TRAINING PLANNER'S GUIDE

SECTION 1

INTRODUCTION

This guide provides information and recommended procedures for unit training planners in Light Infantry and M2-Equipped Mechanized Infantry units at the Company level and below. This guidance helps training planners to carry out the METL-based training planning process described in FM 25-100, *Training the Force*. This guidance is for echelons below those where the METL is usually developed and used (Platoon and Squad). It is also a supplement to the guidance for training planning contained in FM 25-2, *Unit Training Management*, and FM 25-3, *Training in Units*.

Guidance is provided for three parts of the training planning process. They are

1. Deciding when training should take place, as part of the Commander's or leader's assessment of unit task proficiency. This guidance assists collective training decisions for each collective task and each element in a unit.
2. Creating a training strategy. The training strategy is a plan to provide needed training for units and subordinate elements.
3. Selecting training modes, or approaches, to carry out the training strategy.

Guidance and recommended procedures for each part of the training planning process is presented in a separate section of this guide. Section 2 contains guidance for making collective training decisions. Section 3 presents guidance for developing a training strategy. Section 4 contains guidance for selecting training modes to carry out training strategies. Appendixes contain tables referred to in the three sections and forms for recording data needed to assist with collective training decisions.

SECTION 2

COLLECTIVE TASK TRAINING DECISIONS

This section presents guidance and recommended procedures for deciding when training is needed for collective tasks. Decision help is provided for Light Infantry and M2-Equipped Mechanized Infantry Platoon and Squad collective tasks.

Training planners may sometimes not have all the information needed to decide when collective task training is needed for the collective tasks performed by a unit. This section contains information to help identify collective task training needs. Using this information depends on knowing when specific collective tasks were last trained, and the amount of turnover in the unit and subordinate elements.

The decision help for collective task training is contained in the tables in Appendix A. An example table is shown in Table 1. In the tables, information about the number of months since the collective task was trained, and the percent of personnel turnover in an element since training took place, is used to find the level of need for collective training for the task. For example, if a Light Infantry Platoon had gone four months without training on the task Breach Obstacle, and had 50 percent turnover during that 4-month period, Table 1 identifies the training need as "High" for the task.

The levels of collective task training need in the tables are "Low," "Moderate," and "High." A "Low" level of training need means that there is better than a 66 percent chance that the element can perform the collective task without errors. A "Moderate" level of training need means that there is between a 33 percent chance and a 66 percent chance for error-free performance. A "High" level of training needs means that there is less than a 33 percent chance of error-free performance of the task.

There is a separate table for each collective task performed by each unit type. These are the same collective tasks that are included in the ARTEP Mission Training Plans (AMTPs) for M2-Equipped Mechanized Infantry, and Light Infantry, units. There are 58 tables for Mechanized Infantry Platoon tasks, 30 tables for Mechanized Infantry Squad tasks, 45 tables for Light Infantry Platoon tasks, and 38 tables for Light Infantry Squad tasks. A few of the tasks included in the AMTPs have been omitted from these tables. Tasks were omitted because it is not known how performance on the tasks changes as a result of time since training and personnel turnover.

Gathering Information and Using the Tables

To use the tables to identify collective task training needs, two kinds of information are needed. The first kind of information is the amount of time since an element has trained on the collective task. This information is needed for every collective task performed by unit elements. The

Table 1

Example Collective Training Need Table

Unit Type: Light Infantry Platoon

Collective Task: Breach Obstacle

Months since task was last trained	Unit turnover during the period	Training need for this task
1	10 percent	Low
	20 percent	Low
	30 percent	Low
	40 percent	Low
	50 percent	Moderate
	60 percent	Moderate
2	10 percent	Low
	20 percent	Low
	30 percent	Low
	40 percent	Moderate
	50 percent	Moderate
	60 percent	High
3	10 percent	Low
	20 percent	Low
	30 percent	Moderate
	40 percent	Moderate
	50 percent	Moderate
	60 percent	High
4	10 percent	Low
	20 percent	Moderate
	30 percent	Moderate
	40 percent	Moderate
	50 percent	High
	60 percent	High
5	10 percent	Low
	20 percent	Moderate
	30 percent	Moderate
	40 percent	High
	50 percent	High
	60 percent	High
6	10 percent	Moderate
	20 percent	Moderate
	30 percent	Moderate
	40 percent	High
	50 percent	High
	60 percent	High

second type of information is the amount of turnover that has taken place in the element in the period of time since training was conducted for the collective task. The amount of turnover can be different from one collective task to another for an element. This is because different amounts of time may have passed since different collective tasks were trained.

