PREFACE

The Leadership and Management Development Center (LMDC), as part of its charter, has provided consultation services to commanders upon request. The Organizational Assessment Package (OAP) survey is a tool designed to help in this task. Since 1978 LMDC has established a large data base from the thousands of surveys administered during their consultation visits. In an effort to gain maximum benefits from this data base, LMDC sponsored Air Command and Staff College (ACSC) students to conduct research using the OAP data. The purpose of this research was to compare the job attitudes of personnel in different major commands and job specialties with those of the remaining personnel in the data base.

The scope of this report is to make this comparison with the job attitudes of Military Airlift Command personnel. The results found in this report will, I hope, provide MAC commanders with further insight into the attitudes of their personnel.

In addition to fulfilling ACSC academic requirements, this material is being submitted as a report for use by LMDC. To meet their needs, this report is written in a format dictated by LMDC. Additionally, the method of citation in this report follows the guidelines of the American Psychological Association.

A special thanks is extended to Capt Tom McFall and Maj Mickey Dansby of LMDC and Maj Tracey Gauch, ACSC/EDOWA, for all their assistance in preparing this report.

ABOUT THE AUTHOR

Maj Ron Newton entered the Air Force in October 1973. The majority of his career has been in tactical airlift with Military Airlift Command (MAC). He has served as a C-130 pilot at Clark AB, Philippines and Little Rock AFB, Arkansas. Maj Newton has also served at HQ MAC, Scott AFB, Illinois as an Emergency Actions Officer and Executive Officer for the Directorate of Command and Control. Maj Newton holds a BS degree in Aviation Management from Saint Louis University and a MS degree in Systems Management from the University of Southern California.

EXECUTIVE SUMMARY

Part of our College mission is distribution of the students' problem solving products to DoD sponsors and other interested agencies to enhance insight into contemporary, defense related issues. While the College has accepted this product as meeting academic requirements for graduation, the views and opinions expressed or implied are solely those of the author and should not be construed as carrying official sanction.

'insights into tomorrow'

REPORT NUMBER 86-1860

AUTHOR(S) MAJOR ROHALD A. NEWTON, USAF

TITLE JOB ATTITUDES OF MILITARY AIRLIFT COMMAND PERSONNEL

1. <u>Purpose:</u> To investigate whether there are any significant differences between the job attitudes (as measured by the USAF Organizational Assessment Package--UAP) of personnel in Military Airlift Command (MAC) and those of personnel in other commands throughout the Air Force.

background: Since the beginning of the all-volunteer force the fir 11 Force has placed increased emphasis on improving motivation and productivity as a way of achieving organizational effectiveness. The intent of this emphasis is to create a job environment that can attract, retain, and motivate the quality military force necessary to support flir Force mission objectives. The services were very successful in turning the negative recruiting trends of the 70's around. However, care must be taken to avoid another decline. The improving economy, predicted budget cuts, and a decreasing pool from which to recruit increase the difficulty of this task. The Leadership and Management Development Center (LMDC) at Maxwell AFB, Alabama, was created to help maintain manpower levels and improve productivity through improved leadership and management. As part of their management consulting program to assist commanders in the field, LNDC developed the OAP survey. It's purpose was to (a) assist LNDC consultants and traveling teams in the identification of organizational leadenship/management strengths and weaknesses, (b) provide feedback to Hir Force Professional Military Education Schools, and (c) establish a data base in support of Air Force-wide organizational effectiveness

CONTINUED

research. LNDC has amassed thousands of survey responses. In an effort to derive the most benefit from their data base, LNDC sponsored Air Command and Staff College students to conduct a variety of research projects using the OAP data base. This report examines responses from personnel in NAC to see if there are any significant differences between their job attitudes and those of the remaining data base. This report pursues four goals:

1. To review relevant background research and organizational behavior literature.

2. To compare ORP-measured demographic characteristics and job attitudes of officer, enlisted, and civilian personnel in MAC with the attitudes of corresponding personnel in other Air Force commands.

3. To analyze significant attitudinal differences between MRC personnel and other data base personnel.

4. To develop recommendations for MAC commanders and functional managers.

111. <u>Procedures:</u> The UAF is a 109-item survey questionnaire (Appendix \hat{U}) consisting of 15 demographic items and 93 attitudinal items. The attitudinal items are grouped into 21 factors. These factors are grouped into a systems model to assess three aspects of a work group: input, process, and output. From an Air Force-wide perspective, the OAP survey is not a random sampling of Air Force bases. However, because of the large number of organizations surveyed, these data represent a significant portion of the Air Force population.

10. <u>Results:</u> As part of this report a review of relevant research was made. This review highlighted current and related theories and research. This report found no previous research on job attitudes of MAC. The comparisons made, based on the data from the OAP survey, revealed several statistically significant findings.

1. Compared to data base officers, MAC officers have a higher perceived rate of Work Repetition. A possible cause for this was their having to deal with repetitive problems more frequently than the other officers. These perceptions may have an impact on their attitude toward Skill Variety, which they rated lower than the other flir Force officers in the data base. Additionally, MAC officers indicate a less positive attitude toward the support and feedback they receive from their immediate supervisors. In spite of their less favorable attitude toward their supervisors, MAC officers still have a more positive attitude toward the organization as a whole.

2. MHC enlisted personnel, overall, have the lowest job attitude natings of the three personnel categories. MAC enlisted personnel show a

CONTINUED

more positive attitude than data base enlisted toward Job Related Satisfaction. In contrast, they expressed a less positive attitude toward their immediate supervisors' support and feedback. Additionally, this less positive attitude also carries into their perceptions of the organization.

3. MAC civilian personnel reported significantly more positive attitudes than data base civilians in 19 of the 21 factors compared. Two factors were identified for further attention. The first was Work Repetition, where MAC civilians reported they must accomplish repetitive tasks and face repetitive problems more often than the other flir Force civilians. This attitude, when compared to their only moderate desire for repetitive work, could imply reduced overall job satisfaction. The second factor deserving attention was Advancement/Recognition, where they expressed a lower awareness of related opportunities for advancement.

U. <u>Recommendations</u>: Based on the results obtained from the ORP survey the following recommendations are proposed:

1. MAC should sponsor continued studies into the job attitudes of their personnel. These studies should include a general examination of command attitudes and specific examinations by job function. This would allow MAC commanders to pinpoint areas in need of change.

2. MAC commanders should stress increased communications between supervisors and their subordinates. This communication should include periodic counseling to establish subordinate goals. Commanders should be certain that this increased communications reaches the lowest levels of their command.

3. MAC should sponsor research into the effect work repetition has on its civilian personnel's job attitudes.

4. Researchers should conduct further studies to discover why the attitudes of MAC civilian personnel are much more positive than those of other civilian personnel. Examinations into why the pattern of MAC civilian attitudes is so different from the patterns of MAC officers and enlisted personnel should also be conducted.

Chapter One

INTRODUCTION

This study provides Military Airlift Command (MAC) leaders feedback on job attitudes of personnel in their command. Data from the Leadership and Management Development Center's (LMDC) Organizational Assessment Package (OAP, Appendix C) survey are the source of this feedback. The study compares responses of Military Airlift Command (MAC) personnel to those of Air Force personnel in other commands and agencies which have results in the LMDC data base. The intent is to help identify strengths as well as potential problem areas based on this comparison of survey inputs from MAC personnel. By examining the possible attitudinal differences between these groups, MAC commanders can evaluate their current efforts in enhancing unit effectiveness and consider adjustments to compensate for any identified weaknesses.

Since the beginning of the all-volunteer force the Rin Force has placed increased emphasis on improving motivation and productivity as a way of achieving organizational effectiveness. The intent of this emphasis is to create a job environment that can attract, retain, and motivate the quality military force necessary to support Air Force mission objectives. In their report on the UAP, Hendrix and Halverson (1979a, p. 5) mode this observation, "Within organizations, management personnel are concerned with how well their organization meets its objectives. These objectives are frequently measured in terms of productivity, cost

savings, and retention of personnel. The Air Force continues to be concerned with this area of organizational effectiveness."

