THE SECRETARY OF TRANSPORTATION

WASHINGTON, D.C. 20590

April 10, 1989

The Honorable Dan Quayle
President of the Senate
Washington, DC 20510

Dear Mr. President:

It is with pleasure that I submit to you the Seventh Annual Report of Accomplishments Under the Airport Improvement Program as required by Section 521 of the Airport and Airway Improvement Act of 1982.

A report has also been sent to the Speaker of the House.

Sincerely,

A handwritten signature in cursive script, reading 'Samuel K. Skinner', is positioned above the printed name.

Samuel K. Skinner

Enclosure

THE SECRETARY OF TRANSPORTATION

WASHINGTON, D.C. 20590

April 10, 1989

The Honorable Jim Wright
Speaker of the House of
Representatives
Washington, DC 20515

Dear Mr. Speaker:

It is with pleasure that I submit to you the Seventh Annual Report of Accomplishments Under the Airport Improvement Program as required by Section 521 of the Airport and Airway Improvement Act of 1982.

A report has also been sent to the President of the Senate.

Sincerely,

A handwritten signature in cursive script, reading "Samuel K. Skinner". The signature is written in dark ink and is positioned above the printed name.

Samuel K. Skinner

Enclosure

FOREWORD

This annual report of the Airport Improvement Program (AIP) for the fiscal year ending September 30, 1988, is the seventh report of activity under authority granted by the Airport and Airway Improvement Act of 1982, as amended.

In fiscal year 1988, new AIP grants and amendments to previous grants totaled \$1,289.8 million. The 1,251 new grants amounted to \$1,278.3 million and were issued for use at the types of airports and for integrated airport system planning as follows:

<u>Airport Type</u>	<u>Grants</u>	<u>Amount</u>
Primary Airports	521	\$896.8 million
Smaller Commercial Airports	76	47.1 million
Reliever Airports	157	138.3 million
Other General Aviation Airports	448	189.0 million
Integrated Airport System Planning	49	7.1 million

During the 7-year authorization of the AIP, 7,488 grants have been issued totaling \$6.3 billion. Charts I and II show by airport type the number of grants issued and funds provided, respectively. Chart III shows the kinds of airport development and associated AIP funds.

The Airport Improvement Program is authorized through fiscal year 1992.

SEVENTH ANNUAL REPORT OF ACCOMPLISHMENTS UNDER THE

AIRPORT IMPROVEMENT PROGRAM

Section 521 of the Airport and Airway Improvement Act of 1982 as amended, requires that the Secretary of Transportation submit an annual report to Congress describing the accomplishments of the airport grant program. This report covers activities for the fiscal year ending September 30, 1988.

BACKGROUND

The Federal Government initiated a grants-in-aid program shortly after the end of World War II to promote the development of a system of airports to meet the Nation's needs. This early program, the Federal-aid Airport Program (FAAP) was established with the passage of the Federal Airport Act of 1946 and drew its funding from the general fund of the treasury.

In 1970, a more comprehensive program was established with the passage of the Airport and Airway Development Act of 1970. This Act provided for airport planning under the Planning Grant Program (PGP) and for airport development under the Airport Development Aid Program (ADAP). These programs were funded from a new Airport and Airway Trust Fund, into which were deposited revenues from several aviation user taxes on such items as airline fares, air freight, and aviation gasoline. The Act, after several amendments and a 1-year extension, expired on September 30, 1981.

The successor grant program, known as the Airport Improvement Program (AIP), was created by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, September 3, 1982). It provided assistance under a single program for airport planning and development through funding from the Airport and Airway Trust Fund. The 1982 Act also contained a provision to make funds available for noise compatibility planning and to carry out noise compatibility programs as authorized by the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193).

The Airport and Airway Improvement Act has been amended three times. The Continuing Appropriations Act (Public Law 97-276, October 2, 1982) added a section providing authority to issue discretionary grants in lieu of unused apportioned funds under certain circumstances, and the Surface Transportation Assistance Act (Public Law 97-424, January 6, 1983) increased the annual authorizations for the AIP for fiscal years 1983-1985.

