PREFACE

This study was made in partial fulfillment of Contract #DACW09-81-0-0016 between Archaeological Resource Management Corporation (ARMC), and the United States Army Corps of Engineers, Los Angeles District. It was conducted at the Mission Santa Barbara Archive - Library where Father Virgilio, Wilfred Robbins, M.D., and Crescencia Olmstead were most gracious and helpful hosts at all times. Research assistants Joanna Cramer, Kristina Kennann, and Joanne Kvamme provided invaluable help in recording data, and Kennann entered the prepared data into ARMC's Apple 11 computer, with initial assistance from Larry Allen. Ruth Almstedt prepared the village synomymy, and John Johnson and Chester King provided some of the locational information. Moises Hernandez translated problematical passages, and the entire first baptism entry. John Johnson was particularly helpful from the beginning to the end of the project, sharing generously his time, knowledge, and encouragement. Thanks to all of these people, and to several others who also contributed, the enormous job of indexing the Gabrielino entries of the Mission San Gabriel registers was made possible.

INTRODUCTION

The purpose of this study is to provide data from the Mission San Gabriel registers in a format which will be useful to researchers interested in the Gabrielino Indians at the time of their first intense contact with Western culture, i.e., during the years of Spanish missionization in California.

The Portola-Serra expedition arrived in San Diego in 1769, marking the beginning of the extension of the Spanish Empire into Alta California. The expedition had two primary assignments, the first of which was a politico-economic response to the presence of the Russians at Fort Ross and to the fear of their further movement southward. The second was religio-economic, to establish missions to provide a place to which the local Native Americans would be gathered to be converted to Christianity, to learn the rudiments of ranching and farming, and to aid the Spanish in such economic activities as hide tanning and tallow rendering.

As part of the missionization process, the priests kept several kinds of records, some of which the mission registers in particular contain valuable information on California Indians of the late 18th and early 19th centuries. These registers can provide demographic information of direct use to archaeologists in their analysis of particular protohistoric and early historic sites (e.g., population estimates of a particular village, ties to other villages, the date at which a village was reduced or incorporated into the mission, etc.). The registers also contain data which can be used to reconstruct many aspects of the social, political, and economic organization of the Indian people associated with the mission, such as the composition of descent groups, marriage patterns, economic ties, etc.

Although the data presented in this study are extensive and may serve a variety of other purposes, they were chosen with archaeological analysis in mind.

Mission registers consist of records of baptisms, confirmations, marriages, deaths, and padrons or censuses of the Indians and non-Indians associated with a particular mission. In the Mission San Gabriel registers, for example, records of Indians from today's Baja California (then called Antigua California by the Spanish), of Indians baptized at other missions (and therefore, by definition, not Gabrielino) or from areas served by other missions, of gente de razon ("people of reason", i.e., "civilized" people or non-Indians), and of the priests themselves are mixed in with those of the Gabrielino.

The baptism registers from Mission San Gabriel consist of three books. The first entry is the most elaborate, and is presented below in Spanish, followed by the English translation.

Fernando Salvador de los Santos de la Ranchería del llano soldado S^{n} Francisco Guiichi 1	En el año de Señor de mil setecientes y setenta y uno, el día viente y siete de Nobiembre. Bautize solamente en la Yglesia de esta Misión de San Gabriel Arcangel á un parbulo de edad de dos á tres años, que afrecieron sus Padres Gentiles al Sto. Bautizmo, libre y espontaneamente: fue el Primero, y le puse por nombre Fernando Salvador de los Santos: fue su Padrino el Sr. Francisco Miguel Aguiar Monzano, Cabo de la escolta de esta Misión, a quien advertí sus obligaciones, y por no saber el nombre de sus padres, no lo pongo, pero es conocido bulgarmente el Yndio por el nombre del Interprete, por haber sido este el primero que empezó a explicarnos, algunes vocables de su lengua es de la Ranchería que esta al oriente fue esta Misión en un llano serrado de agua por todas lados, parece que en la lengua llaman a esta Ranchería los Yndios,

Gui-chi, y para que mejor se conosca le puse por nombre a dicha Ranchería S[n] Francisco Guichi, y para que conste así lo firmo en el sobre dicho día, mes y ano.