Several external influences motivate Air Force leaders to be concerned over organizational effectiveness. The first is the all-volunceer force. In the late 1970's, the military services were struggling to recruit and retain personnel of the quality and quantity they required (Korb, 1985b). In the 1980's this trend has turned around, but care must be taken not to allow concern over manpower to decline again (Korb, 1985a). Competition for manpower is also keen due to the decreasing numbers of available youth. John Naisbitt, author of <u>Hegatrends</u>, predicts that labor shortages are beginning to occur and will continue throughout the century (Air Force Policy Letter for Commanders, 1985a). The improving economy and reduced unemployment have also contributed to recruiting problems (Korb, 1985a) by drawing off trained military personnel to the higher-paying civilian industries.

In addition to recruiting and retention problems, budget ssues are also impacting organizational effectiveness in the Air Force. With future budget cuts looking more likely, commanders are feeling the pressure to increase productivity. General Larry D. Welch, then Air Force Vice Chief of Staff, suggested one reason for the growing need for quality manpower and increased productivity: "The increased investment in modernization and growth over the past four or five years has produced, and will continue to produce, corresponding growth in the demand for both quality and quantity of military and civilian manpower. But, it is prinfully clear that Congress is not likely to agree to provide that manpower" (Air Force Policy Letters for Commanders, 1985b, p. 2). These examples

illustrate a definite need to create a work place that provides job satisfaction and motivates personnel to stay in the Air Force and productively support its mission.

In order to help create such a productive work place, the Air Force needed a tool to evaluate the effectiveness of its commanders' leadership and management efforts. In 1975 General David Jones, then Chairman of the Joint Chiefs of Staff, approved the formation of LNDC. One of its charters was to provide consulting services to commanders on request and provide Rin Fonce decision makens with systemic information and leadership trends. LNDC developed the OAP survey as a tool to assist in this charter (Nahr, 1982; Short, 1985). Lt Col Lawrence Short (1985) outlined the reasons for developing the UAP. Its purpose was to: (a) assist LMDC consultants and traveling teams in the identification of organizational leadership/management strengths and weaknesses, (b) provide feedback to Air Force Professional Military Education Schools, and (c) establish a data base in support of Air Force-wide organizational effectiveness research. The current version of the ORP has been used in the field since 1978 and LNDC has built a very large cumulative sample (about 200,000 (uses) of the Him Force population in the seven years of ORP use.

2014年1月1日になったのな問題であったいたいでは、問題のなどではなった。日本語のところにはた言語ので、ことには言語ではないですような言語であった。 ちょうちょう ア

The most frequent use of the UAP data has been to provide reports to unit commanders who requested staff visits by LMDC consultant teams. The final reports created by these teams were given only to the commanders of the units they studied. In order to preserve confidentiality, LMDC did not forward these reports to higher headquarters. LMDC researchers also use this survey to examine attitudes in specific career fields, or to look at the effects of specific organizational structures. One report using

OAP data examined four unidentified major commands. It found significant differences in job attitudes among personnel from different commands and recommended further research (Dirnberger, 1980). The present report takes the next step in analyzing the OAP data base by examining a major command, MAC, to see if there are any significant differences in job attitudes for MAC compared with the remaining data base.

To compare MAC personnel's attitudes against the rest of the data base, the present research pursues four goals:

1. To review relevant background research and organizational behavior literature.

2. To compare DAP-measured demographic characteristics and job attitudes of officer, enlisted, and civilian personnel in MAC with the attitudes of corresponding personnel in other Air Force commands.

3. To analyze significant attitudinal differences between MAC personnel and other personnel who have responded to the DAP.

4. To develop recommendations for MAC commanders and functional managers.

This report addresses these four goals in the following manner. First, Chapter Two shows the results of the literature review, and the results of related research. Next, Chapter Three discusses the methodology for this research with an examination of the OAP survey and data collection. An explanation of MAC's mission is included to provide a better understanding of its varied responsibilities. Finally, this chapter explains the process of OAP data analysis. Chapter Four presents demographic data derived from the two sample groups along with the results of the attitudinal portion of the survey. Chapter Five is a discussion of

the results and conclusions drawn from the data in Chapter Four. Finally, Chapter Six summarizes and provides some recommendations for action and further research. アンドロー ひかん ひんしん 美力 たんかん たいかい しょうしょう ディン・シート・シート

LITERATURE REVIEW

Rin Fonce interest in retention and job motivation increased dramatically with the implementation of the all volunteer armed fonces in the early 1970's. This chapter provides a brief review of several significant theories in organizational behavior, what researchers have found in their analysis of job attitudes, and motivation and their effect on the Air Fonce's ability to attract, retain, and build a quality military fonce.

A multitude of books and articles have been written on organizational behavior and its many theories and applications. There has also been a considerable amount of research on retention and job satisfaction. Additionally, much of this research has used the Organizational Assessment Package (OAP) data base to examine these oneas. Unfortunately, a review of research revealed few sources relating to job attitudes within major commands and no research directly relating to Military Airlift Command (NRC), the subject of the present report. Nevertheless, a brief review of key organizational behavior theory may give the reader a context in which to evaluate the present work.

.

Since the 1950's, many social scientists have contributed significant theories on organizational behavior and motivation. Maslow's (1954) "Theory of Human Motivation" was one of the first. He asserted five levels of needs--physiological, safety, affiliation, achievement, and esteem--were the basis for human motivation. Since Maslow, others have

expressed their own ideas on motivational theory. Some well-known theories are McGregor's (1960) "Integration of Goals," Uncom's (1964) "Ualance/Expectation," Herzberg's "Dual Factor Theory" (Herzberg, Mausner, & Snyderman, 1959), Hersey and Blanchard's (1977) "Situational Leadership Model," and Hackman and Oldham's "Job Enrichment Model" (Hackman, Oldham, Jansen, & Purdy, 1975). For the interested reader Talbot (1979) presents an extensive literature review of the more popular theories and models pertaining to job motivation/satisfaction. Of these theories the Dual Factor Theory, Situational Leadership Model, and Job Enrichment Model have had the greatest impact on Air Force organizational research.

ビントン ひんきょう シント いいい 二日本

ĺ

シャーシューアのハイナス大手手になっていた。「「「「」

•

した。これにたられる言語になっていた言語では

In 1959, Herzberg presented the Dual Factor Theory, also called the Mativation-Hygiene Theory (Herzberg et al., 1959). According to this theory, satisfaction of two distinct sets of needs is necessary to achieve high quality work. A worker's hygiene needs relate to his physical work environment. Deficiencies in this area cause job dissatisfaction. The second set of needs (motivation needs) promote a high degree of job satisfaction and Herzberg called them motivators. The e-relate to the job itself: achievement, recognition, work itself, advancement, and responsibility (Herzberg, 1966). In 1974, Air Force Logistics Command (AFLC) contracted Herzberg to implement his model at the Ogden Air Logistics Center in Utah. Other AFLC bases have since implemented his uery successful program (Rafalko, 1976).

Hensey and Blanchand's (1977) work in situational leadership is the second theory that has had a major impact on the Air Force. This model is important to the current research because the Organizational Assessment Package (OAP) is based on a synthesis of the situational/contingency approach to leadership and management (Sume , 1960). This theory

emphasizes the behavior of the leader in relation to followers and environment. The maturity level of the group dictates the leadership style a leader must employ, varying the amount of direction and support based on what the followers need (Blanchard, 1983). Mahr's work (1982), consolidating the findings of available OAP research, provides an excellent history of the OAP development. Hendrix and Halverson's (1979a) report established the validity of the OAP in relation to the situational leadership model. Short's (1985) report on the OAP summarizes research on the validity and reliability of the survey itself.

Finally, Hackman and Oldham's research on job enrichment (Hackman, et al., 1975) has also had significant impact on organizational research in the Air Force. Their work complements previous work on motivation and satisfaction, particularly Herzberg's "Dual Factor Theory." Their model states that job motivation and satisfaction depend on three psychological states: experienced meaningfulness, experienced responsibility, and knowledge of results. Their model also identified five job characteristics to measure and identify changes necessary to increase job motivation. These five characteristics are skill variety, task identity, task significance, autonomy, and feedback (Hackman, et al., 1975). This model was extensively used to develop the job inventory items in the OAP survey (Mahr, 1982).