For example, the information needed to use the tables for one element can be compiled like this (the data are examples only):

Turnover percent for element in the last month:	10
Turnover percent for element in the last 2 months:	20
Turnover percent for element in the last 3 months:	20
Turnover percent for element in the last 4 months:	30
Turnover percent for element in the last 5 months:	40
Turnover percent for element in the last 6 months:	50
Number of months since training on collective task #1:	3
Number of months since training on collective task #2:	2
Number of months since training on collective task #3:	6
Number of months since training on collective task #38:	5.

The turnover percent for the number of months since training is used along with the number of months since training for a task, to find the training need level for a collective task.

Units maintain different amounts of information about when collective tasks have been trained, and about turnover. Below, a method is provided for keeping this information, so that it is available to help make collective task training decisions.

Maintaining Turnover and Training-History Information

Figure 1 shows a form for recording personnel turnover in a Company. This example form is filled out with fictitious data for January through June. A blank copy of this form is included in Appendix B. It can be copied for use by units.

To use the form, put a tick mark in the box for the appropriate month, whenever a person leaves a Squad or Platoon Headquarters in a Platoon. In the example, two people left the Third Squad of First Platoon in April. Two tick marks are placed in the row for First Platoon, Third Squad and the column for April. Only turnover of personnel who leave an element permanently should be recorded. Do not record Temporary Duty (TDY) or additional duty assignments on the form.

The rows for the Platoons are filled in by adding the number of tick marks in each column for the Platoon Headquarters and the Squads in the Platoon. This gives the total number of personnel turned over in the Platoon for the month. In the example, Third Platoon had a total turnover of 4 people in March.

Unit Turnover Record

Company: B Battalion: 2/9 Brigade 1st

First Squad			/		/							
Second Squad			/		//							
Third Squad				//	/	/						

Figure 1. Example form for recording unit turnover.

Figure 2 shows an example of a form for recording when collective training takes place for each collective task performed by a unit type. The data shown are fictitious. The example in Figure 2 is for Light Infantry Platoon collective tasks. A blank copy of this form is in Appendix B. Appendix B also contains blank forms for recording when collective tasks are performed by Light Infantry Squads, M2-Equipped Mechanized Infantry Platoons, and M2-Equipped Mechanized Infantry Squads. These forms can be copied and used as directed.

To use any of the forms, place a tick mark in the column under the month when an element trains on a collective task. To keep records for a Platoon, one Platoon collective task performance record and three Squad collective task performance records—one for each Squad—should be used. This will enable making collective task training decisions for both echelons. As discussed in the next section of this guide, knowing which collective tasks at each echelon require training can assist in developing a sound training strategy for the unit.

Using the Records for Collective Task Training Need Evaluation

To identify the training need for each collective task for an element, use the unit turnover record and the collective task performance record for the element.

Time Since Training. Using the collective task performance record, count the number of months from the last tick mark made for a collective task up to and including the current month. For example, if the current month is July, and an element last trained on a task in March, four months have passed since the task was trained.

An example form for recording this information is shown in Figure 3. This form is also used to record the percent turnover for tasks, and the training need for each task. In this figure, there is one row for each collective task performed by a unit type. In each row is the title of the task, six blocks for recording the number of months since training, six blocks for recording the percent turnover during time since training, and three blocks for recording the training need for the task. To use the form to record time since training, place a tick mark in the block corresponding to the number of months since training, for a collective task.

The small table at the top of the form in Figure 3 is used to record the percent turnover in the element. This is used for reference in completing the rest of the information. The information in the example form in Figure 3 is fictitious.

Blank forms like the one in Figure 3 are included in Appendix B for four unit types: Light Infantry Platoons, Light Infantry Squads, M2-Equipped Mechanized Infantry Platoons, and M2-Equipped Mechanized Infantry Squads. These forms can be copied and used by units.

Turnover. Using the unit turnover record, count the number of tick marks in the row for the element, beginning in the month after the task was last trained. If the current month is July, and a unit last trained on a task in March, count the tick marks beginning in April. If training need is being evaluated for more than one collective task, make counts of tick marks beginning six months back from the current month. That is, make counts for 6, 5, 4, 3, 2, and 1 months back from the current month.

Figure 3. Example training needs evaluation form.

