OEIS OVERVIEW

The primary purpose of the Organizational Effectiveness Information System (OEIS) is to provide OE Staff Officers (OESOs) with case history information about previous OE Operations, and to provide a capability for producing and scoring surveys for use in ongoing operations. It is anticipated that OE operations will improve because OESOs will be able to capitalize on the successes and to learn from the failures of past operations. The system will also provide OE resource information which can be used by OESOs in the performance of their duties. Finally, the system will provide researchers with a data base containing information for describing potential causal links within OE operations.

The system is composed of three parts:

- * The Implementation and Design System (IDS) receives, stores and retrieves OE operation case histories. This portion of the system also includes routines which can be used to perform research on aggregates of cases and management report data.
- * The Survey System (SS) maintains a data base or "pool" of survey questions, generates a survey instrument tailored to OESO-provided specifications, and reports the results of the survey after it has been administered. Survey results will also be added to a normative data base of responses for summary or statistical reporting.
- * The Resource System (RS) provides personnel and library listings that could assist OESOs. It also contains continuing educational and professional development data and a calendar of planned OE events.

The use and operational characteristics of each of these subsystems is explained in detail in the following chapters of this User's Manual.

NOTE: For ease of presentation the following terms will be used as defined below:

- OESO - Organizational Effectiveness Staff Officer. The military consultant responsible for conducting the OE program.
- Client - The military organization using the OESO's services.
- User - The individual using this manual.

ABSTRACT (Continue on reverse side if necessary and identify by block number) This report contains the manual designed to be used with the prototype Organizational Effectiveness Information System (OEIS) (see ARI Research Note 84-131). The manual describes the Design and Implementation System (IDS), the Survey System (SS), and the Resource System (RS). Although the prototype OEIS was not implemented, this manual documents the details of entering and retrieving Organizational Development (OD) case data, constructing survey instruments from an item pool (as well as permitting the user to add extra items), and generating resource directories of persons, printed documents, and events.

FOREWORD

The Army Research Institute for the Behavioral and Social Sciences (ARI) conducted research on the Army's Organizational Effectiveness (OE) program for several years. Some of that research led to the development of this user's manual for the Organizational Effectiveness Information System (OEIS). Although the OEIS was never implemented (because of the phase-out of the OE program), this manual for the prototype system can be a useful reference for persons interested in developing other organizational development (OD) data bases.

ACCESSING THE OEIS

The current OEIS runs on the USAMSSA computer facility located at the Pentagon. It operates under the TSO operating system. To access the OEIS, a user must have a valid user ID and password for this facility. Information on obtaining access to this computer facility can be obtained by contacting the USAMSSA Information Center.

If you have a valid user ID, log onto the USAMSSA computer facility as you would for any other application. After you have successfully logged onto the system the TSO 'READY' prompt will appear. You are now ready to access the OEIS. To access the OEIS, at the 'READY' prompt type:

EXEC 'WNPU.OEIS.CLIST(OEIS)' (hit the enter key)

The system will now begin loading the OEIS system. You will see the following messages appear on your screen indicating that the system is loading:

...ACCESSING OEIS SYSTEM FILES

...ACCESSING OEIS LIBRARY FILES

The system will now prompt you for your OESO Identifier. All users of the OEIS must have a valid OESO Identifier. If you do not have a valid OESO Identifier, please contact your system administrator. After entering your Identifier the system will attempt to verify the information. If your OESO Identifier cannot be found in the list of valid users, the system will notify you and ask you to re-enter. This message will appear as follows:

PLEASE ENTER YOUR OESO IDENTIFIER> XXXXXX = (your Identifier)

VERIFYING OESO IDENTIFIER.....PLEASE WAIT

*** * * ERROR INVALID OESO IDENTIFIER
* * * PLEASE RE-ENTER**

If your OESO Identifier is valid, your screen will clear and the following message will appear indicating that you have entered the OEIS system.

*** * * WELCOME TO * * *
* * * ORGANIZATIONAL EFFECTIVENESS INFORMATION SYSTEM * * *
* * * VERSION 1.0 * * *
* * * JULY 05, 1984 * * ***

Three asterisks (***) will appear at the bottom left of your screen. Any time you see these, it indicates that the screen is full. Hit the ENTER key to display the next screen of information. After you hit the ENTER key the main OEIS system menu will appear. It will look like the following:

OEIS SYSTEM MENU

MENU OPTIONS

- (1) IMPLEMENTATION AND DESIGN SYSTEM
- (2) SURVEY SYSTEM
- (3) RESOURCE SYSTEM
- (X) EXIT THE OEIS SYSTEM

PLEASE ENTER OEIS SYSTEM OPTION
OR 'M' TO RETYPE MENU>

You may now enter any of the three subsystems of the OEIS by selecting the option number for that subsystem. After making your selection the appropriate menu for that subsystem will appear. For instructions for using these subsystems please refer to the appropriate chapters of the User's Manual.

We will examine each of these menu options in the manual. To access the OEIS Implementation and Design System simply enter a '1' and hit ENTER.

OEIS MAIN MENU - OPTION '1'

IMPLEMENTATION AND DESIGN SYSTEM (IDS)

The IDS is designed to provide the OESO with an automated mechanism for the collection of pertinent historical case information during a current case study. The Implementation and Design System is one of the three major subsystems contained in the Organizational Effectiveness Information System (OEIS). The IDS allows the OESO to store information in a structured format concerning specific aspects of a case study which can then be accessed by other OESOs performing a similar case. A case may be retrieved by other OESOs by supplying a set of selection criteria to be matched against existing cases. Giving the OESO a structured format by which the data is collected and stored also serves to structure the OESO approach to the case study. Each OESO is assigned a unique Identifier by which he/she is identified to the system. All case operations in the IDS system are "tagged" with the OESO Identifier and assigned a unique case number.

In the IDS, a case study is partitioned into six phases. Those phases are Case Initiation, Assessment, Planning, Implementation, Evaluation, and Closeout. In the following discussion, each phase and purpose is described.

