20. ABSTRACT (Continue on reverse side if necessary and identify by block number)

The 1976 Study of US Army Libraries recommended that the technical processing functions of each Army library be consolidated or centralized at the installation level. "Integration of New Technology in Army Libraries" determined the feasibility of installation-level networking of technical processing activities, and develops the means through which new technology can be integrated into Army libraries. Site visits to Fort Belvoir, Virginia and Aberdeen Proving Ground, Maryland, libraries gathered information that detailed current library technical processing operations for monographs.

DD FORM 1 JAN 73 1473 EDITION OF 7 NOV 65 IS OBSOLETE

DTIC FILE COPY

SECURITY CLASSIFICATION OF THIS PAGE (When Data Entered)

serials, and technical reports. Library automated turnkey systems and alternative configurations for consolidation were examined. Based on gathered data, a cost model was developed and applied to decentralized, installation-level, and command-level technical processing. Recommendations include projected organizational, staffing, and budget requirements, and an implementation plan for installation-level consolidation.

REPRODUCTION QUALITY NOTICE

This document is the best quality available. The copy furnished to DTIC contained pages that may have the following quality problems:

- Pages smaller or larger than normal.
- Pages with background color or light colored printing.
- Pages with small type or poor printing; and or
- Pages with continuous tone material or color photographs.

Due to various output media available these conditions may or may not cause poor legibility in the microfiche or hardcopy output you receive.

If this block is checked, the copy furnished to DTIC contained pages with color printing, that when reproduced in Black and White, may change detail of the original copy.

INTEGRATION OF NEW TECHNOLOGY IN ARMY LIBRARIES

INTERVIEW GUIDE

LIBRARY NAME

type of library: morale support, technical, or educational support

COMMUNITY SERVED

number of (potential) users

type of users

location of users

ORGANIZATION

library's placement in command structure

functional organization of library

official branches

unofficial branches

STAFF

name, job title, series, grade and step, and source of funds

training

library technicians

automated library/information systems

experience with automated library/information systems

current

previous

AUTOMATED LIBRARY/INFORMATION SYSTEMS

library has

library has access to

library staff may use

library staff may request searches to be performed

EQUIPMENT

make, model, age, ownership (owned, leased, or available for use)

SERVICES

ILL (command networks, installation networks, other sources)

literature searches

recurring bibliographies

SDI

acquisitions list

purchasing books for staff

office collections

desk copies

personal copies (paid for by requestor, personally)

cooperative activities with other libraries (intra-command, inter-command;
formal, informal)

(obtain copies of any written agreements)

CIRCULATION

volume of activity

circulation files (obtain sample records)

overview of circulation process

COLLECTION MAINTENANCE

(files searched/updated; volume and frequency of activity)

binding

preservation filming or microform purchasing

weeding

inventory

BUDGET

(obtain copy of Fiscal '81 budget: operations, salaries, literature)

sources of funds

funding of intra-command and inter-command cooperative activities

REPORTING REQUIREMENTS

requestors of reports

subject of reports (budget, library operations, library use, etc.)

frequency of reports

(obtain sample copies of all reports)

MAJOR PROBLEMS**FUTURE PLANS**

automation

cooperative activities

OTHER IMPROVEMENTS

improvements that are not currently planned for implementation

TECHNICAL PROCESSING - overview

space available

types of materials acquired (books, technical reports, periodicals, etc.)

current collection size (each type)

annual growth rate (each type)

files associated with technical processing

file name (obtain sample record)

organization of file (alpha, by title, etc.)

number of records (may measure in inches)

number of catalog card drawers

number of new records per month

number of records updated per month

number of records deleted per month

number of information-only file searches per month (does not include searches which result in record creation, maintenance, or deletion)

PROCESSING PROCEDURES (to be discussed by type of material, with processing time and grade level of staff to be indicated for each basic activity in the processing flow)

selection

acquisition

pre-order searching

modes of acquisition (BPAS, Purchase Orders, etc.)