Within the flir Force, numerous job attitude studies have been conducted in the hope of improving retention. The following studies show a representative sample of the types of research conducted in the area of job attitudes and leadership.

With few exceptions, the Air Force has experienced less significant recruiting problems compared to the other services. Where the Air Force

ģ

としていていていてい

does have a problem is with retention. Patterson (1977) reported in his study of career intent of first term Air Force personnel that job satisfaction was a significant variable in making career decisions. He also found that leadership/supervision had an impact, but of less significance. An Air Force Manpower and Personnel Center Officer/Airman Exit Survey also found job satisfaction and work environment issues to be significant factors for personnel choosing to leave the service (Dees & Jokerst, 1985). Researchers also have examined leadership style for its effects on retention and found that leadership style did have an impact on career intent. Specifically, democratic leadership behaviors improved c eer intent while autocratic leadership behavior did the opposite (Hall & Hilson, 1980).

くさ 日本 とんとき とき しょうけいけい かままたんと たん という 御言 しょう たいの 大学師

The preceding research investigated what factors positively or negatively affected career intent. From the examples presented, only Hall and Wilson used the UAP to conduct their research. However, the UAP data base can be very useful for comparison studies between selected samples. This is the method pursued in the present report. The following paragraphs review research using the UAP in this manner. These studies are more directly related to the present work.

One study examined four separate personnel categories (Boren, 1980). These categories were Air Force Officers, Enlisted personnel, General Schedule Employees, and Wage Board employees. The purpose of this analysis was to mensure and compone five job satisfaction variables in the OAP and analyze the attitude of each category to see if these areas hold potential for addressing the retention problem. Boren's analysis found that enlisted personnel rated their perceived job satisfaction lower than did the other three personnel categories. The rank ordering of these four

10

< -

personnel categories on how they rated their job satisfaction was wage board civilians, general schedule civilians, officers, and enlisted personnel. Although all categories found their jobs meaningful, enlisted personnel rated their task identity and skill variety significantly lower than did the other personnel categories. マンシンシンシー目とうひつうちも見たいとう

While Boren (1980) used the OAP to examine the four main personnel categories and their attitudes on job satisfaction, Reed (1979) analyzed the OAP to determine how useful the entire survey was in comparing the attitudes of a specific career field with the attitudes in the remaining flir Force data base. His analysis was specifically on flir Force muintenance officers (40XX career field). He found wide misconceptions about the attitudes of this group. He also found that the variables analyzed provided information that would be useful at many levels of command. Boren showed the usefulness of the OAP to examine general categories and Reed showed the OAP's ability for analysis on specific career fields.

To investigate the OAP's usefulness beyond specific career fields the leadership and Management Development Center (LMDC) sponsored research to analyze the attitudes of personnel in major commands (Dirnberger, 1980). Their objective was to determine the significance and strength of differences between major commands and determine the worth of reporting these findings to interested commanders. They picked four unidentified commands for the study. Dirnberger found significant differences between all commands in all factors in the OAP. He suggested that there may be a relationship between a command's demographics and job attitudes. Commands with a high score in job attitude and motivation were also the commands with, "more stable, intrinsically satisfying jobs, more civilian

11

personnel, and better supervisory/management climates" (Dirnberger, 1980, p. 28).

All the theories on organizational behavior and the research just cited established the foundation for the analysis completed in this paper. Early works, in particular the Situational Leadership Hodel, provided the basis for the creation of LMDC's OAP. LMDC has compiled a substantial amount of analysis to establish the validity of the OAP. Research to establish causes for the Air Force's retention problems has identified job attitudes and leadership as important factors. The OAP measures these two factors. Although there is no specific research comparing job attitudes of MAC personnel, related research is available on personnel categories, specific career fields, and comparing several unidentified major commands. The literature reviewed in this chapter does not provide sufficient facts to develop a hypothesis for this study. However, it does provide a useful background to understand the analysis of data in the following chapters. The next chapter presents the methods used to conduct research on job attitudes of MAC personnel.

Chapter Three

METHOD

This chapter provides a description of the OAP survey and its use by LMDC in their consulting mission. It describes LMDC's data gathering procedures and the development of their data base. This chapter also describes the methods used to compare the attitudes of MAC personnel against the remaining personnel in the data base.

<u>Instrumentation</u>

The OAP is a 109-item survey questionnaire designed jointly by the Air Force Human Resources Laboratory (AFHRL), Brooks Air Force Base, Texas, and the Leadership and Hanagement Development Center (LHOC), Maxwell Air Force Base, Alabama. LMDC uses the OAP in its mission to (a) conduct research on Air Force systemic issues using information in the OAP database, (b) provide leadership and management training, and (c) provide management consultation service to Air Force commanders upon request. The survey questionnaire consists of 16 demographic items and 93 attitudinal items (see Appendix C). Hendrix and Halverson (1979a; 1979b) provide documentation of the factor analysis results during OAP development. Short and Hamilton (1981) conducted a factor by factor assessment of the reliability of the OAP and found that it showed "...generally acceptable to excellent reliability for the primary factors," and "...that they were reliable enough for collection of Air Force systemic data." After two years of field use, Hightower and Short (1982) re-examined the

13

ここにに、「た日日のかのへん」目的

validity of the ORP. Their findings also support the use of the ORP as a data gathering instrument.

A cumulative data base contains all data from OAP administrations. While administering the survey, LHDC personnel gather other demographic information in addition to the 16 demographic items. This information includes work group code, personnel category and pay grade, age, sex. Primary Air Force Specialty Code (PAFSC), Duty Air Force Specialty Code (DAFSC), base, and major command. Two computer files make up the data base. One is a historical file containing data collected prior to 1 October 1981 and the other is an active file. LMDC uses the data from the active file for the consulting process. The present study took data from the active file covering the period from 1 October 1981 to 16 September 1985. When conducting research, either file may be used, or the files may be combined ar appropriate.

このなる 日本 かんかん たいていたい 一部 スパークス スパン 日本 かん アンクリン しょうかん たいてい いんかい 一部 しい

Data Collection

All data for the present analysis were gathered as an integral part of the LHDC management consultation program. In the consultation process, the initial administration of the OAP in an organization is a key step in data gathering. This section describes the OAP administration process.

The process begins when an Air Force commander decides that he or she wants to look at what is happening in his or her organization in the realm of job attitudes. The organizational commander submits a request for LMDC's consulting team to visit the organization. LMDC then evaluates this request against internal LMDC administrative criteria for suitability. If approved, LMDC sends a consulting team to the client unit to gather the data. The team gathers data for their analysis in the

initial administration visit, before any other consulting procedures, and these data become part of the Pre-OAP Data Base. Everyone present for duty in the client unit is administered the OAP survey. LMDC personnel gather the surveys after they are filled out so no unit personnel even handle the surveys. The LMDC consultants analyze the survey data, along with other data from the consulting process, to provide feedback to the client organization. They then present this feedback in a collective form, breaking the information out by organizations within the client unit. They provide this feedback to every work group within the combined results of what his or her subordinates feel. LMDC handles all results in a confidential manner between LMDC and the client commander. For the interested reader, Short (1985) provides a detailed description of the LMDC consulting program.

From an Air Force-wide perspective, the OAP survey is not a random sampling of Air Force bases. LMDC gives the survey at bases where the client commander requests the LMDC consulting program. However, since the survey is given as a census of the consulted organization, data gathered is representative of the organization (usually Air Force wings). Data from numerous such organizational censuses comprise the LMDC data base. These data represent a significant portion of the Air Force population.

<u>Subjects</u>

To examine the perceptions of Military Airlift Command (MAC) members, responses to the pre-intervention OAP (pre-OAP) were taken from the active data base to form two independent groups: MAC and LMDC Data Base. The MAC group consists of officer, enlisted, and Department of the Air Force

civil service personnel. For this study the MAC group contains responses from all personnel surveyed who indicated MAC as their major command. The MAC sample represents 14 bases including 2 bases overseas. The Data Base Group consists of responses from all remaining personnel in the active file. The Data Base sample includes responses from 115 bases and operating locations from 12 major commands and operating agencies. Table 1 lists sample sizes, by personnel category, for these two groups.

