FOREWORD

This report documents survey efforts undertaken at the direction of the Deputy Chief of Staff for Personnel, Department of the Army. Four specific requests were included in the general research requirement given ARI for the collection of information useful to policy makers in the management of the success of current recruiting efforts (Memorandum for Directors, ODCSPER, dated 16 Apr 82, Subject: Directors' Meeting - 16 April 1982; and letter (DAPE-ZBR), dated 28 Apr 82, Subject: Managing Success). The specific requests were:

- o Determine who is enlisting in the Army and why.
- o Who are the Category I-IIIa's, where do they come from?
- o Conduct attitude survey to determine why recent recruits joined and their propensity to remain in the service.
- o What recruiting practices/advertising are proving the most successful and why?

The 1982 DA Survey of Personnel Entering the Army was developed to answer these and other questions concerning the demographics and enlistment motivations of new Army recruits. Military personnel planners require such information to monitor current recruiting strategies and to forecast future enlistment and reenlistment trends.

This report addresses the general theme of the questions posed by the Office of the Army Deputy Chief of Staff for Personnel. This report and the companion Volume 2 are intended to serve as references for Army manpower analysis.

EDGAR M. JOHNSON
Technical Director

ACKNOWLEDGEMENTS

ARI acknowledges the cooperative efforts in fielding the 1982 DA Survey of Personnel Entering the Army of CPT Larry Davis of the Human Resources Development Directorate (ODCSPER, Department of the Army) and Mr. Richard Thompson of the Soldier Support Center--National Capital Region (TRADOC). Mr. Thompson's efforts in developing drafts of the survey are greatly appreciated. This survey effort could not have succeeded without the cooperation of the personnel of the US Army Reception Stations; their efforts in administering this survey are greatly appreciated.

The 1982 DA Survey of Personnel Entering the Army is partially based on the 1979 DoD Survey of Personnel Entering Military Service (Doering, Grissmer, & Morse, 1980a, 1980b). ARI especially wishes to thank Dr. Zahava Doering (now) of the Defense Manpower Data Center for sharing her expertise. Dr. Doering's review of early drafts of the 1982 DA Survey were extremely helpful.

ARI also wishes to thank the many people who reviewed the Original Form of the Survey and suggested revisions or additional topic areas for the Revised Forms (2 & 4) of the Survey. Reviews by LTC George Thompson of the Programs, Analysis and Evaluation Directorate at USAREC, CPT Larry Davis of ODCSPER, and Mr. Richard Thompson of Soldier Support Center were especially helpful. Mr. Tom Evans, Deputy Director of Advertising and Sales Promotion at USAREC, was very helpful in providing topic areas and information on advertising and for arranging input from N. W. Ayer. Mr. Lee Bucklin of 6th Army Headquarters was very helpful in providing sample questions for Reserve recruiting. ARI also wishes to thank MAJ(P) Tom Fagan and CPT Tom Daula of the Military Academy for their suggestions on economic background data.

Contributions to the production of the tables in this volume by Mr. Thomas Burnam, Ms. Vickay Ellison, Ms. Joyce Forrest, Mr. Rick Scott, and Ms. Kim Smith are gratefully acknowledged. Special thanks for care and diligence to Ms. Sandra Parham for proof reading this volume.

INTRODUCTION

The 1982 DA Survey of Personnel Entering the Army was developed to answer questions concerning the demographics and enlistment motivations of new Army recruits. Military personnel planners require such information to monitor current recruiting strategies and to forecast future enlistment and reenlistment resource needs. While there is an apparent need for such information on a regular and timely basis, we know of no effort to collect general information on enlistment decision making since the DoD Survey of Personnel Entering the Military was last administered in 1979. See Boesel & Richards (1982) for a review of major surveys on enlistment motivation since the end of the draft.