Table 2

Conversion Table for Finding Percent Turnover in Units

Percent Turnover	Total Number of Personnel Leaving Unit in Time Period		
	Unit Type		
	Light Infantry Squad and Mechanized Infantry Squad	Light Infantry Platoon	Mechanized Infantry Platoon
10	1	1 - 5	1 - 4
20	2	6 - 9	5 - 8
30	3	10 - 12	9 - 11
40	4	13 - 15	12 - 14
50	--	16 - 19	15 - 17
60	5	20 - 22	18 - 20
70	6	23 - 25	21 - 24
80	7	26 - 29	25 - 27
90	8	30 - 32	28 - 30
100	9	33 - 34	31 - 32

When the tick marks have been counted, use Table 2 to identify the percent turnover in the element for each time period. Table 2 provides an easy way to convert the counts to turnover percent. Choose the column in the table that is labeled with the unit type of the element. Then, find the row that corresponds to the number of tick marks counted. The left-hand column of the table in this row gives the turnover percentage to use. Identify and record the percent turnover for each time period for which tick marks were counted. The small tables at the top of the forms like the one in Figure 3 can be used to record this information for an element.

Identify and record the time since training for each collective task of interest for the element. Then, identify the amount of turnover for the amount of time since training for each collective task. When this is complete, use the tables in Appendix A to find the training need for each collective task.

Using the Tables. Use the number of months since training and the percent turnover for each collective task to identify the training need for the task, using the tables in Appendix A. The tables in Appendix A are in the same order as the lists of tasks on the collective training need evaluation forms, for each unit type. Record the training need for each collective task on the collective task need evaluation forms, in the right-hand group of columns. Place a tick mark in the column that

corresponds to the training need for a task. This gives a one-page summary of collective task training needs for each element. The summaries can be used to assist in developing a training strategy to provide the needed training. This is discussed in the next section of this guide.

SECTION 3

DEVELOPING A TRAINING STRATEGY

A training strategy is a plan for satisfying the training needs identified by the Commander's or leader's assessment of unit proficiency. It includes both individual and collective training to build and sustain the skills needed to perform a unit's tasks. A training strategy includes four major elements. These are:

1. Which individual and collective tasks will be trained.
2. Which individuals and elements will train on which tasks.
3. The order in which training on tasks will take place.
4. The training events during which training will occur.

This section provides general guidelines to assist unit training planners to build a training strategy. The guidance is general because no two units or elements have the same training needs. Training needs will be different from unit to unit. This means that the unit training planner must develop a training strategy that meets his or her unit's specific needs.

Selecting Collective Tasks to be Trained

Often, available training time and resources limit what can be trained. This means that only part of the training needs identified by the Commander's or leader's assessment can be met. This sub-section presents guidance on selecting tasks for training.

The training need statements in the Tables in Appendix A only give a "High," "Moderate," or "Low" priority for training. Sometimes, a unit will have many tasks that have "High" training priority, but cannot train all of the tasks. A way is then needed to choose which tasks that have "High" priority for training will be trained. One method for selecting collective tasks for training is to review the amount of time since specific tasks have been trained, and the amount of turnover in units or elements during that time.

The following method gives each task a numeric score that can be used to identify the tasks with the highest priority for training. The steps are:

1. For each task that is a candidate to include in training, identify the percent turnover in the unit or element since that task was last trained, and divide the percent turnover by 10. This is the turnover score for the unit or element for the task. For example, a unit with 40 percent turnover would have a turnover score of 4.

2. For each task, add the turnover score to the number of months since the task was trained. This gives a training priority score for each task.
3. List the tasks in order from highest to lowest training priority score.

The tasks with the highest training priority scores are those that are most in need of training for a unit or element. Follow this procedure for each unit or element that requires training.

Identifying Which Tasks Units or Elements Will Train On

When tasks have been prioritized for each unit and element, the next step is to select which tasks will be trained. The decision will depend on which units and elements are most in need of training on which tasks. Making a summary of the highest-priority tasks for a Platoon and its subordinate Squads can help.

Figure 4 shows a form that can be used to make a summary of high-priority tasks to be trained for a Platoon and its Squads. On this form are spaces to write in the ten collective tasks with the highest priority for training for the Platoon and each Squad. A blank copy of this form is included in Appendix B. It can be copied for use by units.

