

AWARD NUMBER: W81XWH-17-1-0468

TITLE: Evaluation of Lipid Poor Renal Masses with
Magnetic Resonance Spectroscopy in Tuberous
Sclerosis Complex

PRINCIPAL INVESTIGATOR: Adam S. Feldman, M.D., M.P.H.

CONTRACTING ORGANIZATION: Massachusetts General Hospital
Boston, MA 02114

REPORT DATE: Sept 2018

TYPE OF REPORT: Annual

PREPARED FOR: U.S. Army Medical Research and Materiel Command
Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for Public Release;
Distribution Unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.

14. ABSTRACT The Research Project supported by this DOD Award investigates the potential of in vivo and ex vivo MRS in characterizing the metabolomic spectra of TSC-associated lipid poor renal masses. After a brief delay in IRB approval, which led to a later than expected start to our subject enrollment we have proceeded with <i>in vivo</i> and <i>ex vivo</i> MRS of renal masses in patients with TSC. In an effort to optimize our <i>in vivo</i> image acquisition protocol, we began by scanning healthy volunteers. Subsequently, our overall enrollment of TSC patients with lipid poor renal masses has been lower than expected. For this reason and in order to meet our goals of gaining more metabolomic data on renal masses, we have expanded our subjects to include TSC patients with lipid rich masses, non-TSC patients with lipid poor and lipid rich renal masses. We continue to enroll patients and analyze our current and ongoing data.

Introduction:

The Research Project supported by this DOD Award investigates the potential of *in vivo* and *ex vivo* Magnetic Resonance Spectroscopy (MRS) in characterizing the metabolomic spectra of Tuberous Sclerosis Complex (TSC)-associated lipid poor renal masses. We hypothesize that MRS metabolomic profiling of lipid poor renal masses will provide clinical biomarkers to noninvasively differentiate benign from malignant tumors and can help predict the tumor grades and pathological stages defined by histopathology, thus improving decision making for patient care. This information is urgently needed in today's TSC clinic to help clinicians to assess the malignant potentials of specific tumors, improve prognostic accuracy, and select the most appropriate therapy for individual patients.

Keywords:

Tuberous Sclerosis Complex; Metabolomics; Kidney Cancer; Biomarker

Accomplishments:

- **What were the major goals of the project?**

There are three defined major goals of the project to be accomplished over the course of a 24 month period:

Major Task 1: Administrative startup tasks; Subject recruitment (total n=80); *In vivo* MRI/MRS acquisition and interpretation, with correlation of MRS data with multiparametric MRI data; Histopathologic analysis of biopsy and surgical specimens; Correlation of *in vivo* MRS data with histopathology and clinical data.

Major Task 2: *Ex vivo* MRS performance on biopsy and surgical specimens; Correlation of *ex vivo* MRS data with histopathology and clinical data; Assess consistency of *in vivo* and *ex vivo* MRS metabolomic signatures and correlate signatures with tumor tissue assessment for mutations of the cellular metabolic pathway and direct measurement of

tumor metabolite levels.

Major Task 3: Correlation of *ex vivo* and *in vivo* MRS data; GC-MS and qRT-PCR of surgical tissue specimens; Correlation of all MRS, histopathologic and clinical data with GC-MS and qRT-PCR data.

- **What was accomplished under these goals?**

We encountered some delays in obtaining IRB approval and ultimately were given local IRB approval for the research project in January 2018. Subject enrollment began in February 2018 with patients recruited from the Urology Clinic at Massachusetts General Hospital. Given that there has been limited data in performing *in vivo* MRS of the kidney, healthy volunteers were first consented to the project to undergo *in vivo* MRS and help develop the imaging protocol for ultimate subject scans. Since the project start, 10 research subjects have been consented and scheduled for multiparametric MRI and MRS of the kidneys. Nine of the subjects have confirmed diagnoses of Tuberous Sclerosis Complex. Six have undergone clinically-indicated MRIs of the kidneys with the additional *in vivo* MRS sequence. The remaining 4 subjects are scheduled and will undergo MRI and MRS in the near future along their imaging follow-up protocol for their TSC care.

The routine multi-parametric renal MRI includes multiecho gradient-echo, diffusion weighted images with 3 b values (0, 500 and 1000) and dynamic enhanced images with temporal resolution of 6 seconds. Two single voxels are targeted over the area of interest for the *in vivo* MRS spectra. We ran prior axial and coronal imaging sequences with non-breath hold technique to use as references for the MRS sequences. Metabolic spectra of both the tumor(s) of interest and regions of benign parenchymal tissue were recorded and analyzed. We used both a non-water suppression sequence and a LASER MRS sequence with water suppression using TE/TR=30ms/1500ms. Examples of these images are seen in Figures 1 & 2 from both a patient with a TSC-associated lipid-poor AML and a patient with a sporadic renal mass, which was found to be renal cell carcinoma (RCC) on final pathology. There have been issues with interference of metabolites from the surrounding retroperitoneal fat along with the heterogeneity of the tumors. The *in vivo* MRS sequence

has been updated and improved with each scan to more accurately reflect the metabolic profile of the tumor(s) being targeted.