Case Initiation Phase

The first phase of a case operation is the initiation of the case within the IDS system. Each new case will be registered and assigned a unique case number. The OESO will collect initiation data such as the client's MACOM, primary mission, the client's original purpose in wanting OE assistance, organization type, post/installation, start date of the operation, and the OESO's Identifier. The assigned case number resulting from case initiation will be the primary means by which that operation's data may be accessed.

Assessment Phase

During the assessment phase, the OESO gathers information concerning the assessment of the client's environment and initial identification of the problem. Based upon this assessment the OESO determines the likelihood of success in the operation.

Planning Phase

In the planning phase the OESO develops his/her plans to resolve the problems identified during the previous assessment as well as the level of support expected from the client's organization.

Implementation Phase

In this phase the OESO determines the implementation procedures for the plans just developed. In this phase the OESO identifies the roles and involvement levels of the client. The OESO should describe, in detail, the nature of the implementation effort so that other OESOs would understand how the implementation was conducted.

Evaluation Phase

The effectiveness of the OE operation is determined in this phase. The OESO collects information regarding the outcomes (both intended and unintended) of the implementation of his/her solutions to the problems identified during the assessment phase of the operation.

Clogeout Phase

During this last phase the OESO officially closes the operation. Upon closing the case the OESO creates an abstract of the case so that other OESOs may review the summary abstract to determine if further information regarding a case would be useful to them and should be retrieved.

Implementation and Design System Procedures

The purpose of this section is to provide the user the functional knowledge required to use the IDS. This section will identify the menus used within the IDS, the options available, and the data to be entered.

Upon entering the OEIS system the user will be prompted for his/her OESO Identifier. The user-supplied Identifier is verified and, if valid, the OEIS banner followed by the OEIS MAIN MENU will appear. Option (1), on the OEIS MAIN MENU will invoke the IDS and will display the IDS Menu shown below.

Following is a brief discussion of each of the above options of the IDS system.

OPTION (1) - CASE INITIATION

Option (1) of the IDS Menu allows the OESO to establish a new case within the IDS system. Each case established by the OESO will be "tagged" with the OESO's Identifier and will be assigned a unique case number. This unique case number must be used whenever access to a particular case is desired. The selection of Option (1) will result in the following display for data entry.

The user may press the 'TAB' key or the '->' key to move and enter the data requested.

REVIEW: --TYPE 'H' FOR HELP - 'D' TO EXIT
Entering the value ('Y', YES or 'N', NO) in this field will determine whether other OESOs will be allowed access to this case for informational purposes. An 'H' in this field will display the valid codes which can be used in this data entry screen. Before the case can be entered into the system the value must be 'Y' or 'N'.

PASSWORD:
Enter the password assigned to this case for update. This password must be supplied by the originating OESO prior to any update access to this case.

OESO1:
OESO2:
OESO3:
Enter the five character OESO Identifiers for any additional OESOs who may update this case operation in the IDS system.

MTHS AS OESO:

Enter the number of months for which the primary OESO has been an OESO.
Valid responses are 1 to 99.

OPER BEGIN:

Enter the month, day, year on which the operation began (MMDDYY).

PHASE INVOLVE:

Enter the phase in which the primary OESO involvement began in this case.
Valid responses are:

- D - Data Collection;
- A - Analysis;
- F - Feedback;
- P - Planning;
- I - Implementation;
- E - Evaluation;
- O - Other.

MACOM:

Enter the client's MACOM. Valid responses are listed in Appendix A.

UNIT TYPE:

Enter the client's unit type. Valid responses are listed in Appendix A.

PRIM. MISSION:

Enter the primary mission of the client's organization. Valid responses are listed in Appendix A.

MTHS IN POSITION:

Enter the length of time the OESO has been in his/her current position prior to the start of the operation. Valid responses are 1 through 99.

ORG. LEVEL:

Enter the level of the client in his/her organization. Valid responses are listed in Appendix A.

MTHS IN PRIOR ASSIGNMENT:

Enter the length of time the client has been in the position prior to the start of the operation. Valid responses are 1 through 99.

ORIG. PURPOSE:

Enter the client's original purpose in wanting OE assistance. Valid responses are listed in Appendix A.

INTERNAL LINK POSITION:

Enter the client's plans to employ an internal link. The internal link works with both the client and OESO to facilitate all aspects of the operation. Valid responses are listed in Appendix A.

GOAL ORIENTATION:

Enter the extent to which the client possesses an outcome orientation in which OE objectives are defined. Valid responses are 1 through 9 (1-Very Low, 9-Very High).

CLIENT'S ABILITY TO UNDERTAKE PLANNED CHANGE:

Enter the extent to which the client's organization is positioned to implement planned changes. Valid responses are 1 through 9 (1-Poorly Positioned, 9-Well Positioned).

CLIENT'S WILLINGNESS TO UNDERTAKE PLANNED CHANGE:

Enter the extent to which the client's organization is willing to implement planned changes. Valid responses are 1 through 9 (1-Very Unwilling, 9-Very Willing).

TARGETED SUBORDINATES' NEED FOR CHANGE:

Enter the extent to which the targeted subordinates need to implement planned changes. Valid responses are 1 through 9 (1-Very Low Need, 9 -Very High Need).

TARGETED SUBORDINATES' ABILITY TO COMMIT TO CHANGE:

Enter the extent to which the targeted subordinates are able to implement planned changes. Valid responses are 1 through 9 (1-Very Low Ability, 9 -Very High Ability).

TARGETED SUBORDINATES' WILLINGNESS TO COMMIT TO CHANGE:

Enter the extent to which the targeted subordinates are willing to implement planned changes. Valid responses are 1 through 9 (1-Very Unwilling, 9-Very Willing).

Once all the data has been supplied the user must press the ENTER key to update the OEIS system with the new case.