Military recruiting in the 1980's is dramatically changed from military recruiting in the late 70's. While Army recruiting in FY79 suffered one of the poorest years in both quantity and quality* since the end of the draft, the high quality of FY82 and FY83 Army recruits with no loss in quantity is unprecedented. Army personnel policy planners need to know who these recruits are and why they decided to enlist. This knowledge should facilitate efforts to capitalize on the current surge in high quality applicants. Four specific requests were included in the general research requirement given ARI in 1982 for the collection of information useful to policy makers in the management of the success of current recruiting efforts:

- o Determine who is enlisting in the Army and why.
- o Who are the Category I-IIIa's, where do they come from?
- o Conduct attitude survey to determine why recent recruits joined and their propensity to remain in the service.
- o What recruiting practices/advertising are proving the most successful and why?

The 1982 DA Survey of Personnel Entering the Army was designed in response to this research requirement. Three surveys were administered in this effort and are collectively referred to as the 1982 DA Survey of Personnel Entering the Army or as the 1982 DA Survey. The Original Form of the 1982 DA Survey was general in nature and was administered to new servicemembers in all Army components. Form 2 was specifically tailored for active duty service members, while Form 4 was directed to members of the Army Reserves and the Army National Guard. These three surveys, The 1982 DA Survey of Personnel Entering the Army, The 1982 DA Survey of Personnel Entering the Regular Army (Form 2), and The 1982 DA Survey of Personnel Entering the Army Reserves or National Guard

* We use here the generally accepted definition of 'quality' in military service applicants (i.e., high scores on the AFQT and having completed high school and received a diploma).

(Form 4), are the first in a series of enlistment decision making surveys being developed in the Personnel Utilization Technical Area of the Army Research Institute for the Behavioral and Social Sciences.

The data collected in this survey effort have already been used in a variety of contexts. The staff of the US Army Recruiting Command (USAREC) and the Office of the Deputy Chief of Staff for Personnel (ODCSPER) have used specific data for internal planning and in responses to inquiries from Congress. Specific content areas of the surveys have already been addressed in ARI working papers:

- The effects of Army recruiting initiatives on armed services' recruiting. PUTA WP83-1.
- Recognition of Army advertising themes by Regular Army recruits in 1982. PUTA WP83-4.
- Recognition of Army advertising themes by Army Reserve recruits in 1982. PUTA WP83-6.
- Enlistment motivation of Army recruits in 1982. PUTA WP83-7.

ARI researchers are continuing to use the data to address specific research questions, e.g. prediction of first term attrition based on enlistment motivation.

This report and a companion Volume 2 serve as an overview of the non prior service (NPS) regular (Active) Army results from the 1982 DA Survey of Personnel Entering the Army. This report presents the responses to each question in the surveys by gender, education, ethnic group, AFQT, and 1982 high school education status. Volume 2 reports breakdowns of each question by age at contracting, USAREC Regions, rural/urban background, term of enlistment, and enlistment incentive (Army College Fund, Cash Bonus, Both, Neither). Companion volumes for USAR non prior service respondents are also available.

The second chapter of this report is intended as an overview of the 1982 DA Survey. It summarizes the survey and describes the NPS Regular Army samples. The third chapter describes the development of the demographic variables and explains the table layouts. Responses to the Original Form of the survey are tabled in chapter 4, while chapter 5 contains tables for Form 2 of the survey.

These reports are intended to further familiarize Army manpower policymakers and researchers with the content of the survey data bases. As reference books these reports should serve to provide recent information on who is enlisting in the Army as well as why they state that they are enlisting. It is intended that these reports will stimulate interest in detailed analyses of specific policy concerns.

THE 1982 DA SURVEY OF PERSONNEL ENTERING THE ARMY

Technical aspects of the 1982 DA Survey effort are documented in a User's Manual and Codebook (Elig, 1983) which summarizes the survey design, sampling procedures, provides general technical information about the questionnaires, and describes the data base in detail. While basic information from the User's Manual is summarized below, readers of this report are referred to that Manual for technical details on the survey design and data handling.