	Tabl	e i	
Sample	e Sizes of C	omparison Gr	oups
	Officers	Enlisted	Civilians
MAC Group	752	5484	782
Data Base	11561	65063	23912

The subjects within MAC perform a number of different jobs. The following excerpt from AU-23 (1985, p. 83), provides a brief overview of MAC's mission, and consequently highlights some of the responsibilities of MAC personnel:

The Military Rirlift Command (MRC) is a specified command of the Department of Defense (DOD), a major command of the Air Force, and the Single Manager Operating Agency for airlift service within the DOD.

As a specified command, MAC is responsible to the Joint Chiefs of Staff for planning and performing airlift and special operations missions. The command provides airlift support as a specified command during exercises, crises, and wartime in support of other unified and specified commands. As a major command, MAC is responsible to the secretary of the Air Force and the chief of staff, US Air Force, for organizing, training and equipping forces to support BOD forces worldwide. It provides airlift services in peacetime in such a manner as to promote its wartime capability. Systems and services assigned to MAC and under the direction of the chief of staff, US Air Force, include: Air Weather Service (AWS), combat rescue, Aerospace Rudiovisual Service (AAVS), 76th Airlift Division, operational support airlift, and special aircrew training.

Procedures

Two separate examinations were conducted to analyze survey data from these groups. Examination 1, "Analysis of Demographic Information," is provided to characterize the sample groups. Examination 2, "Comparison of MAC Personnel to the LMDC Date Base," compares attitude scores of the groups by personnel category: MAC officers versus other officers, MAC enlisted members versus other enlisted members, and MAC civilians versus other civilian personnel.

The number <u>n</u> shown throughout this study is the total number of valid responses in the pre-intervention data base for the variable or key factor being examined. Each examination was performed using appropriate statistical analysis procedures contained in the <u>Statistical Package for</u> <u>the Social Sciences (SPSSX) User's Guide</u> (1983).

Examination 1, Analysis of Demographic Information

For this analysis, LMDC divided the data base into two groups. The first group consisted of responses of those personnel who indicated MAC was their major command. Responses from all remaining personnel in the data base made up the second group. This examination used the SPSS^X subprogram "Crosstabs" to analyze the data.

<u>Examination 2, Companison of MAC Personnel to the Data Base</u>

These analyses compared job attitude responses of MAC personnel to the data base by personnel category, i.e., officer, enlisted, and civilian. Two-tailed <u>t</u>-tests were performed to discern any attitudinal differences between groups within each personnel category. The level of

significance for all <u>t</u>-tests was alpha=.05. The .05 level of significance obtained from the <u>t</u>-test evaluates whether there is a reliable statistical difference between the two groups with at least a 95% confidence level. An <u>t</u>-test was used to test the assumption of equal variances. Where appropriate, <u>t</u>-tests for unequal variance groups were used. These procedures identified OAP attitudinal factors for which MAC data varies significantly from the data base. Comparisons were made in four areas of organizational functioning.

●● キャイスタン はままたんたけ イスタイ ● たいたたたたた 白星 マンタン いちょう アイマス いちまたたたたたたた ● たいかい いいか

1. <u>Hork Itself</u>. This area deals with the task properties (technologies) and environmental conditions of the jub. It measures perceptions of task characteristics.

2. <u>Job Enrichment</u>. Measures the degree to which the job (tself is interesting, meaningful, challenging, and responsible.

3. <u>Hork Group Process</u>. Assesses the effectiveness of supervisors and the process of accomplishing the work.

4. <u>Hork Group Output</u>. Heasures task performance, group development, and effects of the work situation on group members. Assesses perceptions of quality and quantity of task performance. Assesses pride and satisfaction individuals have in their jobs. See Appendix D for the factors and variables that comprise these areas in the DAP survey.

The next chapter presents the results of these demographic and attitudinal comparisons.

Chapter Four

RESULTS

This chapter presents the results of the statistical analyses conducted on the ORP survey responses comparing filitary Airlift Command (fRC) with the remaining ORP data base. Results are presented in two examinations. The first examination looks at demographic findings for MRC personnel, compared to other personnel, who responded to the ORP survey. The second examination presents significant differences found between MRC personnel and the data base in the attitudinal portion of the ORP survey. Table 2 lists the significantly different factors found in the comparison of the two groups. Tables A-1 through A-21, Appendix A, provide a complete report of demographic data. Tables B-1 through B-3, Appendix B, list the complete results comparing MRC and the data base on the 21 attitudinal factors of the ORP survey. Finally, Tables B-4 and B-5, Appendix B, report the responses to the survey items comparing selected factors found to have significant differences between the two comparison groups.

Examination 1, Analysis of Demographic Information

Of the 752 MAC officers who responded to this survey, 87% are men and 13% are women. Of the 11,561 respondents in the other officer group, 88% are male and 12% are female. The percentages for white officers (87%) and black officers (6%) are the same for both groups. In both groups, over 50% of the officers surveyed have more than 8 years of service. Most MAC

officer respondents have been in their present career fields for more than 18 months (74%). They have been at their present duty stations less than 36 months (88%) and in their current position less than 12 months (54%). These percentages are slightly higher than for the other officer group. The typical MAC officer is married (75%), and 45% of the spouses are working. More than 35% of these MAC officers hold advanced degrees, compared with 46% in the other officer group. Fifty-nine percent of MAC officers and 55% of other officers are supervisors. Over 50% of MAC officers and 52% of the other officer respondents, while only 35% of the other officers are rated. Over 54% of the officers in both groups indicate that they intend to make the fir Force a career. A total of 5,484 MAC and 65,063 other enlisted personnel participated in the OAP survey. In the MAC group, 13% of the enlisted respondents are women. In the other enlisted group, 12% of the respondents are women. In both groups 72% are white, 16% are black, and 5% are Hispanic. The largest proportion of enlisted personnel in both groups are 21 to 25 years old. In the MAC group, 42%, and in the other group, 43%, of enlisted personnel have served less than 4 years. In both groups over 50% have been at their present duty stations for less than 18 months. The typicai MAC enlisted person is married (61%), and 61% of the spouses are employed. Only 3% of MAC enlisted respondents. Most of the enlisted personnel in both groups are not supervisors (60%) and do not write performance reports (66%). With MAC enlisted, 39% have a strong career intent compared to 38% of the other group.

i

Of the 782 MAC civilian personnel responding, 58% are women compared with 40% of the 23,912 other civilian respondents. In the MAC group, 74% are white and 16% are black. In the other civilian group 67% are white and 9% are black. Twenty-four percent of MAC civilians and 27% of other civilians are more than 50 years old. In the MAC group, 49% have more than 12 years of service with 57% remaining at their present duty stations over 36 months. The typical civilian employee is married (89% for MAC civilians and 75% for the other group). Eighty-seven percent of MAC civilian employees have less than a college degree, compared with only 76% of other civilian respondents. Civilians who supervise other people comprise 31% of the MAC group and 25% of the other civilian group.

Examination 2, Comparison of MAC Personnel to the Data Base

This examination found significant attitudinal differences between MAC personnel and the remaining personnel in the work itself, job enrichment, work group process, and work group output areas of the DAP survey. The following paragraphs provide a summary of the significantly different factors for each personnel category. Table 2 presents the significant attitudinal differences for each personnel category.

MAC Officers versus Other Officers

This examination found that MAC officers have significant attitudinal differences from other officers in the DRP survey areas of work itself, jub enrichment, and the work group process. Specifically, 5 out of the 21 factors compared were significantly different, with MAC officers having lower mean responses on 3 of these factors. See Table B-1.

In the area of work itself, MAC officers have a higher mean response than other officers for the Work Repetition factor. This comparison shows that MAC officers perceive their jobs as being more repetitive; they feel that they more frequently perform the same tasks, or face the same type of problems on a regular basis more frequently than the data base officers. In job enrichment, where factors measure the degree to which the job itself is interesting, meaningful, challenging, and responsible, MAC officer respondents report a less favorable attitude than other officer respondents. In the Skill Variety factor, MAC officers express a slightly less positive attitude.