vouchering

invoice processing

cataloging

card preparation and filing

book preparation and shelving

processing problems

processing backlogs (number of items)

Engineer School Library: Processing of monographs and serials

Engineer School Library: Processing reports, audiovisuals, & military publications

LIBRARY: U.S. ARMY ENGINEER TOPOGRAPHIC LABORATORIES SCIENTIFIC AND TECHNICAL
INFORMATION CENTER (ETL)

COMMAND: CORPS OF ENGINEERS

TYPE OF LIBRARY: Technical

MISSION: The library supports ETL's research and development in the topographic sciences, including mapping, point positioning, and military geographic information, by acquiring, organizing, maintaining the collection, and providing reference services to meet mission responsibilities.

BUDGET: FY 81, \$120,700 (includes \$30,000 for library materials)

COMMUNITY SERVED: 300 ETL staff, of which 170 are engineers and scientists

PERSONNEL: one 1410
one 1411

% OF TIME SPENT IN TECHNICAL PROCESSING: one 1410 - 16%
one 1411 - 28%

ADP EQUIPMENT: Execuport available - used to order DTIC reports online

COLLECTION SIZE: monographs - 4,500
technical reports - 1,000
serial titles - 150

TECHNICAL PROCESSING FUNCTIONS:

- o order through MERADCOM procurement (monographs using BPAs, serials using purchase orders); technical reports acquired through automatic distribution or through DTIC online
- o LC card sets ordered
- o serials routed
- o technical reports are filed by report number and are not cataloged

APPENDIX C

The following section presents a detailed breakdown of costs by activity of the existing technical processing systems at Ft. Belvoir and APG. The hourly rate was computed by taking the yearly salary based on GS and military schedules for FY 1981, dividing by 2080 (the estimated number of hours that each full-time employee spends on the job), and multiplying that rate by 1.105 (the estimated 10.5% overhead rate used by the Army). The statistics on numbers of items and hours spent on each technical processing activity were obtained at the site visits to each library and through follow-up calls. In general, these statistics were not kept regularly by the librarians. Many of the figures are estimates, and in some cases, best guesses. Both the librarians and the project team exercised judgement in order to arrive at reliable figures.

APPENDIX D

The cost model is based on current operation statistics. It was necessary to freeze statistics in order to develop the model. However, statistics were corrected throughout the project. Therefore some tables from the cost model may not directly correlate to the raw data sheets. The project team determined that changes made to data sheets after the model was developed did not significantly affect the model's cost estimates.

TABLE D-1. TOTAL FIXED COSTS FOR TECHNICAL PROCESSING
ALTERNATIVES FOR FORTY-FIVE LIBRARIES

Type of Fixed Cost	Forty-Five Decentralized	Six "Installations"	1 "Command"
One-Time			
Computer	\$ 900,000	\$900,000	\$900,000
Terminals	80,892	59,364	53,928
Modem	2,247	1,649	1,498
Furniture	4,494	3,298	2,996
Training	<u>22,470</u>	<u>16,490</u>	<u>14,980</u>
Total	\$1,010,101	\$980,801	\$973,402
Recurring			
Space	22,500	16,500	15,000
Maintenance	2,500	2,200	2,000
Communication	7,640	5,607	5,093
Training	<u>11,250</u>	<u>8,250</u>	<u>7,500</u>
Total	\$43,890	\$32,557	\$29,593

*Total processing power that could be configured several different ways. Implementation plan will detail specific configurations.

