## HOW TO ORDER

When you indicate the method of payment, please note if a purchase order is not accompanied by payment, you will be billed an addition \$5.00 *ship and bill* charge. And please include the card expiration date when using American Express.

Normal delivery time takes three to five weeks. It is vital that you order by number

or your order will be manually filled, insuring a delay. You can opt for *airmail delivery* for a \$2.00 charge per item. Just check the *Airmail Service* box if you're really pressed for time, call the NTIS Rush Order Service (703) 557-4700. For a \$10.00 charge per item, your order will be airmailed within 48 hours. Or, you can pick up your order in the Washington Information Center & Bookstore or at our Springfield Operations Center within 24 hours for a \$6.00 per item charge.

You may also place your order by telephone or TELEX. The order desk number is (703) 557-4650 and the TELEX number is 89-9405.

Whenever a foreign sales price is NOT specified in the listings, all foreign buyers must add the following charges to each order: \$2.50 for each paper copy; \$1.50 for each microfiche; and \$10.00 for each Published Search.

Thank you for your interest in NTIS. We appreciate your order.

## THE PLASTICS TECHNICAL EVALUATION CENTER

Authorized by the Office of Director of Defense Research and Engineering, the Plastics Technical Evaluation Center (PLASTEC) evaluates and disseminates technical information on current development, engineering, and application work in the field of plastics, reinforced plastics, and adhesives. It engages in materials surveys and other special assignments, and provides the Department of Defense with technical data and advice on research and development programs on plastics.

Both government and industry may request information from this Center directly. Inquiries which can be handled routinely are accomplished without charge. Those which require time-consuming study on the part of a specialist are charged for at a sum arrived at by prior agreement between requester and PLASTEC.

In order to recover the costs of publication of its documents, PLASTEC reports are now sold through the cooperation of the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161.

These innovations in our previously charge-free system are in line with a Department of Defense policy affecting all technical information centers.

  
Harry E. Pebley, Jr., Director

## DISCLAIMER

In this compilation PLASTEC has attempted to list all standardization documents known to be relevant to cellular plastics and related materials. It is recognized, however, that there must necessarily be some omissions, and for this the author apologizes.

## ABSTRACT

This is a compilation of all known U.S. specifications and other standardization documents involving cellular plastics (plastic foams), cushioning materials, and related materials, including cellular rubbers. A total of 286 documents covered include ASTM Specifications and Standards, Military Specifications, Standards and Handbooks, Federal Specifications, Federal Test Method Standards, Society of Automotive Engineers (SAE) Aerospace Materials Specifications (AMS's) and SAE Recommended Practices, Underwriters Laboratories (UL) Standards, National Fire Protection Association (NFPA) Standards, and National Bureau of Standards Voluntary Product Standards and Simplified Practice Recommendations. A subject index is provided.

## SCOPE AND NOTES

This Note is intended as a compilation of all known United States specifications and other standardization documents involving cellular plastics (plastic foams), cushioning materials, and related materials, including cellular rubbers. Documents covered include ASTM Specifications and Standards, Military Specifications, Military Standards, Military Handbooks, Federal Specifications, Federal Test Method Standards, Society of Automotive Engineers Aerospace Materials Specifications and SAE Recommended Practices, Underwriters Laboratories Standards, National Fire Protection Association Standards and National Bureau of Standards Voluntary Product Standards and Simplified Practice Recommendations.

A total of 286 documents are listed. In the case of the ASTM specifications and standards, documents selected for listing include 1. standards known to be specific to cellular plastics and related materials and 2. standards not specific to cellular plastics, but which have been listed because they may be used for cellular plastics and similar materials. The other sources list only documents specific to cellular plastics or rubbers and closely related materials. A subject index is included to assist the reader in finding relevant specifications, standards, and other documents.

In the case of ASTM documents the Parts (volumes) in which the standards are published are listed with the entries. Military documents include Federal Supply Classification (FSC) listings or DoD Area Assignments, designations of the preparing activity, issue date of the latest revision, indication of coordination status, and of the existence of a Qualified Products List (QPL). Federal documents have similar listings, but none of those listed have QPL's nor limited coordination, and so there are no coded listings tabulated. In the case of Federal Test Method Standards, with one exception, the individual test methods are listed separately, with titles and dates of issue.

