Speed of Capability

The U.S. DoD is the envy of all nations, but ...

- Near-peer competitors are progressing faster than we change
 - e.g., COTS tools & building blocks are available to all
- New threats are vexing in key warfare areas

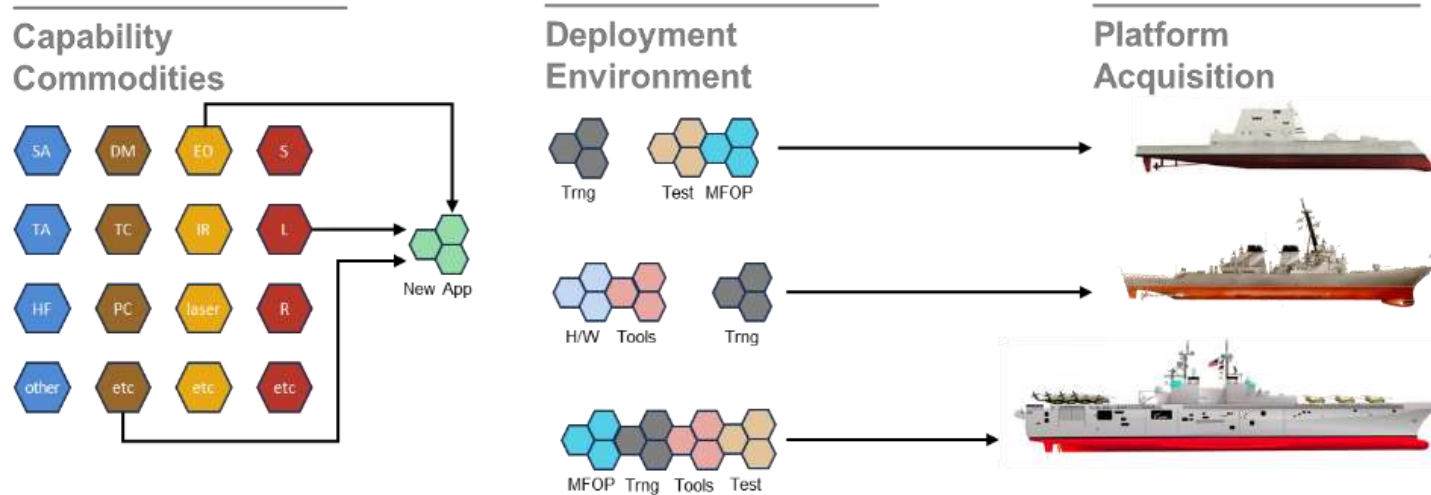

- To move faster, we need a different approach
- The environment is ripe with opportunities for new approaches

This next LSC hull would have “the ability to be upgraded in stride, without these long, expensive modernization periods typically required for really top-end platforms,” Boxall said. He noted the Navy now has a requirement to upgrade in stride and has to adjust to do so.

Business and Organizational Impacts for Modular Flexible Ships

Nimble Responses to Nimble Adversaries via Modularity & Rapid Delivery

Everything on the table to change the DoD acquisition ecosystem:

- Continuous change in the field
- Financial management
- Innovation Engine
- Organization
- Contracts
- Incentives
- Training
- Certification
- Operations