Work group process is the last area where MAC officers scores were significantly different from the other officers' scores. In this area MAC officers are significantly different on three of the four factors which measure the pattern of activity and interaction among group members. MAC officers have less favorable perceptions in the Management and Supervision factor. They also are less positive about their Supervisory Communications Climate (which measures communication rapport with the supervisor, a good working environment, and how well performance is rewarded). However, MAC officers have a more positive attitude toward the Organizational Communications Climate.

MAC Enlisted Members versus Other Enlisted Members

These comparisons revealed significant differences between MAC and other enlisted respondents' attitudes on 8 of the 21 DAP factors. MAC enlisted members express more positive views on four of the eight significantly different factors. See Table B-2.

In the area of work itself, MAC enlisted members feel better about the general task characteristics of their jobs. This factor has to do with the task properties and environmental conditions of the job.

In the second area, job enrichment, MAC enlisted members express more favorable perceptions than the other enlisted members. They rate their Task Identity higher than the other enlisted personnel. MAC enlisted members also express a more positive attitude on the Task Significance factor, which measures the impact their work has on others.

In the work group process area, MAC enlisted members express significant differences in three of the four factors. They are less positive in their perception of Work Support (which measures the hindrance of additional duties and details, inadequate tools, equipment, or work space). They also report less positive feelings about Management and Supervision and their Supervisory Communications Climate. 2. 「ためたたたため」「ためたたたたたた」「「ないない」」「ないない」」」というないできたかできたかです。

The last area where significant differences are noteworthy is in the work group output area. MAC enlisted members report a more positive attitude on the Job Related Satisfaction factor. However, they indicate that they are less satisfied with the General Organizational Climate. <u>MAC Civilians versus Other Civilians</u>

As shown in Table B-3, there are significant differences between MAC and other civilian respondents' scores in 19 of the 21 factors. In all 19 cases MAC civilian personnel's responses were higher than those of the other civilian personnel.

This chapter examined selected demographic information for each personnel category surveyed to highlight characteristics of the MAC survey group. In addition, it identified the significant differences between MAC personnel and data base personnel on each of the 21 factors in each personnel category. Chapter Five presents a discussion of possible reasons for these results.

Chapter Five

DISCUSSION

The purpose of this report, as stated in Chapter One, is to provide MAC leaders feedback on job attitudes of personnel in their command. This report compared the attitudes of MAC personnel against the remaining Air Force personnel who completed the ORP survey as part of LMDC's consulting program. As noted in the literature review, no related research was found comparing the job attitudes of MAC personnel. The absence of research in this area resulted in no hypothesis being formed about any expected outcome from the analysis conducted in this report.

A limitation in conducting a study of this type is the difficulty in drawing specific conclusions which can be turned into useful recommendations. The main difficulty is due to the diversity of the jobs within MAC as illustrated in the MAC mission statement in Chapter Three. In spite of this limitation, it was possible to identify statistically significant differences between the attitudes of MAC and other Air Force personnel. These differences allow the author to suggest possible explanations, which warrant discussion.

This chapter presents a discussion of the significant results found in the comparison of MAC and other Air Force personnel's job attitudes identified by the OAP survey. The discussion focuses on the three personnel categories surveyed: officer, enlisted, and civilian. The discussion in each personnel category covers significant findings in the

four main areas of the survey which are the work itself, job enrichment, work group process, and work group output.

MAC Officers

As noted in Chapter Four, MAC officers reported statistically significant differences in only 5 of the 21 factors on the OAP survey. In the area of work itself, MAC officers reported differences from the other Air Force officers on the Work Repetition factor. In this factor MAC officers indicated a higher tendency to repeatedly perform the same tasks and face the same problems on a regular basis (see Table B-1). Their mean score (mean=4.41, where 4=to a moderate extent and 5=to a fairly large extent) indicates that this repetition occurs quite often. This score compared with their score on the Desired Repetitive/Easy Task factor (mean=2.50, where 2=a slight amount and 3=a moderate amount) shows that they perceive too much repetition.

In the oneo of job enrichment, MAC officers were significantly different and reported a less positive attitude on the Skill Variety factor. This factor measures the degree to which a job requires a variety of different tasks or activities in carrying out the work, involves the use of a number of different skills and talents of the worker, and demands skills valued by the worker. While MAC officers reported a very positive attitude about this factor (mean=5.34, where 5=to a fairly longe extent and 6=to a great extent) their mean score was lower than that of other Air Force officers. MAC officers' perception of having more repetitive work, as discussed previously, is most likely responsible for their having a slightly lower response in the Skill Variety factor. A possible reason

for MAC officers differing from other officers in these two factors may be the organization and mission requirements of MAC. MAC's organizational structure limits officers from performing duties outside of their specialty. However, this characteristic is not limited to MRC and is very likely a characteristic of other commands. The process of operating or supporting airlift missions follows a set sequence of events and is more unique to MAC. To accomplish the mission the MAC officer faces basically the same challenges each day. With many missions operating each day the required tasks, with their inevitable problems, becomes repetitive. Since MAC officers report a less positive attitude toward the Skill Variety factor compared to the other officers and rate the Work Repetition factor higher, this possibly suggests that facing repetitive problems is a primary irritant. This may mean that the MAC organization does not adequately identify these repetitive problems and implement solutions to avoid their reoccurrence. While both means are still fairly positive, further examination into the repetitive problems MAC officers face is indicated.

The final area where any significant differences were shown by MAC officers is in the work group process area. In this area MAC officers indicate their immediate supervisors do not provide as much support and feedback compared with the other Air Force officers. In the Management/ Supervision factor, MAC officers are less positive than other Air Force officers in the ratings given their supervisors (see Table B-1 & B-4). Their Job Performance Standards and Work Procedures are not as highly rated as those of the other officer group. This indicates a lower perception of support, guidance received, and quality of supervision as

compary the the other officers. While the MAC officer mean score for this rating is still fairly high (mean=5.16, where 5=slightly agree and 6=moderately agree) they scored lower than the other Air Force officers. In the related factor of Supervisory Communications Climate, MAC officers also reported a lower rating. In this factor they are much more neutral in rating their supervisors than in the previous factor (mean=4.72, 4=neither agree nor disagree and 5=slightly agree). Their overall mean factor score and individual variable mean scores (Table B-4) show that Mhu supervisors are not providing as good a working environment, they are less effective at establishing goals with subordinates, and they provide less specific feedback to their subordinates. A possible explanation for this is that MAC supervisors do not as routinely councel their subordinates. This leaves the subordinate with only their Officer Effectiveness Report as a gauge to their performance. In contrast to these results, MAC officers rated their Organizational Communications Climate higher than did the other Air Force officers. This indicates a more open communications environment in the overall organization and that adequate information is provided to do their job.

たちまたので、「「ないたい」であるとなる。「ないない」であるというで、「ないたいない」である。「ないない」である。「ないないない」である。「ないないない」である。「ないないない」である。

The examination of significant responses between MAC officers and the other Air Force officers highlights two areas of difference. The first is the perception that MAC officers have concerning the repetitiveness of their work and the impact this may have on their Skill Vaniety score. Second, examining the results of all three factors in the work group process area indicates that the immediate supervision of MAC officers is rated lower than that of the other Air Force officers. The fact that MAC officers express positive attitudes about their overall organizational

climate again directs attention toward the immediate supervisor. Hall and Wilson's (1980) report on the impact of leadership style on career intent supports the importance of good supervisory communications for improved jub satisfaction and increasing retention rates.

MAC Enlisted

In general, MAC enlisted personnel express more positive attitudes than the other enlisted personnel in the areas of the work itself and job enrichment. In these two areas, MAC scores on three related factors were significantly higher than those of the other enlisted personnel. These factors were Task Characteristics, Task Identity, and Task Significance. Based on the data from Table B-2, MAC enlisted personnel appear to be generally satisfied with the jobs they perform. The increased emphasis on the importance of the airlift mission and the public attention received over the last several years may be partly responsible for their higher responses.