The reader who is unfamiliar with specifications and standards will find it helpful to refer to Chapter 11, "Commercial and Government Specifications and Standards," by Arthur H. Landrock and Norman E. Beach, PLASTECH, in the Handbook of Plastics and Elastomers, edited by Charles A. Harper, and published by McGraw-Hill Book Company in 1975.

The author welcomes comments on the usefulness of this Note. Suggestions as to documents that are applicable and should be added to any possible future revision would be very much appreciated.

APPENDIX

Federal Supply Classification (FSC) Groups and Classes  
and DoD Area Assignments<sup>1</sup>

<sup>1</sup> From Cataloging Handbook, H2-1, Federal Supply Classification, Part 1, Groups and Classes, January 1975, Defense Supply Agency

Group 13 Ammunition and Explosives

- FSC 1320 Ammunition, over 125 mm
- FSC 1338 Guided Missile and Space Vehicle Inert Propulsion Units, Solid Fuel; and Components
- FSC 1375 Demolition Materials

Group 16 Aircraft Components and Accessories

- FSC 1660 Aircraft Air Conditioning, Heating, and Pressurizing Equipment

Group 42 Fire Fighting, Rescue and Safety Equipment

- FSC 4220 Marine Lifesaving and Diving Equipment

Group 54 Prefabricated Structures and Scaffolding

- FSC 5410 Prefabricated and Portable Buildings (includes Prefabricated Panels)

Group 56 Construction and Building Materials

- FSC 5640 Wallboard, Building Paper, and Thermal Insulation Materials
- FSC 5680 Miscellaneous Construction Materials

Group 59 Electrical and Electronic Equipment Components

- FSC 5970 Electrical Insulators and Insulating Materials

Group 61 Electric Wire, and Power Distribution Equipment

- FSC 6145 Wire and Cable, Electrical

Group 65 Medical, Dental, and Veterinary Equipment and Supplies

- FSC 6575 Medical and Surgical Instruments, Equipment and Supplies

Group 71 Furniture

- FSC 7110 Office Furniture

Group 72 Household and Commercial Furnishings and Appliances

- FSC 7210 Household Furnishings
- FSC 7220 Floor Coverings

Group 75 Office Supplies and Devices

- FSC 7510 Office Supplies

**Group 79 Cleaning Equipment and Supplies**  
FSC 7920 Brooms, Brushes, Mops and Sponges

**Group 80 Brushes, Paints, Sealers, and Adhesives**  
FSC 8040 Adhesives

**Group 81 Containers, Packaging, and Packing Supplies**  
FSC 8115 Boxes, Cartons and Crates  
FSC 8135 Packaging and Packing Bulk Materials  
FSC 8140 Ammunition and Nuclear Ordnance Boxes, Packages and  
Special Containers

**Group 93 Nonmetallic Fabricated Materials**  
FSC 9320 Rubber Fabricated Materials  
FSC 9330 Plastics Fabricated Materials

**DoD Area Assignments (used in lieu of FSC Classification where an  
FSC class is not applicable)**

MISC Miscellaneous  
PACK Packaging

### **Preparing Activities<sup>1</sup>**

<sup>1</sup> More detailed addresses, telephone numbers, etc. can be found in the DOD Standardization Directory, FSC Class and Area Assignments, SD-1, issued quarterly by the Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120. Similar information, but without the telephone numbers, is available in the Department of Defense Index of Specifications and Standards (DODISS), Part II, Numerical Listing. The DODISS, published periodically, is available to private industry and Government civil agencies through the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Military agencies can obtain copies from the Naval Publications and Forms Center directly, or through military channels.