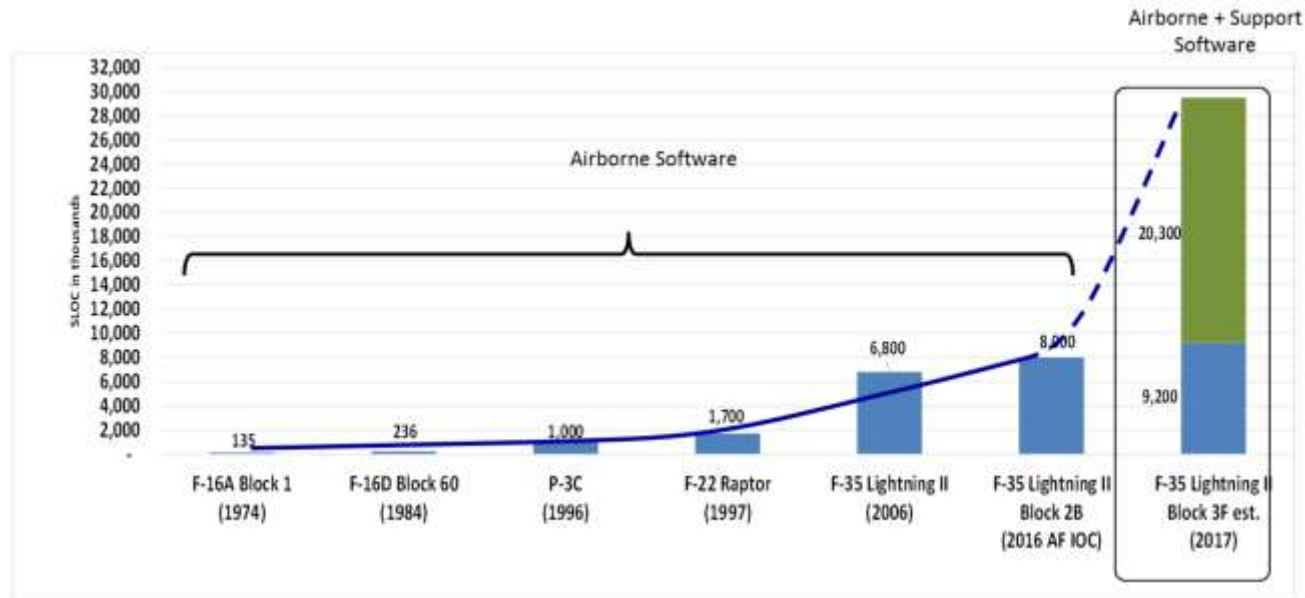

Establish the environments to support exquisite capability

Capability Evolution and Delivery Constantly In Motion

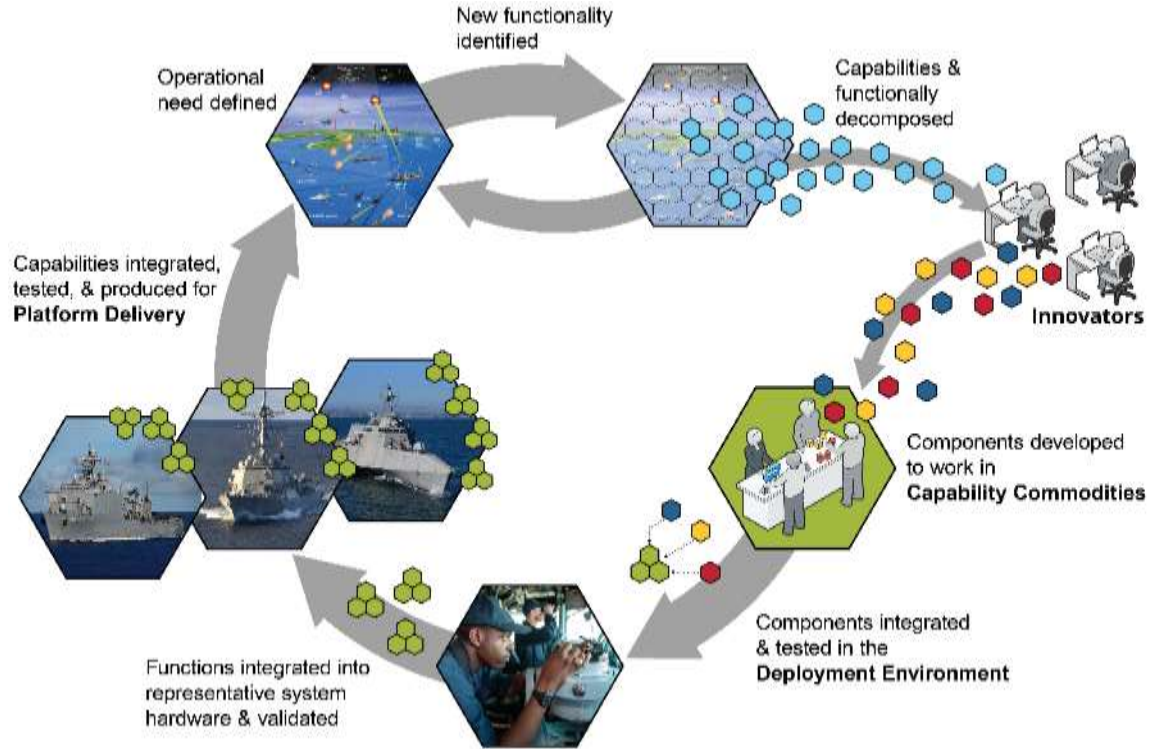

The Methods, Standards and Support are also in Motion

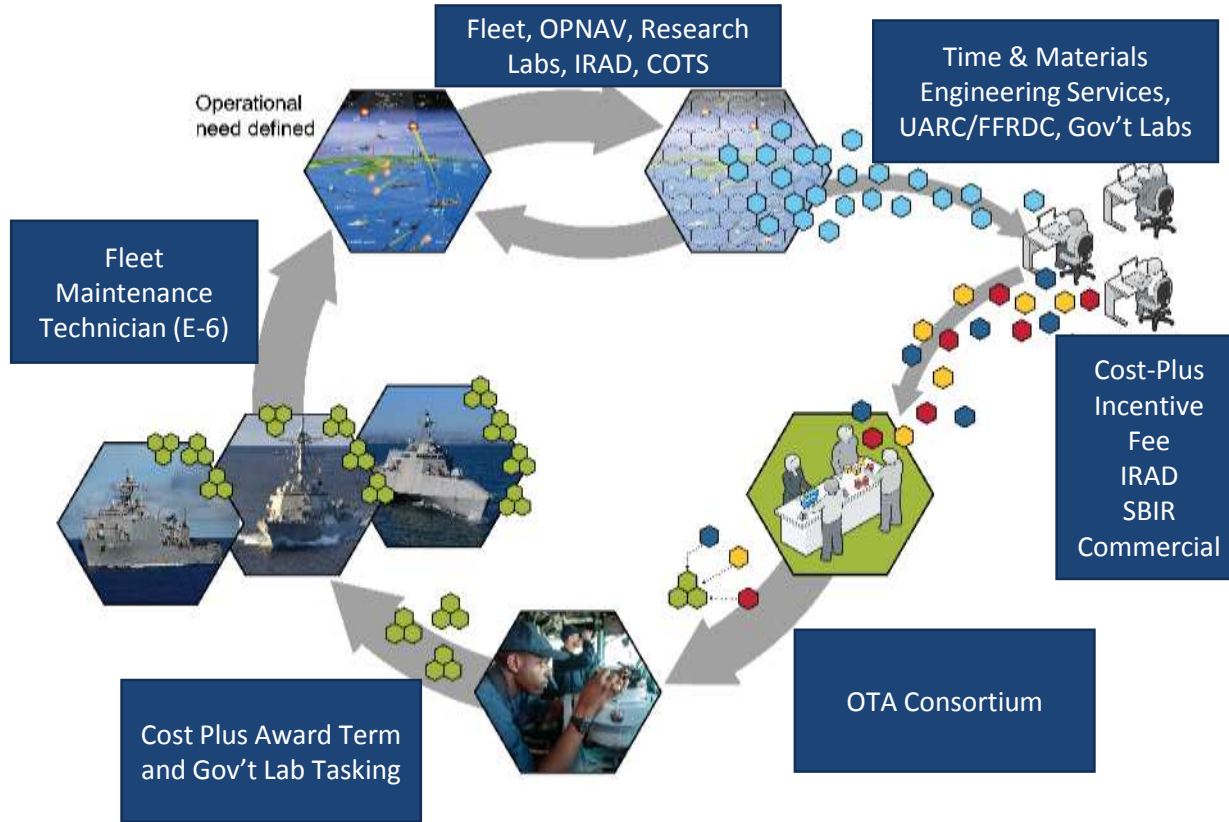

We need to develop the capacity to change how we create value at pace with the world

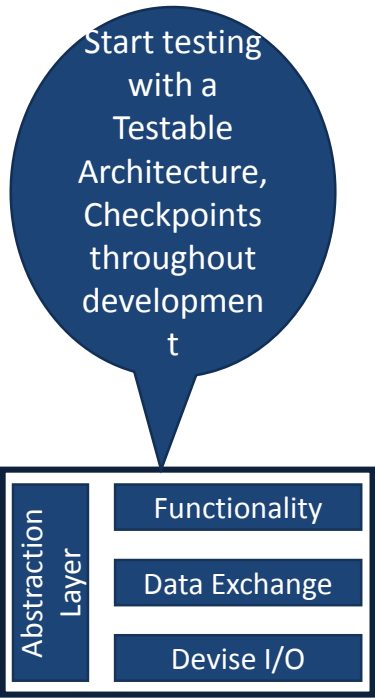

Business and Organizational Impacts for Modular Flexible Ships

Business and Contracting Impacts to Continuous Delivery

Applying Architecture to Testing

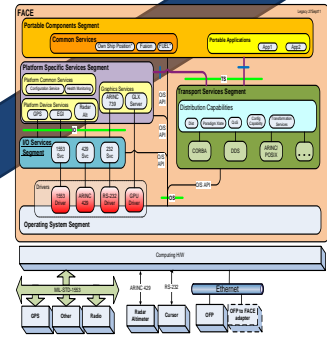

Enterprise Architecture

Establish Testable Requirements of Architecture

Preserve Testability in the Deployment Environment

Automated Testable Product Architecture

Business and Organizational Impacts for Modular Flexible Ships

Modules of Capability

SBIR = Small Business Innovative Research

IRAD = Individual Research and Development

Ulim = Unlimited

Comm = Commercial

GPR = Government Purpose Rights

Lim./Res. = Limited/Restricted.