Making a summary like the one in Figure 4 can help to identify which tasks should be trained for which elements. For example, a summary like this can show when all Squads require training on one specific collective task, or when only one or two squads require training on a task. Information like this can help identify when to train or not to train a task. For instance, if only one Squad out of three requires training on a specific task, Squad training for that task might be done at a later time. This would enable training on another task for which two or three of the squads require training.

Making a summary of this kind is also useful for identifying relationships between Squad collective tasks and Platoon collective tasks. Proficiency in specific Squad collective tasks is essential to proficiency on some Platoon collective tasks. Being aware that Squads require training on a collective task can alert a training planner to provide training on the Squad task before training the Platoon task.

Some Squad collective tasks are essential to more than one Platoon collective task. For example, for Light Infantry units, the Squad task "Move Tactically" is essential to 31 Platoon collective tasks. Being aware that training is needed on Squad tasks that support large numbers of Platoon collective tasks alerts a training planner to an opportunity to gain extra benefits from training. When a Squad task that is essential to many Platoon tasks is trained, all of the Platoon tasks benefit to some degree. This means that training on essential Squad tasks can build proficiency in parts of many Platoon tasks.

Cross-references of Squad tasks that are essential to specific Platoon tasks are provided in Appendix C. Separate cross-references are provided for Light Infantry units and M2-Equipped Mechanized Infantry units. The Light Infantry cross-reference is in nine tables, shown one per page; the Mechanized Infantry cross reference is in 11 tables, shown two tables per page. An example page from the Light Infantry unit cross-reference is shown in Figure 5. In each cross-reference table, there

"Top Ten" Training Tasks for Platoon and Squad

Figure 4. Summary of the "top ten" training-need tasks for a Platoon and its Squads.

is a row for each Squad task, and columns for five Platoon collective tasks. When a Squad task is essential to a Platoon task, the word "Supports" appears in the row of the Squad task and the column of the Platoon task.

The last column in each cross-reference in Appendix C shows the number of Platoon tasks that are supported by each Squad task. This information can help to set priorities for training both Squad and Platoon tasks. If a Squad task supports many Platoon tasks, it may receive a higher priority for training, because training on that task benefits many other tasks. If a Platoon task is supported by many Squad tasks, more prerequisite training may be needed for that Platoon task than for some other Platoon task that is supported by fewer Squad tasks. On the other hand, a Platoon task that is supported by many Squad tasks may be easier for a unit to learn, because training on the supporting Squad tasks provides a large part of the skills needed to perform the Platoon task.

Individual Tasks

Every collective task requires unit members to be proficient in some individual tasks. Training for individual tasks should be considered, along with collective-task training, when making the training strategy. The individual tasks that support each collective task are identified in the Training Matrixes in Chapter 2 of the AMTP for each unit type. In general, unit members should be proficient on the individual tasks that support a collective task, before training on the collective task takes place. It will not always be possible to provide all of the individual-task training for individual tasks that support each collective task, but this should be a goal in every training strategy.

Most individual tasks support several different collective tasks. Training planners can take advantage of this by including in training individual tasks that support larger numbers of collective tasks. This can result in building proficiency for skill elements that support many different collective tasks.

Sequencing Tasks in Training

Properly sequencing the training of collective and individual tasks can help training planners take advantage of existing opportunities to train. This sub-section discusses several factors that training planners should consider when developing a training sequence, as part of the training strategy.

Individual-Task Training Should Precede Collective-Task Training

Training planners should consider whether it is necessary to provide training to develop individual skills in order to conduct effective collective training. If individual skills training is to be provided, it should be scheduled prior to or concurrent with collective training. However, when individual skills need training, there may be benefits from conducting collective training. Although elements with personnel that need individual training will not get as much benefit from collective training, other elements may benefit much more. Also, there may be opportunities to integrate the needed individual training with collective training, in multi-echelon training. Consider the specific

individual tasks, skill deficiencies, and personnel involved when making this decision.

Lower-Echelon Collective-task Training Should Precede Higher-Echelon Training

Consider the need to schedule collective training to develop proficiency in lower-echelon collective tasks that support Platoon collective tasks. Squads or Crews should be proficient on lower-echelon tasks prior to training on Platoon tasks that are supported by lower-echelon tasks. This may be possible in multi-echelon training. Even if some subordinate elements need training on lower-level collective tasks, there may be reason to proceed with collective training for higher echelons. Although the subordinate unit(s) that need training on lower-level tasks will not get as much benefit from the Platoon collective training, other subordinate units may benefit much more. Consider the specific tasks and elements involved at each echelon when making this decision.

