FOREWORD

Selected Manpower Statistics is published by the Office of the Secretary of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (WHS/DIOR). The report provides basic manpower data on active duty military, civilian, retired, and reserve military personnel of the Department of Defense (DoD). It is divided into the following sections:

- Section I - Total DoD Personnel
- Section II - Active Duty Military Personnel
- Section III - Civilian Personnel
- Section IV - Other Personnel
- Section V - Reserve Personnel

Each section has a short narrative with a general description of the contents and selected highlights, including increases/decreases from the prior fiscal year (FY) and general trends.

Although the focus of this publication is on summary data for DoD as a whole, many tables provide associated data for the Army, Navy, Marine Corps, Air Force, and other DoD Components.

NOTE: Excluded from all total DoD strength figures are those full-time military personnel who are paid from other than active duty military personnel appropriations. This group is funded from appropriations for reserve components and Corps of Engineers civil functions. During FY 1993, the number was approximately 67,850.

General

Within the Department of Defense (DoD), personnel strength is considered to be the sum of active duty military and civilian personnel. (See the Glossary of Terms.) This section provides an overview of DoD manpower levels as of September 30, 1993, and presents personnel data by organizational component (Army, Navy, Air Force, etc.), location of personnel, and/or function (military or civilian). Complete data on the total number and percent distribution of active duty military and direct hire civilian DoD personnel, by state, are provided. Historical data on trends in DoD personnel strength are also provided.

Highlights

Table 1-1 shows the active duty military personnel strength as 1,705,103 for September 30, 1993. This figure is down 102,074 from the comparable FY 1992 figure. Total DoD civilian employment (direct and indirect hire) is 972,838, which is down 70,629 from the FY 1992 figure of 1,043,467.

SECTION II - Active Duty Military Personnel

General

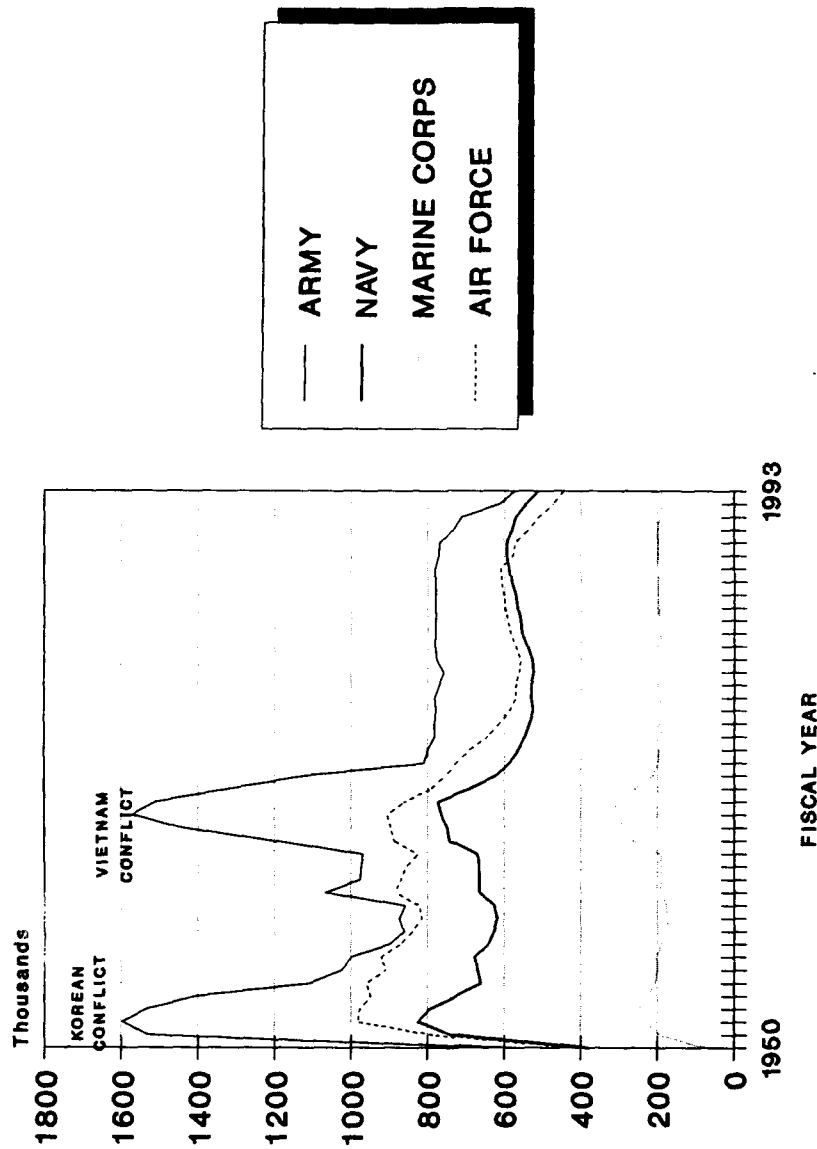

This section contains a variety of data on active duty military personnel. Data are provided for FY 1993 by service, type of personnel (officers, enlisted, or officer candidates), location, and/or pay grade. Extensive historical data are provided in several areas, including trends in military personnel strength, enlistment and reenlistment trends, the age distribution, and the estimated educational levels of active duty military personnel. Other tables provide data on the number of active duty female personnel and the number of military dependents. Statistics on the number of personnel serving in, and the number of casualties resulting from, major armed conflicts in which the United States has been engaged are also provided.

