NOTICE

This report has been prepared for McClellan Air Force Base to aid in the implementation of a final remedial action plan under the Air Force Installation Restoration Program (IRP). As this Data Summary relates to actual or possible releases of potentially hazardous substances, its release prior to an Air Force final decision on remedial action is in the public's interest. The limited objectives of this Data Summary, the ongoing nature of the IRP, and the evolving knowledge of site conditions and chemical effects on the environment and on human health all must be considered when evaluating this Data Summary, since subsequent facts may become known that may make this Data Summary premature or inaccurate. Acceptance of this Data Summary in performance of the contract under which it is prepared does not mean that the Air Force adopts the conclusions, recommendations, or other views expressed herein, which are those of the contractor only and do not necessarily reflect the official position of the Air Force.

13. ABSTRACT (Maximum 200 words) This Data Summary presents the results of groundwater sampling activities conducted on and in the vicinity of McClellan Air Force Base during the sampling period of January through March 1993. Concentrations of purgeable hydrocarbons and aromatic compounds detected in wells (42 monitoring wells, 6 extraction wells, 1 extraction well composite, and 1 background well) exceeded state and/or federal drinking water standards. Like the Fourth Quarter 1992, 25 monitoring wells exceeded the maximum concentration levels (MCLs) for one or more inorganic analytes in the First Quarter 1993, compared to 10 wells in the Third Quarter 1992. The reason for the increase is due to the change in sampling procedure (nonfiltering of inorganics). These wells are located in Sectors A, B, C, and D.

PREFACE

Radian Corporation is the contractor for the Installation Restoration Program, Stage 3 Remedial Investigation/Feasibility Study at McClellan Air Force Base (AFB), California. This work was performed for the Air Force Center for Environmental Excellence, Environmental Services Office, Environmental Restoration Division (AFCEE/ESR) under Air Force Contract No. F33615-90-D-4013, Delivery Order 0004.

This Data Summary summarizes and presents the results of the Groundwater Sampling and Analysis Program for the period of January through March 1993. The data presented includes analytical results from monitoring and extraction well groundwater samples, and from groundwater-level data measured from on- and off-base wells.

Key Radian project personnel were:

Tom Cudzilo — Technical Director
Stephen Van De Wiel — Project Director
Liz Halverson — Technical Editor

Radian would like to acknowledge the cooperation of the McClellan AFB Office of Environmental Management Restoration. In particular, Radian acknowledges the assistance of Mr. Fran Slavich and Ms. Doris Varnadore.

The work presented herein was accomplished between 04 January 1993 and 31 March 1993. Mr. Patrick Haas, of AFCEE/ESR, was the Contracting Officer's Technical Project Manager.

Approved:

William E. Corbett
Project Manager

1.0

INTRODUCTION

In support of ongoing Remedial Investigation/Feasibility Study (RI/FS) activities at McClellan Air Force Base (AFB), California, Radian Corporation (Radian) personnel measure water levels and collect and analyze groundwater samples from selected on- and off-base wells on a quarterly basis. This Data Summary provides, in tabular form, analytical results of data collected during the January through March 1993 (First Quarter) sampling effort. Data are provided in the following nine tables:

- Table 1 — Wells Sampled and Analyses Performed;
- Table 2 — Wells Scheduled and Analyses to be Performed;
- Table 3 — Quarterly Groundwater Level Data;
- Table 4 — Master Log of Wells Sampled;
- Table 5 — Wells Containing Analytes At Concentrations Equal to or Exceeding State and Federal Drinking Water Standards;
- Table 6 — Ambient Blanks with Associated Well Samples;
- Table 7 — Trip Blanks with Associated Well Samples;
- Table 8 — Summary of Quality Control Results for Blanks; and
- Table 9 — Summary of Qualified Data.

Six monitoring zones (A through F) are used to divide the groundwater regime, by depth and lithology, beneath McClellan AFB. McClellan AFB is also divided into six geographic sectors, designated A through F; these sectors encompass the entire base and adjacent off-base areas (Figure 1). Results are presented by zone and sector to support review and data use.