The latest amendment was on December 30, 1987, when the President signed the Airport and Airway Safety and Capacity Expansion Act of 1987. This Act extended the authority for the AIP for 5 years through the end of fiscal year 1992 and authorized \$1.7 billion each year through 1990 and \$1.8 billion each year for FY 1991 and 1992. This amendment also authorized a new procedure in which a sponsor is advised of Federal intentions to fund long-term high priority capacity projects as appropriations allow and to reimburse sponsors for certain specified work performed before a grant is received. This procedure is implemented through a "Letter of Intent" issued to sponsors.

Another provision of the Airport and Airway Safety and Capacity Expansion Act of 1987 authorized a State block grant pilot program during fiscal years 1990 and 1991. This pilot program is implemented by Federal Aviation Regulation Part 156 under which up to three States will assume administrative responsibilities for AIP grants at other than primary airports. The pilot program will identify administrative functions which might successfully be shifted to or shared with States.

Other provisions of the Airport and Airway Safety and Capacity Expansion Act of 1987 pertaining to airport improvement include: establishment of a discretionary fund set-aside for projects to enhance systemwide capacity, safety, security, and noise compatibility; a redefinition of primary airports to include all airports enplaning more than 10,000 passengers annually; revision of the Federal share of terminal building construction from 50 percent to 75 percent; provision of a cargo apportionment to airports with a substantial cargo operation separate from the passenger enplanement apportionment; funding of soundproofing for public schools and hospitals in a noise-impacted environment without a Part 150 noise study; and a requirement that 10 percent of the funds made available under the AIP be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals, known as the Disadvantaged Business Enterprises Program.

The Airport and Airway Improvement Act also requires the Secretary of Transportation to publish a biennial report on the status of the National Plan of Integrated Airport Systems (NPIAS). The NPIAS emphasizes system planning and development to meet current and future airport needs; it includes development considered necessary to provide a safe, efficient, and integrated airport system meeting the needs of civil aviation, national defense, and the postal service. An airport must be included in this plan in order to be eligible to receive a grant under the AIP. The first edition of the NPIAS covering 1984-1993 was transmitted to the Congress on August 2, 1985. The second edition covering 1986-1995 was sent to the Congress on September 29, 1987. The revised plan includes a total of 3,709 airports; 419 primary, 147 commercial service, 244 reliever, 2,449 general aviation, and 466 new airports.

Chart IV depicts the various functions legislated by the three major grant program authorization Acts since 1946: FAAP, ADAP, and AIP.

POLICY

In formulating the Airport and Airway Improvement Act, the Congress included a "Declaration of Policy" section which sets forth the following statements of policy:

- The safe operation of the airport and airway system will continue to be the highest aviation priority.
- The continuation of airport and airway improvement programs and more effective management and utilization of the Nation's airports are required to meet the current and projected growth of aviation and the requirements of interstate commerce, the postal service, and the national defense.

- The Act should be administered in a manner to provide adequate navigation aids and airport facilities, including reliever airports and reliever heliports, for points where scheduled commercial air service is provided.
- The Act should be administered in a manner consistent with a comprehensive airspace system plan to maximize the use of safety facilities, with highest priority for commercial service airports, including but not limited to, the goal of installing, operating, and maintaining, to the extent possible under available funds and given other safety needs, a precision approach system, a vertical visual guidance system, and a full approach light system for each primary runway, grooving or friction treatment of all primary and secondary runways, a nonprecision instrument approach for all secondary runways, runway end identifier lights on all runways that do not have an approach light system, electronic or visual vertical guidance on all runways, distance-to-go signs for each primary and secondary runway, a surface movement radar system at each Category III airport, a taxiway lighting and sign system, runway edge lighting and marking and radar approach coverage for all airport terminal areas. (Note: The Facilities and Equipment Appropriation provides funding for items meeting published establishment criteria that are not included in airport development grants.)
- The Act should be administered in a manner consistent with the Federal Aviation Act of 1958 with due regard for the goals expressed therein of fostering competition, preventing unfair competition in air transportation, maintaining essential air transportation, and preventing unjust and discriminatory practices.
- Special emphasis should be given to reliever airports and their development.
- Development of cargo hub airports should be facilitated because of their critical role in the movement of commerce through the airport and airway system.
- Aviation facilities should be constructed and operated with due regard to minimizing current and projected noise impacts on nearby communities.
- The Federal administrative requirements placed upon airport sponsors can be reduced and simplified through the use of a single project application to cover all airport improvement projects to be undertaken in a particular year.
- It is in the national interest to develop in metropolitan areas an integrated system of airports designed to provide expeditious access and maximum safety.
- Airport construction and improvement projects which increase the capacity of facilities to accommodate passenger and cargo traffic, thereby increasing safety and efficiency and reducing delays, should be undertaken to the maximum feasible extent.

