FOREWORD

This bibliography deals with document and periodical article coverage on the artillery battery. Although emphasis is on the ideal effective operational size, general considerations are also addressed.

The battery may be defined as either an administrative tactical unit corresponding in size and function to a company in other U.S. Army branches, or, may be a group of weapons operating as an entity. Arrangement of this number is in parts. Part One indicates documents on the battery. Part Two lists periodical articles.

Inclusion of an item, or omission, neither implies USAFAS indorsement, sanction of the compiler's point-of-view, nor does it guarantee accuracy of content. Comment concerning this list is solicited.

LESTER L. MILLER, JR.  
Supervisor/Reference Librarian
