20. ABSTRACT (Continue on reverse side if necessary and identify by block number) → This volume presents (1) American English language elements (sentences, phrases, patterns) organized by Language Functions and Functional Categories (2) Rolebooks giving utterances in six Technical Roles for three Functional Categories in three modes of conversation.		

Introduction

This volume contains: (1) the Function Catalog for English and (2) Role-books for the six Technical Roles for English. Each of these is presented as an example of a system component for the benefit of readers not familiar with any of the target languages (Iberian Spanish, Mandarin Chinese, and Russian) used in developing the system.

The Function Catalog presents a list of common American English sentences, patterns and phrases used to accomplish each function within the six Function categories. What appears here is not intended to be an exhaustive list of every possible way to express each function; instead it presents a range of expressions and/or structures in common use. It provides an adequate sample of the language from which the language requirement for a typical military job position would be drawn.

It should be noted that the function catalog for a language is intended as a resource for developers of instruction rather than as a teaching tool itself. Most functions are presented with several alternative modes of expression. The developer would chose from these in creating courses and materials; they would not themselves constitute a corpus of material to be learned in any particular course.

The Function Catalog for English may be used to provide examples and guidelines when developing function catalogs for other languages. However, the developer should always keep in mind that elements do not translate directly from language to language. For any one function, one language may contain more or fewer elements than another. The expressions and vocabulary items may be exact translations; more frequently, they will be approximate equivalents or simply utterances which serve the same purpose but which do not translate at all.

The Rolebooks for English provide information relating to the social dimensions of the language. The rolebooks indicate differences in the style, tone, and formality of the language used in different job situations. It is an assumption of the system that in any conversational exchange in the target language the jobholder's language behavior can be assigned to one of the technical roles presented here. The jobholder's choice of structures and vocabulary items will reflect the difference in roles.

The developer uses the rolebooks to establish the style and tone of the language to be incorporated into target language instruction after the appropriate functions and functional elements have been selected from the Function Catalog.

Function Catalog for English

The following is a catalog of American English sentences, phrases, and structural patterns which can be used to express each of the language functions. The catalog provides samples, called "functional elements", of the different ways that a function can be expressed; the lists are intended to be representative rather than exhaustive.

The functional elements appear in three forms:

(1) single sentences: "There's a lot of red tape involved" (2.12.1
Report, express, or inquire about difficulty)

(2) phrases: "Best wishes" (5.9 Express and receive congratulations)

(3) structural "strings": "It seems to {me} {us} that + S"
(2.13 Report, express, or inquire about belief or opinion)

The presentation of elements in "strings" or patterns allows greater flexibility of expression since many utterances can be generated from a single string. This flexibility greatly increases the power of the catalog, but it allows the production of some utterances that may not fit the function at hand. Therefore, each new sentence generated from a string within a function should be checked against the following standards:

- Is it grammatically correct?
- Does it accomplish the purpose of this function?
- Is the vocabulary appropriate to the structure and the function?

Key to Symbols

The following key will assist the reader in interpreting the "shorthand" symbols used to list elements in the catalog.

ADJ = adjective

ADV = adverb

BE, DO, CAN = any verb, in capital letters and underlined. This indicates that the proper conjugated form of the verb is to be substituted.

NP = noun phrase, including common nouns, proper nouns, pronouns, and their dependent structures. e.g. "the efficient soldier"
"the route he selected"

VP = verb phrase, verb

POSS = possessive

PREP = preposition

NEG = negative form: "no", "not", "n't", "un___", "non___".

S = sentence

EX: = example sentence

if, that = indicates that a vocabulary item has been used to label a grammatical form. The particular vocabulary item, e.g., that, may not appear in every utterance of the grammatical form it names. For example, "whether" may appear instead of "if" in an if-clause, or "that" may be deleted or replaced by another relative pronoun.

{ } = pick one from this set; one (and only one) item listed in the brackets must be included.

Ø = null set; no additional utterance.

() = optional: the item within the parentheses may be included or left out.

Rolebooks for English

The six Rolebooks for English which follow are intended to provide the developer with examples of English language utterances which would be appropriate for the relative professional and social position of a jobholder in each role. For each of the six roles, utterances are presented for three functional categories in three different modes of conversation. The three functional categories are: 2.0 Report, express, or inquire about intellectual attitudes, 3.0 Report, express, or inquire about emotional attitudes, and 4.0 Report, express, or inquire about getting things done (suasion). Utterances in the other functional categories are standard; they are not expected to vary among roles. The three modes of conversation are polite, neutral, and brusque (see below).

