystals. **P.A. Ajibade**

INOR **1034**. Synthesis and characterization of three cationic, isorecticular layered materials based on neodymium and  $\alpha,\omega$ -alkanedisulfonates. **A. Kareh**, S. Oliver

INOR **1035**. Selective aerobic oxidation of primary alcohols to aldehydes in functionalized mesoporous silica nanoparticles. **D. Singappuli-Arachchige**, J. Manzano, L.M. Sherman, I.I. Slowing

INOR **1036**. Crystallizing one-dimensional metal-organic sulfide as cathode material of lithium-ion battery. **Z. Ji**, C. Trickett, H. Jeong, A. Schoedel, O.M. Yaghi

INOR **1037**. Synthesis and catalytic reactions with macroporous botanically templated metal oxides and metal on carbon structures. **N. Black**, E.G. Gillan

INOR **1038**. Metal-organic frameworks as templates for transition metal clusters. **A. Turkiewicz**, M.I. Gonzalez, L.E. Darago, J.R. Long

INOR **1039**. Cytocompatible polysaccharide incorporated biometric tubules. **K. Punia**, M. Bucaro, A. Punia, A. Bykov, K.S. Raja

INOR **1040**. Efficient ammonia adsorption property of Prussian blue analogues. **A. Takahashi**, H. Tanaka, D. Parajuli, T. Nakamura, K. Minami, Y. Sugiyama, Y. Hakuta, S. Ohkoshi, T. Kawamoto

INOR **1041**. Three versatile Pt(II) oxime complexes that display anion sensing, thermochromism, and solvatochromism. **S.O. Elsidieq**, F.R. Fronczek, A.W. Maverick

INOR **1042**. Molybdenum sulfide molecular clusters for 2D-materials. **C. Bejger**, J.L. Shott, M. Howington, J. Johnson

INOR **1043**. Crystal engineering of metal-inorganic frameworks from phosphorescent building blocks. **J. Ivv**, M.A. Omari

INOR **1044**. Nickel telluride as a bifunctional electrocatalyst for efficient water splitting in alkaline medium. **U. De Silva**, W.P. Liyanage, J. Masud, M. Nath

## Section P

Moscone Center  
Hall D

### Inorganic Nanomaterials: Structure & Function in 0, 1 & 2 Dimensions

K. R. Kittilstved, E. J. McLaurin, *Organizers*

#### 5:30 - 7:30

INOR **1045**. Soft-templating strategies for anisotropic Au nanomaterials and hollow multi-Au@SiO<sub>2</sub> nanosystems. **H. Yoo**

INOR **1046**. High performance CsPbX<sub>3</sub> perovskite quantum dot light emitting devices achieved via solid-state ligand exchange. **Y. Suh**, T. Kim, H. Park, C. Lee, J. Park

INOR **1047**. GeP<sub>3</sub> thin layers: Novel 2D materials revealed by first-principles calculations. **Y. Jing**

INOR **1048**. Imaging interactions between dipole emitters and single nanowires. **E. Johlin**, J. Solari, S.A. Mann, J. Wang, T. Shimizu, E. Garnett

INOR **1049**. Size control and Sb doping of solution grown two-dimensional Bi<sub>2</sub>Se<sub>3</sub> nanoplates. **A.J. Bernard**, Y. Hou, D. Yu, S. Kauzlarich

INOR **1050**. Characterization of solution-based exfoliated two-dimensional nanosheets. **K. Pachuta**, A. Sehirlioglu, E. Pentzer

INOR **1051**. Vapor-Phase epitaxial growth of aligned nanowire networks of cesium lead halide perovskites (CsPbX<sub>3</sub>, X = Cl, Br, I). **J. Chen**, Y. Fu, L. Samad, L. Dang, Y. Zhao, S. Shen, L. Guo, S. Jin

INOR **1052**. Pt Nanoparticle anchored molecular self-assemblies of DNA: A stable and efficient electrocatalyst for hydrogen generation. **S. Anantharaj**, **S. Kundu**

INOR **1053**. Titanium metal nanowires via electrospon polymer nanocomposite. **H.E. Lacy**, A.S. Ichimura, K. Teh

INOR **1054**. Solution growth of lead halide perovskite nanowires for high-performance wavelength-tunable nanowire lasers. **Y. Fu**, H. Zhu, X. Zhu, S. Jin

INOR **1055**. Polyttypic phase transitions in metal intercalated 2D Bi<sub>2</sub>Se<sub>3</sub> nanoribbons. **M. Wang**, K.J. Koski

INOR **1056**. Exploring biphasic routes to functionalized CdSe nanoparticles for use in solar nanocomposites. **K. Bolduc**, **M.E. Hagerman**, J.D. Kehlbeck

INOR **1057**. New route for the formation of SnSe thermoelectric materials with low thermal conductivity. **S. Kundu**, S. Yi, C. Yu

INOR **1058**. Mechanism of galvanic replacement reactions for hollow germanium nanoparticles. **X. Qi**, S. Kauzlarich

INOR **1059**. Impact of surface reconstruction on the electronic structure of PbS QD nanocrystals: Experiment and theory. **C.F. Gervasi**, H.J. Seeley, D.A. Kisiltsyn, T.L. Allen, G. Nazin

INOR **1060**. Assembly of CdSe quantum dots and gold nanorods into discrete arrangements with unique optical properties. **B. Szychowski**, M. Daniel

INOR **1061**. Towards broadband-emitting 2D-perovskites LEDs. **P. Carmona Monroy**, D. Solis, E. Perez Gutierrez

INOR **1062**. Elucidating the effect of fluoride-containing ionic liquids on indium phosphide nanocrystals. **S. Lee**, E.J. McLaurin

## Section Q

Moscone Center  
Hall D

### Solid-State Inorganic Chemistry

C. G. Lugmair, V. Poltavets, *Organizers*

#### 5:30 - 7:30

INOR **1063**. Large-scale synthesis of Sb<sub>2</sub>Q<sub>3</sub> (Q = S, Se) nanofibers topotactically converted from ternary metal chalcogenides and their optical and transport properties. **H. Lee**, M. Kim, B. Yoo, K. Ahn, I. Chung

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**INOR 1064.** Hydrothermal synthesis and characterization of three-dimensional titanium(III) phosphites. L. Hung, S. Wang

**INOR 1065.** Mechanoconglomeration and mechanoracemization of gold(I) complex crystals with optical properties alternation. M. Jin, T. Seki, H. Ito

**INOR 1066.** Synthesis, crystal structure, and thermoelectric properties of new phosphides  $\text{BaCu}_3\text{P}_3$  and  $\text{Ba}_2\text{Cu}_{11.2}\text{Mg}_{2.8}\text{P}_{10}$ . J. Mazzetti, J. Wang, K. Kovnir

**INOR 1067.** Synthesis and structural evaluation of manganese doped cobalt oxides. A.R. Thuli, A.M. Morey

**INOR 1068.** Sol-gel synthesis and characterization of lithium nickel cobalt oxides. J.J. McCune, A.M. Morey

**INOR 1069.** Heat treatment intensity on rutile pigment production from unenriched industrial  $\text{TiOSO}_4$  solution via short sulfate process. C. Tian

**INOR 1070.** Two zinc titanophosphates containing organic linkers from in situ metal/ligand reactions. L. Huang, P. Chen, L. Hung, S. Wang

**INOR 1071.** Superhard alloys of transition metal dodecaborides:  $\text{Zr}_{1-x}\text{Y}_x\text{B}_{12}$ ,  $\text{Zr}_{1-x}\text{Sc}_x\text{B}_{12}$  and  $\text{Y}_{1-x}\text{Sc}_x\text{B}_{12}$ . G. Akopov, M.T. Yeung, Z.C. Sobell, C.L. Turner, R.B. Kaner

**INOR 1072.** Metal flux and supercritical fluid syntheses of actinide materials. W. Potter, T.E. Albrecht-Schmitt, S.E. Latturmer

**INOR 1073.** Optimization of the CsCl reduction-oxidation flux synthesis of Cs-Zn-Sb clathrates. S. Heinrich, B. Owens-Baird, J. Dolyniuk, K. Kovnir

**INOR 1074.** Thermoelectric properties of n-type SnSe-based materials. J. Cha, K. Ahn, I. Chung

**INOR 1075.** Tunable optical properties of Sn-based perovskite compounds. M. Lee, I. Chung

**INOR 1076.** Novel light emitting phosphors based on olivine structure type oxide,  $\text{CaYGaO}_4$ . S.M. Araiza, K. Slowinska, S. Derakhshan

**INOR 1077.** Chemical conjugation of rare-earth oxychloride nanocrystals to hybrid organic-inorganic perovskite nanoplatelets for solid-state lighting applications. F.A. Rodriguez Ortiz

**INOR 1078.** Stabilization of  $\text{GdB}_{12}$  in  $\text{Zr}_{1-x}\text{Gd}_x\text{B}_{12}$  under ambient pressure. G. Akopov, Z. Sobell, M. Yeung, R.B. Kaner

**INOR 1079.** Using a dataset of magnetic material properties to screen for magnetocalorics. J.D. Bocarsly, E. Levin, S. Wilson, R. Seshadri

**INOR 1080.** Effects of microstructurally induced strain on magnetic properties of biphasic Heusler systems. E. Levin, M. Buffon, P. Callahan, J. Stinville, S. Mooraj, D. Gianola, T. Pollock, R. Seshadri

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## WEDNESDAY MORNING

### Section A

Moscone Center  
2009

#### Deposition & Etching of Nanostructures

Cosponsored by COLLE<sup>†</sup>

Financially supported by ACS Publications, Strem Chemical

H. Fairbrother, A. V. Walker, *Organizers*

L. McElwee-White, *Organizer, Presiding*

#### 8:30 Introductory Remarks.

**8:35 INOR 1081.** Using inherent substrate-dependent nucleation to promote selective-area atomic layer deposition. G. Parsons, P. Lemaire, M. Ritz, C.J. Oldham

**9:10 INOR 1082.** Deposition of ZnO nanostructures on graphene: Application as tin oxide-free photoanodes. C. Villareal, D. Pirzada, A. Wong, A.K. Mulchandani

**9:35 INOR 1083.** Sustainable manufacturing of functional materials. C.J. Carmalt

#### 10:10 Intermission.

**10:30 INOR 1084.** Cobalt metal thin films: Precursor syntheses, atomic layer deposition, and selective growth. C.H. Winter

**11:05 INOR 1085.** Chemical self-assembly strategies for metal-organic surface structures. J. Kestell, R. Abulflaha, D. Olson, W.T. Tysoe

**11:30 INOR 1086.** New precursor chemistries for ALD of transition metal oxides. A. Devi

### Section B

Moscone Center  
2011

#### Celebrating 60 Years of the Division of Inorganic Chemistry

##### Young Investigators & Officers

D. C. Crans, *Organizer*

M. J. Clarke, *Organizer, Presiding*

L. M. Berreau, C. Turro, *Presiding*

#### 8:00 Introductory Remarks.

**8:05 INOR 1087.** Chemical tools for investigating cellular zinc metalloenzymes. E.L. Que

**8:35 INOR 1088.** Engineering molecular materials for applications in energy storage. A. Baumann, D. Burns, V. Thoi

**9:05 INOR 1089.** Nonaromatic tetrapyrrole metal complexes supporting a multielectron redox chemistry for efficient dioxygen activation. J. Rosenthal, J. Eddy, T. Qiu

**9:35 INOR 1090.** De novo design of metalloproteins. I.V. Korendovych

#### 10:05 Intermission.

**10:20 INOR 1091.** Highly stable Metal-organic frameworks with ultrahigh capacitance. D. Feng, Z. Bao

**10:50 INOR 1092.** Coordination chemistry with fullerene-based ligands. A.L. Balch, M.M. Olmstead, A. Aghabali, S. Jun

**11:20 INOR 1093.** Employing novel porphyrinoid ligands to access biomimetic manganese and iron complexes of relevance to  $\text{O}_2$ -activating heme enzymes. D.P. Goldberg, J. Zaragoza, R.A. Baglia, J. Sacramento

**11:50 INOR 1094.** Lanthanide complexes and materials with sensitized metal-centered luminescence. A. De Bettencourt Dias

### Section C

Moscone Center  
2016

#### Frontiers in Heavy Element Electronic Structure

Cosponsored by NUCL

D. L. Clark, D. K. Shuh, *Organizers*

L. Soderholm, *Organizer, Presiding*

**8:30 INOR 1095.** Up all night with Bruce: From computations to experiments to real computations & experiments. G.G. Stanley

**8:50 INOR 1096.** Designing activated carbons for Hg removal from coal combustion flue gas. R. Cayton

**9:10 INOR 1097.** Counting electrons: What they don't teach you in general chemistry. J.S. D'Acchioli, M.K. Helli, P. Sit, E.D. Speetzen, A. Webster, C. Mueller, D. Cunningham

**9:30 INOR 1098.** Electronic structure and metal-metal bonding in heterobimetallic and heterotrimetallic complexes of a redox-active metalloligand. A.F. Heyduk, M. Wojnar, K.E. Rosenkoetter

**9:50 INOR 1099.** Bonding with Bruce. D.L. Clark

#### 10:10 Intermission.

**10:30 INOR 1100.** Intriguing aspects of non-innocent ligands in transition metal complexes. M.B. Hall

**10:50 INOR 1101.** Give It some thought: Inorganic chemistry and nanotechnology. C.J. Murphy

**11:10 INOR 1102.** Magnetic circular dichroism and electronic absorption spectra of multiply metal-metal bonded rhenium dimers. A.P. Sattelberger, M.L. Kirk, F. Poineau, E. Johnstone, K. Czerwinski, D. Habel-Rodriguez

**11:30 INOR 1103.** Heavy element chemistry in a heterogeneous context. W.F. Schneider

**11:50 INOR 1104.** Excited states of mononuclear and dinuclear complexes and their applications. C. Turro

### Section D

Moscone Center  
2018

#### Solid-State Inorganic Chemistry

C. G. Lugmair, V. Poltavets, *Organizers*

S. E. Latturmer, F. Rabuffetti, *Presiding*

**8:30 INOR 1105.** Lead- and tin-based two-dimensional hybrid organic-inorganic iodide perovskites: Structure, properties and application in planar solar cells. L. Mao, H. Tsai, W. Nie, L. Ma, J. Im, C. Stoumpos, C. Malliakas, M.R. Wasielewski, A.D. Mohite, M.G. Kanatzidis

**8:45 INOR 1106.** Pressure-induced structural, electronic, and optical evolution of hybrid perovskites. A. Jaffe, Y. Lin, C. Beavers, J. Voss, W. Mao, H. Karunadasa

**9:00 INOR 1107.** Tuning indirect to direct bandgaps in double perovskites. T. Tran, J. Panella, J. Chamorro, J.R. Morey, T. McQueen

**9:15 INOR 1108.** Structure and dynamics of perovskite formamidinium lead iodide: Phase transitions, reentrant properties, persistent molecular motion, and large positive thermal expansion. D.H. Fabini, G. Laurita-Plankis, C. Stoumpos, T. Siaw, S. Han, M.G. Kanatzidis, R. Seshadri

**9:30 INOR 1109.** Trends in the lone pair-induced local off-centering of tin and lead atoms in halide perovskites. G. Laurita-Plankis, D.H. Fabini, C. Stoumpos, M.G. Kanatzidis, R. Seshadri

**9:45 INOR 1110.** Negative thermal expansion and other anomalous properties in mixed metal fluorides with structures related to that of  $\text{ReO}_3$ : A perovskite with helium on the A-site? A.P. Wilkinson, B. Hester

**10:00 INOR 1111.** Tuning photochemical and photophysical properties of metallosupramolecular materials. A. Razzoni, A. Ostrowski

#### 10:15 Intermission.

**10:30 INOR 1112.** Synthesis of new complex metal hydrides and carbides from ytterbium/lithium flux. M. Dickman, S.E. Latturmer

**10:45 INOR 1113.** *In situ* identification of kinetic factors that expedite inorganic crystal formation and discovery. Z. Jiang, A. Ramanathan, D. Shoemaker

**11:00 INOR 1114.** Dynamic origins of noncentrosymmetry in  $\text{KNbOF}_6$ . M. Holland, K.R. Poeppelmeier, J. Rondinelli, N. Charles

**11:15 INOR 1115.** In-situ reduction study of the effect of anion concentration in the Fe-Ga-S system. R. McAuliffe, D. Shoemaker

**11:30 INOR 1116.** Design of piezoelectric heterostructural alloys. S. Miller, K. Talley, A.W. Weimer, A. Zakutayev, S. Lany, C. Musgrave, G. Brennecke, A. Holder

**11:45 INOR 1117.** Piezoelectrics: Putting the squeeze on new materials. M. Dolgus

**12:00 INOR 1118.** Low-Barrier "H-M-H" molecular rotor. E. Prack, C.A. O'Keefe, J.K. Moore, A. Lai, A.J. Lough, P.M. Macdonald, M.S. Conradi, R.W. Schurko, U.W. Fekl

**12:15 INOR 1119.** Synthesis of bimetallic trifluoroacetates through a crystallochemical investigation of their monometallic counterparts: The case of  $(\text{A}, \text{A}')(\text{CF}_3\text{COO})_2 \cdot n\text{H}_2\text{O}$  ( $\text{A}, \text{A}' = \text{Mg}, \text{Ca}, \text{Sr}, \text{Ba}, \text{Mn}$ ). B. Dhanapala, N. Mannino, K. Dissanayake, L. Suescun, F. Rabuffetti

### Section E

Moscone Center  
2020

#### Chemistry of Materials: Nanomaterials

C. G. Lugmair, *Organizer*

B. E. Cohen, F. Rabuffetti, *Presiding*

**8:00 INOR 1120.** Pnictide precursors for pnictide-based thermoelectric nanomaterials. A. Das

**8:20 INOR 1121.** Syntheses of  $\text{Zn}_{1-x}\text{Cd}_x\text{S}$  nanocrystals with tunable band structure for efficient reduction of nitroaromatics in water. M. Kaur

**8:40 INOR 1122.** Improved covalent protein labeling and single-molecule optical properties of compact  $\text{CdSe}/\text{CdS}$  quantum dots. B.E. Cohen, A. Powers, S. Wichner, A. Yildiz

<sup>†</sup>Cooperative Cosponsorship

- 9:00 INOR 1123.** Investigations of using environmentally responsive polymers as capping materials for aluminum nanoparticles. **W. Zeng, S.W. Buckner, P.A. Jelliss**
- 9:20 INOR 1124.** Ultrathin copper based core shell nanowires for high-performance transparent conductors - from synthesis to application. **F. Cui, P. Yang, L. Dou, Z. Niu, Y. Yu**
- 9:40 INOR 1125.** Chemically and structurally flexible hosts for Yb-Er sensitizer-activator pairs. **K. Dissanayake, B. Dhanapala, F. Rabuffetti**
- 10:00 Intermission.**
- 10:15 INOR 1126.** Flexible transparent film heaters based on random networks of silver nanowires: Synthesis, characterization and integration into devices. **C. Celle, T. Sannicolo, D. Toybou, A. Cabos, J. Simonato**
- 10:35 INOR 1127.** Fabrication of high quality compressible 3D graphene aerogel based on graphene oxide nanobelts and for supercapacitor. **T. Fan, Z. Xiao, T. He, Y. Liu, Y. Min**
- 10:55 INOR 1128.** Expansion of the family of gigantic palladium macrocycles based on {Pd84}. **L. Cronin**
- 11:15 INOR 1129.** Spatially orthogonal chemical functionalization of a hierarchical pore network for catalytic cascade reactions. **C.M. Parlett, S.K. Beaumont, L.J. Durrnell, M. Isaacs, N.S. Hondow, K. Wilson, A.F. Lee**
- 11:35 INOR 1130.** Synthesis and characterization aluminum nanoparticles capped by polymerization of acrylic monomers. **C.O. Nyapete, P.A. Jelliss, S.W. Buckner**
- 11:55 INOR 1131.** Synthesis and characterization of *o*-carborane passivated aluminum nanoparticles. **A. Benziger, S.W. Buckner, P.A. Jelliss**

## Section F

Moscone Center  
2022

### Lanthanide & Actinide Chemistry

*Cosponsored by WCC*

A. De Bettencourt Dias, *Organizer*

R. J. Abergel, K. Kavallieratos, D. A. Penchoff, *Presiding*

**8:30 INOR 1132.** Terminal Uranium(IV) sulfido and hydrosulfido complexes: Theoretical study of the uranium-sulfur bond. **C. Alvarez Lamsfus, L. Maron**

**8:50 INOR 1133.** Selective separation of americium from europium using 2,9-bis(triazine)-1,10-phenanthrolines in ionic liquids: A new twist on an old story. **N.J. Williams, J. Dehaut, C.W. Abney, H. Luo, S. Dai**

**9:10 INOR 1134.** Computational prediction of paramagnetic NMR spectra of f-element complexes. **H. Moylan, J. McDouall**

**9:30 INOR 1135.** Thermochemical and structural predictions of lanthanide- and actinide-containing compounds: A computational perspective. **D.A. Penchoff, C. Peterson, A.K. Wilson**

**9:50 Intermission.**

**10:00 INOR 1136.** Actinide coordination with bio-inspired ligands: A bridge between fundamental f-element chemistry and new therapeutic drug development. **R.J. Abergel, G. Deblonde, I. Captain, P. Agbo, A. Ricano, D. An**

**10:20 INOR 1137.** Controlled synthesis of lanthanide nanomaterials with covalent organic frameworks. **A. Braun, S. Aloyglu, C. Booth, D. Olive, M. Straub, S.G. Minasian**

**10:40 INOR 1138.** Trivalent f-metal coordination and extraction by tripodal sulfonamide ligands and analogs. **E.V. Govor, V.A. Anagnostopoulos, A.N. Morozov, A.M. Mebel, R.G. Raptis, K. Kavallieratos**

**11:00 Intermission.**

**11:10 INOR 1139.** Synthesis and redox non-innocent reactivity of bis(NHC)borate-supported thorium complexes. **M. Garner, S. Hohloch, L. Maron, J. Arnold**

**11:30 INOR 1140.** Exploring water selective properties and uptake rates of a uranium metal-organic nanotube. **A.S. Jayasinghe, M. Payne, D. Unruh, T. Forbes**

**11:50 INOR 1141.** Chalcogenide insertion reactivity of a thorium-alkyl complex supported by amidinate ligands. **N. Settineri, J. Arnold**

### Nanoscience

B. G. Trewyn, *Organizer*

B. A. Hernandez-Sanchez, *Presiding*

**8:00 INOR 1142.** Hyaluronic acid conjugated carbon quantum dots for bioimaging and targeted drug delivery in ophthalmology. **B.B. Karakocak, J. Liang, P. Biswas, N. Ravi**

**8:20 INOR 1143.** Bacteriophage-conjugated quantum dots as *in vivo* luminescent bioimaging agents. **W.C. Corbin, M. Casillas, J. Pelowitz, C. Ashley, B.A. Hernandez-Sanchez**

**8:40 INOR 1144.** Bioconjugation chemistry in luminescent gold nanoparticles. **R. Vinluan, J. Zheng**

**9:00 INOR 1145.** Nanoelectronic signaling approaches for chemical sensing and fundamental investigation of chemical/biological systems. **M. Ding, Y. Huang, X. Duan**

**9:20 INOR 1146.** Magnetically stimulated release from Medusa particles. **B.J. McCormick, M.E. Whitaker, E. Roedern, K. O'Connor, R.R. Shah, S. Pan, J.A. Nikles, C.S. Brazel, D.E. Nikles**

**9:40 INOR 1147.** Liquid biopsy for detecting ductal pancreatic adenocarcinoma. **S.H. Bossmann, H. Wang, M. Kalubowilage, O. Covarrubias Zambrano, A.P. Malalasekera, A.S. Yapa, R. Ortega, Y. Toledo, A. Kasi, S. Williamson, C.T. Culbertson, D.L. Troyer**

**10:00 Intermission.**

**10:10 INOR 1148.** Synthesis of multifunctional dendronized-gold nanoparticles for bimodal *in vivo* imaging. **A. Saha Ray, M.W. Brechbiel, M. Daniel**

**10:30 INOR 1149.** Developing lanthanide doped alkaline earth chalcogenide nanoparticles for scintillators and bioimaging agents. **B.A. Hernandez-Sanchez, T.J. Boyle, T.N. Lambert, P. Lu**

**10:50 INOR 1150.** Light scattering study on the interaction of poly(N-isopropylacrylamide) and transition metal dications. **L. Fulton, J. Tsavalas, W.R. Seitz, R.P. Planalp**

**11:10 INOR 1151.** Atomically precise Organomimetic Cluster Nanomolecules (OCNs). **E.A. Qian, A.I. Wixtrom, J.C. Axtell, A. Saebi, D. Jung, P. Rehak, Y. Han, E. Hakim Mouly, D. Mosallaei, S. Chow, M. Messina, J. Wang, A.T. Royappa, A.L. Rheingold, H.D. Maynard, P. Kral, A.M. Spokoyny**

**11:30 INOR 1152.** Bottom-up synthesis and self-assembly of atomically precise pristine and nitrogen-doped graphene nanoribbons. **A. Sinitskii**

**11:50 INOR 1153.** Integrating sphere microscopy to quantify losses and limits in nanoscale solar cells. **S.A. Mann, S. Oener, A. Cavali, J. Haverkort, E. Bakkers, E. Garnett**

**12:10 INOR 1154.** Approaching the hole mobility limit of GaSb nanowires. **Z. Yang, J.C. Ho**

## Section H

Moscone Center

### Organometallic Chemistry: Applications to Organic Transformations

N. S. Radu, *Organizer*

B. Fraga, *Presiding*

**8:30 INOR 1155.** Mechanistic understanding of catalyst-controlled and tunable, chemoselective silver-catalyzed intermolecular nitrene transfers. **T. Yang, J.F. Bery**

**8:50 INOR 1156.** Preparation and characterization of copper(I) diazabutadiene complexes and catalytic applications. **B. Zelenay, F. Maseras, S. Diez-Gonzalez**

**9:10 INOR 1157.** Synthesis and reactivity of weakly interacting dicopper systems. **M.B. Pastor, T. Betley, Q. Zhao**

**9:30 INOR 1158.** Synthesis and reactivity of mixed-ligand dirhodium(II) complexes with pendant axial ligands. **A. Darko, D. Cressy, B. Anderson, W.A. Sheffield**

**9:50 INOR 1159.** Selective *ortho* C-H activation of pyridines directed by Lewis acidic boron of PBP pincer iridium complexes. **W. Shih, O. Ozerov**

**10:10 INOR 1160.** Mechanistic insight into carbon-sulfur bond formation at cobalt (III). **B.J. Foley, C. Palit, O. Ozerov**

**10:30 INOR 1161.** Oxidative reactivity of organometallic Ni<sup>II</sup>, Ni<sup>III</sup> & Ni<sup>IV</sup> complexes in the formation of C-C bonds. **M.B. Watson, L.M. Mirica**

**10:50 INOR 1162.** Mechanistic study of an improved nickel precatalyst for the Suzuki-Miyaura reaction of aryl sulfamates: Understanding the role of nickel(I) species. **M. Mohadjer Beromi, N. Hazari**

**11:10 INOR 1163.** Rational design of improved Pd(II) precatalysts and their application towards new cross-coupling reactions. **P. Melvin, N. Hazari**

**11:30 INOR 1164.** Mechanistic investigations of palladium(II) precatalysts: Effects of reaction conditions on precatalyst activity in the Suzuki cross-coupling of aryl bromides. **K.L. Barnett, K.H. Shaughnessy**

**11:50 INOR 1165.** Half-sandwich ruthenium catalysts with enantioselective primary amine-tethered N-heterocyclic carbenes for asymmetric ketone hydrogenation. **K. Wan, M.M. Sung, A.J. Lough, R.H. Morris**

**12:10 INOR 1166.** Asymmetric transfer hydrogenation of ketones by rhodium and iridium complexes of chiral oxazolidine fused N-heterocyclic carbene ligands. **B. Ramasamy, P. Ghosh**

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Polymerization, Coordination Chemistry & Interfacial Catalysis

*Cosponsored by PMSE*

*Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University*

A. Facchetti, T. Lohr, *Organizers*

M. Delferro, *Presiding*

**8:30** Introductory Remarks.

**8:35 INOR 1167.** Controlling ethylene/ $\alpha$ -olefin selectivity with molecular olefin polymerization catalysts. **J. Klosin**

**9:05 INOR 1168.** Performance polymers in the petroleum additives industry. **N.A. Cain, J.D. Moore**

**9:35 INOR 1169.** Deactivation and reactivation of methylaluminoxane (MAO) and the derived metallocene catalysts. New insight into MAO active site structure and activation mechanism. **L. Luo, A. Jain, J. Harlan**

**10:05 INOR 1170.** Recent developments concerning post-metallocene olefin poly/oligomerization catalysts at Mitsui Chemicals. **M. Kondo, S. Ishii, N. Uehara, Y. Tanaka, K. Michiue, K. Tanaka**

**10:35 Intermission.**

**10:45 INOR 1171.** Can microdroplets catalyze chemical reactions? **R.N. Zare**

**11:15 INOR 1172.** Reactions of C-Al and C-H bonds with polynuclear metal carbonyl cluster complexes. **R.D. Adams, P. Dhull, V. Rassolov, J. Tedder, Y. Wong**

**11:45 INOR 1173.** Sustainable polymers with complete recyclability for a circular economy. **E.Y. Chen**

## Section J

### Chemistry is Central to Applied Materials

*Cosponsored by MPPG<sup>†</sup>*

C. J. Chang, *Organizer*

C. R. Bertozzi, M. A. Paley, *Organizers, Presiding*

**8:30 INOR 1174.** Hybrid perovskites under pressure: Accessing new properties through lattice compression. **A. Jaffe, Y. Lin, D. Uneyama, C. Beavers, J. Voss, W. Mao, H. Karunadasa**

**9:05 INOR 1175.** Densely-functionalized porous polymers for ammonia capture, metal ion separations, and battery applications. **G. Barin, S. Demir, J.C. Axelson, M. Aubrey, J.A. Mason, N. Brune, M.K. Taylor, S. Lee, J. Van Humbeck, D.K. Shuh, C.J. Chang, J.R. Long**

**9:40 INOR 1176.** Withdrawn.

**10:15 Intermission.**

**10:30 INOR 1177.** Electrolyte-Mediated assembly of charged nanoparticles. M. Olvera De La Cruz

**11:05 INOR 1178.** Seaweed-Based synthesis of nanostructures for multiple energy storage. D. Yang, X. Yao

**11:40 INOR 1179.** Framework chemistry and its global reach. O.M. Yaghi

## Section K

Moscone Center  
3001

### Switchable Catalysts

J. A. Byers, *Organizer*

P. Diaconescu, *Organizer, Presiding*

F. Breher, *Presiding*

**8:30 INOR 1180.** Altering the selectivity of iron-catalyzed hydrocarbon upgrading. P.J. Chirik, J. Steves, V. Schmidt

**9:00 INOR 1181.** Reversible interconversion of CO<sub>2</sub>/H<sub>2</sub> and formic acid using Cp\*Ir(III) complexes with proton responsive ligands. E. Fujita, J.T. Muckerman, Y. Himeda

**9:30 INOR 1182.** Switchable polynuclear complexes consisting of ambidentate ligands. F. Breher

**10:00 INOR 1183.** Redox catalysis for biomass degradation. C. Stephenson

**10:30 Intermission.**

**10:45 INOR 1184.** Cerium clusters supported by trimetallic crown ethers as catalysts for alternative copolymerization of cyclohexene oxide and CO<sub>2</sub>. K. Mashima, H. Nagae, R. Aoki, T.P. Spaniof, J. Okuda

**11:15 INOR 1185.** One-pot switchable catalytic processes involving the copolymerization of epoxides and carbon dioxide. D.J. Darensbourg

**11:45 INOR 1186.** Supramolecular approach to enzyme mimics. C.A. Mirkin

**12:15 Concluding Remarks.**

## Section L

Moscone Center  
3003

### Bioinorganic Chemistry

S. A. Koch, *Organizer*

D. Wang, Y. Zhang, *Presiding*

**8:30 INOR 1187.** Study the interactions of biomaterials with microtubule binding domain of tau protein, contribution to Alzheimer's diseases. S. Ahmadi, S. Zhu, R. Sharma, R. Dutta Majumdar, R. Soong, D. Wilson, A. Simpson, H. Kraatz

**8:50 INOR 1188.** Small biomolecules reactions with carbon disulfide: Pursuing a primary biological target. M.L. Souza, A. DeMartino, P.C. Ford

**9:10 INOR 1189.** Biomimetic, catalytic water oxidation by molecular nickel complexes with redox active ligands. D. Wang, C. Bruner

**9:30 INOR 1190.** Withdrawn.

**9:50 INOR 1191.** Can Fe<sup>IV</sup>(O)'s swim? The aqueous chemistry of the [Fe<sup>IV</sup>(O)(TMC)]<sup>2+</sup> complex. J. Klein, A. Shokri, A. Draksharapu, J. Prakash, C.J. Cramer, L. Que

**10:10 Intermission.**

**10:20 INOR 1192.** Proton management within a [FeFe] hydrogenase model complex. K. Chu, M. Chiang, Y. Liu

**10:40 INOR 1193.** HNO Binding in heme proteins: Effects of iron oxidation state, axial ligand, and protein environment. R. Khade, Y. Yang, Y. Shi, Y. Zhang

**11:00 INOR 1194.** FerricCEST: A low-spin Fe(III) complex as paraCEST MRI contrast agent. P.B. Tsitovich, J.R. Morrow

**11:20 INOR 1195.** Photoreleasing caged molecules containing nitrile functionality from Ru(II) complexes of the bulky 6-phenyl-2,2'-bipyridine ligand. S. Saha, R. Coll, K.L. Fillman, J. Pellois, C. Turro, K.R. Dunbar

**11:40 INOR 1196.** Typel/Typell dual photoreactivity of new promising Ru-polypyridyl thiophene complexes: A theoretical exploration. M. Alberto, J. Pirillo, N. Russo, C. Adamo

**12:00 INOR 1197.** Dual targeting redox-active gold(I) N-Heterocyclic carbene complexes: A new approach to cancer treatment. K. Arumugam, M. Miles, R. McCall, J. Arambula

## Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

### Synthesis

*Sponsored by PHYS, Cosponsored by INOR*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Spectroscopy & Microscopy of Photocatalytic & PEC Materials

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
2009

### Deposition & Etching of Nanostructures

*Cosponsored by COLL<sup>‡</sup>*

*Financially supported by ACS Publications, Strem Chemical*

H. Fairbrother, A. V. Walker, *Organizers*

L. McElwee-White, *Organizer, Presiding*

**1:30 INOR 1198.** Experimental and computational development of single source precursors to tin-doped germanium nanocrystals. J. Vela-Becerra

**2:05 INOR 1199.** Surface chemistry guided nanoparticle deposition in plasmonic hotspots. J. Millstone

**2:40 INOR 1200.** Mechanism based design of precursors for FEBID. L. McElwee-White

**3:15 Intermission.**

**3:35 INOR 1201.** Nanosoldering carbon nanotube junctions with metal via local chemical vapor deposition for improved device performance. J. Do, D. Estrada, X. Xie, N. Chang, J.A. Rogers, E. Pop, J. Lyding, G.S. Girolami

**4:10 INOR 1202.** Designing high-performance nanoscale catalysts for small molecule reactions: Probing size and composition-dependent electrocatalytic behavior in noble metal-based nanowires. S.S. Wong

**4:45 INOR 1203.** Lanthanide oxides and lanthanide nitrides via vapor phase approaches. H. Parala

## Section B

2011

### Celebrating 60 Years of the Division of Inorganic Chemistry

#### Members

D. C. Crans, *Organizer*

M. J. Clarke, *Organizer, Presiding*

A. De Bettencourt Dias, P. K. Dorhout, *Presiding*

**1:30** Introductory Remarks.

**1:35 INOR 1204.** Meanderings in atom transfer reaction chemistry, structure, electronic structure and thermochemistry. J.M. Mayer

**2:05 INOR 1205.** Tuning transition metal redox potentials through the incorporation of redox-inactive cations: A route to breaking potential dependent scaling relationships? A.H. Reath, T. Chantarojsiri, J.Y. Yang

**2:35 INOR 1206.** Understanding the formation of Pd(I) and Ni(I) complexes in cross-coupling reactions. N. Hazari

**3:05 Intermission.**

**3:20 INOR 1207.** Interplay of inorganic and organic chemistry in catalyst design and performance. D.B. Grotjahn

**3:50 INOR 1208.** Evaluating the cluster-surface analogy with electronically and geometrically flexible macrocyclic ligands. P. Cui, Q. Wang, B. Manor, P. Carroll, N.C. Tomson

**4:20 INOR 1209.** Carbon dioxide reduction with transition metal catalysts composed of pyridines and N-heterocyclic carbenes based chelates. D.B. Burks, S. Siek, C. Boudreaux, J.H. Delcamp, E.T. Papish

**4:40 INOR 1210.** Controlling reactivity of small molecules through confinement. M.D. Johnson, D.C. Crans

**5:10 Concluding Remarks.**

## Section C

Moscone Center  
2016

### Frontiers in Heavy Element Electronic Structure

*Cosponsored by NUCL*

D. K. Shuh, L. Soderholm, *Organizers*

D. L. Clark, *Organizer, Presiding*

**1:30 INOR 1211.** From a high-valent iron nitride to a low-valent pentad of iron nitrosyl complexes [FeNO]<sup>6-10</sup> stabilized by a chelating, N-anchored tris-N-heterocyclic carbene ligand. K. Meyer

**1:50 INOR 1212.** Design and properties of photoredox chromophores that are stronger reductants than alkali metals. M.D. Hopkins, H.B. Vibbert

**2:10 INOR 1213.** Evaluating the electronic structure of Ln[(C5H4SiMe3)3] complexes. S.A. Kozimor, E.R. Batista, J.W. Engle, W.J. Evans, M.G. Ferrier, M. Fieser, J. Pacheco, A. Olson, J. Su, T. Vitova, P. Yang

**2:30 INOR 1214.** Chemistry of iron complexes toward the synthesis of FeX multiple bonds. P.T. Wolczanski, B. Jacobs, S.N. MacMillan, T.R. Cundari

**2:50 INOR 1215.** Actinides, f-orbitals, and multiple bonds: These are just a few of Bruce's favorite things. J.L. Kiplinger

**3:10 Intermission.**

**3:30 INOR 1216.** Addition of H-X to Mn and Ru amide bonds: Catalysts for formic acid decomposition and the aldehyde water shift reaction. J.M. Boncella, A.M. Tondreau, N.H. Anderson, B. Scott

**3:50 INOR 1217.** New thoughts on the speciation of polychalcogenides in solutions: From lapis lazuli, to the paper industry, to synthetic inorganic chemistry and why my clothes smell so bad. P.K. Dorhout

**4:10 INOR 1218.** Recent advances in the chemistry of tris(cyclopentadienyl) rare-earth and actinide metal complexes. W.J. Evans

**4:30 INOR 1219.** Betwixt or between? Inter- and intraligand redox processes in Fe and Co-SNS coordination complexes. R. Baker

**4:50 INOR 1220.** Formation of C(sp<sup>3</sup>)-N bonds from Rh<sup>III</sup>-Me and Ir<sup>III</sup>-Et complexes. T. Stevens, T.R. Cundari, K.I. Goldberg

## Section D

Moscone Center  
2018

### Chemistry of Materials: Metal Organic Frameworks

C. G. Lugmair, *Organizer*

A. F. Cozzolino, *Presiding*

**1:30 INOR 1221.** Water dynamics in three-dimensional extended lead(II) structures: Multiple single-crystal-to-single-crystal transformations. R.A. Burrow, B. Brummelhaus de Menezes

**1:50 INOR 1222.** Withdrawn.

**2:10 INOR 1223.** Structural characterization of framework-guest interactions in metal-organic frameworks. M.I. Gonzalez, R.L. Siegelman, E.D. Bloch, J.A. Mason, M. Kapelowski, W. Queen, S.J. Teat, K.J. Gagnon, J.R. Long

**2:30 INOR 1224.** Confinement of inorganic clusters in metal-organic frameworks with coordinating sites. M.I. Gonzalez, A. Turkiewicz, L.E. Darago, J.R. Long

**2:50 INOR 1225.** Tuning the adsorption-induced phase change in the flexible metal-organic framework Co(bdp). M.K. Taylor, J.R. Long

**3:10 Intermission.**

**3:25 INOR 1226.** Porphyrin-based porphyrinic MOFs with extraordinary stability and catalytic activity for C-H bond halogenation. K. Wang, H. Zhou

**3:45 INOR 1227.** Porphyrin-based metal organic frameworks for electrocatalysis. A. Fateeva, F. Maillard, B. Abeykoon, J. Tommasino

**4:05 INOR 1228.** Metal-organic layers for earth-abundant metal catalysis. Z. Lin, W. Lin, T. Sawano, N.C. Thacker, C. Wang

**4:25 INOR 1229.** Metal-organic frameworks nodes for earth-abundant metal catalysis. P. Ji, K. Manna, Z. Lin, W. Lin

**4:45 INOR 1230.** Incorporating p-block catalysts into robust metal organic frameworks. P. Larson, B. Tahmouresilerd, J. Cheney, A.F. Cozzolino

<sup>‡</sup>Cooperative Cosponsorship

5:05 INOR **1231**. Metal-Organic frameworks with tunable bandgap. J. Park, D. Feng, Z. Bao

## Section E

Moscone Center  
2020

### Inorganic Spectroscopy

V. C. Popescu, *Organizer, Presiding*

- 1:30 INOR **1232**. Achieving surface sensitivity in soft x-ray spectroscopy: Transient reflectivity of charge transfer dynamics in iron oxide. A. Cirri, J. Husek, S. Biswas, L. Baker
- 1:50 INOR **1233**. Probing molecular magnetism with neutron scattering. S. Stavretis, D.H. Moseley, A.A. Podlesnyak, C.M. Brown, Y. Cheng, L.L. Daemen, A.J. Ramirez-Cuesta, X. Wang, C.M. Hoffmann, S.O. Diallo, Z. Zhu, M. Guo, J. Tang, H. Cui, F. Fei, X. Chen, Z. Xue
- 2:10 INOR **1234**. Design principles for porous materials containing quantum sensors. J. Zadrozny, A. Gallagher, D. Harris, D.E. Freedman
- 2:30 INOR **1235**. Probing ion-pairing trends in aqueous polyoxometalate solutions. D. Sures, K. Kozma, P.I. Molina, S. Serapian, C. Bo, M.D. Nyman
- 2:50 INOR **1236**. High-valent states in cobalt cubanes and clusters: Relevance to O–O bond formation. R.G. Hadt, C. Brodsky, D. Hayes, L.X. Chen, D.G. Nocera
- 3:10 INOR **1237**. Studies of single-molecule magnets by far-IR and Raman in magnetic fields. D.H. Moseley, S. Stavretis, K. Thirunavukkuarasu, Q. Chen, H. Zhou, J. Ludwig, D. Smirnov, Z. Zhu, M. Guo, J. Tang, F. Fei, H. Cui, X. Chen, Z. Xue
- 3:30 INOR **1238**. Capturing intermediates of molecular solar fuels catalysts by time-resolved mid-IR spectroscopy. L. Hammarstrom, R. Lomoth, S. Ott
- 3:50 INOR **1239**. Light driven activation of O<sub>2</sub> with iron(II) polypyridyl complexes. J. Chen, A. Draksharapu, W.R. Browne
- 4:10 INOR **1240**. Relativistic effects on the spectra and redox properties of 5d metallocorrols. A. Ghosh, R.F. Einrem, A. Alemayehu
- 4:30 INOR **1241**. Systematic study of luminescence rigidochromism on ambipolar polyimine rhenium(II) complexes. G.A. Salazar-Garza, B. Hua, C.M. Williams, V. Nesterov, M.A. Omari
- 4:50 INOR **1242**. Role of specific and non-specific interactions in understanding the excited-state processes of transition-metal complex based photodrugs. B. Dietzek
- 5:10 INOR **1243**. Advanced <sup>17</sup>O MAS NMR methods to characterise the local environment in complex inorganic systems. D. Grekov, Y. Bouhoute, K.C. Szeto, N. Merle, I. Del Rosal, L. Maron, R. Gauvin, M. Taoufik, L. Delevoye

## Section F

Moscone Center  
2022

### Coordination Chemistry: Characterization & Applications

S. A. Koch, *Organizer*

B. Barry, A. Mukherjee, *Presiding*

- 1:30 INOR **1244**. Dual-modal MR/NIR fluorescent probes for zinc sensing applications. E. Coakley, N.J. Long
- 1:50 INOR **1245**. Coordination chemistry approach for lithium ion batteries. W. Shi, P. Cheng
- 2:10 INOR **1246**. Molecular engineering of ruthenium complexes for highly efficient dye-sensitized solar cells. S. Aghazada, M. Graetzel, M. Nazeeruddin
- 2:30 INOR **1247**. 1,2,3-Triazole-based chelating ligands under investigation: Tuning the donor strength. L. Suntrup, F. Stein, B. Sarkar
- 2:50 INOR **1248**. Development of molecular underground chemical tracers: Coordination chemistry of alkaline earth and transition metal salen-derivative precursors. T.J. Boyle, J.M. Sears, O. Staples, D. Perales, K. Wyss, J.A. Greathouse, R.A. Kemp
- 3:10 Intermission.
- 3:20 INOR **1249**. Understanding reactivities of transition metal compounds with ROS. A. Mukherjee
- 3:40 INOR **1250**. Mn(III) in an all O-donor ligand environment with fluorinated alkoxides. C. Kotyk, J. Henebry, C. Sun, J.L. Steele, Y. Chen, V.F. Oswald, J.W. Bacon, A.L. Rheingold, L. Doerner
- 4:00 INOR **1251**. Synthesis and reactivity of redox-active molecular group 13 complexes. T. Sherbow, L.A. Berben
- 4:20 INOR **1252**. Dinuclear photo-CORMS: Visible/near-infrared light activating CO release. Z. Li, A.E. Pierri, P. Huang, W. Gang, A. Iretskii, P.C. Ford
- 4:40 INOR **1253**. Design, synthesis and characterization of rhenium(II) tricarbonyl complexes derived from a diimine coligand for bio-imaging applications. J. Jimenez, I. Chakraborty, P. Mascharak
- 5:00 INOR **1254**. Complexes with bisguanidine-type ligands towards oxidative additions across sp<sup>2</sup>-heteroatom bonds. B. Barry, K. Feller, H. Schickel, J. Bruggen, J. Sanborn, R. Velcheck, J. Norman

## Section G

Moscone Center  
2024

### Coordination Chemistry: Synthesis & Characterization

S. A. Koch, *Organizer*

T. T. Boron, P. Desrochers, *Presiding*

- 1:30 INOR **1255**. Coinage metal nanoclusters: Characterization and catalytic applications. A.W. Cook, T.W. Hayton
- 1:50 INOR **1256**. Temperature-Driven geometric conversion of solid-state polymorphs of a four-coordinate nickel(II) complex. X.B. Powers, K.B. Ghiassi, J.T. Greenfield, M.M. Olmstead, A.L. Balch

2:10 INOR **1257**. Side-on dioxygen complex of cobalt: Structure, reactivity, and conversion to bimetallic products. D.E. DeRocha, B.Q. Mercado, P.L. Holland, K.R. Rodgers

2:30 INOR **1258**. Synthesis and reactivity of imido and nitrido complexes of first row transition metals supported by tris(pyrazolyl)borate ligands. D.C. Cummins, K.H. Theopold, G.P. Yap

2:50 INOR **1259**. Synthesis and reactivity of new divalent bis(alkoxide) complexes. T. Hollingsworth, S. Groysman

3:10 Intermission.

3:20 INOR **1260**. Sweeter scorpionates incorporate carbohydrates into functional metal chelates. P. Desrochers, T. Clements

3:40 INOR **1261**. Cu(II) mixed-ligand polypyridyl complexes with 6-mercaptopyridine: Synthesis, characterization and their cytotoxicity evaluations. J.A. Obaleye

4:00 INOR **1262**. Cytotoxicity studies of ruthenium(II) polypyridine compounds with a β-diketone ligand. J.A. Obaleye, A.O. Rajee, K.R. Dunbar

4:20 INOR **1263**. Withdrawn.

4:40 INOR **1264**. Anion effect on aluminum hydroxide cluster synthesis. E. Eitheim, C.K. Perkins, B. Fulton, T. Forbes, D.A. Keszler

5:00 INOR **1265**. Controlling single-molecule magnetic behavior of two families of metallocrowns by modifying lanthanide choice or structural components. T.T. Boron, J.C. Lutter, C.I. Daly, C. Chow, A.H. Davis, A. Nimthong-Roldan, M. Zeller, J.W. Kampf, T. Mallah, C.M. Zaleski, V.L. Pecoraro

### Environmental & Energy-Related Inorganic Chemistry

S. A. Koch, *Organizer*

M. Fieser, A. I. Nguyen, *Presiding*

- 1:30 INOR **1266**. Modeling the dissolution of transition metal oxide nanomaterials. S.E. Mason, J. Bennett
- 1:50 INOR **1267**. Understanding the mechanisms of CO<sub>2</sub> adsorption enhancement/degradation in all silica zeolites under wet conditions. W. Jeong, J. Kim
- 2:10 INOR **1268**. Photochemistry of a direct contact core-shell tandem photocatalyst for overall water splitting. M.A. Melo, F.E. Osterloh
- 2:30 INOR **1269**. Bioinspired electrocatalytic CO<sub>2</sub> reduction using first-row transition metal catalysts. E. Nichols, C.J. Chang
- 2:50 INOR **1270**. Tunable, site-isolated Co<sub>2</sub>O<sub>4</sub> oxygen-evolution catalysts in porous frameworks. A.I. Nguyen, K.M. Van Allsburg, M. Terban, M. Bajdich, J. Oktawiec, M.S. Ziegler, J.P. Dombrowski, K.V. Lakshmi, W. Drisdell, J. Yano, S. Billinge, T.D. Tilley
- 3:10 INOR **1271**. Aluminum doped SrTiO<sub>3</sub> nanocrystals as photocatalyst for overall water splitting under sunlight. Z. Zhao, F.E. Osterloh
- 3:30 Intermission.
- 3:40 INOR **1272**. Cationic dirhodium(II,II) complexes as dual action electrocatalysts for H<sup>+</sup> and CO<sub>2</sub> reduction. S. Witt, C. Turro
- 4:00 INOR **1273**. Progress towards catalytic ammonia splitting. M.R. Smith

4:20 INOR **1274**. Rational design of ruthenium(II) chromophores: Towards efficient photocatalytic proton reduction. R.S. Khnazyer, K. El Roz, F.N. Castellano

4:40 INOR **1275**. Catalytic decarboxylation of fatty acid esters. M.E. Fieser, A. John, L.A. Mitchell, B. Benson, L.T. Hogan, A.M. LaPointe, W.B. Tolman

5:00 INOR **1276**. Synthesis of Ni<sub>2</sub>P nanoparticles supported r-GO composites for hydrodesulphurization applications. V. Tzitzios, M. Kartsiotis, V. Pillai, T. Anjana, G. Papavassiliou, T. Karagiannis, S. Al Hassan

5:20 INOR **1277**. Withdrawn.

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Catalysis: Characterization, Computations, & Reactivity

*Cosponsored by PMSE*

*Financially supported by Dow-Dow Corning, ExxonMobil, STREM, Argonne National Lab, Northwestern University*

A. Facchetti, T. Lohr, *Organizers*

M. Stalzer, *Presiding*

1:30 Introductory Remarks.

1:35 INOR **1278**. Oxidative water splitting with molecular, heterogenized and heterogeneous iridium catalysts. A. Bucci, I. Corbucci, L. Fagioliari, G. Menendez Rodriguez, G. Bellachioma, C. Zuccaccia, A. Macchioni

2:05 INOR **1279**. Cascade synthesis of nanoparticle-polymer composites. M.A. Firestone, B.S. Ringstrand, D.J. Williams, H.D. Magurudeniya, A. Joshi

2:35 INOR **1280**. DMF-stabilized single-nano-sized metal nanoclusters as catalyst for cross-coupling reactions. Y. Obora

3:05 Intermission.

3:15 INOR **1281**. Preparation of deuterated drugs through novel catalysis: Synthesis, purification, and preclinical data. G.Y. Li

3:45 INOR **1282**. Mechanistic insights into catalytic conversion methane and light alkanes over supported catalysts. M. Neurock

4:15 INOR **1283**. DFT approach for the investigation of single-site supported catalysts. A. Motta, M. Delferro, T. Lohr, T.J. Marks

## Section J

Moscone Center  
3012

### Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

T. J. Williams, *Presiding*

1:30 INOR **1284**. Highly electrophilic iridium species supported on a sulfated metal oxide for catalytic H/D incorporation. R. Klet, M. Delferro

1:50 INOR **1285**. Reactivity of *para*-benzoquinones with <sup>19</sup>PCPIrH<sub>2</sub>: In search of new hydrogen acceptors. M. Wilklow-Marnell, W.W. Brennessel, W.D. Jones

**2:10 INOR 1286.** Selective conversion of neat glycerol to lactic acid using a prolific catalyzt. I. Demianets, Z. Lu, T.J. Williams

**2:30 INOR 1287.** Platinum-catalyzed ligand-directed C-H functionalization reactions. S. Huo, D.C. McAteer, E. Javed

**2:50 INOR 1288.** Synthesis of 2-alkynoates and 2-ynamides via palladium(II) catalyzed oxidative carbonylation. N.L. Hughes, Q. Cao, C. Brown, M.J. Muldoon

**3:10 INOR 1289.** Withdrawn.

**3:30 INOR 1290.** Theoretical study of (hetero)aromatic fluorination catalyzed by palladium. P. Fleurat-Lessard, M. Ponce Vargas, J. Roger, C. Testa, J. Guilbaud, N. Pirio, J. Hierso

**3:50 INOR 1291.** Room temperature conversion of CO<sub>2</sub> to methanol with nickel catalysis. Z. Lu, T.J. Williams

**4:10 INOR 1292.** Relative thermodynamics of nickel hydride and formate complexes. N.A. Eberhardt, J.A. Krause, H. Guan

**4:30 INOR 1293.** Computational study of dinuclear nickel catalyzed alkyne cyclotrimerization. D. Kwon, D. Ess

**4:50 INOR 1294.** Synthesis of xantheno-bridged bis(iminopyridine) di-nickel complexes toward alkyne cyclotrimerization. R. Hollingsworth, R.L. Lord, S. Groysman

## Section K

Moscone Center  
3001

### Organometallic Chemistry: Synthesis & Characterization-Late Transition Metals

N. S. Radu, *Organizer*

L. Geary, V. M. Iluc, *Presiding*

**1:30 INOR 1295.**  $\sigma$ -Complexes of cobalt and copper. Y. Lee

**1:50 INOR 1296.** Organometallic cationic dicopper complexes: Synthesis, mixed-valence, reactivity, and their role in catalysis. M.S. Ziegler, K.V. Lakshmi, T.D. Tilley

**2:10 INOR 1297.** Using dispersion forces to isolate low-valent high-oxidation state copper complexes. C. Wagner, L. Tao, E.J. Thompson, T.A. Stich, J. Guo, J.C. Fettingler, L.A. Berben, R. Britt, S. Nagase, P.P. Power

**2:30 INOR 1298.** C<sup>\*</sup>-cyclometalated mesoionic NHC ligands in phosphorescent platinum(II) complexes. J. Soellner, T. Strassner

**2:50 INOR 1299.** Adaptable chelating diphosphine ligand for the stabilization of elusive palladium and platinum alkylidenes. B. Barrett, V.M. Iluc

**3:10 INOR 1300.** C<sup>\*</sup> cyclometalated ruthenium NHC complexes. D. Schleicher, T. Strassner

**3:30 INOR 1301.** Reactivity of nickel complexes bearing a HN(CH<sub>2</sub>CH<sub>2</sub>PPr<sub>2</sub>)<sub>2</sub> ligand. N.P. Nambukara Wellala, J. Luebking, J.A. Krause, H. Guan

**3:50 INOR 1302.** Enhanced photoluminescence quantum yields through excimer formation. P. Piermaria, T. Strassner

**4:10 INOR 1303.** Synthesis of luminescent gold(III) cyclometalated complexes. A.N. Sulicz, A. Maity, T. Gray

**4:30 INOR 1304.** Structural and electronic characterization of early stage Magnus-type organocobalt intermediates in the Pauson-Khand reaction via x-ray absorption spectroscopy. L. Geary

**4:50 INOR 1305.** Delocalised chains and rings of ferrocenes. L.E. Wilson, T. Albrecht, N.J. Long

**5:10 INOR 1306.** Selective C8-metalation of various purine nucleosides. F. Kampert, E.F. Hahn

**5:30 INOR 1307.** Oxidation chemistry of palladium complexes with the smallest steric N-heterocyclic carbene, I Me (I Me = 1,3-Dimethylimidazole-2-ylidene). E. Lee

## Section L

Moscone Center  
3003

### Main Group Chemistry

T. W. Hudnall, *Organizer*

T. Perera, *Presiding*

**1:30 INOR 1308.** Antimony(III) secondary bonding interactions for anion binding. J. Qiu, A.F. Cozzolino

**1:50 INOR 1309.** Novel reactivity of N-heterocyclic carbenes toward one-electron oxidants. E. Lee

**2:10 INOR 1310.** Synthesis and photochemistry of N,N'-diamido-carbene - Supported Sb(V) and Bi(III) chloro complexes for solar fuel production. T.A. Perera, T.W. Hudnall

**2:30 INOR 1311.** Stable N-heterocyclic carbene adducts of diphosphorus and carbon monoxide. R.J. Gilliard, R. Suter, Z. Benko, H. Grützmacher, J.D. Protasiewicz

**2:50 INOR 1312.** Withdrawn.

**3:10 INOR 1313.** Synthesis and characterization of stable emissive radicals and biradicals derived from singlet carbenes. R.N. Arias, C. Barragan, T.W. Hudnall

**3:30 INOR 1314.** Withdrawn.

**3:50 Intermision.**

**4:00 INOR 1315.** Hydrostannylation reactions of low valent tin(II) hydrides, [ArSn( $\mu$ -H)]<sub>2</sub> (Ar = Ar<sup>Ph4</sup> or Ar<sup>Ph6</sup>, Ar<sup>Ph4</sup> = C<sub>6</sub>H<sub>5</sub>-2,6-(C<sub>6</sub>H<sub>5</sub>-2,6-Pr<sub>2</sub>)<sub>2</sub>, Ar<sup>Ph6</sup> = C<sub>6</sub>H<sub>5</sub>-2,6-(C<sub>6</sub>H<sub>5</sub>-2,4,6-Pr<sub>2</sub>)<sub>2</sub>) with acyclic and bicyclic olefins. S. Wang, M. McCrea-Hendrick, C.A. Caputo, C. Weinstein, J.C. Fettingler, P.P. Power

**4:20 INOR 1316.** Sterically encumbering N-heterocyclic tetrylenes and their reactivity. C. Weinstein, Y. Zhu, G. Bertrand

**4:40 INOR 1317.** Amido and alkyl complexes of magnesium, calcium and strontium containing highly fluorinated Tp' ligands. N. Romero, Q. Dufrois, C. Dinioi, M. Etienne

**5:00 INOR 1318.** Synthesis of Lewis acid-stabilized calcium imides. B.M. Wolf, C. Maichle-Mössmer, R. Anwander

## Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

### Experimental Characterization

*Sponsored by PHYS, Cosponsored by INOR*

### Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis

### Devices, Assemblies & Hybrid Processes

*Sponsored by CATL, Cosponsored by COLL, ENFL, I&EC and INOR*

## THURSDAY MORNING

### Section A

Moscone Center  
2009

### Bioinorganic Chemistry

### Proteins & Enzymes & Model Systems

S. A. Koch, *Organizer*

L. E. Cheruzel, S. A. Toledo, *Presiding*

**8:00 INOR 1319.** Determination of differential orbital covalency of heme active sites by L-edge spectroscopy. M.L. Baker, B.K. Alpert, H. Cho, E. Denison, W.B. Doriese, J.W. Fowler, K.J. Gaffney, J. Gard, B. Gao, G.C. Hilton, K.D. Irwin, Y.I. Joe, C. Kenney, J. Knight, T. Kroll, S. Lee, D. Li, R. Marks, M. Minitti, K.M. Morgan, R.A. Mori, H. Ogasawara, G. O'Neil, D. Schmidt, D. Sokaras, D.S. Swetz, Y. Song, C.J. Titus, J. Ullom, T. Weng, C. Williams, J.J. Yan, B.A. Young, D. Nordlund, E.I. Solomon

**8:20 INOR 1320.** Selective substrates C-H functionalization with light-driven P450 enzymes. L.E. Cheruzel

**8:40 INOR 1321.** Unleashing a pendant base by reduction-induced hemilability in [Ni<sub>2</sub>S<sub>2</sub>Fe(NO)<sub>2</sub>]<sup>10+</sup> complexes. P. Ghosh, S. Ding, C. Hsieh, R.B. Chupik, N.S. Bhuvanesh, M.B. Hall, M.Y. Darensbourg

**9:00 INOR 1322.** Model complexes of NiSOD and the factors that influence Ni redox cycling. P.T. Truong, T.C. Harrop

**9:20 INOR 1323.** Cu(II) coordination differences in the amyloid-beta protein binding models GHK and DAHK result in varied conditional inter-peptidic metal exchange rate constants. C.N. Beuning, B. Mestre, C. Hureau, D.C. Crans

**9:40 INOR 1324.** Hemilabile bridging thiolates as proton shuttles in bioinspired H<sub>2</sub> production electrocatalysts. S. Ding, P. Ghosh, A.M. Lunsford, N. Wang, N. Bhuvanesh, M.B. Hall, M.Y. Darensbourg

**10:00 Intermision.**

**10:10 INOR 1325.** Interplay of copper and iron in NO release from Dinitrosyl Iron Complexes (DNICs). R.B. Chupik, D. Bruggeman, M. Maurice, J.A. Denny, M.Y. Darensbourg

**10:30 INOR 1326.** Origins of the catalytic proficiency of cytochrome-based artificial metalloenzymes. M. Garcia-Borras, G. Jimenez-Oses, K.N. Houk

**10:50 INOR 1327.** Expanding our understanding of Nickel-Acireductone Dioxxygenase (Ni-ARD) through a family of structural analogues of the resting state of the enzyme. S.A. Toledo, D. Ivan, A. Sanchez, A.J. Gremillion, S. Sanchez, J.D. Green, V. Lynch

**11:10 INOR 1328.** Withdrawn.

**11:30 INOR 1329.** Structure-function relationships of Mn-containing superoxide dismutases (SOD) studied via quantum mechanical computational methods. J.H. Rodriguez

**11:50 INOR 1330.** Merged heme and non-heme manganese co-factors for a dual anti-oxidant surveillance in photosynthetic organisms. M. Bonchio

## Section B

Moscone Center  
2011

### Coordination Chemistry: Synthesis & Characterization

S. A. Koch, *Organizer*

L. Pan, L. Yang, *Presiding*

**8:30 INOR 1331.** Structural flexibility, luminescence, and aurophilic interactions in crystals of the binuclear complexes Au<sub>2</sub>(Ph<sub>3</sub>P(CH<sub>2</sub>)<sub>n</sub>PPh<sub>3</sub>)<sub>2</sub>X<sub>2</sub> (n = 2-6, X = chloride and thiocyanate). K.R. England, K.B. Ghiassi, M.M. Olmstead, A.L. Balch

**8:50 INOR 1332.** Water soluble cationic zinc lysine hydrochloride compound for spontaneous coating of ZnO on biomaterial surfaces. L. Pan

**9:10 INOR 1333.** Luminescence and rearrangement of small poly-gold phosphine complexes. D.T. Walters, R. Babadi, X.B. Powers, K. Ghiassi, M.M. Olmstead, A.L. Balch

**9:30 INOR 1334.** Designing and crystallographic characterization of trinuclear Cu(II) and dinuclear Zn(II) clusters. M. Shahid, F. Sama

**9:50 INOR 1335.** First report of anagostic interaction in heteronuclear polyoxovanadate-Cu complex with highly selective sensing towards nitro explosives: X-ray, theoretical and TRF investigations. M. Raizada, Z.A. Siddiqi

**10:10 Intermision.**

**10:20 INOR 1336.** Synthesis and characterization of copper complexes with Cu<sup>I</sup>/Cu<sup>I</sup>, Cu<sup>I</sup>-5Cu<sup>I</sup>-5 and Cu<sup>I</sup>/Cu<sup>II</sup> core structures supported by a flexible dipyr-idylamide ligand. L. Yang, E.P. McMoran

**10:40 INOR 1337.** Binding modes and thermodynamics of iron and vanadium with amidoxime ligands. B. Parker, Z. Zhang, J. Arnold, L. Rao

**11:00 INOR 1338.** Using the terminal metal-oxo bond as a reporter of electron donation from bicyclic guanidinate ligands to mid transition metals. J. Olson, D. Swenson, L. Messerle

**11:20 INOR 1339.** Dual cavity tetracarboxamide host for anion and metal ion binding. J. Lohrman, H. Telikepalli, V.W. Day, K. Bowman-James

**11:40 INOR 1340.** Light harvesting through photoswitchable molecules. A. Rajput, A.F. Cozzolino

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

## Section C

Moscone Center  
2016

## Electrochemistry

B. L. Lucht, *Organizer, Presiding*

N. R. Neale, *Presiding*

**8:00 INOR 1341.** Boron cluster-based ionic liquids for reversible electrodeposition. R. Dziedzic, S. Lee, J. Kleinsasser, B.D. Bosley, R.A. Kemp, T.L. Peng, V. Lavallo, A.M. Spokoyny

**8:20 INOR 1342.** Effect of surface ligands on CoP for the hydrogen evolution reaction. D. Ung, B. Cossairt

**8:40 INOR 1343.** Molecular surface modification of semiconductor photoelectrodes – A viable water splitting strategy? N.R. Neale, L.E. Garner, J. Gu, K.X. Steirer, J. Young, N.C. Anderson, E.M. Miller, J.A. Turner, A. Sellinger, T.G. Deutsch

**9:00 INOR 1344.** High frequency resistivity: Determining fundamental photoelectrode properties in a complex world. N.C. Anderson, N.R. Neale

**9:20 INOR 1345.** Redox-active deep eutectic solvents. J.C. Goeltz, L.N. Matsushima, D.G. Jones

**9:40 INOR 1346.** Withdrawn.

**10:00 INOR 1347.** Semiconductor-to-metal transition in rutile TiO<sub>2</sub> induced by tensile strain. E. Benson, E.M. Miller, S. Nanayakkara, B.A. Gregg

**10:20 INOR 1348.** Deoptimizing the oxygen reduction reaction on doped amorphous TiO<sub>2</sub> coatings for corrosion inhibition. M. Groenenboom, R. Anderson, D. Horton, S. Policastro, J.A. Keith

**10:40 INOR 1349.** Electrochemical detection of doxorubicin and salinomycin. J.A. Nikles, B.J. McCormick, S. Pan, D.E. Nikles

**11:00 INOR 1350.** Fluorescence spectro-electrochemistry of integrated anthraquinone-polyether macrocycles. A.G. Sykes

**11:20 INOR 1351.** Electroreduction pattern of quinone units in pillar[5-]arene[n]quinones. M. Rashvand Avei, A.E. Kaifer

**11:40 INOR 1352.** Electro-thermochemical cycling process for high-yield ammonia synthesis from N<sub>2</sub> and H<sub>2</sub>O at atmospheric pressure. J.M. McEnaney, A.R. Singh, J.A. Schwalbe, J. Kibsgaard, J.C. Lin, M. Cargnello, T.F. Jaramillo, J.K. Nørskov

## Section D

Moscone Center  
2018

## Solid-State Inorganic Chemistry

C. G. Lugmair, V. Poltavets, *Organizers*

J. Birgoch, K. Kovnir, *Presiding*

**8:30 INOR 1353.** Decoupled electronic and phonon transport in complex chalcogenides: A substructure approach. K. Biswas

**8:45 INOR 1354.** Thermoelectric performance of Zintl phase Yb<sub>x</sub>Eu<sub>x</sub>CdSb<sub>2</sub> exhibiting low thermal conductivity. J. Cooley, P. Promkhan, S. Gangopadhyay, D. Donadio, S. Kauzlarich

**9:00 INOR 1355.** Stabilization of extraordinary off-stoichiometric Bi<sub>2</sub>Te<sub>3</sub> for enhancing n-type thermoelectric performance. I. Chung

**9:15 INOR 1356.** Synthesis, structure, and properties of new Si-As framework compounds. K. Woo, J. Dolyński, K. Kovnir

**9:30 INOR 1357.** High-throughput experimental approach to find new transition metal ternary chalcogenides. A. Bhutani, A. Narayan, J.N. Eckstein, L.K. Wagner, D. Shoemaker

**9:45 INOR 1358.** Crystal chemistry and magnetism of complex compounds with Zn-P frameworks. K. Kovnir

**10:00 INOR 1359.** Mg<sub>9</sub>B<sub>5</sub>C carbaboride as Mg-ion intercalation cathode with redox active anions by first-principles calculations. V. Poltavets, J.D. Davis, M. Johannes

**10:15 INOR 1360.** Elucidating the mechanism of high-rate and high-capacity lithium-ion intercalation in bulk complex transition metal oxides. K.J. Griffith, A. Forse, J.M. Griffin, C.P. Grey

**10:30 Intermission.**

**10:45 INOR 1361.** Withdrawn.

**11:00 INOR 1362.** Design and synthesis of novel rare earth kagome materials: Applications in geometric magnetic frustration. M.B. Sanders, R.J. Cava

**11:15 INOR 1363.** Development of a low-temperature solvothermal route to a variety of novel iron chalcogenides. J.T. Greenfield, K. Kovnir

**11:30 INOR 1364.** Synthesis and low-temperature properties characterization of superconducting Ni<sub>1-x</sub>Bi<sub>x</sub>. K.M. Powderly, S.M. Clarke, A.J. Rettie, C. Malliakas, D.E. Freedman

**11:45 INOR 1365.** Rapid microwave preparation of new earth abundant magnetocaloric materials. J. Grebenkemper, J.D. Bocarsly, E. Levin, R. Seshadri

**12:00 INOR 1366.** In situ real-time monitoring of mechanochemical ZIF8 synthesis via gas pressure measurements. I. Brekalo, C. Mottillo, K.T. Holman, T. Frisic

**12:15 INOR 1367.** Mechanistic insights into the chemical and electronic properties of dielectric materials exposed to chemical warfare agents and their structural analogs. J.R. Soliz, A.L. Tang, W.O. Gordon, A. Balboa, A.J. Hauser, S.R. Padovani

## Section E

Moscone Center  
2020

## Inorganic Catalysts

S. A. Koch, *Organizer*

M. T. Kieber-Emmons, X. Zhao, *Presiding*

**8:30 INOR 1368.** Reactivity of the Mo<sub>2</sub>O<sub>7</sub>S<sub>4</sub>(DMF)<sub>2</sub> complex with cyanide and catalytic conversion of cyanide to thiocyanate. S.G. Suman, J. Gretarsdottir, R. Bjornsson

**8:50 INOR 1369.** Electro- and photolytic hydrogen production catalyzed by molecular Co complexes with pentadentate ligands in aqueous solution. X. Zhao, P. Wang, Y. Sun, L. Duan, M. Long, D. Reese, A. Bah, C. James, G. Liang, C.E. Webster

**9:10 INOR 1370.** Alcoxysilanes production from silica and dimethylcarbonate promoted by alkali bases: A DFT investigation of the reaction mechanism. V. Butera, Y. Choe, N. Fukaya, J. Choi, K. Sato

**9:30 INOR 1371.** Dehydrogenation of ammonia borane through the third equivalent. X. Zhang, L. Kam, T.J. Williams

**9:50 INOR 1372.** Synthetic approaches for cyclic biodegradable polyesters using ligated tin(II) complexes. K. Phomphrai, P. Piriomjitpong, P. Wongmahasirikun

**10:10 Intermission.**

**10:20 INOR 1373.** Synthesis and characterization of cyclic polyester: Effect of alkoxy side chains on Schiff's base ligand of tin(II) complexes. P. Wongmahasirikun, K. Phomphrai

**10:40 INOR 1374.** Rh and Pt nanoparticles stabilized by phosphine functionalized silica for selective hydrogenation reactions. C. Claver, J. Llop, C. Godard, M. Taoufik

**11:00 INOR 1375.** Efficient and selective oxidation of sulfur mustard using singlet oxygen generated by a pyrene-based metal-organic framework. Y. Liu, C.T. Buru, A. Howarth, J. Mahle, J. Buchanan, J.B. DeCoste, J.T. Hupp, O.K. Farha

**11:20 INOR 1376.** Electrocatalytic water oxidation by a dicopper dihydroxide pre-catalyst reveals dinuclear intermediates. M.T. Kieber-Emmons, S.J. Koepke, P.E. VanNatta, A. Shrestha

**11:40 INOR 1377.** Highly controllable syngas (H<sub>2</sub> + CO) production through immobilized dual molecular Re(I)/Co(III) catalyst on a ternary TiO<sub>2</sub> hybrid system. J. Lee, D. Won, W. Jung, H. Son, C. Pac, S.O. Kang

2022

## Lanthanide &amp; Actinide Chemistry

Cosponsored by WCC

A. De Bettencourt Dias, *Organizer*

J. F. Corbey, S. Demir, L. S. Natrajan, *Presiding*

**8:30 INOR 1378.** Solution synthesis and CO<sub>2</sub> reactivity of a rare Sc<sup>2+</sup> complex, [Sc(NR<sub>2</sub>)<sub>3</sub>]<sup>-</sup> (R = SiMe<sub>3</sub>). D. Woen, G. Chen, J.W. Ziller, T.J. Boyle, F.U. Furche, W.J. Evans

**8:50 INOR 1379.** Synthesis, structure, and reactivity of complexes containing +2 ions of late lanthanide metals in tris(silylamide) coordination environments, {Ln[N(SiMe<sub>3</sub>)<sub>2</sub>]<sub>3</sub>}<sup>-</sup>. A. Ryan, J.W. Ziller, W.J. Evans

**9:10 INOR 1380.** Metallation of C-H bonds by Cp<sub>2</sub>Y(μ-Me)<sub>2</sub>MMe<sub>2</sub> (M = Al, Ga). M. Bonath, C. Maichle-Mössner, R. Anwander

**9:30 INOR 1381.** Radical-Bridged lanthanide single-molecule magnets with high blocking temperatures. S. Demir, J.R. Long

**9:50 Intermission.**

**10:00 INOR 1382.** Synthesis and reactivity of organometallic divalent lanthanide compounds using a tris(aryloxide) mesitylene ligand. C. Palumbo, D.P. Halter, M.E. Fieser, H.S. La Pierre, J.W. Ziller, M. Gemblicky, K. Meyer, W.J. Evans

**10:20 INOR 1383.** Binding preferences of uranyl with cyclic imide dioximes: A theoretical investigation. D.A. Penchoff, C. Peterson, G.K. Schweitzer, D.M. Jenkins, R.J. Harrison

**10:40 INOR 1384.** Structural exploration of trivalent f element-containing species of interest for liquid-liquid extraction processes. J.F. Corbey, B.K. McNamara, B.M. Rapko, J.M. Schwantes

**11:00 Intermission.**

**11:10 INOR 1385.** Optical spectroscopic foray into the redox chemistry of the early actinides. M. Andrews, S. Woodall, A. Swinburne, J. Lloyd, A. Ward, S. Botchway, L.S. Natrajan

**11:30 INOR 1386.** Synthesis and magnetic characterization of trinuclear, radical-bridged lanthanide single-molecule magnets. C.A. Gould

**11:50 INOR 1387.** Hydropyridinonate ligands: From iron(III) to berkelium(IV) chemistry. G. Deblonde, D. An, P.B. Rupert, R.K. Strong, R.J. Abergl

## Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

H. Guan, S. M. Kilyanek, *Presiding*

**8:30 INOR 1388.** Palladium POCOP-pincer complexes: Catalysis in reduction of CO<sub>2</sub> with boranes. A. Adhikary, J.A. Krause, H. Guan

**8:50 INOR 1389.** Using stopped-flow kinetics as a mechanistic probe for the insertion of carbon dioxide into metal-hydride bonds. J. Heimann, N. Hazari

**9:10 INOR 1390.** Role of LiCl in generating soluble organozinc reagents. C. Feng, D. Cunningham, Q. Easter, S. Blum

**9:30 INOR 1391.** Filling the gap: Exploration of organoactinide catalysts with amine boranes reveal highly active catalysts and unique structural motifs. K. Erickson, B. Scott, P. Dub, J.L. Kiplinger

**9:50 INOR 1392.** Catalysis, carbon-hydrogen, and carbon-carbon bond activation with PNP Pincer-supported group 3 and lanthanide alkyl complexes. D.S. Levine, T.D. Tilley, R.A. Andersen

**10:10 INOR 1393.** Unexpected proton transfer mechanism in the racemization of lactic acid catalyzed by lactate racemase: A DFT study. B. Qiu, X. Yang

**10:30 INOR 1394.** Mechanism based oligomerization catalysis for upgrading α-olefins to produce specialty fuels and chemicals. T.N. Gunasekara, M.M. Abu-Omar

**10:50 INOR 1395.** Mechanistic studies of the deoxydehydration of polyols by group VI transition metal catalysts. S.M. Kilyanek, R. Tran, K.A. DeNike

**11:10 INOR 1396.** Isolation of key intermediates in Mo-catalyzed hydrosilylation. K. Mandla, J.S. Figueroa

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**11:30 INOR 1397.** Proton and electron transfer by redox-active aluminum complexes for small molecule reduction. **E.J. Thompson,** T. Sherbow, L.A. Berben

**11:50 INOR 1398.** Norbornenyl-Acyl-Rhodium(III) complex as a likely intermediate in the catalytic hydroacylation of norbornadiene. **M.A. Huertos**

### Section H

Moscone Center  
3000

### Chemistry of Materials: Metal Organic Frameworks

C. G. Lugmair, *Organizer*

P. Deria, M. C. So, *Presiding*

**8:30 INOR 1399.** Novel magnetic composite materials: Metal-organic frameworks as hosts for molecular nanomagnets. **D. Aulakh,** J. Pyser, X. Zhang, A. Yakovenko, K.R. Dunbar, M. Wriedt

**8:50 INOR 1400.** Molecular mechanisms of spin crossover in the  $[Fe(pz)[Pt(CN)_4]]$  MOF upon guest adsorption. **H. Pham,** F. Paesani

**9:10 INOR 1401.** Multifunctional MOFs materials platform for biomedical applications. **D.F. Sava Gallis,** L.E. Rohwer, M.A. Rodriguez

**9:30 INOR 1402.** Control over electronic delocalization and conductivity in mixed-valence semiquinoid frameworks. **M.E. Ziebel,** L.E. Darago, J.R. Long

**9:50 INOR 1403.** Topology-Dependent photophysical properties of zirconium-based metal-organic frameworks. **P. Deria**

**10:10 INOR 1404.** Withdrawn.

**10:30** Intermission.

**10:45 INOR 1405.** Interrogation of charge transport by gas sorption in metal-organic frameworks. **M. Aubrey,** M. Kapelewski, J. Melville, J.R. Long

**11:05 INOR 1406.** Isolation of metalloporphyrin dioxygen adducts in metal-organic frameworks. **A. Gallagher,** D. Harris, J. Anderson, M. Kelty

**11:25 INOR 1407.** Ultra-sensitive detection of mycotoxins by a luminescent metal-organic framework. **Z. Hu,** W.P. Lustig, J. Zhang, C. Zheng, H. Wang, S.J. Teat, Q. Gong, N. Rudd, J. Li

**11:45 INOR 1408.** Uptake mechanism, diffusion, and binding energetics of chemical warfare agent simulants within MOFs. **C.H. Sharp,** J. Abelard, A. Plonka, Q. Wang, A. Frenkel, W. Guo, C.L. Hill, D. Troya, J.R. Morris

**12:05 INOR 1409.** Preliminary electrochemical studies on effects of linker length and metal nodes on redox hopping in layer-by-layer assembled metalloporphyrin metal-organic framework-like thin films. **M.C. So,** K. Hara, J.T. Hupp, O.K. Farha

### Section I

Moscone Center  
3010

### Chemistry of Materials: Nanomaterials

C. G. Lugmair, *Organizer*

S. Fischer, J. A. Mason, *Presiding*

**8:00 INOR 1410.** Design and synthesis of  $WO(OR)_L$  complexes as precursors for chemical vapor deposition of  $WO_x$  thin films. **X. Su,** D.C. Bock, T.J. Anderson, L. McElwee-White

**8:20 INOR 1411.** Quantitative control of metal doping in  $TiO_2$  nanocrystals. **S. Mia,** S. Varapragasam, C. Balasanthiran, J.D. Hoefelmeyer

**8:40 INOR 1412.** Exploring metal oxide nanostructure synthesis mechanisms using *In situ* TEM. **L. Yu,** R. Han, H. Djeuteudjeu, A. Patel, B.S. Gupton

**9:00 INOR 1413.** Insights into solution-processed metal oxide thin film formation mechanisms through investigations of non-thermal energy sources for annealing. **E. Cochran,** D. Park, M. Kast, P. Plassmeyer, C. Page, D.W. Johnson, D.A. Keszler, S.W. Boettcher

**9:20 INOR 1414.** Structure of sub-nm oxides synthesized by atomic layer deposition: From isolated cations to bulk-like structure. **A. Yanguas-Gil,** T. Wu, J. Elam

**9:40** Intermission.

**9:55 INOR 1415.** Precise control over the morphology and dopant distribution in colloidal metal oxide nanocrystals. **A. Singh,** D.J. Milliron

**10:15 INOR 1416.** Nanoparticle treated filters for sequestration of radioactive analytes. **S. Hunyadi** Murph

**10:35 INOR 1417.** DNA-mediated assembly of stimuli-responsive colloidal crystals. **J.A. Mason,** C. Laramy, C. Lai, M. Obrien, Q. Lin, V.P. Dravid, G.C. Schatz, C.A. Mirkin

**10:55 INOR 1418.** Exploring the morphology transition from  $Li/Na$  ( $U_{24}Pp_{12}$ ) to  $Na/K$  ( $U_{24}Pp_{12}$ ) uranyl peroxide nanocluster. **Y. Gao,** M. Dembowski, J. Szymanowski, W. Yin, S. Chuang, P.C. Burns, T. Liu

**11:15 INOR 1419.** Shape control of multi-layer lanthanide-doped  $NaYF_4$  nanocrystals by exploiting the shell growth dynamics. **S. Fischer,** A. Alvisatos

**11:35 INOR 1420.** Control and quantification of local polarity in nano-confined systems. **D. Singappuli-Arachchige,** J. Manzano, L.M. Sherman, I.I. Slowing

**11:55 INOR 1421.** Morphology, electropinability, and crystalline phase study of  $SiO_2/TiO_2$  composite ceramic nanofibers using sol-gel chemistry. **F. Huang,** B. Motealleh, C.J. Cornelius

### Section J

Moscone Center  
3012

### Chemistry of Materials: Materials for Energy & Catalytic Applications

C. G. Lugmair, *Organizer*

E. G. Gillan, M. B. Ross, *Presiding*

**8:30 INOR 1422.** Translation of ligand-centered hydrogen evolution reaction activity and mechanism from homogeneous to solid surfaces. **W. Zhang,** R.M. Buchanan, C.A. Grapperhaus

**8:50 INOR 1423.** Monitoring surface species during carbon dioxide reduction using in situ Raman spectroscopy. **M.B. Ross,** Y. Li, C. Dinh, E. Sargent, P. Yang

**9:10 INOR 1424.** Withdrawn.

**9:30 INOR 1425.** Synthesis and catalytic reactions with 3d and 4d phosphorus-rich metal phosphides. **E.G. Gillan**

**9:50 INOR 1426.** Comparison and structural modulation of cobalt amino porphyrin complexes for electrochemical reduction of  $CO_2$ . **M. Abdinejad,** H. Kraatz, X. Zhang

**10:10** Intermission.

**10:25 INOR 1427.** Comparative electrocatalytic activities of bimetallic oxides and carbides of iron, nickel and cobalt with tungsten and molybdenum as the second transition metal. **Y.N. Regmi,** B.M. Leonard

**10:45 INOR 1428.** Molecular Ni-complex containing tetrahedral nickel selenide core as highly efficient electrocatalyst for oxygen evolution reaction in alkaline medium. **M. Nath,** J. Masud, P. Kyritsis

**11:05 INOR 1429.** Chemistry of chromium carbide mono and bimetallic systems: Synthesis and electrocatalytic activity. **B.M. Leonard,** C. Wan, S. Schmuckeier

**11:25 INOR 1430.** Novel catalytic materials for energy and environment investigating transition metal chalcogenides for efficient oxygen evolution electrocatalysis: The effect of covalency and lattice directionality. **M. Nath**

### Section K

Moscone Center  
3001

### Coordination Chemistry: Characterization & Applications

S. A. Koch, *Organizer*

K. V. Waynant, *Presiding*

**8:30 INOR 1431.** Water-soluble thiophene-based fluorescent mercury-sensors. **A.K. Shigemoto,** C. Virca, A. Thompson, J. Dayton, T. McCormick

**8:50 INOR 1432.** Coordination chemistry approaches for rational vanadium(IV) qubit design. **C. Yu,** M. Graham, J. Zadrozny, D.E. Freedman

**9:10 INOR 1433.**  $^1H$  Relaxometric approach to determining the thermodynamic and kinetic stabilities of Mn(II) complexes. **D.W. Laorenza,** T.D. Westmoreland

**9:30 INOR 1434.**  $[MoO(S_2)_2L]^{2-}$  ( $L =$  picolinate or pyrimidine-2-carboxylate) Complexes as  $MoS_2$  inspired electrocatalysts for hydrogen production in aqueous solution. **B. Garrett,** C.M. Hadad, Y. Wu

**9:50** Intermission.

**10:00 INOR 1435.** Synthesis, properties, and reactivity of  $d^3$  terminal-oxo molybdenum and tungsten complexes. **H.B. Vibbert,** M.D. Hopkins

**10:20 INOR 1436.** Anion-Incarcerating nanojars: Solution and solid-state characterization and selective extraction of anions from water. **G. Mezei,** B. Ahmed

**10:40 INOR 1437.** Pentadentate and hexadentate pyridinophane ligands support reversible  $Cu(I)/Cu(II)$  redox couples. **A. Wessel,** L.M. Mirica

**11:00 INOR 1438.** Mono vs dual metal catalysis. **A. Poater**

**11:20 INOR 1439.** Rational catalyst design of first-row  $d^8$  complexes for the electrocatalytic reduction of  $CO_2$ . **A. Ostericher,** M. Reineke, C.P. Kubiak

**11:40 INOR 1440.** Tripodal pyrazole ligands and analogs for selective ammonium and actinide extraction and sensing. **T.M. Jonah,** L. Mathivathanan, S. Kandel, R.G. Raptis, K. Kavallieratos

**12:00 INOR 1441.** Coordination studies of arylazothioformamide ligands with transition metals in varying oxidation states for removal of trace metal impurities. **K.V. Waynant,** N.A. Johnson, S.R. Wolfe, J.G. Moberly, M.F. Roll

### Section L

Moscone Center  
3003

### Organometallic Chemistry: Applications to Materials & Polymer Science

N. S. Radu, *Organizer*

C. E. Knapp, *Presiding*

**8:30 INOR 1442.** Preparation of multiblock copolymers via step-wise addition polymerization of L-lactide and trimethylene carbonate. **M. Abubekerev,** J. Wei, P. Diaconescu

**8:50 INOR 1443.** Copper ligand and anion effects on the kinetics of photo-induced copper(II) catalyzed azide-alkyne cycloaddition polymerizations. **B. El-Zaatari,** S. Cole, C.J. Kloxin

**9:10 INOR 1444.** Application of amino and imino pyridine iron(II) catalysts in atom transfer radical polymerization. **S.E. Jenny,** L.M. Thierer, M.R. Donley, L.M. Round, N.A. Piro, W.S. Kassel, D.L. Zubrick

**9:30 INOR 1445.** Optimization of iron-loaded nanoparticles for  $T_1$ -weighted MRI contrast enhancement. **T.B. Ditri,** Y. Li, Z. Wang, Y. Huang, Y. Xie, M. Botta, J.D. Rinehart, N.C. Gianneschi

**9:50 INOR 1446.** Porous flexible  $Cu_2(pzdc)_2(L)$  [ $pzdc = 2,3$ -pyrazinedi-carboxylate;  $L = 1,3$ -bis(imidazol-1-yl) benzene or 1,3-bis(4-pyridyl)propane] pillared-layer structures. **R.R. Arrieta-Perez,** J.N. Primera-Pedrozo, M.E. Marciano-Gonzalez, J. Exley, J.A. Hogan, D.L. Jan, A.J. Hernandez

**10:10 INOR 1447.** Nitrogen-doped Polycyclic Aromatic Hydrocarbons (PAHs) via titanocene-mediated dinitrile coupling. **G.R. Kiel,** T.D. Tilley

**10:30** Intermission.

**10:35 INOR 1448.** Block copolymers synthesized by redox-switchable catalysis. **S. Quan,** P. Diaconescu

**10:55 INOR 1449.** Co-supported tandem catalysts for production of linear low density polyethylene. **D. Aluthge,** A. Sattler, J.E. Bercaw, J.A. Labinger

**11:15 INOR 1450.** Designer copper precursors and their use in functional materials. **C.E. Knapp,** S.P. Douglas, E.A. Metcalf

**11:35 INOR 1451.** Cationic iridium(III) complexes bearing 2-aryl substituted oxazolo[4,5-f][1,10]phenanthroline (N. N) ligands: Synthesis, crystal structure, photophysics and application for reverse saturable absorption. **X. Zhu,** W. Sun

**11:55 INOR 1452.** Reversible electropolymerization of nickel azobispyridine complexes based on redox mediated ligand exchange. **N. Clayman,** A. Rudenko, R.M. Waymouth

## THURSDAY AFTERNOON

## Section A

Moscone Center  
2009

## Coordination Chemistry: Synthesis &amp; Characterization

S. A. Koch, *Organizer*

L. Cronin, J. M. Sears, *Presiding*

- 1:30 INOR 1453.** Solving topological puzzles in tetramethylcyclam-supported oxoiron(IV) chemistry. J. Prakash, G. Rohde, L. Que
- 1:50 INOR 1454.** Synthesis, electronic structure and reactivity of square-planar open shell iridium imido complexes. M. Kinauer, S. Schneider
- 2:10 INOR 1455.** Assembling complex inorganic clusters using a programmable networked one-pot reaction array. L. Cronin
- 2:30 INOR 1456.** Synthesis and reactivity of six-membered N-heterocyclic thiones and selones. J.J. Flanagan, D. Rabinovich
- 2:50 INOR 1457.** Exploration of  $M[SNS]_2$  ( $M = Mo, W$ ) as redox-active metal-ligands in heterometallic systems. M. Wojnar, A.F. Heyduk
- 3:10** Intermission.
- 3:20 INOR 1458.** Ligand-based redox chemistry in transition metal complexes of linear oligopyrroles. R. Gautam, E. Tomat
- 3:40 INOR 1459.** Scandium salt dehydration for recycling efforts. J.M. Sears, T.J. Boyle, F.A. Fasulo
- 4:00 INOR 1460.** Single-molecule magnetism in a series of two-coordinate  $ML_2$  transition metal complexes. P. Bunting, J.R. Long
- 4:20 INOR 1461.** Electronic conductivity and magnetic ordering in mixed-valence  $M(1,2,3\text{-triazolate})_2$  ( $M = Cr^{III}, Fe^{II/III}$ ) metal-organic frameworks. J.G. Park
- 4:40 INOR 1462.** Deconvoluting the relative oxidation states in hexanuclear cobalt clusters. R. Hernandez Sanchez, A. Champsaur, D. Paley, B. Choi, M.L. Steigerwald, C.P. Nuckolls
- Section B**
- Moscone Center  
2011
- Inorganic Catalysts**
- S. A. Koch, *Organizer*
- C. J. Stromberg, *Presiding*
- 1:30 INOR 1463.** Hierarchical structured  $TiO_2$  nanofibrous membranes with enhanced flexibility and photocatalytic activity. M. Zhang, J. Song, B. Ding
- 1:50 INOR 1464.** Computational investigations of ruthenium with promoters for Fischer-Tropsch processes. E.N. Brothers, S. Moncho, B.G. Janesko
- 2:10 INOR 1465.** Steric, electronic, and geometric effects on the ring opening transesterification polymerization mechanism for sustainable poly(lactones) with aluminum and zinc alkoxide catalysts. D.E. Stasiw, A.M. Luke, T. Rosen, M. Mandal, C.J. Cramer, M. Kol, W.B. Tolman
- 2:30 INOR 1466.** First principles study of sulfonamido-olefin ligands in the rhodium-catalyzed addition of arylboronic acids to ketones. P. Miro, R. Recio, I. Fernandez

- 2:50 INOR 1467.** Electrochemical reduction of  $CO_2$  catalyzed by Re(pyridine-oxazoline)(CO)<sub>3</sub>Cl complexes. J. Nganga
- 3:10** Intermission.
- 3:20 INOR 1468.** One-pot synthesis of Pt nanoparticles supported by graphene nanoribbons with enhanced catalytic performance towards 4-nitrophenol reduction. D.A. Martinez, S. Wang, W. Chiang
- 3:40 INOR 1469.** Important role of the electrode surface in the electrochemical reduction of  $CO_2$  by Ni-cyclam. A. Zhanaidarova
- 4:00 INOR 1470.** Copper tungstate microcrystals as photocatalyst for water oxidation under visible light. Z. Wu, F.E. Osterloh
- 4:20 INOR 1471.** Ultrafast dynamics of cyano functionalized [FeFe]-hydrogenase model compounds. C.J. Stromberg, E.J. Heilwell
- 4:40 INOR 1472.** Selective  $H_2$  or formate production from  $CO_2$  and water: Mechanistic insights achieved from ligand design. N.D. Loewen, L.A. Berben

## Section C

Moscone Center  
2016

## Lanthanide &amp; Actinide Chemistry

*Sponsored by WCC*

A. De Bettencourt Dias, *Organizer*

E. Borbas, J. H. Farnaby, A. F. Martins, *Presiding*

- 1:30 INOR 1473.** Highly axial magnetic anisotropy in a  $N_3O_2$  dysprosium(III) coordination environment generated by a merocyanine ligand. P. Selvanathan, B. Le Guennic, S. Rigaut, K. Bernot, L. Norel
- 1:50 INOR 1474.** Series of  $Dy^{3+}$  single-molecule magnets with terminal alkoxide ligands that promote large barriers to magnetic relaxation. L.E. Darago, J.R. Long
- 2:10 INOR 1475.** F-element complexes with phosphinimide ligands: Probing metal-ligand covalency using  $^{31}P$  NMR Spectroscopy. S. Younger-Mertz
- 2:30 INOR 1476.** Excitation- and emission-based multiplexing with near infrared-emitting luminescent lanthanide complexes using red-light excitation. R. Xiong, E. Borbas
- 2:50** Intermission.
- 3:00 INOR 1477.** Investigating the subtle variations in uranyl and neptunyl oxo reactivity through the characterization of crown ether complexes. M.C. Basile, E.R. Cole, T. Forbes
- 3:20 INOR 1478.** Using bandgap tuneable capped nanoparticles to sensitize emissive  $Ln^{III}$  ions. R.A. Tigaa, G.J. Lucas, S. Silva-Hernandez, J.H. Monteiro, A. De Bettencourt Dias
- 3:40 INOR 1479.** Imaging L-lactate by CEST using paramagnetic shift reagents. A.F. Martins, L. Zhang, A. Sherry
- 4:00** Intermission.
- 4:10 INOR 1480.** Synthesis of multi-metallic lanthanide and actinide complexes from organometallic building-blocks. J.H. Farnaby

- 4:30 INOR 1481.** Spectroscopic and computational characterization of Eu(III)-oxalate precipitation processes. W.C. Isley, S. Kathmann, Z. Wang, G.B. Hall, S. Chatterjee, E.J. Bylaska, T. Meadows, G.J. Lumetta
- 4:50 INOR 1482.** Synthesis and redox behavior of uranium amidinate complexes. M. Straub, S. Hohloch, S.G. Minasian, J. Arnold

## Section D

Moscone Center  
2018

## Main Group Chemistry

T. W. Hudnall, *Organizer*

J. D. Hoefelmeyer, T. Hudnall, *Presiding*

- 1:30 INOR 1483.** Lewis acidic anti-mony: Application as a non-innocent ligand for the activation of platinum catalyst. D. You, H. Yang, F. Gabbai
- 1:50 INOR 1484.** Fluorescent frustrated Lewis pairs for the coordination and functionalization of small molecules. Z.M. Heiden, I.A. Kieffer, R.J. Allen
- 2:10 INOR 1485.** Amphiphilic molecules with (quinolin-8-yl) groups on electrophiles. J. Son, S.R. Tamang, J.I. Fostvedt, J.D. Hoefelmeyer
- 2:30 INOR 1486.** Reactivity of Verkade's superbase with various strong Lewis acids. S. Mummadi, D. Unruh, C. Krempner
- 2:50 INOR 1487.** Synthesis and application of novel polyhalides. B. Schmidt, K. Sonnenberg, F. Redeker, R. Brückner, S. Riedel
- 3:10 INOR 1488.** Solvent-free mechanochemical s-block chemistry: When synthesis and reactivity don't follow the rules. N.R. Rightmire, N.C. Boyde, T.P. Hanusa
- 3:30** Intermission.
- 3:40 INOR 1489.** Withdrawn.
- 4:00 INOR 1490.** Ultrashort beryllium-beryllium distances in molecular clusters. X. Wang
- 4:20 INOR 1491.** Boron-based donor-spiro-acceptor compounds as TADF emitters. A. Lorbach
- 4:40 INOR 1492.** Synthesis and characterization of polyborafluorenes, a novel boron doped variant of polyparaphenylene. I.A. Brettell-Adams, P. Rupar
- 5:00 INOR 1493.** Novel antimony-containing heterocycles synthesized via a Zr-transfer strategy. A.M. Christianson, F.P. Gabbai, E. Rivard
- 5:20 INOR 1494.** Cationic N-phosphoranimine ionic liquids. J.R. Klaehn, J.S. McNally, N. Arulsamy, H.W. Rollins, E.J. Dufek
- 5:40 INOR 1495.** Solid, stable, soluble, and stoichiometric oxidizing agents: Hydrogen peroxide and di(hydroperoxy)alkane adducts of phosphine oxides. J. Blumel

## Section E

Moscone Center  
2020

## Organometallic Chemistry: Catalysis

N. S. Radu, *Organizer*

J. M. Camara, *Presiding*

- 1:30 INOR 1496.** Cationic palladium(II) complexes for the catalytic Wacker-type oxidation of styrenes to ketones using  $O_2$  as the terminal oxidant. H. Chai, Q. Cao, L.M. Dornan, M.J. Muldoon
- 1:50 INOR 1497.** Imparting nobility to first-row metal-hydrides: Unusual anionic Ni-H stabilized by Lewis acidic metal supports and their role in catalytic carbon dioxide hydrogenation. R. Cammarota, C. Lu
- 2:10 INOR 1498.** Withdrawn.
- 2:30 INOR 1499.** Metalloenes adsorbed on silica and activated carbon: Solid-State NMR and catalysis. J. Blumel, K.J. Cluff
- 2:50 INOR 1500.** Synthesis of aziridines at low alkene loadings catalyzed by a chromium(III) tetracarbenic complex. C. Keller, A. Cramer, G. Elptiya, J. Kern, S. Roy, D.M. Jenkins
- 3:10 INOR 1501.** Withdrawn.
- 3:30 INOR 1502.** Mechanistic study of cyclotrimerization of alkynes via a two-coordinate iron complex. R. Witzke, T.D. Tilley
- 3:50 INOR 1503.** Mechanism of Wacker-type oxidation of terminal olefins with cationic Pd(II) complexes using hydrogen peroxide. L.M. Dornan, K.L. Walker, R.M. Waymouth, M.J. Muldoon
- Section F**
- Moscone Center  
2022
- Chemistry of Materials: Metal Organic Frameworks**
- C. G. Lugmair, *Organizer*
- C. McGuirk, *Presiding*
- 1:30 INOR 1504.** Polymer/Metal-organic-framework composite nanoparticle for gas separation: Rational design and theoretical analysis of core-shell structure. K. Xie, Q. Fu, P. Webley, G.G. Qiao
- 1:50 INOR 1505.** Methane adsorption in a flexible iron metal-organic framework with intrinsic heat management. J. Oktawiec, J.A. Mason, M.K. Taylor, M.R. Hudson, J. Rodriguez, J. Bachman, M.I. Gonzalez, A. Cervellino, A. Guagliardi, C.M. Brown, P. Llewellyn, N. Masciocchi, J.R. Long
- 2:10 INOR 1506.** Cooperative and reversible chemisorptive capture of carbon disulfide in diamine-appended metal-organic frameworks. C. McGuirk, R.L. Siegelman, P.J. Milner, J.R. Long
- 2:30 INOR 1507.** Computing adsorption properties of structurally deformed metal organic frameworks using a feature space map. W. Jeong, D. Lim, S. Kim, A. Haraie, M. Yoon, M.P. Suh, J. Kim
- 2:50 INOR 1508.** Enhancing the uptake of oxygen in metal-organic frameworks. J.B. DeCoste, T.M. Tovar, I.O. Iordanov, A.M. Ploskonka, G.W. Peterson
- 3:10 INOR 1509.** Thermodynamically directed method to tether alkylamine into metal-organic frameworks for  $CO_2$  capture. H. Li, H. Zhou
- 3:30** Intermission.

**3:45 INOR 1510.** Record selectivity for olefin/paraffin separations in a metal-organic framework. **M. Kapelewski**, J. Bachman, J.R. Long

**4:05 INOR 1511.** CO<sub>2</sub> capture enhancement in InOF-1 via the bottleneck effect of confined ethanol. **I. Ibarra**

**4:25 INOR 1512.** Water stable Metal-Organic Frameworks (MOFs) for CO<sub>2</sub> capture. **D. Zhao**

**4:45 INOR 1513.** Cooperative, adsorbate-induced spin transitions for efficient carbon monoxide separations in an Fe(II) metal-organic framework. **D. Reed**, B. Keitz, J.R. Long

**5:05 INOR 1514.** Trapping gases in metal organic frameworks with a selective surface molecular barrier layer. **K. Tan**, S. Zuluaga, E. Fuentes, E. Mattson, H. Wang, J. Li, T. Thonhauser, Y.J. Chabal

**5:25 INOR 1515.** Increased CO<sub>2</sub> adsorption in heterobimetallic MOFs obtained by post-synthetic transmetalations of HKUST-1. **J.M. Veleta**, R. Arrieta, M. Baeza, E. Barajas, K. Castañeda, C. Castañon, Z. Garcia, D. Villagrán

## Section G

Moscone Center  
2024

### Chemistry of Materials: Nanomaterials

C. G. Lugmair, *Organizer*

S. M. Noimark, L. J. Treadwell, *Presiding*

**1:30 INOR 1516.** Dimerization of organic dyes on luminescent gold nanoparticles for ratiometric pH sensing. **S. Sun**, X. Ning, J. Zheng

**1:50 INOR 1517.** Molecular layer deposition of ultrathin manganese oxide hybrid materials for catalysis applications. **D.S. Bergsman**, J.G. Baker, N. Yang, C. MacIsaac, A. Strickler, M. Lillethorup, S.F. Bent

**2:10 INOR 1518.** Application of chiral tetrahedral Au nanoparticles in enantiomeric separations of chiral drugs. **N. Shukla**, D. Yang, Y. Zhao, A.J. Gellman

**2:30 INOR 1519.** Synthesis and characterization of hollow Mn<sub>2</sub>O<sub>4</sub> nanoparticles as anode materials for lithium ion batteries. **S. Varapragasam**, C. Balasanthiran, A. Gurung, Q. Qiao, R.M. Rioux, J.D. Hoefelmeyer

**2:50 INOR 1520.** Multi-walled carbon nanotube-polymer composite coatings for optical ultrasound generation. **S.M. Noimark**, R. Colchester, S. Ourselin, I. Papakonstantinou, I.P. Parkin, A. Desjardins

**3:10** Intermission.

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**3:25 INOR 1521.** Synthesis of N, P co-doped amorphous carbon dots and their toxicological impact on *Shewanella oneidensis* MR-1 bacteria. **B. Zhi**, M.J. Gallagher, B.P. Frank, T. Curry, T.A. Qiu, A.C. Mensch, Z. Rosenzweig, H. Fairbrother, R.J. Hamers, C.L. Haynes

**3:45 INOR 1522.** Synthesis of nanoinks using novel precursors for advanced Direct Write applications. **L.J. Treadwell**, T.J. Boyle, N.S. Bell, A. Cook, D. Woodard, M.V. Parkes

**4:05 INOR 1523.** Biocompatible and water-soluble gold-carbon nanoparticles. **B. Atallah**, I. Shehadi, M. Naggari, **A. Mohamed**

**4:25 INOR 1524.** Surface functionalized metal-oxo polymer nanobeads as potential T<sub>1</sub> MRI contrast agents with dual reporting capability and specific targeting. **V. Dahanayake**, W.J. Hickling, O. Rodriguez, C. Albanese, S.L. Stoll

**4:45 INOR 1525.** Investigation of nanosized metal oxides for thermal water splitting at reduced temperatures. **G. Larsen**, K. Coopersmith Lawrence, S. Hunyadi Murph

**5:05 INOR 1526.** Cell-based targeted delivery of mesoporous silica nanoparticles loaded with a T<sub>1</sub>-contrast agent to 4T<sub>1</sub> tumors. **H. Wang**, T.B. Shrestha, J. Covarrubias, A.P. Malalasekera, S.O. Wendel, J. Yu, P. Thapa, M. Pyle, D.L. Troyer, S.H. Bossmann

## Section H

Moscone Center  
3000

### Chemistry of Materials: Materials for Energy & Catalytic Applications

C. G. Lugmair, *Organizer*

V. Doan-Nguyen, J. L. White, *Presiding*

**1:30 INOR 1527.** Utilization of magnesium silicide as a reactive precursor for the facile synthesis of Si@Ge and Si@C composite electrodes for lithium-ion batteries. **J. Ahn**, M. Kang, D. Lee, H. Kim, Y. Sung, **W. Yoo**

**1:50 INOR 1528.** Investigation of the reversible lithium insertion into anti-NASICON Fe<sub>2</sub>(WO<sub>4</sub>)<sub>3</sub>. **G. Barim**, B.C. Melot, R.L. Brutchey

**2:10 INOR 1529.** Transition metal polysulfide chalcogenides as electrode materials for Li-ion batteries. **V. Doan-Nguyen**, K. Subrahmanyam, M. Butala, J.A. Gerbec, S. Islam, K. Kanipe, C. Wilson, M. Balasubramanian, K. Wiaderek, O. Borkiewicz, K.W. Chapman, P. Chupas, M. Moskovits, B. Dunn, M.G. Kanatzidis, R. Seshadri

**2:30 INOR 1530.** Effect of nanostructuring on hydrogen storage properties of complex metal hydrides confined inside nanoporous carbons. **J.L. White**, V. Stavila, B. Wood, T. Heo, L.E. Klebanoff, E. Majzoub, M. Allendorf

**2:50 INOR 1531.** Manganese oxide nanomaterials for electrocatalysis and energy storage. **T.N. Lambert**, J.A. Vigil, J. Duay, M. Kelly

**3:10** Intermission.

**3:25 INOR 1532.** Nb<sub>2</sub>N<sub>5</sub>/Nb<sub>2</sub>O<sub>5</sub>-rGO composites as pseudocapacitive anode materials for high power lithium ion batteries. **Y. Yan**, C. Lai, S. Robbenolt, B. Dunn, S.H. Tolbert

**3:45 INOR 1533.** Modelling La<sub>2</sub>NiO<sub>4</sub> for solid oxide fuel cell cathode applications. **A.L. Gavin**, G.W. Watson

**4:05 INOR 1534.** Mechanisms and motivations for superionic conductivity in polyborane solid electrolytes from *ab initio* molecular dynamics. **B. Wood**, J. Varley, K. Kweon, P. Shea, V. Stavila, T.J. Udovic

**4:25 INOR 1535.** Thermodynamics and kinetics at interfaces of metal hydrides for hydrogen storage. **S. Kang**, T. Heo, P. Shea, K.G. Ray, T. Ogitsu, S. Bonev, B. Wood

## Section I

Moscone Center

### Organometallic Chemistry: New Ligand Platforms

N. S. Radu, *Organizer*

D. R. Manke, M. P. Marshak, *Presiding*

**1:30 INOR 1536.** Structure-activity relationship of ruthenium metathesis catalysts in ethenolysis of cyclic olefins. **P. Engl**, C. Santiago, A. Fedorov, C. Cooper, M.S. Sigman, A. Togni

**1:50 INOR 1537.** Blue phosphorescent zwitterionic Ir(III) complexes featuring weakly coordinating ligands. **K. Kirlikovali**, J.C. Axtell, P.I. Djurovich, D. Jung, V. Nguyen, B. Munekiyu, A.T. Royappa, A.L. Rheingold, A.M. Spokoiny

**2:10 INOR 1538.** Cavityplexes: Metal-Organic platforms for supramolecular recognition. **A. Pöthig**, P.J. Altmann

**2:30 INOR 1539.** Influence of the phenylazopyridine ligand on the reactivity and electronic structure of (cyclopentadienyl)cobalt complexes. **E. McLoughlin**, K.M. Waldie, R. Sarangi, R.M. Waymouth

**2:50 INOR 1540.** Synthesis, structure and reactivity of homo- and heterobimetallic complexes. **A. Nicolay**, T.D. Tilley

**3:10 INOR 1541.** Homoleptic organolanthanide compounds supported by a bis(dimethylsilyl)benzyl ligand. **K. Boteju**, A. Ellern, A.D. Sadov

**3:30 INOR 1542.** *m*-Terphenyl substituted  $\beta$ -diketonate ligands support coordinatively unsaturated metals. **M.P. Marshak**, E.S. Akturk, R.N. Seals

**3:50 INOR 1543.** Modular synthesis of tris(aryl)tren ligands and their reactivity. **V. Mdluli**, D.R. Manke

**4:10 INOR 1544.** Probing the  $\pi$ -acceptor/ $\sigma$ -donor ratio of 2-isocyanozulene ligands as possible rivals of polyfluorinated organic isocyanides. **M.D. Hart**, J.J. Meyers, T. Nakakita, Z. Wood, N. Gerasimchuk, M.V. Barybin

**4:30 INOR 1545.** Studies of protonation preferences in bifunctional late-metal organometallics: Applications to heterolytic C-H activation. **E.B. Hullely**, W. Christman, T. Morrow, N. Arulsamy

**4:50 INOR 1546.** Influence of fluorescent dye containing ligand scaffolds on metal complex reactivity. **Z.M. Heiden**, N.R. Treich

## Section J

Moscone Center  
3012

### Organometallic Chemistry: Synthesis & Characterization-Late Transition Metals

N. S. Radu, *Organizer*

Z. Assefa, D. C. Lacy, *Presiding*

**1:30 INOR 1547.** Chemistry of gold(III) pincer complexes: Structure and reactivity Au-H and Au-CO complexes. **M. Bochmann**, J. Fernandez-Cestau, A. Pintus, L. Rocchigiani, P. Budzelaar

**1:50 INOR 1548.** Synthesis, x-ray crystallography, spectroscopic and cytotoxicity studies of Au(I) complexes of tris(4-methoxy-3,5-dimethylphenyl)phosphine (MDMPP), bis (2-methoxyphenyl) phosphine (MPP) and further structural studies on higher coordinate Au(I) phosphine complexes. **Z. Assefa**, K. Brown, G. Ageberowri, M. Kanipes-Spinks, C. Rorie

**2:10 INOR 1549.** Homo-and heterobimetallic dicarbene complexes featuring unsymmetrical bis-NHC ligand. **M. Böhmer**, E.F. Hahn

**2:30 INOR 1550.** Synthesis and reactivity of Ir<sup>III</sup> complexes bearing NHC/imidazolyl chelate ligands. **T. Tan**, E.F. Hahn

**2:50 INOR 1551.** Reactivity and dynamics of unsaturated cobalt *m*-terphenyl isocyanide complexes. **C. Chan**, J.S. Figueroa

**3:10 INOR 1552.** Synthesis and reactivity of pincer-supported cobalt complexes. **L.M. Guard**, D.E. Linn, D.M. Heinekey

**3:30 INOR 1553.** Metal-metal bonds from halide-bridged group 11 metal cations. **J.P. Sadighi**, C.M. Sato, J. Bacsa

**3:50 INOR 1554.** Splitting water with an organomanganese tetramer. **D.C. Lacy**

**4:10 INOR 1555.** Active site installation on a low valent iron cluster. **M.J. Drance**, J.S. Figueroa

**4:30 INOR 1556.** Bonding in group 8 silylene complexes. **P. Smith**, T.D. Tilley

**4:50 INOR 1557.** Rhenium  $\beta$ -diketiminate: Chemistry at the oxo moiety and in low-valent terminal oxo complexes. **T.D. Lohrey**, R.G. Bergman, J. Arnold

**5:10 INOR 1558.** Frustrated Lewis pairs as ligands for late-transition metal complexes: Probing interactions in the coordination sphere. **B.R. Nichols**, J.L. Petersen, B.V. Popp

## Section K

Moscone Center  
3001

### Chemistry of Materials: Synthesis & Properties

C. G. Lugmair, *Organizer*

B. A. Kilos, L. Vilà Nadal, *Presiding*

**1:30 INOR 1559.** Composition manipulation of germanium nanocrystals via microwave-assisted colloidal synthesis. **K. Tabatabaei**, S. Kazalich, B. Nolan, H. Lu, X. Zhang, R.L. Brutchey, K. van Benthem

**1:50 INOR 1560.** Study of Pt(II) precursors for focused electron beam induced deposition of Pt nanostructures. **H. Lu**, J.A. Spencer, Y. Wu, H. Fairbrother, L. McElwee-White

† Cooperative Cosponsorship

**2:10 INOR 1561.** Long route from hexagonal- $\text{AMn}^{3+}\text{O}_3$  to  $\text{AMn}^{2+}\text{O}_{2.5}$ . M. Olivier, T. Pussacq, M. Huvé, F. Tessier, H. Kabbour

**2:30 INOR 1562.** Withdrawn.

**2:50 INOR 1563.** Thermolytic molecular precursor methods to germanium-doped single-sites on silica. J.P. Dombrowski, T.D. Tilley, A.T. Bell

**3:10 INOR 1564.** Beyond thioureas: Highly monodisperse CdS nanocrystal syntheses via thiocarbonates, thiocarbamates, and thioureas. L. Hamachi, I. Jen-La Plante, G. Cleveland, J.S. Owen

**3:30 INOR 1565.** Withdrawn.

**3:50** Intermission.

**4:05 INOR 1566.** Simple method to predict the electronic spin configuration of Fe(II) tris-dimine complexes. H. Phan, J. Hrudka, M. Shatruk

**4:25 INOR 1567.** Non-covalent interactions in superatomic crystals. J.L. Shott, M. Freeman, N. Saleh, D.S. Jones, C. Beiger

**4:45 INOR 1568.** Water confinement properties of a metal-organic nanotube. M. Payne, A.S. Jayasinghe, D. Unruh, T. Forbes

**5:05 INOR 1569.** Synthesis and characterization of magnesium oxychloride as a fire resistant construction material. R.F. Gochez, C.L. Kitchens

**5:25 INOR 1570.** Industrial outlook on the development of cost effective  $\text{SiO}_2$  mesoporous cellular foams technology. B.A. Kilos, A.M. Kelly-Rowley, S. Matteucci, C.L. Tway, K. Mabe, H. Clements

**5:45 INOR 1571.** Centimeter-sized epitaxial h-BN as a flexible & transferable template for heteroepitaxial growth of semiconductor thin films. H. Oh, K. Chung, J. Jo, Y. Tchoe, H. Yoon, H. Lee, S. Kim, M. Kim, B. Sohn, G. Yi

## Section L

Moscone Center  
3003

### Nanoscience

B. G. Trewyn, *Organizer*

E. Johlin, *Presiding*

**1:30 INOR 1572.** Monocrystalline nanopatterned films made by nanocube assembly and chemical welding. B. Sciacca, A. Berkhout, M. van Huis, B. Brenny, A. Polman, E. Garnett

**1:50 INOR 1573.** Graphene oxide membranes with strong stability in aqueous solutions and controllable lamellar spacing. J. Hu, Y. Xi, Z. Liu, R. Xie, X. Ju, W. Wang, L. Chu

**2:10 INOR 1574.** Photovoltage, effective bandgap and photochemical charge transfer in nanoscale transition metal (Cu, Fe, Mn, Ni) doped  $\text{SrTiO}_3$  photocatalysts. X. Ma, F.E. Osterloh

**2:30 INOR 1575.** Semiconductor nanocrystals with compact fluorinated shells. P. Xia, M.L. Tang

**2:50 INOR 1576.** 3D Nanostructure imaging via multi-energy deconvolution SEM. E. Johlin, M. de Goede, B. Sciacca, F. Boughorbel, E. Garnett

**3:10 INOR 1577.** Opportunities and limitations for nanoscale photovoltaics to surpass the Shockley-Queisser limit. S.A. Mann, R. Grote, R.M. Osgood, A. Alu, E. Garnett

**3:30** Intermission.

**3:40 INOR 1578.** Metal halide perovskite nanowire arrays for photodetection with significantly improved stability. Z. Fan, L. Gu, M. Tavakoli, A. Waleed

**4:00 INOR 1579.** Exploring of the scope of polyarylboranenes. M.W. Lee, T. Wang

**4:20 INOR 1580.** Efficiency of magnetic induction heating for single crystal iron oxide nanoparticles. R.R. Shah, T.P. Davis, A.L. Paulson, C.S. Brazel, D.E. Nikles

**4:40 INOR 1581.** Elucidation of synthesis and characterization of non-precious nanoscale mixed metal oxides for green chemistry catalysis. A.M. York, C.A. Cadigan, R.M. Richards

**5:00 INOR 1582.** Carrier selective contacts for nanowire solar cells. S. Oener, A. Cavalli, J. Haverkort, E. Bakkers, E. Garnett

**5:20 INOR 1583.** TERS: Nanoscale Raman characterization of 0-1-and 2D materials. A. Krayev, M. Chaigneau

## MEDI

### Division of Medicinal Chemistry

A. Stamford, *Program Chair*

#### OTHER SYMPOSIA OF INTEREST:

**ACS Award for Computers in Chemical & Pharmaceutical Research: Symposium in honor of Yvonne C. Martin** (see COMP, Tue)

**ACS Chemical Biology Award Symposium** (see BIOL, Tue)

**Chemical Biology: Enabling Drug Discovery** (see ORGN, Wed)

#### SOCIAL EVENTS:

**Poster Sessions & Socials, 7:00 PM:** Sun, Wed

#### BUSINESS MEETINGS:

**Business Meeting (Open), 5:30 PM:** Sun

**Executive Committee Meeting (Closed), 8:30 AM:** Sun

**Long-Range Planning Committee Meeting (Closed), 5:30 PM:** Mon

## SUNDAY MORNING

### Section A

Moscone Center  
3002/3004

#### Macrocycles & Cyclopeptides in Medicinal Chemistry

M. J. Blanco-Pillado, *Organizer*

M. Blanco, *Presiding*

**9:00** Introductory Remarks.

**9:05 MEDI 1.** Simple ADME rules for complex molecules and life beyond the rule of 5. S. Lokey

**9:40 MEDI 2.** Discovery of oral and BBB permeable eribulin analogs by taking advantage of its macrocyclic properties. W. Zheng

**10:15 MEDI 3.** Peptides as shuttles for drug delivery to the brain. E. Giralt

**10:50 MEDI 4.** Macrocyclic peptides as potential treatments for pain and drug abuse. J.V. Aldrich, S. Senadheera, T.F. Murray, J.P. McLaughlin

**11:25 MEDI 5.** Milla molecule inhibitors of IAP proteins. Y. Zhang

**12:00** Concluding Remarks.

### Section B

Moscone Center  
3006/3008

#### General Orals

A. W. Stamford, *Organizer*

I. M. Bell, *Presiding*

**8:30 MEDI 6.** Development of a potent and selective bromodomain chemical probe. M. Moustakim, P. Brennan, D. Dixon

**8:50 MEDI 7.** Structure-based computer-aided IL-6/GP130 Protein-Protein Interaction (PPI) inhibitor design. G. Shi, L. Mao, V. Kumari, C. Li

**9:10 MEDI 8.** Disclosure of a development candidate to treat severe acute pancreatitis through a drug discovery partnership between GlaxoSmithKline and the University of Edinburgh. J. Liddle

**9:30 MEDI 9.** Expanding screening decks by innovative MCR scaffolds. A. Doemling, P. Patil, R. Madhavachary

**9:50 MEDI 10.** Metamorphosis of paroxetine into a highly potent and selective GRK2 inhibitor via structure-based drug design. H. Waldschmidt, K. Homan, O. Cruz - Rodriguez, M. Cato, R. Bouley, M. Wilson, A. Cannavo, J. Song, J. Cheung, P. Kirchhoff, W. Koch, J. Tesmer, S.D. Larsen

**10:10 MEDI 11.** Discovery of novel potent and selective agonists of the serotonin (5-HT) 5-HT<sub>2C</sub> receptor as neurotherapeutics. H. Mack, G. Backfisch, G. Blaich, W.M. Braje, T. Erhard, A. Haupt, A. Kling, V. Lakics, J.J. Lynch, M. Mugnaini, F. Pohli, A.L. Relo, K. Schaefer