ENTRY ASSESSMENT:

After completing the above screen of data entry, the OESO is informed of the case number assigned by the system to the case operation. The system then displays an assessment as to the likelihood for success of the operation. This field is supplied by the system to estimate the likelihood of success in the use of OE. The OESO will be asked for explanation to support his/her decision to terminate or pursue this case operation. The narrative information is collected through the use of the IBM TSO editor. Before the user is placed into the TSO editor, the following message will appear:

**YOU WILL BE PLACED INTO THE TSO EDITOR ENVIRONMENT.
PLEASE CONSULT THE IBM TSO EDITOR MANUAL FOR ASSISTANCE.**

(label of text block being updated)

The system will display the OESO rating, if applicable, and then place the OESO in the editor environment. Below are the questions for which a narrative explanation will be requested.

The screen requires responses using three different coding schemes. These are as follows:

FINAL PLANNING - Enter the letter that most accurately indicates when final planning with the client took place.

- A PRIOR TO FEEDBACK TO THE CLIENT.
- B AFTER FEEDBACK TO THE CLIENT BUT PRIOR TO FEEDBACK TO THE CLIENT'S SUBORDINATES
- C AFTER FEEDBACK TO THE CLIENT'S SUBORDINATES

FEEDBACK AND IMPLEMENTATION - Enter the letter that indicates when feedback and implementation took place:

- A IN ONE OR SEVERAL MEETINGS WITH THE CLIENT AND HIS/HER SUBORDINATES
- B ON DISTINCTLY DIFFERENT OCCASIONS AND SEPARATED BY PLANNING FOR THE IMPLEMENTATION

RATE OVERALL RECEPTIVITY - Enter the number (between 0-9) that best indicates the client's overall receptivity to the OE effort.

**0 HOSTILE
:
5 NEUTRAL
:
9 SUPPORTIVE**

When the assessment phase has been updated to the user's satisfaction, then updates can be entered into the data base by pressing the 'ENTER' key. If the responses are all valid, and they are processed correctly, the following messages will be displayed.

. . .ASSESSMENT FILE HAS BEEN UPDATED. . .

ENTER/UPDATE ANOTHER SECTION OF ASSESSMENT PHASE?

OPTION (2) Enter/Update Intensity of Process Observations and Interviews

Selection of this option from the Assessment Update menu allows the user to edit the intensity of the process observations and interviews section of the structured case. This section is oriented around the levels in the client organization. The word "level" refers to the horizontal level within or above the client organization. For example, the XO or deputy and immediate staff constitutes level 1. The one-character code used to represent these levels follows:

S	Client's Supervisor Level	5	5th Level
C	Client	6	6th Level
1	1st level	7	7th Level
2	2nd Level	8	8th Level
3	3rd Level	9	9th Level
4	4th Level		

The user has the option of obtaining a listing of levels that are currently on the data base, and is prompted as follows:

DO YOU WANT A LIST OF EXISTING LEVELS? (Y,N)

If the user responds with a 'Y' a list of the existing levels is generated on the screen. Either a 'Y' or an 'N' gives the user the following option:

ENTER THE LEVEL YOU WISH TO ENTER/UPDATE DATA FOR:

Upon entering a valid level, the following screen is displayed:

***** UPDATE ASSESSMENT GENERAL TARGET *****

for WHO GAVE THE FEEDBACK

- 1 OESO gave all feedback
- 2 OESO gave feedback to work group leader, then leader gave feedback to subordinates
- 3 Trained internal organizational person(s) gave all feedback
- 4 Trained internal organizational person(s) gave feedback to workgroup leader, then leader gave feedback to subordinates.
- 5 Written feedback only.

When all of the responses are answered to the user's satisfaction, they can be entered into the data base by pressing the 'ENTER' key. If the responses are all valid and processed correctly, the following messages will be displayed.

. . . . EVALUATION FILE HAS BEEN UPDATED. . . .

ENTER/UPDATE ANOTHER SECTION OF ASSESSMENT PHASE?

OPTION (3) Enter/Update Special Target Groups

Selection of this option from the Assessment Update menu allows the user to edit the special target groups section of the structured case. This section is oriented around the levels in the client organization. The word "level" refers to the horizontal level within or above the client's organization. For example, the XO or deputy and immediate staff constitutes level 1. The one-character code used to represent these levels follows:

S	Client's Supervisor Level	5	5th Level
C	Client	6	6th Level
1	1st level	7	7th Level
2	2nd Level	8	8th Level
3	3rd Level	9	9th Level
4	4th Level		

LIST SPECIAL TARGET GROUP NUMBERS? (Y,N)

A 'Y' response to the above prompt gets a listing of the target groups currently maintained in the data base. Either response gets the following prompt:

ENTER TARGET GROUP NUMBER YOU WISH TO ENTER/UPDATE>

DO YOU WANT TO UPDATE SPECIAL TARGET DATA? (Y,N)

