REVIEW AND APPROVAL STATEMENT

USAFETAC/TN--88/005, *Seasonal Snowfall Statistics for Selected Stations*, revised January 1993, has been reviewed and is approved for publication. There is no objection to unlimited distribution of this document to the public at large, or by the Defense Technical Information Center (DTIC) to the National Technical Information Service (NTIS).

REPORT DOCUMENTATION PAGE

2. Report Date: January 1993
3. Report Type: Technical Note
4. Title: Seasonal Snowfall Statistics for Selected Stations
7. Performing Organization Name and Address: United States Air Force Environmental Technical Applications Center (DOC), Scott AFB, IL 62225-5116
8. Performing Organization Report Number: USAFETAC/TN--88/005 Revised January 1993
11. Supplementary Notes: Supersedes AD-A203965.
12. Distribution/Availability Statement: Approved for public release; distribution is unlimited.
13. Abstract: A convenient reference to seasonal snowfall statistics at 63 selected locations worldwide. Revised data is for the 10-year period from 1980 to 1990. Total snowfall amounts for each season (defined as July of one year to June of the next) is provided, along with 24-hour snowfall extremes, and dates. Seasonal means and standard deviations are also given. All values are in inches.
14. Subject Terms: CLIMATOLOGY, SNOW, SNOWFALL, WORLDWIDE, WEATHER, STATISTICS, PRECIPITATION, SEASONS, EXTREMES, MEANS, STANDARD DEVIATION
15. Number of Pages: 36
17. Security Classification of Report: Unclassified
18. Security Classification of this Page: Unclassified
19. Security Classification of Abstract: Unclassified
20. Limitation of Abstract: UL

PREFACE

The data presented here was originally requested by the staff weather officer at the Air Force Engineering and Services Center (AFESC), Tyndall AFB, FL 32403-6001. The summaries were prepared by USAFETAC's Engineering Meteorology Section from data provided by USAFETAC's Operating Location A and used by AFESC's Operations and Maintenance Directorate to review snow removal equipment authorizations at each of 63 specified locations worldwide. The original 10-year period of record was from 1976 to 1986. This revision provides updated data from a newer (1980 to 1990) period of record.

Total snowfall amounts are given by season, with a "season" defined as beginning in July and ending in June. Maximum 24-hour snowfall is given. Also included are seasonal means and standard deviations of the total seasonal snowfalls for the latest (1980-90) 10-year period of record (POR), for the entire POR, and for other PORs whenever the latest 10-year POR differed significantly from the total POR. All values are in inches. For computing means, "trace" values are equal to 0.004 inches.

Note that since Chanute AFB (one of the locations specified) discontinued weather observations in 1964, nearby Urbana, Illinois, was added to the list.

Although this snowfall data summary was compiled for a specified customer, its potential to other users is obvious; it is therefore being made available for general use.