RFP

1. Description of Proposed System
 - a. Equipment Configuration
 - Make, Model, quantity of each piece of equipment
 - form of data handled
 - storage
 - controls
 - b. Software system
 - form of input documents and data
 - time estimates for each piece of equipment to handle each job
 - examples of coding
 - flow charts
 - supplies required
2. Delivery schedule
 - a. delivery date
 - b. set-up time
3. Installation requirements
 - a. size, weight, floor space, height for each piece of equipment
 - b. electricity and wiring
 - c. air conditioning, humidity control, etc.
 - d. additional space requirements
4. Vendor support
 - a. Nature of firm
 - number and location of employees and field representatives
 - availability of personnel for analysis programming, and installation
 - b. training support and documentation
 - c. guarantees provided regarding resolution of system problems
5. Finance
 - a. terms of contract, renewal and cancellation
 - b. terms of payment, discounts
 - c. guarantees
 - d. maintenance contract
6. System upgrading
 - a. additional units that can be added for: input, output, storage, processing
 - b. interfaces with other equipment and/or systems.

APPENDIX H

DAMANS

and associates

2 Professional Drive • Suite 247 • 301-840-9117
Gaithersburg, Maryland 20879

Marilyn D. Casanave
President

Henry C. Casanave, Jr.
Executive Officer

April 13, 1982

Dear Gentlemen:

DAMANS and Associates, together with King Research Inc., is in the process of investigating the potential for cooperative technical processing in Army libraries. We have acquired some written technical descriptions of your system and have discussed its capabilities with representatives of your firm. Any information you provide will be in the public domain since the data will be published in a non-proprietary situation. Additionally, pricing data for your system is requested.

A centralized technical processing center (TPC) is planned for each installation, with the libraries on each installation interacting with their local TPC.

An integrated system is recommended, beginning with support of technical processing activities (acquisitions and fund accounting, serials control, and cataloging). An online catalog and direct interface with OCLC will be required. Circulation control would be a future enhancement to the system.

The environment within which the system will be working on two test installations is as follows:

Levels of Activity

	Installation X	Installation Y
Number of libraries	7	8
Books ordered and received	40,600	13,300
Serials ordered	2,400	4,000
Serial issues checked in	28,000	47,000
Items cataloged	9,000	25,000
Annual growth rate: books	7%	6%
serials	0%	0%
Number of terminals:	14	15

Your pricing data should include the software, hardware and peripherals necessary to support the two separate technical processing centers and their local libraries. In addition, please provide maintenance and training costs. As with the technical information, pricing data should also be provided with the understanding that it will be made public.

Please address your responses and any questions that you may have to:

Dr. Jose Marie Griffiths
Senior Research Associate
King Research, Inc.
6000 Executive Blvd.
Rockville, MD 20852
(301) 881-6766

Any responses received after May 5 cannot be included in our report.

Thank you in advance for your cooperation; the project team looks forward to your reply.

Sincerely,

Janine Reid

Rockville, MD 20852

Dear Dr. Griffiths:

Thank you for your interest in the Integrated Library System (ILS) and Avatar Systems, Inc.

Using the information you provided about your collection size and processing volume, I have projected a hardware configuration and costs for software and installation of ILS at your libraries. For a full-service turnkey installation, including hardware, software, installation assistance, training, and documentation the total estimated costs for installation X would be approximately \$147,000-\$152,000 and approximately \$151,000-\$166,000 for installation Y. Ongoing hardware and software maintenance would be around \$2,205-\$2,280 (installation X) and \$2,415-\$2,590 (installation Y) per month after acceptance of the system, and would provide you with future software enhancements at no additional charge.

Optionally, Avatar recommends that the two sites share a larger computer system, the cost of which will be approximately 80 percent of the total cost of the two separated systems. Such a configuration will require leasing a line, or perhaps two, for the remote terminals to operate at 1200 baud multiplexed on the same lines. This option would reduce costs and increase resource sharing.

I have enclosed details of the proposed hardware configuration and of Avatar's enhancements to ILS. We are installing the enhanced multi-branch version of the software at Carnegie-Mellon University for the full university library system.

Please feel free to call if you need additional information. We would be glad to work with you further as you continue your planning for automation.

Sincerely,

A handwritten signature in cursive script that reads "Elizabeth A. Payne".