Fr. Joseph Angel Fernandez de la Somero
Indigne Ministro de esta Mision

Fernando Salvador of the Saints from the Rancheria of the plain (or field) (of) soldier San Francisco Guiichi

In the year of (the) Lord, one thousand seven hundred and seventy-one, the 27th day of November, I solemnly baptized in the church of this Mission of San Gabriel Archangel a young male of two or three years, whose gentile parents presented for Holy Baptism freely and spontaneously: he was the first, and I gave him the name of Fernando Salvador of the Saints: his godfather was Mr. Francisco Miguel Agui(l)ar Monzano, chief of the guard of this Mission, whose obligations I made clear,and not knowing the name of his parents, I do not include it, but the Indian (i.e., the father of the child) is popularly known as the Interpreter, for having been the first who began to explain a few words of his language to us (.He) is from the Rancheria which is located to the east of this Mission in a field surrounded by water from all sides (.) It appears that in the(ir) language the Indians call this Rancheria Gui-chi, and so that it may be better known I have named the said Rancheria San Francisco Guichi, and so that it may be made evident, I write it thusly on said day, month, and year.

Fr. Joseph Angel Fernandez de la Somera
Indigne
Minister of this Mission

Succeeding entries are briefer, but maintain the same format. The margin note always includes the baptismal number and name, usually includes whether child or adult, and often includes the birth village or village of current affiliation. The text provides, to a greater or lesser extent, the following: the date, place, and status of baptism (i.e., a "regular" baptism, or one

performed for a very ill or dying person); Christian (baptism) name; Indian name; age and sex of the individual; place of birth; father's name and village; mother's name and village; status of parents (gentiles or neophytes); names and relationship of other relatives; whether or not the individual is legitimate in the eyes of the Chruch; name and place of residence of the godparent; name of baptizing priest; and miscellaneous secular and sacred information.

The marriage register (two books) contains names of villages of bride and groom, of deceased spouses, of relatives, of witnesses, and the name of the officiating priest. Marriages are classified as native marriages confirmed in a Church ceremony, or as marriages not previously recognized by the Indian people.

The death register (two books) contains the names of individuals associated with the mission at the time of death, and occasional reports of deaths of Gabrielino who were baptized at Mission San Gabriel but who were associated with an outlying rancho or another mission at the time of death. Again, basic information on the individual concerned and his relatives (consanguineal and affinal) are included, and circumstances of death (e.g., killed by a bear) are included if unusual. Place of ceremony and/or burial is also mentioned.

Other registers for Mission San Gabriel are one book of confirmations and one remaining padron, or census. The confirmations were examined briefly, but not indexed. The entries are relatively brief, and do not seem to provide data useful to this study. The one extant padron is relatively late (1824) and is useful for providing data to fill the gaps from the other registers.

THE DATA

Over 7000 baptisms were recorded by the Spanish at Mission San Gabriel prior to secularization, and 6589 of them are presented in this study, covering the time between establishment of the Mission in 1771 through 1820. The data are presented primarily as an index to the baptism register, with information from the marriage and death registers incorporated when possible. These latter entries are inconsistent, but many include the baptism number of the individual referred to. Birth and death entries have been reconciled, and there should be almost 100% accuracy of those data. (Occasionally there are two different death notices for the same baptism number, both of which have the correct name. When additional information is provided in both entries -- such as the names of parents or spouse -- it is possible to make a determination, but this is not always the case). Other data presented are not cross checked. Some can be checked internally, as the examples below illustrate.

Baptism numbers 1361 and 1397 have the following information:

#	Age at Birth of Child #1	Child #1	Child #2	Child #3	Death Info.	Comments
1361	27	5434	5759	6241	Died 12/31, at mission	A widow at death
1397	30	5434	5759	6241	Died 2/25, at mission	--------

With or without marriage data, it is possible to ascertain that more likely than not, the baptism numbers of the children are probably accurate, that 1361 and 1397 were married to each other, and that 1361 is the widow of 1397 at the time of her death.

THE FORMAT

The data are presented in columnar form. The first column gives the individual's baptism number, the second the data of baptism by month and year. (Since the time span is less than a century, the first two numbers of the year are omitted). The third column indicates the sex of the individual, and the fourth is the age, in either absolute or relative form. Absolute ages are based on estimates by the recording priest. Babies said to be less than six months old are listed as RN (recien nacida, or recently born), those over six months as one year old. If a younger-older age is given (such as six or seven), the younger age is recorded. Relative ages are RN (defined above), PO/PA (parvulo/a), NO/NA (niño/a), MO/MA (muchacho/a), all of which refer to a child up to approximately ten years of age, and AD (adulto/a), or adult, ten years or older.

Villages are listed in coded form (see Appendix 1) in column five. Status of baptism ("+" for a "regular" baptism, "-" for a baptism performed in casu necessitatis or in articulo mortis, i.e., in an emergency or at death) is shown in column six. Columns seven and eight are for madre (mother) and padre (father). Entries in these columns may be GEN (for gentile, or non-Christian Indian), NEO (for neophyte, or baptized Indian), D (for deceased), UNK (for unknown), or baptism numbers (unverified as to their accuracy). Columns nine, ten, and eleven are for relatives, with relationship to the baptized individual indicated by H (hermano/a, sibling) or N (niño/a, child).

