Summary of the Military
Retirement System
As Of September 30, 1982

The military retirement system, as summarized below, applies to the Army, Navy, Marine Corps, and Air Force. However, most of the provisions also apply to retirement systems for members of the Coast Guard (Administered by the Department of Transportation), officers of the Public Health Service (administered by H.H.S.), and officers of the National Oceanic and Atmospheric Administration (administered by the Department of Commerce). The key provisions of the military retirement system are as follows:

- Non-disability retirement after 20 years of active service equal to (base pay) times (years of service) times (2 1/2%). There is a limit of 75% of base pay. Base pay is equal to terminal basic pay if retiree first became a member of the Armed Services before September 8, 1980. If the retiree first became a member of the Armed Services on or after September 8, 1980, base pay is equal to the average of the highest 36 months of basic pay.
- Disability retirement with similar provisions.
- Reserve retirement with parallel provisions.
- Optional survivor benefit protections for retirees and retirement eligible reservists.
- CPI adjustments for both retirement pay and survivor annuities.
- No contributions by the service members of the military services and no retirement fund, but reductions in member annuities when survivor benefits are elected.
- No vesting.
- Interrelationships with Social Security, Veterans Administration benefits, and other federal service.

Cost-of-Living Increases

All nondisability retirement, disability retirement, and most survivor annuities are presently adjusted annually for inflation. Cost-of-living (COLA) adjustments are scheduled to occur every twelve months, on March 1st, to be reflected in checks issued at the end of that month.

The cost-of-living increase effective March 1st is computed by calculating the percentage increase (adjusted to the nearest 1/10 of one percent) in the Consumer Price Index from the previous December to December.

Public Law 97-253 created a three year temporary deviation to the above calculation and timing of COLA's. In fiscal years 1983, 1984 and 1985, increases will take place in April, May and June, respectively. Full COLA's will still be calculated as before. Instead of a full COLA, in FY83 and FY85, nondisabled retirees under age sixty-two will receive 3.3% plus the total amount that the full COLA exceeds 6.6%, if any. In FY84, nondisabled retirees under age sixty-two will receive 3.6% plus the total amount that the full COLA exceeds 7.2%.

The Bureau of Labor Statistics publishes two Consumer Price Indexes: (1) a CPI for All Urban Consumers, and (2) a revised CPI for Urban Wage Earners and Clerical Workers. OMB has determined that the revised CPI is used in calculating military cost-of-living increases.

Non-Disability Retirement from Active Service

The current system allows voluntary retirement upon credit of at least 20 years of service at any age, subject to Service Secretary approval. The military retiree receives an immediate annuity calculated as 2 1/2% of base pay for each year of creditable service, subject to a maximum of 75% of base pay. Base pay is equal to terminal basic pay if retiree first became a member of the Armed Services before September 8, 1980. If the retiree first became a member of the Armed Services on or after September 8, 1980, base pay is equal to the average of the highest 36 months of basic pay. In calculating years of service, over six months' service is rounded up to a full year and less than six months' service is disregarded. Starting January of 1982, part of a year that is less than six months is disregarded and part of a year that is six months or more is rounded down to the nearest whole month actually served.

In FY82, 1.2 million non-disability retirees were paid \$13.2 billion.

Disability Retirement

If a military member is disabled, he/she is entitled to disability retired pay, assuming the disability is at least 30% (under a standard schedule of rating disabilities by the Veterans Administration) and either 1) the member has eight years of service; 2) the disability results from active duty or; 3) the disability occurred in the line of duty during a time of war or national emergency or certain other time periods.

In disability retirement, the member receives base pay multiplied by the larger of 1) 2 1/2% times years of service; or 2) percent disability. The benefit cannot be more than 75% of base pay. Only the excess (1) over (2) is subject to federal income taxes.

Members whose disability may not be permanent are placed on a temporary disability retired list and receive disability retirement pay just as if they were permanently disabled. However, they must be physically examined once every 18 months to determine any change in disability until a

final determination is made within five years. While on the temporary disability retired list, the member receives base pay multiplied by the larger of 1) 2 1/2% times years of service or; 2) percent disability with a minimum of 50% of base pay. Base pay is equal to terminal basic pay if retiree first became a member of the Armed Services before September 8, 1980. If the retiree first became a member of the Armed Services on or after September 8, 1980, base pay is equal to the average of the highest 36 months of of basic pay.

In FY82, 142,000 disability retirees were paid \$1.4 billion.

