SECTION I.

INTRODUCTION. The purpose of this Technical Report is to review the Interface Requirements Specification, (Draft), Increment II, CDRL A004-05, which was produced for the Government by Evaluation Research Corporation. The results are provided in the form of Data Item Discrepancy worksheets as requested by the CMOS Program Office. (KR) (-

SUMMARY. Not Used.

CONCLUSION. Not Used.

SECTION II.

RESULTS.

Our analysis is provided in the attached Data Item Discrepancy worksheets.

PAGE NUMBER: N/A

PARA NUMBER: N/A

COMMENT OR RECOMMENDED CHANGE:

Add a description of the ADAM III to CMOS (Off-Base) interface. Begin with the following information:

Interface Authority/Directive Requirement:

CMOS IRD/ADAM III - 03a

CMOS IRD/ADAM III - 03b

CMOS IRD/ADAM III - 06a

CMOS IRD/ADAM III - 06b

Message Descriptions:

900 Transaction (Downline) (found in 3.12.2.2)

Manifest Header (found in 3.12.2.3)

Cargo Pallet Header (found in 3.12.2.4)

Prime TCMD (found in 3.12.2.5)

560 Abort Mission Transaction (found in 3.12.2.6)

410 Confirmation of Lifted Manifest Record (found in 3.12.2.7)

405 Reject Lift Notice (found in 3.12.2.8)

RATIONALE:

This interface exists, but has not been properly addressed for design purposes. The elements representing the off-base ADAM III to CMOS interface have been included in the CMOS to ADAM III interface erroneously.

PAGE NUMBER: 9

PARA NUMBER: 3.2 c.

COMMENT OR RECOMMENDED CHANGE:

Change line 2 to read, "CMOS IRD/SBSS-01 and SBSS-03." Move "CMOS IRD/SBSS-02" to paragraph 3.3 c.

RATIONALE:

The CMOS IRD/SBSS-02 covers the Shipment Suspense Status which is a CMOS generated message passed to SBSS.

DATE: 05/17/90

ORIGINATOR NAME: Ronald J. Lacour

OFFICE SYMBOL: SAIC

TELEPHONE NUMBER: 272-2999

SUBSTANTIVE: X EDITORIAL:

PAGE NUMBER: 9 through 14 PARA NUMBER: 3.2 and 3.3

COMMENT OR RECOMMENDED CHANGE:

Provide all protocols used for the CMOS to SBSS and SBSS to CMOS interfaces.

RATIONALE:

This paragraph is not in compliance with paragraph 10.1.5.2.1 of DI-MCCR-80026A. Specifically, it does not list all protocols associated with the SBSS-CMOS interface. ICI is a proprietary (debatably applications layer) protocol that, along with other protocols representing other layers, completes transmissions. These other protocols are not listed in this paragraph.

ORIGINATOR NAME: Ronald J. Lacour

OFFICE SYMBOL: SAIC

TELEPHONE NUMBER: 272-2999

SUBSTANTIVE: X EDITORIAL:

PAGE NUMBER: 9-53,F1-F126 PARA NUMBER: 3.x.1, 3.x.2, Appendix F

COMMENT OR RECOMMENDED CHANGE:

Provide the data element lists and cross references required by paragraphs 10.1.5.2.1 and 10.1.5.2.2 of DI-MCCR-80026A.

RATIONALE:

Comprehensive analysis of the data provided in the various interface record formats, as well as the production of the data element lists required for each interface, should minimize adverse design impacts in four areas:

1. Duplication - Data elements with identical definitions are assigned multiple unique identifiers. For example, Stock No. has six unique identifiers for the SBSS to CMOS interface. A single data element stored six times in a database design as a unique item will result in concurrency and redundancy problems common in flat file structures.
2. Misnomers - Messages and data elements with aliases are unrecognized. For example, Table 3.8.2b and Table 3.9.2b refer to "ATCMD (TRAILER DATA)" with undefined data elements, and Tables 3.10.2b - 3.10.2d, 3.10.2e, and 3.10.2n-3.10.2p are each occurrences of a Trailer Data Message with data elements defined. As a category of messages, Trailer Data has many aliases that are unaccounted for.
3. Misuse of Data Element Identifiers - Format components such as "BLANK" and "FILLER" have been treated as data elements. These format considerations should not warrant treatment as data elements.
4. Future Development Efforts - The compilation of these data elements is a step toward producing a complete data dictionary upon which to base design efforts.

In addition, Tables 3.21.2a through 3.40.2a do not have unique identifiers assigned at either the message level or the data element level.

PAGE NUMBER: 15

PARA NUMBER: 3.5

COMMENT OR RECOMMENDED CHANGE:

Provide all communications protocols for the CMOS to ADAM III (On- Base) interface.

RATIONALE:

This paragraph is not in compliance with paragraph 10.1.5.2.1 of DI-MCCR-80026A. In essence, it does not list all protocols associated with the CMOS to ADAM III (On-Base) interface. Additionally, the protocols or other provisions necessary to allow ADAM III to accept CMOS data on 5 1/4" floppies are not described.

Add a 570 delimiter (start of message) between Tables 3.13.2i and 3.13.2j.

RATIONALE:

In ADAM III, transmissions involving multiple records, such as the ATCMD and the Lifted Manifest, require the use of start and stop delimiters. These are used to verify the accuracy of transmissions with variable length records.