- It is in the national interest to ensure that nonaviation usage of navigable airspace be accommodated but not allowed to decrease the safety and capacity of the airspace and airport system.
- Artificial restrictions on airport capacity are not in the public interest and should not be imposed to alleviate air traffic delays unless other reasonably available and less burdensome alternatives have first been attempted.

AIRPORT IMPROVEMENT PROGRAM

The Airport and Airway Improvement Act of 1982 authorizes the Secretary of Transportation to make grants for airport planning and development under the Airport Improvement Program (AIP).

Annual Authorization

Authorization levels for the program are as follows:

<u>Fiscal Year</u>	<u>Authorization Levels</u>
1982	\$ 450,000,000
1983*	\$ 800,000,000
1984*	\$ 993,500,000
1985*	\$ 987,000,000
1986	\$ 1,017,000,000
1987	\$ 1,017,200,000
1988	\$ 1,700,000,000
1989	\$ 1,700,000,000
1990	\$ 1,700,000,000
1991	\$ 1,800,000,000
1992	\$ 1,800,000,000

Total \$13,964,700,000

- * The annual authorizations included \$200 million for each of the fiscal years 1983 and 1984 and \$75 million for fiscal year 1985 as authorized in the Surface Transportation Assistance Act (STAA) of 1982 (Public Law 97-424, January 6, 1983).

Airport Categories

The airport funding categories consist of commercial service, primary, reliever, and general aviation airports and are defined as follows:

A commercial service airport is a public airport which enplanes 2,500 or more passengers annually and receives scheduled passenger service.

A primary airport is a commercial service airport which enplanes more than 10,000 passengers annually.

A reliever airport is one that has been designated as having the function of relieving congestion at a commercial service airport and providing more general aviation access to the overall community.

General aviation airports, although not specifically defined in the 1982 Act, comprise the largest single group of airports in the U.S. airport system; these are the airports that remain after exclusion of the commercial service and primary airport categories.

The statutory definition of an airport is any area of land or water used for landing and takeoff of aircraft and includes, within the above four categories of airports, special types of facilities such as seaplane bases and heliports.

Distribution of Funds

Not more than 49.5 percent of the annual amount authorized to be obligated may be provided as entitlements to primary and cargo service airports. These funds were apportioned in FY 1988 as follows:

Primary Airports

- \$7.80 for each of the first 50,000 enplaned passengers
- \$5.20 for each of the next 50,000 enplaned passengers
- \$2.60 for each of the next 400,000 enplaned passengers
- \$0.65 for each passenger in excess of 500,000 enplaned passengers

In FY 1988 no primary airport received less than \$300,000 nor more than \$16,000,000.

Cargo Service Airports

A cargo service airport is an airport which is served by aircraft providing air transportation of property (including mail) with an aggregate landed weight in excess of 100 million pounds annually. For fiscal year 1988, 68 airports qualified as cargo service airports. No cargo service airport could receive more than 8 percent of the total amount of money available for all cargo service airports. This money remains available for the sponsor's use for the fiscal year in which it is authorized and the two fiscal years immediately following.

States/Insular Areas

A total of 12 percent of the annual authorization was apportioned for use within the States and insular areas. The eligible general aviation and reliever airports within the 50 States, the District of Columbia, and Puerto Rico qualified for 99 percent of the 12 percent annual authorization while airports in the insular areas (Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands), qualify for the remaining 1 percent. Funds apportioned to the States and insular areas remained available for the fiscal year in which authorized and the two fiscal years immediately following.

Alaska

Alaskan airports received at least the amount they were apportioned in fiscal year 1980 under previous grants legislation. This totaled an additional \$10.5 million in fiscal year 1988.

Discretionary Funds

The remaining funds are defined as discretionary, but a sizable portion of these is used to achieve specified funding minimums. A minimum of 10 percent of all funds is for reliever airports, 2.5 percent is for nonprimary commercial service airports, 10 percent is reserved for planning and implementing noise compatibility programs under the Aviation Safety and Noise Abatement Act of 1979, and 0.5 percent is for the preparation of integrated airport system plans. Of the remaining discretionary funds, 75 percent is to be used for preserving and enhancing capacity, safety, and security and carrying out noise compatibility planning and programs at primary and reliever airports.

