13. ABSTRACT (Maximum 200 words)

The technical manual (Volume 1) and the codebooks published as Volumes 2 to 5 provide information on the Longitudinal Research on Officer Careers (LROC) Survey conducted annually from 1988 through 1992. Approximately 5,000 company-grade officers commissioned from 1980 through 1990 responded to each survey; a total of 928 officers responded to all four surveys. The technical manual provides the sampling plan and tables on the population, sample, respondents, and response rates, as well as a description of the survey and databases. The codebooks provide descriptive statistics for each question in the survey, the survey booklet, and a cross-reference of questions across the 4 years.

The technical manual is Research Product 93-10, Longitudinal Research on Officer Careers: Volume 1. Technical Manual for 1988-1992 Surveys.

In addition to this volume, codebooks are as follows: Research Note 93-21A, Longitudinal Research on Officer Careers: Volume 2. FOREWORD

The Leadership and Organizational Change Technical Area (LOCTA) of the Manpower and Personnel Research Division, U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) conducts research on leadership, personnel, and organizational change. As part of this program, longitudinal research has been conducted on the attitudes, career experiences, and career decisions of company-grade officers in the U.S. Army. The major component of this research has been an annual survey that was administered from 1988 through 1992.

This survey, the Longitudinal Research on Officer Careers (LROC) Survey, focused on personal, family, and career issues, including questions on demographics, command assignments, career development and support, mentors, career orientations and intentions, job satisfaction, Army life expectations, Army versus civilian life, and spouse/family issues.

The LROC database contains data files for each year of the survey with approximately 5,000 respondents for each year. A total of 928 officers have responded to all 4 years of the survey and constitute the longitudinal respondents. Respondents are company-grade officers commissioned from 1980 through 1990. Research Product 93-10 describes the database and provides descriptive statistics for each year of the project.

The 4-year period of the LROC Survey has been a period of major change for the Army. Troops were deployed for Operation Desert Shield/Storm, and Congress mandated significant reductions in the size of the force. The data from the LROC Survey provide a unique opportunity to examine changes in the attitudes, career experiences, and perceptions of officers who have been in the Army during this time of change. In keeping with the mission of LOCTA, this information can also inform policymakers on the factors influencing officer career decisions, retention, and recruitment. Results from the LROC Surveys have been briefed to a number of Directorates and Commands throughout the Army since 1989. Information on the 4-year trends was briefed to the Chief of Staff, U.S. Army, early in 1993.

LONGITUDINAL RESEARCH ON OFFICER CAREERS:
VOLUME 3. CODEBOOK FOR THE 1989 SURVEY

EXECUTIVE SUMMARY

Requirement:

The Longitudinal Research on Officer Careers (LROC) tracks the changes in attitudes and career experiences of company-grade officers over time; identifies the individual, organizational, psychosocial, and family factors that influence officer career decisions; and investigates the effects of policy change and world events on the attitudes and career decisions of officers.

Procedure:

In the fall/winter of each year, beginning in 1988, the LROC Survey was mailed to a stratified random sample of company-grade officers commissioned from 1980 through the year preceding the survey year. The sampling plan called for stratification by gender, source of commission, and year of commissioning. Survey content centered on the attitudes, career experiences, satisfaction, and family experiences of officers from commissioning through mid-career (approximately 10 years). To obtain the maximum number of longitudinal respondents, officers were kept in the sample and resurveyed every year of the research unless they left the Army.

Findings:

The LROC survey databases contain the results of the 1988, 1989, 1990, and 1992 surveys. Approximately 5,000 officers responded each year. Response rates were 63% for 1988; 51% for 1989; 52% for 1990; and 47% for 1992. Overall, the respondents are fairly representative of the total population of company-grade officers. However, some subgroups are underrepresented. Tables included in the technical manual, Volume 1, provide information to guide researchers when subgroup analyses are of interest. Volumes 2 to 5, codebooks for each survey, provide the questions, variable names, response labels and codes, and descriptive statistics for the 1988-1992 databases, respectively. Volumes 2 to 5 also include a cross-reference of survey questions over the 4 years.