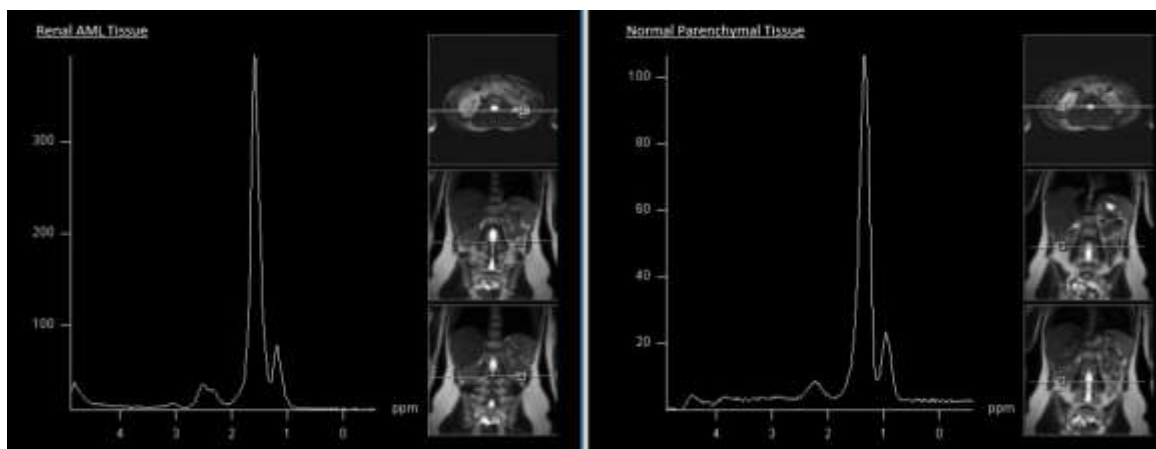

Figure 1: Example of *in vivo* MRS spectra images from single patient with confirmed diagnosis of TSC. The spectra image on the left obtained with targeting of biopsy-proven (fat-poor) angiomyolipoma. Image on the right obtained with targeting contralateral normal kidney tissue.

Figure 2: Example of *in vivo* MRS spectra images from single patient with sporadic renal mass, no history or family history of TSC. The spectra image on the right obtained with targeting of sporadic renal mass, which was found to be renal cell carcinoma (RCC) on final pathology. Image on the left obtained with targeting contralateral normal kidney tissue.

From the current cohort of subjects, two patients have been consented and undergone renal mass biopsy (RMB) as clinically indicated from imaging results. Immediately after RMB, core biopsy specimens are transported on ice to the A.A. Martinos Center for Biomedical Imaging at MGH for *ex vivo* MRS. Following MRS, the specimens were transported to the MGH Pathology department for routine histopathologic processing. The metabolic spectra of the core biopsy specimens were recorded and analyzed. These were compared to the *in vivo* MRS results to assess for consistency between the metabolic signatures. Histopathologic analysis of the core biopsy specimens showed one subject with an epithelioid oncocytic neoplasm, favor epithelioid angiomyolipoma negative for CA-IX on immunostain. The RMB for the second subject confirmed the renal mass to be an angiomyolipoma (fat-poor). The example of this spectra is present in Figure 3. Both patients had confirmed diagnoses of TSC.

Figure 3: Example of high-resolution magic angle spinning (^1H HRMAS) *ex vivo* MRS spectra image obtained with intact biopsy-core specimen from fat-poor angiomyolipoma kidney tissue from single patient.

There has been one non-TSC patient, with a sporadic renal mass, that has proceeded to partial nephrectomy. Following resection, the specimen was taken to the Surgical Pathology lab as soon as possible to minimize changes in the metabolomic profile from

devascularization. One portion of the tissue was provided for *ex vivo* MRS and another portion from the same location for an immediate snap freeze in liquid nitrogen. Example of the spectra image obtained from the renal mass is present in Figure 4. The remaining portion of tissue was stored at minus 80 degrees Celsius for future GC-MS analysis and qRT-PCR to examine the metabolomic profile and enzymes implicated in central carbon metabolism. The histopathologic analysis of the surgical specimen was consistent with clear cell Renal Cell Carcinoma (ccRCC), stage T1a, grade 2, with no evidence of tumor necrosis or lymphovascular invasion.

Figure 4: Example of high-resolution magic angle spinning (^1H HRMAS) *ex vivo* MRS spectra image obtained with intact partial nephrectomy specimen from renal cell carcinoma, clear cell type kidney tissue from single patient.

We continue to actively enroll patients in our protocol. As our accrual of TSC patients with lipid poor renal masses has been lower than expected, we continue to also accrue some patients with sporadic renal masses, including those with sporadic lipid rich AML. We believe that it will be important to gain data on the MRS profile of lipid rich AML in addition to lipid poor masses so that we can better understand the normal metabolic spectra of AML and renal masses in general. Furthermore, we are actively in the process

of comparing the metabolic spectra across our patients and comparing between *in vivo* and *ex vivo* imaging.