PERFECTING INFORMATION ACCESS

BIBLIOTECH

LIBRARY SOFTWARE SYSTEMS

April 22, 1982

Dr. Jose Marie Griffiths
Senior Research Associate
King Research, Inc.
6000 Executive Blvd.
Rockville, MD 20852

Dear Dr. Griffiths:

In response to your request for more information on Bibliotech I am enclosing our most recent brochure and a current price list (which is about to be updated).

In addition, I am enclosing a brochure for the underlying data base management system, DRS. A Bibliotech user has the use of DRS search capabilities and ad hoc reporting using the DRS command language. Because the system is implemented using this DBMS, both enhancements and special report requirements are quickly and easily handled by Advanced Data Management.

Specifically, the letter which we received from Janine Reid mentions that a direct interface with OCLC is required. We currently have a tape interface capability for loading OCLC tapes. The programs used to load the OCLC data, however, must be customized to meet the particular needs of each library. Depending on the requirements of the users the amount of programming will vary; our billing rate for such work is currently \$50/hour.

The "black-box" capability is one we are interested in developing and we would look forward to working with you on this project, possibly on a time and materials basis.

Circulation control is now a feature of the integrated Bibliotech system. The periodicals control and acquisition systems are now in the development/initial testing phase. We are optimistic about a release of fully tested versions of acquisitions and periodicals control modules by the end of the third quarter or late 1982. We will, of course, notify you when these modules are ready for the market.

You will note that Bibliotech runs on IBM hardware in a batch mode at present. We recommend using Bibliotech in the current batch mode when the library wishes to load an already machine-readable data base. The on-line interactive version of Bibliotech in the IBM environment should be

* A PRODUCT OF ADVANCED DATA MANAGEMENT

page 2...bibliotech/damans

available by the end of 1982. Again, we will keep you informed about that configuration.

With regard to pricing, two important items which are not included in the purchase prices are maintenance after the first year and training charges. Maintenance for one year is included in the purchase price. Thereafter maintenance costs are ten percent of the then current purchase price per year.

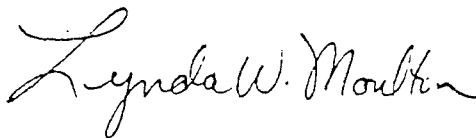

Training charges are \$325/day on-site with the user. As little as one day of training for start-up and two days following that after a month is sufficient in some libraries. However, the appropriate amount of training required in any library depends on many factors such as the complexity of the cataloged materials, the prior experience of the professional and clerical staff, as well as the number of people being trained. Two sets of documentation are included in the purchase price.

Comstow Information Services provides consultation services relating to total library systems design including recommended practices for interfacing with the automated system, work procedures, cataloging and indexing methods and specifications and personnel requirements. We have observed that most libraries which automate have little understanding of the periferal impacts the new system will make on the total operation. We can provide the services to help make the transition much easier.

We have reviewed your requirements for each of two installations. More detail would be required to answer with certainty but we believe that Bibliotech represents a viable and attractive system for those installations.

We look forward to receiving any RFPs which are developed and we will certainly keep you informed about the progress of new Bibliotech products.

Sincerely yours,

Lynda W. Moulton

LIBRARY SOFTWARE SYSTEMS*

JUN 21 Recd

BIBLIOTECH ANNOUNCEMENT

June, 1982

Advanced Data Management and Comstow Information Services are pleased to inform you of the latest developments in BiblioTech's price schedule and features.

In our new price schedule we have attempted to make it easier for the small special library to automate. The new micro computer versions of larger mini and super-mini computers, such as DEC's PDP 11/24 and VAX 11/730, are now affordable and more cost-effective. At less than half the price of BiblioTech on mainframe computers, BiblioTech on these small computers becomes possible for the smallest libraries. For example, you will see that BiblioTech can cost as little as \$350 a month, on a five year lease/purchase.

We have also determined that it is much easier to implement a "single-user update" system. Consequently, another price advantage is given which would benefit the smallest libraries. Note that in the "single-user update" installation, though only one terminal may be used for data entry at one time, many terminals may be used for searching and running reports during data base updating.