Utilization of Findings:

The LROC database provides a longitudinal tracking of Army officers over a crucial 4-year period. Beginning in 1989, results of the LROC surveys have been briefed to Army policy-makers providing information on branching issues; the impact of downsizing on the attitudes, career experiences, and career intentions of officers; and on attitudes about women in combat, to name a few. Combined with other personnel and survey databases, the LROC data provide a unique opportunity to investigate the actual trends and changes in attitudes over this 4-year period of change in the world and in the U.S. Army.

COVER LETTER AND 1989 SURVEY BOOKLET

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
OFFICE OF THE DEPUTY CHIEF OF STAFF FOR PERSONNEL
WASHINGTON, D.C. 20310

December 7, 1989

Dear Fellow Officer:

You have been selected to participate in the 1989 Longitudinal Research on Officer Careers (LROC) Survey, which is enclosed. This survey is similar to the 1988 LROC Survey which was distributed last year as part of an Army long-term research project. If you participated in the 1988 survey, you will notice that we have changed some parts of the questionnaire. The changes were in response to suggestions made by respondents and to build upon the findings of the research.

This research is important to the Army because it helps provide insights into officers' attitudes about Army life and Army policies. This information is used to guide decisions about personnel policies and programs affecting all officers. Therefore, your candid, thoughtful responses are appreciated. The confidentiality of your responses will be protected.

Your participation is very important to me. I urge you to complete the questionnaire and return it quickly. Even if you receive it after PCS, please send in your responses as soon as possible. Your input will become part of this project which is designed to extend over several years.

The last page of the questionnaire is open for your comments on special issues or suggestions about the research. In fact, thirty-five percent of the officers who responded in 1988 provided comments in this section. I assure you that they are being taken very seriously.

Your cooperation and support is valuable to this research.

Sincerely,

A handwritten signature in black ink, appearing to read "Allen K. Ono", is written above the typed name.

Allen K. Ono
Lieutenant General, U.S. Army
Deputy Chief of Staff for
Personnel

LAST NAME, FIRST NAME

**1989 SURVEY:
LONGITUDINAL RESEARCH ON OFFICER CAREERS
(LROC)**

The U.S. Army Research Institute (ARI) is requesting Army officers to provide information on issues pertaining to their careers and their families. The data obtained will help policy planners improve the preparation, performance, and management of officers. The 1989 LROC survey is part of a long-term research project extending over several years. Therefore, as a member of our target sample, you should receive follow-up surveys so that we can examine changes in the officer corps over time.

PRIVACY ACT STATEMENT

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information collected.

The Department of the Army may collect the information requested in this survey under the authority of 10 United States Code 137. Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in this survey will be used solely for research purposes. Social Security Numbers and names are requested only for tracking and control purposes.

Your responses will be held in strict confidence. No one outside the research team will have access to individual data.

VIII. ECONOMIC ISSUES

In this section we ask about fringe benefits, money, work time and other jobs you may have. Some of these questions may be different from the kind you have encountered in previous surveys. We appreciate your cooperation in providing this information.

A. Fringe Benefits

Below you are asked to evaluate four fringe benefits in two dimensions: money and time. The situations that are proposed to you here are purely hypothetical. The Army is not considering eliminating these benefits. However, your realistic response will help us to assess the relative importance of the different benefits in a precise way and will hopefully aid the Army in planning their benefits package.

Please indicate below how much money per month (in dollars) you would be willing to pay out of your current income for each of the following benefits if they were not already provided by the Army. Note that we are not asking you to guess the actual price of these benefits; rather, we want to know how you feel about them personally.

(Consider each benefit separately and enter "000" if a benefit is not worth any money to you.)

Benefit

Now we would like you to consider these benefits again. Only this time, please indicate below how much they are worth in terms of your time. That is, if these benefits were not already provided by the Army, how much longer per week would you be willing to work above and beyond your usual weekly hours (without additional pay) in order to get them?

(Consider each benefit separately and enter "0000" if a benefit is not worth working longer for.)