**10:30 MEDI 12.** Assessment of MCHR1 target engagement in the brain using PET imaging. A. Johansson, M. Antonsson, A. Hogner, M. Fredenwall, M. Hayes, P. Johnstrom, M. Schou

**10:50 MEDI 13.** Redox-responsive hyaluronic acid-taxoid nanoconjugate for CD44-targeted cancer chemotherapy. Y. Zhang, I. Ojima

**11:10 MEDI 14.** Targeting ubiquitin pathway enzymes for cancer immunotherapy. J. Wu, H. Wang, S. Kumar, F. Wang, I. Sokirniy, C. Riling, M. Mattern, J. Weinstock

**11:30 MEDI 15.** Synthesis and biological profiling of 2-azabicyclo[2.1.1]hexane-based proline isosteres as antagonists of TRPA1 ion channel. D. Shore, M. Volgraf, B. Safina, V.A. Verma, E. Villemure, H. Chen, L. Wang, A.A. Estrada, J.P. Lyssikatatos, A. Kolesnikov, S. Do, S. Shields

**11:50 MEDI 16.** Cyclophilin D inhibitors rational and fragment based design: From 7 mM to 7 nM potency. C. Jorand-Lebrun, X. Jian, T. Johnson, U. Graedler, D. Schwarz, B. Leuthner, A. Marx, D. Roche, M. Gilardone, H. Lemoine, S. Kulkarni, F. Bernard

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

Sponsored by PROF; Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVF, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC

## SUNDAY AFTERNOON

### Section A

Moscone Center  
3002/3004

#### General Orals

A. W. Stamford, *Organizer, Presiding*

**1:30 MEDI 17.** Discovery of AZD9977:

A non-steroidal mineralocorticoid modulator for treatment of diabetic kidney disease. K.L. Granberg, Z. Yuan, B. Lindmark, K. Edman, K. Bamberg, A. Hogner, J. Kajanus, M. Malmgren, C. Löfberg, A. Nordqvist, J.Å. Lindberg, J. Brånalt, G. OMahony, M. Kossenjans, D. Liu, A. Aagaard, M. Billger, S. Bäckström, P. Cornwall, H. Ericsson, F. Erlandsson, E.L. Hansson, A. Hayen, M. Hermansson, I. Ivarsson, R. Jansson Löfmark, U. Johansson, U. Karlsson, X. Li, G. Nikitidis, P. Nordberg, A. Nordin, B. Polentarutti, N. Selmi, A. Turner, L. William-Olsson, C.E. Wingolf, J. Hartleib

**1:55 MEDI 18.** Discovery of BMS-962212 a highly potent, selective inhibitor of coagulation FXIIa. D. Pinto, M.J. Orwat, L. Smith II, S. Shrivastava, M.L. Quan, P.Y. Lam, K. Rossi, A. Apedo, J. Bozarth, Y. Wu, J. Zheng, B. Xin, N. Toussaint, P. Stetsko, O. Gudmundsson, E. Crain, P. Wong, Z. Lou, T. Harper, S. Chacko, J. Myers, S. Sheriff, H. Zhang, X. Hou, A. Mathur, D. Seiffert, J. Luettgen, R.R. Wexler

**2:20 MEDI 19.** Development of new therapies for asthma based on compounds that specifically target GABA<sub>A</sub> receptors in the lung. L. Arnold, G.S. Forkuo, N.Y. Yuan, R. Kodali, O.B. Yu, N.M. Zahn, R. Jahan, G. Li, M.R. Stephen, M. Guthrie, A.N. Nieman, M.M. Poe, G.T. Yocum, C.W. Emala, D.C. Stafford, D.A. Steeber, J.M. Cook

**2:45 MEDI 20.** Discovery of AGN-241689: A potent, orally-acting CGRP receptor antagonist for migraine prophylaxis. I.M. Bell

**3:10 MEDI 21.** Discovery of BMS-986142: A reversible inhibitor of Bruton's Tyrosine Kinase (BTK) conformationally constrained by two locked atropisomers. S.H. Watterson, G.V. De Lucca, Q. Shi, C.M. Langevine, D.G. Batt, Q. Liu, M. Beaudoin Bertrand, H. Gong, J. Dai, H. Yip, P. Li, D.Z. Sun, D. Wu, C. Wang, Y. Zhang, S.C. Traeger, M.A. Pattoli, S. Skala, L. Cheng, M.T. Obermeier, R. Vickery, L.N. Discenza, C.J. D'Arienzo, Y. Zhang, E. Heimrich, K. Gillyooly, T.L. Taylor, C. Pulicchio, K. McIntyre, M.A. Galella, A.J. Tebben, J.K. Muckelbauer, C. Chang, L. Salter-Cid, J.C. Barrish, P.H. Carter, A. Fura, J. Burke, J.A. Tino

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**3:35 MEDI 22.** Hydrogen bond interaction geometries in protein-ligand complexes: From large-scale statistics to single cases. **E. Nittinger**, T. Inhester, G. Lange, R. Klein, M. Rarey

**4:00 MEDI 23.** Discovery of selective SETD8 inhibitors via structure-based approach. **A. Ma**, W. Yu, K. Butler, F. Li, W. Tempel, N. Babault, P. Fabio, J. Shao, J. Wang, M. Luo, M. Vedadi, P. Brown, C.H. Arrowsmith, J. Jin

**4:25 MEDI 24.** Discovery of a noncovalent, mutant-selective epidermal growth factor receptor inhibitor. **B.K. Chan**, E.J. Hanan, K. Bowman, M.C. Bryan, D. Burdick, E. Chan, Y. Chen, S. Clausen, T. Dela Vega, J. Dotson, C. Eigenbrot, R. Elliott, R. Heald, P. Jackson, J. Knight, H. La, M. Lainchbury, S. Malek, H.E. Purkey, G. Schaefer, S. Schmidt, E. Seward, S. Sideris, L. Shao, S. Wang, S. Yeap, I. Yen, C. Yu, T.P. Heffron

**4:50 MEDI 25.** Discovery of 4-(((2R,3R)-1,3-dihydroxybutan-2-yl)amino)-6-phenylpyrrolo[1,2-b]pyridazine-3-carboxamide (BMT-1438), a potent JAK1/3 inhibitor and the use of a phosphate prodrug in demonstrating efficacy in a rheumatoid arthritis model. **S.H. Spergel**, M. Mertzman, J. Kempson, J. Guo, S.M. Stachura, L. Haque, J. Lippy, R. Zhang, M.A. Galella, S. Pitt, G. Shen, A. Fura, K. Gilooly, K. Mcintyre, V. Tang, J.S. Tokarski, J. Sack, J. Khan, P.H. Carter, J.C. Barrish, S. Nadler, L. Salter-Cid, G.L. Schieven, S. Wroblecki, W.J. Pitts

### Section B

Moscone Center  
3006/3008

### Medicinal Chemists' Toolbox: Factors Influencing Oral Bioavailability & Case Studies

N. A. Meanwell, P. M. Scola, K. Yeung, Organizers, Presiding

#### 2:00 Introductory Remarks.

**2:05 MEDI 26.** Drug absorption and disposition influencing oral bioavailability: An industrial perspective and literature review. **C. Huang**

**2:40 MEDI 27.** First-pass intestinal glucuronidation as a potential obstacle for oral absorption of small molecule drug candidates: When should we worry? **A.S. Kalgutkar**

**3:15 MEDI 28.** Role of drug metabolizing enzymes in oral bioavailability. **C. Khojasteh**

**3:50 MEDI 29.** Role of early solubility measurements in predicting bioavailability challenges and subsequent formulation strategies to enable compounds. **W.P. Wuelfing**

**4:25 MEDI 30.** Mesenteric lymph: A conduit to enhanced oral bioavailability and immune cell targeting. **C. Porter**

### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG, ORGN and PROF

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES, and WCC

## SUNDAY EVENING

### Section A

Moscone Center  
West Hall

### General Posters

A. W. Stamford, Organizer

#### 7:00 - 9:00

**MEDI 31.** Aminobenzimidazoles and structural isomers: Design, synthesis, pharmacological evaluation and computational studies of novel dual-acting butyrylcholinesterase inhibitors and hCB<sub>2</sub> receptor ligands for the treatment of Alzheimer's disease. **D. Dolles**, E. Sawatzky, J. Möller, M. Nabissi, A. Drakopoulos, A. Strasser, H. Wittmann, M. Lohse, M. Decker

**MEDI 32.** Development of small molecules to modulate ApoE and Abca1/Ldlr levels for Alzheimer's therapy. **N. John**, I. Boginski, A. Voigt, R. Remotigue, J. Kim, J. Kim, S. Maitra

**MEDI 33.** Design, synthesis and biological evaluation of 3-hydroxy-4H-pyrone derivatives as potent MTDLs for Alzheimer's disease. **R. Sheng**, J. Liu, L. Jiang, L. Tang

**MEDI 34.** Acetyl cholinesterase inhibitory and toxicity profiles of tacrine-curcumin hybrids. **R. Alavala**, G. Tipparapu, **S. Boyapati**, U. Kulanthaivelu, R. Ajmeera, B. Mantriprigada

**MEDI 35.** Design, synthesis, and *in vitro* evaluation of novel sigma-2 receptor modulators: An opportunity in Alzheimer's disease therapy. **K. Blattner**, D.J. Cannery, R. Gao, R. Bhandare, J.C. Gordon, M. Abou-Gharbia, N.J. Izzo, N. Knezovich, C. Silky, K. Mozzoni, S. Catalano, G. Rishon, B.E. Blass

**MEDI 36.** Discovery of multi-target-directed ligands for the treatment of Alzheimer's disease. **W. Huang**, Z. Shen, C. Li, Q. Li, X. Zhen, Z. Ma, M. Liang

**MEDI 37.** Biased agonism at CB2 cannabinoid receptors: Implications for drug development. **R. Hutchison**, P. Prather

**MEDI 38.** Synthesis and biological evaluation of dual-target peripheral CB<sub>1</sub>R antagonists. **M.R. Iyer**, R. Cinar, A.R. Katz, G. Kunos

**MEDI 39.** Profiling signaling bias of synthetic cannabinoid New Psychoactive Substances (NPS) at the Cannabinoid Type 1 Receptor (CB1R). **S. Banister**, K.K. Kumar, B.K. Kobilka, S.V. Malhotra

**MEDI 40.** Synthesis and SAR studies of somatostatin subtype-4 agonists for the treatment of Alzheimer's disease. **M. Minaeian**, A.M. Crider, I. Daryaei, M. Kontoyianni, W.M. Kolling, W.L. Neumann

**MEDI 41.** Discovery of tetrahydroquinoline-containing CXCR4 antagonists with improved ADMET properties. **E.J. Miller**, E. Jecs, V. Truax, B. Katzman, K. Kuo, M.B. Kim, R.J. Wilson, H.H. Nguyen, Y.A. Tahirovic, M. Saindane, T. Wang, C. Sum, J. Chen, M.E. Cvijic, D.R. Shen, N. Burford, C. Chen, H. Zhang, A.J. Tebben, L.J. Wilson, G.M. Schroeder, D. Liotta

**MEDI 42.** Synthesis of novel TIQ-15 analogs with improved drug properties. **E. Jecs**, E.J. Miller, R.J. Wilson, H.H. Nguyen, Y.A. Tahirovic, M.B. Kim, B.M. Katzman, V.T. Truax, K. Kuo, J. Chen, M. Cvijic, D.R. Shen, C. Chen, H. Zhang, A.J. Tebben, C. Sum, T. Wang, N. Burford, G.M. Schroeder, L.J. Wilson, D. Liotta

**MEDI 43.** Synthesis and SAR of TIQ-15 based CXCR4 antagonists: Identification of tetrahydroquinoline replacements. **R.J. Wilson**, E.J. Miller, E. Jecs, V.T. Truax, L.J. Wilson, H.H. Nguyen, Y.A. Tahirovic, D. Liotta, G.M. Schroeder, T. Wang, H. Zhang, M. Kim

**MEDI 44.** Synthesis of 2,4,6-trisubstituted pyridines using palladium-catalyzed cross-coupling reactions and *in vitro* anticancer evaluation. **A. Hernandez Campos**, P.J. Trejo, I. González, L. Yépez-Mulia, J. Pérez-Villanueva, M.A. Cerbón-Cervantes, R. Castillo-Bocanegra

**MEDI 45.** First steps in hit-to-lead optimization towards AKT inhibition. **E.E. Sanabria-Chanaga**, R. Castillo-Bocanegra, A. Hernandez Campos

**MEDI 46.** Design, synthesis and biological evaluation of quinazoline derivatives as cytotoxic molecules of breast cancer triple-negative. **A.S. Matus-Meza**, F. Hernández-Luis, M.A. Velasco-Velázquez

**MEDI 47.** Targeting specific interactions to improve EGFR-ligand binding. **C. Williams**, A. Ajamian, N. Thorsteinson, **N. Li**, B. Jean-Claude

**MEDI 48.** Molecular design and synthesis of inhibitors of EGFR kinase: New quinazoline derivatives. **A.S. Bunev**, E.V. Sukhonosova, **S. Sokov**

**MEDI 49.** Derivatives of 5-(imidazo[2,1-b]thiazol-6-yl)-4-methylthiazol-2-amine new effective EGFR-kinase inhibitors. **A.S. Bunev**, E.V. Sukhonosova, **K. Talina**

**MEDI 50.** Discovery of atropisomeric quinolone sulfonamide (AM-0466), a potent and selective Na<sub>v</sub>1.7 inhibitor with robust *in vivo* analgesic activity. **R. Graceffa**

**MEDI 51.** Discovery of non-zwitterionic aryl sulfonamides as Na<sub>v</sub>1.7 inhibitors with efficacy on preclinical behavioral and translational measures of pain. **Y. Wu**, J. Guernon, A. McClure, G. Luo, R. Rajamani, A. Ng, A. Easton, A. Newton, C. Bourin, D. Parker, K. Masure, O. Barnaby, M. Soars, R.J. Knox, M. Matchett, R. Pieschl, J. Herrington, P. Chen, D. Sivarao, L.J. Bristow, N.A. Meanwell, J.J. Bronson, R.E. Olson, L.A. Thompson, C.D. Dzierba

**MEDI 52.** Synthesis and structure-activity relationships of morpholine-based aryl sulfonamide Na<sub>v</sub>1.7 inhibitors. **J.M. Guernon**, A. McClure, R. Rajamani, R.J. Knox, M. Matchett, R. Pieschl, J. Herrington, L.J. Bristow, N.A. Meanwell, R.E. Olson, L.A. Thompson, C.D. Dzierba, Y. Wu

**MEDI 53.** Structure-based design of ATP citrate lyase inhibitors and their anticancer activities. **F.E. Jernigan**, S.K. Koerner, J. Hanai, V.P. Sukhatme, **L. Sun**

**MEDI 54.** Withdrawn.

**MEDI 55.** Bioassay protocols: Semantic annotation to enable informatics. **A. Clark**

**MEDI 56.** Design, synthesis, and evaluation of a new privileged scaffold for use in drug discovery. **M.J. Stocks**, C. Schwelm, B. Kellam, A. Garces, N. Kinson, T. Bradshaw, J. Li, S.J. MacDonald, J. Rowedder

**MEDI 57.** From chemical similarity to rational polypharmacology. **M.J. O'Meara**, X. Huang, B.L. Roth, B. Shoichet

**MEDI 58.** Quantum chemistry calculation-aided optimization of novel microtubule-targeting agents binding to colchicine site. **C. Zheng**, J. Jiang, J. Liu, J. Zhu, Y. Zhou

**MEDI 59.** Enhanced delivery of HIV integrase inhibitors with prodrugs designed for polymeric nanocarriers. **W.E. Afunugo**, M.E. Ebner, A.M. Bever, S. Cao, Y. Jiang, K.A. Woodrow, I.T. Suydam

**MEDI 60.** Synthesis and biological evaluation of sulfonyl piperazine derivatives for LpxH inhibition. **M. Lee**, J. Zhao, J. Cho, D. Kwon, P. Zhou, J. Hong

**MEDI 61.** Creating new from clinical agents: Discovery of Combretastatin A-4 inspired heterocycles as antitubulin anticancer agents. **N. Hura**, S.K. Guchhait

**MEDI 62.** Matching medium characterization by microwave brain stroke imaging. **T. Yilmaz**, G.A. Eken, E. Yildirim, **M.H. Acar**, I. Akduman

**MEDI 63.** Synthesis of functionalized benzofulvenes and their possible application towards thioredoxin reductase inhibition and cancer treatment. **A. Glass**, **K. Casparty**

**MEDI 64.** Hologram QSAR and structure-based design of novel small-molecule inhibitors of choline acetyltransferase. **R. Kumar**, T. Darreh-Shori

**MEDI 65.** Virtual hit-to-lead drug development program FRESH and success across carbonic anhydrase II and phosphatidylinositol 3-kinase  $\alpha$ . **T. Kaiser**, Q. Shi, Z. Denton, P. Burger, J. Snyder, D. Liotta

**MEDI 66.** Dopamine transporter ligands with short and long residence time. **S. Kukuk**, J. Jarv

**MEDI 67.** Structure function studies of silent agonists of the alpha 7 nicotinic acetylcholine receptor. **M. Quadri**, C. Stokes, R. Papke, C. Sanon, N. Horenstein

**MEDI 68.** Dual soluble Epoxide Hydrolase (sEH) and Fatty Acid Amide Hydrolase (FAAH) inhibitors for treating. **L.D. Kodani**, K. Wagner, S. Hwang, K.S. Lee, C. Morisseau, B.D. Hammock

**MEDI 69.** Low-cost high-impact route to kill MRSA with beta-lactam antibiotics. **C.V. Rice**, M. Foxley, M. Xiao, S. Wright, S. Strange

**MEDI 70.** Clickable 4-N-alkanoyl and 4-N-alkylgemcitabine analogues with silicon-fluoride acceptors. **C. Gonzalez**, A. Sanchez, S.F. Wnuk

**MEDI 71.** Novel 5-nitroimidazole and 5-nitrothiazole piperazine derivatives and their antiparasitic activity. **H.A. Saadeh**, M. Khasawneh, Y. Abou-Zeid, I. El-Haty, K. Nsangou, K. Goyal, R. Sehgal, A. Samadi

**MEDI 72.** Matched molecular pair analysis and collaboration: Finding routes to the age-old problem. **A. Dossetter**, E.J. Griffen, A.G. Leach, S. Montague

**MEDI 73.** Diketo acids and their hybrid biososter derivatives as bacterial biofilm and Methionine Aminopeptidase (MetAP) inhibitors. **A. Mohammad**, P. Hasan, V. Pillalamarri, M. Irfan, A. Perwez, B. Ahmad, U. Yadava, M. Rizvi, C. Daniliuc, R. Maguire, K. Kavanagh, A. Adlagatta

**MEDI 74.** Studies aimed at the synthesis of Hsp90 inhibitors as antileishmaniasis agents. **L. Barreto**, J. Leahy, D. Kyle

‡ Cooperative Cosponsorship

- MEDI 75.** Synthesis and biological activity studies of C1-substituted carbapenem antibiotics. **T. Nguyen, J. Kim, P. Nguyen, M. Cox, M. Bennett, B. Meshram, L. Phung, C. Watanabe, A. Shi, M. Alqurafi, J.D. Buynak**
- MEDI 76.** 2-Nitrobenzenesulfonyl fluoride is a novel small molecule pharmacophore for the development of new antibiotics. **B. Park**
- MEDI 77.** Gold-phosphines and gold-phosphine-modified human serum albumin as potent inhibitors of T-cell proliferation. **T.C. Dean, M. Yang, M. Liu, P.K. Langston, J. Lee, C.M. Furdulj, J. Grayson, U. Bierbach**
- MEDI 78.** Insulin: Its structure, function, and interaction in model cell membranes. **K. Saulcy, D.C. Crans, A. Sostarec**
- MEDI 79.** Synthetic and mechanistic studies of cyclotriazadisulfonamide (CADA) down-modulators of human CD4. **T.W. Bell**
- MEDI 80.** Facile synthesis of Benzalkonium Chloride (BAC)-derived mesoporous silica nanoparticles as antibacterial material. **H. Wang, T.B. Shrestha, J. Covarrubias, A.P. Malalasekera, S.O. Wendel, J. Yu, P. Thapa, L. Chlebanowski, O. Covarrubias Zambrano, D.L. Troyer, S.H. Bossmann**
- MEDI 81.** Withdrawn.
- MEDI 82.** Advanced carbapenem antibiotics: The synthesis and activity studies of C6 substituted carbapenems. **M. Alqurafi, J. Kim, D. Le, M. Mohry, C. Watanabe, A. Shi, T. Nguyen, J.D. Buynak**
- MEDI 83.** Impact of pH on solubility, hydrolysis kinetics, and pharmacokinetics of tenofovir disoproxil fumarate delivered from intravaginal rings. **J.A. Moss, M.M. Baum, M. Gunawardana, C.S. Miller, I. Butkyavichene, S. Calvez, F. Yang, K.L. Vincent, R.B. Pyles**
- MEDI 84.** Withdrawn.
- MEDI 85.** Use of substrate analogues and Tetrahydroisoquinolines (THIQ) as potential inhibitors for *Mycobacterium tuberculosis* enzyme MshC and synthesis of mycothiol. **K. Patel, A. Reddy Maddirala, P.R. Andreana**
- MEDI 86.** MRI probe loaded HDL mimicking nanoparticles for diagnosis and therapy of atherosclerosis. **B. Banik, S. Dhar**
- MEDI 87.** Copper responsive gadolinium-based MRI contrast agents. **N.N. Paranewithana, A.F. Martins, G. Meloni, S. Chirayil, P. Zhao, A. Sherry**
- MEDI 88.** Novel, real-time analysis of nano-material inhibition of *E. coli*. **P.A. Sermon**
- MEDI 89.** Organizing 3D project data for structure-based drug design. **H.J. Feldman, A. Ajamian, E. Metwally**
- MEDI 90.** Fast generation of novel leads using virtual screening and fast MCR chemistry. **A. Doemling, C.J. Camacho**
- MEDI 91.** Tumor suppressor P27<sup>Kip1</sup> regulation by tissue transglutaminase and its potential application in cancer therapeutics. **L. Zhang, R.J. Sheaff**
- MEDI 92.** Withdrawn.
- MEDI 93.** Dual targeting of the cancer antioxidant network with redox active gold(II) N-heterocyclic carbene complexes. **R. McCall, J. Kocerha, J.L. Sessler, V. Sittaramane, K. Arumugam, J.F. Arambula**
- MEDI 94.** Fluorescent chemosensing for chloride and nucleotides based on artificial receptors in water. **A. Dorazco Gonzalez**
- MEDI 95.** D-peptides as inhibitors of Proteinase 3-membrane interactions. **K. Maximova, T. Venken, N. Reuter, J. Trylska**
- MEDI 96.** Molecular investigation of cyclic  $\beta$ - and  $\gamma$ -peptoids. **R. Grams, D. Marron, M. Kassu, J.S. Josan**
- MEDI 97.** Mapping of cell surface receptors using silver nanodiscs. **J.S. Josan, M. Kassu, G. Liu, A. Khan, R. Grams**
- MEDI 98.** Late-stage functionalization of complex molecules. **R. Karimov, A. Sharma, J.F. Hartwig**
- MEDI 99.** Synthesis of novel imidazobenzodiazepine oxazole bioisosteres as potential  $\alpha$  2, 3 subtype selective GABA(A) receptors agonists with excellent metabolic stability, pharmacokinetics, and anxiolytic efficacy. **G. Li, K.R. Methuku, M.M. Poe, J.M. Witkin, J.M. Schkeryantz, M. Ernst, J.M. Cook**
- MEDI 100.** Study and isolation of chemical compounds of *Guaiacum sanctum* for cytotoxicity and anti-tumor activities. **A.A. Laureano**
- MEDI 101.** Synthesis and evaluation of increased binding affinity analogues of fosmidomycin as inhibitors of the non-mevalonate isoprenoid biosynthesis pathway. **B.C. Figula, J.W. Tomsho, J.M. Gamrat**
- MEDI 102.** Design and synthesis of alpha-helix mimetics for treatment of high-risk human papillomavirus infection. **S. Rendon**
- MEDI 103.** Design of ER beta selective agonists for hippocampal memory enhancements. **K. Perera, W. Donaldson, A. Schultze, D. Sem, J. Kim, K. Frick**
- MEDI 104.** Rational design, synthesis, and *in vitro* evaluation of mPGEs-1 inhibitors as next-generation of anti-inflammatory drugs. **K. Ding, Z. Zhou, Y. Yuan, F. Zheng, C. Zhan**
- MEDI 105.** Delivery of flavonol-based photoCORMs to mitochondria. **T. Soboleva, H. Esquer, S. Anderson, A. Benninghoff, L.M. Berreau**
- MEDI 106.** Exploring the mechanism of action of a newly-discovered therapeutic peptide for blinding retinal diseases by identifying its receptors. **D. Zhou, Z. Shao, J.A. Kornfield**
- MEDI 107.** Design of new irreversible arginase inhibitors. **X. Guo, C. Seto**
- MEDI 108.** Development of biodegradable microneedles using dexamethasone and Poly Lactic-co-Glycolic Acid (PLGA) for cochlear drug delivery. **C. Bravo**
- MEDI 109.** Alpha-helix mimetics as potential drugs for Human Papillomavirus (HPV). **V. Do**
- MEDI 110.** Discovery of a novel irreversible and potent FLT3 inhibitor FF-10101 under clinical investigation. **M. Takasaki, A. Hirai, D. Terada, M. Okubo, T. Tsujino, K. Sato, S. Tanabe, S. Inuki, S. Mizumoto, N. Fujikawa, D. Hirano, T. Yamaura**
- MEDI 111.** Discovery of CCT251236 from an HSF1 phenotypic screen: A pirin ligand with efficacy in an ovarian adenocarcinoma model. **E. Pasqua, M. Cheeseman, N.E. Chessum, C. Rye, M.J. Tucker, B. Wilding, L.E. Evans, S. Lepri, M. Richards, S.Y. Sharp, S. Ali, M. Rowlands, L. O'Fee, A. Miah, A. Hayes, A.T. Henley, M. Powers, R. Te Poole, E. De Billy, L. Pellegrino, F. Raynaud, R. Burke, R.L. van Montfort, S.A. Eccles, P. Workman, K. Jones**
- MEDI 112.** Bruton's Tyrosine Kinase (BTK) program: Quick systematic SAR development utilizing parallel synthesis. **Y. Yu, R. Anand, D. Sha, H.A. Vaccaro, M. Maletic, R. Mazzola, Z. Shi, M. Alhassan, S.B. Boga, J.L. Duffy, X. Gao, D. Guideen, J. Kelly, A. Krikorian, J. Liu, K. Maloney, O. Selytin, J. Wang, J. Xu, W. Yu, M. Altman, B.M. Andresen, Y. Liu, M. Martinez, T. Siu, S. Liu, C. Yang, H. Wu, J. Cai, Y. Gao, T. Fischmann, J. Presland, M. Mansueto, Z. Xu, E. Leccese, J. Zhang-Hoover, I. Knemeyer, C. Garlisi, N. Bays, P. Stivers, P. Brandish, A. Hicks, R. Kim, J.A. Kozlowski**
- MEDI 113.** Withdrawn.
- MEDI 114.** Leucine's role of dry powder inhaler performance of salbutamol sulphate containing spray dried mannitol. **C. Molina**
- MEDI 115.** Effects of varying H<sub>2</sub>S concentrations on sulfhemoglobin complex formation. **N.E. Crespo Rosado**
- MEDI 116.** Discovery of novel inhibitors of NF- $\kappa$ B Inducing Kinase (NIK) from an FBDD approach. **L. Kwok**
- MEDI 117.** Utilizing the message-address concept to develop selective mu opioid receptor antagonists as potential treatment of opioid addiction. **S. Obeng, A. Jali, D. Stevens, W.L. Dewey, D.E. Selley, Y. Zhang**
- MEDI 118.** Structure-activity relationships of phosphatidylinositol-3-kinase  $\delta$  inhibitors for the treatment of inflammatory respiratory diseases. **A. Garces, C. Schwehm, M.J. Stocks, N. Kindon, S.J. MacDonald, J. Rowedder, T. Bradshaw**
- MEDI 119.** Analysis of the binding parameters of the reversible inhibitor Argyrin B at the active sites of the constitutive and immunoproteasomes. **D. Allardyce, C. Bell, E. Loizidou**
- MEDI 120.** Flavonol-based CO-releasing molecules: Tunability and albumin binding properties. **M. Popova, T. Soboleva, L.M. Berreau**
- MEDI 121.** Identification of ligand-efficient inhibitors of *Trichomonas vaginalis* adenosine/guanosine preferring nucleoside ribohydrolase using NMR-based fragment screening. **S.N. Muellers, A.L. Benzie, D.G. Brown, S. Cowen, D.W. Parkin, B.J. Stockman**
- MEDI 122.** Design, synthesis and employment of Flupirtine-derivative chemical probes for neuroprotective target identification. **N. Kinarivala, F. Saadeh, J. Makoukji, R. Boustany, P.C. Trippier**
- MEDI 123.** Development of imidazopyridines and anti-proliferative effect against castration resistant prostate cancer cells. **I. Wazeeruddin, A. Millena, S. Khan, J. Bu**
- MEDI 124.** Novel chemotype of histone demethylase family KDM4 inhibitors. **M. Siklos, M. Korczynska, T.A. Bates, B. Shoichet, D.G. Fujimori**
- MEDI 125.** Progress towards a novel class of immune modulators: Covalent toll-like receptor-7 agonists. **A.C. Chon, A. Esser-Kahn**
- MEDI 126.** Novel prodrugs of transition state inhibitors of norovirus 3CL protease. **A. Galasiti Kankanamalage, Y. Kim, K. Alliston, A.D. Rathnayake, M. Butler, S. Cardinale, T.L. Bowlin, K. Chang, W. Groutas**
- MEDI 127.** Cyclopropylthiazines as potent BACE1 inhibitors for Alzheimer's disease: Challenging chemistry and *in-vivo* data of this new pre-clinical series. **A. Siegmund, K. Kong, M. Frohn, N. Nishimura, A. Pickrell, M.D. Barberger, D. Hickman, J.R. Allen, S. Wood, M.P. Bourbeau**
- MEDI 128.** Threading the needle: Exploiting a P1-P3 ether linkage in the development of novel BACE inhibitors. **S.P. Walsh, A. Shahripour, E. Kim, W. Li, J.D. Scott, D. Rindgen, L. Hyde, P. Orth, H. Wang, M. Kennedy, J. Cumming**
- MEDI 129.** Novel ROS activated prodrugs as kinase inhibitors: A strategy to improve selectivity. **P.N. Gurjar, S. Abdul Salam, E.J. Merino**
- MEDI 130.** Design and synthesis of selective HDAC6 inhibitors as potential agents against glioblastoma. **S. Fung, A.A. Sadani, K. Wu, J. Chern**
- MEDI 131.** Solid-state structure and absolute configuration of enantiomers of 3-ethyl-3-phenylpyrrolidin-2-one. **A.V. Krivoshein, S.V. Lindeman, V.N. Khrustalev, T.V. Timofeeva**
- MEDI 132.** Chemical correction of cellular dysfunction caused by progranulin deficiency in frontotemporal dementia. **M. Teloukhouvskaia, K. Liu, C. Ludwig, J. Etcheagaray, F. Sayed, Y. Zhou, M.S. Bogoy, S. Ding, L. Gan**
- MEDI 133.** Discovery and structure-activity relationship of thienopyridine derivatives as bone anabolic agent. **T. Shinozuka, K. Saito, A. Nakao, K. Shimada, S. Matsui, N. Daisuke, N. Yoko, N. Satoru**
- MEDI 134.** Molecular modeling studies for a series of benzimidazole derivatives as cruzain inhibitors with anti-*Trypanosoma cruzi* activity. **I. Pauli, L. Ferreira, M.L. de Souza, R. Ferreira, M. Dessoy, B. Slafer, G. Oliva, L.C. Dias, A.D. Andricopulo**
- MEDI 135.** Improving new molecule design using electrostatics. **T. Cheeseright, M.D. Mackey**
- MEDI 136.** Structure-kinetics relationships for LpxC inhibition. **B. Lichtenthal, C. Gu, F. Daryae, R. Basu, M. Babar, P.J. Tonge**
- MEDI 137.** Problem based learning with MOE. **A. Bonin**
- MEDI 138.** Exploiting solvent effects in drug design and optimization. **R. Alvarez, A. Ajamian, C. Williams**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- MEDI 139.** Synthesis of novel efflux pump inhibitors which target the AcrAB-TolC multidrug efflux system in *Escherichia coli*. **K.M. Haynes**, N. Abdali, J. Parks, J.L. Chaney, A.T. Green, D. Wolloscheck, J.K. Walker, N. Wood, V.V. Rybenkov, J.Y. Baudry, J. Smith, H.I. Zgurskaya
- MEDI 140.** Design of mGlu2 negative allosteric modulators for the treatment of neuropsychiatric disorders. **S. Conde**
- MEDI 141.** Phosphoramidate inactivators of *Mycobacterium tuberculosis* (*Mtb*) *BlaC*. **D.S. White**, C. Choy, C.E. Berkman
- MEDI 142.** Development of covalent caspase-6 inhibitors derived from disulfide trapping (tethering). **K.S. Van Horn**, D. Wang, C. Bryant, D. Medina-Cleghorn, P. Jaishankar, P. Lee, M. Arkin, A.R. Renslo
- MEDI 143.** What do recently approved oral drugs look like? A year-by-year analysis of FDA approved drugs in 2007-2016. **A. Ritzén**, L. David
- MEDI 144.**  $\mu$ Cyclic peptides containing tryptophan and arginine residues: Antibacterial activities and structure-activity relationship. **N. Riahi**, T. Aldakhil, S. Nasser, F. Nunez, K. Zoghebi, S. Mozaffari, J. Yamaki, K. Parang, R.K. Tiwari
- MEDI 145.** Synthesis and evaluation of antimicrobial activity of levofloxacin-[R<sub>1</sub>W<sub>1</sub>] and Q-levofloxacin-[R<sub>1</sub>W<sub>1</sub>] conjugates and comparison with the corresponding physical mixtures. **N. Riahi**, K. Tavakoli, J. Yamaki, R.K. Tiwari, K. Parang
- MEDI 146.** Anti-malarials targeting the heat shock 90 protein of *Plasmodium falciparum*. **N. Everson**, J. Bach, T. Sisley, M. Walls, S.C. Eagon
- MEDI 147.** Synthesis of anti-malarial compounds targeting the ATP4 protein in *Plasmodium falciparum*. **G. Koch**, J. Tryhorn, K. Ahn, B. Belanger, K. Yniguez, **H. Lazaro**, A. Kashtanova, S.C. Eagon
- MEDI 148.** Novel high-affinity dopamine D4 receptor-selective ligands. **C.A. Boateng**, T.M. Keck, B. Free, C. Wu, A. Bonifazi, A.H. Newman, D.R. Sibley
- MEDI 149.** Optimized chemical tools to probe the function of thioredoxin-interacting protein as therapeutic target. **O. Mirquet**, S. Nicolas, M. Aunis, K. Daeron-Courte, F. Perron-Sierra, S. Guizzetti, C. Vinson, A. Callez, C. Chesneau, B. Cremers, M. Sadlo, I. Wehrle, G. Zanirato, P. Delerive, C. Bernard
- MEDI 150.** Structure activity relationship of novel piperazino-enaminones (JOAB series) as pro-inflammatory cytokines suppressants. **A. Bill**, D. Szollosi, J. Dhuguru, I. Edefogho, **O.M. Ghoneim**
- MEDI 151.** Phytochemical evaluation of antimicrobial properties of *Combretum igneiflorum* extracts. **I. Maldonado**, A.K. Addo-Mensah
- MEDI 152.** Next generation small molecule inhibitors of 5'-Methylthioadenosine nucleosidase (MTN) as novel antimicrobial agents. **J.H. Thurston**, K. Cornell, **L. Wayment**
- MEDI 153.** Synthesis and evaluation of choline-derived Deep Eutectic Solvents (DES) as biofilm eradicating antibiotics. **A.W. Jemas**, D. Jacobs
- MEDI 154.** Structure Activity Relationship (SAR) studies of EP2 receptor antagonists. **T. Ganesh**, R. Dingleline
- MEDI 155.** Identification of vacuolar (H<sup>+</sup>)-ATPase modulators by virtual screening process. **R. Patil**, A. Kulshrestha, A. Tikoo, S. Fleetwood, G. Katara, W. Seibel, A. Gilman-Sachs, **S. Patil**, K. Beaman
- MEDI 156.** Identification of a novel chemotype of ASK1 inhibitors for heart failure utilizing structure-based drug design. **A.L. Chambers**
- MEDI 157.** Determination of partition and distribution coefficients using <sup>1</sup>H NMR spectroscopy time domain Complete Reduction to Amplitude-Frequency Table (CRAFT) analysis. **D.P. Soulsby**, J. Chica
- MEDI 158.** Synthesis, cytotoxic evaluation and docking studies of novel 9-anilinothiazolo[5,4-b]quinoline derivatives bearing polar groups at the anilino ring. **A. Lira-Rocha**, V. Tinajero-Delgado, **J. Solano-Becerra**
- MEDI 159.** Identification of R419, an indirect AMPK activator. **S.J. Shaw**, D. Goff, D.C. Carroll, R. Singh, D. Sweeny, G. Park, D. Lau, Y. Jenkins, V. Markovtsov, T. Sun, Y. Li, A. Pan, Y. Hitoshi, K. Baltgalvis, H. Nguyen, T. Kinsella, D. Payan
- MEDI 160.** Effects of propolis on cancer cell membranes and bacterial cell membranes studied with Langmuir monolayers. **B. Book**, A. Sostarecz
- MEDI 161.** Langmuir monolayer investigation in to the antibacterial properties of essential oils. **A. Axup**, A. Sostarecz

- MEDI 163.** Radiosynthesis of P2X<sub>2</sub> receptor radioligands [<sup>11</sup>C]GSK1482160 and [<sup>11</sup>C]GSK1482160 isomer under different base conditions. **M. Gao**, M. Wang, Q. Zheng
- MEDI 164.** Fully automated synthesis of [<sup>11</sup>C]Me-GDC-0068 as a PET tracer for imaging of Akt in cancers. **M. Gao**, M. Wang, H. Shannon, B. Bailey, K. Pollok, H. Zarrinmayeh, Q. Zheng
- MEDI 165.** Natural product-inspired agents and their anticancer activity against glioblastoma multiforme cells. **V. Kumar**, S. Banister, H. Hunter Kaufman, J. Vittimberga, S.A. Jacobo, S.S. Gambhir, S.V. Malhotra
- MEDI 166.** CDD vault: A modern approach for drug research project team informatics. **W.W. Smith**, B.A. Bunin, K. Gregory
- MEDI 167.** Novel tetrahydro isoquinoline derivatives as LXR modulators. **A. Chatterjee**, T.P. Burris, K. Griffett, S. Banerjee, Z. Doerer, A. Avdagic, T. Boehm, **J.K. Walker**
- MEDI 168.** From photochemically responsive crystals to anticancer compounds: Discovery of novel anthracene analogs as antineoplastic agents. **I. Islam**, A. Nehdi, R.O. Al-Kaysi, A. Alaskar, M. Boudjelal
- MEDI 169.** Design, synthesis, and biological properties of a fluorescent duocarmycin analog: HxTfA. **K. Kiakos**, P.C. Patil, S. Yanow, J.A. Hartley, **M. Lee**
- MEDI 170.** Evaluated as potential hypocholesterolemic agent, the preparation and characterization of steroidal  $\alpha,\beta$ -unsaturated ketones. **E.J. Parish**, **D. Ren**, Y. Lo, G. Ren, **H. Honda**
- MEDI 171.** Novel approaches to the chemical preparation and characterization of kinsenoside. **D. Ren**, Y. Lo, E.J. Parish, **H. Honda**
- MEDI 172.** New compounds for the treatment of *Mycobacterium abscessus* infections. **K.D. Combrink**, F. Maurer, K. Elizondo, A. Ramirez-Ramos, S. Spring
- MEDI 173.** Anticancer activity of exo-cyclic carbohydrate enones containing thio-phene and pyrrole moieties. **J. Sarnik**, A. Czubatka-Bienkowska, A. Macieja, **Z.J. Witzczak**, R. Bielski, T. Poplawski
- MEDI 174.** Novel carbohydrate functionalized thiosemicarbazides evoked DNA damage in cancer cell lines. **A. Czubatka-Bienkowska**, J. Sarnik, **Z.J. Witzczak**, T. Poplawski
- MEDI 175.** Enhanced chemical diversity through library *in situ* pre-metabolism: Using biological chemistry for novel lead discovery. **N.J. Ayon**, **W.G. Guthell**
- MEDI 176.** Actinomycete antibiotic compounds from soil bacteria at an ancient Roman site. **A. Hoffman**
- MEDI 177.** Inhibitors of the protein-protein interaction of Class IIa HDACs with MEF2 as potential anticancer agents. **C.M. DeAngelo**, K.J. Gaffney, M.A. Sainz, J.A. Jarusiewicz, N. Jayathilaka, L. Chen, S.G. Louie, N.A. Petasis
- MEDI 178.** Development and screening of new cathepsin B and K inhibitors utilizing substituted thiosemicarbazones. **R. McConnell**, H. Sarepalla, P.G. Akula, B. Guada, D. Yermala, N. Kadasala, K. Sayyar, W. Godwin, L. Wen
- MEDI 179.** Novel mPGES-1 inhibitors identified from structure-based virtual screening based on new acting mechanism. **S. Zhou**, Z. Zhou, Y. Yuan, C. Zhan
- MEDI 180.** Nanomolar-potency aminophenyl-1,3,5-triazine CFTR chloride channel activators for pro-secretory therapy of dry eye diseases. **S. Lee**, P. Phuan, C. Felix, M.H. Levin, A. Verkman
- MEDI 181.** Development of novel anti-biofilm compounds for the prevention and treatment of Candidiasis. **M. Valdez**
- MEDI 182.** Anti-bacterial activity of isoxazole rifamycin derivatives against *Mycobacterium abscessus*. **A. Ramirez Ramos**, K.D. Combrink, F. Maurer, S. Schmidt, S. Spring, K.N. Elizondo
- MEDI 183.** Identical HIV populations and levels of proviral expression in lymph nodes and PBMCs in individuals on antiretroviral therapy. **V. Musick**
- MEDI 184.** Synthesis and evaluation of 1, 3, 5 (10) estratriene aminoalkoxy, 16-formyl derivatives of Estrone as potential anti-breast cancer agents. **C. Sullen**, J.S. Cooperwood
- MEDI 185.** Modulation of Glioblastoma tumor area is time dependent on the application of G4-OH PAMAM dendrimer. **M. Jeakle**
- MEDI 186.** Polymorphs and solvates of erlotinib and dasatinib. **T. Maddox**, R. Quinones
- MEDI 187.** Computer-aided design of negative allosteric modulators of metabotropic glutamate receptor 5 (mGluR5): CoMFA studies on aryl ether derivatives. **S. Chelliah**, **B. Jordan**, R. Thilagavathi
- MEDI 188.** Chemo-enzymatic approach towards the synthesis of vancomycin and its analogs. **S. Ozturk**
- MEDI 189.** EGCG and Sylibins as treatment for inherited cardiomyopathies: Binding simulations to cardiac troponin. **J. Eiros Zamora**, G. Hoben, A. Sheehan, A. Messer, A. Chaudhry, D. Biedermann, V. Kren, S.B. Marston, I.R. Gould
- MEDI 190.** Derivatives of L-tryptophanhydroxamic acid as potential inhibitors of *Burkholderia pseudomallei* IspF. **C. Muller**
- MEDI 191.** Synthesis and evaluation for biological activity of cyclic guanidine containing natural product analogues. **V. Sammeta**, **S. Rasapalli**
- MEDI 192.** Exploring the chemical biology of secondary metabolites: Scalable synthesis of majusculamide D. **E.J. Caro-Diaz**, W.H. Gerwick
- MEDI 193.** Prostate cancer targeted nanoparticle cocktail for combination therapy. **U. Basu**
- MEDI 194.** Direct thrombin inhibitors with a novel, reversible, covalent mechanism of action. **M. Sivaraja**, S. Sizikov, D. Williams, C. Xu, D. Clemens, S. Dash, K. Lin, M. Reddy, G. Neckermann, S. Yau, E. To, L. Igoudin, S. Chang, S. Keutzer, P. Zalicki, N. Sandoval, J. Zhang, T. Shiau, **K. Short**, M. Estiarte, A. Datta, D. Kita
- MEDI 195.** Cheminformatics analysis of WNK-inhibitor interactions. **M.A. Kuenemann**, D. Fourches
- MEDI 196.** Computational structural-based design and structure and activity study of fluorinated combretastatin analogues. **Y. Zong**
- MEDI 197.** Benzoate derived pH sensitive phosphoramidate-based linkers for controlled release. **B. Backer**, A. Davis, C. Choy, C.E. Berkman
- MEDI 198.** New vacuolar-ATPase inhibitors as antiviral therapies. **A. Lindstrom**, D.P. Petrov, D. LaCount, R. Davey, V.J. Davissou
- MEDI 199.** Design and synthesis of curcumin analogues for cytotoxicity against head & neck cancer. **S. Chelliah**, B. Jordan, B. Kumar, R. Thilagavathi, P. Kumar
- MEDI 200.** Withdrawn.
- MEDI 201.** Interactions of isoniazid with model membranes. **A. Groninger**, B.J. Peters, J.B. Hough, F. Fontes, G. Cardiff, D.C. Crick, D.C. Crans
- MEDI 202.** Synthesis and biological evaluation of novel casein kinase 1d inhibitors for treatment of Alzheimer's disease. **V. Jha**, C. Gettridge, R. Schroeder, M. Bratton, P. Tram, J. Sidhar
- MEDI 203.** Exploring the interactions between the anti-tuberculosis agent, pyrazinamide/pyrazinoic acid, and lipid model membrane systems. **J.B. Hough**, A.S. Groninger, B.J. Peters, F. Fontes, D.C. Crick, D.C. Crans
- MEDI 204.** Aza-peptide aldehydes and ketones: A new class of proteasome inhibitors. **T. Corrigan**, K. Kasper, R. McCauslin, R.J. Yoder, C.M. Hadad, Ö. Doğan Ekici
- MEDI 205.** Synthesis of oligothiophene tris(2,2'-bipyridyl)-type ruthenium (II) conjugate as electrochromic luescence-luminophore. **L. Lantz**, N. Nilsson
- MEDI 206.** Molecular dynamic simulation and pharmacophore model of parasitic cysteine proteases. **D. Gomes Vital Fujii**, G.M. Monteiro Ferreira, J. da Fonseca Rezende e Mello, G.H. Trossini

- MEDI 207.** Comparison of the efficacy of ester substituents in their specificity and effectiveness for reducing cell growth in certain cancer cell lines. **R. Nguyen**, A. Jelowicki, M. Young, C. Bunye, K. Soriano, E. Guglielmo, E. Lavassani, A. Nguyen, N. Patel, P. De Lijser
- MEDI 208.** Synthesis of KS15 derivatives as CRY-mediated circadian clock modulators. **Y. Choi**, Y. Son, S. Chung, G. Son, K. Kim, Y. Suh, J. Jung
- MEDI 209.** Synthesis and evaluation of xanthurenic acid analogs for impeding transmission of *Plasmodium falciparum* from host to vector. **A. Kanwar**, J. Leahy, D. Kyle, T. Mcgaha
- MEDI 210.** Withdrawn.
- MEDI 211.** Magnetite nanoparticles effect on *Escherichia coli* growth. **M.A. Gratacos**, E. Acevedo
- MEDI 212.** Withdrawn.
- MEDI 213.** Developing dual colorimetric and fluorogenic probes for visualizing tyrosine phosphatase activity and high throughput screening. **S. Biswas**, B. S. McCullough, E. S. Ma, D. LaJoie, C. W. Russell, G. Brown, J. L. Round, K. S. Ullman, M. A. Mulvey, A.M. Barrios
- MEDI 214.** Photoswitchable dualsteric M1 ligand. **L. Agnetta**, M. Kauk, M. Canizal, R. Messerer, U. Holzgrabe, C. Hoffmann, M. Decker
- MEDI 215.** Synthesis of chemical probes for serine/threonine protein phosphatase 5C based on a natural product template. **M. Tuttle**, L. Yet, R. Honkanen, M. Swingle
- MEDI 216.** Development and synthesis of  $\beta$ -lactam prodrugs for tuberculosis. **M. Cole**, J. Buonomo, C.C. Aldrich
- MEDI 217.** Synthesis and biological evaluation of a novel series of GPER antagonists for the treatment of gallstone formation. **C. DeLeon**, C.K. Arnatt, D. Wang, M. Wilhelm, P. Sweeney
- MEDI 218.** Design, synthesis and SAR study of truxillic acid-based fatty acid binding protein inhibitors as anti-nociceptive and anti-inflammatory drugs. **S. Yan**, K. Hu, S. Tong, M. Awwa, Q. Gan, M. Elmes, J. Sweeney, H. Hsu, M. Kaczoga, H. Li, R.C. Rizzo, D. Deutsch, I. Ojima
- MEDI 219.** SB-T-1214 and biotin functionalized gold nanoparticles. **X. Wang**, I. Ojima
- MEDI 220.** Discovery of a novel series of potent and selective Phosphatidylinositol-3-Kinase delta (PI3K $\delta$ ) inhibitors for the treatment of inflammatory and autoimmune diseases. **N. Aguilar**, J. Fernandez, B. Hernandez, M. Carrascal, P. Niño, A. Lopez, L. Vazquez, E. Lozoya, M. Maldonado
- MEDI 221.** Development of cancer stem cell depleting ALDH1A selective inhibitors as potential therapeutics for ovarian cancer. **B. Huddle**, C. Buchman, K. Yang, M. Chtcherbinine, I. Chefetz-Menaker, C. Morgan, R. Buckanovich, T. Hurley, S. Larsen
- MEDI 222.** Photoaffinity probes for protein N-terminal methyltransferases. **B. Mackie**, R. Huang
- MEDI 223.** Novel selenorhodamine dyes as photosensitizers in varying applications. **J. Hill**, M.W. Kryman, G.A. Schamerhorn, M.R. Detty, Z.A. McIver
- MEDI 224.** Design, synthesis and preclinical study of novel taxoid-based Small Molecule Drug Conjugates (SMDCs) using folate/Dimethyltetrahydrofolate (DMTHF) as tumor targeting module. **C. Wang**, Y. Wang, M. Tortorella, I. Ojima
- MEDI 225.** Structure-based discovery of novel small molecule Wnt/ $\beta$ -catenin signaling inhibitors. **S. Guzman**, A. Nguyen, P. De Lijser, N. Patel
- MEDI 226.** Identification and lead optimization of pyrazole carboxamides with antiviral activity. **K. Paulvannan**
- MEDI 227.** Inhibition of arginase from *Leishmania mexicana* by benzimidazole derivatives. **I. Betancourt**, A. Chaidez-Avila, A.G. Vazquez-Raygoza, C.I. Avitia-Dominguez, A. Romo-Mancillas, A. Hernandez Campos, A. Téllez-Valencia
- MEDI 228.** Design and development of a novel class of structurally-enhanced allosteric modulators of hemoglobin for sickle cell disease treatment. **P. Pagare**, O. Abdulmalik, M.K. Safo, Y. Zhang
- MEDI 229.** Generation of novel leads for  $\gamma$ -secretase modulation. **M. Mandal**
- MEDI 230.** Synthesis of benzimidazole derivatives for uridine nucleoside ribohydrolase targeting. **A.S. Leonardo**, M.A. Vanalstine-Parris
- MEDI 231.** Synthesis and biological evaluation of the first triple inhibitors of human topoisomerase 1, tyrosyl-DNA phosphodiesterase 1 (Tdp1), and tyrosyl-DNA phosphodiesterase 2 (Tdp2). **P. Wang**, **M.S. Elsayed**, C. Plescia, E. Kiselev, C. Marchand, O. Zelezniak, K. Agama, Y. Pommier, M. Cushman
- MEDI 232.** Transcarbamoylation of sulfonyl carbamates to generate new Angiotensin II Type 2 Receptor (AT2R) ligands. **J. Wannberg**, **R. Isaksson**, M. Hallberg, M. Larhed
- MEDI 233.** Development of new novel therapeutics for refractive breast cancer. **K. Crosby**, **K. Johnson**
- MEDI 234.** Design, synthesis and pharmacological evaluation of 1,3,6-tri-substituted-4-oxo-1,4-dihydroquinoline-2-carboxylic acid derivatives as selective ET<sub>A</sub> antagonists. **N.S. Khadtare**, R. Stephani, V.L. Korlpara
- MEDI 235.** Withdrawn.
- MEDI 236.** Structure-based design of small-molecular inhibitors targeting the Menin-MLL protein-protein interaction. **S. Xu**, T. Xu, K. Zheng, A. Aguilar, L. Huang, D. Bernard, D. McEachern, S. Przybranowski, J. Stuckey, S. Wang
- MEDI 237.** Novel piperidone derivatives: Potent antifibrotic agents. **Z. Ma**, C. Yu, Q. Chen, W. Huang, Z. Wang, C. Zhang, Z. Shen
- MEDI 238.** Synthesis and biological activity of novel TU-100 derivatives. **O.J. Alao**, R.J. Sheaff, J.C. Dicesare
- MEDI 239.** New  $\alpha$ -helix mimetics targeting the E6 protein in the human papillomavirus. **E. Armenta**, A. Orchard
- MEDI 240.** Finding hits for designing new antidiabetic drugs. Inhibition of protein tyrosine phosphatase 1B. **M.J. Sarabia-Sánchez**, P.J. Trejo, E. Sierra, M. Valdez-Solana, A. Hernandez Campos, C.I. Avitia-Dominguez, **A. Téllez-Valencia**
- MEDI 241.** Identification of small molecular activators on the unfolded protein response in leukemia cells. **N. Mahmoud**, D. Garshott, Y. Xi, A. Brownell, M. Callaghan, A. Fribley
- MEDI 242.** Constrained peptides that inhibit HIV-1 fusion. **O. Bolarinwa**, J. Cai
- MEDI 243.** Design and optimization of small molecule inhibitors blocking the menin-MLL interaction. **T. Xu**, S. Xu, K. Zheng, A. Aguilar, L. Huang, K. Chinnaswamy, D. Bernard, D. McEachern, S. Przybranowski, J. Stuckey, S. Wang
- MEDI 244.** Discovery of LLM4 as potent and specific IL-6/gp130 protein-protein interaction inhibitor for potential cancer therapy. **L. Mao**, G. Shi, C. Li
- MEDI 245.** ML418: The first selective, sub-micromolar pore blocker of K<sub>v</sub>7.1 potassium channels. **H. Kurata**, D.R. Swale, S.V. Kharade, J. Sheehan, R. Raphemot, K.R. Voigtritter, E.E. Figueroa, J. Meiler, A.L. Blobaum, C.W. Lindsley, J.S. Denton, C.R. Hopkins
- MEDI 246.** Effect of magnetite chitosan/alginate beads infused with the anti-biotoxic oxytetracycline hydrochloride on *E. coli* growth rates. **R.M. Zamora**, A. Chardon, F. Alvarez, A. Zapata, V. Fernandez-Alos, F. Roman, O. Perales
- MEDI 247.** Design and solid-phase synthesis of Muramyl dipeptide (MDP) surrogates as NOD2 signaling activating agents. **I. Kekessie**, T. Goncharov, J. Tom, D. Vuic, A. Song
- MEDI 248.** Discovery of preclinical candidate SCH 900577: A prodrug of hydantoin based TACE inhibitor. **L. Tong**, S. Kim, L. Chen, A. Kosinski, B. Shankar, V. Girijavallabhan, D. Yang, W. Yu, G. Zhou, N. Shih, K. Rosner, D. Li, C. Dai, J. Popovici-Muller, L. Yang, A. Siddiqui, Z. Guo, P. Orth, S. Chen, M. Hu, D. Lundell, X. Niu, S. Umland, J.A. Kozlowski
- MEDI 249.** Probing conformational preference: (S)- and (N)-methanocarba 7-deazaadenosine analogues as inhibitors of human adenosine kinase. **K.S. Toti**, D. Osborne, A. Ciancetta, D. Boison, K.A. Jacobson
- MEDI 250.** Synthesis and NMDA receptor activity of various ketamine metabolites. **P.J. Morris**, P. Zanos, R. Moadell, C.A. Zarate, T. Gould, C.J. Thomas
- MEDI 251.** Discovery of potent glucagon receptor antagonists for the treatment of type 2 diabetes. **G. Xu**, M.D. Gaul, F. Song, B. Zhao, Y. Liang, F. Du, K. Diloreto, N. Huebert, B.C. Shook, D. Rentzperis, R. Santulli, A. Eckardt, C. Smith, K. Demarest
- MEDI 252.** Synthesis and two- and three-dimensional *in vitro* studies of hyaluronic acid porphyrin conjugates. **N. Bhupathiraju**, C. Farley, N. Berisha, B. Begum, C.M. Drain
- MEDI 253.** Preformulation analysis and stability of hydrophobic small molecular echinomycin for injection formulation. **J.H. Lee**, M. Tran, P. Yuan, G.K. Potti
- MEDI 254.** Withdrawn.
- MEDI 255.** Design, synthesis and biological evaluation of specific ARK5 inhibitor. **M. Reddy**, S. Athuluri-Divakar, B. Akula, M.R. Mallireddigari, S.C. Cosenza, V. Dandu, V. Bharathi, V. Pallela, P. Reddy
- MEDI 256.** Discovery of novel class IIa-selective histone deacetylase inhibitors using an *in silico* virtual screening approach. **H. Tseng**, C. Liu, C. Chen, K. Hsu, W. Huang
- MEDI 257.** Hybridization approach to selective RIPK2 inhibitors by targeting inactive kinase conformations. **C. Suebsuwong**, A. Degterev, G. Cuny
- MEDI 258.** Design and synthesis of tricyclic and tetracyclic fused coumarin sulfonate derivatives, and their inhibitory effects on LPS-induced nitric oxide and PGE<sub>2</sub> productions in RAW 264.7 macrophages. **M.I. El-Gamal**, C. Oh, K. Lee, D. Baek
- MEDI 259.** Novel benzamides as capsid assembly modulators for the hepatitis B virus. **N. Hwang**, M. Campagna, K. McGuire, S. Wu, J. Guo, Y. Du
- MEDI 260.** Computational design, synthesis and characterization of novel mPGES-1 inhibitors. **Z. Zhou**, K. Ding, S. Zhou, Y. Yuan, F. Zheng, C. Zhan
- MEDI 261.** Evaluation of 2-amino-pyrimidine derivatives as antimicrobial agents and IspF inhibitors. **S. Watkins**, D. Ghose, C.A. Muller, Z. Zhang, J.M. Blain, Z. Lazowski, S.T. McDonald, T. Riggins-Walker, J.R. Horn, R. Meganathan, H. Hofstetter, T.J. Hagen
- MEDI 262.** Design and synthesis of 1-(2-(2,4-difluorophenyl)-2-hydroxy-3-(1H-1,2,4-triazol-1-yl)propyl)-2-(1-((methyl(3-((methylcarbamoyloxy)methyl)pyridin-2-yl)carbamoyloxy)ethyl)-1H-1,2,4-triazol-2-ium. **L. Peyton**, M. Hashemzadeh, S. Gallagher
- MEDI 263.** Fragment-based lead discovery of a novel Map4k4 inhibitor. **L. Wang**
- MEDI 264.** SDAP substrate analog enantioselective synthesis and ninhydrin-based enzyme assay for the dapE-encoded bacterial enzyme diaminopimelate desuccinylase (DapE). **T. Heath**, M. Lutz, C. Reidl, B. Noccek, M. Ballicora, R.C. Holz, K. Olsen, D.P. Becker
- MEDI 265.** Discovery of a new class of highly potent small-molecule degraders of BET bromodomain proteins. **F. Xu**, J. Hu, B. Zhou, Z. Chen, M. Lin, L. Bai, C.Y. Yang, D. McEachern, S. Przybranowski, E. Fernandez-Salas, B. Wen, D. Sun, S. Wang
- MEDI 266.** Glyoxylate shunt as an antibacterial drug target. **S. Bartlett**, A. McVey, A. Crousilles, M. Welch, D.R. Spring
- MEDI 267.** Synthesis of monomers with enzymes and chemical reagents for preparing polyester. **K. Kim**, C. Song, K. Jeong, C.S. Cheong
- MEDI 268.** Exploit ionic liquids to significantly improve asymmetric reduction of 3,5-bis(trifluoromethyl)acetophenone catalyzed by *T. asperillum* ZJPH0810 cells. **J. Li**, W. Du
- MEDI 269.** Microwave-promoted/assisted method for rapid preparation of biaryl seven-membered lactones. **W. Du**
- MEDI 270.** Potent but potentially non-cardiotoxic anthracycline anti-cancer analogs. **J.A. Holdaway**, A.L. Pettay, P.L. Barnes, P. Moon, K. Cornell, D.L. Warner
- MEDI 271.** Targeting the colchicine binding site in tubulin for cancer treatment: Structural optimization of ABI-231 leads to improved potency and microsomal stability. **Q. Wang**, K. Arnst, D.D. Miller, W. Li

**MEDI 272.** Novel, highly selective direct thrombin inhibitors: *In vivo* studies demonstrate efficacy with lower bleeding risk. C. Xu, D. Clemens, S. Dash, K. Lin, M. Reddy, G. Neckermann, S. Yau, E. To, L. Igoudin, S. Chang, S. Keutzer, P. Zalicki, N. Sandoval, S. Sizikov, D. Williams, M. Sivaraja, J. Zhang, T. Shiau, K. Short, M. Estiarte, A. Datta, D. Kita

**MEDI 273.** Synthesis of a known binder of the GRB2 SH2 domain from naphthaldehyde. A. Bowsby, C. Arpin

**MEDI 274.** Novel synthetic strategies to disarm the myeloid cell leukemia-1 oncoprotein. S.J. Hughes, B. Drennen, M.E. Lanning, S. Fletcher

**MEDI 275.** Improving the *in vitro* and *in vivo* performance of a <sup>177</sup>Lu-labeled phosphoramidate-based PSMA inhibitor with an albumin-binding motif. C.J. Choy, X. Ling, J.J. Geruntho, S. Beyers, J. Latoche, B. Langton-Webster, C.J. Anderson, C.E. Berkman

**MEDI 276.** Synthesis and evaluation of phenyl tetrazole derivatives with amide or urea linkers as BCRP/ABC2 inhibitors. N. Gujrati, L. Zeng, Z. Chen, V.L. Korlipara

**MEDI 277.** Two-faced synthetic  $\alpha$ -helix mimetics based on heterocyclic coes as dual BCL-2/MDM2 inhibitors. I.L. Conlon, B. Drennen, M.E. Lanning, L. Chen, S.J. Hughes, P.T. Wilder, S. Fletcher

**MEDI 278.** Kröhnke pyridine synthesis permits facile access to novel Mcl-1 inhibitors. I.L. Conlon, D. Van Eker, J. Chauhan, P.T. Wilder, S. Fletcher

**MEDI 279.** Dual stimuli-activatable oxidative stress amplifying hybrid anticancer drugs. J. Noh, D. Yoo, E. Jung, D. Lee, J. Lee

**MEDI 280.** Covalent-docking based protocol for the rational design of covalent inhibitors. X. Wan

**MEDI 281.** Study of the chemical composition, cytotoxic and antitumor activities of *Croton discolor*. A.D. Ramos Vicente

**MEDI 282.** *Trypanosoma cruzi* sirtuin-2 construction by modeling threading and molecular dynamics. G.M. Monteiro Ferreira, G.H. Trossini, F.D. Emery, V.G. Maltarollo

**MEDI 283.** DFGmodel: Modeling protein kinases in inactive conformations and its applications in drug discovery. P. Ung, A. Schlessinger

**MEDI 284.** Virtual screening for potential inhibitors of neuraminidase for influenza treatment. E.C. Gomez-Suarez

**MEDI 285.** Anthranilic acid derivatives as potential multi-target drugs for metabolic syndrome treatment. A. Bravo, H. González Álvarez, M. Loza-Mejía

**MEDI 286.** Design and synthesis of N-substituted acridone derivatives as potential antibacterial and antiviral agents. L.J. Jimenez Sanchez, D. Juan-Guadarrama, M. Loza-Mejía

**MEDI 287.** Developing a chimeric heterobivalent platform as a selective imaging probe for MMP-14. M. Pun, R. Rios, C.E. Berkman

**MEDI 288.** Structural characterization, homology modelling and virtual screening studies in shikimate kinase from methicillin resistant *Staphylococcus aureus*. A. Favela, A. Téllez-Valencia, H. Nájera, J. Cisneros, M. Gómez-Palacio, A. Hernandez Campos, C.I. Avitia-Domínguez

**MEDI 289.** Selective inactivation of triosephosphate isomerase from *Trypanosoma brucei*. A.G. Vazquez-Raygoza, I. Betancourt, R. Castillo-Bocanegra, C.I. Avitia-Domínguez, E. Sierra, M. Valdez-Solana, A. Téllez-Valencia

**MEDI 290.** Design, synthesis, and biological evaluation of novel C3-sustituted  $\beta$ -carboline-based HDAC inhibitors with potent antitumor activities. Y. Ling, J. Feng, J. Miao, J. Guo, Y. Peng, Y. Zhang

**MEDI 291.** Design and development of reversible inhibitors of lysine specific demethylase 1. D.P. Mould, A. McGonagle, M. Geltmann, U. Bremberg, A.M. Jordan, D. Ogilvie

**MEDI 292.** Withdrawn.

**MEDI 293.** Development of allosteric hydrazide-containing class I histone deacetylase inhibitors for use in acute myeloid leukemia. J.J. McClure, C. Zhang, E.B. Inks, Y.K. Peterson, J. Li, C. Chou

**MEDI 294.** Withdrawn.

**MEDI 295.** Translational feasibility of novel methionyl-tRNA synthetase inhibitors. M. Bassiri

**MEDI 296.** Identification and development of small molecule inhibitors of the aggregation of amyloid  $\beta$ . S. Collins, F. Gielen, L. van Vliet, G. Kaminski, F. Hoffelder, D.R. Spring

**MEDI 297.** Drug-target residence time affects *in vivo* drug efficacy through multiple pathways. K.S. Lee, J. Yang, K. Wagner, C.J. Ng, J. Niu, A. Dickson, B.D. Hammock

**MEDI 298.** Cytotoxicity study of  $\alpha$ -hydroxy- $\beta$ -dicarbonyl bearing synthetic metabolites of poecilosclerid sponge. S.V. Malhotra, M.P. Doyle, P. Truong, D. Sharma, A. Nagalingam, W.C. Reinhold, J.R. Alletyn, Y. Yu

**MEDI 299.** Second-generation fluorescent ligands for nicotinic acetylcholine receptors. R.W. Fitch

## MONDAY MORNING

### Section A

Moscone Center  
3002/3004

#### Actually it does Work: Success with Allosteric Kinase Ligands & Phosphatase Modulators

L. Lombardo, D. S. Weinstein, *Organizers*

R. Moslin, J. B. Schwarz, *Organizers, Presiding*

**9:00 MEDI 300.** Discovery of ARQ 092: A potent, selective allosteric inhibitor of AKT1, 2, 3 and AKT1-E17K in clinical development for cancer and rare diseases. J. Lapierre, S. Eathiraj, Y. Yu, R.E. Savage, G. Abbadessa, B. Schwartz

**9:30 MEDI 301.** Allosteric inhibitors of Interleukin-2-inducible T cell kinase that selectively target its inactive conformation. A.E. Aulabaugh

**10:00 MEDI 302.** BCR-ABL allosteric inhibitors targeting the myristoyl pocket: Optimization and pharmacological evaluation of substituted N-(4-(trihalomethoxy)phenyl)nicotinamide derivatives towards ABL001. J. Schoepfer

**10:30** Intermission.

**10:40 MEDI 303.** Identifying allostery in signaling enzymes. W. Peti

**11:10 MEDI 304.** Selective inhibition of a phosphatase to treat neurodegenerative diseases. A. Bertolotti

**11:40 MEDI 305.** Allosteric inhibition of SHP2 phosphatase. J. Garcia Fortanet, C. Chen, Y. Chen, Z. Chen, Z. Deng, B. Firestone, P. Fekkes, M. Fodor, P. Fortin, C. Fridrich, D. Grunenfelder, S. Ho, Z. Kang, R. Karki, M. Kato, N. Keen, L. Labonte, J. Larrow, F. Lenoir, G. Liu, S. Liu, F. Lombardo, D. Majumdar, M. Meyer, M.G. Palermo, L. Perez, M. Pu, T. Ramsey, W. Sellers, M.D. Shultz, T. Stams, C. Towler, P. Wang, S. Williams, J. Zhang, **M.J. LaMarche**

### Section B

Moscone Center  
3006/3008

#### Residence Time: Not Just Affinity for Drug Design

B. Blagg, *Organizer*

P. J. Tonge, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 MEDI 306.** Drug-target residence time model: A 10-year retrospective. R. Copeland

**9:10 MEDI 307.** Protein dynamics and allostery in kinase activation. N. Ahn

**9:45 MEDI 308.** Drug target residence time in the early drug discovery phase: HSP90, a model to gain insight into the molecular mechanism of kinetics. M. Frech

**10:20 MEDI 309.** Determination of *in vivo* enzyme occupancy utilizing inhibitor dissociation kinetics. M. Lai, D. Murphy, Y. Ou, D. Euler, K. Wessner, S. Adamski, B. Luo, G. Wesolowski, R. Vogel, H. Glantschnig, L. Lubbers, S. Carroll

**10:55 MEDI 310.** Linking target engagement and *in vivo* drug activity: Insights into target vulnerability. P.J. Tonge, F. Daryaei, Z. Zhang, K. Gogarty, S.L. Fisher

**11:30** Concluding Remarks.

#### Advances in High-Throughput Screening

Sponsored by CINF, Cosponsored by COMP and MEDI

#### Science for a Sustainable Energy Future

##### Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG, ORGN and PROF

#### LGST Graduate & Postdoctoral Student Chemistry Research Symposium

#### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCC

## MONDAY AFTERNOON

### Section A

Moscone Center  
3002/3004

#### Kinase Inhibitors for Immuno-Inflammatory Diseases

J. Ramanjulu, *Organizer, Presiding*

L. Krim Gavrin, *Presiding*

**2:00 MEDI 311.** Discovery of GDC-0853: A potent & selective BTK inhibitor for the treatment of lupus & rheumatoid arthritis. W.B. Young

**2:30 MEDI 312.** Development of the selective, allosteric RIPK1 kinase inhibitors. M. Najjar, C. Suebsuwong, S. Ray, G. Cuny, A. Degterev

**3:00 MEDI 313.** Identification of a first-in-class RIP1 kinase inhibitor in phase 2a clinical trials for immuno-inflammatory diseases. P.A. Harris

**3:30 MEDI 314.** Targeting NF- $\kappa$ B pathways in toll-like receptor and antigen receptor signaling. H. Wu

**4:00 MEDI 315.** Approaches to TYK2 pseudokinase: A unique mode of allosteric kinase inhibition. R. Moslin, S. Wroblewski, Y. Zhang, S. Lin, D. Gardner, J.B. Santella, J.V. Duncia, C. Liu, J. Lin, S. Spergel, M. Mertzman, J.S. Tokarski, H. Sun, M. Chiney, P.A. Elzinga, N. Aranibar, A. Chimalakonda, J. Strnad, A. Zupa-Fernandez, L. Cheng, K. Gillooly, K. McIntyre, P.H. Carter, L. Lombardo, J. Burke, J.E. Macor, D.S. Weinstein

**4:30 MEDI 316.** Design of JAK3 covalent inhibitors for the interrogation of JAK3 signaling in humans. A. Casimiro-Garcia, A. Thorarensen, J. Tellez, P. Balbo, M.E. Banker, M.F. Brown, Y. Che, J. Chrencik, J.W. Coe, R. Czerwinski, M.E. Dowdy, A.M. Gilbert, M.M. Hayward, M. Hegen, B. Juba, J. Jussif, J. Langille, L. Leung, S. Liang, T. Lin, J.I. Montgomery, S. Soucy, J. Trujillo, R. Unwalla, F.F. Vajdos, F. Vincent, X. Yang

### Section B

Moscone Center  
3006/3008

#### Misfolded Proteins in Neurodegenerative Diseases

A. M. Walji, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 MEDI 317.** Targeting intrinsically disordered proteins: Taming alpha-synuclein with small molecules. J. Tao, A. Berthet, D. Agard, L. McConlogue

**2:10 MEDI 318.** Current status of the development of PET radiotracers for imaging alpha synuclein aggregates in Lewy bodies and Lewy neurites. R.H. Mach

**2:45 MEDI 319.** HDAC6 inhibitors, autophagy, mitochondrial movement, and disease modification. A.P. Kozikowski

**3:20** Intermission.

**3:35 MEDI 320.** Imaging mutant huntingtin aggregates: Development of potential PET ligand. C. Dominguez

**4:10 MEDI 321.** Small molecule modulators of ER stress for the treatment of neurodegenerative diseases. N.D. Cosford, H. Zou, A. Limpert, J. Zou, A. Dembo, D. Grant, R. Ardecky, A. Pinkerton, G. Magnuson, M. Goldman, J. Rong, D. Sheffler, J. Reed

**4:45 MEDI 322.** Discovery of the P7C3 class of neuroprotective compounds. J. Ready  
**5:20** Concluding Remarks.

**Science for a Sustainable Energy Future**

**Chemical & Biological Conversions Approaches to Energy Conversion**

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG, ORGN and PROF

**Advances in High-Throughput Screening**

Sponsored by CINF, Cosponsored by COMP and MEDI

**Eminent Scientist Lecture with Dr. Carolyn Bertozzi**

Sponsored by SOCED, Cosponsored by MEDI

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

Sponsored by PROF, Cosponsored by ANYL, BIOL, CHED, CMA, COLL, COMP, CWD, ENVR, INOR, MEDI, MPPG, ORGN, PHYS, PMSE, POLY, PRES and WCC

**Undergraduate Research Posters**

**Medicinal Chemistry**

Sponsored by CHED, Cosponsored by MEDI and SOCED

**MONDAY EVENING**

**Section A**

Moscone Center  
Hall D

**Sci-Mix**

A. W. Stamford, Organizer

**8:00 - 10:00**

**111-112, 117, 136, 148, 154, 177, 182, 216, 234, 242, 245, 258, 266, 277, 290.** See previous listings.

**452, 457, 462, 473.** See subsequent listings.

**TUESDAY MORNING**

**Section A**

Moscone Center  
3002/3004

**MEDI Awards Symposium**

A. W. Stamford, Organizer

W. B. Young, Presiding

**9:00 MEDI 323.** Withdrawn.

**9:45 MEDI 324. Award Address** (E. B. Hershberg Award for Important Discoveries in Medicinally Active Substances sponsored by Merck Research Laboratories). Present and future of antisense technology. S. Crooke

**10:30 MEDI 325. Award Address** (ACS Award for Creative Invention sponsored by ACS Corporation Associates). CPP-115: A novel GABA aminotransferase inactivator and potential new treatment for epilepsy, addiction, and hepatocellular carcinoma. R.B. Silverman

**11:15 MEDI 326.** Bristol-Myers Squibb Smismman award lecture: Receptor structures enable drug discovery. K.A. Jacobson

**Section B**

Moscone Center  
3006/3008

**Antibiotic Drug Discovery: The Next Frontier**

E. D. Brown, C. L. Freel Meyers, Organizers, Presiding

**8:30 MEDI 327.** Targeting bacterial bioenergetics and central metabolism: Challenges and opportunities. K. Pethe

**9:10 MEDI 328.** Targeting bacterial nutrient biosynthesis with natural products. E.D. Brown

**9:50 MEDI 329.** Antibacterial agents that target adenylating enzymes in *Mycobacterium tuberculosis*. C.C. Aldrich

**10:30 MEDI 330.** Targeting a branch point in bacterial metabolism through inhibition of DXP synthase. C.L. Freel Meyers

**11:10 MEDI 331.** Co-therapy strategy to enhance target vulnerability in *Mycobacterium tuberculosis*. N.S. Sampson

**11:50 MEDI 332.** Discovery of ETX2514, a novel, rationally designed inhibitor of class A, C and D β-lactamases, for the treatment of Gram-negative infections. T.F. Durand-Reville

**ACS Award for Computers in Chemical & Pharmaceutical Research: Symposium in honor of Yvonne C. Martin**

Sponsored by COMP, Cosponsored by BIOL, MEDI and WCC

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB

**TUESDAY AFTERNOON**

**Section A**

Moscone Center  
3002/3004

**Drug Discovery for ALS: Putting the Ice Bucket to Work**

L. Bruijn, G. M. Dubowchik, Organizers, Presiding

**2:00 MEDI 333.** Challenges and opportunities for drug discovery in ALS. L.I. Bruijn

**2:40 MEDI 334.** Identification and preclinical pharmacology of antisense oligonucleotides targeted to human SOD1 for the treatment of ALS. E.E. Swayze

**3:20 MEDI 335.** Design and study of small molecules targeting r(G4C2) repeats in ALS and FTD. M.D. Disney

**4:00** Intermission.

**4:15 MEDI 336.** Dual leucine zipper kinase inhibitors for the treatment of neurodegenerative diseases. M. Siu

**4:55 MEDI 337.** Development of small-molecule autophagy inducers that mitigate neurodegeneration in models of ALS and other disorders. S. Finkbeiner

**Section B**

Moscone Center  
3006/3008

**General Orals**

A. W. Stamford, Organizer

A. Ali, Presiding

**1:30 MEDI 338.** γ-Functionalized hydrocarbon stapled peptides for inhibiting mutant estrogen receptor/coactivator interaction. T. Speltz, C.G. Mayne, S. Fanning, E. Tajkhorshid, G. Greene, T.W. Moore

**1:55 MEDI 339.** Discovery of BMS-986104: Moving from direct-acting, full agonists to pro-drug, partial agonists in the identification of a differentiated S1P1 modulator with an improved safety profile. A.J. Dyckman, M. Dhar, D. Marcoux, H. Xiao, Z. Xiao, J.L. Gilmore, L. Li, A. Mathur, J. Xie, X. Yang, T.L. Taylor, R. Thomas, K. McIntyre, L. Lehman-McKeehan, H. Shi, P. Levesque, P. Balimane, H. Sun, A.M. Marino, Z. Yang, D. Shen, M. Cvijic, B.M. Warrack, G. Cornelius, C.J. D'Arienzo, L. Salter-Cid, J.C. Barrish, P.H. Carter

**2:20 MEDI 340.** Phenotypic screening identifies a small molecule anti-secretagogue of PCSK9 that acts via a novel mechanism of action. D. Petersen, J. Hawkins, W. Ruangsiriluk, K. Stevens, B. Maguire, T.N. O'Connell, B.N. Rocke, M. Boehm, R.B. Ruggeri, T. Rolph, D. Hepworth, P. Loria, P.A. Carpio

**2:45 MEDI 341.** Discovery of chemical biology probes inhibiting activation of SGK3 kinase in cancer cells. M. Lindvall, G.A. Nishiguchi, C. Bellamacina, W. Shu, L. Tian, E.J. Martin, S. Ma, E. Fang, T. Zavorotinskaya, E. Park, D. Duhl, A.C. Rico, V. Tamez, L. Doyle, M. Doyle

**3:10 MEDI 342.** Unveiling the truth about PAK1 with medicinal chemistry. J. Rudolph, L.J. Murray, C.O. Ndubaku, T. O'Brien, E. Blackwood, W. Wang, I. Aliagas, L.J. Gazzard, J.J. Crawford, J. Drobnick, W. Lee, X. Zhao, D. Favor, P. Dong, H. Zhang, C.E. Heise, A. Oh, C. Ong, H. La, P. Chakravarty, C. Chan, D. Jakubiak, J. Epler, S. Ramaswamy, R. Vega, G. Cain, D. Diaz, Y. Zhong

**3:35 MEDI 343.** Discovery of the potent and selective, broad spectrum fungal CYP51 inhibitor VT-1598. C.M. Yates, E.P. Garvey, R.J. Schotzinger, S.R. Shaver, W.J. Hoekstra

**4:00 MEDI 344.** Discovery of the brain penetrant Phosphodiesterase 1 (PDE1) inhibitor Lu AF64386. J. Kehler, A.I. Parachikova, H. Lindgren, L.K. Rasmussen, M. Langgard, C.T. Christoffersen, C. Bundgaard, K. Juhl, L. Skibsbye, J. Agner, J. Nielsen

**4:25 MEDI 345.** Impact of P-gp susceptibility on brain penetration for a series of potent, selective, and orally bioavailable TrkA inhibitors. M.E. Fraley

**4:50 MEDI 346.** Discovery of ruz-asvir (MK-8408), a 2<sup>nd</sup> generation HCV NS5A inhibitor. W. Yu, L. Tong, L. Chen, O. Selytin, M.P. Dwyer, A.G. Nair, R. Mazzola, J. Kim, D. Sha, J. Yin, R. Ruck, I.W. Davies, B. Hu, B. Zhong, J. Hao, T. Ji, S. Zan, R. Liu, S. Agrawal, E. Xia, S. Curry, P. Mcmonagle, K. Bystol, F. Lahser, D. Carr, L. Rokosz, P. Ingravallo, S. Chen, K. Feng, M. Cartwright, E. Asante-Appiah, J.A. Koziowski

**Entrepreneurship in Biotechnology, Advanced Materials, Drug Discovery & Information Systems**

Sponsored by SCHB, Cosponsored by MEDI and PROF

**ACS Award for Computers in Chemical & Pharmaceutical Research: Symposium in honor of Yvonne C. Martin**

Sponsored by COMP, Cosponsored by BIOL, MEDI and WCC

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB

**WEDNESDAY MORNING**

**Section A**

Moscone Center  
Gateway Ballroom 103/104

**First Time Disclosures**

J. B. Schwarz, Organizer, Presiding

**8:00 MEDI 347.** Discovery of highly efficacious potentiators for the treatment of cystic fibrosis. S. Van der Plas, H. Kelgtermans, T. De Munck, S. Martina, L. Tomaskovic, T. Christophe, M. Jans, E. Van der Aar, M. Borgonovi, L. Nelles, M. Gees, P. Stouten, J. Van Der Schueren, O. Mammoliti, M. Andrews, K. Konrath

**8:30 MEDI 348.** Discovery of ABBV/GLPG-2222: A potent, efficacious CFTR corrector for the treatment of cystic fibrosis. X. Wang

**9:00 MEDI 349.** Discovery of clinical candidate BMS-986158, an oral BET inhibitor for the treatment of cancer. A.V. Gavai, D. Norris, G.V. De Lucca, D. Tortolani, D.P. O'Malley, Y. Zhao, C.A. Quesnelle, W. Han, P. Gill, W. Vaccaro, T. Huynh, V. Ahuja, D. Dodd, C. Mussari, L.S. Harikrishnan, M. Kamau, J.S. Tokarski, R. Rampulla, D. Wu, J. Li, H. Zhang, P. Li, D.Z. Sun, H. Yip, C. Wang, Y. Zhang, A. Mathur, H. Zhang, C. Huang, Z. Yang, A. Ranasinghe, C.J. D'Arienzo, C. Tye, C. Su, G. Everlof, L. Zhang, N. Raghavan, K. Menard, M. Wen, J.T. Hunt, M. Poss, G. Vite, R. Westhouse, F. Lee

**9:30 MEDI 350.** Discovery of a novel class of potent, selective, and orally bioavailable histone methyltransferase Enhancer of Zeste Homolog 2 (EZH2) inhibitors and the identification of development candidate PF-06821497. **P. Kung**, S. Bergqvist, P. Bingham, J.F. Braganza, A. Brooun, M.R. Collins, W. Diehl, Y. Deng, D. Dinh, C. Fan, V.R. Fantin, H.J. Gukasyan, W. Hu, B. Huang, R. Kania, W. Liu, S. Kephart, M. Kraus, C. Krivacic, R.A. Kumpf, G. Li, K. Maegley, I.J. McAlpine, L. Nguyen, S. Ninkovic, M.A. Ornelas, D. Richter, E. Rui, M. Ryskin, S.A. Scales, J. Spangler, A. Stewart, S.C. Sutton, J. Tallock, C. Tsao, D. Verhelle, F. Wang, H. Wang, P. Wells, M. Wythes, S. Yamazaki, B. Yip, X. Yu, L. Zehnder, W. Zhang, P. Zhu, J. Zhu, R.A. Rollins, S. Sharma, M.P. Edwards

**10:00 MEDI 351.** Discovery and development of BLU-554: A potent, highly selective covalent inhibitor of Fibroblast Growth Factor Receptor 4 (FGFR4) in development for the targeted treatment of advanced Hepatocellular Carcinoma (HCC) patients with amplified and overexpressed FGF19. **C.V. Miduturu**, M. Hagel, M. Sheets, N. Rubin, W. Weng, N. Bifulco, L.V. Dipietro, J. Kim, N. Brooijmans, B.L. Hodous, N. Stransky, K. Hoeflich, V.J. Kadambi, N. Kohl, C. Lengauer, T. Guzi

**10:30 MEDI 352.** Discovery of PRN1371: A highly selective, irreversible inhibitor of FGFR1-4 in clinical development for the treatment of solid tumors. **K.A. Brameld**

**11:00 MEDI 353.** FGFR4: A reversible-covalent inhibitor of FGFR4 for the treatment of hepatocellular carcinoma. **R.A. Fairhurst**, T. Knoepfel, P. Furet, N. Buschmann, C. Leblanc, R. Mah, M. Kiffe, D. Graus-Porta, A. Weiss, J. Kinyamu-Akunda, M. Wartmann, J. Trappe, T. Gabriel, F. Hofmann, W. Sellers

**11:30 MEDI 354.** Interdiction at a protein-protein interface: Structure-based design of the Mcl-1 inhibitor AMG 176. **S.P. Brown**

## Section B

Moscone Center  
3006/3008

### Targeting Epigenetic Writers & Erasers

J. Jin, *Organizer, Presiding*

**8:30** Introductory Remarks.

**8:35 MEDI 355.** Probing the epigenome for therapeutic targets. **C.H. Arrowsmith**

**9:05 MEDI 356.** Tazemetostat, a first-in-class inhibitor of EZH2: From bench to bedside to bench. **R. Copeland**

**9:35 MEDI 357.** Sirtuin inhibitors as promising anticancer agents. **H. Lin**  
**10:05** Intermission.

**10:20 MEDI 358.** Targeting histone lysine methylation regulatory pathways in cancer. **P. Trojer**

**10:50 MEDI 359.** Exploring novel models of interaction to inhibit protein methyltransferases. **M. Luo**

**11:20 MEDI 360.** Chemical probes targeting the protein arginine deiminases. **P.R. Thompson**

**11:50** Concluding Remarks.

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
Gateway Ballroom 103/104

### First Time Disclosures

J. B. Schwarz, *Organizer, Presiding*

**1:30 MEDI 361.** Discovery of clinical candidate PF-06648671: A potent, highly brain penetrant gamma secretase modulator for the treatment of Alzheimer's disease. **M. Pettersson**, C. am Ende, T.W. Butler, P.H. Dorff, I.V. Efremov, E. Evrard, S.A. Eisenbeis, C.J. Helal, M.E. Green, J.M. Humphrey, G.W. Kauffman, P.B. Mullins, C.J. O'Donnell, D.A. Rankic, A.F. Stepan, C.M. Stiff, N. Patel, C. Subramanyam, T.P. Tran, E.X. Yang, L. Xie, K.R. Bales, E. Hajos-Korcsok, B.A. Pettersen, L.R. Pustilnik, S.J. Steyn, K.M. Wood, R. Qiu, P.R. Verhoest

**2:00 MEDI 362.** Discovery of a small molecule  $\alpha\beta$ 6 inhibitor for idiopathic pulmonary fibrosis. **S.J. MacDonald**, J. Pritchard, N. Anderson

**2:30 MEDI 363.** Identification of AZD9567, an anti-inflammatory glucocorticoid receptor modulator with improved side effect profile. **L. Ripa**, M. Dearman, G. Edenro, K. Edman, R. Hendrickx, M. Lepistö, L. Öberg

**3:00 MEDI 364.** Discovery and early clinical profile of a non-catchol dopamine 1 receptor agonist. **D.L. Gray**, R. Kozak, S. Mente, J.E. Davoren, D. Nason, S. O'Neil, I.V. Efremov, A. Harris, R. O'Connor, M. Salafia

**3:30 MEDI 365.** Discovery and development of BLU-285: A potent, highly selective inhibitor of KIT and PDGFR $\alpha$  activation loop mutants. **B.L. Hodous**, E. Evans, A. Gardino, A. Davis, J. Zhu, D.P. Wilson, K. Wilson, L.V. Dipietro, J. Kim, N. Brooijmans, V.J. Kadambi, A. Shutes, Y. Zhang, N. Kohl, C. Lengauer, T. Guzi

**4:00 MEDI 366.** NVP-LXS196, a novel PKC inhibitor for the treatment of uveal melanoma. **M. Visser**, J.P. Papillon, J. Fan, M. Luzzio, W. Michael, R. Wang, A. Zhang, C. Straub, S. Mathieu, M. Kato, M.G. Palermo, C. Chen, M.J. LaMarche, T.M. Ramsey, A. Vattay, R. Guo, V. Cooke, A. Brier, F. Chung, G. Liang, M. Romanowski, A. Wylie

**4:30 MEDI 367.** Discovery of selonsertib (GS-4997): A first in class, selective inhibitor of apoptosis signal-regulating kinase 1. **G.T. Notte**, B. Corkey, E. Lansdon, D. Breckenridge, O.L. Saunders, M. Graupe, B. Murray, C. Venkataramani, J. Guerrero, J. Farand, J.A. Zablocki, K. Babaoglu, J. Liles, G. Budas, S. Wise, K. Koch, L. Castonguay, M.C. Desai

**5:00 MEDI 368.** Discovery of a selective inhibitor of indoleamine-2,3-dioxygenase for use in the therapy of cancer. **A. Balog**

### Section B

Moscone Center  
3006/3008

### General Orals

A. W. Stamford, *Organizer*

J. Ramanjulu, *Presiding*

**1:30 MEDI 369.** Teaching old drugs new tricks: Reprogramming ethionamide's bioactivation to fight multidrug resistant *Mycobacterium tuberculosis*. **N. Willand**, M. Gitzinger, B. Deprez, A. Baulard

**1:50 MEDI 370.** Preclinical development and characterization of MYC inhibitors. **N. Jacob**, P. Miranda, P. Serrano Navarro, J. Hart, P.K. Vogt, K.D. Janda

**2:10 MEDI 371.** Discovery of PF-06748962: A potent and selective lactam-based EP3 antagonist. **K. Futatsugi**

**2:30 MEDI 372.** Novel pyrrolomycins as potent antibacterial agents against ESKAPE pathogens and biofilms. **R. Li**, Z. Yang, J. Ahn, Y. Liu, Y. Chhonker, D. Murry, H.A. Zhong, K. Bayles

**2:50 MEDI 373.** Development and application of an NMR-based activity and inhibition assay for mycobacterial isocitrate lyase. **R.P. Bhusal**, K. Patel, B. Kwai, G. Bashiri, J. Reynisson, J. Sperry, I.K. Leung

**3:10 MEDI 374.** LEGO<sup>®</sup>-inspired drug design: Discovery of novel fungal plasma membrane H<sup>+</sup>-ATPase (Pma1) inhibitors from small molecule libraries: An introduction of HFSA-SBS\_DOS-RD strategy in drug discovery. **T. Tung**, T. Dao, M.B. Palmgren, A.T. Fuglsang, S.B. Christensen, J. Nielsen

**3:30 MEDI 375.** Reducing cycle time in medicinal chemistry drug discovery. **J.S. Wai**, T. Wang

**3:50 MEDI 376.** Enzymatic tandem carboxylation-amidation as a bioactivity-potentiating strategy in the production of natural and unnatural thiolactam antibiotics. **J. Li**, X. Tang, S. Mckinnie, T. Awakawa, B.S. Moore

**4:10 MEDI 377.** Structure-based design of highly potent small-molecule inhibitors of DCN1-UBC12 protein-protein interaction. **H. Zhou**, J. Lu, L. Liu, D. Bernard, J. Stuckey, Y. Sun, S. Wang

**4:30 MEDI 378.** CDK8 inhibitors with long residence time emerging from a retro-design approach: New opportunities for cancer treatment. **J.C. Benningshof**, B. Aerts, G. Müller, J. Veerman, E. Damen, M. Kubbutat, J. Ehler, H. Holger, F. Totzke

**4:50 MEDI 379.** Structure-based design, synthesis, biological evaluation, and x-ray crystallographic analysis of novel, highly potent HIV-1 protease inhibitors to address multi-drug resistant HIV. **A.K. Ghosh**, H.L. Osswald, J. Agniswamy, Y. Wang, I. Weber, M. Amano, H. Mitsuya

## WEDNESDAY EVENING

### Section A

Moscone Center  
West Hall

### General Posters

A. W. Stamford, *Organizer*

**7:00 - 9:00**

**MEDI 380.** Inhibition of A $\beta$ -40 and A $\beta$ -42 aggregation by piceatannol and cis-piceatannol. **J.M. Chapman**, M. Moss, Y. Wang

**MEDI 381.** Photoelectrocatalytic inhibition of Alzheimer's  $\beta$ -amyloid aggregation in vitro by hole-derived radicals. **K. Kim**, B. Lee, Y. Chung, W. Choi

**MEDI 382.** Synthesis of Yakuchinone-derived compounds that inhibit  $\beta$ -amyloid aggregation. **L. Chen**, C. Yen, H. Tseng, Y. Huang, Y. Lu, W. Hou, K. Hsu, I. Pan, K. Huang, W. Huang

**MEDI 383.** Photoexcited ruthenium complex for highly sensitive inhibition of  $\beta$ -amyloidogenesis. **G. Son**, C. Park, B. Lee, Y. Chung

**MEDI 384.** New hydroxyquinoline-based derivatives as potent modulators of amyloid-b aggregations. **M. Hu**

**MEDI 385.** Potential multimechanistic therapeutic effects of dihydropyridine calcium channel blockers: Mechanistic study of effects on amyloid-beta aggregation associated with Alzheimer's disease. **J.M. Chapman**, M. Moss, J. Tseng

**MEDI 386.** Withdrawn.

**MEDI 387.** Development of MBRI-001, a deuterium-substituted pinabulin, as a potent anti-microtubule agent for anticancer. **Z. Ding**, H. Cheng, S. Wang, Y. Hou, J. Zhao, H. Guan, **W. Li**

**MEDI 388.**  $\beta$ -Sheet propensity of competitive peptide inhibitor's residue is crucial in binding to proteases: PACE4 inhibitors as a case study. **V. Dianati**, A. Shamloo, A. Kwiatkowska, R. Desjardins, A. Soldera, R. Day, Y. Dory

**MEDI 389.** Hepsin-targeted ligands for prostate cancer imaging and therapy. **Y. Byun**, S. Son, H. Kwon

**MEDI 390.** X-ray crystallographic structures of teixobactin analogues. **H. Yang**, D.R. Du Bois, J.W. Ziller, J.S. Nowick

**MEDI 391.** Withdrawn.

**MEDI 392.** Long wavelength, orthogonal release of internalized anti-inflammatory compounds from cellular vehicles. **R.M. Hughes**, C. Marvin, Z. Rodgers, S. Ding, N. Oien, W.J. Smith, D.S. Lawrence

**MEDI 393.** Amino acid and peptide conjugates are potential drug candidates. **S.S. Panda**

**MEDI 394.** Withdrawn.

**MEDI 395.** Directed immune responses via covalently linked TLR agonist combinations for a Q-fever vaccine. **T.J. Albin**, J. Tom, S. Manna, A. Gilkes, A. Jain, M. Supnet, H. Davies, A. Nalca, A. Burkhardt, P. Feigner, A.P. Esser-Kahn

**MEDI 396.** Development of anti-dotes against nerve agent inhibited acetylcholinesterase – the transformation of an inhibitor into a reactant. **C. Lindgren**, N. Forsgren, C. Akfur, L. Berg, D. Andersson, M. Hillgren, W. Qian, F. Worek, F. Ekström, A. Linusson

**MEDI 397.** Generating site-specific antibody-drug conjugates with high drug to antibody ratios using a tandem Kruoenagel condensation-Michael addition. **R. Kudirka**, R. Barfield, J. McFarland, P. Drake, A. Carlson, S. Banas, W. Zmolek, A. Garofalo, D. Rabuka

**MEDI 398.** Synthesis of truncated tirandamycin A-D derivatives as new antihelminthic agents. **T. Jimenez**, M. Grotli, C. Wallentin

**MEDI 399.** Beyond IC50 and simple PK models – considerations for discovery chemists. **R. Fraczekiewicz**, M.B. Bolger, W. Woltoz

**MEDI 400.** Synthesis and evaluation of anti-tubercular agents 2-aminothiophenes and benzo-1,2-selenazol-3(2H)-ones targeting Pks13 and Ag85C respectively. **S. Thanna**, S.E. Knudson, C.M. Goins, F. Salem, S. Kapil, A. Grzegorzewicz, M. Jackson, D.R. Ronning, R.A. Slayden, S.J. Sucheck

- MEDI 401.** Novel pyrimidine compounds as potent JAK inhibitors. **Y. Chen**, H. Li, R. Yen, T. Heckrodt, D. McMurtrie, N. Lin, R. Singh, V. Taylor, M. Chan, E. Masuda, G. Park, D. Lau, D. Payan
- MEDI 402.** Synthesis and evaluation polythiophene containing rhodamine dyes for biological and photochemical applications. **M.K. Linder**, J.N. Nasca, K.S. Gast, G. Sawada, D. Watson, M.R. Detty
- MEDI 403.** Synthesis of  $\beta$ -configured clickable [ $^{18}$ F]FDGs as novel  $^{18}$ F-fluoroglycosylation tools for PET *in vivo* imaging. **M. Elgland**, P. Nordeman, T. Fyrner, P. Konradsson, G. Antoni, P. Nilsson
- MEDI 404.** Small-molecule anti-virulence agents for the prevention of dental biofilms. **B. Nijampatnam**, H. Wu, S.E. Velu
- MEDI 405.** Discovery of novel pyrrolomycins as potential anticancer agents. **Y. Liu**, T. McGuire, Z. Yang, D. Coulter, Y. Chhonker, D. Murry, J. Sharp, H.A. Zhong, R. Li
- MEDI 406.** Design and synthesis of small molecule inhibitors bearing 1,2,3-triazole/sulfonate pharmacophore from natural precursors for the treatment of bacterial infections. **B. Aneja**, S. Alam, M. Azam, A. Perwez, R. Haque, M. Rizvi, R. Maguire, K. Kavanagh, U. Yadava, C. Daniiluc, A. Azam, A. Mohammad
- MEDI 407.** New N-substituted indazole-5-carboxamides as subnanomolar, selective monoamine oxidase B and dually active MAO-A/B inhibitors with BBB and GI permeability. **M. Gastreich**, C. Detering, L. Antonov, S. Hristova, H. Stammler, N.T. Tzvetkov
- MEDI 408.** Withdrawn.
- MEDI 409.** Glycosylated porphyrins for use in PET and PDT: Synthesis and characterization. **K. Arja**, M. Elgland, P. Nilsson
- MEDI 410.** Selective nicotinic acetylcholine receptor activities from the areca nut. **N. Horenstein**, C. Stokes, R. Papke
- MEDI 411.** Withdrawn.
- MEDI 412.** Differentiating antiproliferative and chemopreventive modes of activity for electron-deficient aryl isothiocyanates against human MCF-7 cells. **J.R. Mays**
- MEDI 413.** Application of the boronic acid as an isostere of the phenolic hydroxyl group in optimization of Selective Estrogen Receptor Downregulators (SERDs). **J. Liu**, S. Zheng, S. Guo, Q. Zhong, M. Bratton, T.E. Wiese, G. Wang
- MEDI 414.** Withdrawn.
- MEDI 415.** Substituted acylsulfonamides as surrogates of a terminal carboxylic acid: More effective small-molecule blockade of the Mcl-1 oncoprotein. **M.E. Lanning**, S. Fletcher
- MEDI 416.** Novel class of substituted phenoxyacetamide derivatives as serotonin reuptake inhibitors and serotonin autoreceptor antagonists for repetitive behavior modulation in autism spectrum disorder. **V.M. Gancarczyk**, J. Dhuguru, A. Khalil, **O.M. Ghoneim**
- MEDI 417.** Polymersomes for targeting and eradicating intracellular parasites. **L. Rizzello**, J. Robertson, P. M. Elks, T. McHugh, S. A. Renshaw, G. Battaglia
- MEDI 418.** Two-in-one approach to modulate repetitive behaviors in autism spectrum disorder: N-arylpiperazines as key motifs towards developing bi-functional serotonergic ligands. **O.M. Ghoneim**
- MEDI 419.** Zinc(II)-dipicolylamine coordination complexes are strongly active against cutaneous leishmaniasis. **M. Betancourt**, D. Rice, P. Vacchina, B. Norris-Mullins, M.A. Morales, B.D. Smith
- MEDI 420.** Peptide-based nanosponges. **S.H. Bossmann**, H. Wang, A.S. Yapa, S.O. Wendel, N. Kariyawasam, T.B. Shrestha, M. Pyle, P.E. Smith, D.L. Troyer
- MEDI 421.** Heterocyclic mimetics of crinine alkaloids – Novel scaffolds against drug-resistant cancer cells. **L.V. Frolova**
- MEDI 422.** Characterization of histone lysine methyltransferase and discovery of NSD2 inhibitors. **J. Kwiatkowski**, A. Hung, Y. Tan, N. Ahmad, G. Lin, A. Ngo, Y. Li, H. Ng, J. Wee, X. Koh-Stenta, P.Z. Kwek, E.H. Ong, J.K. Joy, A. Poulsen, C. Kang, J. Hill, T.H. Keller
- MEDI 423.** Computational rationalisation of ligand specific T-cell activation by the lipid presenting proteins CD1b and CD1c: Different means to the same end? **C. Cave-Ayland**, A. Chancellor, I. Tewes, S. Mansour, C. Skylaris, J.W. Essex
- MEDI 424.** Pharmacophore construction of Cyclooxygenase-2 (COX-2) selective inhibitors based on QSAR models. **R.A. Gomes**, G.L. Luiz Genesi, V.G. Maltarollo, **G.H. Trossini**
- MEDI 425.** Perturbing dissimilar biomolecular targets from natural product scaffolds and focused chemical decoration. **J. Nielsen**, T. Tung, T. Holm Jakobsen, T. Dao, A.T. Fuglsang, M. Givskov, S.B. Christensen
- MEDI 426.** Design of novel GPCR family-targeted scaffolds: Synthetic and cheminformatic exploration of novel medicinal chemistry space. **J.C. Benningshof**, G. Müller, T. Berkenbosch, D. Stumpfe, J. Bajorath
- MEDI 427.** Synthesis and biological evaluation of C24 20S(OH)D3 analogs as anti-inflammatory agents. **Z. Lin**, S. Marepally, E. Goh, C.Y. Cheng, A.E. Postlethwaite, Z. Janjetovic, T. Kim, A.J. Slominski, R.C. Tuckey, N. Rochel, D.D. Miller, W. Li
- MEDI 428.** Multi-omic approach to unraveling the microbial ecology of *Euphorbia* plant latex. **M. Gunawardana**, E. Hyde, S. Rivera, S. Webster, A. Castonguay, M. Anderson, S. Lahmeyer, B. Dorsey, T. La Val, D. VanderVelde, P. Webster, R. Knight, **M.M. Baum**
- MEDI 429.** Discovery of novel indolinone derivatives as potent MELK inhibitors. **R. Edupuganti**, J.M. Taliaferro, Q. Wang, X. Xie, E.J. Cho, V. Sharma, P. Ren, C. Bartholomeusz, E.V. Anslын, K.N. Dalby
- MEDI 430.** Sphingosine analogues as inhibitors of Sphingosine Kinase (SK1). **A. Cardona**, M. Escudero-Casao, M. Corro, J. Hernandez, Y. Diaz, I. Matheu, S. Garcia-Valle, M. Mulero, G. Pujadas, **S. Castillon**
- MEDI 431.** Biological screening of *Moringa oleifera* for cytotoxicity and antitumor activities. **E.P. Rodriguez**, C.A. Ospina
- MEDI 432.** Design of a nucleic acid aptamer to achieve localization of a ROS-activated anti-cancer agent. **K.G. Earnest**, E.J. Merino
- MEDI 433.** Exploring the binding site of GPR119 receptor inverse agonists. **E. Kotsikorou**, S. Kowalski
- MEDI 434.** Methicillin-resistant *Staphylococcus aureus* becomes vulnerable to  $\beta$ -lactam antibiotics when in combination with branched polyethylenimine. **M. Foxley**, M. Xiao, S. Wright, S. Strange, A. Lam, K. Grogan, C.V. Rice
- MEDI 435.** Old and new privileged scaffolds for medicinal chemistry. **P. Schneider**, G. Schneider
- MEDI 436.** Vienna LiverTox Workspace: Towards predicting liver toxicity. **F. Montanari**, E. Kotsampasakou, B. Knasmüller, M. Pinto, M. Grandits, L. Richter, G.F. Ecker
- MEDI 437.** Pyrrole-based antitubulin agents at the colchicine site: SAR of C-5 analogues in explicitly solvated models. **A.J. Obaidullah**, C.C. Rohena, J.A. Sikorski, S. Mooberry, J.T. Gupton, G.E. Kellogg
- MEDI 438.** Design, synthesis, and biological evaluation of small molecule G $\alpha$ 2-androgen inhibitors in prostate cancer therapy. **S. Tapadar**, S. Caggia, S. Khan, A.K. Oyeler
- MEDI 439.** Synthesis of GRB2 SH2 domain inhibitors: Analogues of sclerotinorin. **J.J. Gladfelder**, C. Arpin
- MEDI 440.** Phytoestrogens: New ligands targeting the estrogen receptor domains. **V.J. Thakor**, M. Noolvi
- MEDI 441.** Structure-based design of macrocyclic tetrapeptides intended to modulate the opioid receptors. **M.J. Ferracane**, J.V. Aldrich
- MEDI 442.** MOEsaic: Making SAR analysis easier through the use of matched molecular pairs and R-group profiling. **A. Ajamian**
- MEDI 443.** In search of AKT inhibitors as anticancer agents, an *in silico* approach. **P.J. Trejo**, A. Hernandez Campos, A. Romo-Mancillas, J.L. Medina-Franco, R. Castillo-Bocanegra
- MEDI 444.** Design, synthesis and biological evaluation of Liver X Receptor (LXR) ligands. **R. Komati**, K.M. Lamark, K.A. Payne, M. Ndukwe, D. Spadoni, J. Sridhar, K. Riley
- MEDI 445.** Amido phthalimides as CDKs and VEGF inhibitors. **R. Komati**, V.C. Miles, M. Ismail, F. Joseph, H. McFerrin, J. Sridhar
- MEDI 446.** Withdrawn.
- MEDI 447.** Discovery of Lu AF64196 a highly ligand efficient, brain penetrant and selective PDE1 inhibitor. **L.K. Rasmussen**, M. Langgard, C.T. Christoffersen, J. Nielsen, C. Bundgaard, J. Kehler
- MEDI 448.** Repurposing for G-protein couple receptors by structure-based discovery: Transformation of adenosine derivatives into 5HT $_{2B}$ /5HT $_{2C}$  serotonin receptor antagonists. **D. Tosh**, A. Ciancetta, E.P. Warnick, S. Crane, Z. Gao, K.A. Jacobson
- MEDI 449.** Discovery of highly selective Itk inhibitors with *in vivo* IL-2 inhibition. **S. Takai**, H. Takeda, A. Watanabe, K. Tsuboi, R. Suzuki, A. Hiramatsu, Y. Iyoda, T. Inukai, A. Kinoshita, H. Kohno, B. Liu, R. Shetty, K. Moriarty, M. Kurono, S. Umemura, H. Egashira, J. Zou, Z. Konteatis, R. Omi, H. Nambodini, W. Sawada, M. Murata, T. Koike, R. Komaki-Nishikawa, N. Yada, T. Yoshizawa, J. McCool, M. Bukhtiyarova, M. Kelly, J. Takeuchi
- MEDI 450.** Decoupling proton motive force to overcome antibacterial resistance. **J. Buonomo**, C.C. Aldrich
- MEDI 451.** Adverse drug reactions triggered by the common HLA-B\*57:01 variant: Virtual screening of DrugBank. **G. Van Den Driessche**, D. Fourches
- MEDI 452.** Optimization of 4(1H)-quinolone antimalarials for oral bioavailability and *in vivo* efficacy. **C. Lichorowic**, J.R. Maignan, R. Neelarapu, A. Monastyrski, J.V. Giarrusso, T. Mutka, L. Blake, D. Casandra, A. LaCrue, D. Kyle, R. Manetsch
- MEDI 453.** Design of inhibitors for the human papillomavirus E6 protein. **D.P. Petrov**, V.J. Davisson, E. Androphy, A. Rietz
- MEDI 454.** Scaffold replacement and 3D ligand optimization applied to the discovery of tyrosine kinase inhibitors. **A. Deschenes**
- MEDI 455.** Discovery of the first low-molecular-weight *Mycobacterium tuberculosis* MAbA (FabG1) inhibitors using a fragment-based approach. **C. Pintiala**, M. Moune, K. Bourbiaux, R. Frita, K. Djaout, C. Piveteau, B. Deprez, A. Baulard, N. Willand, **M. Flipo**
- MEDI 456.** Structure-based, in molecular design and synthesis of inhibitors of protein kinase family of receptors of epidermal growth factor. **A.S. Bunev**, E.V. Sukhonosova, G. Lisnik, N. Yabbarov, G. Ostapenko
- MEDI 457.** *In vivo* structure-efficacy studies of regioisomeric arterolane-like endoperoxidases. **B.R. Blank**, J. Gut, P.J. Rosenthal, A.R. Renslo
- MEDI 458.** Optimization of peptide substrates for conjugate modification of macromolecular mediated RNAi delivery. **J.C. Carlson**, J. Benson, A.V. Blokhin, D. Rozema, A. Sokoloff
- MEDI 459.** Impact of activation of GPR68 by metal cations on high throughput screening. **C. Wang**, S. Lin, L.D. Fader, A. Granger
- MEDI 460.** Synthesis of 1,2,4-substituted imidazoles for a fragment-based drug discovery library. **T. Lafferty**, J. Patrone
- MEDI 461.** Identification and optimization of 5-aryl benzimidazolones as AMPA receptor negative modulators selective for TARP- $\gamma$ 8. **S. Ravula**, M. Ameriks, **B.M. Savall**, J.M. Ziff, B.T. Shireman, **M.J. Seierstad**, N. Wu, B. Lord, M. Maher, **N.I. Carruthers**, T.W. Lovenberg
- MEDI 462.** Design and synthesis of L-neplanocin analogues as antiviral agents. **Q. Chen**, C. Liu, S. Schneller, A. Davidson, M. Stout

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- MEDI 463.** Targeted isolation and simplified structure elucidation of new analogues of dolastatin 10 from marine cyanobacteria using MS/MS molecular networking. **B. Naman,** J. Almaliti, L. Keller, A. Remmel, E. Glukhov, P.C. Dorrestein, W.H. Gerwick
- MEDI 464.** MELK as a valid cancer therapeutic target? From virtual screening to highly selective in vivo tool compounds. **S. Mathieu,** B. Toure, J. Giraldes, T. Smith, E. Sprague, Y. Yang, Z. Chen, Y. Mishina, Y. Feng, Y. Yan-Neale, D. Chen, M. Meyer, C. Straub, D. Sage, K. Wright, X. Chen, S. Kim, E.J. Martin, K. Hurov
- MEDI 465.** P(NIPAM) microgel embedding p(AAm) hydrogel interpenetrating polymer networks for controlled drug delivery vehicles. **N. Sahiner,** A. Yasar, F. Onder, M. Ay
- MEDI 466.** Evaluation of antimicrobial properties of *Combretum laxum* extracts. **J.G. Escobar,** I. Maldonado, A.K. Addo-Mensah
- MEDI 467.** Development of a new class of fluorophores and their applications as biological imaging agents and chemical sensors. **J.R. Zimmerman**
- MEDI 468.** Inhibition of pilocarpine-induced fluid secretion by ethylatropine bromide. **T. Ganesh,** A. Rojas, A. Walker, R. Dingleline
- MEDI 469.** Structure-Based Drug Design (SBDD) of allosteric inhibitors for HSC-70 using a combination of pharmacophore searching with ZINCPharmer and AutoDock Vina molecular docking. **C.C. Clement,** J. Gonzalez, M. Philipp
- MEDI 470.** Bioguided fractionation and isolation of chemical constituents of the chloroform extract from the Puerto Rican plant *Simarouba tulae*. **C.A. Ospina,** P. Vivas, E. Hernandez
- MEDI 471.** Synthesis of amino derivatives of dehydroleucodine and dehydroarishin-B as potential anti-proliferative against breast cancer and B16 melanoma cells. **A. Sanchez,** M. Veisaga, S.F. Wnuk, M. Barbieri, L.A. Lopez
- MEDI 472.** Design and evaluation of cyclic peptides containing arginine, lysine and tryptophan residues as a cellular drug delivery system and establishing structure-activity relationship. **S. Mozaffari,** N. Sadeghiani, R. Tiwari, **K. Parang**
- MEDI 473.** Design, synthesis and evaluation of potent inhibitors of PARP-14/ARTD8, a mono-ADP-ribosyltransferase. **M. Meyers,** K. Upton, A. Thorsell, H. Schuler, D. Ferraris
- MEDI 474.** Design, synthesis, and evaluation of potent DNA-alkylating agents for use in Antibody-Drug Conjugates (ADCs). **K.E. Archer,** E.E. Reid, M. Shizuka, A. Wilhelm, N.C. Yoder, C. Bai, N. Fishkin, M. Bogalhas, P. Salomon, L. Harris, E.K. Maloney, O. Ab, R.V. Charf, M.L. Miller
- MEDI 475.** Improved trifluoromethylation via organic electrochemistry. **J. Chen,** J. Starr
- MEDI 476.** R996, an orally-bioavailable and selective activator of nuclear factor (erythroid-derived 2)-like 2 (Nrf2), is active in a Murine model of multiple sclerosis. **M.A. Duncton,** A. Owyang, F. San Pablo, A. Torneros, G. Park, D. Lau, E. Masuda, D. Payan, R. Singh
- MEDI 477.** New small molecule inhibitors of Ghrelin O-acyltransferase. **J.D. Chisholm,** N.S. Mahajani, K.R. McGovern-Gooch, A. Garagozzo, A.J. Schramm, L.G. Hannah, M.A. Sieburg, J. Houglund
- MEDI 478.** Fused imidazole derivatives as TGF- $\beta$  inhibitors. **J. Yu,** I.S. Darwish, M. Gelman, R. Ding, A. Frieria, G. Godinez, W. Lang, W. Li, K. McCaughey, J. McLaughlin, H. Nguyen, I. Smith, K. White, G. Yam, T. Kinsella, V. Taylor, S. Braselmann, C. Lamagna, E. Masuda, H. Ren, L. Chou, G. Park, R. Basile, B. Samant, D. Sweeny, M. Standlee, D. Lau, A. Torneros, F. San Pablo, G. Clemens, D. Payan, R. Singh
- MEDI 479.** Fused pyrazole derivatives as TGF- $\beta$  inhibitors. **I.S. Darwish,** J. Yu, M. Gelman, R. Ding, A. Frieria, G. Godinez, W. Lang, W. Li, K. McCaughey, J. McLaughlin, H. Nguyen, I. Smith, K. White, G. Yam, T. Kinsella, V. Taylor, S. Braselmann, C. Lamagna, E. Masuda, H. Ren, L. Chou, G. Park, R. Basile, B. Samant, D. Sweeny, M. Standlee, D. Lau, A. Torneros, F. San Pablo, G. Clemens, D. Payan, R. Singh
- MEDI 480.** Collaborative web-based architecture for fragment-based drug discovery data. **W.W. Smith,** B.A. Bunin
- MEDI 481.** Planar aryl triazines inhibit cytochrome P450 1A1 and 1B1 as a potential means to prevent cancer. **R. Nakamura,** R. Moran, R.A. Isovitsch, D.S. Iimoto
- MEDI 482.** Discovery of BPR1K871 – a quinazoline based multi-kinase inhibitor for the treatment of AML and solid tumors: Rational design, synthesis, in vitro and in vivo evaluation. **H. Hsieh,** W. Wang, H. Shiao, Y. Ke, W. Lin, J. Hsu, C. Chen, T. Yeh
- MEDI 483.** Novel approaches to the chemical synthesis of halonitrodes for the development of ergot alkaloids compounds. **G. Ren,** E.J. Parish, D. Ren, Y. Lo, **H. Honda**
- MEDI 484.** Novel approaches to the structure activity relationship study of citronellol type compounds useful as enzyme inhibitors. **E.J. Parish,** L. Lv, G. Ren, Y. Lo, **H. Honda**
- MEDI 485.** Novel approaches to the synthetic study of lanost-8-en-3 $\beta$ -ol-7,11-dione, an inhibitor of cholesterol biosynthesis. **G. Ren,** E.J. Parish, Y. Lo, **H. Honda**
- MEDI 486.** Second generation inhibitors of *Porphyromonas gingivalis* biofilm formation. **F.A. Luzzio,** P.C. Patil, D.R. Demuth, J. Tan
- MEDI 487.** Preparative method development from analytical columns. **J.E. Silver,** R.L. Lewis, F. Nancy, L.M. Esther
- MEDI 488.** Synthesis of organic azides via flow chemistry. **J.E. Silver,** L.M. Esther, R.L. Lewis, F. Nancy
- MEDI 489.** Development and screening of new cathepsin D inhibitors. **R. McConnell,** K. Malayala, K. Yarlagaadda, K. Sayyar, C. Trana, W. Godwin, L. Wen
- MEDI 490.** Greener reversed-phase flash chromatography using acetone instead of acetonitrile. **J.R. Bickler**
- MEDI 491.** Acetonitrile as a replacement for methanol in normal-phase flash chromatography. **J.R. Bickler**
- MEDI 492.** NCI/NEC discovery HTS resources: Oncology Interrogation Tools Library. **R.N. Misra,** M. Eckert, C.R. Johnson, C. Laggner
- MEDI 493.** Synthesis and solubility determination of a highly water soluble phosphonooxymethyl prodrug. **R. Castillo-Bocanegra,** J. Victoria-Miguel, A. Hernandez Campos, H. Jung-Cook
- MEDI 494.** Inhibition of *Candida albicans* biofilm formation with biaryl amides. **D.A. Hinojosa**
- MEDI 495.** Center for innovative in drug discovery collaborative programs: Structure based drug design, synthesis and evaluation of new antischistosomal agents. **R. Tarpley**
- MEDI 496.** Fragment based drug discovery of allosteric FAK inhibitors. **O. Cossio,** R. Campos-Olivas, C. Santiveri Martín-Varés
- MEDI 497.** Discovery of novel small molecule inhibitors of oncoprotein EYA2 for breast and ovarian cancers. **B. Campos,** S.F. McHardy, A. Lopez, H. Wang, **D. Wilson,** D. Wristers, R. Li, Y. Bin, S. Smith, S. McCowen
- MEDI 498.** Synthesis of N-functionalized chiral 3-hydroxyphenylpyrrolidines and their evaluation as selective D<sub>3</sub> receptor ligands. **A. Omran,** S. Eslamimehr, A.M. Crider, W.L. Neumann
- MEDI 499.** Anti-cancer drug discovery efforts target two kinases on the non-canonical NF- $\kappa$ B pathway. **G. Chan,** O. Demir, G. Ghosh, R.E. Amaro
- MEDI 500.** Novel mitochondrial complex I inhibitors for anti-cancer therapeutics. **J. Holmes,** K. Damera, J. Yancey, M. Zhu, N. Devi, S. Kaluz, E. Van Meir, B. Wang
- MEDI 501.** Efforts to expand our antibiotic arsenal to eradicate persistent bacterial biofilms. **R. Huigens**
- MEDI 502.** Design, synthesis, and biological evaluation of heteroaryl amine derivatives for anticancer activity. **M. Besan,** R. Srivastava, S. Srivastava
- MEDI 503.** Luminescent Conjugated Oligoethylenes (LCOs) for detection and characterization of disease-associated protein aggregates and cells. **M. Bäck**
- MEDI 504.** Drugging the undruggable with MCR scaffold manifold: The design and synthesis of covalent inhibitors and macrocycles. **T. Zarganes-Tzitzikas,** P. Patil, A. Doemling, K. Neochoritis
- MEDI 505.** Synthesis of novel agents for the treatment of neurodegenerative diseases. **B.J. Eduful,** J. Leahy, D. Kang, M. Chin, A. Rashedi, O. Jallow
- MEDI 506.** Withdrawn.
- MEDI 507.** Artificial macrocycles by multicomponent reactions. **A. Doemling**
- MEDI 508.** Cocrystal of 5-fluorouracil with nicotinamide to improve its biopharmaceutical attributes using crystal engineering approach. **M.K. Gautam,** R. Chadha
- MEDI 509.** Solving challenging structural motifs in natural products using concerted DFT modeling and 2-D INADEQUATE NMR. **J.R. Powell,** T.M. McCullough, R. Luliucci, J.K. Harper

## NUCL

## Division of Nuclear Chemistry and Technology

A. Hixon, Program Chair

## OTHER SYMPOSIA OF INTEREST:

Evolving Nanoparticle Reactivity throughout Nucleation, Growth &amp; Dissolution (see GECC, Wed)

Frontiers in Heavy Element Electronic Structure (see INOR, Wed)

Hollyweird Chemistry (see CPRC, Sun, Mon)

I&amp;EC Division Early Career Fellow Symposium: Honoring Dr. Leigh Martin (see I&amp;EC, Wed)

Lanthanide &amp; Actinide Chemistry (see INOR, Sun, Tue, Wed, Thu)

## SOCIAL EVENTS:

Social Hour, 6:00 PM: Tue

## BUSINESS MEETINGS:

Executive Committee Meeting (Closed), 5:00 PM: Sun

Business Meeting, 5:00 PM: Tue

## SUNDAY MORNING

## Section A

Moscone Center  
Esplanade Ballroom 301

## Nuclear Fission

R. S. Rundberg, Organizer

T. A. Bredeweg, Organizer, Presiding

9:00 Introductory Remarks.

