**DEPARTMENT OF TRANSPORTATION
Federal Aviation Administration**

THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

APR 22 1994

The Honorable Thomas S. Foley
Speaker of the House of
Representatives
Washington, DC 20515

Dear Mr. Speaker:

Enclosed is the U.S. Department of Transportation's Twelfth Annual Report of Accomplishments Under the Airport Improvement Program for Fiscal Year 1993. The report, as required by Section 521 of the Airport and Airway Improvement Act of 1982, discusses airport development accomplishments, the status of each project undertaken, the allocation of appropriations, and an itemized statement of expenditures and receipts.

An identical report has also been sent to the President of the Senate.

Sincerely,

Federico Peña

Enclosure

THE SECRETARY OF TRANSPORTATION
WASHINGTON, D.C. 20590

APR 21 1994

The Honorable Albert Gore, Jr.
President of the Senate
Washington, DC 20510

Dear Mr. President:

Enclosed is the U.S. Department of Transportation's Twelfth Annual Report of Accomplishments Under the Airport Improvement Program for Fiscal Year 1993. The report, as required by Section 521 of the Airport and Airway Improvement Act of 1982, discusses airport development accomplishments, the status of each project undertaken, the allocation of appropriations, and an itemized statement of expenditures and receipts.

An identical report has also been sent to the Speaker of the House of Representatives.

Sincerely,

Federico Peña

Enclosure

FOREWORD

This annual report of the Airport Improvement Program (AIP) for the fiscal year (FY) ending September 30, 1993, is the 12th report of activity required by the Airport and Airway Improvement Act of 1982, as amended.

In FY 1993, new AIP grants and amendments to previous grants totaled \$1,875.2 million. The 1,434 new grants amounted to \$1,829.8 million and were issued for use to the types of airports, integrated airport system planning, and state block programs as follows:

<u>Airport Type</u>	<u>Grants</u>	<u>Amount</u>
Primary Airports	719	\$1,298.7M
Smaller Commercial Airports	72	41.2M
Reliever Airports	163	180.2M
Other General Aviation Airports	406	201.0M
Integrated Airport System Planning	65	10.7M
State Block Grant Pilot Program	9	98.0M

During the 12 years of AIP, 14,215 grants were issued totaling \$14.418 billion. Charts I and II show, by airport category, the number of grants issued and funds provided, respectively. Chart III shows the kinds of airport development and associated AIP funds.

The Airport and Airway Safety, Capacity, Noise Improvement, and Intermodal Transportation Act of 1992 authorized the extension of AIP at a funding level of \$2.05 billion through FY 1993. This Act included provisions resulting in a number of changes in AIP. The primary changes include the expanded eligibility of items under the Military Airport Program; eligibility for the relocation of air traffic control towers and navigational aids (including radar) if they impede other projects funded under the AIP; the eligibility of land, paving, drainage, aircraft deicing equipment, and structures for centralized aircraft deicing areas; and projects to comply with the Americans with Disabilities Act of 1990, Clean Air Act, and Federal Water Pollution Control Act. The Act also increases from three to seven the number of states which may participate in the State Block Grant Program and extends the program through FY 1996.

TWELFTH ANNUAL REPORT OF ACCOMPLISHMENTS UNDER THE
AIRPORT IMPROVEMENT PROGRAM

Section 521 of the Airport and Airway Improvement Act of 1982, as amended, requires the Secretary of Transportation to submit an annual report to Congress describing the accomplishments of the airport grant program. This report covers activities for the fiscal year ending September 30, 1993.

BACKGROUND

The Federal Government initiated a grants-in-aid program shortly after the end of World War II to promote the development of a system of airports to meet the Nation's needs. This early program, the Federal-aid Airport Program (FAAP), was established with the passage of the Federal Airport Act of 1946 and funded from the general fund of the Treasury.

A more comprehensive program was established with the passage of the Airport and Airway Development Act of 1970. This Act provided for grant assistance for airport planning under the Planning Grant Program (PGP) and for airport development under the Airport Development Aid Program (ADAP). The source of funds for these programs was a new Airport and Airway Trust Fund, into which revenues were deposited from several aviation user taxes on such items as airline fares, air freight, and aviation gasoline. The Act, after several amendments and a 1-year extension, expired on September 30, 1981.

The successor grant program, AIP, was established by the Airport and Airway Improvement Act of 1982 (Title V of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248, September 3, 1982). It provided assistance under a single program for airport planning and development through funding from the Airport and Airway Trust Fund. The 1982 Act also contained a provision to make funds available for noise compatibility planning and to carry out noise compatibility programs as authorized by the Aviation Safety and Noise Abatement Act of 1979 (Public Law 96-193).

The Airport and Airway Improvement Act has been amended several times. For instance, the Continuing Appropriations Act (Public Law 97-276, October 2, 1982) added a section providing authority to issue discretionary grants in lieu of unused apportioned funds under certain circumstances and the Surface Transportation Assistance Act (STAA) (Public Law 97-424, January 6, 1983) increased the annual authorizations for AIP for FY 1983-FY 1985.