- **What opportunities for training and professional development has the project provided?**

This project has provided multiple opportunities for training and professional development by increasing our understanding of how to successfully perform *in vivo* metabolomic imaging of the kidney and renal masses.

- **How were the results disseminated to communities of interest?**

We have communicated the results to the multidisciplinary members of our research group, however, have not yet disseminated results to the larger TSC community as we are awaiting additional data and analysis.

- **What do you plan to do during the next reporting period to accomplish the goals?**

Our primary task to accomplish the listed goals of the research project is to recruit a greater number of TSC patients with lipid rich and poor renal masses and patients with sporadic renal masses and lipid rich AMLs to record more data on the metabolomic signatures of renal masses from *in vivo* and *ex vivo* MRS. This will also help update and improve the current *in vivo* MRS protocol to better reflect the metabolic profile of the tumor(s) being targeted.

Impact:

- **What was the impact on the development of the principal discipline(s) of the project?**

Nothing to report.

- **What was the impact on other disciplines?**

Nothing to report.

- **What was impact on technology transfer?**

Nothing to report.

- **What was the impact on society beyond science and technology?**

Nothing to report.

Changes/Problems:

- **Changes in approach and reasons for change**

During the past reporting period, we decided to consent a greater number of healthy volunteers and patients with sporadic renal masses. The volunteers helped us improve the technique used for the *in vivo* MRS sequence given our initial difficulties with signal interference. We also began consenting patients with sporadic renal masses to accumulate more MRS data on lipid-poor renal masses due to the slow enrollment of patients diagnosed with TSC. Recruitment has now increased and we have helped reduce signal interference from surrounding tissues when targeting renal masses, providing more accurate spectra images.

- **Actual or anticipated problems or delays and actions or plans to resolve them**

We anticipated initial slow enrollment into the research study, which was resolved by consenting patients with sporadic lipid-poor renal masses. Part of the delay was related to our prolonged process for IRB approval, but part of it also can be attributed to improving the *in vivo* MRS sequence technique to limit signal interference. This was accomplished by consenting healthy volunteers prior to TSC-associated renal mass patients intended for the study. Given the length in time of the MRS sequence, we had to begin using non-breath hold gating when targeting the tumor of interest. These actual problems have been resolved and we anticipate to consent a greater number of participants according to the schedule for year 2 of the research study.

- **Changes that had a significant impact on expenditures**

Nothing to report.

- **Significant changes in use or care of human subjects, vertebrate animals, biohazards, and/or select agents**

Nothing to report.

Products:

- **Publications, conference papers, and presentations**

Nothing to report.

- **Website(s) or other Internet site(s)**

- **Technologies or techniques**

Nothing to report.

- **Inventions, patent applications, and/or licenses**

Nothing to report.

- **Other Products**

Imaging data and associated clinical databases; biospecimen collections

Participants & Other Collaborating Organizations:

- **What individuals have worked on the project?**

Name:	<i>Adam S. Feldman, MD, MPH</i>
Project Role:	<i>PI</i>

Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	3
Contribution to Project:	<i>Dr. Feldman is responsible for the overall performance of this study. He consents patients in his clinic and then oversees the progress. He coordinates meetings with the various members of the project research team to discuss progress, data and troubleshoot difficulties.</i>
Funding Support:	

Name:	<i>Edouard Nicaise</i>
Project Role:	<i>Research Assistant</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	6
Contribution to Project:	<i>Mr. Nicaise coordinates subject scheduling for MRI with in vivo MRS, records and maintains all data, coordinates the acquisition of all specimens and assists with laboratory preparation of specimens for ex vivo MRS and other analyses.</i>
Funding Support:	

Name:	<i>Eva Ratai, PhD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1

Contribution to Project:	<i>Dr. Ratai has expertise in in vivo MRS and has worked on the development of our in vivo MRS protocol in the kidney and interpretation of MRS data</i>
Funding Support:	

Name:	<i>Mukesh Harisinghani, MD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1
Contribution to Project:	<i>Dr. Harisinghani has expertise in diagnostic multiparametric MRI of the kidney. He has worked to interpret the clinical MRI images and will help to correlate our metabolomic data with standard multiparametric MRI imaging data.</i>
Funding Support:	

Name:	<i>Leo Cheng, PhD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1
Contribution to Project:	<i>Dr. Cheng has expertise in ex vivo MRS and has worked on the development of our ex vivo MRS protocol for renal tissues and interpretation of MRS data</i>
Funding Support:	

Name:	<i>Chin-Lee Wu, MD, PhD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1
Contribution to Project:	<i>Dr. Wu has expertise in genitourinary pathology, kidney cancer in TSC and angiomyolipoma. He reviews all pathology associated with this study.</i>
Funding Support:	