AS - Naval Air Systems Command, Washington, DC  
AT - U.S. Army Tank Automotive Command, Warren, MI  
DM - Defense Personnel Support Center, Directory of Medical Materiel,  
Philadelphia, PA  
EC - Naval Electronic Systems Command, Washington, DC  
FSS- General Services Administration (GSA), Federal Supply Service  
Washington, DC  
GL - U.S. Army Natick Research and Development Command, (formerly  
Natick Laboratories), Natick, MA

- ME - U.S. Army Mobility Equipment Research and Development Center,  
Ft. Belvoir, VA
- MI - U.S. Army Missile Command, Redstone Arsenal, ALA
- MR - U.S. Army Materials and Mechanics Research Center, Watertown, MA
- MU - Frankford Arsenal, Philadelphia, PA
- OS - Naval Sea Systems Command (Ordnance Systems), Washington, DC
- PA - Picatinny Arsenal, Dover, NJ
- SH - Naval Sea Systems Command (Naval Ship Engineering Center),  
Hyattsville, MD
- SM - U.S. Army Packaging, Storage and Containerization Center,  
Tobyhanna Army Depot, Tobyhanna, PA
- YD - Naval Facilities Engineering Command, Alexandria, VA
- 11 - Aeronautical Systems Division, Wright-Patterson Air Force Base, OH
- 69 - Directorate of Packaging, Air Force Logistics Command,  
Wright-Patterson Air Force Base, OH
- 70 - Ogden Air Logistics Center, Air Force Logistics Command, Hill Air  
Force Base, UT

#### Coordination and QPL

The symbol "L" means that the document has limited coordination, by one Service only. For example, in Ref. No. 176, the specification was prepared by the Naval Sea Systems Command, Naval Ship Engineering Center, for exclusive Navy use. It was not circulated to the Army, Air Force, or Civil Agencies for their comments and acceptance. Usually these limited coordination documents have symbols representing the preparing activity in parentheses immediately following the specification number. In this case, SHIPS is actually spelled out. In some cases, for Air Force limited coordination documents, the letters USAF are used. In others the official symbols (see Preparing Activities in this Appendix) are used.

The symbol "Q" means that a Qualified Products List of approved sources has been published. The symbol "NQ" means that such a list is planned but not yet issued.

## SUBJECT INDEX

(in terms of Reference Numbers)

(Note: With a few exceptions, this index has been prepared only from the titles of the Standardization documents cited.)

Abrasion resistance - 71, 78  
Absorption, acoustical materials - 19, 24  
Accelerated service conditions - 61  
Accuracy - 137  
Acoustical materials - 18, 19, 24, 31, 209  
Adhesive, flexible unicellular - 188  
Aging, heat - 67, 123  
Aging, humid - 100  
Aging, laboratory, sandwich construction - 28  
Aging, thermal - 100  
Aging, vulcanized rubber - oven method - 48  
Aircraft applications - 152, 153, 191, 201, 225  
Air flow resistance, acoustical materials - 31  
Air heat test, cellular rubber - 280  
Air-pressure heat test, vulcanized rubber - 44  
Air-pressure test, cellular rubber - 281  
Air pycnometer method for open-cell content - 118  
Alkalinity, hollow glass microspheres - 124  
Automotive rubber compounds - 75, 158  
Automotive urethane compounds - 160, 161  
Bacterial resistance - 139  
Baffle material, aircraft fuel tank - 219  
Ballistic environment - 201  
Bedding cushioning, urethane foam - 284, 289  
Biodeterioration - 138, 139  
Bomb container - 196  
Breaking load (thermal insulation material) - 4  
Brittleness temperature - 58  
Building materials - 130, 133, 163  
Burning characteristics (see Flammability)  
Cable application - 181-184  
Cantilever beam stiffness test - 59  
Carbon-arc test - 60, 82, 140  
Cellulose acetate, cellular - 175  
Cellulosic tubular cushioning material, free-flow - 180  
Chairs, padding - 235  
Chemical resistance - 47  
Chloroprene rubber sponge - 145-147  
Circular oven test - 98  
Classification system, cellular elastomeric materials - 224  
Compression-deflection, vulcanized rubber - 49  
Compression, edgewise, sandwich construction - 15