Use Present Levels of Task Proficiency as a Guide

Consider each element's present proficiency level as a guide for the stage at which training should take place in your training strategy. If an element performs a task at the "Untrained" level of proficiency, consider training at the 'crawl' stage for the task, and begin with basic task elements under routine conditions. If an element presently performs at the "Needs Practice" level of proficiency, consider training at the 'walk' stage for the task. Training at earlier stages ('crawl' or 'walk') may also require training on prerequisite, or lower-echelon collective tasks, or individual-task training, to prepare for higher-echelon or more advanced training.

Build Proficiency at Basic Levels First

Units that are not yet proficient at collective tasks should train on the tasks under basic conditions. Low visibility, difficult terrain, and other challenging conditions should be avoided until a unit is proficient enough that personnel can perform safely in basic conditions. If a unit is not yet proficient, but must train under more advanced conditions (for example, as part of a higher-echelon training event), extra precautions should be taken to ensure both personnel safety and training value for the unit. This can include training at the 'crawl' or 'walk' stage and providing additional supervision for the training.

Training Events

Every training event should be carefully planned to take advantage of the skills that units and elements possess, and use those skills to build proficiency in areas where the units are less skilled. When possible, each training event should have a specific emphasis in the training conducted during the event. For example, one training event might emphasize developing the basic elements of two or three collective tasks, for Squads training separately, and training on prerequisite individual tasks. Another training event might emphasize a Platoon performing a set of collective tasks in a Situational

Training Exercise (STX). The emphasis planned for each training event can be used to select training approaches, or modes for conducting training. This is the topic of the last section of this guide.

When possible, training events should be planned so that earlier events are used to build proficiency on tasks and for units where proficiency is lower. Later events should take advantage of skills developed in earlier events, emphasizing training involving higher-echelon tasks, or more advanced conditions, or both. The tasks planned for later training events should be chosen to sustain and improve the skills developed in earlier training events.

SECTION 4

SELECTING TRAINING MODES

Selecting appropriate training approaches, or modes, is one key to the success of a training strategy. Training planners should consider the following factors, as a minimum, when selecting training modes to carry out a training strategy:

1. The emphasis chosen for each training event. Training modes that are appropriate for developing basic collective-task skills may not be appropriate for sustainment or developing more advanced skills. Also, more advanced training modes may not be appropriate for developing skill basics.
2. The elements and collective tasks to be trained. Some training modes are more appropriate for single-echelon training on task basics. Other training modes are better suited for multiple-echelon training and advanced skills development.
3. Safety. Units at lower levels of proficiency should use more basic training modes until skills are developed to a point where more challenging conditions are required for training.
4. Cost. Some training modes are low in cost (for example, classroom instruction), while other modes are very costly (for example, a Field Training Exercise [FTX]). Less costly training modes should be selected for developing skill basics. More challenging conditions can be provided by other, more costly, training modes when unit skills are more fully developed.

Table 3 gives a summary of these factors for several training modes that may be used by smaller units (Platoons and Squads). This table is only a guide. Each unit training planner should select the training modes that best suit his or her unit's training requirements and conditions.

Table 3

Guidance for Selecting Training Modes

If your training strategy emphasizes this kind of training:	Then this training mode may be appropriate:	But consider training time and resources cost:	And collective task proficiency of units to be trained:
Introducing basics	Classroom/Demonstration/-Practice (Single echelon training under basic conditions)	Lowest cost and least resources required; safety seldom a concern	Appropriate when overall proficiency is low and personnel need introduction to basics
Practicing basics; introducing more advanced elements and building teamwork	Talk-through/walk-through, MAPEX, sand table training (Develop and improve proficiency on collective tasks)	Low cost, few resources required; safety a minor concern	Appropriate when units are proficient on some tasks but proficiency must be developed for others
Practicing elements of tasks	Device-based training (if devices, e.g. COFT, are available) (Improve and sustain proficiency)	Relatively low cost, device resources required; safety usually not a concern	Appropriate when units need to sustain and improve skills, and devices are available
Learn and practice teamwork and decision making in collective tasks	Situational Training Exercises (STX)/Tactical Exercises Without Troops (TEWT)/-Terrain Walk (Develop and improve collective task proficiency)	Somewhat higher cost and longer leadtime needed; more detailed planning required; safety a concern	Appropriate for introducing more difficult conditions when proficiency in basics is established
Sustain proficiency	Field Training Exercises (FTX), using dry-fire or MILES (Sustain proficiency in performing collective tasks)	High cost, long leadtimes needed, detailed planning a must; safety a significant concern	Appropriate when units are proficient at collective tasks under all conditions
Confirm training effectiveness where live-fire is necessary	Live Fire Exercises (LFX) (Confirm that units perform proficiently under all conditions)	Very high dollar and resource cost, long leadtimes required, safety a major concern	Appropriate to confirm training effectiveness and proficiency on tasks that require weapons firing