The six technical roles: Commander, Instructor, Advocate, Advisor, Questor, and Aide have been determined by interviews with jobholders, analysis of a range of military job descriptions, and examination of job products. The six roles are adequate to define the socioprofessional dimension of the language requirement for the vast majority of military jobs.

It is important to note the following points concerning the roles concept:

- The roles concept covers only those situations in which an interpersonal communicative exchange occurs in the course of job performance. Situations in which the jobholder interacts with written materials (e.g., the Communicative Activities "SCANS", or "REVIEWS") or is the receiver of a one-sided transfer of information (e.g., "MONITORS", or "NOTES") do not involve consideration of a technical role.
- Differences between roles are variations in the overall affective messages conveyed in a professional communicative exchange. Therefore, in comparing two roles it may be necessary to look at the general

affective tone carried in the utterances from a number of functions taken as a group. A line-by-line or utterance-by-utterance comparison of roles for a given function may not yield easily recognizable differences; the consideration of a larger unit of analysis will make the variations more evident.

- The labels for the three modes of conversation are intended as mnemonic devices rather than as exact descriptions of the categories:

"Polite" utterances represent the most polite way of expressing a function rather than the only polite way. It is usually also the most formal of the three modes.

"Brusque" utterances are abrupt or informal rather than rude or ill-mannered. All of the utterances given under any category are appropriate means of expression for the military jobholder who wishes to do his/her job "without insult" to the speakers of the target language.

"Neutral" utterances convey the smallest amount of affective overtone of the three modes of conversation. They are in contrast with both the polite and brusque modes, which may carry connotations of authority, familiarity, deference and the like in addition to that expressed by the role itself.

ROLEBOOKS
Functions List for English

ADVOCATE: The Advocate is someone who is quite knowledgeable about, though probably not expert in, a given set of topics. S/he acts only in response to requests for information from host country nationals. The task is to obtain a clear picture and statement of the requestor's needs or desires and then to pass that statement on to U.S. sources of information. The task then becomes one of obtaining information from those sources, probably in English. That information is passed back, in the host country language, to the requestor who reacts, refining his/her request. That refined request is taken back to the U.S. sources who provide more refined information which in turn is passed back again to the requestor. This process is repeated until the information from U.S. sources approximates the requestor's needs as closely as possible or until the requestor tailors his/her needs to the information available.

INSTRUCTOR: An Instructor by definition outranks all other participants in a transaction. S/he teaches, or imparts information, by delivering knowledge or by imparting skills to learners. The Instructor evaluates the performance of the learner, prescribes additional instruction if necessary, and provides the teaching needed. The Instructor is responsible for the learner's performance in the instructed activity beyond the limits of the instructional activity.

ADVISOR: The Advisor operates from his/her position as expert, but only in response to a request. S/he passes on to the requestor his/her (the Advisor's) judgment about the best way to deal with the requestor's problem, or with a situation described by the requestor. The "best" way in a given situation may be, for example, the most effective, or least expensive. It will be defined within certain predetermined limits, such as constraints on fiscal budget or personal resources. The Advisor's duties include giving the best possible advice within the limits of the circumstances. Some of these limits may be: 1) the ability of the requestor to comprehend the advice or information, 2) government or company policies; for example, classification, and 3) limitations on information flow. The Advisor is not responsible for the execution of plans developed by the requestor. If the requestor asks that a plan be executed, and the Advisor agrees, at that point s/he assumes the TECHNICAL ROLE of Instructor or Commander.

ROLEBOOKS
Functions List for English

AIDE: An Aide is concerned with facilitating communication in a transaction - social or business - between peers or near-peers. The facilitating is carried on at the request of one of the parties to the transaction. That person, the requestor, probably is a superior of the person in the Aide role.

A major aim of the transaction is effecting social solidarity between the parties. To that end the Aide is expected to protect the parties from embarrassment, especially the person who requested his/her Aide services and, in general, to effect smoothness in the transaction.

COMMANDER: A commander by definition outranks all other participants in a given transaction. She is totally responsible for the outcome of the entire enterprise. S/he is concerned with leading and inspiring people. S/he directs people to perform in specified ways. S/he evaluates that performance and at his/her discretion may direct others to modify their performance.

QUESTOR: A Questor gathers information in response to a request by his/her employer. His/her duties include gathering and providing all available, relevant information, in the best possible form. The information provided must be at the highest possible level of confidence (that is, it must be the "hardest," most trustworthy, etc., available). The Questor exercises judgment in two ways: 1) in determining the relevance of the information s/he is gathering, and 2) by commenting on the information gathered if the employer requests that s/he do so.