Name:	<i>Elizabeth Thiele, MD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1
Contribution to Project:	<i>Dr. Thiele is the Director of the Herscot TSC Center here at MGH and is very involved in the referral of patients to Dr. Feldman for clinical care and also for consideration of this study. As we collect and analyze more data, she will help with continued interpretation and clinical correlation.</i>
Funding Support:	

Name:	<i>Elizabeth Henske, MD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	

Nearest person month worked:	1
Contribution to Project:	<i>Dr. Henske is a leader in the care of TSC patients and an active part of our local TSC community. She is very involved in the referral of patients to Dr. Feldman for clinical care and also for consideration of this study. As we collect and analyze more data, she will help with continued interpretation and clinical correlation</i>
Funding Support:	

Name:	<i>Othon Iliopoulos, MD</i>
Project Role:	<i>Co-Investigator</i>
Researcher Identifier (e.g. ORCID ID):	
Nearest person month worked:	1
Contribution to Project:	<i>Dr. Iliopoulos has expertise in the clinical and basic biology of RCC, and specifically has expertise in the metabolic pathways in RCC pathogenesis. As we collect and analyze more data, she will help with continued interpretation and clinical correlation.</i>
Funding Support:	

- **Has there been a change in the active other support of the PD/PI(s) or senior/key personnel since the last reporting period**

Nothing to report.

- **What other organizations were involved as partners?**

Nothing to report.

Special Reporting Requirements:

Nothing to report.

Curriculum Vitae

Date Prepared: March 9, 2019

Name: Adam S. Feldman, M.D., M.P.H.

Office Address:

Department of Urology
Massachusetts General Hospital
55 Fruit Street, GRB 1102
Boston, MA 02114 United States

Home Address:

29 Lovett Rd.
Newton, MA 02459

Work Phone: 617-643-1955

Work E-Mail: afeldman@mgh.harvard.edu

Work FAX: 617-726-9150

Place of Birth: New York, NY

Education

1994	B.A. - Biological Basis of Behavior	University of Pennsylvania
1996	M.A. (Alpha Epsilon Lambda) - Medical Sciences	Boston University School of Medicine

2000 M.D. (Alpha Omega Alpha) University of Massachusetts Medical School
 2009 M.P.H. – Clinical Effectiveness Harvard School of Public Health

Postdoctoral Training

07/00-06/01 Intern in Surgery, Massachusetts General Hospital
 07/01-06/02 Resident in Surgery, Massachusetts General Hospital
 07/02-06/05 Resident in Urology, Massachusetts General Hospital
 07/05-06/06 Chief Resident in Urology, Massachusetts General Hospital
 07/06-06/08 Fellow in Urologic Oncology, Massachusetts General Hospital

Faculty Academic Appointments

2000-2006 Clinical Fellow in Surgery, Harvard Medical School, Boston, MA
 2006-2010 Instructor in Surgery, Harvard Medical School, Boston, MA
 2010-present Assistant Professor of Surgery, Harvard Medical School, Boston, MA

Appointments at Hospitals/Affiliated Institutions

2006-present Assistant in Urology, Massachusetts General Hospital, Boston, MA

Major Administrative Leadership Positions

2011 Scientific Program Chair, American Urological Association, New England and Mid-Atlantic Sections, Annual Meeting
 2015-present Director, Combined Harvard Urologic Oncology Fellowship
 2018-present Director of Research, Department of Urology, Massachusetts General Hospital

Other Professional Positions

2012 American Urological Association Representative, Lower Anogenital Squamous Terminology Standardization (LAST) Consensus Conference, 2012
 2012 Member: Scientific Program Committee, American Urological Association, New England Section Annual Meeting
 2012-present Board Member: Sean Kimerling Testicular Cancer Foundation
 2013-present Co-Leader of the Career Development Program: DFCI/HCC Prostate Cancer SPORE
 2016 Scientific Co-Chair: DF/HCC Kidney Cancer Program Retreat
 2016 Course Director: State of the Art Imaging in the Diagnosis and Management of Prostate Cancer
 2017 Course Director: State of the Art Imaging in the Diagnosis and Management of Prostate Cancer

Committee Service - Local

2012-present Member: Surgical Coordination Committee, Department of Urology, MGH
 2013-2015 Member: MGH eCare Big Data and Data Repository Workgroup
 2013-present Urology Representative: Clinical Research Workgroup of the Continuous of the Continuous Research Operations Improvement (CROI) Task Force
 2016-present Urology Representative: MGH Research Council

2018 Urology Representative: MGH Frigoletto Committee on Physician Well-Being

Committee Service - Regional

2012-present Member: Massachusetts Medical Society Committee on Men's Health

Committee Service - National

2013-present Member: Eastern Cooperative Oncology Group (ECOG) Genitourinary Committee