9:05 **NUCL 1.** Total kinetic energy release and fission product mass distributions in the fast neutron induced fission of <sup>235</sup>U, <sup>232</sup>Th, <sup>239</sup>Pu and <sup>238</sup>U. **W. Loveland**9:40 **NUCL 2.** U-235 fission mass yield dependence on resonance and neutron energy. **R.S. Rundberg,** T.A. Bredeweg, M. Koehl, J. Braley10:15 **NUCL 3.** Energy dependence of fission product yields for <sup>235</sup>U, <sup>238</sup>U, and <sup>239</sup>Pu with monoenergetic neutrons between thermal and 14.8 MeV. **M. Gooden,** T.A. Bredeweg, M.M. Fowler, D.J. Vieira, J. Wilhelm, A. Tonchev, M.A. Stoyer, M. Bhike, F. Krishichayan, W. Tornow

10:50 Intermission.

11:10 **NUCL 4.** Theory of fission-fragment angular distributions. **W. Younes**11:45 **NUCL 5.** Survival of excited nuclei produced in warm fusion reactions. **C.M. Folden**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

‡ Cooperative Cosponsorship

SUNDAY AFTERNOON

Section A

Moscone Center

Esplanade Ballroom 302

Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Cosponsored by INOR and PRES

B. E. Bursten, W. J. Evans, A. P. Sattelberger, Organizers

J. C. Green, Presiding

1:20 NUCL 6. Award Address (Glenn T. Seaborg Award for Nuclear Chemistry sponsored by the ACS Division of Nuclear Chemistry & Technology). Bonding trends across the actinide series. D.L. Clark

2:00 NUCL 7. Some bits and pieces of Dave Clark 5d and 5f chemistry. B.E. Bursten

2:20 NUCL 8. Technetium oxide chemistry. A.P. Sattelberger, B. Childs, K.V. Lawler, F. Poineau, P. Forster, K. Czerwinski

2:40 NUCL 9. Recent advances in the chemistry of the rare-earth metals in the formal +2 oxidation state. W.J. Evans

3:00 NUCL 10. New divalent manganese complexes supported by imine-amide ligands. J.C. Gordon, D. Kindra, B. Scott, N.C. Smythe

3:20 Intermission.

3:40 NUCL 11. Uranium (IV -VI) imido and amido chemistry: Synthesis, reactivity and bonding. J.M. Boncella, A.M. Tondreau, N.C. Tomson, N.H. Anderson, B. Scott

4:00 NUCL 12. Structural chemistry of UO<sub>2</sub>, NpO<sub>2</sub>, and PuO<sub>2</sub>. S. Conradson

4:20 NUCL 13. Reactivity of +3 actinides. S.A. Kozimor, E.R. Batista, J.M. Berg, E.R. Birnbaum, J.N. Cross, J.W. Engle, J. Pacheco, M.G. Ferrier, B.W. Stein

4:40 NUCL 14. Actinide coordination chemistry with environmental and biological applications. M. Neu

5:00 NUCL 15. Actinide organometallic chemistry: A meeting with David Clark at the bottom of the periodic table. J.L. Kiplinger

Section B

Moscone Center

Esplanade Ballroom 301

Nuclear Fission

T. A. Bredeweg, Organizer

R. S. Rundberg, Organizer, Presiding

2:00 Introductory Remarks.

2:05 NUCL 16. Fission yield measurements for Th-232, U-238 and HEU at the National Ignition Facility. N. Gharibyan, K. Moody, J. Despotopoulos, S. Faye, P. Grant, K. Kmak, K. Roberts, C. Yeaman, D.A. Shaughnessy

2:40 NUCL 17. Application of the Bohr-independence hypothesis for the measurement of fission yields. N. Gharibyan, K. Moody, S. Turney, T. Brown, D.A. Shaughnessy

3:15 Intermission.

3:35 NUCL 18. Addressing nuclear data needs with FIER. E. Matthews, B.L. Goldblum, W. Younes, L.A. Bernstein

4:10 NUCL 19. Delayed neutron spectroscopy for characterization of special nuclear material. J. Ocampo, J. Wallick, G.E. Miller, A. Shaka

Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

MONDAY MORNING

Section A

Moscone Center

Esplanade Ballroom 302

Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Cosponsored by INOR

B. E. Bursten, W. J. Evans, A. P. Sattelberger, Organizers

D. K. Shuh, Presiding

8:20 NUCL 20. Tribute to an esteemed colleague: Young Doctor Clark. D.E. Hobart

8:40 NUCL 21. Coordination of N-heterocyclic ligands to actinides: A joint theoretical and experimental study. P. Yang, J. Su, E.R. Batista, J.K. Gibson, A. Gaunt, S.A. Kozimor

9:00 NUCL 22. Probing actinide-ligand chemical bonds: Hand shake between quantum mechanical calculations and experimental measurements. E.R. Batista, P. Yang, R.L. Martin, S.A. Kozimor, D.L. Clark

9:20 NUCL 23. Interpretation of morphologic and chemical signatures from actinide oxide materials. M.P. Wilkerson

9:40 NUCL 24. Withdrawn.

10:00 NUCL 25. Factors affecting the sorption of uranyl at mineral-aqueous solution interfaces. G.E. Brown, G. Dublet, V. Noel, S.E. Fendorf, J.R. Bargar, K. Maher

10:20 Intermission.

10:40 NUCL 26. Molecular controls over uranium mobility in complex redox-active sediment systems. J.R. Bargar, V. Noël, S. Bone, N. Janot, S. Roycroft, K. Boye

11:00 NUCL 27. Swift heavy ion irradiation of actinide materials. R. Ewing

11:20 NUCL 28. Synthesis, structure and bonding of tetravalent-metal (M<sup>IV</sup>) oxide clusters. L. Soderholm, S. Skanthakumar, S.L. Estes

11:40 NUCL 29. Covalent interactions in actinide oxides. P.S. Bagus, C.J. Nelin

Section B

Moscone Center

Esplanade Ballroom 301

Nuclear & Radiochemistry Summer School: Past, Present & Future

J. D. Robertson, Organizer

D. D. Ensor, Organizer, Presiding

8:20 Introductory Remarks.

8:30 NUCL 30. Impact of the nuclear and radiochemistry summer schools on the nuclear chemistry program at Michigan State University. P.F. Mantica

8:55 NUCL 31. How the Nuclear and Radiochemistry Summer School shaped my career as a radiochemist in biotech. C.A. Boswell

9:20 NUCL 32. My career in nuclear science: From the nuclear and radiochemistry summer school to national security. J. Freiderich

9:45 NUCL 33. Nuclear science from the big apple to down under. R. Popelka-Filcoff

10:10 Intermission.

10:25 NUCL 34. Structural and chemical changes in uranyl fluoride: A complementary spectroscopic and computational study. M.C. Kirkegaard, A.J. Miskowicz, J. Langford, B. Anderson

10:50 NUCL 35. Path to a PhD: From a summer to a career. A.J. Swift, K. Czerwinski, D.J. Koury

11:15 NUCL 36. Finding my place in radiochemistry: A recent grad's letter of gratitude to the NCSS. E.M. May

11:40 NUCL 37. Impact of the Nuclear Chemistry Summer School on one student from a small, undergraduate liberal arts college. A. Klose

Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

MONDAY AFTERNOON

Section A

Moscone Center

Esplanade Ballroom 302

Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Cosponsored by INOR

B. E. Bursten, W. J. Evans, A. P. Sattelberger, Organizers

C. Burns, Presiding

1:40 NUCL 38. Coordination chemistry of uranium with thioethers and selenoethers: Investigation of neutral heavy donor binding to heavy metals. A.V. Blake, Z. Theiler, S.R. Daly

2:00 NUCL 39. Harnessing the principles of coordination chemistry to control the growth of actinide materials. S.G. Minasian, A. Herve, A. Braun, S. Alayoglu, A.B. Altman, C. Booth, D. Olive

2:20 NUCL 40. C-term magnetic circular dichroism spectroscopy: From transition metals to f-element chemistry. M.L. Neidig

2:40 NUCL 41. Synchrotron radiation for the investigation of heavy element science. D.K. Shuh

3:00 NUCL 42. Activation of uranyl in gas-phase complexes. J.K. Gibson

3:20 Intermission.

3:40 NUCL 43. Separating technetium from nitric acid by trapping in iron oxides. W.W. Lukens

4:00 NUCL 44. Water adsorption on AnO<sub>2</sub> (An = U, Pu) surfaces. J. Wellington, B. Tegner, A. Kerridge, N. Kaltsoyannis

4:20 NUCL 45. Electronic structures and photoelectron spectra of uranium halides and oxides. J. Su, L. Wang, J. Li

4:40 NUCL 46. Broadening student experiences: Research internships with Los Alamos National Laboratory and the interesting Pu chemistry they performed. P.K. Dorhout

5:00 NUCL 47. Realizing cerium(IV)-ligand multiple bonds: Cerium is a 5d element after all? E.J. Schelter, L. Solola, A. Zabula, W.L. Dorfner, B. Manor, P. Carroll

Section B

Moscone Center

Esplanade Ballroom 301

Nuclear & Radiochemistry Summer School: Past, Present & Future

D. D. Ensor, Organizer

J. D. Robertson, Organizer, Presiding

1:20 NUCL 48. Heavy actinide thermodynamics: Research enabled by the Nuclear Chemistry Summer School. J. Braley, M. Luckey, M. Urban, N. Bessen

1:45 NUCL 49. Radiochemistry Center of Excellence and the NCSS: To infinity and beyond. J.D. Auxier, M.T. Cook, M. Lang, D.C. Donovan, H.L. Hall

2:10 NUCL 50. From Brookhaven to the Bronx: Radiochemistry and education. M.A. Deri

2:35 NUCL 51. NCSS to doctoral candidate: Determination of radioisotopes in complex saline matrices. J.K. Daum, R. Sudowe

3:00 Intermission.

3:15 NUCL 52. Education blended with inspiration: Nuclear chemistry summer schools. A.L. Werlein

3:40 NUCL 53. Thermodynamic analysis of lanthanide halides and oxyhalides. D. Miller, J.D. Auxier, H.L. Hall

4:05 NUCL 54. From the summer school to graduate school: Leveraging opportunities in nuclear chemistry. R. Lewis

4:30 NUCL 55. Nuclear and radiochemistry summer school: (Almost) six years later. J.M. Dorhout

4:55 NUCL 56. 2016 Class of the DOE Radiochemistry Summer School in Oregon State University. A. Paulenova

Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

TUESDAY MORNING

Section A

Moscone Center

Esplanade Ballroom 302

Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

Cosponsored by INOR

B. E. Bursten, W. J. Evans, A. P. Sattelberger, Organizers

A. Kersting, Presiding

8:20 NUCL 57. Development of actinide separations in alkaline solutions. G. Jarvinen, W.H. Runde, G. Goff

8:40 NUCL 58. Subsurface containment and permanent disposal of nuclear waste: Role and contribution of fundamental actinide science. D.T. Reed

**9:00 NUCL 59.** Recent progress in studies of internuclear interactions in heavy element systems by solid-state NMR and NQR spectroscopy. **H. Cho**, C. Capan, R. Dempsey, B.K. McNamara, S. Sinkov, C. Soderquist

**9:20 NUCL 60.** Amplification in late actinides: How the minor nuances of electronic structure create bulk effects. **T.E. Albrecht-Schmitt**

**9:40 NUCL 61.** Differential solvation effects on reaction energetics. **G. Schreckenbach**

**10:00 NUCL 62.** Actinide-sulfimine chemistry. **J.R. Walensky**

**10:20** Intermission.

**10:40 NUCL 63.** Preparation and reactivity of the  $[\text{Re}_5\text{F}_9]^{2-}$  anion. **F. Poineau**, S. Mariappan Balasekaran, A.P. Sattelberger

**11:00 NUCL 64.** Thorium redox chemistry and a new way to measure actinide covalency by pulsed EPR spectroscopy. **D. Mills**, E. McInnes, F. Tuna, A. Kerridge, L. Maron, A. Formanuk, A. Aricci, F. Ortu, J. Liu, R. Beekmeyer, L. Castro

**11:20 NUCL 65.** Structures and phase transitions of the actinide hexachlorides. **R. Wilson**

**11:40 NUCL 66.** Why does solid  $\text{PuO}_2$  possess no magnetic moment? **R.L. Martin**

## Section B

Mosccone Center  
Esplanade Ballroom 301

### Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

*Cosponsored by INOR and PRES*

D. L. Clark, D. K. Shuh, L. Soderholm,  
*Organizers*

C. Burns, *Presiding*

**8:20 NUCL 67.** Electronic structures of  $\text{F}_3\text{UAH}$  ( $\text{A} = \text{C} - \text{FI}$ ) molecules: Lewis Electron-Pair (LEP) model revisited. **H. Hu**, W. Li, J. Li

**8:40 NUCL 68.** Experimental and computational study of protactinium, the transition metals and the actinides. **R. Wilson**, V. Vallet

**9:00 NUCL 69.** Still thoroughly modern at 25: The FEUDAL bonding model. **J.L. Sonnenberg**

**9:20 NUCL 70.** Magic journey in metal-metal multiple bonds. **L. Gagliardi**

**9:40 NUCL 71.** Covalency in 4f-element complexes probed with quantum mechanics and ligand K-edge x-ray absorption spectroscopy. **E.R. Batista**, P. Yang, R.L. Martin, S.A. Kozimor, D.L. Clark

**10:00** Intermission.

**10:20 NUCL 72.** Theory enables soft x-ray synchrotron radiation spectroscopy of heavy element materials. **D.K. Shuh**

**10:40 NUCL 73.** Photoelectron spectroscopy and density functional theory: The interplay of experiment and theory. **J.C. Green**

**11:00 NUCL 74.** Stabilities of actinide oxidation states in gas-phase complexes. **J.K. Gibson**

**11:20 NUCL 75.** Complexation of  $\text{Am}^{3+}$ ,  $\text{Cm}^{3+}$ ,  $\text{Bk}^{3+}$  and  $\text{Cf}^{3+}$  with DPA ligand in water: A theoretical study. **P. Yang**, M. Kelley, E.R. Batista, J. Braley

**11:40 NUCL 76.** Taking advantage of the chemistry of heterocycles in actinide coordination: Crystal packing, reactivity, and pi-pi interactions of nitrogen donor ligands containing naphthalene and phenazine. **A.E. Gorden**, E.E. Hardy, K.M. Wyss, M.A. Eddy, R.J. Keller

## TUESDAY AFTERNOON

### Section A

Mosccone Center  
Esplanade Ballroom 302

### Glenn T. Seaborg Award for Nuclear Chemistry: Symposium in honor of David L. Clark

*Cosponsored by INOR*

B. E. Bursten, W. J. Evans, A. P. Sattelberger,  
*Organizers*

J. C. Gordon, *Presiding*

**1:40 NUCL 77.** Unique advantages of organometallic supporting ligands. **P. Diaconescu**

**2:00 NUCL 78.** Complexes of uranium and thorium with multiple bonds to tetryl and pnicide centers. **S.T. Liddle**, J. Seed, M. Gregson, A. Wooles, F. Tuna, E. McInnes

**2:20 NUCL 79.** Synthesis and x-ray crystallographic characterization of low valent organoplutonium complexes: Identification of plutonium in the +2 oxidation state. **C.J. Windsorff**, B. Scott, A. Gaunt, S.A. Kozimor, W.J. Evans

**2:40 NUCL 80.** Pushing the limits with f element-ligand multiple bonding. **T.W. Hayton**

**3:00 NUCL 81.** Mediating redox chemistry at the lanthanides using redox-active ligands. **S.A. Pattenaude**, E.J. Coughlin, M. Zeller, S.C. Bart

**3:20** Intermission.

**3:40 NUCL 82.** Electrocatalytic production  $\text{H}_2$  from  $\text{H}_2\text{O}$  with f-element-based molecular catalysts. **K. Meyer**

**4:00 NUCL 83.** Evaluation of mixed actinide oxides by laser ablation ICP-MS. **K. Campbell**, A. Unger, W.M. Kerlin, T. Hartmann, J. Bertoia, E. Judge, M. Dirmyer, **K. Czerwinski**

**4:20 NUCL 84.** Computational study of semiconducting layered technetium chalcogenide compounds. **E. Kim**, P. Weck, F. Poineau, A.P. Sattelberger, K. Czerwinski

**4:40 NUCL 85.** Computational studies of hydrolysis reactions of cationic and anionic actinide complexes. **D.A. Dixon**, M. Vasiliu, H. Arnold, K.A. Peterson, J.K. Gibson

## Section B

Mosccone Center  
Esplanade Ballroom 301

### Frontiers in Heavy Element Electronic Structure: A Tribute to Bruce Bursten

*Cosponsored by INOR and PRES*

D. L. Clark, L. Soderholm, *Organizers*

D. K. Shuh, *Organizer, Presiding*

**1:20 NUCL 86.** Calculating fellow: A theoretical tribute to Bruce Bursten. **D.E. Hobart**

**1:40 NUCL 87.** Energetic properties of actinide molecular clusters. **D.A. Dixon**, M. Vasiliu, Z. Lee

**2:00 NUCL 88.** Layered metal oxide nanosheets as model surfaces for understanding the strong metal-support interaction. **M. Strayer**, A.S. Rosas, R. Uppuluri, J.M. Binz, T. Sentfle, A. Azizi, R.M. Rioux, M.J. Janik, N. Alem, **T.E. Mallouk**

**2:20 NUCL 89.** Shortest Th-Th distance from a new type of quadruple bond. **H. Hu**, N. Kaltsoyannis

**2:40 NUCL 90.** Actinide-pnictogen chemistry. **J.R. Walensky**

**3:00** Intermission.

**3:20 NUCL 91.** Accurate solution phase thermochemistry for actinide solvation, complexation, and transport from aqueous to organic phases. **A.E. Clark**

**3:40 NUCL 92.** From actinides to transactinides: Peculiarities in electronic structure and properties. **V. Pershina**

**4:00 NUCL 93.** Roles of 4f and 5f orbitals in bonding: A magnetochemical, crystal field, density functional theory, and multi-reference wavefunction study. **W.W. Lukens**, M. Speldrich, P. Yang, T. Duignan, J. Autschbach, P. Koegler

**4:20 NUCL 94.** Insights into the redox chemistry of actinides. **W. Dejong**

**4:40 NUCL 95.** New insights into metal-ion correlations in solution. **L. Soderholm**, S. Skanathakumar

## WEDNESDAY MORNING

### Section A

Mosccone Center  
Esplanade Ballroom 302

### Advanced Actinide Materials: Nanostructure, Complexity & Extreme Environments

P. C. Burns, G. Sigmon, *Organizers, Presiding*

**8:30 NUCL 96.** Updates on uranyl peroxide nanoclusters. **P.C. Burns**

**9:00 NUCL 97.** Dissolution of uranium minerals in uranyl peroxide nanocluster forming environments. **H.L. Lobeck**, C.J. Parker, S. Boukdad, E. Balboni, P.C. Burns

**9:20 NUCL 98.** Structural stability of uranyl nanoclusters. **M. Sharifionizi**, J. Qiu, J. Szymanowski, P.C. Burns

**9:40 NUCL 99.** Sorption mechanism and kinetics of the uranyl peroxide nanocluster (U60) to Ca- and Na-montmorillonite. **L.R. Sadergaski**, W. Stoxen, A.E. Hixon

**10:00** Intermission.

**10:15 NUCL 100.** Uranyl polyrotaxanes: From hydrothermal synthesis to structural diversity. **W. Shi**

**10:45 NUCL 101.** Actinide based metal organic framework materials. **S. Wang**

**11:05 NUCL 102.** Effect of processing conditions on lanthanide and actinide oxalate crystal growth mechanisms: Insights from in situ characterization and computational modeling. **J.A. Soltis**, M. Conroy, W.C. Isley, T. Meadows, T. Meadows, G.B. Hall, S. Chatterjee, Z. Wang, S. Kathmann, J.J. De Yoreo, E. Buck, G.J. Lumetta

**11:25 NUCL 103.** Formation and growth mechanism of U(IV) nanoparticles and colloidal stability in aqueous solutions. **W. Cha**, H. Cho, Y. Youn, E. Jung

## Section B

Mosccone Center  
Esplanade Ballroom 301

### General Topics in Nuclear Chemistry & Technology

L. H. Delmau, *Organizer, Presiding*

**8:30 NUCL 104.** Withdrawn.

**8:50 NUCL 105.** Cyclic voltammetric studies of unique complexation and solvent effects for the actinide elements. **M.L. Marsh**, F.D. White, D.E. Hobart, S.S. Galley, T.E. Albrecht-Schmitt

**9:10 NUCL 106.** Investigation of structure and bonding in transuranium elements utilizing a redox active ligand. **S.S. Galley**, S.A. Pattenaude, S.C. Bart, T.E. Albrecht-Schmitt

**9:30 NUCL 107.** Unraveling the nature of the Am(III)/Eu(III) separation with three structurally similar ligands by changing of bridging groups. **Q. Wu**

**9:50** Intermission.

**10:10 NUCL 108.** Chemistry of technetium in dilute to concentrated saline systems: Redox processes, solubility and complexation. **X. Gaona**, E. Yalcintas, A. Baumann, R. Polly, M. Altmaier, H. Geckeis

**10:30 NUCL 109.** Redox behavior of U(VI)/U(IV) and solubility of U(IV) in repository relevant dilute to concentrated solutions in the absence and presence of complexing ligands. **E. Yalcintas**, N. Cevirim, X. Gaona, D.T. Reed, M. Altmaier

**10:50 NUCL 110.** Complexation of lanthanide and actinide ions with N,N-di-2-ethylhexyl-diglycol-amic acid in solvent extraction separation from nitric acid solutions. **G. Tian**, Y. Zhang, S. Yang, X. Yuan

**11:10 NUCL 111.** Effect of elevated temperatures on actinide solubility and speciation—studies performed by KIT-INE within the German project ThermAc. **X. Gaona**, F. Endrizzi, J. Lee, D. Fellhauer, M. Altmaier

**11:30 NUCL 112.** Complexation and phase transfer kinetics of tributyl phosphate degradation products at the liquid:liquid interface during solvent extraction. **S. Howett**, A. Casella, A. Lines, S. Clark, C. Louie, C. Delegard, G.J. Lumetta, W. Pitts, K.M. McCoy

### Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

*Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL*

### Frontiers in Heavy Element Electronic Structure

*Sponsored by INOR, Cosponsored by NUCL*

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡ Cooperative Cosponsorship

WEDNESDAY AFTERNOON

Section A

Moscone Center  
Esplanade Ballroom 302

Advanced Actinide Materials: Nanostructure, Complexity & Extreme Environments

P. C. Burns, G. Sigmon, *Organizers, Presiding*

**1:00 NUCL 113.** Effects of high ionic strength on actinide speciation and oxidation state distribution in subsurface environments. **D.T. Reed, M.K. Richmann, J.S. Swanson, T. Dittrich**

**1:30 NUCL 114.** Corrosion mechanism of iron in liquid uranium hexafluoride environment. **M. Achour, M. Dubois, L. Jouffret, A. Selmi, B. Morel, S. Delpech, S. Chatain, L. Martinelli, P. Bonnet**

**1:50 NUCL 115.** Turning on the terminal: Promoting non-covalent interaction with uranyl oxo atoms. **K. Carter, M. Kalaj, R. Surbella, L. Ducati, J. Autschbach, C.L. Cahill**

**2:10 NUCL 116.** Insight into the uranyl oxyfluoride topologies through the synthesis and crystal structure new oxyfluoride compounds. **L. Jouffret, J. Hiltbrunner, M. Dubois**

2:30 Intermission.

**2:45 NUCL 117.** Actinide clusters, nanoclusters and cluster-frameworks. **C. Falaise, K. Kozma, O. Renier, H.A. Neal, M.D. Nyman**

**3:15 NUCL 118.** Influence of alkali metals in dissolving UO<sub>2</sub> to form highly soluble aqueous uranyl peroxide clusters. **S. Hickam, P.C. Burns**

**3:35 NUCL 119.** Uranyl-peroxide nanocapsules: From self-assembly to isomerism. **P. Miro**

**3:55 NUCL 120.** Thermochemistry of neptunium oxides and Np incorporated studdite. **L. Zhang, E. Dzik, J. Szymanowski, G. Sigmon, A. Navrotsky, P.C. Burns**

**4:15 NUCL 121.** Plutonium nanocluster formation, structure, and stability. **A.E. Hixon, G. Sigmon**

Section B

Moscone Center  
Esplanade Ballroom 301

General Topics in Nuclear Chemistry & Technology

L. H. Delmau, *Organizer, Presiding*

**1:20 NUCL 122.** Developing regional isotopic baselines to trace resource acquisition patterns in the Mesa Verde area of the American Southwest. **A.L. Werlein, V. Renson, J. Coltrain, K. Schollmeyer, J.D. Robertson, J.R. Ferguson**

**1:40 NUCL 123.** Characterization of indigenous Australian ochre by K<sub>α</sub>-Neutron Activation Analysis (K<sub>α</sub>-NAA) for understanding cultural exchange. **R. Popelka-Filcoff, C. Lenehan, J. Bennett, A. Stopic, K. Walshe**

**2:00 NUCL 124.** <sup>88</sup>Zr(n, <sup>γ</sup>)<sup>89</sup>Zr cross section measurement. **J. Shusterman, J.M. Gates, S.E. Lapi, C.S. Loveless, E.B. Norman, G. Peaslee, J.D. Robertson, G. Severin, L. Sutherlin, K.J. Thomas, M.A. Stoyer, D.A. Shaughnessy, N.D. Szielco**

**2:20 NUCL 125.** Another isomer in Rh102? **H.A. Shugart, K.J. Thomas, E.B. Norman**

2:40 Intermission.

**3:00 NUCL 126.** Unusual coordination of heptadentate tripodal Schiff base lanthanide/actinide complexes. **K. Seidler**

**3:20 NUCL 127.** Utility of MOFs and their derivatives for luminescent sensing and sorption of actinide ions from aqueous solution. **L. Yuan, N. Zhang, Z. Chai, W. Shi**

**3:40 NUCL 128.** Ion selectivity of uranyl peroxide nanocages: An inorganic mimic of K<sup>+</sup> ion channels. **Y. Gao, J. Szymanowski, X. Sun, P.C. Burns, T. Liu**

**4:00 NUCL 129.** Possible atomic fuel production through accumulation of specific radioisotopes by fish in offshore Fukushima, Japan. **H. Katsura**

**4:20 NUCL 130.** Thermodynamic studies on the complexation of uranyl ion in ionic liquids. **C. Xu, J. Chen**

Evolving Nanoparticle Reactivity throughout Nucleation, Growth & Dissolution

Sponsored by GEOC, Cosponsored by COLL, ENVR and NUCL

Frontiers in Heavy Element Electronic Structure

Sponsored by INOR, Cosponsored by NUCL

WEDNESDAY EVENING

Section A

Moscone Center  
Hall D

General Topics in Nuclear Chemistry & Technology

A. E. Hixon, *Organizer*

7:00 - 9:00

**NUCL 131.** Determination of radioactivity of uranium and thorium in environmental samples by using fusion and sequential separation method, and its evaluation using key validation parameters. **Y. Ko, W. Kim, H. Kim, W. Lee, G. Choi, K. Chung, M. Kang**

**NUCL 132.** Modeling redox coordination chemistry for transuranium elements. **F.D. White, M.L. Marsh, S.S. Galley, D.E. Hobart, T.E. Albrecht-Schmitt**

**NUCL 133.** Preparation of alumina microspheres by internal gelation method. **C. Padilla-Cintron, J. Katalenich**

**NUCL 134.** Characterization of lanthanide chlorides for nuclear forensics. **S. Shahbazi, J. Auxier**

**NUCL 135.** Synthesis of Bis-Triazinyl Pyridine (BTPs) ligands for <sup>15</sup>N ESEEM experiments in actinide and lanthanide complexes. **D. Dan, T.E. Albrecht-Schmitt**

**NUCL 136.** PDF analysis of uranyl clusters from aqueous solutions. **K. Kozma, C. Falaise, H.A. Neal, M.D. Nyman**

**NUCL 137.** Ordered mesoporous carbons functionalized for actinide and lanthanide separations chemistry. **K. Kluherz, G. Deodhar, E. Bertelsen, J. Braley, B.G. Trewyn**

**NUCL 138.** Soft N-, S-, and mixed donor site ligands for selective separation of actinides from lanthanides. **M. Twomey, I. Lehman-Andino, L. Mathivathanan, R.G. Raptis, K. Kavalieratos**

**NUCL 139.** Electrochemical reduction of aqueous uranium. **B. Stevenson, J. Scaggs, D.D. Russell**

THURSDAY MORNING

Section A

Moscone Center  
Esplanade Ballroom 302

Young Investigators in Nuclear & Radiochemistry

Cosponsored by YCC

A. E. Hixon, *Organizer*

E. M. May, *Organizer, Presiding*

**8:30 NUCL 140.** Re (III and V) Schiff base complexes as potential therapeutic agents. **J.E. Baumeister, C. Barnes, S.S. Jurisson**

**8:50 NUCL 141.** Radiolabeling of a trithiol-bombesin ligand with <sup>75</sup>As and <sup>75</sup>As for use as radiopharmaceuticals. **M. Phipps, Y. Feng, F. Gallazzi, A. Ketring, S.S. Jurisson**

**9:10 NUCL 142.** Application of inductively coupled plasma mass spectroscopy and enriched tungsten isotopes to nuclear fusion research. **J. Duran, D.C. Donovan, C. Eley, A. Maan, J.D. Auxier, S. Lee, S. Zamperini, E. Unterberg, D. Rudakov, P. Stangeby, W. Wampler**

**9:30 NUCL 143.** Actinide-carbon bond activation in gas-phase organoactinide complexes. **J. Jian, T. Eaton, J.K. Gibson**

**9:50 NUCL 144.** Characterizing actinide speciation using electrospray ionization mass spectrometry. **T. Eaton, J. Jian, J.K. Gibson**

10:10 Intermission.

**10:30 NUCL 145.** Utilizing Diffusion Ordered Spectroscopy (DOSY) to probe organic phases in liquid-liquid solvent extraction systems. **A. Kimberlin, K.L. Nash**

**10:50 NUCL 146.** Study of actinide cations in solution through their paramagnetic behavior. **M. Illy, M. Autillo, L. Guerin, D. Guillaumeont, E. Colineau, P. Moisy, H. Bolvin, C. Berthon**

**11:10 NUCL 147.** Method comparison for the determination of Pitzer parameters for Tc(VII), Re(VII), and V(V) in aqueous systems. **C. Eiroa Lledo, G. Parker, D.E. Wall, N. Wall**

**11:30 NUCL 148.** Elucidating bonding preference in tetrakis(mido)urinate (VI) dianions. **J. Xie, N.H. Anderson, D. Ray, M. Zeller, S.C. Bart, L. Gagliardi**

Section B

Moscone Center  
Esplanade Ballroom 301

General Topics in Nuclear Chemistry & Technology

L. H. Delmau, *Organizer*

A. E. Hixon, *Presiding*

**8:20 NUCL 149.** Radiochemical, elemental, and isotopic analysis of epsilon phase material from irradiated fuel. **K.L. Pellegrini, C. Soderquist, R.A. Clark, J.M. Schwantes**

**8:40 NUCL 150.** Microstructural examination of neutron irradiated base metal and TiG-welded zircaloy-4. **C. Silva, K. Leonard, C. Bryan**

**9:00 NUCL 151.** Using technetium's volatility to decontaminate barrier material. **W.R. Wilmarth, L. Oji, M. Restivo, M. Duignan**

**9:20 NUCL 152.** Semiconductivity in plutonium and americium chromates and molybdates: Evidence for energy-degeneracy-driven covalency. **A. Arico**

**9:40 NUCL 153.** Recent progress on the development of pyroprocessing techniques for TMSR in SINAP. **Y. Gong, Q. Li**

10:00 Intermission.

**10:20 NUCL 154.** Pyroprocessing of spent nuclear fuels: Theoretical calculations and multiscale molecular simulations of solute behavior in molten salts. **X. Li, L. Yan, J. Song, S. Shi, B. Yue**

**10:40 NUCL 155.** Speciation of uranium in condensing laser ablation plasmas. **D. Weisz, J.C. Crowhurst, H. Radousky, T. Rose, W. Siekhaus, B. Koroglu, M. Armstrong, E. Stavrou, J.M. Zaugg, M. Azer, M. Finko, D. Curreli**

**11:00 NUCL 156.** Design and efficient synthesis of a bifunctional octadentate ligand for PET imaging with <sup>89</sup>Zr. **M.A. Abdalrahman, R.P. Planalp**

**11:20 NUCL 157.** Contamination and decontamination of steel components. **A. Lang, D. Engelberg, P. Coffey, P. Martin, N. Smith, A. Jenkins, G. Law**

**11:40 NUCL 158.** Automated clean chemistry for bulk analysis of environmental swipe samples. **S.C. Bottorff, K.N. Tevepaugh, D.A. Bostick, C.R. Hexel, H. Kim, P. Field, B.W. Ticknor**

THURSDAY AFTERNOON

Section A

Moscone Center  
Esplanade Ballroom 302

Young Investigators in Nuclear & Radiochemistry

Cosponsored by YCC

E. M. May, *Organizer*

A. E. Hixon, *Organizer, Presiding*

**1:30 NUCL 159.** Characterizing mixed ligand f-element complexes for better An(III)/Ln(III) separations. **I.M. Hobbs, K.L. Nash**

**1:50 NUCL 160.** Studies of the impact of the diluent on interfacial properties of the advanced TALSPEAK/ALSEP extractant HEH[EHP]. **D.E. Dodd, K.L. Nash**

**2:10 NUCL 161.** Liquid phase chemistry study of indium and thallium for a future investigation of element 113. **M.F. Volia, E. Tereshatov, M. Boltoeva, C.M. Folden**

**2:30 NUCL 162.** Environmental technetium chemistry: Sulfide treatment of iron-containing minerals. **K. Reinig, N. Moore, S.S. Jurisson, T. Phelps**

2:50 NUCL 163. Withdrawn.

3:10 Intermission.

**3:30 NUCL 164.** Europium sorption to aluminum (hydr)oxide minerals. **P. Kay, T. Baumer, A.E. Hixon**

**3:50 NUCL 165.** Alkali ion bridge complexation between uranium nanoclusters and mineral surfaces. **W. Stoxen, L.R. Sadegaski, J. Szymanowski, A.E. Hixon**

**4:10 NUCL 166.** Determination of thermodynamic parameters associated with Tc(IV) sulfate complexation. **G. Parker, D.E. Wall, N. Wall**

**4:30 NUCL 167.** Stability of uranyl peroxide nanoclusters under hydrothermal conditions. J.R. FitzPatrick, H.L. Lobeck, S. Mana, P.C. Burns

## ORGN

### Division of Organic Chemistry

R. Broene and S. Silverman, *Program Chairs*

#### OTHER SYMPOSIA OF INTEREST:

**Advances in Teaching Organic Chemistry** (see CHED, Tue)

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors** (see ENVIR, Tue)

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium** (see PROF, Sun, Mon)

**Organometallic Chemistry: Applications to Organic Transformations** (see INOR, Sun, Wed)

**Space Chemistry** (see YCC, Mon)

#### SOCIAL EVENTS:

**Social Hour, 8:30 PM: Wed**

## SUNDAY MORNING

### Section A

Moscone Center  
3018/3022

**George A. Olah Award in Hydrocarbon or Petroleum Chemistry: Symposium in honor of Robert H. Grubbs**

R. E. Maleczka, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 ORGN 1.** Metal-catalyzed cross-coupling reactions of alkyl electrophiles. G.C. Fu

**8:40 ORGN 2.** Catalytic C–H functionalization: Borylation of molecules great and small along the road out of Flatland. M.R. Smith

**9:15 ORGN 3.** Streamlined synthesis of  $\pi$ -systems containing antiaromatic cyclobutadienoids via C–H activated annulation and aromatization. Y. Xia

**9:50** Intermission.

**10:00 ORGN 4.** Organocatalyzed atom transfer radical polymerization driven by visible light. G. Miyake

**10:35 ORGN 5.** Synthesis of improved protein-polymer conjugates by ROMP and CRP. H.D. Maynard

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

**11:10 ORGN 6. Award Address** (George A. Olah Award in Hydrocarbon or Petroleum Chemistry sponsored by the George A. Olah Award Endowment). Selective olefin metathesis catalysts and their applications. R.H. Grubbs

**11:55** Concluding Remarks.

### Section B

Moscone Center  
3014/3016

**National Fresenius Award: Symposium in honor of Neal K. Devaraj**

*Cosponsored by BIOC*

*Financially supported by Phi Lambda Upsilon, the National Chemistry Honor Society*

E. M. Skoda, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 ORGN 7.** Design and synthesis of new chemical tools for probing, manipulating, and imaging biological systems. D.M. Chenoweth

**8:45 ORGN 8.** Regio- and chemoselective immobilization of proteins on surfaces. J. Seo, G. Ramamoorthy, C.D. Poulter

**9:25 ORGN 9.** Membrane architectures, vesicle and viral fusion using DNA-lipid conjugates. S.G. Boxer

**10:05** Intermission.

**10:20 ORGN 10.** Purposefully moving peptides and proteins into the cytosol. A. Schepartz

**11:00** Introduction of Awardee.

**11:05 ORGN 11. Award Address** (National Fresenius Award sponsored by the Phi Lambda Upsilon, The National Chemistry Honor Society). Novel coupling reactions for manipulating and imaging biomolecules. N.K. Devaraj

**11:55** Concluding Remarks.

### Section C

Moscone Center  
3011

**Biologically-Related Molecules & Processes**

R. D. Broene, *Organizer*

S. T. Handy, *Presiding*

**8:20 ORGN 12.** Aurones: Synthesis and a template for biological investigations. S.T. Handy

**8:40 ORGN 13.** Versatile synthesis of chlorin and application in bio-medicine. N. Bhupathiraju, J. Gonzales, W. Perea, H. Chu, M. Yuen, N.L. Greenbaum, C.M. Drain

**9:00 ORGN 14.** Structural modifications of OXE receptor antagonists towards improved *in vivo* metabolic stability. S. Chourey, Q. Ye, N. Reddy, R. Wang, S. Gravel, C. Cossette, I. Slobodchikova, D. Vuckovic, M. Zeller, W.S. Powell, J. Rokach

**9:20 ORGN 15.** Fluorescent probes for imaging potassium in living cells. Z. Wang

**9:40 ORGN 16.** Fluorogenic dyes for haloalkane-based protein labeling *in vitro* and in bacterial cells. S.A. Clark, V. Singh, D. Vega Mendoza, W. Margolin, E.T. Kool

**10:00 ORGN 17.** Hydrophilized cell-permeant dyes with secondary alcohol functionalities for live cell STED imaging. A.N. Butkevich, V.N. Belov, K. Kolmakov, G. Lukinavicius, D. Kamin, S.C. Sidenstein, J. Matthias, R. Vlijm, H. Shojaei, V.V. Sokolov, S.W. Hell

**10:20 ORGN 18.** Design of a novel fluorescent sensor for chloride. K. VanDenburgh, Y. Liu, B. Qiao, A.H. Flood

**10:40 ORGN 19.** Fluorescent probes for imaging formaldehyde in living cells. K.J. Brummer, R.R. Walvoord, T.F. Brewer, C.J. Chang

**11:00 ORGN 20.** Development of a practical synthesis of ERK inhibitor GDC-0994. N. Wong, X. Linghu, F. Gosselin

**11:20 ORGN 21.** Discovery chemistry towards BTK inhibitor GDC-0853. J.J. Crawford

**11:40 ORGN 22.** Process research and development of the commercial synthesis of BTK inhibitor GDC-0853. H. Zhang, T. Cravillon, Q. Tian, N. Lim, D. Beaudry, J. Defreese, F. Gosselin

### Section D

Moscone Center  
3009

**Asymmetric Reactions & Syntheses**

R. D. Broene, *Organizer*

D. K. Leahy, *Presiding*

**8:00 ORGN 23.** Organocatalytic asymmetric transfer hydrogenation of *N*-alkylated aryliminoesters. J. Mazuela, T.K. Antonsson, M.J. Johansson, L. Kner, S.P. Marsden

**8:20 ORGN 24.** Catalytic asymmetric allylboration of cyclic imines for the stereodivergent synthesis of prenylated indolines and tetrahydroisoquinolines. C. Diner, M. Alam, S. Jonker, L. Eriksson, K. Szabo

**8:40 ORGN 25.** Vic-tricarboxyl compounds in natural product synthesis: Studies in total syntheses of preusochromones. U. Koert, E. Kerste

**9:00 ORGN 26.** Rationalization of enantioselectivity in chiral phosphoric acid-catalyzed reactions of  $sp^3$  electrophiles using DFT calculations. P. Champagne, K.N. Houk

**9:20 ORGN 27.** Efficient and scalable enantioselective synthesis of the axially chiral 11- $\beta$ -HSD inhibitor, BMT-816336. D.K. Leahy, C. Chan, K. Zhu, R.L. Hanson

**9:40 ORGN 28.** Enantioselective palladium-catalyzed insertion of carbene groups into N–H bonds of aromatic heterocycles. D. Van Vranken, S.C. Hiew, U. Ilandari Dewage, V. Arredondo, E. Gutman

**10:00 ORGN 29.** Enantioselective photocatalytic [3+2] cycloadditions of aryl cyclopropyl ketones, and strategies for developing selective photocycloadditions through dual catalysis. E.M. Sherbrook, T.P. Yoon, A. Amador

**10:20 ORGN 30.** Enantioselective Tsuji allylation of enol acetates. J. Liu, S. Mishra, A. Aponick

**10:40 ORGN 31.** Total synthesis of (–)-martinellic acid enabled by enantioselective copper catalyzed quinoline alkylation. M. Pappoppula, F.S. Cardoso, B.O. Garrett, A. Aponick

**11:00 ORGN 32.** New strategy for the first organocatalytic asymmetric  $\gamma$ -selective functionalization of cyclic enones: [4+2] cycloaddition/retro-Mannich reaction. Z. Chungheng, Y. Jinxing

### Section E

Moscone Center  
3007

**Metal-Mediated Reactions & Syntheses**

R. D. Broene, *Organizer*

O. Reiser, *Presiding*

**8:00 ORGN 33.** One-pot palladium-catalyzed synthesis of sulfonyl fluorides from aryl bromides. A.T. Davies, J. Curto, S.W. Bagley, M.C. Willis

**8:20 ORGN 34.** Rhodium(III)-catalyzed C–H functionalization of 1-(2*H*)-phthalazinones at C8. M. Huestis

**8:40 ORGN 35.** Development of new tools for the functionalization of cubane. S.S. Bernhard, S.L. Plunkett, M.O. Senge

**9:00 ORGN 36.** Cooperative palladium and copper catalyzed hydroarylation of alkenes: A new approach to  $sp^2$ - $sp^3$  cross coupling. S.D. Friis, M.T. Pirnot, S.L. Buchwald

**9:20 ORGN 37.** Solving a solved problem: The Chan-Evans-Lam amination. A.J. Watson

**9:40 ORGN 38.** Extending the Chan-Lam coupling reaction scope via cooperative photoredox and copper catalysis. A.J. Wommack, J. Marshall

**10:00 ORGN 39.** Development of functionalized primary alkyboronic derivatives for the Chan-Lam couplings of anilines. T.E. Cole, I. Han, E. Torres, G. Elliott, A. Klein

**10:20 ORGN 40.** Catalytic aerobic oxidation of alcohols catalyzed by cerium complexes supported by a pentadentate Schiff-base ligand. S. Shirase, H. Tsurugi, K. Mashima

**10:40 ORGN 41.** Double active template synthesis for functional rotaxane synthesis. J. Weiss, J.A. Wytko, T. Hayashi, Y. Miyazaki

**11:00 ORGN 42.** Visible-light mediated synthesis of aryl alkyl ketones. S. Roslin, L. Odell

**11:20 ORGN 43.** Shining light on copper: Unique opportunities for visible-light-mediated photoredox catalysis. T. Rawner, S.K. Pagire, C. Lankes, O. Reiser

**11:40 ORGN 44.** Temporary dearomatization as tool for a formal  $S_{\text{N}}\text{Ar}$  on pyridines with silicon electrophiles. S. Wübbolt, M. Oestreich

### Section F

Moscone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer*

D. A. Nagib, *Presiding*

**8:00 ORGN 45.** Thermal intermolecular [3+2] cycloaddition reactions of 4-phthalimido-*N*-sulfonyltriazaoles and substituted arenes. S.M. Wilkerson-Hill, H.M. Davies

**8:20 ORGN 46.** C–H xanthylation: A synthetic platform for alkane functionalization. W. Czaplowski, C.G. Na, E.J. Alexanian

‡ Cooperative Cosponsorship

**8:40 ORGN 47.** *p*-Halogenations made easy. E. Jalali, K. Dudley, B. Fouzia, Q. Nguyen, J. Bailey, D. Slocum

**9:00 ORGN 48.** Application of alkylquinone tautomerization to the total synthesis of Calothrixin B. L.M. Mori Quiroz, M. Dekarske, M.D. Cliff

**9:20 ORGN 49.** Metal-free intermolecular aminoarylation of alkynes. P. Rabet, S. Boyd, M. Greaney

**9:40 ORGN 50.** Para-selective halogenation and oxygenation of arenes. S.C. Fosu, C.M. Hambira, D.A. Nagib

**10:00 ORGN 51.** Withdrawn.

**10:20 ORGN 52.** Polarity-reversed carbonyl reactivity via an anomeric activation strategy. D.A. Nagib

**10:40 ORGN 53.** Synthesis and study of 1,3-disiloxanediols with applications for hydrogen-bonding and anion-binding catalysis. K. Diemoz, A. Kelly, A.K. Franz

**11:00 ORGN 54.** New strategies for aromatic substitution; the development of  $S_NAr$  catalysis. J.D. Weaver, S. Senaweera

**11:20 ORGN 55.** Broad spectrum enolate equivalent for catalytic chemo-, diastereo-, and enantioselective addition to *N*-*boc* imines. C. Hung, B.M. Trost

**11:40 ORGN 56.** Glycerol: A C3 bio-based platform chemical for alternative technologies. C. Len

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy**

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

**SUNDAY AFTERNOON**

**Section A**

Moscone Center  
3018/3022

**Herbert C. Brown Award for Creative Research in Synthetic Methods: Symposium in honor of Bruce H. Lipshutz**

Financially supported by Aldrich (Millipore Sigma), ACS Green Chemistry Institute

D. M. Huryn, *Organizer, Presiding*

**1:10** Introductory Remarks.

**1:15 ORGN 57.** Ligand-accelerated C–H activation: From fundamentals to applications. J. Yu

**1:55 ORGN 58.** New enzymes for green chemistry. F.H. Arnold

**2:35 ORGN 59.** Photoredox/nickel dual catalytic cross-coupling and related processes. G.A. Molander

**3:15 ORGN 60.** Understanding the reduction mechanism Pd(II) to L<sub>n</sub>Pd(0) (*n* = 1 and 2) catalysts for organic synthesis. T. Colacot

**3:55** Introduction of Awardee.

**4:00 ORGN 61. Award Address** (Herbert C. Brown Award for Creative Research in Synthetic Methods sponsored by the Purdue Borane Research Fund & the Herbert C. Brown Award Endowment). Betting on nature: Making the switch to environmentally responsible synthetic organic chemistry in water. B.H. Lipshutz

**Section C**

Moscone Center  
3011

**Biologically-Related Molecules & Processes**

R. D. Broene, *Organizer*

A. R. Narayan, *Presiding*

**1:30 ORGN 62.** High-throughput evaluation of small-molecule catalyst libraries: Development of an amphiphilic, DNA-encoded reaction discovery platform. K.D. Hook, R. Hill

**1:50 ORGN 63.** Rearrangement chemistry of aryl and heteroaryl sulfonamides. W. Martin, R.D. Bowen, R. Gallagher, A. Saïdykhan

**2:10 ORGN 64.** Molecular approaches to photocontrol of biological singlet dioxygen. Y. You

**2:30 ORGN 65.** Selective functionalisation and diversification of halogenated compounds through mild aqueous cross-coupling methodologies: From organic molecules to natural products. C. Pubill-Ulldemolins, M. J. Corr, S. V. Sharma, E. Marelli, R. Goss

**2:50 ORGN 66.** Exploration of advance synthetic processes for generating heterocyclic scaffolds: Synthetic scope and mechanistic insight. S. Sharma, D.M. Sawant, R.T. Pardasani

**3:10 ORGN 67.** Progress towards an anti-inflammatory based on the aurone scaffold. Z.E. Taylor, J.K. Noe, G. Flowers, H. Park, A.L. Farone, S.T. Handy

**3:30 ORGN 68.** Pd-catalyzed arylation of cyclic and spirocyclic diamines under aerobic conditions. S.W. Reilly, R.H. Mach

**3:50 ORGN 69.** Construction of a new eighteen-membered core structure for simplified and stabilized zampanolide mimics. Q. Chen, R. Wang, G. Chen, X. Zhang

**4:10 ORGN 70.** Privileged diversity oriented organic synthesis: Modular one-step route for the synthesis of novel compound collections for phytotypic screening. T.H. Altel, R. Ralph Mazitschek

**4:30 ORGN 71.** Leveraging biosynthetic enzymes for complex molecule synthesis. A.R. Narayan

**Section D**

Moscone Center  
3009

**Asymmetric Reactions & Syntheses**

R. D. Broene, *Organizer*

M. Harmata, *Presiding*

**1:00 ORGN 72.** New catalytic, asymmetric (4+3)-cycloaddition reaction. M. Topinka, K. Zawatzky, C.J. Welch, M. Harmata

**1:20 ORGN 73.** Asymmetric synthesis of Rauhut-Currier type products by a regioselective Mukaiyama reaction under bifunctional catalysis. M. Frías Rodríguez, R. Mas-Balleste, S. Arias, C. Alvarado, J.J. Alemán

**1:40 ORGN 74.** Enantioselective allylic C–H oxidation of terminal olefins to isochromans by palladium(II)/chiral sulfoxide catalysis. W. Liu, S.E. Ammann, M. White

**2:00 ORGN 75.** Ligand-accelerated enantioselective methylene C(sp<sup>3</sup>)–H bond activation. G. Chen

**2:20 ORGN 76.** Global collaborations in asymmetric synthesis to catalyze discovery and development. M. Chorghade

**3:00 ORGN 77.** Process development for β<sub>2</sub> adrenergic receptor agonist moiety via ruthenium-catalyzed asymmetric reduction. M. Komiyama, T. Itoh, Y. Sato, M. Tabe

**3:20 ORGN 78.** Highly efficient and enantioselective synthesis of deoxypropanates and isoprenoids. M. Komiyama, S. Xu, H. Li, E. Negishi

**3:40 ORGN 79.** Chiral dinuclear rhodium(III) complexes as catalyst precursors for asymmetric hydrogenation of simple olefins. K. Higashihara, K. Higashida, H. Nagae, K. Mashima

**4:00 ORGN 80.** Brønsted-acids in template mediated asymmetric synthesis: Mechanistic understanding of azomethine imine cycloaddition reactions. H. Subramanian, M.P. Sibi

**Section E**

Moscone Center  
3007

**Metal-Mediated Reactions & Syntheses**

R. D. Broene, *Organizer*

T. W. Funk, *Presiding*

**1:00 ORGN 81.** Ruthenium(II)-catalyzed C–H activation. L. Ackermann

**1:20 ORGN 82.** Ruthenium catalyzed ortho-C–H halogenation: Switching the chemoselectivity of iodine monochloride by catalyst choice. D. Bunting, C.J. Teskey, M. Greaney

**1:40 ORGN 83.** Development of heterogeneous and homogeneous catalysts for directed C–H halogenation reactions: Implications in late stage functionalization. M.J. Johansson, B. Martin-Matute, X. Zou, E. Erbing, V. Pascanu, F. Carson, J. Malmberg, A. Sanz-Marco, A. Vázquez-Romero, J. Su

**2:00 ORGN 84.** Development of a highly diastereoselective α-arylation of cyclobutyl nitriles. M.E. Dalziel, P. Chen, D.E. Carrera, H. Zhang, F. Gosselin

**2:20 ORGN 85.** Synthesis of indolines by enantioselective C–H insertion reactions of donor-donor metal carbenoids. R. Squitieri, C.N. Penrod, J.T. Shaw

**2:40 ORGN 86.** Sustainable approaches to C–H functionalization processes. F. Ferlin, S. Santoro, L. Ackermann, L. Vaccaro

**3:00 ORGN 87.** Rhodium-catalyzed enantioselective silylation of aryl C–H bonds: Synthetic and mechanistic studies. T. Lee, J.F. Hartwig

**3:20 ORGN 88.** Multicomponent coupling reactions on a zirconocene template. J. Stec, R.J. Whitty

**3:40 ORGN 89.** Palladium-catalyzed processes involving olefin insertion, enolate coupling and radical alkylation. J. Zhou

**4:00 ORGN 90.** Gold-catalyzed domino aminative homodimerization of ortho-alkynylbenzaldehydes providing tetracyclic 1,2-dihydronaphthalene derivatives. A. Ruch, L.M. Slaughter, F. Kong, V. Nesterov

**4:20 ORGN 91.** Reaction kinetics of (3,4-diphenylcyclopentadienone)iron carbonyl-catalyzed alcohol oxidations and carbonyl reductions. T.W. Funk

**Section F**

Moscone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer*

H. A. Lindsay, *Presiding*

**1:00 ORGN 92.** Modular *cul*-proline catalyzed one-pot route for the rapid access of privileged small and medium ring systems. T.H. Altel, V. Srinivasulu

**1:20 ORGN 93.** Orthogonal dual-click diyne for CuAAC and/or SPAAC couplings. R.R. Ramsuhag, G.B. Dudley

**1:40 ORGN 94.** Ligand-controlled silylation and reduction of aryl ammonium salts using nickel *N*-heterocyclic carbene catalysis. A.W. Rand, J. Montgomery

**2:00 ORGN 95.** Development of an interrupted carbonyl-olefin metathesis reaction. R. Watson, J. Ludwig, D. Nasrallah, J. Gianino, C. Schindler

**2:20 ORGN 96.** Halotrimethylsilane-nitrate salts: An efficient reagent system for versatile synthetic applications. T. Mathew, S. Roshandel, L. Gurung, G. Prakash, G. Olah

**2:40 ORGN 97.** One step beyond: Diversifying cycloisomerization products through new reactions. A. Pathak, M.W. Pecuh, J. Saha

**3:00 ORGN 98.** Solvent compatibility with acridinium labels: Cyrene evaluation. J. Grote

**3:20 ORGN 99.** Diazepane carboxylates as organocatalysts: The first organocatalytic Cope rearrangement and application to the Diels-Alder and polyene cyclizations. J. Gleason, D. Kaldre, N. Haggman, F. Larnaud, S. Plamondon

**3:40 ORGN 100.** Microwave-promoted iminyl radical fragmentations: A practical and efficient method of functionalization. M. Jackman, S. Im, S.R. Bohman, A.L. Garrity, S.L. Castle

**4:00 ORGN 101.** Piperidines via a microwave-assisted aza-Prins reaction. H.A. Lindsay, A. Green, A. Havens

**4:20 ORGN 102.** Research progress on interrupted pummerer cyclization. X. Li, R.G. Carter

**4:40 ORGN 103.** One-pot tandem Diels-Alder/Nazarov cyclization to generate advanced tricyclic intermediates. R.A. Carmichael, P. Soplanpanichkul, W. Chalifoux

**Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal**

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>3</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>4</sup>, POLY, PRES<sup>5</sup> and WCC

**SUNDAY EVENING**

**Section A**

Moscone Center  
West Hall

**Asymmetric Reactions & Syntheses**

S. M. Silverman, *Organizer*

5:30 - 7:30

ORGN 104. Phosphothreonine as a catalytic residue in peptide-catalyzed asymmetric transfer hydrogenations. C.R. Shugrue, R.M. Lackner, S.J. Miller

ORGN 105. Synthesis of polypropionate building blocks for complex natural products. D. Galler, M. Calder

ORGN 106. Camphor-derived 1,3-diamine bifunctional organocatalysts. S. Ricko, J. Svete, B. Štefane, U. Grošelj

ORGN 107. Synthesis and DNA binding studies of azinomycin chromophore analogues. S. Pacheco, A. Nazarian

ORGN 108. Asymmetric organocatalytic Michael additions of methyl thioglycolate to various acceptors. D. Tözendimir, C. Tanyeli

ORGN 109. Bioinspired organocatalytic decarboxylative aldol reaction of aldehydes and ketones: Formal synthesis of chiral fluralaner. J. Sim, H. Bae, C. Song

ORGN 110. Benzyloisobornyl derivatives as chiral auxiliaries and chiral organocatalysts. M.K. Kennedy, P.J. Hartfield, A.J. Dahl, D.E. Lewis

ORGN 111. Synthesis of aldehyde substrates for an organocatalyzed enantioselective  $\beta$ -alkylation reaction. M.E. Akana, S. Konda, J.C. Zhao

ORGN 112. Separate ways: Efforts to resolve planar chiral [13]-macrolactones. J. Lawrence, M.W. Peczuł

ORGN 113. Transition state analogues as mechanistic probes for asymmetric desymmetrization by cinchona alkaloid-based catalysts. E. Emmings, G.E. Hofmeister, D.G. Alberg

ORGN 114. Synthesis and characterization of fluorinated curcumin-pyrazoline derivatives. C. Kannigadu, N. Koorbanally

ORGN 115. Enantioselective synthesis of indenyls via chiral Brønsted acid catalyzed Nazarov-type cyclization of  $\beta$ -amino-1,4-enynols. J. Jin, Y. Zhao, P.W. Chan

ORGN 116. Chemo- and stereodivergent synthesis of piperidine derivatives catalyzed by modularly designed organocatalysts. N.K. Rana, J.C. Zhao

ORGN 117. New quinine-based squaramide catalyst and its evaluation in the asymmetric aza-Friedel-Crafts reactions of isatin-derived ketimines. S. Karahan

ORGN 118. Regio-, diastereo-, and enantioselective borylative dearomatization of indoles using copper(I) catalysis. K. Hayama, K. Kubota, H. Iwamoto, H. Ito

ORGN 119. Enantioselective organocatalytic synthesis of cyclohexenone and 4*H*-pyran derivatives: A divergent approach. X. Ding, N. Heberer, B. Borhan

ORGN 120. Synthesis and application of amino-acid condensed  $\delta$ -lactams. I. Jahan, M.E. Taylor, G.A. Kraus, A.E. Russell, M.O. Abdalla

ORGN 121. Asymmetric synthesis of  $\gamma$ -lactones and related chiral building blocks through reaction of enediolates with vinyl onium salts. S. Kaster, N. Peraino, N. Kerrigan

ORGN 122. Synthesis of 1,2,4-dioxazinanes via aza-Michael desymmetrization. T.R. Vavrek, R. Marfatia, M. Abdel, H. Sharma, J. Fedor, D.M. Rubush

ORGN 123. Enantioselective oxoallyl cation catalysis: A theoretical study. C. He, K.N. Houk

ORGN 124. Organic/metallic catalytic system for the asymmetric reactions of disubstituted ketenes. D. Paull, E. Barth

ORGN 125. Enantioselective organocatalysis: Synthesis and NMR studies of transition state analogues. C. Leahy, D.G. Alberg, G.E. Hofmeister

ORGN 126. Effect of acid concentration on the dynamic kinetic resolution in the cyclocondensation synthesis of  $\beta$ -alkyl-5,5-bicyclic lactams. P.T. Buonora, D. Nguyen

ORGN 127. Working with challenging substrates in catalytic enantioselective reactions: Understanding cooperative modes of activation in template-based catalytic reactions. H. Subramanian, M.P. Sibi

ORGN 128. Synthesis of bivalent organothiophosphates and their inhibition of butyrylcholinesterase: A potential therapeutic for Alzheimer's disease. A. Tahira

ORGN 129. Development and tandem EPR study of an asymmetric Cu(II)-catalyzed spiroannulation. B. Armstrong, R.I. Saylor, B. Shupe, J.P. MacDonald, R. Britt, A.K. Franz

ORGN 130. Withdrawn.

ORGN 131. Enantioselective Friedel-Crafts reaction of indoles and pyrroles using a cation-binding catalyst. M. Kim, L. Xue, Y. Liu, S. Paladhi, S. Park, H. Yan, C. Song

**Section B**

Moscone Center  
West Hall

**New Reactions & Methodology**

S. M. Silverman, *Organizer*

5:30 - 7:30

ORGN 132. Chiral diaziridines for the synthesis of five-membered ring nitrogen-containing heterocycles. J. Lizza, G. Moura-Letts

ORGN 133. Withdrawn.

ORGN 134. Synthesis of (Z)-2-((tert-butyl(dimethylsilyl)oxy)-3-(phenylthio)acrylaldehyde. M. Topinka, M. Harmata

ORGN 135. (4+3)-Cycloaddition reactions of oxidopyridinium species. C. Fu, N. Lora, P.L. Kirchoefer, D.R. Lee, E. Altenhofer, C. Barnes, M. Harmata

ORGN 136. Investigation of transannular epoxide-opening toward bioactive pyrrolizidine alkaloids. C. Williams, B. Schafer, B. Wesley, A. Kaplan, E.E. Cleary, K.E. Allen, A. Betrus, M.M. Majireck

ORGN 137. Synthesis of *N*-(1-alkoxyvinyl)pyridinium salts and preliminary investigation of their utility in organic synthesis. J. Shapiro, J. Sonberg, H. Ferris, C. Williams, C. Kriley, E.W. Reinheimer, M.M. Majireck

ORGN 138. Preparation, structure and reactivity of pseudocyclic benziodoxole tosylate reagents. M. Shea, M. Liebl, S. Klasen, K. Nguyen, G. Rohde, A. Yoshimura, A. Saito, V. Nemykin, V.V. Zhdankin

ORGN 139. Metal-free imination of sulfides using tosyliminoiodane reagent. C. Makitalo, J. Fuchs, A. Yoshimura, A. Saito, V.V. Zhdankin

ORGN 140. Assigning the absolute configuration of amines using the competing enantioselective conversion method. A. Burtea

ORGN 141. Stereospecific nickel-catalyzed cross-coupling reactions of benzylic ethers: Investigation of ring-opening reactions and active catalyst identity. D. Dawson, E.R. Jarvo, E. Tollefson, C. Osborne

ORGN 142. Withdrawn.

ORGN 143. ipso-Bromination/iodination of arylboronic acids: Application of poly(4-vinylpyridine)-bromine/iodine complex as efficient reagent. F. Fu, L. Gurning, M. Czaun, T. Mathew, S.G. Prakash, G. Olah

ORGN 144. Halogenation and ipso-nitration of cinnamic acids: Halotrimethylsilane-nitrate, an efficient reagent system. S. Roshandel, L. Gurning, T. Mathew, G. Prakash, G. Olah

ORGN 145. Four-fold alkyne benzylation to afford chiral peropyrenes. K.M. Magiera, W. Yang, W. Chalifoux

ORGN 146. Efficient synthesis of bicyclo[4.4.0]decenes by tandem Diels-Alder of activated alkynes. J.A. Horton, A.M. O'Loughlin, W. Chalifoux

ORGN 147. Tandem diels-alder/Nazarov cyclization of  $\beta$ -silyl-substituted aryl ynones. R.A. Carmichael, P. Sophanpanichkul, W. Chalifoux

ORGN 148. Studies towards the iron(II)-promoted stereoselective haloamination of alkenes. N. Chang, B. Selover, L. Mir, G. Moura-Letts

ORGN 149. Intramolecular dipolar cycloadditions of enediaziridines. G. Haun, D. Almond, G. Moura-Letts

ORGN 150. Potassium phosphate-catalyzed one-pot synthesis of 3-aryl-2-oxazolidinones from epoxides, amines, and atmospheric carbon dioxide. Y.K. Chung, U. Seo

ORGN 151. Organocatalytic activation of isocyanides: *N*-heterocyclic carbene-catalyzed enaminone synthesis. J. Kim, S. Hong

ORGN 152. Development of CLAmP: Rational design of a carbonyl dication synthon that facilitates the one-pot synthesis of unsymmetrical ketones. S. Heller, J.N. Newton, T. Fu, R. Sarpong

ORGN 153. Transition-metal-free regioselective alkylation of heterocyclic *N*-oxides using 1,1-diborylalkanes as alkylating reagents. S. Cho

ORGN 154. Selective  $\alpha$ -oxo C(sp<sup>3</sup>)-H thioesterification of ether. B. Kang, S. Hong

ORGN 155. Photoredox/nickel dual-catalysis-enabled cross-coupling of sulfonamides and aryl halides. T. Kim, E.B. Corcoran, D.W. MacMillan

ORGN 156. Improved synthesis of lamivudine and emtricitabine. D. Mandala

ORGN 157. Withdrawn.

ORGN 158. Formylthioester: Highly chemoselective formylating reagent in palladium-catalyzed cross-coupling reaction of organozincs. R. Haraguchi, S. Tanazawa, S. Fukuzawa

ORGN 159. Novel, sustainable catalyst activation: Electrochemical reduction of titanocene dichloride and applications. T. Olyschlaeger, A. Gansäuer

ORGN 160. Selective monooxidation of symmetric dialdehydes in aqueous solvent. P. Kattanguru, R. Ogawa, S. Niwayama

ORGN 161. Biocatalytic reduction of ketones and imines using *Daucus carota* root. A. Bogetti, R. Kroeher Sachs

ORGN 162. Trichloroisocyanuric Acid (TCCA) as a reagent for chlorolactonization and chlorocyclization. S. Jana, I. Hackett, V. Dragojlovic

ORGN 163. Regioselective construction of N<sup>2</sup>-acyl-C<sup>2</sup>-aryl-aminoimidazoles. E. Kirkeby, J. Salvant, K. Guillen, R. Looper

ORGN 164. Epoxide approach towards the synthesis of (-)-dolabriferol and (-)-dolabriferol B. K. Morales, J.A. Prieto

ORGN 165. Palladium catalyzed homo coupling reactions with in situ formed organolithium reagents, and its application in the total synthesis of Mastigophorene A. D. Heijnen, J. Buter, V. Hornillos, C. Vila, A. Minnaard, B. Feringa

ORGN 166. Formal [2+2+2] photoredox synthesis of naphthalene derivatives using aniline as traceless directing group. Q. Wang, N. Zheng

ORGN 167. Construction of an azasteroid library. M. Charaschanya, J. Aube

ORGN 168. Reductive ketyl radical cyclizations towards the total synthesis of the plakortone family of natural products. N. Foy, J. Cannon

ORGN 169. Development of an auxiliary-directed enolate alkylation for unnatural amino acid synthesis. N. Dwulet, J. Cannon

ORGN 170. Pd-catalyzed difunctionalization of unactivated olefins by tandem Heck coupling/enolate cyclization. R.K. Dhungana, B. Shrestha, R. Thapa Magar, R. Giri

ORGN 171. Tetraphenylphosphonium tetrafluoroborate/1,1,1,3,3,3-hexafluoroisopropanol (Ph<sub>4</sub>PBF<sub>4</sub>/HFIP) effecting epoxide-initiated cation-olefin polycyclizations. Y. Tian, J. Qu

ORGN 172. Halogen bonding induced Friedel-Craft-type alkylation of thiophenes with  $\alpha,\beta$ -unsaturated carbonyl compounds. Y. Ge, W. He, C. Tan

ORGN 173. Arenophile-mediated dearomative reductions. M. Okumura, S.M. Nakamata Huynh, J. Pospech, D. Sarlah

ORGN 174. Anodic coupling of imine with nitrile: Transition-metal-free synthesis of quinazoline derivatives. H. Hung, Y. Huang

ORGN 175. Experimental methodology of C-amination at the C-4 position of triacetic acid lactone. M.E. Taylor, G.A. Kraus, U.K. Wanninayake, Y. Qu

ORGN 176. Dehydrogenative N-formylation and N-methylation of amines catalyzed by ruthenium pincer complex. G. Choi, S. Kim, S. Hong

ORGN 177. Investigation of the Lewis-base catalyzed TMSCF<sub>3</sub> additions to 2-halogenated carbonyles. N. Heth, S. Rouleau, T.A. Davis

<sup>‡</sup>Cooperative Cosponsorship

ORGN **178.** Palladium catalyzed electrophilic fluorination of aryl oxazolines via C-H activation. **D. Gutierrez**

ORGN **179.** Synthesis of hemilabile *N,P* ligands with one, two or three chiral centers. **J. Kukowski, I.P. Smoliakova**

ORGN **180.** New approaches to the chemical synthesis of ketones from organoboranes by using chlorochromate reagent. **E.J. Parish, G. Ren, Y. Lo, H. Honda, M. Hsiao, T. Wei**

ORGN **181.** Exploring the photochemistry of carbonyl-decorated carbenes: *N,N'*-diamidocarbenes (DACs). **T.A. Perera, T.W. Hudnall**

ORGN **182.** Novel application of new synthetic reagents for the oxidation of activated methylene groups for allylic oxidation. **G. Ren, E.J. Parish, Y. Lo, H. Honda**

ORGN **183.** Lewis acid catalyzed 1,4-addition of nucleophiles to  $\alpha$ ,  $\beta$ -unsaturated ketones. **T.J. Rauwolf, R.S. Mohan**

ORGN **184.** Metal-free synthesis of 1,3-dioxanediols and methods toward chiral variants for asymmetric catalysis. **A. Kelly**

ORGN **185.** One-pot tandem oxidative dearomatization/[4+3] cycloaddition: Masked *o*-benzoquinone with diaza-oxyallyl cation. **K. Lee, H. Hsieh**

ORGN **186.** Novel counterion for soluble anhydrous fluoride. **B. Wang, E. Linstad, H. Sun, S.G. DiMugno**

ORGN **187.** Synthesis of annulated  $\alpha$ -carbonyls via metal-catalyzed cyclizations involving cyanamides. **S. Wrenn, S.P. Mulcahy**

ORGN **188.** Practical stereocontrolled synthesis of vicinal halohydrins and haloamines from vinyl epoxides and vinyl aziridines. **L. Weselinski, M.J. Grillo, M. Tanasova**

ORGN **189.** Development of new synthetic methodologies utilizing the decomposition products of alkyl triazabutadienes. **D. Knyazeva, J.C. Jewett**

ORGN **190.** Modifications and mechanistic determination of the Ley-Griffith oxidation of alcohols. **P.W. Moore, Y. Jiao, T. Zerk, C. Read, P. Mirzayans, L. Ng Qi Sheng, J. Hooker, P. Bernhardt, C. Williams**

ORGN **191.** Mechanistic insight into the synthesis of  $\beta$ -lactones via isothiourea-catalyzed enantioselective formal [2+2] cycloaddition. **D. Barrios Antúnez, A.D. Smith**

ORGN **192.** Green protocol for the preparation of silyl enol ethers and their application in the synthesis of fine chemicals. **D. Lanari, M. Curini, C. Morozzi**

ORGN **193.** Five-membered ring closure via intramolecular nucleophilic attack by nitrogen ylides on C=C bond of cyclopropenes. **C. Barrett, M.A. Rubin**

ORGN **194.** Why LogD matters to the synthetic organic chemist: How lipophilicity and pKa interact to affect success or failure in acid-base separations of amine mixtures. **D.J. O'Mahony, R.J. Johnson, C. Francavilla**

ORGN **195.** Studies on the alkylation of phenolate in an organofluorine solvent. **M. Kim, M. Ryu, Y. Son, Y. Choi, J. Jung**

ORGN **196.** Synthesis and reactivity of trifluoromethyl iodonium salts: Mechanistic and synthetic significance. **A.V. Samant, J.N. Brantley, D. Toste**

ORGN **197.** New microwave-promoted transformation of iminyl radicals. **S. Im, M. Jackman, S.R. Bohman, A.L. Garrity, S.L. Castle**

ORGN **198.** Tailoring a chalcone synthesis for use with deuterated starting materials. **C.A. Gehman, C. Hamann**

ORGN **199.** Discovery of a novel synthetic method to form binaphthyltetraone compounds. **V. Jha, C. Stevens, E. Stevens, J. Sridhar**

ORGN **200.** New strategy for the preparation of 3, 4-hydroxypyridinone (HOPO) siderophores using selective *N*-alkylation of 3-benzyloxy-2-methyl-4-pyridinone. **D. Favela, A.S. Gopalan, H.K. Jacobs**

ORGN **201.** Exploration of dihydrofuro-isoxazolines based on Intramolecular Silyl Nitronate Cycloadditions (ISNC) as branch points for novel isoxazoline compounds. **J.L. Duffy-Matzner, K.G. Stevens**

ORGN **202.** Post-synthetic modification of drug candidates via C-H functionalization. **S.C. Fosu, C.M. Hambira, D.A. Nagib, J. Fuchs**

ORGN **203.** Polarity-reversed radical cascade for the functionalization of heteroarenes. **J. Lear, D.A. Nagib**

ORGN **204.** Nucleophilic, radical, and electrophilic trifluoromethylation reagents from fluorofrom. **J.B. Geri, N.K. Szymczak**

ORGN **205.** Simple, stereospecific method for inversion of alcohols. **C. Paquin, D.W. Boerth**

ORGN **206.** Developing a path to chiral aziridines through asymmetric copper hydride reduction. **R. Turro, J. Unger**

ORGN **207.** Direct, regioselective *N*-alkylation of 1,3-azoles. **R. Graceffa**

ORGN **208.** Triiodide-mediated  $\delta$  C-H amination of amines and alcohols. **E. Wappes, K. Nakafuku, S.C. Fosu, D.A. Nagib**

ORGN **209.** Transition-metal-free decarboxylative amidation and their intramolecular cyclization for the synthesis of *N*-heterocycles and its application to the preparation of marketed drug, sildenafil. **K.V. Patel, K. Tummalapalli, N. Dayal, J. Laha**

ORGN **210.** Alkylation of heterocycles through a photoredox catalytic reductive decarboxylation. **E.J. McClain, A. Sun, J.W. Beatty, C. Stephenson**

ORGN **211.** Unusual ring-expansion reaction to prepare 9-Nitro-5H-spiro[benzo[b]tetrazolo[1,5-d]oxazepine-4,2'-oxirane]. **R.S. Kolluri**

ORGN **212.** Redox-active esters in Ni-catalyzed cross-coupling reactions. **J.T. Edwards, J. Cornella, T. Qin, J. Wang, R. Merchant, K.S. McClymont, K.W. Knouse, C. Li, L. Malins, S. Kawamura, C. Pan, L. Wimmer, T. Chen, A. Novak, J.Z. Zhong, R. Mills, R. Gianatassio, M. Schmidt, C. Yuan, B. Maxwell, B. Vokits, S.A. Shaw, M.D. Eastgate, P.S. Baran**

ORGN **213.** Alkaloid-like substructures via photoredox catalysis: Synthesis of 1-aminonorbornanes. **T.M. Sodano, D. Staveness, C. Stephenson**

ORGN **214.** Regioselective benzosultam formation via silver-catalyzed nitrene insertion. **B. Sheffer, R.J. Scamp, J.M. Schomaker**

ORGN **215.** Lewis and Brønsted acid-catalyzed allylsilane oligomerization. **B. Wigman, A.K. Franz, B. Armstrong**

ORGN **216.** Synthetic utility of boracarboxylated styrene derivatives. **T. Perrone, T.W. Butcher, S. Knowlden, E.J. McClain, B.V. Popp**

ORGN **217.** Lanthanum(III)-catalyzed three-component reaction of coumarin-3-carboxylates for the synthesis of indolylmalonamides and analysis of their photophysical properties. **J. Jennings, C.P. Bhatt, B.I. Gomez, A. Nguyen, A.K. Franz**

ORGN **218.** 3-Methylene-2,4-chromandione *in situ* trapping. **F. Popowycz, M. Boulven, A. Montagut-Romans**

ORGN **219.** Synthesis of nitro, amino, nitro/OR, and amino/OR substituted distyrylbenzene and polyphenylene vinylene. **A.I. Torres Burgueno**

ORGN **220.** Development of new methodologies for GSK medicinal chemistry projects. **E. Talbot, R. Griffiths, J. Spencer, R.P. Law, S. Ukuser, C. Jamieson, G.A. Burley**

Section C

Moscone Center  
West Hall

Metal-Mediated Reactions & Syntheses

S. M. Silverman, Organizer

5:30 - 7:30

ORGN **221.** Improvement in cross-coupling reactions by heterobimetallic nickel catalysis. **H. Nazari**

ORGN **222.** Nickel-catalyzed asymmetric reductive cross-couplings with vinyl bromide electrophiles. **J. Hofstra, N. Suzuki, K. Poremba, S.E. Reisman**

ORGN **223.** Nickel-catalyzed direct arylation of oxazoles: Benchmarking the influence of electronic, steric and leaving group variations in the phenolic electrophiles. **D. Steinberg, M.C. Turk, D. Kalyani**

ORGN **224.** Nickel-catalyzed cross-coupling of aromatic nitriles and azoles. **M.G. Hanson, N. Olson, G. Wilson, D. Kalyani**

ORGN **225.** Optimization of a palladium-catalyzed C-N coupling towards the robust synthesis of a RORC ligand. **D. Lao, L.E. Sirois, R. Angelaud, J. Xu, F. Gosselin**

ORGN **226.** Palladium-catalyzed ortho-arylation of benzamides using a removable directing group. **Y. Shen, W. Lee, D.A. Gutierrez, J.J. Li**

ORGN **227.** Palladium catalyzed direct arylation of nitroarenes using tosylates and mesylates. **Y. Aschenaki, A. Schnaith, S. Davick, Z. Yi, R. Wander, R. Daley, D. Kalyani**

ORGN **228.** Palladium-catalyzed reactions of fluoroalkenes. **R. Thornbury, D. Toste**

ORGN **229.** Pd mediated selective functionalization and diversification of biologically relevant halogenated molecules through mild cross-coupling methodologies in water. **C. Pubill-Ulledemolins, S. V. Sharma, M. J. Corr, E. Marelli, R. Goss**

ORGN **230.** Pd<sup>2+</sup> detection in water-based Suzuki-Miyaura coupling reaction using colorimetry with squaraine dyes. **K. Novosad, D. Janzen, R.S. Majerle**

ORGN **231.** Transmetalation of alkylzirconocenes: Copper-catalyzed alkyl-alkynyl cross-coupling with bromoalkynes. **K. Indukuri, O. Riant**

ORGN **232.** Late stage copper-mediated fluorination with PET imaging applications. **K.J. Makaravage, A.F. Brooks, A. Mossine, M.S. Sanford, P.J. Scott**

ORGN **233.** Activation of disilanes with copper(I)-alkoxides. **R. Van Hoveln, B. McCarty, B. Thomas**

ORGN **234.** Application of copper(I) bisphenanthroline complexes in enantioselective photoredox reactions. **M.R. Jilek, M.R. Hurst, S.A. Souder, K.H. Jensen**

ORGN **235.** Copper-catalyzed synthesis of iminoquinolizines and aminoindolizines. **A.K. Isaacs, B. Ghiano, T. Correia**

ORGN **236.** Stereoselective borolytic radical cyclization with copper(I) catalyst. **H. Iwamoto, S. Akiyama, K. Hayama, H. Ito**

ORGN **237.** Copper-mediated C-H chlorination by trichloroacetamide using a directing group. **W. Lee, Y. Shen, D.A. Gutierrez, J.J. Li**

ORGN **238.** Highly diastereoselective (*Z*)-5-trimethylgermyl-2-alkenones via organoboranes. **N.G. Bhat**

ORGN **239.** New diastereoselective synthesis of (*Z*)-trisubstituted alkenes containing allyl and biphenyl moieties via organoboranes. **N.G. Bhat**

ORGN **240.** Highly diastereoselective (*Z*)-2-ditrimethylgermyl substituted dienes via organoboranes. **N.G. Bhat**

ORGN **241.** New diastereoselective synthesis of (*Z*)-trisubstituted alkenes containing a cyclohexyl and biphenyl moieties via organoboranes. **N.G. Bhat**

ORGN **242.** Synthesis of novel, air- and moisture-stable tris(trimethylsilyl)silyborane reagents for boryl substitution and silylation reaction. **R. Shishido, E. Yamamoto, H. Ito**

ORGN **243.** Rhodium-catalyzed addition-cyclization-rearrangement cascade of alkynylhydrazones. **K. Choi, H. Park, C. Lee**

ORGN **244.** Development of rhodium catalyzed carbon-carbon bond formation to thiochromones and *N*-analogues. **F. Guo, B. Graves, J. Malcolm, S. Graham**

ORGN **245.** Development of Fischer-type carbene-based ruthenium olefin metathesis catalysts. **K. Song, K. Kim, S. Hong**

ORGN **246.** Controlled monoisomerization of 1-alkenes mediated by a 16-electron ruthenium catalyst. **E.R. Paulson, C.E. Moore, A.L. Rheingold, D.B. Grotjahn**

ORGN **247.** Reductive elimination from Au(III). **M. Levin, D. Toste**

ORGN **248.** Enantioselective Au(III) catalysis. **P. Bohan, D. Toste**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

- ORGN **249.** Synthesis of novel NHC-Au(I) complexes with extremely bulky groups. R. Ma, T. Seto, B.W. Gung
- ORGN **250.** Gold and Brønsted acid-catalyzed cycloisomerization of 1,8-diynyl vinyl acetates to bicyclo[2.2.1]hept-2-en-7-ones. X. Chen, D.P. Day, W. Teo, P.W. Chan
- ORGN **251.** Synthesis of  $\beta$ -carboline derivatives via a silver-mediated oxidation of tetrahydro- $\beta$ -carbolines. B. Sierra, S. Durham, J. Tran, M. Gomez, S.C. Eagon
- ORGN **252.** Silver catalyzed 1,3-acyloxy migration/diels-alder reaction of 1,4,9-dienyne esters to partially hydrogenated isoquinolines. Y. Zhao, J. Jin, J. Boyle, B. Lee, P.W. Chan
- ORGN **253.** Transformation of amides into highly functionalized triazolines via Mo(CO)<sub>6</sub> catalyzed reduction. T. Slagbrand, A. Volkov, M.P. Trillo, G. Tinnis, H. Adolfsson
- ORGN **254.** Towards novel cobalt catalyzed C-H activation strategies. k. suppan
- ORGN **255.** Enantioselective additions of allyl indium reagents to aldehydes. A. Beckemeyer
- ORGN **256.** Novel route to arylated fluoroalkyl bromide building blocks through  $\alpha$ -bromo- $\omega$ -silyl disubstituted perfluoroalkanes. P.T. Kaplan, D.A. Vicic
- ORGN **257.** Mechanistic aspects of fluorination reactions with fluoro-benziodoxol reagent. N. Ichenko, M. Hedberg, B.O. Tasch, K.J. Szabo
- ORGN **258.** Substrate scope study of tandem acyl C–O/aryl C–H bond activation. P. Gemmel, C. Anderson, N. Serratore, S.J. Underwood, C.J. Douglas
- ORGN **259.** Lewis acid-mediated, microwave-assisted cycloaddition of allylsilanes with donor-acceptor cyclopropanes. M. Smith, E. Finney
- ORGN **260.** Withdrawn.
- ORGN **261.** Ru-catalyzed selective imine formation from nitriles and secondary alcohols through hydrogen-transfer strategy. D. Kim, B. Kang, S. Hong
- ORGN **262.** Novel application to the allylic oxidation of steroids with pyridinium dichromate and pyridinium chlorochromate. Y. Lo, G. Ren, E.J. Parish, H. Honda, T. Wei
- ORGN **263.** Effects of the anion X in Cp<sub>2</sub>TiX-catalyzed reactions. R. Richrath, A. Gansäuer
- ORGN **264.** Nitrosoarenes as building blocks for nitrogen-functionalized arenes. A. van der Werf, M. Hribersek, N. Selander
- ORGN **265.** Highly active titanocene catalysts for epoxide hydrosilylation: Synthesis, theory, kinetics, EPR spectroscopy. S. Klare, D. Schwarz G. Henriques, K. Zimmer, A. Meyer, E. Rojo-Wiechel, M. Bauer, R. Sure, S. Grimme, O. Schiemann, R.A. Flowers, A. Gansäuer

- ORGN **266.** Transannular Pauson-Khand cyclization reactions of macrocyclic dicobalt hexacarbonyl-alkyne complexes. B. Boon, S. Karabiyikoglu, C.A. Merlic
- ORGN **267.** Directing group assisted remote meta C–H bond functionalization. A. Maji, D. Maili
- ORGN **268.** Titanium-mediated synthesis of substituted cyclobutanes. J.R. Alleyn, J. Bradley, R. Walker, F. Perez, M.R. Gesinski
- ORGN **269.** Dehydrogenative cyclization of o-aminobenzyl alcohols with ketones to quinolines in water catalyzed by a water-soluble [Ir] complex. R. Wang
- ORGN **270.** Synthesis and neoglycosylation with stereo-diverse 2-amino free-reducing sugars. A. Scharnow, J. Lam, V. Huang, I. Rocroi, C.M. Rojas
- ORGN **271.** Synthesis of olefin monomers from renewable, biomass-derived polyols by catalytic deoxydehydration. S.D. Jacob, D. Toste
- ORGN **272.** Synthesis of polyfluorinated biphenyls and polyphenyls with Buchwald phosphine ligand assisted Suzuki-Coupling. D. Bulfield, S. Huber
- ORGN **273.** Expanding the scope of hydrogen borrowing catalysis using cyclopropyl ketones as key structural motifs. W. Akhtar, C. Cheong, J. Frost, N. Stevenson, T.J. Donohoe
- ORGN **274.** Withdrawn.
- ORGN **275.** Chemo- and enantioselective silver-catalyzed aziridinations. M. Ju, J.M. Schomaker

MONDAY MORNING

3014/3016

Computer-Guided Organic Synthesis

Financially supported by Molecular Forecaster

N. Moitessier, J. Pottel, Organizers, Presiding

8:00 Introductory Remarks.

- 8:05 ORGN **282.** Computation of organic reaction pathways involving dispersion and unpaired electrons. M. Kozłowski
- 8:35 ORGN **283.** Virtual screening in asymmetric catalysis. P. Norrby
- 9:05 ORGN **284.** Simulating routine synthetic chemistry from a to z. J. Pottel, N. Moitessier
- 9:35 Intermission.
- 9:55 ORGN **285.** Computer guided organic synthesis. D. Walden, R.G. Carter, A.D. Smith, K. Scheidt, P. Cheong
- 10:25 ORGN **286.** From experiment to calculation and back: A round trip ride on the DFT and DFT/MM train. F. Maseras
- 10:55 ORGN **287.** Density functional theory guided catalyst design for solar generated fuels. T. McCormick, C. Virca
- 11:25 ORGN **288.** Modeling asymmetric organocatalysis. K.N. Houk
- 11:55 Concluding Remarks.

Section C

Moscone Center  
3011

Biologically-Related Molecules & Processes

R. D. Broene, Organizer

D. Bandyopadhyay, Presiding

- 8:20 ORGN **289.** Di-substituted maleamic acid as an ultra acid-sensitive, cleavable linker for reversing the cytotoxicity pH-profile of doxorubicin in small molecule prodrugs. M. An, A. Zhang, L. Yao
- 8:40 ORGN **290.** Water-soluble NIR-absorbing rylene chromophores for biomedical applications. K. Peneva
- 9:00 ORGN **291.** Peridinin is a potent probe for the role of bilayer lipid peroxidation in pathogenesis. A. Hill, H. Haley, M.D. Burke
- 9:20 ORGN **292.** Withdrawn.
- 9:40 ORGN **293.** Imaging with novel catecholamine-selective fluorescent sensors. L. Zhang, X. Liu, K. Gillis, T.E. Glass
- 10:00 ORGN **294.** Synthesis and characterization of dyes for use in biological zinc-ion and reactive oxygen species dual imaging. K. Daykin, L. Zhu
- 10:20 ORGN **295.** Rational design and facile synthesis of highly modular turn-on fluorescent probe. J.V. Jun, D.M. Chenoweth, E.J. Petersson
- 10:40 ORGN **296.** Time-resolved mechanism of SpnF-catalyzed Diels-Alder reaction. Z. Yang, P. Yu, S. Yang, Y. Li, C. Doubleday, K.N. Houk
- 11:00 ORGN **297.** Synthesis of gyramide-bound photoaffinity reagents for DNA gyrase. A.J. Kwong, J.T. Shaw
- 11:20 ORGN **298.** Chemical synthesis of the potent anticancer agent prunastatin A. M. Chojnacka, R.A. Batey

- 11:40 ORGN **299.** 5-Azido-modified pyrimidine nucleosides: Chemistry and biology. Z. Wen, J. Peng, P. Tuttle, Y. Liang, S. Rishi, A. Adhikary, M.D. Sevilla, C. Garcia, Y. Ren, Y. Liu, S.F. Wnuk

Section D

Moscone Center  
3009

Asymmetric Reactions & Syntheses

R. D. Broene, Organizer

Y. Chen, Presiding

- 8:00 ORGN **300.** Stereocontrolled synthesis of polypropionates based on building block assembly strategies by lithiation-borylation methodologies. A. Millan, B. Zhou, V.K. Aggarwal
- 8:20 ORGN **301.** Oxidative aerobic NHC catalysis via multistep electron transfer. h. Sundén, L. Ta, A. Axelsson
- 8:40 ORGN **302.** Chemo-enzymatic syntheses of chiral epoxides, rare sugars and flavors from levoglucosone-derived (S)- $\gamma$ -Hydroxymethyl- $\alpha$ , $\beta$ -Butenolide (HBO). M. Moreaux, G. Bonneau, A. Peru, A. Flourat, A. Teixeira, W. Raverty, B. Greatrex, A. Haudrechy, F. Allais
- 9:00 ORGN **303.** Catalytic asymmetric alkylation of chromenones. L. DeRatt, M. Pappoppala, A. Aponick
- 9:20 ORGN **304.** Enantioselective conjugate alkylation enabled by Me-StackPhos. S. Mishra, J. Liu, A. Aponick
- 9:40 ORGN **305.** Developing a highly efficient, environmentally responsible alternate manufacturing process for montelukast sodium (Singulair®). Y. Chen, G.R. Humphrey, S.W. Krska, J. Qi, L. Tan, T. Itoh, J. Albaneze-Walker, S. Funane, T. Yokozawa, T. Kobayashi
- 10:00 ORGN **306.** Stereo- and enantioselective synthesis of chiral compounds bearing an all-carbon quaternary stereocenter by ZACA reaction. S. Xu, C. Wang, M. Komiyama, Y. Tomonari, Q. Qi, E. Negishi
- 10:20 ORGN **307.** Development of hydrogen-bond donor catalysts for asymmetric C–C bond formation. M. Rombola, V.H. Rawal
- 10:40 ORGN **308.** Withdrawn.
- 11:00 ORGN **309.** Synthesis of enantio-enriched  $\alpha$ -quaternary prolines using a C $\rightarrow$ N $\rightarrow$ C chirality transfer. H. Cho, J. Shin, H. Jeon, S. Lee, S. Kim

Section E

Moscone Center  
3007

Metal-Mediated Reactions & Syntheses

R. D. Broene, Organizer

T. J. Williams, Presiding

- 8:00 ORGN **310.** Tuning the regioselectivity of alkene/alkyne functionalization via a directing group strategy. M.L. O'Duill
- 8:20 ORGN **311.** Investigation of the synergistic cooperation between bimetallic systems. S. Martinez de Salinas Uzuquiza, Á. Mudarra, M. Pérez-Temprano
- 8:40 ORGN **312.** N-Trifluoromethylation of nitrosoarenes. A. van der Werf, M. Hribersek, N. Selander

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

**9:00 ORGN 313.** Investigation of the organo-metallic chemistry of cobalt complexes: An attractive alternative to noble metals catalysts. **M. Perez-Temprano**

**9:20 ORGN 314.** Palladium-catalyzed, site-selective direct allylation of aryl C-H bonds by silver-mediated C-H activation: A synthetic and mechanistic investigation. **S.Y. Lee, J.F. Hartwig**

**9:40 ORGN 315.** Metal-mediated radical coupling of propargyl triflates: Acquiring a prognostic power in inter- and intramolecular reactions. **G. Melikyan, R. Davis, E. Artashyan**

**10:00 ORGN 316.** Catalytic borylative opening of propargyl cyclopropane, epoxide, aziridine, and oxetane substrates: Ligand controlled synthesis of allenyl boronates and alkenyl diboronates. **J. Zhao, K. Szabo**

**10:20 ORGN 317.** Visible-light radical cyclizations by photoredox/cobalt dual catalysis. **A. Casitas Montero, M. Claros, J. Lloret-Fillol**

**10:40 ORGN 318.** Substrate controlled product divergence in CO<sub>2</sub> conversion to heterocyclic products. **J. Rintjema, R. Epping, G. Fiorani, E. Martín, E. Escudero-Adán, A.W. Kleij**

**11:00 ORGN 319.** Base and solvent-free ruthenium-catalyzed alkylation of amines. **J. Celaje, X. Zhang, F. Zhang, L. Kam, J.R. Herron, T.J. Williams**

**11:20 ORGN 320.** HandaPhos. A ligand enabling ppm levels of palladium in Suzuki-Miyaura couplings – the density functional theory calculations. **M. Andersson, S. Handa, F. Gallou, J. Reilly, B.H. Lipshutz**

**11:40 ORGN 321.** Lewis acid-catalyzed stereoselective synthesis of cyclopenta[c]furans by a multi-component reaction. **S. Pathi Pati, A. van der Werf, L. Eriksson, N. Selander**

## Section F

Moscone Center  
3005

### New Reactions & Methodology

R. D. Broene, *Organizer*

N. Jui, *Presiding*

**8:00 ORGN 322.** Withdrawn.

**8:20 ORGN 323.** Lignin depolymerization strategy using visible-light photoredox catalysis. **G. Magallanes, C. Stephenson**

**8:40 ORGN 324.** Catalytic methods for heteroarene functionalization via solubility-controlled radical reactions. **N. Jui**

**9:00 ORGN 325.** Photochemical aromatization: A novel approach to substituted furans and pyrroles under neutral conditions. **S. Werrel, J. Walker, T.J. Donohoe**

**9:20 ORGN 326.** Site-selective aryl C-H amination via photoredox catalysis. **K. Margrey, N. Romero, D.A. Nicewicz**

**9:40 ORGN 327.** Decarboxylative alkylation of biologically relevant heterocycles using photoredox catalysis. **A. Sun, E.J. McClain, J.W. Beatty, C. Stephenson**

**10:00 ORGN 328.** Nanomole scale photoredox catalysis: High throughput evaluation and evolution of Ni/photoredox direct C-N amination using chemistry informer libraries. **S. Lin, S. Dreher**

**10:20 ORGN 329.** Design and application of strongly reducing organic photoredox catalysts. **R.M. Pearson, G. Miyake**

**10:40 ORGN 330.** Stereodivergent amino-catalytic synthesis of *Z*- and *E*- trisubstituted double bonds from alkynals. **J. Luis Barrera, R. Mas-Balleste, J.J. Alemán**

**11:00 ORGN 331.** β C-H amination of alcohols via a radical relay chaperone. **E. Wappes, K. Nakafuku, D.A. Nagib**

**11:20 ORGN 332.** New methodology for the synthesis of an array of bifunctional 3-hydroxy-2-pyridinone ligands for applications to therapeutic and diagnostic metal ion chelation. **C.D. Cook, H.K. Jacobs, A.S. Gopalan**

**11:40 ORGN 333.** Geminal dialkyl assistance enables 5-endo-trig-type intramolecular alkene hydroarylation reactions. **X. Cai, A. Keshavarz, J. Omaque, B.J. Stokes**

## Science for a Sustainable Energy Future

### Energy Storage

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

*Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>3</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>4</sup>, POLY, PRES<sup>5</sup> and WCC*

## MONDAY AFTERNOON

### Section A

Moscone Center  
3018/3022

### Ernest Guenther Award in the Chemistry of Natural Products: Symposium in honor of Stephen F. Martin

C. A. Maryanoff, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 ORGN 334.** Design, synthesis and biological evaluation of small-molecule inhibitors of HIV-1 entry: A potential long-term strategy for curbing the AIDS pandemic. **A.B. Smith, III**

**1:55 ORGN 335.** Necessity is the mother of invention: Natural products and the chemistry they inspire. **S.E. Reisman**

**2:45 ORGN 336.** Strategies and methods for chemical synthesis inspired by complex natural products. **R. Sarpong**

**3:35** Introduction of Awardee.

**3:45 ORGN 337. Award Address** (Ernest Guenther Award in the Chemistry of Natural Products sponsored by Givaudan Flavors Corporation). Journey from natural products to unmet medical needs in neuroscience. **S.F. Martin**

**4:35** Concluding Remarks.

### Section B

Moscone Center  
3014/3016

### Application of Physical Organic Chemistry to Challenges in Industry

G. Beutner, *Organizer, Presiding*

**1:30** Introductory Remarks.

**1:35 ORGN 338.** Computational study on the stereoselective reduction of a ketone intermediate with Li(t-BuO)<sub>2</sub>AlH. **G.J. Tanoury, S. Roeper**

**1:55 ORGN 339.** Methods and mechanism. **A.G. Doyle**

**2:35 ORGN 340.** Mechanistic studies toward the development of predictive models. **A. Ramirez**

**2:55** Intermission.

**3:05 ORGN 341.** Development and investigation of a Pd-catalyzed C-N bond formation: Application to the synthesis of an active pharmaceutical ingredient. **J. Milne, A. Allgeier, A. Guram, J.C. Baum, J.A. Murry, J. Colyer, X. Wang, J. Payack, T. Storz, M. Dilmeghani Seran, T. Hwang, B. Shaw**

**3:25 ORGN 342.** Structure-reactivity relationships in the chemistry of lithium enolates. **K.A. Mack, J. Jermaks, M. Houghton, Y. Zhou, D.B. Collum**

**4:05 ORGN 343.** Application of mechanistic modeling to facilitate API process development. **D.D. Caspi**

**4:25** Concluding Remarks.

### Section C

Moscone Center  
3011

### Biologically-Related Molecules & Processes

R. D. Broene, *Organizer*

M. D. Distefano, *Presiding*

**1:00 ORGN 344.** Synthesis and applications of photoactive analogues of isoprenoid diphosphates incorporating diazirines. **J.S. Vervacke, A. Sarkis, A.L. Funk, E.L. Lorimer, C. Hrycyna, C.L. Williams, M.D. Distefano**

**1:20 ORGN 345.** Development of synthetic methods for the preparation of biologically active compounds. **A.R. Angeles**

**1:40 ORGN 346.** Synthesis and biological evaluation of novel heterocyclic scaffolds as infectious disease lead compounds. **G.A. Edwards, J.G. Pierce**

**2:00 ORGN 347.** Strain induced couplings mediated by visible light. **J.D. Weaver, K. Singh**

**2:20 ORGN 348.** Withdrawn.

**2:40 ORGN 349.** Zwitterionic pyrrolidine-phosphonates: Transition state mimics of the glycoside hydrolase-like phosphorylase *Streptomyces coelicolor* GlgEI-V279S. **S. Veleti, C. Petit, D.R. Ronning, S.J. Sucheck**

**3:00 ORGN 350.** Chemosynthetic livers: Predict, prepare and prove the structure, activity and toxicity of drug metabolites. **R. Chorghade, M. Chorghade**

**3:20 ORGN 351.** Chemosynthetic livers: Evaluating plausible drug-drug interactions relating to metabolite suppression or attenuation. **R. Chorghade, M. Chorghade**

**3:40 ORGN 352.** Designing foldamers: Synthesis of hydrophilic peptoids that fold in a predictable manner. **P.W. Peterson, J.G. Schmidt, A.S. Anderson, R.D. Gilbertson, R.F. Williams, C.E. Strauss**

**4:00 ORGN 353.** Origin of RNA: Model studies for the prebiotic synthesis of nucleosides. **G. Purushothaman, R. Breslow**

### Section D

Moscone Center  
3009

### Asymmetric Reactions & Syntheses

R. D. Broene, *Organizer*

G. R. Boyce, *Presiding*

**1:00 ORGN 354.** Ruthenium catalyzed C-C coupling of alcohols with alkynes and 1,3-enynes via hydrogen transfer. **K.D. Nguyen, D. Herkommer, T. Liang, B.Y. Park, M.J. Krische**

**1:20 ORGN 355.** Withdrawn.

**1:40 ORGN 356.** Why is asymmetric hydrogenation of 3-substituted pyridinium salts so problematic? **J.G. De Vries, M. Renom-Carrasco, P. Gajowski, L. Lefort, L. Pignataro, U. Piarulli, C. Gennari**

**2:00 ORGN 357.** Asymmetric synthesis of drug candidates: Discovery and development of novel aza-Michael catalysts for the synthesis of Letemovir. **S. Dalby**

**2:20 ORGN 358.** Brønsted acid-hydrogen bonding model for cinchona alkaloid-catalyzed asymmetric conjugate addition reactions. **M.N. Grayson, K.N. Houk**

**2:40 ORGN 359.** Electrostatic interactions control the selectivity of NHC-catalysed kinetic resolution. **R. Maji, S.E. Wheeler**

**3:00 ORGN 360.** Site selective and stereoselective functionalization at primary, secondary and tertiary C-H bonds. **H.M. Davies, K. Liao**

**3:20 ORGN 361.** Efforts towards the concise stereoselective synthesis of thujone. **G.R. Boyce**

### Section E

Moscone Center  
3007

### Metal-Mediated Reactions & Syntheses

R. D. Broene, *Organizer*

L. M. Stanley, *Presiding*

**1:00 ORGN 362.** Designing Pd-NHC complexes to provide selective monoarylation. **M.G. Organ**

**1:20 ORGN 363.** Designing catalysts for the selective coupling of secondary alkylzinc reagents. **M.G. Organ**

**1:40 ORGN 364.** Ether solvated lithium pinacolone enolates: Solution and solid state characterizations. **O. Tai, P.G. Williard**

**2:00 ORGN 365.** Template assisted remote C-H bond functionalizations. **A. Maji, D. Maiti**

**2:20 ORGN 366.** Think outside the box – air-stable paraffin pellets with highly active and selective Mo- & W-catalysts for industrial and everyday use in olefin metathesis. **L. Ondi, J.B. Czirik, A. Bucsa, J. Varga, C. Hegedus, C. Gego, V. Botka, J. Csernak, G.E. Frater**

**2:40 ORGN 367.** Studies toward copper-mediated [<sup>18</sup>F]radiofluorination of arylstanananes. K.J. Makaravage, A.F. Brooks, A. Mossine, M.S. Sanford, P.J. Scott

**3:00 ORGN 368.** Conformational flexibility as a design element in ligand design for palladium-catalyzed bond-forming reactions. K.H. Shaughnessy

**3:20 ORGN 369.** Rhodium-catalyzed asymmetric 1,4-addition of  $\alpha,\beta$ -unsaturated imino esters using chiral bicyclic bridgehead phosphoramidite ligands. H. Kim, A. Lee

**3:40 ORGN 370.** Nickel-catalyzed carbocyclization of alkenes via activation of amide C-N bonds. J.A. Walker, K.L. Vickerman, J. Humke, L.M. Stanley

**4:00 ORGN 371.** Foldamer synthesis using the Ruthenium-Catalyzed Azide Alkyne Cycloaddition (RuAAC) reaction. J.R. Johansson, A. Said Stålsmeden, T. Beke-Somfai, N. Kann

**4:20 ORGN 372.** Development of an efficient synthesis of an inhaled drug candidate. D. Steinhuebel

**Section F**

Moscone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer*

M. D. Clift, *Presiding*

**1:00 ORGN 373.** Catalytic asymmetric synthesis of pyrrolidines and piperidines. L. Pilsli, T. Ertl, J. Yedoyan, O. Reiser

**1:20 ORGN 374.** Withdrawn.

**1:40 ORGN 375.** New reactions inspired by cofactor-mediated transformations. M.D. Clift

**2:00 ORGN 376.** N-cyanation of secondary amines using trichloroacetone nitrile. L.C. Morrill, J. Ayres, K. Ling

**2:20 ORGN 377.** Additive-free chemo-selective reductions of phosphine oxides. J. Buonomo, C. Eiden, C.C. Aldrich

**2:40 ORGN 378.** Recent advances in phosphine oxide catalysis. P.H. Toy

**3:00 ORGN 379.** Cheap, recyclable trifluoromethylation reagents from fluoroform. J.B. Geri, N.K. Szymczak

**3:20 ORGN 380.** Novel synthesis of fluorinated indoles and benzofurans via oxidative dearomatization. D. Smith, E. Vitaku, J.T. Njardarson

**3:40 ORGN 381.** Radical chlorodifluoromethylation: Providing a versatile motif for (hetero)arene diversification. R.C. McAtee, C. Stephenson

**4:00 ORGN 382.** Efficient Formal Intramolecular Diels-Alder (FIMDA) cyclization of electron-deficient dienynes. N. Kramer, G.B. Dudley

**4:20 ORGN 383.** Alkyne chemistry for the synthesis of high-value molecular targets. G.B. Dudley

**4:40 ORGN 384.** Synthesis of N-sulfonyl amidines through Mo(CO)<sub>6</sub> catalyzed amide reduction to enamines. P. Trillo, H. Adolffson

**Science for a Sustainable Energy Future**

**Chemical & Biological Conversions Approaches to Energy Conversion**

*Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>‡</sup>, ORGN and PROF*

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**

**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

*Sponsored by PROF, Cosponsored by ANYL<sup>‡</sup>, BIOL<sup>‡</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>‡</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>‡</sup>, POLY, PRES<sup>‡</sup> and WCC*

**ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer**

*Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY*

**MONDAY EVENING**

**Section A**

Moscone Center  
Hall D

**Sci-Mix**

S. M. Silverman, *Organizer*

8:00 - 10:00

**106, 118, 126-127, 129, 140-141, 143-144, 147, 151-152, 159, 163-164, 166-167, 173, 178, 193-194, 196, 204, 212, 214, 222, 224, 228, 232, 234, 242, 247-248, 252, 254, 261, 270-271.** See previous listings.

**502, 514, 529-530, 532, 537, 548, 554, 556-557, 581, 586, 594, 602, 606, 608, 611, 614, 618, 736, 740, 753, 763, 772, 797, 810, 816, 822, 825-829, 833-834, 836, 839, 841, 843-844.** See subsequent listings.

**TUESDAY MORNING**

**Section A**

Moscone Center  
3018/3022

**ACS Award for Creative Work in Synthetic Organic Chemistry: Symposium in honor of Matthew S. Sigman**

J. Aube, *Organizer, Presiding*

**8:00 ORGN 385.** Searching for selective catalytic reactions in complex molecular environments. S.J. Miller

**8:45 ORGN 386.** Development and applications of new fluorination methods. M.S. Sanford

**9:30 ORGN 387.** Organic reactions inspired by the organometallic chemistry of gold. D. Toste

10:15 Intermission.

**10:25 ORGN 388.** New directions in Ni-catalyzed cross coupling. A.G. Doyle

11:10 Introduction of Awardee.

**11:15 ORGN 389. Award Address** (ACS Award for Creative Work in Synthetic Organic Chemistry sponsored by MilliporeSigma). Enantioselective formation of remote chiral centers through Pd-catalyzed alkene functionalization. M.S. Sigman

**Section B**

Moscone Center  
3014/3016

**Advances in Organic Synthesis: Successes from Academia-Industry Partnerships**

L. C. Campeau, *Organizer*

T. Lyons, *Organizer, Presiding*

8:00 Introductory Remarks.

**8:05 ORGN 390.** Academic-industry collaborations at Merck process research & development: Working with partners to enable scientific excellence. R. Ruck

8:45 Discussion.

**8:50 ORGN 391.** Pharmaceutical applications of visible light photoredox catalysis. C. Stephenson

9:30 Discussion.

**9:35 ORGN 392.** Collaborative academic/industrial research under the umbrella of the NSF Center for selective C-H functionalization. H.M. Davies

10:15 Discussion.

10:20 Intermission.

**10:30 ORGN 393.** From bench to bottle and the relationships in between. S.L. Trice

11:10 Discussion.

**11:15 ORGN 394.** Practical aerobic (and electrochemical) oxidation reactions. S.S. Stahl

11:55 Concluding Remarks.

**Section C**

Moscone Center  
3011

**Heterocycles & Aromatics**

R. D. Broene, *Organizer*

G. R. Geier, *Presiding*

**8:00 ORGN 395.** Practical design and synthesis of Merestininib's N1-methylindazole building block. Y. Lu, K.P. Cole, J. Fennell, J. Burt, T.D. Maloney, D. Mitchell

**8:20 ORGN 396.** Synthesis of medium-sized rings and cyclic tripeptides through ring expansion of amino-imides. R. Mendoza-Sanchez, V. Corless, N.N. Nguyen, D.J. Tantillo, A.K. Yudin

**8:40 ORGN 397.** Toolbox of porphyrins, phthalocyanines, and other porphyrinoids. C.M. Drain, N. Bhupathiraju, W. Rizvi

**9:00 ORGN 398.** Synthesis of bacteriochlorins with an isocyclic ring: The skeleton of bacteriochlorophylls. S. Zhang, J.S. Lindsey

**9:20 ORGN 399.** More studies on cyclic six- and seven-membered 2,3-dia-ryl-1,3-thiaza-4-ones. L.J. Silverberg, H. Yennawar, C.N. Pacheco, A.F. Lagalante, H.F. Sobhi, K. Alemay, J. Bachert, L. Baker, K. Bandholz, J.A. Bayliff, R. Bendinsky, H.G. Bradley, M.J. Buchwalter, A. Call, O.A. Cardenas, L. Chen, B.K. Colburn, A.D. Cooper, D.J. Coyle, J.R. Dahl, M. Felty, R.F. Fox, J.M. Islam, E. Kimmel, S.E. Koperna, M.K. Lawler, Q.J. Moyer, C.R. Mroz, D.J. Noble, K.C. Perhonitch, H.E. Reppert, H. Singh, C.R. Verhagen, R.M. Vidal, A. Weisbeck, Y. Xie, Z. Yang

**9:40 ORGN 400.** Two-step, one-flask synthesis of an N-confused porphyrin bearing pentafluorophenyl substituents. J.M. Fisher, V.K. Kensy, G.R. Geier

**10:00 ORGN 401.** Porphyrins as functional scaffolds for 2D and 3D materials. M.O. Senge

**10:20 ORGN 402.** Genuine diversity in short order: Development and application of facile [2+2] cyclo-trimerisation methodology suitable for medicinal chemistry. S. Peace, C.J. Tame, C. Jamieson, G. Inglis, G. Vitulli, N. Wellaway, N. Anderson, A. Bouisseau, T.D. Sheppard, H. Hailes, R. Foster

**10:40 ORGN 403.** Synthesis, functionalization, and reactivity of novel silicon-containing heterocycles for drug discovery. S. Barraza, S.E. Denmark

**11:00 ORGN 404.** Synthesis of functionalized polyphenylene dendrimers. A. Baun, A. Narita, K. Muellen

**11:20 ORGN 405.** Evaluating regioselectivity outcomes in 5-endo-trig and 6-endo-trig hydroarylation reactions of  $\beta$ -benzylstyrenes and  $\beta$ -homobenzylstyrenes. A. Keshavarz, X. Cai, L.N. Kagiri, B.J. Stokes

**Section D**

Moscone Center  
3009

**Molecular Recognition & Self-Assembly**

R. D. Broene, *Organizer*

E. Fatila, *Presiding*

**8:00 ORGN 406.** Functional integration of abiotic triazine-derivatives with DNA and RNA. D. Bong

**8:20 ORGN 407.** Phenylacetylene oligomers as synthetic information molecules. J. Swain, C. Hunter

**8:40 ORGN 408.** Selective recognition and separation of oxoanions using a guanidinium ligand. C. Seipp, N.J. Williams, V. Bryantsev, A. Ivanov, B.A. Moyer, R. Custelcean

**9:00 ORGN 409.** Multidentate halogen bonding organocatalysts in molecular recognition studies. S. Huber, S.H. Jungbauer, D. Bullfield, S. Schindler, F. Kniep, E. Herdtweck, C. Lehmann, S. Keller, A. Linke, S.R. Waldvogel

**9:20 ORGN 410.** Binding anions using a clamshell based receptor. E. Fatila, E.B. Twum, J.A. Karty, K.P. McDonald, A.H. Flood

**9:40 ORGN 411.** Self-assembly of Star of David: 2D and 3D approaches. B. Song, Z. Zhang, X. Li

**10:00 ORGN 412.** Location of the steric speed bump controls squaraine threading by tetralcation macrocycle. C.F. Gomez, W. Liu, M. Betancourt, B.D. Smith

<sup>‡</sup>Cooperative Cosponsorship

10:20 ORGN 413. Pumping potassium against concentration gradient through unimolecular channel. J. Hou

10:40 ORGN 414. Sensing of chiral compounds via self-assembly with a stereodynamic probe. Z. De los Santos, C. Wolf

11:00 ORGN 415. Dynamic peptides as biomimetic carbohydrate receptors. B. Ravoo

11:20 ORGN 416. Highly selective biomimetic artificial K<sup>+</sup> channels. M.D. Barboiu

11:40 ORGN 417. Driving assembly of cyanostar with hydroxyanions. E. Fatila, E.B. Twum, A. Sengupta, M. Pink, J.A. Karty, K. Raghavachari, A.H. Flood

## Section E

Moscone Center  
3007

### Metal-Mediated Reactions & Syntheses

R. D. Broene, *Organizer*

C. W. Alexander, *Presiding*

8:00 ORGN 418. Phosphine-ligated alkylpalladium(II) amido complexes: Understanding the kinetic barrier to reductive elimination of alkylamines. D.M. Peacock, J.F. Hartwig, Q. Jiang, T.R. Cundari

8:20 ORGN 419. Consecutive multicomponent syntheses of pyrazoles-diversity-oriented approach to blue emitters and emission solvatochromic dyes. T.J. Muller, A.C. Goetzinger, M. Denissen

8:40 ORGN 420. Chemo- and stereoselective rhodium-catalyzed ene-cycloisomerization of thioether-substituted alkenylidenecyclopropanes: Metal-mediated  $\beta$ -sulfide migration. Y. Su, P. Evans

9:00 ORGN 421. Earth abundant catalysts for the hydrofunctionalization of unsaturated compounds. C.C. Eichman, S. Lee, A.J. Villani-Gale

9:20 ORGN 422. Pd-catalyzed fluorination of (hetero)aryl halides and triflates. P.J. Milner, S.L. Buchwald

9:40 ORGN 423. New catalytic methods for N-heterocycle synthesis by late transition metal-mediated C-H bond activation. P. Kilaru, P. Zhao

10:00 ORGN 424. Investigating reactivity, structure and reusability of an insoluble iridium catalyst for C-H borylations. C.R. Jayasundara, R.E. Maleczka, M.R. Smith, J. Oppenheimer

10:20 ORGN 425. Catalytic asymmetric hydroboration of internal alkenes. Y. Xi, J.F. Hartwig

10:40 ORGN 426. New transition metal-catalyzed reductive processes using H atoms from water mediated by tetrahydroxydiboron and related reagents. S. Cummings, T. Le, L. Quiambao, A. Brito, J. Alvarenga, B.J. Stokes

11:00 ORGN 427. Chemoselective CuAAC reactions via shifting the rate-determining step: Orthogonal reactivity of aromatic ynamines. C.P. Seath, G.A. Burley, A.J. Watson

11:20 ORGN 428. Hydrogen borrowing catalysis: Strategic application and transformation of *ortho*-disubstituted and cyclopropyl ketones. J. Frost, C. Cheong, W. Akhtar, T.J. Donohoe

11:40 ORGN 429. Methods for the synthesis of  $\alpha,\beta$ -substituted vinyl phosphonates from novel  $\alpha$ -phosphonovinyl triflates. C.W. Alexander

## Section F

Moscone Center  
3005

### New Reactions & Methodology

R. D. Broene, *Organizer*

W. Santos, *Presiding*

8:00 ORGN 430. Developing the phosphino-boration reaction. S.A. Westcott, S.J. Geler, C.M. Vogels, N.R. Mellonie, S. Doherty

8:20 ORGN 431. Understanding and exploiting selectivity in the Ir-catalyzed C-H borylation of heterocycles. A. Hones, J. Wright, D. Blakemore, P.G. Steel

8:40 ORGN 432. Diastereoselective B(C<sub>6</sub>F<sub>5</sub>)<sub>3</sub>-catalyzed reductive carbocyclization of unsaturated carbohydrates. J.A. Dabrowski, T.A. Bender, H. Zhong, M.R. Gagne

9:00 ORGN 433. Diastereoselective borocyclopropanation of allylic ethers using a boromethylzinc carbenoid. G. Benoit, A.B. Charette

9:20 ORGN 434. Insights in dehydrogenative borylation reactions. E. Romero, R. Jazzar, G. Bertrand

9:40 ORGN 435. Rapid access to an antimalarial drug core via a three-component minisci reaction. J. Lear, D.A. Nagib

10:00 ORGN 436. Open-to-air hydroboration of alkenes and alkynes with ammonia borane. A.S. Kulkarni, M.P. Drolet, H.A. Jawale, P.V. Ramachandran

10:20 ORGN 437. One-pot regioselective synthesis of highly functionalized chromone derivatives. R. Bam, W. Chailfoux

10:40 ORGN 438. Transition metal-free activation and intramolecular *trans* diboration of propargylamides using unsymmetrical diboron. W.L. Santos, R. Sneed, F. Astha, Y. Dai

11:00 ORGN 439. Regioselective boracarbonylation of vinyl arenes. B.V. Popp

11:20 ORGN 440. Visible light-mediated synthesis of 1-aminonorbornanes, a new saturated building block for drug discovery. D. Staveness, T. Sodano, C. Stephenson

### Green Chemistry Adoption: Progressive Changes by Different Industry Sectors

Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB<sup>2</sup>

## TUESDAY AFTERNOON

### Section A

Moscone Center  
3018/3022

### James Flack Norris Award in Physical Organic Chemistry: Symposium in honor of Robert A. Moss

J. Lee, *Organizer*

M. Platz, *Presiding*

1:00 Introductory Remarks.

1:05 ORGN 441. Origin of homochirality in amino acids and sugars, and enzyme-like catalysis, under prebiotic conditions. R. Breslow

1:30 ORGN 442. All happens at the interface: Monolayer-protected gold nanoparticles and beyond. P. Scrimin

1:55 ORGN 443. Gas phase studies of catalysis. J.K. Lee

2:20 Intermission.

2:30 ORGN 444. Sigma-electron delocalization: Why are loose oligosilane helices strongly conjugated and tight helices not at all? M. Jovanovic, D. Antic, J. Michl

2:55 ORGN 445. What is the effect of the replacement of CH<sub>2</sub> by O on the measured and calculated values of the singlet-triplet energy difference ( $\Delta E_{ST}$ ) in trimethylenemethane (TMM), oxyallyl (OXA), dehydroacetic acid (DHAA), and carbon trioxide (CO<sub>3</sub>)? W.T. Borden, X. Wang, B. Chen, D.A. Hrovat

3:20 ORGN 446. Valley of fear(lessness): Carbene mysteries. D.C. Merrer

3:45 Intermission.

3:55 Introduction of Awardee.

4:00 ORGN 447. Award Address (James Flack Norris Award in Physical Organic Chemistry sponsored by the ACS Northeastern Section). Complexes and activation parameters in carbene-alkene additions. R.A. Moss

4:50 Concluding Remarks.

### Section B

Moscone Center  
3014/3016

### Advances in Organic Synthesis: Successes from Academia-Industry Partnerships

L. C. Campeau, T. Lyons, *Organizers, Presiding*

1:00 Introductory Remarks.

1:05 ORGN 448. Iron and cobalt catalysis at the academic-pharma interface. P.J. Chirik

1:45 Discussion.

1:50 ORGN 449. Stereoselective formation of tetrasubstituted olefins via enol tosylate formation. A. McClory, D.B. Collum, T. Cravillon, F. Gosselin, C. Han, D. Le, B. Li, N. Lim, K.A. Mack, S. Savage, H. Zhang

2:30 Discussion.

2:35 ORGN 450. Kinetic and mechanistic studies in support of process research and development. D.G. Blackmond

3:15 Discussion.

3:20 Intermission.

3:30 ORGN 451. Strain-release amination. M.R. Collins, R. Gianatassio, J.M. Lopchuk, J. Wang, C. Pan, L. Malins, L. Prieto, T.A. Brandt, G. Gallego, N. Sach, J. Spangler, P. Zhu, J. Zhu, P.S. Baran

4:10 Discussion.

4:15 ORGN 452. Dow/UM collaboration on halax fluorination. M.S. Sanford

4:55 Concluding Remarks.