APPENDIX A

COLLECTIVE TRAINING NEED TABLES

This Appendix contains training need tables for collective tasks performed by M2-Equipped Mechanized Infantry Platoons and Squads, and Light Infantry Platoons and Squads. A one-page table is included for each task. Tasks are indexed according to unit type and page number within unit type.

The tables are in the following order:

- 58 tables for M2-Equipped Mechanized Infantry Platoon tasks
- 30 tables for M2-Equipped Mechanized Infantry Squad tasks
- 45 tables for Light Infantry Platoon tasks
- 38 tables for Light Infantry Squad tasks.

Unit Type: Mechanized Infantry Platoon

Collective Task: Acquire Targets/Distribute Fire

Months since task was last trained	Unit turnover during the period	Training need for this task
1	10 percent	Low
	20 percent	Low
	30 percent	Low
	40 percent	Low
	50 percent	Low
	60 percent	Moderate
2	10 percent	Low
	20 percent	Low
	30 percent	Low
	40 percent	Moderate
	50 percent	Moderate
	60 percent	Moderate
3	10 percent	Low
	20 percent	Low

Year: _____ Platoon _____ Company _____ Battalion _____

Collective Task Title	Calendar Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Acquire Targets/Distribute Fire												
Assault Dismounted (Raid)												
Assault Mounted												
Breach Obstacle												
Change Formation (Mounted)												
Clear Building												
Clear Trenchline												
Clear Woodline												
Conduct Aerial Resupply												
Conduct Antiarmor Ambush												
Conduct Fire and Movement												
Conduct Hasty Ambush												
Conduct Helicopter Movement												
Conduct Passage of Lines												
Conduct Point Ambush												
Screen/Guard Operations												
Conduct Tactical Road March												
Consolidate and Reorganize												
Cross Danger Area (Dismounted)												
Cross Defile												
Defend Battle Position												
Disengage (Dismounted)												
Disengage (Mounted)												
Hasty Protective Minefield												
Establish Hasty Position												
Establish Objective Rally Point												
Establish Patrol Base												
Execute Action Right or Left												
Perform Hasty Dismount												
Knock Out Bunker												
Maintain Noise/Light Discipline												
Maintain Operational Security												
Mount Vehicle												
Move (MOUT)												
Move Dismounted												
Move Mounted												
Occupy Assembly Area												
Plan/Control Combat Operations												
Platoon Combat Drill												
Prepare Defensive Position												
Prepare for Chemical Attack												
Prepare for Combat												
Prepare for Nuclear Attack												
React to Indirect Fire												
React to Air Attack												
React to Ambush												
React to Chemical Attack												
React to Contact												
React to Direct Fire/ATGM												
React to Nuclear Attack												
Reconnaissance and Security												
Reconnoiter Objective												
Reconnoiter Zone												
Report												
Secure at Halt												
Support by Fire												
Sustain												
Vehicle Operations												

Collective Task Performance Record Mechanized Infantry Squad (M2-Equipped)

Year: _____ Squad _____ Platoon _____ Company _____

Collective Task Title	Calendar Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

APPENDIX C

PLATOON-TO-SQUAD COLLECTIVE TASK CROSS-REFERENCE TABLES

This Appendix contains Platoon task-to-Squad task cross-reference tables for the collective tasks performed by M2-Equipped Mechanized Infantry units and Light Infantry units. The tables for Mechanized Infantry units are presented first. There are 11 tables, presented two to a page. These are followed by the tables for Light Infantry units. There are nine tables in this cross-reference, one per page.

**M2-Equipped Mechanized Infantry Collective Tasks
Platoon Task-to-Squad Task Cross-Reference Table
Part 1 of 6**

Mechanized Infantry Squad Tasks	Mechanized Infantry Platoon Tasks				
	Acquire Targets/ Distribute Fire	Assault Dismounted (Raid)	Assault Mounted	Breach Obstacle	Change Formation (Mounted)
