

AWARD NUMBER: W81XWH-18-1-0606

TITLE: A Phase 1/2a Clinical Trial Study to Evaluate the Efficacy of MEDI8852 in the Treatment of Influenza in Adults Challenged with a Wild-Type Influenza Strain

PRINCIPAL INVESTIGATOR: Dr. Raburn Mallory

CONTRACTING ORGANIZATION: MedImmune, LLC
Gaithersburg, MD
20878-2204

REPORT DATE: Oct-2019

TYPE OF REPORT: Final

PREPARED FOR: U.S. Army Medical Research and Materiel Command
Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for Public Release;
Distribution Unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.

13. SUPPLEMENTARY NOTES					
14. ABSTRACT MedImmune is developing MEDI8852, a highly potent, broadly-neutralizing, human B cell derived influenza A monoclonal antibody, for treatment of patients hospitalized with type A influenza. MEDI8852 has shown high levels of protection in influenza A lethal murine and ferret models of infections even when administered up to 4 days post infection. MEDI8852 was also more active than oseltamivir, in protecting animals from lethal influenza infection, leading to an extension of the treatment window by 2 to 3 days. In an initial single ascending study conducted in adults with influenza who were not hospitalized, MEDI8852 decreased titers of shed influenza virus and influenza symptoms to the same extent as treatment with oseltamivir. We planned to conduct a randomized, partially-blinded, placebo- and active-controlled challenge study to evaluate the efficacy of MEDI8852 for the treatment of influenza in adults. The primary objective was to assess the impact of MEDI8852 on nasal shedding in adults challenged with a wild-type H1N1 virus. During this reporting period, activities in preparation for the Phase 1/2a clinical trial have ceased as the contract was terminated effective 10 September 2019.

INTRODUCTION

Seasonal influenza has a severe impact on both the US Military Health System and the Veterans Affairs Population. In the Military Health System, influenza was responsible for 143,000 visits to outpatient and military and civilian facilities and 20,000 inpatient bed days in 2009-2010, while in the Veterans Affairs population over 5,500 deaths were attributed to influenza over a 5-year period. MEDI8852 has additional relevance for the health of military personnel as it has activity against all strains with pandemic potential and nearly all human cases due to strains with pandemic potential have been reported outside the USA, where deployed military Service members may become exposed.

MedImmune is developing MEDI8852, a highly potent, broadly-neutralizing, human B cell derived influenza A monoclonal antibody, for the treatment of patients, including military service members, Veterans and beneficiaries, hospitalized with influenza causes by type A strains. MEDI8852 has shown high levels of protection in influenza A lethal murine and ferret models of infections even when administered late, up to 4 days post infection. MEDI8852 was also more active than oseltamivir, in protecting animals from lethal influenza infection, leading to an extension of the treatment window by 2 to 3 days. In an initial single ascending study conducted in adults with influenza who were not hospitalized, MEDI8852 decreased titers of shed influenza virus and influenza symptoms to the same extent as treatment with oseltamivir.

We plan to conduct a randomized, partially-blinded, placebo- and active-controlled challenge study to evaluate the efficacy of MEDI8852 for the treatment of influenza in adults.

The primary objective of the study is to evaluate the impact of MEDI8852 on nasal shedding of an H1N1 challenge virus. Secondary objectives include: 1) Evaluating the effect of MEDI8852 on the time to resolution of influenza symptoms and 2) Evaluating the safety and tolerability of MEDI8852.

The specific aims of the study are: 1) to evaluate if administration of a higher dose of MEDI8852 than previously studied will be more effective than oseltamivir in reduction of viral titers and influenza symptoms and 2) to see if combining MEDI8852 with oseltamivir is more effective than administration of oseltamivir alone.