Marriage information is shown in columns twelve through seventeen. Columns twelve and fifteen have the (usually verified) baptism number of spouse numbers one and two, columns

thirteen and sixteen, the date of the marriage ceremony, and columns fourteen and seventeen the village association of the baptized individual at that time.

Columns eighteen through twenty show estimate age at death, date of death (month and year), and village association at the time of death. The last column contains miscellaneous information gleaned from baptism and death entries. CPTN stands for capitán; preceded by P, it means that the baptized individual's father is capitán of the village listed, and preceded by SP, it means that the spouse is capitán. CC is the abbreviation for casada con, or married with or to, and the numbers immediately following are the baptism number of the spouse (if known; four zeroes are used if unknown). The second set of numbers is the date that information was recorded in either the baptism or -- more frequently -- the death entry. VO/VA stands for viudo/a or widow/widower, and the numbers following are as with the entries. SO/SA is the abbreviation for soltero/a, or single. LR, followed by a date, means that last rites were administered at that time. TWIN is self-explanatory, and Toypurina is the famed leader of the unsuccessful revolt at Mission San Gabriel in 1785.

The Comments column sometimes contains data which appear to belong in columns seven and eight. This occurs when the information has been obtained from the death entry, and the corresponding baptism record is missing.

Baptism numbers were sometimes used twice, or were skipped altogether. There are two gaps in the entries, the first of which is between numbers 2460 (the end of Book 1) and 2549 (the beginning of Book 2). The second gap is between 6294 (the end of Book 2) and 6559 (the beginning of Book 3). Some data on these

individuals is found in other registers, and has been included in this study. Other, shorter gaps also occur, the result of the removal of individual pages. One such page is at the Bancroft Library, and data from it are included, with UCB noted in the Comments column.

Non-Gabrielino are indicated as such by the abbreviations JNO (Junaneño), LSNO (Luiseño), DGNO (Diegueño), FNDO (Fernandeño), or GRAZ (gente de razon). Locations other than villages are indicated by MSG (Mission San Gabriel), MSF (Mission San Fernando), MSLR (Mission San Luis Rey), MSJC (Mission San Juan Capistrano), and RSB (Rancho San Bernardino).

ANALYSIS OF MISSION REGISTER DATA: CUCAMONGA

A brief, low-level analysis of those individuals associated with the village of Cucamonga, as shown in the Mission San Gabriel registers (see Appendix II), is herein provided to demonstrate some of the possible uses of the index.

The first baptism was in January of 1785, thirteen and one-half years after the first baptism at Mission San Gabriel. A total of 115 individuals' baptisms were recorded between 1785 and 1820. Figure 1 shows the yearly totals, and subsequent figures show the yearly totals by relative age (i.e., child or adult) and sex (Table 1 & Fig. 2). There is no year during which a large number of individuals from Cucamonga were baptized, and this fact combined with the relatively late date of the baptisms provides evidence that Cucamonga was located some distance from the mission (a fact known also from other data). (Villages closer to the mission were reduced much earlier than outlying villages, and the number of individuals baptized at one time were frequently high; see the first two pages of the Index, for examples).

Deaths are first recorded for Cucamonga in 1785, and there is no one year during which an unusually large number of persons died. (It is possible, of course, that many of the villagers died, from introduced diseases prior to the first baptism is 1785). Seven individuals were baptized in danger of or near death, and five of them died shortly thereafter, one lived eleven years, and death details are unknown for one. It can be speculated that this last individual -- the mother of a newly born daughter who died the same month she was born -- survived past her baptism age of twenty-five (Table 2).

TABLE 2: Deaths: Mission San Gabriel -- Individuals From Cucamonga.

Most individuals for whom there is information in age, date, and place of association at death were still associated with Cucamonga (47) at death, six were associated with Mission San Gabriel, and one each with the following villages: Amuscopiabit, Chajaibit, Guapiana, Jutucunga, Tobimobit, and Tooybina. There does not seem to be any particular pattern to these non-Cucamonga associations: five of the six at the mission were male, and two of the remaining six were also male (at Guapiana and Tooybina).

Marriage data are sparse, and show only that eight marriages occurred between individuals both of whom were affiliated with Cucamonga, and that one each took place between a Cucamonga person and one from Amuscopiabit, Apuritaimbit, and Gaupiana.

Based on the Cucamonga index, then, the following can be stated: the village of Cucamonga was brought into the Mission San Gabriel system relatively late, the village was only partially incorporated into the system (evidenced by residence at time of death), there may have been ties to at least seven other villages (but spouses from other villages might have been met at the mission), and Cucamonga village seems to have been relatively large. Any other statements would require research into the history of the mission, the development of additional computer programs for additional data manipulation, or additional, very detailed mission register research (e.g., piecing together genealogies).