Groundwater levels were measured in 294 wells (including 247 monitoring wells, 39 piezometers, and 8 extraction wells) between 04 January and 06 January 1993. The location of all wells and piezometers are shown on Plate 1; results are provided in Table 2. Potentiometric-surface contours are shown on plates 2, 3, 4, and 5.

Radian personnel collected groundwater samples from a total of 92 locations between 08 January 1993 and 29 March 1993. The locations included 82 monitoring wells, 6 extraction wells, 1 composite sample of 6 Sector D extraction wells (EWs) (EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87) collected from the Sector D pipeline, and 3 background wells.

Groundwater samples were analyzed by Radian Analytical Services (Austin, Texas) using United States Environmental Protection Agency (U.S. EPA) Test Methods for Evaluating Solid Waste, Physical/Chemical Methods SW846, Third Edition (U.S. EPA, 1986). Selected samples were analyzed for the following analytes:

- Halogenated Volatile Organic Compounds (HVOCs) using Method 8010;
- Aromatic VOCs using Method 8020; and
- Metals using Methods 6010, 7060, 7421, 7470, and 7740.

A total of 92 locations (82 monitoring wells, 6 extraction wells, 1 extraction well composite, and 3 background wells), were sampled for Method 8010 analyses during First Quarter 1993 (1Q93). Method 8020 analyses were performed on samples collected from 67 locations (including 57 monitoring wells, 6 extraction wells, 1 extraction well composite, and 3 background wells). Analysis by methods 6010, 7060, 7421, 7470, and 7740 was performed on unfiltered (i.e., they were filtered prior to 4Q92) samples collected from 43 wells. The analytical results of all these analyses are summarized in Table 1 and estimated trichloroethene concentration isopleths are shown on Plates 2, 3, 4, and 5 (background wells are excluded from plates).

Table 4 presents the Above Action Level List for samples in which one or more contaminants exceeded either the Federal or California Maximum Contaminant Levels (MCL's) or California Action Levels for drinking water. Samples from 6 extraction wells, 1 extraction well composite, 42 monitoring wells, and 1 background well exceeded standards for either organic or inorganic analytes. Twenty-five of the wells exceeded MCL's for one or more inorganic analytes compared to 10 in 3Q92 and 16 in 4Q92. The increase in the number of well samples exceeding MCLs for inorganic analytes can be attributed to a change in sampling procedure; samples for inorganic analysis are no longer filtered in the field. In

the Fourth Quarter 1992, a total of 6 extraction wells, 1 extraction well composite, and 36 monitoring wells were above action levels for organic or inorganic analytes.

The Quality Control (QC) data presented in this report have been evaluated according to the quality assurance objectives specified in the Final McClellan AFB Quality Assurance Program Plan (QAPP), August 1992 revision. These represent accuracy and precision performance objectives for each analytical method. The results of the QC sample analyses are summarized below, as well as in Tables 5, 6, 7, and 8.

- All surrogate recoveries (except one Method 8020 confirmation analysis) were within recovery objectives. The trifluorotoluene surrogate spike recovery for EW-233 confirmation analysis was above acceptance limits. The associated sample result for toluene was flagged with a "G" by the laboratory, indicating that an interference was present. In addition, the toluene result was flagged with an @, indicating that the reported value is an estimated result because it is less than five times the reporting limit.
- Method 7740 selenium QC sample results indicated that a systematic matrix interference was present. All Method 7740 selenium results are qualified as biased low due to the potential for artificially low results to be reported.

The completeness objective for all the measurement parameters is 95 percent. Although several individual sample results required qualification, the remaining body of unqualified analytical data met the objectives. From a total of 4,859 possible individual analyte measurements, 65 were qualified. Therefore, greater than 98% of the data produced from the 1Q93 sampling event are valid, and the completeness objective has been met.

TABLE 1 (Continued)

=====

(a) - The letters 'S' and 'D' associated with the monitoring well numbers are part of the well identification notation and do not refer to monitoring zones at McClellan AFB.

EC = Extraction Well Composite

EC-1 is a composite of EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87.