Compression resistance, cellular rubber - 278  
Compression set, cellular rubber - 42, 76, 277  
Compression strength - 1, 14, 55, 88  
Compressive strength, hydrostatic, syntactic foam - 112  
Conditioning prior to testing - 50, 136  
Conductance - 41  
Container, polyurethane foam - 195, 196, 212  
Creep, package cushioning materials - 102, 263  
Cushion, carpet and rug - 230, 231, 246, 247  
Cushioning materials (see Package cushioning materials)  
Cushions, arm, for crutches - 244  
Cushions, chair and stool - 245  
Cyclic immersion, syntactic foam - 111  
D-C Resistance (conductance) - 41  
Definitions - 2, 8, 68, 86, 128  
Deflection temperature under flexural load - 54  
Density, apparent, rigid cellular plastics - 89  
Density, average true particle, hollow microspheres - 113  
Density, bulk, hollow glass microspheres - 125  
Density, sandwich core materials - 5  
Density, thermal insulation material - 10  
Diameter, cellular rubber - 274  
Dielectric breakdown voltage - 38  
Dielectric constant (permittivity) - 39, 94  
Dielectric strength - 38  
Dimensional stability - 33  
Dissipation factor - 94  
Elasticity, bulk modulus of - 120  
Elasticity, modulus of (Young's modulus) - 132  
Elastomeric materials - 29, 32, 69, 165, 169, 224  
Elastomeric materials, cellular, fabricated parts - 165  
Electrical applications (see Electrical insulating materials)  
Electrical insulating materials - 94, 181-184, 204, 205, 207  
Electrical properties - 38, 39, 94  
Elevated temperature test - 98  
Encapsulating material, polyurethane foam - 204, 207, 208  
Engine, small, container - 195  
Epoxy foam - 151  
Expanded cellular rubber - 74  
Expansion coefficient, cubical, thermal - 66  
Expansion coefficient, linear, thermal - 56  
Fatigue test, dynamic flex - 159  
Fiber, bound, uncompressed, for cushioning - 256  
Fibrous glass cushioning material - 174  
Fillers, joint - 127  
Film, cellular plastic, for package cushioning - 253  
Filter element, air - 213  
Flaked urethane - 250

Flammability - 52, 95, 99, 116, 119, 122, 130, 133, 135, 152, 153,  
158, 162-164, 201, 267  
Flex fatigue test, dynamic - 159  
Flexible cellular plastics (not otherwise described) - 107, 148, 188,  
192, 211, 217, 218, 232  
Flexing endurance, cellular rubber - 2  
Flexural load, deflection temperature effect under - 54  
Flexural properties, plastics - 65  
Flexural strength, thermal insulation - 4  
Flexure-creep, sandwich construction - 27  
Flexure test, flat sandwich construction - 20  
Fluorescent sunlamp exposure - 83  
Foam-in-place (pour-in-place) - 168, 179, 186, 187, 189, 191, 199,  
220, 222, 229  
Fungal resistance - 138  
Furniture, cushioning, urethane foam - 284  
Gasket and sealing materials, cellular - 29  
Geometrical measurements, cellular rubber - 269  
Guarded hot plate method - 3  
Hardness, indentation (Durometer) - 104  
Hardness, international, vulcanized rubber - 80  
Hardness, Rockwell - 64  
Hard rubber, tension testing - 110  
Heat flow meter test for thermal conductivity - 30  
Horizontal screen test (burning) - 95  
Hot surface performance, thermal insulation - 22  
Hydrostatic collapse strength, hollow glass microspheres - 126  
Ignition properties - 99  
Impact resilience of rubber - 72  
Impact strength, insulating materials (thermal and electrical) - 36,  
40, 58  
Impact strength, tensile - 97  
Impedance, acoustical materials - 19  
Incandescence resistance - 62  
Indentation (hardness) - 34, 46, 276  
Isocyanate raw materials - 91  
Latex foam rubber - 73, 156, 158, 248, 250  
Length, cellular rubber - 271  
Light exposure test - 60, 62, 82, 83, 108, 140  
Linear dimension changes - 70  
Liquid immersion effect on properties of elastomeric vulcanizates - 45  
Load deflection characteristics - 264  
Loose-fill expanded polystyrene - 252  
Mattresses, latex foam - 285, 286  
Mattresses, sponge rubber - 176, 248, 286  
Maximum use temperature, thermal insulation - 26  
Mechanical oscillograph method for elastomeric vulcanizates - 69  
Mechanical properties of elastomeric vulcanizates under compression  
or shear strains - 69

