This technical note presents tables and plots of an expression presently in use in prediction models at the Naval Undersea Research and Development Center, San Diego, California. This note is not to be considered an official NUC report. Its purpose is to present tabulated results for use in support of sonar system performance prediction studies.

The work described in this technical note has been supported under NAVSHIP Exploratory Development subproject SF 11-121-500, Task 8704.

This report presents computer determined tabular and graphical evaluations of the backscattering of low frequency sound from the sea surface. Computations were made using the empirical expressions of Chapman and Harris.

Part I contains tables giving the scattering strength as a function of grazing angle and wind velocity for 18 frequencies (.5 to 20 kHz). Part II contains plots of this same data.

The equation used in these calculations is

$$S = 3.3 B \log (P/30) - 42.4 \log B + 2.6$$

where

$$B = 158/(vf^{1/3}) .58$$

S is the surface scattering strength (db/sq yd),

P is the grazing angle in degrees,

f is the frequency in Hz,

and

v is the wind velocity in knots.

The above equation was determined from measurements made in winds from zero to 30 knots and with frequency in octave bands from 400 to 6400 Hz. For completeness, computations have been made for some cases which fall outside the data limits of the original analysis. Similarly, no attempt has been made to place a small angle lower limit on scattering strength resulting from near surface bubble or biological scatterers.

PART I - TABLES

The surface scattering strength (dB/sq yd) is tabulated as a function of the grazing angle (degrees) and the wind velocity (knots) for 18 frequencies. There are two pages for each frequency.