EW = Extraction Well

MW = Monitoring Well

OW = Observation Well

WELL IDENTIFICATION:

EW = Extraction Well
 MW = Monitoring Well
 PZ = Piezometer

ZONE IDENTIFICATION:

A = Screened in the A zone (-16.72 to -93.46 ft msl).
 AB = Screened in both the A and B zones (-47.89 to -126.0 ft msl).
 IAB = Screened in an intermediate zone between the A and B zones (-69.51 to -94.61 ft msl).
 QAB = Screened in the aquitard between the A and B zones (-63.84 to -65.84 ft msl).
 B = Screened in the B zone (-50.3 to -149.73 ft msl).
 BC = Screened in both the B and C zones (-95.86 to -109.65 ft msl).
 QBC = Screened in the aquitard between the B and C zones (-122.18 to -146.05 ft msl).
 C = Screened in the C zone (-117.11 to -213.2 ft msl).
 ICD = Screened in an intermediate zone between the C and D zones (-225.97 to -235.97 ft msl).
 QCD = Screened in the aquitard between the C and D zones (-225.76 to -227.76 ft msl).
 D = Screened in the D zone (-261.69 to -306.95 ft msl).
 E = Screened in the E zone (-327.74 to -365.36 ft msl).

NOTES:

(a) = The letters 'S' and 'D' associated with monitoring well numbers are part of the well identification notation and do not refer to monitoring zones at McClellan AFB.
 (e) = Water level value is suspected to be inaccurate due to field equipment malfunction. These values were not used to generate water level contours.
 b = Unintentionally omitted.
 c = Blocked well access.
 d = Dry Well.
 4Q92 = Fourth Quarter 1992.
 1Q93 = First Quarter 1993.
 msl = Mean Sea Level

TABLE 4 MASTER LOG OF WELLS SAMPLED,
GROUNDWATER SAMPLING AND ANALYSIS PROGRAM
JANUARY THROUGH MARCH 1993, McCLELLAN AIR FORCE BASE

FOOTNOTES AND ABBREVIATIONS

DATAFLAGS:

- Ø = The results are less than five times the method specified detection limit. Uncertainty of the analysis will increase as the method detection limit is approached. These results should be considered approximate.
- C = Confirmed on second column or by GC/MS.
- G = Indicates an estimated value due to GC interferences and/or coelution.
- ND = Not detected at specified detection limit.
- P = Previously confirmed on second column or by GC/MS.
- V = Not confirmed - second column not requested.
- Z = Inorganic methods - Analyte is found in the associated blank, but the sample results are not corrected for the amount in the blank.

FIELD ANALYSIS AND FIELD QA/QC:

- AB = Ambient Blank.
- EB = Equipment Blank.
- FD = Field Duplicate.
- NS = Normal Sample.
- TB = Trip Blank.

QUALIFIED RESULTS:

- G = Second column value reported as primary result due to interferences/coelution.
- H = Qualified as estimated due to matrix spike or surrogate recoveries outside the control limits.
- O = Detected in blank other than reagent blank.
- PF = Qualified as estimated due to high total variability as measured by field duplicates.
- PL = Qualified as estimated due to high total variability as measured by laboratory duplicates.
- R = Detected in the reagent blank.
- S = Systematic analytical difficulties/biases.

UNITS:

- ug/L = Micrograms per liter.
- mg/L = Milligrams per liter.
- METHOD 8010, 8020 = ug/L
- METHODS 6010, 7060, 7470, 7740, 7421, 7740 = mg/L

WELL IDENTIFICATION:

- EC = Extraction Well Composite.
- EC-1 is a composite of EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87.
- EW = Extraction Well.
- MW = Monitoring Well.
- OW = Observation Well.

NOTES:

- AL = Cal/EPA Dept. of Toxic Substances Control Action Level.
- GC = Gas Chromatography.
- GC/MS = Gas Chromatography/Mass Spectrometry.
- MCL = Cal/EPA Dept. of Toxic Substances Control Maximum Contaminant Level.
- PMCL = U.S. Environmental Protection Agency Primary Maximum Contaminant Level.
- QA/QC = Quality Assurance/Quality Control.