### Section C

Moscone Center  
3011

### Heterocycles & Aromatics

R. D. Broene, *Organizer*

J. Day, *Presiding*

1:00 ORGN 453. Functionalized tunable aryl alkyl ionic liquids. M. Kaliner, T. Strassner

1:20 ORGN 454. Thiophene-based double helix shaped molecules. H. Wang

1:40 ORGN 455. Oligodithienothiazines – electronrich heterocyclic oligomers with red-shifted solution and solid-state luminescence. T.J. Muller, J. Nau, C. Dostert

2:00 ORGN 456. DNA binding studies of Schiff base heterocyclic derivatives: *In vitro* antibacterial and antioxidant assessment. R. Uddin, R. Arif

2:20 ORGN 457. Panel of dimethylamino flavylium cyanine dyes spanning the NIR-I and NIR-II regions. E.D. Cosco, J.R. Caram, O. Bruns, T.M. Swager, M.G. Bawendi, E.M. Sletten

2:40 ORGN 458. Challenges and opportunities for synthetic methodology in fragment-based drug discovery. J. Day

3:00 ORGN 459. Novel approaches to nitrogen-containing heterocycles. P.D. Parker, J.G. Pierce

3:20 ORGN 460. Synthesis and biological evaluation of A<sub>2</sub>B phthalocyanines for photodynamic therapy and imaging. E. Okoth, M. Mathis, G. Vicente

3:40 ORGN 461. Solvent controlled regioselective reversal in N-alkylation reactions of fused-ring azole heterocycles including pyrazolo[3,4-*d*]pyrimidines, purines, [1,2,3]triazolo[4,5-*d*]pyrimidines and related deaza-compounds. B.C. Bookser, M.I. Weinhouse, A.C. Burns, A.N. Valiere, B. Dyck, L.J. Valdez, A.L. Rheingold, C.E. Moore

4:00 ORGN 462. Synthesis of catenane-like paddle wheel structures. B. Dumsloff, A. Narita, K. Muellen

4:20 ORGN 463. Modular synthesis and tuning of antiaromaticity of novel  $\pi$ -systems containing cyclobutadienoids. Z. Jin, Y. Xia, L. Chen

4:40 ORGN 464. Copper-catalyzed cyclic ether synthesis via addition of alkyltrifluoroborates to alkenols. C. Um, S.R. Chemler

### Section D

Moscone Center  
3009

### Molecular Recognition & Self-Assembly

R. D. Broene, *Organizer*

R. Khalullin, *Presiding*

1:00 ORGN 465. Self-assembly of metal-terpyridine complexes in the presence of cucurbit[n]uril. M. Raeisi, E. Masson

1:20 ORGN 466. Self-sorted multi-component photoconductive gels. E. Draper, J.R. Lee, A.J. Cowan, D.J. Adams

1:40 ORGN 467. Study of four simultaneously dynamic covalent reactions: Experimental proof of reversibility and orthogonality. H. Seiffert, K. Ramirez Trejo, E.V. Anslын

2:00 ORGN 468. Developing a non-invasive monitoring system using near IR dyes. H. Sepasizangabadi, N.P. Cooley, X. Shao, T.E. Glass

2:20 ORGN 469. Binding studies and organocatalytic activity of a preorganized bidentate halogen bonding molecule. A. Riel, J. Sun, C. Massena, O.B. Berryman

**2:40 ORGN 470.** Synthesis and study of new highly soluble tetraalkylated bis(imino) guanidiniums for the selective removal of oxoanions from aqueous solutions containing mixtures of anions. N.J. Williams, C. Seipp, K.A. Garrabrant, R.J. Ellis, R. Custelcean, B.A. Moyer

**3:00 ORGN 471.** Russian nesting doll complexes of molecular baskets and zinc containing TPA ligands. Z. Lei, S. Polen, C.M. Hadad, T. Rajanbabu, J.D. Badjic

**3:20 ORGN 472.** Synthesis and metal binding ofazole-containing peptidomimetics. A.A. Fuller, A. Mohan, C. Bosmajian

**3:40 ORGN 473.** Stopper group steric effects on macrocycle encapsulation of indolenine squaraine dyes. T. Jarvis, W. Liu, B. Smith

**4:00 ORGN 474.** Self-assembly of 3D columnar structures and 2D bilayers through antimony(III) secondary bonding interactions. S. Moaven, J. Yu, J. Yasin, A.F. Cozzolino

**4:20 ORGN 475.** Thermally stable triazine-based organic superstructure. S. Jung, J. Baek

**4:40 ORGN 476.** Two similar steroid hormones – drastically different complexation behavior: How structural nuances control interactions with aromatic electron density. Z. Luo, T. Friscic, R. Khaluillan

**Section E**

Mosccone Center  
3007

**Total Synthesis of Complex Molecules**

R. D. Broene, *Organizer*  
L. E. Sirois, *Presiding*

**1:15 ORGN 477.** Efforts towards the total synthesis of maecrystal V. B.R. Smith, J.T. Njardarson

**1:35 ORGN 478.** Withdrawn.

**1:55 ORGN 479.** Total synthesis of laurellene. T. Okada, F. Yoshimura, K. Tanino

**2:15 ORGN 480.** Total synthesis of (-)-viroaine A. J. Hughes, J. Gleason

**2:35 ORGN 481.** Kilogram-scale synthesis of RORc ligand GDC-0022. L.E. Sirois, D. Lao, J. Xu, R. Angelaud, F. Gosselin

**2:55 ORGN 482.** Toward total syntheses of cryptobellin and isocryptobellin acid D. L. Kim, E. Go, S. Wetzler, K.J. Kron, G.E. Miller, D.A. Vosburg

**3:15 ORGN 483.** Synthetic progress towards the total synthesis of mandelalide B. A. Ghosh, J. Li, N. Veerasamy, R.G. Carter

**3:35 ORGN 484.** Progress toward the total synthesis of anticancer deoxypodophyllotoxin and antiviral F4-4. D.I. Saavedra, B. Rencher, P.J. Hurst, M. Andrus

**3:55 ORGN 485.** Progress towards the first total synthesis of undulifoline. T.M. Williams, C. Stephenson, E. Swift

**4:15 ORGN 486.** 14-Step total synthesis of thapsigargin from (R)-(-)-carvone. D. Chen, P. Evans

**Section F**

Mosccone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer*  
W. M. Braje, *Presiding*

**1:00 ORGN 487.** Frustrated Lewis pair hydrogenation of a,b-unsaturated carbonyl compounds. I. Khan, L.C. Morrill

**1:20 ORGN 488.** Stereoselective synthesis of tetrasubstituted olefins via mild, one-pot syn-elimination approach. N. Lim, P. Weiss, X. Li, H. Zhang, F. Gosselin

**1:40 ORGN 489.** Tandem chemoselective Suzuki-Miyaura cross-coupling enabled by nucleophile speciation control. C.P. Seath, A.J. Watson

**2:00 ORGN 490.** Palladium-catalyzed alkoxyacylation of unactivated alkyl bromides. B.T. Sargent, E.J. Alexanian

**2:20 ORGN 491.** Recent advances in nickel-catalyzed activation of amides. E.L. Baker, N.K. Garg

**2:40 ORGN 492.** Gold catalysis for the construction of barbaralones and related polycyclic caged frameworks. S. Ferrer Cabrera, A.M. Echavarren

**3:00 ORGN 493.** Iron(III)-catalyzed carbonyl-olefin metathesis. C. Schindler

**3:20 ORGN 494.** Nickel catalyzed reductive cross-electrophile couplings to furnish cyclopropanes. T. Endean

**3:40 ORGN 495.** Investigations in the mechanism of metal-catalyzed hydroarylation. A.J. Villani-Gale, S. Phan, S. Lee, J.J. Devery, C.C. Eichman

**4:00 ORGN 496.** Rhodium-catalyzed oxidative (4+2) annulations of o-alkenylanilides. A. Seoane, C.C. Comanescu, X. Diz, J.L. Mascarenas, M. Gullas Costa

**4:20 ORGN 497.** Recent advances in the transition metal-catalyzed decarboxylative generation and alkylation of 2-azaalyl anions. J.J. Chruma, S. Tang, X. Wang, Q. Lin, M. Li, P.J. Walsh, S. Wang, X. Qian

**4:40 ORGN 498.** Organic chemistry in water: Applications in the pharmaceutical industry. W.M. Braje, J. Kaschel, J. Klee, T. Lindner, K. Britze, A. Jolit, J. Dietrich

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

*Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB\**

**TUESDAY EVENING**

**Section A**

Mosccone Center  
Hall D

**Advanced Materials Technologies, Systems & Processes**

S. M. Silverman, *Organizer*  
5:30 - 7:30

**ORGN 499.** Tough aqua material for a tough application: Self-assembled membrane for water purification sustaining high pressures. E. Cohen, H. Weissman, E. Shimoni, I. Kaplan-Ashiri, K. Werle, W. Wohleben, B. Rytbchinski

**ORGN 500.** Enhanced light extraction efficiency of OLEDs by quasi-periodic diffractive nanogratings. Y. Jeong

**ORGN 501.** Unsymmetrical effect of Hexa-peri-hexabenzocoronenes on columnar mesophase behavior stability. H. Chen

**ORGN 502.** Post functionalization of polycarboxy fantrip. R. Gilley, W.B. Thompson, B.T. King

**Section B**

Mosccone Center  
Hall D

**Biologically-Related Molecules & Processes**

S. M. Silverman, *Organizer*  
5:30 - 7:30

**ORGN 503.** Fast track process research: Identification and development of highly improved routes to GDC-0810. T. Cravillon, A. McClory, S. Savage, N. Lim, H. Zhang, C. Han, F. Gosselin

**ORGN 504.** Development of an expedient synthesis to GDC-0853: A reversible Bruton's tyrosine kinase inhibitor. N. Lim, T. Cravillon, D. Beaudry, J. DeFreese, Q. Tian, H. Zhang, F. Gosselin

**ORGN 505.** Expedient and modular access to [6,5]- and [6,6]-2-azabicyclic morpholones by iron- or palladium-catalyzed intramolecular coupling of vicinally functionalized alcohol-bearing allylic lactams. K. Hovenkotter, T. Beng

**ORGN 506.** Synthesis, chemical reactivity, and medicinal activity of novel chiral piperidines. H. Braunstein, T. Beng

**ORGN 507.** Cleavable fluorescent probes for direct measurement of nutrient uptake. V. Begoyan, M. Tanasova

**ORGN 508.** Synthesis of oligodeoxynucleotides containing electrophilic groups. S. Shahsavari, X. Lin, J. Chen, N. Green, D. Goyal, S. Fang

**ORGN 509.** Epoxyisoindoline formation through tandem Ugi-Smiles Diels-Alder reactions. P.E. Alabi, S. Luesse

**ORGN 510.** Development of a tandem oxy-Michael Ugi-Smiles reaction. R. Ayres, S. Luesse

**ORGN 511.** Investigation and synthesis of isoform-selective histone deacetylase inhibitors. M.J. O'Neill, O. Wiest, P. Helquist

**ORGN 512.** Photocaged NAD<sup>+</sup> for mechanistic investigations of HMG-CoA reductase. F. Salahi, O. Wiest, P. Helquist, C. Stauffacher, V. Purohit, T. Quinn

**ORGN 513.** Synthesis and biological evaluation of inhibitors of KasA identified through virtual screening: A novel inhibitor of *Mycobacterium tuberculosis*. D. Oldham, A. Priest, G. Henry, L. Lewis, D. Toth

**ORGN 514.** Synthesis of oxidative metabolites of the persistent organic pollutant DEHP. K. McDaniel, D. Oldham

**ORGN 515.** Practical and concise syntheses of antifungal amphiphilic kanamycin analogs. M. Alfindee, Q. Zhang, J.P. Shrestha, V.d. Nziko, Y. Kawasaki, X. Peng, J. Takemoto, C.T. Chang

**ORGN 516.** Toward the total syntheses of natural products containing trans-decalin skeleton from masked o-benzoquinone. M. Li, H. Shiao, H. Hsieh

**ORGN 517.** Synthesis of photocyclization/oxidation-based fluorophores for cell and tissue imaging. S. Suh, D.M. Chenoweth

**ORGN 518.** DNA compatible nitro reduction and benzimidazole synthesis. H. Du, H. Huang

**ORGN 519.** PBr<sub>3</sub>-mediated unexpected reductive deoxygenation of α-aryl-pyridinemethanols: Synthesis of arylmethylpyridines toward EP<sub>1</sub> antagonists. S. Seto, Y. Nishigaya, K. Umei, D. Watanabe, Y. Kohno

**ORGN 520.** Efficient cross metathesis of allyl sulfones with isoprenoids for the synthesis of fluorescent lipid probes. R. Sapkota, J. Jarvis, N. Paz, T. Schaub, J.B. Arterburn

**ORGN 521.** Towards understanding of peroxidation of mammalian sterols: Microwave-assisted synthesis of 7-dehydrocholesterol isomers. A.C. Olvera, J. Ramos Flores, H. Muchalski

**ORGN 522.** Synthesis of 6-substituted dopamine derivatives. J.A. Rogowicz, K. Reed, J. Rote, M.L. Cafiero, L.W. Peterson

**ORGN 523.** Schiff bases and hemiaminals: Synthesis, mechanism of formation and biological evaluation. M. Islam, M.R. Karim

**ORGN 524.** Synthesis and atropisomeric binding of novel β-carbolines to brain receptors. C. Foley, S.P. Mulcahy

**ORGN 525.** Design and synthesis of halogen bonding compounds for the inhibition of IGP. J.M. Ellsworth, C.C. Browder

**ORGN 526.** Synthesis and characterization of a verdazyl radical labeled amino acid spin probe. D.J. Brook, A. Clemens, J. DaRos

**ORGN 527.** Shake it off: Ring expanded sugars as ligands for the *E. coli* lectin FimH. R. Vannam, P. Zihlmann, B. Fiege, C. Sager, S. Rabbani, R.P. Jakob, R. Preston, A. Zalewski, T. Maier, B. Ernst, M.W. Peczu

**ORGN 528.** Targeting infectious diseases with dihydropyrimidinone-derived chemotypes. M. DiCairano, R. Trilles, S. Schaus, L. Brown

**ORGN 529.** Light induced cell migration *in vivo* with photocaged TLR agonist. K. Ryu, B. McGonnigal, A.P. Esser-Kahn

**ORGN 530.** Synthesis and evaluation of a novel class of androgen receptor signaling axis inhibitors targeting castration-resistant prostate cancer. D. N. G Ralalage, J. An, M.B. Rettig, M.E. Jung

**ORGN 531.** Synthesis of oligonucleotides containing C8-2'-deoxyguanosine adduct of the tobacco carcinogen 2-amino-9H-pyrido [2, 3-b] indole (AαC). A. Chatterjee, A.K. Basu

**ORGN 532.** Synthesis of 4-N-alkyl gemcitabine analog bearing β-keto tosylate moiety suitable for <sup>18</sup>F-labeling. M. Cabrera, C. Gonzalez, N. Sulimoff, S.F. Wnuk

**ORGN 533.** Development of amino acid-based inhibitors against Aspartate-N-Acetyltransferase (ANAT) for the treatment of Canavan disease. V. Muthamsetty, B. Thangavelu, Q. Wang, R.E. Viola

**ORGN 534.** Stepwise two-photon activatable BODIPY for multi-channel imaging in developing embryos. D. Herrera, Y. Zhang

**ORGN 535.** Fluorescent probes for targeting fructose transport. J. Fedie, S. Xia, M. Tanasova

\*Cooperative Cosponsorship

- ORGN 536.** Increasing the therapeutic index for head-and-neck squamous cell carcinoma targeted therapy through the derivatization of deoxyxyboquinone. **J.E. Jurczyk**
- ORGN 537.** Tandem incorporation of enantiomeric residues engenders discrete peptoid structures. **E.M. Mumford, B.C. Gorske, R.R. Conry**
- ORGN 538.** Co-bisintercalating FRET-based fluorescent bottlebrush polymer nanotags. **M. Evanoff, M. Fouz, B.A. Armitage**
- ORGN 539.** Computational modeling of PiKc activity and selectivity for guided protein and substrate engineering. **J.M. Grandner, S. Yang, K.N. Houk**
- ORGN 540.** Synthesis of functionalized oligonucleotides of RNA using 2-methylbenzothiohenyl groups at the C2'-O- position of uridine and adenosine. **A.J. Francis, M.J. Resendiz**
- ORGN 541.** Synthesis and evaluation of dye derivatives as G-quadruplex-stabilizing molecules. **J. McCallum**
- ORGN 542.** Synthesis of  $\beta$ -APN derivatives for inhibition of the LOX enzyme. **R. Lottie**
- ORGN 543.** Synthesis of menaquinone (MK) analogs and investigation into the solution structure of MK-1 and MK-1 (H<sub>2</sub>). **J.T. Koehn, B.J. Peters, C.N. Beuning, S.K. Dellinger, D.C. Crick, D.C. Crans**
- ORGN 544.** Reversibly photoactivatable Janelia Fluor dyes, and their utility in imaging cellular features beyond the diffraction limit. **F. Jradi**
- ORGN 545.** Azaaurones: An unexplored scaffold for biological activity. **J.K. Noe, S.T. Handy**
- ORGN 546.** Synthesis and analysis of propargylglycine-based derivatives as potential inhibitors of LpxC. **R. Roldan, K. Wilson, M.L. Cafiero, L.W. Peterson**
- ORGN 547.** Fluorescent derivatives of arachidonic acid: Tools for studying the anti-cancer activity of prostaglandins. **J.L. Stanley, R. Van Dross, W.E. Allen**
- ORGN 548.** Design, synthesis and biological effects of novel HDAC6 selective inhibitors. **A. Mahendran, R. Breslow**
- ORGN 549.** Synthetic and metabolic studies of deuterium labeled drugs. **B. Rawal, K. Headrick, R. Giron, J. Kim, M. Klosinski, S. Thomas, J. Lee, K.W. Jung**
- ORGN 550.** Comparative in vitro translation control using anti-sense  $\gamma$ PNA. **C. Emanuelson, T. Canady, B. Armitage**
- ORGN 551.** Novel architectures that exhibit potent and selective inhibition of protein tyrosine phosphatases implicated in cancers and metabolic disease. **K.A. Scott, T. Shi, E. Chapman, J.T. Njardarson**
- ORGN 552.** Exploring vinylboronic acids as reactants in bioorthogonal chemistry. **S. Eising, K.M. Bongor**
- ORGN 553.** Environmentally active nanoprodrug: Two-step surveillance in the anticancer drug release. **S. Biswas, J. Das, S. Barman, T. K. Maity, N. Singh**

**Section C**

Moscone Center  
Hall D

**Chemistry of Fullerenes, Carbon Nanotubes & Graphene**

S. M. Silverman, *Organizer*

5:30 - 7:30

**ORGN 554.** Rotation of benzofulvenes' exocyclic double bond and its effects on molecular conjugation. **A. Glass, J. Okubo**

**ORGN 555.** Interaction of olefin metathesis and fullerenes. **A. Poater**

**Section D**

Moscone Center  
Hall D

**Materials, Devices & Switches**

S. M. Silverman, *Organizer*

5:30 - 7:30

**ORGN 556.** Propeller-shaped molecular switches: Synthesis, solid-state structure, and photochemical properties. **D. Cameron, S. Eisler**

**ORGN 557.** Synthesis and electronic properties of dibenzothieno-isoindole dione building blocks. **E. Albright, S. Eisler**

**ORGN 558.** Building extended metal-organic frameworks from dimetal tetracarboxylate building units. **M. Strowbridge, H. Abourahma**

**ORGN 559.** Crystal engineering of azobenzene cocrystals with non-linear optical properties. **E. Graff, D. Curran, D.J. McGee, H. Abourahma**

**ORGN 560.** Changes in the intermolecular rotation of a crystalline carbazole rotor upon diffusion of volatile compounds. **A. Aguilar, S. Perez Estrada, M. Rodriguez, B.V. Rodriguez-Molina**

**ORGN 561.** Phthalocyanine-chromophore dyads: Synthesis and photophysical studies. **R. Liu, X. Zhang, D. Pockat, R. Moirangthem, J.S. Lindsey**

**ORGN 562.** Synthesis and characterization of asymmetric indenotetracenes: Novel n-type organic semiconductors for use in organic photovoltaics. **L. Purvis, S. Ghosh, Z. Zhang, X. Gu, C.J. Douglas, C.J. Cramer, L. Gagliardi**

**ORGN 563.** Studies toward individual light-driven molecular motors. **H. Heideman, M. Stoehr, B. Feringa**

**ORGN 564.** Withdrawn.

**ORGN 565.** Exploration of *trans*-2-(1,2,3-triazolyl)-cyclohexanols as potential conformational switches. **M.R. Ruyonga, V.V. Samostin**

**ORGN 566.** Synthesis and electrochemical properties of functionalized iptycene-quinones. **Y. Ryu, J. Kwon, K. Choi, B. An, S.Y. Park**

**ORGN 567.** Spin frustrated organic trisradical triangle. **Y. Wu, M.D. Krzyaniak, M.R. Wasielewski**

**ORGN 568.** Red- and blue-shifted fluorescent polycyclic azaborine chromophores: Applications in organic materials. **J.A. Wilson, L.L. Magill, R. Shavnore, C. McClinton, B. Brown, J. Vaughn, C.J. Saint-Louis, A. Schrock, M.T. Huggins**

**Section E**

Moscone Center  
Hall D

**Molecular Recognition & Self-Assembly**

S. M. Silverman, *Organizer*

5:30 - 7:30

**ORGN 569.** Synthesis of a water-soluble cubic porphyrin-based metallocomplex via click-chemistry. **A.R. Metell, J.D. Thoburn**

**ORGN 570.** Synthetic steps toward a more soluble porphyrin-based M<sub>4</sub>Por<sub>6</sub> metallocube. **M. Mitchler, J.D. Thoburn**

**ORGN 571.** Pasteur's quairacemates: A new look at an old story. **E.N. Pinter, K.A. Wheeler**

**ORGN 572.** Molecular recognition boundaries of diarylamide quairacemates. **I.C. Tinsley, B.L. Wagner, K.A. Wheeler**

**ORGN 573.** Deconstructing crystal assemblies of 5-phenyl-1,3-dioxolan-4-ones using molecular shape. **K.A. Wheeler, M.L. Grant**

**ORGN 574.** Tuning the optical properties of perylenemonoimide and the binding ability with cucurbit[8]uril via 9-position substitution. **L. Huang, G.H. Aryal, K.W. Hunter**

**ORGN 575.** Strong fluorescent host-guest complexes based on cucurbit[8]uril and phenylalkyl quaternized perylenemonoimides. **G.H. Aryal, L. Huang, K.W. Hunter**

**ORGN 576.** Separation of CO<sub>2</sub> from ambient air using a guanidine ligand. **C. Seipp, N.J. Williams, M. Kidder, R. Custelcean**

**ORGN 577.** Self-assembly leads to recognition of divalent metal cation and tetrahedral divalent oxoanion using ditopic receptor. **S. Jansone-Popova, A. Thevenet, R. Custelcean, B.A. Moyer**

**ORGN 578.** Synthesis of tetracyanoazulene as a guest for self-assembled Zn-porphyrin supramolecular cubes. **C.F. Ancayas, J.D. Thoburn**

**ORGN 579.** Improved syntheses of tetraaminophenylporphyrin for use in supramolecular metallocubes. **P. Patel, J.D. Thoburn**

**ORGN 580.** Using <sup>19</sup>F NMR spectroscopy to assess the strength of aromatic pi-pi interactions. **S.M. Strickland, P. Li, K.D. Shimizu**

**ORGN 581.** Sensor of chirality and enantioselectivity for enantio-enriched molecules containing amines, alcohols, and carboxylic acids. **J. Zhang, H. Gholami, M. Chun, B. Borhan**

**ORGN 582.** Self-folding multi-metal scaffold coordinator for hydrocarbon oxidation. **M. Mettry**

**ORGN 583.** Synthesis of functionalized NHC-capped  $\alpha$ -cyclodextrin metal complexes. **S.J. Bernardino, M. Sollogoub**

**ORGN 584.** Graphene oxide-probe conjugate for the selective detection of pyrophosphate. **J.I. Hong, D. Lee**

**ORGN 585.** Self-assembly of asymmetrically functionalized perylene diimide small molecules into well-defined structures. **R. Matthews, J. Swisher, M. Tickerhoof, B. Rodier, E. Young, E. Pentzer**

**ORGN 586.** Ester-based synthetic information molecules. **F.T. Szczypinski, C.A. Hunter**

**ORGN 587.** Synthesis and self-assembly of amphiphilic BINOLs in water. **F. Tosi, J. Chen, B. Feringa**

**ORGN 588.** Synthesis of self-assembled bisosette supramolecules. **c. Iqci, Y. Fan, A. Gonzales, K. Temburnikar, H. Fenniri, G.E. Gunbas**

**ORGN 589.** Synthesis and characterization of a new generation of molecular clips and their metal complexes. **M. Alaparthy, A.G. Sykes**

**ORGN 590.** Supramolecular approaches to the protecting group chemistry. **V. Ramalingam**

**ORGN 591.** New class of crown ether- ver-dazyl derivatives for sensing applications. **D.J. Brook, V. Balasubramanian**

**ORGN 592.** Functionalized calixarenes: Synthesis, characterization and anion sensing applications. **N. Edwards, F. Liu, D. Schnable**

**ORGN 593.** Controlling the conformations of molecules inside nano-space towards molecular protection and unique reactions in confined media. **K. Wang, B.C. Gibb**

**Section F**

Moscone Center  
Hall D

**Nanomaterials**

S. M. Silverman, *Organizer*

5:30 - 7:30

**ORGN 594.** Synthesis of covalent organic frameworks for the upconversion of photons with nanocrystal light absorbers. **T.E. Dorado, X. Li, M.L. Tang**

**ORGN 595.** Synthesis of calamitic mesogenic organic small molecules and their influence on the properties of CdSe/ZnS core-shell quantum dot nanocomposites. **G.I. Warren, A. Keshavarz, S. Riahinasab, A. Elbaradei, L. Hirst, B.J. Stokes**

**ORGN 596.** Environmentally benign semi-fluorinated amphiphiles for drug delivery. **M. Fleetwood, A. McCoy, S. Mecozzi**

**ORGN 597.** Withdrawn.

**ORGN 598.**  $\pi$ -Conjugated polycyclic molecular systems and their supramolecular assemblies. **H. Sims, H.P. Rathnayake**

**ORGN 599.** Withdrawn.

**ORGN 600.** Evidence of splitting 1,2,3-triazole into alkyne and azide by low mechanical force in the presence of other covalent bonds. **A. Khanal**

**ORGN 601.** New access to GNRs: Conversion of diarylpolydiacetylene polymers to graphene nanoribbons via mild heating. **R. Jordan, R. Mccurdy, S. Khan, Y.F. Rubin**

**Section G**

Moscone Center  
Hall D

**Peptides, Proteins & Amino Acids**

S. M. Silverman, *Organizer*

5:30 - 7:30

**ORGN 602.** Improving peptide purification via flash column chromatography by modulating mobile phase pH. **E. Denton, J.R. Bickler**

**ORGN 603.** Proteolytic stabilization of  $\beta$  hairpins by  $\alpha,\beta$ -dehydroamino acids. **K.G. Webber, A. Jalan, S.L. Castle**

**ORGN 604.** Impact of peptide structure on proximity-driven reactivity with bifunctional helical catalysts. **B. Masino**

**ORGN 605.** Detecting amyloid oligomer assembly in a chemical model system. **S. Yoo, P.J. Salveson, A. Kreuzer, C.H. Hart, J.S. Nowick**

**ORGN 606.** X-ray crystallographic structures of a trimer, dodecamer, and annular pore formed by an A $\beta$ <sub>17-36</sub>  $\beta$ -hairpin. **A. Kreuzer, I.L. Hamza, R.K. Spencer, J.S. Nowick**

**ORGN 607.** Anion binding by N-protected fluorescent citrulline. **M. Muhammad, W.E. Allen**

**ORGN 608.** Where the glow shouldn't go: Fluorescent arginine inside of membranes. **S. Marshall, W.E. Allen**

**ORGN 609.** Excited-state properties of fluorescent arginine: Toward light-promoted cellular penetration. **M. DiVittorio, W.E. Allen**

**ORGN 610.** Stabilizing the collagen triple helix with a ruthenium(II) anchor. **P. Banzon, W.E. Allen**

**ORGN 611.** Silver(I)-promoted asparagine-based peptide ligation employing an N-terminal asparagine thioamide. **K. Shang, C. Hutton**

**ORGN 612.** Structure activity relationship study of amino acid sulfonamide hydroxamic acid inhibitors for the botulinum neurotoxin LC. **S.L. Rodriguez-Beltran, T.K. Lien, N.T. Salzameda**

**ORGN 613.** Design and synthesis of fibronectin-targeted peptide anticancer drug conjugates for targeted chemotherapy of prostate cancer. **S. Eun Park, M. Bisoffi, K. Parang, R.K. Tiwari**

**ORGN 614.** New method for selective imide bond cleavage. **B. Island, C. Hutton**

**ORGN 615.** Withdrawn.

**ORGN 616.** Isolation, purification and partial characterization of *Crotalaria pallida* Ait seed proteins. **D. Bandyopadhyay, S. Ukil, S. Laskar**

**ORGN 617.** Unusual amino acid from the seeds of *Abrus precatorius* Linn.: Isolation, characterization, *in silico* and *in vitro* anticancer evaluation. **D. Bandyopadhyay, O. Espino, S. Laskar**

**ORGN 618.** Synthesis of cyclic peptide conjugate of curcumin and doxorubicin as a bidentate anticancer agent. **S. Darwish, R.K. Tiwari, K. Parang**

**ORGN 619.** Substrate analogs for characterizing the substrate tolerance of *S. pneumoniae* sortase A. **O.G. Banks, J. Antos**

**ORGN 620.** Contribution of bulky  $\alpha$ ,  $\beta$ -dehydroamino acids in the proteolytic stability of beta-hairpins. **A. Jalan**

**ORGN 621.** Modification of human Hsp72 function by electrophilic compounds. **R.E. Connor, A. Lieber**

**WEDNESDAY MORNING**

**Section A**

Moscone Center  
3018/3022

**Nobel Laureate Signature Award for Graduate Education in Chemistry: Symposium in honor of Junqi Li & Martin D. Burke**

*Cosponsored by WCC*

K. B. Hansen, *Organizer*

A. Hill, *Organizer, Presiding*

**9:00 ORGN 622.** Withdrawn.

**9:45 ORGN 623.** Concepts and catalysts for anion-controlled organic synthesis. **D. Toste**

**10:30 ORGN 624. Award Address** (Nobel Laureate Signature Award for Graduate Education in Chemistry sponsored by Avantor™ Performance Materials). Natural productome project: Modularizing and generalizing natural product synthesis. **M.D. Burke**

**11:15 ORGN 625. Award Address** (Nobel Laureate Signature Award for Graduate Education in Chemistry sponsored by Avantor™ Performance Materials). Automated small molecule synthesis via iterative coupling of boronate building blocks. **J. Li, S.G. Ballmer, E. Gillis, S. Fujii, M.J. Schmidt, A. Palazzolo, J.W. Lehmann, G.F. Morehouse, M.D. Burke**

**Section B**

Moscone Center  
3014/3016

**Chemical Biology: Enabling Drug Discovery**

*Cosponsored by BIOL*

*Financially supported by Celgene Corp.*

R. E. Kyne, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:05 ORGN 626.** Translational chemical biology. **C.R. Bertozzi**

**8:50 ORGN 627.** PROTACS: Induced protein degradation as a therapeutic strategy. **C.M. Crews**

**9:35 ORGN 628.** Clickable photoaffinity probes to evaluate the selectivity of  $\beta$ -secretase inhibitors in live cells. **D.S. Johnson**

**10:20** Intermission.

**10:25 ORGN 629.** From serendipity to clinical trials: Discovery of reversible covalent kinase inhibitors. **J.W. Taunton**

**11:10 ORGN 630.** Chemical-proteomic strategies to investigate reactive cysteines. **E. Weerapana**

**11:55** Concluding Remarks.

**Section C**

Moscone Center  
3011

**Heterocycles & Aromatics**

R. D. Broene, *Organizer*

J. R. Vyvyan, *Presiding*

**8:00 ORGN 631.** Accessing chiral pyrrolines via an iron(III)-catalyzed carbonyl-olefin metathesis. **R. Harding, E. Groso, A. Golonka, B. Alexander, C. Schindler**

**8:20 ORGN 632.** Hiyama couplings of oxasilacycloalkenes: Synthesis of trisubstituted Z-styrenes and application to natural product skeletons. **J.R. Vyvyan, C.A. Engles, S.L. Bray, E.D. Wold, C.L. Porter, M.O. Konev**

**8:40 ORGN 633.** Harnessing cascade Suzuki-cyclization reactions of pyrazolo[3,4-b]pyridine for the synthesis of tetracyclic fused heteroaromatics. **F. Popowycz, H. Lavrard**

**9:00 ORGN 634.** Polycyclic aromatic hydrocarbons via iron(III)-catalyzed carbonyl-olefin metathesis. **C. McAtee, P. Riehl, C. Schindler**

**9:20 ORGN 635.** Diastereoselective synthesis of 2,4,6-trisubstituted piperidines via Prins cyclization. **J.A. Hood, M. Donahue**

**9:40 ORGN 636.** Alkylation, arylation, and cyclopropylation of common heterocycles via palladium catalysis. **J. Zhou**

**10:00 ORGN 637.** Stereoselective synthesis of isoxazolidines via copper-catalyzed alkene diamination. **Z. Khoder, C. Wong, S.R. Chemler**

**10:20 ORGN 638.** Redox controlled supramolecular chemistry based on viologen architectures. **J. Weiss, J.A. Wytko, M. Berville**

**10:40 ORGN 639.** Withdrawn.

**11:00 ORGN 640.** Photoluminescent phenalenyl-type radical. **O. Anamimoghadam, Y. Wu, C. Pezzato, M.T. Nguyen, A. Samanta, S. Gozem, L. Mosca, A. Krylov, M.R. Wasielewski, F. Stoddart**

**11:20 ORGN 641.** Synthesis of biologically active marine natural rubrolides. **T.D. Silva, M. Karak, J. Acosta, L.C. Barbosa, J. Boukouvelas**

**Section D**

Moscone Center  
3009

**Molecular Recognition & Self-Assembly**

R. D. Broene, *Organizer*

D. K. Smith, *Presiding*

**8:00 ORGN 642.** Towards the characterization of the redox properties of shape-persistent macrocycles. **J. Dobscha, C. Benson, Y. Liu, A.H. Flood**

**8:20 ORGN 643.** Logic-gated supramolecular disassembly and non-covalent guest release. **J. Gao, X. Liu, H. Scintzi, Z. Jiang, B. Zhao, Y. Xu, X. Guo, S. Thayumanavan**

**8:40 ORGN 644.** Stimuli-responsive self-assembly of organic cage compounds based on tribenzotriquinacenes. **A. Dhara, F. Beuerle**

**9:00 ORGN 645.** Withdrawn.

**9:20 ORGN 646.** General route to expanded helicenes. **G.R. Kiel, T.D. Tilley**

**9:40 ORGN 647.** Cyclic voltammetry studies of a redox-responsive 4 H-bond ureidopyrimidinone alkyl-pyridinium capable of self-dimerization. **G. Darzi, D.K. Smith**

**10:00 ORGN 648.** Synthesis and functional development of Calix[2]triazole[2]arene. **I. Kim, J. Cho, S. Kim**

**10:20 ORGN 649.** Surface imprinted phosphopeptide capture beads. **C. Wierzbicka, S. Torsetnes, O. Jensen, S. Shinde, B. Sellergren**

**10:40 ORGN 650.** Use of targeting motifs to improve oxidative catalytic breakdown of lignin in whole and fractionated biomass. **W.T. Hartwig, J.J. Bozell**

**11:00 ORGN 651.** Colloidal and antibacterial studies of non-conventional polycationic amphiphiles. **K.L. Caran, K. Seifert, K. Feitosa, J. Marafino, E. Rogers, K. Thompson, B. Walsh, S.D. Kendrick, K. McKenna, B. Ashamole, M.K. Lauer, S. Rauer, A. Rister**

**11:20 ORGN 652.** Redox-responsive dimerization in a ferrocene-containing four hydrogen-bond supramolecular assembly. **D.K. Smith, M. Cedano**

**11:40 ORGN 653.** Design and synthesis of BODIPY based two-photo absorbing fluorescent dyes. **M. Shen, X. Gao, X. He, N. Jian, J. Niu, X. Zhu, M. Song**

**Section E**

Moscone Center  
3007

**Total Synthesis of Complex Molecules**

R. D. Broene, *Organizer*

A. Angeles, *Presiding*

**9:00 ORGN 654.** General strategy for the total synthesis of C-19 methyl substituted sarpagine/macrolone indole alkaloids including macrocarpines A-G, peraksine, and dihydroperaksine. **M. Rahman, J.R. Deschamps, J.M. Cook**

**9:20 ORGN 655.** Utilizing a C–C activation/cross-coupling strategy toward the total synthesis of taxagifine. **B.S. Wang, B. Wylers, R. Sarpong**

**9:40 ORGN 656.** Studies toward the total synthesis of nagelamides A and C. **A.K. Herath, M. Bhandari, C.J. Lovely**

**10:00 ORGN 657.** Application of phosphate tethers in polyketide synthesis: Efforts toward the synthesis of (Z)-cryptofoline and (+)-cryptocaryol A-D. **C.N. Ndi, P.R. Hanson**

**10:20 ORGN 658.** Development of modular, pot-economical and library amenable strategies for the streamlined synthesis of bioactive natural products and analogs. **S. Javed, M. Bodugam, A. Ganguly, G. Dissanayake, P.R. Hanson**

**10:40 ORGN 659.** Synthesis of the biselyngbyolides through rapid and convergent synthesis of C1–C13 fragment. **R.G. Thorat, A.M. Harned**

**11:00 ORGN 660.** Enantioselective total synthesis of akuammiline alkaloids (+)-strictamine, (–)-2(S)-cathafoline, and (–)-aspidophylline A. **E. Picazo, N.K. Garg**

**11:20 ORGN 661.** Concise synthesis of illudinine from dime-done. **A.E. Morrison, G.B. Dudley**

**11:40 ORGN 662.** Flavin monooxygenase-mediated enantioselective oxidative dearomatization. **S. Dockrey, A.R. Narayan**

**Section F**

Moscone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer, Presiding*

**8:00 ORGN 663.** Catalytic olefin dicarbofunctionalization. **R. Giri**

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

† Cooperative Cosponsorship

- 8:20 ORGN 664.** Novel application of Cu-Pd dual catalyst system for the cross-coupling of styryltrifluoroborates and amides. **M. Al-Masum**
- 8:40 ORGN 665.** Isothiourea-catalysed enantioselective formal [2+2] cycloaddition of perfluorinated alkyl-aryl ketones and homoanhydrides. **D. Barrios Antúnez, A.D. Smith**
- 9:00 ORGN 666.** Pd-catalyzed reactions of fluorinated enolates. **R.A. Altman**
- 9:20 ORGN 667.** Site-selective C(sp<sup>2</sup>)-H activation enabled by exo-directing mode. **Y. Xu, G. Dong**
- 9:40 ORGN 668.** General platform for the selective methylene C(sp<sup>3</sup>)-H activation of aliphatic amines. **A. Trowbridge, K.F. Hogg, A. Álvarez Pérez, M. Gaunt**
- 10:00 ORGN 669.** Small and uncommon diazoalkanes - applications in organic synthesis. **R.M. Koenigs**
- 10:20 ORGN 670.** Synthesis of azetidine derivatives via palladium-catalysed C(sp<sup>3</sup>)-H functionalisation of aliphatic secondary amines. **M. Nappi, C. He, M. Gaunt**
- 10:40 ORGN 671.** Ion pair-directed regiocontrol in transition-metal catalysis: A meta-selective C-H borylation of aromatic quaternary ammonium salts. **R. Phipps, H.J. Davis, M.T. Mihai**
- 11:00 ORGN 672.** Simple and efficient halogenation of C(sp<sup>2</sup>)-H bonds directed by poorly coordinating functional groups: Scope and mechanistic investigation. **E. Erbing, A. Sanz-Marco, A. Vázquez-Romero, J. Malmberg, M.J. Johansson, B. Martin-Matute**
- 11:20 ORGN 673.** Discovery of a novel diastereoselective cuprate conjugate addition reaction and its application to the multi-kilogram synthesis of a clinical candidate. **S.W. Wright, C. Choi, S. Chung, J.J. Mousseau, B.P. Boscoe, S.E. Drozda, J.D. Trzupke, K.L. Lee**
- 11:40 ORGN 674.** Copper-catalyzed cyclization reaction for the synthesis of bicyclic  $\alpha$ -carbonyl furan derivatives. **K. Hamal, W. Chalifoux**

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
3018

#### Materials, Devices & Switches

R. D. Broene, *Organizer*  
D. G. Patel, *Presiding*

- 1:00 ORGN 675.** Simple synthesis of complex molecular acceptors for high-performance air-processed and air-tested fullerene-free organic solar cells. **S.M. McAfee, S. Dayneko, P. Josse, P. Blanchard, C. Cabanetos, G. Welch**
- 1:20 ORGN 676.** Design and synthesis of phenothiazine based D- $\pi$ -A chromophores exhibiting mechanofluorochromism and aggregation-induced emission. **T. Sachdeva, S. Bishnoi, M.D. Milton**
- 1:40 ORGN 677.** Self-healing molecular crystals. **P. Commins, H. Hara, N. Pance**
- 2:00 ORGN 678.** Movement of light-driven molecular motors on surfaces. **H. Heideman, M. Stoehr, B. Feringa**

- 2:20 ORGN 679.** Photomechanical molecular crystals based on anthracene derivatives. **F. Tong, C.J. Bardeen, L. Zhu, R.O. Al-Kaysi, M.P. Hanson**
- 2:40 ORGN 680.** Tuning charge carriers using electron deficient thiophenes. **J. Low, B. Capozzi, J. Cui, S. Wei, L. Venkataraman, L. Campos**
- 3:00 ORGN 681.** Development of selective and affordable small molecule sensors for an array of applications. **Y.J. Diaz, Z.A. Page, A. Knight, N.J. Treat, J.R. Hemmer, C.J. Hawker, J. Read De Alaniz**
- 3:20 ORGN 682.** Withdrawn.
- 3:40 ORGN 683.** Medium-dependent emission color of 2-(2-Hydroxyphenol) Benzoxazole (HBO) and click triazole derivatives. **Q.J. Meisner, J.V. Accardo, L. Zhu**
- 4:00 ORGN 684.** Redox active quinone based diarylethenes for light activated advanced materials. **D.G. Patel**

### Section B

Moscone Center  
3014

#### Peptides, Proteins & Amino Acids

R. D. Broene, *Organizer*  
R. E. Moellering, *Presiding*

- 1:00 ORGN 685.** Facile method for the hydrolysis of a nickel Schiff-base complex. **C. Bontrager, T. Geibel, G. Lengyel**
- 1:20 ORGN 686.** Investigation of weak interactions using a  $\beta$ -hairpin peptide model system. **E.R. Danelius, H. Andersson, P. Jarvoll, U. Brath, M. Erdelyi**
- 1:40 ORGN 687.** Versatile, effective formation of biologically active single- and multi-loop peptide macrocycles via hydrazone condensation. **J.F. Reuther, E.T. Hernandez, I. Kolesnichenko, E.V. Anslly**
- 2:00 ORGN 688.** Applying molecular dynamics simulations to engineer transaminase enzymes. **J.N. Sanders, E.L. Noey, G. Jimenez-Oses, S. Osuna, K.N. Houk**
- 2:20 ORGN 689.** Withdrawn.
- 2:40 ORGN 690.** Stabilization, assembly, and toxicity of trimers derived from A $\beta$ . **A. Kreutzer, S. Yoo, R.K. Spencer, J.S. Nowick**

- 3:00 ORGN 691.** Withdrawn.
- 3:20 ORGN 692.** Introduction of  $\alpha$ -(aminomethyl) phenyl-boronic acids into peptides: Alkylation of secondary amines. **E.T. Hernandez, I. Kolesnichenko, J.F. Reuther, E.V. Anslly**
- 3:40 ORGN 693.** Efforts toward the synthesis of collision-induced dissociation-cleavable protein cross-linkers. **S. Block, C. Yu, L. Huang, S.D. Rychnovsky**
- 4:00 ORGN 694.** Stabilized  $\alpha$ -helix-turn- $3_{10}$ -helix inhibitors of RAB25 target context-specific phenotypes in cancer. **R.E. Moellering**
- 4:20 ORGN 695.** Triphenylmethane dyes that recognize oligomers of A $\beta$  derived peptides. **P.J. Salvesson, A. Thuy-Boun, A. Kreutzer, S. Yoo, J.S. Nowick**

### Section C

Moscone Center  
3011

#### Heterocycles & Aromatics

R. D. Broene, *Organizer*  
J. J. Reczek, *Presiding*

- 1:00 ORGN 696.** In silico virtual and molecular docking screenings of pyrazole derivatives as estrogen antagonist. **L. Al-Tamimi, A. Naqvi**
- 1:20 ORGN 697.** Synthesis of 4,8-bis(2-decyloxy)benzo-[1,2-b:4,5-b'] dithiophene-1,1,5,5-tetraoxide (BDTS) based organic semiconductors via copper-catalyzed C-H activation. **D. Khambhati, T.L. Nelson**
- 1:40 ORGN 698.** Synthesis of halogenated thiophenes, selenophenes, and benzo[b]selenophenes via environmentally benign halocyclization using sodium halides. **K. Giraudy, J. Morgan, T. Kesharwani**

- 2:00 ORGN 699.** Selective functionalization of pyridines and diazines via heterocyclic phosphonium salts. **A. McNally, M. Hilton, R. Dolewski, L. Koniarczyk, X. Zhang, A. Overgard, J. Dowling**
- 2:20 ORGN 700.** Synthesis, electrochemistry and antimicrobial properties of 1,2-benzisoxazole 2-oxides. **M.G. Kociotek, K. Miller**

- 2:40 ORGN 701.** Process development of GDC-0032 (Taselisib): Magnesium ethoxide promoted amidine formation and its application in fused imidazole synthesis. **D.R. Beaudry, D.E. Carrera, S. Malhotra, R. Angelaud**

- 3:00 ORGN 702.** Ferrocenyl chalcone salt derivatives: A study of their possible biological applications. **S.M. Delgado-Rivera, G.E. Pérez-Ortiz, I. Montes-González, A.R. Guadalupe-Quiñones, D.J. Sanabria Ríos, A. Serrano-Brizuela, E. Colón-Lorenzo, A. Baerga-Ortiz, Y. Morales-Lozada**

- 3:20 ORGN 703.** Radical chaperone-mediated directed C-H functionalization. **D.A. Nagib**
- 3:40 ORGN 704.** Efficient synthesis of highly-substituted anthraquinones. **J.J. Reczek**

- 4:00 ORGN 705.** OBO-methyl-ketone: A versatile pyruvate equivalent. **H. Esteves, P. Smith, T.J. Donohoe**

- 4:20 ORGN 706.** Heterocycle synthesis from quinols. **J. Wu, S. Zheng**

- 4:40 ORGN 707.** Catalytic Friedel-Crafts route into novel 3,3-diaryloxetane and dihydrobenzofuran motifs. **R.A. Croft, J.J. Mousseau, C. Choi, J.A. Bull**

### Section D

Moscone Center  
3009

#### Physical Organic Chemistry: Calculations, Mechanisms, Photochemistry & High-Energy Species

R. D. Broene, *Organizer*  
B. F. Gherman, *Presiding*

- 1:30 ORGN 708.** Dissociative electron-transfer reactions of polybrominated aliphatic electrophiles. **S.V. Rosokha**

- 1:50 ORGN 709.** Steric effects in the computational modeling of cyclization reactions of enyne-enones. **K. Hoang, C.Q. Li, B.F. Gherman, J.D. Spence**

- 2:10 ORGN 710.** Constructing a free-energy map for the initial steps of glycine: Glycolic acid co-oligomerization. **J. Kua**

- 2:30 ORGN 711.** Mechanistic insights on the transition-metal-catalyzed C-H amination reactions based on DFT studies. **X. Bao**

- 2:50 ORGN 712.** Photochemistry of crystalline 2-azidobiphenyls to form crystalline carbazoles: Scope, laser flash photolysis and solid-to-solid studies. **T. Chung, M.A. Garcia-Garibay**

- 3:10 ORGN 713.** Novel mechanism of molecular rotor fluorescence: Suppression of Kasha's rule. **M.E. Cousins, H. Qian, I. Aporahman, M.D. Liptak**

- 3:30 ORGN 714.** Selective microwave heating of homogeneous organic reaction mixtures. **G.B. Dudley, A.E. Stiegman**

- 3:50 ORGN 715.** Using 19F and 1H NMR to determine the strength of intramolecular hydrogen bonds. **R.E. Rosenberg**

### Section E

Moscone Center  
3007

#### Total Synthesis of Complex Molecules

R. D. Broene, *Organizer*  
T. G. Minehan, *Presiding*

- 1:30 ORGN 716.** Synthetic efforts toward the total synthesis of tubingensin B. **J. Kim, N.K. Garg**

- 1:50 ORGN 717.** Brocazine F: Studies towards total synthesis and divergence into screening library construction. **A.J. Lansakara, W. Hulangamuwa, R. Rafferty**

- 2:10 ORGN 718.** Late-stage strategies for the synthesis of ambiguous natural products. **R.E. Johnson, M. Hartmann, L. Lang, S. Sawano, R. Sarpong**

- 2:30 ORGN 719.** Synthesis of synoxazolidinone C. **N. Perry, J.G. Pierce**

- 2:50 ORGN 720.** Synthesis of complex molecules: Total synthesis and biological evaluation of Reniochalstatin E and analogs and synthetic work towards Laguanamide C. **A.J. Fatino, C. Weese, G. Baca, A.I. Lansakara, R. Rafferty**

- 3:10 ORGN 721.** Total synthesis of hortonones A-C. **T.G. Minehan, H. Stambulyan**

- 3:30 ORGN 722.** Studies toward a scalable second-generation total synthesis of the aplyronines as novel payloads for antibody-drug conjugates. **N. Anzicak, S.R. Williams, M. Housden, I. Paterson**

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**3:50 ORGN 723.** Enantioselective, convergent synthesis of the inelanganolide core by a tandem annulation cascade. J.L. Roizen, R.C. Smith, A.C. Jones, S. Virgil, B.M. Stoltz, R. Craig

**4:10 ORGN 724.** Studies towards the total synthesis of Elisabethin A. B. Schröder, T. Gaich

## Section F

Moscone Center  
3005

### New Reactions & Methodology

R. D. Broene, *Organizer*  
G. Cuny, *Presiding*

**1:00 ORGN 725.** Transition-metal-free synthesis of substituted aminocyclopropanes. P. Cyr, A. Côté-Raiche, S.M. Bronner

**1:20 ORGN 726.** 1,2,3-Triazines: Powerful reagents for heterocycle synthesis. C.M. Glinkerman, D.L. Boger

**1:40 ORGN 727.** Proton activated reactions of cyclopropylamine. J.T. Ippoliti, G.W. Larson

**2:00 ORGN 728.** Asymmetric vinyloligous aza-Darzens approach towards the synthesis of vinyl aziridines. P. Das, I. Chogii, J.T. Njardarson

**2:20 ORGN 729.** Lewis acid catalyzed carbonyl-olefin metathesis of aliphatic ketones. H. Albright, P. Riehl, C. McAtee, L. Karp, G. Rosenhauer, C. Schindler

**2:40 ORGN 730.** *o*-Substituted anilines as a building block for the synthesis of aza heterocycles under transition-metal-free conditions. G. Senadi, J. Wang

**3:00 ORGN 731.** Pyrimidine nucleosides with reactive  $\beta$ -keto sulfonyl group at C5 position. S. Suzoi, A. Howlader, S.F. Wnuk

**3:20 ORGN 732.** Development of a green and sustainable commercial manufacturing process for the antibiotic Zerbaxa™. H. Ren

**3:40 ORGN 733.** One pot 1,3-amino alcohol synthesis via a hydrogen borrowing strategy. R. Whittaker

**4:00 ORGN 734.** Acid-catalyzed cyclizations of  $\alpha$ -hydroxymethyl cyclopropanes. M. Sandridge, S.A. France

**4:20 ORGN 735.** Enantioselective heterodimerization of 1,3-dienes and acrylates. S.M. Jing, V. Balasanthiran, T. RajanBabu

## WEDNESDAY EVENING

### Section A

Moscone Center  
West Hall

### Heterocycles & Aromatics

S. M. Silverman, *Organizer*

**7:00 - 9:00**

**ORGN 736.** Indole formation via palladium-catalyzed amination under mild pressure of 5% oxygen. K.B. Clagg, S.G. Koenig

**ORGN 737.** Process optimization: Synthesis of a heterocyclic intermediate toward a RORc ligand. J. Xu, L.E. Sirolis, R. Angelaud, D. Lao, F. Gosselin

**ORGN 738.** Thermolysis reactions of phenylethylamino acid amides. M. Casale, D.A. Hunt

**ORGN 739.** Base-mediated cyclization reaction of 2-(5-hydroxy-1-pentynyl) benzonitriles to 4-amino-2,3-dihydro-naphtho[2,3-*b*]furanes and synthesis of furanonaphthoquinones. M. Wu

**ORGN 740.** Synthesis of spirocyclic pyranoarenes via enal trapping of HDDA-generated benzyne. C. Oswood, T. Wang, T.R. Hoye

**ORGN 741.** Building blocks for high temperature PEM fuel cells – Synthesis and characterization of crosslinking PAHs. M. Zeyat, D. Lentz

**ORGN 742.** Intramolecular click reaction using carbocontiguous precursors. F.A. Luzzio, P.C. Patil

**ORGN 743.** Atom-economical functionalization of pyrrole scaffolds: Synthesis of dihydropyridazines and tetrahydroindolizines enabled by titanocene(III) catalysis. S. Hildebrandt, A. Gansäuer

**ORGN 744.** Thermal instability of 2,4 and 2,6-*N*-alkylamino disubstituted and 2-*N*-alkylamino substituted nitrobenzenes in weakly alkaline solution: Sec-amino effect. D.K. Mohanty, C. Walczak, A. Badour, C. Wade, M. Yonkey, T. Payne

**ORGN 745.** Expedient access to highly functionalized iodoarylated allylic lactams: Application to the synthesis of macrocyclic enamidynes. B. Mansker, T. Beng

**ORGN 746.** Modular access to potentially versatile 3-azaheterocyclic 1,5-enynes using cyclic  $\alpha$ -chloro enoformamides. S.A. Langevin, T. Beng

**ORGN 747.** Synthesis of 1-azaspiro[4.5]deca-1,3-dienes from *N*-propargylic  $\beta$ -enaminones. E. Karadeniz, M. Zora

**ORGN 748.** Synthesis of propargyl-substituted pyrroles. E.S. Yilmaz, Y. Kelgokmen, M. Zora

**ORGN 749.** Synthesis of heterocarbaporphyrins from carbatripyrrin intermediates. T.J. Smolczyk, T.D. Lash

**ORGN 750.** Synthesis of azulopyrpyrin dyads. M. Metallo, T.D. Lash

**ORGN 751.** Synthesis and metalation of adj-dicarbaporphyrins. W.T. Darrow, T.D. Lash

**ORGN 752.** Development of new routes for the synthesis of carbaporphyrins and carbachlorins. N. Sahota, T.D. Lash

**ORGN 753.** Solubility switchable materials for printed organic electronics. M. Ackermann, J. Freudenberg, D. Jaensch, U. Bunz, K. Muellen

**ORGN 754.** Finally an access to unsubstituted and structurally well-defined Poly-(Para-Phenylene) (PPP). A. Abdulkarim, F. Hinkel, D. Jaensch, J. Freudenberg, F. Gölling, K. Muellen

**ORGN 755.** Synthesis of heterocycles via transition metal catalyzed hydroarylation. S. Acharya, P. Zhao

**ORGN 756.** Terephthalic acid analogs from cellulosic biomass. E.M. Serum

**ORGN 757.** Synthesis of oxygen analogues of a promising anticancer drug. F.M. Watts, K.D. Berlin, D. Benbrook, R.A. Bunce

**ORGN 758.** Bismuth(III) triflate catalyzed tandem esterification-Fries-oxa-Michael route to 4-chromanones. R. Thing, K. Meraz, K. Gnanasekaran, R.A. Bunce

**ORGN 759.** Aromatic bromination in preference to addition to an alkene. A.K. Giebink, D.E. Lewis

**ORGN 760.** Ultra-narrow low-landgap graphene nanoribbons from bromopyrenenes: Synthesis and terahertz-spectroscopy. D. Jaensch, I. Ivanov, M. Baumgarten, M. Bonn, K. Muellen

**ORGN 761.** Key improvements towards the preparation of antiretroviral drug tenofovir. S. Korwar, E. Yu, A.R. Ehle, J. Verghese, D. Rivalti, F. Gupton

**ORGN 762.** Forgotten treasures: Synthesis and properties of *N*-substituted porphyrins. S.S. Bernhard, M. Roucan, M.O. Senge

**ORGN 763.** Synthesis of oxetan-3-sulfides and sulfones as novel modules for medicinal chemistry. R.A. Croft, J.J. Mousseau, C. Choi, J.A. Bull

**ORGN 764.** Withdrawn.

**ORGN 765.** Synthesis and characterization of the synthon 1,2-di(4-pyrindinyl)ethane-1,2-dione dihydrochloride. J.C. Martinez, B. Coleman, R.J. Morgan, M.P. Castellani

**ORGN 766.** Synthesis of novel fluoreno-fluorene-based structures. A. Hacker, M. Pavano, S. Genis, D.K. Frantz

**ORGN 767.** NMR spectroscopic study of the identity and interconversion of conformers of 2-oxo-*p*-tert-butyltetramethoxycalix[4]arene. J.L. Fantini

**ORGN 768.** Toward the templated synthesis of cyclophenylene structures comprising para- and meta-linkages. E. Hajj, M.B. Woodie, P.J. Somerville, S.H. Vansadadia, Z.T. Sherman, K.R. Negri, R.R. Ponce, D.K. Frantz

**ORGN 769.** Pyridinium zwitterion as a new dipole for the construction of heterocycles. J. Lee, D. Ko, J. Shim, J. Lee, E. Yoo

**ORGN 770.** Effects of substituents on s-triazine reactivity. S. Özcan, A.E. Acar

**ORGN 771.** HOF/CH<sub>3</sub>CN: Excellent oxygen transfer agent for heterocycles. S. Rozen

**ORGN 772.** Convenient synthesis of dihalo-substituted benzo[*b*]thiophenes via electrophilic cyclization. A. Hayes, R. Romero, C. Kornman, A. Tonnaer, T. Kesharwani

**ORGN 773.** Approaches to synthesizing tetrahydrobenzazepine systems. K. Dickson, L.M. Bradley

**ORGN 774.** Synthesis of novel exocyclic  $\alpha$ , $\beta$ -unsaturated dihydrolevoglucosene derivatives via direct aldol condensation. R. Hohol, Z.J. Witzczak, D.E. Mencer

**ORGN 775.** Synthesis of chiral conformationally constrained diarylether cyclophanes. B. Lindquist-Kleissler, D. Chadeayne

**ORGN 776.** Sterically overcrowded distyrylbenzenes: Tuning emission properties and photoreactivity. J. Freudenberg, F. Rominger, U. Bunz

**ORGN 777.** Design, synthesis and characterization of novel thiazole based molecules. V. Patil, S.A. Patil, S. Patil

**ORGN 778.** One-pot *N*-alkylation, ketonation and C-enolate alkylation of readily affordable  $\gamma$ -amido esters: Application to the synthesis of functionalized lactams. J. Brooks, T. Beng, E. O'Claire

**ORGN 779.** Functionalized tetraazapentacenes as electron-transport materials. H. Reiss, T. Fritzensmeier, T. Marszałek, W. Pisula, P. Scharfer, U. Bunz, F. Hinkel

**ORGN 780.** Reaction of oximes with 4-phenyl-1,2,4-triazoline-3,5-dione. A.W. Jensen, D.K. Mohanty, W.L. Dilling, D. Flotka, T. Xu, D. Saults

**ORGN 781.** Troponone iron carbonyl complex as a platform for the synthesis of bridged nitrogen heterocycles. D. Griffith

**ORGN 782.** Tuning the conformational equilibria in saturated heterocycles through the manipulation of a non-classical CH---O hydrogen bond: The importance of electrostatic interactions within small molecules. K.M. Lambert, W.F. Bailey, Z.D. Stempel, K.B. Wiberg, B.Q. Mercado

**ORGN 783.** Synthesis of biphenyl and terphenyl precursor for  $\pi$ -conjugated Macrocyclic Molecular Belts (cMMBs). T. Olson, J. Lee, L. Fang

**ORGN 784.** Intramolecular de Mayo photocyclization: The total synthesis of hippadine and pratossine. C.I. Ochoa, D.E. Minter, A. Haugen

**ORGN 785.** Study of novel heterocycles for metal ion separation. J. Shih

**ORGN 786.** Progress toward Au-catalyzed [4+1] cycloaddition of vicinally functionalized tertiary propargylic lactamoyl alcohols with diazoacetates. M.S. Khim, T. Beng

**ORGN 787.** Azo dyes as ionochromic anion indicators. S. McKee, N.M. Paul

**ORGN 788.** Improved method for the synthesis of 5,10,15,20-tetrakis(3,5-diacetamido-4-pyridyl)porphyrin. S. Singh

**ORGN 789.** Parallel synthesis of aurones. Z.E. Taylor, S.T. Handy

**ORGN 790.** First report of diastereodifferentiation of 2-azetidinones towards anticancer activity: Design, synthesis and *in vitro* evaluation. F. Olazarán-Santibáñez, D. Bandyopadhyay, P. Carranza-Rosales, G. Rivera, I. Balderas-Rentería

**ORGN 791.** Microwave-assisted green synthesis of 1,3-thiazolidin-4-ones: An Insight. D. Bandyopadhyay, J. Strong

## Section B

Moscone Center  
West Hall

### Flow Chemistry & Continuous Processes

S. M. Silverman, *Organizer*

**7:00 - 9:00**

**ORGN 792.** Continuous processing approaches for prebiotic syntheses of 2-amino-oxazole and subsequent ribo/arabino furanosyl amino-oxazolines. J. Kading, A. Evans

**ORGN 793.** Continuous bioprocessing/processing (enz-flow) approaches toward levomilnacipran synthesis. M.G. Nguyen, C. Ayoub, A.C. Evans

**ORGN 794.** Towards a novel synthesis of levomilnacipran under continuous processing/bioprocessing conditions - reduction of the ester intermediate. D. Sarmiento, C. Ayoub, A. Evans

**ORGN 795.** Effects of low gravity on chemical transformations. A. Ku

**ORGN 796.** Multi-step continuous flow synthesis of diphenhydramine. V. Vu, D. Stout, J. Lim, G.W. Faris, J.P. Haushalter, J.P. Malerich, N. Collins

**ORGN 797.** Multi-step continuous flow synthesis of fluconazole. J. Szeto, V. Vu, D. Stout, J. Lim, G.W. Faris, J.P. Haushalter, J.P. Malerich, N. Collins

**ORGN 798.** Trans-hexenal preparation using microflow chemical system. K. Wang, L. Zhang, G. Luo

‡Cooperative Cosponsorship

ORGN **799.** Synthesis of silylated diazo reagents via continuous flow synthesis. **C. Audubert, O. Gamboa, H. Lebel**

**Section D**

Moscone Center  
West Hall

**Physical Organic Chemistry: Calculations, Mechanisms, Photochemistry & High-Energy Species**

S. M. Silverman, *Organizer*

7:00 - 9:00

ORGN **800.** Fate of green fluorescent protein chromophore analogues with a positive charge at the phenyl-like group. **J. Xu, Z. Zhang, R. Sung, K. Sung**

ORGN **801.** Reactivity and dynamics of chlorocarbene additions to dibenzocyclooctyne. **A. Nadeem, A. Urquilla, Y. Saperstein, V. Estes, A. Scorese, E. Dalchand, S. Tsuno, D.C. Merrer**

ORGN **802.** Effect of chloro-stabilization on free radical halogenation. **A.J. LaPorte, M. Mielke, J.A. Bjorklund, D.J. Rausch**

ORGN **803.** Synthesis, photophysical and computational studies of a series of linear triazines. **M.J. Voegtle, K. Chikami, R.A. Isovitsch**

ORGN **804.** Synthesis, photophysical, and computational studies of a series of 1,4-diaryl-1,3-butadiynes. **M. San Angelo, R.A. Isovitsch**

ORGN **805.** Intramolecular oxidative cyclization reactions of oximes and oxime ethers using alkenes as a potential nucleophiles or radical traps. **S. Baker, N. Armada, E. Ho, A. Petit, P. De Lijser**

ORGN **806.** Optimization and characterization of oxidative cyclization reactions of benzaldehyde oximes and oxime ethers with built-in heteroaromatic rings. **C. Taylor, A. Alshreimi, P. De Lijser**

ORGN **807.** Mechanistic aspects of the catalytic asymmetric allylboration of indoles and dihydroquinolines. **C. Diner, M. Alam, S. Jonker, K. Szabo**

ORGN **808.** Isolation and reactivity of trifluoromethyl iodonium salts. **J.N. Brantley, A.V. Samant, D. Toste**

ORGN **809.** Mechanistic investigation of Au(I)-phosphine catalyzed cycloisomerizations leads to a highly-selective novel Buchwald-type ligand. **A.H. Christian, Z.L. Niemeyer, M.S. Sigman, D. Toste**

ORGN **810.** Kinetic analysis of substituted tetraphenylacetones via Laser Flash Photolysis (LFP) in nanocrystalline suspensions. **J. Park, M.A. Garcia-Garibay**

ORGN **811.** Multiple oxidation pathways of photo-generated manganese(V)-oxo corroles. **N. Lee, K. Kwong, D. Ranburger, R. Zhang**

ORGN **812.** Computational study of heavy-atom tunneling in the Möbius  $\pi$ -bond shifting in [12]- and [16] annulene. **C.S. Michel, J.K. Arbitman, I. Castano, W.L. Karney, C. Castro**

ORGN **813.** Theoretical study of violapterin in gas phase and aqueous solution. **J.H. Kim**

ORGN **814.** Probing the effects of 1,3-cyclohexadiene substitution on the rates of retro-nitroso-Diels-Alder reactions. **J. Wong, B.E. Lynde, N.A. Yakelis**

ORGN **815.** N-substituted nitro-soguanidine Diels-Alder adducts: Synthesis and substituent effects on the rates of retro-Diels-Alder reactions. **M.N. Radford, N.A. Yakelis**

ORGN **816.** Hyperconjugative, secondary orbital, electrostatic, and steric effects on the reactivities and *endo* and *exo* stereoselectivities of cyclopropene Diels-Alder reactions. **B. Levandowski, K.N. Houk**

ORGN **817.** Computational studies on the mechanism of base-promoted rearrangement-cyclization of allylic esters. **P. Yu, W. Li, K.N. Houk**

ORGN **818.** Withdrawn.

ORGN **819.** Amide bond modulation: Cyclic amines and manipulating energy landscapes for conformational preferences using DEET analogs as a model system. **J.G. Guerra, D. Manning, B. Mason, P. Kumar, B. Bajwa, S. Thompson, K. Maitra, K.V. Krishnan, S. Maitra**

ORGN **820.** Computational elaboration of the mechanism of exocyclic ring formation of  $\alpha,\beta$ -unsaturated carbonyls with guanine. **D.W. Boerth, V.K. Sammeta, C. Paquin**

ORGN **821.** Physical organic chemistry of phenylenevinylene systems for applications as MALDI matrices, photocatalyst and chemosensors. **C.A. Sierra, J. Scaiano, C. Ochoa-Puentes, M.Y. Combariza, C. Blanco-Tirado**

**Section E**

Moscone Center  
West Hall

**Total Synthesis of Complex Molecules**

S. M. Silverman, *Organizer*

7:00 - 9:00

ORGN **822.** Recent progress toward the total synthesis of the arcutine family of natural products. **K. Owens, Y. Hirooka, S. Ueno, R. Sarpong**

ORGN **823.** Synthetic studies on guaipyridine alkaloids: Rupestines B-D and G. **S. Grosslight, H. Spargo, P. Shelton, J.R. Vyvyan**

ORGN **824.** Design and synthesis of archazolid-inspired V-ATPase inhibitors. **A.M. Craig, G.W. O'Neil**

ORGN **825.** Scalable copper mediated C-H hydroxylation: Synthesis of polyhydroxylated steroids. **Y. See, A. Herrmann, R.A. Trammell, N. Xie, Y. Aihara, I. Garcia Bosch, P.S. Baran**

ORGN **826.** Electrochemically promoted divergent synthesis of diterpene. **R. Merchant, K.M. Oberg, A. Novak, P.S. Baran**

ORGN **827.** Progress towards the total synthesis of himeradine **A. J. DeForest, X. Li, S.D. Rychnovsky**

ORGN **828.** Total synthesis of lycoricidine through chemical dearomatization of bromobenzene. **E.H. Southgate, D.R. Holycross, D. Sarlah**

ORGN **829.** Synthesis of antimalarial onocerane triterpene cupacinoxepin. **M. Christmann, F. Bartels**

ORGN **830.** Synthesis of desulfated 2-*epi*-symbioimine and related compounds via a highly stereoselective intramolecular Diels-Alder cycloaddition. **J.J. Chruma, M. Xiang, Y. Wu, Z. Wang**

ORGN **831.** Synthesis of beta-lactam analogs of the proteasome inhibitor belactosin A. **N.K. Dunlap, C. Harmon**

ORGN **832.** Synthesis of optically active crinine-type alkaloid precursors. **S.S. Bernhard, N. Kümmerer, M.O. Senge, U. Nubbemeyer**

ORGN **833.** Towards a total synthesis of cladospins E and G. **H.E. Burdge, J. Mease, K.P. Reber**

ORGN **834.** Synthetic studies towards the D ring of pectenotoxin-4. **M.S. Richardson, C.J. Tame, T.J. Donohoe**

ORGN **835.** Cyclization strategies for the total synthesis of biologically active natural products. **Z. Shultz, J. Leahy**

ORGN **836.** Towards the total synthesis and structural determination of patellazole B. **A. Phillips, T. Balan, M. Anketell, S. Williams, I. Paterson**

ORGN **837.** Withdrawn.

ORGN **838.** Progress towards the total synthesis of zamimaphidin A. **I. Hot**

ORGN **839.** Total synthesis of chaetoglobins A via asymmetric oxidative phenol coupling reaction. **H. Kang, C. Torruellas, Y. Lee, M. Kozłowski**

ORGN **840.** Towards molecular diversity with functionalized titanocenes. **E. Vogelsang, A. Gansäuer**

ORGN **841.** Progress toward the total synthesis of chrysopaenitins A. **S. Jana, K. Kim, C. Fullenkamp, C.A. Bewley, G.A. Sullkowski**

ORGN **842.** Synthesis of 11-*cis*-retinol and its incorporation with FeO nanoparticle. **S. Lin, J.D. Rainier**

ORGN **843.** Total synthesis of taumycins A and B. **U.K. Shrestha, T. Newar, J.N. deGruyter, W.A. Maio**

ORGN **844.** Isocryptobellid acid D: Synthetic pursuit and computational comparisons. **G.E. Miller, L. Kim, K.J. Kron, O. Velazquez, G.G. Castro, R.J. Cave, D.A. Vosburg**

ORGN **845.** Termination of cascade cyclizations by MOM-protected phenols. **P. Shah, D.F. Wiemer**

ORGN **846.** Concise synthesis of oncostemomols enabled by transition-metal catalyzed coupling reactions. **E.E. Sartor, J. Cannon**

ORGN **847.** Total synthesis of the  $\alpha$ -alylidene lactone natural products subamolides D and E. **K. Ng, T.G. Minehan**

ORGN **848.** Harnessing click reaction to synthesize mechanically interlocked cucurbit[n]uril molecules. **J. Partridge, V. Ramalingam**

ORGN **849.** Progress toward the total synthesis of Gymnastatin G. **J. Pham, M.E. Jung, J. Ku**

ORGN **850.** Synthesis and optical characterization of benzothiazole-curcumin derivatives for use in photodynamic therapy. **L. Howard**

ORGN **851.** Efforts in the development of new anticancer therapies: C-benzylated chalcones and derivatives. **J. Dallman, A.I. Lansakara, T. Nguyen, R. Rafferty**

ORGN **852.** Synthesis of four new englerin analogs: Using enzymatic resolution to simplify synthetic pathways. **G. Bermudez**

ORGN **853.** Total synthesis of (+)-chimonanthine, (+)-folicanthine, (-)-calycanthine, and (+)-perophoramidine via solid state Norrish I photochemistry. **J. Dotson, E. Rivera**

**THURSDAY MORNING**

**Section A**

Moscone Center  
3018

**Materials, Devices & Switches**

R. D. Broene, *Organizer*

D. J. Brook, *Presiding*

8:20 ORGN **854.** Redox active single-molecule switches. **X. Yin, Y. Zang, L. Venkataraman, L. Campos**

8:40 ORGN **855.** Synthesis, self assembly, and solar cell performance of N-annulated PDI small molecules. **A. Hendsbee, G. Welch**

9:00 ORGN **856.** Color-change photoswitching of an alkenylpyrene excimer dye. **R. Chan**

9:20 ORGN **857.** Novel oligo and polyacenes for intramolecular singlet fission devices. **A. Pun, L. Campos**

9:40 ORGN **858.** Towards simple low-cost molecular materials for use in air processed organic solar cells. **A. Payne, S. Dayneko, G. Welch**

10:00 ORGN **859.** Synthesis and assembly of discrete macrocycles related to two-dimensional covalent organic frameworks. **A.D. Chavez, B.J. Smith, M.K. Smith, P. Beaucage, B.H. Northrop, W.R. Dichtel**

10:20 ORGN **860.** Boron-containing conjugated materials with ultra-high Stokes shift. **J. Cassidy, M. Bautista, I. Brettell-Adams, M. Smith, D.A. Dixon, P. Rugar, N. Hammer**

10:40 ORGN **861.** Tunable highly fluorescent polycyclic azaborene chromophores: Applications in organic materials. **C.J. Saint-Louis, M.T. Huggins, A. Schrock**

11:00 ORGN **862.** Benzodithiophene (BDT) based small molecules for organic photovoltaics. **R. Gunawardhana, C. Bulumulla, J. Du, M.C. Blewter, M.C. Stefan**

11:20 ORGN **863.** Mixed valence in bis(verdazyl) systems. **D.J. Brook**

11:40 ORGN **864.** Withdrawn.

**Section B**

Moscone Center  
3014

**Chemistry of Nanomaterials, Fullerenes, Carbon Nanotubes & Graphene**

**Nanomaterials & Carbon Allotropes**

R. D. Broene, *Organizer*

W. A. Braunecker, *Presiding*

8:00 ORGN **865.** Synthesis and photocatalytic activity of covalently conjugated three-dimensional pristine graphene-TiO<sub>2</sub> nanocomposite. **M. Yan**

8:20 ORGN **866.** Perfluoroalkylated fullerenes for stabilizing organic photovoltaic active layers. **W.A. Braunecker, B.W. Larson, L.E. Garner, V.N. V., P.C. Ramamurthy, O.V. Boltalina, S.H. Strauss**

**8:40 ORGN 867.** Effects of structural features of graphene oxide on its tissue distribution in mice. D. Jasim, K. Kostarelou

**9:00 ORGN 868.** Graphene nanoribbons through directed molecular assembly and stitching. R. Jordan, Y. Wang, R. Mccurdy, S. Khan, R.B. Kaner, Y.F. Rubin

**9:20 ORGN 869.** Fabrication of supramolecular n/p- nanowires via coassembly of oppositely charged peptide-chromophore systems in aqueous media. M. Khalily, B. Kucukoz, A. Karatay, G. Yaglioglu, M. Guler

**9:40 ORGN 870.** Withdrawn.

**10:00 ORGN 871.** Perylene diimides as precise graphene-like mimetics of antioxidant carbon nanomaterials and of superoxide dismutase. L.G. Nilewski, A.S. Jalilov, V. Berka, C. Zhang, A. Yakovenko, G. Wu, T.A. Kent, A. Tsai, J.M. Tour

**10:20 ORGN 872.** Synthesis of functionalized NHC-CO<sub>2</sub> adducts for applications in SERS-based sensing on noble metals. J.F. DeJesus, M.J. Trujillo, X. Gu, M.D. Stevens, J. Bradshaw, J.P. Camden, D.M. Jenkins

**10:40 ORGN 873.** Clinically-translatable, targeted, polymeric nanoparticles for tissue accumulation. N. Collins, M.T. Proetto, N.C. Gianneschi

**11:00 ORGN 874.** Cyclic peptide nanotubes with polar interior functionality. S. Darnall, C. Li, M. Alsina, S. Keten, B. Helms, T. Xu

**11:20 ORGN 875.** Polymer-based retrograde nano-tracers as tools for neuroanatomy. N. Zang, T.B. Diti, M. Tillo, D. Bortone, B. Bloodgood, M. Scanzain, N.C. Gianneschi

**11:40 ORGN 876.** Scintillating possibilities of a drug assisted radiotherapy. G.M. Entract, R.W. Boyle

**Section C**

Moscone Center  
3011

**Flow Chemistry & Continuous Processes**

R. D. Broene, *Organizer*

A. C. Evans, *Presiding*

**8:30 ORGN 877.** Difluorodiazethane: Applications in cycloaddition reactions. L. Mertens, K.J. Hock, R.M. Koenigs

**8:50 ORGN 878.** Continuous bioprocessing (Enz-Flow) approaches toward levomilnacipran synthesis. C. Ayoub, M.G. Nguyen, A.C. Evans

**9:10 ORGN 879.** *Trans*-cycloheptene, sila *trans*-cycloheptene and their application in bioorthogonal chemistry. Y. Fang

**9:30 ORGN 880.** Arming THIOMAB Antibiotic Conjugates (TACs) through process chemistry. S.G. Koenig

**9:50 ORGN 881.** Assessing inter- and intramolecular continuous-flow strategies towards methylphenidate hydrochloride. R. Gérardy, M. Winter, A. Vizza, J.M. Monbaliu

**10:10 ORGN 882.** Catalyst-free thermal deprotection of *tert*-butyl esters. S.J. Ryan, K.P. Cole, R.D. Miller

**10:30 ORGN 883.** AutoSyn: Toward a versatile multistep continuous synthesis device. J.P. Malerich, D. Stout, J.D. White, N. Collins

**10:50 ORGN 884.** Flow chemistry with in-line analytics and feedback control. M.G. Organ

**11:10 ORGN 885.** Continuous processing approaches for tunable asymmetric photochemical synthesis. A.C. Evans

**Section D**

Moscone Center  
3009

**Physical Organic Chemistry: Calculations, Mechanisms, Photochemistry & High-Energy Species**

R. D. Broene, *Organizer*

S. J. Soback, *Presiding*

**8:30 ORGN 886.** Structure and photophysical property relationships of amino-benzoic acids. S.J. Soback, H. Rossiter

**8:50 ORGN 887.** Photoremovable protecting group based on electrocyclic ring closure with leaving group expulsion via a putative zwitterionic intermediate. G.N. Ndzeidze, L. Li, M.G. Steinmetz

**9:10 ORGN 888.** Hydrogen bonding directed photocatalytic hydrodefluorination, facile access to unsymmetric polyfluorinated aromatics. M. Bani Khaled, J.D. Weaver

**9:30 ORGN 889.** Kinetic studies of various (trialkylsilyl)ethoxycarbonyl derivatives. G.C. Daniels, E. Camerino, J.H. Wynne, E.B. Iezzi

**9:50 ORGN 890.** Mechanistic study of Cp\*Co<sup>III</sup>/Rh<sup>III</sup>-catalyzed directed C-H functionalization with diazo compounds. S. Qu, C.J. Cramer

**10:10 ORGN 891.** N-hydroxyphthalimide (NHP) mediated activation of C-H bonds with visible light using organic dyes. S.S. Shah, N.P. Singh

**10:30 ORGN 892.** Synthesis and mechanistic exploration of novel P,N-ligated gold(I) compounds: Effect of pendant amine groups on catalytic enhancement. J. Piedad, A.C. Jones

**10:50 ORGN 893.** Mechanistic evaluation of transition metal-catalyzed tetrahydroxydiboron-mediated H atom transfer from water. T. Le, S. Cummings, A. Brito, B.J. Stokes

**11:10 ORGN 894.** Mechanism of Zn(II)/TMSCl-catalyzed hydroarylation. S. Phan, M. Desai, S. Wilkens, S. Patel, A. Villani-Gale, J. Devery

**11:30 ORGN 895.** Photolysis of thiophene sulfonium ylides: Evidence for product sensitivity. J. Kolatloor, M.P. Sherman, W.S. Jenks

**Section E**

Moscone Center  
3007

**Total Synthesis of Complex Molecules**

R. D. Broene, *Organizer*

Q. Dai, *Presiding*

**8:30 ORGN 896.** Harnessing persistent radicals and stable quinone methide intermediates for the synthesis of resveratrol oligomers. K.J. Romero, X. Zhu, C. Stephenson

**8:50 ORGN 897.** Enantioselective syntheses of rearranged abietane diterpenoids isolated from *Tripterygium wilfordii*. R. Ali, T.W. Bell

**9:10 ORGN 898.** Synthetic efforts towards mandelalide/madeirolide A hybrid structures. J. Li, A. Ghosh, N. Veerasamy, R.G. Carter

**9:30 ORGN 899.** Studies directed toward the synthesis of aspidophytine. Y.E. Turkmen, M. Gravel, V.H. Rawal

**9:50 ORGN 900.** Catalyst-controlled oligomerization for the synthesis of polypyrrroloindoline natural products. J.J. Badillo, C.R. Jamison, J. Lipshultz, R.J. Comito, D.W. MacMillan

**10:10 ORGN 901.** Total synthesis of clerobungin A. K.P. Reber, J. Mease

**10:30 ORGN 902.** Synthetic studies towards fischerindoles and ambigunes. J. Xu, V.H. Rawal

**10:50 ORGN 903.** Studies towards the total synthesis of nahuico acids. Q. Liu, Y. Deng, A.B. Smith, III

**11:10 ORGN 904.** Exploration of gold(I)-catalyzed alkoxylation for formal synthesis of (+)-laurerincin. H. Park, M. Lanier, P. Mukherjee, A.A. Ribeiro, R. Widenhoefer, J. Hong

**11:30 ORGN 905.** Development and kilogram-scale synthesis of GSK2132838A. Q. Dai

**Section F**

Moscone Center  
3005

**New Reactions & Methodology**

R. D. Broene, *Organizer*

D. R. Stuart, *Presiding*

**8:00 ORGN 906.** Towards effective catalytic C<sub>2</sub> + N<sub>2</sub> aziridination with organic azides for organic synthesis. P.P. Chandrachud, L.C. Keller, J. Kern, G. Elpitiya, S. Roy, D.M. Jenkins

**8:20 ORGN 907.** Synthesis of heterocyclic aldehydes and lactams involving aerobic copper-catalyzed alkene aminooxygenation. T. Wdowik, S.R. Chemler

**8:40 ORGN 908.** Second generation oxirane-based approach for polypropionate construction: Application to the synthesis of ansamycins. J.A. Prieto, W. Torres, D. Rodriguez-Reyes, A. Cruz-Montanez

**9:00 ORGN 909.** Hypervalent iodine(III)-promoted N-incorporation into N-aryl vinylgous carbamates to quinoxaline diesters: Access to 1, 4, 5, 8 tetraazaphenanthrene. S. Arepally, S.S. Duddu

**9:20 ORGN 910.** Metal-free arylation reactions with unsymmetrical diaryliodonium salts. D.R. Stuart

**9:40 ORGN 911.** Synthesis of enantiomerically pure 6-substituted-piperazine-2-acetic acid esters for Fragment Based Lead Discovery (FBLD). S. Chamakuri

**10:00 ORGN 912.** Regio- and stereoselective oxyamination of dienes via tandem aziridination/ring-opening of dienyl carbamates. S. Castillon, I. Gimenez, J. Guasch, Y. Diaz, I. Matheu

**10:20 ORGN 913.** Solvent- and catalyst-free, quantitative protection of hydroxyl, thiol, carboxylic acid, amide and heterocyclic amino functional groups. B. Ahmed, M.L. Jawor, G. Meziel

**10:40 ORGN 914.** Bio-based amines and amides from renewable isosorbide. F. Popowycz, M. Janvier, S. Moebis-Sanchez

**11:00 ORGN 915.** Withdrawn.

**11:20 ORGN 916.** Mechanism-based solution to the ProTide synthesis problem. S.M. Silverman, B. Simmons, Z. Liu, A. Klapars, A. Belomo

**11:40 ORGN 917.** Flexible route to bioactive 6-alkyl- $\alpha$ -pyrones. Y. Qu, G.A. Kraus

**THURSDAY AFTERNOON**

**Section A**

Moscone Center  
3009

**Advanced Materials Technologies, Systems & Processes**

R. D. Broene, *Organizer*

A. R. Lippert, *Presiding*

**1:00 ORGN 918.** Single-molecule peptide sequencing: Side chain modification and model peptide sequencing studies. E.T. Hernandez, J. Swaminathan, A. Boulgakov, A. Bardo, L. Bachman, A. Johnson

**1:20 ORGN 919.** Thio-amine click and declick reactions. I. Kolesnichenko, K. Diehl, S. Robotham, J. Brodbelt, E.V. Ansllyn

**1:40 ORGN 920.** Advanced photoswitch displays for volumetric 3D image generation. A.R. Lippert

**2:00 ORGN 921.** Synthesis of a novel photoreactive collagen-like peptide and its one and two-photon absorption properties. A. Ornelas, K.N. Williams, K.A. Hatch, A. Paez, T. Boland, C. Li, K. Michael

**2:20 ORGN 922.** Synthesis of (7*R*,8*aS*)-octahydro-5,5-dimethylindolizin-7-ol using an enzymatic resolution approach. R.S. Kolluri

**2:40 ORGN 923.** Synthesis and biological evaluation of  $\alpha$ -methoxylated acetylenic fatty acids. C. Morales Guzman, E. Alvarez Benedicto, Z. Torres Martinez, Y. Delgado Reyes, D.J. Sanabria Rios, A.D. Tinoco, R. Balaña Fauce, N.M. Carballeira

**3:00 ORGN 924.** One-pot electrocatalytic oxidation/photocatalytic C-O bond cleavage of lignin systems at ambient temperature. I. Bosque Martinez, C. Stephenson

**3:20 ORGN 925.** Linking substance mixture information with physical properties for discovery. P. Son, V.A. Biehl, E.M. Altizer, A. Windhof, R.B. McWhirter

**3:40 ORGN 926.** Controlling antimicrobial agents' release: Natural polymer-based encapsulation systems. R. Rutenberg, E. Poverenov, E. Falilik

**Section B**

Moscone Center  
3011

**Physical Organic Chemistry: Calculations, Mechanisms, Photochemistry & High-Energy Species**

R. D. Broene, *Organizer*

D. A. Vosburg, *Presiding*

**1:00 ORGN 927.** Mechanistic complexities of catalytic dihydropyridine reactions. C. Hanson, H. Vonesh, M. Solans, A. Nudo, S. Chowdhury, E. Kaydanovsky, J. Devery

‡Cooperative Cosponsorship

**1:20 ORGN 928.** How cinchona alkaloids steer the product distribution in the reactions of oxindoles with nitrosobenzene. N. Celebi-Olcum

**1:40 ORGN 929.** N-heterocyclic carbene catalyzed ring opening polymerization of glycolide and lactide: A theoretical study. X. Dong, Y. Li, J.M. Grandner, K.N. Houk

**2:00 ORGN 930.** Alkyne metathesis to delineate the effect of building block size on organic cage synthesis. A. Yang, J.S. Moore

**2:20 ORGN 931.** Conjugated trimeric scaffolds accessible using indolylene cyclotrimerizations. J. Lin, T. Shah, A. Goetz, K.N. Houk, N.K. Garg

**2:40 ORGN 932.** Non-bonding S–O interactions: A new element of stereocontrol and catalysis? D. Walden, E. Robinson, T. West, C. Fallan, J. Taylor, M. Greenhalgh, A.D. Smith, P. Ha-Yeon Cheong

**3:00 ORGN 933.** Withdrawn.

**3:20 ORGN 934.** Computational exploration of copper catalyzed azide-alkyne coupling reactions. S. Bidwell, H.P. Hratchian

**3:40 ORGN 935.** Computational comparisons of Diels-Alder transition states for endiandric tetracycles using density functional theory. K.J. Kron, R.J. Cave, D.A. Vosburg

**9:30** Intermission.

**9:50 PHYS 3.** Spin effects on photo-induced electron and energy transfer processes in polynuclear donor-acceptor assemblies. J.K. McCusker

**10:30 PHYS 4.** Energy transfer in quantum dot-molecule assemblies. E.A. Weiss, C. Wang, K. Lee, M. Kodaimati, S. Homan, G.C. Schatz

**11:10 PHYS 5.** Nanocrystal taxonomy and ligand alphabet soup: Covalent bond classification system applied to surface chemistry. N.C. Anderson, N.R. Neale, J.S. Owen

## Section B

Parc 55 San Francisco  
Mason

### Long Range Correlated Motions in Proteins

#### Protein Dynamics & Allostery

A. Markelz, *Organizer, Presiding*

**9:00** Introductory Remarks.

**9:05 PHYS 6.** Mind the gap: Building a bridge between physical and statistical models of allostery. M.A. Cuendet, G. Khelashvili, H. Weinstein, M.V. LeVine

**9:35 PHYS 7.** Entropy in protein function. A.J. Wand

**10:05 PHYS 8.** Predicting optimal allosteric stabilization sites with contact stabilization analysis. A. Dickson, C. Bailey, J. Karanicolas

**10:25** Intermission.

**10:40 PHYS 9.** Allosteric dynamics of AMPA receptors and coupling to membrane fluctuations. J. Lee, J. Krieger, I. Gregor, I. Bahar

**11:10 PHYS 10.** Understanding allosteric regulation of G protein-coupled receptors using molecular simulation. A. Grossfield

**11:40 PHYS 11.** Opening of the intracellular gate affects the structure and ion occupancy of the selectivity filter of a potassium ion channel. H.T. Kratochvil, M.T. Zanni

## Section C

Parc 55 San Francisco  
Hearst

### Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities

#### Photosynthesis

K. Glusac, M. Olivucci, *Organizers*

D. S. Larsen, *Organizer, Presiding*

**8:00 PHYS 12.** Probing ultrafast dynamics of photosynthetic reaction centers using two-dimensional electronic spectroscopy. J.P. Ogilvie, V. Policht, A. Niedringhaus, A. Loukianov

**8:30 PHYS 13.** Structural and functional modularity of the orange carotenoid protein in governing cyanobacterial photoprotection. C. Kerfeld

**9:00 PHYS 14.** Biomimetic designs and *In-Situ* x-ray structural characterization of catalysts for the artificial leaf. D.M. Tiede, G. Kwon, I. Kim, J. Emery, A.B. Martinson

**9:30 PHYS 15.** Photophysics of coupled carotenoids. M.J. Tauber

**10:00** Intermission.

**10:20 PHYS 16.** Photochemical water oxidation by photosystem II. G.W. Brudvig

**10:50 PHYS 17.** Pyridine Co-catalysis impacting CO<sub>2</sub> reduction over semiconductor photoelectrodes. T. Senftle, E.A. Carter

**11:20 PHYS 18.** Energy transfer mechanisms in green sulphur bacteria. D. Zigmantas, J. Dostal, K. Zidek, K. Kim, M. Alcocer, D. Bina, H. Lokstein, J. Psencik

## Section D

Parc 55 San Francisco  
Divisadero

### Quantum Dynamics in Large Scale Systems

#### Simulating Electrons on Large Scale

*Cosponsored by COMP*

O. V. Prezhdo, *Organizer*

A. V. Akimov, *Organizer, Presiding*

**8:00 PHYS 19.** Spectroscopy of molecules at metal surfaces: Markovian and non-Markovian electron dynamics. M. Pavanello

**8:40 PHYS 20.** Patches for realtime TDDFT: Correlation and a time-dependent Tamm-Dancoff approximation. J. Parkhill

**9:20** Intermission.

**9:35 PHYS 21.** Linked-cluster formulation of screened electron-hole interaction from explicitly-correlated geminal functions without using unoccupied states. M.G. Bayne, A. Chakraborty

**10:15 PHYS 22.** Spectra from stochastic many-body methods. V. Vlcek, R. Baer, E. Rabani, D. Neuhauser

**10:35 PHYS 23.** Description of quasiparticles in stochastic many-body methods. V. Vlcek, R. Baer, E. Rabani, D. Neuhauser

## Section E

Parc 55 San Francisco  
Embarcadero

### PHYS Division Awards Symposium

#### Ahmed Zewail Award in Ultrafast Science & Technology: Symposium in honor of Stephen R. Leone

*Cosponsored by PRES*

J. E. Shea, *Organizer*

D. Zhong, *Presiding*

**8:00** Introductory Remarks.

**8:05 PHYS 24.** From ultrafast spectroscopy to structural dynamics. M. Chergui

**8:45 PHYS 25.** In search of transition states of chemical reactions. A tribute to Ahmed Zewail. L. Banares

**9:25** Intermission.

**9:40 PHYS 26. Award Address** (Ahmed Zewail Award in Ultrafast Science & Technology sponsored by the Ahmed Zewail Endowment Fund by the Newport Corporation (Newport)). Ultrafast x-ray dynamics. S.R. Leone

**10:40 PHYS 27.** Probed quantum systems from the inside: On the attosecond time scale. P. Corkum

**11:20 PHYS 28.** Anion photoelectron/photodissociation spectroscopies: Ozonide solvation dynamics. W.C. Lineberger

## Section F

Parc 55 San Francisco  
Stockton

### Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanjani

#### Interfaces

A. T. Krummel, N. E. Levinger, *Organizers*  
K. Gaffney, *Presiding*

**8:00** Introductory Remarks.

**8:20 PHYS 29.** Is the surface of clathrate hydrates hydrophilic or oleophilic? V. Molinero

**9:00 PHYS 30.** Solvation and confinement effects on the thermodynamics of helix coil transitions of polyalanine in open nanotubes. D. Suvlu, S. Samararatunga, D. Thirumalai, J.C. Rasaiah

**9:20 PHYS 31.** Ion-induced stabilization of palmitic acid monolayers. H.C. Allen, E. Adams, B. Wellen, A. Vidalis, T. Zhang

**10:00** Intermission.

**10:20 PHYS 32.** Quantitative prediction of position and orientation for a polyhedral nanoparticle at liquid/liquid interfaces. S. Li

**11:00 PHYS 33.** Asymmetric electrowetting at the nanoscale: Molecular dynamics simulations of molecular fluids on graphene. N. van der Vegt

**11:20 PHYS 34.** Rate theory on ion pairings at the liquid/vapor interface of water. L.X. Dang

### Advanced X-Ray Techniques for Catalyst Characterization

#### Catalysts in Action

*Sponsored by CATL, Cosponsored by PHYS*

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Allosteric Regulation & Mechanisms

*Sponsored by COMP, Cosponsored by PHYS*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>1</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>2</sup> and WCC*

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## PHYS

### Division of Physical Chemistry

J. Shea, *Program Chair*

#### OTHER SYMPOSIA OF INTEREST:

**Elucidation of Mechanisms & Kinetics on Surfaces** (see *CATL*, Sun, Mon, Tue, Wed, Thu)

**Light-Driven Chemistry: Photoelectrochemistry & Photocatalysis** (see *CATL*, Mon, Tue, Wed)

**Nanoscience & Nanotechnology for Advanced Materials & Technologies** (see *MPPG*, Mon)

**Nanoscale Spectroscopic Characterization of Catalysts & Polymers** (see *PMSE*, Sun, Mon)

## SUNDAY MORNING

### Section A

Parc 55 San Francisco  
Sutro

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

#### Experimental Characterization

*Cosponsored by INOR*

S. Corcelli, *Organizer, Presiding*

**8:00** Introductory Remarks.

**8:10 PHYS 1.** Scanning tunneling microscopy of alkyl-substituted oligothiophenes on Au(111): Real-space visualization of molecular electronic structure. B. Taber, G. Nazin

**8:50 PHYS 2.** Mixed-valence molecules: Direct imaging of intramolecular charge distribution by STM. S. Kandel

**Catalytic Materials from Molecular Insight**

Sponsored by COMP, Cosponsored by CATL, MPPG<sup>‡</sup> and PHYS

**Strong Electron Correlation & Nonadiabatic Dynamics**

Sponsored by COMP, Cosponsored by PHYS

**Coherent Multidimensional Spectroscopy in Materials Science**

Sponsored by ANYL, Cosponsored by PHYS

**SUNDAY AFTERNOON****Section A**

Parc 55 San Francisco  
Sutro

**Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory****Theory & Modeling**

Cosponsored by INOR

S. Corcelli, *Organizer*

S. Kandel, *Presiding*

**1:30 PHYS 35.** Charge motion in disordered molecular solids. M.A. Ratner

**2:10 PHYS 36.** Electronically excited states of organic molecules and transition-metal containing systems are a challenge for quantum chemistry. L. Gagliardi

**2:50** Intermission.

**3:10 PHYS 37.** Theoretical studies of homogeneous and heterogeneous multicenter electrocatalysts. S. Hammes-Schiffer

**3:50 PHYS 38.** Spectroscopy and electron transfer processes in molecular systems of multi metal centers: Insight by *ab-initio* modeling. B.D. Dunietz

**4:30 PHYS 39.** Efficient implementation and assessment of open-shell symmetry-adapted perturbation theory. J.F. Gonthier, L. Dos Anjos Cunha, C.D. Sherrill

**Section B**

Parc 55 San Francisco  
Mason

**Long Range Correlated Motions in Proteins****Protein-Solvent Modeling: Refinement through Comparison with Measurements**

A. Markelz, *Organizer*

A. J. Wand, *Presiding*

**1:30 PHYS 40.** Spectral analysis of correlated protein and protein-water vibrations in molecular dynamic simulations. M. Heyden

**2:00 PHYS 41.** 2D-Raman-THz spectroscopy of water and aqueous salt solutions. A. Shalit, D. Sidler, P. Hamm

**2:30 PHYS 42.** Correlated vibrational motion in the Fenna-Matthews-Olson complex. B.S. Rolczynski, H. Zheng, V.P. Singh, P. Navotnaya, J.R. Caram, K. Ashraf, A.T. Gardiner, R.J. Cogdell, G.S. Engel

**2:50 PHYS 43.** Protein intramolecular vibrations couple to the dynamical transition. M. Xu, K. Niessen, Y. Deng, N. Michki, A. Markelz

**3:10 PHYS 44.** Towards development of the *ab-initio*-based force field for biological systems. P. Guronathan, L.V. Slipchenko

**Section C**

Parc 55 San Francisco  
Hearst

**Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities****Photochemistry & Emerging Techniques**

K. Glusac, M. Olivucci, *Organizers*

D. S. Larsen, *Organizer, Presiding*

**1:30 PHYS 45.** Controlling the photostability of uracil with shaped light fields. D. Keefer, S. Thallmair, S. Matsika, R. de Vivie-Riedle

**2:00 PHYS 46.** Using fundamental photochemistry to drive drug development and structural-biology applications. C.E. Crespo-Hernandez

**2:30 PHYS 47.** Direct evidence of molecular charge accumulation during solar excitation of molecular dyes, and guidelines for obtaining large quantum yields. H. Chen, J.M. Cardon, S. Ardo

**2:50 PHYS 48.** Operating photoswitches with sunlight. S. Hecht PhD

**3:20 PHYS 49.** Fuel from water: The reductive side of water splitting and the light-driven generation of hydrogen. R. Eisenberg, H. Lv

**3:50** Intermission.

**4:10 PHYS 50.** Photochemical pathways for motion in E/Z photoswitchable thienyl-ethenes. A.E. Bragg

**4:40 PHYS 51.** Combined experimental and theoretical study of the transient IR spectroscopy of 7-hydroxyquinoline in the first electronically excited singlet state. F. Hoffmann, M. Ekimova, G. Bekçioğlu-Neff, E. Nibbering, D. Sebastiani

**5:00 PHYS 52.** Subensemble-Selective photochemistry by mixed IR/VIS two-dimensional spectroscopy. J. Bredenbeck

**Section D**

Parc 55 San Francisco  
Divisadero

**Quantum Dynamics in Large Scale Systems****Simulating Quantum Nuclei on Large Scale**

Cosponsored by COMP

O. V. Prezhdo, *Organizer*

A. V. Akimov, *Organizer, Presiding*

**1:30 PHYS 53.** Linearized path integral methods for capturing quantum effects in molecular dynamics simulations of condensed phase systems. E. Geva

**2:10 PHYS 54.** Phase space vs. coordinate space approaches for overcoming exponential scaling in large quantum calculations. H. Larsson, B. Hartke, D. Tanner

**2:50 PHYS 55.** Path integral methods for nonadiabatic dynamics: Quantum transitions from classical trajectories. N. Ananth

**3:30** Intermission.

**3:45 PHYS 56.** Molecular dynamics of large systems with quantum corrections for selected nuclei. S. Garashchuk

**4:25 PHYS 57.** Nonadiabatic molecular dynamics with time-domain density functional theory. O.V. Prezhdo

**5:05 PHYS 58.** Condensed phase non-adiabatic dynamics from temporally-interpolated memory kernels. D. Hait, M. Mavros, T.A. Van Voorhis

**5:25 PHYS 59.** Preparation of a single highly vibrationally excited quantum state using Stark induced adiabatic Raman passage. W. Perreault, N. Mukherjee, R.N. Zare

**Section E**

Parc 55 San Francisco  
Embarcadero

**PHYS Division Awards Symposium****Ahmed Zewail Award in Ultrafast Science & Technology: Symposium in Honor of Stephen R. Leone**

Cosponsored by PRES

J. E. Shea, *Organizer*

S. R. Leone, *Presiding*

**1:30** Introductory Remarks.

**1:35 PHYS 60.** Ultrafast protein folding. M. Gruebele

**2:10 PHYS 61.** How to turn a right hand into left: Chiral plasmons and more. V.A. Apkarian

**2:45 PHYS 62.** Probing and controlling molecular electronic and vibrational states with shaped laser pulses. M. Dantus

**3:20** Intermission.

**3:35 PHYS 63.** Probing ultrafast photochemical processes in solution with femtosecond spectroscopies. M.H. Khalil

**4:10 PHYS 64.** Better chemical filters for better life. V. Stavros, N.C. Cole-Filipiak, M. Staniforth, M. Horbury, N.D. Rodrigues, L.A. Baker, J. Woolley

**4:45 PHYS 65.** Dynamics and mechanism of ultrafast water-protein interactions. D. Zhong

**Section F**

Parc 55 San Francisco  
Stockton

**Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi****Liquids**

A. T. Krummel, N. E. Levinger, *Organizers*

W. H. Thompson, *Presiding*

**1:30 PHYS 66.** Measuring liquid density using optical Kerr effect spectroscopy. J.S. Bender, S. Cohen, X. He, B. Coasne, J.T. Fourkas

**2:10 PHYS 67.** Combined FT-IR and soft-x-ray spectroscopic approach on aqueous ammonium and ammonia. M. Ekimova, W. Quevedo, L. Szyc, P. Wernet, M. Odellius, E. Nibbering

**2:30 PHYS 68.** Structure and dynamics of glyme based electrolytes for sodium based rechargeable batteries. R. Kumar, R. Jorn, D.G. Kuroda

**3:10** Intermission.

**3:30 PHYS 69.** Ultrafast x-ray scattering studies of solvent and solvation dynamics. K. Gaffney, T.B. van Driel, K. Kjaer, R. Hartsock, A. Dohn, K. Moller, M. Nielsen, T. Harlang

**4:10 PHYS 70.** Dramatic impact of confinement on sugars and carbohydrates in confined environments. N.E. Levinger, B.P. Wiebenga-Sanford

**4:30 PHYS 71.** Solvation dynamics of hydrated electrons: Connecting hydrate electron structure to time-resolved photoelectron spectroscopy and temperature-dependent transient absorption experiments. B.J. Schwartz, C. Zhu, E. Farr, W.J. Glover

**Advanced X-Ray Techniques for Catalyst Characterization****Theory & Beyond**

Sponsored by CATL, Cosponsored by PHYS

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium****Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

Sponsored by PROF, Cosponsored by ANYL<sup>‡</sup>, BIOL<sup>‡</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>‡</sup>, MEDI, ORGN, PHYS, PMSE<sup>‡</sup>, POLY, PRES<sup>‡</sup> and WCC

**Synthesis & Characterization of Materials for Energy Applications****In Operando & Surface Sensitive Analysis**

Sponsored by ANYL, Cosponsored by PHYS

**Catalytic Materials from Molecular Insight**

Sponsored by COMP, Cosponsored by CATL, MPPG<sup>‡</sup> and PHYS

**Strong Electron Correlation & Nonadiabatic Dynamics**

Sponsored by COMP, Cosponsored by PHYS

**Coherent Multidimensional Spectroscopy in Materials Science**

Sponsored by ANYL, Cosponsored by PHYS

**MONDAY MORNING****Section A**

Parc 55 San Francisco  
Sutro

**Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory****Synthesis**

Cosponsored by INOR

S. Corcelli, *Organizer*

L. J. Webb, *Presiding*

**8:00 PHYS 72.** Electrical transport in MOFs. M. Dinca, L. Sun, S. Park, G. Skorupskii, L. Xie, C. Hendon

**8:40 PHYS 73.** Solar photochemistry of semiconductor nanocrystals coupled with redox catalysts. G. Dukovic

**9:20 PHYS 74.** Charge transfer between hydrogen-bonded metal-metal quadruple bonds. L. Brown, A.J. Meijer, N. Patmore, K.B. Vincent, L. Wilkinson

**10:00** Intermission.

**10:20 PHYS 75.** Mixed-valency across hydrogen bonds: The effects of electron delocalization. C.P. Kubiak, T.M. Porter

<sup>‡</sup> Cooperative Cosponsorship

- 11:00 PHYS 76.** Role of molecular assemblies in dye sensitized photoelectrosynthesis cells. T.J. Meyer, L. Alibabaei, M.K. Brennaman, B. Sherman, D. Wang, M. Eberhart, M. Sheridan, A. Nayak, Y. Wang
- 11:40 PHYS 77.** Synthesis and characterization of exactly doped semiconductor quantum dots. A. Hassan

## Section B

Parc 55 San Francisco

Powell

### Long Range Correlated Motions in Proteins

#### Measurement Techniques

A. Markelz, *Organizer*

M. Heyden, *Presiding*

- 9:00 PHYS 78. Award Address** (Nakanishi Prize sponsored by the Nakanishi Prize Endowment). Long range effects from *in vitro* to *in vivo*. M. Gruebele

- 9:40 PHYS 79.** Revealing large-amplitude motions using local probes. C.H. Londergan

**10:00** Intermission.

- 10:15 PHYS 80.** Protein dynamics by femtosecond x-ray solution scattering and absorption. M. Cammarata, L. Balducci, M. Levantino

- 10:45 PHYS 81.** Biopolymer elasticities via terahertz spectroscopy. T.M. Korter

## Section C

Parc 55 San Francisco

Hearst

### Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities

#### Photoreceptor Activity: Non-Rhodopsin Photosensors

K. Glusac, D. S. Larsen, *Organizers*

M. Olivucci, *Organizer, Presiding*

- 8:00 PHYS 82.** Ultrafast biological photomachine: Watching DNA repair in real time. D. Zhong

- 8:30 PHYS 83.** Using light as a trigger to understand biological mechanisms. M. Sans, D.C. Monteiro, J.J. Doyle, B.A. Yorke, A.R. Pearson

- 9:00 PHYS 84.** Unfolding of the C-terminal  $\alpha$  helix in the LOV2 photoreceptor domain observed by time-resolved vibrational spectroscopy. P. Konold, T. Mathes, J. Weissenborn, M. Groot, P. Hegemann, J. Kennis

**9:30** Intermission.

- 9:50 PHYS 85.** Ground state and photo-induced electron transfer in cryptochromes. R. Tazhigulov, K.B. Bravaya

- 10:20 PHYS 86.** Structure-guided design of infrared fluorophores based on the sunlight-driven photoreceptor phytochrome. K.T. Forest

- 10:50 PHYS 87.** Correlating secondary protein dynamics with cryokinetics measurements in cyanobacteriochromes. D.S. Larsen, N. Rockwell, J. Lagarias, P. Kim

- 11:10 PHYS 88.** Revealing the molecular identity of cryptochrome photoactivation reaction. I. Solov'yov

## Section D

Parc 55 San Francisco

Divisadero

### Quantum Dynamics in Large Scale Systems

#### Fragmentation & Linear Scaling: Ab Initio & DFT

*Cosponsored by COMP*

O. V. Prezhdo, *Organizer*

A. V. Akimov, *Organizer, Presiding*

- 8:00 PHYS 89.** Highly accurate and efficient quantum chemical method based on non-orthogonal localized molecular orbitals. W. Yang, F. Gu

- 8:40 PHYS 90.** Ab Initio multiple spawning molecular dynamics with DFT for intersystem crossings. D. Fedorov, S.A. Varganov

- 9:00 PHYS 91.** Linear scaling calculations with the divide-and-conquer method and with non-orthogonal localized molecular orbitals. W. Yang

**9:40** Intermission.

- 9:55 PHYS 92.** Parallel electron dynamics calculations with linear system-size scaling using the time-dependent Hartree-Fock method. E. Rudberg

- 10:35 PHYS 93.** Large-scale real-time TDDFT for studying non-equilibrium electron dynamics in condensed matters: Prospects and challenges in simulating extended systems. Y. Kanai, D. Yost, Y. Yao

- 11:15 PHYS 94.** Multi-petaflop/s quantum molecular dynamics simulations. A. Nakano

## Section E

Parc 55 San Francisco

Embarcadero

### PHYS Division Awards Symposium

#### Peter Debye Award in Physical Chemistry: Symposium in honor of Bruce J. Berne

*Cosponsored by PRES*

J. E. Shea, *Organizer*

G. Hummer, *Presiding*

- 8:00 PHYS 95. Award Address** (Peter Debye Award in Physical Chemistry sponsored by DuPont). Enhanced sampling for thermodynamics and kinetics of ligand-protein binding and unbinding. B.J. Berne

- 8:35 PHYS 96.** Use of molecular dynamics simulations in structure based drug discovery. R. Friesner

- 9:10 PHYS 97.** Free energy simulations of protein-ligand binding and solvation at the interface. R.M. Levy

- 9:45 PHYS 98.** How and when does a drug leave the binding pocket of a host protein. P. Tiwary

**10:20** Intermission.

- 10:30 PHYS 99.** Molecular dynamics simulations of protein dynamics from femtoseconds to milliseconds. G. Hummer

- 11:05 PHYS 100.** Ultra-Coarse-Graining and its applications. G.A. Voth

- 11:40 PHYS 101.** Orderphobic effect: A general mechanism for membrane mediated forces between proteins. D. Chandler, K. Mandadapu

## Section F

Parc 55 San Francisco

Stockton

### Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi

#### Methods

A. T. Krummel, N. E. Levinger, *Organizers*

R. Kumar, *Presiding*

- 8:20 PHYS 102.** Chemical dynamics in Stochastic Hard Collision (SHC) solvents. R. Hernandez

- 9:00 PHYS 103.** Computing multi-dimensional optical spectra from classical trajectories. R.F. Loring

- 9:20 PHYS 104.** Collective behavior of nonequilibrium, nano-confined fluids. D. Limmer

**10:00** Intermission.

- 10:20 PHYS 105.** Tests for, origins of, and corrections to non-Gaussian statistics. A.J. Schile, W.H. Thompson

- 11:00 PHYS 106.** Local structural dynamics revealed by solute-pump/solvent-probe spectroscopy. X. Sun, B.M. Ladanyi, R.M. Stratt

- 11:20 PHYS 107.** Coarse-graining of molecular liquids with integral equation theory. M. Guenza

## Section G

Parc 55 San Francisco

Fillmore

### Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains

#### Astrophysics of Ice & Dust

R. Kaiser, *Organizer*

M. S. Gudipati, *Organizer, Presiding*

R. L. Hudson, *Presiding*

- 8:00 PHYS 108.** Production mechanisms for complex interstellar molecules. E. Herbst, C.N. Shingledecker

- 8:45 PHYS 109.** Thermally induced low temperature fragmentation reaction in solid phase: Possible answers to the non-detection of some interstellar chemical species. L. Krim

- 9:30 PHYS 110.** Ortho-to-para ratios of hydrogen molecules desorbed from ice at around 10 K: What happens on cosmic ice dust? N. Watanabe, H. Ueta, T. Hama, A. Kouchi

- 10:15 PHYS 111.** Gas-phase chemistry above interstellar and cometary ice analogs. S.L. Widicus Weaver, A.J. Mesko, H. Smith, S.N. Milam

- 10:45 PHYS 112.** Extreme Isotope Ratios in Meteoritic Material: A Gas-Phase Interstellar Origin? L.M. Ziurys, D.T. Halfen, T. Zega

#### Advanced X-Ray Techniques for Catalyst Characterization

#### Electro- & Photo-Catalysis

*Sponsored by CATL, Cosponsored by PHYS*

#### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Dynamics & Modeling of Allosteric Systems

*Sponsored by COMP, Cosponsored by PHYS*

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

*Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>1</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>1</sup> and WCC*

#### Catalytic Materials from Molecular Insight

*Sponsored by COMP, Cosponsored by CATL, MPPG<sup>1</sup> and PHYS*

#### Strong Electron Correlation & Nonadiabatic Dynamics

*Sponsored by COMP, Cosponsored by PHYS*

#### Coherent Multidimensional Spectroscopy in Materials Science

*Sponsored by ANYL, Cosponsored by PHYS*

## MONDAY AFTERNOON

### Section A

Parc 55 San Francisco

Sutro

#### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

#### Experimental Characterization

*Cosponsored by INOR*

S. Corcelli, *Organizer*

E. Blair, *Presiding*

- 1:30 PHYS 113.** Probing vibrational coupling and relaxation in cyanide-bridged transition metal mixed-valence complexes. M.H. Khalil

- 2:10 PHYS 114.** Electrostatic and electrodynamic fields in lipid bilayer membranes. L.J. Webb

**2:50** Intermission.

- 3:10 PHYS 115.** Voltage-gated switching of anion-molecule assemblies at interfaces and in solution. A.H. Flood

- 3:50 PHYS 116.** Radical chemistry and charge manipulation with an atomic force microscope. L. Gross, B. Schuler, N. Pavliček, S. Fatayer, Z. Majzik, N. Moll, G. Meyer

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

**4:30 PHYS 117.** Revisiting the structure-properties relation in charge transport across large area molecular tunneling junctions. J. Chen, H. Yoon, M. Thuo

### Section B

Parc 55 San Francisco  
Powell

### Spectroscopy of Complex Systems Dynamics Relevant to Electron & Proton Transfer

A. V. Benderskii, J. Dawlaty, *Organizers*  
S. T. Roberts, *Presiding*

**1:30 PHYS 118.** Proton coupled electron transfer in photosynthetic oxygen evolution: Role for internal water and hydrogen bonded networks. B.A. Barry, U. Brahmachari, Z. Guo

**2:10 PHYS 119.** Hydrated excess proton-ultrafast vibrational dynamics of the Zundel cation  $H_3O_2^+$ . F. Dahms, R. Costard, B. Fingerhut, E. Pines, E. Nibbering, T. Elsaesser

**2:30 PHYS 120.** Dissecting the molecular structure and dynamics of aqueous systems through many-body molecular dynamics simulations. F. Paesani

**3:10** Intermission.

**3:30 PHYS 121.** Panoramic portrait of photochemical events in solution and proteins captured by femtosecond Raman spectroscopy. L. Tang, B.G. Oskar, Y. Wang, L. Zhu, W. Liu, C. Fang

**4:10 PHYS 122.** Time-resolved infrared spectroscopy as a probe of nonequilibrium hydrogen-bond dynamics: A mixed quantum-classical study of alcohols in liquid solution. E. Geva

**4:30 PHYS 123.** Alteration of photoacidic behavior of pyrenol dyes covalently bound in the nanoconfined, electrostatically-complicated tips of asymmetric nanopores. C. Sanborn, J.V. Chacko, S. Ardo

**4:50 PHYS 124.** Photoinduced charge separation and recombination in DNA strands. B. Kohler

### Section C

Parc 55 San Francisco  
Hearst

### Long Range Correlated Motions in Proteins

### Dynamical Measurements & Calculations using Protein Crystals

A. Markelz, *Organizer*  
M. Cammarata, *Presiding*

**1:30 PHYS 125.** Fast and ultrafast structural investigations of trans to cis isomerizations in photoreactive proteins. M. Schmidt

**2:00 PHYS 126.** Ultra-fast time-resolved serial femtosecond crystallography on myoglobin ligand dissociation. I. Schlichting

**2:30 PHYS 127.** Photo-intermediate State Dependence of Picosecond Motions in Photoactive Proteins. Y. Deng, M. Xu, H. Liu, K. Niessen, M. Schmidt, R.E. Blankenship, A. Markelz

**2:50** Intermission.

**3:05 PHYS 128.** Non-thermal effect of terahertz radiation on crystals of lysozyme at room temperature and bovine trypsin at 100 K. G. Katona, I. Lundholm, W.Y. Wahlgren, M. Garcia Bonete, H. Rodilla, J. Stake, J. Vukusic, A. Duelli, H. Bassereh, G. Bourenkov, T. Schneider, R. Friedman

**3:35 PHYS 129.** Effect of intermolecular interactions on mixing of intermolecular and intramolecular vibrations: Terahertz spectroscopy and solid-state density functional theory. F. Zhang, H. Wang, K. Tominaga, M. Hayashi

**4:05 PHYS 130.** Mutation induced structure changes in histone proteins. T. Yu, G.C. Schatz, J. Licht

### Section D

Parc 55 San Francisco  
Divisadero

### Quantum Dynamics in Large Scale Systems

### Fragmentation & Linear Scaling: Semiempirical & DFTB

*Cosponsored by COMP*

A. V. Akimov, *Organizer*

O. V. Prezhdo, *Organizer, Presiding*

**1:30 PHYS 131.** Nonadiabatic molecular dynamics with tight-binding fragment molecular orbitals. A.V. Akimov

**2:10 PHYS 132.** Fragment orbital-based surface hopping for simulation of charge carrier transport in materials and biomolecules. A. Carof, L. Scalfi, J. Blumberger

**2:50 PHYS 133.** Nonadiabatic molecular mechanics/extended Hückel excited state quantum dynamics method. L.G. Rego, R. Oliboni, A. Torres, G. Bortolini

**3:30** Intermission.

**3:45 PHYS 134.** Chemical reaction simulations treated by linear-scaling Divide-and-Conquer Type Density-Functional Based Tight-Binding Molecular Dynamics (DC-DFTB-MD) method. H. Nakai

**4:25 PHYS 135.** QM/MM simulations of electron/exciton transfer reactions. M. Elstner

**5:05 PHYS 136.** Force field accelerated density functional theory molecular dynamics for simulation of reactive systems at extreme conditions. R. Lindsey, N. Goldman, L.E. Fried

### Section E

Parc 55 San Francisco  
Embarcadero

### PHYS Division Awards Symposium Joel Henry Hildebrand Award in the Theoretical & Experimental Chemistry of Liquids: Symposium in honor of Salvatore Torquato

*Cosponsored by PRES*

J. E. Shea, *Organizer*

P. G. Debenedetti, *Presiding*

**1:30** Introductory Remarks.

**1:35 PHYS 137.** Hard spheres under gravity. F. Stillinger

**2:15 PHYS 138.** Inverse design of interactions for assembly. T. Truskett

**2:55 PHYS 139.** Structure and dynamics in cold aqueous clusters: Quantum and classical perspectives. P.J. Rossky

**3:35** Intermission.

**3:50 PHYS 140.** Nano-scale drying and hydration phenomena. P.G. Debenedetti

**4:30 PHYS 141. Award Address** (Joel Henry Hildebrand Award in the Theoretical & Experimental Chemistry of Liquids sponsored by ExxonMobil Research & Engineering Company). Disordered hyperuniform materials: New states of amorphous matter. S. Torquato

### Section F

Parc 55 San Francisco  
Stockton

### Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi

### Ionic Liquids

A. T. Krummel, N. E. Levinger, *Organizers*

M. Guenza, *Presiding*

**1:30 PHYS 142.** Molecular geometries and electronic structures of ionic liquids: Bulk, vacuum interfaces, and ultrathin films. E. Castner

**2:10 PHYS 143.** Heterogeneity in solvation by an ionic liquid: A qualitative distinction between inertial and diffusive dynamics. S. Verma, S. Corcelli, M.A. Berg

**2:30 PHYS 144.** Solute dynamics in ionic liquids: Experiment and simulation. M. Maroncelli, C. Rumble, B. Conway, C. Uitzlugt

**3:10** Intermission.

**3:30 PHYS 145.** Dynamics and vibrational spectroscopy of solutes in ionic liquids. S. Corcelli

**4:10 PHYS 146.** Photo-induced electron transfer by ions in ionic liquids. B. Wu, M. Maroncelli, E. Castner

**4:30 PHYS 147.** Carbon dioxide dynamics in room temperature ionic liquids and supported ionic liquid membranes: 2D IR and polarization selective pump-probe experiments. M.D. Fayer

### Section G

Parc 55 San Francisco  
Fillmore

### Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains

### Kuiper Belt Objects & Comets

M. S. Gudipati, *Organizer*

R. Kaiser, *Organizer, Presiding*

N. Watanabe, *Presiding*

**1:30 PHYS 148.** Chemistry in protoplanetary disks. T.K. Henning

**2:15 PHYS 149.** Chemical evolution of organic materials from protoplanetary disk to small bodies recorded in Antarctic micrometeorites. H. Yabuta

**3:00 PHYS 150.** Energetic gas-surface encounters at ice interfaces. G. Langlois, R.S. Thompson, W. Li, K. Gibson, D.R. Killelea, H. Yuan, S.J. Sibener

**3:45 PHYS 151.** Adsorption, diffusion, aggregation, and desorption of simple molecules ( $CO_2$ ,  $CO$ ,  $O_2$ , etc.) on interstellar ice analogs. G. Vidali, J. He, S. Emiz

**4:30 PHYS 152.** Synthesizing the basic PAH unit. B. Sivaraman

### Advanced X-Ray Techniques for Catalyst Characterization

### New Methodologies

*Sponsored by CATL, Cosponsored by PHYS*

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

### Theory & Experiment

*Sponsored by COMP, Cosponsored by PHYS*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

*Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVIR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

### Catalytic Materials from Molecular Insight

*Sponsored by COMP, Cosponsored by CATL, MPPG<sup>†</sup> and PHYS*

### Strong Electron Correlation & Nonadiabatic Dynamics

*Sponsored by COMP, Cosponsored by PHYS*

### Coherent Multidimensional Spectroscopy in Materials Science

*Sponsored by ANYL, Cosponsored by PHYS*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

### Sci-Mix

J. E. Shea, *Organizer*

**8:00 - 10:00**

**39, 59.** See previous listings.

**169, 220, 241, 247, 338, 367-368, 380-381, 396, 453, 465, 470, 478, 493, 499, 505, 511, 515, 523, 532, 541.** See subsequent listings.