Professional Societies

1998-present Massachusetts Medical Society, Member

2002-present American Urological Association, Member

2004-present American Association of Clinical Urologists, Member

2009-present Society of Urologic Oncology, Member

2002-2004	Investigator	Development of bladder cancer in a murine model for Cables knock-out mice exposed to N-butyl-N-(4-hydroxybutyl)nitrosamine (BBN). Laboratory of Urology/Pathology, Massachusetts General Hospital, Boston, MA.
2002-2004	Investigator	The Role of Cables, a novel cell-cycle regulatory protein in human transitional cell carcinoma and prostate cancer. Laboratory of Urology/Pathology, Massachusetts General Hospital, Boston, MA.
2004-2005	Investigator	Proteomic analysis of voided urine specimens for biomarker discovery and validation in prostate and bladder cancer. Laboratory of Urology/Pathology,

		Massachusetts General Hospital. Department of Vascular Biology, Children's Hospital, Boston, MA.
2007-2008	Investigator	Laparoscopic and Open Radical prostatectomy after laparoscopic inguinal hernia repair. Massachusetts General Hospital, Boston, MA.
2010	Investigator	Outcomes of Organ Sparing Surgery in Penile Cancer. Massachusetts General Hospital, Boston, MA.
2010- 2012	Investigator	Multi-Institutional Bladder Cancer Quality Care Initiative for non-metastatic muscle invasive transitional cell carcinoma of the bladder.

Current:

2008-present	P.I.	A comparison of nephron sparing techniques: percutaneous radiofrequency ablation (RFA) vs. open and laparoscopic partial nephrectomy. Massachusetts General Hospital, Boston, MA.
2009-present	P.I.	Active Surveillance in Prostate Cancer: Retrospective analysis of quality of life and outcomes and development of a prospective cohort. Massachusetts General Hospital, Boston, MA.
2010-present	P.I.	Renal Biopsy for Small Renal Masses. Massachusetts General Hospital, Boston, MA.
2013-present	Investigator	PARTIQoL (Prostate Advanced Radiation Technologies Investigating Quality of Life) Registry

Report of Local Teaching and Training**Teaching of Students in Courses**

2006-present	<u>Urologic Surgery</u>		<i>contact time</i>	<i>prep time</i>
	Attending	30 Medical Students 8 Residents	10 hours/week for 50 week(s)	none reported
2008-2010	<u>Patient Doctor II</u>		<i>contact time</i>	<i>prep time</i>
	Attending	5 Medical Students	8 hours/year for 1 year(s)	none reported
2010, 2015	<u>HMS2 Pathophysiology</u>		<i>contact time</i>	<i>prep time</i>
	Attending	25 Medical Students	3 hours/year for 1 year(s)	3 hours
2013-present	HMS Surgical Clerkship Lecture on Urologic Surgery			

		<i>contact time</i>	<i>prep time</i>
Attending	10 Medical Students	4 hours/year for 1 year(s)	3 hours

Formal Teaching of Residents, Clinical Fellows and Research Fellows (post-docs)

2007	<u>Surgical Chief's Rounds - Department of Surgery - Injuries to the Urogenital Tract</u>		
		<i>contact time</i>	<i>prep time</i>
	Lecturer	25 Residents	1 hour
2008-present	<u>Ambulatory Teaching Rounds - Department of Medicine – Uro-oncology for the primary care physician; Management of Small Renal Masses</u>		
		<i>contact time</i>	<i>prep time</i>
	Lecturer	30 Residents	4 hours/year
2010	<u>General Surgery Teaching Rounds – Department of Surgery – Bladder Cancer Review</u>		
		<i>contact time</i>	<i>prep time</i>
	Lecturer	25 Residents	0.5 hour

Clinical Supervisory and Training Responsibilities

2006-present	Urological Surgery – Training of Residents/Fellows	15 hours/week
2008-2012	Sub-specialty Faculty Advisor for the Acute Care Surgery fellow	10 hours/year
2015-present	Director, Combined Harvard Urologic Oncology Fellowship	
2018-present	Director of Research, Department of Urology, Massachusetts General Hospital	

Laboratory and Other Research Supervisory and Training Responsibilities

2007-present	Supervision and mentoring of Research Fellow	5 hours/week
--------------	----------------------------------------------	--------------

Formal Teaching of Peers (e.g., CME and other continuing education courses)

1996-1997	Worcester, MA	Teaching Assistant/Tutor in Biochemistry, University of Massachusetts Medical School
2009	Las Vegas, NV	Responsibility: Tutor fellow medical students in Biochemistry. Faculty (CME Course): Maximizing Bone Health for Patients With Prostate Cancer: Establishing the "Who, What, Why & How?"
2009	Scottsdale, AZ	Faculty (CME Course): Maximizing Bone Health for Patients With Prostate Cancer: Establishing the "Who, What, Why & How?"