Mechanical stability, thermal insulation, tumbling method - 23  
 Mechanical testing, definitions - 128  
 Medical application - 257  
 Microspheres, hollow - 113, 114, 124-126  
 Missile case applications - 210  
 Mounting bases - 217  
 Nozzle seal, rocket motor - 206  
 Oil immersion test, cellular rubber - 282  
 Open cell content - 118  
 Oxygen index method for flammability - 119  
 Package cushioning materials - 77, 87, 101, 102, 174, 180, 192, 193,  
 195, 196, 212, 222, 226, 228, 229, 253-256, 258-261, 263-266  
 Packing factor, hollow glass microspheres - 125  
 Pad, typewriter, sponge rubber - 249  
 Penetration of rubber - 72  
 Permittivity - 39  
 Pillow, bed - 250, 251  
 Pipe insulation, thermal conductivity of - 11, 239, 240  
 Piston-cylinder method for bulk modulus of elasticity of syntactic  
 foam - 120  
 Polyester urethane foam - 218  
 Polyether urethane foam - 199  
 Polyethylene foam - 257  
 Polypropylene foam - 260  
 Polystyrene foam, expanded bead - 177, 197, 214, 255, 258  
 Polystyrene foam, thermal insulation - 35, 236  
 Polyurethane (see Urethane)  
 Polyvinyl chloride copolymer sponge - 92  
 Polyvinyl chloride foam - 85, 155  
 Polyvinyl chloride sponge - 92  
 Potting compound, foamed epoxy - 151  
 Pour-in-place foam (see Foam-in-place)  
 Precision - 137  
 Probe method, thermal conductivity - 105  
 Radiant heat energy surface flammability test - 135  
 Radiation (high energy) effects - 93, 121  
 Radomes - 154  
 Rate-of-rise test, urethane foaming systems - 103  
 Rebound pendulum test - 72  
 Reticulated urethane foam - 219  
 Rigid cellular plastics (not otherwise described) - 88-90, 100, 106,  
 115, 118, 172, 179, 187, 189, 192, 210, 212  
 Rockwell hardness (see Hardness, Rockwell)  
 Rubber (vulcanized) - 42-46, 49, 51, 60, 69, 72-76, 79, 80, 86, 101,  
 104, 110, 141-147, 156, 157, 164, 166, 167, 176, 178, 200, 244,  
 246-250, 269-283, 285  
 Rubberized curled hair - 101  
 Rupture, modulus of (thermal insulation materials) - 18  
 Sandwich constructions - 5-9, 15-17, 20, 21, 27, 28, 154, 191, 221-  
 223  
 Seal, nozzle, rocket motor - 200