## TUESDAY MORNING

### Section A

Parc 55 San Francisco  
Sutro

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

### Applications & Devices

*Cosponsored by INOR*

S. Corcelli, *Organizer*

S. Roy, *Presiding*

**8:00 PHYS 153.** Investigation of quantum-dot cellular automata networks using a quantum annealing processor. J. Retallick, K. Walus

**8:40 PHYS 154.** Multistable mixed-valence molecular entities for quantum cellular automata: Vibronic localization in isolated and coupled cells. B. Tsukerblat, A. Pali

**9:20** Intermission.

**9:40 PHYS 155.** Fully-quantum, non-equilibrium model of vibration-coupled, electric-field-driven electron transfer in mixed-valence molecules. E. Blair

<sup>†</sup>Cooperative Cosponsorship

**10:20 PHYS 156.** Properties of multiple silicon atom artificial molecules on a silicon surface. R.A. Wolkow

**11:00 PHYS 157.** Mixed-valence molecules could be the replacement for the transistor. C. Lent

## Section B

Parc 55 San Francisco  
Mission I

### Spectroscopy of Complex Systems

#### Exciton Dynamics & Dissociation in Heterogeneous Systems

A. V. Benderskii, J. Dawlaty, *Organizers*

P. B. Petersen, *Presiding*

**8:00 PHYS 158.** Extracting triplet excitons produced by singlet exciton fission from perylene-dimide thin films. A.K. Le, J.A. Bender, A.P. Moon, R. Pandey, S.T. Roberts

**8:40 PHYS 159.** Resonance Raman study of exciton-phonon coupling in CdSe and ZnSe quantum dots and their alloys. K. Gong, D.F. Kelley, A.M. Kelley

**9:00 PHYS 160.** Probes of structure, disorder, and dynamics of excited states in conjugated materials. A.E. Bragg

**9:40** Intermission.

**10:00 PHYS 161.** Probing the mechanism of singlet fission with femtosecond stimulated Raman spectroscopy. R.R. Frontiera, S.M. Hart, W.R. Silva, K. Bera, S. Kwang, A. Cassabaum

**10:40 PHYS 162.** Interfacial disorder drives charge separation in molecular semiconductors. A. Willard, C. Lee, L. Shi

**11:20 PHYS 163.** Intermolecular vibronic coherence transfer in an organic electrode material. A. Rury, J. Dawlaty

**11:40 PHYS 164.** When a single structure is not sufficient: Effect of thermal deformation on excitonic properties of semiconductor nanoparticles. J. Scher, A. Srinari, M.G. Bayne, S. Nangia, A. Chakraborty

## Section C

Parc 55 San Francisco  
Hearst

### Long Range Correlated Motions in Proteins

#### Catalysis

A. Markelz, *Organizer*

A. Grossfield, *Presiding*

**9:00 PHYS 165.** Motions in proteins and drug design. J. Smith

**9:30 PHYS 166.** Evolution and designing enzymes for rapid protein dynamics and catalysis. S.D. Schwartz

**10:00 PHYS 167.** Sensitivity to protein vibration directionality and the relation to function. K.A. Niessen, M. Xu, Y. Deng, E. Snell, A. Markelz

**10:20 PHYS 168.** Role of statistical fluctuations and electrostatics in the improvements of de novo enzyme catalysis. T.L. Head-Gordon

**10:50 PHYS 169.** Withdrawn.

## Section D

Parc 55 San Francisco  
Divisadero

### Quantum Dynamics in Large Scale Systems

#### Simulations in Materials Systems

*Cosponsored by COMP*

A. V. Akimov, *Organizer*

O. V. Prezhdo, *Organizer, Presiding*

**8:00 PHYS 170.** Relating chromophoric and structural disorder in conjugated polymers. L. Simine, P.J. Rossky

**8:20 PHYS 171.** Dynamics of organic materials with optical activity: Advances, appraisal, applications. M. Barbatti

**9:00 PHYS 172.** Charge transfer and singlet fission quantum dynamics in organic photovoltaic. P. Huo

**9:40 PHYS 173.** Theoretical investigation of electron-nuclear dynamics in the neutral and cationic  $[\text{Au}_{25}(\text{SH})_{18}]^{\pm}$  [q = 0, +1] thiolate-protected gold nanoclusters. R.D. Senanayake, A.V. Akimov, C.M. Aikens

**10:00** Intermission.

**10:15 PHYS 174.** Mapping nuclear dynamics in nonadiabatic molecular dynamics simulations. G. Tao

**10:55 PHYS 175.** Theoretical investigation of novel CdSe/Cd<sub>1-x</sub>Zn<sub>x</sub>S seeded nanorods exhibiting high quantum-yield, high polarization, and minimal blinking. I. Hadar, J.P. Philbin, Y. Panfil, H. Eshet, E. Rabani, U. Banin

**11:15 PHYS 176.** Strong binding of CdSe quantum dots to single-walled carbon nanotubes. B. Rudshiteyn, S. Azoz, W. Ding, F. Ren, M. Askerka, A. Matula, N. Marinkovic, G.L. Haller, L. Pfefferle, V.S. Batista

**11:35 PHYS 177.** Exciton transport in disordered molecular systems in couple with the quantum fluctuating electromagnetic field of metal surface. X. Chen, A. Poudel, M.A. Ratner

## Section E

Parc 55 San Francisco  
Embarcadero

### PHYS Division Awards Symposium

#### ACS Award in Theoretical Chemistry: Symposium in honor of Peter Pulay

*Cosponsored by PRES*

J. E. Shea, *Organizer*

S. Hirata, *Presiding*

**8:00 PHYS 178.** Paradigm changes in the methodology of computational quantum chemistry: A tribute to the contributions by Peter Pulay. W.E. Meyer

**8:30 PHYS 179.** Density cumulant functional theory. H.F. Schaefer

**9:00 PHYS 180.** 34 years of local electron correlation: From Peter Pulay's pioneering work to the state-of-the-art. H. Werner

**9:30** Intermission.

**10:00 PHYS 181.** Merging symmetry projection methods with coupled cluster theory. G.E. Scuseria

**10:30 PHYS 182.** Scalable electron-correlation methods and instabilities versus strong correlation: A legacy of Peter Pulay. S. Hirata

**11:00 PHYS 183. Award Address** (ACS Award in Theoretical Chemistry sponsored by the ACS Division of Physical Chemistry). Molecular properties from quantum mechanical calculations 1967 - 2017: Synergy, successes, and challenges. P. Pulay

## Section F

Parc 55 San Francisco  
Stockton

### Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi

#### Extreme Environments

A. T. Krummel, N. E. Levinger, *Organizers*

M. McCullagh, *Presiding*

**8:00 PHYS 184.** Why do isotropic liquid crystals resemble supercooled liquids? R.M. Strat

**8:40 PHYS 185.** Relaxation and self-diffusion of liquids and supercooled liquids derived from picosecond timescale dynamics. M.T. Cicerone, M. Tyagi, M. Zhi, J.S. Bender

**9:00 PHYS 186.** Fundamental differences between glassy dynamics in two and three dimensions. G. Szamel

**9:20 PHYS 187.** Wetting behavior of alkane-water nanodroplets and planar interfaces. P. Neupane, F. Hrahsheh, G. Wilemski

**10:00** Intermission.

**10:20 PHYS 188.** Supercooled water: Three-body interactions, IR spectra in no man's land, and the liquid-liquid critical point. J.L. Skinner

**11:00 PHYS 189.** Electronically coarse grained model, including all quantum mechanical fluctuations necessary for long-range forces, describes water's properties from ice to the supercritical regime. G.J. Martyna

**11:20 PHYS 190.** Thermodynamic forces between plant cell wall constituents. M.S. Skaf

## Section G

Parc 55 San Francisco  
Fillmore

### Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains

#### Condensed Materials in the Outer Solar System

R. Kaiser, *Organizer*

M. S. Gudipati, *Organizer, Presiding*

B. L. Henderson, *Presiding*

**8:00 PHYS 191.** Chemistry and processes in the Pluto system. W. Grundy, D. Cruikshank, C. Olkin, S. Stern, K. Ennico-Smith, L. Young, H.A. Weaver

**8:45 PHYS 192.** Links between the ices of comet 67P/Churyumov-Gerasimenko and the interstellar medium from Rosetta/ROSINA observations. M. Rubin, K. Altwegg, H. Balsiger, J. Berthelier, M. Combi, J. De Keyser, B. Fiethe, S. Fuselier, S. Gasc, T. Gombosi, K. Hansen, U. Mall, H. Rème, M. Schuhmann, I. Schroeder, T. Sémon, C. Tzou, J.H. Waite, S. Wampfler, P. Wurz

**9:30 PHYS 193.** Aerosol impact spectrometer – A variable velocity nanoparticle accelerator. R.E. Continetti

**10:15 PHYS 194.** Self-Assembly of prebiotic organic materials from impact events of amino acid solutions. N. Goldman

**10:45 PHYS 195.** Comparison of gas phase and condensed phase species: Sgr B2(N) vs. Comet 67P. D.T. Halfen, J. Bernal, L.M. Ziurys

**11:15 PHYS 196.** Results from recent experiments on electron-stimulated desorption from icy & rocky surfaces. C. Bennett, M.J. Poston, T.M. Orlando

### Advanced X-Ray Techniques for Catalyst Characterization

#### New Methodologies

*Sponsored by CATL, Cosponsored by PHYS*

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Theory & Experiment

*Sponsored by COMP, Cosponsored by PHYS*

### Catalytic Materials from Molecular Insight

*Sponsored by COMP, Cosponsored by CATL, MPPPG<sup>†</sup> and PHYS*

### Strong Electron Correlation & Nonadiabatic Dynamics

*Sponsored by COMP, Cosponsored by PHYS*

## TUESDAY AFTERNOON

### Section A

Parc 55 San Francisco  
Sutro

### Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory

#### Theory & Modeling

*Cosponsored by INOR*

S. Corcelli, *Organizer*

C. Lent, *Presiding*

**1:30 PHYS 197.** Information propagation in molecular field coupled nanocomputing logic. M. Graziano, R. Wang, G. Piccinini

**2:10 PHYS 198.** Organic semiconductors: Singlets and triplets and charges, oh my! T.A. Van Voorhis, P. de Silva, T. Zhu

**2:50** Intermission.

**3:10 PHYS 199.** Theoretical study of dynamics in molecular junctions: Effects of molecule and electrode microstructure on electron transport. A. Becker, J. Kern, S. Roy

**3:50 PHYS 200.** Practical approaches for studying photochemistry of large molecules in solution and some nice applications. J.E. Subotnik, A. Jain, G.R. Medders

**4:30 PHYS 201.** Nonadiabatic electron-transfer in mixed-valence molecules. S. Corcelli

## Section B

Parc 55 San Francisco  
Mission I

## Spectroscopy of Complex Systems

## Exciton Dynamics &amp; Dissociation in Heterogeneous Systems

A. V. Benderskii, J. Dawlaty, *Organizers*

A. Rury, *Presiding*

1:30 **PHYS 202.** Multiresonant coherent multidimensional spectroscopy of cobalamin. J.C. Wright, J. Handali, N. Neff-Mallon

2:10 **PHYS 203.** Two dimensional spectroscopy of photosynthetic light harvesting antennae. G.S. Engel

2:30 **PHYS 204.** Mixed quantum/semiclassical simulations of ultrafast dynamics and spectroscopic signals. J.A. Cina, P.A. Kovac

3:10 Intermission.

3:30 **PHYS 205.** Harnessing shared vibrations to control energy transfer. D.M. Jonas

4:10 **PHYS 206.** Accessing excitonic structure of a photosynthetic Fenna-Matthews-Olson pigment-protein complex by time-resolved circular dichroism spectroscopy. S. Savikhin, V. Stadnytskyi, G. Orf, R.E. Blankenship

4:30 **PHYS 207.** Withdrawn.

4:50 **PHYS 208.** Ultrafast 2D white light spatial imaging of single nano-structures. A.C. Jones, N.M. Kearns, M.T. Zanni

5:10 **PHYS 209.** Probing ultrafast electron dynamics at surfaces using soft x-ray transient reflectivity spectroscopy. L. Baker, J. Husek, S. Biswas, A. Cirri

## Section C

Parc 55 San Francisco  
Hearst

## Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities

## Photoreceptor Activity: Rhodopsins Photosensors

K. Glusac, D. S. Larsen, *Organizers*

M. Olivucci, *Organizer, Presiding*

1:30 **PHYS 210.** Photoactivation mechanisms of rhodopsins from time-resolved optical absorption spectroscopy. D.S. Kliger

2:10 **PHYS 211.** Unexpected rhodopsin functions initiated by common retinal photoisomerization. H. Kandori

2:50 **PHYS 212.** Evidence for a vibrational phase isotope effect on the photochemistry of vision. R.A. Mathies, C. Schnedermann, M. Liebel, K.M. Spillane, P. Kukura, I. Fernandez, J. Lugtenburg

3:30 Intermission.

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at:  
[www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

3:50 **PHYS 213.** Effect of point mutations on the ultrafast photo-isomerization of anabaena sensory rhodopsin. S. Haacke, D. Agathangelou, J. Leonard, H. Kandori, K. Jung

4:30 **PHYS 214.** Understanding and designing color variants of retinal binding proteins by molecular simulations. S. Hayashi

## Section D

Parc 55 San Francisco  
Divisadero

## Quantum Dynamics in Large Scale Systems

## Simulations in Biological Systems

*Cosponsored by COMP*

A. V. Akimov, *Organizer*

O. V. Prezhdo, *Organizer, Presiding*

1:30 **PHYS 215.** Importance of polarizable embedding in biological systems: Excitonic interactions in photosynthetic proteins. L.V. Slipchenko

2:10 **PHYS 216.** Improving density functional tight binding predictions of free energy surfaces for peptide condensation reactions in solution. M. Kroonblawd, N. Goldman

2:30 **PHYS 217.** Energy profiles for modeling transient kinetic studies of chemical reactions in proteins. A. Nemukhin

3:10 Intermission.

3:25 **PHYS 218.** QM/MM dynamics for metalloproteins, so far without quantum dynamics. C.E. Valdez, M.R. Nechay, A. Morgenstern, M. Eberhart, A. Alexandrova

4:05 **PHYS 219.** Quantum mechanical force fields for condensed phase molecular simulations. D.M. York

4:45 **PHYS 220.** Single ion solvation free energies with ab initio molecular dynamics. T.T. Duignan, M.D. Baer, G.K. Schenter, C.J. Mundy

5:05 **PHYS 221.** Thermoelectric effect and its dependence on molecular length and sequence in single DNA molecules. Y. Li, L. Xiang, J.L. Palma, Y. Asai, N. Tao

## Section E

Parc 55 San Francisco  
Embarcadero

## PHYS Division Awards Symposium

## E. Bright Wilson Award: Symposium in honor of David J. Nesbitt

*Cosponsored by PRES*

J. E. Shea, *Organizer*

M. I. Lester, *Presiding*

1:30 **PHYS 222.** Always acetylene! R. Field, J. Baraban, B. Changala, Z. Du, J. Jiang, A. Merer, A. Muthike, C. Saladrigas

2:05 **PHYS 223.** Unimolecular decay of Criegee intermediates to hydroxyl radical products. M.I. Lester

2:40 **PHYS 224. Award Address** (E. Bright Wilson Award in Spectroscopy sponsored by the ACS Division of Physical Chemistry). Good, good, good vibrations! D.J. Nesbitt

3:25 Intermission.

3:45 **PHYS 225.** Properties of molecular clusters from broadband molecular rotational spectroscopy. B.H. Pate

4:20 **PHYS 226.** Formation of exotic networks of water clusters in helium droplets facilitated by the presence of neon atoms. G.E. Douberly, S. Xantheas

4:55 **PHYS 227.** Spectroscopic resolution attosecond measurements. S.R. Leone

## Section F

Parc 55 San Francisco  
Stockton

## Dynamics &amp; Structure of Molecular Fluids: Honoring the Work &amp; Life of Branka Ladanyi

## Interfaces

A. T. Krummel, N. E. Levinger, *Organizers*

M. Berg, *Presiding*

1:30 **PHYS 228.** Chemical processes at environmental water-air interfaces. V. Vaida, E. Griffith, R. Rapf, R. Perkins

2:10 **PHYS 229.** Quantifying the catalyst's role in inverse phase transfer catalysis with computer simulations. J.J. Karnes, I. Benjamin

2:30 **PHYS 230.** Visualization of charge motion in nanostructures with pump-probe microscopy. J.M. Papanikolas

3:10 Intermission.

3:30 **PHYS 231.** Ice: The common solid we hardly know. M.J. Shultz, P.J. Bissón, J. Marmolejos, A. Brumberg

4:10 **PHYS 232.** Solvation dynamics of aqueous solutions in extreme hydrophilic confinement. R.C. Remsing

4:30 **PHYS 233.** Dynamics and structure of water in confined environments. A. Luzar

## Section G

Parc 55 San Francisco  
Fillmore

## Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices &amp; Catalysis on Interstellar Grains

## Chemistry of Condensates on the Terrestrial Planets

R. Kaiser, *Organizer*

M. S. Gudipati, *Organizer, Presiding*

N. Goldman, *Presiding*

1:30 **PHYS 234.** Quantum chemistry and ab initio molecular dynamics simulations of reactive chemistry in ionized clusters: From acetylene clusters to aromatics. T. Stein, M. Ahmed, M.P. Head-Gordon

2:15 **PHYS 235.** Nucleobase synthesis via UV-induced oxidation of their precursors in astrophysical ices: A quantum chemical perspective. P. Bera, T. Stein, M.P. Head-Gordon, T.J. Lee

3:00 **PHYS 236.** Theoretical cluster studies of charge shift reactions in astrophysical ices. D.E. Woon

3:45 **PHYS 237.** Formation of formamide  $\text{NH}_2\text{CHO}$  catalyzed by icy grain particles: Atomistic insights from quantum chemical simulations. A. Rimola, V. Taquet, C. Ceccarelli, N. Balucani, P. Ugliengo

4:15 **PHYS 238.** Adsorption and catalysis of noble gas atoms and electrons on PAH surfaces. R.C. Fortenberry, G.T. Filipek, II, C.M. Novak, M.M. Moore, M.L. Theis, T.J. Lee

## Catalytic Materials from Molecular Insight

*Sponsored by COMP, Cosponsored by CATL, MPPG<sup>†</sup> and PHYS*

## Strong Electron Correlation &amp; Nonadiabatic Dynamics

*Sponsored by COMP, Cosponsored by PHYS*

## WEDNESDAY MORNING

## Section A

Parc 55 San Francisco  
Sutro

## Multicenter Molecules &amp; Coupled Molecular Assemblies: Synthesis, Characterization &amp; Theory

## Synthesis

*Cosponsored by INOR*

S. Corcelli, *Organizer*

M. Lieberman, *Presiding*

8:00 **PHYS 239.** Structural insight into electronic communication and energy transfer in metal organic framework arrays. A.J. Morris, J.M. Rowe

8:40 **PHYS 240.** Nano-Confinement inside molecular metal oxide clusters: Dynamics and modified encapsulation behavior. P. Yin

9:00 **PHYS 241.** Investigating the transformations of polyoxoanions using mass spectrometry and molecular dynamics. L. Vilà Nadal, L. Cronin

9:20 **PHYS 242.** Charge localization vs delocalization in tetranuclear mixed-valence complexes: A spectroscopic study. C. Lapinte, J. Hamon, R. Makhoul, P. Hamon

10:00 Intermission.

10:20 **PHYS 243.** Cluso-Si<sub>2</sub>C<sub>12</sub> Molecule from cluster to crystal: Structure and properties of cluso-Si<sub>2</sub>C<sub>12</sub> siloxane polymers. X.F. Duan, L.W. Burggraf

10:40 **PHYS 244.** Layer-by-layer assembled MOFs. Building ordered chromophoric arrays and propagating molecular excitons. S. Goswami, O.K. Farha, J.T. Hupp

11:20 **PHYS 245.** Lanthanide-based single-molecule magnets with high blocking temperatures. S. Demir, C. Gould, L.E. Darago, M.I. Gonzalez, K.R. Meihaus, J. Zdrozny, M. Nippe, J.D. Rinehart, J.R. Long

## Section B

Parc 55 San Francisco  
Powell

## Spectroscopy of Complex Systems

## Effects of Nanoconfinement &amp; Local Asymmetry on Dynamics &amp; Chemistry: Local E-Fields

A. V. Benderskii, J. Dawlaty, *Organizers*

A. Rury, *Presiding*

8:00 **PHYS 246.** Electric fields and enzyme catalysis. S.G. Boxer

8:40 **PHYS 247.** Vibrational sum frequency generation Stark shift spectroscopy: Measuring the electric field at a metal-dielectric interface. S.A. Sorenson, J. Patrow, J. Dawlaty

<sup>†</sup> Cooperative Cosponsorship

9:00 **PHYS 248.** Probing electrostatics along the catalytic cycle of an enzyme with site-specific nitrile probes. **S. Hammes-Schiffer**

9:40 Intermission.

10:00 **PHYS 249.** Calibrating the vibrational Stark effect of nitrile probes in the presence of hydrogen bonding with independently measured electric fields in green fluorescent protein. **L.J. Webb**

10:40 **PHYS 250.** Non-linear SFG spectroscopy of mineral/water interfaces containing electrolytes and tera-hertz spectroscopy in liquid water: A DFT-MD theoretical perspective. **M.P. Gaigeot**

11:00 **PHYS 251.** Atomistic electrodynamic-quantum mechanical approaches for simulating surface-enhanced hyper-Raman scattering: Theory and application. **Z. Hu, D. Chulhai, L. Jensen**

11:20 **PHYS 252.** Attosecond quantum kinetics of photoexcited Germanium. **P. Kraus, C. Kaplan, M.W. Zuerch, H. Chang, L.J. Borja, M.F. Jager, S. Cushing, D.M. Neumark, S.R. Leone**

11:40 **PHYS 253.** Driving delocalized dynamics using the orbital angular momentum of light. **B.S. Rolczynski, P. Navotnaya, G.S. Engel**

## Section C

Parc 55 San Francisco  
Hearst

**Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities**

**Excited-State Dynamics & Microscopy**

K. Glusac, D. S. Larsen, M. Olivucci, *Organizers*  
S. Haacke, *Presiding*

8:00 **PHYS 254.** Electronic energy redistribution in conjugated molecules and the effect of an energy gradient. **V.D. Kleiman**

8:30 **PHYS 255.** Space- and time-resolved spectroscopy of energy transfer. **T. Brixner**

9:00 **PHYS 256.** Ultrafast vibronic microspectroscopy of nanostructured electronic materials. **C. Schneidermann, J. Lim, A. Rao, P. Kukura**

9:30 **PHYS 257.** Ultrafast spectroscopic observation of cysteine-based redox regulation of coherent energy transfer in a photosynthetic antenna complex. **J.P. Otto, M.A. Allodi, R.G. Saer, S.H. Sohal, R.E. Blankenship, G.S. Engel**

9:50 **PHYS 258.** Resolving the detailed 2D spectral structure of the Fenna-Matthews-Olson complex. **B.S. Rolczynski, S. Yeh, P. Navotnaya, K. Ashraf, A.T. Gardiner, R.J. Cogdell, G.S. Engel**

10:10 Intermission.

10:30 **PHYS 259.** Electronic and geometric dynamics of transition metal complexes for solar energy conversion. **L.X. Chen, M. Shelby, D. Hayes, R. Hadt, P. Kim, S. Brown-Xu, J. Hong, M. Kelley**

11:00 **PHYS 260.** Torsional dynamics, intramolecular charge transfer, and solvent friction in the  $S_2$  ( $1^1B_u$ ) excited state of peridinin: A mechanism for enhanced mid-visible light harvesting in the peridinin-chlorophyll a protein. **W.F. Beck, J.D. Roscioli, S. Ghosh, M.M. Bishop, A.M. LaFountain, H.A. Frank**

11:20 **PHYS 261.** Probing the dynamics of higher-lying excited states. **C.G. Elles, T.J. Quincy, M.S. Barclay**

## Section D

Parc 55 San Francisco  
Divisadero

**Plasmonic Nanomaterials: From Physical Chemistry Fundamentals to Societal Impacts**

**Metamaterials & Information Technology**

P. K. Jain, *Organizer*

C. J. Murphy, *Organizer, Presiding*

8:00 **PHYS 262.** Film-Coupled nanocubes: From ultrafast spontaneous emission to perfect absorbers. **M.H. Mikkelsen**

8:35 **PHYS 263.** Dynamic plasmonic metamaterials with broken symmetry created via directed self-assembly. **D.B. Litt, M.R. Jones, M. Hentschel, P. Alivisatos**

8:55 **PHYS 264.** Towards all-optical chiral resolution with achiral plasmonic and dielectric nanostructures. **J. Dionne**

9:30 **PHYS 265.** Magneto-Optical response of cobalt interacting with plasmonic nanoparticle superlattices. **M.B. Ross, C.A. Mirkin, G.C. Schatz**

9:50 Intermission.

10:05 **PHYS 266.** Heat-assisted magnetic recording: Next-generation mass storage technology. **M. Re, J. Thiele, G. Ju, C. Rea, T. Rausch, M. Siegler, E. Gage**

10:40 **PHYS 267.** Near field thermal imaging: Sub-diffraction and steady state thermal measurements on optically excited gold nanostructures. **S. Baral, A. Rafiel Miandashiti, H.H. Richardson**

11:00 **PHYS 268.** Plasmonic transition metal nitrides for harsh-environment photonic applications. **U. Guler, H. Reddy, K. Chaudhury, A. Naldoni, A. Kildishev, V. Shalae, A. Boltasseva**

11:35 **PHYS 269.** Far-field superresolution detection of plasmonic near-fields. **R.C. Boutelle, D. Neuhauser, S. Weiss**

## Section E

Parc 55 San Francisco  
Embarcadero

**PHYS Division Awards Symposium**

**Francis P. Garvan-John M. Olin Medal: Symposium in honor of Barbara J. Finlayson-Pitt**

*Cosponsored by PRES*

J. E. Shea, *Organizer*

S. A. Nizkorodov, *Presiding*

8:00 Introductory Remarks.

8:05 **PHYS 270. Award Address** (Francis P. Garvan-John M. Olin Medal sponsored by Francis P. Garvan-John M. Olin Medal Endowment). From active molecules to atmospheric models: The central role of molecular level understanding in improving human health and welfare. **B.J. Finlayson Pitts**

8:40 **PHYS 271.** Towards molecular-level understanding of growth, formation and properties of atmospheric acid-base particles. **R.B. Gerber, J. Xu, K. Arquero, B.J. Finlayson Pitts**

9:05 **PHYS 272.** Atmospheric photochemistry of pyruvic acid and related oxoacids. **V. Vaida, A. Reed Harris, R. Rapf, R. Perkins**

9:30 **PHYS 273.** Enhanced reactivity in aqueous aerosols: Why bulk-phase aqueous measurements can mislead us. **D.O. Dehaan**

9:55 Intermission.

10:15 **PHYS 274.** Studies of halogen chemistry in the Arctic. **P.B. Shepson**

10:45 **PHYS 275.** Molecular dynamics simulation studies of ions and acids at atmospherically relevant aqueous solution-air interfaces. **D. Tobias**

11:10 **PHYS 276.** Composition and chemistry of the liquid/vapor interface of aqueous solutions. **J.C. Hemminger**

11:35 **PHYS 277.** Organic photochemistry in atmospheric particulate matter. **S.A. Nizkorodov**

## Section F

Parc 55 San Francisco  
Stockton

**Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi**

**Complex Systems**

A. T. Krummel, N. E. Levinger, *Organizers*  
R. Remsing, *Presiding*

8:20 **PHYS 278.** Biomolecular hydration shells: Dynamics and effect on biochemical function. **D. Laage**

9:00 **PHYS 279.** Probing PDI nanoaggregate structures by combining MD simulations & 2D IR spectroscopy. **A.T. Krummel**

9:20 **PHYS 280.** Biological water or rather water in biology? **P. Jungwirth**

10:00 Intermission.

10:20 **PHYS 281.** Bottom-up treatment of nonpolar solvation for molecular dynamics simulations. **P.T. Lake, M. McCullagh**

11:00 **PHYS 282.** Magnesium fluctuations modulate RNA dynamics in riboswitch. **U. Mohanty**

11:20 **PHYS 283.** Depolarized light scattering and terahertz absorption of protein solutions. **D.V. Matyushov**

## Section G

Parc 55 San Francisco  
Fillmore

**Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains**

**Physical Properties of Condensed Super Volatiles on Pluto: From the New Horizons Mission**

M. S. Gudipati, *Organizer*

R. Kaiser, *Organizer, Presiding*

G. Vidali, *Presiding*

8:00 **PHYS 284.** Probing molecular growth and charge transfer processes with vacuum ultraviolet mass spectrometry. **M. Ahmed**

8:45 **PHYS 285.** Chemical processing in interstellar grains via electron and UV radiation. **B.L. Henderson, M.S. Gudipati**

9:30 **PHYS 286.** Photon-stimulated processes on planetary surfaces and in astrophysical environments. **T.M. Orlando, C. Bennett, J. McLain, M. Sarantos**

10:15 **PHYS 287.** Chemical functionalization and catalytic activity of polycyclic aromatic hydrocarbons on dust grain surfaces. **L. Hornekaer, J.H. Jorgensen, A.W. Skov**

11:00 **PHYS 288.** PAHs, Dust and ice in the solar system. **A. Mattioda, G. Cruz-Diaz, A. Ricca Bauschlicher, A. de Barros, S. Erickson, P. van Vliet, E. da Silveira, A. Cook**

**Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling**

**Dynamics & Modeling of Allosteric Systems**

*Sponsored by COMR, Cosponsored by PHYS*

## WEDNESDAY AFTERNOON

### Section A

Parc 55 San Francisco  
Sutro

**Multicenter Molecules & Coupled Molecular Assemblies: Synthesis, Characterization & Theory**

**Experimental Characterization**

*Cosponsored by INOR*

S. Corcelli, *Organizer, Presiding*

1:30 **PHYS 289.** Pyrolysis of DNA origami drives carbon atoms into the substrate forming silicon carbide replicas. **M.A. Pillers, M. Lieberman**

2:10 **PHYS 290.** Self-assembled crystals that perform molecular rotor-based computations. **E.H. Sykes, N. Wasio**

2:50 Intermission.

3:10 **PHYS 291.** Simulation of static and dynamic behavior of molecular quantum-dot cellular automata made of Fe and Ru mixed-valence complexes. **K. Tokunaga**

3:50 **PHYS 292.** New reactions in surface chemistry. **F. Rosei**

4:30 **PHYS 293.** Electron transfer in the molecular quantum-dot cellular automata: The competition between Coulomb effect and nuclear relaxation. **Y. Lu, C. Lent**

### Section B

Parc 55 San Francisco  
Powell

**Spectroscopy of Complex Systems**

**Effects of Nanoconfinement & Local Asymmetry on Dynamics & Chemistry**

A. V. Benderskii, *Organizer*

J. Dawlaty, *Organizer, Presiding*

1:30 **PHYS 294.** Dynamics of room temperature ionic liquids measured with two dimensional infrared spectroscopy: The influence of electric fields on observables. **M.D. Fayer**

2:10 **PHYS 295.** Environmental effects on the structure of nanoemulsion interfaces. **A. Carpenter, J. Hensel, R. Ciszewski, B. Schabes, G.L. Richmond**

**2:30 PHYS 296.** Simulations of the vibrational spectroscopy of water at silica interfaces. J.A. Harvey, P.C. Burris, P. Wimalasiri, W.H. Thompson

**3:10** Intermission.

**3:30 PHYS 297.** Spectroscopic insight into efficiency limiting factors in light-driven H<sub>2</sub> generation using 1D and 2D multicomponent semiconductor/catalyst nanoheterostructures. T. Lian

**4:10 PHYS 298.** Transition from molecular vibrations to phonons in atomically-precise cadmium selenide quantum dots. A. Beecher, R.A. Dziatko, M.L. Steigerwald, J.S. Owen, A. Crowther

**4:30 PHYS 299.** Single-molecule exploration of the regulation of photosynthetic light harvesting. G. Schlau-Cohen

**4:50 PHYS 300.** Linear and nonlinear spectroscopy of multicolor photoresists. Z. Tomova, N. Liaros, S. Gutiérrez Razo, H. Ogden, S. Wolf, M. Thum, J.T. Fourkas, A.S. Mullin, D. Falvey, J. Petersen

## Section C

Parc 55 San Francisco  
Hearst

**Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities**

**Exciton Photodynamics: Soft Materials**

D. S. Larsen, M. Olivucci, *Organizers*  
K. Glusac, *Organizer, Presiding*

**1:30 PHYS 301.** What happens to triplet excitons after singlet fission? C.J. Bardeen

**2:00 PHYS 302.** Introducing a general spin-correct spin-flip configuration interaction method that includes dynamic correlation. J. Mato, M.S. Gordon

**2:20 PHYS 303.** Excitonic triplet-triplet couplings in dimeric and aggregated dyes: Experiment and theory. L.V. Slipchenko, D.A. Hartzler, S. Savikhin

**2:40 PHYS 304.** Singlet fission: Optimal choice of mutual disposition of chromophores. Z. Havlas, P. Felkel, E. Buchanan, J. Michl

**3:10 PHYS 305.** Dynamics of electronic excitations at organic-inorganic interfaces. D. Kilin, Y. Han, D. Vogel, A. Forde, B. Disrud, S.J. Jensen, W. Sapp, A.R. Erck

**3:30** Intermission.

**3:50 PHYS 306.** Conical intersections and non-radiative recombination in semiconductor nanocrystals. B.G. Levine, Y. Shu, B. Fales, W. Peng

**4:20 PHYS 307.** Insights into the mechanism of photovoltaic action from photoacid-functionalized ion-exchange materials. W.N. White, C. Sanborn, D. Fabian, S. Ardo

**4:40 PHYS 308.** Role of the protein in light-driven biological functions: A quantum chemical view. B. Mennucci

**5:10 PHYS 309.** Understanding the quantum dynamics of photosynthetic energy transfer with realistic environment interactions. P. Huo, D. Coker, M. Lee

## Section D

Parc 55 San Francisco  
Divisadero

**Plasmonic Nanomaterials: From Physical Chemistry Fundamentals to Societal Impacts**

**Surface Chemistry, Sensors & Diagnostics**

C. J. Murphy, *Organizer*

P. K. Jain, *Organizer, Presiding*

**1:30 PHYS 310.** Plasmonic nanomaterials for ultrasensitive biosensing. M. Stevens

**2:05 PHYS 311.** Dependence of the plasmonic properties of two silver nanocubes on their separation, relative orientation, refractive index of the substrate and propagation direction of the exciting light. N. Hooshmand

**2:25 PHYS 312.** Controlling chirality of aluminum plasmonic architectures based on copper mask nanosphere template lithography. J.S. Shumaker-Parry

**3:00 PHYS 313.** Understanding molecule-plasmon coupling in surface-enhanced femtosecond stimulated Raman scattering: Combined experimental-theoretical studies. M.O. McAnally, G.C. Schatz, R.P. Van Duyne

**3:20** Intermission.

**3:35 PHYS 314.** Commercialization of optically tailored plasmonic nanoparticles for diagnostic assays and therapeutics. S. Oldenburg, R.K. Baldwin, A.E. Saunders, J.M. Werle, R.T. Decker

**4:10 PHYS 315.** Novel numerical method for electron energy-loss spectroscopy calculation: EELS-FDTD. N. Large, A. Manjavacas, E. Ringe, G.C. Schatz, S.X. Wang, P.J. Nordlander

**4:30 PHYS 316.** SERS sensors for direct detection of environmental contaminants. A.J. Haes, T. Forbes, G. Lu

**5:05 PHYS 317.** Plasmon-induced excited-state heterogeneous catalysis on surface-doped metallic nanoparticles. J. Martinez, E.A. Carter

## Section F

Parc 55 San Francisco  
Stockton

**Dynamics & Structure of Molecular Fluids: Honoring the Work & Life of Branka Ladanyi**

**Water**

N. E. Levinger, *Organizer*

A. T. Krummel, *Organizer, Presiding*

**1:30 PHYS 318.** Mechanisms of electronic excited state relaxation in water clusters. P.J. Rossky

**2:10 PHYS 319.** Withdrawn.

**2:30 PHYS 320.** Solvation structure and photochemical dynamics of seeded molecular clusters. G. Peslherbe

**3:10** Intermission.

**3:30 PHYS 321.** Solvation dynamics revisited: An energy flux approach. J.T. Hynes, R. Rey

**4:10 PHYS 322.** Connecting features of a water molecule with the anomalous properties of liquid water by comparing different water models in computer simulations. T. Ichiye

**4:30 PHYS 323.** Hydration-shell vibrational spectroscopy of water-mediated interactions. D. Ben-Amotz

## Section G

Parc 55 San Francisco  
Fillmore

**Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains**

**Chemical Composition & Evolution of Comets 67P/CG: As Observed by the Rosetta Mission**

R. Kaiser, *Organizer*

M. S. Gudipati, *Organizer, Presiding*

L. Hornekaer, *Presiding*

**1:30 PHYS 324.** Sugar derivatives in residues produced from the UV irradiation of astrophysical ice analogs. M. Nuevo, S.A. Sandford, J. Saunders, G. Cooper

**2:15 PHYS 325.** Protonation and ionization of organic reactive molecules in low-density amorphous water ice. W.W. Sander, P. Costa, M.S. Gudipati

**3:00 PHYS 326.** Radiation chemistry and redox reactions in icy molecular solids. R.L. Hudson, M. Loeffler

**3:45 PHYS 327.** Electron induced chemistry in interstellar and cometary ices. N.J. Mason

**4:30 PHYS 328.** Non-Ionizing UV (< 7 eV) photochemistry of cosmic ice analogs of ammonia. H. Cumberbatch, A. Bao, C. Arumainayagam

**Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling**

**Inhibition & Therapeutic Applications of Allosteric Mechanisms**

*Sponsored by COMP, Cosponsored by PHYS*

## WEDNESDAY EVENING

### Section A

Moscone Center  
Hall D

**PHYS Poster Session**

J. E. Shea, *Organizer*

**7:00 - 9:00**

**PHYS 329.** Study of the O(<sup>1</sup>P) initiated oxidation of 2-methylfuran via synchrotron multiplexed photoionization mass spectrometry. Y. Fathi, K. Nwachuku, G. Meloni

**PHYS 330.** Photo-induced phase transitions of spin-crossover nanoparticles within the thermal hysteresis loop. A.D. Mena, D.A. Munteanu, R.M. van der Veen, T. Dixon, C.M. Gentle

**PHYS 331.** Insight into the role of water in the photogeneration and properties of bifunctional quinone methides: A time-resolved spectroscopic study of a binol quinone methide. L. Du, X. Zhang, J. Xue, D.L. Phillips

**PHYS 332.** Electronic dynamics in bulk GaAs induced by light with orbital angular momentum. P. Navotnaya, B.S. Rolczynski, G.S. Engel

**PHYS 333.** Equivalency of the kinetic schemes: Mathematical formulation. V.D. Dergachev, A. Petrov, I. Dergachev, S.A. Varganov

**PHYS 334.** Water, hydrogen-bonding networks, redox-active tyrosines, and proton coupled electron transfer reactions in the photosynthetic water oxidizing complex. Z. Guo, B.A. Bary

**PHYS 335.** Withdrawn.

**PHYS 336.** Accessing chiral information in macromolecules via time-resolved circular dichroism spectroscopy. V. Stadnytskyi, G. Orf, R.E. Blankenship, S. Savikhin

**PHYS 337.** Methylglyoxal hydration state equilibrium at the air-water interface. B. Gordon, G. Lindquist, N.A. Valley, S. Wren, G.L. Richmond

**PHYS 338.** Simulating transient x-ray absorption spectroscopy of photo-excited chemical dynamics in molecular systems. S. Pemmaraju, D. Prendergast

**PHYS 339.** Characterization of the structure and dynamics of AOT reverse micelles in heavy alkanes. I. Sitarik, K. Obray, J. Diverdi

**PHYS 340.** Exploring the role of asymmetrically coordinated photoactive metal centers in photoinduced electron transfer reactions: A spectroscopic perspective. B. Dietzek

**PHYS 341.** Chemistry of aerosolized room-temperature ionic liquids. S. Chambreau, G.L. Vaghjani, D. Popolan-Vaida, S.R. Leone

**PHYS 342.** Electron irradiation effects in icy regoliths: The PacMan anomalies on the icy Saturnian moons. M.J. Schaible, R.E. Johnson, L. Zhigilei

**PHYS 343.** Effects of thermal broadening and photoluminescence in functionalized silicon nanocrystals. D. Vogel, D. Kilin

**PHYS 344.** Undistorted fluorescence yield detected soft x-ray absorption spectroscopy: Direct detection of outer (3d->2p), inner (3s->2p) and inverse partial fluorescence yield using TES based spectrometers. C. Titus

**PHYS 345.** Charge transfer dynamics at perovskite quantum dot and Spiro-MeOTAD interface. D. Vogel, D. Kilin

**PHYS 346.** Withdrawn.

**PHYS 347.** Binary mixtures consisting of glass-forming constituent and crystal-forming constituent: Density, rheology and phase transitions in poly(propylene glycol) - water system. B.H. Milosavljevic, S. Lovrinac

**PHYS 348.** Simplifying calculations of IR and Raman spectra from DFT-based molecular dynamics simulations. D.R. Galimberti

**PHYS 349.** Transient absorption spectroscopy with realtime TDDFT: Perovskites and Pauli bleaches. J. Parkhill

**PHYS 350.** New mechanism for glass formation. I.C. Sanchez

**PHYS 351.** Withdrawn.

**PHYS 352.** Role of chloride ion in photosynthetic oxygen-evolution. U. Brahmachari, J.F. Gonthier, C. Sherrill, B.A. Barry

**PHYS 353.** Theoretical <sup>15</sup>N isotropic chemical shift: Challenging the calculation of liquid state references. F. Jolibois, I. Gerber

**PHYS 354.** Computational studies on chemistry of graphene surface. B.Q. Pham, M.S. Gordon

‡ Cooperative Cosponsorship

- PHYS 355.** Proposed two-dimensional topological insulator in SiTe. **Y. Ma, T. Heine**
- PHYS 356.** Sunlight-Driven synthesis of oligomers from oxoacids in aqueous environments. **R. Rapf, R. Perkins, V. Vaidya**
- PHYS 357.** Ultrafast electron transfer in a model organic semiconductor: An experimental and theoretical examination. **V. Duong, D. Nordlund, D. Prendergast, A. Ayzner**
- PHYS 358.** Optoelectronic structures of hybrid lead iodide perovskites probed by electron-rotor interaction. **J. Gong, M. Yang, X. Ma, R.D. Schaller, G. Liu, L. Kong, Y. Yang, M.C. Beard, M. Lesslie, Y. Dai, B. Huang, K. Zhu, T. Xu**
- PHYS 359.** Spectroscopic and theoretical investigations of the intramolecular  $\pi$ -type hydrogen bonding in cyclic and bicyclic molecules. **J. Laane, E.J. Ocola, A. Al-Saadi**
- PHYS 360.** Withdrawn.
- PHYS 361.** Polarization anisotropy measurements for determining the orientation of guest molecules in a self-assembled bis-urea macrocycle host. **P. Kittikhunnatham, B. Som, L.S. Shimizu, A. Greytak**
- PHYS 362.** Withdrawn.
- PHYS 363.** Effects of exciton-delocalizing ligands on intraband relaxation in semiconductor nanocrystals. **M.S. Azzaro, M.C. Babin, S.T. Roberts**
- PHYS 364.** Nonlinear interferometer for complex signal measurement. **M.J. Shultz, J. Wang, P.J. Bisson, J. Marmolejos**
- PHYS 365.** Withdrawn.
- PHYS 366.** Efficient geometry minimization and transition structure optimization using interpolated potential energy surfaces. **J. Zheng, M.J. Frisch**
- PHYS 367.** Photon induced aerosol formation: Photochemically driven reactions of sulfur dioxide with water and organics. **J.A. Kroll, V. Vaidya**
- PHYS 368.** Angular dependence of ionization by short, intense pulses of linear and circularly polarized light simulated by time-dependent configuration interaction with an absorbing potential. **H.B. Schlegel, P. Krause, P. Hoerner, Q. Liao, W. Li**
- PHYS 369.** Ultrafast transient absorption spectroscopy investigation of excited state dynamics of methyl ammonium lead bromide perovskite nanostructures. **H. Telfah, J. Liu, A. Jamhawi, J. Strain, M. Teunis, R. Sardar**
- PHYS 370.** Modelling photodetachment processes in transition metal oxide clusters. **L.M. Thompson, H.P. Hratchian**
- PHYS 371.** Lock and key bidentate binding of ligands on nanocrystals. **X. Li, A. Fast, D. Fishman, Z. Huang, M. Tang**
- PHYS 372.** Multiple *cis* and *trans* conformations of caprylactam and their role in deuterium isotope effect predictions in  $^{13}\text{C}$  NMR. **E. Kleist, B.S. Hudson**
- PHYS 373.**  $\phi$  Photoreduction of  $\text{CHCl}_3$  initiated by illumination of SPEEK/PVA and SPEEK/ $\text{HCO}_3^-$  system via a free radical mechanism. **M. Islam**
- PHYS 374.** Withdrawn.
- PHYS 375.** Tunable molecular separation by photoswitchable MOF membranes. **L. Heinke**
- PHYS 376.** Nanoscale  $\text{MoS}_2$  towards emerging organic optoelectronics. **A. Salam, S. Pal**
- PHYS 377.** Chiroptical investigation of sulfone-bridged heterohelene. **A. Kim, E. Mohammad, M. Vargas, A.G. Petrovic, B. Gliemann, M. Kivala**
- PHYS 378.** Withdrawn.
- PHYS 379.** Tryptophan-to-tryptophan energy Transfer in UV-B photoreceptor UVR8. **X. Li, D. Zhong**
- PHYS 380.** Withdrawn.
- PHYS 381.** Withdrawn.
- PHYS 382.** Accessing spatial heterogeneity in halide lead perovskite thin films with multimodal optical imaging. **Y. Ma, M. Simpson, B. Doughty, S. Das, B. Yang, K. Xiao**
- PHYS 383.** Non-intrusive detection of polyatomic combustion intermediates via photoionization out of Rydberg states. **F. Rudakov**
- PHYS 384.** Description of hydration water in protein (GFP) solution. **J. Nickels, S. Perticaroli, G. Ehlers, C.B. Stanley, E. Mamontov, H.M. O'Neill, Q. Zhang, D. Myles, J. Katsaras**
- PHYS 385.** Raman studies of the photopolymerization of 1,4-diodobuta-1,3-diene in crystalline urea inclusion compounds. **S. Dinca, D.G. Allis, M.B. Sponsler, B.S. Hudson**
- PHYS 386.** Unequal hole and electron diffusion in lead bromide perovskites. **G. Elbaz, D. Straus, O.E. Semonin, T. Hull, D. Paley, P. Kim, J.S. Owen, C.R. Kagan, X. Roy**
- PHYS 387.** First-principles calculations of the K-edge XANES spectra for aqueous  $\text{Na}^+$  and for ion pairs of  $\text{Ca}^{2+}$  with either carbonate or bicarbonate. **M. Galib, N. Govind, J. Fulton**
- PHYS 388.** Photoinduced charge transfer rates in light-harvesting carotenoid-porphyrin- $\text{C}_{60}$  molecular triad. **X. Sun, E. Geva**
- PHYS 389.** Inelastic neutron scattering analysis of tautomeric polymorphic crystals: The strange case of barbitalic acid. **B.S. Hudson, Y. Cheng**
- PHYS 390.** Exciton imaging in polycrystalline semiconducting organic thin films using optical resonance imaging. **M.A. Allodi, R.J. Mazukski, P.D. Dahlberg, H. Davis, J. Otto, G.S. Engel**
- PHYS 391.** Withdrawn.
- PHYS 392.** High-Resolution infrared spectroscopy of carbon sulfur clusters. **J.B. Dudek, J. Kozubal, T. Salomon, S. Fanghänel, S. Thorwirth**
- PHYS 393.** Electronic structure of iron-sulfur clusters revealed by 2p3d resonant inelastic x-ray scattering: Implications for biological nitrogen fixation. **B. Van Kuiken, A. Hahn, S. DeBeer**
- PHYS 394.** Vacuum ultraviolet spectroscopy of the lowest-lying electronic state in sub-critical and supercritical water. **T.W. Marin, I. Janik, D.M. Bartels, D. Chipman**
- PHYS 395.** Molecular simulations of  $\text{A}\beta$ -hiAPP cross-seeding assemblies on lipid membranes. **M. Zhang, R. Hu, B. Ren, F. Yang, K. Chu, J. Zheng**
- PHYS 396.** Femtosecond stimulated Raman Spectroscopy of light harvesting complexes: Good vibrations in photosynthesis. **J. Artes Vivanco, Y. Hontani, R. van Grondelle, J. Kennis**
- PHYS 397.** Synthesis and charge carrier dynamics of organolead bromide perovskite/graphitic carbon nitride nanoheterostructures for photocatalytic  $\text{CO}_2$  reduction. **Y. Pu**
- PHYS 398.** Partitioning, clustering, and hydrophobicity in mixtures of phospholipids and aromatics at water interfaces. **R. Perkins, V. Vaidya**
- PHYS 399.** Density fluctuations of carbon dioxide in cylindrical nanopore. **Y. Dai, X. Xu, Y. Liu**
- PHYS 400.** From primordial soup to replicating DNA: Analyzing a proposed precursor of modern nucleotides. **K. Gochenour, M.P. Callahan, K.E. Smith, D.K. Elliott, G.E. Lindberg**
- PHYS 401.** Investigation of electric potential induced by flowing water droplet on electrolyte-insulator-semiconductor structure. **J. Park, Y. Yang, Y. Kim**
- PHYS 402.** Effect of salt and pH on the self-assembly of myristic acid. **B. Williamson, R. Rapf, R. Perkins, V. Vaidya**
- PHYS 403.** Confined phase separation of aqueous-organic nanodroplets. **F. Hrahsheh, Y. Sani Wudil, G. Wilemski**
- PHYS 404.** Molecular properties of a light-gated cation channel from cryptophyta *Guillardia theta*. **Y. Yamauchi, M. Konno, S. Ito, Y. Kato, S. Tsunoda, K. Inoue, H. Kandori**
- PHYS 405.** Triboelectric hydrogen gas detection using palladium functionalized surface. **S. Shin, Y. Kwon, J. Jung, J. Nah**
- PHYS 406.** Asymmetric solvent-mediated electron-transfer chemical doping of graphene. **R.A. Dziatko, K. Harris, M. Gibson, J. Kerten, B. Janicek, A. Crowther**
- PHYS 407.** Nondestructive testing with second harmonic generation. **S.D. Smith, S. Averett, J.E. Patterson**
- PHYS 408.** Nature of two diffuse interstellar bands revealed by electronic transitions in  $\text{C}_{60}^+$ . **S. Ahmadvand, A.O. Lykhin, S.A. Varganov**
- PHYS 409.** Specific peptide-bond dissociation and effects of a phenyl group of some peptide model molecules. **C. Liu, Y. Chiang, H. Lin**
- PHYS 410.** Vapor-liquid and liquid-liquid equilibria for a langmuir monolayer of pentadecanoic acid: A Monte Carlo study. **M.S. Minkara, J. Siepmann**
- PHYS 411.** Withdrawn.
- PHYS 412.** Excited-state dynamics of carotenoid dimers. **S.J. Doyle, M.J. Tauber**
- PHYS 413.** Experimental and computational investigation of the competitive unimolecular reactions of  $\text{CHF}_2\text{CHF}_2$  and  $\text{CHF}_2\text{CF}_3$ . **C.A. Smith, G.L. Heard, B.E. Holmes**
- PHYS 414.** Transient grating spectroscopy of spherulene and spherulene: The role of the carbonyl group in the excited state electronic and vibrational dynamics of carotenoids. **S.D. Khosravi, M.M. Bishop, A.M. LaFontaine, D. Busa, S. Suresh, D. Turner, G.N. Gibson, H.A. Frank, N. Berrah**
- PHYS 415.** ITC investigations on the dependence of temperature and osmometry on the structure and stability of the DNA I-motif. **T. Sutorius**
- PHYS 416.** Theoretical investigation of RecA filaments search for DNA breaks. **M. Kochugaeva, A. Shvets, A. Kolomeisky**
- PHYS 417.** Withdrawn.
- PHYS 418.** Theoretical study on the reaction of silyldyne radical (SiH) with dimethylacetylene ( $\text{CH}_3\text{CCCH}_3$ ). **Y. Lin, M. Wu, B. Sun, A.H. Chang, R. Kasper**
- PHYS 419.** Cl-initiated oxidation of propargylamine via synchrotron multiplexed photoionization mass spectrometry. **C. Price**
- PHYS 420.** Withdrawn.
- PHYS 421.** Investigation of glass structures using Raman spectroscopy. **V. Torres, M.D. Sonntag**
- PHYS 422.** Ultrafast photoreleasing of the quinoline-derived phototrigger with sensitivity toward 2-photon excitation. **X. Lan**
- PHYS 423.** Singlet/Triplet excited state mediated dehalogenation reactions of itraconazole in acetonitrile and aqueous solutions studied by time-resolved spectroscopy. **Z. Ruixue, M. Li, L. Du, D.L. Phillips**
- PHYS 424.** Nanomorphology stabilization through the solvent additives and fixing agent interlayer for efficient organic and perovskite photovoltaic devices. **D. Wang, W. Jang, S. Ahn, S. Park, J. Park**
- PHYS 425.** Quantum mechanical calculations of the effects of humidity on  $\text{HNO}_3$  chemisorbed onto  $\text{TiO}_2$ . **C.J. Ostaszewski, N.M. Stuart, J.G. Navea**
- PHYS 426.** Computational investigation of hydroperoxyl radical reacting with acetyl peroxy radical. **M.P. DeVault, K.T. Kuwata**
- PHYS 427.** Computational study of hydride binding to the active site of lactate racemase. **R.C. Mauban, S.A. Varganov**
- PHYS 428.** Temperature dependence of photochemical electron's excited-state relaxation: Distinguishing cavity and non-cavity models. **C. Zho, E.P. Farr, W.J. Glover, B.J. Schwartz**
- PHYS 429.** Excited state proton transfer kinetics of aminonaphthols in aqueous reverse micelles. **A.P. Poblete, K. Takematsu**
- PHYS 430.** Photochemical reactivity of oxoacids in aqueous solution as a function of pH. **M.R. Dooley, R. Rapf, R. Perkins, V. Vaidya**
- PHYS 431.** Prevention of fibrillation of the amyloid- $\beta$  (25-35) peptide by graphene oxide. **S. Bag, S. DasGupta, S. Dasgupta**
- PHYS 432.** FTIR analysis of internal water molecules of a light-driven sodium pump KR2. **S. Tomida, S. Ito, K. Inoue, H. Kandori**
- PHYS 433.** Kinetic modeling of the atmospheric oxidation pathways of dimethyl disulfide and dimethyl sulfide. **J.A. Berlanga**

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

- PHYS 434.** Withdrawn.
- PHYS 435.** Photoaddition of methanol to the stilbenes: Involvement of a common twisted intermediate. **S. Gupta, D. Boose, J. Saitiel**
- PHYS 436.** Utilizing electron spin echo envelope modulation to distinguish between the local secondary structures of an  $\alpha$ -helix and an amphipathic 310-helical peptide. **S. Rafferty**
- PHYS 437.** Hybrid nano-biosystems: An investigation of the impact of quantum dots on the bacteriorhodopsin photocycle. **T.J. Wax, J.A. Greco, S. Chen, J. Zhao, R.R. Birge**
- PHYS 438.** Thermal study of the decomposition of (HTPB) hybrid rocket fuel in the presence of azo-tetrazolate based high nitrogen content high energy materials. **M. Yousef, K. Hudson**
- PHYS 439.** Metal free, redox-active, viologen-based, Deep Eutectic Solvents (DES). **L.N. Matsushima, J.C. Goeltz**
- PHYS 440.** Optical transitions in bulk semiconductors induced by light carrying orbital angular momentum. **P. Navotnaya, B.S. Rolczynski, G.S. Engel**
- PHYS 441.** Core-shell  $\text{MoS}_2/\text{CdS}$  nanorods with extraordinary high photocatalytic activity for hydrogen production under visible-light. **Z. Yan**
- PHYS 442.** Developing and implementing methods for Markov state model construction and conformational sampling to extract the kinetics of protein-protein interactions. **Z. He**
- PHYS 443.** Decomposition of contributions from core-levels exhibiting spin-orbit splitting in XUV core-level spectroscopy. **H. Chang, M.W. Zuerch, P. Kraus, C. Kaplan, L.J. Borja, S. Cushing, D.M. Neumark, S.R. Leone**
- PHYS 444.** Withdrawn.
- PHYS 445.** Unusual pattern formation in the cadmium hydroxide system. **B. Bohner, Á. Tóth, D. Horvath**
- PHYS 446.** Photofragmentation dynamics of tetranitromethane. **Y. Han, B. Rasulev, D. Kilin**
- PHYS 447.** Can zwitterionic cyclic polymers show aggregation in solution? **P. Du, A. Li, X. Li, R. Kumar, D. Zhang**
- PHYS 448.** Molecular dynamics of reaction between hydrogen peroxide and zigzag carbon nanotube. **B. Disrud, D. Kilin**

- PHYS 464.** Non-Thermal plasma for the heterogeneous chemistry of chemisorbed volatile compounds with free-radicals. **C. Bennett-Caso, J.R. Borgatta, J.G. Navea**
- PHYS 465.** Excited-state investigation of the ultrafast electrocyclization reaction for a molecular photochromic switch. **C. Jones, V.A. Spata, S. Matsika**
- PHYS 466.** PhotochemCAD 3. digital database of >1000 absorption and fluorescence spectra of diverse natural and synthetic tetrapyrrole macrocycles. **M. Taniguchi, H. Du, J.S. Lindsey**
- PHYS 467.** Nonadiabatic dynamics in the formation of the elusive disilavinylidene molecule (H<sub>2</sub>SiSi). **C. Kang-Heng, L. Lin, A.H. Chang, R. Kaiser**
- PHYS 468.** Nonadiabatic dynamics of Si(<sup>4</sup>P) + Si<sub>2</sub>H<sub>6</sub> reaction. **B. Sun, C. Jimmy**
- PHYS 469.** In-situ x-ray spectroscopy study of electrodeposited Ni-Fe hydroxide catalysts for electrochemical oxygen evolution reaction. **K. Nie**
- PHYS 470.** Two-Dimensional electronic spectroscopy of BODIPY dye derivatives: Characterizing photophysics and solvent dependence. **Y. Lee, S. Das, R.M. Malamakal, S. Meloni, D.M. Chenoweth, J.M. Anna**
- PHYS 471.** MRCI study of the ground state and low-lying states of Si<sub>2</sub>H. **D. Corey, J. Song**
- PHYS 472.** Apparent molar volumes and isentropic compressions of cyclic ethers in aqueous solutions from 288.15 K to 313.15 K at atmospheric pressure. **L. Brown, P. Bernal**
- PHYS 473.** Electrochemical impedance spectroscopy of bipolar membranes for water and CO<sub>2</sub> electrolysis. **Z. Yan, L. Zhu, C.C. Li, M. Hickner, T. Mallouk**
- PHYS 474.** Excited-State proton transfer in aminonaphthols. **M. Groves, H.E. Rudel, K. Takematsu**
- PHYS 475.** Experimental determination of the aqueous redox potentials of environmentally relevant organic pollutants via high-speed cyclic voltammetry. **M. Paul, D. Ruuska, S.N. Eustis**
- PHYS 476.** Brillouin spectroscopy of bamboo fibers. **D. Williams, N. Rahbar, K.J. Koski**
- PHYS 477.** Anisotropic optical response from asymmetrical assembly of gold-silica-quantum dot nanostructure. **Y. Luo**
- PHYS 478.** Enhanced sampling method with hybrid non-equilibrium molecular dynamics/Monte Carlo. **D. Suh, C. Chipot, B. Roux**
- PHYS 479.** Novel approach to investigate the single molecule photophysics of bare CdSe quantum dots. **B. Mehlenbacher, J.J. Peterson**
- PHYS 480.** Synthesis of iron series phosphate micro-nano-materials and their potential applications for electrochemical energy storage. **H. Xue, Y. Yan, H. Pang**
- PHYS 481.** New inorganic pH indicator based on ferricyanide intercalated zinc-aluminum layered double hydroxide. **N.A. Ibrahim, A. Chaparadza**
- PHYS 482.** Many-Body expansion combined with neural networks. **K. Yao, J. Herr, J. Parkhill**
- PHYS 483.** Albumin based nanoparticles as a delivery vehicle for flavonoids and their anticancer activity. **P. Ghosh, S. Dasgupta**
- PHYS 484.** Stability of bovine serum albumin solutions in presence of salts: A calorimetric and solubility study. **T. Janc, V. Vlachy, M. Luksic**
- PHYS 485.** Noninvasive detection of aluminum sensitization using SHG. **A. Farnsworth, S. Averett, K. Rellaford, S.D. Smith, J.E. Patterson**
- PHYS 486.** Feasibility of *in situ* magnetic resonance imaging of semi-industrial chemical reactors at milli-Tesla magnetic fields. **D. Barskiy**
- PHYS 487.** Influence of pH on the photochromic reaction dynamics of phenylamine-substituted diarylethene derivatives. **S. Mahvidi, C.J. Otolski, Y. Yokoyama, F. Nourmohammadian, C.G. Elles**
- PHYS 488.** Ultrafast energy relaxation dynamics and wave-packet motion in Pt(II) bimetallic complexes. **P. Kim, S. Brown-Xu, A. Chakraborty, F.N. Castellano, L.X. Chen**
- PHYS 489.** Investigation on pyrolysis of jet propellant 8. **D. Belisario-Lara, A.M. Mebel**
- PHYS 490.** Post-Marcus charge transfer dynamics via the generalized quantum master equation. **E. Mulvihill, E. Geva, A. Schubert, X. Sun, A. Kananenka**
- PHYS 491.** Withdrawn.
- PHYS 492.** Molecule-nanocrystal photon upconversion sensitized by CdSe/CdS core-shell nanocrystals. **Z. Huang, M.L. Tang**
- PHYS 493.** Bath gas and pressure dependence of the anomalous isotopic composition of ozone. **A.H. Kazez, K.A. Boering**
- PHYS 494.** Jet-cooled high resolution infrared spectroscopy of small van der Waals SF<sub>6</sub> clusters. **A. Turner, Y. Berger, V. Boudon, L. Bruel, M. Gaveau, M. Mons, A. Potapov, P. Asselin**
- PHYS 495.** Withdrawn.
- PHYS 496.** Ultrafast photophysics of plasmonic aluminum nanoparticles. **K. Smith, Y. Cheng, E. Arinze, S. Thon, A.E. Bragg**
- PHYS 497.** Modeling of hydrodynamic interactions in biological systems. **M. Dlugosz**
- PHYS 498.** Optimization of energy transfer in DNA-dye excitonic circuits. **W. Bricker, J. Banal, R. Veneziano, K. Pan, M. Bathe**
- PHYS 499.** Theoretical investigation of vibrational frequency shifts as probes of charge transfer in organic systems. **K. Williams, E. Geva**
- PHYS 500.** Theoretical study on photoluminescence properties of double salts of silver and gold complexes. **S. Chen, B. Sun, A.H. Chang, I.J. Lin**
- PHYS 501.** Computations of the hyperpolarizability of nonlinear optical chromophores aggregates. **X.A. Sosa Vazquez, J. Maat, C. Isborn**
- PHYS 502.** Surface-Enhanced Raman scattering analysis of DNA modifications in the presence of carboxyplatin. **N. Mirsaleh-Kohan, S. Khan, M. Torres, M. Duplanty, P. Hall, M. Garrett**
- PHYS 503.** Water solubilization of CuInS<sub>2</sub>/ZnS QDs and bioconjugation to fibroblast growth factor studied by FRET. **C. Robinson, M. Mohale, A. Nguyen, C.D. Heyes**
- PHYS 504.** Nonradiative relaxation in real-time electronic dynamics OSCF2: Organolead triiodide perovskite. **T.S. Nguyen, J. Parkhill**
- PHYS 505.** Characterization of  $\alpha$ -hemolysin conformational changes with two-dimensional infrared spectroscopy. **C.T. Kuhs, A.T. Krummel**
- PHYS 506.** Time resolved resonance Raman spectroscopic and laser flash photolysis studies on typical significant stocks-shifted large  $\pi$  system. **L. Song-Bo, M. Li, Z. Ruixue, D.L. Phillips**
- PHYS 507.** Withdrawn.
- PHYS 508.** Anomalies of ice Ih in second-order many-body perturbation theory. **M. Salim, S. Hirata**
- PHYS 509.** Withdrawn.
- PHYS 510.** Microwave spectroscopy of 3,3,3-trifluoro-2-(trifluoromethyl)propanoic acid-formic acid complex. **J. Thomas, M.J. Carrillo, A. Serrato, W. Jaeger, Y. Xu, W. Lin**
- PHYS 511.** Ultrafast extreme-ultraviolet reflection spectroscopy of electro-phonon dynamics in Germanium. **C. Kaplan, P. Kraus, L.J. Borja, M.W. Zuerch, H. Chang, M.F. Jager, S. Cushing, D.M. Neumark, S.R. Leone**

Technical program information known at press time. The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

- PHYS **512**. Photoionization cross sections of three propargylic fuels. **M. Winfough**, G. Meloni
- PHYS **513**. Simulating the chemistry of ionizing radiation in solids. **C.N. Shingledecker**, E. Herbst
- PHYS **514**. Synthesis and photophysical characterization of bipyridyl hybrid oligomers: Examining mixed furan-thiophene systems using spectroscopy and DFT methods. **A.E. Steen**, S. Nguyen, T.L. Ellington, G.S. Tschumper, D.L. Watkins, N. Hammer
- PHYS **515**. Modeling protein organization in thylakoid membrane stacks via a lattice gas model. **A. Rosnik**, P. Geissler
- PHYS **516**. Quantum control of Yukawa interaction at nucleus. **Q. Wang**
- PHYS **517**. Withdrawn.
- PHYS **518**. Structural trends and reactivity of first-row transition metal cation-acetylene complexes revealed by probing their C-H stretching fundamentals. **A.D. Brathwaite**, S.A. Ferguson, T.B. Ward, R.S. Walters, M.A. Duncan
- PHYS **519**. Nonadiabatic dynamics of  $C(P) + SiH_4$  reaction. **A.H. Chang**
- PHYS **520**. Preferential solvation of iodide anion in aqueous binary liquid mixtures. **Y. Al Hussain**, B.H. Milosavljevic
- PHYS **521**. Rotational spectroscopic and theoretical studies of the perfluorobutyric acid--formic acid complex. **J. Thomas**, **A. Serrato**, M.J. Carrillo, W. Lin, W. Jaeger, Y. Xu
- PHYS **522**. Molecular geometry and conformational analysis of the monomer and monohydrate of 4,4,4-trifluorobutyric acid. **A. Treviño**, W. Lin
- PHYS **523**. Spatially extended active site: How distal residues contribute to catalysis in human phosphoglucose isomerase. **S.C. Begay**, P.J. Beuning, M.J. Ondrechen
- PHYS **524**. Electronic structure and RRKM calculations on the reaction  $CH_3OH_2^+ + CH_3OH$ . **M. Rosi**, S. Falcinelli, N. Balucani, N. Fagnas-Lago, C. Ceccarelli, D. Skouteris
- PHYS **525**. Photophysical characterization of free-base triphenylcorrole reduced and oxidized tautomers. **G.N. Calvillo**, **C. Reed**, F. Kohl, S. Klein, A. Loogman, S. Lupercio, E.A. Alemán
- PHYS **526**. Enthalpy relaxation below  $T_g$  in low molecular weight poly(dimethylsiloxane). **D. Eason**, A.D. Schwab
- PHYS **527**. Role of ion-specific effects in DNA/ionene complexation. **M. Seru nik**, B. Zener, **B. Hribar Lee**
- PHYS **528**. Effects of the anion nature of cationic polymethine dyes on the spectral-luminescent and photovoltaic properties of polymer-based photoconductive composites. **A.A. Ishchenko**, G. Bulavko, **N. Barashkov**, **T. Sakhno**
- PHYS **529**. Investigation of relationship between the rate of converting leuco form of Indigo Carmine in its colored form and oxygen permeability of polymer films. **N. Barashkov**, I. Irgibayeva, **T. Sakhno**
- PHYS **530**. Novel approaches to the development of biosensor by using systems of formulation and analytical techniques. **G. Ren**, Y. Lo, E.J. Parish, **H. Honda**, T. Wei
- PHYS **531**. Tuning the structure and photophysics of a fluororous phthalocyanine platform. **C.M. Drain**, C. Farley

- PHYS **532**. Using isothermal titration calorimetry to investigate dicationic alkylammonium bromide Gemini surfactants. **M.L. McKim**, B.K. Rich, P. Okoroji-Ohabor, S.J. Bachofer, **R.D. Sheardy**
- PHYS **533**. Linking pH, temperature, ionic strength and conformation for the DNA i-motif. **T. Nguyen**, C. Fraire, A. Fernandes, M. Choi, **R.D. Sheardy**
- PHYS **534**. Uncertainty and sensitivity analysis of the Marcus electron transfer rate model. **E.J. Alvarado**, D.D. Mendez, E.J. Morales-Butler, M. Cruz-Aponte
- PHYS **535**. Tensor structured coupled cluster method. **R. Schutski**, G.E. Scuseria
- PHYS **536**. Evaluation of VLE data from the TraPPE Force Field. **B.L. Eggimann**
- PHYS **537**. DNA mutation and fluorescent label effects in surface-bound 25mer microarrays: Molecular simulation of bright mismatches. **B. Rivard**, **J.M. Stubbs**
- PHYS **538**. Photochemical activity of layered potassium niobate in the redox processes. **V. Shvalagin**, G. Grodzuk, N. Andryushina, V. Granchak, M. Skoryk, **T. Sakhno**, **N. Barashkov**
- PHYS **539**. Investigation of the mechanism of fullerene and carbon nanotube formation by molecular dynamics simulation. **B. Amofah**, T.J. Fuhrer
- PHYS **540**. Quantum chemical studies of ether formation with peroxide reagents. **K.T. Kuwata**, T. Truttmann
- PHYS **541**. Investigation of organic radicals and intermediates via high-resolution infrared spectroscopy. **M.D. Schuder**, A. Kortyna, D.J. Nesbitt

## THURSDAY MORNING

### Section B

Parc 55 San Francisco  
Powell

#### Spectroscopy of Complex Systems

##### Effects of Nanocconfinement & Local Asymmetry on Dynamics & Chemistry: Interfaces

J. Dawlaty, *Organizer*

A. V. Benderskii, *Organizer, Presiding*

8:00 **PHYS 542**. Sum frequency generation spectra from density functional theory. **V.S. Batista**

8:40 **PHYS 543**. Measuring orientation heterogeneity of heterogeneous catalysts using HD 2D SFG spectroscopy. **W. Xiong**, Z. Li, J. Wang, Y. Li

9:00 **PHYS 544**. Heterodyne-detected sum frequency generation spectroscopy of aqueous interfaces. **S. Yamaguchi**

9:40 Intermission.

10:00 **PHYS 545**. Chiral water structures in biological systems. **M. McDermott**, H. Vanselous, S. Sanders, **P.B. Petersen**

10:40 **PHYS 546**. Water bending vibration: A closer look at the flip-flop of water molecules at charged interfaces. **C. Dutta**, M. Mammetkulyev, A.V. Benderskii

11:00 **PHYS 547**. Probing the surfaces of CdSe quantum dots using sum frequency generation. **B.R. Watson**, B. Doughty, T.R. Calhoun

11:20 **PHYS 548**. Vibrational sum-frequency scattering spectroscopy reveals the detailed surface chemistry of biomaterials in aqueous solutions. **P.K. Johansson**, L. Schmäser, Y. Wang, D.G. Castner

11:40 **PHYS 549**. Understanding catalytic selectivity via the absolute molecular orientation of adsorbed interfacial molecules. **B. Doughty**, S. Goverapet Srinivasan, S. Bryantsev, D. Lee, H. Lee, D.R. Salahub, Y. Ma, D.A. Lutterman

### Section C

Parc 55 San Francisco  
Hearst

#### Sunlight-Driven Processes: Exposing the Mechanisms Underlying Productive Photoactivities

##### Exciton Photodynamics: Hard Materials

D. S. Larsen, M. Olivucci, *Organizers*  
K. Glusac, *Organizer, Presiding*

8:00 **PHYS 550**. Photoexcited carriers recombination and trapping in spherical vs faceted TiO<sub>2</sub> nanoparticles. **C. Di Valentin**, G. Fazio, L. Ferrighi, D. Selli

8:30 **PHYS 551**. Withdrawn.

8:50 **PHYS 552**. Withdrawn.

9:20 **PHYS 553**. Ultrafast transient absorption spectroscopy investigation of photoinduced dynamics in donor-acceptor core-shell nanostructures for organic photovoltaics. **J. Strain**, T.M. Abeywickrama, H.P. Rathnayake, J. Liu

9:40 Intermission.

10:00 **PHYS 554**. Role of interfaces on hybrid perovskite photocarrier dynamics. **D.S. Ginger**

10:30 **PHYS 555**. Bulk carrier dynamics in nanocrystalline organo-halide perovskites through surface passivation. **R. Stewart**, **J.B. Asbury**

11:00 **PHYS 556**. Direct charge transfer at organic semiconductor/metal interfaces. **W. Xiong**, Y. Li, B. Xiang

11:20 **PHYS 557**. Excitation dynamics in nanoscale materials for solar energy harvesting: Time-domain ab initio studies. **O.V. Prezhdo**

### Section D

Parc 55 San Francisco  
Divisadero

#### Plasmonic Nanomaterials: From Physical Chemistry Fundamentals to Societal Impacts

##### Solutions to the Energy Problem

C. J. Murphy, *Organizer*

P. K. Jain, *Organizer, Presiding*

8:00 **PHYS 558**. Aluminum plasmonics: From new chemistry to new applications. **N.J. Halas**

8:35 **PHYS 559**. Imaging acoustic-plasmonic vibrational dynamics with ultrafast electron microscopy. **D.J. Flannigan**, V.E. Ferry, D.T. Valley

8:55 **PHYS 560**. Shine down - cut the cord. **T. Tumkur**, X. Yang, W. Wang, B. Jiang, X. Zhang, Y. Wei, S. Bahauddin, H. Robatjazi, B. Cerjan, C. Doiron, X. Liu, P. Wray, L. Vayssieres, N.J. Halas, P.J. Nordlander, **I. Thomann**

9:30 **PHYS 561**. Impact of dopant choice on the optical response and near-field enhancement of doped indium oxide nanocrystals. **R.W. Johns**, D.J. Milliron

9:50 Intermission.

10:05 **PHYS 562**. Withdrawn.

10:40 **PHYS 563**. Strong coupling of localised surface plasmons to light-harvesting complexes from bacteria and plants. **A. Tsargorodskaya**, M. Cartron, G. Kodali, L. Dutton, C. Hunter, P. Torma, **G.J. Leggett**

11:00 **PHYS 564**. Device applications of metafilms. **M. Brongersma**

11:35 **PHYS 565**. Gas phase catalytic cycle of hydrogen production from water using small Mo-oxide cluster anions. **M. Ray**, A. Saha, C. Jarrold, K. Raghavachari

### Section F

Parc 55 San Francisco  
Stockton

#### Expanding the Frontiers in Condensed Phase Astrochemistry: Electron Transfer Processes in Ices & Catalysis on Interstellar Grains

##### Radiation Chemistry of Europa's Surface

R. Kaiser, *Organizer*

M. S. Gudipati, *Organizer, Presiding*

L. M. Ziurys, *Presiding*

8:00 **PHYS 566**. Coupled surface-atmosphere chemical production of oxidants in the solar system. **S.K. Atreya**

8:45 **PHYS 567**. Carbon dioxide chemistry at low temperatures. **R. Hodyss**, S. Piao, M.L. Cable, M.J. Malaska

9:30 **PHYS 568**. Primary phosphorus sources within extraterrestrial ices. **M.A. Pasek**

10:15 **PHYS 569**. Investigating the formation of alkylphosphonic acids in phosphine ices. **A.M. Turner**, R. Kaiser

10:45 **PHYS 570**. Synthesis of di-peptides under possible solar system environments. **E.T. Parker**, J.G. Forsythe, F.M. Fernandez

11:15 **PHYS 571**. Infrared matrix isolation spectroscopy of photochemical products of acetylene and nitrogen in argon matrices. **B.T. Genest**, P.D. Cooper

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Inhibition & Therapeutic Applications of Allosteric Mechanisms

Sponsored by COMP, Cosponsored by PHYS

#### Engaging Students in Physical Chemistry

Sponsored by CHED, Cosponsored by PHYS

## THURSDAY AFTERNOON

### Section D

Parc 55 San Francisco  
Divisadero

#### Plasmonic Nanomaterials: From Physical Chemistry Fundamentals to Societal Impacts

##### Solutions for Medicine

P. K. Jain, *Organizer*

C. J. Murphy, *Organizer, Presiding*

**1:30 PHYS 572.** Photothermal therapy of cancer in cells and in different animals using gold nano-rods: A progress report. M.A. El-Sayed

**2:05 PHYS 573.** Single-Molecule super-resolution study of distance-dependent plasmonic fluorescence enhancement and emission mislocalization. B. Fu, J.S. Biteen

**2:25 PHYS 574.** Plasmonic biosensors for resource-limited settings. S. Singamaneni

**3:00 PHYS 575.** Nonlinear and ultrafast spectroscopy of gold-silver-gold core-shell nanoparticles. L.H. Haber, T.E. Karam, R.R. Kumal, H. Smith, R.A. Khoury, B. Kruger, J. Ranasinghe, Z. Zhang

**3:20** Intermission.

**3:35 PHYS 576.** Manipulating light-matter interactions in bioprogrammable crystals. C.A. Mirkin

**4:10 PHYS 577.** Plasmonics at the cluster limit: Dielectric sensing with DNA-stabilized silver clusters. S.M. Copp, D. Schultz, S. Wasey, A. Faris, E. Gwinn

**4:30 PHYS 578.** DNA-Encapsulated silver cluster chromophores. J.T. Petty, R. Dickson, T. Yeh

### Allosteric Interactions & Regulation of Complex Biomolecular Systems: From Proteins to Cell Signaling

#### Mechanisms & Molecular Simulations

Sponsored by COMP, Cosponsored by PHYS

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

## POLY

### Division of Polymer Chemistry

C. Lipscomb, T. White and T. Epps, *Program Chairs*

#### OTHER SYMPOSIA OF INTEREST:

**Materials, Devices, and Switches**  
(see ORGN, Tue, Wed, Thu)

**Peptides, Proteins & Amino Acids**  
(see ORGN, Tue, Wed)

**Polymers under Deformation**  
(see PMSE, Tue, Wed)

#### SOCIAL EVENTS:

**Reception, 5:00 PM:** Tue

**Reception, 5:30 PM:** Wed

**Breakfast, 7:30 AM:** Tue

**Luncheon, 12:00 PM:** Sun

## SUNDAY MORNING

### Section A

Moscone Center  
120

#### General Topics: New Synthesis & Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

A. M. Alb, P. S. Majumdar, *Presiding*

**8:00 POLY 1.** Design of experiments based approach to investigate the adhesion of latex paints over alkyl surfaces. P.S. Majumdar, J. Sweeney, C. Kozak, S.A. Carpenter, S. Eberly, W. Howell, L.C. Fioravanti, A.M. Piwowar

**8:20 POLY 2.** Measurement and control of migrating species on water-borne coatings surfaces. J. Bohling, J. Gallagher, A. Gong, K. David, B. Cooper

**8:40 POLY 3.** Mussel inspired coatings based on tannic acid and polyamines. I. Yilgor, E. Yilgor, C. Kosak

**9:00 POLY 4.** Withdrawn.

**9:20 POLY 5.** Macromolecular characterization of biopolymers as alternative depressants for iron ore flotation. A.M. Alb

**9:40 POLY 6.** Shape memory polymers from amino acid-based poly(ester urea)s. G.I. Peterson, E.P. Childers, J. Yu, H. Li, A. Dobrynin, M. Becker

**10:00 POLY 7.** Withdrawn.

**10:20 POLY 8.** Effect of monomer sequence on the properties of hyperbranched copolymers. Y. Shi, H. Gao

**10:40 POLY 9.** Synthesis and characterization of new high temperature multigraft copolymer superelastomer: Polyisoprene-graft-polybenzofulvene. H. Wang, W. Wang, W. Lu, X. Lu, N. Kang, J.W. Mays

**11:00 POLY 10.** Tunable photonic nanocomposite film formed by gelation of self-assembled block copolymer. Y. Huang, Y. Zheng, J. Pribyl, B.C. Benicewicz

**11:20 POLY 11.** Topology transformation of rotaxane-linked star/linear ABC terpolymer: Synthesis and characterization. H. Sato, D. Aoki, T. Takata

**11:40 POLY 12.** Visualizing randomness: Synthesis and imaging of statistical and segmented colloidal copolymers. N.G. Pavlopoulos, J. Pyun

### Section B

Moscone Center  
121

#### Next Generation Smart Materials

Cosponsored by MPPG‡

Y. C. Simon, *Organizer*

E. B. Berda, J. Foster, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 13.** Antisense gene regulation with non-cationic polymer carriers. K. Zhang

**8:35 POLY 14.** Sulfur-free RAFT, sequence-controlled methacrylic multiblockcopolymers via emulsion polymerization. D.M. Haddleton, A. Anastasaki, N. Engells, V. Nikolaou, G. Nurumbetov

**9:05 POLY 15.** Precision functional polyethylene-based polymers via acyclic Diene Metathesis (ADMET). K.B. Wagener, M.H. Bell, H. Li, T.W. Gaines

**9:35** Intermission.

**9:45 POLY 16.** One-pot synthesis of responsive polymers with highly branched structures. H. Gao, Y. Shi, X. Cao

**10:15 POLY 17.** Shape memory in self-healing polymers: Synchronized physico-chemical events. Y. Yang, C.C. Hornat, M.W. Urban

**10:45 POLY 18.** Host-guest chemistry to control polymeric architecture and conformation. H.W. Gibson, T. Price, H. Wessels, Z. Bear

### Section C

Moscone Center  
122

#### Polymeric Materials for Performance & Sustainability

##### Biobased Polymers

Cosponsored by MPPG‡

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

J. M. McCollum, *Presiding*

**8:00** Introductory Remarks.

**8:10 POLY 19.** Molecular dynamics simulation of cellulose nanofibrils used to modify polymer gels. Y. Sliozberg, S. Coleman, H. Dong, J. Snyder, A. West, T. Chantawansri

**8:40 POLY 20.** Mechanophore activation at the crosslinked epoxy-nanocellulose interface: Insight from density functional theory and molecular dynamics simulations. K.S. Khare, F.R. Phelan

**9:10 POLY 21.** Ductile polyacrylonitrile fibers with high cellulose nanocrystals loading. H. Chang, J. Luo, H.c. Liu, A. Bakhtiyari Davijani, P. Wang, G. Lolov, R. Dwyer, S. Kumar

**9:30** Intermission.

**9:45 POLY 22.** New and unexpected properties from polycyanurate networks prepared from bio-based monomers. A.J. Guenther, B.G. Harvey, A.P. Chafin, M.C. Davis, J. Zavala, K. Lamison, J. Reams, M.D. Ford, K. Ghiassi, T.J. Groshens, J.M. Mabry

**10:15 POLY 23.** Styrene-free soybean oil-based thermosets and their natural fiber composites. W. Liu, R. Qiu

**10:35 POLY 24.** Synthesis and properties of new cross-linked bio-based aliphatic polycarbonates. P. Durand

**10:55 POLY 25.** Transient networking in glucarodilactone-containing polyesters. L.M. Lillie, W.B. Tolman, T.M. Reineke

### Section D

Moscone Center  
123

#### Separation of Macromolecules & Particulates

Cosponsored by ANYL, COLL and PMSE

Financially supported by PSS Polymer Standards Service GmbH, The Dow Chemical Company, Tosoh Bioscience LLC, Wyatt Technology

S. V. Orski, Y. Wang, *Organizers*

W. Gao, X. M. Liu, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 26.** Theoretical perspective on the separation mechanism of complex polymers by interaction chromatography. Y. Wang

**8:45 POLY 27.** Polymer microstructure analysis by HPLC. D. Lee, S. Qiu, J. Munro, C. Li Pi Shan, T. Huang, R. Cong

**9:15 POLY 28.** Separation and characterization of living and dead chains in polystyrene synthesized by ATRP. T. Chang

**9:45** Intermission.

**9:55 POLY 29.** Understanding of aqueous oligomers formed during emulsion polymerization and their interfacial behavior via LC-MS. T. Zhang, B. McCulloch, W. Gao, R. Even

**10:25 POLY 30.** Copolymer structure elucidation by multidimensional techniques with focus on UPLC x ESI-TOF-MS. J. Falkenhagen

**10:55 POLY 31.** Application of different chromatographic techniques to characterize chemical and molar mass heterogeneity in graft copolymers. R. Leinweber, P. Montag, J. Preis, W. Radke

**11:25 POLY 32.** Large-scale separation and purification of block copolymers via selective and competitive adsorption on silica. C.Y. Ryu

### Section E

Moscone Center  
124

#### Incorporating Polymer Science into the Classroom

##### Undergraduate Curriculum

Cosponsored by CHED, MPPG‡ and PMSE

K. A. Cavicchi, S. E. Morgan, *Organizers, Presiding*

**8:00 POLY 33.** Green synthesis of renewable triblock polymers in the organic chemistry laboratory: Not your typical white solid. J.E. Wissinger

**8:25 POLY 34.** Undergraduate polymer synthesis developed for lecture and laboratory experiments. P.J. Costanzo

**8:50 POLY 35.** Integration of polymerization kinetics in polymer, physical chemistry, and chemical engineering courses. A. Guymon

**9:15** Intermission.

**9:30 POLY 36.** Polymer physical structure labs at Allegheny College. R.M. Van Horn

‡ Cooperative Cosponsorship

**9:55 POLY 37.** Studying the thermomechanical properties of copolymers to develop laboratory, theoretical, and communication skills essential to a successful research career. **S.A. Sydlík**, W. Koshut, Z. Wright, Z. Smith

**10:20 POLY 38.** Polymeric materials in the beginning organic chemistry course. **B.A. Howell**

## Section F

Moscone Center  
125

### Polymer Applications & Characterization in the Biomedical Industry

X. M. Liu, J. Slager, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 39.** Nitric oxide-releasing hyperbranched polykanamycin as an oral therapeutic. **L. Yang**, X. Wang, D.J. Suchyta, M. Schoenfish

**8:35 POLY 40.** Withdrawn.

**9:05 POLY 41.** Universal multifunctional coating of biomaterials based on salivary acquired pellicle inspired dendrimer. **Y. Xiao**, L. Jianshu

**9:35** Intermission.

**9:50 POLY 42.** Impact of particle modulus on vascular-targeted drug delivery *in vitro* and *in vivo*. **M. Fish**, C. Fromen, T.F. Scott, R. Adili, M. Holinstat, O. Eniola-Adefeso

**10:20 POLY 43.** Kaolin-Polyurethane foam composites for multifunctional wound dressing applications. **J. Lundin**, G.C. Daniels, C.L. McGann, B. Streifel, S.L. Giles, J.H. Wynne

**10:50 POLY 44.** Evolution of morphology in polyurethane biomaterials: Effect of time and storage on material properties. **E. Chen**, S. Eam, A. Padsalgikar

**11:20 POLY 45.** Tuning surface properties of acrylate polymers to direct neurite growth. **B. Leigh**, K. Truong, R. Bartholomew, M.R. Hansen, A. Guymon

**11:50** Concluding Remarks.

## Section G

Moscone Center  
Esplanade Ballroom 310

### Contributions of IBM Almaden to Polymer Science

*Cosponsored by PMSE*

R. D. Miller, *Organizer*

D. Y. Yoon, *Organizer, Presiding*

R. Allen, *Presiding*

**8:15** Introductory Remarks.

**8:25 POLY 46.** Evolution of polymer science at IBM: From microelectronics to Watson Health. **J. Hedrick**

**8:50 POLY 47.** High performance polymer and polymer/inorganic thermoelectric materials. **G. Hadziioannou**

**9:15 POLY 48.** Surface-directed molecular assembly of organic semiconductors for organic electronics. **K. Cho**

**9:40 POLY 49.** Multifunctional layers and memory devices based on ferroelectric polymers. **A.M. Jonas**

**10:05** Intermission.

**10:20 POLY 50.** Multiscale nanoparticle ordering by polymer crystallization. **S. Kumar**

**10:45 POLY 51.** Controlled morphology and its impact on digital memory behavior of well-defined functional polymers in nanoscale thin films. **M. Ree**

**11:10 POLY 52.** Molecular relaxation studies of crystalline polymers, blends and copolymer networks. **D.S. Kalika**

**11:35 POLY 53.** Big sticks and soft interactions (speaking of liquid crystals). **C. Viney**

### Materials Informatics & Computational Modeling

*Sponsored by CINF, Cosponsored by COMP and POLY*

### Frontiers in Nanoscience

*Sponsored by SOCED, Cosponsored by POLY*

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis, & Spectroscopy

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVY, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

### New Horizons in Sustainable Materials

### Renewable Polymers: Isolation, Structure & Properties

*Sponsored by CELL, Cosponsored by POLY*

## SUNDAY AFTERNOON

### Section A

Moscone Center  
120

### General Topics: New Synthesis & Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

F. Horkay, B. S. Lokitz, K. J. Wynne, *Presiding*

**1:00 POLY 54.** Adaptive nanoparticles for regulation of endosomal signalling: Targeting pain at the source. **N. Veldhuis**, M. Whittaker, P. Ramirez-Garcia, Q. Mai, T. Lieu, N. Truong, J. Quinn, T. Davis, N.W. Bunnett

**1:20 POLY 55.** Triggering cellular signalling processes with novel macromolecular hydrogen sulfide donors. **F. Ercole**, F. Mansfeld, M. Kavallaris, M. Whittaker, M. Halls, T. Davis, J. Quinn

**1:40 POLY 56.** Toward a cure for facial acne without bacterial resistance buildup. **K.J. Wynne**, S. Nair, M. Beckwith, D. Ohman

**2:00 POLY 57.** Synthesis and environmentally-responsive properties of poly( $\alpha$ -aminoesters): Applications for the delivery of messenger RNA. **T. Blake**, R.M. Waymouth

**2:20 POLY 58.** Synthesis and biological evaluation of well-defined poly(propylene fumarate) oligomers and their use in 3D printed scaffolds. **Y. Luo**

**3:00 POLY 59.** Molecularly imprinted polymers for high-density lipoprotein: Characterization and functionalization. **S. Chunta**, P. Lieberzeit

**3:20 POLY 60.** Molecular interactions among cartilage proteoglycans. **F. Horkay**, P.J. Bassar

**3:40 POLY 61.** *Thermobifida cellulolytica* cutinase as a powerful tool for the synthesis and functionalization of biobased polyesters. **A. Pellis**, E. Herrero Acero, V. Ferrario, L. Gardossi, G.M. Guebitz

**4:00 POLY 62.** Modulating the hydrophobicity of cell penetrating peptide mimics for binding and intracellular delivery of protein cargo. **N.D. Posey**, L.M. Caffrey, L.M. Minter, G.N. Tew

**4:20 POLY 63.** Novel self-assembled nanoparticle platform based on eight-arm-poly(ethylene glycol)-diosgenin prodrugs for co-delivery of anticancer drugs in cancer therapy. **C. Li**, J. Lei

**4:40 POLY 64.** Recent developments in drug-loaded brush-arm star polymers. **M. Golder**, J.A. Johnson

### Section B

Moscone Center  
121

### Carl S. Marvel Creative Polymer Chemistry Award in honor of Theresa M. Reineke

C. Lipscomb, T. J. White, *Organizers*

H. A. Klok, T. P. Lodge, *Presiding*

**1:00 POLY 65.** Polymer-Based nanoparticle therapeutics. **M.E. Davis**

**1:30 POLY 66.** Synthesis of rationally designed polymers for wound healing applications. **H.D. Maynard**

**2:00 POLY 67.** Engineering cell surfaces with synthetic polymers. **H.A. Klok**

**2:30 POLY 68.** Functional polycarbonates as oxidative- and pH-responsive materials. **M. Herrera-Alonso**

**3:00 POLY 69.** Advances at the interface of catalyst design and polymer chemistry. **G.W. Coates**

**3:30 POLY 70.** Biopolymeric conjugates in the design of hybrid biomaterials. **K.L. Kiick**

**4:00 POLY 71.** Bio-inspired materials, synthesis and function. **C.J. Hawker**

**4:30 POLY 72.** Designing tunable multifunctional macromolecules: From sustainable polymers to selective drug and gene delivery vehicles. **T.M. Reineke**

### Section C

Moscone Center  
122

### Polymeric Materials for Performance & Sustainability

### Functional Materials: Gels & Membranes

*Cosponsored by MPPG‡*

M. Meador, M. A. Meador, *Organizers*

S. E. Morgan, *Organizer, Presiding*

**1:00 POLY 73.** Dynamics of solvent molecules in polyacrylate gels supported on a polymeric substrate. **R. Islam**, S. Mani, **R. Khare**

**1:30 POLY 74.** Promising chemical stable membranes developed through combined effect of radical polymerization and non-solvent induced phase separation of acrylic functionalized polysulfone. **M.F. Mehmood**, S. Marco, P. Bosch, M. Giagnorio, A. Tiraferri

**1:50 POLY 75.** Microfluidic spinning of polyethersulfone hollow fiber membranes. **K. Deng**, Z. Liu, F. Luo, R. Xie, X. Ju, W. Wang, L. Chu

**2:10 POLY 76.** Efficient synthesis of functionalized shape-persistent ladder polymers for gas separation. **H.W. Lai**, Y. Teo, Y. Xia

**2:30** Intermission.

**2:45 POLY 77.** Super-Anisotropic swelling of hydrogels layered by domino-effects of cyanobacterial LC macromolecules. **M. Okajima**, T. Kaneko

**3:05 POLY 78.** Siloxane-substituted polynorbornenes as advanced gas separation membranes. **B.K. Long**, K.R. Gmernicki, C. Maroon, M.A. Higgins

**3:35 POLY 79.** CO<sub>2</sub>-philic polymer membranes for high flux CO<sub>2</sub> separation. **T. Hong**, P. Cao, B. Li, S.M. Mahurin, D. Jiang, K. Vogiatzis, J.W. Mays, B.K. Long, A.P. Sokolov, **T. Saito**

**3:55 POLY 80.** Mixed matrix materials containing Pd nanoparticles with superior membrane H<sub>2</sub>/CO<sub>2</sub> separation properties. **H. Lin**, L. Zhu, D. Yin, S. Konda, M. Swihart

**4:15 POLY 81.** pH-Sensitive linear amphiphilic block copolymers for transport and controlled release of molecular oxygen. **V.O. Rodionov**

### Section D

Moscone Center  
123

### Separation of Macromolecules & Particulates

*Cosponsored by ANYL, COLL and PMSE*

*Financially supported by PSS Polymer Standards Service GmbH, The Dow Chemical Company, Tosoh Bioscience LLC, Wyatt Technology*

W. Gao, X. M. Liu, *Organizers*

S. V. Orski, Y. Wang, *Organizers, Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 82.** Gel permeation chromatography of ultralarge polymers: Challenges and limitations. **D.M. Meunier**, Y. Li, W. Gao

**1:45 POLY 83.** Detailed characterization of gelatins from different sources using aqueous gel permeation chromatography with on-line triple detection and multi-angle light scattering detection. **B. Crawshaw**, D. Herrick, W. Gao, X.M. Liu

**2:15 POLY 84.** Characterization of biopolymer stability by size-exclusion chromatography and asymmetric flow field-flow fractionation. **Y. Li**, K. Kuppannan, M. Covington, D. Dodage, D.M. Meunier

**2:45** Intermission.

**3:00 POLY 85.** Composition and microstructure separations of polymers and nanoparticles using thermal field-flow fractionation. **K.R. Williams**, W.C. Smith, M.B. Pillion, K. Bierbaum, J. Oliver, C.R. Bria

**3:40 POLY 86.** Separation and quantification of colloidal particles and polymers made by emulsion polymerization using asymmetrical flow field-flow fractionation with advanced detection: Challenges and progresses. **W. Gao**, S. Brownell, J. Bohling, P. Luo, A. Gong, K. Joshi, F. Zeng

**4:10 POLY 87.** Correlation between structural properties and encapsulation efficiency in polymersomes. **H. Gumz**, S. Boye, D. Appelhans, **A. Lederer**

## Section E

Moscone Center  
124

## Incorporating Polymer Science into the Classroom

## High School &amp; Community College

*Cosponsored by CHED, MPPG‡ and PMSE*

K. A. Cavicchi, *Organizer*

S. E. Morgan, *Organizer, Presiding*

K. Wingo, *Presiding*

**1:00 POLY 88.** Developing polymer research lessons for the high school classroom – NSF RET at The University of Southern Mississippi. K. Wingo, S.E. Morgan

**1:25 POLY 89.** Cross-linking physics and polymers: Making an impact in STEM education. M. Boleware, A. Sharma, J.S. Wiggins

**1:50 POLY 90.** Synthesis and characterization of di(perylene bisimides) for use as an electron accepting material in polymer photovoltaic devices. J. Brownlow, T. Bullock, L. Moore, M. Norman, S.E. Morgan

**2:15 POLY 91.** Innovation at the intersection of research and outreach. K.A. Cavicchi

**2:40** Intermission.

**2:55 POLY 92.** Augmenting primary and secondary education with polymer science and engineering. R. Cersonsky, L. Foster, R.J. Hall, T. Ahn, H.L. van der Laan, T.F. Scott

**3:20 POLY 93.** Polymers inspired by biomimetic bilayers. K.A. Cavicchi, J. Oldham

**3:45 POLY 94.** Are mushrooms the new plastic? Harnessing student design thinking using ecovative materials. M.C. Enright, K. Anderson

**4:10 POLY 95.** Exploring polymers in the high school classroom through medical sutures. C. Knutson, J.E. Wissinger, C. Javner, D.K. Schneiderman

## Section F

Moscone Center  
125

## Polymer Applications &amp; Characterization in the Biomedical Industry

X. M. Liu, J. Slager, *Organizers, Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 96.** Graphene oxide-conjugated polymer hybrid materials for protein sensing. C. Xing

**1:35 POLY 97.** Photo-curable betaine copolymer with high resistance to thrombus and biofilm formation. Z. Zhang, D. Wallach, J. Li, M. Taylor, A. Roussett, V. Wagner

**2:05 POLY 98.** Self-fitting scaffolds based on PCL-PLLA semi-IPN Shape Memory Polymers (SMPs). M. Grunlan, L.L. Woodard, V.M. Page, K.T. Kmetz

**2:35** Intermission.

**2:50 POLY 99.** Effects of gel mass age on critical process parameters of soft gelatin capsule encapsulation. M. Karamsetty, R. Lau

**3:20 POLY 100.** Photo-CuAAC applications in dental restorative materials. B. El-Zaatari, A. Shete, C.J. Kloxin

**3:50 POLY 101.** All-organic conductive fabrics for continuous monitoring of Electrocardiogram (ECG) response. G.A. Sotzing

**4:20 POLY 102.** Polymer materials in medical devices: Addressing issues through material testing and failure analysis. S.J. Benight

**4:50** Concluding Remarks.

## Section G

Moscone Center  
Esplanade Ballroom 310

## Contributions of IBM Almaden to Polymer Science

*Cosponsored by PMSE*

R. D. Miller, D. Y. Yoon, *Organizers*

K. R. Carter, J. Pyun, *Presiding*

**1:00 POLY 103.** Polymers at interfaces. T.P. Russell

**1:25 POLY 104.** Deposition, mechanics and phase behavior of polyelectrolyte complex films. K.R. Shull

**1:50 POLY 105.** From industrial wastes to functional materials: Hybrid materials based on sulfur. K. Char

**2:15 POLY 106.** Self-organization in materials science: From quantum dot LEDs to mechanical actuators. R.W. Zentel

**2:40 POLY 107.** Synthesis and fabrication of functional polymer thin films. K.R. Carter

**3:05** Intermission.

**3:20 POLY 108.** From polymers to particles and back to polymers. J. Pyun, N.G. Pavlopoulos, N. Pinna, K. Char

**3:45 POLY 109.** Multi-stimuli-responsive inks for 3D printing. A. Nelson

**4:10 POLY 110.** Light-induced self-assembly of achiral molecules containing triphenylamine for supramolecular chirality and chiral polymers. S.Y. Kim

**4:35 POLY 111.** From Almaden to Donostia: A trip from polymer brushes and self-crosslinking nanoparticles to poly(ionic liquids). D. Mecerreyes

**5:00 POLY 112.** Research frontiers of the IBM Research Center as inspiration for the design of biological active materials. E. Harth

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, COLL, COMP, CWD, ENVR, INOR‡, MEDI, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

## Materials Informatics &amp; Computational Modeling

*Sponsored by CINF, Cosponsored by COMP and POLY*

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Novel Reactions, Methodologies &amp; Syntheses in Organic Chemistry

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

## New Horizons in Sustainable Materials

## Nanocellulose Materials &amp; 3D Structures

*Sponsored by CELL, Cosponsored by POLY*

## MONDAY MORNING

## Section A

Moscone Center  
120

## General Topics: New Synthesis &amp; Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

T. M. Alam, P. Luo, *Presiding*

**8:00 POLY 113.** Variable temperature ROMP: Achieving targeted molar mass and low dispersities from low ring-strain monomers. W.J. Neary, J.G. Kenemur

**8:20 POLY 114.** Synthesis and characterization of aromatizing polyester. W. Joo, A. Lane, D. Liu, K. Matsuzawa, R.A. Mesch, W. Wang, B. Cassidy, A. Dick, S.T. Phillips, C.G. Willson

**8:40 POLY 115.** Synthetic approach for reducing viscosity in commercially relevant polymer latexes. P. Luo, J. Bohling, K. Beshah

**9:00 POLY 116.** Facile synthesis of robust, photopolymerizable liquid crystal elastomers. N.P. Godman, A.D. Auguste, T.J. White

**9:20 POLY 117.** Versatile and general strategy to precision conjugated oligomers (PDI= 1.0). J. Lawrence, E. Goto, A. McGrath, D.S. Laitar, P. Clark, C.J. Hawker

**9:40 POLY 118.** Effect of monomer solubility on the evolution of copolymer morphology during polymerization-induced self-assembly in aqueous solution. A.A. Cockram, T.J. Neal, M.J. Derry, O. Mykhaylyk, N.S. Williams, M.W. Murray, S.N. Emmett, S.P. Armes

**10:00 POLY 119.** Impact of hydration and sulfonation on the nanoscale morphology of water in polyphenylene polymer membranes. T.M. Alam, E.G. Sorte, C. Fujimoto, L.J. Abbott, A.L. Frischknecht

**10:20 POLY 120.** Innovations in the design and synthesis of charged polysulfones. M. Green, Y. Yang

**10:40 POLY 121.** Thermoset in thermoplastic for shape memory polymer: Selective role for net point or switching segment under crosslink network. S. Chirachanchai

**11:00 POLY 122.** Synthesis and characterization of waterborne, silane functional, branched polyetherethanes for self-crosslinking coatings in textile applications. A. Durmus, D. Anil, E. Sevinis Ozbulut, Y.Z. Menciloglu, S. Unal

**11:20 POLY 123.** Withdrawn.

**11:40 POLY 124.** Linear multiblock copolymers with up to ten blocks and high molecular weights: A novel in-situ block copolymer formation approach. E. Grune, A. Mueller, H. Frey

## Section B

Moscone Center  
121

## Next Generation Smart Materials

*Cosponsored by MPPG‡*

E. B. Berda, J. Foster, *Organizers*

Y. C. Simon, *Organizer, Presiding*

S. Camarero-Espinosa, *Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 125.** Multiresponsive polymers for drug delivery and sensors. R. Hoogenboom

**8:35 POLY 126.** In Situ nanoparticulation of conjugated polymers. T. Choi

**9:05 POLY 127.** Polymeric sulfobetaines as solution responsive smart materials. T. Emrick

**9:35** Intermission.

**9:45 POLY 128.** Humidity- and electro-responsive actuation in anisotropically aligned protein films. T. Zarkovic Grove, N. Carter

**10:15 POLY 129.** Smart biomimetic polymersomes. S. Lecommandoux

**10:45 POLY 130.** Topological transformations via dynamic-covalent chemistry. H. Sun, C.P. Kabb, Y. Dai, M.R. Hill, B.S. Sumerlin

## Section C

Moscone Center  
122

## Polymeric Materials for Performance &amp; Sustainability

## High Performance

*Cosponsored by MPPG‡*

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

J. Buchanan, *Presiding*

**8:00 POLY 131.** Exceptional flame resistance and gas barrier with thick-growing clay-chitosan multilayer coatings. J.C. Grunlan, T. Guin

**8:30 POLY 132.** Phosphorous-functionalized multi wall carbon nanotubes as flame retardants for polystyrene and poly(methyl methacrylate). D.P. Durkin, M.J. Gallagher, B.P. Frank, E.D. Knowlton, P.C. Trulove, D. Fox, H. Fairbrother

**8:50 POLY 133.** Ultra-high thermostability in polybenzazoles from whole-aromatic amino acid. T. Kaneko, M. Watanabe, M. Ali, M. Singh

**9:10 POLY 134.** Hyperconnected network architectures as a new route to exceptional mechanical properties. J. Burg, R. Dauskardt

**9:30** Intermission.

**9:45 POLY 135.** Continuous manufacturing of twisted yarns from electrospun polymer fibers. W. Panatadasirisuk, S. Yang

**10:05 POLY 136.** Catalyst optimization of covalent organic frameworks by frontier orbital engineering. C.S. Diercks, C.J. Chang, O.M. Yaghi, N. Korienko, S. Lin

**10:25 POLY 137.** Nanoscale toughening mechanism in MoS<sub>2</sub> dispersed epoxy composite system. J. Ryan, S. Webster, S. Roy, R. Wheeler, D. Nepal

**10:45 POLY 138.** Moisture distribution in PEEK, PEKK, PBI, and their blends: A multinuclear solid-state NMR study. J. Bluemel, J.C. Pope

**11:05 POLY 139.** Copolymerization of epoxides and lactones to ultrahigh molecular weight with an aluminum-chelate catalyst. M. Chwatko, N.A. Lynd

‡ Cooperative Cosponsorship

## Section D

Moscone Center  
123

## Excellence in Graduate Polymer Research

Cosponsored by PRES, PROF, SOCED and YCC

Financially supported by POLY  
Industrial Advisory Board

C. J. Ellison, T. E. Long, *Organizers*

H. Cheng, C. J. Landry-Coltrain, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 POLY 140. Cooperative polymerization of  $\alpha$ -helices induced by macromolecular architecture. R. Baumgartner, H. Fu, Z. Song, Y. Lin, J. Cheng

8:25 POLY 141. Prebiotic decapeptide formation from the ester-amide exchange reaction. S. Yu, R. Krishnamurthy, F.M. Fernandez, N.V. Hud, F.J. Schork, M. Grover

8:45 POLY 142. Commodity plastic mimics from polyvinyl acetals derived from bioaromatic aldehydes and polyvinyl alcohol. M. Rostagno, S. Shen, I. Ghiviriga, S.A. Miller

9:05 POLY 143. Sustainable antimicrobial biomaterials and biobased plastics from natural biomass. M.S. Ganewatta, C. Tang

9:25 POLY 144. Efficient, regioselective path to water-soluble polysaccharide ionomers. S. Liu, K.J. Edgar

9:45 Intermission.

10:00 POLY 145. Improving the biopharmaceutical properties of oligonucleotides by brush-polymer-assisted compaction. X. Lu, X. Cao, D. Wang, F. Jia, X. Tan, K. Zhang

10:20 POLY 146. Complexation of linear DNA and polystyrene sulfonate with cationic copolymer micelles: Effect of polyanion flexibility. Y. Jiang, D. Sprouse, J. Lasser, T.M. Reineke, T.P. Lodge

10:40 POLY 147. Photo-Responsive polymeric formulations to attenuate inflammation in cardiovascular tissues. C.T. Greco, T.H. Epps, M.O. Sullivan

11:00 POLY 148. Functionalized star-like  $\epsilon$ -caprolactone amphiphilic block copolymers for thermoresponsive micellar drug delivery systems. K.E. Washington, R.N. Kularatne, Y. Ren, M.C. Biewer, M.C. Stefan

## Section E

Moscone Center  
124

## Undergraduate Research in Polymer Science

J. Lott, S. E. Morgan, S. I. Nazarenko, *Organizers, Presiding*

8:00 Introductory Remarks.

8:05 POLY 149. Multi-scale assembly of polythiophene-surfactant supramolecular complexes. D. Bilger, A. Sarkar, C.D. Danesh, M. Gopinadhan, G. Braggini, J. Figueroa, T. Pham, D. Chun, Y. Rao, C.O. Osuji, M. Stefik, S. Zhang

8:25 POLY 150. Polyureas for dielectric applications developed through a rational co-design approach. S.K. Scheirey, G.M. Treich, S. Nasreen, Z. Li, A. Mannodi-Kanakkithodi, Y. Cao, R. Ramprasad, G.A. Sotzing

8:45 POLY 151. Incorporation of Diels-Alder chemistry into polymer matrices via an iminer approach. T. Colt, K. Barcus, E. Crenshaw, R. Rhoads, P.J. Costanzo

9:05 POLY 152. Stimuli responsive  $\beta$ -cyano-oligo(phenylene vinylene) methylcellulose hydrogels. L. Forte, B. Davis, J. Lott

9:25 Intermission.

9:45 POLY 153. Thio-bromo click approach for developing new, ROMP-based flame-resistant materials. J. Grubb, C.E. Hobbs

10:05 POLY 154. Utilization of a cysteine core for the preparation of novel mikto-arm star polymer. C. Sarantes, K. Eckhart, C. DeHoe, L. Souza, A. Ventura, A.J. Varni, P.J. Costanzo

10:25 POLY 155. Alkynols as a source of flame retardants. A. Gudbrandson, B. Howell

## Section F

Moscone Center  
Esplanade Ballroom 310

## 50th Anniversary Celebration of Macromolecules

Cosponsored by MPPG $\ddagger$  and PMSE

T. P. Lodge, *Organizer, Presiding*

8:00 Introductory Remarks.

8:10 POLY 156. Self-assembled supramolecular nanosystems for smart diagnosis and targeted therapy of intractable diseases. K. Kataoka

8:40 POLY 157. Electrostatic assembly of nanoparticle systems for controlled and tissue targeted release. P.T. Hammond

9:10 POLY 158. Toughening soft materials with sacrificial bonds. J.P. Gong

9:40 Intermission.

10:00 POLY 159. Principles of vitrimer chemistry and physics. L. Leibler

10:30 POLY 160. How advances in polymer synthesis have enabled advances in polymer physics. K.I. Winey

11:00 POLY 161. Entropic barrier theory of dynamics of macromolecules. M. Muthukumar

## Section G

Moscone Center  
125

## Contributions of IBM Almaden to Polymer Science

Cosponsored by PMSE

D. Y. Yoon, *Organizer*

R. D. Miller, *Organizer, Presiding*

T. P. Russell, *Presiding*

8:00 POLY 162. Story of single-molecule detection and spectroscopy and the surprises leading to super-resolution microscopy and beyond. W.E. Moerner

8:30 POLY 163. Learning from nature to create novel nanomaterials. R.K. O'Reilly

8:55 POLY 164. Supramolecular biomaterials: From fundamentals to advanced healthcare solutions. E.A. Appel

9:20 POLY 165. Applications of functionalized biodegradable polymers in tissue engineering and regenerative medicine. K. Fukushima, Y. Inoue, Y. Haga, M. Oji, S. Takaoka, C. Sato, H. Tsuchiya, M. Tanaka

9:45 POLY 166. Degradable elastomeric biomaterials through stereochemically-controlled synthesis. A.P. Dove

10:10 Intermission.

10:25 POLY 167. Forty years of spectroscopic studies of polymers at the leading edge from FT-Raman to AFM-IR spectroscopy: Evolution, revolution or back to the future. J.F. Rabolt

10:50 POLY 168. Development of multi-functional surfaces with controllable wettability. M.A. Frysal, G. Kenanakis, G. Kaklamani, L. Papoutsakis, S.H. Anastasiadis

11:15 POLY 169. Developments in polymer adhesion and fracture at IBM Almaden Reseach Laboratory. H.R. Brown

11:40 POLY 170. Effects of molecular topology and interface on conformations and dynamics of polymer melts from atomistic molecular dynamics simulations. D.Y. Yoon

## LGBT Graduate &amp; Postdoctoral Student Chemistry Research Symposium

## Frontiers in Analytical &amp; Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL $\ddagger$ , BIOL $\ddagger$ , CHED, CMA, COLL, COMP, CWD, ENVR, INOR $\ddagger$ , MEDI, MPPG, ORGN, PHYS, PMSE $\ddagger$ , POLY, PRES $\ddagger$  and WCC

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## MONDAY AFTERNOON

## Section A

Moscone Center  
120

## Industrial Innovations in Polymer Chemistry

Cosponsored by MPPG $\ddagger$  and PMSE

T. W. Baughman, *Organizer*

J. M. Messman, *Organizer, Presiding*

1:00 POLY 171. Development of silicon-containing polymers for modern micro- and nano-electronics. Q. Lin

1:30 POLY 172. Advances in Asymmetric Flow Field Flow Fractionation (AF4) combined with MALS in the characterization of polymers in solution. J.A. Ahlgren

2:00 POLY 173. Cognitive macromolecular therapeutics. J. Hedrick

2:30 Intermission.

2:45 POLY 174. Development of sustainable alternatives for the next generation of chemicals and materials: Continued progress in development of renewably-sourced materials from DuPont. H.E. Bryndza

3:15 POLY 175. Future fabricated with light: Photolithography in 2D leading to CLIP in 3D. J.M. DeSimone

3:45 POLY 176. Digital manufacturing at the NNSA's National Security Campus. D.E. Bowen

## Section B

Moscone Center  
121

## Next Generation Smart Materials

Cosponsored by MPPG $\ddagger$

J. Foster, Y. C. Simon, *Organizers*

E. B. Berda, *Organizer, Presiding*

T. Zarkovic Grove, *Presiding*

1:00 Introductory Remarks.

1:05 POLY 177. Stimuli-responsive metal organic framework nanoparticles. A.J. Morris, C.C. Epley

1:35 POLY 178. Atypical responses from polymeric nanoassemblies. S. Thayumanavan

2:05 POLY 179. Molecular design strategies for smart materials based on new dynamic bonding motifs in polymers. B. Helms

2:35 Intermission.

2:45 POLY 180. Engineering multi-responsive complex coacervate core micelles for biomedical and materials science applications. I. Voets

3:15 POLY 181. Processing effects on mechanically adaptive response of cellulose nanocrystal composites. M. Bortner, J. Foster, J. Fallon, B. Kolb, C. Herwig

3:45 POLY 182. Self-Assembly and responsiveness of polypeptide-based star and triblock copolymers. C. Machado, I. Smith, B. Barnes, D.A. Savin

4:15 POLY 183. Nanoparticle assembly of surface-modified proteins. M. Fach, L. Radi, P.R. Wich

## Section C

Moscone Center  
122

## Polymeric Materials for Performance &amp; Sustainability

## Biodegradable &amp; Recyclable Polymers

Cosponsored by MPPG $\ddagger$

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

B. Schmatz, *Presiding*

1:00 POLY 184. Recyclable crosslinked polymer networks via one-step controlled radical polymerization: Full property recovery after multiple melt-reprocessing steps of models for tire rubber and other polymer networks. J.M. Torkelson, K. Jin, L. Li

1:30 POLY 185. Compounding of thermoplastic polysaccharides and biodegradable polyesters. B. Zhou, J.H. Wang, Q. Jia

1:50 POLY 186. Biodegradable polyesters/cellulose esters blends: Thermal and rheological properties important for thermoplastic processing. Y. Bai, J.H. Wang, J. Kuang, B. Zhou

2:10 POLY 187. Renewable silicon-containing cross-linked polymers and tuning their properties. Y. Nishimura, J. Chung, Z. Guan

2:30 Intermission.

2:45 POLY 188. Biodegradable copolymers based on poly( $\epsilon$ -caprolactone): From packaging to wastewater treatment applications. M.K. Hassan, H. Gayouh, E. Jacob, K. Zadeh, S.A. Al-Muhtaseb, M.A. Al-Maadeed, M. Lahcini

**3:05 POLY 189.** Stress relaxation and reprocessability of cross-linked polyhydroxyurethanes. **D.J. Fortman**, J.P. Brutman, M.A. Hillmyer, W.R. Dichtel

**3:25 POLY 190.** Polycarbonate vitrimers from bis(cyclic carbonates) and polyols. **R.L. Snyder**, D.J. Fortman, W.R. Dichtel

**3:45 POLY 191.** Renewable aliphatic-aromatic copolyesters based on phloretic acid. **M.J. Miri**, M.E. Bloom, J.F. Vicentin, J.M. Marsico, T.S. Geraci, D.S. Honeycutt

**4:05 POLY 192.** Structure-property relationships in modified highly functional bio-based thermosets. **A.Z. Yu**, J.M. Sahouani, D.C. Webster

## Section D

Moscone Center  
123

### Excellence in Graduate Polymer Research

*Cosponsored by PRES, PROF, SOCED and YCC*

*Financially supported by POLY Industrial Advisory Board*

H. Cheng, C. J. Landry-Coltrain, *Organizers*

C. J. Ellison, T. E. Long, *Organizers, Presiding*

**1:00** Recognition of Poster Presenters.

**1:15 POLY 193.** Mechanically stiff 3D printed biomimetic hydrogel for chondrogenesis and cartilage tissue production. **E. Aisenbrey**, S.J. Bryant

**1:35 POLY 194.** Exciton migration in conjugated polymers at the amphiphilic interfaces. **B. Koo**, T.M. Swager

**1:55 POLY 195.** Molecular engineering of polymers to realize high thermal conductivity in amorphous systems. **A. Shanker**, G. Kim, C. Li, K. Pipe, J. Kim

**2:15 POLY 196.** Directed structure manipulation of conjugated polymers with external fields. **Y. Xi**, L.D. Pozzo

**2:35** Intermission.

**2:50 POLY 197.** Direct, single-step alignment of semiconducting polymer thin films and factors influencing their deposition via solution shearing. **L. Shaw**, P. Hayoz, H. Yan, Y. Diao, J. Reinspach, J.W. To, M. Toney, T. Weitz, Z. Bao

**3:10 POLY 198.** Direct formation of large area two-dimensional nanosheets from fluorescent semi-conducting homopolymer with new orthorhombic crystalline orientation. **S. Yang**, I. Choi, S. Shin, T. Choi

**3:30 POLY 199.** Directed self-assembly of 5 nm block copolymer lamellae enabled by nanoimprint lithography. **A. Lane**, X. Yang, M.J. Maher, G. Blachut, Y. Asano, Y. Someya, S. Sirard, A. Mallavarapu, C.J. Ellison, C.G. Willson

**3:50 POLY 200.** Quantitative predictions of shape memory effects in polymers. **C.C. Hornat**, Y. Yang, M.W. Urban

## Section E

Moscone Center  
124

### Undergraduate Research in Polymer Science

J. Lott, S. E. Morgan, S. I. Nazarenko, *Organizers, Presiding*

**1:00 POLY 201.** Semi-flexible string conformational analysis towards an experimental hydrophobic-folding model system. **R. Kiessling**, C. Barraugh, B. Sanii

**1:20 POLY 202.** pKa determination of a his residue in a self-assembling peptide using Raman spectroscopy. **B. Pogostin**, C.H. Londergan, K.S. Akerfeldt

**1:40 POLY 203.** Aligned spherulites of conjugated polymers induced by carbon nanotubes. **K.J. Reynolds**, S. Zhang

**2:00** Intermission.

**2:20 POLY 204.** Thermally responsive materials with dynamic topology based upon Diels-Alder chemistry. **C. Gregory**, E. Wilborn, P.J. Costanzo

**2:40 POLY 205.** Thermal and flammability properties of epoxy resin containing flame retardants derived from castor oil. **E. Ostrander**

**3:00 POLY 206.** Modular liquid crystal elastomer synthesis: Acid catalyzed oxa-Michael addition. **C. Earl**, Z. Kurji, J.A. Kornfield

**3:20** Intermission.

**3:30** Panel Discussion.

## Section F

Moscone Center  
Esplanade Ballroom 310

### 50th Anniversary Celebration of Macromolecules

*Cosponsored by MPPG‡ and PMSE*

T. P. Lodge, *Organizer, Presiding*

**1:00 POLY 207.** Syntheses, structures and functions of AIE polymers. **B. Tang**

**1:30 POLY 208.** Polymer chemistry of graphenes and graphene nanoribbons. **K. Muellen**

**2:00 POLY 209.** Digital polymers: A new class of man-made macromolecules. **J. Lutz**

**2:30** Intermission.

**2:50 POLY 210.** Historical evolution of degradable polymers in the Wooley laboratory: From poly(silyl ester)s to natural product-based polycarbonates. **K.L. Wooley**

**3:20 POLY 211.** Reversible deactivation radical polymerization after nearly 50 years. **K. Matyjaszewski**

**3:50 POLY 212.** 50 Years of macromolecules: A perspective. **T.P. Lodge**

### Hollyweird Chemistry

### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

*Sponsored by PROF, Cosponsored by ANYL‡, BIOL‡, CHED, CMA, COLL, COMP, CWD, ENVR, INOR‡, MEDI, MPPG, ORGN, PHYS, PMSE‡, POLY, PRES‡ and WCC*

### ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer

*Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY*

### Undergraduate Research Posters

#### Polymer Chemistry

*Sponsored by CHED, Cosponsored by PMSE, POLY and SOCED*

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

C. Lipscomb, *Organizer*

**8:00 - 10:00**

**245, 329-330, 342, 345-348, 351, 353, 355, 357-358, 364-365, 367, 371, 373-378, 383, 385, 388, 390-391, 393, 395, 397-398, 406-407, 421, 424, 428, 430-431, 433-435, 441-442, 453-455, 459, 461-464, 467, 469, 474-475, 477-478.** See subsequent listings.