Reserve Retirement

It is also possible for members of the reserves to retire after 20 years of service, the last eight of which must be in a reserve component. Reserve retired pay, however, does not begin until age 60. If the reservist was first a member of the Armed Services before September 8, 1980, the retired pay (base pay) is based upon active duty pay scales for the member's grade in effect at the time the retired pay commences. If the reservist first became a member of the Armed Services on or after September 8, 1980, retired pay is based upon (base pay) the average basic pay for the member's grade in the last three years that he/she was a member of the Armed Services. The retired pay is computed as (base pay) times (2.5%) times (years of creditable service). The years of service is in turn determined using a point system, where 360 points convert to a year of service. Typically, a point is awarded for a day of service or a drill attendance, with 15 points being awarded for a year's membership in a reserve component.

Survivor Benefits

Legislation originating in 1953 provided optional survivor benefits later referred to as the Retired Serviceman's Family Protection Plan (RSFPP). The plan proved to be inadequate since the survivor annuities were never adjusted for inflation and could not be more than 50% of retired pay. RSFPP was designed to be self-supporting in the sense that member annuities were reduced so that the present value of the reductions would equal the present value of survivor annuities. However, no fund was involved.

RSFPP still insures those servicemen retired before 1972 who did not convert to the new plan and still pays survivor annuities. However, since September 21, 1972, RSFPP has been replaced by the Survivor Benefit Plan (SBP) for new retirees. Under SBP, member annuities are also reduced but the SBP is not a self-supporting program; its costs are shared by the Government and retired members. The survivor annuity is originally 55% of the member's base amount. The base amount is elected by the member but can be no less than \$300 (or full retired pay if the monthly pay is less than \$300) and no more than the member's whole retired pay. SBP annuities are adjusted with CPI increases, and integrated with Social Security and Veteran's benefits.

For reserve retirees, the same set of reductions provide coverage after the reservist reaches age 60 (when the reservist begins to receive retired pay). A second set of optional reductions (funded by the employee only) extend this coverage to the reservist who has enough service to retire but who has not attained age 60.

In FY82, 77,000 surviving families were paid \$389 million.

Relationship with Social Security

Beginning in 1957, military members on active duty have been full participants in the Social Security System. Payments from the two systems are additive. However, there is a Social Security offset for surviving spouses of SBP participants equal to 100% of the Social Security benefit attributable solely to military service. The offset provisions apply only to a spouse with one child and spouses over age 62 who are not working in Social Security covered employment. At no time can a Social Security offset be greater than 40% of the survivor annuity.

Relationship with Veterans Administration Benefits

The Veterans Administration provides compensation to service connected and certain non-service-connected disabilities. This annuity can be in place of or in combination with DoD retirement pay (nondisability), but is not additive. Since VA annuities are exempt from federal income taxes, it is sometimes to the advantage of a member to elect whatever VA benefits are available.

Veterans Administration benefits also overlap survivor benefits through the Dependency and Indemnity Compensation (DIC) program. DIC is payable to survivors of veterans who died from service connected causes and are deducted from the SBP annuity.

Interrelationship with Other Federal Service

For retirement purposes, no credit is given for other federal service, except where cross-service transferability is allowed. However, military service is generally creditable toward the Federal civilian retirement systems if military retired pay is waived. However, PL 97-253 requires a 7% contribution of basic pay received for future credit. Military service is not generally creditable under both systems (but is for reservists and certain disability retirees). Retired regular officers employed by the federal government lose a substantial portion of their retired pay while so employed. All retired members are subject to a combined ceiling equivalent to level V of the executive schedule.

Relationship of Retired Pay to Military Compensation

Basic pay is the only element of military compensation upon which retired pay is computed and entitlement is determined. Basic pay is the principal element of military compensation which all members receive; but it is not representative, for comparative purposes, of salary levels in the public or private sectors. Reasonable comparisons can be made, however, to basic military compensation (BMC). This is the base level of compensation received by members, and is the sum of basic pay, the quarters allowance (either cash or in kind), a subsistence allowance (either cash or in kind), and the federal tax advantage accruing to allowances, since they are not subject to federal income tax. Basic pay represents approximately 74% of BMC for retirement eligibles and 69% of BMC for the entire force. Since retired pay is a function of basic pay, the income replacement value of retired pay is significantly reduced through the design of the retired pay computation formula: that formula provides from 50% to a maximum of 75% of basic pay only for years of service over 20. As a percentage of preretirement income, as measured by BMC, the income replacement value is substantially lower. While a 20 year retiree is entitled to 50% of basic pay, that value is only 37% of BMC. Similarly, a 25 year retiree would be entitled to 62.5% of basic pay which is 46% of BMC.

The maximum a member can receive is 75% of basic pay, representing only 55% of BMC, regardless of the years of service thirty or above. Consequently, comparisons of retired pay to other retirement systems must recognize the percentage relationship to BMC rather than to basic pay only.