Rate of Participation

With certain exceptions, the Federal share at all airports is 90 percent of the total allowable project cost. At primary airports which annually enplane 0.25 percent or more of the total number of passengers enplaned at all commercial service airports (1,013,906 or more enplanements for fiscal year 1988), the Federal share is 75 percent. In addition, there are upward adjustments for projects in States containing high percentages of public lands. Grants for integrated airport system planning are funded at a 90 percent level. Projects to implement noise compatibility projects, as authorized by the Aviation Safety and Noise Abatement Act, are funded at an 80 percent level at the largest airports and at the same rate as other development projects at the remaining airports. For eligible areas of terminal buildings at commercial service airports, the Federal share may not exceed 75 percent.

Environmental Considerations

The Federal Aviation Administration (FAA) considers and weighs environmental factors along with safety and economics in evaluating proposed Federal actions relating to airports. FAA Airports program procedures identify types of actions which require an environmental assessment and consultation process. This process provides the FAA, other agencies, and members of the public with an understanding of the potential environmental impacts of a proposed action. Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) requires an environmental impact statement when an action would produce a significant impact on the environment; otherwise, a finding of no significant impact may be prepared. Other laws have particular requirements relative to specialized concerns such as air quality, water quality, public recreational lands, historic and archeological sites, endangered species, coastal zones, wetlands and floodplains.

Initial review of proposed Federal airport actions identifies the extent of environmental analysis and coordination required. If an action is not in a

category requiring environmental assessment and does not have the potential, either individually or through cumulative effects, of significantly affecting the environment, it is categorically excluded from environmental processing. As experience has been gained in the environmental field, FAA procedures have categorically excluded more types of development projects from environmental processing.

FAA's assistance to airport sponsors in identifying environmental requirements varies with the scope and nature of the proposed Federal actions. For the new Denver Airport proposed by the city and county of Denver, Colorado, to replace Stapleton as the major carrier airport to serve that area into the next century, the FAA went an extra step. An FAA environmental review team, consisting of regional and headquarters personnel, was established to review portions of the environmental assessment as it was being prepared; to advise the sponsor on various aspects of the process and related Federal actions needed to implement this major undertaking; and to prepare the documentation needed to assure timely review and completion of the environmental process.

Noise Compatibility

Federal Aviation Regulations (FAR) Part 150, Airport Noise Compatibility Planning, was issued in January 1985 to implement portions of the Aviation Safety and Noise Abatement Act of 1979. Through FY 1988, FAA has funded the preparation of 159 noise compatibility planning studies; has made determinations that 54 Noise Exposure Maps (NEM) were prepared in compliance with FAR Part 150; and has approved 40 Noise Compatibility Programs (NCP), one of which was a revision to a previously approved program. FAA is continuing to fund the implementation of recommendations included in approved NCP's through the Airport Improvement Program.

Civil Rights Requirements

Federal assistance under the Airport and Airway Improvement Act of 1982 requires an airport sponsor to satisfy certain civil rights requirements. During fiscal year 1988, FAA Regional Civil Rights Staffs completed 5 application reviews and 13 post-award reviews for compliance with Title VI of the Civil Rights Act of 1964. All reviews found the sponsors in compliance or resulted in voluntary compliance.

Civil Rights Staffs approved 724 Disadvantaged Business Enterprise (DBE) programs and annual updates required by regulations of the Office of the Secretary of Transportation under 49 CFR Part 23. Forty-three reviews were made of sponsors following program approval, 15 of which were on-site. FAA issued 67 notices for deficient programs or for failure to carry out the terms of an approved program.

During fiscal year 1988, 5 discrimination complaints were filed under the DBE regulation, 2 were filed under Section 504 of the Rehabilitation Act of 1973, 2 were filed under Title VI, and 2 Section 30 complaints were received. (Section 30 refers to a section of the Airport and Airway Development Act, which was retained in its entirety as Section 520 of the Airport and Airway Improvement Act.) No Departmental findings of discrimination were made.

Fiscal Year 1988 Planning and Development Activity

In fiscal year 1988, gross AIP obligations amounted to \$1,289.8 million of which \$1,278.3 million was for 1,251 new grant agreements and \$11.5 million for increases in existing grant agreements. Funds recovered from adjustments to prior year projects were also available.

