DESTRUCTION NOTICE - Destroy by any method that will prevent disclosure of contents or reconstruction of the document.

Under the command jurisdiction of the U.S. Army Health Services Command, AEHA's mission is to support the worldwide preventive medicine programs of the Army and other Department of Defense and Federal agencies.

The Agency is unique with the variety of scientific disciplines working together in one military unit to protect the health and well being of soldiers and civilians and enhance the environment.

This is accomplished through support in environmental quality, occupational and environmental health, toxicology, industrial hygiene, radiation and entomological sciences, pest management, and laboratory services. Various types of field services are provided upon request.

22a. NAME OF RESPONSIBLE INDIVIDUAL David H. Sliney		22b. TELEPHONE (Include Area Code) (301) 671-3932	22c. OFFICE SYMBOL HSHB-MR-LL

HSHB-MR-LL

LASER HAZARDS BIBLIOGRAPHY - JANUARY 1991

1. The following bibliography was prepared in the interest of providing a source of references for those interested in the biological effects and the evaluation of hazards associated with laser equipment. It was compiled from the open literature reviewed on a continuing basis by personnel of the Laser-Microwave Division of this Agency.

2. This is the sixteenth edition of "Laser Hazards Bibliography." The last revision was dated October 1989. The 3414 references are divided into groups as shown in the Table of Contents.