A 1987 amendment, the Airport and Airway Safety and Capacity Expansion Act of 1987 (Public Law 100-223, December 30, 1987), extended the authority for AIP for 5 years. It authorized \$1.7 billion each fiscal year through 1990 and \$1.8 billion each year for FY 1991 and FY 1992. This amendment also authorized a new procedure in which a sponsor is advised of Federal intentions to fund long-term, high-priority capacity projects as appropriations allow and to reimburse sponsors for certain specified work performed before a grant is received. This procedure is implemented through a Letter of Intent issued to sponsors. Other provisions of the 1987 amendment authorized a three-State Block Grant Pilot Program during FY 1990 and FY 1991 and established a requirement that not less than 10 percent of the funds made available under AIP shall be expended with small business concerns owned and controlled by socially and economically disadvantaged individuals, known as the Disadvantaged Business Enterprise Program.

The Aviation Safety and Capacity Expansion Act of 1990 (Public Law 101-508, November 8, 1990) authorized a Passenger Facility Charge (PFC) Program to provide funds to finance airport-related projects that preserve or enhance safety, capacity, or security; reduce noise from an airport that is part of such system; or furnish opportunities for enhanced competition between or among air carriers by local imposition of a charge per enplaned passenger. This Act also established a Military Airport Program for current and former military airfields, which will help improve the capacity of the national transportation system by enhancement of airport and air traffic control systems in major metropolitan areas. Further, the Act extended the State Block Grant Pilot Program through FY 1992. It also increased the authorization for FY 1992 to \$1.9 billion.

The Airport and Airway Improvement Act also requires the Secretary of Transportation to publish a national plan for the development of public-use airports in the United States. This biennial plan is titled the National Plan of Integrated Airport Systems (NPIAS). NPIAS emphasizes system planning and development to meet current and future needs and includes development considered necessary to provide a safe, efficient, and integrated airport system meeting the needs of civil aviation, national defense, and the postal service. An airport must be included in this plan in order to be eligible to receive a grant under AIP. The latest edition of NPIAS covering 1990-1999 was transmitted to Congress on March 4, 1991. The current plan includes a total of 3,692 airports: 3,285 existing airports (396 primary, 172 commercial service, 285 reliever, and 2,432 general aviation) and 407 new airports.

Chart IV depicts the various functions legislated by the three major grant program authorization Acts since 1946: FAAP, ADAP, and AIP.

POLICY

In formulating the Airport and Airway Improvement Act, Congress included a "Declaration of Policy" section. The following statements highlight major considerations:

- The safe operation of the airport and airway system will continue to be the highest aviation priority.
- The continuation of airport and airway improvement programs and more effective management and utilization of the Nation's airports are required to meet the current and projected growth of aviation and the requirements of interstate commerce, the postal service, and the national defense.
- The Act should be administered in a manner to provide adequate navigation aids and airport facilities, including reliever airports and heliports, for points where scheduled commercial air service is provided.
- The Act should be administered in a manner consistent with a comprehensive airspace system plan to maximize the use of safety facilities with highest priority for commercial service airports. The goal is to install, operate, and maintain a precision approach system, a vertical visual guidance system, and a full approach light system for each primary runway; grooving or friction treatment of all primary and secondary runways; a nonprecision instrument approach for all secondary runways; runway end identifier lights on all runways that do not have an approach light system; electronic or visual vertical guidance on all runways; distance-to-go signs for each primary and secondary runway; a surface movement radar system at each Category III airport; a taxiway lighting and sign system; runway edge lighting and marking; and radar approach coverage for all airport terminal areas. (Note: The Facilities and Equipment Appropriation provides funding for items meeting published establishment criteria that are not included in airport development grants.)
- The Act should be administered in a manner consistent with the Federal Aviation Act of 1958 with due regard for the goals expressed therein of fostering competition, preventing unfair competition in air transportation, maintaining essential air transportation, and preventing unjust and discriminatory practices.

- Special emphasis should be given to reliever airports and their development.
- Development of cargo hub airports should be facilitated because of their critical role in the movement of commerce through the airport and airway system.
- Aviation facilities should be constructed and operated with due regard to minimizing current and projected noise impacts on nearby communities.
- The Federal administrative requirements placed upon airport sponsors can be reduced and simplified through the use of a single project application to cover all airport improvement projects to be undertaken in a particular year.
- It is in the national interest to develop in metropolitan areas an integrated system of airports designed to provide expeditious access and maximum safety.
- Airport construction and improvement projects which increase the capacity of facilities to accommodate passenger and cargo traffic, thereby increasing safety and efficiency and reducing delays, should be undertaken to the maximum feasible extent.
- It is in the national interest to ensure that nonaviation use of navigable airspace be accommodated but not allowed to decrease the safety and capacity of the airspace and airport system.
- Artificial restrictions on airport capacity are not in the public interest and should not be imposed to alleviate air traffic delays unless other reasonably available and less burdensome alternatives have first been attempted.