This prompt allows the user to either update the specific target group numbers or go directly to the TSO editor to update the description of the special target group. A 'Y' response to this prompt brings up the following screen:

```
***** UPDATE ASSESSMENT SPECIFIC TARGET GROUP *****
FOR CASE NUMBER:

OPTION (4) Enter/Update Survey Question Valuation

Selection of this option from the Assessment Update menu allows the user to edit the survey question valuation section of the structured case. This section is oriented around the levels in the client's organization. The word "level" refers to the horizontal level within or above the client's organization. For example, the XO or deputy and immediate staff constitute level 1. The one-character code used to represent these levels follows:

S	Client's Supervisor Level	5	5th Level

LIST SURVEY GROUP LEVELS? (Y,N)

A 'Y' response to this prompt produces a list of survey levels currently on the data base.

ENTER SURVEY GROUP LEVEL YOU WISH TO ENTER/UPDATE>

DO YOU WANT TO UPDATE ONLY LOCALLY GENERATED QUESTIONS FOR THIS SURVEY GROUP LEVEL? (Y,N)

A negative response to the last prompt generates the following screen:

***** UPDATE ASSESSMENT SURVEY RELATED INFORMATION *****

The OESO may press the 'TAB' key or the '->' key to move and enter the data requested. Once all the data have been supplied the user must press the 'ENTER' key to update the OEIS system with the new data.

IMPLEMENTATION PHASE STARTING DATE

Enter the date that the implementation phase began. The date format is in MMDDYY.

IMPLEMENTATION PHASE END DATE

Enter the date that the implementation phase was terminated. The date format is MMDDYY.

IMPLEMENTATION PHASE LAST UPDATE DATE

This field is maintained by the system. It shows the date on which the implementation phase was last updated.

CLIENT ROLE

This field identifies the client's objectives for the implementation. The client's role should be one of the following:

- 1 - Implementation was designed primarily to accomplish client's own objectives.
- 2 - Implementation was designed to accomplish client's objectives and to integrate subordinate objectives.
- 3 - Implementation was designed for client and subordinates to jointly identify and solve problems.

OESO'S ROLE

This field identifies the OESO's role during the implementation phase of the operation. The OESO's role should be one of the following:

- 1 - Primary facilitator or trainer for implementation.
- 2 - Only provides consultation to the client who provides facilitation, direction or training.
- 3 - Only provides consultation to client subordinate(s) who provides facilitation, direction or training.
- 4 - Primarily a process role - provide expert advice/guidance about process.
- 5 - Primarily a content expert role.
- 6 - Half process, half content role.

WAS A MID-COURSE CHANGE NEEDED DURING IMPLEMENTATION

This field is used to identify a mid-course change. Valid responses are 'Y' for yes, 'N' for no.

DID LEADERSHIP/MANAGEMENT APPROVE THE CHANGE

This field is used to identify whether the leadership and/or management approved of the change. Valid responses are 'Y' for yes, 'N' for no.

DID THE MID-COURSE CHANGE IMPROVE THE PROCESS

This field is used to identify whether the change resulted in improvements in the process. Valid responses are 'Y' for yes, 'N' for no.

WERE ADDITIONAL OE SERVICES REQUESTED

This field is used to identify whether follow up services have been requested by the OE client. Valid responses are 'Y' for yes, 'N' for no.

IF YES, WHAT IS THE CASE NUMBER

This field identifies the case number, within the OEIS system, which is the follow-up case operation.

CLIENT'S GENERAL REACTION TO THE IMPLEMENTATION

This field identifies the client's reaction to the implementation of the solution. Valid responses are as follows:

- 1 - Extremely Negative
- 2 - Negative
- 3 - Neutral
- 4 - Positive
- 5 - Extremely Positive
- 6 - Unknown

PARTICIPANTS' GENERAL REACTION TO THE IMPLEMENTATION

This field identifies participants' reaction to the implementation of the solution. Valid responses are as follows:

- 1 - Extremely Negative
- 2 - Negative
- 3 - Neutral
- 4 - Positive
- 5 - Extremely Positive
- 6 - Unknown

NON-PARTICIPANTS' GENERAL REACTION TO THE IMPLEMENTATION

This field identifies non-participants' reaction to the implementation of the solution. Valid responses are as follows:

- 1 - Extremely Negative
- 2 - Negative
- 3 - Neutral

Selection of this option from the IDS Menu allows the OESO to update the evaluation phase of the structured case. Entering '6' after the IDS Menu prompt results in the following messages.

ENTER CASE NUMBER YOU WISH TO UPDATE OR 0 TO EXIT>
ENTER THE CURRENT CASE PASSWORD>

The system will then verify that the user is authorized to update the case by checking the OESO Identifier(s), case password, and the closeout field. The following message is displayed.

ENTER/UPDATE ANOTHER SECTION OF EVALUATION PHASE?. ('Y'or 'N')

Option (2) Enter/Update Expectations

Selection of this option from the Evaluation Update menu allows the user to edit the expectations section of the structured case. The expectations for operations is oriented around the levels in the client organization. The word "level" refers to the horizontal level within or above the client's organization. For example, the XO or deputy and immediate staff constitute level 1. The one character code used to represent these levels follows:

S	Client's Supervisor Level	5	5th Level
U	Client	6	6th Level
1	1st Level	7	7th Level
2	2nd Level	8	8th Level
3	3rd Level	9	9th Level
4	4th Level		

The client has the option of obtaining a listing of levels that are currently on the database, and is prompted as follows upon entering '2' following the Evaluation Update Menu prompt.

DO YOU WANT A LIST OF LEVELS?

If the user responds with a 'Y' (yes) a list of the existing levels is generated on the screen. Either a 'Y' or an 'N' gives the user the following option:

ENTER THE LEVEL YOU WISH TO UPDATE OR ENTER:

Upon entering a valid level, the following screen is displayed:

Option (3) Enter/Update Problem Explanation

Selection of this option from the Evaluation Update menu allows the user to edit the problem explanations. Entering '3' after the Evaluation Update menu prompt results in the following display.

DO YOU WANT A LIST OF EXISTING PROBLEMS? (Y,N)

A response of 'Y' gives the user the option of obtaining a list of problems already on the database, or, if the user has a specific problem to update, a response of 'N' will take the user directly to the following messages:

DO YOU WANT TO ADD (A), CHANGE (C), OR DELETE (D)? (A,C,D).