Survey Development

The structure of the 1982 DA Survey is partially based on the 1979 DoD Survey of Personnel Entering Military Service (Doering, Grissmer, & Morse, 1980a, 1980b). Questions were selected from the 1979 DoD Survey, and as appropriate modified, to fit the purposes of the 1982 DA Survey. In taking this approach two major advantages were gained. First of all, by using previously tested items we avoided the necessity of a long developmental effort to insure items appropriate for the subject population. The other major advantage of this approach was that it insured the availability of a cross-sectional comparison group in the Regular Army recruits surveyed in 1979.

A major source of supplemental information was planned for the 1982 DA Survey. Individual survey responses can be matched by SSAN to computerized accession records in the MEPS Reporting System (MRS). Thus survey responses can be segmented by variables such as AFQT, length of the enlistment contract, and enlistment/educational bonuses received.

The Original Form questionnaire was quickly developed and implemented in order to provide as much information as possible in as short a time as possible. Because of very obvious and apparent differences in the recruiting environment since the last collection of information from recruits in the 1979 DoD Survey, updated information was needed in short order on the climate of 1982. Refinements were made in the questionnaires after meeting immediate Army personnel policy planners needs with the Original Form. Differences between the Original and Revised (Forms 2 and 4) questionnaires resulted from a decision to broaden the information base and refine items based on experience with the Original Form.

Survey Content

All Forms of the 1982 DA Survey were designed to collect information about enlistment motivation and personal background. All Forms were similarly structured and loosely followed the organization of the 1979 DoD Survey. Table 1 summarizes the information contained in the 1982 DA Survey by substantive content area. This table does not list every item in the 1982 DA Survey. However, every content area is listed and the table indicates which of the three forms contains the items. Content areas in the 1979 DoD Survey and in the MRS are also included for convenience when they overlap with 1982 DA Survey content areas. Content areas in the 1979 DoD Survey and in the MRS that do not overlap with the 1982 DA Survey are not listed in this table. (See MEPCOM Reg 18-5 for content of MRS records; and Rand Notes N-1605-MRAL and N-1606-MRAL,

NOTE: INFORMATION TYPES ARE LISTED IN THIS TABLE TO REFLECT THE CONTENT OF THE 1982 DA SURVEY OF PERSONNEL ENTERING THE ARMY. Other information is available in the MRS and from the 1979 DoD Survey; listings from these two sources are only for comparison to the 1982 DA Survey.

Doering et al., 1980a, 1980b, for full content of the 1979 DoD Survey.) Complete listings of items in the 1982 DA Survey appear in several forms in the Survey User's Manual (Elig, 1983). Each question in the Original Form and Form 2 surveys is also reprinted in this volume.

It should be noted in Table 1 that questions concerning enlistment motivation are included in both the Original and the Revised Forms. It should also be noted that the Revised Forms address different groups of recruits with somewhat different questions. The remainder of this report is concerned primarily with Regular Army recruits surveyed by the Original Form and by Form 2. Companion reference reports on Army Reserve recruits surveyed with the Original Form and with Form 4 are in preparation.

Survey Procedures and Sample

Administration and Sampling

The 1982 DA Survey of Personnel Entering the Army was administered to recruits in group settings during initial entry processing in U. S. Army Reception Stations. The Original Form was administered during the weeks of 3-7 May, 24-28 May, and 14-18 June to Army recruits processing for initial entry training in the Regular Army, U. S. Army Reserves, or Army National Guard. Form 2 was administered during the weeks of 12-16 July and 2-6 August to Regular Army recruits.

For the first survey period, 3-7 May 1982, all recruits processing through five of the seven US Army Reception Stations were surveyed. Because of a conflicting mobilization exercise, the other two stations were not available until the end of May. Recruits processing through all seven stations were surveyed during the other 4 weeks of the survey effort.

