Research Abstract

Dr. William W. Kirby-Smith, Principal Investigator

Contract No. N00014-92-J-1982

ONR High School Internship Program - 1992

Duke University, School of the Environment, Marine Laboratory

Pivers Island

Beaufort, NC 28516-9721

The Duke University Marine Laboratory, with funding from the Office of Naval Research, conducts an 8-week summer internship program for rising seniors from two high schools: East Carteret High School and West Carteret High School. The purpose of the program is to expose students to active, on-going research programs so that they may be able to understand what is involved in a career in marine science research.

Groups of interns are preselected by a committee of science teachers at each school and the applications are sent to the Duke University Marine Laboratory (DUML). At DUML, applications are reviewed and rated by a panel of three scientists: one from NOAA-NMFS, one from the University of North Carolina Institute of Marine Sciences, and one from DUML. Three interns are selected from each of the two schools. Interns are matched with research faculty at DUML who then contact the interns in the spring to begin the process of developing a research topic.

Interns arrive at DUML in early-mid-June to begin an intensive 8-week exposure to research under the supervision of a faculty member. The interns develop a project topic and a research plan, carry out the research, including data analysis, write a technical report and give an oral presentation of their research. If appropriate, the interns are encouraged to present their work with their mentor at a scientific meeting and/or develop a journal article.

The exposure to such an active research environment is hoped to encourage students at an early age to consider careers in science, particularly marine science.

THE 1992 PROGRAM

Advertising for the internship program for the summer of 1992 tentatively began in January 1992. In February 1992, the high schools provided a pool of 13 applicants (9 from West Carteret and 4 from East Carteret). A selection committee consisting of Drs. Mark Fonseca (NOAA-NMFS), John Wells (UNC Institute of Marine Sciences), and Richard Forward (DUML) reviewed the applications. Three interns were selected from each of the two high schools.

For the 8-week program, interns were allowed to select flexible time-frames within the period from early June to late August. Such flexibility had been encouraged by the participating high schools. The 1992 program spanned the period from June 8-August 14. The oral presentations by all interns were given on July 24 to accommodate the difference in schedules and all interns submitted a final paper prior to the end of their specific 8-week period. Information sheets for each intern are attached which provide biographical information as well as the name of the mentor, and project title/major tasks performed. Also attached are information sheets on each mentor.

Office of Naval Research - High School Internship Program

INFORMATION FOR EACH APPRENTICE

**Year: 1992
Dates: 06/08-07/31**

Name:	Amy Leigh Barnes
Address:	1010 Patch Drive Newport, NC 28570
Phone:	919-223-3438
Address (School, '92-'93):	West Carteret High School Morehead City, NC 28557
Phone:	919-726-1176
Last Grade Completed:	Junior
Type of School:	Public
Sex:	Female
Race/Ethnicity:	White
Installation:	Duke University, School of the Environment, Marine Laboratory Beaufort, NC 28516-9721
Phone:	919-728-2111
Mentor:	Dr. Marius Brouwer
Title:	Associate Research Professor
Principal Discipline of Research:	Environmental biochemistry
Major Tasks Performed:	Study of metal-binding proteins in blue crab hepatopancreas

**Duke University, School of the Environment, Marine Laboratory
Beaufort, North Carolina**