2010	San Francisco, CA	Faculty (CME Course): Master Class on Integrating Novel Antiresorptive Agents into the treatment of Prostate Cancer
2010	Boston, MA	Faculty (CME Course): Trauma and Critical Care Symposium – Penile and Genitalia Trauma
2011	Boston, MA	Faculty (CME Course): Society of Translational Oncology Prostate Cancer Symposium – Prostate Cancer: Progress and Promise
2011	Cambridge, MA	Faculty (CME Course): Primary Care Internal Medicine: Principles & Practice – Case Studies in Urology [<i>Invited Lecture</i>]
2013	Ft. Lauderdale, FL	Faculty (CME Course): Winter Oncology Symposium – Holy Cross Hospital – Management of the Small Renal Mass
2013	Waltham, MA	Faculty (CME Course): Men’s Health Symposium – Prostate Cancer: Screening, Management and Controversy
2013	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2014	Cambridge, MA	Faculty (CME Course): Primary Care Internal Medicine: Principles & Practice – Male Urology [<i>Invited Lecture</i>]
2014	Boston, MA	Faculty (CME Course): 17th Biennial Urologic Cancer Course – Bladder Cancer Biomarkers
2014	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2015	Video Series	Faculty (CME Course): Comprehensive Review of Urology – Penile and Urethral Cancer
2015	Boston, MA	Faculty (CME Course): UroTrack – Renal Mass Biopsy
2015	Boston, MA	Faculty (CME Course): UroTrack – MGH Experience in MRI Fusion Prostate Biopsy
2014	Cambridge, MA	Faculty (CME Course): Primary Care Internal Medicine: Prostate in the Aging Male [<i>Invited Lecture</i>]
2015	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2016	Baltimore, MD	Faculty (CME Course): UroTrack – Renal Mass Biopsy Debate - Pro
2016	Boston, MA	Faculty (CME Course): 18th Biennial Urologic Cancer Course – Role of Biomarkers in Diagnosis and Followup of Bladder Cancer
2016	Boston, MA	Faculty (CME Course): State of the Art Imaging in the Diagnosis and Management of Prostate Cancer - Rising PSA, Prior Negative Biopsy
2017	Boston, MA	Faculty (CME Course): Trauma & Critical Care Symposium – Approaches to the Ureters and Bladder: High and Low
2017	Boston, MA	Faculty (CME Course): State of the Art Imaging in the Diagnosis and Management of Prostate Cancer – Utilization of Other Diagnostics/Biomarkers for the Detection of Prostate Cancer
2017	Boston, MA	Faculty (CME Course): State of the Art Imaging in the Diagnosis and Management of Prostate Cancer – Tips and Tricks: Fusion vs. Cognitive Biopsy
2017	Boston, MA	Faculty (CME Course): UroTrack – To Biopsy or Not to Biopsy: Role of Renal Mass Biopsy
2018	Ft. Lauderdale, FL	Faculty (CME Course): Winter Oncology Symposium – Holy Cross Hospital – To Biopsy or not to Biopsy: Role of the Renal Mass Biopsy

2018	Boston, MA	Faculty (CME Course): National Comprehensive Cancer Network Prostate Cancer Tumor Board Webinar
2018	Santo Domingo, Dominican Republic	Faculty (CME Course): Latin America Prostate Cancer Summit – Management of Patients post-radical prostatectomy [<i>Invited Lecture</i>] Management of Hormone Sensitive Prostate Cancer [<i>Invited Lecture</i>]
2018	San Francisco, CA	Course Director and Faculty: AUA Course – Trimodality Therapy for Management of Muscle Invasive Bladder Cancer
2018	Boston, MA	Faculty (CME Course): 18th Biennial Urologic Cancer Course – Role of Biomarkers in Diagnosis and Followup of Bladder Cancer

Report of Regional, National and International Invited Teaching and Presentations

Local Invited Presentations and Courses

2008	Boston, MA	Comparative Analysis of Nephron Sparing Techniques. Update on Urologic Oncology – Massachusetts General Hospital, Harvard Medical School [<i>Invited Lecture</i>]
2008	Boston, MA	Prostate Cancer: Diagnosis and Management. Prostate Cancer Support Group, Massachusetts General Hospital [<i>Invited Lecture</i>]
2011	Boston, MA	Controversies Around the Management of Small Renal Masses – DF/HCC Kidney Cancer Program [<i>Invited Lecture</i>]
2011	Boston, MA	Proteomic Discovery of Novel Biomarkers in Prostate Cancer – Massachusetts General Hospital Department of Urology Centennial Academic Program [<i>Invited Lecture</i>]
2011	Cambridge, MA	Management of Small Renal Masses – Harvard University Health Services Grand Rounds [<i>Invited Lecture</i>]
2011	Boston, MA	Incidental Radiologic Findings: "Incidental Renal Masses" – Massachusetts General Hospital Medical Grand Rounds [<i>Invited Lecture</i>]
2012	Concord, MA	Controversies in the Management of the Small Renal Mass – Emerson Hospital Medical Grand Rounds [<i>Invited Lecture</i>]
2014	Boston, MA	Management of Renal Lesions in Tuberous Sclerosis Complex – Massachusetts General Hospital Department of Pathology Grand Rounds [<i>Invited Lecture</i>]
2015	Boston, MA	Management of the Small Renal Mass – Massachusetts General Hospital Department of Urology Grand Rounds [<i>Invited Lecture</i>]