AIRPORT IMPROVEMENT PROGRAM

The Airport and Airway Improvement Act of 1982 authorized the Secretary of Transportation to make grants for airport planning and development under the Airport Improvement Program.

Annual Authorization

Authorization levels as of the end of FY 1993 for the program are as follows:

<u>Fiscal Year</u>	<u>Authorization Levels</u>
1982	\$450,000,000
1983*	800,000,000
1984*	993,500,000
1985*	987,000,000
1986	1,017,000,000
1987**	1,017,200,000
1988**	1,700,000,000
1989**	1,700,000,000
1990	1,700,000,000
1991**	1,800,000,000
1992	1,900,000,000
1993	<u>1,800,000,000</u>
Total	\$15,864,700,000

Airport Categories

The statutory definition of an airport is any area of land or water used for landing or takeoff of aircraft and includes, within the five categories of airports listed below, special types of facilities such as seaplane bases and heliports.

The airport funding categories consist of commercial service, primary, cargo service, reliever, and general aviation airports and are defined as follows:

- A commercial service airport is a public airport which enplanes 2,500 or more passengers annually and receives scheduled passenger service.
- A primary airport is a commercial service airport which enplanes more than 10,000 passengers annually.
- A cargo service airport is an airport which is served by aircraft providing air transportation of property only (including mail) with an aggregate aircraft landed weight in excess of 100 million pounds.

* The annual authorizations included \$200 million for FY 1983 and FY 1984 and \$75 million for FY 1985 as authorized in STAA.

** Rescissions in contract authority which reduce the amounts shown include \$148 million in FY 1987, \$12 million in FY 1988, \$100 million in FY 1989, and \$200 million in FY 1991.

- A reliever airport is one that has been designated to relieve congestion at large commercial service airports and provide alternative general aviation access to the overall community.
- General aviation airports, although not specifically defined in the 1982 Act, comprise the largest single group of airports in the U.S. airport system. These are the airports that remain after exclusion of the commercial service and primary airport categories.

Distribution of Funds

Not more than 44 percent of the annual amount authorized to be obligated may be provided as entitlement to primary and cargo service airports. These funds were apportioned in FY 1993 as follows:

Primary Airports

- \$7.80 for each of the first 50,000 enplaned passengers
- \$5.20 for each of the next 50,000 enplaned passengers
- \$2.60 for each of the next 400,000 enplaned passengers
- \$0.65 for each passenger in excess of 500,000 enplaned passengers

In FY 1993, there were 424 primary airports, and no primary airport received less than \$400,000 or more than \$22 million.

Cargo Service Airports

For FY 1993, 84 airports qualified as cargo service airports. No cargo service airport can lawfully receive more than 8 percent of the total amount of money available for cargo service airports. This money remains available for the sponsor's use for the fiscal year in which it is authorized and for the two fiscal years immediately following.

States/Insular Areas

A total of 12 percent of the annual authorization was apportioned for use within the states and insular areas. The eligible general aviation and reliever airports within the 50 States, the District of Columbia, and Puerto Rico, qualified for 99 percent of the 12-percent annual authorization, while airports in the insular areas (Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands) qualified for the remaining 1 percent. Funds apportioned to the States and insular areas remain available for the fiscal year in which they were authorized and for the two fiscal years immediately following.

Alaska

Alaskan airports received at least the amount they were apportioned in FY 1980 under previous grants legislation. This totaled an additional \$10.6 million in FY 1993.

Discretionary Funds

The remaining funds are defined as discretionary, but a sizable portion of these funds is used to achieve specified funding minimums. A minimum of 10 percent of all funds is used for reliever airports, 2.5 percent is used for nonprimary commercial service airports, 12.5 percent is reserved for planning and implementing noise compatibility programs under the Aviation Safety and Noise Abatement Act of 1979, 0.5 percent is used for the preparation of integrated airport system plans, and 2.25 percent is used for the Military Airport Program. Of the remaining discretionary funds, 75 percent is to be used for preserving and enhancing capacity, safety, security, and carrying out noise compatibility planning and programs at primary and reliever airports. The remaining 25 percent is to be used for any eligible project at any airport.

Rate of Participation

With certain exceptions, the Federal share at all airports is 90 percent of the total allowable project cost. At primary airports, which annually enplane 0.25 percent or more of the total number of passengers enplaned at all airports (1,221,663 or more enplanements for FY 1993), the Federal share is 75 percent. In addition, there are upward adjustments for projects in States containing high percentages of public lands. Grants for integrated airport system planning are funded at a 90-percent level. Projects to implement noise compatibility projects, as authorized by the Aviation Safety and Noise Abatement Act, are funded at an 80-percent level at the largest airports and at a 90-percent level at the remaining airports. For eligible areas of terminal development at large, medium, and small hub airports, the Federal share may not exceed 75 percent; at nonhub and nonprimary commercial service airports, the Federal share may not exceed 85 percent; and at Military Airport Program locations, the Federal share may not exceed 90 percent.