PART II - PLOTS

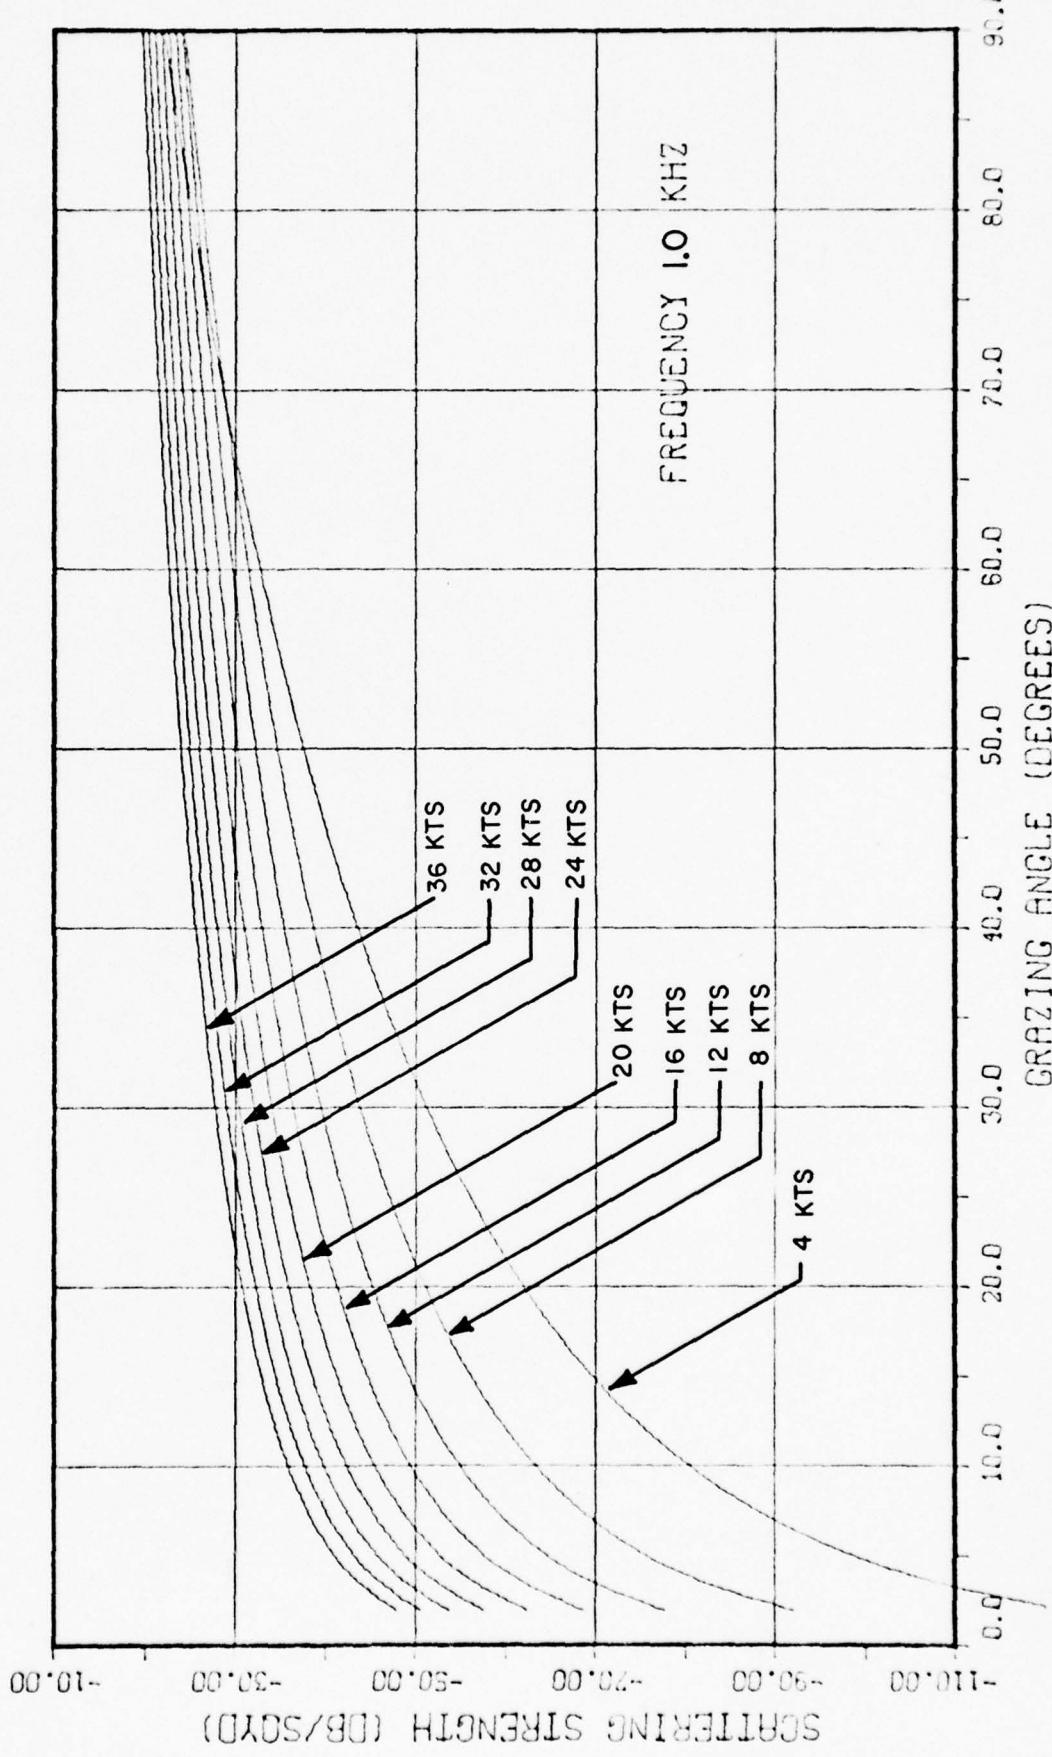

The surface scattering strength (dB/sq yd) is plotted vs the grazing angle (degrees) for 9 wind speeds (knots) on each graph. There are 18 plots, one for each frequency (kHz). These plots were made on a CALCOMP plotter using the AMESPLOT MK II plotting routines.