Examination of the attitudes of NAC enlisted personnel in the work group process area shows that their attitudes closely parallel the attitudes of MAC officers. The three mean factor scores found significantly different from other enlisted personnel mean scores were in Work Support, Management/Supervision, and Supervisory Communications Climate. These differences show that MAC enlisted personnel also perceive less supervisory support and feedback from their immediate supervisors, perhaps for the same reasons already mentioned for MAC officers.

The responses from MAC enlisted personnel in the work group output area are consistent with their attitudes in the three previous areas. In

this area MAC enlisted personnel expressed a more positive attitude than the other Air Force enlisted personnel toward Job Related Satisfaction. On the General Organizational Climate factor MAC enlisted personnel expressed less positive attitudes. The Job Related Satisfaction responses support the more positive responses in the Task Characteristics, Task Identity, and Task Significance factors. The less positive responses on the General Organizational Climate factor support their lower responses, compared to the other Air Force enlisted personnel, in the work group process area. The fact that enlisted personnel are generally farther down the chain of command suggests that supervisors may not be passing on organizational goals and information that they receive. The general conclusion that can be drawn from these data is that, while MAC enlisted personnel are happier with their jobs (because of the attention received) than other Air Force enlisted personnel, they are not as happy with the support and feedback they receive from their immediate supervisors and organization.

MAC Civilians

MAC civilian personnel had the most dramatic and unexpected results of all the comparisons. Their reporting statistically different attitudes in 19 of the 21 factors examined was surprising, especially since on all 19 factors they reported a higher mean score than the other civilian personnel. Overall this shows a significantly higher level of job satisfaction compared to the other civilians. In spite of these very positive results, MAC civilian personnel responses on two factors warrant discussion.

In the area of work itself, MAC civilian personnel report the highest score for the Work Repetition factor (mean=5.02, where 5=to a fairly large extent). In contrast, they only express a moderate desire for repetition on the Desired Repetitive/Easy Task factor (mean=3.30, where 3=a moderate amount and 4=a fairly large amount). The comparison of these two factors suggests an imbalance which could have a potential effect on their overall job satisfaction in the future.

The final factor worth examining is the Advancement/ Recognition factor in the work group output area. In this factor, although their scores are higher than the other civilians, MAC civilian employees report a fairly low awareness of opportunities for advancement, recognition, and preparing for increased responsibility. This also suggests a possible negative impact on their overall job satisfaction. These two factors warrant additional study to determine their effects on MAC civilians' job attitudes. This chapter discussed the significant for higs of the three personnel categories examined. It compared the stitudes of MAC personnel and the remaining personnel in the OAP data base. The next chapter summarizes findings and presents recommendations for future action.

Chapter 6

RECOMMENDATIONS

This chapter presents a summary of results and recommendations based on the comparison of the responses of MAC personnel to those of other Air Force personnel who responded to LMDC's OAP survey. The complete results of this comparison are in Appendices A and B; the questionnaire for the ORP survey is in Appendix C; and the factors and variables guide to the OAP is in Appendix D. The following paragraphs present a summary of the results found.

This report found MAC officers have a higher perceived rate of Work Repetition. A possible cause for this was their having to deal with repetitive problems more frequently than the other officers. These perceptions may have an impact on their attitude toward Skill Variety, which they rated lower than the other Air Force officers in the data base. Additionally, MAC officers indicate a less positive attitude toward the support and feedback they receive from their immediate supervisors. In spite of their less favorable attitude toward their supervisors, MAC officers still have a more positive attitude toward the organization as a whole.

MAC enlisted personnel, overall, have the lowest job attitude ratings of the three personnel categories. MAC enlisted personnel show a more positive attitude than data base enlisted personnel toward Job Related Satisfaction. In contrast to their more positive attitude on Job Related 6

- 35

Satisfaction they expressed a less positive attitude than the data base toward their immediate supervisor's support and feedback. Additionally, this less positive attitude also carries into their perceptions of their organizations as a whole.

MAC civilian personnel reported the most surprising results. They had statistically significantly more positive attitudes than data base civilians in 19 of the 21 factors compared. Their results show significantly more favorable job attitudes than the remaining Air Force civilian personnel. Two factors were identified for further attention. The first was Work Repetition, where MAC civilians reported they must accomplish repetitive tasks and face repetitive problems more often than the other Air Force civilians. This attitude, when compared to their only moderate desire for repetitive work, could imply potential for reduced overall job satisfaction. The second factor deserving attention was Advancement/Recognition, where they expressed a lower awareness than other personnel categories of related opportunities for advancement. Based on the results obtained from the ORP survey data the following recommendations are proposed:

1. MAC should sponsor continued studies into the job attitudes of their personnel. These studies should include a general examination of command attitudes and specific examinations by job function. This would allow MAC commanders to pinpoint areas in need of change.

2. MAC commanders should stress increased communication between supervisors and their subordinates. This communication should include periodic counseling to establish subordinate goals. Commanders should be certain that this increased communications reaches the lowest levels of

their command.

3. MAC should sponsor research into the effect work repetition has on its civilian personnel's job attitudes.

4. Researchers should conduct further studies to discover why the attitudes of MAC civilian personnel are much more positive than those of the other civilian personnel. Examinations into why the pattern of MAC civilian attitudes is so different from the patterns of MAC officers and enlisted personnel should also be conducted.

APPENDIX C

ORGANIZATIONAL ASSESSMENT PACKAGE SURVEY

ł

#### PRIVACY ACT STATEMENT

In accordance with D.O.D. Directive 5400.11, Personal Privacy and Rights of Individuals Regarding Their Personnel Records, the following information about this survey is provided:

a. Authority: 10 U.S.C., 131.

・こうたい 日本 といたたい たい 御子 イン・シント 御台 たいし からえ 御いたい かいかい 注意 たい

b. <u>Principal Purpose</u>: The survey is being conducted to assess your organization from a leadership and management perspective.

c. <u>Routine Uses</u>: Information provided by respondents will be tre-ted confidentially. The averaged data will be used for organizational stath and weakness identification and research and development purposes.

d. <u>Participation</u>: Response to this survey is voluntary. Your cooperation in this effort is appreciated.

[PLEASE DO NOT TEAR, MARK ON, OR OTHERWISE DAMAGE THIS BOOKLET]

#### SCN 84-96 Expires 31 Dec 85

#### GENERAL INFORMATION

The leaders of your organization are genuinely interested in improving the overall conditions within their areas of responsibility. Providing a more satisfying Air Force way of life and increasing organizational effectiveness are also goals. One method of reaching these goals is by continual refinement of the management processes of the Air Force. Areas of concern include job related issues such as leadership and management; training and utilization; motivation of and concern for people; and the communication process.

This survey is intended to provide a means of identifying areas within your organization needing the greatest emphasis in the immediate future. You will be asked questions about your job, work group, supervisor, and organization. For the results to be useful, it is important that you respond to each statement thoughtfully, honestly, and as frankly as possible. Remember, this is not a test, there are no right or wrong responses.

Your completed response sheet will be processed by automated equipment, and be summarized in statistical form. Your individual response will remain confidential, as it will be combined with the responses of many other persons, and used for organizational feedback and possibly Air Force wide studies.

#### KEY WORDS

The following should be considered as key words throughout the survey:

- -- Supervisor: The person who gives you your day-to-day guidance in accomplishing your job.
- -- Work Group: All persons who work for the same supervisor that you do.
- -- Organization: Your squadron. However, if you work in staff/support agencies, the division or deputate would be your organization.

#### INSTRUCTIONS

1. All statements may be answered by filling in the appropriate spaces on the response sheet provided. If you do not find a response that fits your case exactly, use the one that is the closest to the way you feel.

2. Be sure that you have completed Section 1 of the response sheet, as instructed by the survey administrator, before beginning Section 2.

3. Please use the pencil provided, and observe the following:

--Make heavy black marks that fill the spaces.

--Erase cleanly any responses you wish to change.

--Make no stray markings of any kind on the response sheet.

-- Do not staple, fold or tear the response sheet.

-- Do not make any markings on the survey booklet.