Environmental Considerations

The Federal Aviation Administration (FAA) considers and weighs environmental factors, as well as safety and economics, when evaluating proposed Federal actions related to airports. FAA airports program procedures identify types of actions which require an environmental assessment and consultation process. This process provides FAA, other agencies, and members of the public with an understanding of the potential environmental

impacts of a proposed action. Section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) requires an environmental impact statement when an action would produce a significant impact on the environment; otherwise, a finding of no significant impact may be prepared. Other laws have particular requirements relative to specialized concerns such as air quality, water quality, public recreational lands, historic and archeological sites, endangered species, coastal zones, wetlands, floodplains, and noise.

Initial review of proposed Federal airport actions identifies the extent of environmental analysis and coordination required. If an action is not in a category requiring environmental assessment and does not have the potential, either individually or through cumulative effects, of significantly affecting the environment, it is categorically excluded from environmental processing. As experience was gained in the environmental field, FAA procedures categorically excluded more types of development projects from environmental processing. FAA's most recent airport environmental procedures have been in existence since 1985 and have proven to be reliable, detailed guidance for assessing airport development projects. In addition, FAA provides ongoing supplemental guidance to its field counterparts as revised regulations are issued by other Federal agencies. These include recent regulatory actions related to stormwater management, wetlands, and air quality.

FAA's assistance to airport sponsors in identifying environmental requirements varies with the scope and nature of the proposed Federal actions. For the new Denver International Airport to replace Stapleton International, FAA established an environmental review team to ensure timely review and completion of environmental documentation. FAA has established review teams for environmental analyses at other locations. This team approach is highly successful and will continue.

Noise Compatibility

In FY 1992, the FAA began administering new Federal Aviation Regulations (FAR) Part 161, which was issued September 25, 1991. Part 161 implements provisions of the Airport Noise and Capacity Act of 1990 (ANCA) by establishing a national program for reviewing airport noise and access restrictions on Stage 2 and Stage 3 aircraft operations. Part 161 also advises airport operators on how to apply ANCA and Part 161 to the existing Part 150 airport noise compatibility planning process. The FAA is continuing its streamlining effort for Part 150 to improve its effectiveness into the next century. The revised rule will take into account the effect on the noise environment of ANCA's phaseout of Stage 2 aircraft by the year 2000. During FY 1993, FAA found 22 noise exposure maps in compliance with Part 150 and approved 22 noise compatibility programs (NCP) submitted by

airport operators. The FAA is funding a larger number of NCP's that are updates to previously approved programs that have been implemented.

Civil Rights Requirements

In connection with the acceptance of Federal assistance under AIP, an airport sponsor is required to satisfy certain civil rights requirements. During FY 1993, FAA regional civil rights staffs completed five application reviews and one post-award review for compliance with Title VI of the Civil Rights Act of 1964.

Civil rights staffs approved 925 Disadvantaged Business Enterprise (DBE) Programs and annual updates required by regulations of the Office of the Secretary of Transportation under 49 CFR Part 23.

During FY 1993, 7 formal complaints were filed under the DBE regulations, 6 were filed under Title VI, and 2 Section 30 complaints were received. Section 30 refers to a provision of the Airport and Airway Development Act, retained in its entirety as Section 520 of the Airport and Airway Improvement Act, which obligates the Secretary to take affirmative action to ensure that various protected classes are not excluded from participating in activities funded through AIP grants.

Passenger Facility Charge Program

The Passenger Facility Charge (PFC) Program, authorized by the Aviation Safety and Capacity Expansion Act of 1990, provides a source of additional capital funding for expansion of the national air transportation system. In FY 1993, FAA approved 96 new locations to collect PFC's. As of September 1993, authorized PFC collection for the 144 approved locations totalled over \$8.2 billion.

This program requires that AIP funds apportioned to a large or medium hub airport be reduced if a PFC is imposed at that airport. This reduction takes place in the fiscal year following the approval of authority for PFC collections at that airport and continues in each succeeding fiscal year in which PFC is imposed. The apportionment is reduced by 50 percent of the forecast PFC revenue, but not to exceed 50 percent of the earned apportionments for that fiscal year. Such reductions occurred for the first time in FY 1993 for 35 large and medium hubs that received PFC approvals in FY 1992.

These foregone apportionments are distributed within the AIP program as follows:

- a) 25 percent to the AIP discretionary fund; and
- b) 75 percent to the "small airport fund."

Of the 25 percent distributed to the discretionary fund, half of the amount (one-eighth of the total) must be spent at small hub airports.

Of the 75 percent distributed to the "small airport fund," one-third (one quarter of the total) will be distributed to general aviation (including reliever) airports. The remaining two-thirds (one half of the total) will be distributed to nonhub commercial service airports.

As a result of these distributions, AIP funds of \$7.0 million, \$28.0 million, and \$13.9 million went to small hub, nonhub, and noncommercial service airports, respectively.

State Block Grant Pilot Program

The State Block Grant Pilot Program, authorized by the 1987, 1990, and 1992 amendments to the Airport and Airway Improvement Act, has been implemented by Part 156 of the FAR.