The population to be sampled with the 1982 DA Survey of Personnel Entering the Army was 1982 non prior service (NPS) accessions in the Regular Army, Army Reserves, and Army National Guard. To reduce administrative burden on the Reception Stations, the survey was given to all personnel processing through the Stations for initial entry training. This directive for blanket administration was also intended to reduce the possibility of unwitting sample biasing by survey administrators untrained in sampling theory and design. However, the possibility of sample biasing did arise at the Ft. Jackson Reception Station. This station requested and received permission to sample recruit companies rather than survey everyone being processed at the station. This exception was granted because the large number of recruits processed by the Ft. Jackson Station during the summer requires extremely tight scheduling of recruit and station personnel time. Station personnel were instructed to survey by recruit processing company and to favor infantry recruit processing companies in the selection process. At this time the result of this sampling strategy appears to be a slight oversampling of infantry recruits; this question will be addressed at length in a later publication.

Regular Army Samples and Representativeness

Our samples contain 3,281 and 3,037 Regular Army Non Prior Service recruits completing useable Original Form and Form 2 Surveys, respectively. Matching MRS records have been found for 96.6% of the Original Form RA sample

and 98.6% of the Form 2 sample. Thus, we have a very large data base even for analyses using MRS derived variables ($n = 3180$ for Original Form and $n = 2995$ for Form 2).

The sample sizes, our success in matching cases with MRS records, and the relatively low rate of nonresponse are all positive signs that the 1982 DA Survey effort has succeeded in capturing useful data about attitudes and motives that influence enlistment decision making. However, there are several aspects of the survey procedures that must be considered when interpreting the results. The usefulness of this data base lies much more in representing segments of the market rather than in a representation of all FY82 Army enlistments.

Data Inconsistencies and Case Deletion. Survey processing and data base construction is discussed in detail in the Survey User's Manual (Elig, 1983). As discussed in this manual a few cases have been removed who appear from MRS records to be Prior Service. Also, a few cases that do not appear to have useable information have been removed.

Seasonal Variation. The survey sampling covers only the second half of FY82. The impact of regular seasonal variation or other shifts in motivational patterns during the course of the year would seem to preclude a straightforward generalization of survey results to all of 1982. The possibility of seasonal bias is attenuated somewhat for Regular Army samples by the fact that we are dealing with accession rather than contract data. Regular Army recruits who are included in our survey signed enlistment contracts at various times of the year under the Delayed Entry Program (DEP). As can be seen in Table 2, over half of the sample contracted for enlistment at least four months prior to accessioning.

Sample Population. The DEP has made enlistment decision making a complex process of multiple decision points. For people who enlist in the DEP, enlistment decision making involves at least a decision to sign a contract and a decision to fulfill the contract and access. Our respondents were asked to report reasons for enlistment based on memory. The reasons given by our respondents for contracting are probably confounded with their reasons for accessing.

Thus the results of our samples of accessions from the second half of FY82 are best interpreted as indicative of the relative strength of motivations for enlistment in FY82 rather than as definitive of actual percentages of FY82 accessions motivated in certain ways. The major strength of this survey is in defining the motives of specific market segments. For example, this survey can be used to study the characteristics of recruits motivated by a desire to fund a college education. The timing of this survey is particularly good for the comparison of the motives of recruits recently graduated from high school with the motives of other recruits. This comparison is of particular importance for the Army Recruiting Command's efforts to penetrate the high school market.

HOW TO USE THIS VOLUME

This report and a companion Volume 2 serve as an overview of the non prior service (NPS) regular (Active) Army results from the 1982 DA Survey of Personnel Entering the Army. This report presents the responses to each question in the surveys by gender, education, ethnic group, AFQT, and 1982 high school education status. Volume 2 reports breakdowns of each question by age at contracting, USAREC Regions, rural/urban background, term of enlistment, and enlistment incentive (Army College Fund, Cash Bonus, Both, Neither). Responses to the Original Form of the survey are tabled in chapter 4, while chapter 5 contains tables for Form 2 of the survey. These tables are intended to further familiarize Army manpower policymakers and researchers with the content of the survey data bases. As reference books these reports should serve to provide recent information on who is enlisting in the Army as well as why they state that they are enlisting. It is intended that these reports will stimulate interest in detailed analyses of specific policy concerns.