Our new price schedule is enclosed. Please note that three modules, catalog maintenance, authority control, and browsing, are now sold as a single package, Basic BiblioTech. Lease/Purchases and Rentals are also detailed.

Recent enhancements to BiblioTech include:

- Simple report generation from menu selection
- Cataloging of periodicals and monographic series
- Backwards, as well as forwards, browsing
- Scanning borrowers by name, as well as ID

Work on the Periodicals control module and the Acquisitions module is progressing on schedule. In our latest design we intend to support both the needs of the Copyright Clearance Center and the Book Industry Systems Advisory Committee (BISAC) standards for automated acquisitions.

As you move forward with your plans for automating we hope you will give BiblioTech serious consideration. Please call if you have questions about our new pricing policy or about specific needs you might have which are not addressed in our literature.

We look forward to hearing from you.

BIBLIOTECH LIBRARY SOFTWARE SYSTEMS

BIBLIOTECH PRICE SCHEDULE

June 6, 1982

The price of Bibliotech reflects the size and power of the host computer. We have divided the computers on which Bibliotech runs into five price classes. Additionally, Bibliotech is priced higher for the version which supports more than one user updating the data base simultaneously. Note that even in the single user update system, more than one user can be searching the data base at the same time.

Class A: PDP 11/23; PDP 11/24; PDP 11/34

Basic Bibliotech	
Single user update.....	\$10,000
Multi-user update.....	13,000
Circulation system.....	2,000

Class B: PDP 11/44; VAX 11/730

Basic Bibliotech	
Single user update.....	\$15,000
Multi-user update.....	20,000
Circulation system.....	3,000

Class C: PDP 11/70; VAX 11/750

Basic Bibliotech	
Single user update.....	\$20,000
Multi-user update.....	27,000
Circulation system.....	4,000

Class D: VAX 11/780; IBM 43xx

Basic Bibliotech	
Single user update.....	\$25,000
Multi-user update.....	33,000
Circulation system.....	5,000

Class E: IBM 30xx & 370 series

Basic Bibliotech	
Single user update.....	\$30,000
Multi-user update.....	40,000
Circulation system.....	6,000

* A PRODUCT OF ADVANCED DATA MANAGEMENT

Extended Purchase Option(EPO)

Bibliotech provides an Extended Purchase Option which allows payment for the system to be extended over time. As with an outright purchase, the Extended Purchase Option provides maintenance, enhancements and hotline support for one year. The payment factors listed below, when multiplied by the system price, yield the monthly payment.

<u>EPO term in months</u>	<u>Payment factor</u>
24	.057
36	.045
48	.039
60	.035

At any time an EPO contract can be converted to an ordinary purchase by paying 2/3 of the remaining payments.

Rental

Bibliotech may be rented subject to the following terms:

- One year minimum rental
 - The monthly rental is .045 times the price of the system
 - If a rental contract is converted to a purchase, credit will be given for 1/3 of the payments made, up to a maximum of 50% of the system price.
-

Purchase, EPO and Rental prices include:

- tape of system and installation instructions
- maintenance and enhancements for one year
- hotline services
- Bibliotech documentation - one set
- Initialization of Bibliotech control and data validation tables for the user's environment

Sales Notes

- Bibliotech modules are sold for use on a single CPU and may not be installed elsewhere without the written permission of ADM.

(cont'd.)

page 2...biblio. prices

Extended Purchase Option(EPO)

Bibliotech provides an Extended Purchase Option which allows payment for the system to be extended over time. As with an outright purchase, the Extended Purchase Option provides maintenance, enhancements and hotline support for one year. The payment factors listed below, when multiplied by the system price, yield the monthly payment.

<u>EPO term in months</u>	<u>Payment factor</u>
24	.057
36	.045
48	.039
60	.035

At any time an EPO contract can be converted to an ordinary purchase by paying 2/3 of the remaining payments.