The study will be conducted in two Phases. In Part 1 of the study, eight healthy subjects 18 to 65 years of age will receive a single high dose of MEDI8852 as IV inpatients. Part 2 of the study will start after review of safety data from Part 1 and will enroll approximately 60 adults 18 through 65 years of age. All subjects will receive a wild-type A/H1N1 challenge strain on Day 1 and will be randomized at equal ratios into 5 cohorts (~12 subjects per cohort) to receive on Day 2: Cohort 1, will receive placebo; Cohort 2 will receive oseltamivir twice a day for 5 days; Cohort 3 will receive a lower dose of MEDI8852; Cohort 4 will receive a lower dose of MEDI8852 and evaluated twice a day for signs and symptoms of influenza from Day 1-14. Nasal samples for evaluation of shedding will be twice a day from Day 1-9. Safety will be assessed from study initiation through Day 60. Shed virus will be assessed for susceptibility to MEDI8852 and oseltamivir. Blood and nasal samples will be collected for the assessment of

PK parameters. Immune responses to the challenge virus and development of antidrug antibodies will be assessed on Day 1 and on Days 30 and 60.

KEYWORDS

influenza; monoclonal antibody; safety; treatment; efficacy

ACCOMPLISHMENTS

A. What were the major goals of the project?

We planned to conduct a randomized, partially-blinded, placebo- and active-controlled challenge study to evaluate the efficacy of MEDI8852 for the treatment of influenza in adults. The primary objective was to assess the impact of MEDI8852 on nasal shedding in adults challenged with a wild-type H1N1 virus. Secondary objectives included: 1) Evaluating the effect of MEDI8852 on the time to resolution of influenza symptoms and 2) Evaluating the safety and tolerability of MEDI8852.

The specific aims of the study were: 1) to evaluate if administration of a higher dose of MEDI8852 than previously studied will be more effective than oseltamivir in reduction of viral titers and influenza symptoms and 2) to see if combining MEDI8852 with oseltamivir is more effective than administration of oseltamivir alone.

REVISED TIMELINE		
	Study Month	Percentage of completion
Specific Aim 1: To release and ship CTM for the study	11	0%
Major Task 1.1: Release and ship CTM	11	0%
<i>Milestone 1.1 Achieved: CTM shipped to clinical site</i>	11	0%
Specific Aim 2: To obtain IRB/ORP/HRPO/FDA approval for the proposed study	9	100%
Major Task 2.1: Develop clinical protocol and informed consent form	NA	100%
Subtask 2.1.1: Concept Sheet Approved	NA	100%
Subtask 2.1.2: Protocol and Informed Consent Form Developed	NA	100%
<i>Milestone 2.1 Achieved: Protocol Approved</i>	NA	100%
Major Task 2.2: Prepare and submit documents for IRB/ORP/HRPO approval	NA	100%
<i>Milestone 2.2 Achieved: Local IRB/ORP/HRPO approval</i>	NA	100%
Major Task 2.3: Prepare and submit documents to IND	10	50%
<i>Milestone 2.3 Achieved: FDA approval (implied if study not placed on clinical hold)</i>	10	0%
Specific Aim 3: To identify, screen, select and contract with clinical site for the study	8	85%
Major Task 3.1: Execute clinical site contract	8	80%
Subtask 3.1.1: Send request for proposal	NA	100%
Subtask 3.1.2: Evaluate capabilities/cost	NA	100%
<i>Milestone 3.1 Achieved: Clinical site under contract</i>	8	90%
Specific Aim 4: To identify, screen, select and contract with labs able to run clinical assays	NA	100%
Major Task 4.1: Execute sample testing lab contract	NA	100%
Subtask 4.1.1: Send request for proposal	NA	100%
Subtask 4.1.2: Evaluate capabilities/cost	NA	100%
<i>Milestone 4.1 Achieved: Sample testing lab under contract</i>	NA	100%
Specific Aim 5: To recruit, enroll, challenge and treat subjects with MEDI8852	10-15	10%