### Innovating Materials for the Next Generation: Bringing Practical Applications into the Chemistry Classroom

*Sponsored by CHED, Cosponsored by PMSE, POLY and RUBB*

## TUESDAY MORNING

### Section A

Moscone Center  
120

### General Topics: New Synthesis & Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

D. S. Dissanayake, D. A. Waldow, *Presiding*

**8:00 POLY 213.** Diffusion-Ordered NMR Spectroscopy (DOSY) of conjugated polymers. **L.M. Kozycz**, C.J. Hawker, M.L. Chabinyk

**8:20 POLY 214.** Fiber-coupled NMR: A simple and versatile approach to study controlled photopolymerizations in real time. **N. Dolinski**, Z.A. Page, F. Eisenreich, S. Hecht PhD, J. Read De Alaniz, C.J. Hawker

**8:40 POLY 215.** PFPE-based polymeric <sup>19</sup>F MRI agents: A new class of contrast agents with outstanding sensitivity. **C. Zhang**, H. Peng, S. Puttick, D. Searles, A. Whittaker

**9:00 POLY 216.** Decoupling of segmental motion and ionic conductivity in oligomeric ethylene oxide functionalized dicarboxide oxanorbornene polymers. **D.A. Waldow**, A.P. Sokolov, Y. Wang

**9:20 POLY 217.** Light scattering without refractive index increment. A new approach to calibrate SEC-light scattering setups. **W. Radke**, J. Preis, S. Lavric

**9:40 POLY 218.** Polyimide-Tin(poly) ester hybrid films as dielectric materials. **S. Nasreen**, G.M. Treich, M.L. Baczkowski, M. Tefferi, S.K. Scheirey, Y. Cao, G.A. Sotzing

**10:00 POLY 219.** Chemically degradable polymers for applications in nano and biotechnology. **I. Kolesnichenko**, C. Ginestra, M. Chwatko, J. Reuther, N. Lynd, E.V. Anslin

**10:20 POLY 220.** Particles formed from poly(butyl methacrylate)-co poly(acrylic acid). **S. Rimmer**, S.L. Canning, M. Geoghegan

**10:40 POLY 221.** Triethylene glycol monomethyl ether substituted polythiophenes for organic electronic applications. **D.S. Dissanayake**, S.S. Gunathilake, J. Du, T.M. Pathiranaage, E. Sheina, E. Gomez, M.C. Stefan, M.C. Biewer

**11:00 POLY 222.** Withdrawn.

**11:20 POLY 223.** Synthesis and characterization of highly branched, functional poly(arylene ether sulfone)s. **E. Sevinis Ozbulut**, A. Ozturk, I. Sacligil, T. Ormanci Acar, D. Imer, I. Koyuncu, Y.Z. Menceoglu, S. Unal

**11:40 POLY 224.** Can the overall molecular architectures of synthetic polymers be characterized? **R. Gurarslan**, A.E. Tonelli

## Section B

Moscone Center  
121

### Next Generation Smart Materials

*Cosponsored by MPPG‡*

E. B. Berda, J. Foster, Y. C. Simon, *Organizers*  
M. Bortner, A. Ostrowski, *Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 225.** Glucose-tactic asymmetric polymersomes. **G. Battaglia**

**8:35 POLY 226.** Design strategy for efficient intramolecular singlet fission in oligoacenes. **E. Kumarasamy**, L. Campos

**9:05 POLY 227.** Elect spun phase separating block-copolymer fibers for biological applications. **S. Camarero-Espinosa**, J. Cooper-White

**9:35** Intermission.

**9:45 POLY 228.** Functional molecular vibrations for stimuli responsive polymers. **J. Lott**

**10:15 POLY 229.** Bio-Inspired porous amphiphobic materials through surface step-growth polymerization. **S. Oyola-Reynoso**, J. Chen, B. Chang, I. Tevis, **M. Thuo**

**10:45 POLY 230.** Controlling mechanical properties of polymeric materials using photo-active metal coordination interactions. **A. Ostrowski**

**11:15 POLY 231.** Examining the mechanical reactivity of substituted cylobutene mechanophores. **C.L. Brown**, T.B. Kouznetsova, B. Bowser, S. Craig

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

‡Cooperative Cosponsorship

## Section C

Moscone Center  
122

## Polymeric Materials for Performance &amp; Sustainability

## Functional Materials for Energy &amp; Electronics

Cosponsored by MPPG‡

M. Meador, M. A. Meador, S. E. Morgan, Organizers

B. Long, Presiding

**8:00 POLY 232.** Light on an upward trajectory: Sensitized light upconversion in polymers. Y.C. Simon

**8:30 POLY 233.** Conjugated poly-electrolytes as light harvesting antenna. C. Segura, A. Ayzner

**8:50 POLY 234.** Chlorination: A facile method for high-performance polymer solar cells. F. He

**9:10 POLY 235.** Effect of solvent vapor annealing on crystallinity and hole mobility in P3HT:PCBM polymer photovoltaics. L. Moore, M. Bhattacharya, Q. Wu, S. Youm, E.E. Nesterov, S.E. Morgan

**9:30 POLY 236.** Enhancing charge transport in redox active polymers through molecular design. K. Hernandez-Burgos, M. Burgess, E. Chenard, N. Gavvalapalli, R. Assary, J. Moore, J. Rodriguez Lopez

9:50 Intermission.

**10:05 POLY 237.** Multi-grafting lithium polyacrylate as high-performance polymer binder for lithium-ion battery. P. Cao, M. Abdelmalak, E. Stacy, B. Li, T. Hong, J. Nanda, A.P. Sokolov, T. Saito

**10:25 POLY 238.** Drifting proton transport by nanophase separation induced intrinsic electric field in polymer electrolyte material under anhydrous state. Y. Hu, L. Yan, B. Yue

**10:45 POLY 239.** Photophysical changes driven by complexation of oppositely charged conjugated polyelectrolytes. W.R. Hollingsworth, C. Segura, J. Balderrama, N. Lopez, P. Schleissner, A. Ayzner

**11:05 POLY 240.** Application of polypyrrole-based selective electrodes in electrochemical impedance spectroscopy to determine nitrate concentration. M.C. So, M. Hajimorad, H. Mustafa, S. Alhloul

## Section D

Moscone Center  
123

## Excellence in Graduate Polymer Research

Cosponsored by PRES, PROF, SOCED and YCC

Financially supported by POLY Industrial Advisory Board

C. J. Landry-Coltrain, T. E. Long, Organizers

H. Cheng, C. J. Ellison, Organizers, Presiding

**8:00 POLY 241.** Consequences of low- $\chi$  design in block copolymer self-assembly. A. Chang, R.H. Grubbs

**8:20 POLY 242.** Development and applications of living alternating ring-opening metathesis polymerization of cyclopropenes. B.R. Eling, Y. Xia, J. Su

**8:40 POLY 243.** Graft-through synthesis and assembly of Janus bottlebrush polymers from A-branch-B diblock macromonomers. K. Kawamoto, M. Zhong, K.R. Gadelrab, L. Cheng, C.A. Ross, A. Alexander-Katz, J.A. Johnson

**9:00 POLY 244.** Strong aliphatic polyester thermoplastic elastomers. A. Watts, M.A. Hillmyer

**9:20 POLY 245.** Synthesis and characterization of bottlebrush polymers: The importance of the Anchor Group. S. Radzinski, J. Foster, R. Chapleski Jr, D. Troya, J. Matson

9:40 Intermission.

**9:55 POLY 246.** Thiol-ene/yne photopolymerization – Simple reactions to yield complex materials. D.V. Amato, D.L. Patton

**10:15 POLY 247.** Chain-growth CuAAC polymerization: A versatile strategy to produce hyperbranched polymers with well-defined structures in one-pot. X. Cao, Y. Shi, W. Gan, H. Naguib, X. Wang, R. Graff, H. Gao

**10:35 POLY 248.** Water-Soluble ion-containing poly(ether ester)s for extrusion 3D printing. A. Pekkanen, C. Zawaski, C.B. Williams, T.E. Long

**10:55 POLY 249.** Recyclable cross-linked polymer networks via one-step controlled radical polymerization. K. Jin, L. Li, J.M. Torkelson

## Section E

Moscone Center  
124

## Structure to Function in Supramolecular Polymers &amp; Materials

R. Kiełtyka, J. B. Matson, Organizers

P. Besenius, Organizer, Presiding

8:00 Introductory Remarks.

**8:05 POLY 250.** Living crystallization-driven, seeded growth approaches to functional supramolecular materials. I. Manners

**8:30 POLY 251.** Living supramolecular polymerization of perylene bisimide J-aggregates. W.J. Wagner, V. Stepanenko, F. Wuerthner

**8:50 POLY 252.** Probing hydrogen bond-aromaticity coupling in squaramide-based supramolecular polymers. R. Kiełtyka

**9:15 POLY 253.** Supramolecular polymers in aqueous media: From mechanisms to materials. B. Rybtchinski

9:40 Intermission.

**9:55 POLY 254.** Zerovalent metallosupramolecular polymers for the in situ nucleation of platinum nanoparticles. L. Montero de Espinosa, L. Olachea, C. Weder

**10:20 POLY 255.** Network structure-property relationships in polymer metal-organic-cage gels. A.V. Zhukhovitskiy, J. Zhao, M. Zhong, E.G. Keeler, E. Alt, P. Teichen, R.G. Griffin, M.J. Hore, A. Willard, J.A. Johnson

**10:40 POLY 256.** Metallo-Supramolecular crosslinked elastomers. R.H. Lambeth, A.M. Savage, F.L. Beyer

**11:00 POLY 257.** Porous functional nanostructures mediated by directed supramolecular interactions. F. Beuerle

**11:25 POLY 258.** Dynamic, multi-stimuli-responsive polymers based on metal-stabilized, dynamic covalent imine bonds. F. Garcia, J. Pells, H. Zuilhof, M. Smulders

## Section F

Moscone Center  
125

## Polymer Chemistry (RSC) Lectureship

Cosponsored by MPPG‡

Financially supported by Royal Society of Chemistry, Tosoh

J. A. Johnson, E. Pentzer, W. You, Organizers

J. Kalow, E. Kumarasamy, Presiding

8:00 Introductory Remarks.

**8:05 POLY 259.** Hybrid nanomaterials. R.K. O'Reilly

**8:35 POLY 260.** Design and synthesis of polymers for next generation energy storage technologies. B.P. Fors

**8:55 POLY 261.** Mechanochemical generation of conjugated polymers from non-conjugated polymers. Z. Chen, J.A. Mercer, N.Z. Burns, Y. Xia

**9:15 POLY 262.** Polymers for thermal and mechanochemical release of nitroxyl (HNO) and other small molecule payloads. D. Church, S. Nourian, C. Lee, M. Ryskamp, A. Vander Meer, N.A. Yakelis, J.P. Toscano, A.J. Boydston

9:35 Intermission.

**9:55 POLY 263.** Functionally-versatile polypeptide materials. J. Fan, X. He, R. Letteri, T. Nguyen, J. Zou, K.L. Wooley

**10:25 POLY 264.** Bioinspired sequence-defined oligomers and their biological applications. C.A. Alabi

**10:40 POLY 265.** Designer molecules toward advanced polymerizations: Control of sequence and topology for vinyl polymers. M. Ouchi

**11:00 POLY 266.**  $\alpha,\omega$ -Difunctional polyethylene telechelics through functional group tolerant catalysis. S. Mecking

## Polymers under Deformation

## Structure &amp; Morphology Changes during Deformation of Polyolefins &amp; Polymer Composites

Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡

## Developments in the Fields of Celluloses &amp; Lignocelluloses: In honor of Dr. Rajai Atalla

Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY

## TUESDAY AFTERNOON

## Section A

Moscone Center  
120

## General Topics: New Synthesis &amp; Characterization of Polymers

B. Barkakaty, D. Garcia, Organizers

A. Prasher, G. M. Treich, Presiding

**1:00 POLY 267.** Organocatalyzed synthesis of polyurethanes. H. Sardon, A. Bossion, A. Yuen

**1:20 POLY 268.** Aqueous copper(II) photoinduced polymerization of acrylates: Low copper concentration and the importance of sodium halide salts. G.R. Jones, R. Whitfield, A. Anastasaki, D.M. Haddleton

**1:40 POLY 269.** Synthesis, characterization, and analysis of a novel polythiourea for dielectric applications aided by molecular dynamics and density functional theory. G.M. Treich, M. Misra, S. Nasreen, M. Tefferi, A. Mannodi-Kanakkithodi, R. Ramprasada, Y. Cao, G.A. Solzing

**2:00 POLY 270.** Controlled ring-opening polymerization of O-carboxyanhydrides using organometallic catalysts. R. Tong, J. Cheng

**2:20 POLY 271.** Synthesis of vinylic macromolecular rotaxane cross-linkers endowing network polymers with toughness. J. Sawada, D. Aoki, T. Takata

**2:40 POLY 272.** Topology transformation from linear polymer to cyclic Polymer: Effective synthesis of cyclic polymer utilizing [C<sub>2</sub>]daisy chain dimer. D. Aoki, T. Takata

**3:00 POLY 273.** Wrinkling polymer brush surfaces via postpolymerization modification. C. Reese, W. Guo, L. Xiong, C.M. Stafford, B.S. Lokitz, O. Ovchinnikova, A. Ilevlev, D.L. Patton

**3:20 POLY 274.** Methanol-mediated living cationic polymerization of 4-methoxystyrene via oxonium intermediate. A. Prasher, S.R. Liffland, D.A. Nicewicz, W. You

3:40 POLY 275. Withdrawn.

**4:00 POLY 276.** Synthesis and characterization of diamondoid substituted block copolymers. C. Hill, M.F. Roll

**4:20 POLY 277.** Design and synthesis of new initiators for the ring opening polymerization of epoxides inspired by the Vandenberg catalyst. N.A. Lynd

**4:40 POLY 278.** Isospecific, chain shuttling polymerization of propylene oxide using a bimetallic chromium catalyst: A new route to semicrystalline polyols. M. Childers, L.S. Morris, G.W. Coates

## Section B

Moscone Center  
121

## Next Generation Smart Materials

Cosponsored by MPPG‡

E. B. Berda, J. Foster, Y. C. Simon, Organizers

J. Lott, A. Ostrowski, Presiding

1:00 Introductory Remarks.

**1:05 POLY 279.** Chromonic liquid crystal hydrogels. R. Kularatne, T.H. Ware

**1:25 POLY 280.** Self-Assembly and phase behavior in mixed polymer brushes. C.K. Simocko, A.L. Frischknecht, D. Huber

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**1:45 POLY 281.** Materials for drug capture: Filtering off-target chemotherapy agents from the bloodstream. **M.D. Schulz**, C. Blumenfeld, S. Hettis, R.H. Grubbs

**2:05 POLY 282.** Multifunctional cellulose ether derivatives for high performance amorphous solid dispersions prepared by olefin cross-metathesis and thiol-michael addition. **Y. Dong**, L.I. Mosquera-Giraldo, L. Taylor, K.J. Edgar

**2:25 POLY 283.** Synthesis and characterization of organic ion-pairs as dynamic bonds for stimuli-responsive polymers. **G. Deng**, K.A. Cavicchi

**2:45** Intermission.

**2:55 POLY 284.** Optical devices constructed from smart microgels for sensing. **Q.M. Zhang**, S. Mugo, M. Serpe

**3:15 POLY 285.** Antifouling aminoplast coatings and their layer-by-layer deposition technique. **M. Fevre**, X. Ding, R. Wojtecki, Y. Yang, J. Hedrick

**3:35 POLY 286.** Polymeric sensors for 6-D super-resolution microscopy: Advanced fluorogenic materials for measuring redox reactions at surfaces and in solution. **J. Cole**, A. Hanlon, E.B. Berda

**3:55 POLY 287.** Functionalized poly(propylene fumarate) for 3D printed bone growth scaffolds. **J. Wilson**, A. Kleinfehn, S. Petersen, Y. Chen, M. Becker

**4:15 POLY 288.** Vesicle-to-worm transition provides a new high-temperature oil thickening mechanism. **M.J. Derry**, O. Mykhaylyk, S.P. Armes

## Section C

Moscone Center  
122

### Polymers & Biomimicry

A. N. Dhinowala, T. Williams, *Organizers*, *Presiding*

**1:00 POLY 289.** Tough antibiotic-eluting double network hydrogels. **R. Stewart**, D. Lane

**1:30 POLY 290.** Polysulfonates with complex architectures as heparin mimics. **B. Caroline**, R. Peltier, H. Kim, A. Mastrangelo, S. Perrier

**1:50 POLY 291.** Nature-inspired hydrogels that change shape in response to external stimuli or to specific biomolecules. **S.R. Raghavan**

**2:10 POLY 292.** Synthesis of a super-agonist heparin-mimicking block copolymer-FGF2 conjugate. **S. Paluck**, T.H. Nguyen, J.P. Lee, H.D. Maynard

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**2:30 POLY 293.** Triazole polypeptides: Regulation of polypeptide conformation through side-chain hydrogen bonding patterns. **Z. Song**, R.A. Mansbach, R. Baumgartner, A. Ferguson, J. Cheng

**2:50** Intermission.

**3:00 POLY 294.** Bio-inspired metal-coordination dynamics: An easy way to engineer gel viscoelastic mechanics. **N. Holten-Andersen**

**3:30 POLY 295.** Crosslinking acrylate-containing polymers by downstream piezoelectric reduction. **E. Sanders**, H. Mohapatra, A.P. Esser-Kahn

**3:50 POLY 296.** Superhydrophobic coatings from Treated diatomaceous earth. **F.D. Blum**, B.R. Sedai, H. Perera, A. Paul, B.K. Khatiwada, H. Mortazavian

**4:10 POLY 297.** Protein-mimetics materials based on styrene-maleic anhydride copolymers. **A.A. Smith**, S.M. Darnall, A. Hall, **M. Puga**, T. Xu

## Section D

Moscone Center  
123

### Excellence in Graduate Polymer Research

*Cosponsored by PRES, PROF, SOCED and YCC*

*Financially supported by POLY Industrial Advisory Board*

H. Cheng, C. J. Ellison, *Organizers*

C. J. Landry-Coltrain, T. E. Long, *Organizers*, *Presiding*

**1:00 POLY 298.** Accessing poly(olefin)-block-poly(thiophene) copolymers via one-pot living polymerizations. **A. Leone**, K. Souther, A.J. McNeil

**1:20 POLY 299.** Distinct thermophysical and interfacial properties associated with low molecular weight cyclic polystyrene in bulk and confined states:  $T_g$  fragility, and thin film stability. **L. Zhang**, R. Elupula, S.M. Grayson, J.M. Torkelson

**1:40 POLY 300.** Unzipping polyester as a new photoresist material. **W. Joo**, A. Lane, D. Liu, K. Matsuzawa, R.A. Mesch, W. Wang, B. Cassidy, A. Dick, S.T. Phillips, C.G. Willson

**2:00 POLY 301.** Organocatalyzed atom transfer radical polymerization via photoredox catalysis. **R.M. Pearson**, G. Miyake

**2:20** Intermission.

**2:35 POLY 302.** Simple, generalizable method towards highly aligned functional polymeric films. **Z. Qiang**, K.A. Cavicchi, B.D. Vogt

**2:55 POLY 303.** High oxygen gas barrier multilayer thin films through pH and ionic strength manipulation of montmorillonite clay. **Y. Song**, D. Hagen, J.C. Grunlan

**3:15 POLY 304.** Controlling and manipulating crease formation in polymer brush platforms. **K. Brooks**, M.J. Razavi, X. Wang, J.J. Locklin

**3:35 POLY 305.** Tuning CO<sub>2</sub>-philicity in highly permeable polymeric membranes for gas separation. **T. Hong**, H. Feng, S. Lai, S.M. Mahurin, D. Jiang, B.K. Long, J.W. Mays, A.P. Sokolov, T. Saito

## Section E

Moscone Center  
124

### Structure to Function in Supramolecular Polymers & Materials

P. Besenius, *Organizer*

R. Kielyka, J. B. Matson, *Organizers*, *Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 306.** Self-Assembly of exfoliated monolayer crystals as photoswitchable soft matter. **R.H. Zha**, J.A. Berrocal, G. Vantomme, R. Gosens, B. de Waal, E.W. Meijer

**1:30 POLY 307.** N-annulated perylenes. Outstanding scaffolds to build up functional supramolecular polymers. **L. Sánchez**, J. Buendía, E. Greciano, J. Valera, Y. Dorca, R. Gómez

**1:55 POLY 308.** Controlling the assembly of multicomponent supramolecular gelator systems. **E. Draper**, C. Colquhoun, E. Cross, **D. Adams**

**2:20 POLY 309.** Supramolecular control over thermoresponsive polymers. **R. Hoogenboom**

**2:45 POLY 310.** Control of functional materials and supramolecular network dynamics at both the molecular and colloidal length scales. **O.A. Scherman**

**3:10** Intermission.

**3:25 POLY 311.** Functional materials from self-assembled bis-urea macrocycles. **L.S. Shimizu**, S.R. Salpage, B. Som, A.J. Sindt

**3:50 POLY 312.** Impact of solvency and secondary structure on the conformation of single chain polymeric nanoparticles. **G. ter Huurne**, L. de Windt, A. Palmans, E.W. Meijer, **I. Voets**

**4:15 POLY 313.** Single-chain nanoparticles with sequenced defined segments via multicomponent reactions. **E.B. Berda**, J. Cole

**4:40 POLY 314.** Controlled self-assembly of peptidic Au(I)-metalloamphiphiles into 1D nanorods in water. **B. Kemper**, P. Besenius

**5:00 POLY 315.** Photo- and magnetoresponsive self-assembly of nanoparticles. **B. Ravoo**

## Section F

Moscone Center  
125

### Polymer Chemistry (RSC) Lectureship

*Cosponsored by MPPG‡*

*Financially supported by Royal Society of Chemistry, Tosoh*

J. A. Johnson, E. Pentzer, W. You, *Organizers*

A. Anastaski, W. Gutekunst, *Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 316.** Poly(2-oxazoline)s as functional biomaterials. **R. Hoogenboom**

**1:35 POLY 317.** Training the old dog new tricks: The applications of the Biginelli reaction in polymer chemistry. **L. Tao**

**1:55 POLY 318.** Biomass-derived polymers incorporating hydroxycinnamates. **A.M. Kasko**

**2:10 POLY 319.** Polymeric materials for delivery of hydrogen sulfide (H<sub>2</sub>S), a biologically relevant signaling gas. **J.B. Matson**, J. Foster

**2:30 POLY 320.** New strategies for polymer functionalization: From multifunctional homopolymers to polymeric thermometers. **C.A. Figg**, T. Kubo, R.N. Carmean, C.P. Kabb, **B.S. Sumerlin**

**3:00** Intermission.

**3:20 POLY 321.** Cyclopolymerization using Grubbs catalyst. **T. Choi**

**3:40 POLY 322.** Carbohydrate-based macromolecular self-assemblies and their biological functions. **G. Chen**

**4:00 POLY 323.** Harnessing non-covalent interactions for functional organic and polymeric materials. **L. Fang**, T. Yuan, C. Zhu, M.A. Olson

**4:20 POLY 324.** Functional materials constructed by the combination of traditional polymers and host-guest molecular recognition motifs. **F. Huang**

## Polymers under Deformation

### Applying Advances in Characterization Methods for In-Situ Studies of Deformation

*Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡*

### Advances in Polysaccharides: Practice & Applications

### New Developments in the Industrial Sector

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY*

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Recent Advances in Multiblock Copolymers

### Synthesis & Modeling

*Sponsored by PMSE, Cosponsored by POLY‡*

## TUESDAY EVENING

### Section A

Moscone Center  
Hall A

### Excellence in Graduate Polymer Research

*Cosponsored by PRES, PROF, SOCED and YCC*

*Financially supported by POLY Industrial Advisory Board*

H. Cheng, C. J. Ellison, C. J. Landry-Coltrain, T. E. Long, *Organizers*

**6:00 - 8:00**

**POLY 325.** Diversifying catalysts, monomers, cross-coupling strategies and functional groups in the controlled synthesis of conjugated polymers. **Y. Qiu**, K.J. Noonan, T. Kowalewski

**POLY 326.** Bioinspired stimuli-responsive materials: Concurrent shape and color change in programmed cholesteric liquid crystal elastomers. **M.T. Leslie**, G.E. Whnek, L.T. Korley, T.J. White

**POLY 327.** Towards commercially scalable processes for polymers produced by sequential anionic and RAFT polymerization. **M. Forrester**, W. Bradley, N. Hernandez, G.A. Kraus, E.W. Cochran

‡Cooperative Cosponsorship

- POLY 328.** Scalable synthesis of macroCTAs from living anionic polystyrene. **W. Bradley, M. Forrester, N. Hernandez, G.A. Kraus, E.W. Cochran**
- POLY 329.** Synthesizing Hyperbranched Polyglycerol (HPG) derivatives for use in templating hard inorganic nanostructures, biocompatible soft nanoparticles and structure-preserving binder materials for batteries. **J. Iocozzia, Z. Lin**
- POLY 330.** Synthesis of biodegradable polycarbonate nanostructures with selective lysis against gram positive bacteria. **A. Nimmagadda, J. Cai**
- POLY 331.** Promising approach to developing eco-friendly, sustainable and dual-cure coatings. **O. Akdogan**
- POLY 332.** Engineering zwitterionic polymers that control cell adhesion and direct neurite growth to improve cochlear implants. **B. Leigh, E. Cheng, M.R. Hansen, A. Guymon**
- POLY 333.** Modification of alkene-containing copolylactide scaffolds for biomedical applications. **P. Kalelkar, R. Agarwal, A. Garcia, D.M. Collard**
- POLY 334.** Chalcogen polymers for completely solution-processed inorganic photovoltaics. **T.R. Martin, H. Hillhouse, C.K. Luscombe**
- POLY 335.** Fluorinated thiophenes in PBnDT-TAZ for bulk heterojunction solar cells: The impact of fluorination. **Q. Zhang, L. Yan, W. You**
- POLY 336.** Introducing cobaltocenium to Alkaline Anion Exchange Membrane Fuel Cells (AAEMFC). **H. Yuan, T. Tsai, B. Coughlin**
- POLY 337.** Real-time metrology for photopolymer additive manufacturing with exposure controlled projection lithography. **X. Zhao, D.W. Rosen**
- POLY 338.** Nanoscale considerations responsible for diverse macroscopic phase behavior in substituted isobutyl-POSS/poly(ethylene oxide) blends. **Y. Caydamli, E. Yildirim, J. Shen, X. Fang, M.A. Pasquinnelli, R.J. Spontak, A.E. Tonelli**
- POLY 339.** Stable entrapment of cholesteric 1D photonic domains in Liquid Crystalline Random Terpolymer (LCRTTP) architecture with dual covalent and physical networking sites: A platform towards elastomeric 1D photonic material. **L.H. Mahajan, D. Ndaya, P.B. Deshmukh, M. Gopinadhan, C.O. Osuji, R. Kasi**
- POLY 340.** Nanoporous materials from ultrahigh molecular weight linear block copolymer precursors. **J. Mapas, J. Rzyzewski**
- POLY 341.** Segmental dynamics of poly(styrene-stat-methyl methacrylate-*d*<sub>2</sub>) in bulk and at very small amounts on silica. **U.N. Arua, M. Madduma Arachchilage, F.D. Blum**
- POLY 342.** Simple and accurate determination of reactivity ratios of chain copolymerization following terminal model by *in-situ* <sup>1</sup>H-NMR technique. **D. Debnath, J. Baughman, R.A. Weiss, C.R. Pugh**
- POLY 343.** Withdrawn.
- Section A**  
Moscone Center  
Hall A
- General Topics: New Synthesis & Characterization of Polymers**  
B. Barkakaty, D. Garcia, *Organizers*
- 6:00 - 8:00**
- POLY 344.** Effect of organically modified montmorillonite on polymerization and thermal degradation mechanisms of polybenzoxazine. **A. Hisar Telli, J. Hacaloglu**
- POLY 345.** Hydrophilic-hydrophobic hybrid polymer involving perfluoro- with tetraarylphosphonium moieties: Synthesis, film morphology and electrochemical properties. **W. Wan, X. Yang, R. Smith**
- POLY 346.** CdSe/CdS-Conjugated polymer core-shell hybrid nanoparticles by a grafting-from approach. **S. Huber, T. Deroo, D. Seletskiy, A. Leitenstorfer, S. Mecking**
- POLY 347.** Anisotropic nanocrystals from precisely long-spaced ionomers. **C. Rank, S. Mecking**
- POLY 348.** Dual-patterning optical data storage in polymer films with orthogonally responsive dyes. **P. Wei, B. Li, A.D. Leon, E. Pentzer**
- POLY 349.** 2,1,3-Benzoxadiazole, thiophene and benzodithiophene based random copolymers for organic photovoltaics: Thiophene versus thieno[3,2-b]thiophene as  $\pi$ -conjugated linkers. **S. Goker, G. Hizalan, E. Aktas, S. Kutkan, A. Cirpan, L. Toppare**
- POLY 350.** Multifunctional phosphorus flame retardants for polymeric materials from benzoquinone. **A. Alrubayyi**
- POLY 351.** Photochemical controlled disulfide based thiol-ene/thiol-Michael covalent adaptable network development and application. **X. Han, X. Zhang, N. Sowan, L. Cox, S. Huang, C. Bowman**
- POLY 352.** Withdrawn.
- POLY 353.** Oligomeric 3,4-propylenedioxythiophene dyes for achieving color neutrality with electrochromic devices. **O.A. Yassin, M.T. Otley, X. Zhang, M. Li, G.A. Sotzing**
- POLY 354.** In-situ stabilization of polyolefins in aqueous systems by inorganic particles. **T. Morgen, S. Mecking**
- POLY 355.** Structure-property relationships of conjugated polymers. **S.S. Lawton, D.M. Haddleton**
- POLY 356.** Fluorinated polymethacrylate bottlebrush enables outstanding water- and oil-repellent surfaces. **Y. Luo, K. Hong**
- POLY 357.** Phosphonate functionalized poly-3-hexylthiophenes by controlled Suzuki-Miyaura coupling polymerization for interface modification in hybrid solar cells. **A. Groh, P. Ehrenreich, L. Schmidt-Mende, S. Mecking**
- POLY 358.** Triplet-Triplet annihilation upconversion in epoxy-amine networks. **A.K. Williams, J. Lott**
- POLY 359.** Flexible sulfur copolymer film via inverse vulcanization technique. **V. Wadi, S. Khawaja, S. Al Hassan**
- POLY 360.** Syntheses, electrochemical and spectroelectrochemical characterizations of quinoxaline-based conjugated polymers for organic photovoltaics. **M. Yasa, S. Goker, Y. Arslan Udm, G.E. Gunbas, L. Toppare**
- POLY 361.** Analysis of polyamides with GPC using triple detectors. **R. Farasat**
- POLY 362.** Rapid screening of packing for residual monomers using SIFT-MS. **V.S. Langford, B.J. Prince, D.B. Milligan, M. Perkins, T. Wilks, T. Potter**
- POLY 363.** FTIR characterization of co-deposited LbL film of sPPO and sPS copolymer with PDDA. **C.G. Cho, H. Ryu, A. Heo**
- POLY 364.** Polysulfone-poly(diallylpiperidinium hydroxide) multiblock copolymers containing alkaline stable spirocyclic quaternary ammonium cations for alkaline exchange membranes. **B.J. Graziano, D.J. Strasser, D.M. Knauss**
- POLY 365.** Investigating the dynamic assembly of boronate esters and diazaboroles for the formation of frameworks and polygons. **V. Drogkaris, B.H. Northrop**
- POLY 366.** Withdrawn.
- POLY 367.** Structure-property-processing-application relationship of amino acid-based poly(ester urea)s. **J. Yu, M. Becker**
- POLY 368.** From exhaust gas to drug delivery: Nano carriers based on carbon dioxide and tailored epoxide building blocks. **M. Scharfenberg, H. Frey**
- POLY 369.** Hyperbranched polymers for the disruption of quorum sensing in *Pseudomonas aeruginosa*. **W. Martin, J. Shepherd**
- POLY 370.** Smart polymers - drug delivery with polyvinylphosphonates. **C. Schwarzenböck, B. Rieger**
- POLY 371.** Polyglutamic acid based GRAS nanogels for drug delivery. **P. Prasad, M. Molla, W. Cui, M. Canakci, B. Osborne, J. Mager, S. Thayumanavan**
- POLY 372.** Conformational effect of trehalose monomers and polymers on protein stabilization. **M. Messina, J. Ko, Z. Yang, J.M. Strouse, K.N. Houk, H.D. Maynard**
- POLY 373.** Fabrication of biodegradable surfaces of modified poly(lactic acid) for biomedical applications. **P. Kalelkar, D.M. Collard**
- POLY 374.** Investigation of the dynamic aminal bond exchange towards the design and synthesis of polyaminal polymers. **A. Chao, D. Zhang**
- POLY 375.** Bio-based semi-crystalline polyphosphoesters via polyesterification reactions. **H. Busch, S. Mecking**
- POLY 376.** Encoding function in protein-oligonucleotide precision biopolymers. **W. Liu, T. Weil**
- POLY 377.** Poly(acrylic acid) based block copolymers as excipients for enhancing solubility of poorly water soluble drugs. **A. Purchel, W.S. Boyle, T.M. Reineke**
- POLY 378.** Dual effect of thiol addition on fluorescent polymeric micelles: ON-to-OFF emissive switch and morphology transition. **A.B. Mabire, M. Robin, H. Willcock, A. Pitto-Barry, N. Kirby, R.K. O'Reilly**
- POLY 379.** Fabrication and orthogonal modification of multi-functional nanogels for targeted therapy. **L. Chambre, B. Aktan, R. Sanyal, A. Sanyal**
- POLY 380.** Withdrawn.
- POLY 381.** Catalytic precision polymerization of polar monomers: Rare earth metal-mediated synthesis of homopolymers and polymer brushes. **P. Pahl, B.S. Soller, B. Rieger**
- POLY 382.** High swelling acrylate elastomers with a RAFT crosslinker by high-throughput approach. **J. Lee, K.A. Cavicchi**
- POLY 383.** Amino functional poly(propylene oxide). **J. Blankenburg, J. Herzberger, H. Frey**
- POLY 384.** Novel aliphatic polycarbonate elastomers based on CO<sub>2</sub> and epoxides. **L. Kunze**
- POLY 385.** Synthesis of star-comb double crystalline copolymers of  $\epsilon$ -caprolactone /  $\gamma$ -lactide: Effect of main-chain structure on crystallization behavior. **X. Leng**
- POLY 386.** Diene functional polyethers: A versatile platform for triazolinedione click chemistry: New multi-functional PEGs for pharmaceutical purposes and clickable polyethers. **T. Johann, H. Frey**
- POLY 387.** Advances in Pd-initiated polymerization of diazoacetates: From variety of functional groups, living polymerization system, to high stereoregularity. **H. Shimamoto, E. Ihara**
- POLY 388.** One-Pot synthesis of hyperbranched polymers with over a million molecular weight and low polydispersity. **X. Cao, Y. Shi, X. Wang, R. Graff, H. Gao**
- POLY 389.** Safole Oxide (SFO): A novel functional epoxide monomer for the introduction of Catechol moieties into multifunctional Poly(ethylene glycol) via monomer activated technique. **O. Linker, T. Johann, H. Frey**
- POLY 390.** Withdrawn.
- POLY 391.** Chain multiplication of fatty acids. **M. Haeussler, T. Witt, S. Mecking**
- POLY 392.** Synthesis and applications of dialkyne functionalized fulvenes. **A. Pelouquin, N.P. Godman, G.J. Balaich, S.T. Iacono**
- POLY 393.** Side group effects on aggregation properties of conjugated polymers. **Y. Yang, K.S. Schanze**
- POLY 394.** Synthesis of DABCO based cationic polymers with ROMP technique and examination of antibacterial activity. **A. Kaymaz, T. Eren, S. Bucak**
- POLY 395.** Click chemistry toward stable reverse osmosis membranes for water desalination. **B.L. Hamlett, M. Finn, R.P. Lively, B. McCool**
- POLY 396.** Synthesis of high melting precision aliphatic polysulfones via ADMET polymerization. **M.H. Bell, G. Hester, T.W. Gaines, K.B. Wagener**
- POLY 397.** Self-Assembly of brush block copolymer photonic crystals featuring low T<sub>g</sub> side chains. **A.L. Liberman-Martin, C. Chu, A. Chang, R.H. Grubbs**
- POLY 398.** Synthesis of molecular brushes with ultrahigh grafting density using accelerated CuAAC coupling-onto strategy. **Y. Shi, W. Gan, X. Cao, H. Gao**
- POLY 399.** Ultra-rigid indenyl-based group IV metallocene complexes for nearly perfect PP catalysis. **M. Machat, B. Rieger**
- POLY 400.** Controlled ring-opening polymerization of O-carboxyanhydrides using  $\beta$ -diiminate zinc catalyst. **R. Wang, J. Cheng**
- POLY 401.** Microwave-assisted polyarylene: Synthesis, characterization, and optimization. **S.M. Budy, D.Y. Son**
- POLY 402.** Expanding the scope of radical traps in RTA-ATRC reactions by using solvent mixtures and additives. **E.S. Tillman, M. Arce**

POLY **403.** Withdrawn.

POLY **404.** High-strain elastomeric networks from thiol-ene chemistry. **A.J. Guenther**, J.C. Marcischak, T.S. Haddad, J. Reams, M.D. Ford, J.M. Mabry

POLY **405.** Synthesis of polythiophene as a possible smart functional polymer. **M.N. Siddiqui**, N. Ullah, A. Al-Betar, A. Al-Saadi

POLY **406.** Synthesis and characterization of multi-cationic quaternary ammonium containing polymers. **Z.D. Whitemore**, S.M. Duggan, M.C. Jennings, W.M. Wuest, K.P. Minbiole, D.L. Zubris

POLY **407.** Withdrawn.

POLY **408.** Computational and experimental investigations of the thiol-Michael click reaction and its applications in dendrimer synthesis. **S.H. Frayne**, B.H. Northrop

### Polymeric Materials for Performance & Sustainability

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

**6:00 - 8:00**

POLY **421.** Organic solar cell based on porphyrin functionalized Rosette nanotube. **E. Keyvani-Someh**, L. Shuai, W. Lee, H. Fenniri

POLY **422.** Synthesis and applications of recyclable polymer-bound transition metals sequestrants. **D. Chouikhi**, T. Malinski, M. Al-Hashimi, D.E. Bergbreiter, H.S. Bazzi

POLY **423.** Cross-linked films from star-shape poly( $\epsilon$ -caprolactone): Effects of branch number and chain length on elastic properties. **D.K. Saha**, M. Ebara, T. Aoyagi

POLY **424.** Effects of molecular weight on power conversion efficiency of an end-capped polythiophene. **P.R. Pulley**, D.J. Patterson

POLY **425.** PHB and Montmorillonite Clay Composites as KNO<sub>3</sub> and NPK controlled release fertilizers. **J. Souza**, A. Campos, **R. Faez**

POLY **426.** Chitosan-montmorillonite spray dried microsphere and microcapsules for fertilizer encapsulation. **D. França**, Á.F. Medina, C.F. Souza, **R. Faez**

POLY **427.** Nontoxic and nonvolatile alternatives for hexane and heptane and their use in catalysis. **M.L. Harrell**, T. Malinski, C. Torres-Lopez, K. Gonzalez, D.E. Bergbreiter

POLY **428.** Sustainable polyaldimines from lignin-derived aromatic aldehydes and aliphatic diamines. **M. Rostagno**, S.A. Miller

POLY **429.** High performance waterborne exterior coatings with improved durability, eco-footprint and cost through the use of self-assembled polymer pigment composites. **J. Bohling**, P. Luo, J. Tanzer, A.M. Maurice, M. Koback, M. Belowich, C. Valente, W. Gao, J. Reffner

POLY **430.** Succinate polyester polyol copolymers and blends: Synthesis, compatibility, crystallization kinetics, and crystal morphologies. **H.S. Hamilton**, A.A. Seba, J.E. Blue, W.D. Coggio, A. Schrock

POLY **431.** Novel conjugated polymer binders and their processing for Si-based Li-ion battery anodes. **A.L. Miranda**, X. Li, H. An, J.L. Lutkenhaus, R. Verduzco

POLY **432.** Aniline oligomers and polyaniline: Supercapacitors and freestanding films. **C. Lin**, R. Li, R.B. Kaner

POLY **433.** Exploring inverse vulcanization of sulfur with natural source monomers as cathodic materials for long life lithium sulfur batteries. **I. Gomez**, O. Leonet, A. Blazquez, D. Mecerreyes

POLY **434.** Synthesis and properties of physically cross-linked hydrogel obtained from amphiphilic copolymer. **D. Debnath**, R.A. Weiss, C.R. Pugh

POLY **435.** Effects of substituents on the ceiling temperature of cyclopentene in ring-opening metathesis polymerization. **H. Liu**, Y. Ren

POLY **436.** Periodical mesoporous polymers from H-bonding-modulated block copolymer supramolecules. **Y. Wang**, L. Guo

POLY **437.** Photo-responsive solubility, color, and fluorescence of phthalocyanine dye in solution and polymer films. **B. Li**, P. Wei, A. de Leon, T. Frey, E. Pentzer

POLY **438.** New achievement toward greener BIAN-NHC ruthenium complex. **A.R. Hlil**, J. Balogh, R. Tuba, M. Al-Hashimi, H. Bazzi

POLY **439.** Thiol-ene polymerization of biobased monomers deriving from syringaresinol. **Y. Chen**, M. Janvier, S. Jaufaurally, P. Ducrot, **F. Allais**

POLY **440.** Effect of methoxy substituent position on thermal properties and solvent resistance of lignin-inspired poly(dimethoxy phenyl methacrylate). **S. Wang**, G. Wieber, T.H. Epps

POLY **441.** Improving the rheology and mechanical response in alumina-poly(vinylidene fluoride)-poly(lactic acid) composites. **J. Bencomo**, J.M. McCollum, S.T. Iacono

### Undergraduate Research in Polymer Science

J. Lott, S. E. Morgan, S. I. Nazarenko, *Organizers*

**6:00 - 8:00**

POLY **449.** Design and synthesis of solution processable *n*-channel  $\pi$ -conjugated polymers and device applications. **A. Tonnaer**, R. Topiwala, N. Patel, Z. Yuan, E. Reichmanis

POLY **450.** Novel copolymers of styrene and some ring-disubstituted propyl 2-cyano-3-phenyl-2-propenoates. **G.B. Kharas**, V.A. Sloan-Lyon, M. Cieszynski, J.D. Manuel, S.L. Mei, J.B. Mubang, P.E. Skorseth, K.E. Smith, N. Tassone, E. Tolberd, D.Z. Yan

POLY **451.** Fabricating novel optical sensors by embedding gold nanoparticles inside peptoid nanosheets. **K. Chen**, E. Robertson, R.N. Zuckermann

POLY **452.** Exploration of the electron transfer reaction between 1-ethyl-3-methyl-4-vinyl imidazolium triflate and ethyl vinyl ether. **S. Lucisano**, M. Detwiler, T.W. Smith

POLY **453.** Synthesis, characterization and photophysical properties of new 2-(2-methoxyphenoxy)-6-(3-methoxyphenoxy)-1,5-naphthridine;phenylene vinylenes copolymers. **A.A. Boali**, M. Mansha, N. Ullah

POLY **454.** Synthesis and characterization of conducting polymers with degradable crosslinks. **R. Grant**, A. Murphy

POLY **455.** Actuation of electrospun silk-conducting polymer composites. **J. Bontrager**, T. Fuller, S. Maxwell, A. Murphy

POLY **456.** Solvent effects and isothermal crystallization of poly(ethylene oxide)-block-poly( $\epsilon$ -caprolactone). **C. Tower**, R.M. Van Horn, K. Allen, A. Carandang

POLY **457.** Crystallization trends of equal molecular weight poly(ethylene oxide)-*b*-poly(caprolactone). **N. Brigham**

POLY **458.** Isothermal crystallization analysis of poly(ethylene oxide)-block-poly( $\epsilon$ -caprolactone) with Larger  $w_{PEO}$  or  $w_{PCL}$ . **M. Steffen**, R.M. Van Horn

POLY **459.** Synthesis of low molecular weight anionic acrylamide-based polymers for determination of structure/binding interactions with  $\alpha$ -glucan. **H. Kolell**, A. Bristol, S.E. Morgan

POLY **460.** Amine assisted photo-initiated RAFT polymerization using visible light: A kinetic and mechanistic study. **M. Allegranza**, Z. DeMartini, A. Kloster, **Z. Digby**, D. Konkolewicz

‡Cooperative Cosponsorship

**POLY 461.** Employment of thiazolidine chemistry for novel polymer composition and structure. **C. DeHoe,** C. Sarantes, K. Eckhart, L. Souza, P.J. Costanzo

**POLY 462.** Characterization of a thiol-ene/acrylate-based polymer for neuroprosthetic implants. **D. Do,** M. Ecker, W. Voit

**POLY 463.** Withdrawn.

**POLY 464.** Highly functional methacrylate-based bio-based resin system for UV/Vis-curable coatings. **J. Sahouani,** A.Z. Yu, D.C. Webster

**POLY 465.** Finding green alternatives to platinum catalysts for the hydrosilylation and hydrogenation of carboxylic acid derivatives. **J. Arens,** C. Cheng

**POLY 466.** Synthesis and characterization of highly fluorinated dendrimers utilizing orthogonal chemistry. **A. Richert,** A.R. Jennings, S.T. Iacono

**POLY 467.** Molecular weight changing polymers via Diels-Alder chemistry. **T. Schoch,** M.R. Martinez, M. Meyersohn, M. Markmann, P.J. Costanzo

**POLY 468.** Thio-bromo click approach for the preparation of a new class of cross-linked, ROMP-based gels. **D. Gutierrez,** C.E. Hobbs

**POLY 469.** Inversion of molecular topology and composition using Diels-Alder chemistry. **M. Meyersohn,** M. Markmann, P.J. Costanzo

**POLY 470.** Gallic acid esters with flame retarding properties. **K.L. Oberdorfer**

**POLY 471.** Magnetic field triggered degradation of xylan with a xylanase-copolymer conjugate for controlled drug delivery. **T. Richardson**

**POLY 472.** Development of new fluorocyclic-polyhedral oligomeric silsesquioxane containing polymers of varying architectures. **E.C. Lochmaier,** A.R. Jennings, S.T. Iacono

**POLY 473.** Amphiphilic polyurethane coatings for fouling release applications. **R. Burgett,** D.C. Webster, T.P. Galhenage

**POLY 474.** Oligomeric flame retardants for polymeric materials from itaconic acid. **V. Hill,** B. Howell, Y. Daniel

**POLY 475.** Polysoaps to serve as stimuli-responsive micelles for environmental remediation applications. **C.R. Kasprzak,** P.D. Pickett, C.L. McCormick

**POLY 476.** Counterion effects on the glass transition temperature of ionic liquid polymers. **A. Mayers,** S. Lucisano, T.W. Smith

**POLY 477.** Ab initio Monte Carlo simulations of military contaminants binding to cellulose and its derivatives. **T. Truttman,** M. Roth, G. Todde, M.K. Shukla, G. Subramanian

**POLY 478.** Reducing immune response of nucleic acids by brush polymer assisted compaction. **M. Corley,** X. Lu, X. Cao, K. Zhang

**POLY 479.** Nanomorphology of novel synthesized diblock copolymers with and without lithium salt characterized by atomic force microscopy. **M. Longstaff,** D.A. Waldow

**POLY 480.** Time-Dependent release of methylene blue from PEO-*b*-PCL films for the prevention of anaphylaxis. **H. Fischer,** J.E. Jurczyk, M. Seraly, R.M. Van Horn

## WEDNESDAY MORNING

### Section A

Moscone Center

#### New Generation Smart Materials

*Cosponsored by MPPG‡*

E. B. Berda, J. Foster, Y. C. Simon, *Organizers*

M. Karman, J. Lott, *Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 492.** Bioinspired control of polymer self-assembly via ligand-metal ion interactions. **A. Knight,** J. Larsson, C.J. Hawker

**8:25 POLY 493.** Let's get things in order: Sequence controlled anionic polymerization of aziridines. **E. Rieger,** T. Gleede, A. Manhart, L. Thoni, M. Wagner, F. Wurm

**8:45 POLY 494.** Design and synthesis of cellulose based polyelectrolytes via olefin cross-metathesis. **B.L. Nichols,** K.J. Edgar

**9:05 POLY 495.** Hollow polycaprolactone nanocages from variable grafting-density polymer-grafted silica nanoparticles: Materials for next-generation oil dispersants. **K.C. Bentz,** M. Ejaz, S.M. Grayson, D. Savin

**9:25 POLY 496.** Group-Transfer-Polymerization: A highly versatile tool for tailor-made smart polymers. **F. Adams,** P.T. Altenbuchner, B. Rieger

**9:45** Intermission.

**9:55 POLY 497.** Smart hydrogel-based valves inspired by the stomata in plants: Ability to regulate water flow based on temperature, pH, and light. **S.R. Raghavan,** A. Gargava

**10:15 POLY 498.** Design and study of biodegradable and photodegradable thermoplastic elastomers. **K.J. Arrington,** J. Waugh, S. Radzinski, J. Matson

**10:35 POLY 499.** Stimuli-Responsive dendronized polymers for next generation biomaterials. **W. Li,** J. Yan, K. Liu, A. Zhang

**10:55 POLY 500.** Smart organic two-dimensional materials based on a rational combination of non-covalent interactions. **J. Ziwen,** W. Bai, S. Thayumanavan

**11:15 POLY 501.** Discrete chromophores as a path towards high contrast anodically coloring electrochromic polymers. **D. Christiansen,** A.L. Tomlinson, J.R. Reynolds

### Section C

Moscone Center  
122

#### Polymeric Materials for Performance & Sustainability

##### Other Functional Materials

*Cosponsored by MPPG‡*

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

R. L. Snyder, *Presiding*

**8:00 POLY 502.** Synthesis and evaluation of thermally-responsive coatings based upon Diels-Alder chemistry and renewable materials. **D. Amato,** G. Strange, J.P. Swanson, K. Varney, D. Amato, P.J. Costanzo

**8:30 POLY 503.** Superhydrophobic nanocomposite films based on poly(pentafluorostyrene)-modified fumed silica. **Q. Yin,** E. Beyou, A. Charlot, D. Portinha

**8:50 POLY 504.** Environmentally-safe and transparent superhydrophobic coatings. **J. Mates,** R. Ibrahim, A. Vera, S. Guggenheim, J. Qin, D. Calewarts, D. Waldroup, C. Megaridis

**9:20 POLY 505.** Polyelectrolyte multilayer nanocoating exhibiting super oxygen gas barrier and 100% self-healing efficiency. **Y. Song,** K. Meyers, R. Ramakrishnan, J. Geringer, S. Qin, M. Humood, S.I. Nazarenko, J.C. Grunlan

**9:40** Intermission.

**9:55 POLY 506.** Polyphenylenesulfide and polyetheretherketone POSS nanocomposites: Improvements in rheological and crystallization behavior. **S.E. Morgan,** K.M. Knauer, G. Brust, M. Carr, R. Cardona, J. Lichtenhan

**10:25 POLY 507.** Carbon nanofiber and graphene nanoplatelet containing polycaprolactam nanocomposites: Improvements in mechanical performance in the context of unique interfacial interactions. **J. Buchanan,** E.R. Reed-Gore, S.L. Williams, Z.B. McClelland, R.D. Moser, M.K. Shukla

**10:55 POLY 508.** Robust and scalable macromolecular architectures as additives for lubrication oils. **R. Bou Zerdan,** B. van Ravensteyn, D. Seo, N. Cadirov, D. Lee, J. Gerbec, T. Watanabi, C.J. Hawker, M.E. Helgeson, J.N. Israelachvili

### Section D

Moscone Center  
123

#### Polymers & Biomimicry

A. N. Dhinjwala, T. Williams, *Organizers,* *Presiding*

**8:00 POLY 509.** Natural and bio-inspired polyphenols as multifunctional coatings. **P.B. Messersmith,** P. Burch, W. Reese, K. Healy

**8:30 POLY 510.** Designing mechano-responsive polymers that encompass biomimetic cryptic bonds. **S. Biswas,** V. Yashin, A. Balazs

**8:50 POLY 511.** Host-defense peptide-mimetic polymers to target the solution state of bacteria for modulation of biofilm formation. **L. Foster,** S.I. Yusa, K. Kuroda

**9:10 POLY 512.** Polymerization in micro channels of teeth towards artificial leaves. **J.C. Tiller,** C. Fik

**9:30 POLY 513.** Effects of *Stenocara* beetle-inspired biphilic patterns on the rate of water collection from humid air. **J.J. Benkoski,** K. Gerasopoulos, L. Luedeman, M. McCarthy, M.M. Rahman, E. Öçeroglu

**9:50** Intermission.

**10:05 POLY 514.** Effects of chemistry and dynamic three dimensional morphology of the epicuticular wax on water wettability and permeability of the prickly pear cacti cuticle. **K. Rykaczewski,** R. Linder, K. Manning, L. Majure

**10:35 POLY 515.** Mimicking muscle fiber structure and function through electromechanical actuation of nanofiber bundles. **S.Y. Severt,** S. Maxwell, J. Bontrager, T. Fuller, J. Leger, A. Murphy

**10:55 POLY 516.** Advances in asymmetric heterogeneous catalysis: Synthesis of novel nanoreactors. **E. Lestini,** L.D. Blackman, R.K. O'Reilly

**11:15 POLY 517.** Rational design of anti-freeze-protein mimetic materials to enable the cryopreservation of cells. **M.I. Gibson**

**11:35 POLY 518.** Biomimetic polymer coated carbon nanotube gas sensor for real-time air quality sensor suite. **Y.H. Ngo,** G. Slusher, K. Fullerton, C. Suarez, R.R. Naik, J.A. Martin, C. Grigsby, S.S. Kim

### Section E

Moscone Center  
124

#### Structure to Function in Supramolecular Polymers & Materials

R. Kiltyka, *Organizer*

P. Besenius, J. B. Matson, *Organizers, Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 519.** Self-assembly and hydrogelation of a peptide derived from semenogelin I. K.S. Akerfeldt

**8:30 POLY 520.** Tubular supramolecular polymers. H. Cui

**8:55 POLY 521.** Withdrawn.

**9:15 POLY 522.** Light-triggered self-assembly and actuation of DNA nanostructures using photocaged nucleotides. N. Stephanopoulos

**9:40** Intermission.

**9:55 POLY 523.** Supramolecular materials from virus-like particles as building blocks. J.J. Cornelissen

**10:20 POLY 524.** Supramolecular gels for delivery of hydrogen sulfide. J.B. Matson, Y. Qian, K. Kaur

**10:45 POLY 525.** Tubular supramolecular polymers. S. Perrier

**11:10 POLY 526.** Synthesis of a tough thermoplastic elastomer that rapidly absorb water for use in hemorrhage control applications. T.R. Long, E. Bain, F.L. Beyer, R. Mrozek, A.M. Savage, J. Lenhart

**11:30 POLY 527.** Functional, bio-inspired supramolecular polymeric materials – the interplay between covalent and non-covalent bonds. O. Goor, M. Grillaud, P. Fransen, P.Y. Dankers

## Section F

Moscone Center  
125

**Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications**

**Self-Healing Materials & Networks**

*Cosponsored by PMSE*

*Financially supported by Wacker Chemical Corporation, Jewell Laboratories LLC*

D. H. Thompson, *Organizer*

G. Wenz, *Organizer, Presiding*

A. E. Tonelli, *Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 528.** From synthesis of nonlinear block copolymers based on cyclodextrins to functional nanoparticles and Shish-Kebabbs. Z. Lin

**8:35 POLY 529.** Slide-Ring materials: Tough polymers from cyclodextrin. K. Ito

**9:05 POLY 530.** Supramolecular materials: Self-healing and stimuli-responsive polymeric materials through host-guest interactions. A. Harada

**9:35** Intermission.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**9:50 POLY 531.** Peculiar viscoelasticity and tensile behavior of polyrotaxane glass. K. Kato, K. Nemoto, K. Mayumi, H. Yokoyama, K. Ito

**10:20 POLY 532.** Self-healing car paints from cyclodextrin polyrotaxanes. G. Wenz, G. Kali

**10:50 POLY 533.** Concurrent covalent and supramolecular polymerization. X. Hou, C. Ke, J.F. Stoddart

**11:20** Panel Discussion.

## Bio-based Gels & Porous Materials

### Biopolymer Hydrogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Polymers under Deformation

### AFM & Nanoindentation Studies

*Sponsored by PMSE, Cosponsored by MPPG‡ and POLY‡*

### Advances in Polysaccharides: Practice & Applications

### Novel Biocatalytic & Biopolymeric Approaches

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY*

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atala

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

### Recent Advances in Multiblock Copolymers

### Synthesis

*Sponsored by PMSE, Cosponsored by POLY‡*

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
120

### General Topics: New Synthesis & Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

J. Su, Y. Teo, *Presiding*

**1:00 POLY 534.** Synthesis and organocatalytic polymerization of azacprolactones. C. Turlington, R.M. Waymouth

**1:20 POLY 535.** Synthesis and self-assembly of brush block copolymers with various grafting densities. T. Lin, A. Chang, C. Bates, R.H. Grubbs

**1:40 POLY 536.** Surprising and diverse reactivities of cyclopropenes in ring-opening metathesis polymerization. J. Su, Y. Xia

**2:00 POLY 537.** Deprotonated ureas as simple, ultra-fast and highly selective super catalysts for ring-opening polymerizations. B. Lin

**2:20 POLY 538.** Synthesis and characterization of crosslinked biodegradable polymers obtained using a redox-triggered crosslinking reaction. K.R. Delle Chiaie, A.B. Biernesser, L. Yablou, A.W. Sudy, G.R. Michalowski, J.A. Byers

**2:40 POLY 539.** Going beyond ruthenium in metal-cation-based anion exchange membranes. M. Kwasny, G.N. Tew

**3:00 POLY 540.** Polyladders: A new polymer architecture via ROMP of rigid ladder motifs. Y. Teo, Y. Xia

**3:20 POLY 541.** Prolines as efficient catalyst for stereocontrolled polymerization of rac-lactide. H. Sardon, A. Sanchez-sanchez, I. Rivilla, A. Basterrechea, M. Agirre, D. Mecerreyes, F. Cossio

**3:40 POLY 542.** Taking charge of thiol-allylic ionic liquid photopolymerizations. A. Tibbits, L. Mumper, Y. Yan, C.J. Kloxin

**4:00 POLY 543.** Silsesquioxane-based thermosetting phenylethynyls: Synthesis, thermally induced crosslinking and thermophysical properties. T.S. Haddad, G.R. Yandek, J. Zavala, J. Lamb, J. Reams, K. Ghilassi, J.M. Mabry, A.J. Guenther

**4:20 POLY 544.** New synthetic route to tetraarylphosphonium polyelectrolytes via Pd (0) catalyzed polycondensation from diols and diphenylphosphine. W. Wan, X. Yang, R. Smith

**4:40 POLY 545.** Thioimides: Fast and selective catalysts for ring-opening polymerizations. X. Zhang, R.M. Waymouth

## Section B

Moscone Center  
121

### Next Generation Smart Materials

*Cosponsored by MPPG‡*

E. B. Berda, J. Foster, Y. C. Simon, *Organizers*

Y. Dong, B. L. Nichols, *Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 546.** Enzyme-responsive nanoparticles for the targeted delivery of tetrazine-labeled proteins. J. Michaelis, P. Tufar, M.D. Burkart, N.C. Gianneschi

**1:25 POLY 547.** Probing the causes of thermal hysteresis using tunable  $N_{agg}$  micelles with linear and brush-like thermoresponsive coronas. L.D. Blackman, M.J. Gibson, R.K. O'Reilly

**1:45 POLY 548.** Mechanochemical fluorescence switching in polymers containing dithiomaleimide moieties. M. Karman, E. Verde-Sesto, Y.C. Simon, C. Weder

**2:05 POLY 549.** Activation of a maleimide-anthracene mechanophore localized at a silica-polymer interface. J. Sung, M. Robb, J.S. Moore, S. White, N.R. Sottos

**2:25** Intermission.

**2:35 POLY 550.** CO<sub>2</sub>/pH-responsive polymeric particles with built-in fluorescence read-out. A.B. Mabire, Q. Brouard, A. Pitto-Barry, R.J. Williams, H. Willcock, N. Kirby, E. Chapman, R.K. O'Reilly

**2:55 POLY 551.** Preparing core-shell single molecules: Architecturally sound highly branched polymers with tuneable properties. T. Swift, R. Hoskins, S. Rimmer

**3:15 POLY 552.** Optical devices constructed from responsive microgels for polyphenols detection. S.M. Mugo, M. Serpe, Q.M. Zhang

**3:35 POLY 553.** Stimuli-Responsive helical dendronized polymers with switchable conformation. W. Li, K. Liu, A. Zhang

**3:55 POLY 554.** Thermomechanical deformation of liquid crystalline elastomers: From flat to functional. B.A. Kowalski, C. Mostajeran, M. Warner, T.J. White

## Section C

Moscone Center  
122

### Polymeric Materials for Performance & Sustainability

### Recyclable & Bio-Based Materials

*Cosponsored by MPPG‡*

M. Meador, M. A. Meador, S. E. Morgan, *Organizers*

J. Mates, *Presiding*

**1:00 POLY 555.** Polymerizations with elemental sulfur: Sustainable fossil fuel chemistry. Y. Zhang, R.S. Glass, K. Char, J. Pyun

**1:30 POLY 556.** Computational modeling of bio-based furan polymers and bio-inspired polymer adhesives. I. Yeh, C.B. Rinderspacher, J.J. La Scala, J.A. Orlicki, J. Lenhart, J. Andzelm

**1:50 POLY 557.** Sugar-derived thermoresponsive block copolymers. S. Wang, J. He, M.B. Foston, T.H. Epps

**2:10 POLY 558.** Oxidatively-cured coatings from renewable-based poly(vinyl ether) s. D. Kalita, B.J. Chisholm, M.P. Sibi

**2:30** Intermission.

**2:45 POLY 559.** Effects of metal oxide loading on mechanical and rheological response in poly(vinylidene fluoride)-poly(lactic acid) composites. J.M. McCollum, J. Bencomo, S.T. Iacono

**3:15 POLY 560.** Mechanistic investigation and kinetic modeling of PPV polymerization via Gilch using time-resolved low temperature and *in situ* UV-irradiation NMR-spectroscopy. A. Schönbein, M. Wagner, J. Kind, P.W. Blom, C.M. Thiele, J.J. Michels

**3:35 POLY 561.** Incorporation of glucose in triblock copolymers to create sustainable adhesive and elastomeric materials. M. Nasiri, T.M. Reineke

**3:55 POLY 562.** Chemorheology of a methacrylate based thermoplastic resin. D. Cousins, Y. Suzuki, J.R. Dorgan

## Section D

Moscone Center  
123

### Polymers & Biomimicry

A. N. Dhinjwala, T. Williams, *Organizers, Presiding*

**1:00 POLY 563.** Mimicking mussel adhesive proteins: How close can we get to the real thing? J.J. Wilker, S. Daily, N. Hamada, S.L. Huntington, T.A. Jones, M.G. Mazzotta, B. McGill, M. North, A. Putnam, H. Siebert, A. Tibabuzo

**1:30 POLY 564.** Adhesion under humid conditions: Lessons from Spider Silk. S. Singla, G. Amarpuri, N. Dhopathkar, T.A. Blackledge, A.N. Dhinjwala

**1:50 POLY 565.** Spiders tune glue viscoelasticity to maximize adhesion. G. Amarpuri, N. Dhopathkar, T.A. Blackledge, A.N. Dhinjwala

**2:10 POLY 566.** Solvent-Free, mussel-inspired polyester adhesives with impressive underwater adhesion. Y. Xu, A. Narayanan, Q. Liu, S. Kaur, A.N. Dhinjwala, A. Joy

**2:40** Intermission.

‡ Cooperative Cosponsorship

**2:55 POLY 567.** Paradigm shift in mussel-inspired adhesion. K. Ahn

**3:25 POLY 568.** Poly(ester urea) based adhesives: Improved deployment and adhesion by incorporating poly(propylene glycol) segments. V. Bhagat, J. Zhou, M. Becker

**3:45 POLY 569.** Constructing and deconstructing the barnacle adhesive interface. C.R. So, K.P. Fears, D. Barlow, D. Leary, C.M. Spillmann, K.J. Wahl

## Section E

Mosccone Center  
124

### Structure to Function in Supramolecular Polymers & Materials

R. Kielyka, J. B. Matson, *Organizers*

P. Besenius, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 POLY 570.** Programmable brush polymer self-assembly via DNA hybridization. K. Zhang

**1:30 POLY 571.** Self- and co-assemblies of BODIPY derivatives as drug nanocarriers. A. Rödle, A. Ramos Torres, V. Stepanenko, G. Fernandez

**1:55 POLY 572.** Developing functional platforms for responsive materials and combination antimicrobials via non-covalent bonding in macromolecular systems. J.C. Barnes, A.F. Greene, X. Li

**2:20 POLY 573.** Molecular organization, mechanical properties, and ion transport in hierarchically structured repeat-protein materials. T. Zarkovic Grove, N. Carter

**2:45 POLY 574.** Active materials by coupling self assembly to the consumption of fuel. R. Eelkema, J. van Esch, G. Koper, J. Boekhoven, W. Hendriksen

**3:10** Intermission.

**3:25 POLY 575.** Super resolution imaging of supramolecular materials. L. Albertazzi

**3:50 POLY 576.** Tunable structure and function of electrostatically self-assembled polymer nano-objects in solution. F. Groehn, A. Kutz, M. Wagner, A. Krieger, S. Frühbeißer, G. Mariani, R. Schweins

**4:15 POLY 577.** Self-assembling zwitterions as building blocks for switchable gels and polymers. C. Schmuck

**4:40 POLY 578.** Reversible H- and J-type aggregation of a single perylene bisimide leading to different photoconductivity. E. Draper, M.A. Zwijnenburg, D.J. Adams

**5:00 POLY 579.** Conductivity and mechanics in self-organized networks. G.N. Tew

## Section F

Mosccone Center  
125

### Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications

#### Biomaterials

*Cosponsored by PMSE*

*Financially supported by Wacker Chemical Corporation, Jewell Laboratories LLC*

G. Wenz, *Organizer*

D. H. Thompson, *Organizer, Presiding*

I. Carneiro Leao, *Presiding*

**1:00 POLY 580.** Structure-Activity relationships on the *in vivo* therapeutic efficacy of 2-hydroxypropyl- $\beta$ -cyclodextrin: pluronic polyrotaxanes in Niemann-Pick type C disease. C.J. Collins, B. Loren, Y. Mondjinou, S. Alam, K. Haldar, D.H. Thompson

**1:30 POLY 581.** Broad-spectrum anti-virals from cyclodextrins. S. Jones, F. Stellacci

**2:00 POLY 582.** Withdrawn.

**2:30** Intermission.

**2:40 POLY 583.** Rapid enrichment of bacteria using a microfluidic device coupled with host-guest interactions. A. Pérez-Anes, A. Szarpak-Jankowska, D. Jary, G. Delapierre, R. Auzely-Velty

**3:10 POLY 584.** Host-guest macromolecular assemblies: Interplay between macromolecular design, interactions and structure. C. Amiel, I. Antoniuk, B. Plazzotta, D. Kaczmarek, V. Wintgens, G. Volet, T. Nielsen, I. Varga, J. Pedersen

**3:40** Intermission.

**3:50 POLY 585.** Novel emulsions from palmitoyl cyclic sugar. A. Cavac-Paulo

**4:20 POLY 586.** Self-assembly of responsive nanocontainers based on cyclodextrins. B. Ravoo

## Section G

Mosccone Center  
Esplanade Ballroom 310

### ACS Award in Polymer Chemistry: Symposium in honor of Murugappan Muthukumar

*Cosponsored by PMSE*

T. P. Lodge, *Organizer, Presiding*

V. M. Prabhu, *Presiding*

**1:00 POLY 587.** Illumination alters the conformation and thermodynamics of conjugated polymers. B. Morgan, M.D. Dadmun

**1:30 POLY 588.** Hierarchical structure and dynamics of oligocarbonate-functionalized PEG block copolymers. V.M. Prabhu

**2:00 POLY 589.** Polymer physics to understand protein evolution under extreme temperature. K. Ghosh

**2:30 POLY 590.** Rayleighian approach for studying the kinetics of ionic transport in polymeric media. R. Kumar

**3:00 POLY 591.** Ohm's law, polymer electrolytes and lithium batteries. N.P. Balsara, D.M. Pesko

**3:30 POLY 592.** Directing the phase behavior of polyelectrolyte complexes using chiral patterned peptides. N. Pacalin, L. Leon, M.V. Tirrell

**4:00 POLY 593.** Effect of melt viscosity on self-nucleation of ethylene- and propylene-1-alkene random copolymers. R.G. Alamo

**4:30 POLY 594. Award Address** (ACS Award in Polymer Chemistry sponsored by ExxonMobil Chemical Company). Polymer crystallization: New concepts and implications. M. Muthukumar

## Bio-based Gels & Porous Materials

### Biopolymer Organogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Polymers under Deformation

#### Control of Deformation across the Length Scale for Advanced Polymer Materials

*Sponsored by PMSE, Cosponsored by MPPG# and POLY#*

#### Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry

#### Advanced Materials & Structures

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG#, PMSE and POLY*

#### Advances in Polysaccharides: Practice & Applications

#### Novel Materials & Methodologies

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG#, PMSE and POLY*

#### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

*Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY*

#### Recent Advances in Multiblock Copolymers

#### Characterization

*Sponsored by PMSE, Cosponsored by POLY#*

## WEDNESDAY EVENING

### Section A

Mosccone Center  
134

#### POLY/PMSE Plenary Lecture & Awards

*Cosponsored by PMSE*

C. Lipscomb, C. R. Snyder, *Organizers*

C. L. Soles, *Presiding*

**5:30** Welcome Reception.

**6:45 POLY 595.** Directed assembly of hierarchical polymeric materials. J.J. De Pablo

**7:30** Award Presentation and Reception.

## THURSDAY MORNING

### Section A

Mosccone Center  
120

#### General Topics: New Synthesis & Characterization of Polymers

B. Barkakaty, D. Garcia, *Organizers*

A. E. London, N. Penfold, *Presiding*

**8:00 POLY 596.** Chemical conversion of linkages in covalent organic frameworks. P. Waller, S.J. Lyle, T. Osborn Popp, C.S. Diercks, J.A. Reimer, O.M. Yaghi

**8:20 POLY 597.** Effects of  $\alpha$ -olefin chain length and monomer concentration on molecular weights and molecular weight distributions of various  $\alpha$ -olefin-maleic anhydride copolymers. H. Kim, C. Tabako, N.S. Kheifallah, J. Arroyave, R. Sharma

**8:40 POLY 598.** Functional polyphosphoramidates and nanostructures with acid-triggered backbone cleavage. H. Wang, L. Su, R. Li, S. Zhang, K.L. Wooley

**9:00 POLY 599.** Synthesis of bottle-brush polymers using the transfer-to approach. S. Radzinski, J. Foster, J. Matson

**9:20 POLY 600.** Insight into the catalytic mechanism of metal-free ROMP – A DFT and experimental study. J.C. Johnson, T. Kensy, C.B. Rinderspacher, A.J. Boydston, D. Knorr

**9:40 POLY 601.** Stimulus-responsive non-ionic diblock copolymers: Protonation of a tertiary amine end-group induces vesicle-to-worm or vesicle-to-sphere transitions. N. Penfold, J. Lovett, P. Verstraete, J. Smets, S.P. Armes

**10:00 POLY 602.** SI-RAFT Polymerization of chloroprene on silica nanoparticles for the application in rubber nanocomposites. Z.M. Abbas, Y. Zheng, M.M. Mohammadkhani, B.C. Benicewicz

**10:20 POLY 603.** Hydrogen-bonded pore-switchable aqueous nanotubes via visible light-mediated room-temperature polymerization-induced self-assembly. P. Gao, Y. Ding, Z. Cui, Y. Cai

**10:40 POLY 604.** Well-defined PDMAEA stars via Cu(0)-mediated reversible deactivation radical polymerisation. R. Whitfield, A. Anastasaki, N. Truong, P. Wilson, K. Kempe, T. Davis, D.M. Haddleton

**11:00 POLY 605.** Hybrid nanoparticle-polymer brush composites for detection of radionuclides in water. V. Bliznyuk, A. Seliman, S.M. Husson, T.A. Devol

**11:20 POLY 606.** pH-Responsive diblock copolymer nano-objects prepared by polymerization-induced self-assembly. J. Lovett, N. Warren, N. Penfold, C. Mable, S.P. Armes

### Section B

Mosccone Center  
121

#### Next Generation Smart Materials

*Cosponsored by MPPG#*

E. B. Berda, J. Foster, Y. C. Simon, *Organizers*

Y. Dong, M. Karman, *Presiding*

**8:00** Introductory Remarks.

**8:05 POLY 607.** Innovative bionanocomposites based on polysaccharides and protein nanofibers. N.H. Silva, I. Marrucho, C. Freire

8:25 POLY 608. Withdrawn.

8:45 POLY 609. Self-healing polymers for electronic skin, energy storage and actuators. C. Wang

9:05 POLY 610. Synthesis of humidity-gradient responsive copolyamides via Retro-Michael reaction. D.H. Wang, R.N. McKenzie, P.R. Buskohl, R.A. Vaia, L. Tan

9:25 Intermission.

9:40 POLY 611. Application of base amplification to extrinsic self-healing materials. S. Lai, T. Doan, W. Li, N.R. Sottos, P.V. Braun

10:00 POLY 612. How to make a material predictive. T. Raidt, F. Katzenberg, J.C. Tiller

10:20 POLY 613. Alkali-metal-ion accelerated on-demand release from cyclic poly(phthalaldehyde) microcapsules. S. Tang, H. Liu, J. Moore

10:40 POLY 614. Shape memory polypropylene. F. Katzenberg, T. Raidt, J.C. Tiller

## Section C

Moscone Center  
122

### Polymeric Materials for Performance & Sustainability

#### Applications

Cosponsored by MPPG‡

M. Meador, S. E. Morgan, *Organizers*

M. A. Meador, *Organizer, Presiding*

8:00 POLY 615. Making wind power better – new polymer composites with improved sustainability metrics. J.R. Dorgan

8:30 POLY 616. Hexagonal liquid crystal-carbon nanotube composites. C.R. Kasprzak, E. Scherzinger, J. Parkinson, S. Zhang

8:50 POLY 617. Conjugated materials with multistage sidechains for water processable organic electronics. B. Schmatz, Z. Yuan, A. Lang, J. Hernandez, E. Reichmanis, J.R. Reynolds

9:10 POLY 618. Driving performance in low VOC binder rich paints. P.S. Majumdar, D. Conner, P. Luo, S. Eberly, T.A. Phillips, P. Doll, G.W. Dombrowski

9:30 Intermission.

9:45 POLY 619. Bio-based/biodegradable materials from thermoplastic cellulose and aliphatic polyester. J.H. Wang, B. Zhou

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

10:15 POLY 620. Multifunctional materials based on nanofibers and open and closed cell aerogel foams for sustainability. S.C. Jana, N. Teo, S.J. Kim, S. Rajgarhia, M. Ghosh

10:45 POLY 621. Robust porous polymers enabled by rapid TFA-etch with improved selectivity for polylactide. A. Sarkar, M. Stefiik

## Section D

Moscone Center  
123

### Polymers & Biomimicry

T. Williams, *Organizer*

A. N. Dhinojwala, *Organizer, Presiding*

8:00 POLY 622. Making silk without silkworms: Using industrial biotechnology to make performance protein-based fibers. D. Breslauer

8:30 POLY 623. Protein transduction domain mimics from simple polymer scaffolds. G.N. Tew

8:50 POLY 624. Multi-compartmentalized polymersomes as structural analogues of eukaryotic cells. A. Peyret, E. Ibarboure, A. Tron, L. Beauté, R. Rust, O. Sandre, N. McClenaghan, S. Lecommandoux

9:10 POLY 625. Understanding the effect of nanoparticle rigidity on the mechanism of cellular uptake. P. Gurnani, C. Sanchez Cano, S. Perrier

9:30 Intermission.

9:40 POLY 626. Polypept(o)ides: Combining the functionality of polypeptides with the stealth-like properties of polysarcosine. M. Barz

10:00 POLY 627. Synthetic antibodies. A. Poma, A. Guerreiro, H. Brahmabhatt, H. Pendergraff, J. Watts, G. Battaglia, N.W. Turner, S. Piletsky

10:20 POLY 628. Permeable polymersomes as cascade nanoreactor protocells. L.D. Blackman, M.I. Gibson, R.K. O'Reilly

10:40 POLY 629. Exploring principles of tissue morphogenesis and cancer progression using synthetic matrices. X. Jia

11:00 POLY 630. Structural effects of relative side group locations on antibacterial and hemolytic activities of amphiphilic PEGylated macromolecules. A. Punia, E. He, K. Lee, N. Yang

11:20 POLY 631. Generalized Manning model captures excess ion atmosphere around highly charged polymers. U. Mohanty

11:40 POLY 632. Synthesis of a library of degradable and protein-stabilizing polyesters using thiol-ene post-polymerization modification. E. Pelegrí-O'Day, S. Paluck, H.D. Maynard

## Section E

Moscone Center

### Structure to Function in Supramolecular Polymers & Materials

P. Besenius, R. Kiełtyka, J. B. Matson, *Organizers*

K. J. Arrington, B. Kemper, *Presiding*

8:00 Introductory Remarks.

8:05 POLY 633. Recyclable elastomeric networks based on reversible cross-linking chemistry. P. Berto, F. Peruch, S. Grellier

8:25 POLY 634. Topology transformable polymers derived by mechanical linkage. T. Takata

8:50 POLY 635. Supramolecular structures of polymers around nanocarbons. S. Zhang

9:15 POLY 636. Tensile property enhancement and photo-actuation of supramolecular self-assembled copolymers of P3HT. T.M. Pathirana, J.M. Boothby, M.C. Biewer, T.H. Ware, M.C. Stefan

9:35 Intermission.

9:50 POLY 637. Hydrogen bonding supramolecular polymers with temperature controlled switchable mechanical properties reveal photohealable effects. A. Razgoniaev, K. Mikhailov, F. Obrezkov, A. Ostrowski

10:10 POLY 638. Regioselective, metal free C-C coupling of hexafluorobenzene for stable porous polymer networks. D. Thirion, V. Rozyyev, A. Adishev, C.T. Yavuz

10:35 POLY 639. UV Patterned calixarene-derived supramolecular gels with spatially resolved mechanical and fluorescent properties. J. Lee, J.H. Jung, K. Sakurai

10:55 POLY 640. Trefoil knotted block copolymer via ring-expansion strategy. P. Cao, L. Rong, J. Mangadla, R.C. Advincula

11:15 POLY 641. Perylene bisimide aggregation in water: Self-assembly features and development of stimuli responsive materials. B. Soberats, D. Göri, P. Syamala, F. Wuerthner

## Section F

Moscone Center

### Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications

#### Stimuli-responsive Polymers & Polymer Processing

Cosponsored by PMSE

Financially supported by Wacker Chemical Corporation, Jewell Laboratories LLC

D. H. Thompson, G. Wenz, *Organizers*

A. Harada, K. Ito, *Presiding*

8:00 POLY 642. Developing cyclodextrin-based 3D printing materials. Q. Lin, H. Wang, C. Ke

8:20 POLY 643. Stimuli responsive nanoparticles from cyclodextrin polymers. T. Nielsen

8:40 POLY 644. Preparation of shape memory polymers or self-healing composites based on cyclodextrin-based inclusion. Z. Chao, K. Guo, Y. Xiao, B. Li, S. Zhang

9:00 Intermission.

9:10 POLY 645. Highly porous, mechanically strong, cyclodextrin-rich polyimide gels designed for advanced applications: Synthesis, characterization, and applications. E. Leonhardt, T. Williams, K.L. Wooley

9:30 POLY 646. Monodisperse thermoresponsive cyclodextrins with switchable inclusion complexation. J. Yan, W. Li, K. Liu, A. Zhang

9:50 POLY 647. Restructuring polymers via nano-confinement and subsequent release. A.E. Tonelli

10:20 Intermission.

10:30 POLY 648. Controlled rotaxa-polymerization for well-defined polyrotaxanes. G. Kali, J. Hilschmann, G. Wenz

10:50 POLY 649. Amphiphilic cyclodextrin functionalized surfaces. K.L. Larsen

11:10 POLY 650. Polydiacetylenyl  $\beta$ -cyclodextrin based smart vesicles for colorimetric assay of arginine and lysine. E. Cho, H. Kim, Y. Choi, S. Paik, S. Jung

11:40 Concluding Remarks.

## Bio-based Gels & Porous Materials

### Aero-, Cryo- & Xerogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

### Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry

### Commercial & Versatile Technology

Sponsored by CELL, Cosponsored by MPPG‡ and POLY

### Advances in Polysaccharides: Practice & Applications

#### New Functional Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY

### Recent Advances in Multiblock Copolymers

#### Application

Sponsored by PMSE, Cosponsored by POLY‡

## THURSDAY AFTERNOON

### Bio-based Gels & Porous Materials

#### Open-Porous Carbon Materials

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

### Reactive Extrusion: Advances at the Nexus of Polymer Processing, Materials Technology & Green Chemistry

#### Energy, Food & Packaging Development

Sponsored by CELL, Cosponsored by MPPG‡ and POLY

### Advances in Polysaccharides: Practice & Applications

#### Preparation, Characterization & Applications

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG‡, PMSE and POLY

### Developments in the Fields of Celluloses & Lignocelluloses: In honor of Dr. Rajai Atalla

Sponsored by CELL, Cosponsored by AGFD, ANYL and POLY

‡ Cooperative Cosponsorship

## PMSE

## Division of Polymeric Materials Science and Engineering

A. Tsou, M. Grunlan, B. Olsen, X. Jia and C. Snyder, Program Chairs

### OTHER SYMPOSIA OF INTEREST:

**Advanced Materials & Technologies for Solar Energy Conversion & Storage** (see ENFL, Sun, Mon, Tue)

**Bio-based Gels & Porous Materials** (see CELL, Wed, Thu)

**Contributions of IBM Almaden to Polymer Science** (see POLY, Sun, Mon)

**Next Generation Smart Materials** (see POLY, Sun, Mon, Tue, Wed, Thu)

**Polymer Applications & Characterization in the Biomedical Industry** (see POLY, Sun, Tue)

**Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications** (see POLY, Tue, Wed, Thu)

### SOCIAL EVENTS:

Reception, 5:30 PM: Wed

### BUSINESS MEETINGS:

Executive Committee Meeting, 4:30 PM: Sun

Business Meeting, 5:00 PM: Mon

## SUNDAY MORNING

### Section A

Moscone Center  
Esplanade Ballroom 303

#### Young Investigator's Symposium

Cosponsored by DAC<sup>†</sup>

Financially supported by Sigma-Aldrich, IBM, Solvay, Henkel, Tosoh, JACS, ACS Central Science, Chemistry of Materials, ACS Nano, Macromolecules, ACS Macro Letters, Chem (Cell Press)

L. Campos, J. M. Garcia, Organizers

W. Gutekunst, A. Obermyer, Presiding

**9:00 PMSE 1.** Organic polymer chemistry in the context of novel processes. J.M. Desimone

**9:30 PMSE 2.** Design of hydrogel-based synthetic extracellular matrix mimics for fundamental studies of disease and regeneration. A.M. Kloxin

**10:00 PMSE 3.** Cartilage tissue engineering: Using soft material scaffolds. G. O'Connell

**10:30** Intermission.

**10:45 PMSE 4.** Piezo-chemical mediated ATRP via mechanical energy for self-improving materials. A.P. Esser-Kahn, H. Mohapatra, E. Sanders

**11:15 PMSE 5.** Dynamic and user-programmable biomaterials for 4D cell culture. J.A. Shadish, L. Liu, C.A. DeForest

**11:45 PMSE 6.** Better together: Biomaterial manufacturing with microbial consortia. M.A. O'Malley

### Section B

Moscone Center  
Esplanade Ballroom 304

#### ACS Award in Applied Polymer Science: Symposium in honor Zhenan Bao

##### Polymer Synthesis

Cosponsored by WCC

Financially supported by Chemistry of Materials (ACS Journal), Corning Inc., MilliporeSigma

Q. Lin, E. Reichmanis, Organizers, Presiding

**8:30** Introductory Remarks.

**8:40 PMSE 7.** Precisely functionalized molecular nanoparticles are unique elements for macromolecular science: From nanoatoms to giant molecules. S.Z. Cheng

**9:10 PMSE 8.** Staging delivery nanomaterial approaches to address short and long term healing. P.T. Hammond

**9:40 PMSE 9.** Vanishing polymers: Polymer systems designed to fail. C.K. Ober, A. Leonard, K. Camera

**10:10** Intermission.

**10:30 PMSE 10.** Side chains in conjugated polymers: Designing beyond solubility. J.R. Reynolds

**11:00 PMSE 11.** Polymeric semiconductor for high-performance field-effect transistor and circuit. Y. Liu

**11:30 PMSE 12.** Synthesis, processing and function of coplanar  $\pi$ -conjugated organic polymers. L. Fang

### Section C

Moscone Center  
Esplanade Ballroom 305

#### General Papers/New Concepts in Polymeric Materials

M. Grunlan, Organizer

R. Baumgartner, K. C. DeMella, Presiding

**8:30 PMSE 13.** Functional polyesters for heat triggered norbornene thermosets. R. Baumgartner, K. Ryba, Z. Song, R. Wang, K. Harris, J.S. Katz, J. Cheng

**8:50 PMSE 14.** Structured polymeric microparticles via aerosol cationic photopolymerization. M. Bazzano, R. Pisano, M. Woerner, S. Marco

**9:10 PMSE 15.** Improving spin-cast epoxy telescope mirrors with spiro orthocarbonates, polyhedral oligomeric silsesquioxanes, and functionalized multi-walled carbon nanotubes. K. Brodhacker

**9:30 PMSE 16.** Raman-active polymer dots for live cell imaging. S. Brucks, F. Hu, W. Min, L. Campos

**9:50 PMSE 17.** Graphene as nanofiller: Tailoring the functionality for use in polymer nanocomposites. L. Burk

**10:10** Intermission.

**10:25 PMSE 18.** Polyisobutylene oligomers as tools for nanoparticle solubilization. C. Chao, P. Manyam, N. Riaz, R. Khanoyan, S. Madrahimov, D.E. Bergbreiter

**10:45 PMSE 19.** Hybrid double network hydrogels with high strength and toughness. H. Chen, Q. Chen, F. Yang, K. Chu, R. Hu, M. Zhang, B. Ren, J. Zheng

**11:05 PMSE 20.** Exploring the use of metalized nanocellulose in the supporting layer of polysulfone forward osmosis membranes: A water reclamation approach. P.E. Cruz Tato, L. Santiago-Martoral, K. Vega, E.O. Ortiz Quiles, E. Nicolau

**11:25 PMSE 21.** Functionalized polymer foam sorbents for oil spill remediation. E. Barry, A. Mane, J. Libera, J. Elam, S.B. Darling

**11:45 PMSE 22.** Photoresponsive multi-compartment capsules for controlled release. K.C. DeMella, S.R. Raghavan

### Section D

Moscone Center  
Esplanade Ballroom 306

#### Janus Particles: Synthesis, Characterization & Applications

Cosponsored by COLL and MPPG<sup>†</sup>

S. Bon, D. Lee, S. Sacanna, Organizers

E. Pentzer, Organizer, Presiding

D. Watkins, Presiding

**9:00 PMSE 23.** Responsive Janus particles. T.M. Swager

**9:30 PMSE 24.** Gram-scale synthesis of magnetic-semiconductor Janus nanoparticles: Ramifications for colloidal polymers. N.G. Pavlopoulos, N. Pinna, K. Char, J. Pyun

**10:00 PMSE 25.** Fabrication and characterization of Golf-ball shaped microparticles based on the biodegradable polymers. K. Cho, S. Yoon, J. Yim

**10:30** Intermission.

**10:50 PMSE 26.** Synthesis of monodisperse bicompartmentalized amphiphilic Janus microparticles for tailored assembly at oil-water interface. J. Kim

**11:20 PMSE 27.** Programmable self-assembly of 3-dimensional structures from micron-scale units. B. Cassidy, W. Glazener, K. Li, M. Li, C. Jung, A.D. Ellington, C.G. Willson

**11:40 PMSE 28.** Shear-induced alignment of Janus particle lamellar structures. R.A. DeLaCruz-Araujo, D. Beltran-Villegas, R.G. Larson, U.M. Cordova-Figueroa

### Section E

Moscone Center  
Esplanade Ballroom 307

#### 1D Nanomaterials: Synthesis, Assembly, Properties & Applications Polymer-Based

S. B. Darling, J. Hahn, Organizers, Presiding

**8:00 PMSE 29.** Gene regulation via co-assembled, noncationic DNA-polymer conjugates. D. Wang, F. Jia, X. Lu, X. Cao, X. Tan, K. Zhang

**8:20 PMSE 30.** Nanostructured films for therapeutic delivery and wound healing. T. Desai

**8:50 PMSE 31.** Optically active protein films inspired by cephalopods. E. Leung, L. Phan, A.A. Gorodetsky

**9:10 PMSE 32.** Tetrazine mediated drug delivery. J. Geng, K. Neumann, S. Jain, M. Bradley

**9:30 PMSE 33.** Investigating the dynamics of self-assembling cyclic peptide-polymer nanotubes. J.Y. Rho, J. Brendel, S. Perrier

**9:50** Intermission.

**10:05 PMSE 34.** Functional nanofibrous materials: Controllable fabrication and applications. B. Ding

**10:25 PMSE 35.** Microwave structured polyamide-6 nanofiber/net membrane embedded with poly(m-phenylene isophthalamide) staple fibers for ultrafine particle filtration. H. Liu, S. Zhang, L. Liu, J. Yu, B. Ding

**10:45 PMSE 36.** Bio-inspired nano-structured polymer thin films via self-assembly of magnetic nanoparticles. A. Karim, I.J. Zvonkina

**11:05 PMSE 37.** Preparation and characterization of antimicrobial fibrous membranes based on polyhydroxybutyrate. X. Ren, X. Fan, T. Huang

**11:25 PMSE 38.** Tunable peptide constructs for systematically controlling the structure and assembly of chiral gold nanoparticle single helices. S. Mokashi Punekar, A. Merg, N.L. Rosi

### Section F

Moscone Center  
Esplanade Ballroom 308

#### Nanoscale Spectroscopic Characterization of Catalysts & Polymers

##### NMR-Based Methods

Financially supported by Anasys Instruments, Bruker BioSpin, Bruker Nano, ExxonMobil Chemical Company, Neaspec

D. Yablon, Organizer

J. Rapp, Organizer, Presiding

**8:30 PMSE 39.** Atomic-scale characterization of catalytic materials by advanced solid-state NMR methods. T. Kobayashi, F.A. Perras, M. Pruski

**9:00 PMSE 40.** Understanding nanoscopic interfaces in tapered copolymers and their impact on macroscopic properties. J.L. White, A. Clough, J. Kelsey, J.J. Zhou

**9:30 PMSE 41.** Model, fumed silica-supported catalysts: Characterization and performance. M. Afeworki, P. Brant

**10:00** Intermission.

**10:10 PMSE 42.** Solid-state NMR characterization of rare-earth nanoparticles. D.A. Hirsh, B. Richard, N. Johnson, A. Ritcey, F. Van Veggel, R.W. Schurko

**10:40 PMSE 43.** Early time kinetics and mechanisms of polymerization reactions by hyperpolarized NMR. C. Chen, W. Shih, C. Hilty

**11:10 PMSE 44.** Structure and dynamics at interfaces in hybrid materials. U. Scheler

### Section G

Moscone Center  
Esplanade Ballroom 309

#### General Papers/New Concepts in Polymeric Materials

M. Grunlan, Organizer

M. J. Derry, L. E. Hanzly, Presiding

**8:30 PMSE 45.** Shear-induced alignment of diblock copolymer worm gels. M.J. Derry, O. Mykhaylyk, S.P. Armes

**8:50 PMSE 46.** Combining spray and atmospheric plasma deposition of transparent bilayer protective coatings on plastics for exceptional adhesion and hardness. Y. Ding, S. Dong, D. He, Z. Zhao, R. Dauskardt

**9:10 PMSE 47.** Withdrawn.

**9:30 PMSE 48.** Dual precursor atmospheric plasma deposition of organosilicate transparent functional coating on plastics. S. Dong, Y. Ding, D. He, Z. Zhao, R. Dauskardt

**9:50 PMSE 49.** Manipulating ordering and alignment in nanostructured thin films by combining substrate and solvent annealing effects. T.H. Epps, C.K. Shelton

**10:10** Intermission.

**10:25 PMSE 50.** Harnessing the interaction between surfactant and catalyst to control ATRP in dispersed media. M. Fantin, Y. Wang, P. Chmielarz, F. Lorandj, K. Matyjaszewski

**10:45 PMSE 51.** Metal coordination complexes in mechanically responsive systems. K. Hall, M.H. Horst, S.W. Telford, K.J. Franz

**11:05 PMSE 52.** Helical lipopeptide with enhanced antimicrobial activity. Z. Han, M. Xiong, J. Cheng

**11:25 PMSE 53.** Protein self-assembly in polar polymer environments of varying viscosity. L.E. Hanzly, J.R. Barone

#### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

Sponsored by PROF, Cosponsored by ANYL<sup>‡</sup>, BIOL<sup>‡</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>‡</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>‡</sup>, POLY, PRES<sup>‡</sup> and WCC

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>‡</sup> and PMSE

#### Separation of Macromolecules & Particulates

Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE

#### Incorporating Polymer Science into the Classroom

#### Undergraduate Curriculum

Sponsored by POLY, Cosponsored by CHED, MPPG<sup>‡</sup> and PMSE

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

#### Contributions of IBM Almaden to Polymer Science

Sponsored by POLY, Cosponsored by PMSE

### SUNDAY AFTERNOON

#### Section A

Moscone Center  
Esplanade Ballroom 303

#### Young Investigator's Symposium

Cosponsored by DAC<sup>‡</sup>

Financially supported by Sigma-Aldrich, IBM, Solvay, Henkel, Tosoh, JACS, ACS Central Science, Chemistry of Materials, ACS Nano, Macromolecules, ACS Macro Letters, Chem (Cell Press)

L. Campos, J. M. Garcia, *Organizers*

V. Piunova, J. Qin, *Presiding*

**1:30 PMSE 54.** Doing more with controlled radical polymerization. C.J. Hawker

**2:00 PMSE 55.** Polymeric nanomaterials for tailoring the functions of the cellular glycocalyx. K. Godula

**2:30 PMSE 56.** Shaping the future of polymer molecular weight distributions. B.P. Fors

**3:00 PMSE 57.** Rational synthesis of semiconductor fragments. R.S. Klausen

**3:30** Intermission.

**3:45 PMSE 58.** Design and development of negative photochromic systems. J. Read De Alaniz

**4:15 PMSE 59.** Orthogonally responsive small molecule dyes in polymer films: Data storage in 0, 1, 2, 3. P. Wei, B. Li, A.C. de Leon, E. Pentzer

**4:45 PMSE 60.** Ultrafast gelation of injectable reactive microgels: The power of TAD click chemistry. R. Absil, S. Çakir, R. Teixeira, G. Rivero, S. Gabriele, P. Dubois, C. Barner-Kowollik, F.E. Du Prez, L.M. Mespouille

#### Section B

Moscone Center  
Esplanade Ballroom 304

#### ACS Award in Applied Polymer Science: Symposium in honor Zhenan Bao

#### Advances in Organic Solar Cells

Cosponsored by WCC

Financially supported by Chemistry of Materials (ACS Journal), Corning Inc., MilliporeSigma

Q. Lin, E. Reichmanis, *Organizers, Presiding*

**1:30 PMSE 61.** New polymers and synthetic strategies to polymers for photovoltaic and perovskite solar cells. A. Facchetti

**2:00 PMSE 62.** Development of organic semiconducting polymers: Toward real applications. M. He, W. Niu, J.R. Matthews, A. Wallace

**2:30 PMSE 63.** Benzotriazole: A versatile building block for conjugated polymers based solar cells. W. You

**3:00** Intermission.

**3:30 PMSE 64.** Ternary organic solar cells. T.P. Russell

**4:00 PMSE 65.** Melt-processable complementary semiconducting polymer blends for organic electronics. J. Mei

**4:30 PMSE 66.** Graphene-polymer and nanocarbon-polymer composites for cellular mechanics and wireless, wearable sensors. D.J. Lipomi

**5:00 PMSE 67.** Single crystal Rubrene: Tested and proven. A.L. Briseno

#### Section C

Moscone Center  
Esplanade Ballroom 305

#### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

J. N. Lo, K. P. Mineart, *Presiding*

**1:30 PMSE 68.** Post-printing functionalization of radiopaque amino acid based poly(ester urea)s. S. Li, Y. Xu, M. Becker

**1:50 PMSE 69.** CO<sub>2</sub>-responsive poly(N,N-dimethylaminoethyl methacrylate) hydrogels with fast responsive rate. X. Li, R. Xie, Z. Jia, X. Ju, W. Wang, Z. Liu, L. Chu

**2:10 PMSE 70.** Eliminating porosity in benzoxazine thermosets. J.N. Lo, X. Zhang, T.J. Williams, S. Nutt

**2:30 PMSE 71.** Electrochemically mediated ATRP on non-Pt electrodes, in organic and aqueous media. F. Lorandj, M. Fantin, A. Ahmed Isse, A. Gennaro

**2:50 PMSE 72.** Thiol-ene networks for triplet-triplet annihilation. J. Lott, A. Jentsch, B. Davis

**3:10** Intermission.

**3:25 PMSE 73.** Chiral self-assembly of achiral  $\pi$ -conjugated polyelectrolytes induced by hyaluronic acid. P. Manandhar, T. Vokata, J. Moon

**3:45 PMSE 74.** Solvent stable electrospun membranes developed through ultraviolet induced reactive electrospinning. M.F. Mehmood, N.P. Guile, S. Marco, P. Mallon

**4:05 PMSE 75.** Novel surface grafting chemistries for the functionality manipulation of composite separation membranes. J. Meng

**4:25 PMSE 76.** Hybrid stealth liposomes via incorporation of cholesterol-functionalized diblock copolymers. K.P. Mineart, S. Venkataraman, Y. Yang, J. Hedrick, V. Prabhu

**4:45 PMSE 77.** Enhancement of sulfonated polyphenylene properties as a proton conducting membrane by blending with novel polysulfone-base polymer. B. Motealleh, T.D. Largier, C.J. Cornelius

#### Section D

Moscone Center  
Esplanade Ballroom 306

#### Janus Particles: Synthesis, Characterization & Applications

Cosponsored by COLL and MPPG<sup>‡</sup>

S. Bon, E. Pentzer, S. Sacanna, *Organizers*

D. Lee, *Organizer, Presiding*

L. Bradley, *Presiding*

**1:30 PMSE 78.** External-field induced propulsion of particles with broken symmetry. N. Wu

**2:00 PMSE 79.** UV-triggered decoration of Janus micro/nano particles. N. Razza, S. Marco

**2:20 PMSE 80.** Controlling morphology and nanoparticle location within hybrid polymer-inorganic Janus particles using flash nanoprecipitation. V. Lee, C. Sosa, R. Liu, R.K. Prudhomme, R.D. Priestley

**2:40 PMSE 81.** Propulsion of metal-iodidelectric Janus particles by contact charge electrophoresis. K. Bishop, Y. Dou, C. Cartier, W. Fei, S. Pandey, S. Razavi, I. Kretzschmar

**3:10** Intermission.

**3:30 PMSE 82.** Self-assembly and reconfiguration of Janus ellipsoids at high concentrations. M.J. Solomon, S. Razavi, Y. Liu

**4:00 PMSE 83.** Synthesis of highly tailorable nanoparticle combinatorial libraries. J. Hedrick, P. Chen, E.J. Kluender, B. Meckes, C.A. Mirkin

**4:20 PMSE 84.** Synthesis, self-assembly and collective behaviors of asymmetric motile rodlike colloids. Y. Yang, A. Gyedu, K. Liu, Z. Nie

#### Section E

Moscone Center  
Esplanade Ballroom 307

#### 1D Nanomaterials: Synthesis, Assembly, Properties & Applications Polymer-Based

S. B. Darling, J. Hahn, *Organizers, Presiding*

**1:00 PMSE 85.** PVA silica composite nanofibers via sol gel electrospinning. T. Pirzada, S. Arvidson, C.D. Saquing, S. Shah, S.A. Khan

**1:20 PMSE 86.** Mesoporous block copolymer nanofibers by selective swelling. X. Shi, Y. Wang

**1:50 PMSE 87.** Electrospun nanofibrous materials for CO<sub>2</sub> capture. X. Wang, B. Ding, J. Yu

**2:10 PMSE 88.** Electrospun nanofiber composite as proton exchange membrane for fuel cell. B. Motealleh, F. Huang, T.D. Largier, C.J. Cornelius

**2:30 PMSE 89.** Programming the orientation of carbon nanotubes in liquid crystalline elastomers. T. Guin, A.D. Auguste, B. Kowalski, V. Tondiglia, T.J. White

**2:50** Intermission.

**3:05 PMSE 90.** Development and studies of DBfA/DfA block copolymers for optoelectronics. S.S. Sun, M. Hasib, T.H. Nguyen

**3:25 PMSE 91.** Enticing and general strategy for 1D nanocrystals with unprecedented control over dimensions, compositions and architectures using bottlebrush-like block copolymers as nanoreactors. Z. Lin

**3:55 PMSE 92.** Multilevel structured polysulfone/polyacrylonitrile/polyamide-6 nanofiber/nets membranes for sieving airborne particles. N. Tang, S. Zhang, J. Yu, B. Ding

**4:15 PMSE 93.** Molecular design of poly(3-hexylthiophene)-graft-poly(2-vinylpyridine) copolymers to control the crystallinity for solution-assembled nanowires. Y. Kim, H. Kim, J. Kim, R.C. Hayward, B. Kim

5 dendronized polymers with increased structural perfection: Approaching  $g_{max}$  of cylindrical nano-objects. D. Messmer, D. Schlueter

<sup>‡</sup>Cooperative Cosponsorship

## Section F

Moscone Center  
Esplanade Ballroom 308

### Nanoscale Spectroscopic Characterization of Catalysts & Polymers

#### Raman & SFG

Financially supported by Anasys Instruments, Bruker BioSpin, Bruker Nano, ExxonMobil Chemical Company, Neaspec

J. Rapp, D. Yablon, *Organizers*

Z. Su, *Presiding*

**1:30 PMSE 95.** Confocal Raman microscopy of the in-situ uniaxial deformation of a polyethylene dog bone. C.R. Lopez-Barron, Y. Zeng, J. Schaefer, A. Eberle, T.P. Lodge, F.S. Bates

**2:00 PMSE 96.** Scanning angle Raman spectroscopy measurements of thin polymer films and buried polymer interfaces. E.A. Smith, J.M. Bobbitt, D. Mendivelso-Perez, C. Nyamekye

**2:20** Intermission.

**2:30 PMSE 97.** Predicting Raman spectra of condensed polymer phases from simulations. Q. Chen, S. Milner

**2:50 PMSE 98.** Spatially resolved EDS and Raman characterization of crosslinked polymeric catalysts biomass hydrolysis. M.V. Tyufekchiev, P. Duan, M.T. Timko, M. Emmert, K. Schmidt-Rohr, S. Granados Focil

**3:10 PMSE 99.** Effect of interfacial molecular orientation on power conversion efficiency of perovskite solar cell. M. Xiao, J. Jasensky, Z. Chen

## Section G

Moscone Center  
Esplanade Ballroom 309

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

J. A. Nikles, K. Olson, *Presiding*

**1:30 PMSE 100.** Genetically encoded lipid-polypeptide hybrid biomaterials. D. Mozdehi, K.M. Luginbuhl, J. Simon, M. Dzuricky, F. Huang, K.L. Buehne, N.R. Mayne, A. Chilkoti

**1:50 PMSE 101.** Withdrawn.

**2:10 PMSE 102.** High performance multistage-stage cure resins for Continuous Liquid Interface Production (CLIP). A. Nebipasagi, A.L. Quintanilla, S.J. Mecham, J. Cushen, J. Rolland, J.M. DeSimone

**2:30 PMSE 103.** Kinetics of drug release from polymer micelles. J.A. Nikles, L.N. Cobb, J.A. Gettinger, B.J. McCormick, S.M. Nikles, A.L. Glover, C.S. Brazel, D.E. Nikles

**2:50** Intermission.

**3:05 PMSE 104.** Chitosans in nano-structured films for biosensing and antimicrobial coatings. O.N. Oliveira

**3:25 PMSE 105.** Developing nonflammable perfluoropolyether electrolytes for safe lithium-ion batteries. K. Olson, M. Chintapalli, K. Timachova, J. Yin, A.C. Marschliok, E.S. Takeuchi, K.J. Takeuchi, S.J. Mecham, N.P. Balsara, J.M. Desimone

**3:45 PMSE 106.** Recruiting physisorbed water for green and bio-degradable perfluorinated surface modifications. S. Oyola-Reynoso, J. Chen, B. Chang, J. Bloch, M. Thuo

**4:05 PMSE 107.** Fluorescent block copolymer-MoS<sub>2</sub> nanohybrids for real-time photothermal heating and imaging. C. Park, B. Kim

**4:25 PMSE 108.** Functional nanogels for decoration of biointerfaces. A. Pich, A. Töpel

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>2</sup> and PMSE

#### Separation of Macromolecules & Particulates

Sponsored by POLY, Cosponsored by ANYL, COLL and PMSE

#### Incorporating Polymer Science into the Classroom

#### High School & Community College

Sponsored by POLY, Cosponsored by CHED, MPPG<sup>2</sup> and PMSE

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Cathode Materials

Sponsored by ENFL, Cosponsored by MPPG<sup>2</sup> and PMSE

#### Contributions of IBM Almaden to Polymer Science

Sponsored by POLY, Cosponsored by PMSE

#### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Homogeneous Catalysis

Sponsored by INOR, Cosponsored by PMSE

## MONDAY MORNING

### Section A

Moscone Center  
Esplanade Ballroom 303

#### Young Investigator's Symposium

Cosponsored by DAC<sup>2</sup>

Financially supported by Sigma-Aldrich, IBM, Solvay, Henkel, Tosoh, JACS, ACS Central Science, Chemistry of Materials, ACS Nano, Macromolecules, ACS Macro Letters, Chem (Cell Press)

L. Campos, J. M. Garcia, *Organizers*

J. Kalow, K. Mirica, *Presiding*

**9:00 PMSE 109.** Cancer immune therapy targeting the cell surface glycoalyx. C.R. Bertozzi

**9:30 PMSE 110.** Functional ladder materials enabled by efficient catalysis. Y. Xia

**10:00 PMSE 111.** Synthesis of polythioaminals using in-situ generated imines as reactive intermediates: Polymers for tailorable surface topology. R. Wojtecki

**10:30** Intermission.

**10:45 PMSE 112.** Convergence of high rate and selectivity in organocatalytic ring-opening polymerization. M.K. Kiesewetter, E. Kiesewetter, K. Fastnacht, S. Spink

**11:15 PMSE 113.** Block copolymers and crosslinked copolymers obtained with redox-switchable polymerization catalysts. J.A. Byers, K.R. Delle Chiaie, A.B. Biernesser, A.W. Sudyn

**11:45 PMSE 114.** Generation, stability and applications of gelified foams. C. Monteux, F. Lequeux, R. Deleurence, T. Saison

### Section B

Moscone Center  
Esplanade Ballroom 304

#### ACS Award in Applied Polymer Science: Symposium in honor Zhenan Bao

#### Novel Organic Materials

Cosponsored by WCC

Financially supported by Chemistry of Materials (ACS Journal), Corning Inc., MilliporeSigma

Q. Lin, E. Reichmanis, *Organizers, Presiding*

**8:30 PMSE 115.** Enhanced ionic conductivity of peg-containing polyimide/ionic liquid membrane upon thermal annealing. C.W. Frank, E.T. Woo, J. Lu, E. Coletta, J. Mun, A. Spakowitz, D.Y. Yoon, M. Toney

**9:00 PMSE 116.** Supramolecular free radicals. X. Zhang

**9:30 PMSE 117.** Designing functional interfaces using click chemistry. J.J. Locklin

**10:00** Intermission.

**10:30 PMSE 118.** Super-wettability based fabrication of organic functional materials. L. Jiang

**11:00 PMSE 119.** Nanostructured polymer gels as a multifunctional material platform for energy and responsive electronics. G. Yu

**11:30 PMSE 120.** Alternative architectures and polymer coupling layers for field-effect biosensors. H.E. Katz

### Section C

Moscone Center  
Esplanade Ballroom 305

#### Support & Activator Effects on Metal Mediated Polymerization

Cosponsored by CATL, INOR and MPPG<sup>2</sup>

Financially supported by ExxonMobil Chemical Company, Argonne National Laboratory

M. Delferro, *Organizer*

L. Luo, *Organizer, Presiding*

J. Severn, *Presiding*

**8:00 PMSE 121.** Methylaluminoxane as activator for olefin polymerization catalysts. W. Kaminsky

**8:25 PMSE 122.** Unexpected activation modes of constrained geometry precatalysts. J. Klosin

**8:50 PMSE 123.** Structure, function, and modelling of MAO catalyst activators. M. Bochmann, F. Ghiotto, D. Rosca, M. Linnolahti

**9:15 PMSE 124.** Actively supporting the world's strongest fiber. J. Severn

**9:40** Intermission.

**10:00 PMSE 125.** Effect of formation of ionic aggregates higher than ion pairs on the kinetics of a single olefin insertion into the Zr-C bond. C. Zuccaccia, A. Macchioni, L. Sian

**10:25 PMSE 126.** Evidence of coordinated Trimethylaluminum (TMA) in Methylaluminoxane (MAO) as the major active site and its quantification. L. Luo, A. Jain, J. Harlan

**10:50 PMSE 127.** Late transition metal sites supported on sulfated oxides for polymerization reactions. M.P. Conley

**11:15 PMSE 128.** Surface-supported and solution phase homoleptic rare earth silazido catalysts. A.D. Sadow

### Section D

Moscone Center  
Esplanade Ballroom 306

#### Janus Particles: Synthesis, Characterization & Applications

Cosponsored by COLL and MPPG<sup>2</sup>

S. Bon, D. Lee, E. Pentzer, *Organizers*

S. Sacanna, *Organizer, Presiding*

**9:00 PMSE 129.** Seeded emulsion polymerization for non-spherical particles and clickable Janus colloids. L. Bradley, W. Chen, F. Tu, K.J. Stebe, D. Lee

**9:30 PMSE 130.** Janus graphene oxide: Preparation and characterization. A.C. de Leon

**9:50 PMSE 131.** Seeing the unseen: Interrogating intracellular dynamics using Janus particles. Y. Yu

**10:20** Intermission.

**10:40 PMSE 132.** Transport of active Janus particles in geometrically-confined spaces. D. Velegol, A. Sen, S. Das, A. Garg

**11:10 PMSE 133.** Synthesis and characterization of janus linear-dendritic hybrids as next generation biomaterials. D.G. Abebe, D.L. Watkins

**11:30 PMSE 134.** Synthesis and assembly of mono-patch particles. G. Yi, S. Kim, D. Pine, S. Sacanna, J. Oh

---

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

---

## Section E

Moscone Center  
Esplanade Ballroom 307

### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd

L. Fang, J. Mei, *Organizers*

C. Di, *Organizer, Presiding*

**8:00 PMSE 135.** Polymer molecular design and processing for efficient macroscale charge transport pathways. E. Reichmanis

**8:30 PMSE 136.** Melt-processable complementary semiconducting polymer blends for organic field-effect transistors. Y. Zhao, X. Zhao, A. Gumyusenge, J. Mei

**8:45 PMSE 137.** Degradable and biocompatible conjugated polymer for solution-processed imperceptible transient electronics. T. Lei, Z. Bao

**9:05 PMSE 138.** Design and synthesis of semiconducting polymers for high-performance field-effect transistors. Y. Liu

**9:35 PMSE 139.** Room-temperature air-stable spin transport in molecular-based multipurpose spin valves. X. Sun

9:55 Intermission.

**10:15 PMSE 140.** Traps in conjugated polymers: Morphological and disorder effects. A. Salleo

**10:45 PMSE 141.** Thioxanthone derivatives and their application for OLEDs. Y. Wang

**11:05 PMSE 142.** Deep-blue light-emitting polymers containing spiro[fluorene-9,9'-thioxanthene-S,S-dioxide] isomers. F. Peng, W. Yang, Y. Cao

**11:25 PMSE 143.** Making light with light: Patterning LED pixels from solution. Z.A. Page, B. Narupai, C. Pester, D.S. Laitar, A. Sokolov, S. Mukhopadhyay, R. Bou Zerdan, A. McGrath, K. Kearns, J. Kramer, C.J. Hawker

## Section F

Moscone Center  
Esplanade Ballroom 308

### Nanoscale Spectroscopic Characterization of Catalysts & Polymers

#### Infrared-Spectroscopy-Based Methods

Financially supported by Anasys Instruments, Bruker BioSpin, Bruker Nano, ExxonMobil Chemical Company, Neaspec

J. Rapp, *Organizer*

D. Yablon, *Organizer, Presiding*

**9:00 PMSE 144.** Measuring correlated chemical composition and thermal conductivity at the nanoscale with AFM probes. A. Centrone

**9:30 PMSE 145.** Investigation of nano-domain composition in high-impact polypropylene by AFM-IR. P. Bao, Z. Su, F. Tang

10:00 Intermission.

**10:10 PMSE 146.** How do biofilms eat their food? Understanding microbiological degradation of polyurethanes at the nanoscale with AFM-IR. D. Barlow, J.C. Biffinger, C. Hung, L.J. Nadeau, T. Zicht, A.L. Crouch, J.N. Russell, W.J. Crookes-Goodson

**10:40 PMSE 147.** Nanoscale infrared spectroscopy for the chemical characterization of polymer systems. E. Dillon, C. Prater, K. Kjoller

**11:00 PMSE 148.** Nano-FTIR: Quantitative infrared imaging and spectroscopy at 10nm spatial resolution. A.J. Huber

## Section G

Moscone Center  
Esplanade Ballroom 309

### Molecular Engineering of Peptide Assembly

#### Protein Assembly

Financially supported by ACS Biomacromolecules

A. Kros, S. L. Perry, *Organizers*

H. Cui, M. V. Tirrell, *Organizers, Presiding*

8:10 Introductory Remarks.

**8:15 PMSE 149.** Self-assembled fibrils composed of protein-based polymers with silk-like domains: Multiple roles for hydrophilic side-chains. L. Beun, S. Dhayal, L. Albertazzi, M. Werten, F. de Wolf, M.C. Stuart, R. de Vries

**8:45 PMSE 150.** Self-assembly of stimulus responsive biohybrid polymers. A. Chilkoti

**9:15 PMSE 151.** Self-assembled protein-inorganic hybrid supraparticles for enzyme immobilization. W. Park, A. Caparco, J. Champion

9:45 Intermission.

**10:00 PMSE 152.** Minimal DNA length needed for the assembly of virus coat proteins. S. Maassen, M. de Ruiter, J.J. Cornelissen

**10:30 PMSE 153.** Environmental influence on assembly landscapes in protein materials. C. Chen, J. Tan, M. Hsieh, A. Rha, R. Rengifo, J. Goodwin, A. Mehta, N. Anthony, M. Grover, D.G. Lynn

**11:00 PMSE 154.** Electrostatic effects on self-assembly in protein-polymer block copolymers. B.D. Olsen, D. Chang, C. Lam, C. Mills

**11:30 PMSE 155.** Design of peptide and protein-based copolymer self-assembled biomaterials. S. Lecommandoux, E. Garanger

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

Sponsored by PROF, Cosponsored by ANYL<sup>1</sup>, BIOL<sup>1</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, IMEDI, MPPG, ORGN, PHYS, PMSE<sup>3</sup>, POLY, PRESE<sup>4</sup> and WCC

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>2</sup> and PMSE

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Flow Batteries & Organic Electrodes

Sponsored by ENFL, Cosponsored by MPPG<sup>2</sup> and PMSE

### 50th Anniversary Celebration of Macromolecules

Sponsored by POLY, Cosponsored by MPPG<sup>2</sup> and PMSE

### Contributions of IBM Almaden to Polymer Science

Sponsored by POLY, Cosponsored by PMSE

## MONDAY AFTERNOON

## Section A

Moscone Center  
Esplanade Ballroom 303

### Young Investigator's Symposium

Cosponsored by DAC<sup>2</sup>

Financially supported by Sigma-Aldrich, IBM, Solvay, Henkel, Tosoh, JACS, ACS Central Science, Chemistry of Materials, ACS Nano, Macromolecules, ACS Macro Letters, Chem (Cell Press)

L. Campos, J. M. Garcia, *Organizers*

E. A. Appel, S. A. Sydlík, *Presiding*

**1:30 PMSE 156.** Magnetically-active hybrid inorganic-organic network enzymatic disassembly of polymeric micelles. A.J. Harnoy, M. Segal, M. Buzhor, G. Slor, I. Rosenbaum, R.J. Amir

**2:00 PMSE 157.** Molecular precision and enzymatic disassembly of polymeric micelles. A.J. Harnoy, M. Segal, M. Buzhor, G. Slor, I. Rosenbaum, R.J. Amir

**2:30 PMSE 158.** Controlled synthesis of  $\pi$ -conjugated polymers. D.S. Seferos

**3:00 PMSE 159.** Influence of conjugated polymer thin-film morphology and exciton-plasmon coupling on nanophotonic light trapping and light extraction. D. O'Carroll

3:30 Intermission.

**3:45 PMSE 160.** Functional organic frameworks in solution and thin films. Y. Liu, H. Wang, S. Cai, B. He, Z. Li, J. Tian, D. Zhang

**4:15 PMSE 161.** Elastomeric and fluidic metamaterials: Towards large-area, reconfigurable metamaterials. J. Dionne

**4:45 PMSE 162.** Structural engineering of  $sp^2$  functional polymer materials at the molecular and nanoscopic scales. L. Fang

## Section B

Moscone Center  
Esplanade Ballroom 304

### ACS Award in Applied Polymer Science: Symposium in honor Zhenan Bao

#### Frontiers in Organic & Flexible Electronics

Cosponsored by WCC

Financially supported by Chemistry of Materials (ACS Journal), Corning Inc., MilliporeSigma

Q. Lin, E. Reichmanis, *Organizers, Presiding*

**1:30 PMSE 163.** How do we design organic and inorganic materials for flexible, transparent electronic circuitry? T.J. Marks

**2:00 PMSE 164.** Design and applications of dopants and acceptors for organic electronic applications. S.R. Marder

**2:30 PMSE 165.** Advances in fabrication: A discussion. J.M. Desimone

3:00 Intermission.

**3:30 PMSE 166.** Development of new electron acceptors for high efficient, non-fullerene OPV solar cells. L. Yu

**4:00 PMSE 167.** Approaches to sustainable materials and processes for flexible electronics. G. Zhang, B. Risteen, P. Chu, E. Reichmanis

**4:30 PMSE 168. Award Address** (ACS Award in Applied Polymer Science sponsored by Eastman Chemical Company). Skin-inspired polymer electronic materials. Z. Bao

## Section C

Moscone Center  
Esplanade Ballroom 305

### Support & Activator Effects on Metal Mediated Polymerization

Cosponsored by CATL, INOR and MPPG<sup>2</sup>

Financially supported by ExxonMobil Chemical Company, Argonne National Laboratory

M. Delferro, L. Luo, *Organizers*

R. L. Kuhlman, S. L. Scott, *Presiding*

**1:00 PMSE 169.** Single site catalysis: How to avoid co-catalysts in polymerization. J.M. Basset, J. Pelletier

1:25 PMSE 170. Withdrawn.

**1:50 PMSE 171.** Activator effects in ATRP. K. Matyjaszewski

**2:15 PMSE 172.** Impact of silica structure on the distribution of activator on supported catalyst particles. X. Ye

2:40 Intermission.