Under this regulation, states assume responsibility for administration of AIP grants at other than primary airports. This program became effective October 1, 1989, and has been extended for the three original States (Illinois, Missouri, and North Carolina) through September 30, 1996. The 1992 amendment to the Act authorized the issuance of block grants for fiscal years 1993 through 1996 in four additional States selected by FAA (Michigan, New Jersey, Texas, and Wisconsin).

These 7 States will administer funding of nonprimary commercial service, reliever, and general aviation airports. Each State is responsible for determining which locations will receive funds within the State and for ongoing project administration. A total of \$98.0 million was granted to the 7 States in FY 1993 as follows: Illinois, \$24.0 million; Michigan, \$18.0 million; Missouri, \$14.5 million; New Jersey, \$3.4 million; North Carolina, \$14.6 million; Texas, \$15.2 million; and Wisconsin, \$8.3 million. Included in the State of Missouri total is \$1.5 million to relieve damage caused by the summer floods.

Military Airport Program

The Military Airport Program was authorized under Section 9109 of the Aviation Safety and Capacity Expansion Act of 1990 and requires the Secretary to designate up to 12 current or former

military airports which can improve the capacity of the national air transportation system. The Act also specifies that no less than 2.25 percent in FY 1993 and 2.5 percent in FY 1994 and FY 1995 of available AIP funds be set aside for the designated airports.

A total of \$40.5 million of discretionary funds was available and obligated at 11 designated current and former military airfields in FY 1993. The locations and discretionary amounts granted to these airports were: \$4.0 million each to Stewart International Airport, Newburgh, New York, Lincoln Municipal Airport, Lincoln, Nebraska, and Manchester Airport, Manchester, New Hampshire; \$5.0 million to Scott Air Force Base, Belleville, Illinois; \$3.0 million to Pease Air Force Base, Portsmouth, New Hampshire; over \$3.2 to Myrtle Beach Air Force Base, Myrtle Beach, South Carolina; \$2.5 to Smyrna Airport, Smyrna, Tennessee; \$4.1 to Albuquerque International Airport, Albuquerque, New Mexico; over \$1.3 to Ellington Field, Houston, Texas; \$2.7 to Laredo International Airport, Laredo, Texas; and over \$6.7 million to Guam International Airport, Agana, Guam. All of these airports will help improve the capacity of the national air transportation system by enhancing airport and air traffic control system capacity in their respective metropolitan areas, as well as reducing current and projected flight delays. The projects approved for these airports included land acquisition; security improvements; runway, apron, and taxiway construction and improvements; and lighting and terminal development.

The airports designated shall remain eligible to participate in the program for five fiscal years following their designation except that an airport which does not attain a level of enplaned passengers during a five-fiscal-year period, which qualifies it as a small hub airport or a reliever airport, may be redesignated for additional fiscal years.

Major Capacity Project Grants

During FY 1993, \$300.3 million of discretionary funds was obligated for capacity projects. This included support for runways, taxiways, and terminal complex expansions at many airports. Among these were grants to begin construction of new runways at Indianapolis International, Indianapolis, Indiana; Detroit Metropolitan, Detroit, Michigan; Salt Lake City International, Salt Lake City, Utah; major renovations to Washington National Airport, the continued development of the new Denver Airport and the phased development of major construction work started in the last fiscal year. Over \$4.4 million in discretionary funds is included for installing or improving airport security systems.

Other major capacity projects supported with Letters of Intent (LOI) were issued to the following airports during FY 1993:

Sacramento Metropolitan, Sacramento, California
Steamboat Springs-Bob Adams Field, Steamboat Springs, Colorado
Daytona Beach Regional, Daytona Beach, Florida
Key West International, Key West, Florida
Panama City-Bay County International, Panama City, Florida
William B. Hartsfield-Atlanta International, Atlanta, Georgia
Columbus Triangle Regional, Columbus, Mississippi
Albuquerque International, Albuquerque, New Mexico
Piedmont Triad International, Greensboro, North Carolina
Chess-Lamberton/Franklin Field, Franklin, Pennsylvania
Florence Regional, Florence, South Carolina
Hilton Head, HiltonHead Island, South Carolina
Memphis International, Memphis, Tennessee
Nashville International, Nashville, Tennessee
Miller International, McAllen, Texas

Under an LOI, the sponsor may proceed with a project and receive reimbursement in future years as funds become available. By the end of FY 1993, there were 40 outstanding LOI's.

FY 1993 Planning and Development Activity

In FY 1993, gross AIP obligations amounted to \$1,875.2 million, of which \$1,829.8 million was for 1,434 new grant agreements and \$45.4 million for increases in existing grant agreements. Funds recovered from adjustments to prior year projects were also available.

The new grants included 719 for a total of \$1,298.7 million for primary airports; 72 for \$41.2 million for other commercial service airports; 163 for \$180.2 million for reliever airports; 406 for \$201.0 million for general aviation airports; 65 for \$10.7 million for integrated airport system planning; and \$98.0 million for the 9 state block grants.