Rental

Bibliotech may be rented subject to the following terms:

- One year minimum rental
- The monthly rental is .045 times the price of the system
- If a rental contract is converted to a purchase, credit will be given for 1/3 of the payments made, up to a maximum of 50% of the system price.

Purchase, EPO and Rental prices include:

- tape of system and installation instructions
- maintenance and enhancements for one year
- hotline services
- Bibliotech documentation - one set
- Initialization of Bibliotech control and data validation tables for the user's environment

Sales Notes

- Bibliotech modules are sold for use on a single CPU and may not be installed elsewhere without the written permission of ADM.

(cont'd.)

page 3...biblio. prices

Sales Notes, Cont'd.

- Training (see following)
- Prices and particular design features are subject to change without notice.
- After the expiration of the one-year warranty period maintenance contracts to provide hotline support, maintenance and enhancements are available on a yearly basis for %10 of the then current system price.

System Description

Basic Bibliotech performs three powerful functions:

Monograph Catalog Maintenance -- The online ability to add, modify and delete catalog entries for books, book analytics, reports, periodicals, monographic series and journal articles. Full catalog searching on either inverted indexes or on the full text of any field with full Boolean logic. Numerous output reports such as shelf lists, author (corporate or personal), title and subject heading indexes.

Monograph Authority Control -- The online updating of corporate author and subject headings authorities. Dynamic checking of new or modified catalog entries against the authority file. Online scanning of the authorities. Immediate global update of entire data base when an authority term is modified. Provisional authorities are permitted.

Browsing Module -- The library user may inspect the catalog's contents online. The catalog is accessed with any of ten indexes selected by the user. Further, the module allows the user to inspect the short or full citations as well as the status of all copies of particular titles. Holdings records of periodical subscriptions may be viewed.

The Circulation System is not included in the Basic Bibliotech package though it requires the Basic BiblioTech package as a means of entering the records of items to be circulated.

The Circulation System provides the ability to charge, discharge and hold items for any valid user. The status of all materials and user records is available online. Automated production of overdue notices, borrower reports and inventory reports is included in the Circulation System.

Other Services

Computer Systems Consulting

Consulting services for design and programming of custom reports or other enhancements to the Bibliotech system is available at \$60/hour. Fixed rates for these services (cont'd.)

page 4...biblio. prices

Computer Systems Consulting, Cont'd.
may also be quoted.

Library Systems Consulting

Consulting services for library automation planning, indexing and abstracting services, thesaurus construction and conversion of card files supervision is available at \$50/hour, plus travel expenses as required, from Comstow Information Services.

Training

Training is provided by Comstow Information Services. Onsite training is \$325/day including expenses. Length of training is variable depending on requirements of the organization. Typical training might last two days for start-up with a subsequent training period of two days for learning sophisticated features of DRS. Training at Comstow Information Services is \$250 for two. Special arrangements may be made for additional trainees.

Two copies of the user manual and training materials are included in the training fees and additional copies are available for \$50/set.

Documentation

Additional sets of the user documentation are available for \$50 each from Comstow Information Services.

Timesharing

Timesharing services and the use of Bibliotech on a timeshared basis is possible. Interest in such arrangements should be brought to the attention of Advanced Data Management.

Rockville, Maryland 20852

Dear Dr. Griffiths:

Enclosed please find a sample configuration for installations X and Y. I have proposed the same basic configuration for both examples and, of course, terminals can be added or deleted. The system proposed can more than adequately meet the needs of both installations combined. I am enclosing a sample brochure for the planned ALIS II-S System which would be a more realistic price for each installation were they to remain separate.

All training and documentation as well as all software enhancements are included in the cost of the system. I hope this information proves helpful.

Sincerely,

Barb Lamolinara

King Research, Inc.
6000 Executive Boulevard
Rockville, MD 20852

Dear Dr. Griffiths:

This letter, along with its attachments, is a description of the Inforonics' Library Automation System, and a budgetary estimate of its costs based on the data provided in your 13 April 1982 letter. I realize you needed this data by May 5th, but in a call to your office, Ms Nancy Roderer told me it would be acceptable if mailed today. If you use this information would you please state clearly that the cost estimate is budgetary.