The particular conditions and/or limitations affecting the data in each table are explained in historical notes, as applicable.

Highlights

As of September 30, 1993, there were 1,705,103 active duty military personnel. This is a decrease of 102,074 (16,758 officers; 84,913 enlisted; and 403 cadets and midshipmen) from the FY 1992 figure. The "U.S., Territories, and Special Locations" region accounted for 66,029 of the total force reduction. For the last five years, the officer/enlisted ratio has been between 5.6 and 6.0. The largest decrease of officer personnel was in the Captain-Lieutenant category, while the largest decrease among enlisted personnel was in pay grade E-4. The number of female officers, cadets, and enlisted personnel showed a decrease of 6,542 from the FY 1992 figure, but the percentage of female active duty military personnel actually rose from 11.6 to 11.9%.

TABLE 2-11

DEPARTMENT OF DEFENSE HISTORICAL BACKGROUND AND NOTES

1. Officers include warrant officers, field clerks, and nurses. Enlisted personnel include cadets and midshipmen from the U.S. military academies at West Point, Annapolis, and Colorado Springs, as well as other officer candidates. Both officer and enlisted personnel data exclude figures on the Coast Guard.
2. Data for the year shown are as of June 30 beginning with 1878 for Army, 1900 for Navy, and 1798 for Marine Corps. For prior years, the as of date is the month for which records most completely reveal the total strengths of each Service. In some instances, incremental reports of different dates had to be used to compile a service total, with the result that the strength shown is not for any particular point in time during that year. Data subsequent to 1976 are as of September 30.
3. Army data begin with 1789, the year in which the Department of War (now Department of the Army) was established by the new U.S. Congress. Although a "regular" Army has existed continuously since that time, the total strengths cannot be documented from available records, nor can reliable estimates be made for years 1790-1793 and 1796-1800. Beginning with 1861, the data include all military personnel on extended active duty with the Army (regulars, volunteers, militia, inductees, reserves and National Guardsmen) and U.S. Military Academy cadets. Data prior to 1861 are for regular Army and cadets only, except for 1836-1840 (Seminole Indian War) and 1846-1848 (War with Mexico). Source documents for other years do not contain adequate strength statistics on nonregular personnel called up during the War of 1812 or for short periods of service during the numerous Indian disturbances. Army data also include strengths of the Army Air Corps and predecessor agencies.
4. Navy strengths for the period 1794-1798 are estimates of the number of "on board" personnel authorized by the U.S. Congress to reestablish a Navy which had existed from 1775 to 1785 under the Continental Congress. A separate Navy Department was authorized and organized in 1798. During the early years of the Navy, crews were usually contracted for a specific sailing or mission rather than a continuous tour of duty. The strengths shown are more in the nature of an average and are, therefore, marked "estimated." Data excluded an unknown number of Naval militia, supplied by the states, who served during the War of 1812, the Mexican War, and the Spanish-American War.
5. Marine Corps strengths as shown begin in 1798, the year in which the Navy Department and Marine Corps were authorized by an Act of Congress. The Marine Corps was founded in 1775 by the Continental Congress and served during the Revolutionary War, but ceased to exist in 1783. The Marines were reestablished in 1794 when Congress authorized the rebuilding of the Navy. A small number of Marines were used as guards on Navy ships. However, records do not reveal reliable strength data before 1798.

TABLE 2-23
DEPARTMENT OF DEFENSE
HISTORICAL BACKGROUND AND NOTES (P28.2)

- A. Data prior to World War I are based on incomplete records in many cases. Casualty data are confined to dead and wounded and, therefore, exclude personnel captured or missing in action who were subsequently returned to military control.
- B. Marine Corps data for World War II, the Spanish-American War, and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds.
- C. Not known, but estimates range from 184,000 to 250,000.
- D. As reported by the Commissioner of Pensions in his annual report for fiscal year 1903.
- E. Authoritative statistics for the Confederate forces are not available. Estimates of the number who served range from 600,000 to 1,500,000. The final report of the Provost Marshal General, 1863-1866, indicated 133,821 Confederate deaths (74,524 battle and 59,297 other) based upon incomplete returns. In addition, an estimated 26,000 to 31,000 Confederate personnel died in Union prisons.
- F. Number serving covers the period April 21 to August 13, 1898, while dead and wounded data are for the period May 1 to August 31, 1898. Active hostilities ceased on August 13, 1898, but ratifications of the Treaty of Peace were not exchanged between the United States and Spain until April 11, 1899.
- G. Includes air service. Battle deaths and wounds not mortal include casualties suffered by American forces in northern Russia to August 25, 1919, and in Siberia to April 1, 1920. Other deaths cover the period April 1, 1917, to December 31, 1918.
- H. Data are for the period December 1, 1941, through December 31, 1946, when hostilities were officially terminated by Presidential Proclamation, but few battle deaths or wounds not mortal were incurred after the Japanese acceptance of the Allied peace terms on August 14, 1945. Number serving from December 1, 1941, through August 31, 1945, were: Total - 14,903,213; Army - 10,420,000; Navy - 3,883,520; and Marine Corps - 599,693.
- I. Includes Army air forces.