The Tables

Each survey question is reproduced at the top of the left hand page; on that same page survey responses by gender and education are tabled. On the facing page responses are tabled by ethnic group, AFQT, and 1982 high school status. In most cases the response categories in the tables are represented by codes that match the responses in the question. Please note that the AFQT breakdown is not of all recruits; rather the breakdown of responses by AFQT includes only male high school diploma graduates (and/or postsecondary college experience). Tables of 1982 high school status contains only respondents with a high school diploma (and/or college experience). The only other restriction on the sample is that the respondents in all tables are NPS Regular (Active) Army accessions according to MRS records.

Appendix A presents the MRS codes (and for one variable, survey codes) used to assign demographic values for this report. Note that GED's are not distinguished from other NHSG's since there were only 11 GED holders in the Original survey Form (OF) sample and 14 GED holders in the revised Form 2 sample. All respondents coded in the MRS as being Hispanic are included in our Hispanic sample and are not included in the White, Black, or Other categories. High school status in 1982 is intended to distinguish between the two prime recruiting markets of high school seniors and high school graduates. The category of 1982 HSDG's is intended to identify recruits who contracted as seniors and then shipped after high school graduation. Recruits in this category are compared to HSDG's (with or without postsecondary education) who were not in school fulltime during the 1981-1982 school year and thus contracted after high school graduation.

Appendices B and C serve as indexes for both this volume and Volume 2. Appendix B lists each item in the Original Form of the survey and cross-references it to similar items in Form 2 and Form 4. Appendix C lists Form 2 items with cross-references to the Original Form and Form 4. Page numbers for both RA volumes are given for Original Form and Form 2 items in these appendices. These appendices also list page numbers for Form 4 items in the USAR volumes (in preparation).

Statistical Interpretation

The chi square test is printed for each table. A significant chi square indicates that the response pattern cannot be explained just by knowing how many respondents are in each category and how many of all respondents marked each response. A nonsignificant chi square indicates that the categories of respondents probably do not differ on the question. Because of the very large number of tables being looked at, statistical significance for this set of tables should probably be set at the .001 probability level. That is, chi squares with probability levels equal to or less than .001 should be taken as strongly indicating that the question responses do differ between the categories of recruits. At this probability level there is only 1 chance in a thousand that the chi square would be significant just by chance. If a probability level of .05 were used however, it would be likely that 50 of 1000 chi squares would be significant just by chance. While for a .01 level, it is likely that 10 of 1000 chi squares would be significant by chance. A good rule of thumb is that if the probability level is no larger than .01, preferably .001 or lower, and the responses fall into a meaningful pattern, then it is likely that there is a real difference in the way the categories of recruits responded to the item.

For 2 x 2 tables (2 rows and 2 columns) Yates corrected chi square is also printed. For these tables the Yates corrected statistic should be used.

RESPONSES TO THE ORIGINAL FORM OF THE
1982 DA SURVEY OF PERSONNEL ENTERING THE ARMY

Q67--EXPECTED SATISFACTION WITH ARMY

67. Based on what you know now,
how satisfied do you think you
will be with Army life?

Please use the scale below to answer this question. For example, people who expect to be Very Satisfied with Army life would mark 1. People who think they will be Very Dissatisfied with the Army would mark 7. Other people may have opinions somewhere between 1 and 7. Mark the number which shows how satisfied you expect you will be.

