19. ABSTRACT (Continue on reverse if necessary and identify by block number) This report presents the estimation of case total limits for catastrophic re-insurance payments to be made to all thirty-seven Army Gateway catchment areas for Fiscal Year (FY) 1994. Case totals include both institutional and professional services CHAMPUS payments. FY 1993 data were used to derive the estimates. Catastrophic case cutoffs are listed in Table 1 as part of the report Summary. These cutoffs, when implemented by Health Services Command (HSC), will result in approximately 5% of each catchment area's total annual CHAMPUS budget being paid through catastrophic re-insurance. Appendix A lists the actual computation for each site and displays cutoffs associated with various percentages of the budget paid as re-insurance. Appendix B displays each catchment area's Privacy Act protected catastrophic cases which satisfied the cutoff criteria during FY 1993.

Executive Summary

This report presents the estimation of case total limits for catastrophic re-insurance payments to be made to all thirty-seven Army Gateway catchment areas for Fiscal Year (FY) 1994. The Health Service Command (HSC) program of catastrophic re-insurance began in FY 1992 for the initial thirteen Gateway sites only. The Tri-Service CHAMPUS Statistical Database (TCSD) Composite Institutional Record V2.0 database which includes both institutional and professional services CHAMPUS payments is used to derive case totals, utilizing FY 1993 data to obtain the estimates for this report. Catastrophic case cutoffs are listed in Table 1 as part of this report Summary. These cutoffs, when implemented by HSC, will result in approximately 5% of each catchment area's total annual CHAMPUS budget being paid through catastrophic re-insurance. Appendix A lists the actual computation for each site and displays cutoffs associated with various percentages of the budget paid as re-insurance. Appendix B displays each catchment area's Privacy Act protected catastrophic cases which satisfied the 5% cutoff criteria during FY 1993.

Appendix A (pp. A-1-37) lists the actual computation for each Gateway site and displays the cutoffs associated with various percentages of the budget paid as catastrophic re-insurance. For each catchment area, catastrophic cutoff amounts for hospitalization cases discharged in FY 1993 were compared to the actual grand total government payments processed for all CHAMPUS care provided in that catchment area during FY 1993. These overall CHAMPUS claims were extracted with claims paid through 31 December 1993 to obtain a more complete grand total based on FY 1993 date of care. From this comparison case cutoffs were derived for each catchment area (pp. A-1-37). Table 1 in this Summary (p. 3) lists each catchment area's computed catastrophic case cutoff amount at 5%, the total CHAMPUS costs in FY 1993, and the resulting catastrophic payment total at that percent. For example, as shown in Table 1, once a case reaches \$122,000 at Fort Hood, HSC would assume liability for all payments above that cutoff amount. Based on the hospital discharges occurring in FY 1993, that cutoff would have resulted in \$1,437,015 paid to Fort Hood through catastrophic re-insurance, assuming all care was actually paid in FY 1993.

Case limit amounts to be utilized during FY 1994 range from a low of \$13,500 at Fort Drum MEDDAC to a high of \$167,000 at Eisenhower AMC (p. 3, Table 1). At Fort Drum, thirty-four FY 1993 hospitalization cases (see pp. B-14-15), each with CHAMPUS costs over a \$13,500 case cutoff limit, had cost excesses that summed to \$496,028, or 5% of Fort Drum's nearly \$9.9M total annual FY 1993 CHAMPUS budget. On the other hand, Eisenhower AMC had four FY 1993 hospitalization patient cases (B-16) with total excess costs after cutoff amounting to \$485,070, or 5% of Eisenhower's total FY 1993 annual CHAMPUS costs of approximately

\$9.7M. This variance in computed catastrophic cutoff amounts between catchment areas is dependent on several factors besides the amount of a site's total annual CHAMPUS budget and the percentage of budget used for the cutoff. As shown above, a primary part of the computation is the catchment area's actual CHAMPUS patient caseload whose costs are used in the mathematical methodology deriving the various cutoff amounts.

For each catchment area, Appendix B (pp. B-1-50) displays the Privacy Act protected catastrophic patient cases which satisfied the cutoff criteria during the FY 1993 year. It should be noted that the methodology used hospital discharges which occurred in FY 1993 when computing catastrophic case cutoff limits. Examination of Appendix B will demonstrate that, at least for some of the longer hospital lengths of stay, not all of the hospitalization may have been paid, or even occurred during FY 1993. For purposes of cutoff computation, the total cost of each case was arbitrarily assumed to have been paid in the same fiscal year as the discharge, i.e. FY 1993. This assumption was employed to use a prevalence-based estimate to project catastrophic cases which would be expected to arise throughout a given budget year. In any year there will be hospitalizations which surpass the catastrophic limit which were admitted during the previous year, or discharged and partially paid during the following year, as well as hospitalizations which are admitted, discharged and paid for within the same year. As reported in the Executive Summary of the Health Services Command Publication Fiscal Year 1993 CHAMPUS Catastrophic Case Limits, Gateway Catchment Areas, RP 93-009, DTIC: AD A262 324, February 1993, it has been determined through testing with several Gateway catchment areas' data that the above methodology provides a very accurate estimate of future catastrophic re-insurance payments.

Technical Note. The following TCSDP data were utilized for report:

- A) Composite Institutional Record (CIR) V2.0
- B) Composite Professional Record (CPR) V1.0
- C) Main Relational Libraries V1.1
- D) TCSDP Indexing Logic Module #C5B1A94.