- J. Battle deaths and wounds not mortal include casualties incurred in October 1941 due to hostile action.
- K. Tentative final data based upon information available as of September 30, 1954, at which time 24 persons were still carried as missing in action.
- L. As reported in Battle Casualties and Medical Statistics: U.S. Army Experience in the Korean War by Frank Reister, published by the Surgeon General of Department of the Army in 1973. This figure represents nonbattle admissions in Korea and includes deaths resulting from injuries, suicides, homicides, and disease.
- M. Number serving covers the period August 4, 1964, through January 27, 1973, (date of cease-fire). Wounds not mortal exclude 150,332 persons not requiring hospital care. Known status of casualties is as of September 30, 1993.

SECTION III
Civilian Personnel

SECTION III - CIVILIAN PERSONNEL

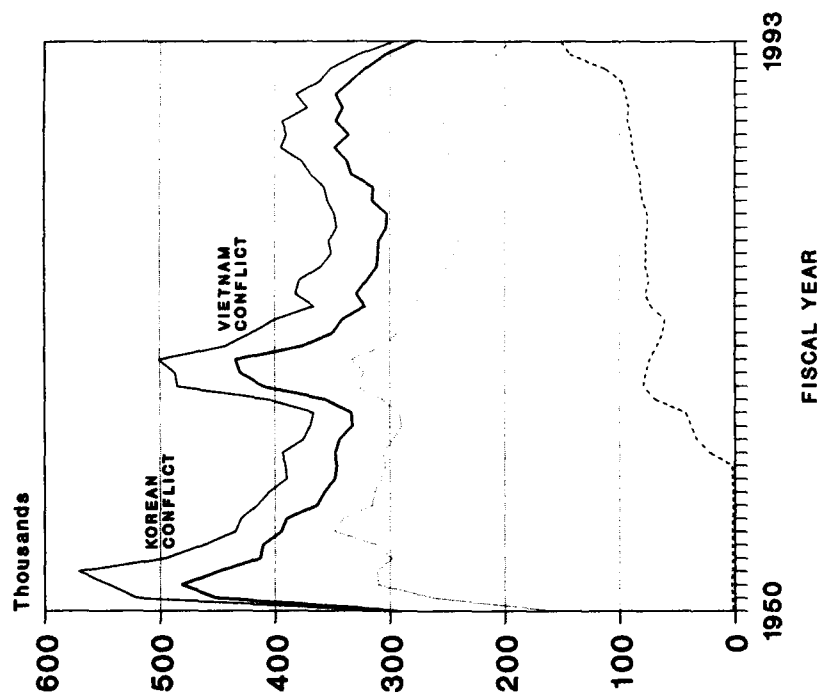

General

Civilian personnel statistics in this section present personnel in the following categories: direct or indirect hires; those supporting military or civil functions; and those subject to Office of Management and Budget (OMB) ceiling control and those exempt from ceilings. (See the Glossary of Terms.) Data are provided which show the worldwide distribution of both direct and indirect hires. Additional tables display the data by location of personnel (region, area, and/or country) and by organizational component (Army, Navy, Air Force, or other DoD organizations). Data on trends in annual accession and separation rates are also provided.

Highlights

As can be seen in Table 3-3, the total Department of Defense (DoD) civilian workforce subject to OMB ceiling decreased by 68,273 in FY 1993. The number of direct hire civilian personnel decreased by 59,239, while the number of indirect hires decreased by 9,034, all of whom were foreign nationals. Among the Military Departments, the Army (including civil functions) reported the largest decrease in civilian personnel (39,598), followed by the Navy (23,556), and then the Air Force (12,805). The civilian workforce for other DoD organizations continued a recent trend of increase by 7,686 during FY 1993.

Data are provided on the geographic distribution of dependents by region and country and on trends in military retirements. (Data on the geographic distribution of dependents living in Alaska, Hawaii, and the U.S. territories exclude dependents of U.S. citizen civilian employees who are permanent residents of these areas and who are employed in the state or territory of their residence.)

Standby Reserve. The Standby Reserve consists of personnel who maintain their military affiliation without being in the Ready Reserve, who have been designated as key civilian employees, or who have a temporary hardship or disability. The Standby Reserve is a pool of trained individuals who could be mobilized if necessary to fill manpower needs in specific skills.