The system as proposed is hardware and software which runs on a Digital Equipment Corporation DEC-2020. It performs all of the functions described in the enclosed literature. The system is in continuous development so additional functions required in your letter will be installed in the future. It presently has an OCLC link.

We would be pleased to provide more details on a configuration to match your cooperating technical processing requirements when you can provide a more detailed description of the system requirements.

The budgetary estimate for cooperative system "x" and "y" follow:

	x	y
Software including installation	\$150,000	\$150,000
Hardware including storage and printer	250,000	300,000
Terminal and communication	35,000	38,000
Training costs	<u>9,200</u>	<u>9,200</u>
TOTAL	\$444,200	\$497,200
Software Maintenance	\$ 2,000/mo	\$ 2,000/mo

Dear Dr. Griffiths:

Helen Hughes passed your request-for-information for the U.S. Army Libraries' Technical Processing Centers for reply.

The enclosed response refers to the OCLC Local Library System, Version I (LLS/I) developed from the Claremont Total Library System (TLS) only.

OCLC is also developing another local library system (LLS/II) and I am enclosing two copies of an overview and a sample patron notice to serve as a general introduction to the system. This system will be developed in three phases, the first of which will handle circulation functions, and will be available later than TLS.

We look forward to working more closely with you and your clients as we have more information to share.

Sincerely yours,

Pauline F. Micciche

July 7, 1982

Ms. Jose Griffiths
King Research, Inc.
6000 Executive Boulevard
Rockville, Maryland 20852

Dear Ms. Griffiths:

Enclosed are our cost estimates for installing the Lister Hill Integrated Library System at two sites as per your specifications.

The estimates are based on the following assumptions:

1. Library size estimates are as stated in the specifications.
2. The libraries will procure basic 2 disk drive systems, adding more storage only when the size of the machine readable files justifies it. The storage proposed will support all system files plus 185,000 full MARC records with full indexing and authority control, or more with smaller records (e.g., technical reports) or less indexing or authority control.
3. All central computer room equipment (i.e., CPU, disk storage, tape drive, controllers, communications units and console printer) is purchased new and from a single vendor.

If the libraries so desire, and if competent hardware maintenance sub-contractors are available at each site, then some money can be saved by procuring mixed vendor equipment.

Online Computer Systems is very flexible regarding all procurement and support policies and can provide whatever specific hardware, support and custom enhancement features requested by the libraries.

All cost elements are listed separately. All prices are quoted list, as of this writing. Since the two sites are very similar in requirements, a full listing is produced only for one site (7 libraries, 14 terminals). Cost estimates for the second site (8 libraries, 15 terminals) are shown as Site 1 costs plus additional costs for extra items.

ONLINE Computer Systems, Inc.

July 7, 1982

Page 5

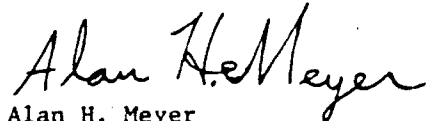

As you may know, Online Computer Systems, Inc. is already committed to providing ILS support to the Federal Government in general and the Department of Defense in particular. Online is the primary contractor to the National Library of Medicine for development of the system. We have also been supporting the Army Library Pentagon with both maintenance and new development since the beginning of the Army's live operations.

We are currently installing the ILS at the Naval Research Laboratories Library in Washington, D.C., and we also have the first academic library installation up and running at the University of Maryland.

Bill Ford (original author of the internal system design) and I have worked with the DoD and the ILS since the early days of the project, when we were both at Lister Hill. We believe that our company has a solid record of competence, competitiveness, and proven performance in ILS support.

Please call me if we may be of any further assistance.

Sincerely,

Alan H. Meyer
Director, Information Systems