REVISED TIMELINE		
	Study Month	Percentage of completion
Major Task 5.1: Safety run-in study for inclusion of higher dose (Part 1)	10-13	NA
Subtask 5.1.1: Clinical site activation	NA	100%
Subtask 5.1.2: Subject screening	11	NA
Subtask 5.1.3: Subject dosing	12	NA
Subtask 5.1.4: Follow-up period	12-13	NA
<i>Milestone 5.1 Achieved: Subjects dosed with study drug (Part 1)</i>	12	NA
<i>Milestone 5.2 Achieved: Decision made whether to proceed with Part 2 including higher dose</i>	12	NA
Major Task 5.2: Challenge study (Part 2)	10-15	NA
Subtask 5.2.1: Subject screening	10-12	NA
Subtask 5.2.2: Subject dosing	12-13	NA
Subtask 5.2.3: Follow-up period	13-15	NA
<i>Milestone 5.3 Achieved: Subjects dosed with study drug (Phase 2)</i>	13	NA
<i>Milestone 5.4 Achieved: Last subject last visit (Part 2)</i>	15	NA
Specific Aim 6: To quantify and characterize influenza virus shed by subjects and evaluate immune responses, PK and ADA	11-18	NA
Major Task 6.1: Strain-specific assay qualification	11-13	NA
<i>Milestone 6.1 Achieved: Assays qualified</i>	13	NA
Major Task 6.2: Clinical sample testing	13-18	NA
Subtask 6.2.1: Clinical samples shipped to STL and MCTL	13-15	NA
Subtask 6.2.2: Quantify and characterize influenza virus in clinical samples		
qRT-PCR analysis and QC (nasal swab; 1080 samples)	15-18	NA
HA/NA sequencing analysis and QC (nasal swab; 62 samples)	15-18	NA
Susceptibility analysis and QC (nasal swab; 10 samples)	15-18	NA
TCID50 analysis and QC (nasal swab; 540 samples)	15-18	NA
Subtask 6.2.3: Evaluate immune responses		NA

REVISED TIMELINE		
	Study Month	Percentage of completion
HAI analysis and QC (serum; 180 samples)	15-18	NA
Subtask 6.2.4: Evaluate PK		NA
Serum/nasal swab PK bioanalysis and QC (serum and nasal swab; 660 samples each)	15-18	NA
Subtask 6.2.5: Evaluate ADA		NA
ADA analysis and QC (serum; 180 samples)	15-18	NA
<i>Milestone 6.2 Achieved: Clinical sample testing complete</i>	18	NA
Specific Aim 7: To generate study results (tables, listings and figures)	13-18	NA
Major Task 7.1: Database reconciliation and cleaning	13-18	NA
Major Task 7.2: Database lock	18	NA
<i>Milestone 7.1 Achieved: Database lock</i>	18	NA
Major Task 7.3: Generate tables, listings and figures	18-19	NA
<i>Milestone 7.2 Achieved: Validated TLFs</i>	19	NA
Specific Aim 8: To write CSR and publish study results in a peer-reviewed journal	19-28	NA
Major Task 8.1: Data analysis and interpretation	19-28	NA
Subtask 8.1.1: Generate and review CSR; submit to IND	19-27	NA
Subtask 8.1.2: PK modeling	19-24	NA
Subtask 8.1.3: Generate and review manuscript	23-28	NA
<i>Milestone 8.1 Achieved: Final CSR approved</i>	27	NA
<i>Milestone 8.2 Achieved: Manuscript submitted to peer-reviewed journal</i>	28	NA

B. What was accomplished under these goals?

Clinical documents:

The IRB/ORP/HRPO approvals for the proposed study were obtained.

Site agreements:

An early engagement agreement with the clinical site, WCCT, was executed, but a full contract was not finalized due to the cost and timeline impact of the site's decision to close their challenge unit.

The sample testing lab contract with Viroclinics was executed and enabled the start of screening activities. Screening of 750 subjects was completed.