4. The response sheet has a 0-7 scale. The survey statements normally require a 1-7 response. Use the zero (0) response only if the statement truly does not apply to your situation. Statements are responded to by marking the appropriate space on the response sheet as in the following example:

Using the scale below, evaluate the sample statement.

- 5 = Slightly agree1 =Strongly disagree
- 2 = Moderately disagree
- 3 = Slightly disagree

6 = Moderately agree

- 7 =Strongly agree
- 4 =Neither agree nor disagree

Sample Statement. The information your work group receives from other work groups is helpful.

If you moderately agree with the sample statement, you would blacken the oval (6) on the response sheet.

NΔ Sample Response: (0) (1) (2) (3) (4') (5) (6) (7)

5. When you have completed the survey, please turn in the survey materials as instructed in the introduction.

#### BACKGRUJND INFORMATION

This section of the survey concerns your background. The information requested is to insure that the groups you belong to are accurately represented and not to identify you as an individual. Please use the separate response sheet and darken the oval which corresponds to your response to each question.

1. Total years in the Air Force:

Less than 1 year.
 More than 1 year, less than 2 years
 More than 2 years, less than 3 years.
 More than 3 years, less than 4 years.
 More than 4 years, less than 8 years.
 More than 8 years, less than 12 years.
 More than 12 years.

2. Total months in present career field.

Less than 1 month.
 More than 1 month, less than 6 months.
 More than 6 months, less than 12 months.
 More than 12 months, less than 18 months.
 More than 18 months, less than 24 months.
 More than 24 months, less than 36 months.
 More than 36 months.

3. Total months at this station:

Less than 1 month.
 More than 1 month, less than 6 months.
 More than 6 months, less than 6 months.
 More than 12 months, less than 18 months.
 More than 18 months, less than 24 months.
 More than 24 months, less than 36 months.
 More than 36 months.

4. Total months in present position:

Less than 1 month.
 More than 1 months, less than 6 months.
 More than 1 months, less than 12 months.
 More than 12 months, less than 18 months.
 More than 18 months, less than 24 months.
 More than 24 months, less than 36 months.
 More than 36 months.

- 5. Your Ethnic Group is:
  - 1. American Indian or Alaskan Native
  - 2. Asian or Pacific Islander
  - 3. Black, not of Hispanic Origin
  - 4. Hispanic
  - 5. White, not of Hispanic Origin
  - 6. Gther

6. Your highest education level attained is:

- 1. Non-high school graduate
- 2. High school graduate or GED
- 3. Less than two years college
- 4. Two years or more college
- 5. Bachelors Degree
- 6. Masters Degree
- 7. Doctoral Degree

7. Highest level of professional military education (residence or correspondence):

- 0. None or not applicable
- NCO Orientation Course or USAF Supervisor Course (NCO Phase 1 or 2)/ NCO Preparatory Course.
- 2. NCO Leadership School (NCO Phase 3)
- 3. NCO Academy (NCO Phase 4)
- 4. Sentor NCO Academy (NCO Phase 5)
- 5. Squadron Officer School
- 6. Intermediate Service School (1.e., ACSC, or equivalent)
- 7. Senior Service School (i.e., AWC, ICAF, NWC)

8. How many people do you directly supervise?

| 1. | None | 4. 3 |    |      |
|----|------|------|----|------|
| 2. | 1    | 5. 4 | to | 5    |
| 3. | 2    | 6. 6 | to | 8    |
|    |      | 7. 9 | or | more |

9. For how many people do you write performance reports?

| 1. | None | 4. 3 | 1    |      |
|----|------|------|------|------|
| 2. | 1    | 5. 4 | to   | 5    |
| 3. | 2    | 6.6  | i to | 8    |
|    |      | 7. 9 | ) or | wore |

10. Does your supervisor actually writ your performance reports?

1. yes 2. no 3. not sure

2-**1** 

11. Which of the following "best" describes your marital status? **U.** Not Married 1. Married: Spouse is a civilian employed outside home. 2. Married: Spouse is a civilian employed outside home-geographically separated. Married: Spouse not employed outside home.
 Married: Spouse not employed outside home-geographically separated. 5. Married: Spouse is a military member. 6. Married: Spouse is a military member-geographically separated. 7. Single Parent. 12. What is your usual work schedule? 1. Day shift, normally stable hours. 2. Swing shift (about 1600-2490) 3. Mid shift (about 2400-0800) 4. Rotating shift schedule 5. Day or shift work with irregular/unstable hours. 6. Frequent TDY/travel or frequently on-call to report to work. 7. Crew schedule. 13. How often does your supervisor hold group meetings? 1. Never 4. Weekly 2. Occasionally 5. Daily 3. Monthly 6. Continuously 14. How often are group meetings used to solve problems and establish goals? 3. About half the time 1. Never 2. Occasionally 4. All of the time 15. What is your aeronautical rating and current status? 1. Nonrated, noc on aircrew 3. Rated, in crew/operations job 2. Nonrated, now on aircrew 4. Rated, in support job 16. Which of the following best describes your career or employment intentions? 1. Planning to retire in the next 12 months 2. Will continue in/with the Air Force as a career

- 3. Will most likely continue in/with the Air Force as a career
- 4. May continue in/with the Air Force
- 5. Will most likely not make the Air Force a career
- 6. Will separate/terminate from the Air Force as soon as possible

#### JOB INVENTORY

Below are items which relate to your job. Read each statement carefully and then decide to what extent the statement is true of your job. Indicate the extent to which the statement is true for your job by choosing the phrase which best represents your job.

Select the corresponding number for each question and enter it on the separate response sheet.

- 17. To what extent does your job require you to do many different things, using a variety of your talents and skills?
- 18. To what extent does your job involve doing a whole task or unit of work?
- 19. To what extent is your job significant, in that it affects others in some important way?
- 20. To what extent does your job provide a great deal of freedom and independence in scheduling your work?
- 21. To what extent does your job provide a great deal of freedom and independence in selecting your own procedures to accomplish it?
- 22. To what extent are you able to determine how well you are doing your job without feedback from anyone else?
- 23. To what extent do <u>additional duties</u> interfere with the performance of your primary job?
- 24. To what extent do you have adequate tools and equipment to accomplish your job?
- 25. To what extent is the amount of work space provided adequate?
- 26. To what extent does your job provide the chance to know for yourself when you do a good job, and to be responsible for your own work?
- 27. To what extent does doing your job well affect a lot of people?

28. To what extent does your job provide you with the chance to finish completely the piece of work you have begun?

ઈઉ

- 1 = Not at all5 = To a fairly large extent2 = To a very little extent6 = To a great extent3 = To a little extent7 = To a very great extent4 = To a moderate extent
- 29. To what extent does your job require you to use a number of complex skills?
- 30. To what extent does your job give you freedom to do your work as you see fit?
- 31. To what extent are you allowed to make the major decisions required to perform your job well?
- 32. To what extent are you proud of your job?

「そうない」というないが、「「「「」」というため、「「」」「「」」というないです。「「」」というないでは、「」」というないでは、「」」というないです。「「」」というないです。

- 33. To what extent do you feel accountable to your supervisor in accomplishing your job?
- 34. To what extent do you know exactly what is expected of you in performing your job?

•.

- 35. To what extent are your job performance goals difficult to accomplish?
- 36. To what extent are your job performance goals clear?
- 37. To what extent are your job performance goals specific?
- 38. To what extent are your job performance goals realistic?
- 39. To what extent do you perform the same tasks repeatedly within a short period of time?
- 40. To what extent are you faced with the same type of problem on a weekly basis?
- 41. To what extent are you aware of promotion/advancement opportunities that affect you?
- 42. To what extent do co-workers in your work group maintain high standards of performance?
- 43. To what extent do you have the opportunity to progress up your career ladder?
- 44. To what extent are you being prepared to accept increased responsibility?
- 45. To what extent do people who perform well receive recognition?
- 46. To what extent does your work give you a feeling of pride?