Seat cushion insert, polyurethane foam - 194  
 Shear fatigue, sandwich core materials - 21  
 Shear modulus - 134  
 Shear strength - 57  
 Shear test sandwich core materials - 7  
 Sheet - 32, 149, 172, 173, 190, 205, 239  
 Shock-absorbing characteristics of package cushioning materials - 87  
 Shrinkage, linear, thermal insulation - 14  
 Significant figures - 129  
 Silicone rubber sponge - 141-144, 200  
 Slab flexible urethane foam - 84  
 Slosh, anti, application, aircraft fuel tank - 220  
 Smoke density - 116  
 Soaking heat - 14  
 Sound absorption (see Absorption, acoustical materials)  
 Specific heat, thermal insulation - 12  
 Sponge, chloroprene rubber - 145-147  
 Sponge (rubber), synthetic - 74, 157, 176, 233, 234  
 Sponge, silicone rubber - 141-144, 200  
 Static indentation method (for load deflection) - 264  
 Stiffness, cantilever beam method - 59  
 Storage recommendations for cellular rubber and plastics - 164  
 Strength properties, architectural acoustical materials - 18  
 Stress relaxation, vulcanized rubber - 79  
 Strip, insulation - 205  
 Surface abrasion - 71  
 Syntactic foam - 111-114, 120, 124-126, 150, 185, 186  
 Tape, adhesive, urethane foam - 202, 215  
 Tear resistance, vulcanized rubber - 51  
 Temperature extremes, effect on physical properties - 63, 98  
 Tensile impact strength - 97  
 Tension test (tensile) - 9, 43, 53, 90, 109, 110  
 Thermal conductivity - 3, 11, 30, 105, 266  
 Thermal insulating materials - 2, 4, 10-12, 14, 22, 23, 25, 26, 33-35, 37, 170, 171, 188, 198, 236-243, 252, 257  
 Thickness, cellular rubber - 273  
 Thickness measurement, sandwich cores - 17  
 Tiles, syntactic foam - 150  
 Trays - 161  
 Tube, igniter, for propelling charge (cellular urethane) - 203  
 Tube method, impedance and absorption of acoustical materials - 19  
 Tubular material, elastomeric cellular - 32  
 Tumbling method, mechanical stability of thermal insulation - 23  
 Urethane (polyurethane) foam - 84, 106, 107, 148, 159-161, 163, 168, 179, 187, 189, 191, 192, 194-196, 199, 201-204, 206-208, 210-213, 216, 218, 219-222, 229, 230-232, 237, 238, 243, 251, 284  
 Urethane foaming systems - 103  
 Urethane foam isocyanate raw materials - 91, 96, 117  
 Vibration barriers - 209  
 Vinyl chloride copolymer foam - 85, 155

Vinyl chloride polymer foam - 85  
Volume increase - urethane foaming systems - 103  
Water absorption, package cushioning materials - 264  
Water absorption, rigid cellular plastics - 115  
Water absorption, sandwich core materials - 6  
Water exposure - 82, 108, 140  
Water vapor transmission - 13, 131  
Weathering test, artificial - 60, 108  
Weather resistance exposure, weathering - 75, 81  
Width, cellular rubber - 272  
Young's modulus (see Elasticity, modulus of)

### REPORTS

R5D	<i>Directory in Plastics - Knowledgeable Government Personnel (Revised)</i> by R.J. Valles and John Nardone, Feb 1975 (Price \$20.00)	AD A008 340
32	<i>The Weatherability of Polyolefins</i> , by J.B. Titus, March 1968 (Price \$6.00)	AD 672 513
33	<i>Compatibility of Explosives with Polymers (II)</i> (An Addendum to Picatinny Arsenal Technical Report 2595), by N.E. Beach and V.K. Canfield, April 1968 (Price \$6.00)	AD 672 861
34	<i>Survey of Plastics Sandwich Construction</i> , by N.T. Baldanza, May 1968 (Price \$6.00)	AD 673 713
35	<i>Subject Index, Bibliography, and Code Description of Technical Conference Papers on Plastics: May 1967-May 1968</i> , by J.B. Titus and A.E. Molzon, Aug 1968 (Price \$6.00)	AD 676 189
36*	<i>A Bibliography of Ablative Composites and Polymers</i> , by A.M. Shibley, July 1968	AD 855 720
37	<i>Polyurethane Foams: Technology, Properties and Applications</i> , by A.H. Landrock, Jan 1969 (Price \$15.50)	AD 688 132
R37A	<i>Ecological Disposal of Plastics with Emphasis on Foam-in-place Polyurethane Foam</i> , by A.H. Landrock, Aug 1973 (Price \$10.00)	AD 771 342
38	<i>Weatherability of Polystyrenes and Related Copolymers and Terpolymers</i> , by J.B. Titus, July 1969 (Price \$6.00)	AD 770 091
39	<i>Subject Index, Bibliography, and Code Description of Technical Conference Papers on Plastics: 15 May 1968-8 May 1969</i> , by J.B. Titus and A.E. Molzon, December 1969 (Price \$8.00)	AD 707 246
40	<i>Compatibility of Explosives with Polymers (III)</i> . An Addendum to Picatinny Arsenal TR 2595 and PLASTE <sup>C</sup> Report 33, by N.E. Beach and V.K. Canfield, January 1971 (Price \$6.00)	AD 721 004
R41	<i>Applications of Ionizing Radiations in Plastics and Polymer Technology</i> , by A.F. Readdy, Mar 1971 (Price \$12.00)	AD 725 940
R42	<i>Solid-Phase Forming (Cold Forming) of Plastics</i> , by J.B. Titus, Jan 1972 (Price \$10.00)	AD 752 136
R43	<i>Plastics Fabrication by Ultraviolet, Infrared, Induction, Dielectric and Microwave Radiation Methods</i> , by A.F. Readdy, April 1972 (Price \$11.00)	AD 756 214
R44*	<i>Plastic Materials for Cartridge Cases</i> by A.M. Shibley, Jan 1973	AD 912 075L
R45	<i>Reverse Osmosis Bibliography: Abstracted and Indexed</i> , by J.B. Titus, June 1973 (Price \$17.00)	AD 769 208