The new grants included 521 for a total of \$896.8 million for primary airports, 76 for \$47.1 million for other commercial service airports, 157 for \$138.3 million for reliever airports, 448 for \$189.0 million for general aviation airports, and 49 for \$7.1 million for integrated airport system planning. Also included, by special direction from Congress, was \$7.5 million for installation of Instrument Landing Systems at 8 airports.

Included in these grant agreements (1,251 for \$1278.3 million) was \$133.4 million for 74 grants to achieve noise compatibility. This amount includes \$75.7 million for the purchase of noise-impacted land adjacent to airports, \$4.5 million for studies to evaluate and develop noise compatibility programs, \$28.3 million for soundproofing residences and schools, and \$24.9 million for other efforts to reduce noise.

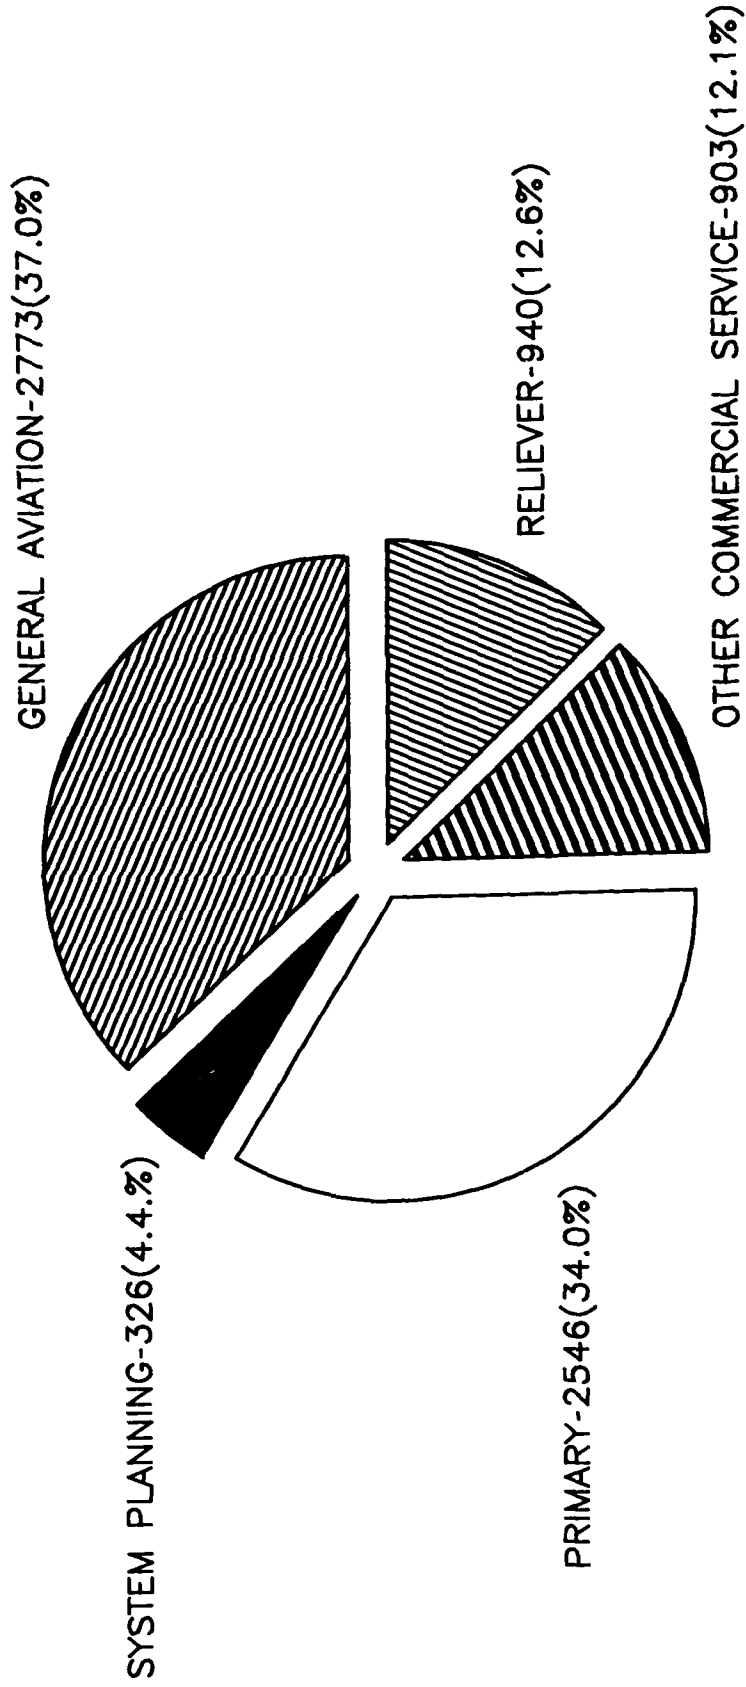

Nine grants totaling over \$26.0 million were issued to start construction of or to acquire land for new or replacement airports, and over \$5.2 million was used to assist public agencies to acquire 5 privately owned airports. There were 3 system plans and 3 master plans for conducting feasibility studies to identify vertiport sites for tilt rotor aircraft.

Fiscal year 1988 was marked by the first issuances of the newly authorized Letters of Intent (LOI). The FAA may issue LOI's for major capacity enhancement projects at primary commercial service or reliever airports. Under an LOI, the airport operator may proceed with a project without Federal funds and receive reimbursement in future years as funds become available. During fiscal year 1988, nine LOI's were issued to airport operators for a total of \$200.1 million through fiscal year 1992, subject to such funds being available.

Charts V and VI on the following pages show the fiscal year 1988 and prior years authorization and appropriation limitations. Listings of fiscal year 1988 funding by State and location are shown in Tables I and II, respectively.

1988	\$1700.0	\$1268.7	\$1289.8	15/	1251

1/ Gross obligations include current year funds plus reobligations of funds recovered from adjustments to prior year projects.

2/ Includes Airport Development Aid Program (ADAP) entitlements that were authorized to be continued under the Airport Improvement Program (AIP). FY 1982 data do not include a FY 1982 ADAP grant to Reno, Nevada (Cannon International), for \$5.1 million funded with FY 1982 monies authorized prior to approval of the AIP or \$7.1 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Legislation allowed use of ADAP recovered funds from ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.