Included in these grant agreements (1,434 for \$1,829.8 million) was \$257.6 million for 109 grants to achieve noise compatibility. This amount included \$146.1 million for the purchase of noise-impacted land adjacent to airports, \$74.2 million for soundproofing residences and schools, and \$37.3 million for other efforts to reduce noise.

Ignaluk, Alaska, and Stafford, Virginia, received grants totaling over \$6.4 million to start construction of or to acquire land for new airports. Assistance to help acquire the following airports totaled over \$2.8 million: Huntsville, Huntsville North Airport, Alabama, and Erie, Tri-County Airport, Colorado.

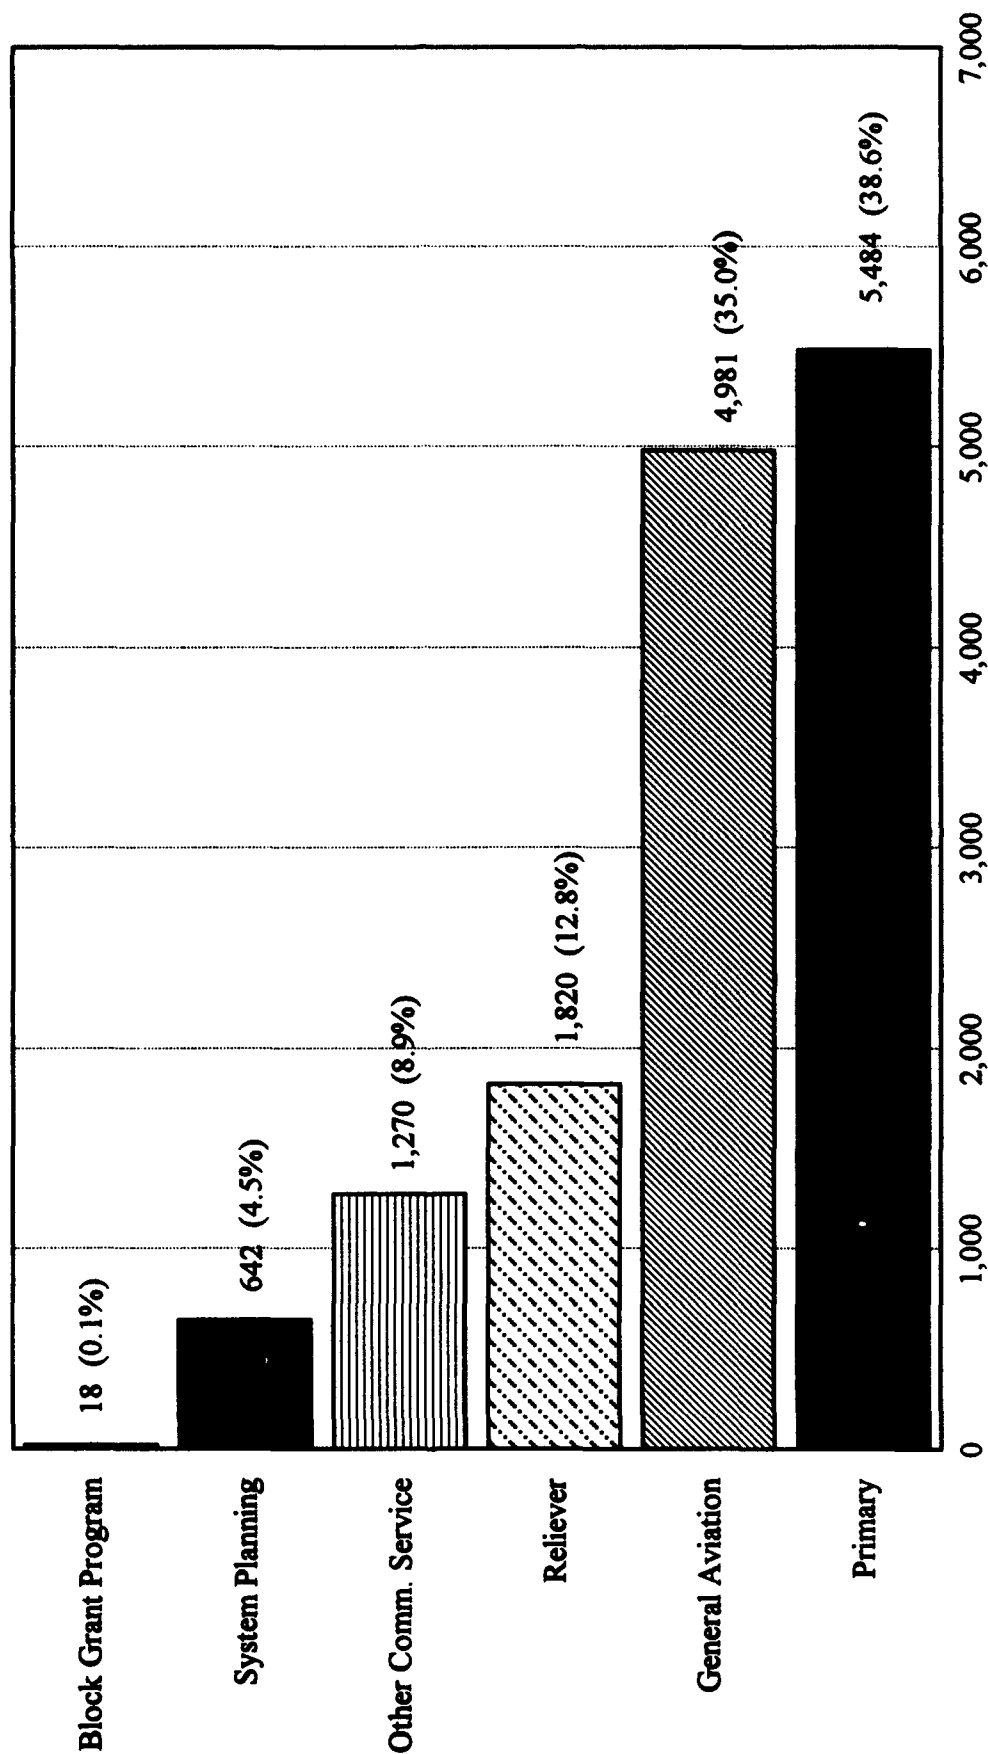

Charts V and VI on the following pages show the FY 1993 and prior years' authorization and appropriation limitations. Listings of FY 1993 funding by State and location are shown in Tables I and II, respectively.