Assay qualifications:

Qualification and optimization of MEDI8852 pharmacokinetic (PK) and anti-drug antibody (ADA) assays MedImmune were initiated. Nasal adsorption samples were sourced from the MedImmune Research Specimen Collection Program and were utilized to qualify nasal specimens as a matrix for the MEDI8852 PK assay. In addition, sensitivity of the MEDI8852 PK assay was improved to from a lower limit of quantification (LLoQ) of 500ng/mL to a LLoQ of 5ng/mL to better accurately quantify lower levels of MEDI8852 which were expected to be found in the nasal epithelium. Finally, reagent generation was initiated for an alternative polyclonal MEDI8852 antiserum that would have been used to develop a new ADA assay with improved drug tolerance.

IND amendment submission:

The quality documents to support use of the Clinical Trial Material (CTM) were finalized.

C. What opportunities for training and professional development has the project provided?

Nothing to report

D. How were the results disseminated to communities of interest?

Nothing to report

E. What do you plan to do during the next reporting period to accomplish the goals?

Nothing to report

IMPACT

- A. What was the impact on the development of the principal disciplines(s) of the project?**
Nothing to report
- B. What was the impact on other disciplines?**
Nothing to report
- C. What was the impact on technology transfer?**
Nothing to report
- D. What was the impact on society beyond science and technology?**
Nothing to report

CHANGES/PROBLEMS

- A. Changes in approach and reasons for change**
Nothing to report
- B. Actual or anticipated problems or delays and actions or plans to resolve them**
Two events caused the study to be initially delayed until 2Q2020, prior to the decision to terminate the contract. The first was an unexpectedly low sero-susceptible rate in the healthy human volunteer population, requiring a doubling of the volunteer recruitment and screening. The concomitant circumstance of the CRO's decision to refurbish their influenza challenge facility would impact the ability to conduct challenge studies while the wild type influenza circulates are the reasons the challenge study could not be initiated before late spring/early summer of 2020.
- C. Changes that had a significant impact on expenditures**
The major strategic reorganization within MedImmune/AstraZeneca led to the business refocusing its resources to core therapeutic areas: oncology, cardiovascular and respiratory. The realignment shifted the majority of clinical, operations, data management, programming, regulatory, research, translation medicine and management resources away from the infectious disease and vaccine pipeline projects and these personnel have been made redundant or reassigned to support the strategic priorities. This effort is expected to be complete by mid-year 2020. Since the study could not be conducted on the original schedule, the resources are no longer available to support the study. As a result, after discussions with the funding agency, the contract was terminated effective 10 September 2019.
- D. Significant changes in use or care of human subjects, vertebrate animals, biohazards, and/or select agents**
Nothing to report
- E. Significant changes in use or care of human subjects**
Nothing to report
- F. Significant changes in use or care of vertebrate animals**
Nothing to report
- G. Significant changes in use of biohazards and/or select agents**
Nothing to report

PRODUCTS, INVENTIONS, PATENT APPLICATIONS, AND/OR LICENSES

A. Publications, conference papers, and presentations

Nothing to report

- **Journal publications**
- **Books or other non-periodical, one time publications**
- **Other publications, conference papers, and presentations**

B. Website(s) or other Internet site(s)

Nothing to report

C. Technologies or techniques

Nothing to report

The following tests have been performed at Viroclinics
 Rotterdam Science Tower
 Marconistraat 16
 3029 AK Rotterdam
 The Netherlands

Date Run: 13-MAR-2019, 14-MAR-2019

For the purposes of interpretation: Results equal to or < 10 indicate a volunteer with an antibody concentration below the threshold to protect against H1N1 virus infection.

Test Approved by: R. Jeeninga Date: 21 MAART 2019

HAI Titers

Total=750

The following tests have been performed at Viroclinics
 Rotterdam Science Tower
 Marconistraat 16
 3029 AK Rotterdam
 The Netherlands

Date Run: 26-04-2019

For the purposes of interpretation: Results equal to or < 10 indicate a volunteer with an antibody concentration below the threshold to protect against H1N1 virus infection.