ENTER THE PROBLEM NUMBER YOU WANT TO ADD, CHANGE, OR DELETE:.

Responding to these questions will bring up one of the following screens:

Responding 'Y' to this will delete only the problem number and outcome displayed. Any other response will cause no change to the data base.

After adding, changing or deleting the problem and outcome you will be prompted with the following question:

DO YOU WANT TO UPDATE PROBLEM TEXT? (Y,N).

An affirmative response ('Y') will place you in the TSO editor. The system retrieves current narrative data and the following message appears:

Option (7) - CLOSE OUT

Option 7 of the IDS Main Menu allows the primary OESO to officially terminate a case operation within the OEIS system. [The OESO has the option of closing out a case operation normally (the case was terminated in normal fashion), or prematurely (the case was terminated due to atypical circumstances)]. Once a case has been closed out, no further modifications to that case will be accepted by the OEIS system. Upon selection of this option, the user is prompted for the case number he/she wishes to update and the case password. Entering '7' after the IDS Menu prompt results in the following display.

ENTER CASE NUMBER YOU WISH TO UPDATE OR 0 TO EXIT>
ENTER THE CURRENT CASE PASSWORD>

The system will then verify that the user is authorized to update the case by checking the primary OESO Identifier, case password, and the close out field. The following message is displayed.

OPTION (8) AD HOC REPORTING

Option 8 of the IDS Main Menu allows the OESO to submit on-line interactive queries against the IDS system files. Upon selection of this option, the OESO may submit any valid FOCUS query request to the OEIS system. Once this option is selected the following message will be displayed.

** YOU ARE NOW IN FOCUS FOR AD HOC QUERY. YOU MAY USE ANY **
** OF THE STANDARD FOCUS COMMANDS. TYPE 'FIN' TO RETURN **

When the user has completed his/her ad hoc session, the command FIN is entered and the OESO is returned to the IDS Main Menu.

OPTION (9) Update Case Password/Additional OESO

Option 9 of the IDS Main Menu allows the primary OESO to modify the case access password and the OESO Identifier(s) that may access the case for updating.

Prior to modification of the existing information, the system will validate the OESO authorization to update the case. Upon entering '9' following the IDS Menu prompt the OESO is requested to supply the case number and current password of the case he/she wishes to update.

OPTION (1) Retrieve Selected Cases

This option allows the user to select specific cases from the OEIS database. The user is able to provide selection criteria for the cases, can review abstracts of these cases, and retrieve complete information about specific cases if desired. Entering '1' after the Reports Menu prompt produces the following display.

CASE RETRIEVAL INSTRUCTIONS

TO RETRIEVE SELECTED CASES, YOU MUST FOLLOW THESE SIMPLE INSTRUCTIONS

1. USE TAB KEYS TO MOVE THE CURSOR TO THE FACTOR YOU WISH TO USE AS YOUR SELECTION CRITERION, AND ENTER THE APPROPRIATE VALUE.
2. YOU ARE NOT REQUIRED TO FILL IN ALL REQUESTED VALUES FOR PERFORMING YOUR SELECTION; SIMPLY TAB OVER THE NON-APPLICABLE ITEMS.
3. YOU MAY ALTER ANY ENTRY, IF YOU CHANGE YOUR MIND, BEFORE PRESSING THE ENTER KEY. TO CHANGE YOUR ENTRY, TAB OVER TO THE FIELD YOU WISH TO CHANGE AND REENTER THE VALUE.
4. WHEN YOU ARE FINISHED, PRESS THE 'ENTER' KEY TO RETRIEVE THE DOCUMENTS THAT MATCH YOUR SELECTION REQUIREMENTS.

The second screen requests information from the user regarding selection criteria.

The valid codes for each of the selection items are listed on the screen. The user should refer to Appendix A for an explanation of the appropriate codes.

This approach to case retrieval is essentially a trial-and-error process. The number of selection factors provided directly impacts the number of cases retrieved. Providing too many factors will significantly limit the number of cases retrieved, while providing too few factors may result in a very large number of cases retrieved. The user may have to execute this option repeatedly, until an optimal number of cases are retrieved.

The following message and prompt appear when the selection criteria provided by the user resulted in no cases retrieved. This is usually due to over-restrictive selection. The user is asked whether he wishes to try again. If yes ('Y'), the user is returned to the case selection screen; if no ('N'), the user is returned to the IDS Main Menu.

YOUR SELECTION CRITERIA DID NOT MATCH ANY OF THE CASES STORED IN THE CASE DIRECTORY. PERHAPS YOU SHOULD PROVIDE FEWER SELECTION FACTORS.

DO YOU WISH TO TRY AGAIN (Y,N) >

If the user anticipates the retrieval of an extremely large number of cases, he/she may limit the number of cases to review by responding to the following prompt.

IF THE SEARCH RETRIEVES A LARGE NUMBER OF RECORDS, HOW MANY WOULD YOU WISH TO REVIEW ==>

The user enters the maximum number of cases which he/she is willing to review. The system will then retrieve selected cases up to the number provided by the user.

These prompts allow the user to select relevant cases and to print out the entire case information for these cases. The user continues to enter case numbers in response to the prompts until all case numbers have been entered. To print out the case information, the user enters 'END' in answer to the last case number prompt.

If multiple case numbers are entered, the case information will be printed in the following format:

1. Case initiation information for all selected cases;
2. Planning phase information for all cases;
3. Implementation phase information for all cases;
4. Assessment phase information for all cases; and
5. Evaluation phase information for all cases.

When reviewing the printouts, the user may find it necessary to reassemble cases by collating phase information for each case number listed in the printout.

OESOs also have the option of allowing others to review their cases during the course of an operation, or making case information unavailable until the case has been closed out. If a case selected by an OESO is not available for review, the following message will appear and the user will be returned to the prompts for PRINTING STRUCTURED CASE FORMAT FOR ENTIRE CASES.

. CASE NUMBER 3 IS NOT AVAILABLE FOR REVIEW.

Options (2-4) Report Generators

Each of these options automatically generates reports as indicated. No further explanation is needed.

OPTION (2) - Entering '2' after the Report Menu prompt generates a report of all open cases in the OEIS data base. This report provides case status information for all cases listed as open as of the report request date.