TABLE 5 (Continued)

FOOTNOTES AND ABBREVIATIONS

DATAFLAGS:

- C = Confirmed on second column.
- P = Previously confirmed on second column or by GC/MS.
- Z = Inorganic Methods - Analyte is found in the associated blank, but the sample results are not corrected for the amount in the blank.
- @ = Reported value is less than five times the reporting limit.
- G = Primary and second column results differ by more than a factor of three times for method SW8010 and two times for method SW8020.

FIELD DUPLICATE ANALYSIS:

- FD = Field duplicate.

LAB:

- RAS = Radian Analytical Services, Austin

MAXIMUM CONTAMINANT LEVEL/ACTION LEVEL:

- AL = Cal/EPA Dept. of Toxic Substances Control Action Level.
- MCL = Cal/EPA Dept. of Toxic Substances Control Maximum Contaminant Level.
- PMCL = U.S. Environmental Protection Agency Primary Maximum Contaminant Level.

WELL IDENTIFICATION:

- EC = Extraction Well Composite.
- EC-1 is a composite of EW-73, EW-83, EW-84, EW-85, EW-86, and EW-87.
- EW = Extraction Well.
- MW = Monitoring Well.
- OW = Observation Well (Residential Well).

QUALIFIED RESULTS:

- G = Second column result used as primary result due to coelution/interferences.
- M = Qualified as inaccurate due to matrix, surrogate, or analytical spike recoveries outside the control limits.
- PF = Qualified as estimated due to high total variability as measured by field duplicates.
- R = Detected in reagent blank.
- PLM = Qualified as estimated due to potential interferences from other elements and lack of confirmation by atomic absorption methods.

UNITS:

- METHODS 8010, 8020 = ug/L.
- METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
- MCL/AL FOR METHODS 8010, 8020 = ug/L.
- MCL/AL FOR METHODS 6010, 7060, 7421, 7470, 7740 = mg/L.
- mg/L = milligrams per liter.
- ug/L = micrograms per liter.

		Antimony	R	Detected in reagent blank
MW-157	8010	Trichloroethene, Tetrachloroethene	PF	High RPD between field duplicates

(Continued)

TABLE 9. (Continued)

Sample Number	U.S. EPA Method	Analyte(s)	Type of Qualifications	Reason
MW-163	6010	Antimony	O	Detected in equipment blank
		Antimony	R	Detected in reagent blank
		Copper	R	Detected in reagent blank
		Lead	O	Detected in equipment blank
MW-181	6010	Antimony	R	Detected in reagent blank
		Copper	R	Detected in reagent blank
		Mercury	M	Low MS recovery
MW-183	6010	Antimony	R	Detected in reagent blank
MW-219	6010	Arsenic	R	Detected in reagent blank
MW-1000	6010	Aluminum	PF	High RPD between field duplicates
		Thallium	R	Detected in reagent blank
MW-1020	6010	Antimony	R	Detected in reagent blank
MW-1026	6010	Selenium	R	Detected in reagent blank
MW-1042	6010	Antimony	R	Detected in reagent blank
MW-1044	7060	Arsenic, Aluminum, Antimony, Barium, Chromium, Cobalt, Copper, Iron, Manganese, Molybdenum, Nickel, Vanadium	PF	High RPD between field duplicates
	6010			
MW-1045 (FD)	8010	All	G	Use second column as primary result
MW-1049	6010	Zinc	R	Detected in reagent blank
MW-1064	6010	Chromium	M	High MS recovery
All Method 7740 Results	7740	Selenium	S	Systematic low bias based on low MS recoveries

EC = Extraction composite.

EW = Extraction well.

G = Second column result used as primary result due to coelution/matrix interferences on first column analysis.

M = Qualified as inaccurate due to matrix or surrogate spike recoveries outside the control limits.

MW = Monitoring well.

MS/MSD = Matrix spike/matrix spike duplicate.

O = Detected in blank other than reagent blank.

PL = Qualified as estimated due to high total variability, as measured by laboratory duplicates.

PF = Qualified as estimated due to high total variability, as measured by field duplicates.

R = Detected in reagent blank.

RPD = Relative percent difference.

S = Qualified as estimated due to systematic matrix interferences.

U.S. EPA = United States Environmental Protection Agency.