- 1 = Not at all2 = To a very little extent 3 = To a little extent
- 5 = To a fairly large extent 6 = To a great extent

7 = To a very great extent

- 4 = To a moderate extent
- 47. To what extent do you have the opportunity to learn skills which will improve your promotion potential?
- 48. To what extent do you have the necessary supplies to accomplish your job?
- 49. To what extent do details (tasks not covered by primary or additional duty descriptions) interfere with the performance of your primary job?
- 50. To what extent does a bottleneck in your organization seriously affect the flow of work either to or from your group?

#### JOB DESIRES

The statements below deal with job related characteristics. Read each statement and choose the response which best represents how much you would like to have each characteristic in your job.

In my job, I would like to have the characteristics described:

- 5 = A large amount 1 = Not at all2 = A slight amount 6 = A very large amount 3 = A moderate amount / - An extremely large amount 4 = A fairly large amount
- 51. Opportunities to have independence in my work.
- 52. A job that is meaningful.
- 53. An opportunity for personal growth in my job.
- 54. Opportunities in my work to use my skills.
- 55. Opportunities to perform a variety of tasks.
- 56. A job in which tasks are repetitive.
- 57. A job in which tasks are relatively easy to accomplish.

#### SUPERVISION

The statements below describe characteristics of managers or supervisors. Indicate your agreement by choosing the phrase which best represents your attitude concerning your supervisor.

- 1 = Strongly disagree 5 =
- 2 = Moderately disagree
- 5 = Slightly agree 6 = Moderately agree
- 7 = Strongly agree

3 = Slightly disagree

4 = Neither agree nor disagree

Select the corresponding number for each statement and enter it on the separate response sheet.

- 58. My supervisor is a good planner.
- 59. My supervisor sets high performance standards.
- 60. My supervisor encourages teamwork.
- 61. My supervisor represents the group at all times.
- 62. My supervisor establishes good work procedures.
- 63. My supervisor has made his responsibilities clear to the group.
- 64. My supervisor fully explains procedures to each group member.
- 65. My supervisor performs well under pressure.
- 66. My supervisor takes time to help me when needed.
- 67. My supervisor asks members for their ideas on task improvements.
- 68. My supervisor explains how my job contributes to the overall mission.
- 69. My supervisor helps me set specific goals.
- 70. My supervisor lets me know when I am doing a good job.
- 71. My supervisor lets me know when I am doing a poor job.
- 72. My supervisor always helps me improve my performance.
- 73. My supervisor insures that I get job related training when needed.
- 74. My job performance has improved due to feedback received from my supervisor.

- 75. When I need technical advice, I usually go to my supervisor.
- 76. My supervisor frequently gives me feedback on how well I am doing my job.

#### WORK GROUP PRODUCTIVITY

The statements below deal with the output of your work group. The term "your work group" refers to you and your co-workers who work for the same supervisor. Indicate your agreement with the statement by selecting the phrase which best expresses your opinion.

| 2 = | Strongly disagree<br>Moderately disagree<br>Slightly disagree | 4 = Neither agree nor disagree<br>5 = Slightly agree<br>6 = Moderately agree<br>7 = Strongly agree |
|-----|---------------------------------------------------------------|----------------------------------------------------------------------------------------------------|
|     |                                                               | 7 = Strongly agree                                                                                 |

Select the corresponding number for each statement and enter it on the separate response sheet.

- 77. The quantity of output of your work group is very high.
- 78. The quality of output of your work group is very high.
- 79. When high priority work arises, such as short suspenses, crash programs, and schedule changes, the people in my work group do an <u>outstanding</u> job in handling these situations.
- 80. Your work group always gets maximum output from available resources (e.g., personnel and material).
- 81. Your work group's performance in comparison to similar work groups is very high.

#### ORGANIZATION CLIMATE

Below are items which describe characteristics of your <u>organization</u>. The term "your organization" refers to your squadron or staff agency. Indicate your agreement by choosing the phrase which best represents your opinion concerning your organization.

1 = Strongly disagree5 = Slightly agree2 = Moderately disagree6 = Moderately agree3 = Slightly disagree7 = Strongly agree4 = Neither agree nor disagree

Select the corresponding number for each item and enter it on the separate response sheet.

1 = Strongly disagree

5 = Slightly agree

- 2 = Moderately disagree
- 3 =Slightly disagree
- 4 = Neither agree or disagree
- 6 = Moderately agree 7 = Strongly agree

- 82. Ideas developed by my work group are readily accepted by management personnel above my supervisor.
- 83. My organization provides all the necessary information for me to do my job effectively.
- 84. My organization provides adequate information to my work group.
- 85. My work group is usually aware of important events and situations.
- 86. My complaints are aired satisfactorily.
- 87. My organization is very interested in the attitudes of the group members toward their jobs.
- 88. My organization has a very strong interest in the welfare of its people.
- 89. I am very proud to work for this organization.
- 90. I feel responsible to my organization in accomplishing its mission.
- 91. The information in my organization is widely shared so that those needing it have it available.
- 92. Personnel in my unit are recognized for outstanding performance.
- 93. I am usually given the opportunity to show or demonstrate my work to others.
- 94. There is a high spirit of teamwork among my co-workers.
- 95. There is outstanding cooperation between work groups of my organization.
- 96. My organization has clear-cut goals.
- 97. I feel motivated to contribute my best efforts to the mission of my organization.
- 98. My organization rewards individuals based on performance.
- 99. The goals of my organization are reasonable.
- 100. My organization provides accurate information to my work group.

#### JOB RELATED ISSUES

The items below are used to determine how satisfied you are with specific job related issues. Indicate your degree of satisfaction or dissatisfaction with each issue by choosing the most appropriate phrase.

- 1 = Extremely dissatisfied
  2 = Moderately dissatisfied
- 5 Slightly satisfied
- 6 = Moderately satisfied
- 3 = Slightly dissatisfied
- 7 = Extremely satisfied
- 4 = Neither satisfied nor dissatisfied

Select the corresponding number for each question and enter it on the separate response sheet.

- 101. <u>Feeling of Helpfulness</u> The chance to help people and improve their welfare through the performance of my job. The importance of my job performance to the welfare of others.
- 102. Co-Worker Relationship My amount of effort compared to the effort of my co-workers, the extent to which my co-workers share the load, and the spirit of teamwork which exists among my co-workers.
- 103. Family Attitude Toward Job The recognition and the pride my family has in the work I do.
- 104. <u>On-the-Job Training (OJT)</u> The OJT instructional methods and instructors' competence.
- 105. <u>Technical Training (Other than WT)</u> The technical training I have received to perform my current job.
- 106. Work Schedule My work schedule; flexibility and regularity of my work schedule; the number of hours I work per week.
- 107. Job Security

ことの言葉をしていたが、「「「「」というというの言葉であるというため、「「「」というない」」では、「」というない」で、

- 108. Acquired Valuable Skills The chance to acquire valuable skills in my job which prepare me for future opportunities.
- 109. My Job as a Whole

which of the following best describes your career or employment intentions? Statement Statement Number 91 Yarlable Number 610

- Planning to retire in the next it wonths
   Utili continue in/with the Air Force at a
  - Career
- 3. Will most likely continue is/with the Air Force
- May consimulation that the Air Force
   Will most litely not oute the Air F
- Will most likely not make the Atr Force
  - a career 6. Vill separate/terminate from the Air Force as soon as possible

WDIE: Yarfable DOB, Statement II was added to the DAP on 19 Jan 80 and replaced variable OI4 which appears on page 6. Although no longer used, Variable OI4 is scill shown because data collected from about 25,000 samples for this variable are still in the data base.

FACTORS

ះ statements in the GAP. A mean score can be derived for each factor except 305, 809, 809 and 825 by using a "straight average." The formula for computing Each 800 series factor consists of two or more variables which correspond the exceptions is indicated. FACTOR BOO - Skill YAKIETY: Messures the degree to which a job requires a veriety of different tasks or accivities in carrying out the work; involves the use of a number of different skills and talents of the worker; skills required are <u>valued</u> by the worker.

| r<br>Statement      | fo what extent does your job require you to<br>do amony different things, using a variety<br>of your talents and skills? | To what estant does your Job require you to<br>use a number of complex skills? |
|---------------------|--------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