**3:00 PMSE 173.** C-H activation and olefin insertion of Cp<sup>Alky</sup>Hf(IV)-complexes observed by NMR and mass spec during olefin polymerization. R.L. Kuhlman, A. Gies, L. Tensi, C. Zuccaccia, A. Macchioni

**3:25 PMSE 174.** Keltan ACE™ technology: Activation of post-metallocene EPDM polymerization catalysts. G. van Doremale, M. Valla, R. Bernardo, A. Berthoud

**3:50 PMSE 175.** Group 4 complexes in the homopolymerization and copolymerization of olefins. M.S. Eisen

**4:15 PMSE 176.** New insights into activating metallocene catalysts for olefin polymerization. C.G. Blakley, M.G. Thorn, S.P. Diefenbach

## Section D

Moscone Center  
Esplanade Ballroom 306

### Janus Particles: Synthesis, Characterization & Applications

Cosponsored by COLL and MPPG<sup>2</sup>

D. Lee, E. Pentzer, S. Sacanna, *Organizers*

S. Bon, *Organizer, Presiding*

A. V. Zhukhovitskiy, *Presiding*

**1:30 PMSE 177.** Design and assembly of asymmetrically functionalized particles via digital alchemy. S.C. Glotzer, G. Van Anders

**2:00 PMSE 178.** Catalytic propulsion and magnetic steering of soft, patchy microcapsules: Ability to pick-up and drop-off microscale cargo. S.R. Raghavan, A. Lu

**2:20 PMSE 179.** Emerging concepts in colloidal self-assembly: Rapid prototyping 3D DNA origami and self-sorting systems. A. Walther

2:50 Intermission.

<sup>‡</sup>Cooperative Cosponsorship

- 3:10 PMSE 180.** Interfacial polymerization on dynamic complex colloid: Creating stabilized Janus droplets upon external perturbation. Y. He, S. Savagatrup, T.M. Swager
- 3:30 PMSE 181.** Janus polymersomes. L. Ruiz-Perez, C. Contini, G. Battaglia
- 3:50 PMSE 182.** Asymmetric polymersomes for active delivery to the brain by chemotaxis. G. Battaglia

## Section E

Moscone Center  
Esplanade Ballroom 307

### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd

C. Di, J. Mei, *Organizers*

L. Fang, *Organizer, Presiding*

- 1:30 PMSE 183.** Three-dimensional, porous conjugated polymers for photocatalytic hydrogen production. L. Yu
- 2:00 PMSE 184.** Electroactive polymers for advanced energy storage devices: From synthesis to engineering. Y. Kim, W. Abousamra, D. Yang, O. Melton, J. Jung, S. Besic, M. Birschbach, V. Ebron, R. Mercado, P.J. Kinlen, H. Nguyen
- 2:20 PMSE 185.** Withdrawn.
- 2:35 PMSE 186.** Synthesis of long-chain acrylate copolymers for ultra-sensitive temperature sensors with wide range tunability. F. Daigle, K. Yang, J. Reeder, H. Handley, J. Elliott, W. Voit
- 2:50 PMSE 187.** Nanoconfined polymer electrolytes for rechargeable thin film lithium-ion batteries. Z. Zhang, J. Ding, K. Yager, B. Ocko, F. Fisher, C. Black

**3:05** Intermission.

- 3:25 PMSE 188.** Materials for 3rd-generation solar cells based on singlet fission. L. Campos
- 3:55 PMSE 189.** Organic thin-film transistors with functionalized surface for biosensing applications. H. Shen, C. Di, D. Zhu
- 4:10 PMSE 190.** Higher hole mobility in lower-crystallinity conjugated polymers and their application to energy devices. T. Park
- 4:25 PMSE 191.** Solution-processed nanoporous organic semiconductor thin films for health and environmental monitoring. F. Zhang, G. Qu, E. Mohammadi, J. Mei, Y. Diao
- 4:40 PMSE 192.** Promising new dielectric polymers for pulsed-power high energy density capacitors using the process of rational co-design. G.A. Sozting

## Section F

Moscone Center  
Esplanade Ballroom 308

### Nanoscale Spectroscopic Characterization of Catalysts & Polymers

#### Infrared-Spectroscopy-Based Methods

Financially supported by Anasys Instruments, Bruker BioSpin, Bruker Nano, ExxonMobil Chemical Company, Neaspec

J. Rapp, D. Yablon, *Organizers*

P. Bao, *Presiding*

- 1:30 PMSE 193.** Ultra-broadband synchrotron infrared nano-spectroscopy and imaging. H.A. Bechtel, M.C. Martin, E. Muller, O. Khatib, M.B. Raschke
- 2:00 PMSE 194.** Joint nanoscale chemical-sensitive infrared imaging and mechanical property mapping of polymers at sub 20 nm spatial resolution. X. Xu, L. Wang, H. Wang
- 2:30** Intermission.

**2:40 PMSE 195.** Characterization of metastable crystalline polymorphs in electrospun polymer nanofibers using AFM-IR spectroscopy and Selected Area Electron Diffraction (SAED). J.F. Rabolt

**3:10 PMSE 196.** Developing predictive tools for onset of damage in polymer composite: Experimental insights on chemical network structure of epoxy system and its influence on mechanical performance. D. Nepal, J. Chalker, E. Mungall, G.S. Kedziora, A. Ecker, B. Rooths, J. Ryan, S. Barr, J. Moller, C. Kirkham, R.J. Berry, T. Breitzman

**3:30 PMSE 197.** Withdrawn.

## Section G

Moscone Center  
Esplanade Ballroom 309

### Molecular Engineering of Peptide Assembly

#### Drug Delivery

Financially supported by ACS Biomacromolecules

H. Cui, M. V. Tirrell, *Organizers*

A. Kros, S. L. Perry, *Organizers, Presiding*

- 1:30 PMSE 198.** Intra- and extra-cellular manipulation of cell signaling using elastin-like polypeptides. Z. Li, D. Tyrpak, M. Park, C. Lee, A. Kouhi, J. Dhandhukia, S. Hamm-Alvarez, C. Okamoto, J.A. MacKay
- 2:00 PMSE 199.** Organelle-specific subcellular delivery using mitochondria-penetrating peptides. S.O. Kelley
- 2:30 PMSE 200.** Dual-ligand peptide-functionalized liposomes targeting  $\alpha_v\beta_3$  and  $\alpha_5\beta_1$  integrins enhance gene delivery and selectivity to cancer cells. R.M. Levine, E. Kokkoi
- 3:00** Intermission.
- 3:15 PMSE 201.** Shape-changing drug carriers programmed with peptides for tissue targeting. N.C. Gianneschi
- 3:45 PMSE 202.** Enzyme-cleavable peptide amphiphiles enhance intracellular delivery. H. Acar, M.R. Schnorenberg, J.L. LaBelle, M.V. Tirrell
- 4:15 PMSE 203.** Rational design of peptide hydrogels for sustained drug delivery. R. Hoogenboom, A. Madder, S. Ballet

**4:45 PMSE 204.** Drug-bearing supramolecular filament hydrogels. H. Cui

### Industrial Innovations in Polymer Chemistry

Sponsored by POLY, Cosponsored by MPPG<sup>2</sup> and PMSE

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

Sponsored by PROF, Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>1</sup>, POLY, PRES<sup>2</sup> and WCC

### ACS Award in Industrial Chemistry: Symposium in honor of Jane Frommer

Sponsored by I&EC, Cosponsored by ANYL, BIOL, COLL, INOR, ORGN, PMSE and POLY

### Advanced Materials & Technologies for Solar Energy Conversion & Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>2</sup> and PMSE

### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Capacitors

Sponsored by ENFL, Cosponsored by MPPG<sup>2</sup> and PMSE

### 50th Anniversary Celebration of Macromolecules

Sponsored by POLY, Cosponsored by MPPG<sup>2</sup> and PMSE

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

### Supported Organometallics & Heterogeneous Catalysis

Sponsored by INOR, Cosponsored by PMSE

### Undergraduate Research Posters Polymer Chemistry

Sponsored by CHED, Cosponsored by PMSE, POLY and SOGED

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

M. Grunlan, *Organizer*

**8:00 - 10:00**

**18, 27, 29, 44, 53, 69, 78, 80, 83, 89, 94, 98, 121, 128-130, 180-181, 202.** See previous listings.

**206, 212, 229, 267, 270, 299, 303, 476-477, 479, 483, 488, 496, 500, 509, 511, 513, 515, 523, 532, 538, 549, 555, 557, 560, 568, 579, 584, 585, 602, 608, 611, 630-632, 635, 643, 659, 663, 688-690.** See subsequent listings.

### Innovating Materials for the Next Generation: Bringing Practical Applications into the Chemistry Classroom

Sponsored by CHED, Cosponsored by PMSE, POLY and RUBB

## TUESDAY MORNING

### Section A

Moscone Center  
Esplanade Ballroom 303

### Biomaterials for Immunotherapy

Z. Gu, D. J. Irvine, *Organizers*

H. Cheng, *Organizer, Presiding*

C. Jewell, Z. Liu, *Presiding*

**8:30 PMSE 205.** Lymph node-targeted delivery of vaccines for cancer prophylaxis and synergistic cancer immunotherapy. X. Chen, G. Zhu

**9:00 PMSE 206.** Engineering nanomaterial morphology to enhance immunotherapeutic strategies. S. Yi, S. Allen, N. Karabin, Y. Liu, E.A. Scott

**9:30 PMSE 207.** Ex vivo engineered immune organoids for controlled differentiation of germinal center-like B cells. A. Singh

**10:00** Intermission.

**10:15 PMSE 208.** Targeted polymeric nanoparticles: From discovery to clinical trials. O.C. Farokhzad

**10:45 PMSE 209.** Discovery and early clinical development of Synthetic Vaccine Particles (SVP) to induce antigen-specific immune tolerance. K. Kishimoto

**11:15 PMSE 210.** Novel polysaccharide carrier for vaccine adjuvant CpG-DNA for cancer immunotherapy. K. Sakurai, N. Miyamoto, S. Mochizuki

**11:45 PMSE 211.** Engineered polymer nanogels for lymph node restricted immune activation. B. De Geest

### Section B

Moscone Center  
Esplanade Ballroom 304

### Polymers under Deformation

### Structure & Morphology Changes during Deformation of Polyolefins & Polymer Composites

Cosponsored by MPPG<sup>2</sup> and POLY<sup>2</sup>

Financially supported by Asylum Research, ExxonMobil Chemical Company

A. I. Norman, D. Yablon, *Organizers*

Y. Gao, *Presiding*

**8:30 PMSE 212.** Deformation of amorphous, semi crystalline, and segmented polyolefin elastomers. S. Datta

**9:00 PMSE 213.** Tensile deformation mechanism of propylene-ethylene random copolymer. J. Zhao, Y. Sun, Y. Men

**9:30 PMSE 214.** Nanohybrid Shish-Kebab (NHSK) structure in composites of Poly(Ethylene Terephthalate) (PET) and Multiwall Carbon Nanotubes (MWCNTs). E.L. Heeley, D. Hughes, E. Crabb, J. Bowen, O. Bikondo, B. Mayoral, T. McNally

**10:00** Intermission.

**10:10 PMSE 215.** Polymer chain stretching during uniaxial deformation: An *in-situ*, time-resolved SANS study in polymer melts. C. Lopez-Barron, J. Richards, Y. Zeng

**10:40 PMSE 216.** Shear induced crystallization of bimodal and unimodal high density polyethylene. Y. Zhang, A.I. Norman, J. Throckmorton, A.K. Doufas, A.H. Tsou, B.S. Hsiao

**11:10 PMSE 217.** Observations of unfolding for isotactic polypropylene under uniaxial stretching by solid-state NMR. T. Miyoshi

### Section C

Moscone Center  
Esplanade Ballroom 305

#### Support & Activator Effects on Metal Mediated Polymerization

*Cosponsored by CATL, INOR and MPPG<sup>‡</sup>*

*Financially supported by ExxonMobil Chemical Company, Argonne National Laboratory*

L. Luo, *Organizer*

M. Delferro, *Organizer, Presiding*

**8:00 PMSE 218.** Influence of ligand structures on chromium alkene oligomerization catalysts. T. Wambach, T.D. Tilley

**8:25 PMSE 219.** Examination of nascent polyolefin structure formed during polymerization on supported Zeigler-Natta and metallocene catalysts. P. Brant

**8:50 PMSE 220.** Amorphous silica as a support and activator of chromium-based catalysts for olefin polymerization. S.L. Scott, A. Fong, Y. Wang, B. Peters, A.E. Stiegman

**9:15 PMSE 221.** Controlling active site formation for supported metallocene catalysts. K.M. Clark, A. Hock, B. Liu, W.B. Beaulieu, G.L. Glass

9:40 Intermission.

**10:00 PMSE 222.** Bimetallic effects in Ni-catalyzed ethylene polymerization catalysis. I. Tonks, A.J. Smith, H. Chiu, R.J. Hue, E.D. Kalkman

**10:25 PMSE 223.** Single-site(s) or not single-site(s): That is the question. C. Coperet

**10:50 PMSE 224.** Alkali cations as leading actors in olefin polymerization catalysis. L. Do, Z. Cai, D. Xiao

**11:15 PMSE 225.** Toward green olefin metathesis: Homogeneous polymer-supported ruthenium catalysts. H. Bazzi

### Section D

Moscone Center  
Esplanade Ballroom 306

#### Innovations in Drug Delivery Systems & Combination Products

##### Controlled Release

A. S. Kulshrestha, S. Sridharan, *Organizers, Presiding*

**8:30 PMSE 226.** Withdrawn.

The use of any device to capture images (e.g., cameras and camera phones) or sound (e.g., tape and digital recorders) or to stream, upload or rebroadcast speakers or presentations is strictly prohibited at all official ACS meetings and events without express written consent from ACS.

**8:55 PMSE 227.** Small molecule responsive nanostructures for controlled drug delivery. K. Neumann, S. Jain, J. Geng, M. Bradley

**9:20 PMSE 228.** Telodendrimers: A unique platform for engineering macromolecules based nanocarriers for tailored drug delivery. A.K. Kakkar

**9:45 PMSE 229.** Well-defined targeted polymer-taxane produgs. B. De Geest, B. Louage

10:10 Intermission.

**10:20 PMSE 230.** Sutureless wound closure with covalent controlled release for local drug delivery: Therapeutic methacrylate adhesives. Z. Wright, B. Holt, S.A. Sydlík

**10:45 PMSE 231.** Electrically induced controlled release from biopolymer capsules. A. Gargava, S.R. Raghavan

### Section E

Moscone Center  
Esplanade Ballroom 307

#### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

*Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd*

C. Di, L. Fang, J. Mei, *Organizers*

D. Lipomi, *Presiding*

**8:00 PMSE 232.** High efficiency non-fullerene polymer solar cells. S.A. Jenekhe

**8:30 PMSE 233.** Molecular engineering on conjugated side chains for high performance polymer photodetectors and solar cells. Y. Liang

**8:50 PMSE 234.** All-polymer solar cells based on conjugated perylene diimide polymer acceptors. Y. Guo, Y. Li, H. Yan, D. Zhao

**9:20 PMSE 235.** Highly efficient thick-film polymer solar cells. J. Chen

**9:40 PMSE 236.** Solution-processable molecular donors & acceptors for efficient bulk-heterojunction solar cells. P. Beaujuge

10:00 Intermission.

**10:20 PMSE 237.** Optimized alloy-parallel morphology of ternary organic solar cells. W. Ma

**10:50 PMSE 238.** Lead perovskite formation and its application for solar cell. Y. Guo

**11:10 PMSE 239.** Characterization of charge transport networks in non-fullerene bulk-heterojunction thin films. M. Roders

**11:25 PMSE 240.** Multiscale simulation of solution phase behavior during organic solar cell processing. F.L. Lee, A.B. Farimani, K.L. Gu, H. Yan, Z. Bao, V.S. Pande

**11:40 PMSE 241.** Impact of fluorination in non-fullerene acceptor organic photovoltaics. N. Bauer, Q. Zhang, X. Zhan, W. You

### Section F

Moscone Center  
Esplanade Ballroom 308

#### Cooperative Research Award: Symposium in honor of Paul A. Kohl & Edmund Elce

S. C. Jana, E. Reichmanis, *Organizers, Presiding*

**8:30 PMSE 242.** Molecular engineering of anion exchange membranes for fuel cell technology application. C. Bae

**9:00 PMSE 243.** Nanocellulose thin films and nanocellulose aerogels. A. Chang, K.L. Martin, Y. Li, K.R. Carter

**9:30 PMSE 244.** Epoxy-based polymorbornenes for MEMS, microelectronics, and photonics. M. Raeszadeh

**10:00 PMSE 245.** Stable, high molecular weight polyaldehydes. J.M. Schwartz, O. Phillips, A. Engler, J. Lee, A. Suttief, P. Kohl

10:30 Intermission.

**10:45 PMSE 246.** Vinyl addition polymerization of norbornene monomers. Catalyst developments at Promerus LLC. L.F. Rhodes

**11:15 PMSE 247.** Polymer dielectrics for electronic devices and packaging. P. Kohl, E. Elce

### Section G

Moscone Center  
Esplanade Ballroom 309

#### Molecular Engineering of Peptide Assembly

##### Supramolecular Assemblies

*Financially supported by ACS Biomacromolecules*

S. L. Perry, M. V. Tirrell, *Organizers*

H. Cui, A. Kros, *Organizers, Presiding*

**8:15 PMSE 248.** Dipeptide-based low molecular weight gelators. E. Draper, C. Colquhoun, M. Wallace, J. Iggo, D. Adams

**8:45 PMSE 249.** Heterotypic supramolecular assemblies of short peptidic derivatives. J. Li, B. Xu

**9:15 PMSE 250.** Exploring the peptide sequence space for function. R. Ulijn

**9:45 PMSE 251.** Self-assembling short peptides into complex supramolecular gels with emergent catalytic function. N. Singh, M. Araujo, B. Escuder Gil

10:05 Intermission.

**10:20 PMSE 252.** Peptide sequence variation tunes mechanical properties and charge carrier formation within peptide-based supramolecular nanomaterials. J.D. Tovar

**10:50 PMSE 253.** Biomolecules for non-biological things: Materials construction through peptide design and solution assembly. D.J. Pochan

**11:20 PMSE 254.** Self-assembly of peptide amphiphiles in nonpolar solvents. J.W. Schneider, E. Carvalho, J. Vries, P.J. Sides, D.C. Prieve

**11:50 PMSE 255.** Directing self-assembly and stability of micelles by secondary structure formation in polypeptides. M. Barz

### Section H

Moscone Center  
Esplanade Ballroom 310

#### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

X. Hu, F. Huang, *Presiding*

**8:30 PMSE 256.** Withdrawn.

**8:50 PMSE 257.** Preparation of CO<sub>2</sub> permeable nanomembranes from amine-containing nano-gel particles. Y. Hoshino, T. Gyobu, R. Honda, K. Imamura, C. Yamashita, T. Watanabe, I. Taniguchi, Y. Miura

**9:10 PMSE 258.** Programming temporal shapeshifting. X. Hu, J. Zhou, M. Vatankeh-Varnoosfaderani, W.F. Daniel, Q. Li, A.P. Zhushma, A. Dobrynin, S. Sheyko

**9:30 PMSE 259.** Reversible photochemical control over contact electrification of polymer coatings. X. Hu, S.W. Thomas

**9:50 PMSE 260.** Tunable non-iridescent photonic colloidsomes of bio-inspired core-shell melanin nanoparticles via reverse emulsion process. Z. Hu, M. Xiao, Z. Wang, Y. Li, M. Shawkey, A.N. Dhinojwala, N.C. Gianneschi

10:10 Intermission.

**10:25 PMSE 261.** New bis-( $\mu$ -alkoxo-alkyl-aluminum) initiators for lactone polymerization. C. Huang, M. Chwatko, N.A. Lynd

**10:45 PMSE 262.** Hybrid organic-inorganic multi-block 6F-DABA polyimide SiO<sub>2</sub>-TiO<sub>2</sub> nanocomposites: Structure, physical properties, and gas transport. F. Huang, C.J. Cornelius

**11:05 PMSE 263.** Fabrication of geometrically complex micro-lattices with Continuous Liquid Interface Production (CLIP) for biological applications. R. Jansziewicz, C.J. Bloomquist, S.J. Mechem, J.M. Desimone

**11:25 PMSE 264.** Redox exfoliation of layered transition metal dichalcogenides. A. Jawaid, J. Che, R.A. Vaia

**11:45 PMSE 265.** Synthesis and characterization of amphiphilic brush copolymers for applications in drug delivery and as antimicrobial agents. P. Kalelkar, D.M. Collard

#### Advanced Materials & Technologies for Solar Energy Conversion & Storage

*Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>‡</sup> and PMSE*

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

##### Solid-State Electrolytes & Beyond Li

*Sponsored by ENFL, Cosponsored by MPPG<sup>‡</sup> and PMSE*

#### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

##### Conjugated Polymeric Materials

*Sponsored by INOR, Cosponsored by PMSE*

## TUESDAY AFTERNOON

### Section A

Moscone Center  
Esplanade Ballroom 303

#### Biomaterials for Immunotherapy

H. Cheng, *Organizer*

Z. Gu, D. J. Irvine, *Organizers, Presiding*

**1:30 PMSE 266.** Nanoparticle mediated remodeling of the suppressive immune microenvironment in tumors. L. Huang

**2:00 PMSE 267.** Designer vaccine nanodiscs for personalized cancer immunotherapy. J. Moon

**2:30 PMSE 268.** Harnessing biomaterials to study and engineer lymph node function. C. Jewell

**3:00 PMSE 269.** Engineering lymph-node targeting vaccines for type 1 diabetes. H. Liu

<sup>‡</sup>Cooperative Cosponsorship

- 3:30 PMSE 270.** Macroporous scaffolds for immune cell modulation. P. Li, Z. Fan, H. Cheng
- 3:45 PMSE 271.** Manipulating immune cell responses with designer Janus interfaces. Y. Yu

## Section B

Moscone Center  
Esplanade Ballroom 304

### Polymers under Deformation

#### Applying Advances in Characterization Methods for In-Situ Studies of Deformation

*Cosponsored by MPPG<sup>2</sup> and POLY<sup>2</sup>*

*Financially supported by Asylum Research, ExxonMobil Chemical Company*

D. Yablon, *Organizer*

A. I. Norman, *Organizer, Presiding*

- 1:30 PMSE 272.** *In situ* TEM nanomechanical testing of polymers. F.I. Allen, N. Velez, M. Jones, G. Meyers, A. Minor
- 2:00 PMSE 273.** *In situ* morphology observations of single high-performance fibers with novel multi-axial strain approach. K.E. Strawhecker, M.R. Roenbeck, S. Lustig, E.J. Sandoz-Rosado
- 2:30 PMSE 274.** Investigating the mechanism of stress-oscillation phenomenon in a semi-crystalline biopolymer. E.L. Heeley, D. Hughes, E. Crabb, C. Cafolla, C. Wan
- 2:50** Intermission.
- 3:00 PMSE 275.** *In situ* Raman mapping of materials under mechanical loading: A platform for simultaneous Raman spectroscopy and nanoindentation. C.A. Michaels, Y. Gerbig, R.F. Cook
- 3:30 PMSE 276.** Development of  $\mu$ RheoSANS at NIST. D. Seeman, J. Weston, D.L. Blair, P. Salipante, S.D. Hudson, K. Weigandt
- 3:50 PMSE 277.** Polycaprolactone flow-induced crystallization as probed by simultaneous Raman, rheology, and optical microscopy. A. Kotula, K. Migler
- 4:10 PMSE 278.** Investigation of swelling thermodynamics of extended chain conformations within polymer thin films. S.V. Orski, E. Chan, K. Beers

## Section C

Moscone Center  
Esplanade Ballroom 305

### Support & Activator Effects on Metal Mediated Polymerization

*Cosponsored by CATL, INOR and MPPG<sup>2</sup>*

*Financially supported by ExxonMobil Chemical Company, Argonne National Laboratory*

M. Delferro, L. Luo, *Organizers*

L. Do, I. Tonks, *Presiding*

- 1:00 PMSE 279.** Olefin trimerization with titanium catalysts: MAO/silica-supported variants display higher productivities. J.E. Bercau, D. Aluthge, A. Sattler, J.A. Labinger
- 1:25 PMSE 280.** Effects of activation on coordination-addition polymerization of polar vinyl monomers: From living and chemo/stereoselective to catalytic polymerization. E.Y. Chen
- 1:50 PMSE 281.** Structure-property relations of ethylene-propylene random copolymer comparison between Ziegler/Natta and self-supported single-site products. J. Wang, L. Boragno, L. Resconi, M. Gahleitner
- 2:15 PMSE 282.** Designing high-performance palladium and nickel catalysts for olefin polymerization and copolymerization. C. Chen
- 2:40** Intermission.
- 3:00 PMSE 283.** Expanding the range of polyolefin materials through Living Coordinative Chain Transfer Polymerization (LCCTP). L.R. Sita
- 3:25 PMSE 284.** Benefits from the use of cycloalkyl-bridged metallocene catalysts in ethylene polymerization. J.M. Praetorius, Q. Yang, C. Boxell, W.B. Beaulieu
- 3:50 PMSE 285.** Self-assembled multinuclear palladium catalysts for olefin polymerization. R.F. Jordan
- 4:15 PMSE 286.** Withdrawn.

## Section D

Moscone Center  
Esplanade Ballroom 306

### Innovations in Drug Delivery Systems & Combination Products

#### Novel Drug Delivery

A. S. Kulshrestha, S. Sridharan, *Organizers, Presiding*

- 1:30 PMSE 287.** Efficient transdermal delivery of NSAIDS from new pressure sensitive adhesive technology (TEPI), delivery of ibuprofen, licochaine, diclofenac, etc. D.M. Haddleton, G. Nurumbetov, V. Nikolaou, E. Tombs
- 1:55 PMSE 288.** Hydrogen peroxide-activatable nanotherapeutics: Ultrasound imaging and anti-inflammatory therapy of oxidative stress-associated diseases. D. Lee, C. Kang, E. Jung, E. Hong, Y. Go
- 2:20 PMSE 289.** On the combined use of cyclodextrins and D- $\alpha$ -tocopheryl polyethylene glycol succinate as a drug delivery system. G. Gonzalez-Gaitano, C. Dreiss, J. Puig
- 2:45** Intermission.
- 2:55 PMSE 290.** Enzyme-responsive nanomaterials for targeted delivery of chemo- and immunotherapeutics. C.E. Callmann, N.C. Gianneschi
- 3:20 PMSE 291.** Divided we stand: Exploiting sequegels for time-staged delivery of dual chemotherapeutics. P. Majumder, U. Baxa, J. Schneider
- 3:45 PMSE 292.** Covalently captured dynamic self-assembled star-shaped polyglutamates as drug delivery vehicles. A. Duro-Castano, V.J. Nebot, A. Niño-Pariente, N. Feiner, J.J. Arroyo, A. Paul, A. Arminan, L. Albertazzi, M.J. Vicent

## Section E

Moscone Center  
Esplanade Ballroom 307

### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

*Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd*

C. Di, L. Fang, *Organizers*

J. Mei, *Organizer, Presiding*

- 1:30 PMSE 293.** Development of organic semiconducting materials for photovoltaic applications. S.R. Marder, J. Zhang, T. Parker, Q. Shi, S. Blakey, B. Xu, S. Agarkar, G. Pirotte, J. Reynolds, X. Zhan
- 2:00 PMSE 294.** Aza-Diels-Alder route to polyquinolines. M. Umerani, R. Kurakake, P. Patel, D.J. Dibble, R. Lopez, J.W. Ziller, A.A. Gorodetsky
- 2:15 PMSE 295.** Synthesis of novel quinoidal type conjugated polymers and application to organic field-effect transistors. H. Hwang, Y. Kim, M. Kang, K. Hwang, M. Lee, D. Kim
- 2:30 PMSE 296.** BDOPV-based conjugated polymers towards high performance n-type polymer field-effect transistors. J. Pei
- 3:00 PMSE 297.** Synthesis of well-defined ladder-type oligomeric *p*-phenylene derivatives via Ring-Closing olefin Metathesis (RCM). J. Lee, L. Fang
- 3:15** Intermission.
- 3:35 PMSE 298.** Design and synthesis of novel electron donors and acceptors for high performance organic electronic materials. Y. Liu, B. He, M. Kolaczowski, L. Klivansky, T. Chen
- 4:05 PMSE 299.** Structure-property correlation study of quinoidal ladder oligomers and polymers. X. Ji, L. Fang
- 4:20 PMSE 300.** Generic strategy for cross-linking organic semiconducting polymer thin-films. B. Watson, N. Rolston, K. Bush, L. Taleghani, R. Dauskardt
- 4:40 PMSE 301.** New design principles for realization of high performance electrochromic materials. G.E. Gunbas
- 5:00 PMSE 302.** Innovative carboxylic acid functional propylene dioxythiophene (ProDOT-COOH) monomer for bioelectronics. D. Mantione, A. Sanchez-Sanchez, H. Sardon, D. Mecerreyes

## Section F

Moscone Center  
Esplanade Ballroom 308

### Recent Advances in Multiblock Copolymers

#### Synthesis & Modeling

*Cosponsored by POLY*

*Financially supported by ExxonMobil Chemical Company, The Dow Chemical Company*

Z. Bai, B. K. Long, *Organizers*

J. Zhang, *Organizer, Presiding*

**1:00** Introductory Remarks.

- 1:05 PMSE 303.** Tandem ring-opening metathesis/vinyl insertion copolymerization of ethylene with cyclic olefins: Access to functional polyolefin block-copolymers. M. Buchmeiser

- 1:35 PMSE 304.** Sequence controlled multiblock copolymers: New chemistries lead to new possibilities. A. Anastasaki, N. Engelis, V. Nikolaou, G. Nurumbetov, N. Truong, M. Whittaker, T. Davis, D.M. Haddleton
- 2:05 PMSE 305.** Synthesis of and morphological consequences of frustration in ABC and ABCA' multiblock polymers. M.A. Hillmyer
- 2:35 PMSE 306.** Fast and slow dynamical processes in simulations of block copolymer micelles. D. Morse, J. Mysona
- 3:05** Intermission.
- 3:25 PMSE 307.** Multiblock copolymers by ATRP. K. Matyjaszewski
- 3:55 PMSE 308.** Manipulation of effective interaction parameters from ARB and AHB type triblock copolymers. J. Bang, S. Woo, A. Khan, D. Ryu, S. Choi, J. Huh
- 4:25 PMSE 309.** Block copolymers by simultaneous copolymerisation of different monomers, unusual initiators and polymeranalogous transformations. M. Klapper, F. Karagoez, I. Freudensprung, K. Muellen
- 4:55** Concluding Remarks.

## Section G

Moscone Center  
Esplanade Ballroom 309

### Molecular Engineering of Peptide Assembly

#### Helical Peptides

*Financially supported by ACS Biomacromolecules*

H. Cui, A. Kros, *Organizers*

S. L. Perry, M. V. Tirrell, *Organizers, Presiding*

- 1:30 PMSE 310.** Decipher 3-helix micelle as nanocarrier. T. Xu
- 2:00 PMSE 311.** Hydrophobic interactions in peptide folding, association, and assembly. M. Shell
- 2:30 PMSE 312.** Drug delivery via cell membrane fusion using lipopeptide modified liposomes. A. Kros
- 3:00** Intermission.
- 3:15 PMSE 313.** Collagen hybridizing peptide: Targeted binding, self-assembly, and biomedical application. M.S. Yu
- 3:45 PMSE 314.** Using molecular tuning to design functional polypeptide assemblies. T.J. Deming
- 4:15 PMSE 315.** Programmed assembly of helix bundle-forming peptide-dendron hybrids. J.G. Rudick
- 4:45 PMSE 316.** Histidine-rich amphiphilic peptides exhibit a range of biological functions and self-associate into helical coiled-coil fibers and hydrogels. B. Bechinger, L. Vermeer, J. Wolf, A. Galy, D. Fenard

Technical program information known at press time.

The official technical program for the 253rd ACS National Meeting is available at: [www.acs.org/SanFran2017](http://www.acs.org/SanFran2017)

## Section H

Moscone Center  
Esplanade Ballroom 310

## General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

D. Roy, A. Shete, *Presiding*

**1:30 PMSE 317.** Bactericidal and non-hemolytic macromolecules through synergistic variation in spacer arm and separate center design. A. Punia, K. Punia, K. Chatterjee, S. Mukherjee, J. Fata, P. Banerjee, K.S. Raja, N. Yang

**1:50 PMSE 318.** Rubber toughening of photocurable resins for Continuous Liquid Interface Production (CLIP). A.L. Quintanilla, L. Huang, A. Nebipasagil, S.J. Mecham, J.M. Desimone

**2:10 PMSE 319.** New class of organoaluminum initiators for epoxide polymerizations. C. Rodriguez, R.C. Ferrier, N. Lynd

**2:30 PMSE 320.** Effect of CNCs on crystallization kinetics of polycaprolactone as probed by Rho-Raman microscopy. D. Roy, A. Kotula, D. Fox, K. Migler, J. Gilman, B. Natarajan

**2:50 PMSE 321.** Vat photopolymerization additive manufacturing for the construction of graded and multi-material objects. J. Schwartz, C. Thrasher, A.J. Boydston

## 3:10 Intermission.

**3:25 PMSE 322.** Weld formation in polymer extrusion additive manufacturing processes. J. Seppala, S. Hoon Han, K.E. Hillgartner, C.S. Davis, K. Migler

**3:45 PMSE 323.** Understanding moisture outgassing kinetics of a silica reinforced polydimethylsiloxane using experimental and first-principles modeling. H. Sharma, W. McLean II, R.S. Maxwell, L. Dinh

**4:05 PMSE 324.** Polymer gel electrolytes with jeffamine-amine coupled polyureas structure for enhancing efficiency of dye-sensitized solar cells. S. Shen, P. Shih, K. Ho, J. Lin

**4:25 PMSE 325.** One-pot blue-light triggered Interpenetrating Polymeric Network (IPN) from rapid CuAAC and methacrylate reactions with superior mechanical properties. A. Shete, C.J. Kloxin

**4:45 PMSE 326.** Preventing blood loss with self-sealing hemostatic needles. M. Shin, H. Lee

## Advances in Polysaccharides: Practice &amp; Applications

## New Developments in the Industrial Sector

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG<sup>2</sup>, PMSE and POLY

## Advanced Materials &amp; Technologies for Solar Energy Conversion &amp; Storage

Sponsored by ENFL, Cosponsored by CATL, MPPG<sup>2</sup> and PMSE

## Innovative Chemistry &amp; Materials for Electrochemical Energy Storage

## 2D Energy Storage Materials

Sponsored by ENFL, Cosponsored by MPPG<sup>2</sup> and PMSE

## 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

## Materials for Energy Conversion

Sponsored by INOR, Cosponsored by PMSE

## TUESDAY EVENING

## Section A

Moscone Center  
Hall A

## Joint PMSE/POLY Poster Session

M. Grunlan, *Organizer*

6:00 - 8:00

## General Posters/New Concepts in Polymeric Materials.

**PMSE 327.** Photo-controlled proton transfer in polymer films using metastable-state photoacids. N. Abeyrathna, C. Yang, T. Khalil, Y. Liao

**PMSE 328.** Tuning interfacial energy of nanodiamond fillers for property reinforcement in polymer nanofiber composites. P. Adhikari, S.A. Khan, O.J. Rojas

**PMSE 329.** Synthesis of fluorescent phenyleneethynylene trimer-containing polymer. M. Ahmed, J. Moon

**PMSE 330.** Heteroarm core cross-linked star polymers via RAFT alternating copolymerization. N. Ahn, M. Seo

**PMSE 331.** Preparation and structural studies of electrospun poly(vinyl alcohol)/Ru<sub>2</sub>S<sub>3</sub> and hydroxylethyl/Ru<sub>2</sub>S<sub>3</sub> nanofibers. P.A. Ajibade

**PMSE 332.** High loaded sulfur – polymer/graphene cathode material for Li-S batteries. A. Abraham, V. Pillai, S. Lonkar, S. Al Hassan

**PMSE 333.** Tunable hygromorphism: Structural implications of low molecular weight gels and electrospun nanofibers in bilayer composites. S. Alexander, L.T. Korley

**PMSE 334.** Synthesis and developing properties of functional phenolic polymers for eco-friendly thermal printing papers. B. An, K. Choi, H. Kwon, Y. Ryu

**PMSE 335.** High performance electrochromic material shows voltage-dependent fluorescence change. G. Atakan, Y. Arslan Udum, G.E. Gunbas

**PMSE 336.** Device physics of the organic alloying effect in high-efficiency ternary blend polymer/fullerene bulk-heterojunction solar cells. T. Aubry, B.J. Schwartz

**PMSE 337.** Performance of liquid benzoxazine-PEG blend resin systems for potential industrial composites processing. E. Brown, D.A. Rider

**PMSE 338.** Novel comonomers for highly branched LDPE. H.A. Brown, M. Demirors, C. Eddy, S. Ewart, J. Osby

**PMSE 339.** Dimeric drug polymeric nanoparticles with exceptionally high drug loading and quantitative loading efficiency. K. Cai, J. Cheng

**PMSE 340.** Production and characterization of microbial polyhydroxyalkanoates. A. Cal, D. Sikkema, M. Ponce, W.J. Orts, C. Lee

**PMSE 341.** Architectural influence on the assembly of biosynthetic polymer analogues to a peptide hydrogel. A.S. Carlini, D.T. Crystal, S. Sahu, F.J. Hidalgo, A.P. Blum, N.C. Gianneschi

**PMSE 342.** Metal-containing polyesters from 3,5-pyridinedicarboxylic acid, 2-ketoglutaric acid, dipicolinic acid, and camphoric acid. C.E. Carraher, M. Roner, P. Slawek, F. Mosca, D. Patel, K. Black, J. Einkauf, F. Russell, J. Frank, A. Moric-Johnson, L. Miller, L. Chen

**PMSE 343.** Synthesis of metallocene-containing polyethers. C.E. Carraher, M. Roner, K. Black, J. Frank

**PMSE 344.** Development of *Aloe vera*/violet silver nanoparticles/bacterial cellulose film for using as burn wound dressings. L. Chatchawanwirote

**PMSE 345.** Fully physically-linked hydrogels with superior mechanical, self-healing, and antifouling properties. H. Chen, Q. Chen, F. Yang, K. Chu, R. Hu, M. Zhang, B. Ren, J. Zheng

**PMSE 346.** Reduced confinement and its effect on stability in strong polyelectrolyte brushes. W. Chen, M. Menzel, T. Watanabe, O. Prucker, J. Ruehe, C.K. Ober

**PMSE 347.** Effect of oligomeric resin on silica-filled rubber compound. Y. Chen, Y. Liu, F. Lo, Z. Zheng, C. Hsieh, C. Dai

**PMSE 348.** Withdrawn.

**PMSE 349.** Modified Stöber method for the synthesis of dextran-SiO<sub>2</sub> glyconanoparticles for siRNA delivery. O.M. Chesniak, D. Vocelle, C. Chan, S. Walton, M.R. Smith

**PMSE 350.** Synthesis and characterization of indolocarbazole pyrroledione-based organic semiconductors. K. Choi, J. Park, J. Kwon, Y. Ryu, B. An, S.Y. Park

**PMSE 351.** Fabrication of Pickering emulsion stabilized by associative magnetic nanoparticles for recoverable emulsion flooding. S. Choi, J. Kim

**PMSE 352.** Biodegradable hairy nanoparticles for biomedical applications. S. Christau, J. Lahann

**PMSE 353.** Preparation and characterization of hydrogel wound dressing loaded PLGA/white thyme oil PLGA nanospheres for used as pressure ulcer treatment. C. Choipang, O. Suwanton, P. Chusinsuan, P. Ekabutr, P. Supapol

**PMSE 354.** Design of electronically-active polyionenes at organic/inorganic interfaces. M.D. Cole, M. Sheri, C. Bielicki, T. Emrick

**PMSE 355.** Development of double layer-wound dressing of biopolymer containing rice extract and essential oil for biomedical applications. P. Chusinsuan, N. Chimnoi, A. Makarasen, N. Reuk-ngam, L. Pattani, P. Khlaychan, S. Techasakul

**PMSE 356.** Monomer encapsulated ARGET ATRP emulsion polymerization for synthesis of Polymer-Grafted Nanoparticles (PGNs). R. Cordero, C.K. Ober, R.A. Vaia

**PMSE 357.** Morphology and responsive properties of mosaic polymer brushes. O. Davydovich, E. Chu, P.B. Moore, A. Sidorenko

**PMSE 358.** Synthesis of latexes from plant oil-based acrylic monomers. Z. Demchuk, I. Tarnavchik, V. Kirianchuk, A.S. Voronov

**PMSE 359.** Induction of adipose-derived stem cells on nanofibrous, porous microspheres for vascularized adipose tissue regeneration *in vivo*. Y.R. Doleyres, J. Wang, X. Jin, P.X. Ma

**PMSE 360.** Preparation and characterization of a nano-composite constrained high temperature drilling fluid with water soluble AM-SAS-SSS copolymers by inverse microemulsion polymerization. Q. Deng, Y. Ke

**PMSE 361.** Self-healing poly(hydroxyalkanoates) formed from metal-ligand complexation. T. Ebrahimi, S. Hatzikiriakos, P. Mehrhodavandi

**PMSE 362.** Synthesis and characterization of Polycaprolactone (PCL) membranes as scaffolds for bone tissue engineering. E.A. Dwomoh, J. Santillan, E.O. Ortiz-Quiles, E. Nicolau

**PMSE 363.** Biologically relevant polymeric materials based on the azobenzene motif. T. Eom, Y. Lee, S. Kim, J. Bang, A. Khan

**PMSE 364.** Laminar flow-based fabrication of thin film battery separators from aramid nanofibers. A.E. Emre, P. Weerappuli, S. Takayama, N. Kotov

**PMSE 365.** Understanding ordering of block-copolymer-based supramolecules on lithographically patterned surfaces. K. Evans, T. Xu

**PMSE 366.** Advanced polymer nanocomposites for 3D printing in space. C. Fincher, Y. Mizuno, G. Garner, T. Ozkan, J. Meyer

**PMSE 367.** Synthesis, characterization and gas transport properties of Tröger's Base-Based Polyimides of Intrinsic Microporosity (TB-PIM-PIs). B. Ghanem, N. Alaslai, I. Pinnau

**PMSE 368.** Selective  $\alpha$ -olefin oligomerization using group IV amine bis(phenolate) catalysts. T.N. Gunasekara, M.M. Abu-Omar

**PMSE 369.** Near infrared responsive hydrogels with fast and spatially controlled responses. I.M. Hill

**PMSE 370.** Tailoring multi-site catalysts and in-situ formation of self-reinforcing all-polyolefin composites for sustainable light-weight construction. T. Hees, M. Stürzel, R. Mülhaupt

**PMSE 371.** Material design for perovskite solar cell. C. Holmes, O. Allam, Z. Greenberg, S. Jang, K. Kim

**PMSE 372.** Enhancement of elasticity in alginate-clay nanocomposite hydrogels with PEO-PPO-PEO copolymers. W. Hom, S.R. Bhatia

**PMSE 373.** Stimuli-sensitive lipid coated nanogels (lipogels) for hydrophilic and hydrophobic guest delivery. C. Homyak, S. Thayumanavan

**PMSE 374.** Single component hydrogel simultaneously exhibiting stretchable, self-healing, stimuli-responsive, and adhesive properties. S. Hong, H. Lee

**PMSE 375.** Withdrawn.

**PMSE 376.** Morphology and adsorption kinetics of 0D, 1D, and 2D carbonaceous nanomaterial networks in polymeric electrospun fibers. N. Hoogesteijn von Reitzenstein, O. Apul, E.L. Pruitt, K. Hristovski, P.K. Westerhoff

**PMSE 377.** Incorporation of Nile red in hyperbranched poly n-isopropylacrylamide and its response to environmental change. R. Hoskins, S. Rimmer

**PMSE 378.** Hybrid organic-inorganic polyimide SiO<sub>2</sub>-TiO<sub>2</sub> nanocomposites: Structure, physical properties, and gas separation. F. Huang, C.J. Cornelius

‡ Cooperative Cosponsorship

- PMSE 379.** Synthesis of a dendritic scaffold that will be used for antioxidant dendrimer synthesis. U.G. Huynh, C.Y. Lee
- PMSE 380.** Chemosensor of Nile Red deposition in poly(styrene-co-maleic anhydride) core-shell for copper cation in water. K. Hwang, J. Park, J. Lee
- PMSE 381.** Carbon dioxide gas indicating film using the hydrophobic ion pair dye doped on poly(ethyleneimine)/poly(styrene-co-maleic anhydride). K. Hwang, W. Choi, J. Lee
- PMSE 382.** Synthesis of various cycloaliphatic polyester copolymers based on Poly(1,4-cyclohexylenedicyclohexane-1,4-dicarboxylate) (PCCD) with tunable glass transition temperature and viscosity using melt polymerization technique. S. Ikkardesler, R. Piyade, A.E. Acar
- PMSE 383.** One-step fabrication of multi-scale diffractive gratings by directional photofluidized surface relief of azo polymers. Y. Jeong
- PMSE 384.** Preferential ordering of poly(3-hexylthiophene) on two type graphene substrates. K. Jo, S. Chae, J. Choi, S. Won, J. Kim, H. Kim
- PMSE 385.** Structural characterization of three-helix micelle delivery platform for neurological disease treatment. B. Jung, J. Ang, T. Xu
- PMSE 386.** Development of chitosan derivatives/starch foam for use as oral surgical wound dressing. N. Jungprasertchai
- PMSE 387.** Synthesis of cycloaliphatic polyesters, poly(1,4-cyclohexylenedicyclohexane-1,4-dicarboxylate) (PCCD), for low temperature curing powder coatings. K. Kalayci, R. Piyade, B. Salman, A.E. Acar
- PMSE 388.** Adhesion control of polymeric dry adhesives using partial wrinkle generation method. S. Kang
- PMSE 389.** Withdrawn.
- PMSE 390.** Microfluidic synthesis of uniform gelatin microparticles for temporary embolization. B. Kim, S. Choi, S. Han, J. Kim
- PMSE 391.** Stimuli-responsive release of guests from mesoporous nanocontainer induced by conformational conversion of peptide gatekeepers. J. Lee, C. Kim
- PMSE 392.** Surface modification of microcrystalline cellulose to capture CO<sub>2</sub> as fillers in LDPE composite. K. Ha, H. Kim, S. Park, Y. Yang
- PMSE 393.** Thermal stability and physical properties of basalt fiber reinforced epoxy composite modified by silane coupling agents. H. Kim, J. Lee, I. Nam
- PMSE 394.** Fluorescent supracolloidal chains of diblock copolymer micelles with color tunability. K. Kim, S. Jang, B. Sohn
- PMSE 395.** Fabrication of methacrylated silk fibroin hydrogel by photo-cross-linking. M. Kim, H. Kim, Y. Park, C. Ki
- PMSE 396.** Effect of plant oil unsaturation on emulsion copolymerization with vinyl monomers. K. Kingsley, O. Shevchuk, I. Tarnavchik, A. Voronov
- PMSE 397.** Chemical warfare agent simulant sensing via natural polymeric photonic crystals. J. Kittle
- PMSE 398.** Synthesis of amphiphilic PEO-b-PCL-b-PEO triblock copolymers as novel polymeric surfactants. J. Lee, H. Seo, J. Kim
- PMSE 399.** Withdrawn.
- PMSE 400.** Optimization of electrochromics on polycarbonate substrates: Use of thermal and long wavelength photo-initiators. M. Li, x. zhang, G.A. Sozling
- PMSE 401.** Preparation and characterization of a novel halogen-free flame retarded polyamide 6. K. Liu, Y. Li, R. Xiao
- PMSE 402.** MOF-random copolymer nanocomposite. S. Liu, T. Xu
- PMSE 403.** Dynamic mechanical behavior of thermoset rubber blends. Y. Liu, Y. Chen, J. Wang, H. Lin, C. Dai, C. Hsieh
- PMSE 404.** Graphene/polyaniline blended fiber for conducting and flexible energy storage devices. Y. Feng, J. Shen, C. Ma, D. Zhang, Z. Xiao, Y. Liu, Y. Min
- PMSE 405.** Synthesis of graft copolymers with N-vinylimidazole onto pristine and modified polypropylene monofilaments: PP-g-PNVIm, (PP-g-PHEMA)-g-PNVIm, and (PP-g-PNIPAAm)-g-PNVIm. F. Lopez Saucedo, E. Bucio
- PMSE 406.** Enzyme induced mineralization of hydrogels. M. Meuris, N. Rauner, J.C. Tiller
- PMSE 407.** Polymer thin film surfaces for molecular transport and concentration. K.A. Miller, L. Kiskey, P.V. Braun
- PMSE 408.** Relationship between cure temperature and the mechanical, physical, and dielectric performance of a polydimethylsiloxane/glass composite for electric motor insulation. S. Miller, K. Becker, T. Williams, D. Scheiman, P. Heimann, A. Ring
- PMSE 409.** Physical, thermal, electrochemical and fuel cell performance study of sulfonated poly(phenylene)s/novel branched polysulfone-based polymer blend. B. Motealleh, T.D. Largier, F. Huang, C.J. Cornelius
- PMSE 410.** Imprinted polymeric materials for selective recognition of anti-diabetic drugs in complex mixtures. A. Mujahid, I. Haq, T. Hussain, S. Bajwa
- PMSE 411.** Zinc and cadmium coordination polymers of aliphatic systems as dielectric materials. S. Nasreen, M.L. Baczkowski, G.M. Treich, A. Mannodi-Kanakithodi, S.K. Scheirey, R. Ramprasad, G.A. Sozling
- PMSE 412.** Agarose coating to combat peritoneal dialysis catheter-associated complications. K. Neoh, M. Li, J. Rahmat, K. Mandakhalikar, E. Kang, E. Chiong
- PMSE 413.** Synthesis and characterization of copolymers of  $\beta,\beta'$ - branched alkyl fused thiophenes with branched alkyl diketopyrrolopyrrole. W. Niu, A. Wallace, J.R. Matthews, M. He
- PMSE 414.** UV-curable flame retardant coatings for cotton fabrics. Z. Yildiz, H. Onen, A. Gungor, Y. Wang, K. Jacob
- PMSE 415.** Effect of catalyst concentration on acid-epoxy reactions: A powder coating study. A. Ozdemir, A. Ozcan, B. Salman, A.E. Acar
- PMSE 416.** Catalyst screening for powder coating by differential scanning calorimetry. A. Ozdemir, A. Ozcan, A.E. Acar
- PMSE 417.** Withdrawn.
- PMSE 418.** Optimizing parameters for electrospinning alginate- and chitosan-based nanofibers. K. Penton, W. Weeks, T. Brown, S.K. Hamilton
- PMSE 419.** Physical and chemical analysis of photodegraded high-density polyethylene by natural and accelerated ultraviolet light exposure. L.N. Perry, D. Stanley, H. Hsueh, J. Kim, D.L. Hunston, C.C. White, L. Sung
- PMSE 420.** Janus dendrimer from poly(aryl ether) linked PAMAM for supergelation and guest release. P. Prabhakaran
- PMSE 421.** Curcumin-glucose macromolecular conjugates via click-chemistry for selective chelation of toxic metals. K. Punia, A. Averick, A. Punia, S. Dolai, S.R. Guariglia, W. L'Amoreaux, K.S. Raja
- PMSE 422.** Increase in compatibilization of engineered resins with modified polyolefins. R. Putans, Q. Wan, B. Walther, E. Keene, Y. Li, M. Williams
- PMSE 423.** Enhancement of binding affinity of catechol and catecholic polymer to 4-fluorophenylboronic acid through nitration of aromatic ring. S. Qiu, S. Jin, N. Yang
- PMSE 424.** Protein surface PEGylation for the emulsion-based formation of stable nanoparticles. L. Radi, M. Fach, E. Steiert, P. Wich
- PMSE 425.** Novel properties of polymers upon critical cross-linking right at the borderline between thermoplastic and elastomer. T. Raidt, F. Katzenberg, J.C. Tiller
- PMSE 426.** Light-activated non-equilibrium processes at the interface of a nanoassembly. P. Rangadurai, S. Thayumanavan, M. Molla, J.J. De Pablo
- PMSE 427.** Graphene oxide armored polythioether particles. B. Rodier, E. Mosher, S. Burton, R. Matthews, E. Pentzer
- PMSE 428.** In situ synthesis of conductive polymers within covalent organic frameworks. N. Sahiner, S. Demirci
- PMSE 429.** Photomediated approach for patterned bottlebrush networks. C. Sample, E. Discekici, N. Dolinski, D. Lunn, A. Anastasaki, C.J. Hawker
- PMSE 430.** Charge transfer modulated self-assembly in poly(aryl) ether dendron derivatives with improved stability and transport characteristics. S. Satapathy
- PMSE 431.** Polymer antibiotic conjugates based on poly(2-oxazoline)s. M. Schmidt, C. Krumm, J.C. Tiller
- PMSE 432.** Understanding the relationship between semiconducting polymer crystallinity and the electrical properties of sequentially-processed F4TCNQ-doped P3HT films. D.T. Scholes, P. Yee, S.A. Hawks, J. Lindemuth, S.H. Tolbert, B.J. Schwartz
- PMSE 433.** New approach to fabricate thermally responsive nanoscale emulsion films by layer-by-layer deposition. H. Seo, J. Lee, J. Kim
- PMSE 434.** CO<sub>2</sub>-sensitive poly(N-isopropylacryl amide-co-acrylic acid) copolymers with high glass transition temperatures. Y. Shieh, P. Lin
- PMSE 435.** Fabrication of superhydrophobic coatings on AA 6061. N.A. Siddiqui, A. Zeeshan, H. Haseeb, M. Shaharyar
- PMSE 436.** Functionalized nanofiber scaffolds for neural differentiation of mouse ESCs. E. Silanteyeva, J. Carpenter, W. Nasir, R. Willis, M. Becker
- PMSE 437.** Continuous Electrocardiogram (ECG) measurement via optimization of electrochemical state of a conductive polymer on fabric. S.K. Sinha, Y. Noh, G.M. Treich, S.H. Alipour, K.H. Chon, G.A. Sozling
- PMSE 438.** Super oxygen and improved water vapor barrier of polypropylene film with polyelectrolyte multilayer nanocoatings. Y. Song, P. Tzeng, J.C. Grunlan
- PMSE 439.** Preparation of surfactant-resistant polymeric vesicles with ultra-thick membranes through RAFT dispersion polymerization. Z. Song, Y. Huang, V. Prasad, R. Baumgartner, S. Zhang, K. Harris, J.S. Katz, J. Cheng
- PMSE 440.** Glycocalyx-inspired nitric oxide-releasing polysaccharide coating on TiO<sub>2</sub> nanotube surfaces reduce platelet adhesion and activation. J. Staver, R. Simon-Walker, R. Romero, Y. Zang, M.M. Reynolds, K. Popat, M. Kipper
- PMSE 441.** Facile approach to large-scale and three-dimensional pore-forming on polymeric objects. J. Huang, W. Sun
- PMSE 442.** Withdrawn.
- PMSE 443.** Snatching bacteria out of biofilms using the power of polymer desolvation. T. Swift, R. Plenderleith, S. Rimmer
- PMSE 444.** Fabrication and characterization of thiol-norbornene schizophyllan hydrogels. H. Tae, S. Lee, M. Kim, C. Ki
- PMSE 445.** Preparation and characterization of full biobased polyamide 109 based on the renewable monomer: Application in engineering thermoplastics. L. Tao, R. Xiao
- PMSE 446.** Effect of multi-branched PDLA additives on the mechanical and thermomechanical properties of blends with PLLA. L.F. Torres, C. Momahan, W.J. Orts
- PMSE 447.** Control of graphene at the interface of the polyethylene/polypropylene blends: Fabricated conductive composites with ultralow percolation thresholds. C. Tu, K. Nagata, M. Higuchi
- PMSE 448.** Aramid nanofiber films for ionizing radiation detection via semi-conducting nanoparticles. D. Vecchio, B. Davis, M. Hammig, N. Kotov
- PMSE 449.** Photophysics of polarons and bipolarons in F4TCNQ-doped semiconducting polymers. M.G. Voss, D.T. Scholes, J. Challa, J. Lindemuth, B.J. Schwartz
- PMSE 450.** Convenient one-step preparation of isoporous nanostructures by melt-shear organization. S. Vowinkel, M. Gallei
- PMSE 451.** Modifying PDMS surface using infiltration interfacial polymerization. M. Wang, J.M. Gorham, J. Kilgore, F. DelRio, Z. Zhang, Y. Ding
- PMSE 452.** New polyolefins via ring-opening metathesis polymerization for biomedical applications. Y. Wang, M.A. Hillmyer
- PMSE 453.** Homoporous structures derived from amphiphilic block copolymers. Y. Wang
- PMSE 454.** PEG-polypeptide dual brush block copolymers. Z. Wang, J. Cheng
- PMSE 455.** Responsive nanoporous membranes by selective swelling of triblock terpolymers. Y. Wang, Z. Wang
- PMSE 456.** Towards fibers that will possess hydrophobic/oleophobic properties for an extended period of time. L. Wei, T. Demir, P. Brown, I.A. Luzinov

- PMSE 457. Modified biopolymers as dynamic materials for nanoparticle drug delivery. D. Bamberg, M. Fach, L. Radi, P.R. Wich
- PMSE 458. Iron(II) crosslinked bipyridine-terminated poly(dimethylsiloxane) as an elastomer. Z. Williams, E. Burwell, A. Chiomento, J. Pawlik, A.D. Schwab, M.S. Hambourger
- PMSE 459. Withdrawn.
- PMSE 460. Super-wettability based fabrication of one-dimensional materials. Y. Wu, L. Jiang
- PMSE 461. Zwitterionic polymer brushes for salt-responsive polymer structure-surface activity relationship. S. Xiao, H. Chen, R. Hu, M. Zhang, B. Ren, F. Yang, K. Chu, J. Yang, J. Zheng
- PMSE 462. Large nanoparticle assembly in block copolymer-based supramolecule. Y. Xiao, T. Xu
- PMSE 463. Effect of weight ratios of PHBV/PLA polymer blends on nitrate removal efficiency and microbial community during solid-phase denitrification. Z. Xu
- PMSE 464. Synthesis and characterization of ultralow fouling poly(N-acryloylglycinamide) brushes. F. Yang, H. Chen, Q. Chen, K. Chu, R. Hu, M. Zhang, B. Ren, J. Zheng
- PMSE 465. Effects of silane surface treatment of microcrystalline cellulose on mechanical properties of polyurethane composites. K. Ha, Y. Yang, H. Kim, S. Park, K. Lim
- PMSE 466. Study on the functional effect of nano composites lubricant and lubricating drilling fluid. C. Yu, Y. Ke
- PMSE 467. Cationic conjugated polymers for discrimination of microbial pathogens. H. Yuan
- PMSE 468. Uniaxial stretching induced packing and folding structure change in isotactic polypropylene. S. Yuan, T. Miyoshi
- PMSE 469. Next generation semiconducting carbonaceous material, graphyne: Its synthesis, properties and electrical applications. E. Yun, S. Cho, D. Ryu, H. Lee
- PMSE 470. Effect of temperature and concentration on self-assembly and mechanical properties of triblock copolymer gels. M. Zabet, S. Mishra, S. Kundu
- PMSE 471. Membrane gas separation accelerated by hollow nanospheres. J. Zhang, S.M. Mahurin, S. Dai
- PMSE 472. Neutral color tuning of flexible conjugated polymer electrochromic devices achieved by multi-component systems. X. Zhang, M. Li, G.A. Sotzing
- PMSE 473. Polymer-aided rituximab-epirubicin conjugate for treatment of B-cell malignancies. L. Zhang, Y. Fang, J. Kopecek, J. Yang
- PMSE 474. Mixed micellar assemblies as polymer adjuvants for peptide administration. O. Zholobko, A. Kohut, S. Stafslien, L. Vanderaman, A.S. Voronov
- PMSE 475. Multi-stimuli-responsive amphiphilic assemblies through simple postpolymerization modifications. J. Ziwen, X. Liu, S. Thayumanavan
- PMSE 477. Injectable cyclic peptide pro-gelators as enzyme-responsive hydrogels for post-myocardial infarction tissue engineering. A.S. Carlini, N.C. Gianneschi
- PMSE 478. Water-soluble Au(I)-phosphate complexes: From post-modification of biomolecules to peptidic self-assembly into fluorescent micelles. B. Kemper, P. Besenius
- PMSE 479. Controlling size, shape and function of core cross-linked nanostructures: Exploiting secondary structure in reactive polypept(oid)s to direct self-assembly. K. Klinker, O. Schäfer, D. Huesmann, L. Braun, L. Capelão, M. Barz
- PMSE 480. Amino acid-encoded transient helicity by biocatalytic self-assembly. M. Kumar, R. Ulijn
- PMSE 481. Biomimetic approach to engineering high affinity protein-binding supramolecular nanofibers. Y. Li, L. Lock, Y. Wang, X. Xu, Z. Li, H. Cui
- PMSE 482. Peptide-Oligonucleotide Chimeras (POCs): Programmable building blocks for the construction of soft nanoscale matter. A. Merg, R. Thamer, S. Mokashi Punekar, S.T. Nguyen, N.L. Rosi
- PMSE 483. Biologically active peptide quaternary structures with topological diversity using orthogonal, abiotic dynamic covalent reactions. J.F. Reuther, I. Kolesnichenko, E.T. Hernandez, D.V. Ukrainsev, E.V. Anslin
- PMSE 484. Withdrawn.
- Recent Advances in Multiblock Copolymers.**
- PMSE 485. Withdrawn.
- PMSE 486. Graded, hierarchically porous carbon materials from block copolymer and organic additive co-assembly. S.A. Hesse, J. Werner, P. Beauceage, K. Barteau, U.B. Wiesner
- PMSE 487. Janus container. F. Liang
- PMSE 488. Elaboration of photoreversible poly( $\epsilon$ -caprolactone)-based networks with two-way shape-memory effect. F. Pilate, R. Mincheva, L. Wu, J. Raquez, P. Dubois
- PMSE 489. Video-rate AFM imaging of block copolymer evolution. J.G. Raybin, J. Ren, P.F. Nealey, S.J. Sibener
- PMSE 490. Polymersome membrane-confined self-assembly. L. Ruiz-Perez, L. Messenger, J. Gaitzsch, A.S. Joseph, L. Sutto, F. Gervasio, G. Battaglia
- PMSE 491. Development of engineered bionanomaterial based on dispersed nanodiamonds into self-assembled polystyrene-block-poly(ethylene oxide) copolymer. J. Santillan, Y. Rodríguez, S.A. Bello, E. Nicolau
- PMSE 492. Transient network formed by supramolecular assembly of oligocarbonate-fluorene end-functionalized poly(ethylene glycol). G. Wei, S. Ali, V.M. Prabhu, S. Venkataraman, Y. Yang, J. Hedrick
- PMSE 493. Microscopic structures in ion exchange fuel cell membranes. J. Lu, A. Spakowitz, C. Frank, M. Toney
- PMSE 494. Effects of network termination on elastic and thermal expansion asymmetries in hybrid molecular materials. J. Burg, R. Dauskardt
- PMSE 495. Correlating radiative dynamics with structural heterogeneity in conjugated polymers. W.R. Hollingsworth, J. Lee, L. Fang, A. Ayzner
- 1D Nanomaterials: Synthesis, Assembly, Properties & Applications.**
- PMSE 496. Dual modal nanosensors for the early detection of *Escherichia coli* O157:H7. T. Banerjee, S. Sulthana, T. Shelby, J.G. McAfee, S. Santra
- PMSE 497. Gradient structure nanofibrous assemblies for broadband acoustic absorption. L. Cao, J. Yu, B. Ding
- PMSE 498. Versatile stimuli-responsive ROMP-based polymeric system for modulating orientation of liquid crystal microdroplets. Y. Huang, Y. Kim, N.C. Gianneschi, N.L. Abbott
- PMSE 499. Aligned silver nanowire transparent electrodes for flexible electronic devices. S. Kang, S. Cho, H. Ko
- PMSE 500. Role of phenolic compounds in the formation of fluorescent carbon nanoparticles from natural polysaccharides. K. Lee, E. Park, C. Jeong, S. Park, H. Lee
- PMSE 501. Electret polyvinylidene fluoride nanofibers hybridized by polytetrafluoroethylene nanoparticles for high-efficiency air filtration. L. Yuyao, X. Zhao, J. Yu, B. Ding
- PMSE 502. Layer-by-layer assembly and spectroelectrochemical study of alizarin red S-based thin films. W. Ma, J. Lutkenhaus
- PMSE 503. Polymerization of 3,4-ethylenedioxythiophene in CD-MOF. W. Michida, A. Nagai, M. Sakuragi, K. Kusakabe
- PMSE 504. Nanoribbons and nanofractals self-assembled from graphene quantum dots. Z. Qu, W. Feng, N. Kotov
- PMSE 505. Development of designer nanomedicines and nanosensors: Important roles in human health. S. Santra, T. Banerjee, T. Shelby, S. Sulthana, J.G. McAfee, I.S. Zegar
- PMSE 506. Hierarchically structured superhydrophobic and superoleophilic nanofibrous membranes for effective oil-water separation. F. Wang, L. Huang, B. Ding
- PMSE 507. Hydrophobic polyvinylidene fluoride fibrous membranes with simultaneously water/windproof and breathable performance. X. Yu, Y. Li, X. Wang, B. Ding
- PMSE 508. Polyurethane/fluorinated polyurethane membranes with waterproof and breathable performance improved by lithium chloride. J. Zhao, Y. Li, L. Liu, B. Ding
- Innovations in Drug Delivery Systems & Combination Products.**
- PMSE 509. Polypept(oid)s: From polymers based on endogenous amino acids to therapeutics and imaging agents. M. Barz
- PMSE 510. Controllable multi-compartmental capsules with distinct cores and shells for synergistic release. F. He, W. Wang, X. He, X. Yang, M. Li, R. Xie, X. Ju, Z. Liu, L. Chu
- PMSE 511. PEG architecture effect on the hybridization thermodynamics and protein accessibility of PEGylated oligonucleotides. F. Jia, X. Lu, X. Tan, K. Zhang
- PMSE 512. Transiently responsive block copolymer micelles based on (meth)acrylamides engineered with hydrolyzable carbonate side chains. B. De Geest, S. Kasmi
- PMSE 513. Protein-induced supramolecular disassembly of amphiphilic polypeptide nanoassemblies. M. Molla, P. Prasad, S. Thayumanavan
- PMSE 514. Tuning cell behaviour by nanoparticles shape. L. Rizzello, A.S. Joseph, C. De Pace, G. Battaglia
- PMSE 515. Micellar thrombin-binding aptamers as reversible nanoparticle anticoagulants. A. Roloff, A.S. Carlini, N.C. Gianneschi
- PMSE 516. Light activation and triggered drug release of multi-agent loaded nanoconstructs for simultaneous suppression of multiple treatment escape pathways in the pancreatic cancer. B.B. Sears, B.Q. Spring, L. Zheng, T. Hasan
- PMSE 517. Dendrimer-modified MoS<sub>2</sub> nanoflowers for combinational gene silencing and photothermal therapy of tumors. X. Shi, L. Kong, L. Xing, C. Alves, L. Du
- PMSE 518. Drug-eluting magneto-fluorescent nanoparticles for combined imaging and therapy. A. Simchi, Y. Wang
- PMSE 519. Engineering the local lymph node microenvironment to promote immunological tolerance. L.H. Tostanoski, T. Simon, J. Bromberg, C. Jewell
- PMSE 520. Self-assembled transferin-polymer conjugate nanocarriers for the delivery of therapeutics. A. Wong, A.P. Johnston, G.K. Such
- PMSE 521. Helical antimicrobial polypeptides with radial amphiphilicity. M. Xiong, J. Cheng
- PMSE 522. Enteric elastomer enables safe gastric retention and extended oral drug delivery for improved medication adherence. S. Zhang, R.S. Langer
- Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications**  
Sponsored by POLY, Cosponsored by PMSE
- WEDNESDAY MORNING**
- Section A**
- Moscone Center  
Esplanade Ballroom 303
- Biomaterials for Immunotherapy**
- H. Cheng, D. J. Irvine, *Organizers*  
Z. Gu, *Organizer, Presiding*  
H. Liu, J. Moon, *Presiding*
- 8:30 PMSE 523.** Phototherapy-triggered cancer immunotherapy with nanoparticles. S. Liu
- 9:00 PMSE 524.** Nanotechnology-mediated delivery of nucleic acids for cancer therapy. J. Shi
- 9:30 PMSE 525.** Enhancing cancer immunotherapy using responsive biomaterials. L. Tang
- 10:00 PMSE 526.** Transiently thermosensitive tetrahydropyran/furanylated-polyacrylamides: Synthesis, self-assembly, acid-triggered degradation and formulation of Amphotericin B as a vaccine adjuvant. B. De Geest, S. Van Herck
- 10:15 Intermission.**
- 10:30 PMSE 527.** Modular nanostructures for immunotherapy. C.A. Mirkin

‡Cooperative Cosponsorship

**11:00 PMSE 528.** Nanolayer assembly as a platform for immunomodulatory release systems. P.T. Hammond

**11:30 PMSE 529.** Ionic polyphosphazenes and their potential as immunotherapies. A.K. Andrianov

## Section B

Moscone Center  
Esplanade Ballroom 304

### Polymers under Deformation

#### AFM & Nanoindentation Studies

*Cosponsored by MPPG<sup>2</sup> and POLY<sup>2</sup>*

*Financially supported by Asylum Research, ExxonMobil Chemical Company*

A. I. Norman, *Organizer*

D. Yablon, *Organizer, Presiding*

**8:30 PMSE 530.** Mechanical properties of polymers determined by nanoindentation. A. Bushby

**9:00 PMSE 531.** Confined plasticity in polymer thin films. G.L. Cross, O. Brazil, J. de Silva, M. Chowdhury, W. Shi, W. Oliver, J.B. Pethica

**9:30 PMSE 532.** Dynamic mechanical behavior of thermoset silica-filled rubber blends. C. Dai, Y. Chen, Y. Liu, J. Wang, F. Lo, C. Hsieh

**10:00** Intermission.

**10:10 PMSE 533.** AFM methods for aqueous probing of lubricious gel coatings for medical devices. G.D. Haugstad, M. Zeng, C. Colling, A. McCormick

**10:40 PMSE 534.** Importance of the mechanical model used for the interpretation of atomic force microscopy measurements of the mechanical properties of nanofibers. J. Hutter, S. Makaremi, W. Wan

**11:10 PMSE 535.** Pressing and sliding on gels and brushes. C.H. Mathis, R. Simic, L. Isa, N.D. Spencer

**11:40 PMSE 536.** Deformation rate dependence of Atomic Force Microscope based nanomechanical measurements. B. Pittenger, J. He, L. Huang, T. Mueller, P. De Wolf

## Section C

Moscone Center  
Esplanade Ballroom 305

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

J. L. Almodovar, P. Byrley, *Presiding*

**8:30 PMSE 537.** Epitaxial, ultra-thin gold coating as a barrier to prevent oxidation of silver nanowires. Y. Zhu, X. Ma, S. Kim, P. Byrley, M. Liu, R. Yan

**8:50 PMSE 538.** Coordinate immobilization of Silver Nanoparticles on Aminated Polyethersulfone (AgNPs-APES) composite membrane for prolong and controlled silver ion (Ag<sup>+</sup>) release. M. Saliman Haider, G.N. Shao, K. Hee Taik

**9:10 PMSE 539.** Bioinspired graphene-based nanocomposites via synergistic toughening. Q. Cheng

**9:30 PMSE 540.** Nanohybrid films of functional biopolyimides with metal oxides by simple surface-engineering. S. Dwivedi, T. Kaneko

**9:50 PMSE 541.** Multi-walled carbon nanotubes –Sulfur/High-Density Polyethylene (HDPE) multi-composites: Synthesis, crystallization, morphology and thermo-mechanical properties. K. Jena, S. Al Hassan

**10:10** Intermission.

**10:25 PMSE 542.** Engineering nano-structured hydroxyapatite/collagen composite scaffolds by green electrospinning. J.L. Almodovar, D. Castilla, M. Maldonado, P. Sundaram

**10:45 PMSE 543.** Scalable manufacturing of biomimetic moldable hydrogels for industrial applications. E.A. Appel

**11:05 PMSE 544.** Withdrawn.

**11:25 PMSE 545.** CO<sub>2</sub>-selective composite membranes for pre-combustion carbon capture. J. Bachman, J.R. Long

**11:45 PMSE 546.** Orthogonal oxime and Diels-Alder hyaluronan hydrogels as tunable matrices for multicellular tumour spheroid formation. A.E. Baker, R.Y. Tam, M.S. Shiochet

## Section D

Moscone Center  
Esplanade Ballroom 306

### Innovations in Drug Delivery Systems & Combination Products

#### Novel Drug Delivery

A. S. Kulshrestha, *Organizer*

S. Sridharan, *Organizer, Presiding*

S. R. Raghavan, *Presiding*

**8:30 PMSE 547.** Onion-like multilayered capsules based on stimuli-responsive polymers: A new design for multi-step release of drugs. S.R. Raghavan, B. Zarket

**8:55 PMSE 548.** Electroresponsive drug delivery using conducting polymer nanoparticles. D. Samanta, N. Hosseini-Nassab, R.N. Zare

**9:20 PMSE 549.** Multifunctional poly-ether-based lipids for liposomal nano drug carrier systems. A. Danner, H. Frey

**9:45 PMSE 550.** Drug-eluting devices fabricated using the 3D printing technique Continuous Liquid Interface Production (CLIP) for controlled release applications. C.J. Bloomquist, R. Jansuziewicz, J.C. Luft, S.J. Mecham, A.Z. Wang, J.M. Desimone

**10:10** Intermission.

**10:20 PMSE 551.** Core cross-linked polypept(o)ide-based nanostructures: A novel platform for drug delivery. K. Klinker, T. Bauer, O. Schäfer, D. Huesmann, L. Braun, M. Barz

**10:45 PMSE 552.** Optimizing drug release using silicone based implantable drug delivery systems. N. Deorkar

**11:10 PMSE 553.** Magnetic nanostructures decorated hydrogels as a theranostic platform for biomedical applications. V. Nandwana, S. Ryo, T.S. Zheng, M.M. You, V.P. Dravid

## Section E

Moscone Center  
Esplanade Ballroom 307

### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

*Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd*

C. Di, L. Fang, J. Mei, *Organizers*

C. Wang, *Presiding*

**8:00 PMSE 554.** Controlling the active layer microstructure through conjugated block copolymers for solar cells and transistors. E. Gomez, B. Smith, M. Aplan, Y. Lee

**8:30 PMSE 555.** Complementary semiconducting polymer blends melt-processed at 130°C for organic field-effect transistors with hole mobility approaching 1.0cm<sup>2</sup>/Vs. A. Gumyusenge, X. Zhao, Y. Zhao, J. Mei

**8:45 PMSE 556.** Withdrawn.

**9:15 PMSE 557.** Inkjet printing high-resolution nanoparticle patterns by controlling substrate rheology. M. Li

**9:35 PMSE 558.** Withdrawn.

**9:55** Intermission.

**10:15 PMSE 559.** Chemical blending vs physical blending: Comparing two approaches for polymer solar cells. Q. Zhang, M.A. Kelly, L. Yan, W. You

**10:45 PMSE 560.** Surface-directed assembly for large-area coating of highly-aligned conjugated polymer thin films. E. Mohammadi, C. Zhao, Y. Meng, J. Mei, J. Zuo, D. Shukla, Y. Diao

**11:00 PMSE 561.** Effect of chain length and comonomers/regiodefects on the stability of liquid crystalline phases in semiconducting polymers. C.R. Snyder

**11:20 PMSE 562.** Interface engineering of graphene for enhanced photo-voltaic performance. Y. Wang

**11:40 PMSE 563.** Removable and recyclable conjugated polymers for highly selective and high-yield dispersion and release of low-cost carbon nanotubes. T. Lei, Z. Bao

## Section F

Moscone Center  
Esplanade Ballroom 308

### Recent Advances in Multiblock Copolymers

#### Synthesis

*Cosponsored by POLY*

*Financially supported by ExxonMobil Chemical Company, The Dow Chemical Company*

Z. Bai, B. K. Long, J. Zhang, *Organizers*

C. Bates, *Presiding*

**8:00** Introductory Remarks.

**8:05 PMSE 564.** Sequence controlled block copolymers by RAFT polymerisation. S. Perrier

**8:35 PMSE 565.** Design and synthesis of acrylate-based sulfonated super-elastomers. K. Misichronis, W. Wang, Y. Wang, J.W. Mays, T. Saito, S. Cheng

**9:05 PMSE 566.** Novel segmented Polyhydroxyurethane (PHU): Control of naphase separation to achieve properties unlike and like those of segmented polyurethane and the potential to overcome challenges associated with recyclability of network PHU. J.M. Torkelson

**9:35** Intermission.

**9:55 PMSE 567.** Modifications to ethylene oxide /1,2-butylene oxide-based block copolymers and their effects on micellar behavior. K. Harris, E. Keene, V. Prasad

**10:25 PMSE 568.** Complex ordered phases via designed multi-block copolymers. A. Shi

**10:55 PMSE 569.** Architecture effects in block polymer self-assembly. C. Bates

**11:25 PMSE 570.** Synthetic strategies for preparing (AB)<sub>n</sub> multiblock copolymers combining chain- and step-growth polymerization. K.A. Cavicchi

**11:55** Concluding Remarks.

## Section G

Moscone Center  
Esplanade Ballroom 309

### Molecular Engineering of Peptide Assembly

#### Peptides at Surface & Polypeptides

*Financially supported by ACS Biomacromolecules*

H. Cui, S. L. Perry, *Organizers*

A. Kros, M. V. Tirrell, *Organizers, Presiding*

**8:15 PMSE 571.** Regulation and surface confinement of dynamic supramolecular peptide assemblies. P. Besenius, D. Spitzer, P. Ahlers, H. Frisch

**8:45 PMSE 572.** Peptide-enhanced surface deposition of polymers and polymer nanoparticles. H.A. Klok

**9:15 PMSE 573.** Designer synthetic polypeptides for cancer therapeutics. P.T. Hammond

**9:45** Intermission.

**10:00 PMSE 574.** Patterning and structure in polypeptide-based coacervates. S.L. Perry

**10:30 PMSE 575.** Effect of surfaces and osmolytes in modulating peptide assembly. J.E. Shea

**11:00 PMSE 576.** Synthesis of brush polypeptides. R. Baumgartner, H. Fu, Z. Song, Y. Lin, J. Cheng

**11:30 PMSE 577.** Creating nanostructured films with high molecular weight periodically sequenced polypeptides. R.S. Tu

### Bio-based Gels & Porous Materials

#### Biopolymer Hydrogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

#### Advances in Polysaccharides: Practice & Applications

#### Novel Biocatalytic & Biopolymeric Approaches

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG<sup>2</sup>, PMSE and POLY*

#### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Electrolytes & Interface

*Sponsored by ENFL, Cosponsored by MPPG<sup>2</sup> and PMSE*

#### Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications

#### Self-Healing Materials & Networks

*Sponsored by POLY, Cosponsored by PMSE*

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

#### Polymerization, Coordination Chemistry & Interfacial Catalysis

Sponsored by INOR, Cosponsored by PMSE

## WEDNESDAY AFTERNOON

### Section A

Moscone Center  
Esplanade Ballroom 303

#### Biomaterials for Immunotherapy

Z. Gu, D. J. Irvine, *Organizers*  
H. Cheng, *Organizer, Presiding*  
J. Shi, *Presiding*

**1:30 PMSE 578.** Engineering silk-based microneedles for enhanced vaccines and cancer immunotherapy. D.J. Irvine

**2:00 PMSE 579.** Designing biomaterials for CAR-T immunotherapy. P. Wang

**2:30 PMSE 580.** Local delivery of checkpoints antibodies. Z. Gu, C. Wang, Y. Ye

### Section B

Moscone Center  
Esplanade Ballroom 304

#### Polymers under Deformation

#### Control of Deformation across the Length Scale for Advanced Polymer Materials

Cosponsored by MPPG<sup>2</sup> and POLY<sup>2</sup>

Financially supported by Asylum Research, ExxonMobil Chemical Company

A. I. Norman, D. Yablon, *Organizers*  
E. L. Heeley, Y. Yang, *Presiding*

**1:30 PMSE 581.** Mechanical annealing and scraping of ferroelectric polymers at the nanoscale. S. Hong

**2:00 PMSE 582.** Development of pressure-sensitive amorphous materials bearing TGAQ motifs. Y. Ren, S. Lee, J.M. Christensen, N. Plotnikov, M. Burgess, T.J. Martinez, D.D. Dlott, J.S. Moore

**2:20 PMSE 583.** Determining the electromechanical response mechanism of nanostructured ionic block copolymers under an applied electric field. B.S. Lokitz, J. Dugger, M. Chen, T.E. Long, R. Kumar, J. Browning

**2:40 PMSE 584.** Investigation into stress whitening production caused by coatings additives. E. Radley, C. Lowe, D. Gethin

**3:00** Intermission.

**3:10 PMSE 585.** Mechanochromic and photochromic fluorescence in epoxy. R.E. Toivola, S. Jang, D. Mannikko, S. Stoll, B. Flinn, A.K. Jen

**3:30 PMSE 586.** Effect of uniformly applied force and molecular characteristics of a polymer chain on its adhesion to graphene and carbon nanotube substrates. S. Pattanayek

**3:50 PMSE 587.** Omnidirectional nonlinear elasticity in liquid crystal elastomers. A.D. Auguste, N.P. Godman, T.J. White

**4:10 PMSE 588.** Reliability of polymer backsheet structures in photovoltaic modules. P. Yuen, R. Dauskardt

### Section C

Moscone Center  
Esplanade Ballroom 305

#### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*  
E. Kynaston, *Presiding*

**1:30 PMSE 589.** Effects of the temperature and UV intensity levels on degradation behaviors of high-density polyethylene. J. Kim, H. Hsueh, D.L. Hunston, D. Jacobs, L.N. Perry, C.C. White, L. Sung

**1:50 PMSE 590.** Natural phenolic polymers for multi-functionalization of surface of fibers using laccase. S. Kim, H. Lee, J. Kim, F. Oliveira, J. Nakamatsu

**2:10 PMSE 591.** Synthesis and characterization of cardanol based vinyl ester resins. E. Kinaci, E. Can, J.J. La Scala, G.R. Palmese

**2:30 PMSE 592.** Tapping mode based AFM technique for quantitative characterization of mechanical properties of polymers. M. Kocun, A. Labuda, R. Proksch

**2:50 PMSE 593.** Moldable photo-responsive elastomers from thermoreversible networks formed by triblock copolymer self-assembly. Z. Kurji, E. Bernhardt, M.G. Kuzyk, J.A. Kornfield

**3:10** Intermission.

**3:25 PMSE 594.** Patchy nanofibers from the self-assembly of a conjugated diblock copolymer. E. Kynaston, Y. Fang, J. Manion, N. Obhi, J. Howe, D.F. Perepichka, D.S. Seferos

**3:45 PMSE 595.** Multi-scale coarse-graining with effective polarizabilities. P.G. Lafond, T.W. Sirk, J. Andzelm, S. Izvekov

**4:05 PMSE 596.** Sulfonated Diels-Alder poly(phenylene) gas transport phenomena: Effect of chemistry and counterion. T.D. Largier, F. Huang, C.J. Cornelius

**4:25 PMSE 597.** Temperature-dependent shape and morphology transformation of block copolymer particles by controlled assembly of thermoresponsive polymers. J. Lee, K. Ku, J. Shin, B. Kim

**4:45 PMSE 598.** Design and synthesis of zwitterionic polyphosphoester-based coating materials for <sup>64</sup>Cu doped Au nanoclusters towards advanced *in vivo* pharmacokinetics. R. Li, G. Heo, L. Su, H. Wang, Y. Song, G. Sun, Y. Liu, K.L. Wooley

### Section D

Moscone Center  
Esplanade Ballroom 306

#### Innovations in Drug Delivery Systems & Combination Products

#### Biodegradable Vehicles for Drug Delivery

A. S. Kulshrestha, S. Sridharan, *Organizers*, *Presiding*

**1:30 PMSE 599.** Development of a gemcitabine-polymer conjugate with enhanced cytotoxicity against a pancreatic cancer cell line. F. Joubert, S. Perrier, G. Pasparakis

**1:55 PMSE 600.** Nitric oxide-releasing alginate as a biodegradable antibacterial scaffold. M.R. Ahonen, D.J. Suchyta, M. Schoenfish

**2:20 PMSE 601.** Polylactide-based multi-functional biodegradable polymer-drug conjugates. H. Sun, R. Zhang, W. Cheng, A. Commisso, M. Capeling, C. Cheng

**2:45** Intermission.

**2:55 PMSE 602.** Synthesis and self-assembly of amino functional AB-type biodegradable block copolymers. F. Karagoz, R. Dorrestein, M. Klapper

**3:20 PMSE 603.** Biodegradable, enzyme-responsive nanoparticles for acute myocardial infarction. G.M. Policastro, D. Wright, N.C. Gianneschi, K. Christman

**3:45 PMSE 604.** Pro-Antimicrobial Networks with Degradable Acetals (PANDAs) prepared via thiol-ene photopolymerization. D. Amato, D.V. Amato, D.L. Patton

### Section E

Moscone Center  
Esplanade Ballroom 307

#### Synthesis, Processing & Device Engineering of Polymeric Electronic Materials

Financially supported by Tosoh, Japan Analytical Industry (JAI) Co., Ltd

C. Di, L. Fang, J. Mei, *Organizers*  
Y. Diao, *Presiding*

**1:30 PMSE 605.** Materials and measurements for flexible electronics. D. DeLongchamp

**2:00 PMSE 606.** Mechanically adaptive electronic polymers for transparent self-healing artificial muscle. C. Wang

**2:20 PMSE 607.** Mechanical properties of organic semiconductors for mechanically stable and intrinsically stretchable solar cells. D.J. Lipomi

**2:50 PMSE 608.** Inducing elasticity through oligo-siloxane crosslinks for intrinsically stretchable semiconducting polymers. G. Wang, L. Shaw, J. Xu, T. Kurosawa, B.C. Schroeder, J. Oh, S.J. Benight, Z. Bao

**3:05 PMSE 609.** Self-healable electrical insulation for high voltage aircraft. T. Williams, E. Shin, D. Scheiman, M. Lizzano, P. Mensah, J. Walker

**3:20** Intermission.

**3:40 PMSE 610. Award Address** (ACS Award for Team Innovation sponsored by ACS Corporation Associates). Development of photo-definable benzocyclobutene dielectric polymers: An enabling material for integrated circuit packaging. R. Devries, P. Garrou, C.E. Mohler, E. Moyer, T. Stokich

**4:10 PMSE 611.** Highly stretchable polymer semiconductor films through nanoconfinement effect. J. Xu, S. Wang, Z. Bao

**4:25 PMSE 612.** All-solution-processed stretchable transistor arrays based on polymer semiconductor and dielectric. S. Wang, F. Molina Lopez, J. Xu, J. Liu, J. Chung, Z. Bao

**4:40 PMSE 613.** Effects of sterilization on self-softening thiol-ene/acrylate polymers for bioelectronics. M. Ecker, V. Danda, J. Pancrazio, W. Voit

### Section F

Moscone Center  
Esplanade Ballroom 308

#### Recent Advances in Multiblock Copolymers

*Characterization*  
Cosponsored by POLY

Financially supported by ExxonMobil Chemical Company, The Dow Chemical Company

B. K. Long, J. Zhang, *Organizers*  
Z. Bai, *Organizer, Presiding*

**1:00** Introductory Remarks.

**1:05 PMSE 614.** Control of gelation and syneresis of aqueous cellulosic ether materials. R.L. Sackmler, C.E. Mohler, R. Adden, M. Brackhagen, J.D. Moore, B. Huebner-Keese

**1:35 PMSE 615.** Thermoplastic elastomers from linear and star polymers containing polyethylene blocks. R.A. Register, A.B. Burns

**2:05 PMSE 616.** Bicontinuous morphologies from binary blends of narrow dispersity block polymers. M.K. Mahanthappa

**2:35 PMSE 617.** Dynamic properties of polyolefin block copolymers prepared through living coordination polymerization. L.R. Sita

**3:05** Intermission.

**3:25 PMSE 618.** Strain hardening in immiscible PE/PP blends via interfacial reinforcement with PE-cb-PP comb-block copolymers. C. Lopez-Barron, A.H. Tsou, P. Jiang, D.J. Crowther

**3:55 PMSE 619.** Using crystallisation driven assembly to prepare 2-dimensional nanomaterials. R.K. O'Reilly

**4:25 PMSE 620.** Structure, phase behavior, and rheology of block copolymers in crosslinkable acrylate monomers. Z. Bai, J. Huang, V. Ginzburg, M. Williams, K. Penkala, J. Joo, C. Taylor, L. Chen, C.J. Tucker

**4:55** Concluding Remarks.

### Section G

Moscone Center  
Esplanade Ballroom 309

#### Molecular Engineering of Peptide Assembly

#### Peptides for Medicine

Financially supported by ACS Biomacromolecules

A. Kros, M. V. Tirrell, *Organizers*

H. Cui, S. L. Perry, *Organizers, Presiding*

**1:30 PMSE 621.** Supramolecular polypeptide materials for modulating immune and inflammatory processes. J. Collier

**2:00 PMSE 622.** Tit for tat: Design evolution of anticancer peptides from self-assembled hydrogels and how cancer cells gain resistance to their action. J.P. Schneider

**2:30 PMSE 623.** Self-assembling multidomain peptides for tissue regeneration. J.D. Hartgerink

**3:00** Intermission.

**3:15 PMSE 624.** Designable peptide assemblies. V.P. Coticello

**3:45 PMSE 625.** Designing peptides for use in regenerative medicine and biosensing. M. Stevens

4:15 PMSE **626**. Peptide-polymer and asymmetric peptide assemblies. S.I. Stupp, L.C. Palmer, Z. Yu

4:45 PMSE **627**. Engineering peptide hydrogels: From fibres to networks. A.F. Miller, A. Saiani

5:15 Concluding Remarks.

## Bio-based Gels & Porous Materials

### Biopolymer Organogels

Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY

### Advances in Polysaccharides: Practice & Applications

### Novel Materials & Methodologies

Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG<sup>+</sup>, PMSE and POLY

### Innovative Chemistry & Materials for Electrochemical Energy Storage

### Anode Materials & Li-S

Sponsored by ENFL, Cosponsored by MPPG<sup>+</sup> and PMSE

### Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications

### Biomaterials

Sponsored by POLY, Cosponsored by PMSE

### ACS Award in Polymer Chemistry: Symposium in honor of Murugappan Muthukumar

Sponsored by POLY, Cosponsored by PMSE

### 2017 Priestley Medalist: Symposium in honor of Tobin J. Marks

### Catalysis: Characterization, Computations & Reactivity

Sponsored by INOR, Cosponsored by PMSE

## WEDNESDAY EVENING

### POLY/PMSE Plenary Lecture & Awards

Sponsored by POLY, Cosponsored by PMSE

## THURSDAY MORNING

### Section A

Moscone Center  
Esplanade Ballroom 303

### Biomaterials for Immunotherapy

H. Cheng, Z. Gu, D. J. Irvine, *Organizers*

E. A. Scott, L. Tang, Y. Yu, *Presiding*

8:30 PMSE **628**. Functionalized polymersomes as carriers for immune activation. R.W. Zentel, S. Schuerer, R. Krini, M. Scherer, M. Helm, M. Bros, R. Ose, H. Jonuleit

8:45 PMSE **629**. Immune-modulator polymersomes. A. Poma, C. Lopez Vasquez, L. Rizzello, Y. Zhu, D. Cecchin, J. Gaitzsch, I. Romano, E. Mele, C.K. Williams, G. Battaglia

9:00 PMSE **630**. Rationalization of a lipid-polymeric nanoparticle-based nicotine nanovaccine for immunotherapy against nicotine addiction: A focus on haptan localization. Z. Zhao, T. Harmon, P. Pentel, C. Zhang

9:15 PMSE **631**. Engineering anti-cancer immunity using polymeric nanoparticles that transform into synthetic cell surface receptors in response to intracellular pH. B. De Geest, R. De Coen

9:30 PMSE **632**. Enhanced cancer immunotherapy by microneedle patch-assisted delivery of anti-PD1 antibody. Z. Gu, C. Wang, Y. Ye

9:45 Intermission.

10:00 PMSE **633**. Synthetic polymers delivering peptide neoantigens and TLR-7/8 agonists as personalized cancer vaccines. G. Lynn, C. Sedlik, R. Laga, O. Lantz, R. Seder

10:15 PMSE **634**. Tunable glycopolyptides bearing pattern-recognition motifs affect phagocytosis and cytokine expression. J. Kramer, M. Zhou, C. Delaveris, C.R. Bertozzi

10:30 PMSE **635**. Poly(pept)oid based tumor immune therapy: Combining vaccination and abolishment of immune tolerance. M. Barz

10:45 PMSE **636**. Intracellular unfolding nanoparticles for the delivery of immune-stimulatory cues towards anticancer immunity. L. Nuhn, B. De Geest

### Section B

Moscone Center  
Esplanade Ballroom 304

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

R. Y. Tam, H. Wang, *Presiding*

8:30 PMSE **637**. Stimuli-responsive hyaluronan-based hydrogels provide biochemically-defined, biomimetic scaffolds for 3D cell culture. R.Y. Tam, S. Fisher, A.E. Baker, L. Smith, L. Julian, J. Yockell-Lelievre, W. Stanford, M.S. Shoichet

8:50 PMSE **638**. Effect of branching chain parameter on rheological behavior of comb-like (co)polymers with high branching degree. T. Tang

9:10 PMSE **639**. Effects of pendant alkyl chain length on water barrier properties of epoxy/amine thermosets. J. Vergara, G.R. Palmese

9:30 PMSE **640**. Toughening hybrid nanocomposites with molecularly confined polymers by chemically tuning the polymer-surface interaction. C. Wang, S.G. Isaacson, K. Lioni, W. Volksen, T.P. Magbitang, R. Dauskardt, G. Dubois

9:50 Intermission.

10:05 PMSE **641**. Novel polyamide liquid core-shell microcapsules responsive to solvent environments. H. Wang, S.C. Zimmerman, J.M. Grolman, J. Moore

10:25 PMSE **642**. Architectural effect of organic nanoparticles on block copolymer thin film orientation. H. Wang, S. Kim, A. Khan, J. Huh, J. Bang

10:45 PMSE **643**. Air-triggered self-sealing polymeric materials spontaneously formed at liquid/air interface. Y. Wang, H. Lee

11:05 PMSE **644**. Smart microgels as functional valves for detection of Pb<sup>2+</sup>. Y. Wang, Z. Liu, H. Peng, L. Zhang, W. Wang, X. Ju, R. Xie, L. Chu

11:25 PMSE **645**. Polymeric exfoliating dispersants of poly(oxyethylene)-imide-amide structures for waterborne delaminating graphite into graphene and uses in electrostatic-heat dissipation and flexible conductive films. G. Wang, S. Shen, W. Wang, W. Lo, C. Ho, Y. Wang, J. Lin

### Section C

Moscone Center  
Esplanade Ballroom 305

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

M. J. Worthington, K. Yang, *Presiding*

8:30 PMSE **646**. Formation of well-defined, functional nanotubes via osmotically induced shape transformation of biodegradable polymersomes. D.S. Williams, L.K. Abdelmohsen, D.A. Wilson, J. van Hest

8:50 PMSE **647**. Heterogeneous nucleation of lamella polypropylene on SWNT-alumina hybrid platelets for discontinuous composite reinforcement. Z. Winter, J. Faust, M. Minus

9:10 PMSE **648**. Renewable polysulfides for mercury capture and environmental remediation. M.J. Worthington, J.M. Chalker

9:30 PMSE **649**. Producing low reflectance coatings utilizing synergistic effects of polymer phase separation. S.L. Giles, N.W. Heller, C.R. Clayton, J.H. Wynne

9:50 Intermission.

10:05 PMSE **650**. Withdrawn.

10:25 PMSE **651**. Combined material and photochemical printing with cantilever-free polymer tip arrays. Z. Xie, C.A. Mirkin

10:45 PMSE **652**. Environmentally friendly high-performance furan-based polyimides. S. Yadav, J.J. La Scala, J.M. Sadler, G.R. Yandek, G.R. Palmese

11:05 PMSE **653**. Withdrawn.

11:25 PMSE **654**. Diels-Alder rapid extrusion 3D printing of melt-processable thermoset polymers. K. Yang, J. Grant, W. Archer, W. Voit

### Section D

Moscone Center  
Esplanade Ballroom 306

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

I. Yilgor, L. Zou, *Presiding*

8:30 PMSE **655**. Stiffer but more healable exponential layered assemblies with boron nitride nanoplatelets. M. Yang

8:50 PMSE **656**. Hydrolysable polyureas based on hindered urea bonds. Y. Yang, H. Ying, J. Cheng

9:10 PMSE **657**. Chemistry in porous polymers: Fine tuning chemical interactions. C.T. Yavuz, V. Rozyyev, Y. Song, N.A. Dogan, Y. Hong

9:30 PMSE **658**. Fabrication of microporous PLA foams via thermally induced phase separation and solvent exchange. I. Yilgor, E. Yilgor, O.C. Onder

9:50 Intermission.

10:05 PMSE **659**. 3D printed bioceramic/biodegradable polymer scaffolds for bone tissue engineering. J. Yu, Y. Xu, S. Li, G.V. Seifert, M. Becker

10:25 PMSE **660**. One-pot synthesis of inorganic nanoparticle vesicles via surface-initiated polymerization-induced self-assembly. Y. Zheng, Y. Huang, Z. Abbas, B.C. Benicewicz

10:45 PMSE **661**. Design and synthesis of amine-functionalized Porous Polymer Networks (PPNs) for carbon capture. L. Zou, H. Zhou

11:05 PMSE **662**. Utilizing hard transparent arrays for polymer pen lithography for high resolution patterning. J. Hedrick, K.A. Brown, E.J. Kluender, M. Cabezas, P. Chen, C.A. Mirkin

11:25 PMSE **663**. Enhanced piezoelectric response of electrospun PVDF with ZnO nanorods. M. Kim, J. Fan, Y. Wu

### Section E

Moscone Center  
Esplanade Ballroom 307

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

M. Graffeo, P. Samanta, *Presiding*

8:30 PMSE **664**. Dynamic hydrogels with tunable mechanics and their biological applications. J. Lou, F. Liu, Y. Xia

8:50 PMSE **665**. Fatigue of injection molded and 3D-printed polycarbonate urethane in solution. A. Miller, D.L. Safranski, K.E. Smith, D.G. Sycks, R.E. Guldberg, K. Gall

9:10 PMSE **666**. Homogenous nucleated crystallization of poly(ethylene oxide) under confinement in electrospun nanofibers of polystyrene/poly(ethylene oxide) blends. P. Samanta

9:30 PMSE **667**. Rheological characteristics of hairy particles in oscillatory shear flow. W. Xiong, S. Li, X. Wang

9:50 Intermission.

10:05 PMSE **668**. Kirigami nanocomposites as strain-tunable diffraction gratings. L. Xu, N. Kotov

10:25 PMSE **669**. Synthesis and properties of quaternized polyethersulfones and their applications as alkaline anion exchange. J. Chen, P. Chen, H. Chen

10:45 PMSE **670**. Ion transport and nanoscale morphology in cyclopropenium-based polymerized ionic liquids. J. Freyer

11:05 PMSE **671**. Drug delivery: Accelerating the drug development pathway for increased speed to patient. M. Graffeo

11:25 PMSE **672**. Single particle fluorescence microscopy reveals unexpected photobrightening in dye aggregates. D. Hinton, J. Ng, R.H. Goldsmith

### Section F

Moscone Center  
Esplanade Ballroom 308

### Recent Advances in Multiblock Copolymers

### Application

Cosponsored by POLY

Financially supported by ExxonMobil Chemical Company, The Dow Chemical Company

Z. Bai, B. K. Long, J. Zhang, *Organizers*

A. Lane, *Presiding*

8:00 Introductory Remarks.

**8:05 PMSE 673.** Block copolymer-directed assembly of pharmaceutical nanoparticles: Effects of Mw and chemistry on assembly, delivery, and in vivo performance. R.F. Pagels, H. Lu, B.K. Wilson, S.M. D'Addio, S.M. Ansell, L.D. Mayer, C. Vauthier, A. Pietrangelo, A. Panagiotopoulos, **R.K. Prudhomme**

**8:35 PMSE 674.** Janus composites and interfacial engineering. **Z. Yang**

**9:05 PMSE 675.** Orientation control in thin films of a high- $\chi$  block copolymer with a surface active embedded neutral layer. **J. Zhang**, P.D. Hustad, P. Trefonas

**9:35 PMSE 676.** Polypropylene-based olefin block copolymers as compatibilizers for polyethylene and polypropylene. **Y. Hu**

**10:05** Intermission.

**10:25 PMSE 677.** Multiblock copolymer phase separation in thermoset polyurethanes. **K. Aou**

**10:55 PMSE 678.** Strengthening thermosensitive ABC linear triblock copolymer micellar hydrogels with thermosensitive hairy nanoparticles. **B. Zhao**

**11:25 PMSE 679.** Aligned 5 nm block copolymer lamellae for high resolution lithography applications. **A. Lane**, X. Yang, M.J. Maher, G. Blachut, Y. Asano, Y. Someya, S. Sirard, A. Mallavarapu, C.J. Ellison, C.G. Willson

**11:55 PMSE 680.** Bioorthogonal synthesis of protein mimetic multiblock copolymers. **X. Jia**

**12:25** Concluding Remarks.

## Section G

Moscone Center  
Esplanade Ballroom 309

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

T. Hussain, C. Zhu, *Presiding*

**8:30 PMSE 681.** Fabrication highly conductive copper powder and films by chemical methods with polymer dispersant. **P. Huang**, J. Lin, Y. Leu

**8:50 PMSE 682.** Establishment of correlation between MWCNTs dimensions and electrical character of MWCNTs based polymer composites. **T. Hussain**, A. Alvi, A. Mujahid

**9:10 PMSE 683.** Production of core-sheath structured nanofibrous membranes for high temperature fuel cells. **S. Jahangiri**, I. Aravi, Y.Z. Menciloglu, L. Isikel Sanli, E. Ozden Yenigun

**9:30 PMSE 684.** Crystalline MoOx thin-films as hole transport layer in organic solar cells. **A. Cauduro**, R. dos Reis, M. Ahmadpour, G. Chen, A. Schmid, C. Méthivier, N. Witkowski, H. Rubahn, **M. Madsen**

**9:50** Intermission.

**10:05 PMSE 685.** Uniformly distributed heteroatoms containing two-dimensional networks. **J. Mahmood**, J. Baek

**10:25 PMSE 686.** Role of enhanced hydrogen bonding of selectively reduced graphite oxide in fabrication of poly(vinyl alcohol) nanocomposites in water as EMI shielding material. **K. Manna**

**10:45 PMSE 687.** Anti-icing property of transparent heater with super-repellency and electrothermogenesis exhibited by PEDOT:PSS/cyanoacrylate composite nanoparticles. **S. Shiratori**, T. Matsubayashi, M. Tenjimbayashi

**11:05 PMSE 688.** Host-guest self-assembled surface with controllable switch for bacteria killing and detaching. **Z. Shi**, W. Zhao

**11:25 PMSE 689.** Conformational control of  $\pi$ -conjugated molecules using hydrogen bonds. **C. Zhu**, A. Mu, Z. Guo, L. Fang

## Bio-based Gels & Porous Materials

### Aero-, Cryo- & Xerogels

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Advances in Polysaccharides: Practice & Applications

#### New Functional Materials

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG<sup>†</sup>, PMSE and POLY*

### Innovative Chemistry & Materials for Electrochemical Energy Storage

#### Electrochemical Catalysis & Energy Conversion

*Sponsored by ENFL, Cosponsored by MPPG<sup>†</sup> and PMSE*

### Smart Polymeric Materials from Cyclodextrins: Novel Designs & Applications

#### Stimuli-Responsive Polymers & Polymer Processing

*Sponsored by POLY, Cosponsored by PMSE*

## THURSDAY AFTERNOON

### Section A

Moscone Center  
Esplanade Ballroom 303

### General Papers/New Concepts in Polymeric Materials

M. Grunlan, *Organizer*

R. C. Steinhart, S. A. Sydlík, *Presiding*

**1:30 PMSE 690.** Improvement in dynamic mechanical and barrier properties of innovative polymer clay nanocomposites based on polystyrene matrix. **I. Soltani**, R.J. Spontak

**1:50 PMSE 691.** Effect of fatty acid chain length in amidoamine crosslinkers on material properties of epoxy systems. **A. Sridhar**, J. Vergara, C. Abrams, G.R. Palmese

**2:10 PMSE 692.** Facile *in-situ* polymer brush characterization using whispering gallery mode sensors. **A. Stanton**, R.C. Bailey

**2:30 PMSE 693.** Discovering the cellular origin of agonist synergies towards the development of better vaccines. **R.C. Steinhart**, B. Moser, A. Esser-Kahn

**2:50** Intermission.

**3:05 PMSE 694.** Efficient dispersion of mineral hemostatics in a poly-HIPE scaffold for severe wound treatment. **B. Streifel**, J. Lundin, C.L. McGann, J.H. Wynne

**3:25 PMSE 695.** Functional triblock bottlebrush polymers: From synthesis toward biomedical applications. **L. Su**, G. Sun, K.L. Wooley

**3:45 PMSE 696.** Polymer complexation and the beautiful lie: Complex laddering of globular structures. **T. Swift**, S. Rimmer

**4:05 PMSE 697.** Polyphosphate and polyamide modified graphite as a degradable, cell instructive scaffold for bone regeneration. **S.A. Sydlík**, A. Arnold, B. Holt

**4:25 PMSE 698.** Investigating dynamic mechanical properties of inventive polyvinylacetate clay nanocomposites with improved gas barrier properties. **I. Soltani**, R.J. Spontak

## Bio-based Gels & Porous Materials

### Open-Porous Carbon Materials

*Sponsored by CELL, Cosponsored by AGFD, CARB, COLL, PMSE and POLY*

### Advances in Polysaccharides: Practice & Applications

#### Preparation, Characterization & Applications

*Sponsored by CELL, Cosponsored by AGFD, CARB, MPPG<sup>†</sup>, PMSE and POLY*

## PROF

### Division of Professional Relations

R. Libby, *Program Chair*

#### SOCIAL EVENTS:

Reception, 5:00 PM: Tue

#### BUSINESS MEETINGS:

Business Meeting, 3:00 PM: Tue

## SUNDAY MORNING

### Section A

Hotel Nikko San Francisco  
Nikko Ballroom III

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy

*Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

*Financially supported by Peter K. Dorhout (ACS President-Elect) & Merck*

M. Morris, J. S. Nowick, *Organizers*

P. Rodenbough, *Presiding*

**9:00** Introductory Remarks.

**9:05 PROF 1.** Coupling multiple proton transfers to electron transfer in bio-inspired Tyr-His models. **M.T. Huynh**, S.J. Mora, M. Villalba, A. Teillout, J.D. Gust, T.A. Moore, A.L. Moore, S. Hammes-Schiffer

**9:25 PROF 2.** Ligand to metal charge transfer in early transition metal bicyclic guanidinate complexes. **J. Olson**, D. Swenson, L. Messerle

**9:45 PROF 3.** New materials from superatomic build blocks: The Fe<sub>3</sub>O<sub>4</sub>p<sub>2</sub>Cl<sub>4</sub> cluster as a probe for singlet fission and novel battery materials. **A. Pinkard**, M. Trinh, A. Pun, S. Sanders, E. Kumarasamy, M. Sfeir, L. Campos, X. Roy, Z. Xiaoyang

**10:05 PROF 4.** In situ Raman investigation of chemical vapor deposition of WN<sub>2</sub>C<sub>2</sub> thin films from tungsten imido precursors. **M. Nolan**, A. Koley, S. Kim, T.J. Anderson, L. McElwee-White

**10:25** Intermission.

**10:40 PROF 5.** Direct observation of localized surface plasmon resonances in single nanocrystals of doped metal oxides. **R.W. Johns**, D.J. Milliron

**11:00 PROF 6.** Theoretical and numerical study of catalytic metal-noble metal nanoparticle aggregates for plasmon-mediated catalysis. **N.P. Montoni**, D.J. Masiello

**11:20 PROF 7.** Soft donor coordination compounds of the mid to late actinides. **S.S. Galley**, T.E. Albrecht-Schmitt

**11:40 PROF 8.** Investigation of f-element bonding with neutral soft chalcogen donors for lanthanide/actinide separations. **A.V. Blake**, S.R. Daly

## SUNDAY AFTERNOON

### Section A

Hotel Nikko San Francisco  
Nikko Ballroom III

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

#### Novel Reactions, Methodologies & Syntheses in Organic Chemistry

*Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

*Financially supported by Peter K. Dorhout (ACS President-Elect) & Merck*

M. Morris, J. S. Nowick, *Organizers*

M. Nolan, *Presiding*

**1:40** Introductory Remarks.

**1:45 PROF 9.** Development of a unified strategy for the synthesis of enmein-type ent-kauranoids. **J.C. Beck**, S.E. Reisman

**2:05 PROF 10.** Chiral phosphoric acids as Brønsted acid promoters of latent nucleophile reactions. **R.A. Escobar**, S. Schaus

**2:25** PROF 11. Withdrawn.

**2:45 PROF 12.** Spin-Selective generation of triplet nitrenes: Olefin aziridination through visible-light photosensitization of azidoformates. **S. Scholz**, E. Farney, S. Kim, D. Bates, T.P. Yoon

**3:05** Intermission.

**3:20 PROF 13.** Aldol condensation of biomass-derived feedstocks in HZSM-5 zeolite: Quantum chemistry and experiments point to keto/enol as the rate-determining step. **A.N. Miguez**, Q. Sun, S. Vatheeswaran, W. Sherman, X. Qi, W. Fan, S.M. Auerbach

**3:40 PROF 14.** Automated reaction progress analysis: A rapid and robust method for elucidating catalyst monopoly. **R. Chung**, J. He in

**4:00 PROF 15.** Panel discussion. Celebrating LGBT identities in chemistry: Opportunities, challenges, and perspectives. **M. Morris**, J.S. Nowick

<sup>†</sup> Cooperative Cosponsorship

### Chemical Angel Network: Chemists Investing in Chemical Companies

Sponsored by BMGT, Cosponsored by PROF and SCHB<sup>2</sup>

### Holy Grails in Chemistry: Celebrating the 50th Anniversary of Accounts of Chemical Research Journal

Sponsored by PRES, Cosponsored by BIOL, BMGT, CARB, CATL, CELL, COLL, ENVR, HIST, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

### Starting a Successful Research Program at a PUI

Sponsored by YCC, Cosponsored by PROF

### The Importance of Role Models & Mentors in Reaching Gender Equity in Chemical Sciences: A Symposium in Honor of Judith Iriarte-Gross

Sponsored by WCC, Cosponsored by CHED, CMA and PROF

## SUNDAY EVENING

### Section A

Moscone Center  
Exposition, Halls B/C

#### General Posters

R. Libby, Organizer

6:30 - 8:30

PROF **16**. White light from hybrid water soluble Au (I) phosphor systems for OLED applications. C. Williams, E.N. Benton, S.B. Marpu, M.A. Omary

PROF **17**. Collaborations and outreach: A review of ACS presence at the 2017 Out to Innovate™ career summit for LGBTQ+ people in STEM. B.L. Belmont, C.J. Bannochie

PROF **18**. Materials for teaching professionalism in chemistry. S.M. Schelble

### Entrepreneurial Opportunities in Chemistry

Sponsored by YCC, Cosponsored by BMGT, PROF and SCHB

## MONDAY MORNING

### Section A

Hotel Nikko San Francisco  
Nikko Ballroom III

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries

Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

Financially supported by Peter K. Dorhout (ACS President-Elect) & Merck

M. Morris, J. S. Nowick, Organizers

A. Mercer, Presiding

9:00 Introductory Remarks.

9:05 PROF **19**. Understanding the unusual isotope effects in ozone formation for applications to atmospheric chemistry and climate. A.H. Kazez, K.A. Boering

9:25 PROF **20**. Fulvenallene and fulvenallenyl photodissociation dynamics at 248 nm. M. Shaperov, I.A. Ramphal, D.M. Neumark

9:45 PROF **21**. Irradiation of secondary organic aerosol material in the presence of volatile organic compounds: The role of photosensitization. K.T. Malecha, S.A. Nizkorodov

10:05 PROF **22**. Chemical x-ray photodiffraction for structural characterization of short-lived intermediates. P.P. Rodenbough, P. Naumov

10:25 Intermission.

10:40 PROF **23**. Megasupramolecules as molecular probes of turbulence. R. Lhota, R. McMullen, D. Huynh, M. Wei, J.A. Kornfeld, B. McKeon

11:00 PROF **24**. Effect of annealing temperature on graphene supported nickel catalysts with regards to its structure and urea oxidation properties. D. Glass, S.G. Prakash, G. Olah

11:20 PROF **25**. Dietary proanthocyanidin detector response factors have appreciable variability. M.R. Dorris, B.W. Bolling

### Space Chemistry: How it Helps Space Exploration

Sponsored by YCC, Cosponsored by CPRC and PROF

### Science for a Sustainable Energy Future

#### Energy Storage

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

### Teaching, Researching & Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT<sup>2</sup>, ENVR<sup>2</sup>, I&EC, PRES<sup>2</sup> and PROF

### Celebrating 90 years of the WCC: Reflections of Past Chairs

Sponsored by WCC, Cosponsored by PRES and PROF

### Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## MONDAY AFTERNOON

### Section A

Hotel Nikko San Francisco  
Nikko Ballroom III

### LGBT Graduate & Postdoctoral Student Chemistry Research Symposium

### Advances in Medicinal & Biological Chemistry: From Therapeutics to Education

Cosponsored by ANYL<sup>2</sup>, BIOL<sup>2</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>2</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>2</sup>, POLY, PRES<sup>2</sup> and WCC

Financially supported by Peter K. Dorhout (ACS President-Elect) & Merck

M. Morris, J. S. Nowick, Organizers

R. Lhota, Presiding

2:00 Introductory Remarks.

2:05 PROF **26**. Advancing ferrocenyl derivatives pharmacophores throughout the incorporation of heterocycles in their scaffolds. J.C. Aponte-Santini, I. Montes-González, J. Davila, D.J. Sanabria Rios, Y. Morales-Lozada, A. Baerga-Ortiz, A.R. Guadalupe Quinones, A. Serrano-Brizuela, E. Colón-Lorenzo, F.T. Halaweish

2:25 PROF **27**. Development of a selective and stable anti-cancer agent by exploiting high levels of reactive oxygen species. K.G. Earnest, A.L. Kadekaro, Y. Zhang, E.J. Merino

2:45 PROF **28**. Thioether-bridged peptide macrocycles as inhibitors of the Sonic Hedgehog/patched 1 protein-protein interaction. A. Owens, R. Fasan

3:05 PROF **29**. Enzyme-Directed imidazoquinolines for cancer immunotherapy. J. Hantho, R.J. Mancini, A.E. Nielsen

3:25 Intermission.

3:40 PROF **30**. Engineering a synthetic peptide/GPCR communication language in yeast. J. Brisbois, S. Billerbeck, M. Jimenez, N. Agmon, M. Shen, J. Temple, J. Boeke, V.W. Cornish

4:00 PROF **31**. Backbone C5 hydrogen bonds in proteins. R.W. Newberry, R.T. Raines

4:20 PROF **32**. Withdrawn.

4:40 PROF **33**. Student accuracy and confidence on items assessing problematic topics in the biochemistry sequence. A. Mercer, A. Wolfson, J.E. Lewis

### Rising Star Award Symposium

Sponsored by WCC, Cosponsored by BIOL, ENFL and PROF

### Science for a Sustainable Energy Future

### Chemical & Biological Conversions Approaches to Energy Conversion

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>2</sup>, ORGN and PROF

### Space Chemistry: How it Helps Space Exploration

Sponsored by YCC, Cosponsored by CPRC and PROF

### Teaching, Researching & Community Building in the Global Chemical Enterprise

Sponsored by IAC, Cosponsored by BMGT<sup>2</sup>, ENVR<sup>2</sup>, I&EC<sup>2</sup>, PRES<sup>2</sup> and PROF

### Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## MONDAY EVENING

### Section A

Moscone Center  
Hall D

#### Sci-Mix

R. Libby, Organizer

8:00 - 10:00

16-18. See previous listings.

## TUESDAY MORNING

### Section A

Hotel Nikko San Francisco  
Monterey I

### Producing Knowledgeable, Well-Rounded, T-Shaped Chemists for the 21st Century: Current Perspectives from High School, Undergraduate & Graduate Educators

Cosponsored by BMGT, CHED and PRES

J. L. Bryant, J. C. Giordan, Organizers

S. M. Graham, Organizer, Presiding

8:40 PROF **34**. Depth and breadth. Content and skills. Experts and generalists. The emerging need for T-shaped individuals: Opening overview. S.M. Graham

8:50 PROF **35**. Preparing T-shaped chemists: Using big ideas to understand and communicate chemistry. G.T. Rushton

9:10 PROF **36**. Process - The missing element. D. Hanson

9:30 PROF **37**. Transformational and innovative approaches to STEM graduate education - building T shaped professionals with a Lens of the Market® as well as a Lens of Science. J.C. Giordan, M. Dolgos, M. Storksdieck, R.G. Carter

9:50 Intermission.

10:00 PROF **38**. Remembering to cross your T: Teaching and learning chemistry with today's teenagers. J.L. Ball

10:20 PROF **39**. Who gives a darn? An application based organic chemistry curriculum to develop T-shaped students. E.C. Bucholtz

10:40 PROF **40**. Transformational and innovative approaches to STEM graduate education: Building T shaped professionals with real world internship experiences. S.E. York

11:00 Intermission.

11:10 Interactive Panel With Facilitated Q&A.

11:30 Concluding Remarks.

11:40 "Office Hours" with Speakers

### Chemists & Writing for Fun & Profit: Write Your Own Career

Sponsored by SCHB, Cosponsored by CPRC and PROF

### The Importance of Role Models & Mentors in Reaching Gender Equity in Chemical Sciences: A Symposium in Honor of Judith Iriarte-Gross

Sponsored by WCC, Cosponsored by CHED, CMA and PROF

### Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

### ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

### Materials Chemistry of Solutions & Solids for a Sustainable Future

Sponsored by INOR, Cosponsored by BMGT<sup>2</sup>, MPPG and PROF

### Advancing Undergraduate Research Research Supportive Curricular Innovations

Sponsored by CHED, Cosponsored by PROF

## TUESDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Monterey I

## REU Chemistry in Action: Student Perspectives

L. M. Watkins, *Organizer*  
S. A. France, *Presiding*

1:30 Introductory Remarks.

1:35 **PROF 41.** Synthetic studies of redox-active, self-associating macrocycles: Perspectives on a materials chemistry REU. R.E. Fadler, J. Dobscha, H.D. Castillo, S.L. Tait, A.H. Flood

1:55 **PROF 42.** Passport to success: Research experience abroad. S. Ramirez

2:15 **PROF 43.** Understanding the products of the bisulfite reaction with 5-methylcytidine and 5-hydroxymethyl-2'-deoxycytidine. H. Donelick, A.M. Fleming, C.J. Burrows

2:35 **PROF 44.** Synthesis of a new mixed occupancy  $\text{Yb}_{1-x}\text{Ca}_x\text{MgSb}_{11}$  ( $x = 0, 1, 2$ ) for thermoelectric device application. K. Meyer, S. Kaulzarich, E.L. Kunz Wille

2:55 Intermission.

3:10 **PROF 45.** Aspect ratio dependent growth mechanism revealed in gold nanorod synthesis. T. Ripplinger, J. Zhao, S. Thota

3:30 **PROF 46.** Correlation between Hammett parameters and vibrational Stark effects in benzonitrile derivatives. J. Alvarez Duque, J.R. Hunt, J. Dawlaty

3:50 **PROF 47.** Intracellular tracing of deferasirox and its Ti(IV) complex by the FITC probe to study their cytotoxic mechanism of action. M. Kowaleff, Y. Delgado, A.D. Tinoco, Z. Torres, A.M. Vázquez

4:10 **PROF 48.** Antibiotic-carbon dot conjugate for imaging and as bactericidal agents. I. Sun, I.V. Ogunbge

4:30 Concluding Remarks.

## Entrepreneurship in Biotechnology, Advanced Materials, Drug Discovery &amp; Information Systems

*Sponsored by SCHB, Cosponsored by MEDI and PROF*

## Excellence in Graduate Polymer Research

*Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC*

## ACS Award in the Chemistry of Materials: Symposium in honor of Douglas A. Keszler

## Chemists Leading the Charge: Chemists Using Business Acumen &amp; Transformative Research to Address Societal Needs

*Sponsored by INOR, Cosponsored by BMGT, MPPG, PRES and PROF*

## Advancing Undergraduate Research Focus on Early Access to Research &amp; Broadening Participation of Under-Represented Groups

*Sponsored by CHED, Cosponsored by CMA, PROF and WCC*

## TUESDAY EVENING

## Excellence in Graduate Polymer Research

*Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC*

## WEDNESDAY MORNING

## Section A

Hotel Nikko San Francisco  
Monterey I

## Looking Beyond Your Current Boundaries: What's the Next Step?

## Academic Route: PhD to Postdoc to Ass. Prof.

*Cosponsored by BMGT and YCC*

M. Grandbois, *Organizer*

J. T. Kelly, *Organizer, Presiding*

9:00 Introductory Remarks.