VERY
SATISFIED

VERY
DISSATISFIED

R66--MOST IMPORTANT REASON FOR ENLISTING

66. Which of these reasons is your MOST IMPORTANT REASON for enlisting? (Mark only one from the list below)

0. I was unemployed
1. To be away from home on my own
2. I want to travel
3. To get away from a personal problem
4. To serve my country
5. Earn more money
6. Family tradition to serve
7. To prove that I can make it
8. To get trained in a skill
9. Money for a college education

R67--EFFECT OF NO 2 YEAR OPTION FOR MOS

67. Suppose the job you signed up for
did not offer a 2-year option.
 What would you have done?

0. Does not apply to me. I enlisted for 3 or 4 years
1. Signed up for the same job anyway
2. Signed up for a different job in the Army whether or not it had a 2 year option
3. Signed up for a different job in the Army only if it had a 2 year option
4. Tried to join a different service
5. Not enlisted at all

RR71--EXPECTED SATISFACTION WITH ARMY LIFE

71. Based on what you know now, how satisfied do you think you will be with Army life?

Please use the scale below to answer this question. For example, people who expect to be Very Satisfied with Army life would mark 1. People who think they will be Very Dissatisfied with the Army work mark 7. Other people may have opinions somewhere between 1 and 7. Mark the number which shows how satisfied you expect you will be.

VERY SATISFIED							VERY DISSATISFIED

APPENDIX B

CROSS REFERENCE OF ORIGINAL FORM
TO FORM 2 AND FORM 4 ITEMS

The 1982 DA Survey of Personnel Entering the Army was administered in three forms. The Original Form was administered during the weeks of 3-7 May, 24-28 May, and 14-18 June to Army recruits processing through U. S. Army Reception Stations for initial entry training in the Regular Army, U. S. Army Reserves, or Army National Guard. Forms 2 and 4 were administered during the weeks of 12-16 July and 2-6 August to Army recruits processing through U. S. Army Reception Stations for initial entry training. Form 2 was administered to Regular Army recruits; Form 4 was administered to Army Reserve and Army National Guard recruits.

This appendix allows the determination of the items in the Original Form which also appear in Form 2 and/or Form 4. Table B lists the page number in both RA and USAR Volumes for each item in the order it appeared in the Original Form. Item and page numbers for Form 2 and Form 4 are included for similar items in these forms. (Page numbers for Form 2 items are only for RA Volumes; page numbers for Form 4 are only for the USAR Volumes, in preparation). Cross-referenced items may differ in wording and/or coding, however. While notes are provided to aid in cross-referencing items, users of this table are cautioned to compare the exact item wording and coding before comparing actual data.

TABLE B
CROSS REFERENCE OF ORIGINAL FORM
TO FORM 2 AND FORM 4 ITEMS

Variable Name (Page Number)				
Original Form	Form 2	Form 4	Notes	Item Description
STATION	STATION	STATION		Reception Station
DATE	DATE	DATE		Date survey completed (MMDD)
SSN	SSN	SSN		SSN
Q1	RS17	RS17		Army component.
Q2 (14)				Years of active duty commitment
Q3 (16)				Years of reserve duty commitment
Q4 (18)	R18 (174)	S18 (174)	a	Satisfaction with military job
Q5 (20)	R19 (176)	S19 (176)		Plans to try to become an officer
Q6 (22)				Enlistment for W0 flight training or OCS
Q7 (24)				Prior service enlistment history
Q8 (26)				Enlistment in Delayed Entry Program
Q9 (28)				Month/year enlisted
Q10 (30)	R20 (178)	S20 (178)		Plans after this enlistment
Q11 (32)	R21 (180)		a	Plans for service after active duty
Q12 (34)	R22 (182)	S22 (182)	a	Ease of attriting before ETS
Q13 (36)	R36 (210)	S36 (210)		T/F reason: unemployment
Q14 (38)	R37 (212)	S37 (212)		T/F reason: being away from home
Q15 (40)	R38 (214)	S38 (214)		T/F reason: a chance to better myself
Q16 (42)	R39 (216)	S39 (216)		T/F reason: travel
Q17 (44)	R40 (218)	S40 (218)		T/F reason: escaping personal problem
Q18 (46)	R41 (220)	S41 (220)		T/F reason: serving my country
Q19 (48)	R42 (222)			T/F reason: earning more money
Q20 (50)	R43 (224)	S43 (224)		T/F reason: family tradition to serve
Q21 (52)	R44 (226)	S44 (226)		T/F reason: proving I can make it
Q22 (54)	R45 (228)	S45 (228)		T/F reason: skill training
Q23 (56)	R46 (230)	S46 (230)		T/F reason: money for college education
Q24 (58)	R66 (270)	S66 (270)	a	Most important reason for enlisting
Q25 (60)				Second most important reason
Q26 (62)	R24 (186)	S24 (186)		Guidance counselor information on MOS
Q27 (64)	R23 (184)	S23 (184)		Recruiter information on MOS
Q28 (66)	RK33 (344)	SS25 (328)		Self report of cash enlistment bonus
Q29 (68)	RR34 (346)	SS26 (330)	a	Effect of no cash bonus for MOS
Q30 (70)				Sex