OPTION (3) - Entering '3' after the Report Menu prompt generates a report of all closed cases in the OEIS data base. This report provides case status information for all cases listed as closed as of the report request date.

OPTION (4) - Entering '4' after the Report Menu prompt generates a report of all cases initiated in the OEIS data base. This report provides case status information on all cases initiated as of the report request date.

OPTION (X) - Selection of this option returns the user to the IDS Main Menu.

OEIS MAIN MENU - OPTION (2): SURVEY SUBSYSTEM

This chapter contains documentation to allow the user to prepare and analyze OE surveys. Such surveys are frequently used by OESOs to gather data about a current situation as well as to evaluate the relative success of an OE intervention at some time after its completion. When the user selects Option (2) from the OEIS MAIN MENU the type of terminal used must be indicated. The Survey System can be run on either a full-screen CRT or a standard hardcopy terminal. The type of prompting received will be determined by the nature of the terminal used. The prompting will appear as follows:

PLEASE ENTER YOUR TERMINAL TYPE
(T = HARDCOPY OR C = CRT) >

After responding to the terminal type prompt, the following menu will appear on the screen.

OPTION (1) CREATE A NEW SURVEY INSTRUMENT

Selection of this option will allow the user to create a new survey instrument.

Having entered this option, the following information screen will appear.

CREATE A SURVEY INSTRUMENT

THIS PROCEDURE WILL PROMPT YOU FOR THE INFORMATION NECESSARY TO CREATE A NEW SURVEY INSTRUMENT. IT WILL AUTOMATICALLY INSERT THE DEMOGRAPHIC AND CORE QUESTIONS AND THEN WILL PROMPT YOU TO ADD STANDARD AND AD HOC QUESTIONS. YOU WILL BE LIMITED TO A TOTAL OF 130 QUESTIONS. (THIS INCLUDES THE DEMOGRAPHIC AND CORE QUESTIONS.)

TO CREATE A SURVEY INSTRUMENT YOU MUST HAVE A VALID CASE NUMBER AND A VALID OESO IDENTIFIER. YOU WILL BE PROMPTED FOR THESE FIRST AND MAY NOT CONTINUE UNLESS THEY ARE VERIFIED.

DO YOU HAVE A VALID CASE NUMBER (Y,N) ? >>

A valid case number is required which can be associated with the survey instrument to be created. If one exists, enter a 'Y', if not, enter a 'N' and return to the Survey System Main Menu.

If a 'Y' is entered then a prompt for the case number and the OESO Identifier of the case author will appear. The prompt will appear as follows.

ENTER THE CASE NUMBER ASSOCIATED WITH THIS SURVEY >>

ENTER YOUR OESO IDENTIFIER >>

** PLEASE STANDBY ... PROCESSING YOUR SURVEY **

>

After entering this information, the system verifies that it is correct. If the combination of case number and OESO Identifier does not exist, the following message will appear.

YOUR CASE NUMBER (12345) AND OESO IDENTIFIER (99999) DO NOT EXIST AS A VALID COMBINATION.

DO YOU WISH TO RE-ENTER ? >>

To try again, respond with a 'Y' and the prompt will be repeated. If not, enter an 'N' and be returned to the Survey System Main Menu.

If the case number is correct, the prompting to create a survey will resume. The first information requested will be to enter a comment line of text. This comment line is optional and may be skipped by entering an 'N' when prompted. This line of text is for notes to be associated with the survey instrument. The prompting will appear as follows:

YOU MAY, IF YOU WISH, ENTER UP TO 1 LINE (60 CHARACTERS) OF COMMENT
TEXT FOR THIS SURVEY. THIS TEXT CAN BE USED IN ANY WAY YOU CHOOSE.

DO YOU WISH TO ENTER A COMMENT ? >>

ENTER YOUR COMMENT (60 CHARACTERS) >>

The next information prompt is the MACOM code. A list of the valid codes appears in Appendix A. Enter the code for the MACOM being surveyed. The prompt will appear as follows:

ENTER MACOM CODE OF THE SURVEYED ORGANIZATION >>

** PLEASE STANDBY ... PROCESSING YOUR SURVEY **

All of the basic survey information has now been entered. The system will now create the survey instrument, assign it a unique number, and load in the demographic and core questions. When this is completed the following will appear:

ADD SURVEY QUESTIONS

YOUR SURVEY NUMBER 30 HAS BEEN CREATED. IT ALREADY CONTAINS THE DEMOGRAPHIC AND CORE QUESTIONS WHICH ARE PART OF EVERY SURVEY CREATED. YOU MAY NOW ADD STANDARD AND AD HOC QUESTIONS TO YOUR SURVEY STARTING WITH QUESTION NUMBER 25.

YOU WILL BE PROMPTED AS TO WHAT TYPE OF QUESTION YOU WISH TO ADD. YOU MAY ADD UP TO 106 MORE QUESTIONS FOR A TOTAL OF 130. PLEASE SUPPLY THE REQUESTED INFORMATION WHEN PROMPTED.

ENTER TYPE OF QUESTION TO ADD >>

The user can now add standard and ad hoc questions to the survey. Standard questions are questions catalogued in the question pool data base. They may be selected by entering the question number under which they are catalogued. Ad hoc questions allow the user to enter up to three (3) lines of text to formulate his/her own questions. Please remember, ad hoc questions must still use the two response (like-it-to-be, as-it-is) Likert scale (1-5) as do all other questions. No text responses are permitted. OPTION (2) SCORE THE RESULTS OF THE SURVEY

Selection of this option will allow the user to upload scored survey results from an optical mark scanner device.

The details of this portion of the User's Manual will depend on the Mark Sensing Device ultimately procured by the Army for this project.

OPTION (3) ENTER THE SURVEY REPORTING SYSTEM

When selecting this option, the following menu will appear:

STANDARD REPORT
MENU

REPORT OPTIONS

- (1) STANDARD REPORT A
- (2) STANDARD REPORT B
- (3) STANDARD REPORT C
- (4) STANDARD REPORT D
- (5) FOCUS AD HOC QUERY
- (X) EXIT THE REPORTING SYSTEM

PLEASE ENTER THE NUMBER OF YOUR
CHOICE OR 'M' TO RETYPE THE MENU.
ENTER THE NUMBER OF YOUR CHOICE>>

This menu offers four standard reports. In addition the user has access to the FOCUS editor to make ad hoc queries against the survey results data base. To use the FOCUS ad hoc query please refer to the FOCUS User's Manual.

When you select 'X' to exit the system you will be returned to the Survey System Main Menu.

OPTION (4) PRINT OUT AN OLD SURVEY INSTRUMENT

Selection of Option 4 allows the user to print out surveys that have been prepared in the past.

Under this option, the system will prompt for the number of the survey instrument to be reprinted. It will then ask to verify that survey number request. Once verified, the system will attempt to reprint the survey instrument. If it cannot find the requested survey, it will offer a chance to re-enter this request. If it is found, the system will output a copy of the survey instrument. The prompting sequence will appear as follows:

```
*****  
REPRINT SURVEY INSTRUMENT  
UTILITY

> PAUSE.. PLEASE ADJUST PAPER AND ISSUE CARRIAGE RETURN

OPTION (5) REPORT NORMATIVE DATA

Selection of this option allows most users to develop reports comparing individual survey results against the results for all surveys (regardless of author) for the 'core' questions that appear on all surveys.

When you select this option the following menu will appear:

NORMATIVE DATABASE
REPORTING SYSTEM

REPORT OPTIONS

- (1) STANDARD REPORT A
- (2) STANDARD REPORT B
- (3) STANDARD REPORT C
- (4) STANDARD REPORT D
- (5) FOCUS AD HOC QUERY
- (X) EXIT THIS REPORTING SYSTEM

ENTER NORMATIVE DATABASE REPORT OPTION
NUMBER OR 'M' TO RETYPE THE MENU.
ENTER OPTION NUMBER>>

This menu offers four standard reports as well as access to FOCUS for ad hoc queries against the normative database. To use the FOCUS ad hoc query, please refer to the FOCUS User's Manual.

When you select 'X' to exit the system you will return to the Survey System Main Menu.

OPTION (6) MAINTAIN THE QUESTION POOL

When this option is selected, the following menu will appear:

QUESTION POOL DATABASE
MAINTENANCE SYSTEM

MENU OPTIONS

- (1) ADD A STANDARD QUESTION
- (2) MODIFY A STANDARD QUESTION
- (3) ARCHIVE A STANDARD QUESTION
- (4) ENTER THE REPORTING SYSTEM
- (X) EXIT THIS PROCEDURE

ENTER QUESTION POOL MAINTENANCE OPTION
NUMBER OR 'M' TO RETYPE THE MENU.

These options may be executed in either full-screen (CRT) or hardcopy mode. The following examples are all done using hardcopy. If accessing the system using full-screen mode, prompts for the same data appear in full-screen format.

OPTION (1) Add a Standard Question

When this option is selected, the following instructions will be displayed:

ADD A NEW STANDARD QUESTION

THIS PROCEDURE WILL PROMPT YOU FOR THE INFORMATION NECESSARY TO ADD A NEW STANDARD QUESTION TO THE QUESTION POOL DATABASE. PLEASE SUPPLY ALL THE REQUESTED INFORMATION. IF THE QUESTION YOU ARE ENTERING HAS FEWER THAN THREE LINES OF TEXT, ENTER 3 BLANKS (SPACE BAR 3 TIMES) AND HIT THE CARRIAGE RETURN.

YOU MAY ADD AS MANY QUESTIONS AS YOU WOULD LIKE WITHOUT EXITING THIS PROCEDURE. WHEN YOU ARE THROUGH ADDING QUESTIONS, ENTER 'END' WHEN PROMPTED FOR THE QUESTION SOURCE TO UPDATE THE DATABASE AND EXIT THE PROCEDURE.

Immediately after these instructions, the system will begin prompting for the following standard question information.

Question Source: Up to 12 characters describing the source of the question.

Scheduled Review Date: The date, usually 1 year after the date of entering the question, that the question should be reviewed. (MMDDYY)

Question Subject Code: The code representing the subject area of the new question (see Appendix B).

The system will then prompt for up to three lines that represent this new question. If the question is less than three lines enter 3 spaces and hit the ENTER key for those extra lines.

ENTER THE QUESTION SOURCE (MAX OF 12 CHARACTERS)=>
ENTER THE SCHEDULED REVIEW DATA (MMDDYY)>>
ENTER QUESTION SUBJECT CODE>>

ENTER TEXT OF QUESTION

LINE TEXT 1 =>
LINE TEXT 2 =>
LINE TEXT 3 =>

After the system accepts this input it will assign a question number to the information and begin prompting for the next question. From now on, the question just entered can be referenced by this number. The number assigned will appear as follows:

YOUR QUESTION HAS BEEN ADDED TO THE DATABASE. IT HAS BEEN ASSIGNED NUMBER 26

When there are no additional questions to enter, type 'END' when prompted for the question source. The user will be returned to the Question Pool Maintenance menu.

OPTION (2) - Modify a Standard Question

When this option is selected, the following instructions will be displayed:

MODIFY A QUESTION

THIS PROCEDURE WILL ALLOW YOU TO CHANGE INFORMATION RELATED TO AN EXISTING QUESTION. YOU WILL BE FIRST PROMPTED FOR THE NUMBER OF THE QUESTION YOU WISH TO UPDATE. THEN THE SYSTEM WILL DISPLAY THE EXISTING VALUES FOR THE FIELDS YOU MAY UPDATE. AT THAT POINT YOU MAY THEN CHANGE ANY OF THE VALUES DISPLAYED. THE SYSTEM WILL PROMPT YOU FOR EACH OF THE FIELDS; IF YOU WISH TO CHANGE THE EXISTING VALUE SUPPLY THE NEW VALUE AT THE PROMPT. IF YOU DO NOT WISH TO CHANGE THE VALUE ENTER A '.' WHEN PROMPTED FOR IT.

THIS PROCEDURE ALLOWS YOU TO MODIFY AS MANY QUESTIONS AS YOU WOULD LIKE WITHOUT EXITING THE SYSTEM. WHEN YOU ARE THROUGH MODIFYING QUESTIONS, TYPE 'END' WHEN PROMPTED FOR THE QUESTION NUMBER YOU WOULD LIKE TO MODIFY.