### NOTES

N6C	<i>Government Specifications and Standards for Plastics Covering Defense Engineering Materials and Applications (Revised, Final)</i> , by N.E. Beach, May 1973 (Price \$3.00)	AD 771 008
N9B	<i>Trade Designations of Plastics and Related Materials (Revised)</i> , by J.B. Titus, Oct 1974 (Price \$13.00)	AD A001 856
18	<i>The Coating of Aluminum with Plastics by the Fluidized-Bed and Electrostatic Powder Techniques</i> , by A.H. Landrock, Feb 1968 (Price \$6.00)	AD 666 224
19	<i>Polymer Synthesis: A Survey of Government Contracts Since 1960</i> , by A.E. Molzon, Jan 1968 (Price \$6.00)	AD 666 758
20	<i>Literature Survey on Thermal Degradation, Thermal Oxidation, and Thermal Analysis of High Polymers (III)</i> , by D.A. Teetsel and D.W. Levi, November 1969 (Price \$10.00)	AD 706 811
21	<i>Literature Search. Injection Molding Processing Parameters</i> , by N.T. Baldanza, July 1969 (Price \$3.00)	AD 703 530
22	<i>Compatibility of Explosives with Polymers. A Guide to the Reactions Reported in Picatinny Arsenal Technical Report 2595, March 1959</i> , by M.C. St. Cyr and N.E. Beach, October 1970 (Price \$3.00)	AD 716 624
N23	<i>Literature Survey on Thermal Degradation, Thermal Oxidation, and Thermal Analysis of High Polymers (IV)</i> , by E.C. Schramm and D.W. Levi, Jan 1972 (Price \$12.00)	AD 759 530
N24	<i>Environmentally Degradable Plastics A Review</i> by J.B. Titus, Feb 1973 (Price \$4.00)	AD 760 718
N25*	<i>Low Energy Impact Strength of Graphite/Epoxy Composites. An Initial Exploration</i> , by J.A. Maciejczyk, Apr 1973	AD 912 224L
N26	<i>Weldbonding in the United States An Annotated Bibliography and History</i> , by R. Winans, A.M. Shibley and J.R. Hill, Dec 1974 (Price \$6.00)	AD A008 048
N27*	<i>Army Aircraft Structural Plastic Materials Testing and Data Compilation, Characterization (Part I) Signatures of Commercial Prepregs for Composite Aerostructures</i> , by L.R. Weiner, J.A. Maciejczyk and A.E. Slobodzinski, June 1975	AD B006 545L
(Part II)	<i>Same as above</i> , September 1975	AD B007 234L
N28*	<i>Review of Plastic Flooring for Explosive/Fuel Plant Processing Areas of Army Ammunition Plants</i> , by John Nardone (Mar 1976)	AD B011 790L
N29	<i>Literature Survey on Thermal Degradation, Thermal Oxidation, and Thermal Analysis of High Polymers (V)</i> , by Alice Csete and D.W. Levi, Jan 1976 (Price \$15.00)