TABLE B (continued)

CROSS REFERENCE OF ORIGINAL FORM
TO FORM 2 AND FORM 4 ITEMS (continued)

Variable Name (Page Number)				
Original Form	Form 2	Form 4	Notes	Item Description
Q31 (72)				Age when surveyed
Q32 (74)				Self report of race
Q33 (76)				Self report of hispanic lineage
Q34 (78)	RR45 (368)	SS34 (346)		Size of place living when enlisted
Q35 (80)				Number of siblings
Q36 (82)	RR41 (360)	SS30 (338)	a	Number of siblings ever in military
Q37 (84)	RR42 (362)	SS31 (340)	a	Father/male guardian ever in military
Q38 (86)				Number of dependents (including self)
Q39 (88)	RR47 (372)	SS36 (350)		Total yearly gross family income
Q40 (90)	RR48 (374)	SS37 (352)	a	Family income from public sources
Q41 (92)	RR44 (366)	SS33 (344)	a	Number of friends enlisted in Army
Q42 (94)				Marital status when surveyed
Q43 (96)				Marital status at enlistment
Q44 (93)				Last lived with parents/relatives
Q45 (100)				Highest year of school completed
Q46 (102)				Highest diploma/degree attained
Q47 (104)				School enrollment when enlisted
Q48 (106)	RR46 (370)	SS35 (348)		Last fulltime school attendance
Q49 (108)	RR49 (376)	SS38 (354)		Grades made when last in school
Q50 (110)	RR50 (378)	SS39 (356)	a	Non high school votech/business school
Q51 (112)				Completion of votech/business courses
Q52 (114)	RR51 (380)	SS40 (358)		Votech/business school acceptances
Q53 (116)	RR52 (382)	SS41 (360)		College acceptances
Q54 (118)	RR53 (384)	SS42 (362)	b	Reason for Army rather than school
Q55 (120)	RR54 (386)	SS43 (364)		Educational aspirations
Q56 (122)				Plans to use VEAP
Q57 (124)	RR36 (350)		a	Self report of ACF
Q58 (126)	RR37 (352)		a	Effect of no ACF for MOS
Q59 (128)				Enlisted for money to further education

TABLE B (continued)

CROSS REFERENCE OF ORIGINAL FORM
TO FORM 2 AND FORM 4 ITEMS (continued)

