INSTRUCTION SHEET FOR HEALTH MANPOWER FORMATS

1. The health manpower report formats have been developed after a thorough review and discussion of each data element. Because of the automation used for this system, none of these data elements shall be changed during a data submission cycle. The only allowable addition to a format is in the "Other" category, when an item does not fit with the data elements already established. Data elements shall comply with DoD 5000.12-M (reference (c)).
2. The "As Of" date should be in the form of YYMMDD (reference data element DA-FA of reference (c)), and reflect the appropriate "Cutoff Date" in paragraph E.3.a.
3. When necessary, explanatory footnotes accompany formats to facilitate completion.
4. Formats 1 - 35 are for active duty military (officer and enlisted) and civilian personnel. Formats 36 - 51 are for reserve component personnel. Separate formats will be prepared and submitted for the Reserve and Guard and the Component indicated on each format.
5. For the purposes of this system, actual personnel inventories shall be reported in reserve component data; do not calculate and report anticipated mobilization yields.
6. To further delimit data elements, a glossary of terms and acronyms follows:
 - a. Administrative and Management Position. Physicians or dentists whose primary responsibilities are the administration or management of health care operations. Examples include commanders, deputy commanders, facility directors, HQ staff officers, major command surgeons, and corps surgeons.
 - b. AFHPSP. Armed Forces Health Professions Scholarship Program.
 - c. ANG. Air National Guard.
 - d. Applicants. The total number of applicants by specialty or corps; includes inter- and intra-Service transfers and recalls.
 - e. ARNG. Army National Guard.
 - f. Budget Authorization. The sum of "programmed manning" plus the "individuals account." Programmed manning consists of spaces in the programmed manpower structure officially authorized to be filled. The term "programmed manning" is synonymous with: Force Structure Allowance (Army), Distributable Billets (Navy), and Force Structure Authorizations (USAF). "Individuals account" includes transients, trainees, patients, prisoners, holdees, and students; personnel not filling programmed manpower structure spaces but required to maintain the programmed structure at 100 percent of programmed manning.

k. End Strength. The number of personnel actually assigned as of the last day of the reporting period.

Note 1. Report in this format only those individuals whose applications have completed the selection process; do not report applications still in process.

Note 2. Report applicants who were selected but could not enter active duty due to insufficient budget authorizations. These individuals are reported in the "No. of Applicants" and the "No. of Selectees" columns but are not reflected in the "No. Entered Active Duty" column. These individuals become "fiscal year carry-overs" and are also reported in the following fiscal year (see Note 3).

Note 3. Report fiscal year carry-overs as new applicants. A fiscal year carry-over is an individual who applied and was selected, but could not be entered onto active duty due to a lack of budget authorizations. Such applications are therefore carried over to the next fiscal year and entered on active duty if sufficient end strength exists. They therefore would be reported in the "Applicants," "Selectees," and "Entered Active Duty" columns.

² The number of civilian deferred GME-1 (Internship) graduates who continue immediately into civilian deferred residencies.

³ The number of physicians returning to GME training status after more than 1 but less than 3 years of Not-In-Training active duty status.

⁴ Total number of physicians eligible for residency training by virtue of completion of GME-1 (to include both categorical and transitional/flexible interns) for each accession (i.e., AFHPSP and other accessions) and education category shown in the format. The number should equal the number of trainees in the previous year's GME-1 program for each accession and education category, less any losses from those GME-1 programs.