CHART I

AIRPORT IMPROVEMENT PROGRAM

Number of Grants Issued By Airport Category

Fiscal Years 1982 - 1993

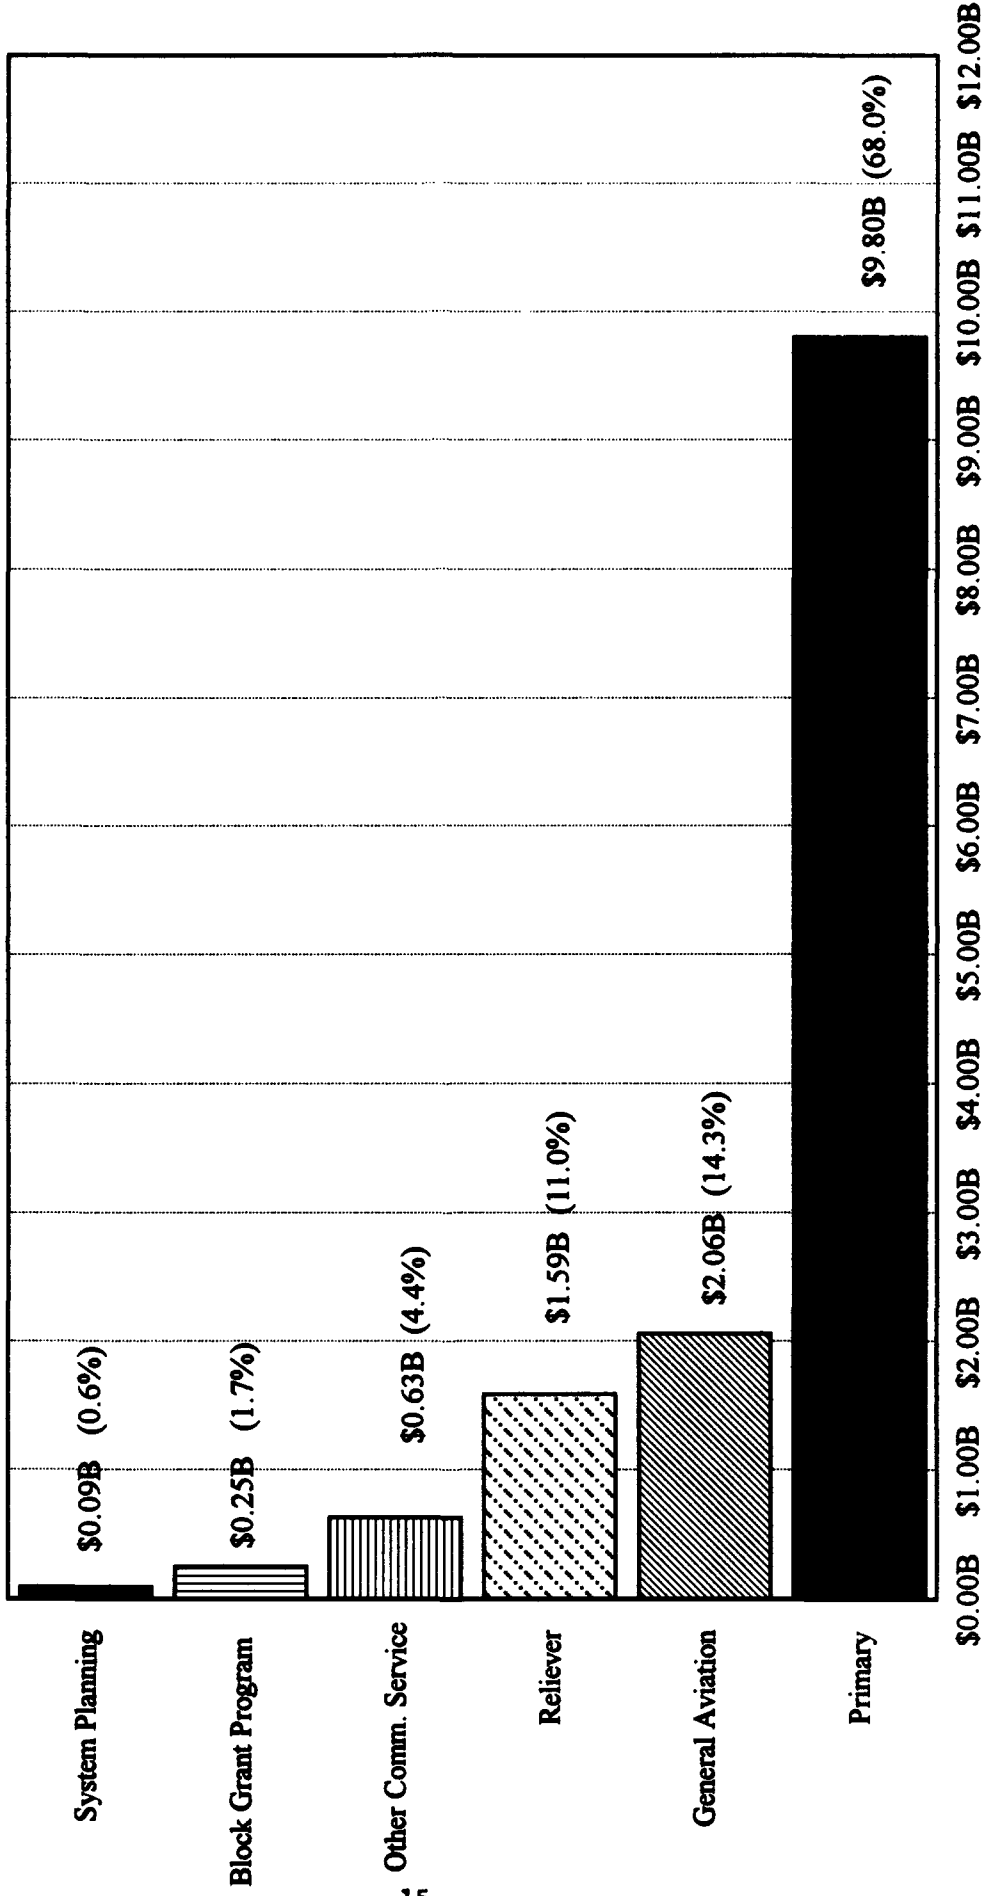

Total Number of Grants Issued - 14,215

1989	\$1700.0	\$1430.4	\$1279.3	1258
1990	\$1700.0	\$1453.1	\$1284.5	1152
1991	\$1800.0	\$1835.7	\$1670.3	1404
1992	\$1900.0	\$1954.5	\$1765.0	1507
1993	\$1800.0	\$1875.2	\$1829.8	1434

1/Authorizations column. Increases of \$200.0 million each in FYs 1983 and 1984 and \$75.0 million in FY 1985, authorized by the STAA of 1982.

2/Appropriations Act column. FY 1983 includes basic authorization of \$600.0 million and \$150.0 million of the \$200.0 million authorized by STAA and appropriated under the Emergency Jobs Bill (Public Law 98-8) and \$54.5 million of unrequested entitlements carried over from prior years; FY 1984 includes basic authorization of \$793.5 million and \$6.5 million authorized under the STAA; FY 1986 authorization of \$925.0 million was reduced to \$885.2 million as a result of P.L. 99-177, Balanced Budget and Emergency Deficit Control Act; FY 1987 includes basic authorization of \$1,000.0 million and \$25.0 million supplemental appropriation, P.L. 100-71, July 1987.

3/Gross obligation column. Gross obligations include current year funds plus reobligations of funds recovered from adjustments to prior year projects. Difference between yearly gross obligations and new grants are increases to existing agreements.

4/Includes ADAP entitlements that were authorized to be continued under the Airport Improvement Program (AIP). FY 1982 data do not include an FY 1982 grant to Reno, Nevada (Cannon International), for \$5.1 million funded with FY 1982 monies authorized prior to approval of the AIP.

5/ADAP reobligations. Not included in above figures are reobligated funds recovered from adjustments to obligations made under the ADAP program authorized from FY 1970-1981. Legislation allowed use of recovered ADAP funds for ADAP grant adjustments up to a maximum of 10 percent of the original grant amount. For each FY from 1982 through 1993, the reobligations have been \$7.1, \$6.7, \$7.1, \$5.2, \$4.0, \$6.7, \$2.7, \$3.1, \$1.1, \$.4, \$.2, and \$.1 million, respectively.
