SDCS Event Report No. 119
 Eastern Kazakh, SSR, 30 October 1976

This event report contains seismic data from the Special Data Collection System (SDCS), and other sources for the above event. Published epicenter information from seismic observations is:

	"P" Arrival	Origin Time	Lat.	Long.	m_b	M_s
LASA	05:09:31.3	Unpublished	46.9N	079.3E	4.6	N/A
Hagfors	05:04:08.6	04:56:36	48N	081E	4.6	N/A

All SDCS stations were operational during this time period and positive short-period signals were recorded at RK-ON and OB2NV. Horizontal channels were rotated. Long-period at all SDCS stations was negative.

LASA data is reported from the LASA Data Center Teleseismic Report. Hagfors data is from their bulletin.

There were no tapes recorded from the SDAC/VELA detection processor for this time period, therefore, no LASA or NORSAR waveform data is available.

Scaling factors on plots are millimicrons at 1 Hz (not corrected for instrument response)