2015	Boston, MA	Prostate Cancer: Facts and Misconceptions – Massachusetts State House, Prostate Cancer Awareness Day [Invited Lecture]
2016	Cambridge	Evaluation and Management of the Small Renal Mass – Cambridge Health Alliance, Department of Surgery Grand Rounds [Invited Lecture]
2016	Boston, MA	Evaluation and Management of the Small Renal Mass – Massachusetts General Hospital Department of Urology Grand Rounds [Invited Lecture]
2017	Boston, MA	Penile and Urethral Cancer– Massachusetts General Hospital Department of Urology Grand Rounds [Invited Lecture]
2018	Boston, MA	MGH/MIT Center for Ultrasound Research & Translation (CURT) Lecture Series - I'm still trying to figure it out: A busy surgeon's evolving journey in translational and clinical research [Invited Lecture]
2018	Boston, MA	MGH Chief's Council – Urologic Oncology at MGH: Research and Scholarly Activity
2018	Cambridge, MA	Harvard University Health Services: Grand Rounds – Bladder Cancer Review [Invited Lecture]

Regional Invited Presentations and Courses

2009	Dedham, MA	Urologic Oncology: An Overview. Massachusetts Health Information Management Association [<i>Invited Lecture</i>]
2010	Mt. Kisco, NY	Controversies in the Management of Small Renal Masses [<i>Invited Lecture</i>]
2011	Dedham, MA	Penile Cancer. Urology Nursing Society [<i>Invited Lecture</i>]
2012	Boston, MA	AUA Update in Bladder and Prostate Cancer. AUA New England Section, Annual Meeting
2013	Ft. Lauderdale, FL	Faculty (CME Course): Winter Oncology Symposium – Holy Cross Hospital – Management of the Small Renal Mass
2013	Waltham, MA	Faculty (CME Course): Men's Health Symposium – Prostate Cancer: Screening, Management and Controversy
2015	Bahamas	Renal Mass Biopsy Should Be Used Selectively Prior To a Treatment Decision [<i>Invited Lecture</i>]
2016	Boston, MA	DF/HCC Kidney Cancer Program Retreat - Metabolomic imaging of RCC using MR Spectroscopy: Proposal for a comparative <i>in vivo</i> and <i>ex vivo</i> study
2016	Portland, ME	Multiparametric MRI for the Detection of Prostate Cancer. AUA New England Section, Annual Meeting
2017	Boston, MA	First Annual Herscot Center for Tuberos Sclerosis Complex Symposium – Management of Renal Masses in Tuberos Sclerosis Complex
2018	Ft. Lauderdale, FL	Faculty (CME Course): Winter Oncology Symposium – Holy Cross Hospital – To Biopsy or not to Biopsy: Role of the Renal Mass Biopsy

National Invited Presentations and Courses

2007	Hollywood, FL	Radical prostatectomy after inguinal hernia repair. The American Hernia Society <i>[Invited Lecture]</i>
2009	Boston, MA	Renal Cell Carcinoma: Surgical Management at Massachusetts General Hospital. Exchange Experience Program on Renal Cancer <i>[Invited Lecture]</i>
2009	Las Vegas, NV	Faculty (CME Course): Maximizing Bone Health for Patients With Prostate Cancer: Establishing the "Who, What, Why & How?" <i>[Invited Lecture]</i>
2009	Scottsdale, AZ	Faculty (CME Course): Maximizing Bone Health for Patients With Prostate Cancer: Establishing the "Who, What, Why & How?" <i>[Invited Lecture]</i>
2010	San Francisco, CA	Faculty (CME Course): Master Class on Integrating Novel Antiresorptive Agents into the treatment of Prostate Cancer. <i>[Invited Lecture]</i>
2010	Boston, MA	Faculty (CME Course): Trauma and Critical Care Symposium – Penile and Genitalia Trauma. <i>[Invited Lecture]</i>
2011	Boston, MA	Faculty (CME Course): Society of Translational Oncology Prostate Cancer Symposium – Prostate Cancer: Progress and Promise
2011	Cambridge, MA	Faculty (CME Course): Primary Care Internal Medicine: Principles & Practice – Case Studies in Urology <i>[Invited Lecture]</i>
2012	Washington, DC	Society of Urologic Oncology – December, 2012: To biopsy or not to biopsy: Results of 1000 renal mass biopsies at a single institution
2013	New Orleans, LA	Faculty – World Congress of Endourology (Industry Sponsored Symposium) - 3D Laparoscopic Urology: Surgical Techniques and Hands-On
2013	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2014	Cambridge, MA	Faculty (CME Course): Primary Care Internal Medicine: Principles & Practice – Male Urology <i>[Invited Lecture]</i>
2014	Boston, MA	Faculty (CME Course): 17th Biennial Urologic Cancer Course – Bladder Cancer Biomarkers
2014	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2015	New Orleans, LA	Society of Urologic Oncology, May 2015 – Primary Penile Sparing: Treatment Approaches
2015	Chicago, IL	Faculty (CME Course): Radiologic Society of North America – Refresher course: Small renal mass (T1a) – the case for resection
2016	San Francisco, CA	Myriad Genetics, Inc. Advisory Board on Renal Cell Carcinoma – Evaluation of CCP Score Genomic Signature in Renal Cell Carcinoma
2016	Boston, MA	Faculty: World Conference on Interventional Oncology – Partial Nephrectomy Remains the Gold Standard
2016	Baltimore, MD	Faculty (CME Course): UroTrack – Renal Mass Biopsy Debate - Pro
2016	Boston, MA	Faculty (CME Course): 18th Biennial Urologic Cancer Course – Role of Biomarkers in Diagnosis and Followup of Bladder Cancer