9:05 **PROF 49.** Crossing boarders as a postdoc: An unexpected journey after a PhD. J.T. Kelly

9:35 **PROF 50.** Securing a tenure-track position at a research university: The hiring process. N. Hammer

10:05 **PROF 51.** Professor Gig at a medium-sized PUI. R.C. Fortenberry

10:35 Intermission.

10:45 **PROF 52.** Expanding the academic excellence model through gender diversity. D. Stallings, S. Iyer, R. Hernandez

11:15 **PROF 53.** Creating a mentoring culture to improve demographic diversity in academia. S. Iyer, D. Stallings, R. Hernandez

11:45 Concluding Remarks.

## Advancing Undergraduate Research

*Sponsored by CHED, Cosponsored by CMA, PROF and WCC*

## WEDNESDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Monterey I

## Looking Beyond Your Current Boundaries: What's the Next Step?

## Industrial Route: PhD, Postdoc, Scientist

*Cosponsored by BMGT and YCC*

J. T. Kelly, *Organizer*

M. Grandbois, *Organizer, Presiding*

1:30 Introductory Remarks.

1:35 **PROF 54.** Thinking about a career in industry? C.J. Murphy

2:05 **PROF 55.** Realizing you're ready: How my everyday experience translated into job seeking success. S.L. Hemmingson

2:35 **PROF 56.** Personal brand development and social networking strategies for professional chemists. J.L. MacLachlan

3:05 Intermission.

3:15 **PROF 57.** Managing your career with power! How to get that first promotion and prepare yourself for future roles. M. Grandbois, S. Collick

3:45 **PROF 58.** Career transitions for a young industrial chemist: From the bench to management. A.K. Gupta, M. Grandbois

4:15 Concluding Remarks.

## RUBB

## Rubber Division

W. Stahl, *Program Chair*

## MONDAY EVENING

## Innovating Materials for the Next Generation: Bringing Practical Applications into the Chemistry Classroom

*Sponsored by CHED, Cosponsored by PMSE, POLY and RUBB*

## SCHB

## Division of Small Chemical Businesses

J. Sabol, *Program Chair*

## OTHER SYMPOSIA OF INTEREST:

**Advances in Organic Synthesis: Successes from Academia-Industry Partnerships** (see ORGN, Tue)

**Ask Dr. Safety: Chemical & Occupational Safety in the Cannabis Industry** (see CHAS, Sun)

**Cannabis Law: Navigating Complex Regulatory & Legal Issues in States with Legal Cannabis Programs** (see CHAL, Wed)

**Careers in Chemical Information** (see CINF, Sun)

**Green Chemistry: Theory & Practice** (see CHED, Sun)

**Kathryn C. Hach Award for Entrepreneurial Success: Symposium in honor of David R. Walt** (see ANYL, Tue)

## SOCIAL EVENTS:

**SCHB Member's Welcome Social Hour**, 5:30 PM: Sat

**Coffee & Networking**, 8:00 AM: Tue

**Luncheon**, 11:30 AM: Tue

**Reception**, 5:00 PM: Tue

## BUSINESS MEETINGS:

**Business Meeting**, 6:30 PM: Sat

**Executive Committee Meeting**, 7:00 PM: Sat

## SUNDAY AFTERNOON

## Chemical Angel Network: Chemists Investing in Chemical Companies

*Sponsored by BMGT, Cosponsored by PROF and SCHB*

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

## SUNDAY EVENING

## Section A

Moscone Center  
Halls B/C

## Entrepreneurs' Poster Session

G. W. Ruger, *Organizer*

6:00 - 8:00

**SCHB 1.** SCHB is the home for entrepreneurs inside the ACS. A. Rahman, P.C. Lauro, M. Chorghade, A. Katak, D.J. Deutsch, J.E. Sabol, J.L. MacLachlan, E.L. Oltermann, R. Chorghade, C.A. Burton, T. Siepmann, P.C. Kearney, G.W. Ruger

**SCHB 2.** Chemical Angel Network: Chemists investing in chemical companies. S.S. White, M. Vreeke, J.C. Giordan

**SCHB 3.** Small chemical businesses providing materials and resources to promote the sciences through outreach activities. G.W. Ruger

## Entrepreneurial Opportunities in Chemistry

*Sponsored by YCC, Cosponsored by BMGT, PROF and SCHB*

## MONDAY MORNING

## Cannabis: Emerging Challenges in Regulations, Product Analysis &amp; Processing

*Sponsored by CHAS, Cosponsored by CCS and SCHB*

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

## MONDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Nikko Ballroom I

**Chemists & Writing for Fun & Profit: Write Your Own Career**

*Cosponsored by CPRC and PROF*

L. M. Balbes, *Organizer, Presiding*

8:00 Networking.

8:30 Introductory Remarks.

8:35 **SCHB 4.** How I got my job at C&EN. L. Wang

9:05 **SCHB 5.** Translating my way around the periodic table. K.M. Tkaczyk

9:35 **SCHB 6.** How to write your first book without knowing how. J.E. Brown

10:05 Intermission.

10:20 **SCHB 7.** Taking a leap of faith from one non-traditional career to another. S.P. Hasford

10:50 **SCHB 8.** Leveraging social media for effective content marketing for corporate and non-profit entities in the chemical enterprise. J.L. Maclachlan

11:20 **SCHB 9.** Confessions of The Speaking Scientist®: Growing a business that helps scientists communicate when the stakes are high. N. Milanovich

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

*Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB<sup>†</sup>*

## TUESDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Nikko Ballroom I

**Entrepreneurship in Biotechnology, Advanced Materials, Drug Discovery & Information Systems**

*Cosponsored by MEDI and PROF*

B. A. Bunin, *Organizer*

P. C. Kearney, *Organizer, Presiding*

1:00 Introductory Remarks.

1:05 **SCHB 10.** Surface-functionalized hollow silica nanoparticles for advanced material applications. V.O. Rodionov, H. Ahmad

1:35 **SCHB 11.** Xtractite: An inorganic ion-exchange material for sorption of radionuclides and heavy metals. A.W. Apblett, E. Kadossov, N.F. Materer, C.K. Perkins

2:05 **SCHB 12.** Funding a deep-tech startup: Taking an idea from the back of a napkin to market. R. Nordsell, J.H. Melman

2:35 **SCHB 13.** Practical wet adhesives and tough resin composites for real business. K. Ahn

3:05 Intermission.

3:20 **SCHB 14.** 3D tissue-engineered bone marrow, a novel 3D-cell culture model: From basic biological mechanism to a fast revenue generating start-up company with diversified business models. K. Azab

3:50 **SCHB 15.** Welcome to the real world. S. Jin

4:20 **SCHB 16.** CDD vault: Building the dominant hosted platform for global hosted commercial and humanitarian drug discovery collaborations. B.A. Bunin

4:50 Concluding Remarks.

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

*Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB<sup>†</sup>*

## WEDNESDAY MORNING

## Section A

Hotel Nikko San Francisco  
Golden Gate

**Cannabis: A Growing Sector for Business & Employment**

*Cosponsored by CHAS*

E. M. Pryor, *Organizer*

E. L. Oltermann, *Organizer, Presiding*

8:00 Introductory Remarks.

8:05 **SCHB 17.** Emerging opportunity of becoming a cannabis inspector for private and public institutions. J. Marcu, E.M. Pryor, M.J. Wilcox, E.L. Oltermann

8:35 **SCHB 18.** Employment opportunities in cannabis science: A view into future needs in the cannabis economy and the drivers behind them. G. Murray, G.M. Sanz

9:05 **SCHB 19.** Chemistry and cannabis: Highlighting the demand for chemists in key roles for a burgeoning industry. A. Pham

9:35 Intermission.

9:50 **SCHB 20.** Optimizing yield and composition of cannabis extracts of large scale SFE. M. Roggen

10:20 **SCHB 21.** Scientific and economic challenges facing cannabis testing laboratories. J.T. Fishedick, E.M. Pryor

10:50 **SCHB 22.** Serving as an educator in the cannabis staffing market. K. Humiston, K. Arfsten

11:20 Panel Discussion.

11:50 Concluding Remarks.

## CCS

**Committee on Chemical Safety**

E. Howson, *Program Chair*

## SUNDAY AFTERNOON

**Best Practices in Selecting & Presenting Safety Training Content**

*Sponsored by CHAS, Cosponsored by CCS and PRES*

**Ask Dr. Safety: Chemical & Occupational Safety in the Cannabis Industry**

*Sponsored by CHAS, Cosponsored by CCS*

## MONDAY MORNING

**Cannabis: Emerging Challenges in Regulations, Product Analysis & Processing**

*Sponsored by CHAS, Cosponsored by CCS and SCHB<sup>†</sup>*

## MONDAY AFTERNOON

**Cannabis: Emerging Challenges in Regulations, Product Analysis & Processing**

*Sponsored by CHAS, Cosponsored by CCS and SCHB<sup>†</sup>*

## TUESDAY MORNING

**Information Flow in Environmental Health & Safety**

*Sponsored by CHAS, Cosponsored by CCS and CINF<sup>†</sup>*

## TUESDAY AFTERNOON

**Information Flow in Environmental Health & Safety**

*Sponsored by CHAS, Cosponsored by CCS and CINF<sup>†</sup>*

## WEDNESDAY MORNING

**What Have We Learned & Where Are We Going: Post-Settlement in the University of California**

*Sponsored by CHAS, Cosponsored by CCS and PRES*

## WEDNESDAY AFTERNOON

**What Have We Learned & Where Are We Going: Post-Settlement in the University of California**

*Sponsored by CHAS, Cosponsored by CCS and PRES*

## CCPA

**Committee on Chemistry and Public Affairs**

S. Butts, *Program Chair*

## SUNDAY AFTERNOON

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

## MONDAY MORNING

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

## MONDAY AFTERNOON

## Hollyweird Chemistry

*Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC*

## CWD

**COMMITTEE ON CHEMISTS WITH DISABILITIES**

J. Johnston, *Program Chair*

## SUNDAY MORNING

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Emerging Applications in Inorganic Chemistry: Energy, Materials, Catalysis & Spectroscopy**

*Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

## SUNDAY AFTERNOON

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Novel Reactions, Methodologies & Syntheses in Organic Chemistry**

*Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, MPPG, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

## MONDAY MORNING

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Frontiers in Analytical & Physical Chemistry: From Atmospheric to Atomic Discoveries**

*Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

## MONDAY AFTERNOON

**LGBT Graduate & Postdoctoral Student Chemistry Research Symposium**
**Advances in Medicinal & Biological Chemistry: From Therapeutics to Education**

*Sponsored by PROF, Cosponsored by ANYL<sup>†</sup>, BIOL<sup>†</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>†</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>†</sup>, POLY, PRES<sup>†</sup> and WCC*

**WEDNESDAY MORNING****Communicating Science in the Twenty-First Century to Diversified Audiences**

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

**WEDNESDAY AFTERNOON****Communicating Science in the Twenty-First Century to Diversified Audiences**

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

**CCA****COMMITTEE ON COMMUNITY ACTIVITIES**

M. McGinnis, Program Chair

**MONDAY MORNING****Fundamentals of Chemistry Outreach Education: From Program Design to Assessment**

Sponsored by CHED, Cosponsored by CCA, LSAC, SOCED and YCC

**MONDAY AFTERNOON****Fundamentals of Chemistry Outreach Education: From Program Design to Assessment**

Sponsored by CHED, Cosponsored by CCA, LSAC, SOCED and YCC

**DAC****Committee on Divisional Activities**

R. Bennett, Program Chair

**SUNDAY MORNING****Young Investigator's Symposium**

Sponsored by PMSE, Cosponsored by DAC<sup>‡</sup>

**SUNDAY AFTERNOON****Young Investigator's Symposium**

Sponsored by PMSE, Cosponsored by DAC<sup>‡</sup>

**MONDAY MORNING****Young Investigator's Symposium**

Sponsored by PMSE, Cosponsored by DAC<sup>‡</sup>

**MONDAY AFTERNOON****Young Investigator's Symposium**

Sponsored by PMSE, Cosponsored by DAC<sup>‡</sup>

**CEI****Committee on Environmental Improvement**

C. Middlecamp, Program Chair

**SUNDAY MORNING****Citizens First!**

Sponsored by CHED, Cosponsored by CEI

**Green Chemistry: Theory & Practice**

Sponsored by CHED, Cosponsored by CEI

**Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**Green Chemistry & the Environment**

Sponsored by ENVR, Cosponsored by CEI

**SUNDAY AFTERNOON****Hollyweird Chemistry**

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

**Citizens First!**

Sponsored by CHED, Cosponsored by CEI

**Green Chemistry: Theory & Practice**

Sponsored by CHED, Cosponsored by CEI

**Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**Green Chemistry & the Environment**

Sponsored by ENVR, Cosponsored by CEI

**Integrated & Sustainable Environmental Remediation**

Sponsored by ENVR, Cosponsored by CEI

**MONDAY MORNING****ACS-CEI Award for Incorporating Sustainability into Chemistry Education**

Sponsored by CHED, Cosponsored by CEI

**Science for a Sustainable Energy Future**

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENFL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>‡</sup>, ORGN and PROF

**Hollyweird Chemistry**

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

**Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**MONDAY AFTERNOON****Hollyweird Chemistry**

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

**Science for a Sustainable Energy Future****Chemical & Biological Conversions Approaches to Energy Conversion**

Sponsored by PRES, Cosponsored by BIOL, BIOT, BMGT, CARB, CATL, CEI, CELL, COLL, ENVR, GEOC, I&EC, MEDI, MPPG<sup>‡</sup>, ORGN and PROF

**Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**Undergraduate Research Posters****Green Chemistry & Sustainability**

Sponsored by CHED, Cosponsored by CEI and SOCED

**TUESDAY MORNING****GSSPC: Water Sustainability****Chemists in Pursuit of Clean Water**

Sponsored by CHED, Cosponsored by CEI and PRES

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB<sup>‡</sup>

**Perspectives on Climate Change Literacy & Education: Local to International**

Sponsored by CHED, Cosponsored by CEI and IAC

**Innovative Materials & Technologies for Sustainable Water Purification****Adsorption Technologies**

Sponsored by ENVR, Cosponsored by CEI

**Processes, Technologies & Sensors for Food-Energy-Water Nexus Research**

Sponsored by ENVR, Cosponsored by CEI and CHED

**TUESDAY AFTERNOON****GSSPC: Water Sustainability****Chemists in Pursuit of Clean Water**

Sponsored by CHED, Cosponsored by CEI and PRES

**Green Chemistry Adoption: Progressive Changes by Different Industry Sectors**

Sponsored by ENVR, Cosponsored by CEI, MEDI, ORGN and SCHB<sup>‡</sup>

**Innovative Materials & Technologies for Sustainable Water Purification****Adsorption Technologies**

Sponsored by ENVR, Cosponsored by CEI

**Science & Perception of Climate Change**

Sponsored by ENVR, Cosponsored by CEI and CHED

**WEDNESDAY MORNING****Innovative Materials & Technologies for Sustainable Water Purification****Membrane & Other Treatment**

Sponsored by ENVR, Cosponsored by CEI

**WEDNESDAY AFTERNOON****Advances in Resource Recovery & Conservation in Water Systems**

Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC

**Innovative Materials & Technologies for Sustainable Water Purification****Photocatalytic**

Sponsored by ENVR, Cosponsored by CEI

**WEDNESDAY EVENING****Contaminants of Emerging Concern in Natural & Engineered Systems**

Sponsored by ENVR, Cosponsored by AGRO, ANYL and CEI

**Green Chemistry & the Environment**

Sponsored by ENVR, Cosponsored by CEI

**Innovative Materials & Technologies for Sustainable Water Purification**

Sponsored by ENVR, Cosponsored by CEI

**Integrated & Sustainable Environmental Remediation**

Sponsored by ENVR, Cosponsored by CEI

**Science & Perception of Climate Change**

Sponsored by ENVR, Cosponsored by CEI and CHED

**THURSDAY MORNING****Advances in Resource Recovery & Conservation in Water Systems**

Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC

**Innovative Materials & Technologies for Sustainable Water Purification****Catalytic**

Sponsored by ENVR, Cosponsored by CEI

**THURSDAY AFTERNOON****Advances in Resource Recovery & Conservation in Water Systems**

Sponsored by ENVR, Cosponsored by AGFD, CEI and GEOC

**Innovative Materials & Technologies for Sustainable Water Purification****Catalytic & Electrochemical**

Sponsored by ENVR, Cosponsored by CEI

<sup>‡</sup> Cooperative Cosponsorship

## ETHX

## Committee on Ethics

K. Vitense, Program Chair

## MONDAY AFTERNOON

## The Write Thing to Do: Ethical Considerations in Authorship &amp; the Assignment of Credit

Sponsored by CINF, Cosponsored by CHED, CPRM and ETHX

## IAC

## International Activities Committee

E. Tratras Contis, Program Chair

## SOCIAL EVENTS:

Networking Globally: Helping Chemistry Students Find Success in Careers and Study Abroad, 4:30 PM: Sun

International Welcome Reception, 5:30 PM: Sun

## SUNDAY MORNING

## Section A

Hotel Nikko San Francisco  
Carmel I

## Blending Chemistry &amp; Culture: Undergraduate Research Abroad through ACS IREU Program

Cosponsored by CHED

L. Brown, Organizer

C. LaPrade, Organizer, Presiding

9:15 Introductory Remarks.

9:25 IAC 1. My summer experience: Researching water oxidation catalysts and experiencing the beauty of Italy. R. Hutchinson

9:45 IAC 2. La ragazza in Italia: The p-docelyoxybenzylidimethylamine oxide (pDoAO) gel as pH sensitive artificial gland. N.E. Caldero-Rodríguez

10:05 IAC 3. Multiple reaction conditions &amp; multiple reasons why I need to travel more. S. Fusi

10:25 IAC 4. Optics in Umbria: Investigating nanoparticles and fluorescence in the land of pizza and piazzas. R. Warnock, G. Massaro, L. Latterini

10:45 Intermission.

11:00 IAC 5. Fascinating summer with research in organic solar cells, exploring Glasgow and the beautiful highlands of Scotland. M. Matar Abed

11:20 IAC 6. Bagpipes, highlands, and cholesterol functionalized gold nanoparticles. R. Kress

11:40 IAC 7. Performing synthesis and gaining cultural awareness in Germany. E. Janeira

12:00 IAC 8. Summer in Germany: Exploring Europe, making friends, and synthesizing peptides. M. Gaviria

## Chemistry of Korean Foods &amp; Beverages

Sponsored by AGFD, Cosponsored by IAC

## SUNDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Carmel II

## Blending Chemistry &amp; Culture: Undergraduate Research Abroad through ACS IREU Program

Cosponsored by CHED

L. Brown, Organizer

C. LaPrade, Organizer, Presiding

1:30 IAC 9. Prost to polymers and proteins: A summer spent exploring the world from the nano to global scale. M.J. Austin, S. Schubert, M. Leiske, A. Traeger, U.S. Schubert

1:50 IAC 10. Summer in Germany: Improving lithium ion battery technology and exploring Europe. N. James

2:10 IAC 11. Summer in Germany: Computational electrochemistry, magnesium batteries, and self-discovery. A.T. Berry

2:30 IAC 12. Applying global solutions to bacterial infections: Synthesis of cystobactamide 861-2. A. Deyett

2:50 IAC 13. International research experience: Investigating the biosynthesis of terrein in *Aspergillus terreus* and experiencing Germany. M. Villanueva

3:10 IAC 14. Undergraduate research in Singapore: Explorations of protein-protein interactions and Southeast Asia. K. Senn, B. Woo, S. Chng

3:30 IAC 15. Exploring southeast Asia and biogenic synthesis of silver nanoparticles. L. Browder, D. Yong Wei Ying, W.S. Chin

3:50 IAC 16. MOFs to mee soto: A summer at the National University of Singapore. M. Molenda

4:10 Concluding Remarks.

## Chemistry of Korean Foods &amp; Beverages

Sponsored by AGFD, Cosponsored by IAC

## MONDAY MORNING

## Section A

Hotel Nikko San Francisco  
Carmel I

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Cosponsored by BMGT, ENVR, I&amp;EC, PRES and PROF

L. Brown, P. Kostiuk, E. Tratras Contis, Organizers, Presiding

9:00 Introductory Remarks.

9:15 IAC 17. Festival De Química: A successful model to communicate the value and impact of chemistry to local communities. I. Montes-González, L. Brown

9:45 IAC 18. Beyond the lab: An international Younger Chemists Network in the works. J. Breffke, P. Kostiuk

10:15 IAC 19. Fighting chemophobia through community building: Lessons learned from the local, national, and international arenas. C. Janaky, L. Brown

10:45 Intermission.

11:00 IAC 20. Global perspectives of Citizen Science. I.T. Urasa, L. Brown

11:30 IAC 21. The challenges and benefits of international research collaborations for undergraduate institutions. T.W. Hanks, P. Kostiuk

12:00 Intermission.

12:30 Panel Discussion.

## MONDAY AFTERNOON

## Section A

Hotel Nikko San Francisco  
Carmel I

## Teaching, Researching &amp; Community Building in the Global Chemical Enterprise

Cosponsored by BMGT, ENVR, I&amp;EC, PRES and PROF

L. Brown, P. Kostiuk, E. Tratras Contis, Organizers, Presiding

1:30 IAC 22. Green chemistry education in Brazil: The 2016 Global Innovation Imperatives (Gii) program from the perspective of a chemist in industry. S.C. Nanita, P. Kostiuk

2:00 IAC 23. Sharing best practices in the global chemical enterprise. E. Tratras Contis, L. Brown

2:30 Intermission.

2:45 IAC 24. Developing an ACS international chapter in the presence of a strong local chemical society. S. McAlpine, P. Kostiuk

3:15 IAC 25. Malta Conference Series: Measuring the success of science diplomacy. Z.M. Lerman, M.Z. Hoffman

3:45 Concluding Remarks.

## International &amp; Multicultural Perspective

Sponsored by CHED, Cosponsored by IAC

## TUESDAY MORNING

## Perspectives on Climate Change Literacy &amp; Education: Local to International

Sponsored by CHED, Cosponsored by CEI and IAC

## WEDNESDAY MORNING

## Research on Learning in the Lab

Sponsored by CHED, Cosponsored by IAC<sup>†</sup>

## Research on Learning in the Lab

Sponsored by CHED, Cosponsored by IAC<sup>†</sup>

## LSAC

## Committee on Local Section Activities

M. Rudd, Program Chair

## SUNDAY AFTERNOON

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## MONDAY MORNING

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Fundamentals of Chemistry Outreach Education: From Program Design to Assessment

Sponsored by CHED, Cosponsored by CCA, LSAC, SOCED and YCC

## MONDAY AFTERNOON

Sponsored by PROF, Cosponsored by ANYL<sup>‡</sup>, BIOL<sup>‡</sup>, CHED, CMA, COLL, COMP, CWD, ENVR, INOR<sup>‡</sup>, MEDI, MPPG, ORGN, PHYS, PMSE<sup>‡</sup>, POLY, PRES<sup>‡</sup> and WCC

**TUESDAY MORNING****The Importance of Role Models & Mentors in Reaching Gender Equity in Chemical Sciences: A Symposium in Honor of Judith Iriarte-Gross**

Sponsored by WCC, Cosponsored by CHED, CMA and PROF

**ACS Award for Encouraging Disadvantaged Students into Careers in the Chemical Sciences: Symposium in honor of Sandra Y. McGuire**

Sponsored by CHED, Cosponsored by CMA and WCC

**TUESDAY AFTERNOON****Advancing Undergraduate Research Focus on Early Access to Research & Broadening Participation of Under-Represented Groups**

Sponsored by CHED, Cosponsored by CMA<sup>‡</sup>, PROF and WCC

**WEDNESDAY MORNING****Advancing Undergraduate Research**

Sponsored by CHED, Cosponsored by CMA, PROF and WCC

**CPRM****Committee on Patents and Related Matters**

S. Shah, Program Chair

**MONDAY AFTERNOON****The Write Thing to Do: Ethical Considerations in Authorship & the Assignment of Credit**

Sponsored by CINF, Cosponsored by CHED, CPRM and ETHX<sup>‡</sup>

**CPRC****Committee on Public Relations and Communications**

D. Nelson, Program Chair

**OTHER SYMPOSIA OF INTEREST:**

**Chemists & Writing for Fun & Profit: Write Your Own Career** (see SCHB, Tue)

**Communicating Science in the Twenty-First Century to Diversified Audiences** (see CHED, Wed)

**Science & Perception of Climate Change** (see ENVR, Tue, Wed)

**Perspectives on Climate Change Literacy & Education; Local to International** (see CHED, Tue)

**Citizens First!** (see CHED, Sun)

**Chemistry through the Eyes of Non-Chemists** (see HIST, Mon, Tue)

**EVENTS:**

**Workshop—Getting Involved: Chemistry Ambassadors' Forum, 2:00 PM: Sun**

**SUNDAY AFTERNOON****Section A**

Moscone Center  
135

**Hollyweird Chemistry**

Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

D. J. Nelson, Organizer, Presiding  
K. Grazier, D. A. Kirby, Presiding

1:10 Introductory Remarks.

1:15 CPRC 1. Science in the TV show Breaking Bad. D.J. Nelson

1:45 CPRC 2. Bridging the worlds of science fiction and science fact on Star Trek. A. Bormanis

2:15 CPRC 3. How "The Universe" is made. C. Campbell

2:45 CPRC 4. NOVA's "Hunting the Elements" and other chemistry projects. C. Schmidt, P. Rosenstein

3:15 CPRC 5. Science and science fiction: The boundary between fantasy and futurism. J. Colwell

3:45 CPRC 6. Science as a human story. S.E. Lyons

4:15 Panel Discussion.

**MONDAY MORNING****Section A**

Moscone Center  
135

**Hollyweird Chemistry**

Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

D. J. Nelson, Organizer, Presiding

M. A. Griep, Presiding

9:00 CPRC 7. Hollyweird scientists. K. Grazier

9:30 CPRC 8. Correctness, creativity, and compromise: The art of putting good science into great television. J.G. Sotos

10:00 CPRC 9. Role of scientific integrity in cinematic and televised science. D.A. Kirby

10:30 CPRC 10. Who is speaking? Film and TV as part of an on-going dialogue between science and society. E. Stengler

11:00 CPRC 11. Too many geeks? S. Cass

11:30 Panel Discussion.

**Space Chemistry: How it Helps Space Exploration**

Sponsored by YCC, Cosponsored by CPRC and PROF

**MONDAY AFTERNOON****Section A**

Moscone Center  
135

**Hollyweird Chemistry**

Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

D. J. Nelson, Organizer, Presiding

J. G. Sotos, Presiding

1:15 CPRC 12. Teaching chemistry using popular media. J.G. Goll

1:45 CPRC 13. How to teach chemistry using Movie Wow! M.A. Griep, M. Mikasen

2:15 CPRC 14. Effective science communication in the popular media. J.J. Grbic

2:45 CPRC 15. Making science humerus (pun intended). N. Reagan

3:15 CPRC 16. This is your brain on Hollywood. Any questions? J. Cail

3:45 Panel Discussion.

**Space Chemistry: How it Helps Space Exploration**

Sponsored by YCC, Cosponsored by CPRC and PROF

**TUESDAY MORNING****Chemists & Writing for Fun & Profit: Write Your Own Career**

Sponsored by SCHB, Cosponsored by CPRC and PROF

**WEDNESDAY MORNING****Communicating Science in the Twenty-First Century to Diversified Audiences**

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

**WEDNESDAY AFTERNOON****Communicating Science in the Twenty-First Century to Diversified Audiences**

Sponsored by CHED, Cosponsored by CPRC, CWD and PRES

**COMSCI****Committee on Science**

M. Kociolek, Program Chair

**MONDAY AFTERNOON****Section A**

Moscone Center  
132

**Chemical Innovation Partnerships: Industry-University Success Stories**

Cosponsored by BMGT

M. G. Kociolek, Organizer, Presiding

1:00 Introductory Remarks.

1:05 COMSCI 1. Successful models and key principles in university-industry partnerships. A. Boccanfuso

1:35 COMSCI 2. Open Laboratory initiatives and their role in innovation partnerships. M.G. Kociolek

2:05 Intermission.

2:15 COMSCI 3. Successful university partnerships in the pharmaceutical industry. C.J. Welch

2:45 COMSCI 4. Government's role in public-private partnerships. G. Wang

3:15 Panel Discussion.

**SCC****Senior Chemists Committee**

T. Beattie, Program Chair

**SUNDAY AFTERNOON****Golden Age of Industrial Chemistry**

Sponsored by HIST, Cosponsored by SCC and YCC

<sup>‡</sup> Cooperative Cosponsorship

## SOCED

Society Committee  
on Education

M. Roslonowski, Program Chair

## SOCIAL EVENTS:

- Networking Social with Graduate School Recruiters, 1:00 PM: Sun  
Undergraduate Social, 8:30 PM: Sun  
Undergraduate Speed Networking with Chemistry Professionals, 4:00 PM: Mon

Student Awards Ceremony, 7:00 PM: Sun  
Chemistry & the Environment Film Series, 12:00 PM: Mon

## SUNDAY MORNING

## Section A

San Francisco Marriott Marquis  
Golden Gate A

## Frontiers in Nanoscience

Cosponsored by POLY

M. C. Roslonowski, Organizer, Presiding

9:30 Introductory Remarks.

9:45 SOCED 1. Donor-Acceptor molecules for organic photovoltaics. M.C. Stefan

10:10 SOCED 2. Incorporating Diels-Alder chemistry to prepare thermally-responsive materials. M. Markmann, M.R. Martinez, T. Kleine, M. Meyersohn, C. Gregory, T. Colt, P.J. Costanzo

10:30 SOCED 3. Single molecule/aggregate spectroscopy for plastic semiconducting polymers. Z. Hu

10:50 SOCED 4. Withdrawn.

11:10 SOCED 5. Degradable conjugated polymers: New biomaterials for biological labeling, sensing, and delivery. J. Moon

11:30 SOCED 6. Directed self-assembly: A new frontier for nanolithography. A. Baruth

11:50 Q&amp;A.

12:05 Concluding Remarks.

## Undergraduate Research Papers

Sponsored by CHED, Cosponsored by SOCED

## SUNDAY AFTERNOON

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

San Francisco Marriott Marquis  
Golden Gate A

## Chemistry of Fermented Beverages

M. C. Roslonowski, Organizer, Presiding

10:00 Introductory Remarks.

10:10 SOCED 7. Chemistry in homebrewing. R. Burns

10:45 Q&amp;A.

10:55 SOCED 8. How offering a beer course can make you famous and infamous. M.C. Roslonowski

11:30 Q&amp;A.

11:40 SOCED 9. Beer, chemistry and the secrets of the universe. M.B. Cichowicz

12:15 Q&amp;A.

## Hollyweird Chemistry

Sponsored by CPRC, Cosponsored by AGRO, CARB, CCPA, CEI, CHED, ENFL, HIST, LSAC, NUCL, POLY, SCHB, SOCED and YCC

## Fundamentals of Chemistry Outreach Education: From Program Design to Assessment

Sponsored by CHED, Cosponsored by CCA, LSAC, SOCED and YCC

## Excellence in Graduate Polymer Research

Sponsored by POLY, Cosponsored by PRES, PROF, SOCED and YCC

## Undergraduate Research Papers

Sponsored by CHED, Cosponsored by SOCED

## MONDAY AFTERNOON

## Section A

San Francisco Marriott Marquis  
Golden Gate A

## Eminent Scientist Lecture with Dr. Carolyn Bertozzi

Cosponsored by MEDI

M. C. Roslonowski, Organizer, Presiding

2:30 Introductory Remarks.

2:40 SOCED 10. What life and research share in common: Finding opportunity in failure. C.R. Bertozzi

3:40 Concluding Remarks.

3:55 Q&amp;A.

---

# EXPOSITION HIGHLIGHTS

**SEE WHAT'S NEW INSIDE THE EXPOSITION.** Visit the ACS National Exposition at the Moscone Center, Halls B/C, from Sunday, April 2, through Tuesday, April 4. The show hours will be Sunday, 6:00 to 8:30 PM, and Monday and Tuesday, 9:00 AM to 5:00 PM. Companies will showcase services, instruments, books, computer hardware, scientific software, and an array of chromatographic, lab, and safety equipment. Technical personnel will give demonstrations, answer questions, and discuss your needs and interests.

Visit the revamped ACS Career Fair where you'll meet recruiters from top employers like KAUST, Brewer Science, Gilead and many more. Create an online profile and upload your résumé to our database where recruiters can schedule in-person interviews with you. While at the Career Fair, network with potential employers and drop-off your résumé, attend Career Pathways Workshops, and meet with ACS Career Consultants.

Also, join us at the ACS booth in the middle of the exposition floor, where ACS staff members will present the many

benefits, services, products, and merchandise offered by ACS.

**Online exposition.** The online exposition is a component within the exhibitor directory that enables attendees to view videos, press releases, brochures, and flyers of participating exhibitors. Access the online exposition at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) to learn more about exhibiting companies and download product information that meets your needs.

**Free exhibitor workshops.** Free workshops will be hosted by exhibitors on the exposition floor and in private rooms inside the Moscone Center. These workshops will introduce new products and services, build skills with specific tools and techniques, and highlight innovative applications that may improve your productivity. Register at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) to reserve your seat.

**Presentations & special events.** Join us on Sunday from 6:00 to 8:30 PM for the attendee welcome reception. Take an afternoon break on Tuesday from 3:00 to

5:00 PM and visit the exhibitors before the exposition closes. Access the mobile app, play a game with participating exhibitors and win special prizes!

**Internet & technology.** Get free internet access and leave messages for one another at the meeting mail terminals inside the town center. Enjoy free Wi-Fi service at designated areas in the Moscone Center.

**Admission requirements & expo-only registration.** Exposition admission is complimentary for all national meeting registrants; however, you are required to wear your badge. Individuals who want to visit the exhibits without registering for the technical component of the national meeting can obtain an expo-only badge for \$60. Students with school identification can obtain an expo-only badge for \$30. Registration can be handled online or in person at ACS attendee registration at the Moscone Center, North Lobby, and at our satellite registration areas at the Hilton San Francisco Union Square, and Grand Hyatt San Francisco.

ACS Exposition

# EXHIBITORS

The following list of exhibitors, as of Feb. 11, is the property of the American Chemical Society. Any unauthorized use of this list, or any part thereof, either directly or indirectly, is strictly prohibited.

Visit the Online ACS National Exposition at [www.acs.org/sanfran2017](http://www.acs.org/sanfran2017) to download the updated exhibitor list and access product information.

**101**, 375 South End Avenue, Apt. 9G, New York, NY, United States 10280, 917-587-7883, Internet: [www.101edu.co](http://www.101edu.co) **101** builds subject-specific classroom engagement tools that promote active learning in college STEM courses. Our first product for chemistry courses, Chem101, was piloted with 2000 students across 8 schools in Fall 2016 including Carnegie Mellon, Columbia University, and the University of Cincinnati. **1530**

**abcr GmbH**, Im Schlehert 10, Karlsruhe, Germany 76187, +49 721 950 61101, fax: +49 721 950 6133, Internet: [www.abcr.de](http://www.abcr.de) With **abcr**, you have access to over 260,000 products from the organic, organometallic and inorganic specialty chemicals area.

– R&D services: custom synthesis, research projects  
– Production: research, syntheses, scale-up, pilot and commercial plant in our production facilities  
– Semi bulk / bulk business  
– Catalogue business: procurement and sales of specialty chemicals **1718**

**Accela ChemBio Co. Ltd.**, 9883 Pacific Heights Blvd., Suite H, San Diego, CA, United States 92121, 858-699-3322, fax: 858-769-6322 or 858-876-1948, e-mail: [info@accelchem.com](mailto:info@accelchem.com), Internet: [www.accelchem.com](http://www.accelchem.com) **Accela ChemBio** focus on design, synthesis, manufacture R&D chemicals and pharmaceutical intermediates for worldwide scientific research institutions and industrial development corporations. Since founding in 2007, **Accela** are providing high-quality, innovative products to over 3,000+ valuable customers in 38 countries. We run ISO9001-Quality-System daily, and certified by Tuv since 2010. **418**

 **Ace Glass, Inc.**, 1430 N. West Blvd., PO Box 688, Vineland, NJ, United States 08360, 800-223-4524, fax: 800-543-6752, e-mail: [sales@aceglass.com](mailto:sales@aceglass.com), Internet: [www.aceglass.com](http://www.aceglass.com) **Ace Glass Incorporated** has been a leader and innovator of scientific glassware, lab equipment and glass apparatus for over 80 years. **Ace Glass** provides a wide variety of quality U.S. manufactured standard and custom scientific glassware, including reactors engineered to any customer specifications from 100mL-200L. **518**

**ACS Career Fair Recruiters** **2028**  
ACS Career Consultants **2028**  
Aramco Services Company **1825**  
Brewer Science, Inc. **1927**  
Central Intelligence Agency (CIA) **1931**  
Getson & Schatz, P.C. **2026**  
Gilead **1735**  
Institute for Basic Science (IBS) **1934**  
KAUST **1725**  
Lanzhou University **1933**  
Merck & Co. **1925**  
Open Eye **2030**  
ORAU **1935**  
Sasol **2034**

**ACS Career Navigator**, 1155 16th Street, NW, Washington, DC, United States 20036, 202-872-6031, e-mail: [k\\_redmond@acs.org](mailto:k_redmond@acs.org), Internet: [www.acs.org/content/acs/en/careers/career-navigator.html](http://www.acs.org/content/acs/en/careers/career-navigator.html) **725**

**ACS Committee on Chemical Health & Safety**, P.O. Box 152329, San Diego, CA, United States 92195, 619-990-4908, Internet: [www.acs.org/safety](http://www.acs.org/safety) The ACS Committee on Chemical Safety and the Division of Chemical Health and Safety provide this opportunity for you to learn more about chemical safety within the ACS and to have chemical safety experts answer your questions. **1125**

**ACS Division of Small Chemical Businesses (SCHB)**, 4344 Moorpark Ave., Ste # 1, San Jose, CA, United States 95129, 408-834-8597, fax: 408-351-7900, e-mail: [expo-booth@acs-schb.org](mailto:expo-booth@acs-schb.org), Internet: [www.acs-schb.org](http://www.acs-schb.org) The ACS Division of Small Chemical Businesses (SCHB) has objectives "To aid in the formation, development, and growth of small chemical businesses." SCHB helps chemists working in small enterprises, including self-employed, with the legal, social, educational, legislative, regulatory, and economic aspects of their unique professional status. **1329**

**ACS Education**, 1155 16th Street, NW, Washington, DC, United States 20036, 202-872-6269, fax: 202-833-7732, e-mail: [education@acs.org](mailto:education@acs.org), Internet: [www.acs.org/education](http://www.acs.org/education) The ACS Education Division serves learners and educators by building communities and providing effective chemistry education resources, grants, communities, professional development opportunities, standards and guidelines. Stop by our booth to find information that can support your efforts to provide innovative, relevant, and effective chemistry education from kindergarten through professional education. **725**

**ACS Green Chemistry Institute**, 1155 16th Street, NW, Washington, DC, United States 20036, 202-872-6102, fax: 202-776-8009, e-mail: [gci@acs.org](mailto:gci@acs.org), Internet: [www.acs.org/gci](http://www.acs.org/gci) The ACS Green Chemistry Institute® believes that innovation in sustainable and green chemistry and engineering (GC&E) is vital to solving environmental and human health challenges. Our mission is to catalyze and enable the implementation of GC&E throughout the global chemical enterprise and empower you to re-imagine a sustainable future. **724**

**ACS Meetings & Expositions**, 1155 Sixteenth Street NW, Washington, DC, United States 20036, 800-227-5558, fax: 202-872-6128, e-mail: [m\\_stevenson@acs.org](mailto:m_stevenson@acs.org), Internet: [www.acs.org/meetings](http://www.acs.org/meetings) The ACS Meetings booth displays information on current and future regional meetings and the spring and fall National Meetings. Register for a regional meeting or get information on submitting an abstract to a meeting in your region. The programming is diverse and exciting! Meet the volunteers who are planning these meetings at the booth. Visit the regional meetings website at [www.acs.org/regionalmeetings](http://www.acs.org/regionalmeetings) for a tour of this year's conferences. Information on future national meetings will be on display. **725**

**ACS Member Insurance Program**, 1155 16th Street, N.W., Washington, DC, United States 20036, 800-227-5558, ext. 6037, fax: 202-872-4435, e-mail: [memins@acs.org](mailto:memins@acs.org), Internet: [www.acs.org/insurance](http://www.acs.org/insurance) The ACS Member Insurance Program is committed to offering quality comprehensive insurance plans to members and their families. Stop by the ACS station to learn more about the plans available such as Life and Health Insurance, Auto & Homeowners, Long Term Care, Professional Liability, Chemical Educators Legal Liability and more. **725**

**ACS Membership**, 1155 16th St., NW, Suite OTH420, Washington, DC, United States 20036, 2028726062, Internet: [www.acs.org/Member](http://www.acs.org/Member) Handbook Visit Membership in the ACS Booth to pick up a copy of the 2017 Member Handbook and a booth raffle card. Visit at least 5 ACS Kiosks and return your completed card to be entered to win one of 10 prizes! **725**

 **ACS Publications** **ACS Publications**, 1155 16th Street, N.W., Washington, DC, United States 20036, 202-872-6862,

fax: 202-872-6005, e-mail: [s.jackson@acs.org](mailto:s.jackson@acs.org), Internet: [pubs.acs.org](http://pubs.acs.org) ACS Publications is the leading publisher in chemistry and related sciences. Stop by our booth to receive free gifts and information on our newest journal, ACS Earth and Space Chemistry, and be sure to participate in our interactive author mosaic by using the hashtag #ACSmosaic. Visit ACS theater to meet Priestley Medalist Tobin Marks and learn about C&EN's Molecule of the Moment. **725**

**ACS Store**, 1155 16th Street, N.W., Washington, DC 20036, United States, Phone: 800-ACS-5558 Fax: 202-872-6067, Internet: <http://www.acs.org/store> **725**

**ACS Web Strategy & Operations**, 1155 16th Street, NW, Washington, DC, United States 20036, 202-872-4548, e-mail: [m\\_parker@acs.org](mailto:m_parker@acs.org), Internet: [www.acs.org](http://www.acs.org) ACS.org is getting a makeover! Our goal is to simplify the navigation and tell the ACS story in a more captivating way so you can find what you need faster and discover new things easier. Stop by the ACS Web kiosk to provide input and learn more. **725**

**AdValue Technology**, 3158 S. Chrysler Ave., Tucson, AZ, United States 85713, 520-514-1100, fax: 520-747-4024, Internet: [www.advaluetech.com](http://www.advaluetech.com) AdValue Technology specializes in areas of Alumina, Fused Quartz, Sapphire and Zirconia. Products range from Alumina and Silicon Dioxide Powders, Crucibles, Tubes & Rods, Plates & Discs, Sample Pans, UV Cuvettes, Quartz Wool, Ceramic Membranes, and Cerium Polishing Powders. We strive to be your valuable partner in Material Science! **1224**

**Advanced ChemBlocks Inc.**, 849 Mitten Rd., Suite 101, Burlingame, CA, United States 94010, (650) 692 2368, fax: (650) 560 6477, e-mail: [sales@achemblock.com](mailto:sales@achemblock.com), Internet: [www.achemblock.com](http://www.achemblock.com) **Advanced ChemBlocks Inc** is a research-based manufacturer and world-wide supplier of various novel advanced building blocks and research chemicals for drug discovery. We focus on various advanced building blocks having biological and pharmacological bias. Please check our website [www.achemblock.com](http://www.achemblock.com) for more information. **1015**

**Advanced Polymer Materials Inc.**, 2264 Chemin St. Francois, Dorval, QC, Canada H9P 1K2, 514-683-8488, fax: 514-683-2070, e-mail: [gary.yu@apmpolymers.com](mailto:gary.yu@apmpolymers.com), Internet: [www.apmpolymers.com](http://www.apmpolymers.com) We are a Canada based manufacturing company with R&D capability. We produce polymers and block copolymers for your R&D and production, such as controlled release formulation, tissue engineering, nano-structure formation, etc. We make functional block copolymers. We do contract research, custom synthesis and scaling-up according to your specification. **1728**

**Advion**, 10 Brown Rd., Ithaca, NY, United States 14850, 607-379-4565, fax: 607-257-5761, Internet: [www.advion.com](http://www.advion.com) Advion is a leader in MS & synthesis solutions. The expression CMS is a high performance, compact, affordable single quad mass spectrometer. Its compact size allows it to fit in space-limited labs for direct access and immediate results for chemists requiring mass confirmation, reaction monitoring, QC and purity analysis. [www.expressioncms.com](http://www.expressioncms.com) **1107**

**AGI USA Inc.**, PO Box 21388, Lehigh Valley, PA, United States 18002-1388, (610) 691-2385, Internet: [www.asahiglassplant.com](http://www.asahiglassplant.com) AGI is a world wide state-of-the-art scientific glassware manufacturer. Our proprietary Ring Baffle Reactor technology is the most efficient system in the world. Products include Rotary Evaporators, Thin Film and Short Path Evaporators, Pressure Reactors, Filter Reactors, Nutsche Filter Reactors, Molecular Distillation, Liquid-to-Liquid Extraction Columns and Mini Plants. **1525**

**AgileBio LLC - LabCollector**, 5473 Keary Ville Road, Suite 255, San Diego, CA, United States 92123, 347-368-1315, Internet: [www.labcollector.com](http://www.labcollector.com) AgileBio develops LabCollector

## EXPOSITION

([www.labcollector.com](http://www.labcollector.com)), which is a modular software for laboratory management (LIMS). It includes flexible inventory management for any type of samples or chemicals and many add-ons like an Electronic Lab Notebook, metrology tracking, service management... Chemistry plugin for structure search is available. LabCollector can be used free. **1431**

**Agilent Technologies**, 2850 Centerville Rd., Wilmington, DE, United States 19808, 302-636-1604, fax: 302-633-8944, e-mail: [alanzo\\_brown@agilent.com](mailto:alanzo_brown@agilent.com), Internet: [www.agilent.com/chem](http://www.agilent.com/chem) Agilent Technologies is a leading provider of GC, LC, MS and Spectroscopy instruments, technologies, related consumables, support, services, and workflow solutions that enable labs to analyze, confirm and quantify substances of interest with confidence while maintaining the most stringent laboratory practices, from sample preparation to final report. [www.agilent.com](http://www.agilent.com). **1401**

**AIP Publishing – The Journal of Chemical Physics**, 1305 Walt Whitman Road, Suite 300, Melville, NY, United States 11747, 516-576-2279, fax: 516-349-9704, e-mail: [mgross@aip.org](mailto:mgross@aip.org), Internet: [jcp.aip.org](http://jcp.aip.org) The Journal of Chemical Physics (JCP) publishes concise and definitive reports of significant research in the methods and applications of chemical physics. JCP is the most highly cited journal in Atomic, Molecular, and Chemical Physics. [jcp.aip.org](http://jcp.aip.org) **629**

**AK Scientific, Inc.**, 30023 Ahern Avenue, Union City, CA, United States 94587, (510) 429-8835, Internet: [www.aksci.com](http://www.aksci.com) AK Scientific is a trusted chemical supplier contributing to a variety of R&D applications for over 10 years. In the San Francisco Bay Area, we stock over 17,000 products ready to ship same-day. A commitment to excellent service and guaranteed quality makes our products essential for researchers worldwide. **1320**

**Aldlab Chemicals, LLC**, 3H Gill St., Suite 300, Woburn, MA, United States 01801, 203-589-4934, fax: 781-305-3851, e-mail: [sales@aldlab.com](mailto:sales@aldlab.com), Internet: [www.aldlab.com](http://www.aldlab.com) ALDLAB is a leading supplier for chemical reagents. More than 20000 chemicals are in stock. Many special building blocks in R&D are only available in Aldlab. Aldlab is on the right track for fast growth with ISO9001:2008 and cGMP facilities. **1528**

**American Society for Engineering Education (ASEE)**, 1818 N. Street, NW Suite 600, Washington, DC 20036 United States, Phone: 202-350-576, Internet: <http://www.asee.org> **113**

**Analytik Jena US, Inc.**, 100 Cummings Center, Suite 234-N, Beverly, MA, United States 01915-6115, 781-460-0697, fax: 781-376-9897, Internet: [analytik-jena.com](http://analytik-jena.com) Analytik Jena is a leading provider of high end analytical instrumentation for spectroscopy, optical and elemental analysis. Our portfolio includes traditional analytical technology for the measurement of elements and molecules. Our instruments include ICP-MS, High Resolution ICP-OES, Single Source and traditional Atomic Absorption, UV/Vis, and Elemental Analyzers. **316**

**Anasazi Instruments Inc.**, 4101 Cashard Ave., Suite 103, Indianapolis, IN, United States 46203, 317-783-4126, fax: 317-783-7083, e-mail: [sales@ainmr.com](mailto:sales@ainmr.com), Internet: [www.ainmr.com](http://www.ainmr.com) Manufacturers of the highest resolution, highest sensitivity, and largest application base of any permanent magnet based NMR instrument. 60 and 90 MHz Eft are general purpose NMR instruments available as 1H, 1H/13C, and multinuclear. These instruments are low maintenance and do not require cryogens. **1016**

**Anasys Instruments Corp.**, 325 Chapala St., Santa Barbara, CA, United States 93101, 805-730-3310, Internet: [www.anasysinstruments.com](http://www.anasysinstruments.com) Anasys Instruments is the world leader in nanoscale IR spectroscopy dedicated to delivering innovative AFM based nano-spectroscopy products and solutions that measure spatially varying physical and chemical properties with

nanoscale spatial resolution in a diverse range of fields, including polymers, 2D materials, materials science, life science and micro-electronics industry. **1127**

 **Anton Paar USA**, 10215 Timber Ridge Drive, Ashland, VA, United States 23005, 800-722-7556, fax: 804-550-1057, e-mail: [info.us@anton-paar.com](mailto:info.us@anton-paar.com), Internet: [www.anton-paar.com](http://www.anton-paar.com) Anton Paar produces high-quality measuring and analysis instruments for laboratory, research and industrial applications. In the fields of density and concentration measurement we are the established world leader. Our product portfolio also includes viscometers, rheometers, polarimeters, refractometers, microwave synthesis, microwave decomposition, and instruments for X-ray structure analysis. **818**

**Ark Pharm, Inc.**, 3860 North Ventura Drive, Arlington Heights, IL, United States 60004, 847-367-3680, fax: 847-367-3681, e-mail: [sales@arkpharminc.com](mailto:sales@arkpharminc.com), Internet: [www.arkpharminc.com](http://www.arkpharminc.com) Ark Pharm, Inc. is a leading supplier of building blocks, scaffolds and other advanced intermediates. We have over 20,000 compounds in stock. We do contract research, custom synthesis and bulk intermediates. Please visit our website at [www.arkpharminc.com](http://www.arkpharminc.com) for more information. **717**

**Asahi Spectra Co., Ltd.**, Gardenia Bldg. 4F, 2-13-1, Kamijujo, Kita-Ku, Tokyo, JAPAN 114-0034, 81-33-909-1151, fax: 81-33-909-1152, Internet: [www.asahi-spectra.com](http://www.asahi-spectra.com) Monochromatic illumination system  
– Higher light intensity than the grating monochromator.  
– Monochromatic illumination (bandpass filter)  
– IR heat blocking  
– Fiber output  
– <Applications> Photocatalyst, water-splitting, hydrogen production, artificial photosynthesis and so on. / Optical filter (UV-IR) / Solar simulator (Not exhibited) **1427**

**Astatech, Inc.**, Keystone Business Park, 2525 Pearl Buck Road, Bristol, PA, United States 19007, 215-785-3197, fax: 215-785-2656, e-mail: [sales@astatechinc.com](mailto:sales@astatechinc.com), Internet: [www.astatechinc.com](http://www.astatechinc.com) AstaTech is the leading contract research organization (CRO) in the U.S. As a global pharmaceutical solution company, AstaTech offers advanced intermediates and building blocks. We also provide high-quality services to global pharmaceutical and other chemical industries. **1228**

**Asylum Research, an Oxford Instruments Company**, 6310 Hollister Avenue, Santa Barbara, CA, United States 93117, 805-696-6466, fax: 805-696-6444, e-mail: [sales@asylumresearch.com](mailto:sales@asylumresearch.com), Internet: [www.oxford-instruments.com/AFM](http://www.oxford-instruments.com/AFM) Asylum Research introduces the new Cypher VRS Video-Rate AFM, the first and only full-featured video-rate atomic force microscope. Visualize biochemical reactions, self-assembly, and more while imaging at 625 lines/second (up to 10 fps) together with the same ease of use, modes, and accessories as the rest of the Cypher family. **1305**

**Asynt, Ltd.**, Unit 29 Hall Barn Rd. Industrial Estate, Isleham, United Kingdom CB7 5RJ, Internet: [www.asynt.com](http://www.asynt.com) **1428**

**Authentic Development**, 18700 Yorba Linda Blvd., #45, Yorba Linda, CA, United States 92886, 847-873-9559, Internet: [www.authenticdevelopment.com](http://www.authenticdevelopment.com) Bad bosses suck productivity, reduce engagement, and limit results. Authentic Development provides best in class leadership training (Situational Leadership II) and leadership coaching that creates bosses who transform into engagement and results producing leaders. Founded by a chemist, we speak your language. Come have a real conversation with an authenticity geek! **220**

**BASF Corporation**, 100 Park Avenue, Florham Park, NJ, United States 07932, 973-245-5930, fax: 973-245-5833, e-mail: [jason.nolan@partner.basf.com](mailto:jason.nolan@partner.basf.com), Internet: [www.basf.us](http://www.basf.us) **1724**

**Bentham Sciences Publishers Ltd.**, 117 S. Euclid Avenue, Oak Park, IL, United States 60302, 708-308-4203, fax: 312-275-7530, e-mail: [morrissy@benthamsience.org](mailto:morrissey@benthamsience.org), Internet: [www.benthamscience.com](http://www.benthamscience.com) Bentham Sciences Publishers is a major STM journal and e-book publisher of 120 plus journal titles and over 600 e-books, helping to answer the information needs of the pharmaceutical and biomedical research community. The leading journals in the field include Current Neuropharmacology (Impact Factor 3.753), Current Cancer Drug Targets (Impact Factor 3.707), Recent Patents on Anti-Cancer Drug Discovery (Impact Factor 3.533), Current Medicinal Chemistry (Impact Factor 3.455) and Current Alzheimer Research (Impact Factor 3.145). **1818**

**Biolin Scientific**, 215 College Road, Suite 300, Paramus, NJ, United States 07652, 877-773-6730, fax: 866-415-8164, Internet: [www.biolinscientific.com](http://www.biolinscientific.com) Biolin Scientific provides proprietary nanotechnology and advanced measurement systems. From contact angle meters and tensiometers to instrumentation for film fabrication and characterization as well as systems that enable analysis of molecular interactions and surface properties, we are your partner for performing research at the frontiers of science and technology. **402**

**BioRAFT**, 1 Canal Park, Suite 1A, Cambridge, MA 02141 United States Phone: 617-475-9281 Internet: [www.bioraft.com](http://www.bioraft.com) **1817**

**BioSolveIT**, An der Ziegelei 79, St. Augustin, Germany 53757, 49-2241-2525-0, fax: 49-2241-2525-525, e-mail: [detering@biosolveit.de](mailto:detering@biosolveit.de), Internet: [www.biosolveit.com](http://www.biosolveit.com) BioSolveIT is a globally operating leading company providing easy-to-use yet sophisticated software solutions for hit finding, lead optimization and prioritization. Its core customer base are Medicinal and Computational Chemists alike and everyone with a passion for innovative and efficient drug discovery. **1418**

**Biotope**, 10430 Harris Oaks Blvd, Suite C, Charlotte, NC, United States 28269, 704 654 4900, fax: 704 654 4917, Internet: [www.biotope.com](http://www.biotope.com) Biotope is a leading provider of Instruments and Consumables for use in Medicinal Chemistry, Organic Chemistry, Peptide Synthesis and Analytical Testing. Check out the Extrahera, Simple automation, the Isolera Dalton, Mass Detection for Flash Systems, and the Isolera Spektra with ACI and Assist which purifies 250 mg in 5 minutes. **526**

**BioTools, Inc.**, 17546 Bee Line Jupiter, FL 33458 United States, 561-625-0133, 866-btools1, fax: 561-625-0717 e-mail: [info@btools.com](mailto:info@btools.com) Internet: <http://www.btools.com> **1532**

**BrandTech Scientific**, 11 Bokum Road, Essex, CT, United States 06426, 860-767-2562, fax: 860-767-2563, Internet: [www.brandtech.com](http://www.brandtech.com) BrandTech® Scientific offers a complete line of laboratory equipment for Life Sciences and Chemistry including: BRAND® liquid handling products; VACUUBRAND vacuum pumps; VIT-LAB volumetric plastics; BLAUBRAND Class A, USP-certified volumetric glassware; and BO-CHEM stainless steel support jacks. Products include pipettes; repeating pipettes; pipette controllers; bottle-top dispensers; microplates, and PCR products. **1625**

**Brookhaven Instruments Corp.**, 750 Blue Point Road, Holtsville, NY, United States 11742-1832, 631-758-3200, fax: 631-758-3255, e-mail: [info@brookhaveninstruments.com](mailto:info@brookhaveninstruments.com) Brookhaven Instruments pioneered modern techniques in characterizing nanoparticles, proteins and polymers using light scattering for particle sizing, zeta potential and absolute molecular weight. Whether solving routine Research & Development, Quality Control or Process Control problems, Brookhaven has the instrumentation, the experience and the expertise to help you get the results you need to be productive. New software, Particle Solutions, is a unique database approach with outstanding search features

that combines all the techniques under one umbrella to ensure maximum productivity. **1318**

**Bruker**, 19 Fortune Drive, Billerica, MA, United States 01821, 888-4BRUKER, e-mail: info@bruker.com, Internet: www.bruker.com Welcome to the world's most comprehensive range of scientific instrumentation available under one brand - Bruker. A brand synonymous with excellence, innovation and quality. Bruker offers a wide range of applications for molecular characterization in chemistry and life sciences as well as solutions for materials research and nanotechnology. Visit us! **1101,1100**

**Brush with Science**, 3515 B Edison Way, Menlo Park, CA 94070, (650) 440-0084, Internet: www.brushwithscience.com Chemistry and math games made out of paper and wood, scientifically inspired artwork and music, all created and composed by the owner / artist of Brush with Science; Julie Newdoll. Great for an Atoms First approach in the classroom, or just for fun. **1435**

**BUCHI Corporation**, 19 Lukens Drive, Suite 400, New Castle, DE, United States 19720, 302-652-3000, fax: 302-652-8777, e-mail: us-sales@buchicom, Internet: www.buchi.com For 75 years BUCHI is a leading solution provider in laboratory technology for R&D, quality control and production worldwide. Our solutions for laboratory, industrial and parallel evaporation, spray drying, melting point, preparative chromatography, extraction, distillation & digestion, Dumas and NIR are designed to meet the needs of our customers globally. **1613**

 **Cambridge Crystallographic Data Ctr.**, 174 Frelinghuysen Road, Piscataway, NJ, United States 08854, 848-445-4869, e-mail: admin@ccdc.cam.ac.uk, Internet: www.ccdc.cam.ac.uk The Cambridge Crystallographic Data Centre is dedicated to the advancement of chemistry and crystallography for the public benefit. The CCDC supports structural chemistry research worldwide through the Cambridge Structural Database (CSD), the world's comprehensive, up to date, and fully curated knowledge base of small molecule crystal structures, powerful software solutions and powerful software solutions. **1429**

**Carbosynth LLC**, 7887 Dunbrook Rd., Suite F, San Diego, CA, United States 92126, Internet: www.carbosynth.com Carbosynth offers over 6000 carbohydrates and nucleosides. This range includes monosaccharides, enzyme substrates, D- and L- sugars, oligosaccharides, detergents and nucleosides. Our catalogue offers quantities for R&D, but many are produced in bulk. We also offer a custom synthesis service out of our UK based laboratories. **1720**

 **CAS**, 2540 Orlentangy River Road, Columbus, OH, United States 43210, 614-447-3600, fax: 614-447-3713, e-mail: help@cas.org, Internet: www.cas.org CAS, a division of the American Chemical Society, is dedicated to the ACS vision of improving people's lives through the transforming power of chemistry. At CAS, we organize, analyze and share information that drives scientific discoveries. We facilitate your research to fuel tomorrow's innovation. Together, we will do great things. **725**

**Cellatrix, LLC**, 4320 Forest Park Avenue, Suite 303, St. Louis, MO, United States 63108, 314-660-0005, Internet: www.cellatrix.com Cellatrix developed a 3D Tissue Engineered Bone Marrow (3DTEBM) cell culture model derived from cancer patients' material, that allows proliferation of cancer cell lines and primary patient samples ex vivo. Cellatrix provides drug efficacy testing service using the 3DTEBM, and sells its "3D-Cell-Pro" matrix and "BoneChipable" components for in-house testing. **1635**

**CEM Corp.**, 3100 Smith Farm Road, Matthews, NC, United States 28104, 704-821-7015, fax: 704-821-7894, Internet: www.cem.com CEM is a

leading provider of innovative, advanced microwave laboratory systems for chemical synthesis, sample preparation, and bioscience applications. Discover teaching and explore research at the speed of light. Our award-winning systems provide fast, reproducible results in rugged, flexible platforms and are available with a variety of vessels and accessories. **618**

**Cengage Learning, Inc.**, 500 Terry Francois Blvd., Second Floor, San Francisco, CA, United States 94158, 415-839-2329, Internet: www.cengage.com Cengage is an education and technology company built for learners. We create learning experiences that build confidence and momentum toward the future students want. Our innovative products and solutions for chemistry include OWLv2, MindTap, LabSkills PreLabs, and best-selling textbook franchises. **503**

**Chem21Labs LLC**, 2503 Oakland Drive, Cleveland, TN, United States 37312, Internet: www.chem21labs.com Couple **YOUR undergraduate labs** with Chem21Labs - online submission that replaces single-submission, hand-graded, paper lab reports with 21<sup>st</sup> Century innovation. Add computerized grading (immediate feedback with improved accuracy) to enrich the laboratory experience - "grade smarter, not harder." **1900**

**ChemBridge Corp.**, 11199 Sorrento Valley Rd., Suite 206, San Diego, CA, United States 92121, 858-451-7400, fax: 858-451-7401, e-mail: sales@chembridge.com, Internet: www.chembridge.com ChemBridge Corporation is a global provider of enabling chemistry products and contract research services for small molecule drug discovery. ChemBridge's extensive portfolio includes over 1,000,000 diverse and target-focused screening compounds, 14,000 chemical building blocks, our Hit2Lead.com on-line chemical store, and high-end, research-intensive custom library and chemistry services. **1129**

 **Chemglass Life Sciences**, 3800 North Mill Road, Vineland, NJ, United States 08360, 800-843-1794, fax: 800-922-4361, Internet: www.cglife.com **700**

**Chemical Computing Group**, 1010 Sherbrooke Street West, Suite 910, Montreal, QC, Canada H3A 2R7, 514-393-1055, fax: 514-874-9538, e-mail: info@chemcomp.com, Internet: www.chemcomp.com CCG (Chemical Computing Group) is a leading supplier of software solutions for life sciences. With a proven track record in scientific innovation, CCG continues to provide state-of-the-art applications in drug discovery to pharmaceutical, biotechnology and academic researchers. CCG's software platform is the Molecular Operating Environment (MOE) which is used by computational chemists, medicinal chemists and biologists in the major pharmaceutical and biotechnology companies throughout the world. CCG has a very strong reputation for collaborative scientific support, maintaining support offices in both Europe and North America. Founded in 1994, CCG is headquartered in Montreal, Canada. For more information visit: www.chemcomp.com **1624**

**Chemily, LLC**, 58 Edgewood Ave., N.E. #123, Atlanta, GA 30303, United States, 404-514-2601, Internet: www.chemily.com Chemily Glycoscience is a manufacturer of specialty glycans, glycosyltransferases, oligosaccharides and other biochemicals. We also offer on-demand synthesis of custom glycans, glycopeptides, glycoproteins, and glycoconjugates. For more information, visit: http://www.chemilyglycoscience.com. **1630**

**Chemrus Inc.**, 84 October Hill Road, Holliston, MA, United States 01746, Internet: www.chemrus.com Chemrus Inc developed the world's first polymer-structured disposable filter funnel for solid-liquid separation. Recently, we developed the world's first reaction flasks, which can be kept upright on the bench without the use of cork rings, perform multi-flask reactions without the use of clamps, and perform solvent concentration under reduced pressure. **1628**

**Chemshuttle**, 3916 Trust Way, Hayward, CA, United States 94545, 510-999-8909, fax: 510-999-8902, e-mail: sales@chemshuttle.com, Internet: www.chemshuttle.com Founded in 2010 by medicinal chemists for chemists, ChemShuttle is a premier chemistry CRO for FTE / Custom Synthesis from mg to kg, and a research chemical supplier for building blocks / bioactive compounds. ChemShuttle has business center at San Francisco Bay Area, and research facility at Wuxi City, Jiangsu, China. **1801**

**CiVentiChem**, 1001 Sheldon Drive, #101, Cary, NC, United States 27513, 919-678-0704, fax: 919-678-0706, Internet: www.cvchem.com CiVentiChem, a global CDMO, provides cGMP API manufacturing, process development, and contract R&D services from our FDA inspected headquarters in Cary, NC. In addition, CiVentiChem provides contract R&D and manufacturing of Key Starting Materials and specialty chemicals up to multi-metric ton scale from our facility in Hyderabad, India. **1014**

**Collaborative Drug Discovery**, 1633 Bayshore Highway, Suite 342, Burlingame, CA, United States 94010, 901-297-3980, Internet: www.collaborativedrug.com Collaborative Drug Discovery (Booth 1620) provides a drug discovery platform your whole project team will embrace. CDD Vault enables users to organize chemical & biological data & collaborate through an intuitive web interface. The Visualization and Inventory modules expand the platform by providing dynamic data visualization and compound/reagent tracking. **1620**

**CombiPhos Catalysts, Inc.**, P.O. Box 220, Princeton, NJ, United States 08542-0220, 609-587-6500, fax: 609-587-6570, e-mail: info@combiPhos.com, Internet: http://www.combiPhos.com CombiPhos Catalysts, Inc. discovers, develops, manufactures, and markets historically unstable chemical intermediates (gram to kg scale) including derivatives of pyridine-2-boronic acids, pyridine-4-boronic acids, thiazole-4-boronic acids, thiazole-5-boronic acids, pyrazole-3-boronic acids, pyrazole-4-boronic acids, imidazole-4-boronic acids, pyrimidine-5-boronic acids, pyrazine-2-boronic acids, thiophene-2-boronic acids, furan-2-boronic acids, pyridazine-4-boronic acids, and triazole-4-boronic acids, via novel catalytic transformations. **1011**

**CONFLEX Corp.**, 3-23-17 Takanawa, Minato-ku, Shinagawa Center Bldg. 6F, Tokyo, Japan 108-0074, 81-3-6380-8290, fax: 81-3-6380-8299, e-mail: info@conflex.co.jp, Internet: www.conflex.net CONFLEX permits fast, accurate, automated conformation searching and analysis critical to drug discovery and chemical engineering. CONFLEX can completely search the conformational space of a flexible molecule to find every optimal structure of chemically significant conformers. CONFLEX also includes crystal structure search and optimization, CD/UV/Vis spectra and solvent effect. **1112**

**CP Lab Safety**, 14 Commercial Blvd., Suite 113, Novato, CA, United States 94949, 415-883-2600, fax: 415-532-1662, e-mail: carel@cplabsafety.com, Internet: www.cplabsafety.com Manufacturer of ECO Funnels, Chromatography Funnels, Secondary Containers and Solid Waste Containers. ECO Funnels reduce harmful emissions and help prevent fire while solving the open waste container problem. Made of HDPE with a gasket in the lid, sturdy hinge and latch. Unique design will prevent container over-filling. **1208**

**CrystalMaker Software Ltd.**, Centre for Innovation & Enterprise, Oxford University Begbroke Science Park, Begbroke, Oxfordshire, United Kingdom OX5 1PF, 44-1865-854804, fax: 44-1865-854805, e-mail: info@crystallmaker.com, Internet: http://www.crystallmaker.com Award-winning software for crystal and molecular modelling and diffraction simulation. Build, display, manipulate chemical structures - fast. Elegant user interface with multi-structure browsing, synchronization and animation - and one-click movie generation.

## EXPOSITION

Optional software for single-crystal or powder diffraction, with real-time simulation control and display of observed data. **1331**

**De Gruyter**, Gentiner Str. 13, Berlin, Germany D-10785, 0049 (0)30 26005 0, fax: 0049 (0)30 26005 251, e-mail: info@degruyter.com, Internet: www.degruyter.com De Gruyter is an international publisher which has published first-class scholarship since 1749. Publishing over 1,300 new book titles per year and more than 750 journals in the humanities, social sciences, medicine, natural sciences and law, the company also offers a wide range of digital media. **1306**

**Delong America**, 4020 S. Ambrose, Suite 473, Montreal, Quebec, Canada H4C-2C7, 514-904-1202, Internet: www.lv-em.com Leader in Low Voltage and Benchtop Transmission Electron Microscopes. Now with two systems available, the LVEM5 (TEM/SEM/STEM) and the LVEM25 (TEM/STEM). The LVEM systems provide rapid and convenient imaging in easy to use compact formats. LVEM technology allows for enhanced contrast compared to traditional TEMs (even without heavy metal stains). **419**

**Edinburgh Instruments**, 2 Bain Square, Kirkton Campus, Livingston, United Kingdom EH54 7DQ, +44 (0) 1506 425 300, fax: +44 (0) 1506 425 320, e-mail: sales@edinst.com, Internet: www.edinst.com Edinburgh Instruments is the global leader in the development and manufacturing of: fluorescence spectrometers (steady-state and TCSPC), transient absorption spectrometers, picosecond laser sources and gas lasers (CO<sub>2</sub>, THz). With unparalleled customer support and instruments with the highest sensitivity, Edinburgh Instruments are the experts in fluorescence. www.edinst.com **1501**

**Elemental Machines**, 186 Alewife Brook Parkway Cambridge, MA 02138, United States, 781-354-6440, Internet: http://www.elemental-machines.com **1807**

 **Elsevier**, The Boulevard, Langford Lane, Kidlington, Oxford, United Kingdom OX5 1GB, Internet: www.elsevier.com Elsevier is a world-leading provider of information solutions that support the entire research process. Our products are developed and delivered in a way that puts the chemistry researcher first, empowering them to make better decisions and enhancing their performance. **909**

**Enamine LLC**, 7 Deer Park Drive, Suite M-3, Monmouth Junction, NJ, United States 08852, 732-274-9150, fax: 732-274-9151, Internet: www.enamine.net Established in Kiev in 1991, Enamine combines a CRO profile with a production of innovative screening compound libraries, building blocks, fragments, and comprehensive chemistry support in drug discovery projects. The catalog includes a collection of 2,150,000 screening compounds and 180,000 building blocks. **216**

**Exergy**, 320 Endo Blvd Ext., Garden City, NY, United States 11530, (516) 832-9300, fax: (516) 832-9304, Internet: http://www.exerygllc.com Exergy offers an extensive product line of highly efficient Shell & Tube and Tube-in-Tube heat exchangers and Point-of-Use WFI Systems constructed of 316L SS, Hastelloy, Inconel, Titanium and other alloys. **1810**

**Extrel CMS**, 575 Epsilon Drive, Pittsburgh, PA, United States 15238, Internet: www.extrel.com Extrel is the world's leading manufacturer of Research and Process Mass Spectrometers, Residual Gas Analyzers (RGA's), Quadrupole Mass Spectrometry Systems and Components. We have been providing quadrupole mass spectrometry solutions to our Research and Industrial customers for over 50 years. Our instruments are known for their high performance, reliability and flexibility. We offer equipment for Basic Research, QA/QC Laboratories, Process Development and Process Control. Extrel's global cus-

tomers receive the most comprehensive application, technical and onsite support in the industry. **1020**

**Federal Bureau of Investigation**, 935 Pennsylvania Avenue NW, Washington, DC, United States 20535, The FBI promotes the importance of chemical security within the academic community through the Academic Chemical Security (ACS) Initiative. The ACS Initiative addresses vulnerabilities inherent in academic chemical laboratories and focuses on strategic outreach opportunities by participating in conferences and establishing a close working relationship with relevant professionals. **730**

**Flinn Scientific Inc.**, P.O. Box 219, Batavia, IL, United States 60510, 800-452-1261, fax: 866-452-1436, e-mail: jkeller@flinnsci.com, Internet: www.flinnsci.com Flinn Scientific is the leader in science and lab chemical safety. Flinn develops and offers a full line of chemistry and safety products for middle schools, high schools and higher Ed. SciMatCo manufactures high quality Hazardous Materials Safety Storage Cabinets that exceed NFPA and OSHA standards. **1819**

**Formulation USA**, 6660 N High Street, Suite 2A, Worthington, OH, United States 43085, 614-888-0023, fax: 614-987-0045, Internet: www.formulation.com Formulation manufactures two lines of instruments to include a Micro Rheology system & the Turbiscan Stability Analyzer. The Rheolaser utilizes Diffusing Wave Spectroscopy to measure the viscoelastic properties of sample at rest. Turbiscan Stability Analyzer enables you predict stability measuring Creaming, sedimentation, flocculation and particle size in High Concentration solutions without dilution. **1312**

**FRITSCH Milling and Sizing**, 57 Grant Drive, Suite G, Pittsboro, NC, United States 27312, 412-559-8840, Internet: www.fritsch-us.com FRITSCH is an internationally respected German manufacturer of application-oriented laboratory instruments. Our instruments are used worldwide for particle size reduction, sample preparation, materials science, product development, and particle analysis for fast paced industrial process monitoring and critical applications in QA, QC, and R&D. Particle sizes from nano range on up. **1721**

**Frontiers**, EPFL Innovation Park, Building I, Lausanne, Switzerland 1015, 41 21 510 17 00, fax: 41 21 510 17 01, e-mail: editorial.office@frontiersin.org, Internet: www.frontiersin.org Frontiers publishes some of the largest and most-cited journals in their fields. Established in 2007, Frontiers drives innovations in peer review, post-publication review and an ecosystem of open-science tools. Frontiers has published over 50,000 articles across 57 journals and 430 disciplines, which receive 8 million monthly views. **314**

**Gamry Instruments**, 734 Louis Drive, Warminster, PA, United States 18974, 877-367-4267, fax: 215-682-9331, e-mail: info@gamry.com, Internet: www.gamry.com Gamry Instruments is the recognized leader in instrumentation for electrochemical impedance spectroscopy. Our lineup includes single and multichannel potentiostats with currents up to 30A and EIS up to 5MHz. Stop by the booth to see our new educational bundle which includes all equipment and accessories necessary for a semester course. **1221**

**Gaussian**, 340 Quinpiac Street, Building 40, Wallingford, CT, United States 06492, 203-284-2501, fax: 203-284-2521, e-mail: info@gaussian.com, Internet: www.gaussian.com Gaussian, Inc. is the world leader in electronic structure computational chemistry programs. The Gaussian series of programs is available on every major computing environment, from PCs to supercomputers, and it is currently used in a wide variety of industrial, governmental and academic research settings worldwide. Gaussian, Inc. will be demonstrating the latest versions of Gaussian and GaussView. **919**

**GERSTEL Inc.**, 701 Digital Drive, Suite J, Linthicum, MD, United States 21090, 410-247-5885, fax: 410-247-5887, Internet: www.GERSTELus.com GERSTEL analytical instrumentation have enabled analysts to achieve ultra-low detection levels in complex matrices, while dramatically increasing sample throughput; handle difficult sample preparation challenges; and analyze a wide range of sample types. GERSTEL is the world's largest Partner of Agilent Technologies for customer oriented GCMS and LCMS solutions. **1202**

**Harrick Scientific**, 141 Tompkins Ave., 2nd Floor, P.O. Box 277, Pleasantville, NY, United States 10570, 800-248-3847, fax: 914-747-7209, e-mail: info@hamicksci.com Harrick Scientific designs and manufactures an extensive array of sampling accessories for FTIR, UV-Vis, and Raman molecular spectroscopy techniques, with configurations available for virtually all spectrometer models. Harrick accessories cover the full range of spectroscopic sampling modes, including ATR, diffuse reflection, specular reflection, and transmission. We now introduce the versatile and economical DiaMaxATR high-performance diamond ATR, and the ConcentratIR2 multiple-reflection ATR for sensitive measurements of microliter samples such as aqueous protein solutions. Temperature-controlled accessories include heated and cooled cells for in-situ catalysis, photochemistry, and kinetics studies. We work in partnership with scientists to develop novel and effective solutions for challenging research studies. Harrick Scientific—for over 40 years the leading innovator in molecular spectroscopy sampling technologies. **303**

**Heidolph North America**, 1241 Jarvis Ave., Elk Grove Village, IL, United States 60007, 2242659600, Internet: www.heidolphNA.com Heidolph North America focuses on providing unparalleled sales and support of premium laboratory equipment. Heidolph specializes in rotary evaporation, overhead stirrers, and magnetic stirring hotplates. **1325**

**Hellma USA, Inc.**, 80 Skyline Drive, Plainview, NY, United States 11803, 516-939-0888, fax: 516-939-0555, e-mail: info@hellmausa.com, Internet: www.hellmausa.com **1719**

**HEMCO Corporation**, 711 North Powell, Independence, MO, United States 64056, 816-796-2900, fax: 816-796-3333, UniFlow laboratory fume hoods ranging in size from 24" to 144" wide and large floor mount models in greater depths and up to 24' long are available. Lab furniture layout systems and lab automation enclosures built to your size and design requirements including HEPA filtered clean workstations and vented styles. **1631**

**Hidden Analytical Inc.**, 37699 Schoolcraft Road, Livonia, MI, United States 48150, 734-542-6666, fax: 734-542-6030, e-mail: info@hiddeninc.com, Internet: www.HiddenAnalytical.com Hidden Analytical manufacture high performance quadrupole mass spectrometers for precision gas analysis, materials characterization and surface science applications. Showcasing systems for catalysis studies, reaction kinetics, residual and process gas analysis. For quantitative atmospheric pressure gas analysis the new, compact QGA system includes automated gas calibration for spectral deconvolution, sub-ppm detection and fast inlet technology for pulsed gas studies. Also featuring CatLab, a unique, integrated microreactor and mass spectrometer system for characterization and evaluation of catalysts or thermal studies of evolved species. For atmospheric gas studies the SPACI-MS quantifies intra-catalyst channel species transients and distributions with high temporal resolution. **626**

**HORIBA Scientific**, 3880 Park Avenue, Edison, NJ, United States 08820-3012, 732-494-8660, fax: 732-549-5125, e-mail: info.sci@horiba.com, Internet: www.horiba.com/scientific HORIBA Scientific provides Fluorescence and Raman solutions for every application. Featured technologies include particle size and shape analysis,

zeta potential, surface area; the most sensitive steady state and lifetime spectrofluorometers, (including the PTI brand), and Raman microscopes, AFM-Raman, transmission Raman, modular Raman systems analyzers and dedicated in-situ process Raman spectrometers. **1605**

 **Magritek Inc.**, 6440 Lusk Blvd., Suite 108, San Diego, CA, United States 92121, 855-667-6835, Internet: www.magritek.com Magritek is a world leading company developing and manufacturing portable NMR solutions for education, research and industrial applications. Spinsolve™ is the first benchtop NMR instrument capable of multinuclear (1H, 19F, 31P, 13C) and multidimensional NMR that does not require cryogenics and is maintenance free. Magritek is exhibiting Spinsolve®, a revolutionary benchtop NMR spectrometer that provides exceptional performance in a low-cost, convenient and compact package. This high-performance instrument includes 13C, 1H, 19F and 31P capabilities and it is ideal for chemistry education, synthetic chemists, reaction monitoring and industrial QA/QC. **1110**

 **Malvern Instruments, Inc.**, 117 Flinders Road, Westborough, MA, United States 01581, 508-768-6400, fax: 508-768-6403, e-mail: sales.us@malvern.com, Internet: www.malvern.com Malvern's materials and biophysical characterization technology and expertise enables scientists and engineers to investigate, understand, and control the properties of dispersed systems. Used in research, development, and manufacturing, Malvern's instruments provide critical information that helps accelerate research and product development, enhance and maintain product quality, and optimize process efficiency. **1106**

**Maruzen Co., Ltd.**, 110B Meadowlands Parkway, Suite 205, Secaucus, NJ, United States 07094, 201-865-4400, fax: 201-865-4845, Internet: www.maruzen.info/hgs Maruzen International Co., Ltd (MIC) is the leading distributor of globally renowned HGS Molecular Model. The company is located in Secaucus, NJ, with the parent company Maruzen Co., Ltd. in Tokyo. Manufactured in Japan, HGS molecular model has attracted researchers, educators, and students all over the world for over 40 years. This subtle and professionally manufactured model has very wide variety of options, which will suit any type of research/ educational activities in the broad fields of chemistry, pharmacology etc. **1012**

**McGraw-Hill Education**, Two Penn Plaza, New York, NY, United States 10121-2298, 646-766-2892, fax: 646-766-2208, Internet: www.mheducation.com McGraw-Hill Education is a learning science company that delivers personalized learning experiences to help students, parents, educators and professionals drive results. McGraw-Hill Education has offices across North America, India, China, Europe, the Middle East and South America, and makes its learning solutions available in nearly 60 languages. www.mheducation.com. **1302**

 **MDPI AG**, St. Alban-Anlage 66, Basel, Switzerland CH-

4020, +41 61 683 77 34, fax: +41 61 302 89 18, e-mail: molecules@mdpi.com, Internet: www.mdpi.com MDPI, the Multidisciplinary Digital Publishing Institute, is an academic open access publisher, established in 1996. We publish over 170 peer-reviewed open access journals across ten different fields and offer publishing-related initiatives to scholars. 91% of papers published in 2016 are available in Web of Science. **1618**

 **Mestrelab Research SL**, Feliciano Barrera, 9B-Baixo, Santiago de Compostela, Spain 15706, 34-881-976-775, fax: 34-981-941-079, e-mail: info@mestrec.com, Internet: www.mestrelab.com Mestrelab Research specializes in the development of software for the processing and analysis of Analytical Chemistry data and Chemical information. Our main product Mnova is a multiplatform (Windows, Mac, Linux) and multivendor software suite designed for combined NMR and LC/GC/MS techniques. **627**

**Metamolecular, LLC**, 8070 LaJolla Shores Drive, #464, LaJolla, CA, United States 92037, 858-754-9396, Internet: www.metamolecular.com Metamolecular creates software for chemists and the teams working with them. With customers including companies and individuals engaged in research, development, and education, Metamolecular is a leader in adapting information technologies to solve chemical problems. **1533**

**Metrohm USA, Inc.**, 6555 Pelican Creek Circle, Riverview, FL, United States 33578, 866-Metrohm, fax: 813-316-4900, e-mail: info@metrohmusa.com, Internet: www.metrohmusa.com Metrohm offers a complete line of analytical laboratory and process systems for titration, ion chromatography, electrochemistry and spectroscopy. From routine moisture analysis to sophisticated anion and cation quantification, we are ready to help you develop your method and configure the optimum system. Stop by and meet Metrohm. **1324**

**Mettler-Toledo AutoChem, Inc.**, 7075 Samuel Morse Drive, Columbia, MD, United States 21046, 410-910-8493, fax: 410-910-8101, Internet: www.mt.com/autochem METTLER TOLEDO provides process analytical technology (PAT), automated synthesis reactors, and in situ sampling. In situ FTIR spectroscopy and automated sampling provides continuous analysis of reactions. Inline particle size analysis enables crystallization development with particle size and shape measurements. Reaction calorimetry provides process knowledge to eliminate scale-up and safety incidents. **405**

**MicroLAB, Inc.**, PO Box 7358, Bozeman, MT, United States 59711, 406-586-3274, fax: 406-586-3582, Internet: www.microlabinfo.com MicroLab's new FS-528 Laboratory Data System combines our patented FASTspec 360-880 nm scanning spectrophotometer and integrated sensors to create a high quality, general purpose chemistry lab instrument serving freshmen to undergraduate research. High resolution measurements support small safe "green" samples. User-friendly software encourages visualization and effective use of laboratory time. **525**

**Micromeritics Instrument Corp.**, 4356 Communications Drive, Norcross, GA 30093, United States, 770-662-3636, fax: 770-662-3696, e-mail: ussales@micromeritics.com, Internet: http://www.micromeritics.com **215**

**PROTO Manufacturing**, 12350 Universal Drive, Taylor, MI, United States 48180, 734-946-0974, Internet: info@protoxrd.com For over 30 years PROTO has provided X-ray diffraction based solutions for the characterization of materials in the laboratory and industry. Customer driven innovation has resulted in a complete product line of powder, Laue and stress diffractometers as well as X-ray tubes and custom XRD systems, and a full service laboratory. **1711**

**Proton OnSite**, 10 Technology Drive, Wallingford, CT, United States 06492, 203-678-2182, Internet: www.protononsite.com Proton OnSite is the global leader in on-site gas generation for laboratories. We offer safe, affordable and high-performance solutions for hydrogen/nitrogen/zero air generators and air compressors. Proton's units are manufactured in a wide range of space-saving stackable systems. We offer a complete line of advanced equipment for LCMS and GC markets. **401**

**Qorpak**, Corporate One West, 1195 Washington Pike, Bridgeville, PA, United States 15017, 412-257-3100, fax: 312-258-6787, Internet: www.qorpak.com Qorpak is a leading provider of lab containers and packaging products. We are best known for our huge selection of glass and plastic packaging, however we also carry caps and closures, jugs, bags, metal containers, and more. **521**

**Quantachrome Corp.**, 1900 Corporate Drive, Boynton Beach, FL, United States 33426, 5617314999125, fax: 5617329888, Internet: www.quantachrome.com Quantachrome designs and manufactures revolutionary analytical laboratory instruments for material characterization. Our instrumentation is used in leading industrial and research laboratories to measure the properties of powders and porous materials. Whether you are developing new materials or controlling your manufacturing process, our instruments and expertise provide the assistance you need. **312**

**Quantum Analytics**, 3400 East Third Avenue, Foster City, CA, United States 94404, 650-312-0360, fax: 650-312-0313, Internet: www.LQA.com Quantum Analytics works with you to simplify instrumentation acquisition. We specialize in understanding your unique analytical needs, and finding the right equipment and financing solution for you. We offer a rich portfolio of multi-vendor instrumentation, value-added services, and flexible financing options. **1712**

**Rapp Polymere GMBH**, Ernst Simon Strasse 9, Tuebingen, Germany D-72072, 49-7071763157, fax: 49-7071763158, e-mail: rapp-polymere@t-online.de, Internet: www.rapp-polymere.com Rapp Polymere is a world leader for high quality polymer supports. Resins based on TentaGel or polystyrene are used in solid phase and liquid phase chemistry. Reagents for PEGylation include hundreds of derivatives from Methoxy-PEG's, homofunctional PEG's to hetero-bifunctional PEG's. We also offer custom synthesized PEG derivatives. **1715**

**Regis Technologies**, 8210 Austin Avenue, Morton Grove, IL, United States 60053, 847-967-6000, fax: 847-967-1214, Internet: registech.com Regis Technologies provides chromatography products, specialty reagents, and purification services. They offer free chiral screenings with optimized methods and a GMP or non-GMP separation service using SFC. Ask about their unique products, such as the Wheel-O 1 and IAM columns. Visit booth 403 to learn more. **403**

**Richman Chemical Inc.**, 768 North Bethlehem Pike, Lower Gwynedd, PA, United States 19002, 215-628-2946, fax: 215-628-4262, e-mail: clk@richmanchemical.com, Internet: www.richmanchemical.com Richman Chemical specializes in custom chemical synthesis, consulting and manufacturing. Our capabilities include full cGMP manufacturing, method development, regulatory assistance, and raw material sourcing. We tailor our production solutions to each client's unique needs, saving them both time and money. **1808**

**Rigaku Americas Corp.**, 9009 New Trails Drive, The Woodlands, TX, United States 77381, 281-362-2300, fax: 281-364-3628, Internet: www.rigaku.com Rigaku provides the world's most complete line of X-ray diffraction and X-ray fluorescence instruments and components. Systems include the MiniFlex XRD and Supermini WDXRF benchtop systems, the SmartLab multi-purpose diffractometer with SAXS and in-plane capabilities, DMAX Rapid II micro-diffraction system, SMAX3000 small angle scattering systems and the ZSX Primus WDXRF. **1308**

**Robertson Microlit Laboratories, Inc**, 1705 U.S. Highway 46, Suite 1D, Ledgewood, NJ, United States 07852, (973) 966-6668, fax: (973) 966-0136, Internet: www.robertson-microlit.com Robertson Microlit Laboratories is a micro-analytical testing laboratory with over 30 years of experience, serving the pharmaceutical, nutraceutical, chemical, research, and governmental industries. Our services include: CHN; metals by AA/AE, ICP-OES, ICP-MS; IC; GC-MS; GC-FID; KF; UV/VIS; FTIR; Optical Rotation; DSC/TGA; USP testing; and method development and validation services. **1603**

**Roki S&S America Inc.**, 21515 Hawthorne Blvd., Suite 601, Torrance, CA, United States 90503, 310-540-2800, Internet: www.rokigrp.com ROKI S&S America is an industrial cartridge filter manufacturer for the most demanding critical fluid management needs. ROKI ensures the highest quality and service from lab scale proto-type testing to mass-production filtration and separation process. We work closely with our customers to achieve high quality, efficiency, and cost savings. **214**

**Royal Society of Chemistry**, Thomas Graham House, Science Park, Milton Road, Cambridge, United Kingdom CB4 0WF, 44-1223-432-378, fax: 44-1223-426-017, e-mail: sales@rsc.org, Internet: www.rsc.org The Royal Society of Chemistry is the UK's professional body for chemical

scientists; a not-for-profit organisation with 175 years of history and an international vision for the future. We promote, support and celebrate chemistry. Working to shape the future of the chemical sciences – for the benefit of science and humanity. **901**

**RT Instruments, Inc.**, 1240 Churchill Downs Ave, Woodland, CA, United States 95776, Internet: www.rtinstruments.com **318**

**Sartorius Corporation**, 5 Orville Drive, Bohemia, NY, United States 11716, 615-254-4249, Internet: www.sartorius.com **321**

**Schrodinger, Inc.**, 101 SW Main Street, Suite 1300, Portland, OR, United States 97204, Internet: www.schrodinger.com Come see our full suite of drug discovery solutions, including the industry leading Glide for flexible ligand docking, as well as our ligand-based tools. We will also exhibit our Materials Suite, featuring a diverse set of tools for computing the structure, reactivity, and properties of chemical systems. Hands-on demos are available. **1001**

**SCIENCE/AAAS**, 1200 New York Avenue, NW, Washington, DC, United States 20005, 202-326-6417, fax: (202) 842-1065, e-mail: membership@aaas.org, Internet: www.sciencemag.org The American Association for the Advancement of Science (AAAS) is the world's largest multidisciplinary scientific society and a leading publisher of cutting edge research through its Science family of journals. A trusted voice for science since 1848, our membership includes more than 100,000 members. **1527**

**Sciex**, 500 Old Connecticut Path, Framingham, MA, United States 01701, 650.631.2625, Internet: www.sciex.com SCIEX is dedicated to ensuring the safety of foods, beverages, water and the environment. Our solutions deliver fast, accurate results to exceed regulatory requirements that ensure safety. SCIEX customers depend on our instrumentation and software solutions to detect wide ranges of contaminants and toxins impacting global food and environmental resources. **1505**

**Scilligence Corporation**, 186 Alewife Brook Pkwy, Suite 304, Cambridge, MA, United States 02138, 781-330-0089, Internet: www.scilligence.com **1716**

AMPAC™ is a semiempirical quantum mechanical program, including an industry leading graphical user interface (GUI) that builds molecules and offers full visualization of results. CODESSA™ is an advanced quantitative structure/activity relationship (QSAR) program that ties information from AMPAC™ and other QM programs with experimental data. **917**

 **Sheldon Manufacturing Inc.**, 300 N. 26th Avenue, Cornelius, OR, United States 97113, 5036403000, fax: 5036401366, Sheldon Manufacturing, Inc. is an ISO 9001:2008 certified manufacturer of high quality and innovative constant temperature equipment. Major product lines: anaerobic chambers, incubators, humidity test chambers, ovens, water and bead baths, pharmaceutical, biomedical, environmental and industrial markets. Sheldon markets under the Shel Lab, Lab Armor and Bac-tron brands. **1707**

**Shimadzu Scientific Instruments Inc.**, 7102 Riverwood Drive, Columbia, MD, United States 21046, 800-477-1227, fax: 410-381-1222, Internet: www.shimadzu.com Shimadzu is a leading manufacturer of scientific instrumentation, includ-

ing chromatography, spectroscopy, FTIR, environmental monitoring, and physical measurement. Markets/industries served include pharmaceuticals, metals, forensics, educational, government, agriculture and petrochemical. **810**

**Software for Chemistry & Materials, SCM/TC/FEW**, Vrije Universiteit Amsterdam, De Boelelaan 1083, Amsterdam, Netherlands 1081 HV, 31-20-5987626, fax: 31-20-5987629, e-mail: sales@scm.com, Internet: www.scm.com Scientists at SCM are passionate about making computational chemistry work for you. Whether you research spectroscopy, heavy elements, organic electronics, chemical reactions or materials, we have the right tools (DFT, DFTB, ReaxFF, COSMO-RS) in the ADF Modeling Suite 2017. Come by to see the user-friendly graphical interface in action! **721**

**Sorbent Technologies**, 5955 Peachtree Corners East, Suite A, Norcross, GA, United States 30071, 866-767-2832, ext. 0281, e-mail: dschurer@sorbtech.com, Internet: www.sorbtech.com Your dedicated Separation Source for 16 years. Chromatography & Purification products from lab to production scale for all compounds. Highest quality and selection of Silica Gel, Bonded Silicas, Aluminas, Polymeric Resins, Gel Filtration, SEC, TLC Plates, Flash Cartridges & Systems Syringe Filters, SPE Cartridges, HPLC, GC & FPLC Columns, and more. **1206**

**Specac**, Specac, Ltd., 414 Commerce Dr., Suite 175, Fort Washington, PA, United States 19034, 44 (0)1689 873134, fax: 44 (0)1689 878527, Internet: www.specac.com Specac is a high quality manufacturer of FTIR accessories and sample preparation products, bringing new and innovative solutions to the market place on a regular basis. Specac's spectroscopic accessory products cover a range of techniques, including ATR, Diffuse Reflectance, Specular Reflectance and Transmission. **1809**

**Spectro Analytical Instruments, Inc.**, 91 Mckee Drive, Mahwah, NJ, United States 07430, 508-269-6847. **1704**

**Spectrum Chemical Mfg Corp.**, 769 Jersey Ave, New Brunswick, NJ, United States 08901, (732) 801-5651, e-mail: sales@spectrumchemical.com, Internet: www.spectrumchemical.com Spectrum manufactures and distributes over 45,000 fine chemicals and laboratory reagents in research and production quantities, including Controlled Substances (CI-CV) and the largest selection of USP/NF/FCC chemicals. Spectrum also distributes over 100,000 supply and equipment items from 250 manufacturers such as PerkinElmer, Corning, Thermo Fisher Scientific, Wheaton and KimbleChase. **425**

**SpiroChem AG**, c/o ETH-Zürich, Vladimir-Prelog-Weg 1, Zurich, Switzerland HCI-D151.1, 41 44 633 7363, fax: 41 44 633 1089, Internet: www.spirochem.com SpiroChem AG is a Swiss CRO specialized in the design and commercialization of novel building blocks for drug discovery. Unique repertoire of molecular fragments along with cutting-edge know-how in drug design & process chemistry. Ideal collaboration partner for life science companies (Custom synthesis & FTE services). **421**

**SpringerNature**, One New York Plaza, Suite 4500, New York, NY, United States 10004, 212-726-9200, fax: 212-696-9006, Internet: www.springernature.com Springer Nature is a leading global research, educational and professional publisher, home to an array of respected and trusted brands providing quality content through a range of innovative products and services. Springer Nature is the world's largest academic book publisher, publisher of the world's most influential journals and a pioneer in the field of open research. Springer Nature was formed in 2015 through the merger of Nature Publishing Group, Palgrave Macmillan, Macmillan Education and Springer Science+Business Media. Visit www.springernature.com and follow @SpringerNature. **708**

**StellarNet Inc.**, 14390 Carlson Circle, Tampa, FL, United States 33626, 813-855-8687, fax: 813-855-0394, e-mail: dpersell@stellarnet.us, Internet: www.StellarNet.us StellarNet provides low cost miniature spectrometer systems and software for product analysis, research, education, and OEM. StellarNet instrumentation is rugged for any environment - lab, process, or field. Applications include absorbance & transmission (190-2300nm), fluorimetry, microscopy, optical metrology, colorimetry, LED/Laser/Solar, LIBS, OES, NIR, & Raman (532, 785, 1064). Come See the SpectraWizard! **1425**

**Strem Chemicals**, 7 Mulliken Way, Dexter Industrial Park, Newburyport, MA, United States 01950-3104, 978-499-1600, fax: 978-465-3104, Internet: www.strem.com Strem Chemicals, Inc., an ISO 9001 certified company established in 1964, manufactures & markets over 5,000 metals, inorganics & organometallics for research & development. Our product line includes metal catalysts, ligands & biocatalysts for organic synthesis, MOCVD/ALD precursors, bubblers & nanomaterials for use in pharmaceutical, microelectronic, chemical & petrochemical industries. Custom synthesis services are also provided. **701**

**Supercritical Fluid Technologies**, One Innovation Way, Suite 303, Newark, DE, United States 19711, 302-738-3420, fax: 302-738-4320, e-mail: info@supercriticalfluids.com, Internet: www.supercriticalfluids.com New: Low cost, portable, fully featured HPLC instruments; ideal for cannabis analysis, teaching labs and on-site environmental testing. Additionally we offer laboratory and pilot scale supercritical fluid extractors, high pressure reactors, custom bioreactors, and supercritical water systems. See us for CO2 pumps, high pressure liquid pumps, and contract R&D services. **1314**

**Surface Measurement Systems**, 2125 28th Street, Suite 1, Allentown, PA, United States 18103, Internet: www.surface-measurement.com Surface Measurement Systems develops and engineers innovative experimental techniques and instrumentation for physicochemical characterization of solid state materials. We are the world leaders in Dynamic Vapor Sorption technology and Inverse Gas Chromatography instrumentation and solutions, providing professional world-class scientific and technical support for our international customers. **221**

**SurForce LLC**, 354 S. Fairview Avenue, Suite B, Goleta, CA, United States 93117, 805-722-9316, e-mail: jeff@surforce.com, Internet: www.SurForceLLC.com SurForce LLC is the leading manufacturer of the Surface Forces Apparatus (SFA). The SFA is the only means for directly measuring molecular interaction forces (static & dynamic) between extended surfaces in controllable vapors or liquids. Inducing either normal or lateral shearing motions while simultaneously monitoring any accompanying surface deformation. **1432**

**Synquest Laboratories, Inc.**, P.O. Box 309, Alachua, FL, United States 32616-0309, 386-462-0788 or 877-4-FLUORO (toll free), fax: 386-462-7097, e-mail: info@synquestlabs.com, Internet: www.synquestlabs.com SynQuest Laboratories is a manufacturer and international supplier of organic and inorganic chemicals, providing a creative and innovative range of 85,000+ items including building blocks, reactive intermediates, reagents, solvents, and compressed and liquefied gases. We offer chemical services designed to support your research from conception to pilot quantities. **1609**

**Synthonix**, 2713 Connector Drive, Wake Forest, NC, United States 27587, 919-875-9277, fax: 919-875-9601, Internet: www.synthonix.com **624**

**Syrris Ltd.**, 156 Norwell Ave, Norwell, MA, United States 02061, 617-532-1033, fax: 617-848-2997, Internet: www.syrris.com Syrris is world leader in high quality, innovative products for R&D chemists and chemical engineers. Our

products include batch and flow chemistry systems for lab, pilot plant and scale-up applications. Visit us to see Orb Pilot, our new large scale batch reactor, and our revolutionary Asia Flow Chemistry system. **1602**

**TA Instruments**, 159 Lukens Drive, New Castle, DE, United States 19720, 302-427-4000, fax: 302-427-4001, e-mail: info@tainstruments.com, Internet: www.tainstruments.com Visit TA Instruments for innovative technology in thermal analysis, rheology, microcalorimetry, and mechanical characterization. We provide the highest accuracy and sensitivity for polymers, organic and inorganic materials, and biological characterization. Learn about our all new Discovery DSC, TGA, and SDT family of instruments and the latest measurement accessories for the DHR. **504**

**Taylor & Francis Group**, 530 Walnut Street, Suite 580, Philadelphia, PA, United States 19106, 215-650-8900, fax: 215-606-0050, e-mail: kayla.danie@taylorandfrancis.com, Internet: www.tandfonline.com Taylor & Francis is committed to the publication of scholarly research and publishes a variety of journals & books concerning the field of chemistry. Visit us at www.tandfonline.com or the Taylor & Francis Booth #705 to learn about our products and services, and to request FREE sample copies. **705**

**TCI America**, 9211 N. Harbortgate Street, Portland, OR, United States 97203, 800-423-8616, fax: 888-520-1075, e-mail: sales-us@tcichemicals.com, Internet: www.TCIchemicals.com TCI is a leading global manufacturer and supplier of research chemicals to the pharmaceutical, electronic, cosmetic, chemical, environmental, and biotech industries. Our current catalog lists over 26,000 organic and biochemical products for use in research and production with 8,000 unique to TCI. Visit www.TCIchemicals.com today! **1111**

**TELEDYNE ISCO** Everywherelyoulook **Teledyne Isco - Chromatography**, 4700 Superior St, Lincoln, NE, United States 68504, 402-464-0231, fax: 402-465-3064, e-mail: iscoinfo@teledyne.com, Internet: www.isco.com The Teledyne Isco Chromatography product line includes instruments and accessories for purification of organic compounds in normal-phase and reversed phase separations, and for bio-purification of proteins, peptides, and other biopolymers. **1019**

**ThalesNano Nanotechnology Inc.**, 7. Zahony u, Budapest, Hungary H-1031, 00 36 1 8808 500, fax: 00 36 1 8808 501, Internet: www.thalesnano.com ThalesNano is dedicated to making dangerous and difficult chemistry safe and easy to perform while assisting advances in the scientific field of chemistry. The company is widely recognized for its expertise in transforming chemical processes to microscale continuous-flow operations and developing manual or robotic continuous microreactors for the chemical industry. **524**

**Thermo Fisher Scientific**, 168 Third Avenue, Waltham, MA, United States 02451, 781-622-1000, fax: 800-678-5599, Internet: www.thermofisher.com Visit Thermo Fisher Scientific for integrated laboratory workflow solutions including specialty chemicals, metals and materials, sample preparation, chromatography, mass spectrometry, trace elemental analysis and molecular spectroscopy. Come see the very latest technologies to help streamline processes, deliver confident results, yield higher throughput and reduce sample preparation. **1114,1115**

**Thieme Chemistry**, Ruedigerstr. 14, Stuttgart, Germany 70469, 49-711-8931-771, fax: 49-711-8931-777, e-mail: marketing@thieme-chemistry.com, Internet: www.thieme-chemistry.com Thieme Chemistry publishes highly evaluated information about synthetic and general chemistry for professional chemists and advanced students since 1909. Our portfolio includes the journals SYNFACTS, SYNLETT, SYNTHESIS and SynOpen, the synthetic methodology tool Science of Synthesis, the reference guide Pharmaceutical Substances, the chemical encyclopedia ROEMPP and a selection of monographs. **732**

**Top Hat**, 2 Carlton Street, Suite 600, Toronto, ON, Canada M5B 1J3, 1-888-663-5491, Internet: www.tophat.com **1902**

**Tosoh Bioscience LLC**, 3604 Horizon Drive, Suite 100, King of Prussia, PA, United States 19406, 484-805-1219, fax: 610-272-3028, Internet: www.tosohbioscience.com We are a global leader in high quality, innovative pre-packed HPLC columns and bulk resins with the TSKgel® and TOYOPEARL® brand names, as well as our EcoSEC® GPC Systems. Stop by booth #625 to learn about our newest innovations in all of our product lines. **625**

**TWD Kemtech America**, 10555 86th Avenue, Lakeview Corporate Park, Pleasant Prairie, WI, United States 53158, 973-476-8600, fax: 262-605-3262, Internet: www.kemtech-america.com KEMTECH AMERICA markets exclusively SYNTHWARE branded specialty glassware to North American synthetic research laboratories. It also provides consumable pathology products to clinical and research markets. KEMTECH is recognized for its high quality standard at attractive prices. We strive to add personal touch to our customer experiences. **400**

**UNIQSIS** **Uniqsis**, 29 Station Road, Shepreth, United Kingdom SG8 6GB, Internet: www.uniqsis.com Uniqsis FlowLab and FlowSyn are flexible, easy to use continuous flow reactors for reaction optimization, library synthesis, reagent screening, synthesis and scale up. Reactions from mg to multiple kg of material can be produced at temperatures ranging from -80 C to 300 C and up to 2800 psi. **1430**

**Unisense A/S**, Tueager 1, Aarhus N, Denmark DK-8200, +45 89449500, fax: +45 89449549, e-mail: tr@unisense.com, Internet: www.unisense.com Measure O<sub>2</sub>, H<sub>2</sub>, pH, H<sub>2</sub>S, N<sub>2</sub>O, NO and more! Unisense is a world leading manufacturer of sensors for a wide range of chemical applications. Our technology offers sensor response times within seconds, from low to high range concentrations in liquid and gas phase, and with many customizations and adaptations available. **320**

**University Science Books**, 20 Edgehill Rd., Mill Valley, CA, United States 94941, 415-332-5390, fax: 415-383-3167, e-mail: univscibks@gc.org, Internet: www.uscibooks.com University Science Books will be exhibiting its broad array of excellent and affordable books and textbooks, as well as unveiling new titles for 2017, including INTRODUCTION TO COMPUTATIONAL PHYSICAL CHEMISTRY by Joshua Schrier, FOUNDATIONS OF INORGANIC CHEMISTRY by Gary Wulfsberg, and THE BOLTZMANN FACTOR by E. Brian Smith. **1013**

**US EPA Green Chemistry Program**, 1200 Pennsylvania Avenue, Mail Code 7406M, Washington, DC, United States 20460, Internet: www.epa.gov/greenchemistry The U.S. EPA Green Chemistry Program is a voluntary, partnership program whose mission is to promote innovative chemical technologies that reduce or eliminate the use or generation of hazardous substances in the design, manufacture, and use of chemical products and processes. The Program accomplishes these goals through multiple activities including: The Presidential Green Chemistry Challenge Awards; designing tools, databases, and educational materials; and supporting research through grants and fellowships. **728**

**V&P Scientific, Inc.**, 9823 Pacific Heights Blvd., Suite T, San Diego, CA, United States 92121, 858-455-0643, fax: 858-455-0703, e-mail: sales@vp-scientific.com, Internet: www.vp-scientific.com **213**

**Vacuubrand**, 11 Bokum Road, Essex, CT, United States 06426, 860-767-2562 ext. 125, fax: 860-767-2563, Internet: www.vacuubrand.com VACUUBRAND offers exceptionally quiet, corrosion-resistant, oil-free vacuum pumps with ultra-long service intervals for labs, scale-up and OEM use. Products include both simple dry pumps and self-regulating, automated vacuum systems

for critical evaporative applications. The line also includes the unique HYBRID pumps, which reduce oil-changes by 90%, even in corrosive applications. VACUUBRAND will also show corrosion-resistant digital vacuum gauges and controllers. New products include high flow-rate, chemical-resistant dry vacuum pumps for kilo-lab and pilot-scale applications. **1519**

**Vacuum Atmospheres Co.**, 4652 West Rosecrans Avenue, Hawthorne, CA, United States 90251, 310-644-0255, fax: 310-970-0980, e-mail: info@vac-atm.com, Internet: www.vac-atm.com VAC has set the standards for gloveboxes and inert gas purification for over 50 years. Once again, our ongoing research and development has produced a proven revolutionary design. NO REGENERATION required by the user. Please visit us in booth 1207. **1207**

We offer screening of columns, method development and purification for chiral and achiral molecules. We combine the benefits of analytical and preparative HPLC and Supercritical Fluid Chromatography (SFC) to achieve separation goals and results. **1632**

**WILEY Wiley**, 111 River St. 4-02, Hoboken, NJ, United States 07030, 201-748-6000, Internet: www.wiley.com Wiley's product diversity is unique, spanning books, journals, databases, web-portals and workflow tools. Visit Booth #800 to learn what's new at Wiley and browse our books on display - ACS attendees receive 30% off orders and FREE worldwide shipping! **800**

**Wilmaad-LabGlass**, 1172 N.W. Boulevard, Vineland, NJ, United States 08360, 856-691-3200, fax: 856-691-6206, e-mail: cs@wilmaad-labglass.com, Internet: www.wilmaad-labglass.com Scientists rely on the expertise and artistic skills of Wilmaad-LabGlass' engineers and glass specialists to manufacture NMR and EPR consumables and laboratory glassware of the highest quality. Used daily in academia, healthcare and chemical, petroleum and other industrial applications, Wilmaad offers 7000+ items as part of their standard catalog as well as custom fabrication for individual glassware, glass repair services and OEM glass parts. **613**

**Workrite Uniform Company**, 1701 North Lombard St., Oxnard, CA, United States 93030, 800-521-1888, fax: 805-483-0678, e-mail: info@workrite.com, Internet: www.workritefc.com **1813**

**WuXi AppTec (Shanghai) Co. Ltd.**, 288 Fute Zhong Road, Waigaoqiao Free Trade Zone, Shanghai, China 200131, e-mail: hr@wuxiapptec.com, Internet: www.LabNetwork.com LabNetwork, a WuXi AppTec company, is a global eCommerce platform connecting suppliers and buyers of research products. Backed by WuXi AppTec's expertise in R&D, sourcing, quality control, warehousing and logistics, LabNetwork brings high-quality compounds from WuXi's network of qualified providers to the global chemistry/R&D community. **1601**

**Wyatt Technology Corp.**, 6300 Hollister Avenue, Santa Barbara, CA, United States 93117, 805-681-9009, fax: 805-681-0123, e-mail: info@wyatt.com, Internet: http://www.wyatt.com Wyatt Technology is the recognized leader in instrumentation for determining the absolute molar mass, size, charge and interactions of macromolecules and nanoparticles in solution. These tools include: in-line multi-angle static

light scattering, high-throughput dynamic light scattering, differential refractometry, electrophoretic mobility, differential viscosity, field flow fractionation and automated composition gradient. **605**

**X-Ability Co., Ltd.**, Ishiwata Building, 3rd Floor, 4-1-5 Hongo, Bunkyo-Ku, Tokyo, Japan 113-0033, +81-3-5800-7731, e-mail: rkoga@x-ability.jp, Internet: x-ability.com **1634**

**Xenometrix** The Power to Discover Xenometrix Ltd., Ramat Gabriel Industrial Zone, Migdal Haemek, Israel 2307049, +972-4-9891313, fax: +972-4-9891323, Internet: www.xenometrix.com Xenometrix Ltd. specializes in ED-XRF Spectrometers with over 30 years of experience in the design, development, production and marketing of Energy-Dispersive X-Ray Fluorescence systems, offering solutions suitable for today's ever-growing analytical challenges, performing non-destructive elemental analysis starting from Carbon (6) through Fermium (100), while providing detection limits from ppm to low ppb. **1706**

**Xenocs SA**, 19 rue François Blumet, Sassenage, France 38360, +33 (0)4 76 26 98 59, Internet: www.xenocs.com Xenocs, and its subsidiary SAXSLAB, are the leaders in Small Angle X-ray Scattering (SAXS) for Nanoscale Metrology. We offer a wide range of versatile tools for molecular structure analysis of soft matter, polymers, nanomaterials, proteins, surfaces and nanoelectronics. Our innovative portfolio includes SAXS/WAXS instruments with capabilities from specific measurements to state-of-the-art research platforms. All our products are backed by the most experienced worldwide team of specialist scientists and engineers. **1227**

**Yamato Scientific America, Inc.**, 925 Walsh Avenue, Santa Clara, CA, United States 95050, 1-800-292-6286 / 408-235-7725, fax: 408-235-7730, e-mail: customerservice@yamato-usa.com, Internet: www.yamato-usa.com YSA provides high-end general laboratory products to a diverse pool of industries in North America, Latin America, Europe and Africa. Our product portfolio includes ovens, sterilizers, incubators, rotary evaporators, spray dryers, muffle furnaces, freeze dryers, fume

hoods, clean benches, stirrers, shakers, plasma cleaners, water purifiers and custom made industrial products. **1714**

**Yamazen Science, Inc.**, 1455 Rollins Road, Burlingame, CA, United States 94010, 650-347-7750, fax: 650-347-6496, e-mail: info@yamazenusa.com, Internet: www.yamazenscience.com Yamazen manufactures Japan's Leading Automated Flash Purification Systems & High Resolution Columns with 45 years of Chromatography experience. US Patented software (GREEN FLASH) gearing toward GREEN CHEMISTRY: Fast (4CV) & Predictable, Streamlined & Advanced Chromatography & Low Solvent Usage. W-Prep: Parallel system can run two columns simultaneously. ELSD, RI, MS & TLC Reader as add-ons. **500**

**Zurich Instruments AG**, Technoparkstrasse 1, 8005 Zurich, Switzerland, 41-44-5150382, Internet: www.zhinst.com Zurich Instruments makes cutting-edge instrumentation for scientists and technologists in advanced labs who are passionate about phenomena that are often notoriously difficult to measure. Our core offering includes lock-in amplifiers, phase-locked loops, arbitrary waveform generator, impedance analyzers, digitizers and boxcar averagers. **301**

## 2017 NEW PRODUCT LISTINGS

**abcr GmbH****Booth # 1718**

Chirals  
Fluorinated Intermediates  
Building Blocks

**Accela ChemBio Co. Ltd.****Booth # 418**

SY022231 1,2,3,4-Tetrahydrophthalazine  
Dihydrochlo  
SY021760 5-Chloro-[1,2,4]triazolo[4,3-a]pyridine  
SY021954 (S)-3-Aminochroman Hydrochloride  
SY020529 (S)-2-Aminobutanamide  
Hydrochloride  
SY020391 (R)-(+)-1-Benzyl-3-(Boc-amino)pyrrolidine

**Ace Glass, Inc.****Booth # 518**

Bench Top Reactor Swing Latch Clamp  
50L Low Profile Reactor with Heat Seal  
Dual Bench Top Reactor Stand  
Ace Glass Temperature Controller Lineup  
Unjacketed Bench Top Reactors

**ACS Member Insurance Program****Booth # 725**

Chemical Educators Legal Liability Insurance

**Advanced Polymer Materials Inc.****Booth # 1728**

block copolymers  
functional polymers  
biodegradable polymers  
poly(ethylene glycol) block copolymers

**AgileBio LLC - LabCollector****Booth # 1431**

LabCollector  
LabCollector structure search

**Analytik Jena US, Inc.****Booth # 316**

Plasma Quant MS (ICP-MS)  
Plasma Quant 9000 (ICP-OES)  
multi N/C 3100 TOC  
contrAA@ 800 F  
Specord

**Anasys Instruments Corp.****Booth # 1127**

nanoIR2-FS  
nanoIR2-s  
Tapping AFM-IR  
FASTspectra

**Anton Paar USA****Booth # 818**

Microwave Digestion System: Multiwave GO  
Density Sensors DPRn 4X7, DPRn 427S  
Raman Spectrometers – RamSpec  
Abbemat 200 Economy Line Refractometer  
Density Meters: DMA Generation M

**Ark Pharm, Inc.****Booth # 717**

2,6-Dichloro-5-nitroquinoline, [1209246-34-3]  
5-Nitro-1H-indazol-6-ol, [1082041-56-2]  
2-Bromo-5H-pyrrolo[2,3-b]pyrazine,  
[875781-43-4]  
8-Bromo-6-nitroquinoline, [120287-30-1]  
5,6-Dichloronicotinonitrile, [65189-15-3]

**Asylum Research, an Oxford Instruments Company****Booth # 1305**

Cypher VRS Video-Rate AFM  
Cypher Electrochemistry Cell

**Authentic Development****Booth # 220**

Executive Coaching for Science Professionals

## WE THANK OUR VOLUNTEERS FOR THEIR DEDICATION AND HARD WORK

ACS Volunteers contribute thousands of hours of service to create and implement programs that promote our science, benefit our members, and contribute to the development of our communities. Thanks to your contributions, the Society provides its members with:

◆ Powerful networks on the local, regional, and national level;

- ◆ Specialized technical information and research;
- ◆ Expansive career enhancement materials;
- ◆ Award-winning publications; and
- ◆ Meetings & expositions that set industry standards for excellence.

We salute the outstanding volunteer efforts that have contributed

to the success of this year's national and regional meetings, including division officers and national meeting program chairs, regional meeting organizers and program chairs, symposium organizers, session and award presiders, short course and workshop instructors, career counselors, and all members of our Society's governance. To get involved, visit [www.acs.org](http://www.acs.org).

## Shuttle Schedule

### SUNDAY, APRIL 2\*

7:00 AM - 10:00 AM ..... 15 minute service  
10:00 AM - 4:00 PM ..... 30 minute service  
4:00 PM - 7:00 PM ..... 15 minute service  
7:00 PM - 11:00 PM ..... 30 minute service

### MONDAY, APRIL 3

7:00 AM - 10:00 AM ..... 15 minute service  
10:00 AM - 4:00 PM ..... 30 minute service  
4:00 PM - 11:00 PM ..... 15 minute service

### TUESDAY, APRIL 4

7:00 AM - 10:00 AM ..... 15 minute service  
10:00 AM - 4:00 PM ..... 30 minute service  
4:00 PM - 11:00 PM ..... 15 minute service

### WEDNESDAY, APRIL 5

6:30 AM - 11:00 PM ..... 30 minute service

### THURSDAY, APRIL 6

7:00 AM - 6:00 PM ..... 60 minute service

 Route 1    Route 2    Walk

 Boarding Location    Pickup/Dropoff Location

For all shuttle enquiries and wheelchair assistance, please call 1-866-439-8564.

Shuttle Services managed and operated by Transportation Management Services.

 Carbon Neutral Shuttles.

# American Chemical Society

## Volunteer/National Meeting Attendee Conduct Policy

One of the key strengths of the ACS has been the enduring and varied contributions made by its thousands of dedicated volunteers.

Another unassailable strength of the ACS is its outstanding national meetings program. ACS national meetings are among the most respected scientific meetings in the world. ACS national meetings offer scientific professionals a legitimate platform to present, publish, discuss, and exhibit the most exciting research discoveries and technologies in chemistry and its related disciplines. Furthermore, ACS national meetings facilitate networking opportunities, career development and placement, and provide organizations with opportunities to exhibit products and services to targeted audiences.

The Society's Congressional Charter explicitly lists among its objectives "the improvement of the qualifications and usefulness of chemists through high standards of professional ethics, education and attainments..." The ACS expects its volunteers and national meeting attendees to display the highest qualities of personal and professional integrity in all aspects of their ACS-related activities. Indeed, every chemical professional has obligations to the public, to volunteer and staff colleagues, and to science.

Accordingly, and to foster a positive environment built upon a foundation of trust, respect, open communications, and ethical behavior, the ACS Board of Directors has issued this Conduct Policy. It applies to ACS Volunteers, i.e., it applies to individuals conducting the business and affairs of the ACS without compensation for that conduct. It also applies to attendees at ACS national meetings. Volunteers and national meeting attendees should at all times abide by this Conduct Policy. Specifically:

1. Volunteers should understand and support ACS's vision and mission.
2. Volunteers and national meeting attendees should contribute to a collegial, inclusive, positive, and respectful environment for their fellow volunteers and attendees, as well as for other stakeholders, including national meeting vendors and ACS staff.
3. Volunteers and national meeting attendees must avoid taking any inappropriate actions based on race, gender, age, religion, ethnicity, nationality, sexual orientation, gender expression, gender identity, marital status, political affiliation, presence of disabilities, or educational background. They should show consistent respect to colleagues, regardless of the level of their formal education and whether they are from industry, government or academia, or other scientific and engineering disciplines.
4. Volunteers and national meeting attendees should interact with others in a cooperative and respectful manner. Volunteers and national meeting attendees should refrain from using insulting, harassing, or otherwise offensive language in their ACS interactions. Disruptive, harassing, or inappropriate behavior toward other volunteers, stakeholders, or staff is unacceptable. Personal boundaries set by others must be observed. Harassment of any kind, including but not limited to unwelcome sexual advances, requests for sexual favors, and other verbal or physical harassment will not be tolerated.
5. Volunteers must obey all applicable laws and regulations of the relevant government authorities while acting on behalf of the ACS. Likewise, national meeting attendees must obey all applicable laws and regulations of the relevant government authorities while attending ACS national meetings. Volunteers and national meeting attendees alike should also ensure that they comply with all applicable safety guidelines relating to public chemistry demonstrations.
6. Volunteers and national meeting attendees should only use ACS's trademarks, insignia, name, logos, and other intellectual property in compliance with ACS regulations and directives as may be issued from time to time.
7. Violations of this Conduct Policy should be reported promptly to the ACS Secretary and General Counsel or to the Chair of the ACS Board of Directors. In cases of alleged persistent and/or serious violations of this Conduct Policy, the Board shall review the evidence and shall take such actions as may be appropriate, including but not limited to requiring volunteers to leave their volunteer position(s); precluding volunteers from serving in Society volunteer roles in the future; requiring national meeting attendees to leave the meeting; and, precluding meeting attendees from attending future ACS national meetings. ACS, through its Board of Directors, reserves the right to pursue additional measures as it may determine are appropriate.

Adopted by the Board of Directors 12/6/13