Variable Name (Page Number)				
Original Form	Form 2	Form 4	Notes	Item Description
Q60 (130)	RR57 (392)	SS46 (370)	a	Number of employers since age 16
Q61 (132)	RR58 (394)	SS47 (372)	a	When last job ended
Q62 (134)	RR55 (388)	SS44 (366)		Employment status when enlisted
Q63 (136)	RR56 (390)	SS45 (368)		Alternatives if ineligible to enlist
Q64 (138)			d	Gross earnings month before enlistment
Q65 (140)				Income from public assistance
Q66 (142)			d	1981 gross earnings
Q67 (144)	RR71 (408)	SS66 (398)		Expected satisfaction with Army life
Q68 (146)	RR72 (410)	SS61 (388)	a	Father's reactions
Q69 (148)	RR73 (412)	SS62 (390)	a	Mother's reactions
Q70 (150)	RR74 (414)	SS63 (392)	c	Reactions of siblings
Q71 (152)	RR74 (414)	SS63 (392)	c	Reactions of other relatives
Q72 (154)	e	f		Reactions of military friends
Q73 (156)	RR77 (420)	SS68 (402)	a	Reactions of nonmilitary friends
Q74 (158)	RR78 (422)	SS69 (404)	a	Reactions of spouse/girlfriend/boyfriend
Q75 (160)	RR79 (424)	SS70 (406)	a	Reactions of high school counselor
Q76 (162)	RR80 (426)	SS71 (408)	a	Reactions of teachers
Q77 (164)				Ease of getting fulltime job in hometown
Q78 (166)				Civilian/Army fairness for self
Q79 (168)				Civilian/Army fairness for women
Q80 (170)				Civilian/Army fairness for blacks

a Wording and/or codings of Original Form was revised for Forms 2 & 4.

b Wording and/or codings differ among all Forms.

c These items combine Q70 & Q71 which ask separately for reactions of 'brothers and sisters' and 'other relatives.'

d See items RR59/RR67 (396/406) AND SS48/SS56 (374/384) in Forms 2 and 4, respectively.

e This item was split in Form 2 (Regular Army) to ask about reactions of friends with (RR75--416) Army and (RR76--418) Other Military experience.

f This item was split in Form 4 (Reserves and National Guard) to ask about reactions of friends with (SS64--394) Regular Army, (SS65--396) Army Reserve, (SS66--398) Army National Guard, and (SS67--400) Other Military experience.

APPENDIX C

CROSS REFERENCE OF FORM 2 TO THE
ORIGINAL FORM AND FORM 4 ITEMS

The 1982 DA Survey of Personnel Entering the Army was administered in three forms. The Original Form was administered during the weeks of 3-7 May, 24-28 May, and 14-18 June to Army recruits processing through U. S. Army Reception Stations for initial entry training in the Regular Army, U. S. Army Reserves, or Army National Guard. Forms 2 and 4 were administered during the weeks of 12-16 July and 2-6 August to Army recruits processing through U. S. Army Reception Stations for initial entry training. Form 2 was administered to Regular Army recruits; Form 4 was administered to Army Reserve and Army National Guard recruits.

This appendix allows the determination of the items in Form 2 which also appear in the Original Form and/or Form 4. Table C lists the page number in the RA Volumes for each item in the order it appeared in Form 2. Item and page numbers for the Original Form and Form 4 are included for similar items in these forms. (Page numbers for Original Form items are for the RA as well as the USAR Volumes; page numbers for Form 4 are only for the USAR Volumes, in preparation). Cross-referenced items may differ in wording and/or coding, however. While notes are provided to aid in cross-referencing items, users of this table are cautioned to compare the exact item wording and coding before comparing actual data.

TABLE C

CROSS REFERENCE OF FORM 2 TO THE
ORIGINAL FORM AND FORM 4 ITEMS

Variable Name (Page Number)				
Original Form	Form 2	Form 4	Notes	Item Description
SSN	SSN	SSN		SSN
	FORM	FORM		Survey form
DATE	DATE	DATE		Date survey completed (MMDD)
STATION	STATION	STATION		Reception Station
Q1	RS17	RS17		Army component
Q4 (18)	R18 (174)	S18 (174)	a	Satisfaction with military job
Q5 (20)	R19 (176)	S19 (176)		Plans to try to become an officer