2016	Boston, MA	Faculty: First Global Summit on Precision Diagnosis for Prostate Cancer – Imaging Tools in a Population of Men With Proven Prostate Cancer: Clinical Case Presentations.
2017	Boston, MA	Faculty: AdMeTech Second Global Summit on Precision Diagnosis for Prostate Cancer - Precision Oncology and Advanced Prostate Cancer: Genomic Testing.
2018	Dallas, TX	Advanced Urology Fellows Course: Identification, Resection & Treatment of Non-Muscle Invasive Bladder Cancer –Complications and Management of TURBT
2018	San Francisco, CA	Course Director and Faculty: AUA Course – Trimodality Therapy for Management of Muscle Invasive Bladder Cancer
2018	Boston, MA	Faculty (CME Course): 18th Biennial Urologic Cancer Course – Role of Biomarkers in Diagnosis and Followup of Bladder Cancer

International Invited Presentations and Courses

2011	Mallorca, Spain	5 th International Urology Forum – The Potential of Nanoparticle Enhanced Imaging in the Accurate Detection of Lymph Node Metastases [<i>Invited Lecture</i>]
2012	Mallorca, Spain	6 th International Urology Forum – Renal Mass Biopsy [<i>Invited Lecture</i>]
2016	Tel Aviv, Israel	Faculty: Friends of Israel Urology Symposium – Nephron sparing surgery for multiple renal tumors [<i>Invited Lecture</i>] Partial Nephrectomy: How I do it with less than 20 minutes warm Ischemia time [<i>Invited Lecture</i>] Session Chair: Oligometastases in Prostate Cancer
2017	Hachioji, Japan	Olympus Corporation - Future of Urologic Surgery [<i>Invited Lecture</i>]
2018	Santo Domingo, Dominican Republic	Latin America Prostate Cancer Summit – Management of Patients post-radical prostatectomy [<i>Invited Lecture</i>] Management of Hormone Sensitive Prostate Cancer [<i>Invited Lecture</i>]
2018	Tel Aviv, Israel	Faculty: Friends of Israel Urology Symposium – Active Surveillance for Prostate Cancer in Young Men [<i>Invited Lecture</i>] Trimodality Therapy for Muscle Invasive Bladder Cancer [<i>Invited Lecture</i>]

Report of Clinical Activities and Innovations

Current Licensure and Certification

2002 Diplomate, National Board of Medical Examiners
2004 Massachusetts Registered Physician

Practice Activities

Urology/Urologic Oncology, Laparoscopy and Endourology Massachusetts General Hospital
Attending Urologic Surgeon, Polycystic Kidney Disease Clinic Massachusetts General Hospital

Report of Technological and Other Scientific Innovations

Patents

1. Zetter BR, Feldman AS, McDougal WS. Methods for diagnosis and prognosis of epithelial cancers. U.S. provisional Patent Application. 2006 Mar 8.
 - Potential use of biomarkers as diagnostic or prognostic markers in bladder cancer. These are currently under investigation and are not yet being used in clinical care
 - My contribution was and is the discovery and analysis of the patented biomarkers

Report of Education of Patients and Service to the Community

Activities

1996-1998 Director (1997-1998) Volunteer (1996-1997), Creating Our Future Program - Worcester Family Health and Social Services Center

Educational Material for Patients and the Lay Community:

2010 **Feldman AS.** Essay on Prostate Cancer. CBS Cares: Prostate Cancer Campaign. cbscares.com.

2011 **Feldman AS.** Essay on Testicular Cancer. CBS Cares Valentine's Day Campaign on Testicular Cancer. cbscares.com.

2011 **Feldman AS.** Patient information: Blood in the urine (hematuria) in adults. UpToDate 19.3. October 14, 2011.

2014 **Feldman AS.** Prostate Cancer: Screening, Management and Controversy. Lecture given at Temple Beth Avodah, Newton, MA.

2015 **Feldman AS.** Prostate Cancer: Screening and Awareness. Lecture given at Leon De Juda Church, Boston, MA.

2015 **Feldman AS**. Prostate Cancer: Screening, Diagnosis and Treatment. Lecture given at The 7th Annual Prostate Cancer Awareness Day. Massachusetts State House, Boston, MA.