3/ Shows increases of \$200 million each in FY 1983 and 1984 and \$75 million in FY 1985 authorized by the Surface Transportation Assistance Act of 1982 (STAA) (Public Law 97-424).

- 4/ Includes the basic authorization of \$600.0 million and \$150.0 million of the \$200.0 million authorized by the STAA and appropriated under the Emergency Jobs Bill (Public Law 98-8) and \$54.5 million of unrequested entitlements carried over from prior years.
- 5/ Includes \$736.0 million for new grant agreements, \$11.0 million for increases to existing agreements, and \$58.8 million for amendments to multi-year grants. Not included is \$6.7 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
- 6/ Includes the basic authorization of \$793.5 million and \$6.5 million authorized under the STAA.
- 7/ Includes \$739.2 million for new grant agreements, \$9.3 million for increases to existing agreements, and \$63.0 million for amendments to multi-year grants. Not included is \$7.1 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
- 8/ Includes \$848.7 million for new grant agreements, \$4.8 million for increases to existing agreements, and \$81.2 million for amendments to multi-year grants.
- 9/ \$925.0 reduced to \$885.2 as a result of P.L. 99-177, Balanced Budget and Emergency Deficit Control Act.
- 10/ Not included is \$5.2 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
- 11/ Includes \$782.0 million for new grant agreements, \$8.1 million for increases to existing agreements, and \$116.0 million for amendments to multi-year grants.
- 12/ Not included is \$4.0 million reobligated funds recovered from adjustments to obligations made under the Airport Development Aid Program (ADAP) authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.

- 13/ Includes basic authorization of \$1,000.0 million and \$25.0 million supplemental appropriation, P.L. 100-71, July 1987.
- 14/ Includes \$919.4 million for new grant agreements, \$10.2 million for increases to existing agreements, and \$123.4 million for amendments to multi-year grants. Not included is \$6.7 million reobligated funds recovered from adjustments to obligations under the Airport Development Aid Program (ADAP). Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
- 15/ Includes \$1,278.3 million for new grant agreements and \$11.5 million for increases to existing agreements; not included is \$2.7 million reobligated funds recovered from adjustments to obligations under the Airport Development Aid Program (ADAP). Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount.