Immediately after these instructions, the system will prompt for the number of the question to be modified. After entering this number press RETURN, and the system will print out the information it has recorded for that question number. If the question number cannot be found, the system will display a message and reprompt for a new question number. The information will be displayed as follows:

>
QUESTION NUMBER YOU WOULD LIKE TO MODIFY>>

QUESTION SOURCE = MICKEY
SCHEDULED REVIEW DATE = JUL 01 85
QUESTION SUBJECT CODE = 01

TEXT OF QUESTION

LINE ONE : THIS IS LINE ONE OF A STANDARD QUESTION
LINE TWO : THIS IS LINE TWO OF A STANDARD QUESTION
LINE THREE : THIS IS LINE THREE OF A STANDARD QUESTION

The system will then begin prompting for changes. To change the value of a field enter the new value when prompted and it will replace the previous value. If no change is to be made in a field enter a '.' for that field and it will remain unchanged. The prompt will appear as follows:

QUESTION SOURCE=>
SCHEDULED REVIEW DATE (MMDDYY)=>
QUESTION SUBJECT CODE=>
LINE ONE OF TEXT=>
LINE TWO OF TEXT=>
LINE THREE OF TEXT=>

When there are no other questions to modify, type 'END' when prompted for the Question Number to modify. The user will be returned to the Question Pool Maintenance menu.

OPTION (3) Archive A Standard Question

When this option is selected, the following instructions will be displayed.

ARCHIVE A STANDARD QUESTION

THIS PROCEDURE ALLOWS YOU TO ARCHIVE A STANDARD QUESTION. YOU WILL BE FIRST PROMPTED FOR THE QUESTION NUMBER. THE SYSTEM WILL THEN ASK YOU TO VERIFY THE NUMBER YOU ENTER. A CHECK WILL BE MADE TO MAKE SURE THE NUMBER YOU ENTER IS A STANDARD QUESTION. WHEN THIS IS CONFIRMED YOU WILL BE NOTIFIED THAT THE QUESTION HAS BEEN ARCHIVED. THE SYSTEM AUTOMATICALLY ENTERS THE DATE ARCHIVED INTO THE DATABASE.

Following these instructions, the system will prompt for the question number to be archived. It will ask for confirmation of this number. If you confirm it, the question will be archived. If an 'N' is entered the archive procedure will be aborted for that question number, and the system will ask if another question is to be archived. Respond 'Y' to continue archiving questions, 'N' to return to the menu. The entire sequence will appear as follows:

ENTER THE QUESTION NUMBER YOU WISH ARCHIVED>>

YOU HAVE ENTERED 26 :

OPTION (X) Return to the OEIS Main Menu

When this option is selected, the user is returned to the main OEIS environment. The user will be prompted as to whether they wish to access any of the other OEIS menu options. If the user replies 'Y' he/she will be prompted for the OEIS option number or offered a chance to review the menu. If the user responds 'N' they will exit the OEIS system.

OEIS MAIN MENU - OPTION (3): RESOURCE SYSTEM

This chapter documents the user procedures for the Resource System (RS) of the Organizational Effectiveness Information System (OEIS). The Resource System is comprised of directories: the Personnel Directory, the Library Directory, and the Event Directory.

Within each directory, the user can interact with the RS in three ways. These are:

- * Option Selection, where the user selects a processing option.
- * Option Processing, where the user actually executes a function of the RS. This option makes use of FOCUS's full screen data entry capability. To enter the data, simply use the TAB key or the '->' key to position the cursor at the appropriate data entry position. The cursor will automatically move to the next data entry position when all character positions for a particular data field have been filled.
- * Decision Points, where the user is given several options from which to choose (continue, quit, etc.).

When OPTION (3) is chosen from the OEIS MAIN MENU, the following screen is displayed:

```

ENTER RECORD NUMBER OR TYPE ZERO (0) TO EXIT.

ENTER RECORD NUMBER: > 16

The OESO should review the summary data to verify that the correct record has been found. The user should note the record number, if not previously known, of the record to be modified. This record number is used to access certain other information. If the correct record is listed enter 'Y', if an incorrect record is listed enter 'N'.

To modify a record, enter the number of the record to be modified. Type '0' if you wish to exit this procedure and return to the Personnel Directory Menu. If no records are found, or the wrong record is retrieved, you will be asked if you wish to try again. Type 'Y' if you wish to continue, 'N' if you wish to return to the Personnel Directory Menu.

When the user has indicated that the correct record has been selected for modification, all current information will appear on the screen.

OPTION (4) Generate Confirmation Letter

Choice of Option (4) will result in the generation of the following letter.

OPTION (5) Query Personnel Directory

Option 5 of the Personnel Directory Menu allows the user to identify OE resources who possess up to three (3) particular skill codes. (Appendix C contains a list of valid skill codes.)

The following prompts appear when Option 5 is selected.

PLEASE ENTER THE SKILL CODES OF THE PERSONNEL YOU WISH TO DISPLAY

ENTER FIRST SKILL CODE --- >
ENTER SECOND SKILL CODE --- >
ENTER THIRD SKILL CODE --- >

The user may enter up to three skill codes. The system will then retrieve Personnel Resource records for OE resources that match any of the skill codes entered.

To enter fewer than three (3) codes, press the space bar to advance the cursor. Do not press the RETURN key or you will be reprompted for that skill code.

When no records in the Personnel Directory match the skill codes entered, the following message appears.

NO RECORDS FOUND FOR SKILL CODES 1,2,3

DO YOU WISH TO TRY AGAIN?

ENTER Y FOR YES, N FOR NO >

This means that either no one in the directory has the skills required or the skill codes have been mistyped.

Verify that the skill codes are valid and enter 'Y' if you wish to try again. Enter 'N' if you wish to return to the Personnel Directory Menu.

If the search for OE resources with the selected skills is successful, the following information is provided by the Personnel Directory.

APPENDIX C: LISTING OF VALID RESOURCE SYSTEM CODES

This Appendix defines the coded values to be entered by users of the Resource System. It is subdivided into three sub-appendices, which reflect the codes used in each of the three Resource System directories:

- o Personal Directory
- o Document Directory
- o Event Directory

Where the codes were available, the valid code values and code explanations have been provided.

Codes values which were not available have been identified. These codes, and their respective code explanations must be developed and inserted at the appropriate data element category.

These code values should be developed in accordance with the format defined for the specific data element. The data elements and associated formats can be found in the master file descriptions which accompany this report. An index of the data element names and the file names in which they are described follow this page.