APPENDIX I

Village Synonymy and Code

GABRIELINO, SERRANO, AND ALLIKLIK RANCHERIAS NAMED IN THE MISSION SAN GABRIEL REGISTERS

This list of rancherías is derived from Almstedt's (1981) analysis of Clemence's (1968) list of rancherías associated with Mission San Gabriel. It has been revised, based on comments from Johnson (1981) and King (1981), and on locational information found in the various Mission San Gabriel registers. Congruent with the index, Luiseño, Juaneño, and Diegueño rancherías are omitted. Noncongruent with the index, rancherías whose inhabitants were incorporated into the mission after 1820 (the end date of the index) are included. These names are included with the intent that the index be expanded at a later date.

The four letter abbreviation used in the index follows (in parentheses) the preferred spelling for each ranchería.

Ruth F. Almstedt
June 1981

SAN GABRIEL MISSION RANCHERIA NAMES

EXPLANATION OF THE TABLES

The first column contains names of the rancherias which are either Gabrielino, Serrano, or Alliklik, but exactly which cannot be presently determined. Additional columns are headed GABRIELINO, SERRANO, LUISENO, and DIEGUENO. Under these headings are listed villages which are reasonably certain to be of these cultures. There is no separate column for Alliklik because so little is known of that language that villages cannot be determined with any certainty.

If a rancheria has been located or identified in the literature, the source is keyed by an abbreviation. H = Harrington. J = Johnston. K = Kroeber. R = Reid.

For each rancheria, the first listing of preference is the simple locative, if it is included in the data. For Gabrielino this is -nga [-ŋa]. Under certain vowel situations it may be [-na]. [ŋ] is a velar nasal. This suffix indicates a place name.

Lacking this locative form, the next choice has the suffix -bit [-βit] with β being a bilabial fricative. The suffix -pit would be third choice. The approximate meaning of this suffix is "from such and such a place" or "native of." Synonyms are arranged these forms in more or less descending order of preference--in my opinion. Sometimes there is little choice.

No forms have been used which are not in the data, even when such a form has been cited elsewhere or is certain to exist.

Tomijaibit (TOMJ) Tomijaivit Thomijaivit Tomijavit Tomajabit		

GABRIELINO, SERRANO OR ALLIKLIK

Jujuibit (JUJI)
- Jujuitbit
- Jujuvit
- Jujubit

Junubabit (JUNU)

Jonaumogna (JONA)
- Junalmonat
- Junaumona

Mairobit (MAIR)
- Mayrobit

Mapitbit (MAPI)

Mopibuit (MOPI)

Naasin (NAAS)
- Naasin
- Nahasin
- Nasin

Nonobit (NONO)

Nosabit (NOSA)

Pabocoya (PABO)
- Pabocrobiat

Pachechorobit (PACH)
- Pachestrorobit
- Pachectprovit
- Pachehero

Paobeatam (PAOB)

Paorbia (PAOR)

Papiana (PAPI)
- Papiabit
- Patpiabit
- Papaxabit

GABRIELINO

Jautbit (K,R) (JAUT)
- Jautvit
- Jautibit
- Jautivit
- Jautubit

Juiunga (K) (JUIU)
- Juyunga
- Juuinga
- Juyùbit
- Juyùvit
- Juiubit
- Juiuvit
- Juùbit

Jujuabit (JUJU)
- Jububabit
- Guguavit

Jutucunga (K,R) (JUTU)
- Jutùcubit
- Jutòcubit
- Jutùcuvit
- Jutucubi
- Jutubit
- Utùcubit
- Otucbit
- Jutuncga

Mauvit (K,R) (MAUV)

Momomibit (MOMO)
- Momonivit

Paaymabit (PAAY)
- Paaimabit
- Paymbit
- Paimabit
- Pamabit
- Panaibit
- Pamaibit
- Pamiavit
- Panviavit
- Pumiabit

SERRANO

Guaaschna (J) (GUAA)
- Guaschna
- Guaaschpet
- Guaschpet
- Guaaspet
- Guachpet
- Guachspet
- Guahaspet
- Guhaaspet
- Jajasbit

Juruna (JURU)
- Jurupe
- Jurupet
- Juruppet
- Jurubabit
- Gurupet

Maromat (MARO)

Mujanian (?) (MUJA)

Najayana (NAJA)
- Najayabit
- Nayababit

Pajajanat (PAJA)
- Pajajana

Paracunat (PARA)

Topipana (TOPI)
- Topisavit
- Topipabit
- Tobpipabit
- Topisabet

Tupabea (?) (TUPB)

Tupaya (?) (TUPY)

Yucaipat (YUCA)
- Yucaipa

GABRIELINO, SERRANO OR ALLIKLIK	GABRIELINO	SERRANO
